## ANTIQUE RADIO CLASSIFIED

Antique Radio Classified (ISSN:8750-7471) is published monthly, 12 times per year, by John V. Terrey, 498-A Cross Street, P.O. Box 2, Carlisle, MA 01741. Periodicals postage paid at Carlisle, MA, and additional mailing offices. Telephone: (866) 371-0512, 9:00 AM to 5:00 PM ET weekdays; machine answers phone at other times.

Annual subscription rates within the U.S. are \$39.49 by Periodicals mail and \$57.95 by First Class mail.

Annual foreign rates. By air: Canada - \$61.00; Mexico - \$67.00; Other foreign countries - \$105.00. Surface mail: Canada - \$51.00; Other foreign countries - \$58.00. (Surface delivery to countries other than Canada may take two or more months and cannot be guaranteed.)

Two-year subscriptions are twice these rates and receive an extra month. Sample issues are available free on request.

© Copyright 2002 by John V. Terrey.

POSTMASTER: Send address changes to Antique Radio Classified, P.O. Box 2, Carlisle, MA 01741. Printed in U.S.A.

**PURPOSE.** Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

## STAFF:

**Publisher and Editor:** John V. Terrey  
**Assistant Publisher:** Cindie Bryan  
**Managing Editor:** Dorothy Schecter  
**Circulation Manager:** Tammy DeGray  
**Advertising Manager:** Cindie Bryan  
**Office Manager:** Tammy DeGray

**Founding Publisher/Editor:** Gary B. Schneider  
**Contributing Writers & Consultants:** Mike Adams, Richard L. Arnold, Richard Begbie, Ray Bintliff, Paul J. Bourbin, Norman Braithwaite, Dave Crocker, Dick Desjarlais, Alan Douglas, Richard Foster, Jim Kreuzer, Ron Ramirez, Gary Schneider, Daniel Schoo, Frank White, Ralph Williams, Walter Worth

**CONTACTING ANTIQUE RADIO CLASSIFIED.** All correspondence should be sent to:

A.R.C., P.O. Box 2, Carlisle, MA 01741.

Only UPS, FedEx, etc. items to street address: 498-A Cross Street.

Telephone: (866) 371-0512; Fax: (978) 371-7129

E-mail: [ARC@antiqueradio.com](mailto:ARC@antiqueradio.com)

Web: [www.antiqueradio.com](http://www.antiqueradio.com)

Please, no classified ads by telephone; thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

## EDITOR'S COMMENTS

The April issue with the promise of spring always heralds good times to come. Collectors come out of hibernation to gear up for the big radio events of summer and fall. But, here in the Northeast, hardy collectors begin early and may be excused for taking a moment to look back on a big winter event — Radio XXXIII. At the risk of gloating a bit, we're proud to say that this event highlights winter and really works for the 700 to 800 folks who attend.

Managing Editor Dorothy Schecter has written an account that conveys why even a non-collector like herself enjoys this event. All kinds of interesting people who might be potential collectors show up, and human interest stories abound. In fact, one of the unusual qualities of Radio XXXIII is that A.R.C. does extensive advertising to invite the general public. What a great way to foster interest in radio preservation!

The A.R.C. staff, and especially Office and Circulation Manager Tammy DeGray, spend many hours in early winter preparing for this event. The rewards are great — tables are sold out well in advance, and the feedback is overwhelmingly positive.

Perhaps the appeal of Radio XXXIII is due to our sticking to a tried and true plan. First, it is a 5-hour, indoor flea market in a pleasant facility, nothing more, nothing less. Unlike the major 3-day events, it has no frills — no auction, no banquet, no contest. Though tried in a small way in the past, these extras received little response. As a result, a "flea market it remains.

And since the bottom line for any annual event is consistent attendance, why change the plan? We suggest that every group sponsoring radio events find what works for its participants and not succumb to pressures to match what other clubs may be doing.

Speaking of change, Dave Gonshor's article on the Bristol Audiphone horn speakers brought to mind the old saying, "The more things change, the more they remain the same." Today's audiophiles might be struck by the similarity of the 1920s Bristol speakers to some high-end speakers of today, such as the Avantgarde-USA speakers, priced in the thousands. Though contemporary in style, the horns in these speakers still sit up there in full view like the Bristol models.

Follow-ups to A.R.C. articles are always welcome, especially when they tell us something new. New to us in Ken McGregor's article, inspired by Steve Auyer's earlier article on radio postcards, is the origin of some familiar old radio shows. One photo can trigger many memories and unearth even more information.

On the subject of information, we are constantly asked about where repairs can be done to old radios. One of our missions is to try to answer that question, and Christina Barnes' article on Victor Bang's shop in Tempe, Arizona, does that for folks in that area. Of special interest is how this story came to be written. Christina, a business broker and a non-collector, happened to talk with Victor about his business and found

his story worth telling.

*Photo Review* may give some of you a few chuckles. One "sef" inspires the question, "When is a Fada bullet Catalan not a Fada bullet Catalan?" And how about those "tube boxes made by a seed company?"

In his Zenith repair article, William Demetriou opens up a very interesting theme about which purists might feel uneasy — combine the parts of two sets in bad condition to make one good one. William operated on the same principle of car aficionados — buy two to make one. Few of us would recommend this technique for rare sets, but for a set of relatively modest value like this Zenith, it was a good choice.

In the same vein, Dale Davenport offers more restoration tips to add to his list in the June 2001 issue. Many of us are glad to know how to deal with those time-consuming handles, dials and knobs.

When we received *The Saga of Marconi Osram Valve* by Barry Vyse and George Jessop for review, we knew just the man to do it — Ludwell Sibley of the Tube Collectors Association. Lud tells us that this book, which is about Britain's Marconi-Osram Company, is "a significant addition to tube history."

Letters in *Radio Miscellanea* this month indicate a very positive response to recent articles. Both John Hagman's repair article on the RCA 128 and Ron Russell's article on wind-powered radios excited a great deal of interest.

**A.R.C. Benefits.** A toll-free number, 866-371-0512; Discover, American Express, Visa and MasterCard accepted; books shipped free in the U. S. by book rate; and for current subscribers, a ten percent discount on all book orders. Subscribers, remember you must request the discount when you order, and shipping must be to the address to which we send your magazine.

**A.R.C. Address Change.** Although the address for all general correspondence remains the same — P.O. Box 2, Carlisle, MA 01741 — A.R.C.'s address for UPS, FedEx, etc. items has changed from 1 River Rd. to 498-A Cross St., Carlisle, MA 01741.

**Coming Radio Events.** The month of April brings us over 40 scheduled events. Auctions include Harris' on April 6 and Estes' on April 20-21. For meets, check out the NVRC's Spring Swap Meet on April 20, MARC's Spring Meet on April 27, or Spring Fever #10 on April 13. And, stop by the A.R.C. tables at NEARC's meet in Nashua, New Hampshire, on April 27 to say "Hi."

Happy collecting!

John V. Terrey, Editor

## ON THE COVER

Dave Gonshor's photo of the Bristol Audiphone family of horn speakers is mindful of Grimm's fairy tale characters, the three bears. However, instead of Father, Mother and Baby, they are Senior, Junior, and Baby. The 1920s speakers are products of the Connecticut-based Bristol Company, now Bristol Babcock.

# MEET REPORT

## Radio XXXIII

Westford, Massachusetts — February 17, 2002

REPORTED BY DOROTHY SCHECTER

"We're having a great time! Wish we had this four times a year!" So said Dennis Markell of Bedford, New Hampshire, as he and his 13-year old daughter Amanda arranged their table at the Greater Boston Antique Radio Club's (GBARC) Radio XXXIII on Sunday, February 17, 2002. According to Dennis, Amanda is his "chief financial officer." What a pleasure to know that the next generation is on track with the preservation of radio history!

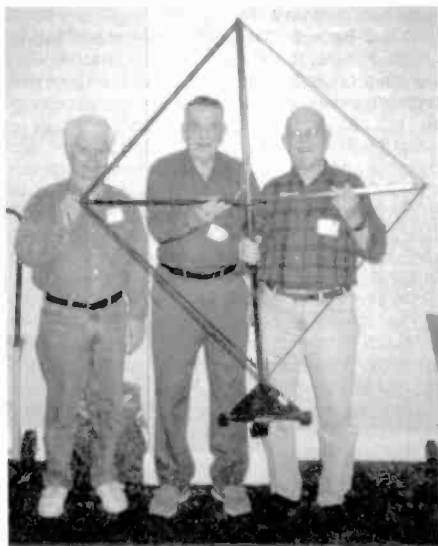

Held from 8:00 A.M. to 1 P.M. in the 7,900 square feet of the Regency Ballroom, Whittier & Emerson rooms of the Westford Regency Inn & Conference Center and managed by the A.R.C. staff, Radio

*A vintage Collins studio mixing panel.*

*"But I don't have one, so what else could I do?" said John Terrey after purchasing this 1927 Shepard Stores tube radio. The inset label reads: "Shepard Six - Sales Division of WNAC - The Shepard Stores - Boston, Mass."*

*Hear no evil, speak no evil, see no evil — unless you have a loop antenna by Wally Worth, center, supported by Dave Crocker, left, and Ray Bintliff, right. All three are contributors to A.R.C.'s editorial pages.*

XXXIII has become the premier radio event in the Northeast. Despite a dire weather forecast that never materialized beyond drizzling rain, collectors gathered from all the New England states, New York, New Jersey, and Canada.

Exhibitors numbered 72 and the 106 tables were sold out well ahead of time. The count for attendees was approximately 791, somewhat down from 911 in 2001 and 851 in 2000. However, the enthusiasm for person-to-person contact with other devotees of antique radio collecting remained undiminished.

Many said that eBay can't compete in that department with events like this one. And according to comments on the Internet, eBay can't com-

My, how radio has changed. Left: Zenith tombstones from the 1930s. Right: Zenith transistor radios of the 1950s.

pete for price either. Lou deGonzague remarked that a beautiful Philco 90 selling for \$400 at Radio XXXIII would be twice that on eBay.

Thirty-five hotel rooms were booked, some for two nights, as couples and families have come to enjoy the hotel amenities. Bill and Gerri Rindfuss of Radio Daze in Upstate New York said that coming for the weekend works out well for them. They have a chance to get away, while also meeting both old and new customers at the meet. They had their many repair products on display, as well as the 5th edition of the *Collector's Guide to Antique Radios*, which John Slusser and the staff of Radio Daze took over from Marty Bunis last year.

### RULES OF THE GAME

Organizing this event is no small feat for the A.R.C. staff. However, one of the questions we are constantly being asked is why exhibitors can't go in to set up ahead of the crowd. Alan Douglas answers the question nicely for us on the Internet. He says it "makes for a friendlier atmosphere. You need to keep the exhibitors from

scooping up all the good deals before the show opens, or many buyers won't come. The question is how to do it. You can make rules like 'No dealing before 8 A.M.' but how can you enforce them? By patrolling the aisles with your Gestapo? ...Make people feel unwelcome and they won't come back.

...Far better to make a self-enforcing rule: if no one can unpack before 8:00, it removes most of the temptation. ...You need to encourage the casual attendees, and at least present the illusion of bargains and surprises to be found. There are other ways to do it, but John's [Terrey] idea has worked well for this meet."

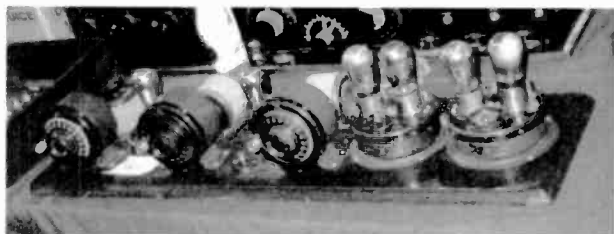

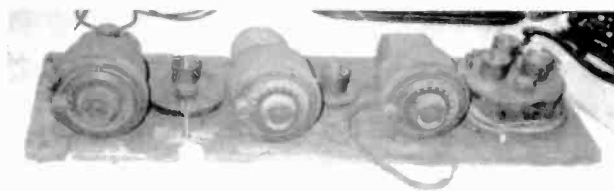

Another request A.R.C. makes of exhibitors is that they stay until 1 P.M., even if they sell out. In this way, they remain a part of the information flow that is a component of a meet. Also, potentially new buyers express disappointment when sellers are not there for the advertised span of time. Chuck Weimer sold out two tables by 9:00 A.M., but he honored the request and stayed until noon. Alan Douglas did the same.

### FAMILY PARTICIPATION

The general comfort of the Westford Regency Inn & Conference Center and the camaraderie of the crowd seem to encourage more family participation in this meet each year. Positive comments were made by exhibitors and buyers alike. For example, Bruce and Ross Phillips, a father and son team, said that this is their favorite show. They like the facility and the fact that, as a 1-day show, it requires less of an up-front investment than a multiday show. This makes the pursuit of what Ross calls an "obsession" less expensive. Their new banner "Radio Orphanage" was hard to miss.

Peter Eslinger's two daughters admitted to being pressed into service but also expressed interest in their father's collection.

*(Continued on following page)*

Two Atwater Kent breadboards. Above: an AK 10C in poor condition. Below: an AK 12 in considerably better condition.

*(Radio XXXIII, continued)*

Katherine, age 19, has been coming for ten years, while Lyndsey, age 13, was new to the game.

For the Longobardi family, who are buyers, this has been a favorite event for the past five years. Dad's interest stems from a radio handed down by his grandfather. Mom tours around with the three children, Vinnie, Jr., Regina, and Gabrielle, who are on the lookout for transistor radios to add to their collections.

Scott and Melanie Seichel from Northern New Jersey were there with their two very young children — Rebecca, carried in Dad's arms, and 4-year old Kailyn, circulating with Mom. Scott is particularly interested in TV from the 1920s to the 1940s, but he works at keeping his collection under control. We didn't get Melanie's take on that assertion.

Husband and wife teams, of course, are much in evidence. Dave and Karen Sutherland in their "Got Radios" hats presided over their table of

*Dave Crocker's Crosley Pup salt and pepper shakers would highlight any dining table.*

One manifestation of the "disease" factor could be called the "But, I don't have one" syndrome. Among the many victims of this disorder is our own editor John Terrey. His purchase of a 6-tube Shepard radio, ca. 1927, when radio stations were owned and operated by department stores, confirmed the diagnosis. This treasure was pro-

*Well known collector and author Alan Douglas, right, and A.R.C. Managing Editor Dorothy Schecter. Maybe she talked him into writing an article.*

books, manuals, and ephemera. They were excited about this event, as well as about the impending move of their specialty gift and toy shop into new space in the beautiful Colony Mill Marketplace in Keene, New Hampshire.

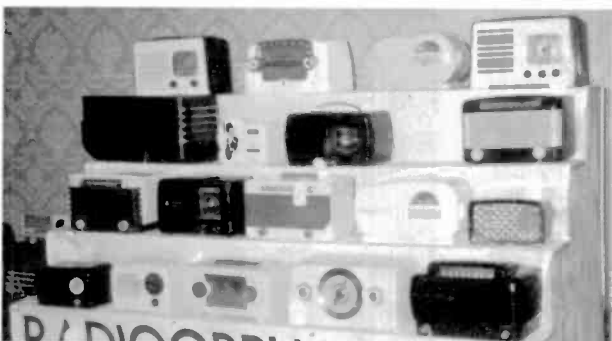

Trudy and Ed White have been into "everything antique" for 60 years. Ed, now 90 years old, joked that his latest bargain is old Enron stock certificates. Trudy sports earrings, made by Ed, in the shape of tube boxes with real tubes hanging from them. What more could a "radio wife" ask? Obviously, these two thoroughly enjoy their "life in radio."

Midge and Andrew McInnes from Long Island mentioned the fun they were having seeing lots of good people year after year. While showing their classic stereo equipment and records, Matthew Kevy and buddy Chris Jones bantered about this "disease" that infects radio collectors. A customer at their tables labeled that remark as "usually spousal commentary." Others chimed in with "life style" and "way of life." With that we have to agree.

*A Philco Predicta ca. 1958 with a 21-inch black & white picture tube.*

*A study in contrasts. Above: modern miniature music boxes at Dave & Karen Sutherland's table. Below: full size 1950s plastic table models from Bruce & Ross Phillips' Radio Orphanage.*

cured, it seems, right out from under the nose of local, avid collector John Wolkonowicz. Such transactions make the day at a meet — and without risk of a cure for the disease.

### HUMAN INTEREST STORIES

Human interest stories abound at a show like this, and the successes are both large and small. Cindie Dickinson happily clutched the one thing she'd been looking for — a Jim Resse and Patsy Cline LP — while her friend Scott Fowler prepared to go off with his bargain shortwave radio. David Moore, now legally blind, but still able to participate in collecting everything electronic, spoke with obvious pleasure about his hobby and his carefully organized basement display of old equipment.

Mike and Suzanne Urban of Westport, Connecticut, had an unusual beginning to their radio story. It was she who initiated his interest in old radios. Working at home as an artist, she listens to NPR, and one day hit on the idea that, as an engineer, he might be interested in restoring old radios. She, in turn, finds radio designs aesthetically satisfying. The result is a virtual store and showroom and a full-time commitment to radio restoration. Both had been in the corporate world and find this work infinitely more satisfying. That is what any antique radio collector would call a real success story.

Perhaps the human interest story we found most compelling stemmed from last year's show after which Adam Schoolsky's photo, just by chance, was chosen to appear on our cover. A few months later, we received a letter from Adam's half brother

in Louisiana, saying he had seen the photo and hoped to connect with Adam whom he hadn't seen in years. As Adam went about with his cell phone this year, we asked if he and his brother had gotten in touch. The answer was "Yes, thanks to A.R.C." We're happy to say that more than one good thing can come of radio collecting.

A word with Michael Katz, known as the "man of the cloth" (grille cloth, that is) revealed that he's been having a successful "going out of business sale," New York style, for about five years. Michael has the least cluttered table in the hall because his product takes up little room. Besides, he says selling grille cloth is fun and allows him to go home sometimes with more money than he had when he came.

Let's hope most sellers had that experience and most buyers went home well satisfied. The consensus continues to be that this show is one of the best, so mark your calendars for President's Day Weekend next February. We'll look for you.

*(Dorothy Schecter, c/o A.R.C., P.O. Box 2, Carlisle, MA 01741)*

*An Alan Douglas quote on the Internet: "John Terrey was running around taking pictures, but I turned the tables on him. We'll see if he prints my photo in A.R.C."*

# HORN SPEAKERS

## The Bristol Audiophone Family

BY DAVE GONSHOR

*Horn speakers in all sizes and shapes have an endless fascination for collectors. Dave Gonshor shares his interest in a long-lived New England manufacturer, the Bristol Manufacturing Company, maker of the Audiophone line of speakers for battery sets of the 1920s. (Editor)*

The Bristol Manufacturing Company was established in 1889 in Naugatuck, Connecticut. Bristol pioneered the manufacture of recording products, including the circular chart recorder still used throughout industry today. In 1892, the company moved to Waterbury, Connecticut, where it remained for 95 years. Throughout the years, Bristol produced a wide variety of product lines, including radio equipment.

The Bristol Company produced a series of horns for battery sets of the 1920s. Much along the storyline in the Grimm's fairy tale of "Goldilocks and the Three Bears," Bristol produced three horns called the "Senior," "Junior" and "Baby." These were very well built units presumably designed for a higher end market. The trade name applied to these horns was "Audiophone."

Figure 1. The Bristol Senior horn speaker sold for \$32.50.

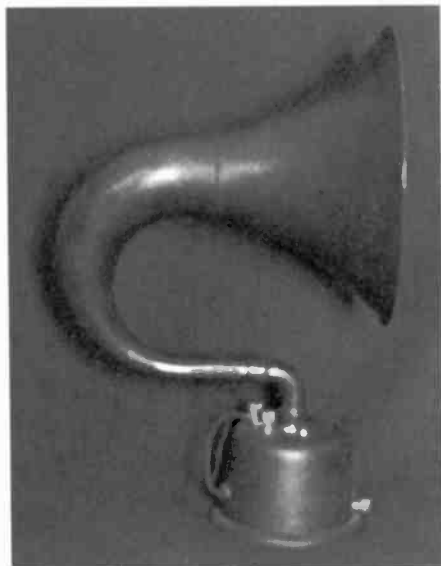

Figure 2. The Bristol Junior horn speaker contained a matching transformer in its base.

The Senior and Junior, shown in Figures 1 and 2 respectively, are C-neck horns that use armature type drivers with impedance matching transformers. The armature type driver was chosen by the industry to drive the higher fidelity cone speakers introduced shortly after the Bristol horns were made. Shown in Figure 3, a Bristol ad for a Super S model refers to a large, low-pitch diaphragm capable of deep bass notes. This could have been the same armature-driven diaphragm used in the Senior and Junior.

Both the Senior and Junior are made of metal, while the Baby material is "composition." The Senior is the tallest of the three at 21½"; its bell size is 15⅝". The Junior bell size is 11"; the Baby bell size, 10⅝". The matching transformer is located in the base of the Senior and the Junior.

"Bristol Audiophone" is cast into the neck of the Senior and Junior near the connector to the base. The Senior has the manufacturer and model identified on a plate on the back of the driver unit, while the Junior manufacturer and model identification appears on the base.

The Baby, shown in Figure 4, is a smaller straight neck horn using a conventional, iron diaphragm-type driver, also known as the head-phone driver. A plate at the top of the base identifies the manufacturer and the model.

Both the Senior and the Junior have an input resistance to the transformer of only 240 ohms, unusual for a battery set speaker. The Baby has a coil resistance of 1,000 ohms, similar to many other horn speakers.

All three horns have distinguishing features making them very collectible, as seen in the photographs. The family of horns is shown together in Figure 5 for size comparisons.

Floyd Paul's book *The Radio Horn Speaker Encyclopedia* identifies horns made by Bristol other than those of the "family." These horns are the J, the S, and the Baby Grand. Note that the Audiophone Baby was produced in three versions, probably with three different horn bell sizes. The Junior was made in two versions.

In addition, the Bristol ad refers to a Super C and a Cabinet type speaker. Bristol also produced other radio components. Johnson's book *Guide to Old Radios* identifies a 1-tube amp built by Bristol, but no model number is given.

The three horns pictured are from my collection. The Senior was purchased from an antique store; the Baby, from a fellow collector. The base for the Junior was purchased from an ad in A.R.C. To complete the Junior speaker and the set, I purchased the horn for the Junior through a "wanted" ad in A.R.C.

It is interesting to note that the Junior horn was spotted at a garage sale a thousand miles from my home base. The prospective buyer went home, got on the computer, and did a search on the "Bristol Audiophone" marking on the neck of the horn, and came up with my A.R.C. ad! A.R.C. ads can go beyond the subscribers, thanks to the

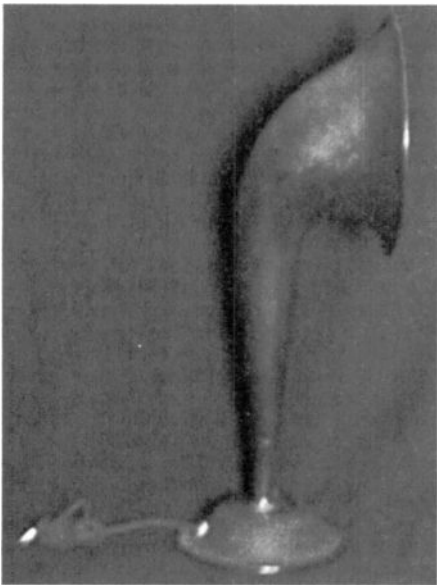

Figure 4. This Baby horn speaker used a conventional iron diaphragm-type driver.

## Postcard-Inspired Memories

BY KEN MCGREGOR

The very interesting article by Steven Auyer about radio station postcard collecting (A.R.C. May 2001) brought home the "media" side of antique radio, and I loved it. We can bring back the original beauty and functionality of nice, old radios, but I've yet to see anybody restore the grandeur that once was AM broadcasting.

Of course, after looking at all the interesting postcards, I began thinking about the radio stations I had actually heard at one time or had some interest in. For some, the most interesting call letters might be WGN in Chicago — WGN means "World's Greatest Newspaper," and I'm told the station is owned by the *Chicago Tribune*.

But, what really brought on my memories was the card depicting the Maccabees Building in Detroit. The call letters "WXYZ" are clearly mounted on the roof and framed by two towers. Based on the reference in the author's bio to high school in the 1950s, my youth may be pretty close in time to his.

In those times, WXYZ radio was a real network powerhouse. The station had a producer-director named Charles W. Trendle who came up with some pretty decent radio show ideas; for example, "The Lone Ranger," "Sergeant Preston of the Yukon," "The Green Hornet," and "Sky King." Some high quality stuff, that, and it originated right in my home town of little old Detroit.

I absolutely loved radio programs, both the afternoon kid shows and the nighttime dramas like "Fibber McGee and Molly," "The Great Gildersleeve," and the "Jack Benny Program." AM broadcasting was an absolute torrent of hit shows.

Later on, when the radio shows migrated to television or just disappeared, WXYZ became a rock and roll icon. Every Detroit teenager I knew

tuned in to Ed McKenzie at 1270 on the dial each and every afternoon. The station became known as "wixie" then. Today, for some reason or other, and probably somehow involving FCC policy, "the living end of the alphabet" now is WXYT. Maybe they are no longer in common ownership with WXYZ-TV Channel 7.

Some years later, when I got really serious about the radio business, I had a summer announcing job at WQRS-FM in Detroit. We had some prerecorded station IDs, along the lines of "You're Tuned To One O Five Point One on your FM Dial, Michigan's First Fine Arts Station, WQRS, Detroit." Those simple words clearly betrayed the work of a silver-tongued veteran broadcaster. Who? None other than Fred Foy, better known for "Return with us now to those golden days of yesteryear — the Lone Ranger Rides Again."

What brought all this to mind? The postcard of the Maccabees Building. WQRS was on the 14th floor. Though the postcard showed two broadcast towers, Steven Auyer notes in his article that other Maccabees cards showed one or three towers. That may have been artistic license, but the number could have really changed. I know the sign on top did. When I worked there, that sign was W-D-E-T, the Detroit school board station, later to be NPR. There must have been at least two towers, WQRS and WDET. Maybe only two. WXYZ had moved out.

Thanks for a nice piece, a most excellent publication, and for introducing yet another new radio-related hobby. Everything about radio is fun.

*(Ken McGregor, 8911 Ensley Lane, Leawood, Kansas 66206)*

# COLLECTOR PROFILE

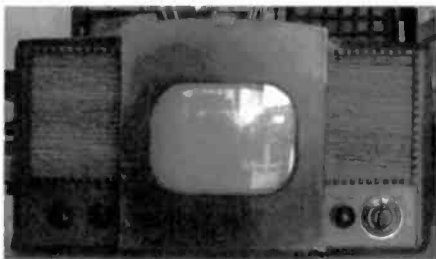

## Waves in the Desert A Radio Repair Shop Story

BY CHRISTINA BARNES

*Where would collectors be without repair shops like the one described in this article? These are the folks that keep radio/TV history alive and our collections running. (Editor)*

As you enter Video Tech Service & Repair, you instantly know this is no ordinary repair shop. A life-sized cardboard cutout of "The Duke," John Wayne, is positioned to challenge you to a shoot out as you mosey on up to the counter with your radio in tow. However, it is the 150 antique TVs and radios that create the atmosphere that stops customers in their tracks. No matter how heavy their load, they have to stop and smile in awe. No small wonder Juno Productions sought out this unusual shop in Tempe, Arizona, to fill their movie *Pleasantville* with authentic radios and televisions from the 1950s. They purchased over 50 items.

While growing up on the East Coast, Victor Bang Jr., who founded Video Tech fifteen years ago, and his twin brother were introduced to the

*RCA's first post-war television — a 1946 Model 630TS — in excellent condition.*

world of repairing TVs and radios by their Uncle Chris. He was the "TV repair guy," and when the family television broke down, Uncle Chris would come to their house with his trusty assistant and wife Mildred. She would set up the metal mirror screen and proceed to direct him to the right or a little to the left — no, right again — you get the picture. By the time they were finished, they were usually arguing, but somehow the seeds of inspiration were sown in Victor and his brother.

### MICROPHONE SPECIALTY

In addition to his interest in repairing radios and televisions, Victor's knowledge of microphones is so extensive that he felt compelled to put together a 300-page book, complete with photographs and all the technical information a microphone aficionado-to-be could want. It is appropriately titled *Vintage Microphones*. The interest of collectors in microphones has grown so that at \$29.95 Victor has trouble keeping enough books in stock.

A few years ago, Bob Galvin, the 83 year old CEO of Motorola Inc., was so impressed with Victor's book that he came to meet him. He signed the cover of one  
*(Continued on following page)*

*A view of Victor Bang's Video Tech Service & Repair business in Tempe, Arizona.*

*A display of radio/TV treasures in the shop.*

*(Waves in the Desert, continued)*

copy, "Victor, you are the personification of the history of a great industry. Thank you, B. L. Galvin, Motorola, Inc."

For a collector new to microphones Victor offers many tips. For example, of the 25 American companies, the names to remember are Shure, Turner and ElectroVoice. The Neumann is a very high quality microphone made in Germany.

In addition, there are several types of microphones; for example, carbon, crystal, ribbon, condenser or electrostatic, and dynamic. The early microphones were carbon. Crystal microphones are commonly used

*A variety of telephones, radios and radio-related items on display.*

*A TV "wall" showing the variety available in Victor Bang's shop.*

in tape recorders and are temperature sensitive.

Ribbon microphones are in high demand. They are the type of microphone used in Hollywood and on Broadway. The ribbon microphone gets its name from the aluminum foil strip inside. By the way, a *Juicy Fruit* gum wrapper makes a great temporary repair substitute for that ribbon.

The German Neumann and AKG microphones are condenser or electrostatic microphones. They have a built in amplifier and a different sound. Barbara Streisand used to use a U87, and when she sang into it, the

tube would glow and create a wonderful ambience. These microphones in good condition sell from \$8,000 to \$10,000.

The technology in today's new microphones is clean and perfect, void of character. Manufacturers are actually reproducing the old microphones now to recapture that character and hum. As a result, the price on the old microphones has skyrocketed.

The last category is the dynamic or moving coil microphone. It is a very strong microphone and will pick up wind, pressure and other outdoor sounds. It is a robust microphone, like an inverse speaker, where the coil is moving. Elvis used a 55C.

Don't be surprised to hear these microphones referred to

by their nicknames. Skunk, Paintbrush, Eight Ball, Box Brownie, Bird Cage, Salt & Pepper Shaker, David Letterman, just to name a few of the best known.

On a scale from most valuable to least valuable, the condenser would rank highest, followed by the ribbon, the dynamic or moving coil, the crystal, and last, the carbon.

The best places to find microphones are the usual haunts of any astute collector — flea markets, estate and garage sales, A.R.C., and, of course, you might get lucky on eBay. You can start for as little as \$5. Make sure it is made in the U.S.A., check for physical damage, plug it in if possible and shake it to see if anything is moving around or loose inside. If you can open it up, look to see that everything is in its place. You should be able to tell if someone who didn't know what he was doing tried to repair it. And last of all, find a mentor.

Victor says the Internet has been a great way for collectors to contact him to answer questions. They can also obtain hard-to-find copies of schematics and repair manuals from his extensive and complete Sams and Rider libraries.

### A LUCKY BUSINESSMAN

Victor, now in his fifties, is fortunate to be a success doing something he loves. For him, the greatest satisfaction is repairing something and bringing it back to life. The look on customer's faces, especially after he has repaired a sentimental piece, is priceless.

Victor also enjoys the customers. Some are quirky, like the "dumpster diver" who had a near death experience and now spends his days finding treasures. He then gives them to people he thinks can use them, never saying much and never charging anything for them.

Some customers are mysterious, like the two Japanese men that pull up in a limousine every

*John Wayne is ready for a shootout with any challenger to these radio and TV treasures.*

couple of years. They don't speak a word of English, but they know what they want. They point to vacuum tubes, anything with lots of American chrome on it, and small, compact televisions in mint condition only. They pay cash, bid him farewell, get back in the limousine and drive away.

His biggest joy in life and by far his greatest accomplishment, has been raising, along with his wife, their three adopted children — Natalie 23, Brad 21, who, by the way, knows how to repair everything in the shop, and Christina 18. At age 23, while in the Air Force, Victor himself

was diagnosed with Muscular Dystrophy. The nurse said "I guess this means your life won't amount to anything." I guess he showed her. He runs his whole business from a wheelchair.

You can contact Victor by e-mail at: [bcarm47.aol.com](mailto:bcarm47.aol.com) or by phone (480) 491-1811. His shop, Video Tech Service and Repair, is at 7520 S. Rural Rd., #A3, Tempe, AZ 85283.

*You can contact Christina Barnes at [christinabarnes@yahoo.com](mailto:christinabarnes@yahoo.com)*

*Christina Barnes, a commercial artist, also owns a business brokerage. She met Victor Bang while looking for businesses to list. His personal story and expertise inspired her to write about a "great guy with a wonderful zest for life."*

*Victor Bang and his popular book Vintage Microphones, which is available for \$29.95.*

# PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

**KMA TYPE 201A RADIO TUBE BOXES** – This photo shows all four sides of the KMA Type 201-A radio tube boxes. They were manufactured by the May Seed & Nursery Co. of Shenandoah, Iowa, in the mid-1920s. (Clark Trissell – Lincoln, NB)

**EKCO MODEL ADT95** – E.K. Cole, Ltd., Essex, England, manufactured this 7-tube radio in a black Bakelite cabinet with chrome trim and 3 vertical glass rods. It has 2 internal loop antennas and weighs about 35 pounds, which explains the side handles. (Jim Taylor – Bournemouth, England)

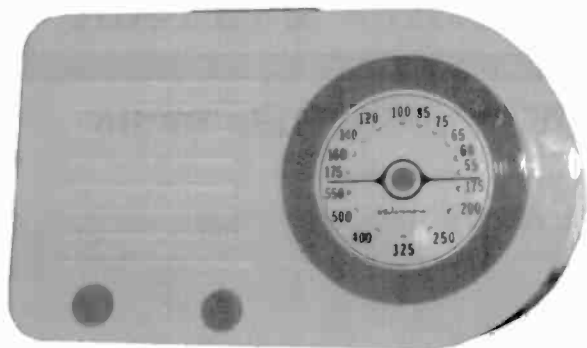

**CLAPP-EASTHAM TYPE HRA** – This tiny, 1-tube, 1-stage amplifier was manufactured by the Clapp-Eastham Co. of Cambridge, Mass., in 1921 to match the Clapp-Eastham Type HR 1-tube receiver. It measures 4<sup>3</sup>/<sub>4</sub>" wide by 6" high. (Wally Worth – Wollaston, MA)

---

## PHOTO REVIEW

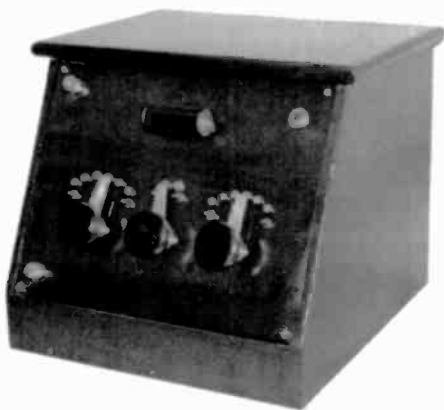

---

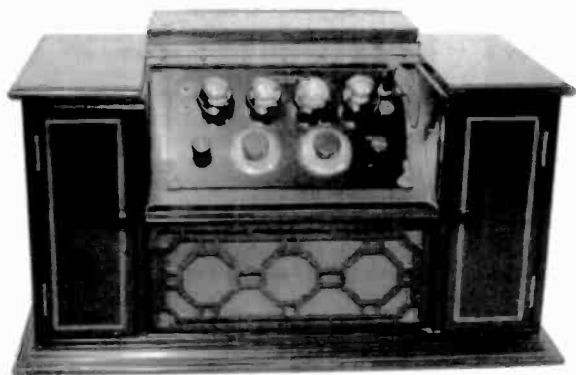

**WINNER'S NOVELTY** – This is not a radio but a cookie jar! It is modeled after the Fada bullet Catalin radio. (*Norman Landis – Kirkwood, MO*)

**ZENITH MODEL 6S222** – This "square tombstone" radio has the famous black dial. The speaker grille is at the top of the cabinet. All four knobs are made of wood. (*Clark Trissell – Lincoln, NB*)

**CRYSTAL SET, MANUFACTURER UNKNOWN** – This home-brew receiver uses a fixed crystal detector mounted on the front panel. The use of three tap switches is unusual. (*Wally Worth – Wollaston, MA*)

**KENNEDY MODEL XI** – Manufactured in 1924 by the Colin B. Kennedy Co., this 4-tube receiver sold for \$185. A double-hinged cover lid folds forward to conceal the control panel. Below is a built-in speaker. The vertical doors on each side lead to compartments for battery storage. Operating instructions are attached to the backs of the doors. (*Ross Mason – Mason City, IA*)

# RESTORATION & REPAIR

## Zenith G-510Y — 1950 Table Radio

BY WILLIAM DEMETRIOU

*One plus one does not always equal two, as this restoration article explains. In this case, one plus one equals "one good one." Here we learn how the fine art of cannibalization can be applied to radio restoration. (Editor)*

Was this ever a popular radio of the 1950s! It had to be in almost every home in America. There must be a dozen different versions of this radio, although they basically all looked similar in appearance.

Like many other radio enthusiasts, I always have several restoration projects going, but must set my project aside while patiently awaiting a much needed part. So, I put it in a box and on the shelf waiting for parts, hoping I will find a scrap radio that I can scavenge parts from to finish the project.

One day, I was looking for something I could both start and finish, so that I could have another radio to put in my small (but growing) collection of antique radios. Just then, I came across two Zenith radios that looked similar, shown in Figure 1. One was black, and the other was brown with a handle.

The black one, which is the Model G-510Y had a broken case, but the chassis was in good condition and had a complete set of knobs.

The other radio (model unknown, probably a G-511) had a bad chassis but a good case. It also had a complete set of tubes. My G-510Y was missing a Type 50L6. So, after completely disassembling both radios and laying all the parts out next to each other, I went to work. Figure 2 shows the two disassembled radios.

### THE RESTORATION PROCESS

I started cleaning the chassis and the case. After checking all the tubes, I selected the tubes that tested the best. This radio has five tubes: a 35W4 rectifier, a 12BE6 converter, a 12BA6 IF, a 12AT6 detector/amp, and a 50L6GT power amp. The replacement of the AC cord was necessary.

After replacing three rubber grommets on the tuning condenser, and tightening the spring for

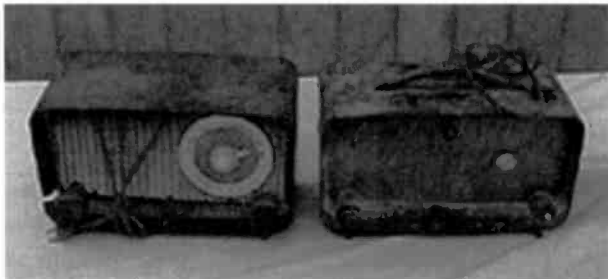

Figure 1. The Model G-510Y (left) and the unknown model, probably a G-511 (right).

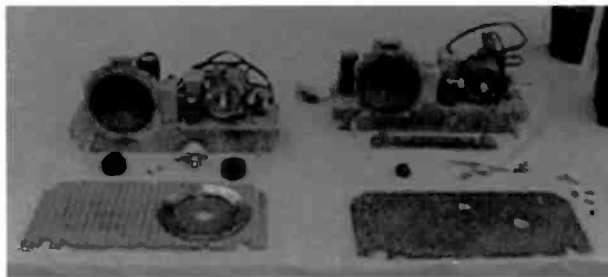

Figure 2. The Model G-510Y and possible G-511 disassembled.

the dial cord, I replaced a coupling capacitor (a 0.05 mF off pin #5 of the 35W4). The plate was glowing red, indicating that the capacitor was shorted. I cleaned the volume control with some contact cleaner, and basically, checked all the solder connections. After plugging it in, it played really well. So I started to reassemble it, and then shined the cabinet up and cleaned the knobs.

This set made a nice addition to my collection. Now my 1950 Zenith G-510Y, shown in Figure 3, is really a G-511 with a handle on it. It's basically the same radio. The only difference is the handle. It may not be an original anymore, but it's as close as you can get. I brought this non-functioning radio back to working condition, and it was fun!

That's what the hobby is all about. I just love old radios! I love the way they look, and I love the way they smell, and I love seeing those tubes glow. It's great to get together with a friend to

solve restoration problems. My fellow antique radio friend, David Terwilliger, takes an hour and a half ride to my home on many Saturday nights just to talk about and repair these wonderful old radios.

## More Restoration Tips

BY DALE DAVENPORT

After writing an article on restoring radio knobs and dials (see A.R.C., June 2001), I thought of a few other restoration tips that have worked for me and that I'd like to pass on to collectors. For example, those cute nickel plated levers on early Michigan brand sets originally had the handle portion of the control handle painted black. Dipping the handle part in Liquid Tape and hanging it in a vertical position to dry will produce beautiful results.

A second example concerns the dial scales on these sets which are behind the panel and viewed through a small opening. Most of the time the dial just needs a gentle cleaning and possibly a light coat of matte finish, clear lacquer to bring it back to life. Some models of the Atwater Kent metal box sets and possibly other brands had the scales on the tuning knobs filled in with gold. I've had good luck filling these with the gold paint from fine line Pilot brand pens.

To do this, first clean the knob, buff if necessary, mask off any parts of the knob, such as the flutes, that you don't want the paint to get in, and then fill with the gold paint. Wipe off the excess paint, and let it dry thoroughly for a couple of days. When dry, any smears and excess paint can be removed with a piece of paper towel slightly dampened with mineral spirits or lighter fluid. Let dry thoroughly again and lightly buff it out. The results are very gratifying.

Chips and nicks in dials and knobs are a common problem, but they can be filled with a black epoxy material. I use a 24-hour, metal-filled variety by Devcon called "Plastic Steel." It can be

sanded, drilled, and ground to shape, but better results will be achieved if a wax impression from a good part of the dial can be used as a mold for the repair. The Devcon epoxy then will assume the surface of the mold, and if it's in good shape, so too will be the cast surface.

This epoxy has one curious property that is, as far as I have been able to determine, unique. Before the epoxy cooks off and becomes hard, it's water soluble. Smears and mistakes can be scrubbed off with a damp cloth. This is such a great feature that it lends itself particularly well to reinstallation of loose tube bases. Shove some of the epoxy in between the glass envelope of the tube and the loose base. Use cheap throw away acid brushes for this, as they are stiff and disposable.

When you have a sufficient amount of the epoxy in the bonding area, hold the base tightly in place, and using a damp cloth, clean the excess epoxy from the glass and tube base until none is visible. Pay particular attention to the groove where the envelope meets the base.

The damp cloth and your fingernail make a good removal tool to clean off all excess adhesive. Store the tube upright with a small amount of weight on top until the epoxy sets. Tubes repaired this way look good, the repair is virtually invisible, and they have proved sturdy and serviceable.

*(Dale Davenport, 622 S. 18th St., Fort Smith, Arkansas 72901)*

## BOOK REVIEW

### The Saga of Marconi Osram Valve A History of Valve-Making By Barry Vyse and George Jessop

REVIEWED BY LUDWELL SIBLEY

*The Saga of Marconi Osram Valve* is an extraordinary book by two long-term employees of Marconi Osram — Britain's most important tube maker — Barry Vyse and George Jessop. This new "Saga" is a welcome addition to tube lore and Gerry Tyne's classic *Saga of the Vacuum Tube*.

The book details the history of the company and its plants, starting from the Victorian light-bulb days and the joint venture of Marconi's Wireless Telegraph Company and the General Electric Co. Ltd. It covers the development of tube technology from incandescent-lamp practices to today's ceramic models — not just the evolution of tube designs, but the progress in materials and manufacturing technology. Its main focus is the "glory" years up to 1958, although the Marconi-Osram (M-OV) valve held out until the last KT88 came off the line in 1988. The book is based on extensive files of original records and catalogs, and must have taken years to write.

The scope of tubes covered is essentially the whole range. Transmitting tubes, receiving types, audio devices (the PX4, PX25, KT66, KT88, etc.), tuning eyes, Tuneon indicators, radar tubes from World War II, the Catkin metal line, thyratrons — they're all there. The "CAT" line of big water-cooled triodes receives great attention, as do other transmitting tubes. To provide insight as to why particular tube types were developed, the book covers the early history of the BBC and of the original radar defenses of the United Kingdom.

The book provides the first complete history of the "silica valve," an M-OV transmitting product unique to the British tube industry. With a bulb made of fused quartz and ten kilowatts or so of power dissipation, it ran with white-hot plate.

Packed with photos and catalog illustrations, the *Saga* depicts people, tubes, tube cartons, and design drawings. The photos, many in color, are a mix of original shots and new images. As a nice unifying touch, there are also photos and descriptions of the equipment that used the tubes — classic broadcast radios, transmitters, and military gear from both World War I and II.

As an integral part of the company's history, there is coverage of day-to-day work life in a tube

plant. The various expansion projects at the company's Hammersmith (London) factory are detailed, as is the construction just before World War II of a "shadow" factory away from the areas of Britain that were likely to be bombed.

The book mentions Marconi-Osram's partnership with RCA in the design of tubes, the result of partial ownership by the latter. A minor complaint — there is no explanation of the apparent interchange of designs with Eitel-McCullough in later years. The outline drawing of the M-OV CAS1 bears a remarkable resemblance to the Eimac 4W20,000. The M-OV 4CX250B "surely" originated with Eimac, as did other tubes

like the 4CW10,000. It also looks as if there were interchanges with Philips and possibly other tube makers.

This *Saga* is designed for ongoing reference use, as well as history. A list of sources cites published research material. An appendix with 25 tables gives the basic operating parameters of M-OV receiving tubes. Another lists special variants, like the A855 (a KT66 with top cap). A third appendix lists experimental tubes, some civilian, some important World War II military types. There are two indexes: one general, one by tube type.

To those interested in the radar tubes of World War II, the new *Saga* is effectively an affordable replacement for the now-rare 1990 book *Metres to Microwaves*.

To put it simply, this book is a significant addition to tube history. Professionally written, it is enjoyable and insightful. It will be a pleasure to anyone interested in the history of, or the collection of British tubes and equipment.

*The Saga of Marconi Osram Valve* is available softbound for \$39 from Antique Electronic Supply, 480-820-5411; [www.tubesandmore.com](http://www.tubesandmore.com). It has 340 pages in a 7" x 10" format, with 350 plus photos, and 300 plus catalog cuts. Be sure to check the supplier for shipping information.

(Ludwell Sibley, Editor, *The Tube Collectors Association*, 102 McDonough Rd., Gold Hill, OR 97525, [tubelore@internetcds.com](mailto:tubelore@internetcds.com))

## Wincharger Memories

Dear Editor:

The March issue article on wind-powered radios brought back memories to me. In 1941, my parents were one of three couples who qualified for an FHA loan to buy a farm in Nuckolls County, Nebraska. The house was old at the time, so was remodeled and indoor plumbing, electricity, and central heating were added. REA did not come to that area until 1948, so my father bought a 32-volt Wincharger. It had a 12-foot blade and a gear-driven generator, and it was mounted on a 40-foot high tower. The 16 storage batteries were in the basement.

The house was wired using a pair of No. 6 wires running from the basement through the attic, tapped as needed for lights and outlets. The barn and corncrib were also wired. Besides the lights, we had appliances, electric motors, and even a welder. I used the welder only when the wind was blowing, which is often on the plains of Nebraska.

A neighbor had the ultimate turbine — a 110-volt Jacobs with a 3-blade propeller.

Will Jensby, Santa Clara, CA

Dear Editor:

I enjoyed the windcharger story in the March 2002 issue. It reminded me of my youth. Farm systems were probably never the norm here on Long Island, although there were a few around.

While in high school, I fixed radios for my cousin who took care of a small radio shop during the day. The caretaker for an estate, where they obviously had no AC, brought in a 32-volt radio to fix. That was a challenge to me. I rewired the heaters so I could use 6 volts, fixed the radio, and wired the filaments back. I guess it was successful as I never got a complaint.

In 1937, I used to stare in the hardware store window where there was a 1 Kw AC generator for sale. When the New England hurricane of 1938 came along, it disappeared from the window and made the rounds powering water pumps for the local residents.

Several years later, I bought it used and found that it was made to be part of a farm system. It had a 32-volt DC generator to charge the batteries (when the wind didn't blow I guess), and if you turned on a light, the generator would start on the starter/generator windings and the light would light.

Van R. Field, Center Moriches, NY

## Hooked, So I Renewed

Dear Editor:

Okay, I'm hooked. I enjoy the articles and the ads. I'm not completely radio-crazy but getting there, so please renew my subscription for one year.

Best wishes.

Harry Hacker, Temple TX

## Superb Article Leads to Renewal

Dear Editor:

I had decided to let my subscription to A.R.C. run out this month because the cost is quite high and there are just not enough restoration and repair articles. However, the John Hagman article in the February 2002 issue is superb, so I have once again decided to renew.

Walt Zandi, Sugar Hill, NH

*Glad to have you aboard. The more subscribers we have, the more articles are contributed and published. (Editor)*

## Questions about the GE Model M-61

Dear Editor:

I have been reading A.R.C. for several years and usually find the articles and information of great interest. However, an article in the January 2002 issue has a special interest for me.

On page 19 is John Hagman's article "Restoring an RCA Model 128" with photos of the RCA set. I have the GE version of this model — an M-61. The cabinet is very similar, except the top on mine is more square off on the sides. I have had mine for over 30 years. It also has the dark red dial, but the cover is square, not round. The chassis looks identical to the RCA. I also have an approximate production date for mine.

I knew that GE and RCA went back a long way, but this is just one more example of how closely related they were. The label on mine says that it was designed for and tested with RCA tubes. So, is my GE an RCA chassis with a GE label, or is the RCA a GE chassis with an RCA label? It would be interesting to know.

Thom Day, McNabb, IL

*Your radio, a GE Model M-61, was manufactured by RCA for sale by GE. Both radios are 1934 models and use the same chassis. As you have observed, the cabinets and dials differ in appearance. A photograph of the GE Model M-61 appears on page 146 of "Machine Age to Jet Age II" by Mark Stein. (Editor)*

## Thanks from "Radio Nuts"

Dear Editor:

I would like to tell you what a good job you do on your publication. The month wouldn't be complete for me if I didn't have it to read. Keep up the good work! Thanks for everything you do for us radio "nuts."

Tom Zenisek, Cedar Rapids, IA

## High Tech Articles Appreciated

Dear Editor:

Thank you and keep up the good work with A.R.C. I'd love to see articles at a higher technical level.

William Van Lennep, Pepperell, MA

*We're happy to consider articles of a more technical nature. However, we also do try to match the interests of the average collector who may not be an engineer. (Editor)*

# A.R.C. RATES & POLICIES

**GUARANTEE.** You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

**PAYMENT.** Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify U.S. funds. Subscriptions will be prorated to amount sent if amount is incorrect.

**FAX & E-MAIL PROCEDURES/PAYMENT.** Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

**CHANGE OF ADDRESS.** Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

**SUBMISSION OF MATERIAL.** Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

**PUBLISHING RIGHTS.** Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

**MAILING OF ISSUES.** U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

**ETHICS.** No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

**DISCLAIMER.** The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

## DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

*The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.*

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please contact A.R.C. before beginning to prepare your ad. We will be

happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/8-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

† For 6 and 12 month ads, no ad make-up charge if no change is made to ad for entire run.

## CLASSIFIED ADS • DETAILS AND RATES

**ONE FREE 20-WORD AD** for subscribers in each issue. additional words are 29c each. (See details below.) Classified ads sent by mail, fax, e-mail or by any other method must be received (not just post-marked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Stamps or cash are OK for small amounts. (Canadian and other foreign advertisers please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

**Faxed & e-mailed ads:** Please see additional information on opposite page.

**When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper.** Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive two months) you want the ad to run.

**To minimize our typing errors: Please write legibly.** Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike, for example 1, l and I (the number one, the capital I and the small l.) Also 0, O, o, o, Q and D; r and n, 6, b and G; V, U, u, v and Y, A and R; 5, S and s; Z, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets].

**Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and non-original items must be so identified.** Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

**Clubs:** Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

### CLASSIFIED AD DETAILS

**Deadline: NOON ET— 10th of the month!**

Classified ads must have a standard heading such as **WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE**, etc. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is **required** in all classified ads; we will add it if you forget.

### Classified Ad Rates per Month

Subscribers:

- First 20 words: **FREE\***
- 29c per word for extra words over 20 **plus**
- 10c per word for a shaded ad (count all words including free words).
- \* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

- 47c per word **plus**
- 10c per word for shaded ad.

Please do not forget to send in the extra 29c per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

### BOXED CLASSIFIED AD DETAILS

**Deadline: 1st of the month!**

Boxed classified ads can run unchanged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with "For Sale," etc. Minimum run is 3 months, prepaid. Discount: 10% for 6 months; 20% for 12 months.

### Boxed Classified Ad Rates per Month

Nonshaded ads:

- 40c per word for all words, \* none free, **plus**
- 10c per word for each bold word **plus**
- 10c per word for each all-caps word.

Shaded Ads (All words are bold at no charge):

- 50c per word for all words **plus**
- 10c per word for each all-caps word.

Non-Subscribers:

- Add 20c per word to above costs.

\*Three words can be bold-all-caps at no extra charge.

### PHOTO & DRAWING DETAILS

**Deadline: 1st of the month**

**for all ads with drawings or photos!**

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will recut it or enlarge it as needed.

### Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing  
(If ad is canceled, this amount cannot always be refunded.)

### CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

### IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: **WANTED, FOR SALE, etc.**, count as one word each time used in an ad. **Name, address and (one) telephone number**, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is **required** in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

**FOR SALE:** Zenith stereo tube amp - \$20. Blonder-Tongue tube amp - \$20. Scott 299C amp - \$225. Jim Havlicek, 531 Wentworth Ave., Calumet City, IL 60409. (708) 891-5550, before 5 CST; (708) 730-1549, after

# Mid-Atlantic Antique Radio Club

## Proudly Presents

# RadioActivity 2002

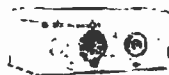

### May 16 - 18, Beltsville, MD

**Please note: this is one month earlier than last year!**

An Event celebrating vintage  
radio and television

This Year's Theme: Atwater Kent

### Featured Activities:

-  Flea Market - starting at Noon Thursday, May 16 through Saturday morning.
-  Tubes, Parts, and Ephemera Auction - Thursday evening.
-  Informative Restoration Seminars including Wood Cabinet Refinishing, Speaker Repair, and Electrical Repair topics.
-  Friday Evening Awards Banquet with talk on Atwater Kent Radio.
-  Our great Old Equipment Contest.
-  The regular large Saturday auction. Several desirable, high-end radios have been pledged including a nice GE L570 catalin, an Emerson model 400 catalin and an Emerson model 520 catalin. Also a Mickey Mouse and a Hopalong Cassidy novelty radios, plus a Philco 70 cathedral.
-  A no commission, walk-around "Junque Auction" after the regular auction.

### Location

Sheraton College Park Hotel  
4095 Powder Mill Road, Beltsville, MD 20705  
(800) 325-3535 or (301) 937- 4422  
Same location as last year. Easy to find  
between Baltimore and Washington D.C.  
From I-95 take exit 29B (MD Rt. 212),  
turn left at first stop light.  
A block of rooms is available at \$89 ea.  
Reservation cutoff date: April 16  
(mention Group MRR).  
We recommend booking early!

### Registration

- Registration mailed on or before May 2: \$5  
- Registration after May 2 or at the door: \$10  
- Flea Market spaces, each: \$10  
- Friday Evening Banquet tickets, each: \$20  
Registration includes family members.  
Flea market vendors must be registered.  
Mail check made out to MAARC to:  
Lynne Bushong, P. O. Box 274, Fulton, MD 20759

# EXTRAVAGANZA '02

Hosted by the Michigan Antique Radio Club  
July 12-14, 2002

Holiday Inn South Convention Center  
6820 S. Cedar Street, Lansing, MI 48911  
(517) 694-8123

Come join us for our 17th annual convention

This year we are proud to honor a notable mid-western business leader and manufacturer who made a significant contribution to radio broadcasting as well as radio manufacturing. Powell Crosley left a legacy of ingenuity, creativity and productivity from radios, broadcasting and appliances to automobiles that carried his name.

## CROSLY

### HIGHLIGHTS:

- HUGE 3-DAY FLEA MARKET
- NOTE: FLEA MARKET STARTS FRIDAY!
- HOSPITALITY UNDER THE BIG TOP
- SATURDAY AUCTION WITH RICH ESTES

## RESTORATION VIDEO!

Come along as a 1936 Philco is transformed from "flea market find" to working, museum-ready show-piece! Along the way, you'll get basic tube theory, basic receiver theory, plus learn to trouble-shoot your set, test voltages, rebuild Bakelite-block capacitors, repair an old lacquer finish without stripping, and much more. For beginning, and intermediate-level restorers, or any old radio lover!

run time: 115 minutes

### A GREAT GIFT IDEA!

# Estes Auctions

*Specializing in Vintage Radios  
Complete Auction & Appraisal Service*

## Catalin Radio Auction

**Saturday & Sunday, April 20-21, 2002 at 10:00 am  
at the "Capitol City Music Hall" in Wheeling, WV**

This is a living estate auction for Larry Anderson of Wheeling, West Virginia. Mr. Anderson has been a collector for many years but due to health reasons has decided to sell his quality collection. Estes Auctions will conduct a two-day sale to disperse of his many radios.

The collection contains: twenty-six Catalins, a Model 5 breadboard. Predicta TV, Nipper dogs, advertising, wood and Bakelite radios, several Zenith consoles, a 10-tube Zenith Spinnet model, a large collection of transistor radios to include Regency TR-1 Toshiba Lace, Hoffman and Zenith solar models, plus a large collection of high-end novelty radios.

This exciting auction will be held at the "Capitol City Music Hall," home of WWVA radio, 1115 Main St., Wheeling, West Virginia. For a listing of Catalins call or write to us. Also check-out our web page for listings of all the Catalins plus many more of the radios to be featured in the sale. There is ample parking nearby the music hall. There are many fine motels in the area and we can provide a list and map of both parking areas and phone numbers for motels.

Terms: Cash/Check/Visa/Mastercard with 5% buyer premium. Bank letter of credit or reference if not known by our firm.
