2-1176

Twin Vintage Limiting Amplifier

- ◆ Sound and features of the original 1176LN
- ◆ Classic custom 1176LN output transformers
- ◆ Stereo or dual mono operation
- ◆ Independent compression/gain in dual mono mode
- ◆ Matched FETs and output transformers

“The 2-1176 was used on every song on Norah's new record; recording and mixing.”

Jay Newland – Etta James, Norah Jones, Charlie Haden & Pat Metheny, etc.

The 2-1176 is built from UA's hugely successful 6176 Channel Strip and combines two 1176 channels from that unit. The 2-1176 can be two mono channels or one stereo unit, with no calibration ever needed. Rather than being a clone of the original, the 2-1176 utilizes new components such modern caps and resistors, but maintains the critical tone shaping elements: the same Class A circuit, the Bill Putnam Sr. designed output transformer and the FET transistor. The transformers and FETs are also stereo matched for improved stereo imaging.

**Is there any piece of equipment in your studio
that is more than 20 years old
and still the best?**

**The DPA 4006
is still the best microphone in its class.**

In 1982, the 4006 was designed by Ole Brøsted Sørensen, then a design engineer at Brüel & Kjaer, now the Technical Director and Co-owner of DPA Microphones.

The omnidirectional condenser in its distinctive slim black livery was the first studio microphone to be released by B&K, the first model in the celebrated 4000 Series. The technical innovation of the 4006, giving precise performance and natural-sounding clarity in a mic of outstanding stability in any recording environment, has kept it a favorite among professional audio engineers.

Information Is Power

Communication is a vital part of any industry. Information is power. And in the fast-paced world of pro audio—which seems to be ruled by the classic “Time = Money” equation—having access to a fingertip source of information can save you time *and* money.

Mix magazine was founded in 1977 from a need to provide information for studios, musicians, engineers, producers and other audio professionals. First appearing as a directory of recording studios and services in the San Francisco Bay Area, the concept expanded to include the studios of Los Angeles, and later Nashville, New York and the rest of the country. Eventually *Mix* widened its scope, adding interviews with key industry figures, articles on audio production techniques, new products, and directories of essential audio services, such as audio for video/film, live sound, remote recording, mastering/replication and audio schools. Along the way, the *Mix Master Directory* was conceived as an annual, convenient, single-volume reference filled with resource data for audio pros.

Today, it's hard to imagine life without cell phones, Wi-Fi communications, FedEx, console automation and DAWs with unlimited undo commands. But just as in that pre-CD/pre-MTV/pre-MP3 world of 1977 when *Mix* began, the need for solid, reliable information remains essential. Certainly, the Internet offers a vast array of data, but if you're searching for CD pressing services, a hot New York tracking room, a studio designer/acoustician or engineers/producers in your area, the *Mix Master Directory* provides the data you need at a glance—without getting snared in a Web engine that spits out 325,000 entries when you search for “studio.”

We think you'll find the 2005 *Mix Master Directory* an essential part of your business, whether you're contacting major or indie record labels, live sound companies, duplicators or recording studios. And e-mail mmd@primediabusiness.com or give us a call at 800/344-LIST if you'd like to be included in next year's *Mix Master Directory*.

We'll be listening.

BIAS, founded in 1994 as Berkley Integrated Audio Software Inc, is dedicated to crafting powerful, innovative tools for audio, video, and film professionals, as well as musicians, composers, multimedia developers, and internet authors.

◀ *I carve MP3s every week with Peak for mix approvals.*

I send them out and have people listen to and make essential suggestions. They can tell me what they like and don't like and then I spot assemble a new sequence and cut it from wherever I am in the world, even on an airplane. In the studio, if somebody wants to hear something right away, I just make the changes, post it, and boom, it's done.

The newly founded US-based company is determined to re-define the meaning of quality in pro-audio through a subjective as well as objective, "Golden-ear"-driven R&D process spearheaded by Andrew Lipinski. Mission I: The Loudspeakers, debuted at the 2003 AES, are super-linear surround monitoring solutions for varying room sizes. Mission II: The Microphone Pre-amp, debuted at the 2004 AES in San Francisco and Lynn Fuston's mic-pre shoolout DVD, is a four-way gain adjustment microphone preamplifier with two different kinds of input transformers, each having a switchable turn ratio. Mission I Quotes: "The 707's sound is in the same league as that of the best loudspeakers I've ever heard, including Egglestons, Wilson Watt/Puppies and Dunlavy SCS's." - Bob Katz, Digital Domain; "If more engineers were using monitors like these there might be a lot less abuse inflicted on poor defenseless audio." - Alan Silverman, Arf! The "VDX BOX" is a combination compressor, microphone preamplifier, 33 frequency Pultec style equalizer, de-esser and limiter based on several of Manley's legendary tube designs including the 40dB Microphone Preamplifier, the Electro-Optical Limiter, and the All Tube Mid Frequency Equalizer. It elegantly combines these with a shorter audio path and more processing power than the individual units. Features include, a variable attack/release opto-compressor located

before the mic preamp (I). Instrument and line inputs, VU meter, high-pass filters, phase and phantom switches. While designed for vocals, the "VDX BOX" is well-suited for drums, guitars, synths and bass. The "Variable MUAE™ Compressor Limiter" today is widely recognized as the best all purpose compressor available. It has that very rare quality of making a source immediately sound better. No audible squashing, pumping, distortion or frequency emphasis. It accomplishes this feat using an all-tube differential circuit in some ways similar to the old Fairchild compressors. It features individual attack, release, threshold, output controls, a useful dual input control and two hardware bypass, and compress/limit switches and link switch. The vast majority of recent hit records have been mixed and/or mastered through a Manley Variable MUAE Compressor Limiter. Marian Digital Audio Electronics; 1155 N. La Brea Ave., W. The music comes first, not the clock, nor the fee. Engineers who don't "fix it in the mix" because they care and get it tracked right. Outstanding clarity in your headphone mix. Outstanding clarity in your final mixes. Great drum sound, perfect vocal mixes, solid bass, horn and guitar sound you name it we get it right. Located on 3.5 acre county site, large array of vintage guitars, amps, and more. You can have fun recording; it happens, and it happens here.

We have the only Neve 88R between the coasts (5.1 on-board compressor) Sluder Gold tape machines, top outboard gear, beautiful instruments, and incredible classic microphones - paired with Protools HD-3 (72 tracks). Live recordings are also an option in our ballroom. Hotel, restaurant, deli, bar and condos right in our historic building make arrangements simple. Our client lounge has wireless internet, big-screen TV, kitchenette, and bath with shower. Chief Engineer Tim Andersen has 15 years experience in L.A., earning him gold and platinum albums, and working with artists as diverse as House of Pain and Shaquille O'Neal. Palmyra Studios (nestled in the countryside 25 miles south of Dallas) was built and designed from the property's original 1903 farmhouse. The control room is solid 1", 100-year-old cedar. The sound and feel of the old wood, coupled with our 1969 Abbey Road Class A Neve 8038, and Studer A800's, give Palmyra Studios an amazingly distinctive sound. Add 65 acres of privacy, and an occasional pooch resting on the surrounding decks, and you have what we feel is one of the most creative environments ever built for the recording process. For 8 years, we have been one of the best kept secrets in Texas.

Arf! Digital is about great sound. In addition to major label and audiophile label work, we also provide the highest class of mastering to indie producers. Recent releases include Chaka Khan, Norah Jones, Cheap Trick, The Kinks, and Bebo Valdes (five-time 2004 Latin Grammy Nominee.) Dur SACD series of classic Kinks albums have earned rave reviews in the music and audiophile press. The gear is second to none and our clients say the same about our work.

Wallmate is a wall-mounted PVC extrusion that aligns, stretches and tensions user-supplied fabric to walls in sound studios, theaters, ballrooms, meeting rooms, multimedia centers or anywhere walls require acoustical treatment. Wallmate is most effective to install since specifiers use their own fabric and labor resources. No staples or welding are required. Edges are clean and finished. Installation provides maximum flexibility in case of dirt, damage or change in décor. Fabric is removable and replaceable. Sold direct by manufacturer.
