College or University Campus-Limited Radio Stations in the U.S.

The following college or university campus-limited stations are operated principally by students enrolled in the schools. Their transmission is by radiation, and reception is limited generally to on-campus listening. College stations with 10 w or more power are listed in the Directory of AM and FM stations, page B-3. IBS indicates affiliation with Intercollegiate Broadcasting System. IBS is a division of the National Assn. of College Broadcasters. See Associations, page E-35. Station affiliation is listed beside the call letters.

Plug into \$63,000 savings

Savings with the new Norelco triax cable cameras are immediate and substantial. Our \$63,000 figure is a *conservative* estimate, calculated by determining such normal (and inevitable) costs as initial outlay for cable, set-up and strike, cable repair and storage, and depreciation, and extending the good news over a five year period. We repeat, \$63,000 is conservatively estimated. In checking our cost figures against your own, it is almost a certainty that you will arrive at an even greater saving. For the down-to-earth facts, send for our paper, "The Economics of Triaxial Cable Color Television Cameras." It will allow you to define *your* savings in detail.

Norelco PC-100A...the only camera with A.C.T. Plumbicon* tubes ... solve high-contrast problems at the source.

Here's the camera that introduced two revolutions in color television. A cable revolution—using light, low-cost triaxial cable. And a tube revolution with the new Anti-Comet-Tail "A.C.T." Plumbicon.

A new gun design gives the A.C.T. Plumbicon tube an unprecedented dynamic range (inherent overbeaming capability equivalent to five or more f-stops overexposure) with no washout or loss of detail even in action scenes with brilliant highlights and deep shadows. It's standard in the PC-100A, and the contrast problem is defeated at the source . . . not partially offset through complicated, costly, extra-option hardware. As a bonus, the A.C.T. tube handles low-light situations with matchless fidelity.

This is the camera that stunned every audience at NAB with its remarkable reliability . . . with quick, easy assembly . . . three and one-half minute cable butting . . . and sparkling color pictures that were called "the best color television picture ever achieved."

Norelco PCP-90B...the only broadcast-quality portable. It operates RF fully system-integrated Triax system-integrated Backpack-to-VTR fully N. T. S. C.

This is the tried and proven hand-held color camera that is enabling broadcasters and production firms to go where they never went before, get pictures never before attainable.

Part and parcel of the Norelco camera revolution, the PCP-90B is adding daily to its illustrious record of getting the action—anywhere and anytime—and getting it in faithful, crisp Norelco color.

Best of all, the PCP-90B operates on triaxial cable to afford the same kind of day-in and day-out savings now possible with the PC-100A. When it isn't on a remote, the three-Plumbicon PCP-90B doubles as a studio camera. Truly far-out mobility comes with the camera's optional microwave link; great examples are the widely acclaimed helicopter applications of this unique broadcast-quality camera. It is the most versatile camera available, and can be fielded as a self-contained battery-operated camera with a portable video tape recorder to record the action. And remember, you get all these revolutionary advantages on top of tremendous operational dollar savings.

†Write on your letterhead for our detailed report, "The Economics of Triaxial Cable Color Television Cameras." Plug in your figures and compute your short- and long-term savings.

Buyer's Guide to Equipment

Radio and television broadcast equipment and services are listed here at the special request of each company in an easy-to-use alphabetical directory. Each product or service appears in bold face type with the companies supplying that service following in alphabetical order.

To locate the headquarters, or nearest sales office, of any listed manufacturer or service, simply turn to the company's alphabetical listing in Section C, the Broadcast Equipment Directory. That listing includes address, principal executives, branch offices and telephone numbers.

Firms preceded by an asterisk and appearing in capital letters are advertisers in the 1972 BROADCASTING Yearbook.

MULTRONICS®

Your No. 1 source for Antenna Systems & Components

CUSTOM-DESIGNED PHASOR SYSTEMS Full phasing systems, couplers and AC control circuits are custom designed to meet your exact station requirements. We can also offer full financing if required. For any phasing needs, Multronics will be pleased to quote the optimum system required for your pattern.

HI-Q RF INDUCTORS Our RF Inductors provide unmatched stability for systems requiring impedance matching, phase shifting, power dividing and filtering. Typical inductors range from 15 to 100 ampere current handling capability, inductance values from 6 to 620 microhenries, and special units built to meet specific requirements. Our expansive line of MULTIFILAR RF inductors provide higher inductance and current handling capacities in minimum size configurations. All are suited for motor-driven applications in remote-controlled systems.

RF CONTACTORS A wide choice of rugged, recoil- and corona-free multi-pole contactors are available for high voltage RF switching. All feature strong Melamine construction for extra ruggedness and ease-of-maintenance. Ideally suited for RF applications in the VLF, LF, MF and HF ranges, they are rated from 208 to 240 VAC capability (24KV and 40KV models available).

In addition to: Folded Unipole Kits Meter Switch Assemblies Phase Sampling Loops J-Plugs (test jacks) Plug-in Meter Boards Isolation Inductors Limit Switch Assemblies for controlling motor-driven variable inductors and vacuum capacitors.

FIM-21 Field Strength Meter, 535 KHz to 1605 KHz Lightweight, easy-to-use, the '21' is the new solid state replacement for the time-proven Nems-Clarke FIM-120 (RCA WX-2). Using six standard D cells, the unit features a ceramic IF filter, ganged osc/receiver tuning, front panel speaker and illuminated meter and dial. Field strength values between 10 microvolts/Meter and 10 volts/Meter. An external RF input jack is provided for tunable voltmeter applications.

FIM-41 Field Strength Meter. 540 KHz to 4.8 MHz This lightweight unit measures AM broadcast harmonics to -80db. Exceptionally stable over a wide temperature range, it includes the same features as the Model FIM-21. Exceptionally easy to use, it is particularly well suited for transmitter 'proof-of-performance' reporting as defined by FCC Rule 73.47(a)(5).

AM-19 Antenna Monitor The basic instrument for measuring phase and loop current ratio, the AM-19 can monitor up to 12 towers and accommodate DA-1, DA-2 and DA-3 patterns. Phase meter resolution is 0.5 degrees. Loop current accuracy is $\pm 1.5\%$ with a 0.5% resolution.

The **AM-19-D** offers digital readout of phase angle and loop current ratio to provide phase and current resolutions of 0.1 degree and 0.1% respectively.

MINIMUM DOWNTIME

Each unit undergoes more than 100 hours cumulative testing ■ Typical parts shipment from factory service department - under 48 hours ■ Easy access plug-in modules for instant servicing ■ Patented electromagnetic brakes never need adjusting ■ Simple transports - only 9 or 10 moving parts, all solenoid operation ■ Superior tape head contact plus light tape tension for low head wear

MAXIMUM LIFETIME

Design lifetime is 10 years continuous use or 65,000 hours, with three service check-ups ■ Construction "rugged enough to withstand parachute drops" (AUDIO magazine) ■ Top-grade components such as silicon transistors and tantalum capacitors ■ One of the two remaining original American tape recorder manufacturers; still supplying parts and service for broadcast units 15 years and older

MAXIMUM PERFORMANCE

Computer logic controls provide rapid fool-proof tape handling, safe popless remote control, prevent broken tapes ■ Best frequency response among all recorders, pro or semi-pro, and the only one that's guaranteed ■ Every unit shipped with its hand-entered proof-of-performance report

Speed	Response-Hz	S/N	Wow
15 ips	+2db 40-30K	-60db	0.06%
7½ ips	+2db 20-20K	-60db	0.09%
3¾ ips	+2db 20-10K	-55db	0.18%

MAXIMUM FLEXIBILITY

Bias metering and adjustment; record and play equalization switching ■ 2 line level inputs per channel and a 600-ohm line output for each channel ■ Third head monitor with A/B switch ■ At-the-head editing plus cue lever ■ Full line of 1, 2 and 4-channel recorders and players ■ From the mono SX711 at \$895 to the stereo CX822 with typical options at \$2300, you can pay less for a semi-pro recorder, and replace it every couple years . . . or pay more for a wide-tape mastering machine, and get no better performance. It's your choice. To help you make it, we'll be glad to send you full technical data with performance graphs.

BBC TEST CHART NO 57 Colour Camera grey scale

- ★ Excellent neutrality
- ★ Step wedge contrast range of 40:1
- ★ Contrast range of super black cavity over 100:1
- ★ Built-in gamma exponent approximately 2.4
- ★ Matt finish eliminates specular reflection
- ★ Strong construction of 2.2 cm block board with heavy duty plastic cover
- ★ Peak white of 60% selected to give optimum reproduction of flesh tones
- ★ Size 51 x 66 cms

Now used by leading European Broadcasting authorities as a standard for setting up colour cameras. The BBC Test Chart No. 57 has been developed by Royle in close co-operation with the Research Department of the British Broadcasting Corporation to meet the demand for a professional quality standard grey scale suitable for use with all types of colour cameras.

The new test chart incorporates advanced features that provide a critical test of colour camera performance hitherto only available from 'one off' laboratory prepared charts.

By special arrangement with the BBC we are now able to offer this new test chart as a standard reference for general use by all Broadcasting Authorities and Equipment Manufacturers.

THE DELTA TRIO

for optimum monitoring of your antenna system

Model OIB-1 Operating Impedance Bridge measures "in circuit" impedance of networks, transmission lines and antennas. Accuracy $\pm 5\% \pm 1 \text{ Ohm}$. 5kW Power rating-VSWR 3:1.

Model CPB-1 Common Point Bridge measures resistance to $\pm 2\% \pm 10 \text{ Ohm}$ at full power.

Model RG-1 Receiver/Generator combines a high output power signal generator with a shielded receiver for use with Model OIB-1 or any other impedance bridge.

With this "Delta Trio", you can either "spot check", or continuously and accurately monitor actual "on-the-air" operating impedance of transmission lines, networks and antenna systems to maintain a "clean signal" at peak operating efficiency.

If you're operating with a directional antenna, there's real value in being able to keep the radiating system in close adjustment at all times...continuously verify common point impedance to insure full power output...plus locating and correcting any antenna problems—fast!

Complete details and application data are available without obligation—just write or call Bill Cottles, DELTA ELECTRONICS, INC., 4206 Wheeler Avenue, Alexandria, Va. 22304 (703) 751-3133.

... meet the AEL FM-2500 watt and FM-1000 watt transmitters.

Here are the newest members of the AEL Advanced Equipment Line with the answer to efficient, economic Class A operation (up to 3kw ERP).

High transmitter power, low antenna gain or low transmitter power, high antenna gain (you name it) AEL offers solid state reliability, easy accessibility and high quality standards of production.

FEATURING:

- full 2500 or 1000 watt power output
- automatic recycling
- mid-cabinet metering
- circuit breaker protection
- remote control provisions
- single phase power supply

The FM-2.5KD and FM-1KD Transmitters have the built-in capabilities to give you true Sound Fidelity for the Seventies.

SA100

SYANTIFIC 

REMOVES

- ★ Finger Grease
- ★ Nicotine Stain
- ★ Bacteria
- ★ All Types of Dirt Particles
- ★ Leaves Records Clean & Dry
- ★ Ready to Play in 45 Sec.

Operation:

Method of Operation

By pressing the fluid applicator, solution is applied to the disc and evenly distributed by the brush over the entire grooved portion of the record. The solution dissolves or loosens all pollutant factors e.g. finger grease, nicotine stain, and dirt particles within only a few seconds of application. The suction head is then placed in the center of the disc and will proceed to travel outwards. The nozzle is held on the record by its own suction and in the tracking operation will pass over each groove, not once, but three times, vacuuming off the cleaning fluid along with dirt particles.

SA 100 \$595.00 Broadcaster net

NEW SA75

225.00

BROADCASTER NET

The SA 75 works identically to the SA 100 however is a simplified design. An additional feature on the unit is a vacuum gauge readout which continually checks the vacuum system for leaks or inefficient working pressure. The SA 75 was developed from the very successful SA 100 series and was designed to meet the demand for a low cost efficient record cleaning system. All Syantific Audio record cleaning machines are designed to rid the broadcaster of the clicks, pops and high surface noise due to polluted records. Tracking is also improved along with a drastic increase in stylus life.

Radio-TV Station Employment

In this table, groupings of full-time staffs of radio and television stations have been made. Percentages of the total reporting stations employing a given number of people are shown. For example, in the United States, 3.2% of all reporting television stations and 14.3% of all reporting AM radio stations employ full-time staffs of from one to five persons.

Figures in parentheses are cumulative to a given point on the chart. For example, in the U.S., 7.3% of reporting television stations and 52% of reporting AM radio stations employ full-time staffs of 10 or less persons. U.S. figures are derived from totals of 1,976 AM stations, 434 FM stations and 345 television stations; Canadian figures are from 79 AM and FM's, and 16 TV's.

CONSIDERING AUTOMATION?

Consider Full Spectrum Automation from Broadcast Products! Versatile, flexible and completely station-proved for unmatched accuracy and dependability, our automation systems are designed to meet your own AM or FM format.

Whether you're Rock, Live Sound C&W, Hit Parade, Good Music FM or MOR . . . Broadcast Products has *the* automation system for you. All systems are solid-state—and designed on a modular basis allowing you to custom-build automation on an as-you-grow basis . . . to meet present and future requirements.

Our wide range of system types, capabilities and plug-in modular components is unmatched in the industry. Whether you require a 'mini' stereo system handling up to 8 inputs for under \$6000 . . . or full-capability 24-hour automation featuring direct-access MOS "pushbutton" programming with complete random select, English printout logging and computer billing . . . Broadcast Products has it *now!* If you're already automated, we also have the right add-on components to upgrade any system now in use.

If you're considering automation, whether a new system or upgrading an older one, be selective. Look before you buy. Investigate the full range of automation systems and components from Broadcast Products.

**. . . just wait 'til you
see ours!**

Free loan-for-trial.

Free repairs for the first two years, no matter what happens.

Plus a lifetime guarantee.

We're very confident. But then we've been offering all this for years!

E.V. A careful study of guarantees can tell you quite a bit about a company. And that's why we're so proud of ours. For instance, every E-V Professional-line microphone has a 2-year UNCONDITIONAL warranty against malfunction; regardless of cause. Even accidental damage is covered, no questions asked. All absolutely free—except one-way postage. And for a modest charge we'll even hide the scars!

But that's just part of the story. Every

Electro-Voice microphone is also guaranteed for the life of the unit to be free from factory defects in workmanship and materials. To show you we're really serious, we've printed the entire guarantee below. There's no finer in the industry.

How can we afford such liberal guarantees? By making products that have served for decades as the yardstick of reliability in studios throughout the world. And by creating designs that really solve your sound problems, day after day.

Which brings us to our other unusual offer.

Did you know that most Electro-Voice distributors will loan any E-V Professional product to responsible firms for trial without cost or obligation? You can make every test you want under actual working conditions. And in the rare event that you aren't satisfied, just return the unit. Your distributor then exchanges it for fresh stock from us. No cost to either him or you. We've found this simple system helps you choose the products that really solve your problems. And we're happy to help.

A great guarantee and a time-tested loan-for-trial program. Plus a broad line of professional products that fit almost every studio need. We wouldn't want to do business any other way.
