Specializing in Vintage Radios
Complete Auction & Appraisal Service

Vintage Radio Auction Saturday June 15, 2013 - 10AM EST

At the Expo Auction Center
8157 Garman Rd., Burbank Ohio

From I-71 Exit #204 turn south on SR #83 then turn left at the Love's gas station onto Garman Rd., follow it 1/2 mile to the auction.

We are pleased to bring you part two of this fantastic radio collection. We know you will be delighted with the quality of the radios in this offering. Ted made sure every radio he purchased for his collection met his high standards for quality. Each piece that went into his collection was an object of beauty, restored to original or better condition. Mr. Rogers made the collecting of radios a part of his life that he truly enjoyed. He also enjoyed showing his collection to friends and fellow radio collectors. Ted was the ultimate radio collector and friend to fellow collectors. Items to be offered in the second auction are:

1931 US Radio and TV Model 8A "Apex"
 1933 Majestic Model 311
 1937 Arvin Model 517
 1954 General Electric Model K-60p
 1926 Freshman Model 6F6 "Masterpiece"
 1931 American Bosch Model 5A "Tower House"
 1933 Philco Model 16B
 1937 General Electric Model 1U-624
 1934 Philco Model 84
 Crosley Cathedral Model 129
 Philco Model 44
 1931 Geneva Model 36
 1934 Philco Model 60
 1933 RCA Model R-28
 1942 Silvertone Model 7039
 1936 Arvin Model 417
 1930 Clearcut Speaker Model 333
 1936 Airline Model 62-229
 1937 Airline Model 62-256
 1923 Majestic Model 151 "Havenwood"
 1934 RCA Model 128
 Crosley Model 435
 Majestic Model 194 "Gothic"
 Philco Model 40-140
 1933 Simplex Model R
 1935 Dewald Model unknown
 1933 US Radio TV Model 24
 1938 Philco Model 38-93B
 1950 Zenith Model G-503
 1946 Olympic
 Zenith Model 6-D-525
 Zenith Model 526
 Zenith Model 827
 Stromberg Carlson Model 58T
 General Electric Model K43
 1927 RCA Radiola Speaker Model 100-A
 1946 Bendix Model 646A "End Table Type"
 1932 Clarion Model AC220
 1941 Zenith Model 6D 525
 1933 Philo Model 16-B

1933 General Electric Model K60p
 1930 Philco "Baby Grande"
 1941 Philco Model 41-22CL
 1937 General Electric Model F-63
 1939 General TV and Radio Model 534
 "Grand Piano"
 1937 Musicaire Model 52AE
 1936 Airline Model 62-425
 1935 Philco Model 59
 Imperial Model 80
 Magnavox Model J Jr. "One Dial"
 Philco Model 125
 RCA Model R7
 1936 RCA Model 5T
 1931 General Electric Model S-22-XC
 1933 General Electric Model L-53
 Philco Model 95TS
 Philco Model 80 Jr
 Emerson Model 107
 1934 National Transceiver Model TRW
 Spartan Model 606
 Stewart Warner Model R1071A
 1941 Philco Model 41-316 Console with
 Wireless Remote Control Box
 1930 Brunswick Model 15 Console
 1939 Zenith Model S-7003 "End Table Type"
 1936 Airline Model 62-197 Console
 1937 Midwest Model 18-37 Console
 1930 Zenith Model 77 Console
 1936 Spartan Model 517
 1933 Atwater Kent Model 145
 1937 Silver Model 139
 1935 Grunow Model 550
 1941 Emerson Model DY-351
 1941 Arvin Model 732
 1938 Marconi Model 112
 1933 Majestic Treasure Chest
 1937 Philco Model 34-604
 1936 Halson Model SLX
 1937 Troy Model - M61

1935 Westinghouse Model WR-207
 1938 Emerson Model BF-204
 1932 Airline Model 62-1355 Console
 Zenith Model 5724 Console
 1930 Stromberg Carlson Model 12A Console
 1938 Philco Model 38-116 Console
 1936 Case Model - 722A Console
 1939 Stromberg-Carlson Model 350V Console
 1936 Stromberg-Carlson Model 130M Console
 1933 Philco Model 89L Console
 1936 Westinghouse Model WR-215 Console
 1938 Airline Model 63-403 "Movie Dial" Console
 1931 Stromberg Carlson Model 25 Console
 1937 Zenith "Chair Side" Model 6-S-147
 1942 Philco Model 42-390 Console
 1936 Stromberg-Carlson Model 145L Console
 1929 RCA Victor Model RF-45 Console
 1935 Westinghouse Model WR-30 Console
 1928 All American Mohawk Model-91
 "Lyric" low boy
 1933 General Electric Model K-107
 1936 Grunow Model 1191
 1934 Silvertone Model 7119
 1935 Silvertone Model 1919
 1936 Silvertone Model 1955
 1934 Grimes Model 453 "Dictator"
 1935 Emerson Model 49
 1946 Hotel Radio Model 6A
 1924 RCA Radiola III
 1933 Emerson Model 35 "Sheraton"
 1934 Emerson Model 375-W6
 1934 Philco Model 66
 1939 Addison Model 568B
 1925 Sialge Radio Model 171-A
 1947 True Tone Model D-1612
 American Boeh Model 440T
 Musette Model 52
 Maniola Model F-1
 Stewart Warner Model 1191
 Philco Model 89

All items are ready for your home or office, or to add to a collection. We hope to see you at this super nice sale!

THE HISTORY OF RADIO ON CD-ROM

Radio Era Archives produced the *QST-VIEW* series of CD's for the American Radio Relay League (ARRL) and over 1/2 million CD's have been sold. *QST* Magazine has been continuously published since 1915. We are now proud to announce that this small mountain of CD's (about 35) is now available exclusively from REA (All Sets) ! Every magazine published from 1915 to 1994, front cover to back cover, every article and column, all accessible with our database search engine

QST-VIEW CD Edition truly captures the history of radio in 11 volumes. All CD's warranted to work on all Windows platforms from Windows 95 through XP. Each set is \$ 39.95 and we have all sets in stock. The sets are: 1915-1929, 1930-1939, 1940-1949, 1950-1959, 1960-1964, 1965-1969, 1970-1974, 1975-1979, 1980-1984, 1985-1989, 1990-1994. Each set of years is a self-contained set so you can operate one or all sets together. Now that large capacity hard drives are so inexpensive, the 36 CD's can be loaded on about 20Gb of hard disc space for instant searching and viewing without having to swap discs! Full information is provided with each purchase and *QST-VIEW* has on-line instructional help for operating the *QST-VIEW* browser!

EACH SET \$ 39.95 (specify the years)

ALL 11 SETS \$ 379

S&H USA for first set is \$ 5.00, add \$ 1.00 each set thereafter
S&H Export first set is \$ 15.00, add \$ 2.00 for each set thereafter

2009 1/2 PRICE SPECIAL (while supply lasts)

Don't forget, we have the entire John Rider's Perpetual Troubleshooters Manuals on a single DVD. All 23 Volumes of the Riders available at the click of a mouse! Over 120,000 different model radio schematics and related service information in an easy to use DVD. Thousands sold at \$ 199. **SPECIAL \$ 99 + \$ 6.00 S&H in the USA, add \$12 for worldwide delivery. Order Now while supply lasts !**

POSTMASTER: Send address changes to
Antique Radio Classified, PO Box 1558,
Port Washington, NY 11050.

Printed in U.S.A.

PURPOSE - Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

Publisher: Jon Kummer; **Layout:** Maureen Schwarz; **Publisher/Editor Emeritus:** John Terrey; **Founding Publisher/Editor:** Gary B. Schneider; **Contributing Editor:** John Terrey; **Contributing Writers & Consultants:** Mike Adams, Ray Bintliff, Ray Chase, Dave Crocker, Alan Douglas, Richard Foster, Daniel Schoo, John Vuolo.

CONTACTING ANTIQUE RADIO CLASSIFIED

All correspondence should be sent to:
A.R.C., PO Box 1558, Port Washington, NY 11050
Telephone: (866) 371-0512; Fax: (516) 883-1077
Email: ARC@antiqueradio.com
Web: www.antiqueradio.com

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However A.R.C. does solicit letters of interest from its readers and publishes them as space permits.

ADVERTISING. Display and Classified advertising rates and artwork specifications are available on the web site.

CHANGE OF ADDRESS. Please notify us in advance of a change of address. Send your new address, your old address, your SUB# and the effective date of the change.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, email, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

NOTICE. Subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

ATTENTION SUBSCRIBERS: All paid subscribers receive a FREE classified ad of up to 50 words in each issue.

Publisher's Comments

The summer months have finally arrived. It's time to get out to the many radio meets that take place around the country. This coming weekend I am attending 2 meets in my general area. When Antique Radio Classified goes to a meet they usually sell magazine samples, subscriptions, and books for the collector and restorer. Sometimes I bring radio items for sale.

We have a list of radio meets in each issue as well as on the A.R.C. web site. Be sure to check out a radio meet in your area.

Restoration Article

In the January 2012 issue we had an article on the First International Restoration Contest conducted by the Quebec Antique Radio Collectors Society. The Society originally held their restoration contest for their member only but this year it was opened to all individuals and clubs.

This month we have an article on the winner of the contest and 6 of the runner-ups. It's amazing what you can do with a basket case giving the time and ingenuity.

Tips for New Collectors

Where the restoration article might pertain to the old time collector, we also have an article on tips for the new collector. This will help the new collector avoid some of the pitfalls that the experienced collector has already experienced. Is the power cord still there? Are the tubes still present? Any signs of rodent visitors? It's a good article both to remind the old timer as good information for the new guy.

Why is the Magazine Arriving So Late?

The staff of A.R.C. consists of myself and a part-time person who works out of her house. Maureen takes care of the magazine layout (making sure the articles and ads are in the correct order) and then sends the file to the printer. We have too few people working on the magazine and there isn't enough revenue for more people at this time.

My immediate plan will be to "double-up" on the next issue. The next issue will be March/April 2013. This will help get up back on track. IT IS IMPORTANT TO KNOW THAT ALL SUBSCRIBERS WILL HAVE THEIR SUBSCRIPTIONS EXTENDED BY ONE ISSUE. In other words, if you paid for 12 issues, you will receive 12 issues. Your mailing label in the next issue will reflect your new expiration date.

I think this will be the beginning of getting us back on track.

Let me know what you think of this idea.

Thank you and until next month happy collecting.

Jon Kummer
Publisher

On The Cover

On the cover this month we have some examples from the First International Restoration Contest sponsored by the Quebec Antique Radio Collectors Society. See page 4 for all the details.

First International Restoration Contest

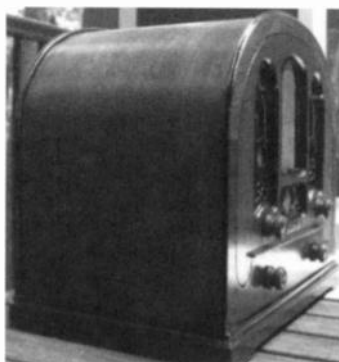

Last March saw the conclusion of the first international restoration competition inaugurated by the Quebec club SQCRA under Serge Hainault's responsibility. Practically all the antique radio clubs of the world were invited to participate. A dozen on three continents accepted to participate and eight presented participants.

This was a big challenge, establish the rules, evaluation criteria, transfer of data from participants to judges, ensuring that the judges understood and used the evaluation criteria all in the same manner. Serge rose handily to the challenge! The participants presentations are very detailed, some containing up to 50 pages, so here we will only present a short resume. Here are the results based on eight criteria.

2013 Points details									
Détails du pointage pour 2013									

Association:	ARCBA	AWA	CHCR	CHRS	MAARC	NZVPS	SPARC	SQCRA

Totals	56,89	59,67	52,13	63,22	69,22	65,22	52,63	62,22	Totaux

The winner, Dan Koczur of the Mid Atlantic Antique Radio Club (MAARC), presented an Atwater Kent 708.

The receiver was missing many parts, there is only a base, a front panel and the rusted chassis. To fabricate of the missing cabinet parts Dan had to find other collectors via the Internet to get close up pictures of moldings, arch supports etc. Rust was removed from the chassis then refinished with a Caswell nickel plating kit. All resistors were replaced by

new ones hidden in molded ceramic tubes painted to the color code of the era and the tips finished with molten lead like the originals.

The flexible resistors were all open and were reproduced using a nichrome wire. All the capacitors were emptied and refilled with new ones, hidden in the old casings. Since the paper capacitors had their connecting leads coming out of the sides, when emptied the ends broke, so new paper ends were made.

The open speaker's field coil was repaired and its cone was replaced by a homemade version. The only negative point is a RF coil which seems to be defective causing one short wave band to have a weak reception. So all in all a devilish challenge!

In second place John Dodgshun of the New Zealand Vintage Radio Society (NZVRS) presented an American Philco 18 with tuning indicator. The front is delaminated and missing some veneer and the chassis is very rusted. The electronics are all there but the primary of the oscillator and mixer coils are open as is the tuning indicator coil. After stripping, the chassis and speaker were sent to a plating shop while the cabinet was restored.

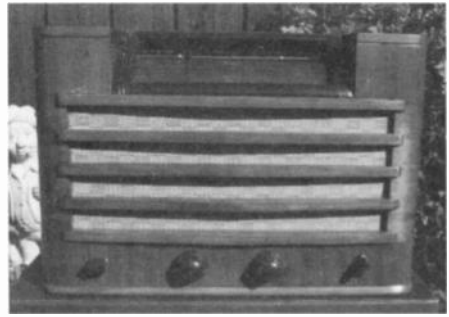

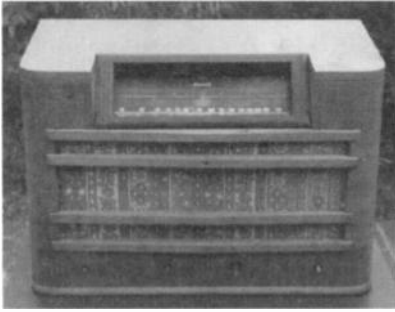

The delaminated front piece is re-glued, a new veneer piece installed and the remaining finish is removed by scraping and the missing moldings fabricated. The reassembling of the chassis meant emptying all the capacitor cans and the Bakelite blocks to fill them with new capacitors. The primaries of the damaged coils were rebuilt. The rebuilding of the tuning indicator required 10,800 turns of 0.071 mm wire and the adjustment of the movement was a challenge.

Two minutes after powering it up, the output transformer fried and had to be rewired. During the restoration an earthquake caused the receiver to fall from workbench to the floor, which added to the repairs.

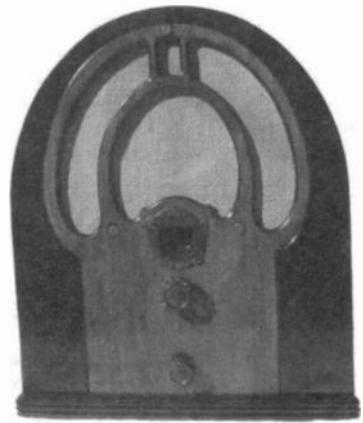

In third place Elmo Giovanetti of the California Historical Radio Society (CHRS) presented a Remler 72. The cabinet, although in bad shape, is complete but for a missing grill element. As for the electronics, it is obvious that this receiver as been used as a parts donor to fix many radios. The complete magic eye assembly was missing as well as the speaker, output and power transformers! All the tubes are missing and the rectifier socket is broken. The dial is peeling and a pilot lamp holder is missing. This is more a reconstruction than a restoration!

A new decal of the dial is transferred on an acrylic piece to restore the dial. Most of the missing parts came from Elmo's and CHRS stock, the speaker was found on the Internet, the power transformer came new from Hammond Electric in Ontario. Since the field coil has a higher impedance than the original the circuit required some adjustment with the aid of a few resistors.

The chassis was painted after cleaning, capacitors emptied and refilled with new ones. A set of knobs was borrowed from a friend and used to make molds which were used to make new ones.

In fourth place *Daniel Labelle of the Société Québécoise des Collectionneurs de Radios Anciens (SQCRA)* presented an American Philco 80 (junior). The cabinet was partially delaminated, some pieces of veneer, knobs and speaker were all missing. The chassis is dirty, tubes and a shield are missing. After cleaning it is noted that the chassis is so rusted that light is visible through holes in the chassis.

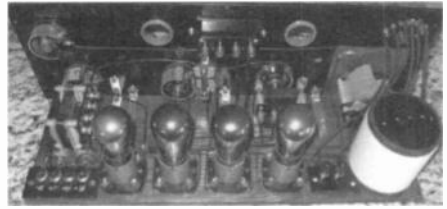

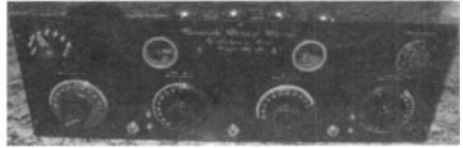

After cleaning and stripping the chassis is treated by reverse electrolysis for 27 hours in a solution of water and sodium carbonate at 12 volts and 1.5 amps to remove all the rust. Then the holes are filled with touch up putty, then primed and painted with chrome color Krylon paint.

All the capacitors were refilled with new ones and one bad resistor replaced with one NOS. During reassembly the secondary of the antenna transformer and the oscillator coil were found open. Another reasonably priced Philco 80 in poor shape with a good chassis was purchased.... the temptation was strong to use it, but since most of the circuitry was already reinstalled on the original chassis only the coils, knobs and the speaker were used to complete the restoration.

In fifth place Dan Merz of the Antique Wireless Association (AWA) presented a Heacock Radiophone R12 from the early 20's. The receiver had been modified many times since it was customary in those years to modify every time a new circuit became available.

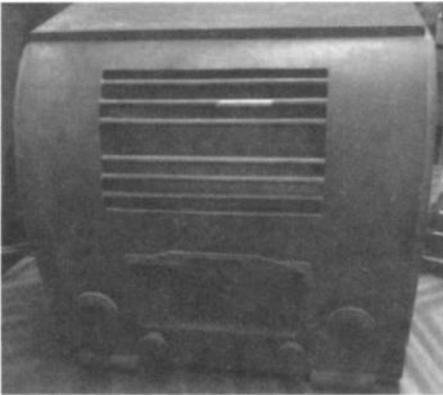

The main tuning coil was damaged it could be fixed, but it was decided to replace it since a plastic tube of the proper size was available as well as the cotton insulated wire. All the

modifications were removed, the chassis cleaned up and varnished and two type CH sockets installed as well as an audio transformer and an RF coil of the Acme brand just like the one used originally. The tuning coil was rewired on the plastic tube after grooves were made to help hold the wire in place like it was customary to do thus eliminating the use of glue. 100 turns of 24 gauge with 8 taps. For the wiring 14 gauge wire was used after removing the modern markings with acetone.

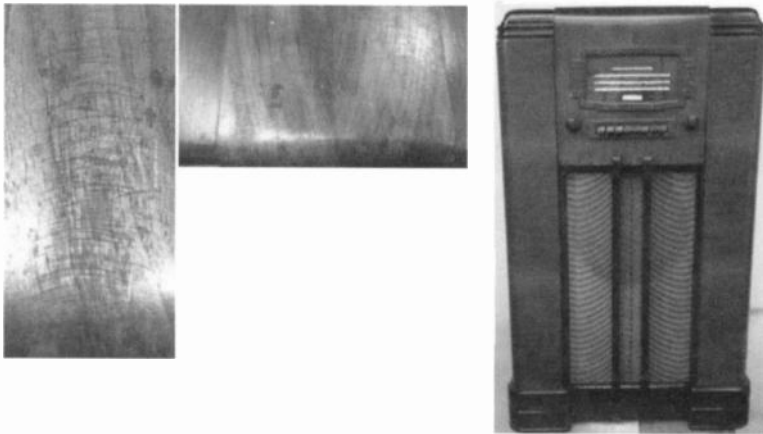

Half a dozen holes had been drilled through the front panel over the years, they were filled with a mixture of epoxy and black paint powder.

In sixth place, the team from L'Association Radio Club du Bassin D'Arcachon (ARCBA) presented a French Lafayette model T-536.

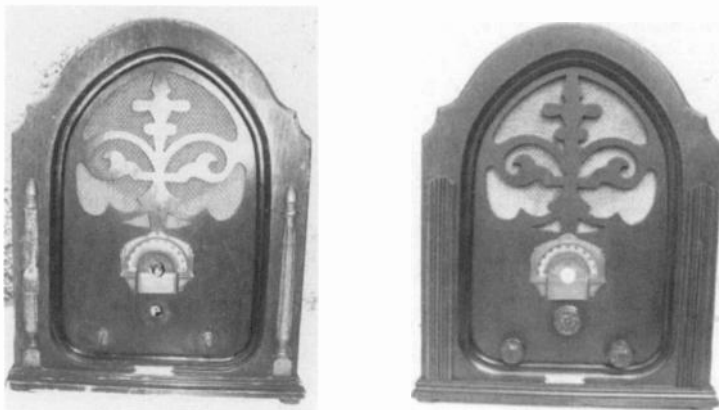

A wood worker, member of the team, restored the cabinet while the others stripped the chassis to clean it and repaint it. The electronic restoration was easy. Most of the efforts were put on fabricating a new dial glass with some very special techniques.

In seventh place the team of the Society for the Preservation of Antique Radio in Canada (SPARC) presented a Canadian General Electric model 66. The receiver had passed decades in a garage after having its cabinet "restored" with a disc sander and covered with polyurethane! The restoration of the cabinet was a long love affair, sanding just enough to remove sander scratches without sanding through the veneer. The knobs were missing so a set was used from an identical radio in display at the museum to make molds from which new knobs were molded. The chassis was cleaned and the electronics restored easily.

In eight place Walter Krieg of the Club Histoire et Collection Radio (CHCR) presented an American RCA Gloria, Export model. The cabinet was restored without great difficulty except for the replacement of the front moldings. The chassis was stripped, cleaned and painted.

The power transformer had to be re-winded. On the variable capacitor shaft a nylon disc was installed to receive the dial string thus giving it a reduction factor of 1/15 to provide more precise tuning. A very nice restoration by this 92 years young passionate collector.

This is only a resume of the presentations of the participants, some 50 pages long, but if you wish to read them they are available on our website at WWW.SQCRA.CA. We hope that this presentation will convince many more to accept the challenge and enter the contest.

Daniel Labelle, from Montreal, Quebec, retired mechanic from Air Canada, collecting radios for the last 43 years, I am president of SQCRA and editor of our newsletter "Radiophilie." dlabelle54@yahoo.ca

Tips for New Collectors

BY TERRY LAYMAN

With another year of radio meets just around the corner, I thought I'd take a few lines to provide encouragement to our newest friends who will be attending a radio meet for the first time hoping to successfully embark on rewarding and satisfying careers as radio collectors. We "old-timers" go about our business at the meets looking over the items available and going through mental checklists that, through experience, clue us in to the item's physical and, sometimes electrical condition as well as its completeness and its appropriate price range. We who do our own repair work (and I speak for myself here) especially forget to recall how it may feel to be a novice who is looking for a reasonably priced "treasure" that is likely to work reasonably well when taken home and will not catch the house on fire. The novice may well feel alone at the meet trying to decide what to pick out among the vast sea of radio and what-nots spread out before his or her eyes. While it is true that almost every seasoned radio enthusiast is happy to impart to the newcomer some help and guidance, the novice may yet feel bewildered and overwhelmed in reaching spending decisions. It is to our newest friends in the hobby that I direct this primer.

HAIL TO THE NOVICE!

1. MAKE SURE IT HAS A CORD! AC

cords seem to have a nasty habit of disappearing when the insulation becomes so brittle as to crumble when bent. If the cord is still there but crumbling just remember that those little electrons coming out of the wall aren't very friendly to each other should the wires meet along the way. Cloth covered wires with deteriorated internal insulation on the wires will make a crackling sound when bent. Even if the cord seems fairly fresh and pliable be sure to inspect the points where it enters the chassis and where it enters the wall plug. These points are most often the first to fray when the cord is twisted. If a replacement plug has been

installed check to see that the wire ends are carefully trimmed and positioned so they do not touch. If a new cord has been spliced to the remains of the old one coming out of the set, beware! This is indicative of shortcut servicing. It may be safe. It may not. Obviously a missing cord renders the set unusable, at least for a while. A missing AC cord may mean any one of the following conditions: 1. Only the cord was bad. 2. The radio may have severe internal problems such as short circuits or burned out transformers, etc. 3. The radio may be battery operated only.

2. CHECK TO SEE IF TINY VISITORS MADE IT THEIR WINTER HOME.

Radios provided "cruise ship" accommodations for small visitors such as mice, roaches, spiders and other unwelcome critters. I figure the mice enjoyed the warm living quarters after the set had been turned off and the listeners left the room. After the radio had been retired and put in the barn, the buffet began. Cloth insulation was generous and tasty for the mice. Not unusual is looking through the front of a console and seeing a big hole where the speaker cone and grille cloth used to be, and, although wax covered capacitors weren't on their list of favorite entrees, I did recently find a third of a .05/600v tubular completely chewed away. Yummy! Fortunately coils inside the chassis are not on the menu, but I have seen a couple cotton wound coils that had been gnawed upon. Be prepared for anything when you see a patch of rust on the chassis. When I refer to the radio as being their home, they do include using it as a bathroom. Another tell-tale sign of rodents is shreds of paper emanating from the bottom edge of the chassis. A friend brought to me his 12 tube Zenith to restore. I saw the signs and after making sure we were standing upwind, I turned over the chassis. The nest filled one half of the chassis - the size of a football. I've pictures to attest to it.

Roaches, live or dead, are quite disgusting. Enough said. Spiders have a habit of leaving

their concentrated "cottony" web remnants in interesting places. I've dug out large chunks from the holes in the tops of IF cans, from between plates of the tuning capacitor, from inside RF and antenna coils, and from many locations throughout the cabinet. Although I don't expect that these presumably harmless remnants disturb the performance of the radio, I don't take the chance. Also, if I can spot the white chunk, the owner might see it as well.... not good restoration work in my opinion.

3. CHECK TO SEE IF THE STEERING WHEEL IS THERE. Seriously, it is easy to look a radio over several times, feel satisfied that it is a good buy, plunk out the hard earned

sweepstakes money, tote it home, and later find that the set is missing a part or two. Even the most seasoned collector can fall prey to failing to notice, during the heat of the hunt, that the prize catch

was not quite complete. On one occasion, I studied a nice little late forties plastic set I favored, purchased the set and later discovered why I found it so easy to examine the inside of the set while at the meet. The loop antenna and back were missing. DUH! That scenario is probably not rare. Even some plastic sets had no backs and the antenna was a little coil on the chassis. Metal Arvins and Silvertones are typically configured

that way. Fortunately for those of us who have amassed piles of old chassis and extra parts, this situation may not cause any great concern other than recognizing our carelessness. For the new collector, it can be a sad disappointment and a source of great heartburn at the seller and perhaps at the club that hosted the meet.

It is, at this point, most prudent to mention to the novice that sellers at radio meets may or may not have much technical background pertaining to radio servicing and maintenance. Even those who do have such experience may not have even checked out the items available at his or her table. You are, in nearly all cases, buying the set AS IS, without warranty or testimonial as to its condition. Do bear in mind however that radio collectors are, by far, truly an honest and honorable lot. If the seller tells you that the radio has indeed been serviced or is otherwise ready-to-go, you can feel relatively comfortable that the set should perform reasonably well with a fair expectancy of safety. If no such assurance is made or if

the seller says that the set has not been tested, you may wish to apply your consideration of the set based on other merits such as cabinet style, external condition, etc. On the PLUS side of the ledger, remember that almost any radio can be brought back to life by a good repairman.

With this in mind, here is a handy checklist of what to be looking for as you survey the radio you can't live without:

ARE THERE ANY NAKED TUBE SOCKETS? Tubes are not generally hard to find....

YET! On radios made from the mid 1930s, tubes are still abundant and can be had without great expense. With the exception of a 6T5 eye tube, you shouldn't have any difficulty scrounging plenty of good, and possibly new-old-stock (NOS), replacement tubes at any well-attended meet. If you favor the earliest AC radios, using such tubes as an 81, a 10, or a 50, you should certainly check to see that the tubes haven't been snatched or that duds or improper tubes haven't been put in the sockets. Replacements can cost way more than the tank of gas it took to get you to the meet. If you have a sweet tooth for Federals and other extremely early sets, be prepared for sticker shock regarding these tubes also. Keep in mind that, regardless of the vintage, some radios require tubes that are very specific and unique to that radio and manufacturer. Substitution is often not an option. Additionally, bear in mind that a common tube such as a 6A8 can come in a variety of shapes and sizes and will not necessarily fit in the radio you are studying. A good example is trying to put a 6A8 metal tube into a 1937 Philco chassis. It can't be done without chewing up the tube socket. A 6A8GT will fit, however the wire that attaches to the cap on top of the tube may not reach due to having to stretch over the edge of the metal shield. Ack! - another consideration. A reverse of the problem would be trying to put a 6A8G into an RCA chassis using metal tubes. The wire might be too short to reach the cap on the taller tube. AND, since the "G" is not shielded like the metal tube, performance problems accompanied by weird sounds are sure to occur. A dealer who specializes in selling tubes should be well versed in the subject. A person with a table full of Philcos or RCAs, etc. is surely a good guide too. Ask around.

On many sets, the speaker cable plugs into a tube-like socket on the backside or top of the chassis, near the rear. If you notice such a socket without the cable plugged in, check to see if the speaker itself is there. Noticing whether or not the speaker is there may seem a bit obvious but remember the missing loop antenna? Also, some wood table models, notably certain Zeniths and Philcos, have the entire speaker area masked by a massive loop antenna incorporated into the cabinet back. Small sockets are often used for connecting such antenna assemblies. On many floor models a loop antenna, resembling a car muffler standing on end, is mounted near the speaker. On others, a loop is stapled above the chassis and the wires are soldered to appropriate connections or a plug and socket is provided. If there is a small three, four, or five pin socket, about the size of a dime, left unattended, search for the antenna. Without this essential part the set won't play at all. Each radio is equipped with a specific antenna designed for that set.

2. ARE THERE ANY TUBE SHIELDS MISSING? Radios of the early 30's through the early 40's used metal tube covers to prevent tubes from electrically interacting with each other in unfavorable ways. The covers are usually made in the shape of cylinders that slip over the tubes and are held in place by clips or specially shaped bases that hold the shields firmly in place while, at the same time, providing a ground path for undesired signals radiating from the tubes themselves. Other styles of tube shields, such as those used in many Philco cathedrals, cover several tubes at once and are held in place by a small clip at one end and by a screw at the other. Tube shields used by one manufacturer may not necessarily fit in a set made by another. An RCA 1940's battery set used cardboard tubes, much like toilet paper roll, lined with copper foil on the inside. A spring clip protruded from the grounded pin #1 and pressed against the foil when the shield was placed over the tube. Most importantly, shields have a purpose and are essential to the proper performance of the set. If you are peering into the back of that monstrous, but fetching, cathedral and envisioning it sitting in your new "radio room" take note as to what might be missing. Once you leave the meet, it's a bummer to find out the iconic Philco 90 you lovingly acquired will have a tough time making pleasing sounds until the shield is in place.

3. ARE THERE ANY DANGLING OR BARE WIRES? Be especially alert to wires that emanate from the chassis. If you see two wires coming out the back it is entirely possible that they are the ground and antenna wires, especially if there is no antenna assembly evidenced. **ALL OTHER WIRES MUST GO SOMEWHERE.** Note if the insulation is in good shape. A number of companies used rubber insulated wire during the thirties and forties. Zenith sets employing push button tone controls are undeniably prone to weathering of the insulation. Considering the high voltage running through the wires to the push-buttons it is imperative that the insulation be intact. Replacing the wiring is a nasty and heavily time-laden job. Wires coming out of the top of metal cans on the chassis, connecting to the caps atop tubes, must not short out to any shields or other metal surfaces. Though voltage present, by design, is miniscule, but the signal is in the wire. Short it out to the metal and your signal is no longer available. By the same token, wires going to the pilot lamps are often in equally poor shape. The heat of the lamps tends to destroy the insulation over the years. Even if the insulation seems ok, observe if the wires are about to break loose from the sockets. They have likely been tugged many times as bulbs are replaced. The voltage is not usually high, but should the wires short to the chassis or lamp mounting brackets the result will be the same: A radio 'Bar B Que'!

4. DOES THE TUNING DIAL MOVE FREELY? Though not usually a "biggie", a non-working or missing dial pointer can lead to frustrating and exasperating moments for even the most adept technician. Dial string becomes stiff and susceptible to breaking as it ages. A broken string commonly ends up in a pile having slipped off the myriad of pulleys and shafts at the front of the set. Some sets have highly complicated dial string systems and unless you have a guide to restringing that particular set, or have a good idea of how it should go your neighbors can be in for an evening of real entertainment. European-made sets (Grundig, Telefunken, Saba, et al) are true nightmares to restring. Your wife dreaming of a vacation to the Bahamas, conflicting with your plans to stay home to restring the Emud, makes for the ultimate in Reality TV. Also, check to see if the pointer is still there. I bought a splendid deco-styled table model once, only to notice later the pointer had long left the building.

5. CHECK THE CABINET FOR SIGNS OF DEMOLITION. Crosleys are my favorite. The wood glue used in these sets tends to allow the cabinet to fall apart. The same can happen to radios of other manufacturers, particularly if the wood has dried out appreciably.

Some chassis are extremely heavy, especially in early model cathedrals and tombstones, and if due care is not exercised in carrying the radio, disasters can happen. You'll notice that smart folks never lift a Philco 90 by the inside of the arched top.

Don't take chances. Gravel on a parking lot can take big bites of an otherwise pristine finish. Always support the bottom of the cabinet. Heavy speakers mounted on the front, above the chassis, can break loose. Check that too. Another thing to look for in wood sets is the condition of the veneer. Generally, slight separation of the veneer front from the underlying plywood is not difficult to fix, provided glue can be inserted from a nearby edge of the cabinet. Speaking of edges, check the back surfaces for separation. Perhaps it is due to the heat escaping around the back of the set, but the edges seem to delaminate and can easily be snagged on clothing and the veneer torn as a result. Again, careful regluing does help eliminate the problem. If an edge is loose, a couple layers of masking tape may sustain you until the radio is safely home.

On plastic sets, check the chassis mounting holes or the bottom inside of the cabinet for signs of over-torquing of the screws. The same can be said for handles and other places where mounting screws are employed. Painted cabinets were common in the forties and early fifties as an inexpensive way to offer a variety of sets to the public. Very small nicks in the painted finish can be touched up. Often the paint cannot be feathered to blend into the cabinet. Over-painting only leaves blemishes in the finish. Where there are major scratches and peeling paint it can be stripped and repainted. I have had tried-an-true success stripping paint from bakelite, and even catalin, using ordinary paint stripper.

OK, so you're ready to make a decision; and you'd like to take your prospective treasure for a test run. You and perhaps a knowledgeable accomplice are ready to plug in the set and anxiously wait for tubes to light and

sound to spew forth. Here are some observations you should make ahead of time that can help you render your final decision. I'll talk about transformer sets first. Power transformers, common in large table models and most consoles, are used in AC only radios. If a plate or paper affixed to the radio specifies AC only, you have such a set. Power transformers are designed to handle the work very easily but can take a beating when other components begin to fail. If there is an odor from the transformer, even when cold, something else created the situation and the transformer is probably "toast". If there is no odor but a lot of goo around the bottom edges, it still might be "toast". Rust and flaking paint is normally of no concern.

Watch carefully for any tubes that begin to glow cherry red. This is a sure sign of a power supply defect which, depending on whether or not the power transformer is shot, could mean that significant restoration is needed. A frying sound from the transformer is a no-no. Smoke is surely about to make an appearance and is an obvious sign the transformer is done. Shorted electrolytic capacitors and other capacitors, as well as tubes, will quickly ruin a replacement transformer. If the transformer doesn't exhibit problems, but you hear a loud hum or absolutely no sound, it may be caused by nothing more than a defective tube. Other components may, and probably, have failed as well. ANY of these symptoms is an alert to pull the plug immediately.

A slight bluish glow on the glass wall of tubes not uncommon and does not necessarily indicate a deficiency in the set or in the tubes.

A very slight hum perceived only at close proximity to the speaker is generally of no great concern, although the filter capacitors may be starting to go south at which time attention will be warranted. Transformerless, or AC/DC sets with a loud hum most likely have filtering problems. However, since there is no power transformer to ruin, the defect is usually more of an annoyance than a real danger. Additionally, power supply parts for AC/DC sets are generally less expensive than for transformer-operated sets since the operating voltages are lower. Transformerless sets' tubes are wired in series, meaning that if one burns out they all go out. In very early sets the tube filaments are fed through a special resistance wire located within the AC line cord. If that wire is broken the tubes will not light. Such wires sometimes can be repaired if the

break is at one end of the cord or the other but replacement cords are scarce and, even if found NOS, are not safely usable. There are remedies, and many solutions are cast on the internet. If you don't feel comfortable doing it yourself or don't want to invest the coin to have it done, the radio may only serve as decoration. Considering how neat many of those little sets are, that is often not such a bad situation.

All radios may give the following symptoms:

A crackling sound from the speaker may be caused by a defective tube or corroded tube pins and or sockets. Such sounds are often created by dirty volume, tone and bandswitch controls. Either situation can usually be easily remedied. A nastier malfunction that has much the same sound is a shorted IF transformer or output transformer. An internally shorted intermediate frequency (IF) transformer will short out the signal. All you hear is a loud crackling sound. Strangely, the problem may disappear for a few moments and all seems fine. Then... If the cause is due to dirty tube contacts, a gentle rocking of the tubes in the sockets while the set is on will indicate this trouble. If the radio was parked in a barn or attic for a few generations, you might see rust and oxidation on the tube pins and socket. They can be sprayed with contact cleaner and buffed to a shine with a brass brush. Dirty controls will show up as culprits as the controls are turned. Pushbuttons are frequent trouble-spots as well. Again, contact cleaner is a good remedy and is available about everywhere.

Tuning controls that crackle are often caused by the plates of the tuning capacitor making contact with each other. The stations may pop in and out as you turn the dial as a result. On dials that have a pointer that slides along a metal guide, dirt and goo may also create noise. The chassis should be removed to correct either condition.

Should the set have very weak volume or sensitivity, the problem could range from bad tubes to poor alignment of the circuit adjustments to an open antenna coil or to any number of capacitors and other parts hidden under the chassis. Touching the antenna terminal or putting your hand over the loop antenna will normally boost the volume if a few adjustments are all that is necessary.

I hope I have taken some of the trauma out of starting your radio collection or finding just the one radio you remember as a youngster or was told about by a grandparent. Remember, each of us veteran collectors was a "newbie" at one time and can easily recall being overwhelmed at seeing a vast sea of radio offerings at our first meet. It is a great hobby and is the only one I can think of that can provide evenings of nostalgia and listening entertainment from now on. Think of those little signals floating around your head, from Cuba and South America, from the Middle East, from Russia, from Oslo, from Belgrade, from Taiwan, and from the greatest station of all: WOWO in Ft. Wayne.

I welcome you to the hobby and that you get the most enjoyment possible from attending radio meets and picking up those darling little sets that are just waiting for you. As you discover the thousands upon thousands of radios, each with a unique style and charm, you will surely and unwittingly become an enthusiastic and savvy collector. I only ask you to save those 60's GE clock radios for me. Thanks.

Since 1991 Terry has repaired radios as a full-time business known as Layman's Vintage Radios in Lexington, KY. With over three thousand radios and associated items crossing his service bench, including eleven hundred or more Philcos getting the rehab treatment, over a stretch of twenty two years, Terry Layman has been doing what he dreamed of doing as far back as 1959.

CLASSIFIED ADVERTISEMENTS

FOR SALE: Atwater Kent Model 33 six-tube receiver. It's complete with correct tag inside the lid, correct tags in the rear, and correct warrantee card on the bottom. Nice looker, but has a blemish on the right-side of the panel.. nothing really bad. \$52 including tubes. Dave Crocker, 35 Santuit Pond Rd., #4B, Mashpee, Cape Cod, MA 02649. Tel. (508) 477-1578, before 9 p.m. EST please. Thanx

FOR SALE: Atwater Kent Model 33 six-tube receiver. It's complete with correct tag inside the lid, correct tags in the rear, and correct warrantee card on the bottom. Nice looker, but has a blemish on the right-side of the panel.. nothing really bad. \$52 including tubes. Dave Crocker, 35 Santuit Pond Rd., #4B, Mashpee, Cape Cod, MA 02649. Tel. (508) 477-1578, before 9 p.m. EST please. Thanx

FOR SALE: Boat anchor power supply, adj AC, adj DC, adj bias 6.3 volts works; Transistor radios: Windsor 2129 Hong Kong, Ross RE1913N Japan, (2) Ross RE1912 Japan all working; Crown HT melody coin 430S Jewel box no working; RCA WV120 power line monitor works. Robert Rossi, 10936 Melbourne Ave., Allen Park, MI 48101. (313) 386-8321.

FOR SALE: Kenwood TS900 transceiver. Includes power supply and microphone. Looks and works nice \$350. Ed Fluehe WA7DAX, 1649 East Stratford Ave, Salt Lake City, UT 84106. (801) 598-9217.

FOR SALE: Vintage battery radios: Amrad Neutrodyne model S522, Atwater Kent model 33, Trego 3 and 5, Freed Eisemann model 10, DayFan model OEM 7, DeForest Crosley model DC5-7-1180, Tresco model W4, Arionola model 4, Radiola III, Crosley V, Westinghouse Aeriola Sr., DeForest F5AL, Miraco Ultra 5, Grebe MU1, Marconi C10A, Freed Eisemann model NR5, Splittord model RV580, Freshmasterpiece w/ built in horn speaker, Airline tombstone model 62-160, RCA speakers model 100A and 103. Also AC sets: Crosley model 58 Buddy Boy and Radiola 18. All are in good condition. Raymond Butler, 130 Forest Ave., Comer, GA 30629. (706) 410-5821. E-mail: rbutler130@charter.net.

FOR SALE: Got an Atwater Kent console with a bad or missing speaker? This one is in very good, working condition, \$30. Also, **WANTED:** Any parts you may have for an Aeriola Sr. 1-tube receiver. Have good box and paper but need better wood panel and better dials. What have you? Dave Crocker, 35 Santuit Pond Rd., #4B, Mashpee, Cape Cod, MA 02649. Tel. (508) 477-1578, before 9 p.m. EST please. Thanx

FOR SALE: Victrola VV-80 s/n 59945 orig mahogany, working, good condition. Asking \$250. Zenith 6-S-254 console, fair, not working. Asking \$40. Photos upon request. Items in South Delaware. Pickup only. Rick Lindquist, WW1ME, POB 153, Harrington, ME 04643. (207) 483-1273. E-mail: ww1me@arrl.net.

FOR SALE: Atwater Kent model 724 tombstone working all original \$200; Crosley model 150 cathedral like new; Atwater Kent model 82 cathedral all original working; Philco 90 cathedral very nice; (2) Zenith model 12S445 consoles with bow front; many Hickok tube testers; Pilot model H224 big table radio has eye tube drum dial all original; Philco 37-670 tombstone with 11 tubes; Sencore model 136 tube checker new in box; Zenith cobramatic phono in beautiful portable burgundy leather case; (25) Zenith portables some solid state; Airline model 512 PeeWee Bakelite; Emerson Fee Wee 4 tube bakelite radio; Hallicrafters S94 radio looks like a S38 \$30; Hallicrafters S38E working 4 band; RCA PB90 velocity mike with manual; Zenith porthole TV round screen 21 inch working; 60 year collection of tubes, etc. at bargain prices; Hallicrafters model S62 working has slide rule dial with original speaker. Bill Kalcik, 1533 River Rd., Wisconsin Dells, WI 53965. (608) 253-9855.

FOR SALE: Specialty tubes: CK5702 subminiature pentodes, Dumont #6292 PMT, 3BP1, 3CP1 CRT, FX-1 EG&G straight flash tube, 1D21 Sylvania, 1P39 RCA photodetector, 1P40 photodetector, CE-18D Centron photodetector, 1B59 Sylvania photodetector, GL917 RCA photodetector, GL919 photodetector, 5819 photodetector, 931A photodetector. John Zima, 1360 Reed Rd., Churchville, NY 14428. (585) 293-3023. E-mail: jfz_rhy@yahoo.com.

FOR SALE: Old original Channel 61 CBS WHUM-TV sign about the size of a license plate, blue on cream, shows signs of normal wear. Pennsylvania station on air from 1953 to 1956, \$70; S53A Hallicrafters receiver, \$115; another Hickok tube tester, mod 799 w/ mod CA-99 adapter, \$345; 1920's nickel coated World crystal radio, Bethlehem Radio Corp., missing glass bubble over galena crystal, \$150; FADA catalin, 202 Series, maroon with butterscotch knobs, top handle missing, no breaks or cracks, \$1250; Mod. 740 Sky Rover wooden table top w/ knobs and good speaker, cabinet rough, parts or repair, \$70; NC 57 parts; Toshiba transistor model 8TM294, 1960, not working, as is, w/ leather case that needs sewn, \$45; RCA 45 record changer 45-EY-3, no breaks or cracks, as is, needs repair, \$65; Stromberg-Carlson 61-H radio w/ wooden knobs, grillcloth torn, \$175; Montgomery Ward Airline, Mod. 62304 battery, left curve table top, good speaker/knobs, rough cabinet and chassis, \$45; lots of T.O. parts, mostly solid state; SX 100 chassis parts; Zenith mod. 1000, 2000, 3000, & 7000 parts and Hallicrafters parts, lots of radios, call with wants; Ron Crowe, P.O. Box 117, Handley, WV 25102. (304) 442-8179; (304) 550-1973 cell.

FOR SALE: Motor mounts and chassis mounting cones for RCA and V-M 45 players, along with wheels and cartridge kits. Phono and tape recorder wheels, belts for most brands. Phono needles, cartridges, 45 adapters, centerposts, AC cords with plugs for record changers! Gary Stork, 37530 E. Meadowhill, Northville, MI 48167. (248) 478 0990. Visit www.thevoiceofmusic.com or email info@thevoiceofmusic.com.

FOR SALE: Gray Zenith Tube Portable 401G \$35. Claude Chafin, 4223 E 42nd St Way S, Independence, Mo. 64055. (816) 478-3391.

FOR SALE: Speakers/modern/military/antique mikes and some nice boat anchors. Howard Felder, 7517 Granada Dr., Bethesda, MD 20817. (301) 320-3028.

FOR SALE: Vintage Aircraft Communication Items Electro Voice differential microphone FAATC RM 1040(A), push to talk, coiled cord with PJ 068 plug, not tested; Headset, Telephonics Corp. TH37B, large ear cushions, fabric covered cord with PJ 055B plug, 300 ohms. PPD Priority \$26. Henry Loos, 542 Tomahawk Ct. Palm Beach Gardens Fl, 33410. (561) 352-8172. E-mail: hcloos@comcast.net.

FOR SALE: 1939 philco under the dash car radio, \$15 or highest bid plus shipping. Joe Koehler, 1919 W Nimisila Rd., Clinton, OH 44216. (330) 882-5281. E-mail: tecumseh547@yahoo.com.

FOR SALE: American Bosch 28 table, American Bosch 29 table, RCA 56X3 table, Zenith K666R Radio/RP, Philco 48-1256 Radio/RP, Zenith 8E20 table, Panasonic RF-2600 John Zima, 1360 Reed Rd., Churchville, NY 14428. (585) 293-3023. E-mail: jfz_rhy@yahoo.com.

FOR SALE: Allied AX190 receiver, very clean, works good \$100. Hammarlund HQ170A with matching speaker \$140. Two Eimac 304TL tubes new in sealed factory boxes, both for \$75. Hallicrafters TO keyer \$20. Ameco converter model CMA \$15. Johnson Viking Ranger Transmitter \$50. Ed Fluehe WA7DAX, 1649 E. Stratford Ave., Salt Lake City, UT 84106. (801) 598-9217.

FOR SALE: Collection of CB radios. Have some classic 23 channel tube base sets and 23 and 40 channel mobile sets, about 15 total. Some working some not working, \$75 of all. Ed Fluehe WA7DAX, 1649 E. Stratford Ave., Salt Lake City, UT 84106. (801) 598-9217.

FOR SALE: Kenwood TS900 transceiver. Looks and works very nice. Best offer. Ed Fluehe WA7DAX, 1649 E. Stratford Ave., Salt Lake City, UT 84106. (801) 598-9217.

FOR SALE: Parts radios: Swan 500, Swan 500C, Drake 2B, Yaesu FT101B, Yaesu FT101E. \$20 each. Ed Fluehe WA7DAX, 1649 E. Stratford Ave., Salt Lake City, UT 84106. (801) 598-9217.

FOR SALE: Used test good USA at \$1.50 each: 6SA7, 6SK7, 6SQ7, 6SJ7, 6SG7, 6J7, 6K7, 12SA7, 12SU7, 12SK7, 12J7, 12K7, 12Q7. The following at \$3 each: 6U5, 6C5, 12SQ7, 12C5, 12U5, 35L6, 35Z5, 50L6, 5U4GB, 5Y3GT. The following at \$6 each: 6SN7GT, 6V6GT, 6F6, 6SL7GT, 80, 41, 42, 52A, 6L6 metal. Plus shipping and handling. Free delivery on orders over \$60.00. Call for other types. James Lopaz, 5467 S. 975 E., Ogden, UT 84405.

FOR SALE: ICOM IC-V82 2 meter radio, hand held VHF transceiver. Complete with antenna, belt clip, AC adapter, battery pack, and battery charger. Mint in box \$150. Roger Simmons, PO Box 224, Gloucester Point, VA 23062. (804) 642-2076.

FOR SALE: Hammarlund HQ-120X with 10" speaker. Shipped \$375, local \$300. Philip Recupero WINWX, 265 Union St., Portsmouth, RI 02871.

FOR SALE: Following used tubes. All test good on Hickok tester: 26 globe \$4; 43 \$2; 12A \$7; 42 \$4; pair 42 globes (look nice) test a little weak but should work fine in old set \$15; pair 46 NOS in boxes \$20. Priority Mail \$6. Robert Larson, 1325 Ridgeway, Medford, OR 97504. E-mail: w7lng@arrl.net.

FOR SALE: John Rider: Perpetual Troubleshooters Manuals Volume 1 through 22. All pages in excellent condition. \$240 pick up only. Stephen Bonino, 107 Georgetown Rd., Glassboro, NJ 08028. (858) 881-0244. E-mail: slbonino524@comcast.com.

FOR SALE: Victor Victrola talking machine VV90-16128. Perfect working condition, all original parts from 1921. Crank works, includes 78s and many extra needles. Original wood in good shape. Make offer. Pick up in Wilton, CT only. Erwin Ruckel, 24 Bittersweet Trail, Wilton, CT 06897. (203) 762-0689. E-mail: ruckel6@optonline.net.

FOR SALE: Yaesu FT1000-D 13 years old. Used only at 100 watts output. Includes MD-1 desk mike, MH-1bb hand mike, SP-5 external speaker with LL5 phone patch installed. Kept under dust cover in non smoking environment. \$1500 plus shipping. Everett McCulloch WR5A, 1701 Westside Dr., Sherman, TX 75092. (903) 892-9074.

FOR SALE: Harvey Wells Bandmaster de lux with power supply beautiful condition \$275 plus shipping. Howard Felder, 7517 Granada Dr., Bethesda, MD 20817. (301) 320-3028.

FOR SALE: Working Philco model 91 chassis complete with tubes and large 3-tube shield and tuning shadow device. Clean, original, no usual Philco chassis corrosion. With knobs and the original speaker (if desired) has newer filter capacitors cans properly installed. \$88 OBO. David Boyle, 303-681-3258; djboylesr@msn.com

From the A.R.C. Bookstore...

Practical Radio Repair – Volume II

by Ray Bintliff

\$22.95 - 126 pages, 315 illustrations, soft cover

Volume I of *Practical Radio Repair* by Ray Bintliff is one of the hottest selling titles in the A.R.C. Bookstore.

Volume II complements the original volume and provides additional information regarding special tools, test adapters, supplies, chemicals, and shop set-up. An excellent book for both the experienced restorer as well as the novice learning repair.

OLD TECH BOOKS & THINGS

A 2,000 sq. ft. museum is not enough space for my 1000+ set collection. And, hundreds of boxes await either space in the museum or sale. Some things must go! Choices must be made. As the late Dr. Muchow said, "As collectors, we truly are temporary caretakers of these historical artifacts."

Items for sale are either duplicates or the result of fine-tuning the scope of my collection.

For details on these items and much more, visit:

www.oldtech.com

or contact:

CRYSTAL CLEAR

By Maurice L. Sievers

Volume 1

750 Illustrations – 570 Crystal Sets
341 Detectors – 207 Crystals
Perfect for the beginning collector!
Useful for the experienced too!

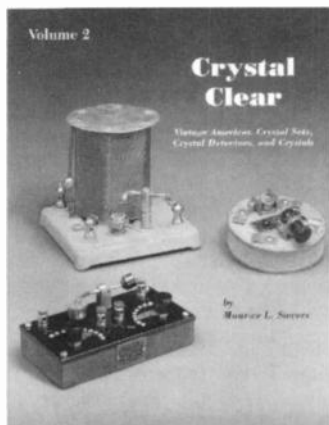

Crystal Clear is the most comprehensive reference for collectors, historians and anyone interested in early radio. In addition to the many excellent photos and reproductions of ads, *Crystal Clear* includes lists showing all sets by manufacturer, set name, selling price and date of manufacture. 8 1/2" x 11", 282 pages.

\$29.95 – Softcover

Volume 2

Crystal Clear, Vol. 2 supplements the first volume. It identifies an additional 172 crystal radio sets, 91 crystal detectors and 26 crystals by manufacturer, model, year produced, description and original selling price. Further research on many of the crystal sets covered in Volume 1. Detailed history on the Philmore Manufacturing Company and the Western Manufacturing Company. 8 1/2" x 11", 252 pages.

\$29.95 – Softcover

Everything stocked and shipped promptly — Radio is our middle name.

A.R.C., PO Box 1558, Port Washington, NY 11050 – Toll Free: (866) 371-0512
Fax: (516) 883-1077 – E-mail: ARC@antiqueradio.com – Web: www.antiqueradio.com

U.S. orders \$3 for first book, \$1 per additional book (typical U.S. order will be received within 7 days, but allow 2-3 weeks). Most orders shipped by next business day. Send payment with order. New York residents add sales tax. Non-U.S. orders, contact us for shipping costs. For your protection, if using a credit card, use our secure website. Do not send credit card information via e-mail.

CLUBS: Send antique radio club and meet information to A.R.C. for free listing here, as space permits. Sorry, we don't have room for hamfests. Always send a SASE when writing to clubs!

Order today. We gladly accept:

\$3.00 shipping & handling on all U.S. orders (typical U.S. order will be received within 7 days, but allow 2-3 weeks). Non-U.S. orders, write for shipping costs, or use credit card. Most orders shipped by next business day. If using credit card, include name on card, card number and expiration date. Send payment with order. New York residents must add sales tax.

A.R.C. RATES & POLICIES

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA, MasterCard, American Express or Discover. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or our secure website. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by credit card via our secure website or send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax. For your protection, please no credit cards by e-mail, use our secure website only.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the last day of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. **Originals must be the artwork size listed below.** Send all artwork via e-mail or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. **Do not cut or trim photos or glue photos to artwork; submit separately.**

If you are confused by these requirements and terms, please

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed (size in magazine)	
	H x W (inches)		H x W (inches)	
Full	7 3/4 x 4 3/4		7 3/4 x 4 3/4	
1/2 H	3 5/16 x 4 3/4		3 5/16 x 4 3/4	
1/2 V	7 3/4 x 2 1/4		7 3/4 x 2 1/4	
1/4	3 5/16 x 2 1/4		3 5/16 x 2 1/4	
1/8	1 5/8 x 2 1/4		1 5/8 x 2 1/4	
Business Card (1st)	2 x 3 3/4		1 1/4 x 2 3/8	
Business Card (2nd...)	2 x 3 3/4		1 1/4 x 2 3/8	

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

	Cost for 1-month	Cost for 3-months	Cost for 6-months	Cost for 12-months	One Time to make up Ad

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 50-WORD AD for subscribers in each issue; additional words are 10¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by **Noon Eastern Time** or the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when an ad is submitted. Free ads are OK via e-mail but for your protection, please use our secure website for longer, paid ads.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SU3# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive months up to your subscription expiration; 12-months, maximum) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital i and the small L.) Also: 0, O, o, Q and D; v, r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address are required in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 50 words may not be used for club activity ads. A discount on display advertising is available for clubs.

Classified Ad Rates per Month

Deadline: NOON ET- 10th of the month!

Subscribers (First Ad):

First 50 words: **FREE!**

10¢ per word for words over 50

Subscribers (Ads after first ad):

10¢ per word for all words

Non-Subscribers:

30¢ per word

Please do not forget to send in the extra 10¢ per word when your classified ad runs over the free 50 words; your payment will be appreciated, and it will help to keep A.R.C. healthy

PHOTO & DRAWING DETAILS

Deadline: 1st of the month

for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$10.00 per month for each photo or drawing

(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address are required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

DO YOU KNOW YOUR A.R.C. SUBSCRIBER BENEFITS?

Since becoming publisher I've asked many of our subscribers about the benefits that come with a subscription to *Antique Radio Classified*.

These have included both our print subscribers as well as our online edition subscribers. The only difference between the print and online subscribers is that the online subscribers pay a reduced subscription rate and don't receive the print magazine.

Many of the people I spoke with didn't know about our subscription benefits.

Let's take a look at them:

ABILITY TO LOOK AT THE MAGAZINE ONLINE

As a print or online subscriber you can look at the latest issue of the magazine online on our web site. This is the entire issue of the magazine and not an abbreviated edition. Subscribers can look at the last four issues of the magazine. Non-subscribers can look at earlier editions of the magazine at no cost.

One advantage of the online edition is that any photograph sent to us in color is posted in color!

ABILITY TO LOOK AT PAST AUCTION RESULTS

Almost every month we publish auction results in the magazine. Did you know that we have a database of the auction prices online on our web

site? Subscribers can look at the auction results and they are SEARCHABLE! If you want to see if a specific radio, piece of equipment, tube, magazine, etc. that has been sold, all you have to do is enter the item and see every time the item has been sold as well as the price, auction house, and date!

ABILITY TO LOOK AT ONLY THE CLASSIFIED ADS

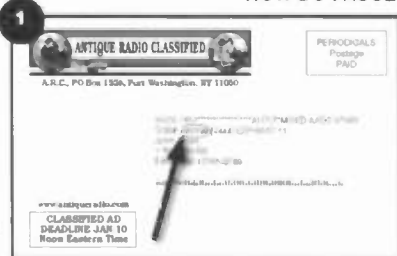

Subscribers can also look only at the classified ads without downloading the entire magazine. This is very useful for readers who just want to read the classified ads. Readers with dial up Internet service will save a lot of downloading time.

FREE MONTHLY CLASSIFIED AD

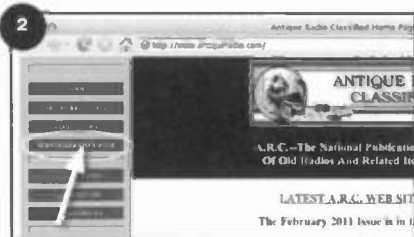

Each month a paid subscriber is entitled to place a free classified ad in the magazine. The classified ad can be up to 50 words. Additional words are 10 cents each. Classified ads can be submitted by email, fax, or mail. Typewritten preferred to reduce possible errors. Name, address and telephone number count as 6 words. Full name and address are required in all classified ads.

Of course the most important benefit to the subscribers of *Antique Radio Classified* are the articles containing information that will help you in increasing your knowledge of our hobby.

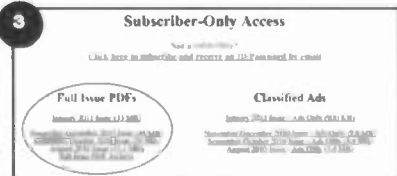

HOW DO I ACCESS THESE BENEFITS?

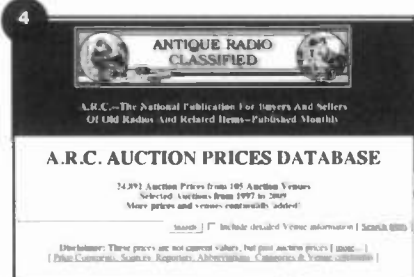

Your print subscriber user ID and password are on your mailing label. Online subscribers are emailed their user ID and password. Your user ID is the number after "SUB#" on your mailing label. Your password is the digits in brackets [xxxx] after your "SUB#".

Go to A.R.C.'s home page www.antiqueradio.com and click on Subscriber Only Page.

On the Subscriber-Only Access page you can click on the Full Issue you would like to view or click on the Classified Ads section from that issue.

Or you can click on the Auction Prices Data Base. Just enter the item that you are researching.
