NOTE 8: Paragraph (a)(1) of this section will not be applied to cases involving television stations which are primarily "satellite" operations. Such cases will be considered on a case-by-case basis in order to determine whether common ownership, operation, or control of the stations in question would be in the public interest. Whether or not a particular television broadcast station which does not present a substantial amount of locally originated programming is primarily a "satellite" operation will be determined on the facts of the particular case. An authorized and operating "satellite" television station the Grade B contour of which overlaps that of a commonly owned, operated, or controlled "non-satellite" parent television station may subsequently become a "non-satellite" station with local studios and locally originated programming. However, such commonly owned, operated, or controlled "non-satellite" stations with Grade B overlap may not be transferred or assigned to a single person, group or entity.

STUDIO LOCATION ORIGINATIONS

In AM rules . . .

§73.30 Station location and program origination.—(a) (1) Except as provided in paragraph (b) of this section, each standard broadcast station will be licensed to serve primarily a particular city, town, political subdivision, or community which will be specified in the station license and the station will be considered to be located in such place. (2) Unless licensed as a synchronous amplifier transmitter, each station shall maintain a studio, which will be known as the main studio, in the place where the station is located provided that the main studio may be located at the transmitter site whether or not the transmitter site is in the place where the station is located. (3) A majority (computed on the basis of duration and not number) of a station's programs or in the case of a station affiliated with a network two-thirds of such station's non-network programs, whichever is smaller, shall originate from the main studio or from other studios or remote points situated in the place where the station is located.

(b) (1) Stations will be licensed to serve more than one city, town, political subdivision, or community only where a satisfactory showing is made that each such place meets all the requirements of the rules and regulations of this subpart with respect to the location of main studios; that the station can and will originate a substantial number of local live programs from each such place; and that the requirements as to origination of programs contained in paragraph (a) of this section would place an unreasonable burden on the station if it were licensed to serve only one city, town, political subdivision or community. (2) A station licensed to serve more than one place shall be considered to be located in and shall maintain main studios in each such place. With respect to such station and requirements as to origination of programs contained in paragraph (a) of this section shall be satisfied by the origination of

programs from any or all of the main studios or from other studios and remote points situated in any or all of the places in which the main studios are located.

(c) The transmitter of each standard broadcast station shall be so located that primary service is delivered to the borough or city in which the main studio is located in accordance with the rules and regulations of this subpart.

§73.81. Authority to move main studio.—The licensee of a station shall not move its main studio outside the borders of the borough or city, state, district, territory, or possession in which it is located, unless such move is to the location of the station's transmitter, without first securing a modification of construction permit or license. The licensee shall promptly notify the Commission of any other change in location of the main studio.

In FM rules . . .

§73.210.—[EDITOR'S NOTE: In substance the same as §73.30, above].

In TV rules . . .

§73.613 Main studio location.—(a) The main studio of a television broadcast station shall be located in the principal community to be served. Where the principal community to be served is a city, town, village or other political subdivision, the main studio shall be located within the corporate boundaries of such city, town, village or other political subdivision. Where the principal community to be served does not have specifically defined political boundaries, applications will be considered on a case-to-case basis in the light of the particular facts involved to determine whether the main studio is located within the principal community to be served.

(b) In case where an adequate showing is made that there is good cause for locating a main studio outside the principal community to be served and that to do so would not be inconsistent with the operation of the station in the public interest, the Commission will permit the use of a main studio location other than that specified in paragraph (a) of this section. The licensee or permittee of a television broadcast station shall not move his main studio outside the principal community in which it is located without first securing a modification of construction permit or license. Such a licensee or permittee shall notify the Commission promptly of any change of the location of the main studio within the community. In any case where the main studio is located outside the principal community to be served, the licensee or permittee of a television broadcast station shall not move his main studio without first securing a modification of construction permit or license.

OPERATING SCHEDULES

For AM stations . . .

§73.71 Minimum operating schedule.—(a) All standard broadcast stations are required to maintain an operating schedule of not less than two-thirds of the total hours they are authorized to operate between 6 a.m. and 6 p.m. local time, and two-thirds of the total hours they are authorized to operate between 6 p.m. and midnight, local time each day of the week except Sunday. Provided, however, that stations authorized for daytime operation only need comply only with the minimum requirement for operation between 6 a.m. and 6 p.m.

(b) In the event that causes beyond the licensee's control make it impossible to adhere to the operating schedule in paragraph (a) of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 10 days, without further authority of the Commission. However, the Commission and the Engineer in Charge of the radio district in which the station is located shall be immediately notified in writing if the station is unable to maintain the minimum operating schedule and shall be subsequently notified when the station resumes regular operation.

§73.72 Operation during experimental period.—The licensee of each standard broadcast station shall operate or refrain from operating its station during the experimental period as directed by the Commission in order to facilitate frequency measurement or for the determination of interference.

§73.73 Specified hours.—If the license of a station specifies the hours of operation, the schedule so specified shall be adhered to except as provided in §§73.71 and 73.72.

§73.79 License to specify sunrise and sunset hours.—If the licensee of a broadcast station is required to commence or cease operation, or to change the mode of operation of the station at the times of sunrise and sunset at any particular location, the controlling times of each month of the year are set forth in the station's instrument of authorization. Uniform sunrise and sunset times are spe-

cified for all of the days of each month, based upon the actual times of sunrise and sunset for the fifteenth day of that month adjusted to the nearest quarter hour. In accordance with a standardized procedure described therein, actual sunrise and sunset time are derived by interpolation in the tables of the 1946 American Nautical Almanac, issued by the Nautical Almanac Office of the United States Naval Observatory.

§73.80 Secondary station; filing of operating schedule.—The license of a secondary station authorized to operate limited time and which may resume operation at the time the dominant station (or stations) on the same channel ceases operation shall, with each application for renewal of license, file in triplicate a copy of its regular operating schedule, bearing a signed notation by the licensee of the dominant station of its objection or lack of objection thereto. Upon approval of such operating schedule, the Commission will affix its file mark and return one copy to the licensee authorized to operate limited time, which shall be posted with the station license and considered as a part thereof. Departure from said operating schedule will be permitted only in accordance with the procedure set forth in §73.77.

§73.81 Secondary station; failure to reach agreement.—If the licensee of a secondary station authorized to operate limited time and a dominant station on a channel are unable to agree upon a definite time for resumption of operation by the station authorized limited time, the Commission shall be so notified by the licensee of the station authorized limited time. After receipt of such statement the Commission will designate for hearing the applications of both stations for renewal of license, and pending the hearing the schedule previously adhered to shall remain in full force and effect.

§73.82 Departure from schedule; material violation.—In all cases where a station licensee is required to prepare and file an operating schedule, any deviation of departure from such schedule, except as herein authorized, shall be considered as a violation of a material term of the license.

§73.83 References to time.—Where used in Commission authorizations to specify average times of sunrise and sunset, or to specify other times at which stations commence operation or change modes of operation and which vary with local sunrise and local sunset, "standard time" means standard time (as determined by the Department of Transportation for the various areas of the United States) as that term has been used prior to the Uniform Time Act of 1966, i.e., time sometimes referred to as "nonadvanced" or "winter-based" time, without the 1-hour advancement provided for in that Act from late April until late October. In all other time references in Commission authorizations (including times for specified hours and shared hours stations and the expiration times of licenses) "standard time" means local time. The term "local time," where used in this part and in Part 74, of this chapter, means the time (advanced or non-advanced) prevailing in the community of station location at the particular time of year. Where used in this part or in Part 74, the term "advanced time" means time from the last Sunday in April until the last Sunday in October with the 1-hour advancement contemplated by the Uniform Time Act of 1966 and sometimes called "daylight saving time"; and the term "nonadvanced time" means time from the last Sunday in October until the last Sunday in April, and time during the remainder of the year in jurisdictions not adopting "advanced time."

§73.87 Times and modes of program transmission.—Except as provided in §73.98 and §73.99, no standard broadcast station shall operate at times, or with modes or powers, other than those specified in the basic instrument of authorization.

§73.88 Blanketing interference.—The licensee of each broadcast station is required to satisfy all reasonable complaints of blanketing interference with the 1 m/v contour.

§73.98 Operation during emergency.—(a) When necessary to the safety of life and property and in response to dangerous conditions of a general nature, standard broadcast stations may, at the discretion of the licensee and without further Commission authority, transmit emergency weather warnings and other emergency information. Examples of emergency situations which may warrant either an immediate or delayed response by the licensee are: tornadoes, hurricanes, floods, tidal waves, earthquakes, icing conditions, heavy snows, widespread fires, discharge of toxic gases, widespread power failures, industrial explosions, and civil disorders. Transmission of information concerning school closings and changes in school bus schedules resulting from any of these conditions, is appropriate. In addition, and if requested by responsible public officials, emergency point-to-point messages

may be transmitted for the purpose of requesting or dispatching aid and assisting in rescue operations.

(b) When emergency operation is conducted utilizing the facilities, systems, and procedures of a Detailed State EBS Operational Plan as provided in §73.971 of this part, the attention signal described in §73.906 may be employed.

(c) Except as provided in paragraph (d) of this section, emergency operation shall be confined to the hours, frequencies, powers, and modes of operation specified in the license documents of the stations concerned.

(d) When adequate advance warning cannot be given with the facilities or hours authorized, stations may employ their full daytime facilities during nighttime hours to carry weather warnings and other types of emergency information connected with the examples listed in paragraph (a) of this section. Because of skywave interference impact on other stations assigned to the same channel, such operation may be undertaken only if regular, unlimited-time service is nonexistent, inadequate from the standpoint of coverage, or not serving public need. All operation under this paragraph must be conducted on a noncommercial basis. Recorded music may be used to the extent necessary to provide program continuity.

(e) Any emergency operation undertaken in accordance with this section may be terminated by the Commission, if required in the public interest.

(f) Immediately upon cessation of an emergency during which broadcast facilities were used for the transmission of point-to-point messages under paragraph (a) of this section, or when daytime facilities were used during nighttime hours in accordance with paragraph (d) of this section, a report in letter form shall be forwarded to the Commission and the Engineer in Charge of the radio district in which the station is located, setting forth the nature of the emergency, the dates and hours of emergency operation, and a brief description of the material carried during the emergency period. A certification of compliance with the noncommercialization provision of paragraph (d) of this section must accompany the report where daytime facilities are used during nighttime hours, together with a detailed showing concerning the alternate service provisions of that paragraph.

(g) If an Emergency Action Condition is declared while emergency operation under this section is in progress, the Emergency Action Notification shall take precedence.

§73.99 Pre-sunrise Service Authority.—(a) In order to afford the maximum uniformity in early morning operations compatible with interference considerations, the following classes of standard broadcast permittees and licensees are eligible to request Pre-sunrise Service Authority (PSA):

(1) Class II stations except those operating on Class I-A Clear Channels not assigned to the United States under the North American Regional Broadcasting Agreement (NARBA) or the US/Mexican Agreement, and those assigned to U.S. I-A clear channels and located east of the co-channel I-A station.

(2) Class III stations.

(b) When issued, AFSA will permit:

(1) Class II stations to commence operation with their daytime antenna systems either at 6:00 a.m. local time or at sunrise at the westernmost Class I station located east of the Class II station (whichever is later), and to continue such operation until local sunrise. Provided, that the permissible power, to be specified in the PSA, shall not exceed 500 watts (or the authorized daytime or critical hours power, if less than 500 watts), or such lesser power as may be determined on the basis of calculations made pursuant to paragraph (c) of this section.

(2) Class III stations to commence operation with their daytime antenna systems at 6:00 a.m. local time, and to continue such operation until local sunrise. Provided, that the permissible power, to be specified in the PSA, shall not exceed 500 watts or such lesser power as may be determined on the basis of calculations made pursuant to paragraph (c) of this section.

(c) Notwithstanding the provisions of §§1.571 and 1.580 of this chapter, requests for PSA's shall be treated as proposals for minor change in existing facilities and, as such, are not subject to the procedural requirements or remedies applicable to applications for new facilities and major changes therein. PSA requests shall be submitted by letter, signed in the manner

FCC Rules

specified in §1.513 of this chapter, with the following information:

(1) Name, call letters and station location.

(2) For Class II stations, a showing that objectionable interference, as determined by the Standard Broadcast Technical Standards of this subpart or by the engineering standards of the NARBA or the US/Mexican Agreement (whichever is controlling), will not be caused within the 0.5 mv/m 50 percent skywave contour of any domestic or foreign Class I-B clear Channel station located west of the Class II station. In addition, the applicant must show that foreign Class II stations (if any) assigned to the same channel will receive full treaty protection. If the foregoing protections cannot be achieved on the basis of 500-watt operation, calculations may be submitted to establish the level to which power must be reduced to preclude objectionable interference; Provided, that with respect to Canadian Class II stations, permissible radiation may be established by the use of Figure 12 of §73.190, in the manner described in Paragraph (c) (3) of this section.

(3) For Class III stations, a showing that co-channel stations in foreign countries will receive full treaty protection. If such protection cannot be achieved on the basis of 500-watt operation, calculations may be submitted to establish the level to which power must be reduced to preclude objectionable interference; Provided, that with respect to Canadian Class III stations, such power level may be established by a showing that the radiation at the pertinent vertical angle toward co-channel Canadian stations does not exceed that defined in Figure 12 of §73.190. If the latter showing cannot be made on the basis of 500-watt operation, calculations may be submitted to establish the level to which power must be reduced in order to limit radiation at the pertinent vertical angle to the values specified in Figure 12 of §73.190.

(4) A description of the method whereby any proposed power reduction will be achieved.

(d) Calculations made under paragraph (c) of this section shall not take outstanding PSA's into account, nor shall the grant of a PSA confer any degree of interference protection on the holder thereof.

(e) Operation under a PSA is not mandatory, and will not be included in determining compliance with the requirements of §73.71. To the extent actually undertaken, however, pre-sunrise operation will be considered by the Commission in determining overall compliance with past programing representations and station policy concerning commercial matter.

(f) The PSA is secondary to the basic instrument of authorization and may be suspended, modified, or withdrawn by the Commission without prior notice or right to hearing, if necessary to resolve interference conflicts, to implement agreements with foreign governments, or in other circumstances warranting such action.

(g) The PSA will be issued for a term coinciding with the current basic instrument of authorization and, unless surrendered by the holder or suspended, modified or withdrawn by the Commission, will have continuing or renewed effect under succeeding instruments.

(h) The issuance of a PSA is intended to include the waiver of §§73.45, 73.182, and 73.188 in situations where the operation might otherwise be considered as technically sub-standard. However, such special conditions as the Commission may deem appropriate may be included in the PSA to insure the operation of the transmitter and associated equipment in accordance with all phases of good engineering practice.

(i) In the event of permanent discontinuance of pre-sunrise operation, the PSA shall be forwarded to the Commission's Washington office for cancellation, and the Engineer in Charge of the radio district in which the station is located shall be notified accordingly.

For FM stations . . .

§73.242 Duplication of AM and FM programing.—(a) After October 15, 1965, licensees of FM stations in cities of over 100,000 population (as listed in the latest regular U. S. Census Reports) shall operate so as to devote no more than 50 percent of the average FM broadcast week to programs duplicated from an AM station owned by the same licensee in the same local area. For the purposes of this paragraph, duplication is defined to mean simultaneous broadcasting of a particular program over both the AM and FM station or the broadcast of a particular FM program within 24 hours

before or after the identical program is broadcast over the AM station.

(b) Compliance with the non-duplication requirement shall be evidenced by such showing in connection with renewal applications as the Commission may require.

(c) Upon a substantial showing that continued program duplication over a particular station would better serve the public interest than immediate non-duplication, a licensee may be granted a temporary exemption from the requirements of paragraph (a) of this section. Requests for such exemption must be submitted to the Commission, accompanied by supporting data, at least 6 months prior to the time the non-duplication requirement of paragraph (a) of this section is to become effective as to a particular station. Such exemption, if granted, will ordinarily run to the end of the station's current license period, or if granted near the end of the license period, for some other reasonable period not to exceed 3 years.

§73.261 Time of operation.—(A) All FM broadcast stations will be licensed for unlimited time operation. A minimum of 36 hours per week during the hours of 6 a.m. to midnight, consisting of not less than 5 hours in any one day, except Sunday, must be devoted to the FM broadcast operation.

(b) In the event that causes beyond a licensee's control make it impossible to adhere to the operating schedule in paragraph (a) of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 10 days, without further authority of the Commission. However, the Commission and the Engineer in Charge of the radio district in which the station is located shall be immediately notified in writing if the station is unable to maintain the minimum operating schedule and shall be subsequently notified when the station resumes regular operation.

§73.262 Experimental operation.—(a) The period between 12 midnight and 6 a.m., prevailing local time, may be used for experimental purposes in testing and maintaining apparatus by the licensee of any FM broadcast station on its assigned frequency and not in excess of its authorized power without specific authorization from the Commission.

(b) FM broadcast stations may (with prior notification to the Commission and the Engineer in Charge of the radio district in which the station is located) test, maintain, and adjust the apparatus at the station during other time periods; and may (upon informal application) conduct technical experimentation directed to the improvement of technical phases of operation during other time periods and for such purposes may utilize a signal other than the standard FM signal, subject to the following conditions:

(1) That the licensee complies with the provisions of §73.261 with regard to the minimum number of hours of operation.

(2) That emissions outside the authorized bandwidth shall comply with §73.317 (a) and that no interference is caused to the transmissions of other FM broadcast stations.

(3) No charges either direct or indirect shall be made by the licensee of an FM broadcast station for the production or transmission of programs when conducting technical experimentation.

For TV stations . . .

§73.651 Time of operation.—(a) (1) All television broadcast stations will be licensed for unlimited time operation. Each such station shall maintain a regular program operating schedule as follows: not less than 2 hours daily in any five broadcast days per week and not less than a total of 12 hours per week during the first 18 months of the stations operation; not less than 2 hours daily in any 5 broadcast days per week and not less than a total of 16 hours, 20 hours and 24 hours per week for each successive 6-month period of operation, respectively; and not less than a total of 28 hours per week thereafter.

(2) "Operation" includes the period during which a station is operated pursuant to temporary authorization or during program tests, as well as during the license period. Time devoted to test patterns, or to aural presentations accompanied by the incidental use of fixed visual images which have no substantial relationship to the subject matter of such aural presentations, shall not be considered in computing periods of program service.

(3) In the event that causes beyond a licensee's control make it impossible to adhere to the operating schedule in paragraph (a) (1) of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 10 days, without further authority of

the Commission. However, the Commission and the engineer in charge of the radio district in which the station is located shall be immediately notified in writing if the station is unable to maintain the minimum operating schedule and shall be subsequently notified when the station resumes regular operation.

(b) Noncommercial educational television broadcast stations are not required to operate on a regular schedule and no minimum number of hours of operation is specified; but the hours of actual operation during a license period shall be taken into account when considering the renewal of noncommercial educational television broadcast licenses.

(c) (1) The aural transmitter of a television station shall not be operated separately from the visual transmitter except for the following purposes:

(i) For actual tests of station equipment or actual experimentation in accordance with §73.666; and

(ii) For emergency "fills" in case of visual equipment failure or unscheduled and unavoidable delays in presenting visual programs. In such situations the aural transmitter may be used to advise the audience of difficulties and to transmit for a short period program material of such nature that the audience will be enabled to remain tuned to the station: for example, music or news accompanying a test pattern or other visual presentation.

(2) During periods of transmission of a test pattern on the visual transmitter of a television station, aural transmission shall consist only of a single tone or series of variable tones. During periods when still pictures or slides are employed to produce visual transmissions which are accompanied by aural transmissions, the aural and visual transmission shall be integral parts of a program or announcement and shall have a substantial relationship to each other; Provided: That nothing herein shall preclude the transmission of a test pattern, still picture or slides for the following purposes and periods:

(i) To accompany aural announcements of the station's program schedule and aural news broadcasts or news commentaries, for a total period not to exceed one hour in any broadcast day.

(ii) To accompany aural transmissions for a period of time not to exceed fifteen minutes immediately prior to the commencement of a programing schedule.

Examples: (1) Duplication of AM or FM programs on the aural transmitter of a television station while the same program is broadcast on the visual transmitter (i.e., a "simulcast") is consistent with this paragraph.

(2) Duplication of AM or FM programs on the aural transmitter of a television station while a test pattern is broadcast on the visual transmitter is not consistent with this paragraph, except for the specific purposes and periods specified in paragraph (c) (2).

(3) A travel lecture in which the words of the lecturer are broadcast simultaneously with still pictures or slides of scenes illustrating the lecture and a newscast in which the words of the newscaster are broadcast simultaneously with still pictures or slides of the news events, are examples of programs in which the aural and visual transmission are integral parts of the same program having a substantial relationship to each other, within the meaning of paragraph (c) (2). Mood music unrelated to the visual transmission is not consistent with this paragraph.

(4) The broadcast of a test pattern accompanied by a musical composition for the purpose of demonstration, sale, installation or orientation of television receivers, or receiving antennas is not consistent with this paragraph.

(5) Music accompanying the transmission of a test pattern upon which is visually imposed a moving test consisting of continuous program material, such as a running newscast or news commentary, is consistent with this paragraph.

(6) Music accompanying the transmission of a test pattern upon which is visually imposed a clock indicating the time of day, or a text that is changed at spaced intervals, is not consistent with this paragraph.

OPERATOR REQUIREMENTS

In AM rules . . .

§73.93 Operator requirements.—(a) One or more radio operators holding a valid radiotelephone first-class operator license, except as provided in paragraph (b) of this section, shall be in actual charge of the transmitting apparatus and shall be on duty either at the transmitter location or remote control point. If operation by remote control has not been authorized, the transmitter shall be readily accessible and clearly visi-

ble to the operator at his normal operating position. If operation by remote control is authorized, the control and monitoring equipment shall be readily accessible and clearly visible to the operator at his normal operating position.

(b) In the cases where a station is authorized for non-directional operation with power not in excess of 10 kilowatts, the routine operation of the transmitter may be performed by an operator holding a valid first-class or second-class radiotelephone or radiotelegraph operator license or a radiotelephone third-class operator permit which has been endorsed for broadcast station operation. The operator shall be on duty at the transmitter or authorized remote control point and in actual charge thereof. Except at times when the operation of the station is under the immediate supervision of an operator holding a valid radiotelephone first-class operator license, adjustments of the transmitting equipment shall be limited to the following:

(1) Those necessary to turn the transmitter on and off.

(2) Adjustments of external controls as may be required to compensate for voltage fluctuations in the power supply.

(3) Adjustments of external controls to maintain modulation of the transmitter within the prescribed limits.

(4) Adjustments of external controls necessary to effect routine changes in operating power which are required by the station's instrument of authorization.

(5) Adjustments of external control necessary to effect operation in accordance with a National Defense Emergency Authorization during an Emergency Action Condition.

It shall be the responsibility of the licensee to insure that the person who may be required to perform these tasks as well as to perform other duties (such as reading meters and making log entries), is properly instructed so as to be capable of performing the duties required of him at times when not under the immediate supervision of a radiotelephone first-class operator. Where necessary, printed step-by-step instructions shall be posted for those transmitter adjustments which the lesser grade operator is authorized to make. Should the transmitting apparatus be observed to be operating in any manner inconsistent with this subpart or the current instrument of authorization for the station at any time when an operator holding a valid radiotelephone first-class operator license is not immediately available and none of the above adjustments is effective in correcting the condition of improper operation, the emissions of the station shall be immediately terminated.

(c) If the routine operation of the transmitting apparatus at a standard broadcast station with power of 10 kw or less and non-directional antenna is performed by an operator other than a radio-telephone first-class operator pursuant to the provisions of paragraph (b) of this section, the licensee shall either employ one or more operators holding a valid radiotelephone first-class operator license as a full-time member of the station staff or, in the alternative contract in writing for the services on a part-time basis of one or more such operators. The radiotelephone first-class operator or operators shall perform transmitter maintenance and shall be promptly available at all times to correct conditions of improper operation beyond the scope of authority of the lesser grade operator on duty. If such services are on a contract part-time basis, a signed copy of the agreement shall be kept in the files of the station and at the transmitter or control point and shall be made available for inspection upon request by any authorized representative of the Commission. A signed copy of the agreement shall also be forwarded to the Commission and to the Engineer in Charge of the radio district in which the station is located within 3 days after the agreement is signed.

NOTE: During the period prior to April 19, 1964, the alternative of contracting in writing for the services of radiotelephone first-class operators on a part-time basis may not be followed unless the routine transmitter operation under the provisions of paragraph (b) of this section is performed by operators holding at least valid radiotelephone third-class operator permits which have been endorsed for broadcast station operation. Information concerning examinations for such operator permits is available to all applicants through the Commission's field offices.

(d) The licensed operator on duty and in charge of a standard broadcast transmitter may, at the discretion of the licensee, be employed for other duties or for the operation of another radio station or stations in accordance with the class of operator's license which he holds and the rules and

regulations governing such other stations: Provided, however, that such duties shall in no wise interfere with the proper operation of the standard broadcast transmitter.

(e) At all standard broadcast stations, a complete inspection of all transmitting equipment in use shall be made by an operator holding a valid radiotelephone first-class operator license at least once each day, 5 days each week, with an interval of not less than 12 hours between successive inspections. This inspection shall include such tests, adjustments, and repairs as may be necessary to insure operation in conformance with the provisions of this subpart and the current instrument of authorization for the station.

In FM rules . . .

§73.265 Operator requirements.

[EDITOR'S NOTE: Substantially the same as §73.93.]

In TV rules . . .

§73.661 Operator requirements.—One or more operators holding a valid radiotelephone first class operator license shall be on duty at the place where the transmitting apparatus is located or at a remote control point established pursuant to the provisions of §73.676, and in actual charge thereof whenever the transmitter is delivering power to the transmitting antenna. The original license (or FCC Form 759) of each station operator shall be posted at the place where he is on duty. The licensed operator on duty and in charge of a television broadcast transmitter may, at the discretion of the licensee, be employed for other duties or for the operation of another station or stations in accordance with the class of license which he holds and the rules and regulations governing such other stations. However, such other duties shall in no wise impair or impede the required supervision of the television broadcast transmitter. If operation by remote control has not been authorized, the transmitter shall be readily accessible and clearly visible to the operator at his normal operating position. If operation by remote control is authorized, the control and monitoring equipment shall be readily accessible and clearly visible to the operator at his normal operating position.

FACSIMILE

§73.266 Facsimile broadcasting and multiplex transmission.—(a) FM broadcast stations may transmit simplex facsimile in accordance with transmission standards set forth in §73.318 during periods not devoted to FM aural broadcasting. Such transmissions may not exceed one hour during the period between 7 a.m. and midnight (no limit for the hours between midnight and 7 a.m.) and may not be counted toward the minimum operation required by §73.261. The Commission shall be notified by the licensee of the FM broadcast station of its intent to transmit such facsimile.

(b) FM broadcast stations may, upon securing authorization from the Commission, transmit multiplex facsimile in accordance with transmission standards set forth in §73.318; provided that the transmission of such facsimile does not reduce the quality of aural programs simultaneously transmitted by the licensee below that required by the technical standards of this subpart and that no degradation of such aural programs will result from such facsimile transmissions when received on FM receivers not equipped with filter or other additional equipment.

PERSONAL ATTACK AND POLITICAL BROADCASTING

In AM rules . . .

§73.123 Personal attacks; political editorials.—(a) When, during the presentation of views on a controversial issue of public importance, an attack is made upon the honesty, character, integrity or like personal qualities of an identified person or group, the licensee shall, within a reasonable time and in no event later than one week after the attack, transmit to the person or group attacked (1) notification of the date, time and identification of the broadcast; (2) a script or tape (or an accurate summary if a script or tape is not available) of the attack; and (3) an offer of a reasonable opportunity to respond over the licensee's facilities.

(b) The provisions of paragraph (a) of this section shall not be applicable (i) to attacks on foreign groups or foreign public figures; (ii) to personal attacks which are made by legally qualified candidates, their authorized spokesmen, or those associated with them in the campaign, on other such candidates, their authorized spokesmen, or persons associated with the candidates in the campaign; and (iii) to bona fide news-casts, bona fide news interviews, and on-the-spot coverage of a bona fide news event (including commentary or analysis contained in the foregoing programs, but

the provisions of paragraph (a) shall be applicable to editorials of the licensee).

NOTE: The fairness doctrine is applicable to situations coming within (iii), above, and, in a specific factual situation, may be applicable in the general area of political broadcasts (ii), above. See, Section 315(a) of the Act, 47 USC §315(a); Public Notice: Applicability of the Fairness Doctrine in the Handling of Controversial Issues of Public Importance, 29 Fed. Reg. 10415. The categories listed in (ii) are the same as those specified in Section 315(a) of the Act.

(c) Where a licensee, in an editorial, (1) endorses or (ii) opposes a legally qualified candidate or candidates, the licensee shall, within 24 hours after the editorial, transmit to respectively (i) the other qualified candidate or candidates for the same office or (ii) the candidate opposed in the editorial (1) notification of the date and the time of the editorial; (2) a script or tape of the editorial; and (3) an offer of a reasonable opportunity for a candidate or a spokesman of the candidate to respond over the licensee's facilities; provided, however, that where such editorials are broadcast within 72 hours prior to the day of the election, the licensee shall comply with the provisions of this subsection sufficiently far in advance of the broadcast to enable the candidate or candidates to have a reasonable opportunity to prepare a response and to present it in a timely fashion.

§73.125 Equal employment opportunities.—

(a) General policy: Equal opportunity in employment shall be afforded by all licensees or permittees of commercially or non-commercially operated standard, FM, television or international broadcast stations (as defined in this Part) to all qualified persons, and no person shall be discriminated against in employment because of race, color, religion, or national origin or sex.

(b) Equal employment opportunity program: Each station shall establish, maintain, and carry out, a positive continuing program of specific practices designed to assure equal opportunity in every aspect of station employment policy and practice. Under the terms of its program, a station shall: (1) Define the responsibility of each level of management to insure a positive application and vigorous enforcement of the policy of equal opportunity, and establish a procedure to review and control managerial and supervisory performance.

(2) Inform its employees and recognized employee organizations of the positive equal employment opportunity policy and program and enlist their cooperation.

(3) Communicate the station's equal employment opportunity policy and program and its employment needs to sources of qualified applicants without regard to race, color, religion, national origin or sex, and solicit their recruitment assistance on a continuing basis.

(4) Conduct a continuing campaign to exclude every form of prejudice or discrimination based upon race, color, religion, national origin or sex, from the station's personnel policies and practices and working conditions.

(5) Conduct continuing review of job structure and employment practices and adopt positive recruitment, training, job design and other measures needed in order to insure genuine equality of opportunity to participate fully in all organizational units, occupations and levels of responsibility in the station.

NETWORK AFFILIATION

In AM rules . . .

§73.131 Exclusive affiliation of station—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from or penalized for, broadcasting the programs of any other network organization. (The term "network organization" as used herein includes national and regional network organizations. See Chapter VII, J of Report on Chain Broadcasting.)

§73.132, Territorial exclusivity.—No 1-

FCC Rules

license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which prevents or hinders another station serving substantially the same area from broadcasting the network's programs not taken by the former station, or which prevents or hinders another station serving a substantially different area from broadcasting any program of the network organization. This section shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization pursuant to which the station is granted the first call in its primary organization.

§73.133 Term of affiliation.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which provides, by original term, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than two years; provided, that a contract, arrangement, or understanding for a period up to two years, may be entered into within six months prior to the commencement of such period.

§73.134 Option time.—No license shall be granted to a standard broadcast station which options for network programs any time subject to call on less than 56 days' notice, or more time than a total of 3 hours within each of four segments of the broadcast day, as herein described. The broadcast day is divided into four segments, as follows: 8 a.m. to 1 p.m.; 1 p.m. to 6 p.m.; 6 p.m. to 11 p.m.; 11 p.m. to 3 a.m. (These segments are to be determined for each station in terms of local time at the location of the station but may remain constant throughout the year regardless of shifts from nonadvanced to advanced time or vice versa.) Such option may not be exclusive as against other network organizations and may not prevent or hinder the station from obtaining or selling any or all of the time covered by the option, or other time, to other network organizations.

NOTE 1: As used in this section, an option is any contract, arrangement, or understanding, expressed or implied, between a station and a network organization which prevents or hinders the station from scheduling programs before the network agrees to utilize the time during which such programs are scheduled, or which requires the station to clear time already scheduled when the network organization seeks to utilize the time.

NOTE 2: All time options permitted under this section must be for specific clock hours, expressed in terms of any time system set forth in the contract agreed upon by the station and network organization. Shifts from advanced to nonadvanced time or vice versa may or may not shift the specified hours correspondingly as agreed by the station and network organization.

§73.135 Right to reject programs.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which (a) with respect to programs offered pursuant to an affiliation contract, prevents or hinders the station from rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable; or which (b) with respect to network programs so offered or already contracted for, prevents the station from rejecting or refusing any program which, in its opinion, is contrary to the public interest, or from substituting a program of outstanding local or national importance.

§73.136 Network ownership of stations.—No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control with a network organization, for more than one standard broadcast station where one of the stations covers substantially the service area of the other station, or for any standard broadcast station in any locality where the existing standard broadcast stations are so few or of such unequal desirability (in terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing. (The word "control" as used herein, is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.)

NOTE: Effective date of this section with respect to any station may be extended from time to time in order to permit the orderly

disposition of properties; and it shall be suspended indefinitely with respect to regional network organizations.

§73.137 Dual network operation.—No license shall be issued to a standard broadcast station affiliated with a network organization which maintains more than one network; provided, that this section shall not be applicable if such networks are not operated simultaneously, or if there is no substantial overlap in the territory served by the group of stations comprising each such network.

§73.138 Control by networks of station rates.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, fixing or altering its rates for the sale of broadcast time for other than the network's programs.

In FM rules . . .

§73.231-73.238, inclusive.—

[EDITOR'S NOTE: Same as §§73.131-13138, above with the following exceptions; (1) references are to FM rather than standard stations and networks; and (2) the section on "Network Ownership of Stations" is changed to read as follows:

§73.236 Network ownership of stations.—No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control with a network organization, for an FM broadcast station in any locality where the existing FM broadcast stations are so few or of such unequal desirability (in terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing. (The word "control" as used herein, is not limited to majority stock ownership but includes actual working control in whatever manner exercised.)

In TV rules . . .

§73.658. Affiliation agreements.—(a) Exclusive affiliation of station. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, broadcasting the programs of any other network organization.

(The term "network organization" as used herein includes national and regional network organizations. See chapter VII, J. of Report on Chain Broadcasting.)

(b) Territorial exclusivity. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which prevents or hinders another broadcast station in the same community from broadcasting the network's programs not taken by the former stations, or which prevents or hinders another broadcast station located in a different community from broadcasting any program of the network organization. This regulation shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization pursuant to which the station is granted the first call in its community upon the program of the network organization. As employed in this paragraph the term "community" is defined as the community specified in the instrument of authorization as the location of the station.

(c) Term of affiliation. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which provides, by original terms, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than 2 years; provided that a contract, arrangement, or understanding for a period of up to two years may be entered into within 6 months prior to take commencement of such period.

(d) Station commitment of broadcast time. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with any network organization, which provides for optioning of the station's time to the network organization, or which has the same restraining effect as time optioning. As used in this section, time optioning is any contract, arrangement, or understanding, express or implied, between a station and a network organization which prevents or hinders the station from scheduling programs before the network agrees to utilize the time during which such programs are scheduled, or which requires the station to clear time already scheduled when the network organization seeks to utilize the time.

(e) Right to reject programs. No license shall be granted to a television broadcast

station having any contract, arrangement, or understanding, express or implied, with a network organization which, with respect to programs offered or already contracted for pursuant to an affiliation contract, prevents or hinders the station from (1) rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable or contrary to the public interest, or (2) substituting a program which in the station's opinion, is of greater local or national importance.

(f) Network ownership of stations. No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control of a network organization, for a television broadcast station in any locality where the existing television broadcast stations are so few or of such unequal desirability (in terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing. (The word "control" as used in this section is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.)

(g) Dual network operation. No license shall be issued to a television broadcast station affiliated with a network organization which maintains more than one network of television broadcast stations: provided that this section shall not be applicable, if such networks are not operated simultaneously, or if there is no substantial overlap in the territory served by the group of stations comprising each such network.

(h) Control by networks of station rates. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, fixing or altering its rates for the sale of broadcast time for other than the network's programs.

(i) No license shall be granted to a television broadcast station which is represented for the sale of non-network time by a network organization or by an organization directly or indirectly controlled by or under common control with a network organization, if the station has any contract, arrangement or understanding, express or implied, which provides for the affiliation of the station with such network organization; provided however, that this rule shall not be applicable to stations licensed to a network organization or to a subsidiary of a network organization.

(j) Network syndication and program practices. (1) Except as provided in subparagraph (3) of this paragraph, no television network shall:

(i) after October 1, 1971, sell, license, or distribute television programs to television station licensees within the United States or non-network television exhibition or otherwise engage in the business commonly known as "syndication" within the United States; or sell, license, or distribute television programs of which it is not the sole producer for exhibition outside the United States; or reserve any option or right to share in revenues or profits in connection with such domestic and/or foreign sale, license, or distribution; or

(ii) after October 1, 1970, acquire any financial or proprietary right or interest in the exhibition, distribution, or other commercial use of any television program produced wholly or in part by a person other than such television network, except the license or other exclusive right to network exhibition within the United States and on foreign stations regularly included within such television network; provided that if such network does not timely avail itself of such license or other exclusive right to network exhibition within the United States, the grantor of such license or right to network exhibition may, upon making a timely offer reasonably to compensate the network, re-acquire such license or other exclusive right to exhibition of the program.

(2) Nothing contained in subparagraph (1) and (2) of this paragraph shall prevent any television network from selling or distributing programs of which it is the sole producer for television exhibition outside the United States, or from selling or otherwise disposing of any program rights not acquired from another person, including the right to distribute programs for non-network exhibition (as in syndication) within the United States as long as it does not itself engage in such distribution within the United States or retain the right to share the revenues or profits therefrom.

(3) Nothing contained in this paragraph shall be construed to include any television network formed for the purpose of produc-

ing, distributing, or syndicating program materials for educational, non-commercial, or public broadcasting exhibition or uses.

(k) Prime time access rule. (1) After October 1, 1971, no television programs assigned to any of the top-fifty markets in which there are three or more operating commercial television stations; shall broadcast network programs offered by any television network or networks for a total of more than three hours per day between the hours of 7:00 p.m. and 11:00 p.m. local time, except that in the Central Time Zone the relevant period shall be between the hours of 6:00 p.m. and 10:00 p.m.

(2) For the purpose of subparagraph (1) of this paragraph, network programs shall be defined to exclude special news programs dealing with fast-breaking news events, on-the-spot coverage of news events and political broadcasts by legally qualified candidates for public office.

NOTE: See also footnote 35, Report and Order, 35 FR 7417, for application of this paragraph to certain sports events.

(3) The portion of time from which network programming is excluded by subparagraph (1) hereof may not after October 1, 1972, be filled with off-network programs; or feature films which within two years prior to the date of broadcast have been previously broadcast by a station in the market.

(4) The top-fifty markets shall be determined on an annual basis as of September 1, according to the most recent American Research Bureau prime time market rankings (all home stations combined) throughout the United States.

(5) Nothing in this paragraph shall be construed to apply to educational, non-commercial, or public broadcasting station licenses in their use and exhibition of program materials supplied through one or more non-commercial, educational, or public broadcasting television network systems.

COMMON ANTENNA SITE

§73.635. Use of common antenna site. No television license or renewal of a television license will be granted to any person who owns, leases, or controls a particular site which is peculiarly suitable for television broadcasting in a particular area and (a) which is not available for use by other television licensees; and (b) no other comparable site is available in the area; and (c) where the exclusive use of such site by the applicant or licensee would unduly limit the number of television stations that can be authorized in a particular area or would unduly restrict competition among television stations.

REPORTS TO BE FILED

All broadcast stations . . .

§1.611 Financial report.—Each licensee or permittee of a commercially operated standard, FM, television, or international broadcast station (as defined in Part 73 of this chapter) shall file with the Commission on or before April 1 of each year, on FCC Form 324, an annual financial report.

§1.612 Annual employment report.—Each licensee or permittee of a commercially or non-commercially operated standard, FM, television, or international broadcast station (as defined in Part 73 of this chapter) with five or more fulltime employees shall file with the Commission on or before April 1 of each year, on FCC Form 335, an annual employment report.

§1.613 Filing of contracts.—Each licensee or Permittee of a standard, FM, television, or international broadcast station (as defined in Part 73 of this chapter), whether operating or intending to operate on a commercial or non-commercial basis, shall file with the Commission copies of the following contracts, instruments, and documents together with amendments, supplements, and cancellations, within 30 days of execution thereof. The substance of oral contracts shall be reported in writing.

(a) Contracts relating to network service: All network affiliation contracts, agreements or understandings between a station and a national, regional or other network shall be reduced to writing and filed. Each such filing in or after May 1, 1969 initially shall consist of a written instrument containing all the terms and conditions of such contract, agreement, or understanding without reference to any other paper or document by incorporation or otherwise. Subsequent filings may simply set forth renewal, extension, amendment, or change, as the case may be, of particular contract previously filed in accordance herewith. Transcription agreements or contracts for the supplying of film for the television stations which specify option time must be filed. This section does not require the filing of transcription agreements or contracts for the supplying of film for television stations which do not specify

option time, nor contracts granting the right to broadcast music such as ASCAP, BMI, or SESAC agreements.

(b) Contracts relating to ownership or control. Contracts, instruments, or documents relating to the present or future ownership or control of the licensee or permittee or of the licensee's or permittee's stock, rights, or interests therein, or relating to changes in such ownership or control. This paragraph shall include but is not limited to the following:

(1) Articles of partnership, association, and incorporation, and changes in such instruments;

(2) Bylaws, and any instruments effecting changes in such bylaws;

(3) Any agreement, document or instrument (i) providing for the assignment of a license or permit or (ii) affecting, directly or indirectly, the ownership of voting rights of the licensee's or permittee's stock (common or preferred, voting or nonvoting), such as: (a) agreements for transfer of stock; (b) instruments for the issuance of new stock; or (c) agreements for the acquisition of licensee's or permittee's stock by the issuing licensee or permittee corporation. Pledges, trust agreements, options to purchase stock and other executory agreements are required to be filed: Provided, however, that trust agreements are not required to be filed, unless requested specifically by the Commission; in lieu of the trust agreement, the licensee or permittee may submit the following information concerning the trust: (1) name of trust; (2) duration of trust; (3) number of shares of stock owned; (4) name of beneficial owner of stock; (5) name of record owner of stock; (6) name of the party or parties who have the power to vote or control the vote of the shares; and (7) any conditions on the powers of voting the stock or any unusual characteristics of the trust.

(4) Proxies with respect to the licensee's or permittee's stock running for a period in excess of one year; and all proxies, whether or not running for a period of one year, given without full and detailed instructions binding the nominee to act in a specified manner. With respect to proxies given without full and detailed instructions, a statement showing the number of such proxies, by whom given and received, and the percentage of outstanding stock represented by each proxy shall be submitted by the licensee or permittee within 30 days after the stockholders' meeting in which the stock covered by such proxies has been voted: Provided, however, that when the licensee or permittee is a corporation having more than 50 stockholders, such complete information need be filed only with respect to proxies given by stockholders who are officers or directors, of who have 1% or more of the corporation's voting stock; in cases where the licensee or permittee is a corporation having more than 50 stockholders and the stockholders giving the proxies are neither officers or directors nor hold 1% or more of the corporation's stock, the only information required to be filed is the name of any person voting 1% or more of the stock by proxy, the number of shares voted by proxy by such person, and the total number of shares voted at the particular stockholders' meeting in which the shares were voted by proxy.

(5) Mortgage or loan agreements containing provisions restricting the licensee's or permittee's freedom of operation, such as those affecting voting rights, specifying or limiting the amount of dividends payable, the purchase of new equipment, the maintenance of current assets, etc.; or

(6) Any agreement reflecting a change in the officers, directors, or stockholders of a corporation, other than the licensee or permittee, having an interest, direct or indirect, in the licensee or permittee as specified by §1.615.

(c) Contracts relating to the sale of broadcast time to "time brokers" for resale.

(d) Contracts relating to Subsidiary Communications Authorization Operation, except contracts granting licensees or permittees engaged in SCA the right to broadcast copyright music.

(e) Time sales contracts. Time sales contracts with the same sponsor for 4 or more hours per day, except where the length of the events (such as athletic contests, musical programs, and special events) broadcast pursuant to the contract is not under control of the station.

(f) Contracts relating to Personnel.

(1) The following contracts, agreements, or understandings shall be filed: management consultant agreements with independent contractors; contracts relating to the utilization in a management capacity of any person other than an officer, director, or regular employee of the licensee or permittee station; management contracts with any

persons, whether or not officers, directors, or regular employees which provide for both a percentage or profits and a sharing in losses, of any similar agreements.

(2) The following contracts, agreements, or understandings need not be filed: agreements with persons regularly employed as general or station managers or salesmen; contracts with program managers or program personnel; contracts with chief engineers or other engineering personnel except those contracts required to be filed under the provisions of §§73.93(c), 73.265(c), and 73.565(c); contracts with attorneys, accountants, or consulting radio engineers; contracts with performers; contracts with station representatives; contracts with labor unions; or any similar agreements.

§1.615 Ownership reports.—(a) Each licensee of a TV, FM or standard broadcast station (as defined in Part 73 of this chapter), other than noncommercial educational stations, shall file an Ownership Report (FCC Form 323) at the time the application for renewal of station license is required to be filed: Provided, however, the licensees owning more than one TV, FM, or standard broadcast station need file only one Ownership Report at 3-year intervals. Ownership Reports shall give the following information as of a date not more than 30 days prior to the filing of the Ownership Report:

(1) In the case of an individual, the name of such individual;

(2) In the case of a partnership, the names of the partners and the interest of each partner;

NOTE: Any change in partners or in their rights will require prior consent of the Commission upon an application for consent to assignment of license or permit. If such change involves less than a controlling interest, the application for Commission consent to such change may be made upon FCC Form 316 (Short Form).

(3) In the case of a corporation, association, trust, estate, or receivership, the data applicable to each:

(i) The name, residence, citizenship and stock-holdings of officers, directors, stockholders, trustees, executors, administrators, receivers, and members of any association;

(ii) Full information as to family relationship of business association between two or more officials, and/or stockholders, trustees, executors, administrators, receivers, and members of any association;

(iii) Capitalization with a description of the classes and voting power of stock authorized by the corporate charter or other appropriate legal instrument and the number of shares of each class issued and outstanding; and

(iv) Full information on FCC Form 323 with respect to the interest, and identity of any person having any direct, indirect, fiduciary, or beneficiary interest in the licensee or any of its stock;

For example:

(a) Where A is the beneficial owner or votes stock held by B, the same information should be furnished for A as is required for B.

(b) Where X corporation controls the licensee, or holds 25% or more of the number of issued and outstanding shares of either voting or non-voting stock of the licensee, the same information should be furnished with respect to X corporation (its capitalization, officers, directors, and stockholders and the amount of stock [by class] in X held by each) as is required in the case of the licensee, together with full information as to the identity and citizenship of the person authorized to vote licensee's stock, in case of voting stock.

(c) The same information should be furnished as to Y corporation if it controls X corporation or holds 25% or more of the number of issued and outstanding shares of either voting or non-voting stock of X, and as to Z corporation if it controls Y corporation or holds 25% or more of the number of issued and outstanding shares of either voting or non-voting stock of Y and so on back to natural persons.

(4) In the case of licensees:

(i) A list of all contracts still in effect required to be filed with the Commission by §1.342 showing the date of execution and expiration of each contract; and

(ii) Any interest which the licensee may have in any other broadcast station.

(b) A permittee shall file an Ownership Report (FCC Form 323) within 30 days of the date of grant by the Commission of an application for original construction permit. The Ownership Report of the permittee shall

FCC Rules

give the information required by the applicable portions of paragraph (a) of this section.

(c) A supplemental Ownership Report (FCC Form 323) shall be filed by each licensee or permittee within 30 days after any change occurs in the information required by the Ownership Report from that previously reported. Such report shall include without limitation:

(1) Any change in capitalization or organization;

(2) Any change in officers and directors;

(2) Any transaction affecting the ownership, direct or indirect, or voting rights of licensee's or permittee's stock, such as:

(i) A transfer of stock;

(ii) Issuance of new stock or disposition of treasury stock; or

(iii) Acquisition of licensee's or permittee's stock by the issuing corporation; or

(4) Any change in the officers, directors, or stockholders of a corporation other than the licensee or permittee such as X, Y, or Z corporation described in the example in paragraph (a) (3) of this section.

NOTE: Before any change is made in the organization, capitalization, officers, directors, or stockholders of a corporation other than licensee or permittee, which results in a change in the control of the licensee or permittee, prior Commission consent must be received under Section 310(b) of the Communications Act and §1.329. A transfer of control takes place when an individual, or group in privacy, gains or loses affirmation or negative (50%) control. See instruction on FCC Form 323, "Ownership Report."

(d) Exceptions: Where information is required under paragraphs (a), (b), or (c) of this section with respect to a corporation or association having more than 50 stockholders or members, such information need be filed only with respect to stockholders or members who are officers or directors of the corporation or association, or to other stockholders or members who have 1 percent or more of either the voting or nonvoting stock of the corporation or voting rights in the association regardless of whether the stockholder or member is an investment company as defined in NOTE 4 to §§73.35, 73.240, and 73.636 of this chapter. Provided, however, that such information with respect to stock held by stockbrokers need be filed only if the stock is held by the stockbroker in its name (either for itself or for customers) for a period exceeding 30 days.

(e) The provisions of this paragraph apply to all licensees and permittees of noncommercial educational TV, FM, or standard broadcast stations.

(1) Each licensee covered by this paragraph shall file an Ownership Report (FCC Form 323E): Provided, however, that licensees owning more than one noncommercial educational TV, FM, or standard broadcast station need file only one Ownership Report at 3-year intervals. Ownership Reports shall give the following information as of a date not more than 30 days prior to the filing of the Ownership Report:

(i) The following information as to all officers, members of governing board, and holders of 1 percent or more ownership interest (if any): Name, residence, office held, citizenship, principal profession or occupation, and by whom appointed or elected.

(ii) Full information on FCC form 323E with respect to the interest and identity of any individual, organization, corporation, association, or any other entity which has direct or indirect control over the licensee or permittee.

(iii) A list of all contracts still in effect required by §1.342 to be filed with the Commission, showing the date of execution and expiration of each contract.

(iv) Any interest which the licensee or permittee or any of its officers, members of the governing board, and holders of 1 percent or more ownership interest (if any) hold in any other broadcast station.

(2) A permittee shall file an Ownership Report (FCC Form 323E) within 30 days of the date of grant by the Commission of an application for original construction permit. The Ownership Report of the permittee shall give the information required by the applicable portions of this paragraph.

(3) A supplemental Ownership Report (FCC Form 323E) shall be filed by each licensee or permittee within 30 days after any change occurs in the information required by Ownership Report from that previously reported. Such report should include, without limitation:

(1) Any change in organization;

(ii) Any change in officers or directors;

(iii) Any transaction affecting the ownership (direct or indirect) or voting rights with respect to the licensee or permittee (or with respect to any stock interest therein).

(f) A copy of all ownership and supplemental ownership reports and related material filed pursuant to this section shall be maintained and made available for public inspection locally as required by §1.526.

§1.526 Records to be maintained locally for public inspection by applicants, permittees, and licensees.

(a) Records to be maintained. Every applicant for a construction permit for a new station in the broadcast services shall maintain for public inspection a file for such station containing the material in subparagraph (1) of this paragraph, and every permittee or licensee of a station in the broadcast services shall maintain for public inspection a file for such station containing the material in subparagraphs (1), (2), (3), (4) and (5) of this paragraph: Provided, however, that the foregoing requirements shall not apply to applicants for or permittees or licensees of television broadcast translator stations. The material to be contained in the file is as follows:

(1) A copy of every application tendered for filing by the applicant for such station after May 13, 1965, pursuant to the provisions of this part, with respect to which local public notice is required to be given under the provisions of §1.580 or 1.594; and all exhibits, letters and other documents tendered for filing as part thereof, all amendments thereto, copies of all documents incorporated therein by reference, all correspondence between the Commission and the applicant pertaining to the application after it has been tendered for filing, and copies of Initial Decisions and Final Decisions in hearing cases pertaining thereto, which according to the provisions of §0.417 of this chapter are open for public inspection at the offices of the Commission. Information incorporated by reference which is already in the local file need not be duplicated if the entry making the reference sufficiently identifies the information so that it may be found in the file, and if there has been no change in the document since the date of filing and the applicant, after making the reference, so states. If petitions to deny are filed against the application, and have been duly served on the applicant, a statement that such a petition has been filed shall appear in the local file together with the name and address of the party filing the petition.

NOTE: Applications tendered for filing on or before May 13, 1965, which are subsequently designated for hearing after May 13, 1965, with local notice being given pursuant to the provisions of §1.594, and material related to such applications, need not be placed in the file required to be kept by this section. Applications tendered for filing after May 13, 1965, which contain major amendments to applications tendered for filing on or before May 13, 1965, with local notice of the amending application being given pursuant to the provisions of §1.580, need not be placed in the file required to be kept by this section.

(2) A copy of every application tendered for filing by the licensee or permittee for such station after May 13, 1965, pursuant to the provisions of this part, which is not included in subparagraph (1) of this paragraph and which involves changes in program service, which requests an extension of time in which to complete construction of a new station, or which requests consent to involuntary assignment or transfer, or to voluntary assignment or transfer not resulting in a substantial change in ownership or control and which may be applied for on FCC Form 316; and copies of all exhibits, letters, and other documents filed as part thereof, all amendments thereto, all correspondence between the Commission and the applicant pertaining to the application after it has been tendered for filing, and copies of all documents incorporated therein by reference, which according to the provisions of §0.417 of this chapter are open for public inspection at the offices of the Commission. Information incorporated by reference which is already in the local file need not be duplicated if the entry making the reference sufficiently identifies the information so that it may be found in the file, and there has been no change in the document since the date of filing and the licensee, after making the reference, so states. If petitions to deny are filed against the application, and have been duly served on the applicant, a statement that such a petition has been filed shall appear in the local file together with the name and address of the party filing the petition.

(3) A copy of every ownership report or

supplemental ownership report filed by the licensee or permittee for such station after May 13, 1965, pursuant to the provisions of this part; and copies of all exhibits, letters, and other documents filed as part thereof, all amendments thereto, all correspondence between the permittee or licensee and the Commission pertaining to the reports after they have been filed, and all documents incorporated therein by reference, including contracts listed in such reports in accordance with the provisions of §1.615(a)(4)(i) and which according to the provisions of §0.417 of this chapter are open for public inspection at the offices of the Commission. Information incorporated by reference which is already in the local file need not be duplicated if the entry making the reference sufficiently identifies the information so that it may be found in the file, and if there has been no change in the document since the date of filing and the licensee or permittee, after making the reference, so states.

(4) Such records as are required to be kept by §§73.120(d), 73.290(d), 73.590(d), and 73.657(d) of this chapter, concerning broadcasts by candidates for public office.

(5) A copy of every annual employment report filed by the licensee or permittee for such station pursuant to the provisions of this part; and copies of all exhibits, letters and other documents filed as part thereof, all amendments thereto, all correspondence between the permittee or licensee and the Commission pertaining to the reports after they have been filed and all documents incorporated therein by reference and which according to the provisions of §0.451-0.461 of this chapter are open for public inspection at the offices of the Commission.

NOTE: The engineering section of applications mentioned in subparagraphs (1) and (2) of this paragraph, and material related to the engineering section, need not be kept in the file required to be maintained by this paragraph. If such engineering section contains service contour maps submitted with that section, copies of such maps, and information (state, county, city, street address, or other identifying information) showing main studio and transmitter location shall be kept in the file.

(b) (1) In cases involving applications for consent to assignment of broadcast station construction permits or licenses, with respect to which public notice is required to be given under the provisions of §1.580 or 1.594, the file mentioned in paragraph (a) of this section shall be maintained by the assignor. If the assignment is consented to by the Commission and consummated, the assignee shall maintain the file commencing with the date on which notice of the consummation of the assignment is filed with the Commission. The file maintained by the assignee shall cover the period both before and after the time when the notice of consummation of assignment was filed. The assignee is responsible for obtaining copies of the necessary documents from the assignor or from the Commission files.

(2) In cases involving applications for consent to transfer of control of a permittee or licensee of a broadcast station, the file mentioned in paragraph (a) of this section shall be maintained by the permittee or licensee.

(c) The file need contain only applications, ownership reports, and related material that concern the station for which the file is kept. Applicants, permittees, and licensees need not keep in the file copies of such applications, reports, and material which pertain to other stations with regard to which they may be applicants, permittees or licensees, except to the extent that such information is reflected in the materials required to be kept under the provisions of this section.

(d) The file shall be maintained at the main studio of the station or at any accessible place (such as a public registry for documents or an attorney's office) in the community to which the station is or is proposed to be licensed, and shall be available for public inspection at any time during regular business hours.

(e) The records specified in paragraph (a) (4) of this section shall be retained for the periods specified in §§73.120(d), 73.290(d), 73.590(d) and 73.657(d) of this chapter (2 years). The records specified in paragraph (a) (1), (2), (3) and (5) of this section shall be retained as follows:

(1) The applicant for a construction permit for a new station shall maintain such a file so long as the application is pending before the Commission or any proceeding involving that application is pending before the courts. (If the application is granted, subparagraph (2) of this paragraph shall apply.)

(2) The permittee or licensee shall maintain such a file so long as an authorization

to operate the station is outstanding, and shall permit public inspection of the material as long as it is retained by the licensee even though the request for inspection is made after the conclusion of the required retention period specified in this subparagraph. However, material which is voluntarily retained after the required retention time may be kept in a form and place convenient to the licensee, and shall be made available to the inquiring party, in good faith after written request, at a time and place convenient to both the party and the licensee. Applications and other material placed in the file should be retained for a period of seven years from the date the material is tendered for filing with the Commission, with two exceptions: First, engineering material pertaining to a former mode of operation need not be retained longer than 3 years after a station commences operation under a mode; and second, all of the material shall be retained for whatever longer period is necessary to comply with the following requirements: (1) material shall be retained until final Commission action on the second renewal application following the application or other material in question; and (2) material having a substantial bearing on a matter which is the subject of a claim against the licensee, or relating to a commission action of which the licensee has been advised, shall be retained until the licensee is notified in writing that the material may be discarded, or, if the matter is a private one, the claim has been satisfied or is barred by statutes of limitations. Where an application or related material incorporates by reference material in earlier applications and material concerning programming and related matters (Section IV and related material), the material so referred to shall be retained as long as the application referring to it.

LICENSE RENEWALS

General . . .

§1.539 Application for renewal of license.—(a) Unless otherwise directed by the Commission, an application for renewal of license shall be filed at least 90 days prior to the expiration date of the license sought to be renewed except that applications for renewal of license of an experimental or developmental broadcast station shall be filed at least 60 days prior to the expiration date of the license sought to be renewed. (b) No application for renewal of license of any broadcast station will be considered unless there is on file with the Commission, the information, if any, currently required by §§1.611-1.615, inclusive, for the particular class of station. The renewal application shall include a reference by date and file number to such information on file. (c) Whenever the Commission regards an application for a renewal of license as essential to the proper conduct of a hearing or investigation, and specifically directs that it be filed by a certain date, such application shall be filed within the time thus specified. If the licensee fails to file such application within the prescribed time, the hearing or investigation shall proceed as if such renewal application has been received. (d) The following application forms shall be used:

[EDITOR'S NOTE: There follows a list of forms to be used in filing for license renewals.]

In AM rules . . .

§73.34 Normal license period.—(a) Initial licenses for standard broadcast stations will ordinarily be issued for a period running until the dates specified in this section for the state or territory in which the station is located or, if issued after such date, to the next triennial renewal date determined in accordance with this section; and, when renewed, will normally be renewed for three years; provided, however, that if the Commission finds that the public interest, convenience or necessity will be served thereby, it may issue either an initial license or a renewal thereof for a lesser term. The time of expiration of normally issued initial and renewal licenses will be 3 a.m., local time, on the following dates, and at three-year intervals thereafter:

- (15) For stations located in Arkansas, Louisiana, and Mississippi, June 1, 1970.
- (16) For stations located in Tennessee, Kentucky, and Indiana, August 1, 1970.
- (17) For stations located in Ohio and Michigan, Oct. 1, 1970.
- (18) For stations located in Illinois and Wisconsin, Dec. 1, 1970.

[NOTE: For the cutoff date for the filing of applications mutually exclusive with, and petitions to deny, renewal applications, see §1.516(e).]

STATION IDENTIFICATION

All broadcast stations . . .

§73.1201 Station identification.—(a) When regularly required, broadcast stations shall announce station identification: (1) at the beginning and ending of each time of operation, and (2) regularly, during operation, within 2 minutes of each hour. Standard, FM, and noncommercial educational FM broadcast stations shall, additionally, announce station identification regularly within 2 minutes of each half-hour. Television broadcast stations may make the hourly announcements either visually or aurally, but shall make the announcements at the beginning and ending of each time of operation both visually and aurally.

(b) Content. (1) Official station identification shall consist of the station's call letters immediately followed by the name of the community or communities specified in its license as the station's location.

(2) When given specific written authorization to do so, a station may include in its official station identification the name of an additional community or communities, but the community to which the station is licensed must be named first.

(3) A licensee shall not in any identification announcements, promotional announcements or any other broadcast matter either lead or attempt to lead the station's audience to believe that the station has been authorized to identify officially with titles other than those permitted to be included in official station identifications under subparagraphs (1) and (2) of this paragraph.

[NOTE: Commission interpretations of this paragraph may be found in a separate Public Notice issued October 30, 1967, entitled "Examples of Application of Rule Regarding

Broadcast of Statements Regarding a Station's Licensed Location". (FCC 67-1132; 10 FCC 2d 407.)

(c) Channel. (1) Generally, except as provided in subparagraph (2) of this paragraph, in making the identification announcement the call letters shall be given only on the channel of the station identified thereby.

(2) Simultaneous AM-FM broadcasts. If the same licensee operates an FM broadcast station and a standard broadcast station and simultaneously broadcasts the same programs over the facilities of both such stations, station identification announcements may be made jointly for both stations for periods of such simultaneous operation. If the call letters of the FM station do not clearly reveal that it is an FM station, the joint announcement shall so identify it.

(d) Program interruption. Licensees shall, in general, arrange their programming so as to permit the broadcast of station identification announcements at the regular times prescribed in paragraph (a) of this section without undue disruption of program continuity. Subject to this requirement, a station identification announcement need not be presented at the time it is regularly required, if to do so would objectionably break program continuity essential to the value of the program to the audience. However, program continuity is deemed to be broken, and therefore an announcement is required, if during the four-minute period in which an announcement is regularly due there is presented any non-program matter, such as commercial, public service or promotional announcements. While there may be exceptions, normally program continuity is also deemed to be broken, and an identification announcement is required, if during the four-minute period there occurs the end of a regular period in a sports event being broadcast (e.g., round, quarter, or half-inning), the end of an act in a dramatic or variety program, the intermission of a live concert, opera, recital or other musical performance presented live in its entirety (presented simultaneously or by rebroadcast), or the end of any other musical selection.

(e) Deferred station identification. (1) If a station omits a regular station identification announcement as permitted under paragraph (d) of this section, it shall broadcast a deferred station identification announcement at the next opportunity when it can be presented without objectionably breaking program continuity essential to the value of the program to the audience. Such opportunity is deemed to occur, at the latest, when any of the material or events mentioned in paragraph (d) of this section is presented or occurs.

(2) If no opportunity for an announcement (as defined in subparagraph (1) of this paragraph) occurs after a regular station identification is omitted, a deferred station identification shall be broadcast promptly at the end of the program unless the next regular station identification is broadcast within 5 minutes after the program ends.

SPONSORED PROGRAMS

(Announcement of)

In AM rules . . .

§73.119 Sponsored programs, announcement of.—(a) When a standard broadcast station transmits any matter for which money, services, or other valuable consideration is either directly or indirectly paid or promised to, or charged or received by, such station, the station shall broadcast an announcement that such matter is sponsored, paid for, or furnished, either in whole or in part, and by whom or on whose behalf such consideration was supplied: Provided, however, that "service or other valuable consideration" shall not include any service or property furnished without charge or at a nominal charge for use on, or in connection with, a broadcast unless it is so furnished in consideration for an identification in a broadcast of any person, product, service, trademark, or brand name, beyond an identification which is reasonably related to the use of such service or property on the broadcast.

(b) The licensee of each standard broadcast station shall exercise reasonable diligence to obtain from its employees, and from other persons with whom it deals directly in connection with any program matter for broadcast, information to enable such licensee to make the announcement required by this section.

(c) In any case where a report (concerning the providing or accepting of valuable

FCC Rules

consideration by any person for inclusion of any matter in a program intended for broadcasting) has been made to a standard broadcast station, as required by Section 508 of the Communications Act of 1934, as amended, of circumstances which would have required an announcement under this section had the consideration been received by such standard broadcast station, an appropriate announcement shall be made by such station.

(d) In the case of any political program or any program involving the discussion of public controversial issues for which any records, transcriptions, talent, scripts, or other material or services of any kind are furnished, either directly or indirectly, to a station as an inducement to the broadcasting of such program, an announcement shall be made both at the beginning and conclusion of such program on which such material or services are used that such records, transcriptions, talent, scripts, or other material or services have been furnished to such station in connection with the broadcasting of such program: Provided, however, that only one such announcement need be made in the case of any such program of 5 minutes' duration or less, which announcement may be made either at the beginning or conclusion of the program.

(e) The announcement required by this section shall fully and fairly disclose the true identity of the person or persons by whom or in whose behalf such payment is made or promised, or from whom or in whose behalf such services or other valuable consideration is received, or by whom the material or services referred to in paragraph (d) of this section are furnished. Where an agent or other person contracts or otherwise makes arrangements with a station on behalf of another, and such fact is known to the station, the announcement shall disclose the identity of the person or persons in whose behalf such agent is acting instead of the name of such agent.

(f) In the case of any program, other than a program advertising commercial products or services, which is sponsored, paid for, or furnished, either in whole or in part, or for which material or services referred to in paragraph (d) of this section are furnished, by a corporation, committee, association, or other unincorporated group, the announcement required by this section shall disclose the name of such corporation, committee, association, or other unincorporated group. In each such case the station shall require that a list of the chief executive officers or members of the executive committee or of the board of directors of the corporation, committee, association or other unincorporated group shall be made available for public inspection at the studios or general offices of one of the standard broadcast stations carrying the program in each community in which the program is broadcast. Such lists shall be kept and made available for a period of 2 years.

(g) In the case of broadcast matter advertising commercial products or services, an announcement stating the sponsor's corporate or trade name, or the name of the sponsor's product, when it is clear that the mention of the name of the product constitutes a sponsorship identification, shall be deemed sufficient for the purposes of this section and only one such announcement need be made at any time during the course of the program.

(h) The announcements required by Section 317(a) of the Communications Act of 1934, as amended, are waived with respect to the broadcast of "want ad" or classified advertisements sponsored by individuals. The waiver granted in this paragraph shall not extend to classified advertisements or want ads sponsored by any form of business enterprise, corporate or otherwise. Whenever sponsorship announcements are omitted pursuant to this paragraph the following conditions shall be observed:

(1) The licensee shall maintain a list showing the name, address and (where available) the telephone number of each advertiser and shall attach this list to the program log for each day's operation; and

(2) shall make this list available to members of the public who have a legitimate interest in obtaining the information contained in the list.

(i) Commission interpretations in connection with the foregoing rules may be found in the Commission's Public Notice entitled "Applicability of Sponsorship Identification Rules" and such supplements thereto as are issued from time to time.

PERSONAL ATTACKS; POLITICAL EDITORIALS

§73.123 Personal attacks; political editorials.—(a) When, during the presentation of views on a controversial issue of public importance, an attack is made upon the honesty, character, integrity or like personal qualities of an identified person or group, the licensee shall, within a reasonable time and in no event later than one week after the attack, transmit to the person or group attacked (1) notification of the date, time and identification of the broadcast; (2) a script or tape (or an accurate summary if a script or tape is not available) of the attack; and (3) an offer of a reasonable opportunity to respond over the licensee's facilities.

(b) The provisions of paragraph (a) of this section shall not be applicable (i) to attacks on foreign groups or foreign public figures; (ii) to personal attacks which are made by legally qualified candidates, their authorized spokesmen, or those associated with them in the campaign, on other such candidates, their authorized spokesmen, or persons associated with the candidates in the campaign; and (iii) to bona fide newscasts, bona fide news interviews, and on-the-spot coverage of a bona fide news event (including commentary or analysis contained in the foregoing programs, but the provisions of paragraph (a) shall be applicable to editorials of the licensee).

NOTE: The fairness doctrine is applicable to situations coming within (iii), above, and, in a specific factual situation, may be applicable in the general area of political broadcasts (ii), above. See Section 315(a) of the Act, 47 USC §315(a); Public Notice: Applicability of the Fairness Doctrine in the Handling of Controversial Issues of Public Importance, 29 Fed. Reg. 10415. The categories listed in (iii) are the same as those specified in Section 315(a) of the Act.

(c) Where a licensee, in an editorial, (i) endorses or (ii) opposes a legally qualified candidate or candidates, the licensee shall, within 24 hours after the editorial, transmit to respectively (1) the other qualified candidate or candidates for the same office or (ii) the candidate opposed in the editorial (1) notification of the date and the time of the editorial; (2) a script or tape of the editorial; and (3) an offer of a reasonable opportunity for a candidate or a spokesman of the candidate to respond over the licensee's facilities: Provided, however, that where such editorials are broadcast within 72 hours prior to the day of the election, the licensee shall comply with the provisions of this subsection sufficiently far in advance of the broadcast to enable the candidate or candidates to have a reasonable opportunity to prepare a response and to present it in a timely fashion.

§73.679 [EDITOR'S NOTE: Identical with §73.123 above.]

§73.1205 Fraudulent billing practices.—No licensee of a standard, FM or television broadcast station shall knowingly issue to any local, regional or national advertiser, advertising agency, station representative, manufacturer, distributor, jobber or any other party, any bill, invoice, affidavit or other document which contains false information concerning the amount actually charged by the licensee for the broadcast advertising for which such bill, invoice, affidavit or other document is issued, or which misrepresents the nature or content of such advertising, or which misrepresents the quantity of advertising actually broadcast (number or length of advertising messages) or the time of day or date at which it was broadcast. Licensees shall exercise reasonable diligence to see that their agents and employees do not issue any documents which would violate this section if issued by the licensee.

NOTE: Commission interpretations in connection with this Rule may be found in a separate Public Notice issued May 18, 1970,

entitled "Applicability of Fraudulent Billing Rule" (FCC 70-513), 35 FR.

§73.1206 Broadcast of telephone conversations.—Before recording a telephone conversation for broadcast, or broadcasting such a conversation simultaneously with its occurrence, a licensee shall inform any party to the call of the licensee's intention to broadcast the conversation, except where such party is aware, or may be presumed to be aware from the circumstances of the conversation, that it is being or likely will be broadcast. Such awareness is presumed to exist only when the other party to the call is associated with the station (such as an employe or part-time reporter), or where the other party originates the call and it is obvious that it is in connection with a program in which the station customarily broadcasts telephone conversations.

RECORDINGS AND TRANSCRIPTIONS (Identification of)

In AM rules . . .

§73.118 Mechanical reproductions.—(a) No mechanically reproduced program consisting of a speech, news event, news commentator, forum, panel discussion, or special event in which the element of time is of special significance, or any other program in which the element of time is of special significance and presentation of which would create, either intentionally or otherwise, the impression or belief on the part of the listening audience that the event or program being broadcast is in fact occurring simultaneously with the broadcast, shall be broadcast without an appropriate announcement being made either at the beginning or end of such reproduction or at the beginning or end of the program in which such reproduction is used that it is a mechanical reproduction or a mechanically reproduced program: Provided, however, that each such program of one minute or less need not be announced as such.

(b) The exact form of identifying announcement is not prescribed, but the language shall be clear and in terms commonly used and understood. Any other program mechanically reproduced or series of mechanical reproductions, including a mechanical reproduction used for background music, sound effects, station identification, program identification (theme music of short duration) or identification of sponsorship of the program proper, need not be announced as provided in subsection (a), but the licensee shall not attempt affirmatively to create the impression that any program being broadcast by mechanical reproduction consists of live talent.

(c) The requirements of subsection (a) are waived with respect to network programs, transcribed and rebroadcast at a later hour because of the time zone differentials between the place where the program originates and where it is rebroadcast, this waiver being applicable whether the off-the-line recording is made by the network itself at one of its key stations or by an individual station, but only when the off-the-line recording is for broadcast at an hour not exceeding the time zone differential between the place where the program originates and where it is rebroadcast. Each station which broadcasts network programs at a later hour in accordance with this waiver shall make an appropriate announcement at least once each day between the hours of 10:00 a.m. and 10:00 p.m., stating that some or all of the network programs which are broadcast by that station are delayed broadcasts by means of transcription. This waiver provision also applies during the annual periods in which advanced time is effective with respect to network programs transcribed and rebroadcast one hour later because of the time differential resulting from the adoption or non-adoption of advanced time in some areas.

POLITICAL BROADCASTS

For AM, FM and TV . . .

§73.120 Definitions.—(a) A "legally qualified candidate" means any person who has publicly announced that he is a candidate for nomination by a convention of a political party or for nomination or election in a primary, special, or general election, municipal, county, state or national, and who meets the qualifications prescribed by the applicable laws to hold the office for which he is a candidate, so that he may be voted for by the electorate directly or by means of delegates or electors, and who

(1) has qualified for a place on the ballot or

(2) is eligible under the applicable law to

be voted by sticker, by writing in his name on the ballot, or other method, and (1) has been duly nominated by a political party which is commonly known and regarded as such, or (2) make a substantial showing that he is a bona fide candidate for nomination or office, as the case may be.

(b) General requirements.—No station licensee is required to permit the use of its facilities by any legally qualified candidate for public office, but if any licensee shall permit any such candidate to use its facilities, it shall afford equal opportunities to all other such candidates: Provided, that such licensee shall have no power of censorship over the material broadcast by any such candidate.

(c) Rates and practices.—(1) The rates, if any, charged all such candidates for the same office shall be uniform and shall not be rebated by any means direct or indirect. A candidate shall, in each case, be charged no more than the rate the station would charge if the candidate were a commercial advertiser whose advertising was directed to promoting its business within the same area as that encompassed by the particular office for which such person is a candidate. All discount privileges otherwise offered by a station to commercial advertisers shall be available upon equal terms to all candidates for public office.

(2) In making time available to candidates for public office no licensee shall make any discrimination between candidates in charges, practices, regulations, facilities, or services for or in connection with the service rendered pursuant to this part, or make or give any preference to any candidate for public office or subject any such candidate to any prejudice or disadvantage; nor shall any licensee make any contract or other agreement which shall have the effect of permitting any legally qualified candidate for any public office to broadcast to the exclusion of other legally qualified candidates for the same public office.

(d) Records: Inspections.—Every licensee shall keep and permit public inspection of a complete record of all requests for broadcast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the licensee of such request, and the charges made, if any, if request is granted. Such records shall be retained for a period of two years.

NOTE: See §1.526 of this chapter.

(e) Time of request. A request for equal opportunity must be submitted to the licensee within one week of the day on which the first prior use, giving rise to the right to equal opportunities, occurred; provided however, that where a person was not a candidate at the time of such first prior use, he shall submit his request within one week of the first subsequent use after he has become a legally qualified candidate for the office in question.

(f) A candidate requesting such equal opportunities of the licensee, or complaining of noncompliance to the Commission, shall have the burden of providing that he and his opponent are legally qualified candidates for the same public office.

[EDITOR'S NOTE: In FM this is §73.290; in TV, §73.657.]

REBROADCASTS In AM rules . . .

§73.121 Rebroadcast.—(a) The term "rebroadcast" means reception by radio of the program of a radio station, and the simultaneous or subsequent retransmission of such program by a broadcast station.

NOTE: As used in §73.121, program includes any complete program or part thereof, or any signals if other than A-3 emission. In case a program is transmitted from its point of origin to a broadcast station entirely by telephone facilities in which a section of such transmission is by radio, the broadcasting of this program is not considered a rebroadcast.

(b) Standard broadcast stations may, without further authority from the Commission, rebroadcast programs originated by other United States standard and FM broadcast stations, provided that the Commission is notified in writing of the call letters of each station rebroadcast, together with certification that the originating station(s) has consented to the rebroadcast(s). However, the requirements of this paragraph do not apply to emergency rebroadcasting conducted pursuant to §73.971(b) of this part, which provides unrestricted AM/FM/TV rebroadcast privileges for stations utilizing the facilities, systems, and procedures of a Detailed State EBS Operational Plan.

NOTE: The notice and certification of consent shall be given within three (3) days

of any single rebroadcast, but in case of the programs of a standard broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for renewal of license, or at the beginning of such rebroadcast practice if begun during a license period.

(c) (1) The licensee of a standard broadcast station located within a state or the District of Columbia may, without further authority of the Commission, rebroadcast on a noncommercial basis a noncommercial program of a United States international broadcast station.

(2) The licensee of a standard broadcast station located in any territory or insular possession of the United States may, without further authority of the Commission, rebroadcast any program of a United States international broadcast station.

(3) In the case of any rebroadcast under the provisions of this paragraph (c), the Commission shall be notified of the call letters of each station whose programs are rebroadcast and the licensee shall certify that express authority has been received from the licensee of the station originating the program.

(d) No licensee of a standard or high frequency broadcast station shall rebroadcast the program of any other class of United States radio station without written authority having first been obtained from the Commission upon application accompanied by written consent or certification of consent of the licensee of the station originating the program.

NOTE 1: The broadcasting of a program relayed by a remote pick-up broadcast station (§74.401 of this chapter) is not considered a rebroadcast.

NOTE 2: Informal applications may be employed.

NOTE 3: By order No. 82, dated and effective June 24, 1941, until further order of the Commission, §73.121(d) is suspended insofar as it requires prior written authority of the Commission for the rebroadcasting of programs originated for that express purpose by United States Government radio stations.

(e) In case of a program rebroadcast by several standard broadcast stations, such as a chain rebroadcast, the person legally responsible for distributing the program or the network facilities may obtain the necessary authorization for the entire rebroadcasts both from the Commission and from the person or licensee of the station originating the program.

(f) Attention is directed to section 325 (b) of the Communications Act of 1934, which reads as follows (see also §1.545 of this chapter):

No person shall be permitted to locate, use, or maintain a radio broadcast studio or other place or apparatus from which or whereby sound waves are converted into electrical energy, or mechanical or physical reproduction of sound waves produced, and caused to be transmitted or delivered to a radio station in a foreign country for the purpose of being broadcast from any radio station there, having a power output of sufficient intensity, and/or being so located geographically that its emissions may be received consistently in the United States, without first obtaining a permit from the Commission, upon proper application therefore.

In TV rules . . .

§73.655 Rebroadcast.—(a) The term "rebroadcast" as used below means reception by radio of the program of a television broadcast station, and the simultaneous or subsequent retransmission of such programs by a broadcast station. The broadcasting of a program relayed by an auxiliary broadcast station licensed to the television broadcast station is not considered rebroadcast. (As used in this section, program includes any complete program or part thereof.)

(b) Television broadcast stations may, without further authority from the Commission, rebroadcast programs originated by other United States television stations, provided that the Commission is notified in writing of the call letters of each station rebroadcast, together with certification that the originating station(s) has consented to the rebroadcast(s). However, the requirements of this paragraph do not apply to emergency rebroadcasting conducted pursuant to §73.971(b) of this part, which provides unrestricted AM/FM/TV rebroadcast privileges for stations utilizing the facilities, systems, and procedures of a Detailed State EBS Operational Plan.

NOTE: The notice and certification of consent shall be given within 3 days of any single rebroadcast, but in case of the regular practice of rebroadcasting certain pro-

grams of a television broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for renewal of license, or at the beginning of such rebroadcast practice, if begun during a license period.

(c) No licensee of a television broadcast station shall rebroadcast the program of any United States radio station not designated in paragraph (b) of this section without written authority having first been obtained from the Commission upon application (informal) accompanied by written consent or certification of consent of the licensee of the station originating the program. The foregoing requirements concerning notification of call letters and certification of authority shall not apply to a station when rebroadcasting Defense Network (FM) programs. Blanket authorizations for the rebroadcast of such programs have been filed with the commission by all Defense Network (FM) stations.

REVOCATIONS, MODIFICATIONS, SUSPENSIONS

(All Classes of Station Licenses)

§1.87 Modification of license or construction permit on motion of the Commission.—

(a) Whenever it appears that a station license or construction permit should be modified, the Commission will notify the licensee or permittee in writing of the proposed action and the grounds and reasons therefor and direct him to show cause why an order modifying the license or construction permit in the manner proposed by the Commission should not be issued.

(b) Any order to show cause issued in accordance with paragraph (a) of this section will notify the licensee or permittee that he may request within a period of time to be stated in the order to show cause, that a hearing be held on the proposed modification. In case of timely request, a hearing will be held on the proposed modification, in no event less than 30 days after the receipt of the order to show cause, unless the Commission finds that safety of life or property require the fixing of a shorter period.

(c) In order to avail himself of the right to request a hearing and of the opportunity to appear and give evidence upon the matters specified in the order to show cause, the licensee or permittee, in person or by his attorney shall, within the period of time as may be specified in the order to show cause, file with the Commission a written statement stating that he request a hearing and will appear at the hearing and present evidence on the matter specified in the order to show cause. Such written statement must contain a detailed response to the matter specified in the order to show cause and the permittee or licensee shall be limited in the hearing to matters fairly encompassed within the issues raised by the response.

(d) The right to request a hearing shall, unless a good cause is shown in a petition to be filed not later than 5 days before the lapse of the time specified in paragraph (c) of this section, be deemed waived:

(1) In case of failure to timely file a written statement as required by paragraph (c) of this section.

(2) In case of filing the written statement provided for in paragraph (c) of this section but failure to appear at the hearing, either in person or by counsel.

(e) Where the right to request a hearing is waived and no written statement has been filed within the period of time specified in the order to show cause, the licensee or permittee will be deemed to consent to the modification as proposed in the order to show cause and a final decision will be issued by the Commission accordingly.

(f) Where the right to request a hearing has been waived, a written statement may be filed within the period of time to be specified in the order to show cause, showing with particularity why the license or construction permit should not be modified or not so modified as proposed in the order to show cause. In this case, the Commission may, depending upon the facts alleged and proof offered, either call upon the submitting party to furnish additional information under oath, designate the proceeding for hearing, or issue without further proceedings an order modifying the construction permit or license as proposed in the order to show cause or in said written statement. The order to show cause will advise the person against whom it is directed of procedure set forth in this paragraph.

(g) Any order of modification issued pur-

FCC Rules

suant to this section shall include a statement of the findings and the grounds and reasons therefore, shall specify the effective date of the order and shall be served on the licensee or permittee.

§1.89 Notice of violations.—(a) Any licensee who appears to have violated any provision of the Communications Act or any provision of this chapter shall be served with a written notice calling the facts to his attention and requesting a statement concerning the matter. FCC Form 793 may be used for this purpose.

(b) Within 10 days from receipt of notice or such other period as may be specified, the licensee shall send a written answer, in duplicate, direct to the office of the Commission originating the official notice. If an answer cannot be sent nor an acknowledgement made within such 10-day period by reason of illness or other unavoidable circumstances, acknowledgement and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay.

(c) The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. In every instance the answer shall contain a statement of action taken to correct the condition or omission complained of and to preclude its recurrence. In addition:

(1) If the notice relates to violations that may be due to the physical or electrical characteristics of transmitting apparatus and any new apparatus is to be installed, the answer shall state the date such apparatus was ordered, the name of the manufacturer, and the promised date of delivery. If the installation of such apparatus requires a construction permit, the file number of the application shall be given, or if a file number has not been assigned by the Commission, such identification shall be given as will permit ready identification of the application.

(2) If the notice of violation relates to lack of attention to or improper operation of the transmitter, the name and license number of the operator in charge shall be given.

§1.91 Revocation and/or cease and desist proceedings: hearings.—(a) If it appears that a station license or construction permit should be revoked and/or that a cease and desist order should be issued, the Commission will issue an order directing the person to show cause why an order of revocation and/or a cease and desist order, as the facts may warrant, should not be issued.

(b) An order to show cause why an order of revocation and/or a cease and desist order should not be issued will contain a statement of the matters with respect to which the Commission is inquiring and will call upon the person to whom it is directed (the respondent) to appear before the Commission at a hearing, at a time and place stated in the order, but not less than thirty days after the receipt of such order, and give evidence upon the matters specified in the order to show cause. However, if safety of life or property is involved, the order to show cause may specify a hearing date less than thirty days from the receipt of such order.

(c) To avail himself of such opportunity for hearing, the respondent, personally or by his attorney, shall file with the Commission, within thirty days of the service of the order or such shorter period as may be specified therein, a written appearance stating that he will appear at the hearing and present evidence on the matters specified in the order. The Commission in its discretion may accept a late appearance. However, an appearance tendered after the specified time has expired will not be accepted unless accompanied by a petition stating with particularity the facts and reasons relied on to justify such late filing. Such petition for acceptance of late appearance will be granted only if the Commission determines that the facts and reasons stated therein constitute good cause for failure to file on time.

(d) Hearings on the matters specified in such orders to show cause shall accord with the practice and procedure prescribed in this subpart and Subpart B of this part, with the following exceptions: (1) In all such revocation and/or cease and desist hearings, the burden of proceeding with the introduction of evidence and the burden of proof shall be upon the Commission; and (2) the Commission may specify in a show cause order, when the circumstances of the proceeding require expedition, a time less than

that prescribed in §§1.276 and 1.277 within which the initial decision in the proceeding shall become effective, exceptions to such initial decision must be filed, parties must file requests for oral argument, and parties must file notice of intention to participate in oral argument.

(e) Correction or promise to correct the conditions or matters complained of in a show cause order shall not preclude the issuance of a cease and desist order. Corrections or promises to correct the conditions or matters complained of, and the past record of the licensee, may, however, be considered in determining whether a revocation and/or cease and desist order should be issued.

(f) Any order of revocation and/or cease and desist order issued after hearing pursuant to this section shall include a statement of findings and the grounds therefor, shall specify the effective date of the order, and shall be served on the person to whom such order is directed.

§1.92 Revocation and/or cease and desist proceedings: after waiver of hearing.—(a) After the issuance of an order to show cause, pursuant to §1.91, calling upon a person to appear at a hearing before the Commission, the occurrence of any one of the following events or circumstances will constitute a waiver of such hearing and the proceeding thereafter will be conducted in accordance with the provisions of this section.

(1) The respondent fails to file a timely written appearance as prescribed in §1.91(c) indicating that he will appear at a hearing and present evidence on the matters specified in the order.

(2) The respondent, having filed a timely written appearance as prescribed in §1.91(c), fails in fact to appear in person or by his attorney at the time and place of the duly scheduled hearing.

(3) The respondent files with the Commission, within the time specified for a written appearance in §1.91(c), a written statement expressly waiving his rights to a hearing.

(b) When a hearing is waived under the provisions of paragraph (a) (1) or (3) of this section, a written statement signed by the respondent denying or seeking to mitigate or justify the circumstances or conduct complained of in the order to show cause may be submitted within the time specified in §1.91(c). The Commission in its discretion may accept a late statement. However, a statement tendered after the specified time has expired will not be accepted unless accompanied by a petition stating with particularity the facts and reasons relied on to justify such late filing. Such petitions for acceptance of a late statement will be granted only if the Commission determines that the facts and reasons stated therein constitute good cause for failure to file on time.

(c) Whenever a hearing is waived by the occurrence of any of the events or circumstances listed in paragraph (a) of this section, the Chief Hearing Examiner (or the presiding officer if one has been designated) shall, at the earliest practicable date, issue an order reciting the events or circumstances constituting a waiver of hearing, terminating the hearing proceeding, and certifying the case to the Commission. Such order shall be served upon the respondent.

(d) After a hearing proceeding has been terminated pursuant to Paragraph (c) of this section, the Commission will act upon the matters specified in the order to show cause in the regular course of business. The Commission will determine on the basis of all the information available to it from any source, including such further proceedings as may be warranted, if a revocation order and/or a cease and desist order should issue, and if so, will issue such order. Otherwise, the Commission will issue an order dismissing the proceeding. All orders specified in this paragraph will include a statement of the findings of the Commission and the grounds and reasons therefore, will specify the effective date thereof, and will be served upon the respondent.

(e) Corrections or promise to correct the conditions or matters complained of in a show cause order shall not preclude the issuance of a cease and desist order. Corrections or promises to correct the conditions or matters complained of, and the past record of the licensee, may, however, be considered in determining whether a revocation and/or cease and desist order should be issued.

(Of Operator Licenses)

§1.85 Suspension of operator licenses.—Whenever grounds exist for suspension of an operator license, as provided in Section 303(m) of the Communications Act, the Chief of the Safety and Special Radio Services Bureau, with respect to amateur

operator licenses, or the Chief of the Field Engineering and Monitoring Bureau, with respect to commercial operator licenses, may issue an order suspending the operator license. No order of suspension in any operators' license shall take effect until 15 days' notice in writing of the cause for the proposed suspension has been given to the operator licensee, who may make written application to the Commission at any time within said 15 days for a hearing upon such order. The notice to the operator licensee shall not be effective until actually received by him, and from that time he shall have 15 days in which to mail the said application. In the event that physical conditions prevent mailing of the application before the expiration of the 15-day period, the application shall then be mailed as soon as possible thereafter, accompanied by a satisfactory explanation of the delay. Upon receipt by the Commission of such application for hearing said order of suspension shall be designated for hearing by the Chief, Safety and Special Radio Services Bureau or the Chief, Field Engineering Bureau, as the case may be, and said order of suspension shall be held in abeyance until the conclusion of the hearing. Upon the conclusion of said hearing, the Commission may affirm, modify or revoke said order of suspension. If the license is ordered suspended, the operator shall send his operator license to the office of the Commission in Washington, D.C. on or before the effective date of the order, or, if the effective date has passed at the time notice is received, the license shall be sent to the Commission forthwith.

LOGS AND RECORDS

§1.6 Availability of station logs and records for Commission inspection.—(a) Station records and logs shall be made available for inspection or duplication at the request of the Commission or its representative. Such logs or records may be removed from the licensee's possession by a Commission representative or, upon request, shall be mailed by the licensee to the Commission by either registered mail, return receipt requested, or certified mail, return receipt requested. The return receipt shall be retained by the licensee as part of the station records until such records or logs are returned to the licensee. A receipt shall be furnished when the logs or records are removed from the licensee's possession by a Commission representative and this receipt shall be retained by the licensee as part of the station records until such records or logs are returned to the licensee. When the Commission has no further need for such records or logs, they shall be returned to the licensee. The provisions of this rule shall apply solely to those station logs and records which are required to be maintained by the provisions of this chapter.

(b) Where records or logs are maintained as the official records of a recognized law enforcement agency and the removal of the records from the possession of the law enforcement agency will hinder its law enforcement activities, such records will not be removed pursuant to this section if the Chief of the law enforcement agency shall promptly certify in writing to the Federal Communications Commission that the removal of the logs or records will hinder law enforcement activities of the agency, and stating insofar as feasible the basis for his decision and the date when it can reasonably be expected that such records may be released to the Federal Communications Commission.

LOTTERIES

§73.122 Lotteries.—(a) An application for construction permit, license, renewal of license, or any other authorization for the operation of a broadcast station, will not be granted where the applicant proposes to follow or continue to follow a policy or practice of broadcasting or permitting "the broadcasting of any advertisement of or information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance or any list of the prizes drawn or awarded by means of any such lottery, gift enterprise, or scheme, whether said list contains any part or all such prizes." (See 18 U.S.C. §1304.)

(b) The determination whether a particular program comes within the provisions of paragraph (a) of this section depends on the facts of each case. However, the Commission will in any event consider that a program comes within the provisions of Paragraph (a) of this section if in connection with such program a prize consisting of money or thing of value is awarded, to any person whose selection is dependent in whole or in part upon lot or chance, if as a condition of winning or competing for such prize, such winner or winners, are required to furnish any money, or thing of value or are re-

quired to have in their possession any product sold, manufactured, furnished or distributed by a sponsor of a program broadcast on the station in question.

§1304 (of U.S. Criminal Code) Broadcast-Lottery Information.—Whoever broadcasts by means of any radio station for which a license is required by any law of the U.S. or whoever, operating any such station, knowingly permits the broadcasting of any advertisement of or information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance, or any list of the prizes drawn or awarded by means of any such lottery, gift enterprise of scheme, whether said list contains any part or all of such prizes, shall be fined not more than \$1,000 or imprisoned not more than one year, or both.

Each day's broadcasting shall constitute a separate offense.

CENSORSHIP

§326 (of Communications Act.)—Nothing in this Act shall be understood to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station, and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication.

INDECENT LANGUAGE

§1464 (of U.S. Criminal Code) Broadcasting obscene language.—Whoever utters any obscene, indecent, or profane language by means of radio communication shall be fined not more than \$10,000 or imprisoned not more than two years, or both.

TRANSFERS AND ASSIGNMENTS

§1.540 Application for voluntary assignment or transfer of control.—(a) Application for consent to the assignment of construction permit or license, or for consent to the transfer of control or a corporation holding such a construction permit or license, shall be filed with the Commission on FCC Form 314 (Assignment of License), FCC Form 315 (Transfer of Control), or FCC Form 316 (Short Form). Such application should be filed with the commission at least 45 days prior to the contemplated effective date of assignment or transfer of control.

(b) The following assignment or transfer applications may be filed on Form 316.

- (1) Assignment from individual or individuals (including partnerships) to a corporation owned and controlled by such individuals or partnerships without any substantial change in their relative interests;
- (2) Assignment from a corporation to its individual stockholders without effecting any substantial change in the disposition of their interests;
- (3) Assignment or transfer by which certain stockholders retire and interest transferred is not a controlling one;
- (4) Corporate reorganization which involves no substantial change in beneficial ownership;
- (5) Assignment or transfer from corporation to wholly owned subsidiary thereof or vice versa, or where there is assignment owned or controlled by assignor stockholders without substantial change in their interests;
- (6) Assignment of less than a controlling interest in a partnership.

§1.541 Application for involuntary assignment of license or transfer of control.—(a) The Commission shall be notified in writing promptly of the death or legal disability of an individual permittee or licensee, a member of a partnership, or a person directly or indirectly in control of a corporation which is a permittee or licensee.

(b) Within 30 days after the occurrence of such death or legal disability, an application on FCC Form 316 shall be filed requesting consent to involuntary assignment of such permit or license or for involuntary transfer of control of such corporation to a person or entity legally qualified to succeed to the foregoing interests under the laws of the place having jurisdiction over the estate involved.

Station Application Procedure

How to Apply for a Broadcasting Station (AM/FM/TV)

(Updated to September 1970)

Any qualified citizen, firm, or group may apply to the Federal Communications Commission for authority to construct a standard (AM), frequency modulation (FM), or television (TV) broadcast station.

Licensing of these facilities is prescribed by the Communications Act of 1934, as amended, which sets up certain basic requirements. In general, applicants must satisfy the commission that they are legally, technically and financially qualified, and

that operation of the proposed station would be in the public interest.

The licensing procedure is detailed in Part 1 of the commission's rules of "Practice and Procedure." Station operation is covered by Part 73 (formerly Part 3) "Radio Broadcast Services." The latter includes technical standards for AM, FM and TV stations, and TV and FM channel (frequency) assignments by states and communities. Copies of these rules are not supplied by the commission but are available from the Government Printing Office.

Most applicants employ engineering and legal services in preparing their applications. The commission does not make technical or other special studies for prospective applicants nor does it recommend individual lawyers or engineers. Names of firms and individuals practicing before the commission are listed in various trade publications.

Following is a summary of the consecutive steps to be followed in applying for authorization to build and operate a broadcast station. The application procedure is substantially the same whether the facility sought is AM, FM or TV.

Selecting a Facility

An AM applicant must make his own search for a frequency on which he could operate without causing or receiving interference from existing stations and stations proposed in pending applications. AM broadcast stations operate on "local," "regional," or "clear" channels. Stations of 250 watts power nighttime and up to 1 kilowatt daytime serve small communities; stations of 500 watts to 5 kilowatts power cover centers of population and surrounding areas; stations of 10 to 50 kilowatts power are for large area coverage, particularly at night. The FCC is currently not accepting applications for new AM stations or for major changes in the facilities of existing AM stations pending an over-all review of its standard broadcast rules.

An FM station applicant must request an FM channel assigned to the community in which he proposes to operate, or a place within a 10-mile radius (for Class A FM stations) or a 15-mile radius (for Class B or Class C FM stations), which has no FM channel assignment. Power, antenna height and station separation are governed by which of three zones the station is to be located. There are three classes of commercial FM stations. Class A stations use power of from 100 watts to 3 kilowatts to cover a radius of about 15 miles; Class B stations, 5 kilowatts to 50 kilowatts for 40-mile service and Class C, 25 kilowatts to 100 kilowatts for 65-mile range. Noncommercial educational FM stations are in a separate category and may operate with power as low as 10 watts. Commercial and educational FM stations may apply for a "Subsidiary Communications Authorization" (Form 318) to furnish certain supplemental services. FM stations may engage in stereophonic broadcasting for which no special application is required.

An applicant for a TV station must request a VHF (very high frequency) or a UHF (ultra high frequency) channel assigned to the community in which he proposes to operate, or a place having no channel assignment within 15 miles of that community. Power depends upon the kind of channels used (VHF or UHF) and station separation is determined by three zones. TV "translator" stations serve remote communities by picking up and rebroadcasting the programs of outside stations, with latter's permission. They operate on VHF or the upper 14 UHF channels. Booster stations fill in the shadows of UHF station service areas. Certain channels are assigned for noncommercial educational TV operation. There is a "Community Antenna Relay Service" for noncommon-carrier microwave facilities to relay TV signals to community antenna television (CATV) systems.

Applying for a Construction Permit

After a prospective broadcaster has decided upon the type of station he desires, and the place where it would be located, he should ascertain and plan his programming to meet the community problems and programming needs of the locality he intends to serve. The next step is to apply for a construction permit. This is done on FCC Form 301, "Application for Authority to Construct a New Broadcast Station or Make Changes in an Existing Broadcast Station," which covers AM, FM, or TV broadcast, except educational applicants who use FCC Form 340, TV translators (Form 346), and booster stations (Form 343). These forms require information about the citizenship and character of the applicant, as well as his financial, technical and other qualifications, plus details about the transmitting apparatus to be used, antenna and studio locations, and the service proposed. Commercial broadcast applicants are required to

show their financial ability to operate for one year after construction of the station. Triplicate copies are required. Nonprofit educational institutions apply for new or changed instructional fixed TV stations on Form 330P.

Applicants Must Give Local Notice

Applicants for new broadcast stations, license renewals, station sales or major changes in existing stations must give local public notice of such intent and also of any subsequent designation of their applications for hearing. This is done over the applicant's local station (if any) and by advertising in the local newspaper. It affords interested persons an opportunity to comment on these applications to the commission. Applicants and stations must also maintain public reference files in their respective localities.

Application Processing

All broadcast applications are reported twice by the commission—when first tendered (received) and, again, when formally accepted for filing. An application is not acted upon until at least 30 days after the commission gives public notice of its acceptance. During that time objecting petitions may be filed.

Competing AM applications may be filed up to a date specified (about 30 days subsequent to) in a notice of AM applications ready for processing. Competing FM and TV applications may be filed up to the day the initial application is ready for commission consideration.

Applications are, in general, processed in the order in which accepted. They are reviewed in their engineering, legal and financial aspects by the Broadcast Bureau, which, under delegated authority, can act on routine applications and report to the commission applications involving policy or other particular considerations. If an application has no engineering or other conflicts, has no valid protests, the applicant is found qualified. Assuming all other requirements are met, the application may be granted without hearing and a construction permit is issued. All such grants are announced by the commission. Petitions for reconsideration of grants without hearing made without hearing can be filed within 30 days thereafter but must show good cause why the objections were not raised before the grant.

Hearing Procedure

Where it appears that an application does not conform to the commission's rules and regulations, that serious interference would be caused, if there is protest of merit, or if other serious questions of a technical, legal or financial character develop, a hearing is usually required. The commission must accord a hearing to competing applications filed within specified time limits.

In designating an application for hearing, the commission gives public notice of the issues for the information of the applicant and others concerned. The hearing notice generally allows the applicant 60 days or more in which to prepare. Even after the hearing has been set, an applicant may amend his application to resolve engineering or other problems. (Commission approval is required for all mergers or situations in which a competing applicant withdraws on payment of expenses.)

Hearings on competing applications are normally held at the commission's Washington offices. Hearings on license revocations and renewals are held in the communities affected.

Hearings are customarily conducted by an examiner. He has authority to administer oaths, examine witnesses and rule upon the admission of evidence. A prehearing conference is held to reach agreement on procedural matters.

Within 20 days after the close of a record by the hearing examiner, each party and the chief of the Broadcast Bureau of the commission can file proposed findings of fact and conclusions to support their contentions. After review of the evidence and statements, the hearing examiner issues an initial decision.

If he wishes to contest the initial decision, the applicant or any other party in interest has 80 days from the date on which the initial decision was issued to file exceptions. In all cases heard by an examiner, the commission or its review board may hear oral argument on timely request of any party. After oral argument, the commission or the review board, as the case may be, may adopt, modify or reverse the hearing examiner's initial decision. In cases where the review board has acted on the exceptions, an appeal from its decision may be taken to the commission within 30 days. The commission may, however, deny the appeal

Station Application

for review without stating reasons for such action.

Court appeals can be taken within 30 days following release of the final decision, in which case the commission's action is stayed pending court determination.

Construction Permit

When an application is granted, a construction permit is issued. The new permittee may then request call letters which, if available and conforming to the rules, are issued. A period of 12 months for AM and FM and 18 months for TV from the date of the construction permit is provided as the time for completion of construction. Application to make changes in an existing station is made on the same form used in seeking initial construction authorization (Form 301). Application to modify a broadcast construction authorization or to modify a license is made on form 301-A, "Request for Modification of Broadcast Station Authorization." If the permittee is unable to build his station within the time specified, he must apply for extension of time on Form 701 ("Application for Additional Time to Construct a Radio Station"), giving reasons. Upon completion of construction the permittee conducts equipment tests.

License

The final step is to apply for the actual license on Form 302 ("Application for New Broadcast Station License"), or Form 341 (for noncommercial educational FM stations), Form 344 (for TV boosters), or Form 347 (for TV translators). Applicants must show compliance with all terms, conditions and obligations set forth in the original application and the construction permit. Not until he applies for a license can the holder of a construction permit request authority to conduct program tests. The license application form provides a space for program test request, or it can be made separately. A station license and program test authority are issued if no new cause or circumstance has come to the attention of the commission that would make operation of the station contrary to public interest.

Applicants for renewal of station licenses must show that they have operated according to the terms of their authorizations and the promises they made in obtaining them. Most renewal applications are made on Form 303 ("Application for Renewal of Broadcast Station License"). Noncommercial educational licensees use Form 342; and TV translators Form 348. Pending the disposition of any commission hearing or other proceeding involving license renewal or revocation, the station continues to operate even though its license term may have expired.

Sales and Transfers

If the holder of a construction permit or license desires to assign it to someone else, he makes application on Form 314 ("Application for Consent to Assignment of Radio Broadcast Station Construction Permit or License"). Should the permittee or licensee wish to transfer corporate control, he applies on Form 315 "Application for Consent to Transfer Control of Corporation Holding Radio Broadcast Station Construction Permit or License". Form 316 ("Application for Assignment or Transfer—Short Form") may be used when the transfer or assignment involves no substantial change in interest. Sales of stations held less than three years are subject to hearing except in case of death, hardship or other mitigating circumstances beyond the licensee's control.

Construction Changes

Applicants for authority to make construction changes in existing stations apply on the same form used for a construction permit for the type of station involved.

Application and License Fees

Since March 17, 1964, the commission has exacted fees for most application filings to comply with government policy to charge for certain federal services. In July 1970, the commission increased those fees and imposed new ones for grants and licenses, in an action aimed at recovering for the Treasury all of the costs of running the agency.

Printed Rules

FCC rules may be obtained only through the Government Printing Office, Washington, D. C. 20402. The rules on FCC practice and procedure are contained in Volume I, which is available at the Government Printing Office for \$4 a copy; the broadcast rules are contained in Volume III, for \$7. Orders should be sent to the Government Printing Office direct (not through the FCC). The printed rules are sold on a subscription basis, which entitles the purchaser to receive subsequent amendments to the rule part purchased.

For AM and FM radio stations the annual fee will be a payment equal to 24 times the station's highest single one-minute spot-announcement rate, but in no event shall the annual payment for each AM and each FM station be less than \$52.

For television broadcast stations the annual fee will be a payment equal to 12 times the station's highest 30-second spot-announcement rate, but in no event shall the annual payment be less than \$144.

(b) Fees are not required in the following instances:

(1) Applications filed by tax-exempt organizations for the operation of stations providing noncommercial educational broadcast services, whether or not such stations operate on frequencies allocated for noncommercial educational use.

(2) Applications in the AM service requesting only authority to determine antenna power by direct measurement.

¹ With respect to applications for remote pickup broadcast stations authorized under Subpart D of Part 74 of this chapter, one fee will cover the base station (if any) and all the remote-pickup mobile stations of a main station, provided the applications therefore are filed, at the same time.

ASCAP can supply you with over 3 million songs.

Those not given to excesses and impatience, will find, however, that a discerning selection suited to their program policy, from among the works of ASCAP's 14,000 members, provides the most judicious solution. (Since you can't play a judicious solution, it will also, of course, provide the music you selected.)

And what a repertoire to select from! From Bach to Country. Or even a combination of both, such as, "Bach Home Again In Indiana". From Western to Jazz. From Pop to Musical Theatre. From Symphonies to Solos. From "Peter and the Wolf" to "Peter and the Paul and Mary. From ASCAP to you. From this moment on - you and I babe.....

(How you play them all in one program is another matter.)

NAB Television Code

Preamble

Television is seen and heard in every type of American home. These homes include children and adults of all ages, embrace all races and all varieties of religious faith, and reach those of every educational background. It is the responsibility of television to bear constantly in mind that the audience is primarily a home audience, and consequently that television's relationship to the viewers is that between guest and host.

The revenues from advertising support the free, competitive American system of telecasting and make available to the eyes and ears of the American people the finest programs of information, education, culture and entertainment. By law the television broadcaster is responsible for the programming of his station. He, however, is obliged to bring his positive responsibility for excellence and good taste in programming to bear upon all who have a hand in the production of programs, including networks, sponsors, producers of film and of live programs, advertising agencies, and talent agencies.

The American businesses which utilize television for conveying their advertising messages to the home by pictures with sound, seen free-of-charge on the home screen, are reminded that their responsibilities are not limited to the sale of goods and the creation of a favorable attitude toward the sponsor by the presentation of entertainment. They include, as well, responsibility for utilizing television to bring the best programs, regardless of kind, into American homes.

Television and all who participate in it are jointly accountable to the American public for respect for the special needs of children, for community responsibility, for the advancement of education and culture, for the acceptability of the program materials chosen, for decency and decorum in production, and for propriety in advertising. This responsibility cannot be discharged by any given group of programs, but can be discharged only through the highest standards of respect for the American home, applied to every moment of every program presented by television.

In order that television programming may best serve the public interest, viewers should be encouraged to make their criticisms and positive suggestions known to the television broadcasters. Parents in particular should be urged to see to it that out of the richness of television fare, the best programs are brought to the attention of their children.

I. Advancement of Education and Culture

1. Commercial television provides a valuable means of augmenting the educational and cultural influences of schools, institutions of higher learning, the home, the church, museums, foundations, and other institutions devoted to education and culture.

2. It is the responsibility of a television broadcaster to call upon such institutions for counsel and cooperation and to work with them on the best methods of presenting educational and cultural materials by television. It is further the responsibility of stations, networks, advertising agencies and sponsors consciously to seek opportunities for introducing into telecasts factual materials which will aid in the enlightenment of the American public.

3. Education via television may be taken

to mean that process by which the individual is brought toward informed adjustment to his society. Television is also responsible for the presentation of overtly instructional and cultural programs, scheduled so as to reach the viewers who are naturally drawn to such programs, and produced so as to attract the largest possible audience.

4. The television broadcaster should be thoroughly conversant with the educational and cultural needs and desires of the community served.

5. He should affirmatively seek out responsible and accountable educational and cultural institutions of the community with a view toward providing opportunities for the instruction and enlightenment of the viewers.

6. He should provide for reasonable experimentation in the development of programs specifically directed to the advancement of the community's culture and education.

7. It is in the interest of television as a vital medium to encourage and promote the broadcast of programs presenting genuine artistic or literary material, valid moral and social issues, significant controversial and challenging concepts and other subject matter involving adult themes. Accordingly, none of the provisions of this code, including those relating to the responsibility toward children, should be construed to prevent or impede their broadcast. All such programs, however, should be broadcast with due regard to the composition of the audience. The highest degree of care should be exercised to preserve the integrity of such programs and to ensure that the selection of themes, their treatment and presentation are made in good faith upon the basis of true instructional and entertainment values, and not for the purposes of sensationalism, to shock or exploit the audience or to appeal to prurient interests or morbid curiosity.

II. Responsibility Toward Children

1. The education of children involves giving them a sense of the world at large. It is not enough that only those programs which are intended for viewing by children shall be suitable to the young and immature. In addition, those programs which might be reasonably expected to hold the attention of children and which are broadcast during times of the day when children may be normally expected to constitute a substantial part of the audience should be presented with due regard for their effect on children.

2. Such subjects as violence and sex shall be presented without undue emphasis and only as required by plot development or character delineation. Crime should not be presented as attractive or as a solution to human problems, and the inevitable retribution should be made clear.

3. The broadcaster should afford opportunities for cultural growth as well as for wholesome entertainment.

4. He should develop programs to foster and promote the commonly accepted moral, social and ethical ideals characteristic of American life.

5. Programs should reflect respect for parents for honorable behavior, and for the constituted authorities of the American community.

6. Exceptional care should be exercised with reference to kidnapping or threats of kidnapping of children in order to avoid terrorizing them.

7. Material which is excessively violent or would create morbid suspense, or other

undesirable reactions in children, should be avoided.

8. Particular restraint and care in crime or mystery episodes involving children or minors, should be exercised.

III. Community Responsibility

1. A television broadcaster and his staff occupy a position of responsibility in the community and should conscientiously endeavor to be acquainted fully with its needs and characteristics in order better to serve the welfare of its citizens.

2. Requests for time for the placement of public service announcements or programs should be carefully reviewed with respect to the character and reputation of the group, campaign or organization involved, the public interest content of the message, and the manner of its presentation.

IV. General Program Standards

1. Program materials should enlarge the horizons of the viewer, provide him with wholesome entertainment, afford helpful stimulation, and remind him of the responsibilities which the citizen has towards his society. The intimacy and confidence placed in television demand of the broadcaster, the network and other program sources that they be vigilant in protecting the audience from deceptive program practices.

2. Profanity, obscenity, smut and vulgarity are forbidden, even when likely to be understood only by part of the audience. From time to time, words which have been acceptable, acquire undesirable meanings, and telecasters should be alert to eliminate such words.

3. Words (especially slang) derisive of any race, color, creed, nationality or national derivation, except wherein such usage would be for the specific purpose of effective dramatization such as combating prejudice, are forbidden, even when likely to be understood only by part of the audience. From time to time, words which have been acceptable, acquire undesirable meanings, and telecasters should be alert to eliminate such words.

4. Racial or nationality types shall not be shown on television in such a manner as to ridicule the race or nationality.

5. Attacks on religion and religious faiths are not allowed. Reverence is to mark any mention of the name of God, His attributes and powers. When religious rites are included in other than religious programs the rites shall be accurately presented. The office of minister, priest or rabbi shall not be presented in such a manner as to ridicule or impair its dignity.

6. Respect is maintained for the sanctity of marriage and the value of the home. Divorce is not treated casually as a solution for marital problems.

7. In reference to physical or mental afflictions and deformities, special precautions must be taken to avoid ridiculing sufferers from similar ailments and offending them or members of their families.

8. Excessive or unfair exploitation of others or of their physical or mental afflictions shall not be presented as praiseworthy.

The presentation of cruelty, greed and selfishness as worthy motivations is to be avoided.

9. Law enforcement shall be upheld and, except where essential to the program plot, officers of the law portrayed with respect and dignity.

10. Legal, medical and other professional advice, diagnosis and treatment will be permitted only in conformity with law and

NAB TV Code

recognized ethical and professional standards.

11. The use of animals both in the production of television programs and as part times, be in conformity with accepted standards of humane treatment.

12. Care should be exercised so that cigarette smoking will not be depicted in a manner to impress the youth of our country as a desirable habit worthy of imitation.

13. Criminality shall be presented as undesirable and unsympathetic. The condoning of crime and the treatment of the commission of crime in a frivolous, cynical or callous manner is unacceptable.

The presentation of techniques of crime in such detail as to invite imitation shall be avoided.

14. The presentation of murder or revenge as a motive for murder shall not be presented as justifiable.

15. Suicide as an acceptable solution for human problems is prohibited.

16. Illicit sex relations are not treated as commendable.

Sex crimes and abnormalities are generally unacceptable as program material.

The use of locations closely associated with sexual life or with sexual sin must be governed by good taste and delicacy.

17. Drunkenness should never be presented as desirable or prevalent.

The use of liquor in program content shall be de-emphasized. The consumption of liquor in American life, when not required by the plot or for proper characterization, shall not be shown.

18. Narcotic addiction shall not be presented except as a vicious habit. The administration of illegal drugs will not be displayed. The use of hallucinogenic drugs shall not be shown or encouraged as desirable or socially acceptable.

19. The use of gambling devices or scenes necessary to the development of plot or as appropriate background is acceptable only when presented with discretion and in moderation, and in a manner which would not excite interest in, or foster, betting nor be instructional in nature.

20. Telecasts of actual sport programs at which on-the-scene betting is permitted by law should be presented in a manner in keeping with federal, state and local laws, and should concentrate on the subject as a public sporting event.

21. Program material pertaining to fortune-telling, occultism, astrology, phrenology, palm-reading, numerology, mind-reading or character-reading is unacceptable when presented for the purpose of fostering belief in these subjects.

22. Quiz and similar programs that are presented as contests of knowledge, information, skill or luck must, in fact, be genuine contests and the results must not be controlled by collusion with or between contestants, or any other action which will favor one contestant against any other.

23. No program shall be presented in manner which through artifice or simulation would mislead the audience as to any material fact. Each broadcaster must exercise reasonable judgment to determine whether a particular method of presentation would constitute a material deception, or would be accepted by the audience as normal theatrical illusion.

24. The appearances or dramatization of persons featured in actual crime news will be permitted only in such light as to aid law enforcement or to report the news event.

25. The use of horror for its own sake will be eliminated; the use of visual or aural effects which would shock or alarm the viewer, and the detailed presentation of brutality or physical agony by sight or by sound are not permissible.

26. Contests may not constitute a lottery.

27. The costuming of all performers shall be within the bounds of propriety and shall avoid such exposure or such emphasis on anatomical detail as would embarrass or offend home viewers.

28. The movements of dancers, actors, or other performers shall be kept within the bounds of decency, and lewdness and impropriety shall not be suggested in the positions assumed by performers.

29. Camera angles shall avoid such views of performers as to emphasize anatomical details indecently.

30. The use of the television medium to transmit information of any kind by the use of the process called "subliminal perception," or by the use of any similar technique whereby an attempt is made to convey information to the viewer by transmitting messages below the threshold of normal awareness, is not permitted.

31. The broadcasters shall be constantly alert to prevent activities that may lead to such practices as the use of scenic properties, the choice and identification of prizes, the selection of music and other creative program elements and inclusion of any identification of commercial products or services, their trade names or advertising slogans, within a program dictated by factors other than the requirements of the program itself. The acceptance of cash payments or other considerations in return for including any of the above within the program is prohibited except in accordance with Sections 317 and 508 of the Communications Act.

32. A television broadcaster should not present fictional events or other non-news material as authentic news telecasts or announcements, nor should he permit dramatizations in any program which would give the false impression that the dramatized material constitutes news. Expletives, (presented aurally or pictorially) such as "flash" or "bulletin" and statements such as "we interrupt this program to bring you . . ." should be reserved specifically for news room use. However, a television broadcaster may properly exercise discretion in the use in non-news programs of words or phrases which do not necessarily imply that the material following is a news release.

33. Program content should be confined to those elements which entertain or inform the viewer and to the extent that titles, teasers and credits do not meet these criteria, they should be restricted or eliminated.

34. The creation of a state of hypnosis by act or demonstration on the air is prohibited and hypnosis as an aspect of "parlor game" antics to create humorous situations within a comedy setting cannot be used.

V. Treatment of News and Public Events

1. A television station's news schedule should be adequate and well-balanced.

2. News reporting should be factual, fair and without bias.

3. A television broadcaster should exercise particular discrimination in the acceptance, placement and presentation of advertising in news programs so that such advertising should be clearly distinguishable from the news content.

4. At all times, pictorial and verbal material for both news and comment should conform to other sections of these standards, wherever such sections are reasonably applicable.

5. Good taste should prevail in the selection and handling of news:

Morbid, sensational or alarming details not essential to the factual report, especially in connection with stories of crime or sex, should be avoided. News should be telecast in such a manner as to avoid panic and unnecessary alarm.

6. Commentary and analysis should be clearly identified as such.

7. Pictorial material should be chosen with care and not presented in a misleading manner.

8. All news interview programs should be governed by accepted standards of ethical journalism, under which the interviewer selects the questions to be asked. Where there is advance agreement materially restricting an important or news-worthy area of questioning, the interviewer will state on the program that such limitation has been agreed upon. Such disclosure should be made if the person being interviewed requires that questions be submitted in advance or if he participates in editing a recording of the interview prior to its use on the air.

9. A television broadcaster should exercise due care in his supervision of content, format, and presentation of newscasts originated by his station, and in his selection of newscasters, commentators, and analysts.

Public Events

1. A television broadcaster has an affirmative responsibility at all times to be informed of public events, and to provide coverage consonant with the ends of an informed and enlightened citizenry.

2. The treatment of such events by a television broadcaster should provide adequate and informed coverage.

VI. Controversial Public Issues

1. Television provides a valuable forum for the expression of responsible views on public issues of a controversial nature. The television broadcaster should seek out and develop with accountable individuals, groups and organizations, programs relating to controversial public issues of import to his fellow citizens; and to give fair representation to opposing sides of issues which materially affect the life or welfare of a

substantial segment of the public.

2. Requests by individuals, groups or organizations for time to discuss their views on controversial public issues, should be considered on the basis of their individual merits, and in the light of the contribution which the use requested would make to the public interest, and to a well-balanced program structure.

3. Programs devoted to the discussion of controversial public issues should be identified as such. They should not be presented in a manner which would mislead listeners or viewers to believe that the program is purely of an entertainment, news or other character.

4. Broadcasts in which stations express their own opinions about issues of general public interest should be clearly identified as editorials. They should be unmistakably identified as statements of station opinion and should be appropriately distinguished from news and other program material.

VII. Political Telecasts

1. Political telecasts should be clearly identified as such. They should not be presented by a television broadcaster in a manner which would mislead listeners or viewers to believe that the program is of any other character.

(Ref.: Communications Act of 1934, as amended, Secs. 315 and 317, and FCC Rules and Regulations, Secs. 3.654, 3.657, 3.663, as discussed in NAB's "A Political Catechism.")

VIII. Religious Programs

1. It is the responsibility of a television broadcaster to make available to the community appropriate opportunity for religious presentations.

2. Telecasting which reaches men of all creeds simultaneously should avoid attacks upon religion.

3. Religious programs should be presented respectfully and accurately and without prejudice or ridicule.

4. Religious programs should be presented by responsible individuals, groups and organizations.

5. Religious programs should place emphasis on broad religious truths, excluding the presentation of controversial or partisan views not directly or necessarily related to religion or morality.

6. In the allocation of time for telecasts of religious programs the television station should use its best efforts to apportion such time fairly among the representative faith groups of its community.

IX. General Advertising Standards

1. This Code establishes basic standards for all television broadcasting. The principles of acceptability and good taste within the Program Standards section govern the presentation of advertising where applicable. In addition, the Code establishes in this section special standards which apply to television advertising.

2. A commercial television broadcaster makes his facilities available for the advertising of products and services and accepts commercial presentation for such advertising. However, a television broadcaster should, in recognition of his responsibility to the public, refuse the facilities of his station to an advertiser where he has good reason to doubt the integrity of the advertiser, the truth of the advertising representations, or the compliance of the advertiser with the spirit and purpose of all applicable legal requirements.

3. Identification of sponsorship must be made in all sponsored programs in accordance with the requirements of the Communications Act of 1934, as amended, and the Rules and Regulations of the Federal Communications Commission.

4. Representations which disregard normal safety precautions shall be avoided. Children shall not be represented, except under proper adult supervision, as being in contact with, or demonstrating a product recognized as potentially dangerous to them.

5. In consideration of the customs and attitudes of the communities served, each television broadcaster should refuse his facilities to the advertisement of products and services, or the use of advertising scripts, which the station has good reason to believe would be objectionable to a substantial and responsible segment of the community. These standards should be applied with judgment and flexibility, taking into consideration the characteristics of the medium, its home and family audience, and the form and content of the particular presentation.

6. The advertising of hard liquor (distilled spirits) is not acceptable.

7. The advertising of beer and wines is acceptable only when presented in the best of good taste and discretion, and is acceptable only subject to federal and local laws.

(See Television Code Interpretation No. 4).

8. The level of cigarette advertising on television will be reduced in progressive steps so that effective Sept. 1, 1973, all cigarette advertising will cease on subscriber stations and networks. The base year of July 1, 1968-July 1, 1969 will be the measuring point for cigarette commercials. Each subscriber station and network will compute the total minutes of commercial time devoted to cigarette advertising during the base year.

Beginning Jan. 1, 1970, each station and network will limit the total number of minutes available for sale to cigarette advertisers to the Percentages of the base year minutes listed below:

Period Commencing	Pct.
Jan. 1, 1970	90%
Sept. 1, 1970	75%
Sept. 1, 1971	50%
Sept. 1, 1972	25%
Sept. 1, 1973	0

Each subscriber station and network will be required to file with the NAB Code Authority the total minutes of commercial time in its base year and to file periodic reports of cigarette commercials carried in the succeeding years.

The advertising of cigarettes shall not state or imply claims regarding health and shall not be presented in such a manner as to indicate to youth that the use of cigarettes contributes to individual achievement, personal acceptance or is a habit worthy of imitation.

No cigarette commercials shall be permitted in or adjacent to any program primarily directed to youth audiences. Note: All cigarette commercials on TV are banned after Jan. 1, 1971 under Public Law 91-222, signed April 1, 1970. This section was ordered deleted by the TV Board prior to the passage of PL 91-222, with the president of NAB ordered to prepare a new section.

9. Advertising by institutions or enterprises which in their offers of instruction imply promises of employment or make exaggerated claims for the opportunities awaiting those who enroll for courses is generally unacceptable.

10. The advertising of firearms/ammunition is acceptable provided it promotes the product only as sporting equipment and conforms to recognized standards of safety as well as all applicable laws and regulations. Advertisements of firearms/ammunition by mail order are unacceptable. The advertising of fireworks is acceptable subject to all applicable laws.

11. The advertising of fortune-telling, occultism, astrology, phrenology, character reading or subjects of a like nature is not permitted.

12. Because all products of a personal nature create special problems, acceptability of such products should be determined with special emphasis on ethics and the canons of good taste. Such advertising of personal products as is accepted must be presented in a restrained and obviously inoffensive manner.

13. The advertising of tip sheets, race track publications, or organizations seeking to advertise for the purpose of giving odds or promoting betting or lotteries is unacceptable.

14. An advertiser who markets more than one product should not be permitted to use advertising copy devoted to an acceptable product for purposes of publicizing the brand name or other identification of a product which is not acceptable.

15. "Bait-switch" advertising, whereby goods or services which the advertiser has no intention of selling are offered merely to lure the customer into purchasing higher-priced substitutes, is not acceptable.

16. Personal endorsements (testimonials) shall be genuine and reflect personal experience. They shall contain no statement that cannot be supported if presented in the advertiser's own words.

X. Presentation of Advertising

1. Advertising messages should be presented with courtesy and good taste; disturbing or annoying material should be avoided; every effort should be made to keep the advertising message in harmony with the content and general tone of the program in which it appears.

2. The role and capability of television to market sponsors' products are well recognized. In turn, this fact dictates that great care be exercised by the broadcaster to prevent the presentation of false, misleading or deceptive advertising. While it is entirely appropriate to present a product in a favorable light and atmosphere, the presentation

must not, by copy or demonstration, involve a material deception as to the characteristics, performance or appearance of the product.

3. The broadcaster and the advertiser should exercise special caution with the content and presentation of television commercials placed in or near programs designed for children. Exploitation of children should be avoided.

Commercials directed to children should in no way mislead as to the product's performance and usefulness.

Appeals involving matters of health which should be determined by physicians should not be directed primarily to children.

4. Appeals to help fictitious characters in television programs by purchasing the advertiser's product or service or sending for a premium should not be permitted, and such fictitious characters should not be introduced into the advertising message for such purposes.

5. Commercials for services or over-the-counter products involving health considerations are of intimate and far-reaching importance to the consumer. The following principles should apply to such advertising:

a. Physicians, dentists, or nurses, or actors representing physicians, dentists or nurses, shall not be employed directly or by implication. These restrictions also apply to persons professionally engaged in medical services (e.g., physical therapists, pharmacists, dental assistants, nurses' aides).

b. Visual representations of laboratory settings may be employed, provided they bear a direct relationship to bona fide research which has been conducted for the product or service. (See Code, X. 10.) In such cases, laboratory technicians shall be identified as such and shall not be employed as spokesmen or in any other way speak on behalf of the product.

c. Institutional announcements not intended to sell a specific product or service to the consumer and public service announcements by nonprofit organizations may be presented by accredited physicians, dentists or nurses, subject to approval by the broadcaster. An accredited professional is one who has met required qualifications and has been licensed in his resident state.

6. Advertising should offer a product or service on its positive merits and refrain by identification or other means from discrediting, disparaging or unfairly attacking competitors, competing products, other industries, professions or institutions.

7. A sponsor's advertising messages should be confined within the framework of the sponsor's program structure. A television broadcaster should avoid the use of commercial announcements, which are divorced from the program either by preceding the introduction of the program (as in the case of so-called "cow-catcher" announcements) or by following the apparent sign-off of the program (as in the case of so-called trailer or "hitch-hike" announcements). To this end, the program itself should be announced and clearly identified, both audio and video, before the sponsor's advertising material is first used, and should be signed off, both audio and video, after the sponsor's advertising material is last used.

8. Since advertising by television is a dynamic technique, a television broadcaster should keep under surveillance new advertising devices so that the spirit and purpose of these standards are fulfilled.

9. A charge for television time to churches and religious bodies is not recommended.

10. Reference to the results of bona fide research, surveys or tests relating to the product to be advertised shall not be presented in a manner so as to create an impression of fact beyond that established by the work that has been conducted.

XI. Advertising of Medical Products

1. The advertising of medical products presents considerations of intimate and far-reaching importance to the consumer because of the direct bearing on his health.

2. Because of the personal nature of the advertising of medical products, claims that a product will effect a cure and the indiscriminate use of such words as "safe," "without risk," "harmless," or terms of similar meaning should not be accepted in the advertising of medical products on television stations.

3. A television broadcaster should not accept advertising material which in his opinion offensively describes or dramatizes distress or morbid situations involving ailments, by spoken word, sound or visual effects.

XII. Contests

1. Contests shall be conducted with fairness to all entrants, and shall comply with all pertinent laws and regulations.

Care should be taken to avoid the concurrent use of the three elements which together constitute a lottery—prize, chance and consideration.

2. All contest details, including rules, eligibility requirements, opening and termination dates should be clearly and completely announced and/or shown, or easily accessible to the viewing public, and the winners' names should be released and prizes awarded as soon as possible after the close of the contest.

3. When advertising is accepted which requests contestants to submit items of product identification or other evidence of purchase of products, reasonable facilities thereof should be made acceptable unless the award is based upon skill and not upon chance.

4. All copy pertaining to any contest (except that which is required by law) associated with the exploitation or sale of the sponsor's product or service, and all references to prizes or gifts offered in such connection should be considered a part of and included in the total time allowances as herein provided. (See Television Code, XIV.)

XIII. Premiums and Offers

1. Full details of proposed offers should be required by the television broadcaster for investigation and approval before the first announcement of the offer is made to the public.

2. A final date for the termination of an offer should be announced as far in advance as possible.

3. Before accepting for telecast offers involving a monetary consideration, a television broadcaster should satisfy himself as to the integrity of the advertiser and the advertiser's willingness to honor complaints indicating dissatisfaction with the premium by returning the monetary consideration.

4. There should be no misleading descriptions or visual representations of any premiums or gifts which would distort or enlarge their value in the minds of viewers.

5. Assurances should be obtained from the advertiser that premiums offered are not harmful to person or property.

6. Premiums should not be approved which appeal to superstition on the basis of "luck-bearing" powers or otherwise.

XIV. Time Standards for Non-Program Material

In order that the time for non-program material and its placement shall best serve the viewer, the following standards are set forth in accordance with sound television practice:

1. Non-Program Material

Definition: Non-program material, in both prime time and all other time, includes billboards, commercials, all credits in excess of 30 seconds and promotional announcements. Public service announcements and promotional announcements for the same program are excluded from this definition.

2. Allowable Time for Non-Program Material

(a) In prime time, non-program material shall not exceed 10 minutes in any 60-minute period.

Prime time is a continuous period of not less than three consecutive evening hours per broadcast day as designated by the station between the hours of 6 P.M. and midnight.

(b) In all other time, non-program material shall not exceed 16 minutes in any 60-minute period.

3. Program Interruptions.

(a) Definition: A program interruption is any occurrence of non-program material within any 30-minute program or within any 60-minute program.

(b) In prime time, the number of program interruptions shall not exceed two within any 30-minute program, or four within any 60-minute program.

Programs longer than 60 minutes shall be pro-rated at two interruptions per half-hour. The number of interruptions in 60-minute variety shows shall not exceed five.

(c) In all other time, the number of interruptions shall not exceed four within any 30-minute program period.

(d) In both prime time and all other time, the following interruption standard shall apply within programs of 15 minutes or less in length:

- 5-minute program—1 interruption;
- 10-minute program—2 interruptions;
- 15-minute program—2 interruptions.

NAB TV Code

(e) News, weather, sports and special events programs are exempt from the interruption standard because of the nature of such programs.

4. No more than four commercial announcements shall be scheduled consecutively within programs, and no more than three commercial announcements shall be scheduled consecutively during station breaks. The consecutive commercial message limitation shall not apply to a single sponsor who wishes to further reduce the number of interruptions in the program.

5. A multiple product announcement is one in which two or more products or services are presented within the framework of a single announcement.

A multiple product announcement shall be counted as a single announcement provided the same voice(s), setting, background, and continuity are used throughout so that the announcement appears to the viewer as one single announcement. Multiple product announcements not meeting this definition shall be counted as two or more announcements under this section of the code. This provision shall not apply to retail or service establishments.

6. The use of billboards, in prime time and all other time, shall be confined to programs sponsored by a single or alternate week advertiser and shall be limited to the products advertised in the program.

7. Reasonable and limited identification of prizes and donors' names where the presentation of contest awards or prizes is a necessary part of program content shall not be included as non-program material as defined above.

8. Programs presenting women's service features, shopping guides, fashion shows, demonstrations and similar material provide a special service to the public in which certain material normally classified as non-program is an informative and necessary part of the program content. Because of this, the time standards may be waived by the code authority to a reasonable extent on a case-by-case basis.

9. Gratuitous references in a program to a non-sponsor's product or service should be avoided except for normal guest identification.

10. Stationary backdrops or properties in television presentations showing the sponsor's name or product, the name of his product, his trade-mark or slogan should be used only incidentally and should not intrude on program interest or entertainment.

Interpretation of the Television Code No. 1, June 7, 1956, revised June 9, 1958 "Pitch" Programs

The "pitchman" technique of advertising on television is inconsistent with good broadcast practice and generally damages the reputation of the industry and the advertising profession.

Sponsored program-length segments, consisting substantially of continuous demonstration or sales presentation, violate not only the time standards established in the Code, but the broad philosophy of improvement implicit in the voluntary Code operation and are not acceptable.

No. 2 June 7, 1956 Hollywood Film Promotion

The presentation of commentary or film excerpts from current theatrical releases in some instances may constitute commercial material under the "Time Standards for Advertising." Specifically, for example, when such presentation, directly or by inference, urges viewers to attend, it shall be counted against the commercial allowance for the program of which it is a part.

No. 3, Jan. 23, 1959 Prize Identification

Aural and/or visual prize identification of up to 10 seconds duration may be deemed "reasonable and limited" under the language of Paragraph 7 of the "Time Standards of Advertising." Where such identification is longer than 10 seconds, the entire announcement or visual presentation will be charged against the total commercial time for the program period.

No. 4, March 4, 1965 Drinking on Camera

Paragraph 7, Section IX, "General Advertising Standards," states that the "advertising of beer and wine is acceptable only when presented in the best of good taste and discretion." This requires that commercials involving beer and wine avoid any representation of on-camera drinking.

NAB Radio Code of Good

Practices

Preamble

The radio broadcasters of the United States first adopted industry-wide standards of practice in 1937. The purpose of such standards, in this as in other professions, is to establish guideposts and to set forth minimum tenets for performance.

Standards for broadcasting can never be final or complete. Broadcasting is a creative art and it must always seek new ways to achieve greater advances. Therefore, any standards must be subject to change. In 1945, after two years devoted to reviewing and revising the 1937 document, new standards were promulgated. Further revisions were made in 1948, 1954, 1955, 1958, 1960, 1961, 1962, 1964, 1965, 1966 and 1967, and now there follows a new and revised Fourteenth Edition of The Radio Code of the National Association of Broadcasters.

Through this process of self-examination broadcasters acknowledge their obligation to the American family.

The growth of broadcasting as a medium of entertainment, education and information has been made possible by its force as an instrument of commerce.

This philosophy of commercial broadcasting as it is known in the United States has enabled the industry to develop as a free medium in the tradition of American enterprise.

The extent of this freedom is implicit in the fact that no one censors broadcasting in the United States.

Those who own the nation's radio broadcasting stations operate them—pursuant to this self-adopted Radio Code—in recognition of the interest of the American people.

The Radio Broadcasters' Creed

We Believe:

That radio broadcasting in the United States of America is a living symbol of democracy; a significant and necessary instrument for maintaining freedom of expression, as established by the First Amendment to the Constitution of the United States;

That its influence in the arts, in science, in education, in commerce, and upon the public welfare is of such magnitude that the only proper measure of its responsibility is the common good of the whole people;

That it is our obligation to serve the people in such manner as to reflect credit upon our profession and to encourage aspiration toward a better estate for all mankind; by making available to every person in America such programs as will perpetuate the traditional leadership of the United States in all phases of the broadcasting art;

That we should make full and ingenious use of man's store of knowledge, his talents, and his skills and exercise critical and discerning judgment concerning all broadcasting operations to the end that we may, intelligently and sympathetically:

Observe the proprieties and customs of civilized society;

Respect the rights and sensitivities of all people;

Honor the sanctity of marriage and the home;

Protect and uphold the dignity and brotherhood of all mankind;

Enrich the daily life of the people through the factual reporting and analysis of news, and through programs of education, entertainment, and information;

Provide for the fair discussion of matters of general public concern; engage in works directed toward the common good; and volunteer our aid and comfort in times of stress and emergency;

Contribute to the economic welfare of all by expanding the channels of trade, by encouraging the development and conservation of natural resources, and by bringing together the buyer and seller through the broadcasting of information pertaining to goods and services.

Toward the achievement of these purposes we agree to observe the following:

I. PROGRAM STANDARDS

A. News

Radio is unique in its capacity to reach the largest number of people first with reports on current events. This competitive advantage bespeaks caution—being first is not as important as being right. The following standards are predicated upon that viewpoint.

1. News Sources. Those responsible for news on radio should exercise constant professional care in the selection of sources—for the integrity of the news and the

consequent good reputation of radio as a dominant news medium depend largely upon the reliability of such sources.

2. News Reporting. News reporting shall be factual and objective. Good taste shall prevail in the selection and handling of news. Morbid, sensational, or alarming details not essential to factual reporting should be avoided. News should be broadcast in such a manner as to avoid creation of panic and unnecessary alarm. Broadcasters shall be diligent in their supervision of content, format, and presentation of news broadcasts. Equal diligence should be exercised in selection of editors and reporters who direct news gathering and dissemination since the nation's performance in this vital informational field depends largely upon them.

3. Commentaries and Analyses. Special obligations devolve upon those who analyze and/or comment upon news developments, and management should be satisfied completely that the task is to be performed in the best interest of the listening public. Programs of news analysis and commentary shall be clearly identified as such, distinguishing them from straight news reporting.

4. Editorializing. Broadcasts in which stations express their own opinions about issues of general public interest should be clearly identified as editorials and should be clearly distinguished from news and other program material.

5. Coverage of News and Public Events. In the coverage of news and public events the broadcaster has the right to exercise his judgment consonant with the accepted standards of ethical journalism and especially the requirements for decency and decorum in the broadcast of public and court proceedings.

6. Placement of Advertising. A broadcaster should exercise particular discrimination in the acceptance, placement and presentation of advertising in news programs so that such advertising should be clearly distinguishable from the news content.

B. Controversial Public Issues

1. Radio provides a valuable forum for the expression of responsible views on public issues of a controversial nature. The broadcaster should develop programs relating to controversial public issues of importance to his fellow citizens; and give fair representation to opposing sides of issues which materially affect the life or welfare of a substantial segment of the public.

2. Requests by individuals, groups or organizations for time to discuss their views on controversial public issues should be considered on the basis of their individual merits, and in the light of the contributions which the use requested would make to the public interest.

3. Programs devoted to the discussion of controversial public issues should be identified as such. They should not be presented in a manner which would create the impression that the program is other than one dealing with a public issue.

C. Community Responsibility

1. A broadcaster and his staff occupy a position of responsibility in the community and should conscientiously endeavor to be acquainted with its needs and characteristics in order to serve the welfare of its citizens.

2. Requests for time for the placement of public service announcements or programs should be carefully reviewed with respect to the character and reputation of the group, campaign or organization involved, the public interest content of the message, and the manner of its presentation.

D. Political Broadcasts

1. Political broadcasts, or the dramatization of political issues designed to influence an election, shall be properly identified as such.

2. They should be presented in a manner which would properly identify the nature and character of the broadcast.

3. Because of the unique character of political broadcasts and the necessity to retain broad freedoms of policy void of restrictive interference, it is incumbent upon all political candidates and all political parties to observe the canons of good taste and political ethics, keeping in mind the intimacy of broadcasting in the American home.

E. Advancement of Education and Culture

1. Because radio is an integral part of American life, there is inherent in radio broadcasting a continuing opportunity to enrich the experience of living through the advancement of education and culture.

2. The radio broadcaster, in augmenting the educational and cultural influences of

the home, the church, schools, institutions of higher learning, and other entities devoted to education and culture:

- (a) Should be thoroughly conversant with the educational and cultural needs and aspirations of the community served;
- (b) Should cooperate with the responsible and accountable educational and cultural entities of the community to provide enlightenment of listeners;
- (c) Should engage in experimental efforts designed to advance the community's cultural and educational interests.

F. Religion and Religious Programs

- 1. Religious programs shall be presented by responsible individuals, groups or organizations.
- 2. Radio broadcasting, which reaches men of all creeds simultaneously, shall avoid attacks upon religious faiths.
- 3. Religious programs shall be presented respectfully and without prejudice or ridicule.
- 4. Religious programs shall place emphasis on religious doctrines of faith and worship.

G. Dramatic Programs

- 1. In determining the acceptability of any dramatic program containing any element of crime, mystery, or horror, proper consideration should be given to the possible effect on all members of the family.
- 2. Radio should reflect realistically the experience of living, in both its pleasant and tragic aspects, if it is to serve the listener honestly. Nevertheless, it holds a concurrent obligation to provide programs which will encourage better adjustments to life.
- 3. This obligation is apparent in the area of dramatic programs particularly. Without sacrificing integrity of presentation, dramatic programs on radio shall avoid:
 - (a) Techniques and methods of crime presented in such manner as to encourage imitation, or to make the commission of crime attractive, or to suggest that criminals can escape punishment;
 - (b) Detailed presentation of brutal killings, torture, or physical agony, horror, the use of supernatural or climactic incidents likely to terrify or excite unduly;
 - (c) Sound effects calculated to mislead, shock, or unduly alarm the listener;
 - (d) Disrespectful portrayal of law enforcement;
 - (e) The portrayal of suicide as a satisfactory solution to any problem.

H. Responsibility Toward Children

The education of children involves giving them a sense of the world at large. It is not enough that programs broadcast for children shall be suitable for the young and immature. In addition, programs which might reasonably be expected to hold the attention of children and which are broadcast during times when children may be normally expected to constitute a substantial part of the audience should be presented with due regard for their effect on children.

- 1. Programs specifically designed for listening by children shall be based upon sound social concepts and shall reflect respect for parents, law and order, clean living, high morals, fair play, and honorable behavior.
- 2. They shall convey the commonly accepted moral, social and ethical ideals characteristic of American life.
- 3. They should contribute to the healthy development of personality and character.
- 4. They should afford opportunities for cultural growth as well as for wholesome entertainment.
- 5. They should be consistent with integrity of realistic production, but they should avoid material of extreme nature which might create undesirable emotional reaction in children.
- 6. They shall avoid appeals urging children to purchase the product specifically for the purpose of keeping the program on the air or which, for any reason, encourage children to enter inappropriate places.
- 7. They should present such subjects as violence and sex without undue emphasis and only as required by plot development or character delineation. Crime should not be presented as attractive or as a solution to human problems, and the inevitable retribution should be made clear.
- 8. They should avoid reference to kidnapping or threats of kidnapping of children.

I. General

- 1. The intimacy and confidence placed in radio demand of the broadcaster, the networks and other program sources that they be vigilant in protecting the audience from

deceptive program practices.

2. Sound effects and expressions characteristically associated with news broadcasts (such as "bulletin," "flash," "we interrupt this program to bring you," etc.) shall be reserved for announcement of news, and the use of any deceptive techniques in connection with fictional events and nonnews programs shall not be employed.

3. The acceptance of cash payments or other considerations for including identification of commercial products or services, trade names or advertising slogans including the identification of prizes, etc. must be disclosed in accordance with provisions of the Communications Act.

4. When plot development requires the use of material which depends upon physical or mental handicaps, care should be taken to spare the sensibilities of sufferers from similar defects.

5. Stations should avoid broadcasting program material which would tend to encourage illegal gambling or other violations of federal, state and local laws, ordinances and regulations.

6. Simulation of court atmosphere or use of the term "court" in a program title should be done only in such manner as to eliminate the possibility of creating the false impression that the proceedings broadcast are vested with judicial or official authority.

7. Quiz and similar programs that are presented as contests of knowledge, information, skill or luck must in fact be genuine contests, and the results must not be controlled by collusion with or between contestants, or any other action which will favor one contestant against any other.

8. No program shall be presented in a manner which through artifice or simulation would mislead the audience as to any material fact. Each broadcaster must exercise reasonable judgment to determine whether a particular method of presentation would constitute a material deception, or would be accepted by the audience as normal theatrical illusion.

9. Legal, medical and other professional advice will be permitted only in conformity with law and recognized ethical and professional standards.

10. Narcotic addiction shall not be presented except as a vicious habit. The misuse of hallucinogenic drugs shall not be presented or encouraged as desirable or socially acceptable.

11. Program material pertaining to fortune-telling, occultism, astrology, phrenology, palm-reading, numerology, mind-reading, character-reading, or subjects of a like nature, is unacceptable when presented for the purpose of fostering belief in these subjects.

12. The use of cigarettes shall not be presented in a manner to impress the youth of our country that it is a desirable habit worthy of imitation in that it contributes to health, individual achievement or social acceptance.

13. Profanity, obscenity, smut and vulgarity are forbidden. From time to time, words which have been acceptable acquire undesirable meanings, and broadcasters should be alert to eliminate such words.

14. Words (especially slang) derivative of any race, color, creed, nationality or national derivation, except wherein such usage would be for the specific purpose of effective dramatization such as combating prejudice, are forbidden.

15. Respect is maintained for the sanctity of marriage and the value of the home. Divorce is not treated casually as a solution for marital problems.

16. Broadcasts of actual sporting events at which on-the-scene betting is permitted should concentrate on the subject as a public sporting event and not on the aspects of gambling.

II. ADVERTISING STANDARDS

Advertising is the principal source of revenue of the free, competitive American system of radio broadcasting. It makes possible the presentation to all American people of the finest programs of entertainment, education and information.

Since the great strength of American radio broadcasting derives from the public respect for and the public approval of its programs, it must be the purpose of each broadcaster to establish and maintain high standards of performance, not only in the selection and production of all programs, but also in the presentation of advertising.

This code establishes basic standards for all radio broadcasting. The principles of acceptability and good taste within the program standards section govern the presentation of advertising where applicable. In addition, the code establishes in this section special standards which apply to radio advertising.

A. General Advertising Standards

1. A commercial radio broadcaster makes his facilities available for the advertising of products and services and accepts commercial presentations for such advertising. However, he shall, in recognition of his responsibility to the public, refuse the facilities of his station to an advertiser where he has good reason to doubt the integrity of the advertiser, the truth of the advertising representations, or the compliance of the advertiser with the spirit and purpose of all applicable legal requirements.

2. In consideration of the customs and attitudes of the communities served, each radio broadcaster should refuse his facilities to the advertisement of products and services, or the use of advertising scripts, which the station has good reason to believe would be objectionable to a substantial and responsible segment of the community. These standards should be applied with judgment and flexibility, taking into consideration the characteristics of the medium, its home and family audience, and the form and content of the particular presentation.

B. Presentation of Advertising

1. The advancing techniques of the broadcast art have shown that the quality and proper integration of advertising copy are just as important as measurement in time. The measure of a station's service to its audience is determined by its overall performance.

2. The final measurement of any commercial broadcast service is quality. To this, every broadcaster shall dedicate his best effort.

3. Great care shall be exercised by the broadcaster to prevent the presentation of false, misleading or deceptive advertising. While it is entirely appropriate to present a product in a favorable light and atmosphere, the presentation must not, by copy or demonstration, involve a material deception as to the characteristics or performance of a product.

4. The broadcaster and the advertiser should exercise special caution with the content and presentation of commercials placed in or near programs designed for children. Exploitation of children should be avoided. Commercials directed to children should in no way mislead as to the product's performance and usefulness.

Appeals involving matters of health which should be determined by physicians should be avoided.

5. Reference to the results of research, surveys or tests relating to the product to be advertised shall not be presented in a manner so as to create an impression of fact beyond that established by the study. Surveys, tests or other research results upon which claims are based must be conducted under recognized research techniques and standards.

C. Acceptability of Advertisers and Products

In general, because radio broadcasting is designed for the home and the entire family, the following principles shall govern the business classifications listed below:

- 1. The advertising of hard liquor shall not be accepted.
- 2. The advertising of beer and wines is acceptable when presented in the best of good taste and discretion.
- 3. The advertising of fortune-telling, occultism, astrology, phrenology, palm-reading, character-reading, or subjects of a like nature, is not acceptable.
- 4. Because the advertising of all products of a personal nature raises special problems, such advertising, when accepted, should be treated with emphasis on ethics and the canons of good taste, and presented in a restrained and inoffensive manner.
- 5. The advertising of tip sheets, publications, or organizations seeking to advertise for the purpose of giving odds or promoting betting or lotteries is unacceptable.
- 6. The level of cigarette advertising on radio will be reduced in progressive steps so that effective September 1, 1973, all cigarette advertising will cease on subscriber stations and networks. The base year of July 1, 1968-July 1, 1969 will be the measuring point for cigarette commercials. Each subscriber station and network will compute the total minutes of commercial time devoted to cigarette advertising during the base year.

Beginning January 1, 1970, each station and network will limit the total number of minutes available for sale to cigarette advertisers to the percentages of the base year minutes listed below:

Code, Talent Agents

Period Commencing	Percentage
January 1, 1970	90%
September 1, 1970	75%
September 1, 1971	50%
September 1, 1972	25%
September 1, 1973	0

Each subscriber station and network will be required to file with the NAB Code Authority the total minutes of commercial time in its base year and to file periodic reports of cigarette commercials carried in the succeeding years.

The advertising of cigarettes shall not state or imply claims regarding health and shall not be presented in such a manner as to indicate to the youth of our country that the use of cigarettes contributes to individual achievement, personal acceptance or is a habit worthy of imitation.

Note: All cigarette commercials on radio are banned after Jan. 1, 1971 under Public Law 91-222, signed April 1, 1970. This section was deleted by the Radio Board, prior to the passage of PL 91-222, with the president of NAB ordered to prepare a new section.

7. An advertiser who markets more than one product shall not be permitted to use advertising copy devoted to an acceptable product for purposes of publicizing the brand name or other identification of a product which is not acceptable.

8. Care should be taken to avoid presentation of "bait-switch" advertising whereby goods or services which the advertiser has no intention of selling are offered merely to lure the customer into purchasing higher-priced substitutes.

9. Advertising should offer a product or service on its positive merits and refrain from discrediting, disparaging or unfairly attacking competitors, competing products, other industries, professions or institutions. Any identification or comparison of a competitive product or service, by name, or other means, should be confined to specific facts rather than generalized statements or conclusions, unless such statements or conclusions are not derogatory in nature.

10. Advertising testimonials should be genuine and reflect an honest appraisal of personal experience.

11. Advertising by institutions or enterprises offering instruction with exaggerated claims for opportunities awaiting those who enroll, is unacceptable.

12. The advertising of firearms/ammunition is acceptable provided it promotes the product only as sporting equipment and conforms to recognized standards of safety as well as all applicable laws and regulations.

Advertisements of firearms/ammunition by mail order are unacceptable.

D. Advertising of Medical Products

Because advertising for over-the-counter products involving health considerations are of intimate and far-reaching importance to the consumer, the following principles should apply to such advertising:

1. When dramatized advertising material involves statements by doctors, dentists, nurses or other professional people, the material should be presented by members of such profession reciting actual experience, or it should be made apparent from the presentation itself that the portrayal is dramatized.

2. Because of the personal nature of the advertising of medical products, the indiscriminate use of such words as "safe," "without risk," "harmless," or other terms of similar meaning, either direct or implied, should not be expressed in the advertising of medical products.

3. Advertising material which offensively describes or dramatizes distress or morbid situations involving ailments is not acceptable.

E. Time Standards for Advertising Copy

1. The amount of time to be used for advertising should not exceed 18 minutes within any clock hour. The code authority, however, for good cause may approve advertising exceeding the above time standard for special circumstances.

2. The maximum time to be used for advertising allowable to any single sponsor beyond mention of sponsor's name and address at the opening and close of the program shall be:

5 minute program	1:30
10 " "	2:30
15 " "	3:00

3. Any reference to another's products or services under any trade name, or language sufficiently descriptive to identify it, shall, except for normal guest identifications, be considered as advertising copy.

4. For the purpose of determining advertising limitations, such program types as "classified," "swap shop," "shopping guides," and "farm auction" programs, etc., shall be regarded as containing one and one-half minutes of advertising for each five-minute segment.

F. Contests

1. Contests shall be conducted with fairness to all entrants, and shall comply with all pertinent laws and regulations.

2. All contest details, including rules, eligibility requirements, opening and termination dates, should be clearly and completely announced or easily accessible to the listening public; and the winners' names should be released as soon as possible after the close of the contest.

3. When advertising is accepted which requests contestants to submit items of product identification or other evidence of purchase of products, reasonable facsimiles thereof should be made acceptable. However, when the award is based upon skill and not upon chance, evidence of purchase may be required.

4. All copy pertaining to any contest (except that which is required by law) associated with the exploitation or sale of the sponsor's product or service, and all references to prizes or gifts offered in such connection should be considered a part of and included in the total time limitations heretofore provided. (See Time Standards for Advertising Copy.)

G. Premiums and Offers

1. The broadcaster should require that full details of proposed offers be submitted for investigation and approved before the first announcement of the offer is made to the public.

2. A final date for the termination of an offer should be announced as far in advance as possible.

3. If a consideration is required, the advertiser should agree to honor complaints indicating dissatisfaction with the premium by returning the consideration.

4. There should be no misleading descriptions or comparisons of any premiums or gifts which will distort or enlarge their value in the minds of the listeners.

WORRIED ABOUT THE WORLD WE LIVE IN? WHO ISN'T!

That's what makes

OUTDOORS with Bill Clede the most listenable and saleable program that puts "matters of great public concern" in your front line. On top of the news of environmental problems, Bill Clede gives you weekly updates on what's happening NOW.

A nationally known outdoor newsmen covering this beat for 15 years, he's seen the problems develop. Now he's backed by a team of consulting ecologists to translate technical terminology into layman's language.

And he transports the listener to outdoor adventure all over America.

OUTDOORS with Bill Clede is available as a five-program weekday strip or one-a-week outdoor feature, each program 3:30-timely and topical. Call or write:

Our music speaks everybody's language

A lot of European hit songs rise
to the top of the charts in the U.S.A.
72% of the ones that have since 1960
are licensed by BMI.
Call us the Transatlantic Hitmaker.

All the Worlds of Music for All of Today's Audiences

YOU LEARN A LOT IN 44 YEARS

Storer Broadcasting has learned a few things over the years. We hope we never forget them.

We've learned that the most important element in a station's success is a responsive, continually building audience with confidence in a broadcaster's integrity and credibility. We've learned that the best way to develop such audiences is to become sincerely involved in the communities our stations serve—in the problems, the aspirations, the undertakings, the achievements, even the failures, when the objectives are worthwhile.

All this is not entirely out of charity. There's a tangible reason, too. The more effective we are in our communities, the more effective we are for our advertisers, the more

effective we are for ourselves. Our "most important product" is our audience and community reputation. We've worked at it for 44 years and plan to continue working at it as good neighbors, involved friends and effective broadcasters. That way everybody wins.

ABC Radio Network Rates

The rates shown below are for fixed-position minutes. The first figure in each case is for one minute scheduled from one to 12 consecutive weeks; the second is for one minute scheduled for 52 or more consecutive weeks (between these extremes are graduated

prices, again based on length of contract). Prices for 30-second units and combinations of 60's and 30's are somewhat less than those shown for 60's. Rates are based on 100% coverage of total U.S. retail sales and are adjusted to coverage of less than 100%. Rates for a number of features are set separately and are available from ABC on request.

American Contemporary Radio Network: \$2,500; \$2,250.

American Information Radio Network: \$1,500; \$1,350.

American Entertainment Radio Network: \$1,250; \$1,125.

American FM Radio Network: \$650; \$585.

ABC-TV NETWORK RATES

Below are gross rates for Class A hours: Class A time is 6-11 p.m., Sunday through Saturday. Class C time (50% of Class A rate) is 11 p.m. to sign-off Sunday through Saturday, 9 a.m. to 6 p.m. Saturday and Sunday, and 5-6 p.m. Monday through Friday. Class D time (33.3% of Class A rate) is daytime hours up to 5 p.m. Monday through Friday, except for special programs on national holidays, which are charged as Class C. Rates for each period of time of less than one hour are figured at the following percentages of the hour rate: half hour—60%; quarter hour—40%; one-third of an hour—40%; two-thirds of half-hour—40%; one-third of half-hour—20%; one-sixth of hour—20%.

ABC has no must-buy list of basic stations. Its rate card states "Advertisers are required to purchase for each program a minimum cleared gross for station time equivalent to \$100,000 for each Class A hour telecast."

#Limited live service (limited live service stations are subject to change in classification).

##Unless advertiser is notified to the contrary, this station will schedule for simultaneous telecast the network program carried by the ordered associated station, without additional charge.

(1) WSVI-TV Christiansted, V. I. and ZFB-TV Hamilton, Bermuda, are subject to an additional charge for shipping and handling.

A listing for CBC stations will be made available by ABC on request.

Canadian stations are not subject to ABC discounts or rebate. Special frequency and group discounts allowed by CBC will be given on request. Rate classification and percentage of the hour are not the same as the ABC Television rates and percentages. All other charges (such as microwave, CBS kinescope recordings, sales tax, distribution, telecine rehearsal, editing, importation, cuts, production and facilities services for commercial messages and billboards, etc.) will be billed to the agency by CBC. Canadian telecasts are payable in Canadian currency.

The thousands of Main Streets located beyond the major metropolitan areas account for nearly one-third of the nation's annual retail sales of \$340 billion.

Small market radio stations are the dominant media in this important market.

Keystone Broadcasting System, with over 1,100 affiliated Non-Metro, small market radio stations has specialized in serving this market for nearly 30 years.

The current KBS Station List contains

more data on small market radio than is provided by any wired network or representative firm, including individual Pulse '68 Circulation data for each of the 1,100 plus affiliates. Print-outs on network demographics are available by state, region, or the entire list of affiliates.

The Pulse report shows that Keystone affiliates serve 2,101, or 77% of the Non-Metro counties accounting for 19 million homes with a potential of 49,780,500 listeners weekly.

Voice of America Fact Sheet

The Voice of America, a part of the U. S. Information Agency, has the following directive: "The long-range interests of the United States are served by communicating directly with the peoples of the world by radio. To be effective, the Voice of America must win the attention and respect of listeners. These principles will govern VOA broadcasts:

"1 VOA will establish itself as a consistently reliable and authoritative source of news. VOA news will be accurate, objective and comprehensive.

"2 VOA will represent America, not any single segment of American society. It will therefore present a balanced and comprehensive projection of significant American thought and institutions.

"3 As an official radio, VOA will present the policies of the United States clearly and effectively. VOA will also present responsible discussion and opinion on these policies."

Implementation of this directive has re-

sulted in approximately half of the word output being devoted to news and news related items such as news analyses, commentaries, and press reviews. The other half consists of round-table discussions, documentary programs, features and special events covering American political, economic, social and cultural topics so as to provide overseas audiences a balanced and accurate concept of the United States and clear information regarding United States policies. The VOA also broadcasts music programs.

Facilities

The Voice has a network of 109 transmitters, of which 41 are in the continental United States. These are short wave, medium and long wave stations ranging in power from 35 kw to 1,000 kw, owned and operated by the USIA. The largest transmitter complex is at Greenville, N.C. There 18 transmitters feed programs received via micro-wave from the Washington studios to audiences and relay bases abroad over 73 directional antennas. Total power at Greenville is 4,800 kw. Other domestic facilities are at Bethany, Ohio; Marathon, Fla. (MW); Delano and Dixon, both California.

Overseas relay stations are at: Munich, Germany; Thessaloniki and Rhodes, Greece; Tangier, Morocco; Monrovia, Liberia; Okinawa; Tinang and Poro, the Philippines; Wofferton, England; Colombo, Ceylon; Bangkok, Thailand; Hue, Vietnam. These include short, medium and long wave transmitters among which are four one-megawatt transmitters.

In addition to its network of fixed transmitters, the Voice has seven transportable transmitters. These are all 50 kw, six shortwave and one medium wave. They are designed to be moved quickly, to wherever they are needed by land sea or air. The medium wave transportable transmitter is on Marathon Key, Florida, broadcasting Spanish language programs to Cuba. The six shortwave transportables are in the Philippines, where they augment existing facilities in relaying Voice programs to Southeast Asia and the Far East. An additional station is under construction in Northern Greece. When it is completed in FY 1972, the short, medium and long wave facilities of VOA will total 23,000 kw.

Local Placement

Many VOA transcribed programs, music recordings and script material are furnished by U.S. Information Agency offices throughout the free world for local distribution and broadcast. Other relays and rebroadcasts are made through arrangements with local broadcasters in West Europe, Africa, the Near East, South Asia, the Far East and Latin America. Currently some 4,000 stations overseas are rebroadcasting more than 15,000 hours of USIA programming weekly.

RIAS

In West Berlin the USIA operates RIAS (Radio in the American Sector), which broadcasts an average of 240 hours per week in German over medium and short wave facilities as well as FM. Its purpose is to reach the population of East Berlin and East Germany.

Audiences

The USIA estimates its current world radio audience is in the range of from 17 to 26 million on an average day, and about double that amount for an average week. During times of international crisis, or such special events as an American space mission, the audience increases considerably. For example, during the Apollo 11 mission it is estimated the VOA's total audience probably exceeded 750 million—or 27% of the world's population outside the United States. During the eight-day flight VOA's direct broadcasts were relayed or rebroadcast by more than 3,600 foreign stations, including 888 TV stations and 39 major national and international broadcasters.

Jamming

USSR jamming of VOA vernacular language broadcasts to the USSR and East Europe began in 1948 and continued until 1963. Other East European countries began jamming in 1950. Except for Poland which stopped jamming in 1956 and Bulgaria which has continued to jam, Czechoslovakia, Hungary and Romania ceased jamming VOA broadcasts shortly after the USSR. Coincident with the invasion of Czechoslovakia (August 21, 1968) the Soviet Union resumed jamming of VOA's broadcasts in Armenian, Georgian, Russian and Ukrainian. By May 1969 this jamming again was intensive.

The Chinese Communists began jamming the VOA Chinese broadcasts in 1956, and this continues to increase in intensity. From

time to time, VOA broadcasts in Spanish and Arabic have been subjected to a limited jamming effort by Cuba and the UAR respectively.

Network affiliates groups, before FCC, see costs of ground stations exceeded by fees—8/24/70.

Federal Communications Commission:

■ (Among major groupings under FCC are Fairness-Personal Attack and Ex-Parte; contesting or "strike" applications appear in several places, principally in the category, Concentration of Control under Media, also in Civil Rights and Broadcaster-Government Relations, and still other related items can be found in this, the FCC section).
 ■ Ex Parte: Concerns issues alleged to have involved directly or otherwise off-the-record contacts between applicants for broadcast licenses and individual FCC commissioners. Some of these are in the background of the following, from Sept. 1, 1969, to Aug. 31, 1970:
 ■ Complainants in KRON-AM-TV San Francisco license-renewal case defend FCC Commissioner Nicholas Johnson from alleged ex-parte activities—9/15/69, broadcaster calls on Commissioner Johnson to disqualify himself from Georgia renewal considerations—10/13/69 and NAB's Wasilewski sees removal tactics making a martyr of commissioner—10/27/69.
 ■ FCC reminds communications industry of its ex-parte rule, as KCST(TV) San Diego is charged with ex-parte activity by Tijuana station—3/9/70, station savagously such intent—3/16/70, FCC review board dismisses ex-parte plea—5/18/70, but FCC reconsiders 5/25/70.
 ■ In cases related initially to ex-parte allegations, hearing examiner recommends award of Orlando (Fla.) channel 9 to Mid-Florida Television Corp., interim joint operator—6/8/70, and long dispute over Jacksonville, Fla., channel 12 appears settled in applicants' accord—6/29/70, but FCC's Broadcast Bureau opposes it—8/17/70.
 ■ Fairness-personal attack doctrines (ongoing issues, and FCC-imposed, they appear mostly in this section though some overlapping occurs with references in News and Political Broadcasting in Programming category):
 ■ FCC says remarks by soul singer James Brown about two other entertainers on Mike Douglas Show did not constitute personal attacks—9/8/69; request by monosodium-glutamate manufacturers for time to present another viewpoint of food additive gets some favorable responses—11/3/69; West Coast attorney requests fairness for recruiting spots—12/15/69.
 ■ FCC upholds Broadcast Bureau's rejection of Dr. Tillson fairness complaint against WHAM(AM) Rochester, N.Y., and WRG-TV Buffalo—1/19/70.
 ■ Antiwar business group charges anti-fairness of WTOP-AM Washington in refusing to carry spots—2/2/70, new challenge comes up in San Francisco area—2/23/70. FCC finds fairness met in NET, CBS and WMAL Washington cases involving hunger, China and Vietnam controversies, respectively—3/9/70.
 ■ FCC raps KING-TV Seattle for apparent fairness violation in coverage of school-budget item—3/2/70; renews Paradise, Calif., AM for short-term (station was target of local citizens' fairness complaint)—3/16/70.
 ■ Baltimore peace group asks FCC for anti-military time under fairness doctrine—3/23/70; complaints of personal attack and fairness violations against KTRG(AM) Honolulu result in renewal hearing sched-

uled—3/23/70.
 ■ FCC airs WXUR Media, Pa., renewal issues (from its start, this long-standing case had fairness-personal attack as central issue and was among original cases that led to Supreme Court decision of June 1969 [6/16/69]—4/6/70, orders AM-FM off air—7/6/70, 7/13/70, stations ask for reconsideration—8/10/70).
 ■ FCC staff finds NBC violated fairness in three Huntley-Brinkley newscasts on aviation problems—4/6/70.
 ■ FCC moves to tighten up on fairness, proposes broadcasters seek out contrasting views in speaking out—5/18/70, meets with cool reception of broadcasters—6/29/70.
 ■ In FCC comment on fairness, antiwar groups lose bid to reply to recruiting spots—6/8/70.
 ■ NAB sees FCC fairness proposal as too rigid—7/6/70.
 ■ FCC sets hearing on KAYE(AM) Puyallup, Wash., object of citizens' complaints over personal attack and fairness—7/27/70.
 ■ Commissioners (though personalities of individual FCC commissioners may not "dominate" the agency, they most certainly help to provide FCC watchers with added perspective):
 ■ Rosel Hyde retires as FCC chairman and praised as chairman called to lead in era of mavericks—11/3/69, becomes consultant in proposed Corinthian merger with Dun and Bradstreet—12/29/70.
 ■ It is Dean Burch as new FCC chairman, Robert Wells as a new member—9/1/70, nominations in—9/2/69, Burch is interviewed in Tucson—9/6/70, Senate committee hears nominations—10/20/69, approves, and they are sworn in at FCC—11/3/69.
 ■ New chairman (Dean Burch) takes over FCC, sets tough pace—11/10/69, defends broadcast journalism at duPont-Columbia awards ceremony, and also Vice President Agnew's right to express views on news objectivity—11/17/69, holds first news conference, indicates hands-off attitude on programming and flexibility on multimedia ownership—12/8/69.
 ■ Burch and Commissioner Johnson square off verbally over FCC order approving \$150-million long-distance phone rates—1/5/70, again as Commissioner Johnson takes strong line in KRLD-TV sale—5/4/70.
 ■ Chairman Burch suggests sweeping review of agency's procedures in appearance before Federal Communications Bar Association—1/19/70, and blue-ribbon review panel is set—1/26/70; FCC takes cue from new leadership and buckles down—1/26/70; Burch dissents in denial of Mishawaka, Ind., bid for CP of AM—3/2/70; in his first NAB address, Chairman Burch labels himself "restrained regulator," says he'll demand best of broadcasters, especially in children's programming—4/13/70; predicts cooling-off period for commission—7/13/70, confirms key staff changes expected to be Francis Walsh and Richard Wiley—7/13/70; chides press for carelessness in reporting fairness issue—8/24/70.
 ■ Commissioner Wells points up common troubles—and excuses—in broadcasting business—2/9/70, suggests FCC be reorganized, at least at the top—3/9/70, suggests broadcasters use media as "unifying force"—5/11/70, they end "minor skirmishes" and face gut issues—8/17/70.
 ■ FCC Commissioner Nicholas Johnson appears on two network shows and before Congressional group to air his critical views; Loewinger is proposed to answer him—9/22/69, NAB's Wasilewski pans "Nick Johnson Show"—10/6/69, and NAB's Walbridge goes on CBS show—12/1/69.

INTERNATIONAL RADIO-TV

The country-by-country information presented below is compiled from various authoritative sources, both official and unofficial. Every effort was made to provide information as up-to-date as possible, but information derived from official government reports, in particular, sometimes tends to be delayed. For the most part, however, the information below is based on reports of the situation as it existed in the first half of 1970.

Aden

One TV station, government-controlled and commercial, services 16,000 TV sets. South Arabian Television Service, Box 1264, Aden.

Argentina

About 31 TV stations serve 3 million sets. Government, which operates one of four stations in Buenos Aires, licenses channels on one-to-a-customer basis and does not permit simultaneous networking, although stations outside Buenos Aires may buy and present recordings of programs after their Buenos Aires Presentation.

Australia

Broadcasting is under dual system, with government operating noncommercial stations and other entities commercial. Commercial radio stations reported at about 110, noncommercial radio at 69. In TV, 43 were operating commercially, while government (Australian Broadcasting Commission) had 39 noncommercial stations in operation. Receiver licenses, required by government, as of June 1969 numbered 2,700,000 for radio-TV combinations. Governing body is Australian Broadcasting Control Board (373 Elizabeth St., Melbourne, C.I. Victoria), headed by Miles Wright, chairman.

TV service includes one government, non-commercial station and one to three commercial stations in 33 areas. Commercial stations follow general U.S. format, selling up to six minutes each hour plus station-break time. Spot messages range from I.D. to one-minute; and sponsored programs range from five-minute news to 15, 30 and 60 minute shows. Co-sponsorship permitted in series or as half-sponsorship with spots available.

Four major TV networks: Australian Television Network, National Television Network, Independent Television System and noncommercial Australian Broadcasting Commission.

You can just call it a "Special"
or you can really make it "SPECIAL"

Which is what NBC is doing—in a particularly big way—this current season.

The "star specials" showcase very special stars, indeed: Jack Benny, Carol Channing, Bing Crosby, Peggy Fleming, Goldie Hawn, Arte Johnson, Dick Van Dyke and John Wayne. To drop a few names.

The drama specials include TV productions of such distinguished works as Paddy Chayefsky's "Gideon" (starring Peter Ustinov and Jose Ferrer), Arthur Miller's "The Price" (starring George C. Scott, with Barry Sullivan and Colleen Dewhurst), and Shakespeare's "Hamlet" (starring Richard Chamberlain, Sir Michael Redgrave and Sir John Gielgud).

And the spectacles are truly spectacular: like the Miss America Pageant, the Tournament of Roses Parade, Macy's Thanksgiving Day Parade and the Orange Bowl Parade.

In short, there are Specials and then there are SPECIALS. This season, if it's truly out-of-the-ordinary, you're likely to find it on NBC.

NATIONAL BROADCASTING COMPANY

The longest running, most successful program in broadcasting history has surprise, suspense, humor, heart...and every AP Member has it all.

That's right, you have it all in your news programming...including over 3300 AP staffers working for you everywhere in the world, backed by cooperation and contributions by more than 3250 fellow AP Members in every state in the union. It started back on November 2, 1920, when radio station KDKA, Pittsburgh carried the AP Harding/

Cox election results. That was the first news broadcast in history. Now a half century later, while everything else comes and goes with the fashion, news programming is still as fresh, exciting and important to your audience as today's stories coming over the AP wire right now. You've got it all with faster, more accurate AP.
