Rt. 57, Feeding Hills Road, Southwick, MA 01077 • (413) 569-5939

You can have our big hits sooner.

Or theirs later.

With over half the titles cleared for '86-'87 airing, Century 13 is ready with the kinds of movies and stars that deliver when the Sweeps stakes are high.

Century 13 has that special appeal that carries box office momentum right into the home. ("Mr. Mom" already scored as the highest rated network theatrical film of last season—beating "Tootsie," "Rocky III," "Flashdance" and "48 Hours.")

Put Stallone and Schwarzenegger to work for you. Give your audience the appeal of Parton and the charisma of Cruise. Watch the Nerds get revenge, take a sexy jaunt to Rio, join a Bachelor's last fling, see a man who's a Mom, Romance a deadly Stone—and look out for a Commando gone wild.

But above all, don't wait.

CENTURY 13

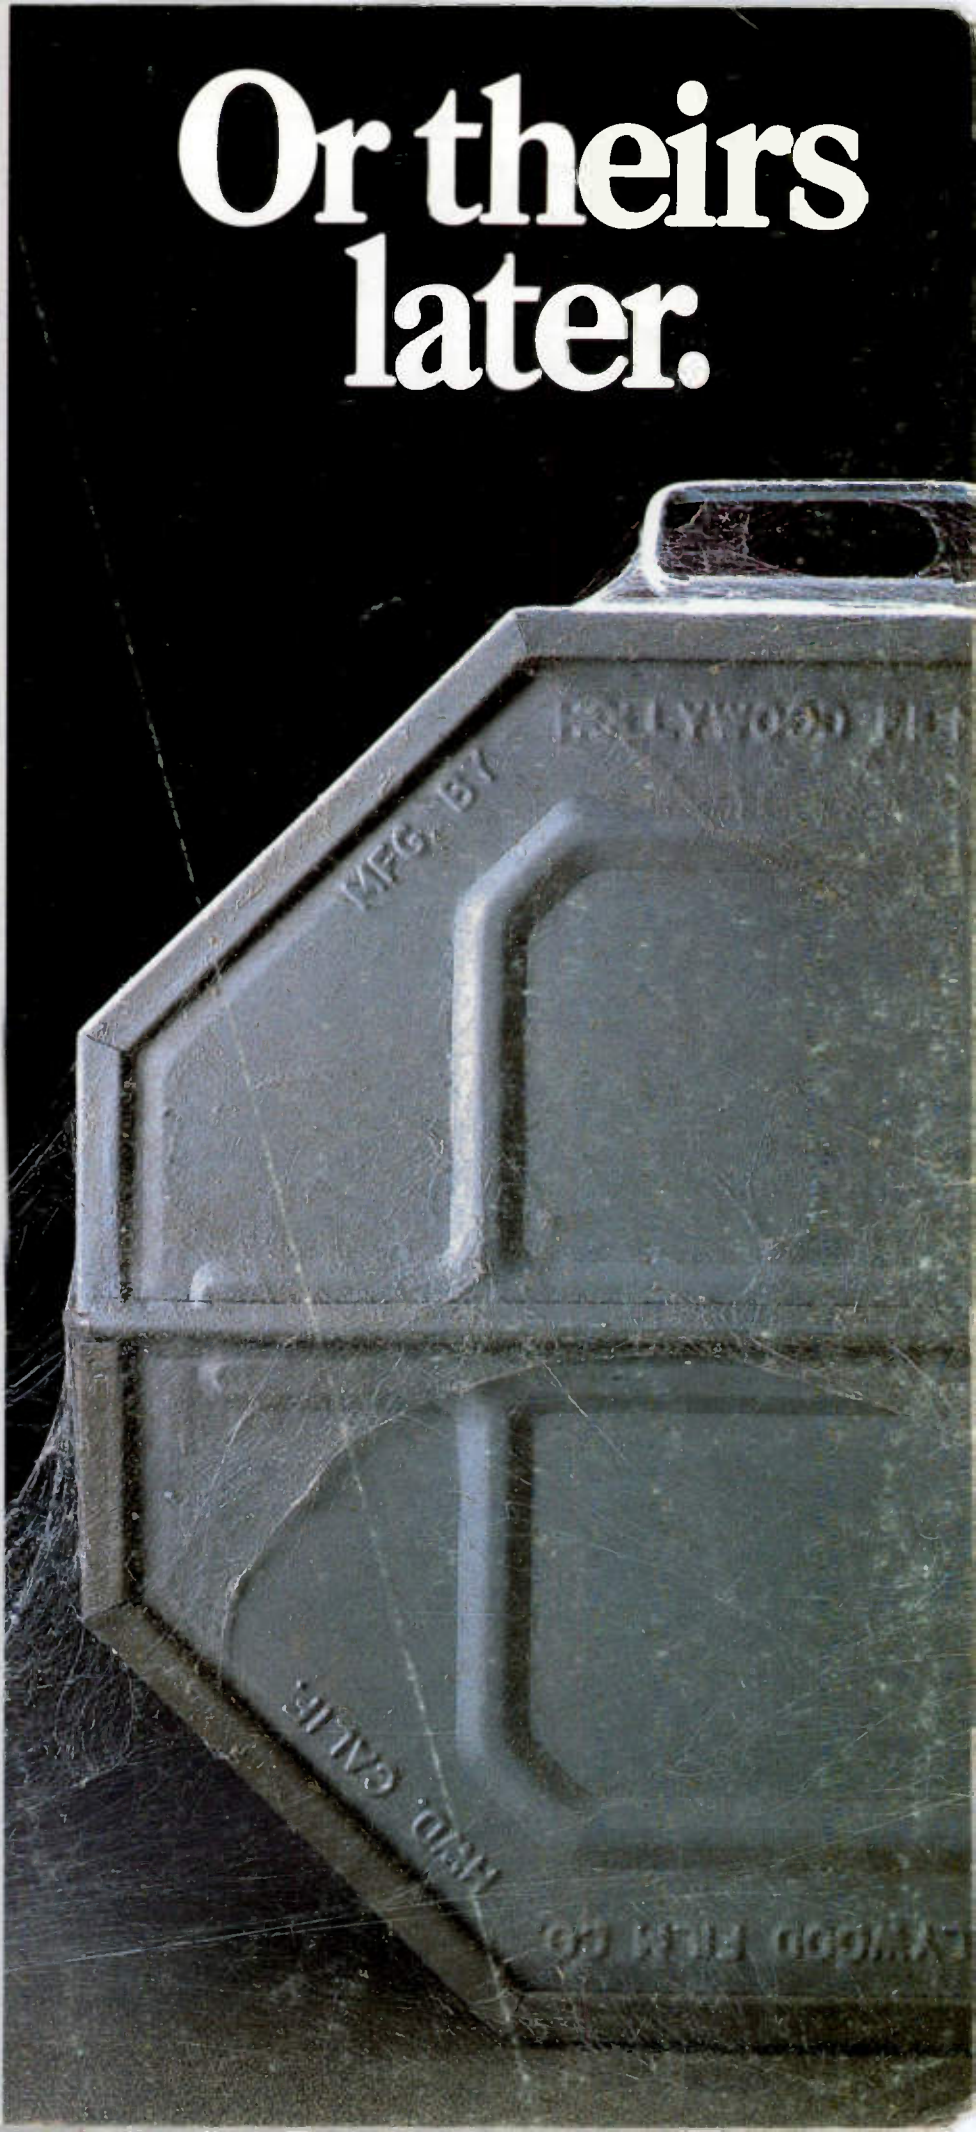

**THE HITS YOU CAN RUN
WHILE THEY'RE HOT.**

All major theatrical releases.

* COMMANDO * ROMANCING THE STONE *
* BACHELOR PARTY * MR. MOM * ALL THE RIGHT
MOVES * REVENGE OF THE NERDS * BLAME IT
ON RIO * HEART LIKE A WHEEL * MEL BROOKS'
HISTORY OF THE WORLD—PART I * RHINESTONE *
* TO BE OR NOT TO BE * WITHOUT A TRACE *
* THE MAN WITH ONE RED SHOE * JOHNNY
DANGEROUSLY * UNFAITHFULLY YOURS * TWO OF
A KIND * GIVE MY REGARDS TO BROAD STREET *
* MAX DUGAN RETURNS * THE BUDDY SYSTEM *
* THE STAR CHAMBER * BUCKAROO BANZAI *
* THE AMATEUR * THE OSTERMAN WEEKEND *
* TURK 182! * DREAMSCAPE * BAD MEDICINE *

**"It better work
we're talking serious**

right out of the box, money here."

We couldn't agree more.

When you pay tens of thousands of dollars for a piece of professional equipment, you deserve to have that investment thoroughly tested.

At Sony Broadcast, thorough testing is the law.

Consider our BVH series of one-inch recorders.

Each and every unit is unpacked and inspected at our San Jose testing facility.

Critical performance specs are carefully verified with precision test instruments.

Then, since you can order BVH recorders in a variety of configurations, we test the configuration you specify as a complete system.

It's all part of our commitment to deliver a product that meets the highest standards of professionalism.

All you do is plug in the cables, thread the tape and go.

That's the Sony Standard at work.

Working right from day one.

SONY
BROADCAST

SHOOT FOR

Some of the most watched stars in television history are now available in Premiere 2. Michael Landon. Diahann Carroll. John Ritter. Michele Lee. Ed Asner. Veronica Hamel. Jane Seymour. Peter Strauss. Penny Marshall. Loni Anderson. Stephanie Zimbalist. Leonard Nimoy. To name just a few.

Twenty-two starpowered, high impact, 2-hour movies. With provocative, promotable plots—perfect for highly exploitable, audience building theme weeks.

Premiere 2. Television's brightest stars, shining in Twentieth Century Fox productions. Backed by a powerful promotion package. To deliver the ratings you get only from movies made for television.

From the moment the first telecast made its way into a handful of living rooms, audiences were entranced, entertained and enlightened. Now, television is in nearly every household. Viewers receive more channels and have more choices than ever before. Television. It's the media choice that reaches 98% of all households. That's why advertisers invest a whopping 21 billion dollars each year. How do we know? We've been watching audiences watch TV since 1949—longer than *anyone*. And, as the medium and the audience grow and change, so do we. Developing new ways to define and describe who they are and what they watch. Arbitron. We know the territory.

CHANGING ADDRESS?

PLEASE KEEP IN TOUCH!

We want you to get the best service possible and to do so, we need your help!

Because of the format of TELEVISION & CABLE FACTBOOK, it's very important that we don't lose touch with you. To insure that you receive the next volume of this two-volume set as soon as it's published, we need to be advised of any address change that might affect delivery.

For your convenience, we have included the postage-paid card below.

Please change your records to reflect my new address and to insure that I will receive the second volume of my two-volume TELEVISION & CABLE FACTBOOK as soon as it's published.

Just Some of the Products and Information Services Available from Television Digest

- **CABLE & STATION COVERAGE ATLAS** — Annual source book for television, cable and related industries, highlighted by updated Grade B contour, microwave, 35-mile and 55-mile zone maps plus information on MDS, LPTV and other vital subjects.
- **ELECTRONIC DELIVERY** — Instant access to all the data in the Television Digest newsletter information services via NewsNet or NEXIS, featuring a keyword search capability and headline scan function designed to give users the most up-to-date news available in the easiest, most timely fashion.
- **COMPUTERIZED MAILING LISTS** — Updated mailing lists of all U.S. operating cable systems and operating U.S. television stations are available for rental.
- **SATELLITE WEEK** — Weekly newsletter covering the latest developments in satellite broadcasting, telecommunications, earth observation and space industrialization.
- **COMMUNICATIONS DAILY** — Daily newsletter covering all aspects of electronic communications including telephone and data communications, cable TV, teleconferencing, electronic publishing and emerging technologies.
- **VIDEO WEEK** — Weekly newsletter reporting the latest news on program sales and distribution for videocassettes, discs, pay TV and allied media.
- **TELEVISION DIGEST with CONSUMER ELECTRONICS** — Weekly newsletter presenting the most up-to-the-minute news, trends and developments in the television, cable, broadcasting and consumer electronic fields.
- **PUBLIC BROADCASTING REPORT** — Bi-weekly newsletter that supplies impartial, analytical news and information on public broadcasting, including funding, technical and regulatory news.
- **ACTION UPDATES** — Weekly supplements covering changes in the Cable and Television fields including licensing, franchising and other regulatory matters.
- **COMMON CARRIER WEEK** — Weekly newsletter examining the telecommunications industry with focus on regulatory and legal actions, product announcements, new services such as PBX and cellular radio, competition and more.
- **SPACE COMMERCE BULLETIN** — Bi-weekly newsletter covering the frontiers of space business including commercialization, industrialization, defense, remote sensing, space stations and other pertinent trends and developments.
- **TELECOM FACTBOOK** — Annual reference/phone directory for the telecommunications industry with organizational charts, graphs, glossary, Buyer's Guide and more.

The authoritative weekly information service covering the latest developments in broadcasting, cable, consumer electronics and allied industries...

TELEVISION DIGEST With Consumer Electronics

Television Digest has been keeping leading communications executives informed since 1945 and is aimed at all those decision-makers...like you...who have a big stake in the ever-changing broadcasting and cable industries.

Television Digest goes beyond the scope of any other publication by bringing into sharp focus all the conflicting forces at work—broadcast, cable, MDS, DBS, SMATV and others. It provides experienced coverage of the entire industry.

Each issue furnishes thorough coverage of government activities—the FCC, Capitol Hill, the White House. Each issue gives you the latest news on programming ploys...marketing strategies...personnel shifts...and current standings on the ever-changing revenue and ratings picture.

Television Digest regularly includes a host of industry surveys and statistics that cannot be found anywhere else. And because trade shows, conventions and professional meetings are of such vital importance in the communications industry, Television Digest provides complete pre- and post-meeting coverage of virtually every major trade show and professional meeting in the world.

Television Digest gives you the information you need, delivered in a fast-paced style and clear format that always respects your busy schedule!

For subscription information, call collect: (202) 872-9200.

Description of Station Directory Section

THE STATION MAPS

The only official and uniform rough guide to a station's physical coverage is found in the files of the Federal Communications Commission. Each TV station grantee is required to submit to the Commission its coverage contours predicted on the basis of engineering formulas designated by the Commission. The FCC specifies three grades of service as a general indication of the probable quality of reception.

The FCC does not intend or expect the predicted coverage contours, submitted by each station, to reflect whether a signal is received or not received at any specific location. Rather, the Commission regards the contours as a general guide to probable reception. The basic use made by the Commission of the contours is as a tool to determine where to allocate channels to minimize interference among stations.

Though all stations and applicants are required to submit predicted contours to the FCC, stations may also file contours based on actual measurements of transmitted signals. Under FCC rules, such filings are not mandatory, and only a relatively few stations have offered such measurements voluntarily. The Commission has no official and uniform rules for measuring service contours; such submissions are associated with stations' files but are not given official status by the Commission.

The maps are intended to serve as guides. It should be emphasized that the use of maps for legal proceedings, such as those before the FCC, may require precision greater than that reasonably obtainable in maps of the size employed in the *Factbook*.

On May 29, 1975 the FCC amended Section 73.699 of the rules providing revised charts for the prediction of field strengths of TV stations and requiring licensees to file new contours with renewal applications filed after the effective date. When a revised map was not available from the station or the FCC, a note to that effect appears on the station page.

The three grades of predicted contours required by the FCC are as follows:

Grade B Service: The quality of picture expected to be satisfactory to the median observer at least 90% of the time for at least 50% of the receiving locations within the contour, in the absence of interfering co-channel and adjacent-channel signals.

Grade A Service: Satisfactory service expected at least 90% of the time for at least 70% of the receiving locations.

Principal City Service: Satisfactory service expected at least 90% of the time for at least 90% of the receiving locations.

We obtained the predicted contour maps from the FCC files or from the stations. We publish two contour lines, "Grade A" and "Grade B."

(The composite maps and all other contents of this book are copyrighted by Television Digest, Inc., publishers of Television & Cable Factbook. The American Map Corp. (46-35 54th Rd., Maspeth, NY 11378), is the copyright owner of the base maps which are reprinted herein under Licenses #14244 and #14244-W. Reproduction in whole or part is prohibited without written permission of the copyright owners.)

ARBITRON TV STATION CIRCULATION

The counties listed on the station pages represent the home market Arbitron Metro area plus those counties in which the station receives a Net Weekly Circulation of at least 5% according to Arbitron circulation estimates. Each of these counties is then delineated by three circulation categories which include those in which the station's circulation is 50% or more, 25%-49% and 5%-24%. In some instances, counties listed do not appear on the maps, since the reduction in scale required to include them would impair the legibility of the maps.

The station circulation estimates which determined the allocation of each county to the proper category were derived from samples obtained over several survey periods. The estimates were based on Arbitron market surveys conducted during 1985 and 1986.

The Total Households and Television Households which are listed for each county qualifying for inclusion in one of the three circulation categories are current Arbitron projections as of January 1986 (see Definitions of Arbitron Terms).

Net Weekly and Average Daily Circulation totals for each station are based on the above surveys.

(Data from Arbitron Ratings are fully protected by copyright. Reproduction in whole or part is prohibited without written permission from the Arbitron Ratings Company, 1350 Ave. of the Americas, New York, NY 10019.)

DEFINITIONS OF ARBITRON TERMS

Total Households—A household is a single dwelling unit, which may be a house, an apartment, or a group of one or more rooms. The total households figures shown in the current study are Market Statistics estimates projected to January 1, 1986 and rounded to the nearest hundred. These estimates include households on military installations.

Television Households—A television household is an occupied dwelling unit having one or more television sets. Updated estimates of TV households in each county are prepared annually by the Arbitron Research Department.

TV Penetration—The percent of total homes having one or more television sets at the time of the surveys. TV penetration uses current regional penetration estimates derived by the Advertising Research Foundation from U.S. Bureau of the Census surveys conducted in accordance with ARF specifications.

Net Weekly Circulation—The estimated number of different television households viewing a particular station at least once per week, Monday-Sunday, Sign-on to Sign-off.

Average Daily Circulation—The estimated average number of different television households reached by a particular station on each day of the week, Sign-on to Sign-off.

EDITOR'S NOTE: Total Households listed for each station in this Volume of the Television and Cable Factbook do not include households in any county in which the station's circulation is less than 5%. The counties appearing in the circulation report are listed alphabetically by state. The states are arranged alphabetically by two-letter state abbreviations.

SURVEY METHODS, Described by ARBITRON

Arbitron uses one-week, interviewer-supervised family viewing diaries to secure information for television audience estimates. Families are contacted initially by mail to inform them of their selection for the survey. They are then contacted by telephone to secure their cooperation in the survey and to elicit basic information as to television set ownership and number of sets owned in the household. Contact is maintained with the sample families through followup calls to encourage proper recording and prompt return of the diaries.

Sampling is controlled by geographic units of no larger than county size, and in some instances for reasons of population distribution, terrain or technical control a county is divided into two sampling units. Sample homes are selected by computer from all available households with listed telephones in the sampling universe through a systematic interval selection technique with random selection occurring within each interval.

In the Metro and ADI Rating Area, households with unlisted telephones are included in the sample universe by using a list of potential telephone numbers. Known listed numbers, business numbers, nonresidential business exchanges and unassigned number blocks have been eliminated.

The Arbitron family viewing diary measurement technique is used for both market surveys of television viewing and broadscale station circulation information by county.

At least four times each year, Arbitron surveys every county to provide viewing information for every television market in the country. Further details on Arbitron sampling procedures are available from Arbitron.

EXPLANATION OF FCC SYMBOLS

FCC Filing Symbols:

1. BPCT: Broadcast Permit Commercial Television.
2. BMPCT: Broadcast Modification of Permit Commercial Television.
3. DOC: Docket (designation applied by FCC to hearing cases).
4. GRANTED: Date of authorization by FCC.

Note: "BPCT" and "BMPCT" designations, accompanied by numbers, are affixed by the FCC to applications for new or changed station facilities to identify each when it is accepted for filing. They therefore constitute file numbers. Each map in the Factbook is accompanied with its file number to facilitate reference to the Commission's official files. In each case, the file number used is the one affixed to the application for facilities which were subsequently authorized by the FCC and in use at the time this Factbook was published. "Docket" numbers are used in those few cases where the application was in a hearing status and a file number hasn't been assigned. The "granted" date indicates when the FCC approved construction of facilities involved.

After a station is completed according to the terms of its construction permit, it receives a license; this is identified by a number with a "BLCT" (Broadcast License Commercial Television) prefix. When a license is renewed,

a number with a "BRCT" (Broadcast Renewal Commercial Television) prefix is employed. Applications for licenses or license renewals do not include requests for changes in facilities, thus do not affect predicted

Grade A & B contours. Therefore, they are not employed as references in the Factbook.

The Grade A & B contours on the maps are predicted by station engineers according to the formulas designated by the FCC, as previously explained. They are based on facilities authorized or in use by stations at the time of Factbook publication.

BBM SURVEY METHODS

BBM is a non-profit tripartite association of advertising agencies, advertisers, broadcasters and broadcast representatives.

BBM conducts national surveys of television viewing and radio listening in all ten Canadian provinces.

A television market survey is taken over a seven day period and compiled and reported as the average of two or three weeks. Three week surveys are the designated sweep surveys. BBM identifies a range of dates during which a sweep survey can be taken. Toronto, Montreal and Vancouver are reported seven times yearly; markets four through twelve four times yearly; all others twice yearly. The individual weeks selected by BBM are not disclosed. Network television reports are produced for forty-eight weeks of each year.

BBM provides detailed survey data for fifty recognized markets across Canada. BBM divides the country into three hundred and forty-six mutually exclusive sampling cells which, when combined, cover all of Canada's ten provinces. Ten times yearly, household enumerations are conducted by telephone. A master file of all individuals aged two and over is compiled. From this master file, BBM draws its television sample, just prior to each survey interval. Households selected are not used again except as they may occur in the random selection of a sample. More than a half million Canadians are asked to participate in BBM television surveys each year, 350,000 of whom agree.

Randomly selected households are mailed a diary for each television set in the home. Household members are asked to record their personal television tuning by quarter hour for a specific seven day period to each set. The returned diaries are then weighted to represent the population within each sampling cell. Projections are made separately by age/sex group and by week of survey. In the bilingual markets of Montreal and Ottawa-Hull the intab diaries are also weighted by language group.

For each home station, BBM provides rating information by time periods and for each program for all specified markets in either central and/or extended markets. Full coverage audience data or total station tuning from all measured areas is also published. A reach report showing results by station and area is produced each Fall and Spring.

The definition of the central markets correspond to Statistics Canada defined Census Metropolitan Areas (CMA) or Census Agglomerations (CA) from which the home stations broadcast. To be considered a central market, CA/CMA will normally contribute the largest of the total hours of tuning to a home station. All BBM central markets have one accompanying extended market (similar in definition to an Area of Dominant Influence) except for some markets where no concentration of hours of tuning to home stations is found within the CA/CMA.

U.S. Television Station Directory

Data updated to October 15, 1986. Includes rate digests, personnel, facilities and other data. CP holders reported due by November 1986.

Explanatory Notes

Rates, personnel and other data supplied by stations.

RATE DIGESTS: These show only the highest one-time rate charged by the stations. Most rates are also subject to frequency discounts, separate or additional rehearsal charges, talent & production charges, etc. For further details and for contract conditions, specifications etc., consult complete station rate cards, available from the stations on request.

STATION POWER: Powers shown are Effective Radiated Powers (ERP).

NETWORK SYMBOLS (registered trademarks)

THE STATION PAGES

The individual station tables show a complete listing of all counties grouped by Arbitron Net Weekly Circulation levels, with Total Households, and TV Penetration in each county individually. For definitions of Arbitron terms, see introduction.

SATELLITE STATIONS are shown with a dash line pattern in relation to the parent listing. In the satellite listing the parent station is shown with a dash line pattern.

THE STATE PAGES

Following the map of each state, rankings for Arbitron's Area of Dominant Influence Television Households are shown. ADI Households Rank is established by Arbitron.

The state pages also carry additional cross-reference material, indicating for example, those stations within the state that are identified with two or more cities, or with cities in another state.

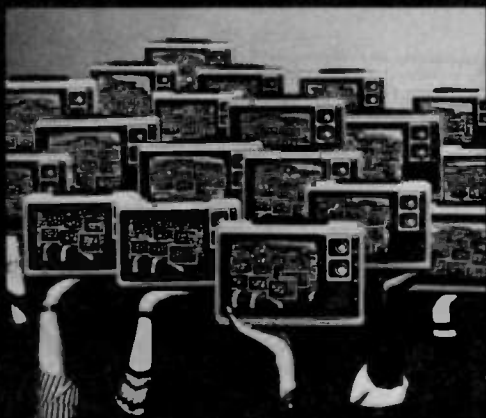

Operating commercial and educational TV stations by VHF and UHF are shown for each state in a status report as of October 15, 1986.

From the moment the first telecast made its way into a handful of living rooms, audiences were entranced, entertained and enlightened. Now, television is in nearly every household. Viewers receive more channels and have more choices than ever before. Television. It's the media choice that reaches 98% of all households. That's why advertisers invest a whopping 21 billion dollars each year. How do we know? We've been watching audiences watch TV since 1949—longer than *anyone*. And, as the medium and the audience grow and change, so do we. Developing new ways to define and describe who they are and what they watch. Arbitron. We know the territory.

ARBITRON RATINGS
