(5) Network, audio news service, rep and programing. The WOF national affiliates are ABC Entertainment Network and AP Network. The regional affiliate is Mountain State. Sales representatives are also listed—national rep first, then regional. The WOF program format is part middle-of-the-road, part country and western, with three hours weekly of special programing in Spanish.

(7) Advertising rates. The prices the station charges for a 12-times-a-week, one-minute spot are shown for each of four day-parts:

**Co-owned FM.** WOF-FM has the same ownership as WOF(AM), and the FM listing contains only information different from the AM. Co-owned AM and FM stations are always listed together, even when they have dissimilar call letters.

(8) Frequency in megahertz, effective radiated power, and antenna height above average terrain. WOF-FM broadcasts in stereo.

(9) Programing. WOF-FM duplicates WOF programs 50% of the time and has a C&W format.

Listings for independent FM stations follow the format of AM station entries.

**Note:** Unless indicated as French (Fr), programming is in English on Canadian stations in all provinces except Quebec. In Quebec, programming is in French unless shown as English (Eng). Due to Canada's geographic expanse, several Canadian stations have affiliates on shortwave (sw) frequencies for domestic broadcasting. In all cases they duplicate the AM station programming 100%.

#### Policy

By law the Voice of America, a part of the U.S. Information Agency, operates under the following directive: "The long-range interests of the United States are served by communicating directly with the people of the world by radio. To be effective, the Voice of America must win the attention and respect of listeners. These principles will govern VOA broadcasts:

"1. VOA will serve as a consistently reliable and authoritative source of news. VOA news will be accurate, objective and comprehensive.

"2. VOA will represent America, not any single segment of American society, and will therefore present a balanced and comprehensive projection of significant American thought and institutions.

"3. VOA will present the policies of the United States clearly and effectively, and will also present responsible discussion and opinion on these policies."

To implement this directive, these broadcasts present news and news-related items of American and world events, news analyses, editorials, correspondents' reports, editorial roundups, and feature material such as documentaries, roundtable discussions, interviews and special events all of which provides overseas audiences with a balanced and accurate concept of the many facets of American life and clear information regarding U.S. policies.

#### Facilities

The Voice of America has a network of 108 transmitter: 31 in the continental United States and 77 overseas. These are short and medium wave stations ranging in power from 10 kw to 1,000 kw. The largest transmitter complex is at Greenville, N.C. There, 16 transmitters relay programs received via microwave from the Washington studios to audiences and relay stations abroad over 66 directional antennas. Total power at Greenville is 4,700 kw. Other domestic facilities are at Bethany, Ohio; Marathon, Fla. (MW); Delano and Dixon, both California.

Overseas relay stations are at: Munich, Germany; Kavala and Rhodes, Greece; Tangier, Morocco; Monrovia, Liberia; Tinang and Poro, The Philippines; Woferton, England; Colombo, Sri Lanka; Bangkok, Thailand; Judge Bay, Antigua and Sebebi-Phikwe, Botswana. These include short and medium wave transmitters, among which are two one-megawatt transmitters.

## Caribbean, U.S. International Radio, VOA, Radio Free Europe

VOAs total power is now 21,470,000 watts. Also 21 satellite circuits are used to feed VOAs overseas relay stations.

#### Local Placement

Many VOA tapes, music recordings and script materials are furnished by United States Information Agency offices overseas for local distribution and broadcast. Other relays and rebroadcasts are made through arrangements with local broadcasters in Western Europe, Africa, the Near East, South Asia, the Far East and Latin America. For example, VOAs Spanish-language feed of 20 daily (M-F) correspondent reports are broadcast a total of 1,200 times on stations and networks throughout the southern hemisphere.

## Armed Forces Radio and Television Service

AFRTS operates over 800 radio and television outlets located in more than 50 foreign countries, remote areas of Alaska, U.S. trusts, territories and possessions, and aboard Navy ships. Most of the land-based stations are grouped into regional AFRTS networks to serve specific geographical areas (for example, American Forces Network-Europe in Europe and Far East Network in the Pacific). These AFRTS networks and independent stations create their own individual radio and television program schedules from broadcast ma-

terials provided by the AFRTS BroadcastCenter in Los Angeles and from their own local productions. Some outlets are broadcast operations and some carried on closed circuit systems of various types. Domestic and Intelsat satellite service is leased on a 24 hour-a-day basis and provides real-time stateside radio and TV to certain overseas locations.

**World Radio and Television**

The following summarizes radio and television broadcasting around the world. Stations and transmitters used for international and armed forces programs are included. Transmitter counts for each country are for main transmitters and often include low power relays, repeaters, satellites and/or translators. Where current information is not available, radio set counts have been estimated by *Broadcasting*.

**Note:** Domestic radio stations in foreign countries often use shortwave and longwave frequencies, as well as the medium wave frequencies corresponding with the standard AM broadcast band in the U.S. Longwave (lw) frequencies below 500 khz are generally used in Europe, Africa, the Middle East, and Asiatic U.S.S.R. Medium wave (mw) frequencies are between 500 and 1600 khz and are used on all continents. Shortwave (sw) frequencies are between 1600 and 30,000 khz and are used for domestic broadcasting on all continents, especially in tropical areas. On long, medium, and shortwave, the mode of transmission is amplitude modulation (AM). Most foreign frequency modulation (FM) radio broadcasting is on the same frequencies as those used in the U.S., although some countries use a band between 60 and 88 mhz.

Unless shown as commercial (com), government broadcasting activity identified below is without advertising. Some independent broadcasting organizations, such as the BBC, operate under statutory authority and are so identified. Statutory nongovernmental broadcasting may be supported by receiver license fees, advertising, subsidies, or a combination.
