NBC INTERNATIONAL: UNIQUE SERVICE IN A UNIQUE FIELD

In the realm of world communications, television enjoys a privileged role. No other medium can unite peoples of different lands and backgrounds so quickly, intimately and effectively. And in the field of international television, you will find one organization whose resources and experience have placed it in a class by itself. ■ That organization is NBC International. In more than 80 regions—representing more than 300 stations over the globe—NBC International renders an unequalled service ranging from the construction of TV facilities to the distribution of TV programs. It is a service that not only

grows with the times, but anticipates them as well. Color TV, for example, is mushrooming in popularity throughout the world; and—because of its association with the National Broadcasting Company, pioneer in color TV—NBC International is uniquely prepared to satisfy this increasing demand for color. Uniqueness, in this instance, begins at home, where NBC is the Full Color Television Network. ■ In *all* instances, NBC International has brought a pioneering spirit to global communications—and has become, in consequence, the leading broadcaster in the international field.

Armed Forces Television Stations

All stations are operated by the Military Departments under the jurisdiction of the Department of Defense. The Assistant Secretary of Defense (Manpower) provides policy guidance through his Directorate for Armed Forces Information & Education (AFIE), Washington, D.C. 20305. The Armed Forces Radio & Television Service (AFRTS) in Los Angeles under the jurisdiction of AFIE ships the bulk of the television programs to the stations. The U.S. commercial networks provide television programs to AFRTS. Those stations with asterisks (*) are not a part of the AFRTS overseas operations.

for just a few of their reasons

One of America's shrewdest economists was getting a little concerned about our

Jack Benny, star of stage, screen, radio and TV, and bulwark of the American dollar.

country's money problems. So he wrote this post card to the Secretary of Commerce.

This was the reply Mr. Benny got from the Secretary of Commerce.

Dear Secretary Connor,
I've been hearing so much about America's balance-of-payments deficit and our outflow of dollars that, naturally, I got concerned.
First of all does "balance-of-payments deficit" mean we owe other countries money? If so, how did we ever get into a situation like that? And can't we just owe it to them? Everybody knows we're good for the money. So why should we have to pay it?
Secondly, even if they ask for their money why do we have to give it to them in gold? Won't ordinary American dollars do?
Last but not least, I was wondering if there was any reason for me, personally, to be concerned? Not that I have that much money. But over the years I've managed to hold onto a few dollars. Paper dollars, that is. Do you think they'll remain as good as gold?
Sincerely,

Jack Benny

THE SECRETARY OF COMMERCE
WASHINGTON 25, D.C.

Dear Mr. Benny:

We appreciate your interest in America's balance-of-payments deficit. It is a serious problem, but one we have every confidence of solving with the help of American businessmen and bankers and the understanding of the American people.

To answer your questions: "Balance-of-payments deficit" means more dollars are going out of this country than are coming in. We got into this situation by spending more abroad, over the short term, than we receive from abroad.

For example, American business is expanding overseas, using American dollars to build factories and office buildings for future economic growth. Our military bases abroad and our economic assistance to developing countries take dollars...much more than the dollars we get back, for instance, for the goods we export. As a result, our "outgo" is greater than our income. So, we have a balance-of-payments deficit.

When foreign countries ask to redeem their dollars in gold, we must give it to them because this country is pledged to exchange dollars for gold upon demand. The strength and stability of the dollar and to a great extent, the strength and stability of all the world's currency, depend on our fulfilling that pledge.

Finally, Mr. Benny, you certainly need not be concerned about your personal finances. The dollar is as good as gold. It is backed up by the world's most productive and efficient economy that gets more productive and more efficient every year. In addition, our government, businessmen, bankers, and military are all working together to solve the balance-of-payments problem. And it will be solved.

As President Lyndon Johnson has said, "Those who fear for the dollar are needlessly afraid. We will eliminate our international deficit. We will maintain the dollar at full value."

For the full story on our balance-of-payments situation and what we are doing about it, I am enclosing a booklet, "Keeping the American Dollar Strong." If any of your friends would like a free copy just ask them to write to: "Good as Gold," U.S. Department of Commerce, Washington, D.C. 20230. A postcard will do.

Sincerely,

John T. Connor

To get a good job, get a good education

Jobs demand it. Employers insist on it. So you'd better plan on having what it *really* takes to get the kind of job you want.

Today, there's no fooling about schooling. You honestly need a good education to get a good job . . . a good *paying* job . . . a job with a good future.

So, if you're in school now . . . stay there! Learn all you can for as long as you can. If you're out of school, there are plenty of ways to get valuable training outside the classroom. For details, visit the Youth Counsellor at your State Employment Service. Get a good education . . . you can't get ahead without one.

You need at least one, maybe two, possibly all three.

For master tape production:

The Ampex VR-2000 Teleproduction Videotape* Recorder. Now—for the first time—you get master tapes which can be duplicated to the fourth generation in black-and-white. Get superb, broadcast-quality multiple generation color copies, too. Now—for the first time—you get *total* teleproduction including unlimited editing capability with the exclusive Ampex Editec* System.

For economical studio tape

operations: The Ampex VR-1100 Solid State Videotape Television Recorder. Here's the station workhorse—the most reliable recorder of its kind. No wonder it was specified for 60 installations in one 90-day period. Accessories are optional: add the Amtec* Electronic Editor, Intersync* and color capability extras when you need them. You don't pay for accessories you don't need.

For reliable remote operations:

The Ampex VR-650B Videotape Television Recorder. It's the world's first fully-transistorized portable—durable, trouble-free and lightweight for fixed or mobile use. And now it's available with the exclusive Ampex Electronic Editor. Get the full details. Write: Ampex Corporation, 401 Broadway, Redwood City, California

Assignments Affecting Borders

Channel Allocations for Canada and Mexico

Allocations within 250 miles of Canadian and Mexican borders are as agreed upon by U.S. and respective countries through exchange of diplomatic notes. Though allocations beyond 250 miles of border do not require agreement between countries, Canada unofficially reports assignments beyond 250 miles; Mexico reports VHF within 250 miles, UHF within 200 miles.

Plus (+) and Minus (-) symbols designate offset carrier positions of channels
 (L) indicates limited allocation under "Working Arrangement" of Canadian-U.S.A.
 Television Agreement of 1952, announced March 29, 1961.

what does it take to be first in CATV (and how do you stay there) ?

Jerrold's answer is: "Customer satisfaction!" Our systems satisfy the CATV owner/operator because they're engineered for subscriber satisfaction. When you buy Jerrold, you get . . .

Reputation—15 years and 1,700 systems after we equipped the first commercially successful CATV system, more CATV operators depend upon Jerrold for subscriber satisfaction than upon any other single source. *Jerrold is Number One* in the CATV industry.

Know-how—Jerrold has consistently maintained the industry's largest

staff of development engineers. A staff which has provided such "firsts" as the Channel Commander which made 12-Channel systems a

STARLINE MAIN-TRUNK STATION

All active equipment for any specific location fits into a similar compact housing.

reality. A staff which is justifiably proud of its latest "first": Starline—the new standard for solid-state CATV distribution system quality and performance.

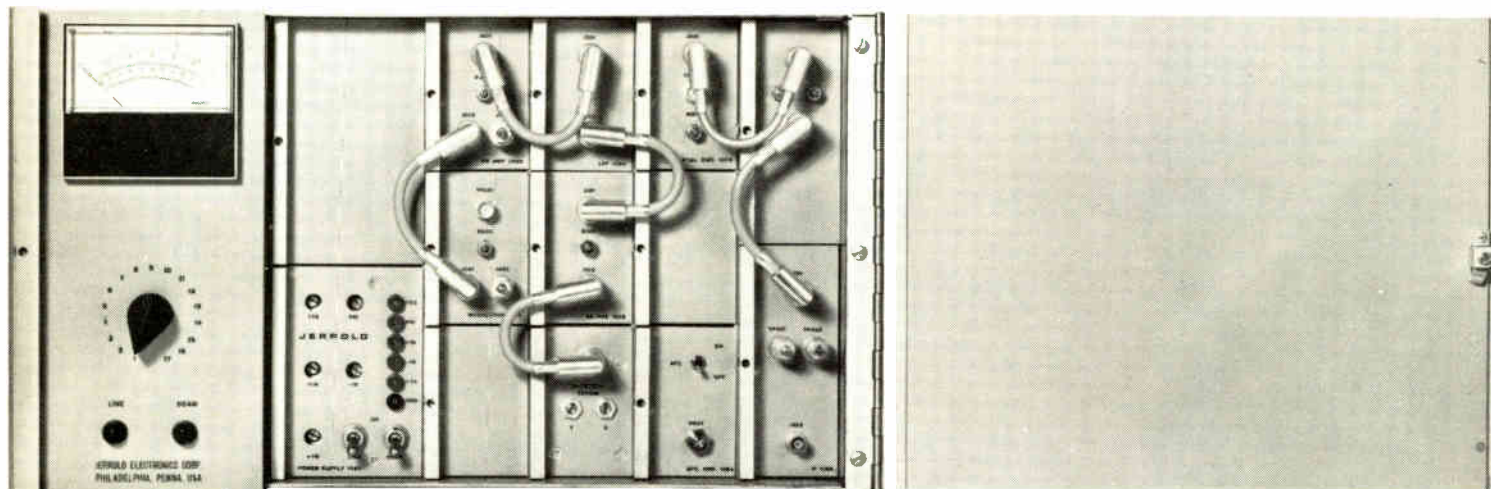

Services—Jerrold has built more systems on a "turnkey" basis than any other manufacturer/contractor in CATV. Our nationwide organization can help you in any and every stage of providing a profitable CATV system—from marketing and engineering-surveys, through system engineering and construction, to turning over to you a complete, operating system.

Whatever your CATV requirement—consult Jerrold first. Call 215-226-3456 or write: CATV Systems Division, **JERROLD ELECTRONICS CORPORATION**, 15th and Lehigh Ave., Philadelphia, Pa. 19132

the shortest distance between two points

new 440 solid-state microwave by Jerrold

One point is your head end, the other a remote program source. Your requirement . . . melt the distance and deliver a first-class video signal. Solution? Specify Jerrold 440 Microwave.

This compact and ultra-stable equipment provides sharp, strong pictures over longer distances. Need only a short hop? The extra power and stability lets you use smaller antennas for overall reduction of system cost.

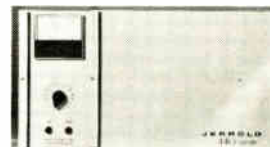

"Solid state—high-output klystron" design provides maximum reliability plus greater fade margins. In a word, the 440 Series by Jerrold is the finest microwave gear available from any manufacturer, at any price. Check the specs—then check the cost.

If you're considering a system in either the 6gc common-carrier band or the new CARS (Community Antenna Relay Service) 12gc band, speak with Jerrold first.

Write today for complete data.

DEPEND ON KAISER-COX FOR CATV LEADERSHIP TODAY AND TOMORROW

The Great New Phoenician Series

NEW Solid-State, All-Band, Trunkline Amplifiers

Featuring unsurpassed serviceability and flexibility ■ Unique design for easy "fool-proof" conversion ■ Die-cast aluminum casing, all-weather and moisture-proof ■ Universal-type fittings to accommodate all popular sizes and types of cable.

THE OUTSIDE STORY

The new "Phoenician" series combines rugged construction, unusual serviceability, and dependable performance under all operating conditions. The 3 sealed access ports permit internal probe measurement in any weather without exposing the entire internal parts. Fittings of new design and moisture-proof seal are backed by Kaiser-Cox warranty. (Patent applied for) The new Kaiser-developed aluminum alloy used in fittings is impervious to corrosion.

*The Kaiser-Cox Phoenician series is ready NOW. The SOLID products you can **DEPEND** on . . . !*

THE INSIDE STORY of the Phoenician Amplifier series. Modular construction of the "plug-in" type allows complete interchangeability from trunkline amplifier to 2 and 4-output bridging amplifier — or combinations of trunkline and bridging amplifier (with or without AGC and automatic tilt). Built-in knob type controls eliminate the need for screwdrivers, plug-in pads or accessories.

SOLID PERFORMANCE! The new Kaiser-Cox "Phoenician" series works as well as it looks . . . CATV's finest all-band, "human-engineered" amplifier. The Phoenician series is your assurance that your CATV system (from head-end to tap-off) will deliver maximum signal quality with minimum degradation at all times. Low noise figure—minimum cross-modulation products — **CASCADEABILITY PLUS** — these are the results of Kaiser-Cox background in the exacting aerospace world of close tolerances, rigid specifications, quality control. An excess of 25,000 man-hours of engineering research and development, unrelenting purchasing standards and production know-how mean these Kaiser-Cox CATV products perform to published specifications.

To get a good job, get a good education

Jobs demand it. Employers insist on it. So you'd better plan on having what it *really* takes to get the kind of job you want.

Today, there's no fooling about schooling. You honestly need a good education to get a good job . . . a good *paying* job . . . a job with a good future.

So, if you're in school now . . . stay there! Learn all you can for as long as you can. If you're out of school, there are plenty of ways to get valuable training outside the classroom. For details, visit the Youth Counsellor at your State Employment Service. Get a good education . . . you can't get ahead without one.

5-YEAR GUARANTEE
 Superior 75 ohm coaxial cable with "Coppergard" shield is guaranteed to be 100% sweep-tested prior to shipment, with no attenuation discontinuity greater than 1% at all frequencies up to 220 megacycles, and with high frequency impedance guaranteed to be 75 ohms plus or minus 3 ohms; and can be expected to show no excessive attenuation increase, provided jacket and/or outer conductor are not damaged during installation and remain free from damage caused by external sources. The specific coaxial cable product manufactured in accordance with the requirements of the factory order number listed below, is guaranteed to be of first quality in material and workmanship. In the event of failure under normal service conditions, when such failure is proved to be caused by faulty material or manufacturing defects, Superior Cable Corporation will:
 (1.) Replace material and pay for labor costs incurred for replacement, if such failure occurs within one year after date of installation.
 (2.) Replace material only, if such failure occurs during the next four years after date of installation.
 This five-year guarantee pertains to Superior "Cell-O-Air" expanded polyethylene coaxial cable only when utilized in aerial installation; and pertains to Superior "Solid-D" solid polyethylene coaxial cable when utilized in aerial or direct burial installations; and is applicable only when proper installation procedures and techniques are followed.

TIMES

Cable: Available in seamless lengths up to 1/2 mile

Timatch[®] perfect match connectors

CATV CABLE & CONNECTORS

Putting a good show on the home screens of your subscribers is one part of CATV show business. Having the equipment to back up your programming—with clear, dependable pictures that don't ghost, fade or give up altogether—is another.

Times 30db CATV cable—and instantly-installed matching connectors—delivers award-winning performance to your subscribers' homes year after year. It's the surest way to keep them happy and put profits in your system's picture. Times cable is trouble-free because of the way it's made:

in continuous seamless lengths up to 1/2 mile. This means fewer splices, fewer trouble points, less maintenance . . . and less labor cost. And because it's seamless, it's water and vaporproof . . . won't stop the signal short of target. All in all, you get improved electrical performance from Times cable and matching Timatch connectors. Long after so-called economy cable has been replaced, Times cable will still be a top performer, even while you're upgrading your system.

To take advantage of this direct way to assure your system's pay-out, contact Times for information on its CATV cable.

We speak eight languages...

all fluently.

Multi-lingual. That's TeleSystems. We're as fluent in Equipment Recommendations as we are in Franchise Procurement. We speak CATV Public Relations, Sales Promotion, Feasibility Research, Engineering and Financing with equal ease. In CATV, nothing sounds like Greek to TeleSystems. That's because we operate systems of our own, build turnkey systems for others, and perform all kinds of services for operators and investors alike. How did we get so fluent? First we learned the mother tongue. Profits.

**HAUL
LONG
OR
HAUL
SHORT**

Two ways to get there

Short haul or long haul? Whichever way you go, you'll find one of Collins' microwave systems the best way to relay television programming.

Low differential gain, low phase distortion and excellent linearity of Collins' equipment assures you that the sharpness, clarity, definition and color hues will be faithfully maintained for transmissions sent over hundreds or thousands of miles.

Collins 5-watt i-f heterodyne microwave systems provide the capability for best long haul color television performance.

Collins 1-watt remodulating equipments offer economy for short to medium haul routes.

Both systems are available in either 6-gc or 11-gc frequency bands, and are completely transistorized—except for TWT's or transmit klystrons. Both have new advanced packaging techniques for ease of maintenance.

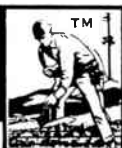

For technical information, call, wire or write Collins Radio Company, Microwave Marketing, Dallas, Texas, Area Code 214, AD 5-9511.

TelePrompTer's vital role in communications reaches all across America!

Some 15 years ago, TelePrompTer Corporation supplied the TV industry with its first prompting device. Today, TelePrompTer is one of the nation's leaders in (CATV) Community Antenna Television Systems, Group Communications, Microwave, and Government Communications; with operations extending from New York City to Hawaii. While CATV and MATV Divisions provide Cable-TV for homes, apartments, education, hotels and institutions, the Group Communications Division provides live, film and closed circuit production service and facilities for industrial and special events throughout the U.S.A. TelePrompTer closed circuit TV helps to train thousands of missile men at the Army Guided Missile School, Huntsville, Alabama.

ELIMINATE CO-CHANNEL INTERFERENCE!

The new
"QUADRATE CHANNELER"
MASTER ANTENNA SYSTEM
has succeeded where all others have
failed. (Case histories on request). Be-
cause of its outstanding performance we
offer this unprecedented

GUARANTEE OF SATISFACTION:
Consult with us on your particular antenna
problem. We will advise you frankly whether
QUADRATE CHANNELER can solve it. If,
based on our recommendation, you buy and
install one of our antennas and are not
completely satisfied with its perform-
ance you can return it within 30
days for a full purchase
price refund.

Here is superior antenna engineering:

- Very Low Sidelobe Level
- Very High Front-to-Back Ratio
- Narrow Beamwidth
- High Gain
- Low VSWR
- Wide Bandwidth
- Weatherproof Construction
- Complete Packaged Assembly

As the world's leader
in the design and fabrication of
antenna instrumentation and antenna test ranges,
Scientific-Atlanta maintains a staff of engineers who live antennas day-after-day.
They are responsible for a long series of
successful radar, satellite and missile tracking antennas used by
NASA, RCA, Naval Research Laboratory, Sperry, USAF, Aerospace Corp. and many more.
These same skills have developed
the "QUADRATE CHANNELER" Master Antenna System
to eliminate co-channel interference and ghost problems.

Custom Design and Consulting Service:

Scientific-Atlanta's antenna specialists are available
to advise you on solutions to your particular problem.
Custom configurations and special antenna systems can be furnished
to fit your "one-of-a-kind" need.

Our careful engineering and successful experience **GUARANTEE SATISFACTION!**

PARABOLIC BROADBAND ANTENNA

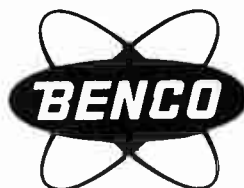

STARTS WHERE OTHER SOPHISTICATED ANTENNAS LEAVE OFF!

The Benco Parabolic Broadband Antenna utilizes tropospheric scatter for over-horizon TV reception beyond normal distances. Over 13,500 square feet of screen area capture and reflect fringe TV signals into a focal point antenna providing picture qualities impossible with previously known hi-gain antenna arrangements. Its narrow forward selec-

tivity and its high front to back ratio serve ideally to overcome most co-channel and adjacent channel interferences. This ruggedly constructed Parabolic Broadband Antenna is available as a standard kit, including hardware and erection instructions from:

ENGINEERING DEPENDABILITY PRODUCTION SERVICE

Due to our top design engineers; the complete dependability of our products; our modern production methods; and our old-fashioned custom of "Service-First"; our sales have increased 400% since 1963 and we are now expanding into our second plant.

Our record speaks for itself when you consider that we started as a cellar operation only 7 years ago, and didn't even begin our national sales program until 1963.

CRAFTSMAN is grateful to the numerous systems who have contributed to our growth, and whom we have encouraged to a higher profit picture through the use of our products.

Remembering that you, our customer, are the life's blood of our company, we at Craftsman continue to serve you and the CATV industry.

Why Dresser-Ideco is "Tallest in Towers"

Let's look at the Dresser-Ideco construction record for 1965 alone:

At Tulsa, Okla., (KTUL-TV), 1909 feet. At Little Rock, Ark., (KATV), 2000 feet. At Eau Claire, Wis., (WEAU-TV), 2000 feet. At Ft. Smith, Ark., (KFSA-TV), 1169 feet. At Mason City, Iowa, (KGLQ-TV), 1529 feet. At San Juan, P.R., (WAPA-TV), 1094 feet. At Joplin, Mo., (KODE-TV), 999 feet. At Television Hill in Baltimore, Md., Dresser-Ideco "lifted" the 700-foot WBAL-TV, WMAR-TV, WJZ-TV "Candelabra" to 1000 feet (in accordance with a capability "built-in" to the original "Candelabra" tower by Dresser-Ideco some years before).

Concurrently, Dresser-Ideco designed, fabricated and installed: (1) at Bethesda, Md., (Washington, D.C.'s WDCA-TV) the world's first self-supporting (no guy wires) "Candelabra," 809 feet; (2) at other sites, many smaller TV and AM radio antenna towers and an imposing number of special antenna support structures for government and industry.

At year's end, Dresser-Ideco, among other projects, was putting up four towers ranging from 1100 to 1500 feet for Georgia Educational TV.

These are the current facts behind the phrase "tallest in towers"... facts to consider if you are initiating station improvement or a new tower.

So far, there's only one applicant

It's Lenkurt's 76 TV microwave transmission system.

This is the system that's bringing top-quality color and black & white TV into areas where they used to think something was wrong with their picture if it didn't have snow most of the time.

For instance, take the 76 TV Studio Transmitter installation at station KOLO-TV in Reno, Nevada. Since the 76 is transistorized, the new system operates with practically no maintenance, quite a bonus to KOLO-TV because one of their microwave terminals is located on Freel Peak, where 20 foot snows and 100-200 mile winds are not uncommon.

Another outstanding feature of the 76 system is its versatility. At the University of Kansas Medical Center, a 76 ETV system makes it possible for students to participate in classes being presented at a sister campus, 45 miles away. This is one of the few two-way ETV systems in existence. This system is significant because of the high resolution it provides for remote observation of medical techniques.

And the Columbia Basin Microwave Company is using our microwave to transmit two off-the-air pickups through an extensive 76 network to serve several CATV companies and school districts.

So, whether you're planning a community TV setup, an Educational TV program, or want to join a network, and you want rugged, reliable equipment to help with top-quality color and black & white TV transmission, you'd be doing a smart thing to write us for the resume on our money-saving, solid-state 76 TV microwave system.

We're thinking all the time... of CATV

and have been ever since the industry was founded practically in our backyard. We pioneered in supplying the earliest cable systems and have continued supplying CATV construction throughout the industry's rapid growth.

If you're thinking—of CATV...

you can benefit from our long experience and large inventories of the top lines of supplies you'll need. You'll build your system with the least possible expense, waste and delay if...when you think of CATV, you think of Pruzan first!

Packaged CATV— from Anaconda

Anaconda's packaged CATV relieves you of *all* the problems, all the guesswork, at every stage in the creation of a CATV system—from initial feasibility studies and surveys of potential market, to engineering and construction. Anaconda furnishes a complete system warranty. All you have to do is call Anaconda, discuss your requirements, and we take it from there.

What, specifically, does Anaconda supply? Complete systems research, development, design and engineering; subscriber commercial survey; a signal availability study; a signal verification survey; a receiver site location study; local marketing assistance—and, finally, a complete system backed by full system warranty.

Anaconda packaged CATV systems

utilize the finest components available: flexible, moistureproof Sealmetic® Co-axial cable, system-evaluated electronic equipment and hardware—all selected to assure the highest long-term system reliability.

It will pay you to talk with your Anaconda man. Anaconda Wire and Cable Company, 605 Third Avenue, New York, N. Y. 10016.

CANADA WIRE **ALUCEL**

Your assurance of coaxial quality!

ALUCEL aluminum sheathed polyethylene coaxial cable has been designed and produced since 1961, expressly for all CATV system needs. Over 30,000 miles are in use in U.S.A. and Canada today.

How can you be sure ALUCEL is right for your system? Quality control is Canada Wire's assurance to you. Constant production checks show that on the average, minimum structural return loss at any frequency between 7 and 216 Mc/s is 32 d.b., and "ghosting" is eliminated by close control of impedance.

Are you worried about connector pull-out problems? ALUCEL'S precisely controlled dielectric extrusion diameter, regulated adhesion to center conductor and controlled drawdown of the aluminum sheath through selected dies, absolutely insures properly installed connectors will not pull out.

Make sure that your CATV system is up-to-date equipment—specify ALUCEL by Canada Wire.

THE PHOENICIAN SERIES

MINIMUM RF CHASSIS CURRENTS

Kaiser-Cox Phoenician amplifier design provides a completely coaxial transmission line path to the actual amplifier input-output terminals. This insures a minimum of RF chassis currents which cause unwanted discrepancies in the response curve.

AN OPEN LETTER TO CATV OPERATORS

from

FREDERICK W. FORD, *President*
National Community Television Assn.

Dear CATV Operator:

The year 1966 promises to mark a major turning point in the CATV industry. The momentous developments that received widespread national attention in 1965 are certain to be over-shadowed by the events of the current year.

In Congress, at the FCC, and in the courts, problems vital to the industry's and the public interest will occupy the minds of many men. We are hopeful for, and expect, a reasonable resolution of these problems.

It will not be easy—change is never so. It will require a concerted effort by ALL CATV system operators to arrive at our goal: The establishment of a national policy to assure that the people of the United States shall have access to the greatest practicable diversity of television programming, whether by wire or radio.

The membership of the National Community Television Association is united in its determination to obtain the practical accomplishment of their goal.

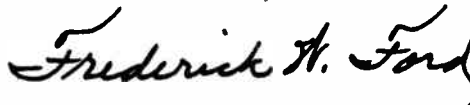

Our cause is just, and we are determined to fight until the correctness of our position is recognized, and CATV becomes integrated into the communications industry and assumes its rightful place in striving for a common objective of the CATV and broadcasting industries—namely, the greatest service to the greatest number of people that our free enterprise system will permit.

We do not desire to win that rightful place through the weakness of the arguments of our opponents, but only through the strength of our own and the correctness of our position.

As a CATV system operator, you have a vital stake in the deliberation of the issues. Through NCTA, your voice can be heard and heeded at the places where your presence must be felt if our efforts are to be successful. If you are not already a member of NCTA, there is no better time than now to join your nearly 800 fellow CATV system operators who are working together for your best interests. We welcome *your* participation.

P.S. For a membership application form and descriptive brochure on the benefits and services offered by NCTA, write today to Membership, National Community Television Association, 535 Transportation Building, Washington, D.C. 20006. Your investment in NCTA is an investment in your own CATV future.

Sincerely,

Frederick W. Ford

ameco
the leader in
Cable Television

TOTAL SERVICE — TOTAL CATV

Ameco, Inc. with more than \$13 million dollars in assets, has the capability to provide the total products and services required to build, rebuild, or expand CATV systems. Now listed on the American Stock Exchange, Ameco is out-pacing every other CATV manufacturer. Ameco has five buildings with an over-all capacity of 100,000 square feet. Since 1962, Ameco has produced over 78,000 solid-state amplifiers. More than 10,000 Ameco 70 Series amplifiers are in use in CATV systems throughout the U. S. And, 80% of the CATV systems in the United States and Canada rely in whole or in part on Ameco equipment.

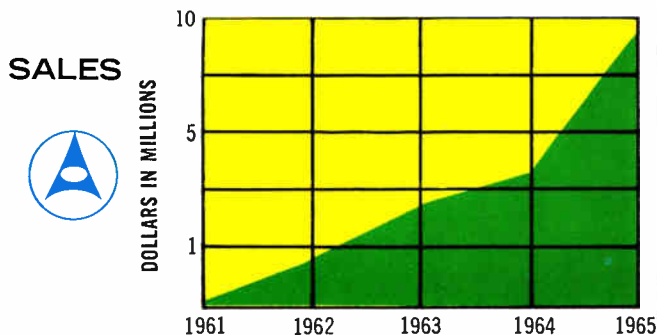

Ameco sales have increased dramatically. In 1961, sales totaled \$500,000. In 1965, sales rose to the \$10,000,000 mark. Currently, sales are running more than \$2,000,000 per month.

Ameco services enable you to provide your customers with the best cable television viewing available in the United States today. Two of Ameco's services are now pacing the industry.

The Ameco Acceptance Corporation offers financing for new system construction and rebuilds. AAC has established an unlimited line of credit and will tailor financing to meet your individual system requirements.

Co-ax Construction Company has built more than 7,500 miles of turnkey plant. This Ameco subsidiary utilizes its own construction personnel and can handle any size construction job throughout the nation.

Ameco has the people, products, resources, and knowledge to serve all your CATV requirements. **When quality counts — count on Ameco!**

EXPERIENCE IN EVERY PHASE OF CABLE TELEVISION

WorldRadioHistory

GROWTH IS A MEASURE OF SUCCESS. From 1956 to 1965 Ameco's overall plant size was increased from 38,000 square feet to over 100,000 square feet.

Engineering Research & Development Engineering is the keystone of any CATV system. Ameco's engineers are experts in all phases of engineering: construction and installation, signal surveys, system layout, head-end alignment. Their goal: the most effective products possible, realistically priced, designed with precision, efficiently produced.

Construction Coax Construction Co., newly formed subsidiary of Ameco, Inc., is staffed with experienced CATV construction personnel. CCC offers system owners a complete turnkey package, or, qualified assistance on any construction problem.

Financing Ameco's "custom finance plans" enable you to obtain finances with terms tailored to your particular needs. Headed by Dick Peterson, Ameco's finance subsidiary offers the personnel, experience and backing to assist you in building a new system or rebuilding an old one.

Sales Service Regional warehouses are located in major cities; 10 contract sales representatives, and 23 CATV sales engineers, are located strategically throughout the U. S. and Canada. This coordinated sales-service program assures you and your customers of consistent, continuous system performance.

LOOKING AHEAD We've come a long way in CATV, but the future promises even more, especially in the field of public service. CATV will shine as color TV becomes more readily available. Educational TV will benefit from CATV service. Weather channels will multiply, news and information services will become readily available to subscribers. Ameco has all the necessary qualifications — plus the vision and ingenuity to anticipate and fulfill the ever growing needs of CATV.

When Quality Counts = Count on Ameco!

Top People Read Television Digest

For their reasons, turn to page 249-c

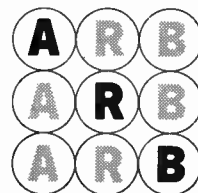

Isabel Brown turns them down

We have a long list of volunteers eager to become a part of the American Research Bureau's sampling activities. People write to us regularly requesting that they be included in our audience surveys, eager to cast their "vote." But Isabel Brown turns them down.

As Field Staff Director, she knows that good sampling requires using only those people who are *selected* during the due course of ARB's procedures . . . the idea being that everyone in the defined universe is given an equal opportunity for selection. This is the critical criterion. We don't have to ask everybody, but once we do make a selection we are particularly concerned that those people, and those alone, participate.

For those over-eager volunteers, we have to make a friendly policy. *Don't call us, we'll call you . . . maybe.* It just has to be that way to keep ARB audience reports as good as they are.

Why not go VIKING SOLID STATE?

Viking's all new HIGH LEVEL INLINE MODULAR SOLID STATE AMPLIFIERS have been designed to provide MORE CASCADABILITY, HIGHER GAIN, LOWER NOISE FIGURE and MORE OUTPUT CAPABILITY than any other competitive design... with all silicon RF transistors and rectifiers.

No other Solid State Amplifiers offer so much value at so low a cost. After years of research and development VIKING brings to the CATV industry a complete line of amplifiers that meet the requirements of an ALL-BAND system necessitating the use of fewer amplifiers resulting in trouble free installation and low maintenance costs.

GO VIKING FOR THE FINEST SOLID STATE EQUIPMENT.

VIKING SOLID STATE AMPLIFIERS offer all of these valuable features:

60 AMPLIFIER CASCADABILITY – a 12 channel system of more than 60 main line amplifiers in series or better than 1400db of cable can be built for signal-to-noise ratio in excess of 40db.

LOWEST NOISE FIGURE – at full gain, 10db maximum – At 10db gain reduction 12db maximum.

OUTPUT CAPABILITY – 50dbmv minimum at 57 db crossmodulation, full-tilted.

BUILT IN AGC – is an integral part of the amplifier and operates by changing gain after the second stage of amplification with an insignificant change in noise figure in proportion to AGC action.

BUILT-IN THERMAL EQUALIZER – the VIKING AGC is designed to tilt the response curve to compensate for change in cable attenuation due to climatic variances, eliminating the need for separate thermal equalizers.

NO SPECIAL TEST PROBES – All test points externally available with "F" type fittings.

PLUG IN PADS – the mainline AGC amplifier is designed with separate plug-in pads so that, after several amplifiers, each band can be individually readjusted or to permit the amplifier to be used as either a low band only or high band only AGC amplifier.

BUILT IN DIRECTIONAL COUPLER – a -10db directional coupler is externally built into the unit to power associated bridger or line extender amplifiers. External test points are provided.

LIGHTNING PROTECTION – every Solid State amplifier is protected by special circuitry up to 10,000 volts. The AGC amplifier has a full wave power supply with no D.C. component.

MODULAR CONSTRUCTION – the internal unit of the amplifier can be replaced within seconds without disconnecting cable fittings or unsoldering components. When a bridger amplifier is disconnected, the trunk signal and A.C. power is undisturbed. All amplifiers pass AC power through rugged connections whether internal amplifier unit is in place or not. The RF modules may be up-dated when improved transistors become available so that the amplifier will not be out-moded.

WEATHER AND RADIATION PROOF – 2 piece die cast and hinged housing requires no additional weather-proof housing or radiation shielding and provides easy accessibility to all controls.

VERSATILITY – amplifiers may be messenger mounted from either the side or top of the housing as well as direct pole or crossarm mounted.

INLINE INSTALLATION – all amplifiers may be installed directly into the cable line without requiring pole or additional support other than the messenger strand. The need for jumpers and extra connectors are completely eliminated resulting in 22% reduction of material and labor costs.

FITTINGS – stocked with special VIKING designed SM412 and SM500 SUPER-MATCHED fittings. Center conductor has full one inch engagement of cable in Super Match connectors which allows for maximum expansion or contraction due to climatic conditions. Available with all other fittings upon request.

CAS Combines Reliability with Competitive prices for your best buy in CATV equipment

CATV EQUIPMENT

Whether you are building, modernizing or extending a CATV system, your best combination of reliability and price is CAS performance-proved solid state CATV equipment. Low initial cost keeps your installation expenses down...high unit reliability keeps your profits up!

Write today for this
*CATV System Equipment
and Accessories* brochure.
Check the electrical specifica-
tions and prices of the full
line of CAS products.
CAS reliability costs no more!

You can be "reliability conscious and cost wise" when you depend on CAS for your CATV equipment. Competitively priced, it functions reliably regardless of environmental conditions...cuts maintenance costs, reduces system downtime and keeps subscribers happy!

(For a typical CAS equipment reliability story, please see overleaf.)

P. O. BOX 47066 • DALLAS, TEXAS 75207
214/BL 3-3661

Mr. M. D. McGuire and the reliable CAS TRA-217 amplifier.

Let CAS stop your amplifier problems

More than 250 CAS amplifiers in Abilene, Texas, CATV system operate for 12 months without a single failure. That's over 1,500,000 amplifier hours of trouble-free operation.

How's that for reliability? CAS performance-proved TRA-217 solid state amplifiers are unaffected by lightning surges, transistor or other circuit failures . . . reduce subscriber downtime and keep component maintenance to a minimum.

"No Failures"

Listen to what Mr. M. D. McGuire, chief engineer of TV Cable of Abilene, Inc., says:

"We now have more than 500 CAS TRA-217 amplifiers in our system. Most of them have been in use since

November 1964. After all that service we have had no failures. The CAS amplifiers continue to deliver signals with no deterioration and require a minimum of technical attention."

The TRA-217 amplifier has trunk line capability, yet is priced low enough for use as an extender. It is especially well suited for use in limited cascade (10 or less) or as a high-level extender with practical output of +40 db with at least 6 db reserve.

CAS reliability is available in a wide range of CATV products and services

. . . from temperature compensated solid state equipment to experienced system design and construction.

Write today for information how CAS capabilities can help you build, modernize or extend your CATV system.

JERROLD

FIRST IN CATV

The nation's largest, most experienced manufacturer /
supplier of CATV equipment and services.

WorldRadioHistory

when Jerrold hands you the key you're in CATV

Jerrold "turnkey" service can pave your way to CATV profits!

This, we admit, is a bold statement. We urge you to verify it. How? Simply examine Jerrold's fifteen-year CATV record. We believe that the facts will convince you that Jerrold can put you in business faster and more profitably than any other CATV contractor.

Learn for yourself why Jerrold equipment does the job better, lasts longer, requires less maintenance. By all means, compare Jerrold equipment and specifications with any others on the market.

Find out why Jerrold has built more systems on a "turnkey" basis than any other manufacturer-contractor in CATV. Discover why we say: "*Satisfied subscribers make operators contented Jerrold customers.*"

Finally, consider the comprehensive Jerrold "turnkey" package. We provide every necessary service from market and feasibility surveys, through construction, financing, community relations—to handing you a completely operational CATV system.

Television Translator Stations

As of March 7, 1966

Vhf and Uhf Channels

Dagger (†) preceding a listing indicates station(s) are licensed.

Asterisk (*) preceding a listing indicates construction permit(s).

When a community has a translator licensed and another with a construction permit only, these symbols precede call letters.

Absence of symbols means that an application has been filed, but FCC has not yet taken action.

Channel numbers are contained in call letters:

For example, Ch. 3 is indicated for Clear, Alaska, by K03BE; symbols # # indicate call letters not yet assigned.

Call letters and location of station repeated are in parentheses.

Forward-thinking broadcast executives have been calling upon EMCEE Translators, for the past ten years, to solve coverage problems. And, EMCEE has delivered the widest possible range — at low cost with little maintenance! Here are a few reasons why you should consider EMCEE equipment to solve your coverage problems:

EMCEE Translators extend signal range under the complete control of the station.

EMCEE Translators remove coverage problems within the framework of existing broadcast principles . . . and the public doesn't pay for the service!

Available in all authorized FCC types, EMCEE Translators come in 1 watt VHF to 100 watt UHF, including the newly authorized 100 watt VHF Translators. If you would like to discuss the application of EMCEE Translators to your station coverage problems, call us. There's no obligation. Yes, most of the translators installed in the U.S. today are EMCEE products.

* The equipment listed herein is considered acceptable for use in the television broadcast service, provided operation is in accordance with the Commission's rules and that the technical specifications as listed herein are not exceeded. "Type acceptance" is required for listing of transmitters and translators. For monitors, "type approval" is required for listing.

In most cases, type acceptance is based on measurements made when the transmitter is used with certain external components specified by the manufacturer. In such cases, the type number listed identifies the assembly, including the transmitter and external components identical to those used for the type acceptance measurements.

^A Type accepted for monochrome transmission only.

^B This is a power amplifier only.

^C This entry shows power ratings at upper extremity of frequency range indicated.

^D RCA transmitters with suffix "PC" equipped with RCA type TFC-IA exciter.

^E Visual exciter rated at 10-watts output power and having an output frequency range of 4.5-14 mc.

^F Power amplifier for use with Adler equipment only.

^G Translator multiple output power amplifier to be used with VHF translator.

HURRICANE BETSY FAILS TO SHAKE FORT WORTH TOWER COMPANY INSTALLATION!

"personnel are already on the job salvaging as much of the many miles of plant as possible. The tower, installed by Fort Worth Tower Company remained intact despite 170 mile winds and a tremendous tidal wave which destroyed the chain-link fence at the base, and actually blew the paint off the tower"

An on-site inspection report by Jim Davidson, president of DAVCO Electronics Corporation, the firm who is rebuilding the cable television system at Buras, Louisiana. The system was almost completely destroyed by Hurricane Betsy.

Your Fort Worth Tower installation will probably never have to prove itself in a hurricane but isn't it assuring to know that it could. You can't do better than to specify towers designed, manufactured and erected by FORT WORTH TOWER COMPANY for every communications purpose. For COMPLETE information WRITE — PHONE — WIRE.

Why Dresser-Ideco is "Tallest in Towers"

Let's look at the Dresser-Ideco construction record for 1965 alone:

At Tulsa, Okla., (KTUL-TV), 1909 feet. At Little Rock, Ark., (KATV), 2000 feet. At Eau Claire, Wis., (WEAU-TV), 2000 feet. At Ft. Smith, Ark., (KFSA-TV), 1169 feet. At Mason City, Iowa, (KGLO-TV), 1529 feet. At San Juan, P.R., (WAPA-TV), 1094 feet. At Joplin, Mo., (KODE-TV), 999 feet. At Television Hill in Baltimore, Md., Dresser-Ideco "lifted" the 700-foot WBAL-TV, WMAR-TV, WJZ-TV "Candelabra" to 1000 feet (in accordance with a capability "built-in" to the original "Candelabra" tower by Dresser-Ideco some years before).

Concurrently, Dresser-Ideco designed, fabricated and installed: (1) at Bethesda, Md., (Washington, D.C.'s WDCA-TV) the world's first self-supporting (no guy wires) "Candelabra," 809 feet; (2) at other sites, many smaller TV and AM radio antenna towers and an imposing number of special antenna support structures for government and industry.

At year's end, Dresser-Ideco, among other projects, was putting up four towers ranging from 1100 to 1500 feet for Georgia Educational TV.

These are the current facts behind the phrase "tallest in towers"...facts to consider if you are initiating station improvement or a new tower.

'ENGLISH ELECTRIC' SERVES THE TV INDUSTRY—AND THE VIEWER!

These English Electric camera tubes incorporate an entirely new target material giving an operational life expectancy of at least 3 times that of normal tubes.

THE ELCON* TARGET ACHIEVES:

- Guaranteed life of 750 hours
- Complete lack of image retention—no sticking pictures
- Sensitivity fall-off greatly reduced—sensitivity remains constant for life
- Stability of contrast reproduction—no matching problems
- Immediate switch-on—no warm-up delay.

Experience has proved that operational lives of 3000/5000 hours are obtainable. Another EEV development in ELCON tubes is the complete absence of image-induced microphony. The availability of these new improved EEV Image Orthicons means that the picture will be better than ever.

** ELCON is derived from the properties of the new EEV target—namely, EElectronic CONducting as opposed to the familiar ionic conductors normally used.*

Why should you care about Mrs. Brennan?

Chances are you don't even know Mrs. Brennan. She's rather an everyday housewife. Shops. Scrubs floors. Makes peanut butter sandwiches for three kids. On occasion, she's even been known to stand up and speak her piece at PTA meetings. Mrs. Brennan's an everyday housewife, *but not an ordinary woman*. She accomplishes what she sets out to do with a vital dedication and enthusiasm.

That's what makes her important to ARB . . . and to you.

You see, Mrs. Brennan is an ARB interviewer, one of hundreds in communities all over the country. She's close to her community and its people. She works *in* her community. If you think she makes a mean peanut butter sandwich, you should hear her gain the cooperation of selected sample families and note her pleasant, courteous follow-up calls. She's a real professional.

So you really should care about Mrs. Brennan. And, someday when you are pondering an ARB audience measurement report, remember her. We do. And it sure makes us feel a lot more confident.

Do yourself a favor—start exporting.

You'll be doing your country a favor, too.

There's money in exporting. Who knows—it could even double your business.*

How does it help your country? Simple. The more we export, the better we'll be able to reduce our balance-of-payments deficit. For really helpful information on world markets and how to break into them, just pick up the phone and call your local office of the U.S. Dept. of Commerce.

*It happened to one of America's largest chemical companies. And there are dozens of others—large and small—that have been just as successful abroad. Case histories on request from U.S. Dept. of Commerce, Washington, D.C.

Published as a public service in
co-operation with The Advertising Council
and the Department of Commerce.

Why should you care about Mrs. Brennan?

Chances are you don't even know Mrs. Brennan. She's rather an everyday housewife. Shops. Scrubs floors. Makes peanut butter sandwiches for three kids. On occasion, she's even been known to stand up and speak her piece at PTA meetings. Mrs. Brennan's an everyday housewife, *but not an ordinary woman*. She accomplishes what she sets out to do with a vital dedication and enthusiasm.

That's what makes her important to ARB . . . and to you.

You see, Mrs. Brennan is an ARB interviewer, one of hundreds in communities all over the country. She's close to her community and its people. She works *in* her community. If you think she makes a mean peanut butter sandwich, you should hear her gain the cooperation of selected sample families and note her pleasant, courteous follow-up calls. She's a real professional.

So you really should care about Mrs. Brennan. And, someday when you are pondering an ARB audience measurement report, remember her. We do. And it sure makes *us* feel a lot more confident.

Do yourself a favor—start exporting.

You'll be doing your country a favor, too.

There's money in exporting. Who knows—it could even double your business.* How does it help your country? Simple. The more we export, the better we'll be able to reduce our balance-of-payments deficit. For really helpful information on world markets and how to break into them, just pick up the phone and call your local office of the U.S. Dept. of Commerce.

*It happened to one of America's largest chemical companies. And there are dozens of others—large and small—that have been just as successful abroad. Case histories on request from U.S. Dept. of Commerce, Washington, D.C.

THE FULLER ORGANIZATION

1339 WIDENER BUILDING, PHILADELPHIA, PA. 19107 • (212) WA 5-9900

The Fuller Organization, with more than 250 employees, is a closely integrated four-company and three-division graphic arts complex dedicated to the typographic and printing needs of American business.

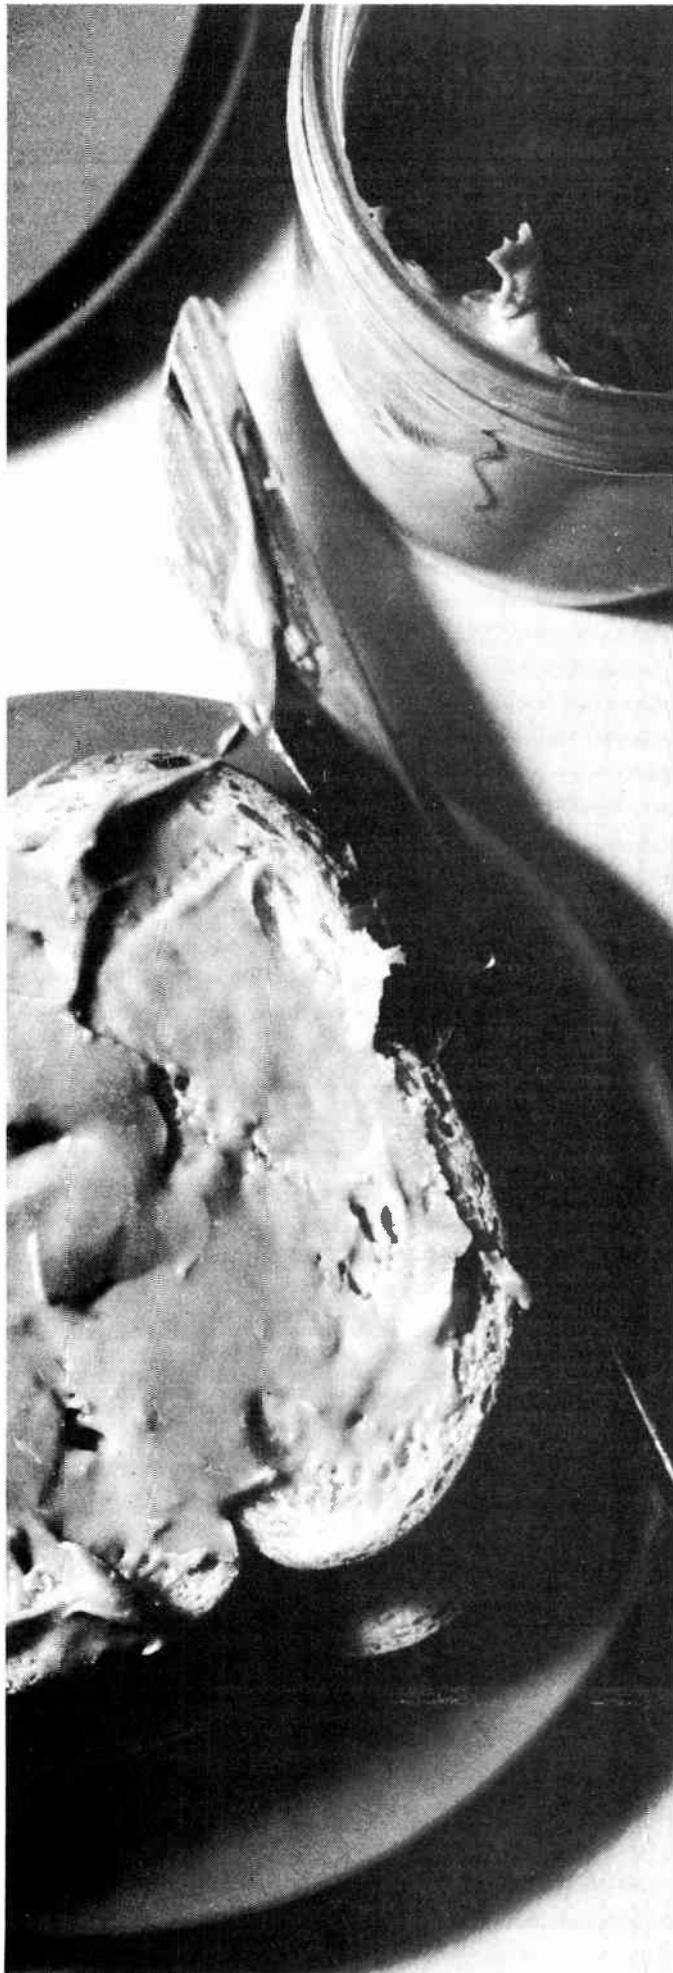

Twenty-five linecasting machines, eight automated with teletype keyboards, are augmented with an IBM computer to give typesetting capacity of unusual volume.

Fourteen letterpresses and twenty-four offset presses, including a 4-color 25" x 38" perfecter, a 16-page tabloid-size rotary and other sizes up to a 2-color 35" x 45", round out our unusual printing capability.

Whatever your typographic, letterpress or offset printing requirements may be, or wherever your delivery, this organization will welcome your inquiry by letter or phone.

Why should you care about Mrs. Brennan?

Chances are you don't even know Mrs. Brennan. She's rather an everyday housewife. Shops. Scrubs floors. Makes peanut butter sandwiches for three kids. On occasion, she's even been known to stand up and speak her piece at PTA meetings. Mrs. Brennan's an everyday housewife, *but not an ordinary woman*. She accomplishes what she sets out to do with a vital dedication and enthusiasm.

That's what makes her important to ARB . . . and to you.

You see, Mrs. Brennan is an ARB interviewer, one of hundreds in communities all over the country. She's close to her community and its people. She works *in* her community. If you think she makes a mean peanut butter sandwich, you should hear her gain the cooperation of selected sample families and note her pleasant, courteous follow-up calls. She's a real professional.

So you really should care about Mrs. Brennan. And, someday when you are pondering an ARB audience measurement report, remember her. We do. And it sure makes us feel a lot more confident.

Television Equipment Catalog

EDITOR'S NOTE: With this 1966 Edition of the Television Factbook, we inaugurate this catalog of television equipment. It will be developed to cover all aspects of television—broadcast, CATV, educational, instructional, industrial, governmental, promotional, etc. The purpose of the Section is to develop a single, quick-reference source of detailed catalog data exclusively devoted to television. For reservation of catalog space in the next edition of the Factbook, write:

from tap to total system

more than 500 Jerrold products

will satisfy your CATV needs

Only Jerrold offers a complete line of compatible CATV equipment from head end to subscriber.

Take antennas as an example—we manufacture more than 100 types. And you'll find our microwave equipment ideal for a short one-hop or a complex multi-channel, multi-hop link. At the head end we offer everything from preamplifiers to the Channel Commander signal processor that made 12-channel systems a commercial reality. For the *criterion* of all-band distribution "Look to Starline" the solid-state, 12-channel system.

The main point is: Jerrold is your *one best*,

single source for everything in CATV—including cable, subscriber hardware, and test equipment. If more than 500 dependable products are not enough, our extensive engineering facilities stand ready to design, manufacture and, if necessary, modify any component to meet your unique requirements. When in need, simply phone 215-226-3456, or write:

AMCI BROADCAST EQUIPMENT for VHF and UHF-TV and FM

VHF-TV
Transmitting Antennas

VHF-TV TRANSMITTING ANTENNAS
Mast or tower-corner mounted
DIRECTIONAL OR OMNIDIRECTIONAL
for Channels 5 to 13

Omnidirectional VHF-TV antennas with power gains up to 20. Directional VHF-TV antennas with power gains up to 36.

UHF-TV TRANSMITTING ANTENNAS
Mast, tower-corner, or truss-mounted
DIRECTIONAL OR OMNIDIRECTIONAL
for Channels 14 to 83

Omnidirectional UHF-TV antennas with power gains up to 50. Directional UHF-TV antennas with power gains up to 80.

FM TRANSMITTING ANTENNAS
Mast or tower-corner mounted
DIRECTIONAL OR OMNIDIRECTIONAL
For single or multi-station transmission.

UHF-TV
Transmitting Antennas

SPECIAL PURPOSE ANTENNAS

The Empire State Building Master FM Antenna; two rows of dipoles around the 102nd floor observation level, the diplexers within the tower, and the transmission line, designed, built, and installed in 1965, permit up to 17 FM stations to broadcast simultaneously from the same antenna.

FM Transmitting
Antennas

DIPLEXING FILTERS

Temperature compensated. Aural-to-visual and visual-to-aural rejection over 30 db. For use with transmitters up to 50 kw.

**VESTIGIAL
SIDE BAND FILTERS**

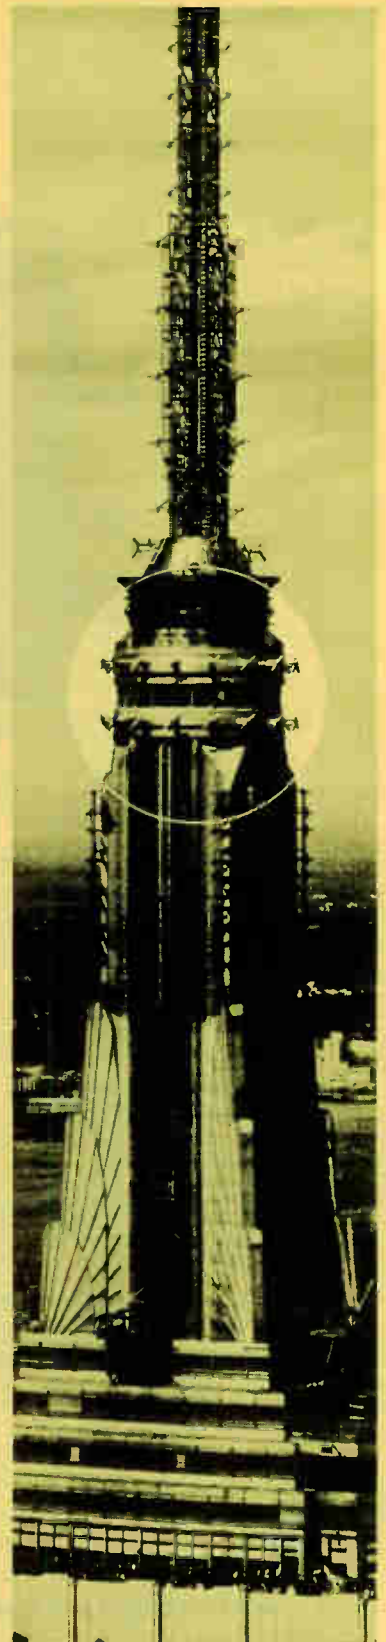

Low insertion loss. Lower sideband of the color subcarrier frequency is attenuated 30 db. or more.

COAXIAL SWITCHES

For 6 1/8" or 3 1/8", coaxial transmission lines.

SWR over a specified 100 mc band under 1.03, high peak power models under 1.06 over a specified 50 mc band. CW power rating equal to the mating transmission line.

The Great New Phoenician Series

NEW Solid-State, All-Band, Trunkline Amplifiers

Featuring unsurpassed serviceability and flexibility ■ Unique design for easy "fool-proof conversion" ■ Die-cast aluminum casing, all-weather and moisture-proof ■ Universal-type fittings to accommodate all popular sizes and types of cable.

THE OUTSIDE STORY

The new "Phoenician" series combines rugged construction, unusual serviceability, and dependable performance under all operating conditions. The 3 sealed access ports permit internal probe measurement in any weather without exposing the entire internal parts. Fittings of new design and moisture-proof seal are backed by Kaiser-Cox warranty. (Patent applied for) The new Kaiser-developed aluminum alloy used in fittings is impervious to corrosion.

The Kaiser-Cox Phoenician series is ready NOW. The SOLID products you can DEPEND on . . . !

THE INSIDE STORY of the Phoenician Amplifier series. Modular construction of the "plug-in" type allows complete interchangeability from trunkline amplifier to 2 and 4-output bridging amplifier — or combinations of trunkline and bridging amplifier (with or without AGC and automatic tilt). Built-in knob type controls eliminate the need for screwdrivers, plug-in pads or accessories.

SOLID PERFORMANCE! The new Kaiser-Cox "Phoenician" series works as well as it looks . . . CATV's finest all-band, "human-engineered" amplifier. The Phoenician series is your assurance that your CATV system (from head-end to tap-off) will deliver maximum signal quality with minimum degradation at all times. Low noise figure—minimum cross-modulation products — CASCADEABILITY PLUS — these are the results of Kaiser-Cox background in the exacting aerospace world of close tolerances, rigid specifications, quality control. An excess of 25,000 man-hours of engineering research and development, unrelenting purchasing standards and production know-how mean these Kaiser-Cox CATV products perform to published specifications.

PRE-AMPLIFIERS

Solid-State Single-Channel Mast-Mounted Pre-Amplifiers

VHF 2-13

Model TPR-**

Model TPR-** Channel Champ is available in two types: lo-TV band with one transistor and hi-TV band with two transistors. All units have a flat (within 0.5 db) response across the 6-mc bandwidth. Lo-band and hi-band units have respective minimum gains of 18 db and 20 db and respective maximum outputs (at 0.5 db sync compression) of 40 dbmv and 50 dbmv. TPR units require a remote power supply (sold separately) either Model 405-P (for single TPR unit) or PPS-8 (for up to eight TPR units). **Price: \$165.00**

Solid-State Broadband Mast-Mounted Pre-Amplifier

UHF 14-83

Model UPC-105. Super-gain (13.7 db average) UHF band (ch. 14-83) mast-mounted preamplifier for fringe and deep-fringe areas complete with remote power supply. Choice of 75 or 300-ohm input with 75-ohm output. Power from remote supply and amplified signal carried by same cable. **Price: \$83.80**

Tube-Type Single Channel Mast-Mounted Pre-Amplifiers

VHF 2-13 and FM

Model 401A-* is equipped with an iridite-finished weatherproof cabinet and is powered from a remotely-located 24 vac source (Model 405-P). TV units feature high output (0.6 v rms lo ch., 0.5 v rms hi ch.), high gain (28 db min.), and low noise figure (5 db lo ch., 8 db hi ch.). FM unit provides 25 db min. gain for entire FM band. **Price: \$46.17**

Model 501AP-* comprises Model 401A-* complete with power supply Model 405-P. **Price: \$65.67**

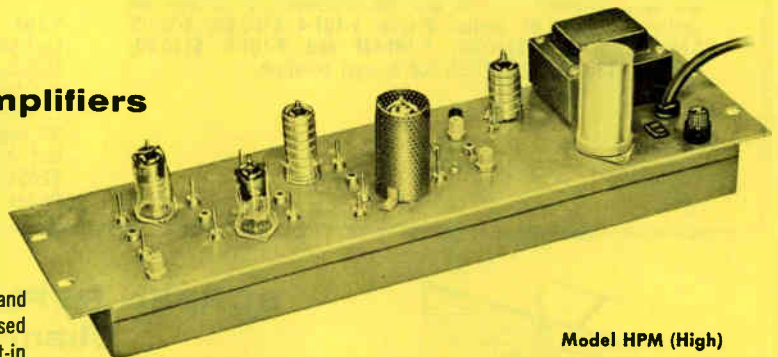

Model 406A-* is an indoor version of Model 401A with a self-contained power supply. Operates from any 117 vac source. **Price: \$46.17**

AMPLIFIERS

Single-Channel Strip Amplifiers

VHF 2-13 or FM Band

Model HPM (High)

Model HPM-* Strip Amplifiers (one model for each TV channel and one model for the FM band) are high-output, tube-type units used in the head-end of CATV systems. TV channel units have built-in AGC (20 db range) and the FM band unit has built-in AOC (10 db range). Output capability: TV strips, 72 dbmv (4.0 v) max. for 0.5 db sync compression; FM strip, 60 dbmv (1.0 v) max. for 3rd order beats down 40 db min. Gain: Lo-TV strips, 46 db min.; hi-TV strips, 44 db min; FM strip, 42 db min. Each amplifier is energized from a 117-v, 60-cycle source and is equipped with an ac convenience out-

let to permit quick, neat installation of multiple units. The new reversible bracket permit either rack or surface mounting. Model HPM-* units are ruggedly constructed and engineered for long service with a minimum of maintenance.

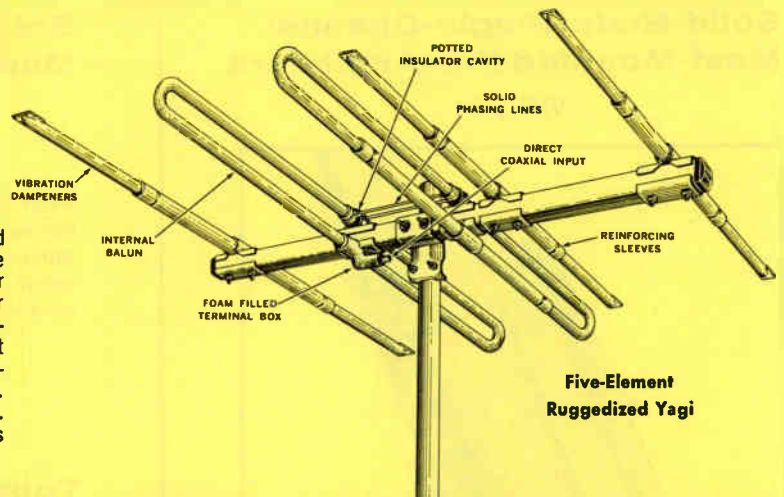

Price: HPM-Lo \$122.85, HPM-Hi \$145.20

ANTENNAS • RUGGEDIZED VHF YAGIS – UP TO STAY!

Engineered and fabricated to withstand the severest climatic conditions . . . high winds, corrosive atmospheres, and heavy ice loadings . . . Jerrold-TACO ruggedized yagis are a CATV industry standard for long-lived trouble-free operation.

Electrical Features

Unique internal balun which confines unequal currents (caused by balanced to unbalanced transformation) to the inside of the element. This results in more symmetrical patterns and a greater degree of frequency independence than are possible with other external matching devices. Jerrold-TACO ruggedized yagis provide the exceptionally high front-to-back ratios, high gain, flat response, and excellent impedance match across their respective bandpasses—all vital for proper color TV performance. These antennas are supplied with a 50-ohm coaxial output fitting. For feeding 75-ohm equipment a Y-TR series transformer is required.

5 ELEMENT YAGI ANTENNAS • Channels 2-13 and FM

Y-51 Series. Designed for single-channel application in the VHF lowband (ch. 2-6), each model features flat response and sharp drop off outside the desired channel. This produces excellent interference rejection and black-and-white or color reproduction of exceptional quality. Three additional models supply complete FM coverage. Construction features: 1 1/4" square crossarm; 5/8" diameter elements with 3/4" reinforcing sleeves. Prices: Y-51-2, 3, and 4 \$95.00; Y-51-5 \$90.00; Y-51-6 \$85.00. Add \$8.00 for special painting.

Y-53 Series. Particularly suited to broadband systems installations, these models are offered for multi-channel applications. Y-53-70—Channels 2-6; Y-53-185—Channels 7-13; Y-53-220—Channels 10-13. Same basic construction as the Y-51 Series. Prices: Y-53-70 \$110.00, Y-53-185 and Y-53-220 \$80.00. Add \$6.00 for special painting.

Y-54 Extra-Heavy Duty Series. Even more rugged construction to resist exceptionally severe environmental conditions of wind and ice. The five models offered cover Channels 2 through 6. Since Channel 2 and 3 antennas are quite large, it is good practice to use this heavy duty Y-54 Series for these channels . . . Crossarms are 2" square; antenna elements 3/4" diameter with 7/8" reinforcing sleeves. Prices: Y-54-2, 3, and 4 \$150.00; Y-54-5 and 6 \$145.00. Add \$8.00 for special painting.

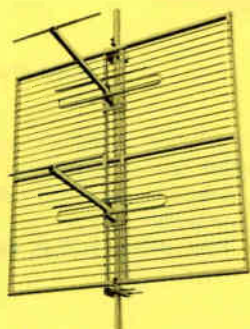

8 and 10 ELEMENT YAGI ANTENNAS • Channels 2-13 and FM

Y-81 Series. Two models designed to cover Channels 2 and 3. Use of eight elements in this frequency range reduces crossarm length and provides an extra margin of safety under adverse weather conditions. Crossarms are 1 1/4" square; antenna elements are 5/8" with 3/4" diameter reinforcing sleeves. Prices: Y-81-2 and Y-81-3 \$155.00. Add \$9.00 for special painting.

Y-101 Series. Six 10-element models to cover the rest of the low band (Channels 4, 5, 6 and FM). Construction features are similar to the Y-81 Series. Prices: Y-101-4 \$160.00; Y-101-5 \$145.00; Y-101-6 \$140.00; Y-101-FM and Y-101-C \$140.00; Y-101-D \$135.00. Add \$10.50 for special painting.

Y-103 Series. Specifically designed to cover the high band Channels 7 to 13. These 10-element antennas are available in seven models to cover each channel, plus an additional broadband model for Channels 7 through 13. Mechanical construction uses a 1 1/4" crossarm with 1/2" diameter elements and 5/8" diameter reinforcing sleeves. Prices: Y-103-7, 8 \$78.00; Y-103-9 \$77.00; Y-103-10, 11 \$76.00; Y-103-12, 13 \$75.00; Y-103-(7-13) \$80.00. Add \$8.00 for special painting.

Y-104 Extra-Heavy Duty Series. This twin-driven, heavily-ruggedized series is designed to cover Channels 2 to 6 in five models. Massive 2" square crossarm construction successfully resists the fiercest onslaughts of wind, water and ice. Flat across-the-channel response produces sharp black & white or color pictures. 2" square crossarms are employed with 3/4" diameter elements and 7/8" reinforcing sleeves. Prices: Y-104-2 \$250.00; Y-104-3 \$245.00; Y-104-4 \$240.00; Y-104-5 \$240.00; Y-104-6 \$225.00. Prices slightly more for special painting.

SCREEN REFLECTOR YAGI ANTENNAS Channels 7 through 13

Models SY-41 and SY-42 offer an effective means of eliminating problems associated with co-channel, adjacent channel, or man-made interference. High gain (up to 13 db for an SY-42) and exceptional front-to-back ratios offer excellent reception on all high band channels. Antenna design provides single tower leg mounting, with angular adjust-

ment. SY-41 Series consists of a single 4-element yagi mounted to a screen reflector; SY-42 Series have two 4-element yagis complete with combining lines for a single coaxial output. Prices for all SY-41 models, \$135.00. Add \$7.50 for special painting. SY-42 models are \$250.00 each. Add \$11.00 for special painting.

ANTENNA ACCESSORIES

Model Y-TR Series Coax Transformers: Impedance transformers from 50 ohms to 75 ohms for each frequency range are required on all antennas or arrays connected to 75 ohm transmission line or equipment. These transformer units are supplied complete with mounting brackets and rf fittings. Y-TR2 has type "N" connectors and includes one mating UG-94 A/U cable plug. Y-TR3 is the same as Y-TR2 except that the output fitting is a type F-61A 75-ohm connector. Each Y-TR3 comes with a mating F-59 cable connector. Price: \$10.00 each

Model Y-SL Stacking Lines: Jerrold-Taco Y-SL Stacking Lines are cut to precise electrical lengths, and are available in six different series for each channel. Each Y-SL Stacking Line consists of two cable assemblies and a combining "T" connector. Impedance at the combining connector of any array is 50 ohms. To convert to 75 ohms a single Y-TR2 or Y-TR3 Coaxial Transformer is used. Price: Y-SL3-(*), \$18.00; Y-SL5-(*), \$20.00; Y-SL7-(*), \$22.00; Y-SL9-(*), \$22.00; Y-SL11-(*), \$22.00; Y-SL13-(*), \$22.00; Y-SL15-(*), \$26.00

Model SY-M Series Screen Yagi Mounting Kits are complete kits for mounting SY41 and SY42 screen yagis to a tower leg or support structure. Model SY-M-1 is for tower legs up to 4¹/₂" O.D. and Model SY-M-2 is for tower legs from 4¹/₂" to 7¹/₂" O.D.

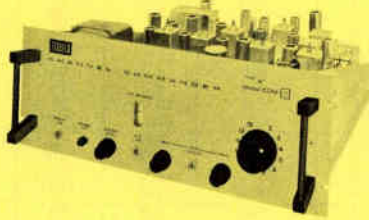

Price: SY-M-1, \$24.00; SY-M-2, \$29.00

CHANNEL CONTROL UNIT

CHANNEL COMMANDER—VHF Ch. 2 thru 13

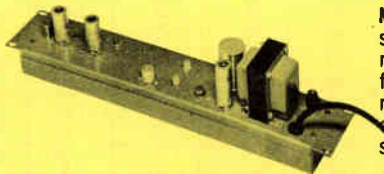

Model COM.*

Model COM.* Channel Commander. Utilized head-end for completely controlling any VHF channel. Controls signals in such a way that adjacent channels on both high and low bands can be fed to a distribution system. Compatible with existing system equipment, the unit may be used to supply an additional VHF channel, to replace obsolete equipment, or as a spare head-end for any VHF channel. Has IF AGC; automatic frequency control circuitry to keep the tuner "on-the-button"; automatic sound control circuitry to maintain the desired relationship between sound and video carriers. Highly selective IF amplifier incorporates specially-designed traps and filters to eliminate adjacent channel interference. Output of IF amplifier is fed to a crystal-controlled converter for off-channel conversions. When on-channel conversion is desired, the crystal-controlled converter-oscillator is switched out and the tuner oscillator is used. Unit also incorporates a standby carrier oscillator which is energized after a specific time delay to provide a replacement carrier. Has built-in regulating transformer. Stacked multi-channel rack mount provides complete head-end installation with minimum space requirements.

Price: \$895.00

*Specify channel.

CARRIER GENERATORS

Model CCG-73.5 Crystal-Controlled Carrier Generator. Provides constant-level carrier at the system head-end for automatic gain control regulation. Low VSWR. Output constant with plus or minus one db for line variations between 90 and 135 volts. Designed for shelf or rack mounting. Plug-in attenuation. Manual gain control. Bridging output. Operating frequency: 73.5 mc. Output: 45 dbmv (65 dbmw on special order).

Price: \$250.00

CONVERTERS

HI-VHF to SUB-VHF

Model HSC-713A Converter/Amplifier. Three-module unit incorporating a regulated power supply. Converts VHF channels (7-13) to sub-channels T7-T13 with a minimum gain of 23 db at sub-channel T13. Built-in equalizer compensates for 36 db of cable at 48 mc. Minimum full-gain noise figure is 22 db. Second-order beat product is -60 db for 2 channels at 52 dbmv output, referenced to sub-channel T13. Provides for extra-long cable runs with a minimum number of re-amplifiers between head-end and distribution system network.

Price: \$1195.00

SOLID-STATE UHF to VHF SINGLE-CHANNEL OUTDOOR CONVERTER

504-ST
Mast-Mounted
Converter-
Amplifier
and Oscillator
Model 454T

504-ST
Power Supply
Model 407-P

Model 504-ST. Mast-mounted solid-state converter-amplifier. Complete with remote power supply Model 407-P. Overall conversion gain: 7 db min. lo-band, 5 db min. hi-band. Crystal-controlled oscillator for maximum frequency stability. 75 ohm input and output.

Price: \$294.00

Model 505-ST is an indoor version of Model 504-ST featuring a self-contained power supply.

Price: \$207.15

Model 503-HZ. UHF to VHF single-channel crystal-controlled converter. Hi-Q, cavity-tuned, mast-mounted head and remote, tube-type oscillator for weak signal areas. Features mast-mounted VHF preamplifier (5-7 db gain). Typical noise figure is 10.

Price: \$245.70

DEMODULATOR

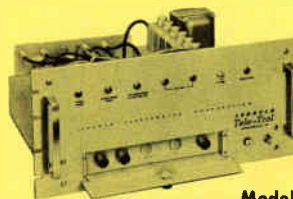

Model TD Demodulator. Designed for CATV head-ends. Demodulator for TV microwave or off-the-air reception of TV broadcasts. Has all-channel tuner with lock-in oscillator feature (optional). Unit has high-Q co-channel traps. High rejection to adjacent carriers. Automatic or manual gain controls. Noise suppression circuit. Video attenuator in output allows maximum of 21 db of attenuation in 3 db steps.

Price: \$565.00

MODULATORS

Model TM Industrial TV Modulator. Provides standard vesigal sideband transmission of any sub-VHF or VHF channel for both black-and-white and NTSC color. Accepts standard 1 v

p-p, black negative, video signals from cameras, microwave terminals or demodulator. See Model TD, demodulator. 75 ohm video and audio input. Visual carrier stability: .005%. Modulation variable from 0 to 100% (visual). Response: 30 cps to 4 mc, within .5 db. Rack mounting. Regulated power supply. Audio input: 1 v p-p (4.5 mc). Aural carrier modulation capability is plus or minus 25 kc when used with the accessory FM modulator, Model TAM. Output level: 56 db above 1 millivolt across 75 ohms (visual) and 57 db above 1 millivolt across 75 ohms (aural). Prices: TM-2 thru 6 \$590.00; TM-7 thru 13 \$715.00; TM-T7 thru TM-T13 \$715.00.

Model TM

Model TVA Video-Audio Separator. Auxiliary unit for the TM unit. Permits sound duplexing when operating the Model TM with microwave equipment. Unit receives the microwave output signal and separates the video and 4.5 mc sound components, restores the sound level to equal that of the video, and supplies both signals to the Model TM. Gain: 20 -db.

Price: \$65.00

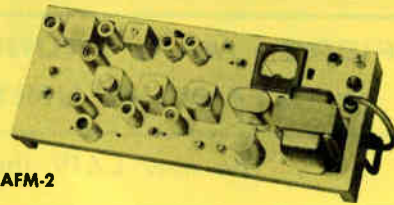

Model TAM FM Modulator. Auxiliary unit for the TM unit. Converts any audio source into 4.5 mc FM signal. Output level: 3 v p-p across 75 ohms. High input, 75 usec. pre-emphasis. Deviation: plus or minus 25 kc.

Price: \$195.00

Model AT

Model AT Modulator. Designed for CATV systems. Provides an unmodulated crystal-controlled video carrier and an FM sound carrier which is held at 4.5 mc separation from the video carrier. Output on any VHF TV channel (specify). Uses any suitable sound source such as AFT-2000 tuner, etc. RF output: up to 55 dbmv, each carrier, separately controlled, at 75 ohms, at each of two terminals. Spurious signals: down to 50 db. Built-in power supply. Standard pre-emphasis. **Price: \$204.75**

Model AFM-2

Model AFM-2 FM Stereo Modulator is designed to provide FM signal (88-108 mc) and rf carrier frequency (specified by system operator). Audio, or standard 10.7 mc IF from an FM tuner such as Jerrold Model AFT-2000 can be used as source of modulation. With 10.7 mc input, AFM-2 has a min. full gain of 55 dbmv (dual output); max. noise and hum at full gain is at least 40 db below strength of signal; and max. audio distortion at full gain is 1.5%. **Price: \$215.00**

POWER SUPPLIES AND ACCESSORIES

Models RPS-300B and RPS-150B. Deluxe, rack-mounted regulated power supplies designed to provide 150 volts B+ (at 300 milliamps and 150 milliamps respectively) to amplifiers, converters, etc. in a CATV system head-end. Equipped with Sola regulating transformer for excellent line voltage regulation. **Price: RPS-300B \$131.98, RPS-150B \$103.95**

Model PPS-8A

Model 405-P provides a regulated 24-vac power supply for either one Model 401A or one Model TPR preamplifier. Shelf or wall-mount. **Price: \$25.41**

Model PPS-8A provides a regulated 24-vac power supply for up to 8 Model TPR preamplifiers. Mounts in standard 19" relay rack. **Price: \$155.55**

Model ACF-1 RF Power Line Filter. Has 4 ac power outlets. RF attenuation: 60 db minimum, 50 to 250 mc. Maximum load: 1 kw total on all four outlets. **Price: \$16.00**

Model PEP-1000 Power Entrance Panel. Contains an rf filter, 15-amp circuit breaker, and six grounding plug outlets. **Price: \$42.50**

TEST POINT TAP

MTP-20 2-Way Splitter. Designed to match the trunk line in and out as well as the tap. Insertion loss: 2 db. Tap loss: 20 db. F-61A fittings. Bandwidth: 0 to 216 mc. **Price: \$6.00**

TUNER

Model AFT-2000

Model AFT-2000 AM/FM Tuner. Designed to operate in conjunction with Model AT modulator. FM section has 3.2 uv sensitivity with frequency response of 15-15,000 cps within 1 db. Incorporates gated beam limiter. AM section has 10 kc bandwidth. Self-contained power supply. **Price: \$197.25**

TRAPS AND FILTERS

Models TLB-1, TFM-1 and THB-1 High "Q" Bridged "T" Traps. Minimum attenuations: 60 db to undesired carriers. Insertion loss: 1 db to desired signals. Tuning range TLB-1, 59.75 to 83.75 mc; TFM-1, 88 to 108 mc; THB-1, 197.75 to 211.25 mc. 75 ohm impedance. F-61A fittings. **Price: \$38.55**

SPLITTING AND MIXING NETWORKS

Models AMN-Lo and AMN-Hi Mixing Networks. Low loss mixing network (AMN-Lo) for low VHF channels. Will combine up to three non-adjacent channels from 75 ohm inputs into a single 75 ohm output. AMN-Hi is designed for mixing high TV channels. Will combine up to four non-adjacent channels from 75 ohm inputs into a single 75 ohm output. **Price: \$18.15**

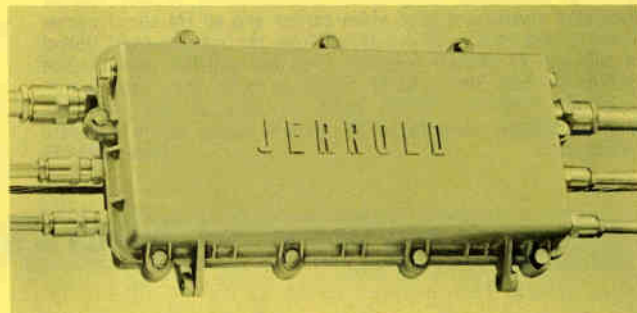

Model FC0-47 Wide-Band Frequency Mixer-Splitter. Low loss unit for mixing or separating frequencies in the 0 to 47 mc range from those in the 54 to 220 mc range. Unit features 30 db minimum rejection between these bands with insertion loss of 1 db. 75 ohm impedance. **Price: \$25.00**

Model LHS-76 Cross-Over Network. Used to split or mix VHF hi-lo bands. Insertion loss less than .6 db. Bandpass 0 to 110 mc and 170 to 216 mc. Cut-off: 140 mc. 75 ohm impedance. **Price: \$12.50**

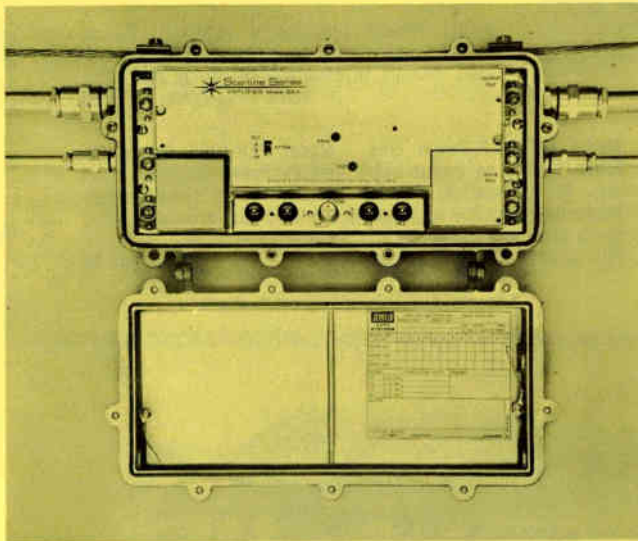

AMPLIFIERS • MAIN TRUNK • VHF BAND (54-216 mc) SOLID-STATE ★ STARLINE UNITIZED MAIN TRUNK STATIONS ★

The new CATV industry standard for distribution systems

Each of the five Starline unitized main-trunk stations (Models SA-1 thru 5) is cable-powered and provides for a specific electronic function. Each station comprises three elements (a basic housing, one of two connector chassis types, and one of five station plug-in units), integrated into one functional package. The basic station housing comprises a cast-aluminum body and a hinged cover. A double gasket between the body and hinged cover provides an air-tight, radiation-proof seal when the cover is closed. The housing is designed to accept VSF-type fittings. Apart from trunk line input and output apertures, the housing has four feeder-line exits for use at bridging locations, with plugs provided for unused apertures. In addition, the housing has three

apertures, sealed with wire-secured plugs, to give access while the housing is closed to trunk input and output, and bridging test fittings. One of two connector chassis types is integrated with each basic housing. One of these types is used with all unitized stations serving feeder lines (Models SA-1, SA-2, and SA-5). The other is used with those stations not serving feeder lines (Models SA-3 and SA-4). Starline main-trunk amplifiers in stations SA-1, 2, 3, and 4 feature an output capability of 48 dbmv per channel for twelve channels, a minimum gain of 26 db, a response flatness of ± 0.25 db, hum modulation down 60 db, and a maximum noise figure at full gain of 8 db at ch. 2 and 11 db at ch. 13. Manual gain and tilt controls as well as switchable fixed pads are provided.

CASCADABILITY

Fifty main-trunk Starline amplifiers can be cascaded in accordance with Jerrold specifications with cross-mod at the last amplifier down 57 db and signal-to-noise ratio of 40 db. These real-number specifications insure picture/sound quality.

AGC UNITS

For solid-state TML-line
or tube-type Super-Cascader systems

Model AGC-213 Automatic Gain Control. Designed to operate with Super Cascader, Model SCA-213. Gain control voltage is derived from constant carrier located at the head-end site. Unit stabilizes and maintains signal levels throughout the system to correct minor variations due to tube aging, temperature changes, etc. Provides only $\frac{1}{2}$ db variation in output level with input change of 5 db. Has input level control and AGC level control.
Price: \$125.00

Model TAGC-213 is designed specifically for use with solid-state trunk line amplifier Model TML-1, from which it obtains a nominal 24 vac operating voltage. The unit receives its pilot carrier signal of 73.5 mc from a crystal-controlled carrier generator (Model CCG-73.5) at the head-end and automatically compensates for carrier level fluctuations over a range of 8 db from +5 db to -3 db by keeping output level variations constant within ± 0.5 db. The power bridging circuit is capable of passing ac and dc for powering bridging amplifiers Models

TAGC-213

TBA-1 and TBA-2 and line extender amplifiers Model TLE-1. A built-in regulated power supply transforms the 20-30 vac input to -17 volts dc for operating the solid-state circuitry. The unit is fully shielded in a metal housing and shipped with mounting brackets for installation in 19" relay racks. Normal system requirements are for one TAGC-213 at every third amplifier location, preferably at the master power supply location.
Price: \$165.00

PLUG-IN UNITS FOR STARLINE STATIONS

Plug-in Unit for Model SA-1

Model SA-1 Plug-in Unit provides a fully-loaded station. The device is an all-band trunk-line and bridging amplifier with AGC circuitry. The bridging amplifier output is connected to the "feeder-maker" receptacle on the connector chassis. When the proper "feeder-maker" model is plugged into the receptacle from one to four feeder line outputs are created. It is supplied complete with housing and connector chassis as Starline Model SA-1. Price: \$635.00

Model SA-2 Plug-in Unit provides a main trunk and bridging amplifier station. The bridging amplifier output is connected to the "feeder-maker" receptacle on the connector chassis. When the proper "feeder-maker" model is plugged into the receptacle, from one to four feeder line outputs are created. It is supplied complete with housing and connector chassis as Starline Model SA-2. Price: \$540.00

Model SA-3 Plug-in Unit provides a main trunk amplifier with AGC circuitry. The unit is supplied complete with housing and connector chassis as Starline Model SA-3. Price: \$485.00

Model SA-4 Plug-in Unit provides an all-band trunk line amplifier. It is an improved version of Jerrold Model TML-1 and is supplied complete with housing and connector chassis as Starline Model SA-4. Price: \$390.00

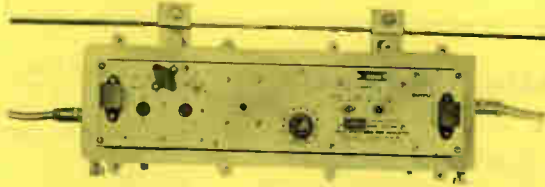

NOTE: Model SA-5 Plug-in Unit is described under bridging amps.

Solid-State Main Trunk Amplifiers

VHF BAND (54-216 mc)

Model TML-1 VHF Band Main Trunk Line Amplifier. All transistorized, provides unsurpassed cascading, extraordinary stability and long-term trouble-free performance. Significant characteristics include: bandwidth of 54-216 mc with plus or minus 0.25 db response flatness; gain of 24 db max.; output capability (at -57 db cross mod.) of 44 dbmv per ch. for 9 ch. and 43 dbmv per ch. for 12 ch. Recommended operational characteristics for 9 ch.: input of 5 dbmv (lo-band) and 8 dbmv (hi-band). For 12 ch. operation, inputs and outputs are 1 dbmv less. The noise figure is 10 db max. (ch. 2 full gain) and 11 db max. (ch. 13 full gain). The TML-1 includes two switchable cable equalizer-sections and a 3-transistor internal power supply. Price: \$335.00

SUB-VHF/LO-VHF (5-95 mc)

Model TLSA-510 Solid-State Amplifier is designed for high cascading in long-haul transportation of low and sub-channel signals. The amplifier features 12-channel capability, a frequency range from 5 to 95 mc, a minimum full gain of 35 db at 95 mc, output capability of 48 dbmv for each of 12 channels, second order beat down 55 db at 60 dbmv output, and a maximum noise figure of 9 db at full gain. Cable-powered through either its input or output terminal, the amplifier has ac bypass circuitry. Designed as a plug-in module for its cast metal housing to facilitate installation and maintenance. Housings are supplied having such apertures as are necessary to accommodate the type of fittings required for the cable type used in the system. Price: \$605.00

Tube-Type Main Trunk Amplifiers

SUB-VHF/LO-VHF (6-90 mc)

Model LSA-410AB comprises two twelve-tube, two-stage distributed amplifiers connected in push-pull. The amplifier covers a bandwidth from 6 to 90 mc and features the suppression of second order distortion components (down 62 db). A built-in metered test circuit permits checking all tubes and supply voltages during operation. Amplifier gain is 35 db maximum at 90 mc. AGC circuitry in the unit requires a carrier generator (Model CCG-73.5) at the head-end. The noise figure is 7 db at full gain. Especially suited for the long-haul where second order distortion components are a problem. Price: \$720.00

VHF/FM (54-216 mc)

Model SCA-213 Super Cascader RF Distributed Amplifier covers 54 to 216 mc. Plug-in equalization. Regulating transformer. Gain 28 db at 216 mc. Output: 42 dbmv (maximum per channel for 12 channels at cross modulation distortion of 0.14%). Manual gain control has 8 db range. Noise figure: 9 db, low band; 10 db, high band. Self-contained power supply. Price: \$275.00

LO-VHF (53.5-95 mc)

Model AOC-26B Low Band Amplifier. Has automatic overload control. Covers channels 2-6 and FM. 75-ohm input and output. Gain: 32 db at Channel 6. Output: 46 dbmv for 1 AOC-26B at IML of -57 db. Noise figure: 9 db. Manual gain control adjustable over 10 db range. Plug-in pads for additional gain reduction. Can be used in-line for line-bridging applications. Built-in power supply. Uses PIP or BTC pads. Price: \$245.00

LO-VHF (53.5-95 mc) MAIN TRUNK OR BRIDGING

Model UBC-26B Line-Bridging Distribution Amplifier covers low band plus FM. Gain: 30 db minimum. Flat response. Maximum output: 47 dbmv for 5-channel operation. Less than 0.3 or 1% distortion, single unit. Noise figure: 9 db or less 3 db manual gain control range and plug-in pads (either PIP or BTC series). 75-ohm input and output impedance. Self-contained power supply. Can be used for line-bridging or cascading. Price: \$150.00

Solid-State Bridging Amplifiers

VHF BAND (54-216 mc)

"feeder-maker" model is plugged into the receptacle, from one to four feeder line outputs are created. The amplifier provides a minimum 33 db full gain, has a response flatness of ± 0.5 db, and has manual gain and tilt controls. Shipped complete with air-tight, radiation proof housing and connector chassis as Model SA-5.

Price: \$345.00

Plug-in Unit for Model SA-5

Starline Model SA-5 is an intermediate bridging station used on the main trunk of a distribution system. The plug-in unit is an intermediate bridging amplifier providing a low-loss feed-thru for signals from the trunk-line amplifier preceding it, together with bridging amplification. The bridging amplifier output is connected to the "feeder-maker" receptacle on the connector chassis. When the proper "feeder-

Model TBA-1

Model TBA-1 Bridging Amplifier. All transistorized, establishes four feeder lines at main trunk line amplifier locations. Significant characteristics include bandwidth of 54-216 mc with plus or minus 0.5 db response flatness; gain of 11 db; max. output capability (at —57 db cross mod.) of 41 dbmv at each of 4 outputs (per ch. for 9 ch.) and 40 dbmv at each of 4 outputs (per ch. for 12 ch.). Recommended operational characteristics (9 ch.): input of 27 dbmv (lo-band) and 30 dbmv (hi-band) and outputs of 38 dbmv (lo-band) and 41 dbmv (hi-band). 12 ch. operational inputs and outputs are 1 db less.
Price: \$195.00

Model TBA-2 Intermediate Bridging Amplifier. All-transistorized, provides feeder lines between two TML-1 main trunkline amplifiers. Significant characteristics include: bandwidth of 54-216 mc with plus or minus 0.5 db response flatness; gain (min. full) of 26 db (each of two outputs); max. output capability (at —57 db cross-mod.) of 43 dbmv (per ch. for 9 ch. using block tilt) and 42 dbmv (per channel for 12 ch. using block tilt). Recommended operational characteristics (9 ch.): inputs of 14-20 dbmv (lo-band) and 17-23 dbmv (hi-band) for outputs of 40 dbmv (lo-band) and 43 dbmv (hi-band). 12 ch. operational inputs and outputs are 1 db less.
Price: \$245.00

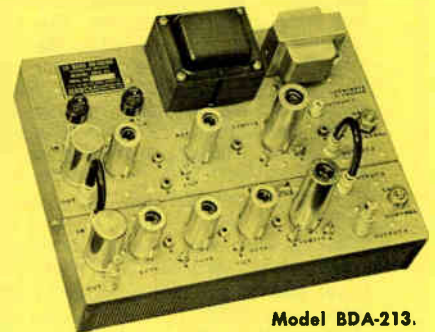

VHF BAND (54-108, 174-216 mc) TUBE-TYPE

Model SDA-4 High Output Distribution Amplifier covers all VHF channels plus FM. Low-loss bridging input (under 1 db). Rack mounting with self-contained power supply. Gain: 14 db (four outlets). Flat response. Maximum output: 44 dbmv per channel for 12 channels, each of 4 outlets. 75 ohm input and output impedance. Separate high and low band gain controls with 4 db range.
Price: \$165.00

VHF LO-BAND (54-95 mc) TUBE-TYPE

Model MDA-4 Line-Bridging Distribution Amplifier covers channels 2 thru 6 and FM. Response flat within 2 db. Gain: 5 db. 75 ohm input and output impedance. Less than 1 db insertion loss. Gain control obtained by use of capacitive plug-in pad in the input circuit. Output: 46 dbmv per channel for 5 channels (max.). Self-contained power supply.
Price: \$70.00

Model BDA-213 comprises Models BDA-26 and BDA-713. Model BDA-26 is a bridging distribution amplifier for the lo-VHF band which contains the power supply for both units. BDA-26 may be used by itself for lo-band amplification and distribution or may be combined with Model BDA-713 (hi-VHF band amplifier) to provide all-band amplification and distribution. Model BDA-213 features excellent input and output match, a high dual output (44 dbmv), an insertion loss of 1 db max., a 5 db gain control range, and a separate tilt control.
Price: BDA-26 \$90.00, BDA-713 \$85.00, BDA-213 \$165.00.

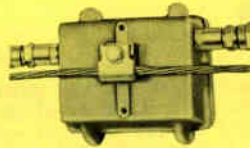

Model BDA-213.

LINE EXTENDER AMPLIFIERS

VHF ALL-BAND (54-216 mc) SOLID STATE

Model SX-1

Model SX-1 is a line extender amplifier used on Starline system feeder lines. Gain 24 db min., high output, flat response, variable gain and tilt controls, and a plug-in pad for fixed gain control. Cable-powered with optional ac by-pass.
Price: \$98.75

Model TLE-1

Model TLE-1 line extender has an 18 db minimum gain and a maximum output capability of 33 dbmv. Variable tilt and gain control. Aligned thru 18 db of cable. Cable powered.
Price: \$85.00

VHF LO-BAND (54-88 mc) TUBE-TYPE

Model WLA-88 line extender amplifier covers channels 2 thru 6. Minimum gain at 23 db on Channel 6 and 17 db on Channel 2. Maximum undistorted output: 0.1 v rms for three channel operation. Voltage regulating transformer and built-in power line filter. Cabinet is weather-proof with iridite finish. Quick mount back plate and twist lock ac disconnect plug.
Price: \$98.50

ATTENUATORS

Models PDL-3, 6, 10, and 20 are tubular in-line attenuators. Number designates db of attenuation.
Price: \$3.50 ea.

Models BTD-3L, 6L, 9L, 12L, and 15L are plug-in pads for Model BDA-26.
Price: \$4.80 ea.

Models BTD-5H, 10H, 15H, 20H, and 30H are similar pads for Model BDA-713. Number designates db of attenuation.
Price: \$4.80 ea.

Model PDL

Models BTC-3, 6, 9, 12, 15, and 18 are plug-in pads for UBC/AOC amplifiers. Number designates db of attenuation.
Price: \$6.40 ea.

Models CP-3, 6, 9, and 15 are capacitive plug-in pads for MDA-4 amplifiers. Number designates db of attenuation.
Price: \$1.60 ea.

Models PIP-3, 6, 9, 12, and 15 are plug-in pads for UBC-26 Band CDX-713. Number designates db of attenuation.
Price: \$1.60 ea.

Model BTC

COAXIAL CABLES

Jerrold coaxial cables are manufactured by Times Wire and Cable Co. to rigid specifications.

JT-1000 Series Aluminum Coaxial Cables

JT-1000 series of coaxial cables employ solid center conductors, cellular polyethylene as dielectric, and seamless aluminum tubing as outer shield. Can also be ordered with a jacket made of non-contaminating, long-life xelon.

JT, JEL, and RG-59/U Series Coaxial Cables

JT series cables have solid copper center conductors, employ cellular polyethylene as the dielectric, and the jacket(s) is (are) made of non-contaminating, long-life xelon.

JEL series cables are similar to JT series cables except that the dielectric is solid polyethylene, and the center conductors are copper weld.

RG-59/U series cables are similar to JEL series cables except that the jacket is made of vinyl.

COAXIAL CABLE CONNECTORS AND FITTINGS

ALUMINUM CABLE CONNECTORS

Aluminum cables are manufactured from clear irridited 2011T-3-type aluminum. Connectors have been completely lubricated at factory. They are completely weather-proof. A template for cutting the cable center conductor to the exact length is available for each size and type of connector.

AF-712. Splices JT-1412 cable to JT-1750 cable. Price: \$7.50.

F-412A. Adapts JT-1412 cable to TR-72F or TR-75FCW termination. Smooth barrel. Price: \$2.75

F-412B. Introduces JT-1412 cable into weather-proof equipment housing via un-threaded aperture. F-61 fitting on F-412B mates with F-59 or FHC-404 fitting on jumper cable for connection to equipment within housing. Threaded barrel. Price: \$2.75

F-500A. Adapts JT-1500 cable to TR-72 or TR-75FCW termination. Price: \$3.00

F-500B. Similar to F412B but used with JT-1500 cable. Price: \$3.00

F-750. Similar to F-412B but used with JT-1750 cable. Price: \$7.50

Model SC-412A

SC-412A. New splice for JT-1412 cable features a sleeve which accepts bared center conductor of each cable end. Sleeve is then crimped to hold each conductor firmly, and insure perfect connection. Splice is then laid in a plastic shield which snaps into place in the barrel of the connector, to center the splice. When the gland nuts are tightened to the barrel, a built-in ferrule is compressed to clamp the cable shield firmly and insure an excellent ground connection. A built-in gland is also compressed to form a completely weatherproof seal for the splice. Electronically, the splice is as radiation-proof as the cable itself and the VSWR (return loss of the splice) is better than VSWR of the cable. Price: \$3.75

SC-500A. Similar to SC-412A but used with JT-1500 cable. Price: \$3.95

SC-750A. Similar to SC-412 but used with JT-1750 cable. Price: \$7.50

VSF-412. Introduces JT-1412 cable into weather-proof equipment housing via a threaded aperture. Connection to equipment within housing via seized center conductor of cable. Price: \$1.55

VSF-500. Similar to VSF-412 but used with JT-1500 cable. Price: \$1.85

VSF-750. Similar to VSF-412 but used with JT-1700 cable. Price: \$3.50

FLEXIBLE CABLE CONNECTORS

AF-101. Adapts RG-11/U, Jel 101 or 104 cable to F-61A fittings. Price: \$1.26

AF-201. Adapts JT-201, 204, 301, 304, or 404 cable to F-61A fitting. Price: \$1.26

AF-408. Adapts JT-408 cable to F-61A fitting. Price: \$1.10

C-52. Adapts RG-59/U, Jel-102, 105 or JT-205 cable to C-61 fitting. (Standard package) Price: \$5.00

F-56. Adapts RG-6/U cable to F-61A fitting. (Standard package) Price: \$4.50

F-59. Adapts RG-59/U, Jel 102, 105, or JT-205 cable to F-61 fitting. (Standard package) Price: \$4.50

F-200. Adapts JT-200 cable to F-59 connector. Price: \$9.75

F-400. Adapts JT-300 cable to F-59 connector. Price: \$9.75

F-408-59. Adapts JT-408 cable to F-59 connector. Price: \$1.10

FHC-404. Adapts JT-201, 204, 301, 304, or 404 cable to F-59 connector. For constructing jumpers carrying up to 12 amperes. Price: \$7.75

G-59. Push-on RG-59/U connector mates with G-61. Price: \$4.48

PF-59. Push-on F-59 mates with F-61 and F-81. Price: \$1.70

SC-24. Splice for either JT-201, 204, 301, 304, or 404 cable. Price: \$1.75

SC-48. Splice for JT-408 cable. Price: \$1.75

VSF-404. Bushing accepts JT-201, 204, 301, 304, or 404 cable and introduces cable into weather-proof equipment housing via a threaded aperture. Connection to equipment within housing via seized center conductor. Price: \$1.80

VSF-408. Bushing accepts JT-408 cable introduces cable into weather-proof equipment housing via a threaded aperture. Connection to equipment within via seized center conductor. Price: \$1.80

FITTINGS AND TERMINATIONS

C-61. Female chassis fitting with collet. Mates directly with C-52 and TR-72 or (via A-61) with F-56, F-59, F-71, FHC-404, any AF series connector, or TR-72F. (Standard package) Price: \$5.00

F-61A. Female chassis fitting with improved clutch collet. Mates with F-56, F-59, F-71, FHC-404, any series (AF) connector, or TR-72F. (Standard package) Price: \$8.75

A-61. F to C adaptor adapts C-61 chassis fitting to accept F-series connectors. (Standard package) Price: \$1.88

C-81. Female coupling (feed-thru). Back-to-back C-62 fittings. Feed-thru chassis fitting or splice for male connectors. (Standard package) Price: \$11.50

F-71. Male coupling. Back-to-back F-59 connectors. Splice for female connectors. Price: \$11.00

TR-72. Termination. Male C-52 connector incorporating 75-ohm resistor. Mates with C-61 fitting. Terminates lines w/o ac. Price: \$8.85

TR-72F. Termination. Male F-59 connector incorporating 75-ohm resistor. Mates with F-61A fitting. Terminates lines w/o ac. Price: \$9.90

LTR-75F. Used with sub-channel equipment for terminating lines carrying ac. Price: \$1.80

TR-75FCW. Similar to TR-72F but for terminating lines carrying ac. Price: \$1.00

GROUNDING BLOCKS AND FERRULES

LGB-3. Ground blocks Price: \$1.15

1026. Ferrules for bonding RG-6/U or Jel-102 cable to mandrel of connector. Price: \$1.20/c

1051. Ferrules for bonding RG-59/U, Jel-105, or JT-205 cable to mandrel of connector. Price: \$1.20/c

1095. Ferrules for bonding RG-11/U, JT-201, 204, 301, 304, or 404 cable to mandrel of connector. Price: \$3.60/c

1098. Ferrules for bonding JT-408 cable to mandrel of cable connector. Price: \$4.70/c

TOOLS AND ACCESSORIES

PL-601. Tool for crimping 1051 ferrule. Price: \$4.00

PL-602. Tool for crimping 1026, 1051 or 1095 ferrules. Price: \$5.00

PL-603. Tool for crimping 1098 ferrule. Price: \$5.25

PL-605. Crimping tool used with new splices for aluminum cables. Price: \$5.50

ET-404. Expansion tool. Forms separation between shield and dielectric of JT-201, 204, 301, 304, or 404 cables. Price: \$1.15

ET-408. Expansion tool. Forms separation between shield and dielectric of JT-408 cable. Price: \$1.25

WB-412. Weather boot for F-412 and VSF-412 connectors. Price: \$1.95

WB-500. Weather boot for F-500 and VSF-500 connectors. Price: \$1.95

WB-750. Weather boot for F-750 and VSF-750 connectors. Price: \$2.50

WSC-450. Weather boot for SC-412, and SC-500 splice connectors. Price: \$4.05

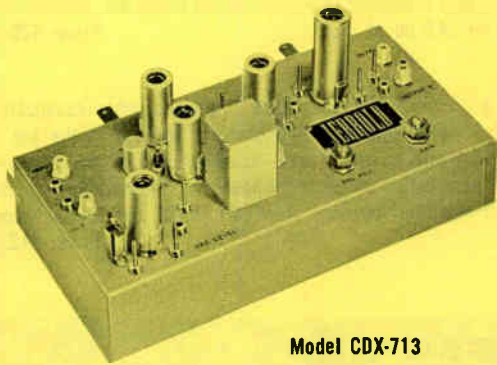

WSC-750. Weather boot for SC-750 splice connector. Price: \$2.75

WBT-450. Weather boot for terminators on JT-1412, and JT-1500 cable. Price: \$1.25

WB-24/48. Weather boot for SC-24 or SC-48 splice. (Standard package) Price: \$5.00

WB-59. Weather boot for RG-59/U cable connector. (Standard package) Price: \$5.00

CONVERTERS

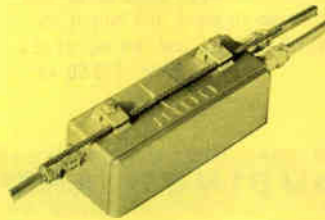

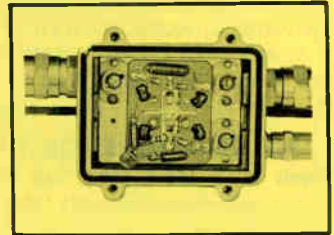

Model CDX-713

Model CDX-713 Sub-VHF to High-VHF Converter/Amplifier converts signal in the 4 thru 48 mc band to TV channels 7 thru 13 (174-216 mc) and then amplifies the converted signals for distribution. Unit obtains power from distribution amplifier BDA-26. Plug-in equalization. Manual gain control (3 db range). Noise figure of 10 db. Output is 44 dbmv for four channels at each of two outputs. Major features of Model CDX-713 are the push-pull input which reduces second order beats and the balanced mixer circuit which effectively reduces the oscillator frequency in the output to a minimum. Price: \$115.50.

DIRECTIONAL COUPLERS

Starline Models SDC-8, 12, and 16 are directional couplers covering the 54-216 mc range with low insertion loss to the line and high isolation (26 db min.) between output and tap. Tap loss of SDC-8 is a nominal 8.25 db; of SDC-12, 12.25 db; and of SDC-16, 16.25 db. Ac power by-pass. Price: \$21.25 each.

Models DC-8W, 12W and 16W are messenger-mounted directional couplers covering the 54-216 mc range with low insertion loss to the line and high isolation between output and tap. Tap losses are a nominal 8, 12, and 16 db for the respective units. Ac power by-pass.

Price: \$15.25 each

Models DC-8, 12, and 16 are mounted in blister cans and cover the 6-216 mc range. Maximum insertion losses for Model DC-8 is 1.5 db, for DC-12 is 1 db, and for DC-16 is 0.75 db. The number (8, 12, or 16) of the unit designates the approximate tap loss. Three F-59 cable connectors and two wood screws are shipped with each unit.

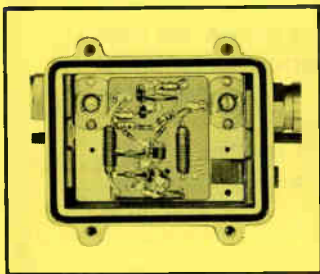

Price: \$7.50 each

Models LSA-8, LSA-12, and LSA-16 directional couplers used to tap off a 75-ohm line. Units cover the 5-90 mc band, have input and output impedance of 75-ohms with a VSWR of 1.2:1, and are equipped with "N" fittings. Isolation between output and tap is 30 db minimum. Power by-pass (1 amp). Model LSA-8 has 8 db loss in one leg and less than 1 db in the other. Models LSA-12 and LSA-16 have respectively, 12 and 16 db loss in one leg and less than 0.5 loss in the other. Price: 26.50.

EQUALIZERS

THERMAL—FOR SOLID-STATE SYSTEMS

Starline Model STE is a thermal equalizer used at every third trunk amplifier location. Equalizes for 17 db of cable at 216 mc at 70°F and compensates for temperature changes for 60 db of cable from -40°F to 120°F.

Price: \$44.50

Model TOM-4 Automatic Temperature Compensator. For use with Model TML-1. All-band Distribution system (transistorized). Equalizes for 16 db of cable at channel 13. Compensates for temperature tilt variations thru 54 db of cable.

Price: \$47.00

Models LTE-25 and LTE-29 are plug-in thermal equalizers used with TLSA-510 systems. They compensate respectively for 25 and 29 db of cable. Price: \$44.50

Thermal Equalizers for Tube-Type Systems

Models LSET-1 and LSET-2 are thermatic equalizers in systems employing LSA-410AB amplifiers. Model LSET-1 will compensate for the variation in cable attenuation due to variation in frequency between 5 and 90 mc at 60°F. In addition, it will compensate for the variation in cable attenuation due to variation in temperature between 0° and 120°F for the same length of cable. Model LSET-2 will perform the same functions for 24.5 db at cable. Price: \$39.75.

Model TOM-2, Automatic Temperature Compensator. For use with Model SCA-213 all-band distribution system (tube-type). Equalizes for 21 db of cable at channel 13. Compensates for temperature tilt variations thru 64 db of cable. Price: \$36.00.

CABLE EQUALIZERS FOR SOLID-STATE SYSTEMS

Models LVE-0, LVE-24, LVE-27, and LVE-30 are plug-in cable equalizers used with model TLSA-510 amplifier. Model LVE-0 is used when no equalization is required. Model LVE-24 equalizes for from 22.5 to 25.5 db of a cable at 90 mc, 60°F. Model LVE-27 equalizes for from 25.5 to 28.5 db cable and model LVE-30 for from 28.5 to 31.5 db of cable at 90 mc, 60°F. Prices: Model LVE-0, \$9.75; all others, \$28.75

CABLE EQUALIZERS FOR TUBE-TYPE SYSTEMS

Models LSC-2, LSC-4, LSC-6, and LSC-8 are equivalent cable lengths used in systems employing LSA-410AB amplifiers in the main trunk line. They are equivalent, respectively to 2, 4, 6, or 8 db at cable measured at 90 mc. They cover 5 to 90 mc band, have an input and output impedance of 75-ohms with a maximum VSWR of 1.1:1 and are equipped with "N" fittings. Price: \$26.50 ea.

Models LSE-1 and LSE-2 are equalizers used in systems employing LSA-410AB amplifiers in the main trunk line. Units will provide compensation for varying cable attenuation due to variations in frequency. Used at amplifier locations. Model LSE-1 compensates for the variation in cable attenuation due to variation in frequency between 5 and 90 mc for 28.5 db of cable measured at 90 mc. Model LSE-2 will perform the same function for 24.5 db of cable. Price: \$26.50

Model PVE is a plug-in variable equalizer. Provides cable equalization for one Model SCA-213 amplifier. Two controls, located at the top of the device, permit plus or minus 1½ db adjustment of the equalizer from its given attenuation value to compensate for variations in distances between amplifier locations. Available in 18 and 21 db values. Price: \$12.25

HOUSINGS AND ACCESSORIES

Model WC-410 is a weather-proof equipment cabinet for pole or cross-arm mounting of LSA-410AB amplifiers and associated equipment. Price: \$99.75

Model WCB is a pair of mounting brackets for Model WC-410 equipment cabinet. Price: \$19.75

Models WC-5 and WC-6 are weatherproof equipment cabinets for pole or cross-arm mounting of TML-line amplifiers.

Prices: WC-5, \$33.50; WC-6, \$24.50

Model WC-7 is a weatherproof strand-mount equipment cabinet for TML-series amplifiers. Price: \$29.50

WC-400. Weatherproof utility cabinet. Heavy gauge steel. Heavy galvanized finish. Hardware and cable connector holes are pre-punched. Cabinet can be locked with standard padlock. Dimensions: 10" x 18½" x 24¼". Cross-arm or bench mounting. Price: \$27.50

HB-1. Weather protective, umbrella housing for outdoor mounting of 1500 series splitters. Housing can be mounted on messenger, or on antenna masts. Price: \$4.50

Model AHB-1 is a pair of hanger brackets for hanging Models TLE, DC-W, and 1595W from messengers while multiple cables are lashed to a common strand. Price: \$1.50

Model AHB-2 is a bracket for hanging a utility housing (used with Starline splitters directional couplers, line extenders, etc.) below a messenger cable when a group of cables is attached for the messenger wire. Price: \$1.50

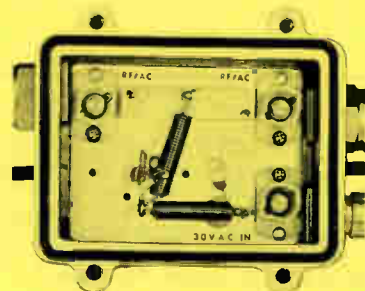

Model AHB-3 comprises a pair of brackets for hanging SA-1, 2, 3, 4, or 5 housing below a messenger cable when a group of cables is attached to the messenger wire. Price: \$1.95

Model SPB-2 is a bracket for mounting a utility housing (used with Starline splitters, directional couplers, line extenders, etc.) on any flat surface or pole. Price: \$6.25

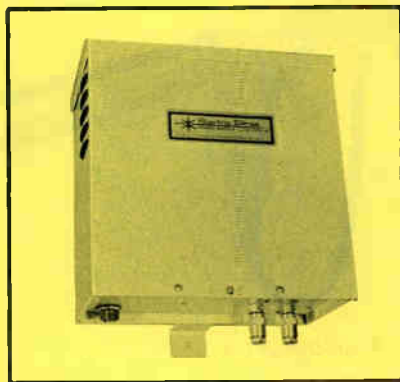

Model SPB-1 is a cruciform bracket for mounting a Starline SA-1, 2, 3, 4, or 5 housing on utility pole or two cross-arms. Price: \$7.75

POWER COMBINER

Starline Model SPJ-2 is for transporting 30 v ac power from Model SPS-12 power supply to the trunk-line in instances where Model SPS-12 is remotely located. Current carrying capacity is 12 amperes. Price: \$19.95

POWER SUPPLIES

Starline Model SPS-12 is a power supply for powering up to six completely-loaded stations on the main trunk of a Starline system. Mounts on pole or cross-arm. Power (30 volts ac, 12 amperes) is normally placed on the trunk-line via fittings on the power supply but may also be fed to a remotely-located trunk line via cable and a Model SPJ-2 power combiner. **Price: \$185.00**

Model RPS-30 is a 30-v, 12-amp power supply used to supply as many as (3) TML-1, (3) TBA-1, (3) TBA-2, and (48) TLE-1 amplifiers in a TLM solid-state system. The 30-vac output is constant plus or minus 1% for line voltage between 95 and 130-vac and held within 2% for bad variations between 4 and 12 amps. **Price: \$136.20**

Model RPS-30T is similar to Model RPS-30 but is used to supply Model TLSA-510 amplifiers. **Price: \$145.00**

Model CPS-4 is a 24-volt power supply for line extender amplifiers in up to four separate feeder lines. **Price: \$45.00**

Model RPS-15 is a 30-v, 6 amp power supply used with TML-series amplifiers or other cable-powered transistorized equipment. **Price: \$45.00**

SPLITTERS

Starline Plug-in "Feeder-makers"

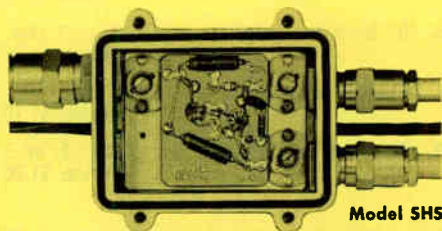

Starline "feeder-makers" are aptly named since their function is to create a specific number (from one to four) of feeder line outputs at any distribution amplifier location on the main trunk-line. These models (not supplied as part of a unitized station) are necessary with Models SA-1, SA-2, and SA-5.

Model SO-1. Creates one feeder line with only 0.2 db (max.) insertion loss. **Price: \$4.75**

Model SO-2. Creates two feeder lines with a nominal insertion loss of 3.5 to each. **Price: \$7.50**

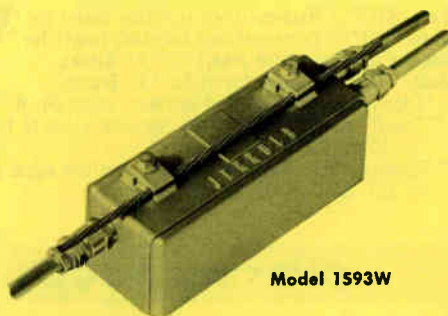

Model SO-3. Creates three feeder lines with a nominal 3.5 db loss to one, and 6.5 db loss to each of the others. **Price: \$8.50**

Model SO-4. Creates four feeder lines with a nominal insertion loss of 6.5 db to each line. **Price: \$9.75**

Starline Model SHS-2 is a messenger-mounted, two-way power-passing hybrid splitter with a nominal insertion loss of 3.5 db. **Price: \$21.25**

Model SHS-2

Model 1593W

SURFACE-MOUNTING (BLISTER-CAN) SPLITTERS

Model 1592 is a 2-way splitter. Response flat from 4 to 220 mc. Surface-mounting. Isolation: 20 db low band, 15 db high band. 75-ohm impedance. F-61A fittings. 3.5 db maximum insertion loss. **Price: \$6.95**

Model 1562 is a 2-way transformer-type splitter. 20 db low band and 15 db high band isolation. Bushings come out around edges of "blister-can." B-59 bushings. **Price: \$3.65**

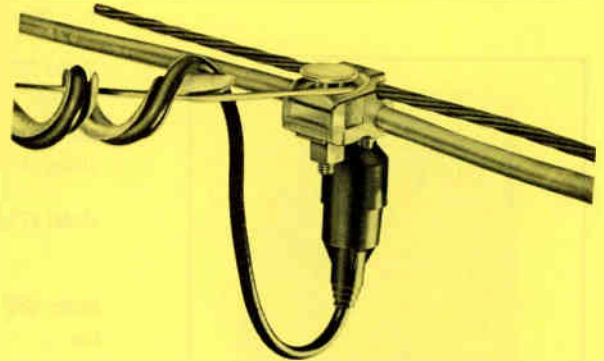

Model 1514 is a 4-way transformer-type splitter. 12 db isolation. 6.5 db splitting loss. F-61A fittings. Covers 24 to 216 mc bandwidth. **Price: \$6.95**

Model 1593W is a low-loss, two-way rf hybrid splitter covering the 54-216 mc range and featuring ac by-pass circuitry. This messenger-mounted unit also features a low VSWR and has only 3.5 db loss in each leg. **Price: \$15.25**

- Model T-378.** 75 to 300 ohm matching transformer (economy model). **Price: \$1.55**
- Model T-372.** Surface mounting matching transformer. **Price: \$2.75**
- Model T-373.** Flush mounting matching transformer. **Price: \$2.75**

Model FMT-3. Provides for connection of one FM set to line. Surface mounting. Isolation: 8 db minimum, 17 db maximum. Less than 1 db insertion loss. 75 ohm impedance. **Price: \$3.65**

ATTENUATORS

Model A-750-F is a slide-switch device providing 0 to 82 db attenuation in one-db steps. Covers 0 to 250 mc range. Price: \$54.50

Model AV-75-F is a rotary-switch device providing 0 to 62.5 db attenuation in 0.5 db steps. Covers 0 to 500 mc range. Price: \$160.00

FIELD STRENGTH METERS AND ADAPTERS

NEW! Model 727 is a deluxe, solid-state FSM. This portable, light-weight instrument can be powered from three sources; (1) built-in, rechargeable nickel-cadmium battery (10 hrs. continuous use between charges), (2) any 117-v ac outlet, and (3) any external 12-v, 50 ma. battery. Range: 5 to 220 mc in 4 ranges. Accuracy: ± 1.5 db. Meter ranges: 10 microvolts to 3 volts in 10 ranges. Also features recorder output, video output jack, meter range indicator, and dial lights. Price: \$595.00

Model UH-727 is a plug-in adapter to extend the range of Model 727 to cover the UHF band (470 to 890 mc). Price: \$120.00

Model 720 is an economy, solid-state, battery-operated FSM ideally suited to field applications. Range: 54 to 108 mc and 174 to 220 mc. Accuracy: ± 1.75 db. Employs 2 standard, 9 volt, transistor-radio-type batteries. Price: \$295.00

Model UH-720 UHF adapter can be connected to any FSM on the market to extend its range to cover the UHF band (470 to 890 mc). Built-in power supply enables it to be operated at a

distance from the FSM. Accuracy: ± 2 db. Supplied complete with 300-75 ohm matching transformer, plug-in UHF antenna, universal mounting bar, 2 F-59 male connectors, and 2 9-volt alkaline batteries. Price: \$120.00

Model 704-B is the tube-type FSM covering the TV and FM bands which has long been the standard of the industry. Reads down to 5 microvolts and up to 3 volts in 8 ranges. Accuracy: ± 0.8 db. Price: \$395.00

Model TK-704 adapts Model 704-B to cover the sub-VHF range. Price: \$105.00

MARKER GENERATORS

Model CM-10 TV provides your choice of up to ten crystal-controlled marker signals between 100 kc and 100 mc. In the higher frequencies, up to the 20th harmonic will be visible (up to the 10th in the lower frequencies). Proper choice and mixing will provide harmonic sideband ("birdie bypass") markers across wide band width. Features include individual amplitude control, marker-shape control, scope preamplifier, choice of ac or dc marks, and provision for the addition of external markers.

Price (w/10 crystals): \$615.00

Model CM-6TV is a portable unit similar to CM-10 in circuitry. Instrument provides up to 6 crystal controlled marker signals between 2 and 100 mc. Price (w/6 crystals): \$445.00

Model CM-6TV

Models RLBV-7F and RLBV-6H-7F are rf bridges having respectively 40 and 60 db return loss. Prices: RLBV-7F, \$175.00; RLBV-6H-7F, \$250.00

Models D-86-7F and D-75-UF are bridging-type rf detectors having respective ranges of 0.5 to 230 mc and 0.5 to 1200 mc. They convert rf energy into dc voltage for direct application to an oscilloscope, a scope preamp, or a recorder. Prices: D-86-7F, \$25.00; D-75-UF, \$55.00

SWEEP GENERATORS

Model 900-B-7F provides 10 kc to 400 mc sweeps to satisfy both narrow and wide sweepwidth requirements. Built-in test equipment includes attenuator, harmonic marker generator, scope preamplifier, plug-in rf detector (removable for remote use), and rf output meter. A large, accurately, calibrated, illuminated dial provides center-frequency reference at a glance. Additional features include VHF-UHF switch, marker amplifier, provision for inserting external markers for connecting other accessory equipment.

Specifications: ranges—VHF, 500 kc to 400 mc and UHF, 275 mc to 1200 mc; response—flat within ± 0.5 db up to 800 mc and ± 1.5 db from 800 to 1200 mc; output capability—VHF, 0.25 v rms and UHF, 0.5 v rms. Price: \$2,045.00

Model 890-7F Sweep Generator provides for sweeping from 500 kc to 1100 mc in two ranges (VHF, 500 kc to 400 mc, and UHF, 275 mc to 1100 mc) with sweep widths variable from 100 kc to 200 mc.

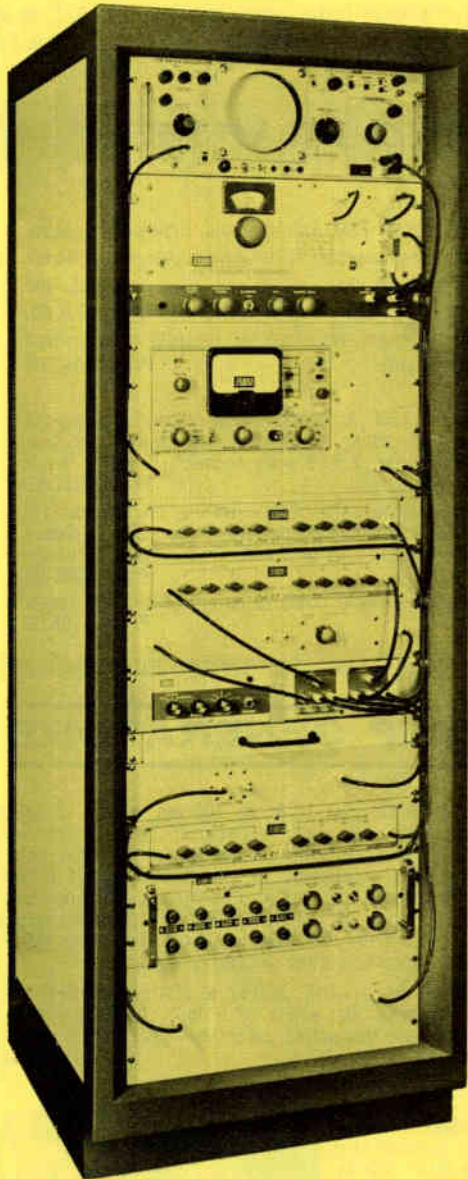

Model 890

VHF or UHF operation is selected by simple interconnection or jumper cables to front panel fittings. Other features include marker amplifier, reference dial, provisions for inserting an external marker, and means for connecting an external rf detector. Price: \$895.00

Model 601-7F is a portable sweep generator for testing and aligning if and rf circuits in the frequency range from 12 to 225 mc. There are eleven overlapping switch ranges to cover the entire band with fundamental frequency output on all ranges. The unit features an electronic, saturable-reactor sweep circuit with a maximum sweep deviation of approximately $\pm 60\%$ of center frequency. The rf output response at 0.5 volts rms is flat within $\pm 3\%$ db. Output level is adjustable by switch attenuators. The horizontal output can be phased thru approximately 360° . Blanking is provided with a front panel switch. Price: \$365.00

COMPLETE RF TEST EQUIPMENT PACKAGE FOR CATV SYSTEMS

Model 1801

MODEL 1801

Model 1801. Rack-mounted Jerrold rf test equipment includes a Model 890-7F sweep generator, a 704-B field strength meter, a TC3-7F three-position coaxial switcher, a CM-10TV marker generator, two TML-1 solid-state amplifiers, an RPS-15 power supply, three AV-75FR attenuators, a D-75-FR detector, and two CS-275 rotary coaxial transfer switches ganged together in a special manner for this rack application. Also included in the rack is a high-sensitivity Tektronix oscilloscope Model RM-503. A pull-out work surface is provided for the equipment under test. A Jerrold variable bridge Model RLBV-7F is supplied with the rack.

Applications include quick and accurate MBC (measurement-by-comparison) tests as well as noise figure, signal-to-noise ratio, and signal strength tests. Any CATV equipment (amplifiers, converters, cable, cable connectors, filters, traps, etc.) can be tested for all rf characteristics.

Price: \$5,450.00

Model 1802 is similar to Model 1801 except that Tektronix high-sensitivity scope is replaced by a wide-band Model RM-15 Tektronix scope.

Price: \$5,775.00

Model 1803 is similar to Model 1801 except that no oscilloscope is supplied.

Price: \$4,750.00

VOLTAGE COMPARATORS

Each of these models provides for the simultaneous display on an oscilloscope of the output voltages of electronic devices under test and reference voltages from another source for immediate and simple comparison. This technique insures measurement free from errors due to detector square law characteristics, scope calibration, or non-linearity.

Model FD-30 is a portable, two-position (alternates between reference and test) comparator covering the dc to 230 mc range.

Price: \$195.00

Model TC3-7F is a bench or rack-mounted, solid-state, three-position comparator which permits simultaneous viewing of three separate traces on a scope. Specifications: range—dc to 1200 mc; isolation—30 db min. (1000 mc), 28 db min. (1200 mc); VSWR—1.1:1 max. (1000 mc), 1.2:1 max. (1200 mc); insertion loss—0.1 db; fittings—75-ohm F.

Price: \$295.00

Is Agnes Ehrlich different because she said "No"?

The cooperation of selected samples is one of the most critical areas of good research. That's why we at the American Research Bureau put special emphasis on selecting and training interviewers who can talk friendly and honestly to people like Agnes Ehrlich about the importance of participating in our audience surveys. But some of them still tell us no.

Although 619,700 families *did* participate in ARB diary surveys last year, we know that gaining complete and accurate cooperation is an impossible objective. We know it, but we don't write it off. Rather, ARB researchers are constantly at work attempting to identify the effects of non-cooperation. After all, it's important to us, and to you, to know if Agnes Ehrlich is that much different than people who say "yes" and how she's different.

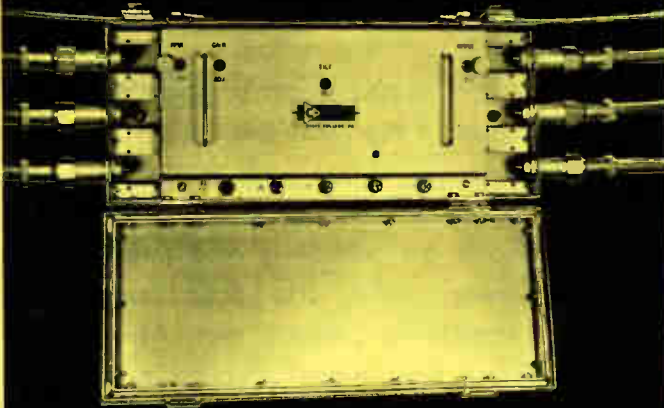

This type of diligence has paid off, and will continue to pay off in better audience research reports . . . the kind you just naturally expect from ARB.

NOVACOR SOLID-STATE AMPLIFIERS

A GREAT BREAKTHROUGH IN CATV AMPLIFIERS

BRIDGING AMPLIFIERS

BRIDGING AMPLIFIERS

NOVACOR Bridgers are modular in design, incorporate new circuitry, and supply 10 db more output than any other CATV amplifiers. The case, with connectors and cables attached, can become a permanent part of the plant, with the electronic chassis unplugging. NOVACOR Bridgers, available in 12 different models, feature direct feed and directional coupler feed configurations. The direct feed configuration is designed to feed from a "bridger out" of the Trunk Amplifiers, an external splitter or directional coupler. The coupler feed is designed for insertion in the trunk without external coupler or splitters.

LINE EXTENDERS

LINE EXTENDERS

NOVACOR All Band Line Extender Amplifiers utilize solid state circuit design for high output-low noise capabilities. Equipped with both fixed and variable attenuation for flexibility of system design, these line extenders are designed to be cable-powered with power feed thru or power "link" disconnect for feeding either end. Housed in a water tight, RF gasketed case, the NOVACOR Extenders are available with AMP connector arrangements for either messenger or pedestal mounting.

TAP UNITS

TAP UNITS

NOVACOR Tap Units, a hybrid design for flattest response, are housed in epoxy sealed, aluminum cases, and come with pedestal mountings (TU) or messenger mountings (TM). These units feature true impedance match on service drops, and are marked with reflective numbers for ease of locating at night, db loss of tap and input direction.

NOVACOR . . . a breakthrough in CATV amplifiers

TRUNK AMPLIFIERS

NOVACOR Trunk Amplifiers supply 10 db more output than any other CATV amplifiers. They are available in three basic models, which differ in gain and tilt capability to provide optimum amplifier spacing in systems of varying length and customer density. The amplifier is housed in an aluminum, weathertight, RF gasketed case, and is available with messenger mount or can be attached to the cross arm.

SPLITTERS

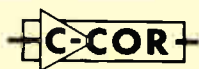

All NOVACOR Splitters are weather sealed with epoxy for long lasting, trouble-free performance. They feature a universal mounting for messenger or surface by use of a throw-away stud and messenger clamp assembly. AMP connectors are standard, while we can supply M or U, or other connectors on special order. The NOVACOR indoor splitters are supplied with F connectors and no power bypass.

TEST PROBE

A NOVACOR Test Probe, TP-30, is supplied with each amplifier. It is designed with 30 db of attenuation ± 1 db with 3' of RG-59U cable. It can be utilized for measurements either at the input or output test points. The test probe is clipped to the inside of the case cover of the amplifier with a flexible retaining cable to eliminate loss.

POWER SUPPLY

The PS-30 Power Supply is housed in a weather-proof aluminum case which can be mounted to the cross arm. Power feed and distribution is made through the connectors on the bottom of the case. Accessibility to the supply unit is made easy and convenient through a sliding front panel. The supply unit may be removed without detaching the case from its mounting.

COLOR TV TAKES A GIANT LEAP FORWARD WITH THE REVOLUTIONARY NEW...

Polychrome Camera

Sarkes Tarzian, Inc. brought a fresh outlook to the problem of color television. We were free to explore all possibilities. We had no commitment—economical or philosophical—to an existing system, with its inherent faults.

We had no hesitation to innovate, where innovation was called for. Likewise, where we found a proven concept, we adopted it.

Results? The revolutionary, full-color Polychrome Camera system—the only color system offering a choice of tubes.

Here is color television previously unknown. Here is color performance to still the remaining skeptics. Here is rare purity of color . . . rigid stability . . . delicate detail.

And while our engineers were at it, they designed out heaviness and awkward appearance—giving the Polychrome Camera a trim, eye-pleasing silhouette in a unique magnesium housing. Like its monochrome predecessors, Tarzian's Polychrome Camera systems feature 100% transistorized circuitry.

The first Polychrome Camera systems are scheduled for June delivery.
