## Lose the paper.

Music flows. Or at least it should. But taking your hands off your instrument to turn the page can really mess things up. Touch the screen of MusicPad Pro® Plus or tap the optional foot pedal and hands-free page turning becomes a reality.

Now thousands of sheets of music can fit into one lightweight "book" with pages that never tear, fall out or blow away in the wind. Download music from [freehandmusic.com](http://freehandmusic.com), scan paper scores or import music from all the popular music and graphics programs directly into this user-friendly, 12.1-inch tablet-sized digital music notebook and you'll never again have to sort through stacks of paper to find the right chart.

Compose or make rehearsal notations right on the page of music and then store, change or delete your marks as needed — without losing your original score. PC and Mac compatible, the unit comes loaded with software to help you organize your music and your thoughts. Plus, the Premium Tools upgrade includes wireless networking capability, as well as a pitch pipe, metronome and MP3 player.

**Never miss a note.**

## Welcome to the 2007 Mix Master Directory

**M**ix magazine was founded 30 years ago from a need to provide information for studios, musicians, engineers, producers and other audio professionals. First appearing as a directory of recording studios and services in the San Francisco Bay Area, the concept expanded to include the studios of Los Angeles, and later Nashville, New York and the rest of the country.

Eventually, *Mix* widened its coverage, adding interviews with key industry figures, articles on audio production techniques, new products and directories of essential audio services, such as audio for video/film, live sound, remote recording, mastering/replication and audio schools. Along the way, the *Mix Master Directory* was conceived as an annual, convenient, single-volume reference filled with resource data for audio pros.

Technologically, we're a long way from 1977, and it's hard to imagine life without cell phones, laptops, fax machines, e-mail, Internet, FedEx, DAWs and terabyte storage systems. But today, just as in that pre-CD/pre-MTV/pre-DVD/pre-MP3 world when *Mix* began, the need for solid, reliable information is paramount. Certainly, today's Internet offers a vast array of data, but if you're searching for CD pressing services, a hot tracking room in Nashville, a studio designer/acoustician or engineer/producers in your area, the *Mix Master Directory* provides the data you need—fast and at a glance—without getting bogged down in a Web engine that spits out 325,000 entries when you search for "studio."

Communication is a vital part of any industry. We think you'll find the 2007 *Mix Master Directory* an essential part of your business, whether you're contacting record labels, touring companies or recording studios. After three decades of serving audio professionals, we thank you for your support. If you have comments or suggestions, visit us at [www.mixonline.com](http://www.mixonline.com) or drop us a note at [mixeditorial@mixonline.com](mailto:mixeditorial@mixonline.com).

We'll be listening.

MIX<sup>®</sup> MAGAZINE IS AFFILIATED WITH

**a classic,  
reborn.**

Presenting the **m801**, the proud successor to the celebrated model 801 microphone preamplifier.

The new m801 delivers unmatched audio performance – with vast headroom and ultra-wide bandwidth that contribute to a markedly open, musical character. The m801 will effortlessly resolve even the lowest level ambient information, resulting in a sonic picture of astonishing clarity and detail, which serves to capture **the essential character of the music being recorded.**

The signal path has been hot-rodded to be fully balanced from start to finish, resulting in a wider dynamic range. While new higher-current output drivers enable even longer cable runs without signal loss. Each channel has a dedicated ribbon microphone switch, which shifts the gain range up 10dB while deactivating 48V phantom power, optimizing input impedance and bypassing the decoupling capacitors. And we've added an additional set of 8 channel balanced outputs for sending signals to a secondary recorder, workstation or console.

While its predecessor now takes its place in pro audio history, the new m801 faithfully furthers the tradition of breathtaking audio performance and perfect reliability in a beautiful, functional 8 channel package.

A small high-tech R&D-driven company geared toward the development of standard-setting studio monitoring products. Always seeking to push the envelope, we've recently released a revolutionary new line of third-generation high-resolution control room amplifiers to power our near-field PRM 165 passive reference monitor, MRM 250 mastering reference monitor and the High-Output Series, HOS 115 modular main mono. Fully differential from input to output with no global feedback and utilizing a split-dual toroidal power supply, our radical new design approach taking full advantage of extraordinary advancements in intelligent output device technology has enabled us to lower distortion in the critical mid- and high frequencies more than a level of magnitude over typical designs, yielding immediately apparent dramatic improvements in clarity, definition and musicality. In addition, these new intelligent output devices provide a previously unobtainable level of stability and reliability as a result of their internal self-biasing and self-protecting nature.

With four of the most accurate studio monitors ever offered the professional recording community, the nearfield PRM 165 passive reference monitor, the midfield ARM 265 active reference monitor, the MRM 250 mastering reference monitor and the High Output Series HOS 115 modular main monitor, as well as the acknowledged SPL champion SD 312/SB 412 combination and the ASB and HOS series subwoofers, we have produced a remarkably diverse line with each speaker designed from the ground up for its specific application. Characterized by extremely low distortion, exceptional transient and phase accuracy, ruler-flat high frequency response and "no hype" extended low end, translation between models is guaranteed, regardless of size differentials, and fatigue is non-existent. Providing systems with near-perfect time alignment, some ranging up to twelve and a half octaves, and the largest even able to crack 150 dB if necessary, there's no application we can't tackle.

The newly founded company is determined to re-define the meaning of quality in pro-audio through a subjective as well as objective, "Golden-ear"-driven R&D process spearheaded by Andrew Lipinski. Mission I: The Loudspeakers, debuted at the 2003 AES, are super-linear surround monitoring solutions for varying room sizes. Mission II: The Microphone Pre-amp, debuted at the 2004 AES in San Francisco and Lynn Fuson's mic-pre shootout DVD, is a four-way gain adjustment microphone preamplifier with two different kinds of input transformers, each having a switchable turn ratio.

Mission I Quotes: "If more engineers were using monitors like these there might be a lot less abuse inflicted on poor defenseless audio." - Alan Silverman, *Art! Digital*. "The imaging and transient response are incredible - Roy Hendrickson, *Avatar Studios*

Mission II Quotes: "The L-408 is one of the finest clean-sounding mic preamps that I've ever encountered. The resolution and detail of the pres are amazing, especially in the bottom end. The L-409 is reminiscent of a vintage Class A mic preamp. Though it sounds like neither, its performance reminds me of falling somewhere between an API and a Neve 1081. In my mind, the optimum preamp palette would be a pair of each mounted in one of the 3RU rack units." - Russ Long, *Pro Audio Review*

The "VOX BOX" is a combination compressor, microphone preamplifier, 33 frequency Pultec-style EQ, de-esser and limiter based on several of Manley's legendary tube designs including the 40dB microphone preamplifier, the Electro-Optical Limiter and the All Tube Mid-Frequency Equalizer. It elegantly combines these with a shorter audio path and more processing power than the individual units. Features include a variable attack/release opto-compressor located before the mic preamp. Instrument and line inputs, VU meter, highpass filters, phase and phantom switches. While designed for vocals, the VOX BOX is well-suited for drums, guitars, synths and bass. The Variable MU® Compressor Limiter is widely recognized as the best all-purpose compressor available. No audible squashing, pumping, distortion or frequency emphasis. It accomplishes this feat using an all-tube differential circuit in some ways similar to the old Fairchild compressors. It features individual attack, release, threshold, output controls, a useful dual-input control and two hardware bypass, and compress/limit switches and link switch. The vast majority of recent hit records have been mixed and mastered through a Manley Variable MU Compressor Limiter.

Stabilant 22 is an Electronic Contact Enhancer. It ensures long-term connector reliability, conductivity, and performance by eliminating intermittent connections. Stabilant 22 is easy to apply and cost-effective. It is an active, resident treatment for assembling or servicing audio and video equipment. Stabilant 22 can substantially improve the quality of the sound or video by increasing the signal-to-noise ratio and reducing thin-film rectification effects. These can cause susceptibility to RF interference. Any reflections will cause ghosting that can degrade the signal quality. Remember that Stabilant 22 is effective from DC to several GHz.

# Introducing the **8PRE**

## Firewire audio interface for PC and Mac with 8 mic inputs

What's better than 2 or 4 mic inputs? How about 8 mic inputs in one rack space, complete with a five-segment level meter, phantom power switch, 20 dB pad switch and trim knob right on the front panel for each input. Now add two banks of ADAT optical digital I/O for eight more channels — even at 88.2 or 96 kHz. Top it off with main outputs and MIDI I/O, and you've got the 8PRE, a FireWire audio interface that turns your Mac or PC into a complete studio that can record your entire band. Already have an interface or mixer with optical connectors? Connect the 8PRE via ADAT optical to add 8 mic inputs to your existing rig and seamlessly integrate 8 more inputs into your current mixing environment.

### Two products in one

- Firewire audio interface for Mac & PC
- 8-channel mic input-to-optical converter
