WOF is in Anytown, in Howcom county. Its Direct Dial telephone code is 401.

WOF began operation Jan. 1, 1963. It operates on 1600 kc, with 50 kw in daytime hours, 10 kw at night. It uses a directional antenna during day hours (DA-N indicates nighttime directional antenna; DA-1, indicates directional antenna at all times, and DA-2 indicates directional antenna with differing directional patterns in daytime and nighttime hours. SH—specified hours of operation; ST—station shares time; CH—critical hours; CP—construction permit; CR—Canadian restricted). This station is limited to operating at nighttime, only when dominant station (WOOF) is not operating. Its mailing address is P.O. Box 100, ZIP code 00001. Telephone is 462-0100. Teletype Writer Exchange

(TWX) number is 401-568-0100. Licensee's name is WOF Broadcasting Co., which purchased the station from its previous owner on July 1, 1963. (If no acquired date is listed, licensee is original owner.) The licensee owns other stations, which are listed in the "Group Ownership" section of this yearbook under WOF Broadcasting Stns. The licensee also has connection with print publications which are listed in the "Newspaper Ownership" section.

WOF is affiliated with the ABC network. Its national sales representative is Petry, and regional rep, Penn State, follows the national rep. WOF has one hour of specialty programs each week in the Italian language.

**WOF-FM** 1963: 106.9 mc; 20 kw. Ant 200 ft. Dup WOF 60%. Stereo.

WOF-TV affil.

WOF-FM began operation in 1963 on 106.9 mc, with an effective radiated power of 20 kw. Its antenna is 200 feet above average terrain. It duplicates the programing of WOF 60% of its broadcast schedule and programs independently the remaining time. It also broadcasts in stereo by the multiplex system. Licnsee of the FM station is the same as companion AM station, unless otherwise listed.

WOF-TV is the TV adjunct of WOF-AM-FM.

Listings for independent FM stations follow the format of AM station listings.

For abbreviations used in listing see page E-66.

# BEELINE<sup>®</sup> COUNTRY... AWFULLY BIG IN FARM INCOME

... and **BEELINE RADIO** is a proven way to reach this important market

You can bank on *results* when you put your sales message on Beeline Radio. The Inland California and Western Nevada counties covered by these four stations have more combined farm income than any one of 46 states — \$2.01 billion. This is the audience Beeline Radio has been reaching

for many years. Beeline stations have the listener loyalty that produces sales results for you. In your next media schedule, be sure and include the four Beeline stations — the key to California's Inland Valley and Western Nevada.

**The K-TTT Story . . .**

We program bright pop music which is listened to in 15 rich Nebr. counties where the farm income is double the national average.

Our announcers are real pros and a full time news staff aided by fully equipped mobile news unit and 11 area correspondents doesn't miss a trick.

K-TTT leads the field in all surveys. But the proof of the pudding is in our list of local sponsors. It's a long one.

We are 500 watts on 1510 kc. with 10,000 ideas.

## CONTINUITY IN MANAGEMENT

# 44 years' EXPERIENCE and responsible service to TOLEDO

WSPD-Radio is one of the golden circle of only 30 radio stations which were on the air before January 1, 1922.

Its first broadcast was April 15, 1921, just a little more than 44 years ago. In 1927, it became the first of the Storer Stations—when it was acquired by George B. Storer, Sr., and his associate, J. Harold Ryan.

From WSPD and from the exper-

ience and skills developed in Toledo has grown The Storer Broadcasting Co.—one of the nation's leaders in responsible electronic communication, entertainment and service.

From that first day in 1927 under Storer management, WSPD has earned and maintained a dominant influence with the people of Toledo, Northwestern Ohio and Southern Michigan.

WSPD, Toledo—in 1921, the first station in Northwestern Ohio; today, still first in audience among all stations serving this bustling, prosperous corner of the Buckeye State.\*

SERVING THE STATE FROM  
COLUMBIA WITH SOUTH CAROLINA'S  
ONLY TOTAL RADIO  
BROADCASTING SERVICE

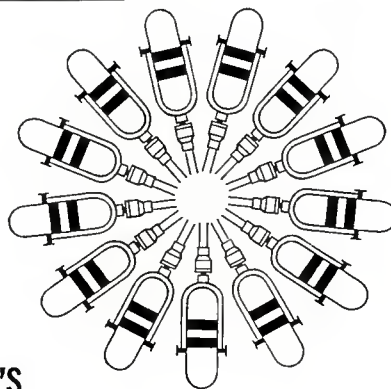

WIS Radio, for 36 years, has been the symbol of Quality Broadcast Service to South Carolinians and advertisers alike, with more local, regional and national advertisers than the next three leading stations combined. WIS is the only local radio station subscribing to the Industry Code of Good Practices indicating responsibility in programming and observing minimum standards in the presentation of advertising.

Golden Horn stations reach the special audience you want with the kind of responsible broadcasting that converts listeners into a loyal audience. Each has an experienced staff working to make their station a living part of the community. They understand and fulfill their obligation to their communities because they are sensitive to the special interests and special needs of their audience.

Against this background of responsible, intelligent broadcasting, Speidel air salesmen can give your product an endorsement that counts. Try Speidel "community radio" and watch the sales curve climb.

It's one easy buy for all 6 stations or any combination that suits your marketing plans. For full details call our representatives —

In each field, there is a leader—and this leader selectively attracts the major share of men and women who are leaders themselves.

Your best index of a business paper's worth is the *PAID* circulation it commands. People *pay* for a publication because they value it, want it, depend upon it as a reliable source of facts. Only *quality* of editorial coverage can make this possible.

IN THE BUSINESS OF BROADCAST ADVERTISING the leader is BROADCASTING. Through the pages of BROADCASTING, your own advertising reaches more than *twice* the paid circulation among vital agency-&-advertiser readers than any other TV-radio publication can offer. And at a cost-per-contact less than *half* that of any other.

This is the largest audience with the greatest potential at the biggest economy. BROADCASTING delivers it.

## IT'S NO SOONER DONE THAN SAID ON KPRC!

Folks who have been in the 5,000 watt, 22 county coverage area of Radio Station KPRC for any length of time know that the KPRC frequency, 95-0, is the place to stay tuned if you want complete, concise, conscientious up-to-the minute news coverage! KPRC maintains Houston's largest radio news staff, headed by enthusiastic veteran Ray Miller and manned by reporter-announcers like Tom Fox, Will Sinclair, Lee Tucker, Garry James, Frank Dobbs, Bob Harper, Bruce Eagin, Jack Long and Ray Norton, aided and abetted by the Associated Press, UPI and NBC News. Newcomers are instantly alerted to KPRC award-winning News the first time they drive around Houston by the 20 award-winning posters KPRC exhibits purely to let people know its news is **on the air**. . . . These posters, like the one shown above, are linked by telephone lines to the news announcer's booth at KPRC, and when he sits down to broadcast he flicks a switch and all 20 boards start blinking. Houston motorists pay immediate attention — switch to KPRC, 95-0. This is what is known as "racking up" a maximum audience! It makes KPRC

## FIRST WORD IN NEWS, LAST WORD IN MUSIC

because the music library at KPRC has been more than 40 years in the building, and is up-dated daily with a delicate, almost seismographic feel of the KPRC audience pulse. KPRC is an adult radio station and reflects mature programming ideas and innovations. Its taste in music never irritates, never jangles nerves, never palls, but always stimulates, encourages, and pleases. And, KPRC isn't just a news-music machine. It introduces its music with

## THE MOST POPULAR PERSONALITIES AROUND!

Mornings begin at KPRC with Tim Nolan and Bob Byron, the irrepressible pair in town. Individually they're head and shoulders above the usual cut. Together they're unbeatable! They hold forth from 6:15 until 10 each weekday morning. Alan Johnson follows them, from 10 until 2 in the afternoon with his sly wit and humor, and Charlie Johnson regales the loyal KPRC listeners with his ingratiating manner and his good nature from 2 to 6. Night-time belongs to Jim Young at KPRC when there isn't a major league baseball game, or a Southwest Conference football or basketball game on the air, and when he gets the chance, Jim makes the best of it! **You can enjoy the best of it in Houston by using KPRC RADIO/95-0 ON THE DIAL/THE HOUSTON POST STATION/EDWARD PETRY & CO., NATIONAL REPS.**

**The pop-click-hum bug is dead.**

**Collins' new Speech Console hasn't a mechanical contact in the program circuits.**

Photoconductive cells instead of relays and switches.

No contacts to wear and get dirty. Nothing at all to keep clean. Result: your most troublesome maintenance problem is ended. Also: no pops, clicks and hums from mechanical switches. Your audio is the cleanest, clearest audio on the air.

A lot less wire (and a lot less hum).

Audio doesn't have to travel to front panel and back. This means you have a lot less wire to pick up noise. (There is no noise, either, from attenuators. They are sealed in protective capsules.)

Module design ends time-wasting troubleshooting.

Simply take out one card and plug in another. Replace attenuator, input switches, and amplifier output switches with one quick shuffle of cards.

The Collins solid state 212S-1 is for stereo and dual channel operation for FM, AM and TV stations. The companion 212M-1 Console has fewer modules for mono program and monitor outputs.

For details, call your Collins representative. Or write: Broadcast Communication Division, Collins Radio Company, Dallas, Texas 75207.

This is the  
Collins 212S-1  
that killed the  
pop-click-hum bug.

# To what lengths must a cable manufacturer go to prove his product is better?

## As long as the distance between your amplifiers—even up to one-half mile continuous lengths.

When Times Wire and Cable decided to build a CATV cable to outdistance any other in length and performance, we really went all the way: We built a cable that can span the entire distance between your amplifiers.

However, it's not just that Times JT-1000 CATV cable is longer that makes it better. It's also continuous. It's seamless for the entire length. And it's aluminum. Put them all together and you have *continuous seamless aluminum tube sheath CATV cable* in lengths up to ½ mile long—a feat nobody else has yet been able to match!

Here's what these new longer lengths mean to your CATV operations:

- Easily saves you 10% installation and shipping costs. Longer lengths mean fewer splices—8% saved. Another example: Only 1 reel needed for 2,500 feet of cable instead of 1 reel for each 1,000 feet—another 2% saved.

- Times seamless cable is waterproof. Puncture it, splice it, apply as many pressure taps as you like. Water vapor and/or water can't travel in Times self-sealing solid sheath cable. Complete dielectric adhesion to center conductor and complete compression seal to outer conductor eliminate longitudinal vapor or water paths.

- Times cable gives you minimum return loss guarantee. Your choice of guaranteed 26 db or 30 db minimum return loss—a must for minimum ghosting, true color reproduction.

- Increases profit by decreasing splices and scrap. Fewer splices mean less material wasted (fewer tailings), less maintenance needed, too. Less maintenance means less labor cost and more profit.

And don't forget: long after so-called economy cable has been replaced (it starts deteriorating the day you install it), Times continuous seamless aluminum tube sheath CATV cable will still be a top performer, keeping pace with your system's planned potential.

There you have it: the longer the cable, the fewer the splices, the lower the maintenance, the better the performance... and the higher the profits. Times did it all, with its new longer CATV cable... and we're shipping it right now!

*Presenting the Times Family of Firsts— The Standards of the CATV Industry...*

First to design a long-life cable specifically for CATV. First with foam dielectric cables for CATV. First with cable that made all-band CATV systems economically feasible.

First to offer 26 db minimum return loss guarantee for CATV.

First again with ½ mile lengths of seamless aluminum sheath CATV cable.

**Timatch® Connectors with Coilgrip® clamp**  
The quality CATV connector

One piece construction  
The Timatch Connector with Coilgrip Clamp introduces a new concept in connector design... "simplicity." A one piece construction incorporating excellent electrical characteristics and a positive, simple, non-destructive clamp. Eliminating separate sleeves, nuts, collets, rings, inserts, etc., all components of Timatch Connector with Coilgrip Clamp have been integrally designed into the connector body.

Because of this one-piece construction, Timatch Connector are simple to attach:

1. Cut outer conductor flush with dielectric exposing inner conductor.
2. Slip connector on cable.
3. Tighten back nut.

This quality CATV Connector is available with COILGRIP Clamp in series N, F, UHF, VSF. Splices and bulkhead connectors available in all sizes.
