WANTED

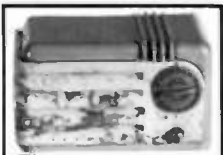

AIR KING SKYSCRAPERS

PAYING **\$14,500.00+** for near mint condition red or blue
\$10,000.00+ for green, lavender or yellow
\$3000.00+ for black and **\$2000.00+** for white or brown
ALSO WANTED ANY COLOR-ANY CONDITION
COLLECTOR PAYING TOO MUCH, CALL ME LAST

TOM THUMB CATALIN RADIOS WANTED

paying **\$6,750.00+** for mint cond red, green, orchid, blue
\$2500.00+ for any mint condition one
ALSO WANTED ANY COLOR-ANY CONDITION

DETROLA PEE WEE & SUPER PEE WEE WANTED

paying **\$600.00+** for mint cond black, white
\$1,450.00+ for beetle, gray, salt & pepper
\$2000.00+ for red, blue **\$3500.00+** for green or lavender
ALSO WANTED ANY COLOR-ANY CONDITION

WANTED ANY CATALIN RADIO

ADDISON 2 MAROON & YELLOW \$900.00, YELLOW & RED \$3,750.00
ARVIN 532 ANY COLOR \$2,500.00, BENDIX 526 GREEN & BLACK \$625.00,
DeWALD A501, A502 BROWN \$375.00, YELLOW \$425.00, RED \$1,200.00
EMERSON AU 190 & BT 245 YELLOW \$1,300.00, GREEN \$2,500.00,
DARK RED \$2,700.00, BLUE \$6,850.00, BRIGHT RED \$11,000.00
ESPEY MIDGET, YOU NAME THE PRICE I WILL PAY IT!
EMERSON BM258 YELLOW \$750.00, GREEN \$1,350.00, RED \$2,150.00, BLUE \$4,000.00
EMERSON 564 BLACK \$500.00, GREEN \$1,150.00, RED \$1,650.00
FADA L56, F55, 52, 5F50, 5F60, 136, 53X, YELLOW \$1,500.00, LT GREEN \$1,750.00
MAROON & YELLOW \$2,200.00, YELLOW & BLUE \$2,500.00, YELLOW & RED \$3,100.00,
EMERALD GREEN & YELLOW \$7,000.00, BLUE & YELLOW \$7,000.00.
FADA 115, 116 & 1000 ALL YELLOW \$700.00, MAROON & YELLOW \$950.00,
YELLOW & RED \$1,150.00, PEA GREEN \$1300.00, BLUE & YELLOW \$2,550.00.
GAROD 6AUI MAROON \$675.00, YELLOW & RED 1,350.00,
RED & YELLOW \$1,450.00
HALSON ANY COLOR \$1,500.00 TO \$5,000.00
MOTOROLA 50XC ALL YELLOW \$1,750.00, BROWN & TORT \$2,750.00,
RED & YELLOW \$6,000.00, GREEN & YELLOW \$6,250.00.
MOTOROLA 52 YELLOW & TORT \$1,500.00, MAROON & YELLOW \$1,850.00,

Complete Riders Troubleshooter Manuals On A Single DVD Disc!

Tired of changing CD's? Tired of getting "that" schematic on your old radio where you can't read the values? REA has just released the first DVD-ROM publication at a break-through introductory price. REA created the first Riders Professional CD-Series that is the ONLY database driven system ever created and is the "standard" that others are judged by. Now we introduce the Riders Standard Series DVD using Riders' indexes for finding "that" schematic that you need occasionally. Priced at a very low introductory price, every collector or restorer who repairs radios should own this DVD. Requires Windows on a PC to use it. It requires nothing to download as it has its own built in digital browser that allows viewing, magnification, rotation and printing to your own printer. This DVD holds almost 120,000 of the early radio models made from 1920 to 1954. A true price breakthrough yet with no sacrifice in quality. Introductory Offer - Limited Time - A professional produced product.

**Only \$ 150 + \$ 6 S&H (Sold only on DVD) -
Introductory Price - Reg. Price \$ 199**

Other CD-ROM Publications:

Riders Professional database driven 6-CD set - now only \$ 299 or \$ 59 per CD (4 volumes/CD)
Cunningham-Radiotron Hi-Rez CD \$ 85
Sam's Photofact Sets 1-175 - 7 CD's. with Sets 1-25, 26-50, 51-75, 76-100, 101-125, 126-150 and 151-175. Only \$ 79 each CD-ROM (25 sets per CD)
All 7 Sam's CD's (1-175) - \$ 495.00

CONTACTING ANTIQUE RADIO CLASSIFIED. All correspondence should be sent to:

A.R.C., P.O. Box 2, Carlisle, MA 01741.

Only UPS, FedEx, etc. items to street address: 498-A Cross Street.

Telephone: (866) 371-0512; Fax: (978) 371-7129

E-mail: ARC@antiqueradio.com

Web: www.antiqueradio.com

Please, no classified ads by telephone; thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

ANTIQUE RADIO CLASSIFIED

EDITOR'S COMMENTS

Reviewing the contents of this month's issue prompted a memory search. When had we been prophetic about the future value of consoles in the grand scheme of radio collecting? Then Dave Crocker's drawing at right from his July 1989 article surfaced. Yes, Dave was the prophet way back then. He warned that those who ignored the potential future value of consoles did so at their own peril.

As both the Estes and Harris auctions attest, consoles have arrived — big time. What used to go begging drew vigorous bidding. In fact, eleven quality consoles sold for over \$1,000 each, totaling \$42,000, which represented 30 percent of the Estes auction.

Of course, "quality" is the optimum word here. Buyers have to pick and choose for value, and they were in luck at the Estes auction which focused primarily on two quality collections — those of Joe Koester and Arlo Brakel. Together they offered a broad selection of cathedrals, Catalins and consoles, along with Amateur, battery and other traditional sets. The consoles came largely from Joe Koester's collection, which epitomized the unusual, scarce, and collectible — all aspects of a quality collection.

Tom Harris Auctions also offered quality items covering the full spectrum of collecting. We're happy to note that Harris is continuing its practice of two radio auctions a year, and we will report on the September event soon.

In contrast to consoles, Charles Stadler's interest in transistorized multiband portable radios is at the other end of the size spectrum. Charles' article is even more narrowly focused on a small subset of these radios, namely the Patrolman Series. Read the photo captions carefully to realize the subtle differences among the sets. I understand an interest in such differences, as my own collection includes subtle variants in models.

Coincidentally, the Indiana Historical Radio Society's 33rd annual meet celebrated the 50th anniversary of the Regency TR-1 transistor radio. This 2-day event included an auction that yielded an impressive total of nearly \$5,000.

Transistors were also on Mal Fuller's mind when he found that his Zenith Royal 3000-1 had a mixer transistor problem. Setting about repairing a defective transistor would seem a stretch for most of us, but Mal tells us how to do it. As he says, good substitutes are hard to find, so here's his answer to the problem.

In another repair article, Jerry Wieland describes a second chance he had at a General Motors Model 219, which he had previously turned down because of price and the fact that "it didn't look right." Well,

his judgment When the him for re-cabinet had stalled in it. the kind of cre-

proved correct. set later came to pair, he found that the the wrong chassis in- Jerry's story illustrates activity sometimes needed

to make a functioning piece out of someone else's partial restoration.

Photo Review is a good mix of European and U.S. sets. U.S. sets include a Walton, two AC table sets, a Belmont chairside, and a Beco battery set. Two German crystal sets and an interesting Dutch battery set are also pictured. We look forward to receiving your candidates for future *Photo Reviews*.

A.R.C. Benefits: Be sure to take advantage of A.R.C. benefits for your subscription renewals, book orders, and other radio resource needs: a toll-free number (866) 371-0512; the Web: www.antiqueradio.com; Discover, Visa, American Express, and MasterCard accepted; books shipped free in the U. S. by book rate; and to current subscribers, a 10 percent discount on all book orders.

Coming Radio Events. Among the 48 events listed this month are 27 meetings and 15 meets, one of which is the New England Antique Radio Club's meet in Nashua, New Hampshire. Of the four auctions listed, two are in Illinois, one in Missouri, and one in Ohio, namely another Estes auction. For those of you interested in a little travel, you might try the National Vintage Communications Fair in Birmingham, England, an event I have enjoyed more than once in the past.

Happy Collecting!

John V. Terrey, Editor

ON THE COVER

Our cover pictures a 1935 E.H. Scott Allwave 23 in a Westerly Grand cabinet with its doors open. This handsome set is from the Joe Koester collection and has silver-colored bars in front of the speakers. It sold for \$3,600 at the Estes auction.

MEET & AUCTION REPORT

Indiana Historical Radio Society 33rd Annual Meet Kokomo, Indiana — April 30-May 1, 2004

CONTRIBUTED BY HERMAN GROSS

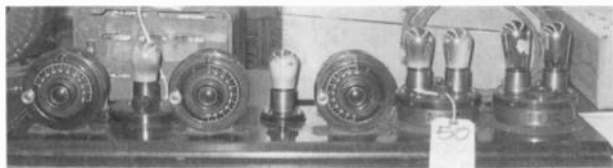

The Indiana Historical Radio Society (IHRS) held its 33rd annual spring meet at the Johanning Civic Center in Kokomo, Indiana, on April 30-May 1, 2004. The meet was well attended and members and visitors alike came, not only from Indiana and the contiguous states of Ohio, Michigan, Kentucky and Illinois, but also from such distant places as South Carolina, Georgia, Florida, Missouri, Texas, California, and Oregon. In all, 122 families attended.

The theme of this meet was the 50th anniversary of the Regency TR-1 pocket transistor radio. Especially significant to those of us in the Indiana group is that the TR-1 was developed and built in Indianapolis. Several very interesting and extensive displays of TR-1 history and memorabilia were offered.

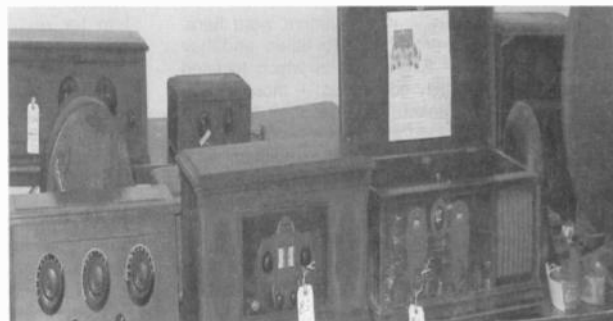

The highlight of the meet was the auction held Saturday at 1:00 P.M. Of particular interest was the very rare Atwater Kent 12C breadboard selling at \$1,300. This was the Cadillac of Atwater Kent breadboards and less than 8,400 were manufactured. Who knows how many remain.

Max Scott Auction Service moved 136 lots along with ease, and proceeds amounted to \$4,710. All prices have been rounded down to the dollar.

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

This Atwater Kent 12C, the highlight of the auction, sold for \$1,300.

A wide variety of radios on preview before the auction.

Several of the table sets awaiting the auctioneer's gavel.

WITH THE COLLECTORS

Transistorized Multiband Portable Radios

BY CHARLES STADLER

Radio collecting is such a broad field that most collectors home in on a particular specialty. In Charles Stadler's case, he has chosen multiband portable radios. Here he describes the subtle variations in some Radio Shack's Realistic lines from the 1970s and 1980s. (Editor)

It is 50 years since the Regency TR-1 transistor radio was sold in 1954. This would definitely make "antique" a proper term for those old transistor radios. By the end of the 1960s, a decade and a half later, one would be hard pressed to find a tube radio, portable or table. The advantages of transistors had helped change the styles and designs of electronics. Smaller packages could easily accommodate more bands and quality for lower costs.

Looking through catalogs, such as Montgomery Ward, Lafayette, and Radio Shack (Al- lied), provides a look at a wide range of portable radios available from a variety of sources. It was not hard to find radios with wide frequency coverage. A quick search through eBay shows that many of these radios are still available.

RADIO SHACK PATROLMAN SERIES

I like to collect multiband portable radios. Fur-

Figure 2. This Patrolman 6, a 12-760 from 1976, was identical in appearance to the 12-756. However, its UHF tuning range was extended to 512 MHz.

Figure 1. The first in the series of Patrolman 6 radios was this 12-756 from 1973. In addition to AM and FM, this radio tuned the High and Low VHF bands, the VHF Air band, and UHF (450-470 MHz).

ther, I like to find radios that belong to sets or series. One such series is the Radio Shack Patrolman series. These radios featured VHF coverage in addition to AM or FM coverage. The first units — 12-628, 12-629, and the Patrolman Mini 12-622 —

(Continued on following page)

Figure 3. A restyled version of the 12-760, this 1977 12-750's tuning range was identical to the 12-760.

Figure 4. The Patrolman CB-6, introduced in 1978, substituted the Citizens band for the Air band.

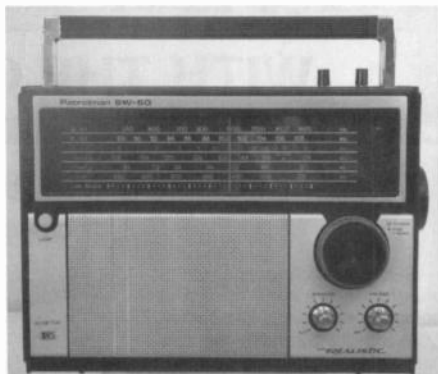

Figure 6. The 6-band Patrolman SW-60 (12-779) was introduced in 1984 and appeared in catalogs until 1990.

Figure 5. The Patrolman CB-60 (12-766) from 1980 added the Air band, and its UHF High band covered 108-174 MHz.

Figure 7. The 1973 Astronaut 6 (12-5060), upper middle photo, has a case style similar to the Patrolman 6, but it has shortwave rather than UHF coverage. It carried the Allied Radio Shack (ARS)/Allied nameplate. The lower photo shows the 1974 Model 12-2060 where the nameplate reads "Realistic."

(Multiband Portables, continued)

appeared in the early 1970s. They were pocket radios which featured the VHF High band.

Over the years, bands were added, starting with the Patrolman 3 (3 bands with UHF added) and the Patrolman 10 (10 bands — shortwave to UHF coverage) in 1974, and ending with the Patrolman SW-60 (6 bands) introduced in 1984 and shown in catalogs until 1990.

The Patrolman 6 series appeared in catalogs for almost two decades. The first Patrolman 6, the 12-756, shown in Figure 1, appeared around 1973. It featured, in addition to AM and FM coverage, Low and High VHF bands, VHF Air band, and UHF (450-470 MHz).

The next version, the 12-760, appeared around 1976. As Figure 2 shows, this radio had the same appearance, the only discernible difference being an expanded UHF coverage to 512 mHz. In 1977, a restyled version, the 12-750, was introduced, but with the same coverage. This radio is shown in Figure 3.

For the 1978 version, the Air band was replaced with the Citizens band. This version, shown in Figure 4, was called the CB-6. Introduced in

1980, the Patrolman CB-60, shown in Figure 5, included the Air band and a VHF High band, giving a wide 108-174 MHz spread.

Introduced around 1984, the final version was the Patrolman SW-60, shown in Figure 6. The CB

Figure 8. Similar to the Patrolman 6 series is the DX-66 series, two versions of which are shown here. The set in the upper photo includes a tone switch.

coverage was replaced with shortwave coverage from 6 to 18 MHz. This model last appeared in the 1990 catalog.

The Patrolman-6 radios are more than just good-looking units. They are rugged and reliable radios. The back is easily removed so controls and switches can be cleaned and lubricated. The cases are easy to clean – Windex and Novus easily give good results. One feature that greatly assists tuning is the inclusion of continuous fine tuning available to all bands. A fine tuning knob centered in the main tuning knob gives a gear reduction of approximately 40:1 which makes tweaking not only possible, but useful.

SIMILAR SETS

Around 1973, Allied-Radio Shack introduced the Astronaut 6, 12-5060, shown in Figure 7. The case style is quite similar to the Patrolman 6, but the main differences are shortwave coverage on the Astronaut, but no UHF coverage. In 1974, the 12-2060, shown also in Figure 7, replaced the Astronaut 6. This version has the Realistic logo rather than the Allied logo on the case.

Other similar styles to the Patrolman 6 are the DX-60 and DX-66 radios. Two versions of the DX-60 are shown in Figure 8. An example of the DX-66

Figure 9. The DX-66, a 6-band radio, provided SW coverage. Its styling is similar to the other multiband radios described in this article.

Figure 10. The Patrolman 9 has a taller case to accommodate its 9-band dial scale.

is shown in Figure 9. While having a similar profile to the redesigned Patrolman, they have less chrome, and they covered shortwave, thus the DX designation. (The DX-60 also covers the CB band, while the DX-66 covers the Air band.) Similar styles to the original Patrolman-6 are the Patrolman-9, shown in Figure 10, and the Patrolman-CB9, with a taller case to handle the added three bands.

Since these multiband radios cost in the neighborhood of \$100 when new, it is quite probable that the original owners took better than average care of the radios. While they cannot compete with scanners or synthesized receivers, these sets do work quite well within the limits of analog broad-coverage receivers.

Reference: Radio Shack catalogs.

(Charles J. Stadler, 30 Stockton Dr., Monroe, MI. 48162)

A member of the Michigan Antique Radio Club, Charles Stadler has been involved with radio since the mid-1960s when he was in the Marine Corps and trained in radio repair. Multiband radios are his preference — the more and varied the lines, the better.

RESTORATION TOPICS

General Motors Model 219 The Second Chance Radio

BY JERRY WIELAND

Collectors frequently have second thoughts about a rejected radio. Seldom do they get a second chance to confirm the wisdom of their decisions, as Jerry Wieland did. (Editor)

About a year ago while visiting one of my favorite antique shops, the owner asked if I would like to see an interesting radio. I had purchased a few from him so he was hoping to sell me another. He had just unloaded his truck and did not have his new find on display yet. It appeared to be a small table radio with a door, like a smoking stand.

The cabinet was in nice condition. When I opened the door, I saw a panel with three metal escutcheons, as shown in Figure 1. The left escutcheon was labeled "General Electric" at the top and "Volume" at the bottom. The right escutcheon was the same, except it was la-

Figure 1. A front view of the radio showing the three escutcheons. The center escutcheon is the original GM item. The others are for the replacement chassis from a GE Model K-60.

beled "Tuning" at the bottom. The center one was labeled only "GM" and "General Motors." It appeared to be a tuning indicator with two pointers at the center of the opening. The volume and tuning windows had rotating disks behind the escutcheons. The center window had none. There were three knobs, a small wooden one in the center and two phenolic ones on either side.

I could not see the chassis from any angle. Looking at the bottom of the cabinet revealed only a speaker facing down with no baffle. I did see a small metal plate attached to the cabinet with the General Motors name and model number 219. The price was too high for me, and it didn't look right. I passed it up. By my next visit, it was gone. Figure 2 shows a GM Model 219.

THE SECOND CHANCE BEGINS

I received a phone call a year later from the shop owner asking if I would repair a radio for one of his customers. When I went to pick it up, the GE/GM radio was waiting for me. Now I had a second chance to find out more about this strange item.

The first order of business was to get a good look at the chassis. The only way to do this was to remove the cabinet top. Seven screws had to be removed to release the top. They were machine screws, rather than wood screws, mating to threaded brackets attached to the cabinet sides. I could now see the chassis top

Figure 2. The General Motors Model 219 with its door in the open (down) position. The Model 219 found in the antique shop had a chassis from a General Electric Model K-60 installed. (Photo credit: John Slusser, "Collector's Guide to Antique Radios," 5th Ed.)

but had to unscrew four more wood screws to release a board to which the chassis was mounted. The knobs also had to be removed. The speaker was hardwired to the chassis so I had to unscrew it also. By tilting the chassis one way and the speaker the other, both could be removed. It was a tight fit.

The chassis, shown in Figures 3 and 4, had six tubes and a label identifying it as a GE K-60. The schematic for a GM 219 shows seven tubes. I could not find a schematic for a GE K-60 on the Internet.

Looking at the back of the control panel confirmed that the panel had been reworked to accept the GE chassis. The two GE escutcheon holes were crudely gouged out and two new control shaft holes drilled. The GM escutcheon and the shaft hole were factory-made. I bet the GM 219 chassis used the center escutcheon as the tuning indicator. I could see two other partial shaft holes for the GM chassis in the area now occupied by the two GE escutcheons. My original suspicions about this radio not looking right were confirmed.

THE REPAIR BEGINS

Even though the radio was not original, it still warranted repair. The chassis was mounted to a wooden panel by three machine screws. A fourth was missing. Once the chassis had been removed, I could see a rather busy maze, as shown in Figure 4. Reworks had been made in numerous places. Some wax droppings and a power resistor burned in half indicated heat damage. There is no ventilation in this cabinet, and the chassis bottom is sealed by the wooden mounting board. I suspected that trapped heat over the years had done considerable

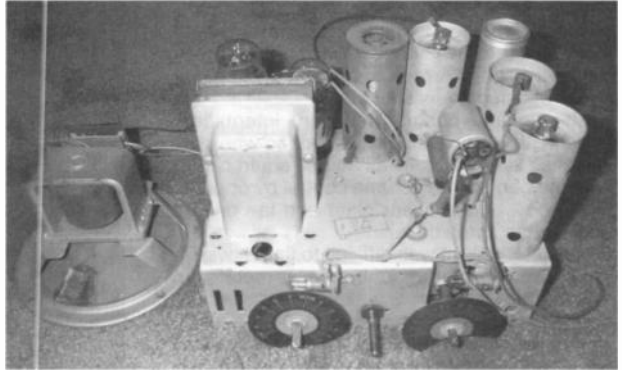

Figure 3. A top view of the GE K-60 chassis.

damage to the components.

I performed my usual power transformer check (it passed) and tube testing (the 80 rectifier had an open filament). I decided to reduce the heat by replacing the 80 with two silicon diodes. I left the tube in the socket for originality (although its not likely anyone will see it). I did extensive component checking before applying any power with the tubes inserted and found the following problems:

- A dead four section electrolytic capacitor (all sections gone)
- Three dead bypass capacitors
- The burned power resistor and its series mate that also looked crispy
- Two grid cap wires that had cracked insulation and were close to shorting
- A ripped speaker cone
- An open power switch on what appeared to be the tone control (center control)
- Cracked and close-to-shorting line cord
- Bad rubber insulation on numerous wires

It took some time to repair all these problems. I was able to clean the power switch contacts. Allen Bradley was nice enough to design the back cover so it could be pried off to expose the switch contacts and the pot mechanism. A good cleaning fixed the switch and probably helped the pot operation. This pot/switch assembly was a rather elegant design.

I guessed at the power resistor values. They were used as a voltage divider for grid biasing. I found a 4-section electrolytic capacitor in my parts bin that I was able to mount with the aid of an extra chassis hole I drilled. A long terminal strip also was added to help stabilize wiring.

TESTING AND FINISHING

After repairing all that looked
(Continued on following page)

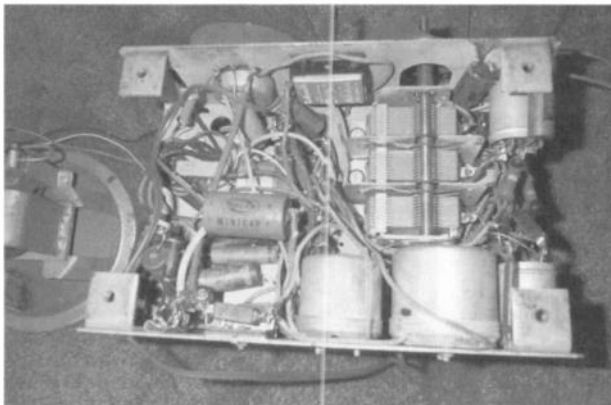

Figure 4. The bottom view of the chassis shows the crammed in components.

(Second Chance Radio, continued)

suspect, I plugged in the tubes and slowly increased the line voltage. I didn't expect much but heard static. A twist of the tuning capacitor shaft revealed a few stations.

The volume control was very intermittent and the radio occasionally went dead when the chassis was moved. I was able to squirt cleaner in the back of the volume control by opening a gap between the rear plate and the control body with a screwdriver.

The intermittent was difficult to find. It was in an IF transformer mounted in a metal can mounted to the chassis wall. Some disassembly was required to remove the transformer so I could take it apart and separate the wires that were shorting. Not a fun job. This chassis layout left a lot to be desired.

Another functional test revealed stable operation. I peaked the RF and IF and got good performance on the AM broadcast band with a clip lead antenna. While examining the cabinet, I noticed metal strips mounted under the leg stretchers. A bottom view of the cabinet is shown in Figure 5.

These four strips were connected in series with wires that routed through holes in the cabinet legs. A wire was routed up through one of the legs into the cabinet. I assumed this was the antenna lead. When I connected it to the radio antenna input, reception was very good.

I cleaned the cabinet, mounted the chassis and speaker, connected the antenna, and declared it restored. Something had to be done about the useless center escutcheon. I dis-

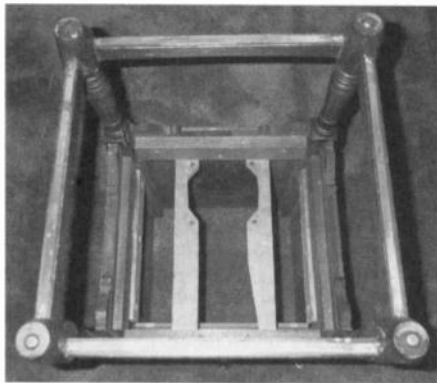

Figure 5. The metal strips located under the cabinet's leg stretchers serve as the radio's antenna.

cussed it with the shop owner, and we decided to remove the escutcheon and cover the hole with a decorative molding.

This radio represents a good case of "Let the Buyer Beware."

(Jerry Wieland, 780 Charleston Lane, Hoffman Estates, IL 60195. E-mail: jeromewieland@comcast.net)

Jerry Wieland is an electrical engineer working in cellular phone development at Motorola. His interest in old radios began at age 12 when he started listening to shortwave broadcasts on a 1930s Silvertone console.

"Bad" Trans-Oceanic Transistors Work Again!

BY MAL FULLER

Repairing defective transistors may seem impossible, but Mal Fuller tells us how. (Editor)

My focus in the radio hobby leans towards AC-powered radios of the 1920s and 1930s. But, recently I was offered a Zenith Royal 3000-1 Trans-Oceanic for a price I could not refuse. Though in nearly mint condition, only the FM worked.

"That's common," I was told by several radio buddies. The problem is usually either the RF amplifier, the oscillator, or the mixer transistor in the AM "front end."

"Good luck finding replacements!" they added.

With the benefit of a Zenith service manual, I found that in the AM front end, there are seven test points, easily accessible without any disassembly. Test point #7 in the collector supply of the mixer transistor was 0 volts instead of -6.7 volts.

I turned the radio off, removed the mixer transistor and repowered the radio. Presto, the correct voltage appeared. A shorted transistor, I thought.

I like to check transistors with an ohmmeter.

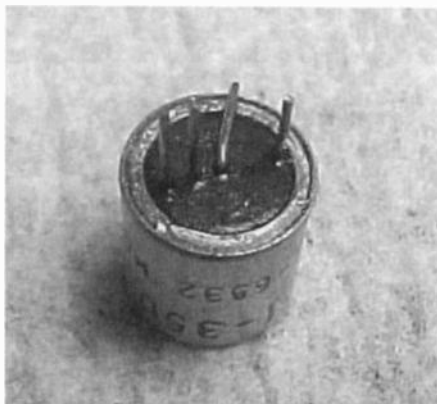

Figure 1. A bottom view of one of the transistors used in the Zenith Royal 3000. From left to right, the leads are emitter, base, case ground and collector. Note that the case ground pin has been bent over so that it will not make contact with the socket.

As many of you know, a few forward and reverse checks on the emitter, base and collector, and a bad (or good) transistor can usually be identified. I looked for the collector-to-emitter short I expected to find. Instead, I found only normal readings on the transistor's three elements!

YOU DON'T SUPPOSE...

Whenever I'm puzzled I scratch my head. After my head was well scratched, a "you don't suppose" idea came to me. Many transistor types have three leads, but, as you can see in Figure 1, these transistors have four leads. The additional lead connects the transistor's metal case to chassis ground. Figure 2 is a closeup of the AM tuner section of the

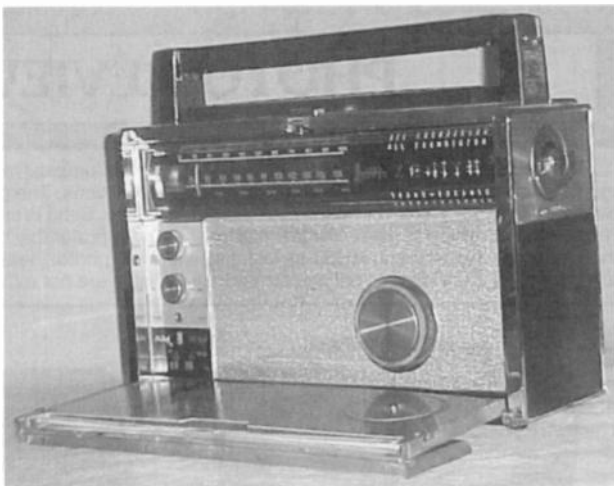

Figure 3. Mal's Zenith Royal 3000-1 Trans-Oceanic.

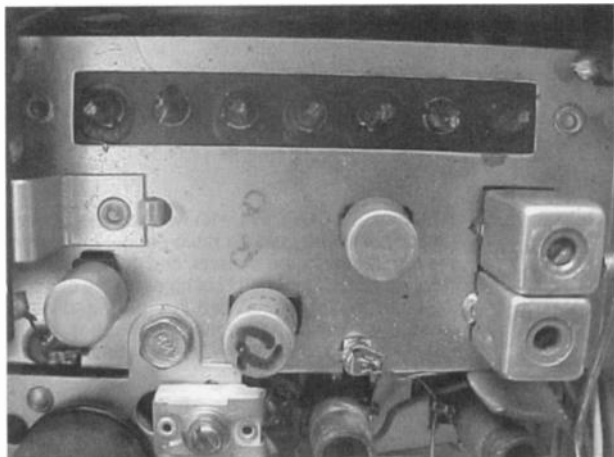

Figure 2. This view of the radio's AM tuner chassis shows the three transistors in their sockets.

Royal 3000-1 and shows the three transistors used there.

A test with my ohmmeter revealed that the collector of the mixer transmitter was shorted to the metal case of the transistor! With fingers crossed, I bent the ground lead over so it would not engage with the transistor socket. I put the transistor back and turned on the radio. Nothing. But, when I went to test point #7 the -6.7 volts were there.

Another "you don't suppose" thought came to me. I removed the oscillator transistor and cut to the chase. Sure enough, while not a dead short in this instance, there was a resis-

tance reading between the case of the transistor and the collector. I bent that transistor's ground lead over in the same fashion as I have already described and plugged it back in. This time, when I powered the radio, it worked flawlessly on all bands.

Of course, I can't say how many of the shielded transistors that Zenith used have failed in this manner. But, I thought it worth sharing since two out of the three transistors in my set's AM front end were so afflicted.

Good substitutes for these transistors are elusive. Most, I understand, will at best cause some degradation of performance, likely, in 1L6 fashion, on the higher frequencies. With the shields disconnected I can find no problem — all bands are right on frequency. Further, everything about the Royal 3000-1 constitutes a shield! Hope this is a help to fans of this and perhaps other Zenith all-transistor models.

(Mal Fuller, 624 North Main St., Wolfboro, NH 03894)

As a "sort of" apprentice, Mal Fuller began fixing radios and televisions before his voice changed. Radio and television repair remained his vocation until the 1980s. While always a collector, he has also returned, full-time, to fixing old tube-type radios for others.

PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

ZENITH MODEL 9S232A – This 9-tube Zenith "Walton" radio was found at a local estate sale for \$40, and the family was happy to get rid of it. Turns out that this is a very unusual set, as it doesn't have motorized tuning. After some research, I found that, in early 1938, Zenith was having problems with the tuning motors, so they eliminated motorized tuning altogether; hence, the "A" at the end of the model number. (Claude Chafin – Independence, MO)

BELMONT MODEL 671 – I have done major work on this "restyled" console radio-phonograph. I removed the top, removed the chassis, and cut the cabinet down to 17 inches. Then I cut holes for the dial and knobs in the top, reinstalled the grille, and refinished the cabinet. It now makes a nice, working, chairside radio. (Howard Brammell – Emporia, KS)

PHILCO MODEL PT-25 – This small 5-tube "Transitone," manufactured in 1939, has a Bakelite cabinet. It measures 8 1/4" in length. (Carl D. Sutton – Ironton, OH)

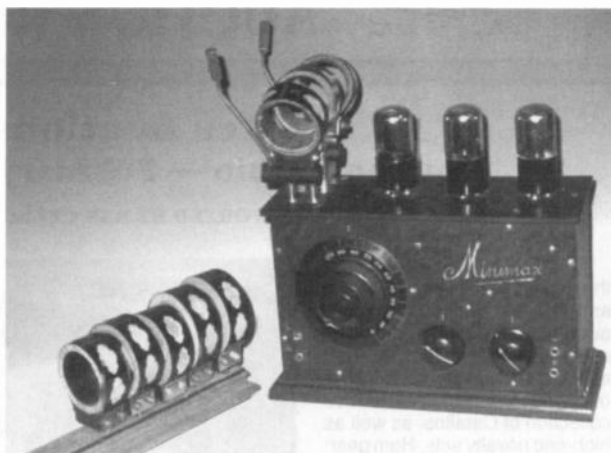

TONE MASTER, MODEL UNKNOWN – Made by DR Co. of Detroit, Michigan, this large dial table radio is an AC/DC set. AC or DC operation is selected by a switch in the rear of the chassis. (Ray Chase – Plainfield, NJ)

PHOTO REVIEW

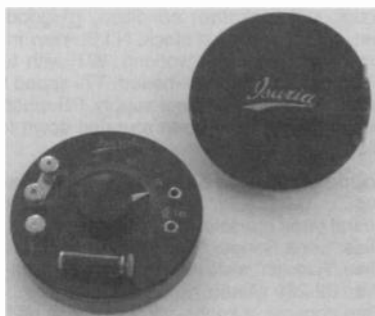

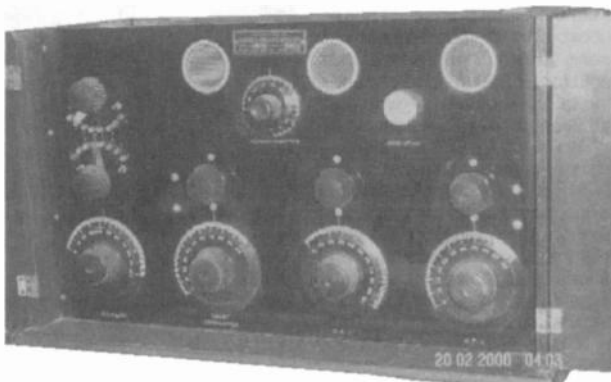

MINIMAX, MODEL UNKNOWN

– This 3-tube receiver was manufactured in 1926 by Minimax, a rather small Dutch company. (G.W.H. Faassen – Reuver, Holland)

BECO, MODEL UNKNOWN

– This 3-tube TRF receiver was manufactured in 1922 by Bissell Engineering Co. of New York City. The site of the factory is now occupied by Lincoln Center. The only advertisement I have ever seen for this set appeared in the October 1922 issue of *The Radio Dealer*. (Merrill Bancroft – Townsend, MA)

ISARIA FORM L POCKET CRYSTAL SET – This pocket crystal set, made in Germany by Isaria Zählerwerke in 1924/25, still has its original plug-in crystal detector. Its variometer tuning is for 450-1800 meters. A description is in the lid. The metal case is dark green. (Erwin Macho – Vienna, Austria)

BLAUPUNKT TYPE V15 CRYSTAL SET – Manufactured in 1945/46, this crystal set with a 1-tube amplifier (RV 12 P 2000) is extremely rare. Only one other set like this is known to exist, and it is in the Deutsche Rundfunkmuseum. (Erwin Macho – Vienna, Austria)

AUCTION REPORT

Estes Auctions Burbank, Ohio — February 21, 2004

REPORTED BY RAY CHASE

This Estes Auction presented the collections of Joe Koester and Dr. Arlo Brakel with other additions. Highlights included many exceptional Zeniths, such as eight shutter-dial sets; a host of Scotts (about 13 in all); a nice collection of Catalins; as well as high-end novelty sets, Ham gear, and some very nice Edison cylinder machines. There was more than the usual number of better consoles, including the seldom seen Zenith Stratosphere that sold for \$7,000 in spite of needing a fair amount of work. In addition, there was a very clean Philco 38-690, a 22-tube, 2-chassis set, that sold for \$900.

Several of the Scott consoles were truly outstanding, and although they brought good prices, they did not command the prices set by comparable Scotts in sales several years ago. For the Zenith collector the offerings were outstanding — eleven Zenith sets sold for over \$1,000 each, totalling \$33,100 or nearly 25 percent of the total sale proceeds. As always, it was a distinct pleasure to see and touch all these fine collectibles even if one was not in a position to buy them.

There was a good mix of other radio items as well, so there was something for nearly everyone. As often is the case, many additional items were coming in on the Saturday morning before the auction started. The sale consisted of over 600 lots and yielded nearly \$140,000, not counting the 5 percent buyers premium which is not included in

These E.H. Scott Philharmonic models sold for \$3,000 (left) and \$3,250 (right).

the listing below. Note that the photographs may show many sets without knobs. This is a security measure taken by the auctioneer, and most, if not all, of the better sets had the knobs available for the purchaser at the checkout counter.

e=excellent, vg=very good, g=good, f=fair, p=poor, unk=unknown condition, gf=good filament, N.O.S.=new old stock, N.I.B.=new in box, wk=working, nwk=not working, WT=with tubes, NT=no tubes, BB=brass-based, TT=tipped tube, SW=shortwave, PS=power supply, PB=push buttons. All prices have been rounded down to the dollar.

- Addison Catalin, red & orange, small hairline, vg \$1,500
- Admiral large console, wk 30
- Airline "Lone Ranger," white, vg 800
- Airline "Rudolph" white plastic, mark on bottom . 800
- Airline 62-289 plastic, no cracks, f 65
- Airline console, 4 knobs, wk, but needs dial cord, g 55
- Alliance small plastic UHF converter 2
- Altec Lansing Bolero 890 speakers, (2) 100
- American Bosch console, 3 knobs, g 20
- Antenna kit, in box 7
- Antenna lamp, w/green dancing nymphs .. 1,500
- Arborphone 3 dialer, NT 20
- Arvin 2T yellow metal midget 35

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

Tom Harris Auctions — Staying Tuned In Marshalltown, Iowa — April 3, 2004

CONTRIBUTED BY TOM HARRIS AUCTIONS

Carrying on his proven method of presenting specialty theme auctions with nationwide participation, Tom Harris held a large radio sale on April 3, 2004. Gathering at the Auction Center in Marshalltown, Iowa, were enthusiasts from all over the country. In addition, there were absentee and phone bidders who could not be present for the auction.

The main auction room was full of every type of radio imaginable, as well as speakers, parts, advertising, projects, other electronic devices and all kinds of related items — even some things that very few, if any, could identify precisely. With the crowd added to the equipment, the room was packed to overflowing. Approximately 780 individual lots consisting of single and multiple items crossed the auction block to head for new homes by day's end. Featured in this auction were the large holdings of a gentleman currently living in Louisiana. More of his pieces and other selections will be offered in a yet to be scheduled event for the fall.

The top item of the day was an RCA Catalin

Bidders had a chance at a cone and a ship speaker in the auction.

with tulip grille selling at \$1,210. Another Catalin, this time a Sentinel with maroon swirl case, reached \$935 when the bidding stopped. For \$880 one pleased bidder took home a nice Deco-styled Midwest console, along with a Federal 61, for \$770. A second Midwest console sold for \$605.

Just over the \$500 mark, a sweet little Stewart Jewel 188 achieved \$550, while a Grunow 1541 came through at \$525. A ship speaker hit \$470 while, at slightly less, a Zenith 410 topped out at \$440. One other speaker, a Music Master, proved quite popular and closed for \$385. At nearly the same level, a bid of \$375 took a green Emerson 74, while \$360 was enough for a nifty Hammond Silver-tone clock radio. Just clearing the \$300 mark was a Hopalong Cassidy 441T. A large and wide variety of items sold in the \$200 and less range.

One of the more interesting aspects of this auc-

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

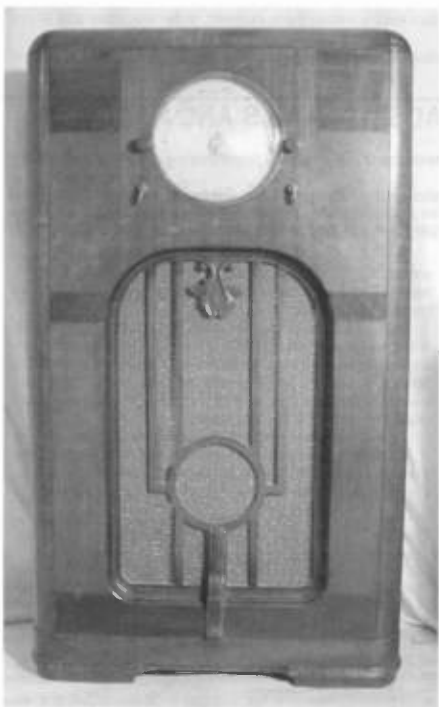

Even with a cracked front plate, this Federal 61 sold for \$770.

This Hopalong Cassidy 441T sold for a little over \$300.

tion's results was that the smaller, used-to-be insignificant tabletop radios seem to be increasing in popularity and demand. In previous years they did not attract much interest, but now the prices are rising. Many enthusiasts are guessing that the eBay internet market has given the whole category a real boost in value. There will be literally hundreds of these easily shippable goodies in Tom's "Specialty Radio Sale," next spring. Better mark your calendars for April 2, 2005 — it will be here before we know it!

Tom and his staff wish to thank all those who participated in this auction, as well as those who attended the recent September 18, 2004 event, which we expect to report in a future A.R.C.

This Midwest console sold for \$605.

\$1,210 — the top price of the day was paid for this RCA Catalin with tulip grille.

Tom and his staff travel nationwide to professionally pack and transport entire collections and/or individual high quality items. Specialty auctions may be held at his Auction Center in Marshalltown, or on site at your location.

For more information regarding the many upcoming events in a wide range of categories, please visit the Web site at www.TomHarrisAuctions.com or call Tom Harris Auction Center in Marshalltown, Iowa, at 641-754-4890.

A handsome Deco-styled Midwest Console selling at \$880.

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify U.S. funds. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. **Originals must be the artwork size listed below.** Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. **Do not cut or trim photos or glue photos to artwork; submit separately.**

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed (size in magazine)		Cost for 1-month	Cost for 3-months	Cost for 6-months	Cost for 12-months**	One Time to Make up Ad

* Full & 1/2 page, 6-mos.: 1/2 due with order; 1/2 due in 3 mos. ** Full & 1/2 page, 12-mos.: 1/4 due with order; 1/4 due at 3, 6 & 9 mos. † For 6 and 12 month ads, no ad make-up charge if no change is made to ad for entire run.

E-mail: arc@antiqueradio.com

Web: www.antiqueradio.com

A.R.C. RATES & POLICIES

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive months up to your subscription expiration; 12-months, maximum) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example, 1, l and I (the number one, the capital i and the small L.) Also: 0, O, o, Q and D; v, r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

Classified Ad Rates per Month

Deadline: NOON ET- 10th of the month!

Subscribers:

First 20 words: **FREE***

29¢ per word for extra words over 20 plus

10¢ per word for a shaded ad (count all words including free words).

* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

47¢ per word plus

10¢ per word for shaded ad.

Please do not forget to send in the extra 29¢ per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

PHOTO & DRAWING DETAILS

**Deadline: 1st of the month
for all ads with drawings or photos!**

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing

(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

*Specializing in Vintage Radios
Complete Auction & Appraisal Service*

West Coast Vintage Radio Auction

Saturday, March 12, 2005 at 10 AM

at Oceanside Masonic Lodge Center
987 Eucalyptus Ave.

Oceanside, California

(Just off Interstate 5)

I-5 to Oceanside Blvd., exit west toward ocean, right on South Coast
Highway, right on Eucalyptus)

Estes Auctions is pleased to announce their inaugural vintage radio auction on the West Coast! In addition to serving the midwest, east coast and southeast U.S., we are now serving all collectors on the west coast and mountain states. We will be offering approx. 250 lots of nice wood and Bakelite table sets, tombstones, cathedrals, transistor radios, advertising, ephemera, etc. There will be no "junkie sets/boxes" in this auction. The majority of the auction contains mostly tube radios from the 1930s-1950s and will include Bakelite.

Plaskon, modern plastic and even some Catalin radios that will be auctioned off. No reserves: See, buy & take same day and avoid the internet hassles. Know what you're buying before you pay for it! Terms: Cash, check, Visa, M/C, 5% gallery fee. Lunch, refreshments & snacks available. The average high on March 12 is around 70 degrees - make plans to attend! Estes Auctions is America's premier auction service for vintage radios - quality consignments now being accepted. Contact Gary Fletcher at radiobarn@earthlink.net or call 760-458-2169.

New Wireless Pioneers

Books, Magazines, Literature Bought and Sold

New Wireless Pioneers buys and sells books, catalogs, magazines and other literature from the 1800's to 1950 that deal with early radio, wireless and electricity. A selection from our list of specialties:

**Pre-1900 Electricity • Pre-1900 Telegraphy • Pre-1925 Radio or Wireless
Pre-1940 Television • Pre-1950 Computers • Early X-Ray**

Magazines, Catalogs, Autographs or Ephemera related to the above topics. Also: Pre-1920 Wireless and Telegraph Apparatus - Radio-Related Novelties and Advertising - Early Vacuum Tubes and Electrical Devices.

Some items available in other technical subject areas also.

Several catalogs featuring items for sale are published each year.

Vintage Radio Auction

Saturday, November 20, 2004 at 10 AM EST

at the Expo Auction Center

8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)

then south to the Duke Gas Station, turn left onto Garman Rd. and follow to the auction site.

The large radio collection of the late Joseph Pentecost, W4GYE, of Nashville, Tennessee will be offered by Estes Auctions on Saturday, November 20. Joseph had a nice variety of radios, speakers, tubes and parts. Some of the items are: Eagle Radio Type B, Musi-King, Valley Electric, Workrite, Butler Bros. Skyrover, Michigan Midget, USL, Crosley Trirdyn, King Cole, Best 5, Erla, Ware Neutrodyne, Majestic, Freed-Eisemann NR-5, Mastertone, Globe Electric, Gilfillian Bros. Nutridyne, Pathé, Bluebird, Atlas, Fada, Acme Flex, Shapleigh Hardware, Browning Drake N5R, Apex Electric. Grebe, David Grimes Baby Grand, American Beauty, King-Hinners, Mohawk, Kodel, Beacon Radio Mfg., Day-Fan 7, Bremer-Tully "Nameless," Radiola 20, Radiola III, Radiola IIIA, Rely-O-Dyne, Arborphone Royal Radio. There are one hundred battery sets. Horn speakers by Music Master, Magnavox, Burns, Atwater Kent and others. Hundreds of tubes to include some early types, boxes of parts. Transformers, tuning condensers, knobs, hardware cabinets full of items. Books and magazines. A very clean Model 10 Atwater Kent breadboard radio. Some nice cathedral and tombstone radios also. This will be a good sale with lots of variety. Make your plans to be here. Terms: cash/check/Visa/MC. 5% gallery fee.

**WANTED: FOR SALE OR TRADE:
VINTAGE HI-FI & RADIO EQUIPMENT,
PHONOGRAPHS AND OTHER EARLY
TECHNOLOGY FOR OUR PRIVATE
MUSEUM**

We are a hi-fi audio/video store with product lines including McIntosh, Yamaha, and Marantz. We have a passion for vintage audio equipment and technology, which led us to start a private museum to display these relics. In addition, we are seeking WWII Italian, German, French, and Japanese military radio equipment.

We may also be able to supply your audio/video system needs. Visit our website or call for details.

We have 45 years of experience in the audio business!

Special

Announcement

Estes Auctions announces the opening of their new West Coast Branch, serving the entire Western U.S., including the Rocky Mountains and West Coast. Estes Auctions have specialized in the sale of radios and radio-related items for 12 years. We are known worldwide for our radio auctions. We also specialize in amateur radio. Auctioneer Richard Estes has been a licensed ham operator for 45 years. We have conducted over 100 radio auctions. The most notable were the Henry Ford Museum Radio Auction and Muchow Historical Museum Radio Auction. We look forward to serving radio collectors in the Western United States. Our Operations Director on the West Coast is Mr. Gary Fletcher, located in Carlsbad, California. Gary will be able to assist you with any questions or concerns you may have regarding the auction process. Gary is also an avid radio collector and is well known in the radio collecting community. He has the knowledge and experience to help you in any way you desire to consign a radio or a complete collection. You may reach us at the following:

Vintage Radio & Phonograph Society Convention 2004

Thirty Years Celebration- 1974-2004

So what does an organization do to celebrate their 30th year? The Vintage Radio & Phonograph Society (VRPS) decided to do it in style: from November 12th through 14th, at its 29th annual convention, the members will witness three live auctions, 2 silent auctions, a contest of some of the finest antique radios, phonographs and related equipment ever assembled, technical sessions, a flea market, an awards banquet and entertainment of the quality befitting a 30th anniversary celebration.

Door prizes, raffles and very nice gift to each paid attendee await those making the journey to Mesquite, Texas (near Dallas) this fall. Read our SoundWaves newsletter or on the VRPS website: www.vrps.org for any additional information on events.

But wait, someone will surely ask what is the banquet entertainment we are so proud of? I would like to be able to announce to you that the Vocal Majority, an internationally known singing group in Dallas, will be there to perform. Well, I cannot, as you see, the Vocal Majority consist of 200+ very talented male singing artists. If this group were all to attend, we would have no room left for the banquet guests to sit. However, we have done the next best thing. A barbershop quartet from the Vocal Majority has agreed to perform for us, as the evening entertainment. This award winning group is known as the Dallas Blend.

But, even that is not enough. James "Rick" Wilkins, nationally known phonograph historian and collector, will be recording several of the songs on wax cylinders using equipment circa 1893. We boldly venture to think that in this age of digital recordings, this will be the first such records produced on wax in this century! In fact, the last known recordings of this kind, were done at the 1978 VRPS convention. Mr. Wilkins also did those recordings using the same 111 year old equipment.

Plan to join us, for a weekend of fun and entertainment and witness history in the making. We do expect a full house, so make your plans now to join us November 12-14, 2004.

REGISTRATION:

To attend Convention 2004 you must be a member of VRPS (Annual dues \$17.50). Please write for a convention 2004 brochure, which will be sent out in September. Pre-registration is \$20, @ door is \$22. Banquet tickets are \$17 advance, \$20 @ door (Limited Available).

Special rates at the Hampton Inn Suites in Mesquite, Texas are \$69 single/double, contact 1-800-HAMPTON (good until 10/11/04). Write VRPS at: VRPS, PO Box 163345, Irving, Texas 75016 or E-mail: bsargent@swbell.net or DeForest22@aol.com or the VRPS website at: www.vrps.org

The Old Timer's Bulletin Back Issue Library on CD-ROM

The entire run of *The Old Timer's Bulletin* (*The OTB*) from Volume 1 through Volume 37 (1960-1996) available on two CD-ROMs. Set up for use with Acrobat Reader 4.0, each page is scanned full-size at 300 dpi resolution so pages are crisp and clear, and look very much like the originals both on the screen and when printed.

Volume 1: *The OTB* Vol. 1, No. 1 (Jan. 1960) through Volume 25, No. 4 (Mar. 1985) **\$49.95**

Volume 2: *The OTB* Vol. 26, No. 1 (Jun. 1985) through Volume 37, No. 4 (Nov. 1996) **\$49.95**

Buy the two-volume set for **\$69.95**

Each CD-ROM also contains a searchable index covering *The OTB* and other AWA pubs. through Feb. 2000.

Runs on both PC and Mac. A free copy of Acrobat Reader 4.0 for PC is included on each disc. Mac users may download a free copy of Acrobat Reader from Adobe at www.Adobe.com. System requirements: 486 or Pentium processor, Microsoft Windows 95 or 98, Minimum 8 MB RAM (16 MB recommended) and 10 MB available hard disk space.

SERVICES: I am the King of Controls and the Deacon of Dials! The famous Blais repro radio dials are back! I bought the whole business last year, and all those great repro dials for Philco, Zenith, RCA and others are back! Mostly the translucent ones of 1930-1938 and the Philco glass dials 1939-1946. Also some Emerson gold foil, Coke Coolers and others. Further, I have the most extensive inventory of replacement controls for your home or car radios, amps, etc! Can also replace bad power switches! You need to put me on your first try list for these and many other items like tubes, knobs, etc! Over 30 years in the antique radio business! No website yet... just e-mail or call your wants. Thanks! Mark Oppat, Antique Audio, 253 Blanche St., Plymouth, MI 48170. (734) 20-RADIO. E-mail: moppat@comcast.net

SERVICES: Can't wait months for a quality antique radio restoration? Then call me. I'll restore your radio promptly and for a reasonable price. I bring 16 years of experience and a passion for perfection to the process. Send me your wretched radios yearning to be fixed! Mike Simos, 100 Commonwealth Ave., Merrick, NY 11566. (516) 223-1470. E-mail: mike_simos@yahoo.com

SERVICES: Repair & restoration of pre-1960 televisions, Predictas, auto radios, amps, 40 years experience. T. Romano, 8 Howe Ln., Millbury, MA 01527. (508) 865-6293

SERVICES: Professional restoration of antique radios and vintage hi-fi. Repairs, upgrades & detailing. Mike Urban, 58 Naugatuck Ave., Milford, CT 06460. (800) 594-4359. Web: www.urban-antiqueradio.com

SERVICES: Rebuild all the old metal 78 crystal cartridges like Astatic, Shure, Webster Electric, EV and RCA. Rebuild the 45 RP 190, magnetic horseshoe for phonos and jukeboxes. Also, the Seeburg Pickering blackhead and redheads. We rebuild the crystal and magnetic cutter heads for record cutter units like the X-26, M-41, Presto etc. Also rebuild the Edison Voicewriter crystal cartridge. We make all new idlers for the VM, 45 RP 190 idlers and cams, and the Zenith Cobra along with some 3,000 N.O.S. We provide record changer, record cutter and wire recorder restoration. Sales and service. West-Tech Services, 570 Hazelgreen Rd., Smithville, WV 26178. Monday-Friday 10-5 EST. Tel/fax: (304) 349-2149. E-mail: westtechservices@yahoo.com. Web: www.west-techservices.com

Price Guides from Radiomania Books By Mark V. Stein

The Machine Age to Jet Age/Tabletop Radio Series

The continuing series of vintage radio pictorial reference and price guides. Each volume is a supplement to the others with virtually no overlap among the three. Over 10,000 vintage tabletop radios are individually described and valued.

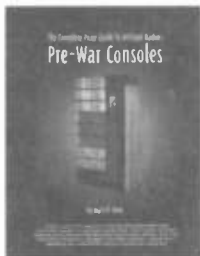

Volume 1: 2,500 radios. Black and white photos. Updated with 2003 market values. Includes master index for all three volumes. 239 pages. \$29.95

Volume 2: 2,700 radios. Black and white photos. 16 page color insert. Updated with 2001 market values and hundreds of variations not previously included. 372 pages. \$28.95

Volume 3: 3,000 radios. Tube and band-count information. Black and white photos. Includes 2001 market values. 256 pages. \$29.95

Volume 4: 2,500 new radio listings. 1,500 new illustrations. B&W photos. 239 pages. \$29.95

The Complete Price Guide to Antique Radios Series

Pre-War Consoles

Identification, grading, and current market values for 3,500 models focusing on the period from 1930 through the end of pre-war production in 1942. Tube and band-count information and variations. Expanded resource section. B&W photos. 240 pages. \$29.95

Sears Silvertone Catalogs 1930-1942

Current market values for 1,000+ radios. Original advertising, options, specs and pricing. Historical preface. Manufacturer source code table. Full model cross reference with tube and band counts, variations, cabinet materials and colors. B&W photos. 240 pages. \$34.95

Everything stocked and shipped promptly — Radio is our middle name.
