## Directory of Radio Stations in the United States and Canada

### Key to the listings

Listed in this directory are all AM (amplitude modulation) and FM (frequency modulation) radio stations in the U.S., its territories and Canada. Information received as late as Dec. 1, 1983, has been included in the listings. The following is a sample listing with explanation of information keyed to the boldface numbers.

**WOF(AM)**—(1) Oct 8, 1946; (2) 1000 khz; 1 kw-D, 250 w-N, DA-D. (L-KOSL) (CP: 5 kw-U). Stereo. (3) Box 1000 (99999). (909) 555-1000. TWX: 909-999-9999. (4) General Broadcasting Corp. (group owner; acq 7-20-69). (5) Net: ABC/E, AP Mountain State Network. Rep: Jones and Company, Penn State. Format: MOR, C&W. Spec prog: SP 3 hrs wkly. ■ (6) John Jones, stn mgr; David Smith, chief engr. ■ (7) Rates: \$14; 13.50; 14; 12.50.

**WOF-FM**—(1) October 1959; (8) 101.1 mhz; 3 kw. Ant 300 ft. Stereo. (9) Dups AM 50%. Format: C&W. ■ (10) WOF-TV affil. ■ (7) Rates: \$8.50; 7; 8.50; 7.

(1) Date station first went on air (regardless of subsequent ownership changes).

(2) Frequency in kilohertz; power and hours of operation. WOF operates with one kilowatt in daytime hours, 250 watts at night, and uses a directional antenna in daytime. Nighttime operation is limited to hours when dominant station KQSL is operating in daylight. WOF holds a construction permit for five kilowatts power day and night. WOF broadcasts in stereo.

Operational abbreviations:

CH—critical hours  
 CP—construction permit  
 CR—Canadian restricted  
 D—day  
 DA-D—directional antenna daytime only  
 DA-N—directional antenna nighttime only

DA-1—directional antenna day and night  
 DA-2—directional antenna with changing patterns, day and night  
 DA-3—same as DA-2, with an additional pattern change  
 kw—kilowatt

N—night

SH—specified hours of operation

ST—shares time with . . .

U—unlimited time  
 w—watt

(3) Address and zip code, telephone, Teletype Writer Exchange number.

(4) Licensee name and date of acquisition (if not original owner). If the licensee is a group owner—a company with several broadcast properties—it is so identified, as is a group owner of which the licensee is a subsidiary. Details on group owners are listed in section A.

(5) Network, audio news service, rep and programing. The WOF national affiliates are ABC Entertainment Network and AP Network. The regional affiliate is Mountain State. Sales representatives are also listed—national rep first, then regional. The WOF program format is part middle-of-the-road, part country and western, with three hours weekly of special programming in Spanish.

(6) Personnel.

(7) Advertising rates. The prices the station charges for a 12-times-a-week, one-minute spot are shown for each of four day-parts:

6 a.m.-10 a.m.; 10 a.m.-3 p.m.; 3 p.m.-7 p.m.; 7 p.m.-midnight in that order. If a day-part is inapplicable, a dash (—) replaces the rate.

**Co-owned FM.** WOF-FM has the same ownership as WOF(AM), and the FM listing contains only information different from the AM. Co-owned AM and FM stations are always listed together, even when they have dissimilar call letters.

(8) Frequency in megahertz, effective radiated power, and antenna height above average terrain. WOF-FM broadcasts in stereo.

(9) Programing. WOF-FM duplicates WOF programs 50% of the time and has a C&W format.

(10) Co-owned TV. WOF-TV has the same licensee as WOF-AM-FM.

Listings for independent FM stations follow the format of AM station entries.

An asterisk (\*) indicates noncommercial stations.

Dear Pam,

I can hardly wait to share the results our station has achieved using your Video Sales Training Course. "Basics of Broadcast Selling."

Our cash sales increased over \$35,000 the first four weeks we used your Video Sales Training Course. This month billing is up to almost \$20,000 above our highest month ever. That gives 1,000 percent return on our cash investment in only 30 days. Merrill Lynch should listen to you!

Thanks again, Pam. You said the small investment for your video sales training would be the best money our station could invest. And with over ten times return on our money with the first month, I agree. With our investment recouped already we will still have you in house "for free" for years to come.

Sincerely,

KISS 94FM

Dear Pam:

Pam Lontos is the best thing ever to happen to KISS 94 FM!

Last fall, the sales staff and I attended one of your seminars. The following month we increased our already healthy billing by over 60%! It's gotten better from there, too, including big first quarter profits in what is a seasonal market here!

The name "Lontos" has become a verb at KISS 94 ("I Lontos-ed him into buying . . .") and when we crack a tough sale, we usually find that your techniques were what turned the client around.

Novices and seasoned vets alike could benefit greatly from your training. Thanks, Pam, for being such an important part of our success.

Sincerely,  
*Mark*

Dear Pam:

Incredible . . . that's the word that best describes the results our sales staff has experienced since watching just the first five lessons of your video sales course.

In the three days since we began the course, our station has had the most sales per day in its history! Sales are up a whopping 316% over average days. In my twenty years in radio I've never seen anything like it, Pam!

I admit that I was reluctant to make the investment at first, but I'm convinced it's the wisest move we could ever have made toward dramatic sales increases!

We love you, Pam and the entire sales staff is looking forward to completing the video course (they come in at night, on their own time, because they're so excited with it).

Cordially,  
*Bill*

### Policy

By law the Voice of America, a part of the U.S. Information Agency, operates under the following directive: "The long-range interests of the United States are served by communicating directly with the peoples of the world by radio. To be effective, the Voice of America must win the attention and respect of listeners. These principles will govern VOA broadcasts:

"1. VOA will serve as a consistently reliable and authoritative source of news. VOA news will be accurate, objective and comprehensive.

"2. VOA will represent America, not any single segment of American society, and will therefore present a balanced and comprehensive projection of significant American thought and institutions.

"3. VOA will present the policies of the United States clearly and effectively, and will also present responsible discussion and opinion on these policies."

To implement this directive, these broadcasts present news and news-related items of American and world events, news analyses, editorials, correspondents' reports, editorial roundups, and feature material such as documentaries, roundtable discussions, interviews and special events all of which provides overseas audiences with a balanced and accurate concept of the many facets of American life and clear information regarding U.S. policies.

### Facilities

The Voice of America has a network of 110 transmitters: 34 in the continental United States and 74 overseas. These are short and medium wave stations ranging in power from 35 kw to 1,000 kw. The largest transmitter complex is at Greenville, N.C. There, 18 transmitters relay programs received via microwave from the Washington studios to audiences and relay stations abroad over 73 directional antennas. Total power at Greenville is 4,800 kw. Other domestic facilities are at Bethany, Ohio; Marathon, Fla. (MW); Delano and Dixon, both California.

Overseas relay stations are at: Munich, Germany; Kavala and Rhodes, Greece; Tangier, Morocco; Monrovia, Liberia; Tinang and Poro, The Philippines; Woolferton, England; Colombo, Sri Lanka; Bangkok, Thailand. These include short and medium wave transmitters, among which are three one-megawatt transmitters. VOA's total power is now 21,820,000 watts. Also 18 satellite circuits are used to feed VOA's overseas relay stations.

### Local Placement

Many VOA tapes, music recordings and script materials are furnished by United States Information Agency offices overseas for local distribution and broadcast. Other relays and rebroadcasts are made through arrangements with local broadcasters in Western Europe, Africa, the Near East, South Asia, the Far East and Latin America. For example, VOA's Spanish-language feed of 20 daily (M-F) correspondent reports are broadcast a total of 1,200 times on stations and networks throughout the southern hemisphere.

**Armed Forces Radio and  
Television Service**

AFRTS operates over 800 radio and television outlets located in more than 50 foreign countries, remote areas of Alaska, U.S. trusts, territories and possessions, and aboard Navy ships. Most of the land-based stations are grouped into regional AFRTS networks to serve specific geographical areas (for example, American Forces Network-Europe in Europe and American Forces Korea Network in Korea). These AFRTS networks and independent stations create their own individual radio and television program schedules from broadcast materials provided by the AFRTS Programming Center in Los Angeles. Some outlets are broadcast operations and some carried on closed circuit systems of various types. Domestic and Intelsat satellite service is leased on a 24 hour-a-day basis and provides real-time stateside radio and TV to certain overseas locations.

**HQ AFRTS.** AFRTS is the broadcast arm of the American Forces Information Service located at 1735 N. Lynn St., Arlington, Va 22209. (202) 696-5284. Lieutenant Colonel Melvin W. Russell, asst dir, AFRTS/broadcast media; Major Lawrence Pollack, opns mgr.

## World Radio and Television

The following summarizes radio and television broadcasting around the world. Stations and transmitters used for international and armed forces programs are included. Transmitter counts for each country are for main transmitters and often include low power relays, repeaters, satellites and/or translators. Where current information is not available, radio set counts have been estimated by *Broadcasting*.

**Note:** Domestic radio stations in foreign countries often use shortwave and longwave frequencies, as well as the medium wave frequencies corresponding with the standard AM broadcast band in the U.S. Longwave (lw) frequencies below 500 khz are generally used in Europe, Africa, the Middle East, and Asiatic U.S.S.R. Medium wave (mw) frequencies are between 500 and 1600 khz and are used on all continents. Shortwave (sw) frequencies are between 1600 and 30,000 khz and are used for domestic broadcasting on all continents, especially in tropical areas. On long, medium, and shortwave, the mode of transmission is amplitude modulation (AM). Most foreign frequency modulation (FM) radio broadcasting is on the same frequencies as those used in the U.S., although some countries use a band between 60 and 88 mhz.

Unless shown as commercial (com), government broadcasting activity identified below is without advertising. Some independent broadcasting organizations, such as the BBC, operate under statutory authority, and are so identified. Statutory, nongovernmental broadcasting may be supported by receiver license fees, advertising, subsidies, or a combination.

## The Comark "S" Series

# We just made every other UHF transmitter obsolete.

Broadcast engineers and managers agree. Without a doubt, Comark's new "S" Series UHF television transmitters—from 10kW through 220kW—represent a world class product. Integrating high efficiency, reliability and low cost, each model incorporates state-of-the-art technology to achieve a unique combination of unparalleled features:

- Broadband (no tuning), high power, field proven, exciter system featuring dual channel (redundant) operation as well as Comark's CM-100S Broadcast Modulator with 1F S.A.W. filter.
- External cavity, full-band klystron power amplifiers, combining highest efficiency and compact size.
- Space efficient, mechanical and electrical layouts, fully engineered for maximum EMI/RFI isolation and overall operator convenience.

- Fiber optic telemetry for all floating, high voltage metering functions, incorporated into a complete latched fault and status display system.
- Clean, fully isolated, high voltage compartments, with double-filtered air cooling and front access. (No exposed high voltage in klystron areas.)

All Comark "S" Series models are available with advanced system options, including beam current pulsers, motorized RF switching systems, LED and ICPM correction systems, and the services of Comark's 24-hour field operations group.
