

G RUDIO EQUIPMENT FOR BROADCASTERS

How to Use This Catalog

Since we represent over 200 manufacturers, we provide thousands of products that would be impossible for us to list in any one source. Our 176-page catalog is a representation of the most popular products from each manufacturer. So if you don't see the products you seek, just ask.

All products are shown with the manufacturer's list price (not our sales price). Because our catalog is printed each year in January, it is impossible to print retail pricing for the entire year. Rest assured, BSW is going to offer you an excellent price on every item in our catalog, so please call or fax us today to get your discounted BSW price.

Products are organized in this catalog alphabetically by general application categories, and within each category alphabetically by manufacturer. Major category headings are listed on page 1. Product descriptions and list prices are subject to change at the manufacturer's discretion.

Need Complete Product Specifications?

Complete product specifications are available upon request. We are happy to fax or e-mail you additional product information as we cannot possibly include all product information in each catalog listing. Also, you may visit our website at www.bswusa.com which includes hot links to many of the manufacturers we represent. Specifications should be verified prior to ordering, as they do change without notice.

Stock vs. Non-Stock Items

Special order or non-inventory items (designated by an asterisk* in this catalog) may be subject to restrictions on return or exchange. A BSW sales professional can verify if any product is deemed "non-inventory".

In addition, a restock fee may be assessed on returns of noninventory items or for reasons other than defect, damage or situations arising outside of BSW's control.

How Do I Order from BSW?

Call us toll-free at 1-800-426-8434 from anywhere in the United States, Puerto Rico, U.S. Virgin Islands and Canada. International customers, please call us at 253-565-2301. Sales professionals are on duty 6:00 AM to 6:00 PM Pacific Standard Time, Monday through Friday.

You may fax us toll-free (1-800-231-7055) or e-mail us at (sales@bswusa.com) and a sales professional will contact you to confirm your order. International customers, please fax your order to 253-565-8114. As a convenience, we have provided an order form on page 173 that you may photocopy and fax to us. Or visit our website at http://www.bswusa.com.

We Offer Flexible Payment Terms

To qualified *domestic business* and educational customers, net 30-day billing is available with approved credit. For your convenience, a credit application is provided on page 174. We also accept Visa, Mastercard, American Express and Discover. Personal checks may be accepted with TeleCheck approval. Limited COD services are available to BSW business customers only. COD service is available on inventory items only. Please check with your sales representative for further details.

BSW offers our *international customers* a number of payment options: Prepayment via Checks/Cash/Cashier's Check. (funds in U.S. dollars and checks drawn on a U.S. bank) • Payment via Letter of Credit • Payment via Visa, Mastercard, American Express or Discover • Payment via Wire Transfer. Interbank wire services (such as SWIFT) are the preferred option of payment. Please contact a BSW international representative for information on all purchasing options.

Customized Shipping to Meet Your Needs

We know fast delivery is important to you, so we make every effort to stock the items you need. Our warehouse is filled with thousands of items available for immediate shipment. Some products will be shipped directly from the manufacturer at our discretion. We offer a variety of shipping options and carriers to save you money and time.

Shipping charges are based on actual shipping weights plus a minimal handling fee, so please call for price quotes if paying in advance. Shipping charges will be added to the credit card if provided. BSW ships F.O.B. Point of Origin unless other arrangements are made and approved in advance.

BSW Return Policy

If a return of any equipment is deemed necessary, please contact our customer service department immediately at 800-426-8434 or 253-565-2301 between 6:00 AM and 6:00 PM Pacific Standard Time for a Return Authorization (RA) number. You may fax customer service at any time (253-565-8114) or e-mail to custserv@bswusa.com.

For your convenience, complete return instructions, including return shipping labels, are included on the back of all BSW packing lists. Please contact your sales professional or BSW customer service for additional information.

Fine Print

BSW is not responsible for typographical or photographical errors. Suitability of products for intended use is the sole responsibility of the customer. All factory warranties apply. Service and repair must be completed at designated factory repair centers. BSW will not be responsible for any damage resulting from the equipment we provide. BSW strives to provide its customers with the very best in professional audio equipment and service. We go to great lengths to ensure that your order is correctly filled in a quick and concise manner; however, an occasional error may occur. In these situations, BSW stands ready to correct the problem and work with you to resolve the situation in a timely manner. BSW cannot assume responsibility for delays or errors caused by manufacturers or others in the course of doing business.

ALESIS

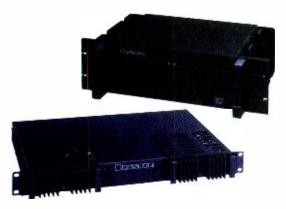

RA100 - Power Amplifier

Features: front panel level controls; silent, convection cooling with large built-in heat sinks for silent operation; .05% THD; power-up delay; clip lights on each channel; unbalanced 1/4" inputs; 1/4" and push clip speaker connectors. 90-day warranty.

t's no longer a secret, people all over the world are discovering, despite the hype, that digital dynamics processing can't compete with good analog. Even Cutting Edge[®] claims their Omnia unit sounds almost as good as analog, while both Cutting Edge and Orban[®] claim each other's digital product trashes the signal.

The Aphex 2020 FM Pro offers the purity of an all analog signal path with the power of digital control. Through its use of 11 patented circuits, the 2020 achieves the greatest possible loudness while retaining musicality and naturalness.

No digital grunge, no aliasing, no overshoot. No subcarrier artifacts from composite clipping. Just the loudest, cleanest FM processing with the greatest possible coverage area.

Better sound *and* more listeners - too good to be true? Call Aphex today for a demonstration, and we'll show you there *is* truth in advertising.

Improving the way the world sounds^{5M}

11068 Randall Street, Sun Valley, CA 91352 U.S.A

Cutting Edge and Omnia are registered trademarks of TLS Corporation. Orban and Optimod are registered trademarks of Harman International.

CRL

MILLENNIUM - Digital Audio Processor

The Millennium digital audio processor from Circuit Research Labs marks the beginning of a whole new generation of audio processing technology. The sound is clear and real loud. The Millennium is based on a 32-bit floating point DSP processor. It has a straightforward touch screen and graphical user interface that allows you to create your own unique sound identity – setting your station apart from the crowd. There's also a legion of factory presets from which to choose.

Features: the Millennium includes a true digital stereo multiplex generator, AGC, five-band compressor and a multi-band limiter; remote control software that makes adjustments fast and easy; 100% floating point digital signal processing; 256 kHz final limiter sample rate (the highest currently available); it accepts analog and AES/EBU digital signals (wired or optical). It can even accept both at the same time and mix them in the digital domain.

Hardware and software upgrades are included for the first year at no charge. The AES/EBU rate adaptive digital interface (32 kHz/44.1 kHz/48 kHz) is included at no additional cost. Warranty (parts and labor) is 3 years. The unit is available in an array of "loud" colors as well as black.

INOVONICS

235-00/222-00 - AM NRSC Broadcast Processors

The Inovonics 235 triband AM broadcast audio processor is available in various versions with different audio bandwidths. **Features:** fully NRSC-compliant and AMAX-certified; slow "gain-rating" gated-AGC erases long-term input level variations; 3-band compressor/equalizer optimizes program spectral density; peak controller has adjustable clipping depth to maximize carrier modulation; RS-232 allows full remote control.

Designed for AM broadcasting, the 222 can act as a stand-alone processor, or interface with existing processing to provide an NRSC-compliant signal. **Features:** "adaptive" pre-emphasis to enhance signal intelligibility and presence; a sharp cut-off to eliminate adjacent channel interference; built-in peak limiter; feed-forward pulse width modulation (PWM) control.

INOVONICS

716-00 DAVID II - FM Stereo Processor/Generator

The DAVID II integrates FM audio processing and stereo generation into a single, easy-to-use affordable package. It lets you achieve an aggressive sound that is fully protected from overmodulation without sacrificing ease of setup. Features: digital synthesis of the composite multiplex signal; feed-forward pulse width modulation (PWM); built-in composite processor to maximize modulation density; unique "bassenhanced" feature (suppresses subaudible program components while augmenting legitimate "bottom-end"); internal combining for SCA and RDS subcarriers.

708-00 - Digital Synthesis FM Stereo Generator

The 708-00 provides cost-effective stereo generation for audio processors that don't have a stereo generator built in. Features: digital synthesis of the stereo pilot and MPX signals; front-panel metering; patented overshoot compensation with an adjustable pre-pilot composite clipper; adjustable composite equalization; internal combining for SCA and RDS subcarriers.

OMNIA

OMNIA - Family of All-Digital Audio Processors

Since the Omnia.fm all-digital audio processor made its debut, it's become the model for an entire family of processors dedicated to providing the best audio platform for different broadcast media. Now in addition to the FM model, Omnia is available in AM, Digital Audio Broadcasting and Internet Webcasting versions. Plus you can order Omnia.fm with specific algorithms for your station's format!

Omnia fm is a complete digital 4-band FM processor with digital stereo encoder. It utilizes an advanced design philosophy to provide extraordinary sonic performance with maximum control flexibility. From the useradjustable wideband AGC to the ThunderBoost EQ and non-aliasing final limiter, Omnia will not compromise your sound. What does all this technology add up to? Crystal clear power.

Features: software configured processing on a plug-in PC card with user adjustable wideband AGC; Thunder Boost EQ for cleaner, more powerful low end; four-band AGC; four-band dynamic peak limiter; non-aliasing final limiter that exceeds the smoothness of a well designed analog limiter; selectable composite clipper. Additional features: factory presets for various formats, plus user presets; daypart automation; front panel headphone jack; external control is via local serial RS-232 or modem; balanced XLR analog I/O; AES/EBU digital I/O; SCA/RDS subcarrier input; two independent composite outputs.

Options: new Omnia plug-in PC Card modules provide algorithms to further tailor the power of the Omnia platform; for crank-it-up-to-eleven loudness, choose the Hot model; for stations with more traditional formats like classical or jazz, choose the clean sound of the Veris. The new Space-EFX algorithms improve the stereo soundfield without creating unnatural imaging or increasing multipath.

Omnia.fm.jr is a lower priced, 3-band all-digital FM processor. All other features are identical to the Omnia.fm, including digital I/O and digital stereo generator and it can be upgraded to Omnia.fm at any time.

Omnia.am offers unrivaled levels of positive modulation with a smooth, FM-like quality plus adjustable filtering for NRSC and narrow band broadcast requirements throughout the world. Stereo or mono processing.

Omnia.net provides spectral and loudness consistency to webcasts. It optimizes audio processing for a wide range of bit rates and audio bandwidths, it also conditions audio processing for multimedia listening environments.

Omnia.dab optimizes audio processing for selected broadcast bit rates and audio bandwidths as high as 20 kHz. It's compatible with Eureka-147 transmissions.

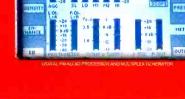

Call today and speak to one of our knowledgeable sales professionals about the right Omnia model for your station or application.

OPTIMOD[™] 8200 - FM Digital Audio Processor

The 8200 is a complete digital audio processing system for FM broadcast, fulfilling all of your station's processing needs: automatic gain control, compression, peak modulation control and stereo generation. Features: flexible software-based processing; select from several factory presets or adjust and store your own custom presets (up to 32) for instant recall; 5-band processing for comprehensive modulation control; fully software upgradable; automatic program switching for format changes throughout the day or night; 8200PC Software (included with purchase of 8200) provides full control of your station's processing from any location. It displays all of the 8200's meters and processing controls on a computer screen via modem communications or direct connection. Balanced XLR I/O and BNC composite outputs.

Options: the 8200D/32 basic digital interface card allowing 32 kHz AES/ EBU inputs and outputs; the 8200D/SRC digital interface card which can accept inputs of 32, 44.1 or 48 kHz AES/EBU and convert for output of 32, 44.1 or 48 kHz AES/EBU.

OPTIMOD[™] DAB 6200 - Digital Audio Broadcast Processor

OPTIMOD DAB 6200 is designed for digital radio broadcasting. A transparent limiter provides control of peaks for protection against digital clipping, while OPTIMOD processing structures ensure source-to-source consistency. Presets are provided for all radio formats and webcasting applications. It's compatible with Eureka 147 and all proposed IBOC DAB and Radio Mondial systems. **Features:** 2-band processing for gentle control of dynamics; 5-band processing with a flexible set of equalization controls; 20 kHz bandwidth for wideband DAB; bandwidth variable to 4 kHz for narrow-band, low-samplerate broadcasting (IBOC shortwave systems); computer control via modem.

6200 DAB Mfr. List \$6,500.00 Call For BSW Price

If you want to know what's new in AM processing, ask the guy who's been thinking about it since 1962.

BOB ORBAN is a quiet legend in radio. Which is ironic, considering all he's done to engineer louder, clearer, punchier sound in AM broadcast. But after nearly four decades studying, listening, and thinking about audio processing, that wealth of experience has found its way into the latest release of the OPTIMOD 9200 version 2.0. What began as the industry's first 100% digital, fully programmable AM processor is now ready to take major market sound into the new millennium – with unmatched performance, price, and, of course, Orban engineering.

ART AND SCIENCE

Version 2.0 takes the polished, proven sound of the OPTIMOD-AM and blends it with exceptional digital controllability. So now you have a much wider range of sound signatures at your fingertips, with factory presets that guarantee outstanding results even if you aren't an audio processing expert. Day-parting is easy, too, just by using the 9200's versatile remote control to recall presets.

Whether it's sports, news/talk or music, Orban's exclusive receiver equalizer overcomes the muddy sound of typical AM radios without sacrificing loudness or coverage. The 9200 delivers a bright, clear, punchy sound at a short years, it's become the best-selling digital processor in AM. With nearly four decades of Orban expertise behind it, it's the digital solution that deserves to be called an OPTIMOD.

THE OPTIMOD 9200

price that's even less than its analog predecessor. So small market stations can easily achieve major market sound, while larger stations can customize their sound precisely for their format and target demographic.

NOW HF READY

Version 2.0 adds presets that improve punch and intelligibility for narrow-bandwidth audio like shortwave. The same presets are perfect for MW stations needing to cut through co-channel interference at night. So the 9200 is now the perfect choice for MW broadcasters and HF broadcasters alike.

What's more, programmable bandwidth gives MW users the ability to tailor bandwidth to suit their program, and optimize coverage. You can use full bandwidth for music, lower bandwidth for voice. Or reduce your bandwidth if it's required for AM IBOC broadcasts. No other AM processor offers you more options, better engineering, or greater investment protection. That's why in just a few

EVENTIDE

BD500 - Digital Broadcast Delay

From the inventors of the digital talk show delay, comes an affordable solution for keeping profanities off the air. Features: Eventide's patented automatic catch-up circuitry; a user-definable function to divide the total available delay time into several discrete segments to protect against multiple obscenities that occur in succession; "cough" button momentarily edits audio entering the delay; exact digital read out of delay; a "quick read" bar graph to instantly confirm you have delay time left; RS-232 port and dry contacts for remote control. Balanced XLR1/O. Optional AES/EBU digital I/O.

Pump up your voice with the new ToolVox from Omnia.

TALK TO ME, BABY

The new ToolVox from Omnia is the all-digital microphone processor that jocks everywhere have been waiting

for. With ToolVox, voice talent is clean, full and powerful—

while the music remains untouched.

ToolVox is the best sounding mic processor ever because it harnesses the power of DSP. Bulletproof AGC, compressor and noise gate sections neatly handle everything from a whisper to a scream. An intelligent de-esser—the first of its kind—uses sophisticated FFT analysis to automatically find and remove every trace of sibilance, while preserving high end frequencies. Built-in phase rotators and TrueVerb from Waves® allow you to maximize vocal presence without affecting the rest of the air-

chain. And unlike some "flying saucers", the front panel is talentfriendly—just a single knob and selector switch control everything.

If you think this sounds great on paper, wait 'til your jocks hear ToolVox in the studio. It's the first microphone processor designed by people who really understand audio processing.

To find out more, call BSW at 1-800-426-8434. We're listening to you, baby.

1066 - Compressor/Limiter/Gate

This flexible dynamics control device allows you to choose the level and style of compression/limiting you like. Use the "Auto" button to automatically achieve a classic "dbx" sound, or use the independent attack and release controls to tailor the 1066 to your specific needs. Features: PeakStopPlus[™] circuitry offers stiff limiting without unwanted side effects; new lightpipe technology replaces standard LEDs, making the 1066 very easy to read and operate; sidechain input for ducking and frequency dependent limiting; balanced inputs and outputs with XLR and 1/4" connectors.

1066

The PreSonus M80 Eight Channel Microphone/Preamplifier with Mix Bus.

"...a microphone power tool...eight channels of no-fuss gain, a convenient mix bus and flexible I/O..." Loren Alldrin, Pro Audio Review

- Amazing front end for two, four or eight channel analog to digital converters including Digidesign[™] 888, MOTU[™] 2408 & others.
- High headroom mix bus allows true stereo imaging.
- High impedance inputs for exceptional instrument preamplification.
- Insert your favorite outboard gear via Servo Balanced Send/Return Jacks.
- Feed the inputs of any digital audio workstation with the M80's direct outputs.
- Chain multiple M80's together via the Auxiliary Input.
- Mix Bus assign for Multiple Mic/Instrument Stereo Imaging and monitoring via headphone out.

MP20

The Perfect Gift for Your Favorite Pair of Microphones.

"Wholly praiseworthy products seem to come along only once in a blue moon... The PreSonus MP20 is one of those rare products," Brian Knave, Electronic Musician

Brian Knave, Electronic Musician

- Each channel includes Polarity Reversal, Phantom Power, 20dB Pad, Rumble Filter, Full Output Metering and High Impedance Instrument input for DI with amplification.
- HUGE Class A Sound!
- 10Hz to 50kHz Bandwidth. EIN less than -127.5dB.
- IDSS Control Adjusts Harmonic Distortion to emulate a tube circuit.
- Servo Balanced Send and Return Jacks on Each Channel for External Balanced Processing.
- High Output Headphone Amplifier.

Instant Vocal Karma.

The PreSonus VXP Dual Servo Mic Preamp Voice Processor.

Your all-in-one, easy-to-use, set & forget total microphone processing solution!

- Mic Preamp: Hi quality transformer with Class A Discrete Input Buffer, Dual Servo Gain Stages. IDSS Control. Phantom Power. 20dB Pad.
- Dynamics Processing: 16 Pre-set compression curves. Downward Expander (Variable). Deesser (Variable). Crystal Clear Compression Optimized for Maximum Dynamics Control.
- Equalizer: Four Band, Semi-Parametric EQ with Low and High Shelving. High Pass Rumble Filter. Narrow Q select.
- Peak limiter Maximizes Bit Resolution for Digital Recorders and provides a separate Threshold from the compressor section.
- Optional 24-Bit, 48K/96K digital audio output card. CrystalTM converters, selectable sample rate external clock input, psycho-acoustic dithering. SPDIF and AES/EBU output connections.

FEEL THE

PreSonus products have vibe, making them favorites with engineers & artistsall over the world. Use PreSonus products for your own creative applications. PreSonus' huge sounding, musical micpreamps give YOU the creative edge! Packed with the latest in engineering excellence, high-end components and amazing features, unparalleled artistic attitude can be yours! If you don't have at least one PreSonus product in your rack, it is time you felt our vibe!

RANE

DC24 - Audio Dynamics Processors

This unique, 2 channel compressor/limiter/expander/gate offers split band processing for separate control over lows and highs. Features: controls for compression ratio and threshold, expander/gate ratio and threshold, limiter threshold; gain reduction LED meters; built-in crossover for split band processing; XLR and 1/4" I/O (switchable -10 dBv/+4 dBu).

SYMETRIX

422 - Stereo AGC Leveler

This stereo, wide-range, AGC amplifier and peak limiter keeps audio levels consistent by gently bringing up lower level audio and transparently limiting audio that is too hot. Radio stations use the 422 as a preprocessor to boost the "horsepower" of their on-air processors. The 422 is an excellent remedy to inconsistencies between commercials and other program material for TV stations, cable systems and automated radio stations. It also helps maintain higher average recording levels and prevents overloading the inputs of digital production systems. Features: target level control for easy setup; parallel input and output LED ladder metering; remote bypass port; balanced or unbalanced I/O via XLR and TRS connectors.

60 PRODUCTS, ONE PROMISE.

You've probably heard that Rane makes the best EQs and crossoverscaround. You heard right. But you've really only heard the beginning. Rane actually makes more than 60 different innovative audio products, from tiny low-noise mic preamps to sophisticated multi-function Digital Signal Processing stations. Rane products serve a wide variety of applications from sound stage to nightclub, recording studio to teleconferencing system, courtroom to cinema. But they all have one thing in common—the Rane philosophy. A dedication to quality we promised in our very first brochure. And a promise that is stronger than ever today. We vowed that each and every model we make will carry that distinctive set of Rane characteristics: top of the line performance, refreshingly easy to operate, remarkably cost-effective, extremely reliable, and thoroughly backed by the best technical and customer support in the industry. We've made good on this promise for nearly two decades, with legions of satisfied Rane owners to show for it. Whatever your sound needs might be, be sure to ask about Rane. You'll be very glad you did. We promise.

RANE

ME SERIES - Graphic Equalizers

The ME60 dual channel stereo graphic equalizer features 20mm sliders for precise visual control. **Features:** 2 x 30 bands of interpolating constant-Q filters; sweepable high and low-cut filters; ±12 dB boost/cut range; input level controls; overload indicators; bypass switches; balanced XLR and 1/4" TRS inputs and outputs; unbalanced RCA I/O; two-year limited warranty.

The Rane ME15B is a 2 channel, 15-band 2/3 octave EQ in a single rack space unit. The ME30B is a single channel unit with 30 bands (1/3 octave). Features (both units): a range switch for the 20mm faders allowing cut or boost of ± 12 dB or ± 6 dB; input and output level controls; balanced XLR or 1/4" TRS I/O.

TASCAM

CD-RW700 - Compact Disc Recorder

The CD-RW700 is TASCAM's budget minded CD recorder, but it's still feature-rich. Like most products in this price range, the CD-RW700 offers unbalanced RCA I/O, S/PDIF digital I/O in coax and optical formats, and utilizes consumer "for music only" CD-R and CD-RW media. However, this product stands above the crowd with a RAM buffer, 24 A/D-D/A converters for premium sound quality, digital gain adjustment and digital processing of fade in and fade outs from 3 to 30 seconds. **Features:** sample rate converter; adjustable gain on digital I/O; digital fade in/out from 1 to 24 seconds; Sync start (all or one track); RAM buffer; auto or manual track increment; wireless remote control.

CDRW700

RD12/RD20 - Audio Consoles

Transition smoothly into the digital realm with the Arrakis RD12 and RD20 consoles. With the power of 32-bit floating point digital signal processing, these consoles are the flexible control centers for today's digital and analog studios. They accept both analog and digital input signals, process them entirely in the digital domain and then provide output signals in both digital and analog formats! With the RD12 and RD20, your present analog equipment isn't made obsolete, and the consoles can easily accommodate future digital equipment so your transition to digital can be orderly. The RD1212 console comes standard with 12 input modules (2 mono mic, 5 digital stereo line and 5 analog stereo line). The RD2018 has 18 input modules (2 mono mic, 8 digital stereo line and 8 analog stereo line) and 2 option slots (other console configurations are available). Features for both include: control room monitor module; 2 output master modules; meter module; three VUs; clock; timer; cue speaker. Options for both include: line selector modules, dual fader phone module with mix-minus; studio module with talkback controls and more.

BROADCAST AUDIO

BA1230 - Digital Console

The BA1230 is a fully digital 12-channel on-air console with 30 inputs, 12 individual fader controls, A and B inputs on each channel and two 4x1 auxiliary input switches. With 30 inputs, engineers can more efficiently parallel digital and analog sources from audio switchers and computer systems to the console to keep a broadcast signal on the air even in the event of automation or software failure. The BA1230 is equipped with up to 12 interchangeable digital or analog input board modules each providing two channel inputs by separate XLR connectors. Mixing and audio signal processing are performed by a state-of-the-art DSP, designed in partnership with Graham-Patten Systems. Features: a total of 30 available stereo inputs; two separate air inputs; full output metering; two stereo and one mono output bus; time of day/event timer combination; phone and monitor source select and level controls; digital inputs support both AES/EBU and S/PDIF formats and accept sample frequencies from 24 to 50 kHz (all digital inputs contain sample rate converters); analog inputs are balanced XLR connections and offer individual analog level adjustment for both A and B inputs; high-performance 18-bit A/D converters. Options: individual input modules, fader start/stop option; left or right mount meter bridge; overlays and side panels.

Vmix When space is tight

ROC-5 For your smaller studios

LOGITEK

LOGITEK

NUMIX - Digital Audio Console

Numix's ergonomic shape gives your studio a modern, open look. The enclosures are low and narrow providing better line-of-sight and access to video monitors behind the console. The control surface is modular in design. Start with a Selector wedge and add as many fader wedges as you need. The surface is as flexible as you choose. Faders can be limited to just one or two inputs or can access up to every input and output on the Audio Engine. This means smaller, less expensive hardware can still get a big job done.

Stored setups can be created which will allow each operator or day part to have a different configuration. You can even have multiple control surfaces connected to one Audio Engine. These surfaces can run independent studios or act as one large console for talent and producer-type shows.

The Numix connects to the Audio Engine with a single cable which makes installation a snap. Its flexibility, modest size and ease of use make it a clear choice for a full featured console. Call and talk to our sales professionals today.

*Price Based On Configuration

ROC-10 - Digital Audio Console

The Logitek ROC-10 console control surface is ergonomically designed with 10 fully assignable faders, giving you easy access to up to 64 inputs. Separate audio and control sections allow you to keep audio out of the control room. Features: easily connects up to 64 inputs and outputs – analog or digital; analog inputs/outputs have 20-bit AD-DA converters; digital inputs take either AES or S/PDIF and have sample rate converters for each; each audio engine supports two control surfaces and replaces the need for an audio switcher; LCD display shows audio sources and their destinations. ROC-10 consoles are configured with a control surface in your choice of colors (white or gray), AE32 audio engine with communication controller and power supply, one SHARC[™] DSP card for each control surface used and your choice of digital and/or analog I/O cards (4 stereo ins/outs per card) and mic preamps.

EVENTIDE

VR204/VP204 - Digital Audio Logger

This four-channel digital logger is extremely easy to use, and because of its superior audio quality and low cost, is the perfect logging tool for radio stations in any market. Features: records more than 500 hours (20+ days), divided among up to 4 channels, on a single DAT tape; built-in hard disk memory module which allows continuous recording while the tape is playing back an earlier segment, or even if the tape runs out (when the tape resumes recording, the content of the hard disk is transferred to tape, maintaining the complete recorded log); built-in passcode security matrix; up to 4 special event flags that allow you to mark and retrieve important segments as they are recorded. VP204 is a play-only model that is ideal for the GM's or PD's desk or for the group's main office. Both the VR204 and the VP204 can play back any of the 24 channels recorded on an Eventide VR240.

TCR4[™] - Multitrack Hard Disk Recorder

Tired of maintenance headaches and costs associated with DAT recorders? Relief is here – no heads to maintain, no tape to break and lightning fast random access to all recorded audio. TCR4's jog/shuttle, scrub and auto-locate features beat the performance of analog and digital tape machines. It comes out of the box ready to go, with standard XLR connections for analog and digital audio, LTC, VITC, sync references (word clock, AES, video), GPI/O, P2 (9-pin VTR emulation) and remote control ports. Looking for an "audio VTR"? TCR4 also makes a perfect low-cost replacement for videotape machines that are tied up doing audio transfers. The TCR4 now also includes DVD-RAM!

INSTANT REPLAY® 2.0 - Hard Disk Player

360 Systems Instant Replay is the original morning-show Hot-Keys[™] player for sound effects and music beds. This rugged, professional-quality digital audio hard disk recorder/player gives instant access to a vast library of recordings ranging from a split second to almost unlimited duration. Features: stores up to 1,000 audio cuts of various lengths; records with a "start on audio" feature for tight starts; built-in keyboard locates cuts by name/number; ten banks of 50 Hot-Key buttons (find a cut by typing its name or ID number, or, if it has been assigned to one of the 50 Hot-Keys, just hit its associated key for absolute instant access); internal hard disk stores over 24 hours of random access audio; external port for outboard removable disk drives to expand storage and archival options; printer port with printout options for cut lists, bank maps, playlists and legend overlays to label Hot-Keys; built-in D-NET File Transfer Network capability lets you transfer audio files, including the cut names and running times to DigiCart/IIs or other Instant Replays; balanced XLR analog I/O; AES/EBU digital I/O. Playback Features: simply press a Hot-Key to play a cut - audio starts instantly; when the cut is finished the audio is instantly re-cued; jump from one cut to another with completely seamless transitions; audio cuts can also be selected as part of a play list for sequential playback; different play lists can be stored for each of the 10 banks, and can be recalled for playback or editing at any time; loop function causes a cut to play back continuously and seamlessly. The standard Instant Replay (DR-552-24) includes 24 hours of internal digital audio storage. Options: Gig Bag (GPTPDC \$115.00 Mfr. List).

DIGILINK IV - Digital Audio Storage/Automation Systems

The Digilink IV is an award-winning series of digital audio workstations designed for professional broadcast applications. Not a failure prone PC computer with a sound card, the DL4 is a dedicated digital audio record and playback jukebox that stores audio on high-quality SCSI hard disk. As a hard disk audio jukebox, the DL4 is not subject to viruses, network crashes, software conflicts, and other PC related problems. The built-in audio switcher for satellite and other sources and the logic control for console and satellite interface make the DL4 ideal for Live On-Air cart machine replacement, Hard disk automation and Satellite automation. Because the DL4 features 3 or 6 playback outputs and 1 or 2 Record inputs, a single DL4 workstation services as many as two On-Air studios and two Production/Scheduling studios from a single audio library. There is therefore no need for delay between Production and On-Air playback as found in computer based systems that must produce a spot in one studio and network transfer it to the Air studio. If there is a need to move an audio file from a PC to the DL4, the DL4 features a simple transfer utility. Because the DL4 has BOTH analog and digital inputs and outputs, the DL4 can be easily integrated into any existing studio.

With your audio secure in the DL4 hard disk jukebox, the workstation may be controlled in a number of ways to get audio to Air. The DL4 features an optional LCD control panel for local or remote control of record and playback, similar to a familiar cart machine.

Windows-based PC computers may run Arrakis software for Scheduling, Production, Live Air, Automation and Logging. Without the audio locked inside the computer, a PC makes an excellent control device. If the control PC fails, the DL4 workstation will continue to play to Air.

NEWSREADY32 - News Room Software

NewsReady32[™] is a cutting edge, 32-bit Win95/NT newsroom system based on the original NewsReady and RadioReady Systems used by over 2500 radio stations. It integrates and organizes your wire services, news scripts, phone contacts, school closings, and audio bits all on the same screen and offers built-in word processing and audio editing. Digitally record and edit all your phone bits and automatically time-record all your satellite actuality feeds. Use with all Windows-compatible sound cards. Requires Pentium computer with Win95 or WinNT, 32 MB of RAM; 17" or larger monitor strongly recommended. Can run stand-alone, or multi-user on a LAN. LANs require a customer-supplied Windows, NT or Linux-based server. Includes 1-year of 24-hour 800# support. and a free upgrade through manufacturer. Training, installation and maintenance packages also available.

NewsReady32 is now used by Clear Channel stations from coast to coast.

MD-301MKII - MiniDisc Recorder/Player

Tascam's popular MD-301 just got better. Now in its second generation, this MiniDisc recorder features 20-bit A-D/D-A converters; sample rate conversion facility for digital inputs; monaural recording mode, front panel keyboard connection (PS/2) and XLR balanced analog inputs/outputs (plus RCA I/O). Conveniences for the broadcaster also abound on the MD-301MKII. There are timer record/play, auto track and sync record functions and many program play options. Editing is easy with divide, combine, erase, move, title and undo. The MD-301MKII boasts a signal-to-noise ratio (playback) of better than 94 dB and the low total harmonic distortion rate comes in at less than 0.013%. It also features an ATRAC (Adaptive Transform Acoustic Coding) compression system. Wireless remote control is included.

360 SYSTEMS

TRC8 - Multitrack Hard Disk Recorder

For pros that know the difference - this high-end 8-track hard disk recorder comes loaded with all the extras and delivers top-of-the-line sonic quality. Made by 360 Systems, the originators of rugged hard disk recorders for broadcast, the TCR8 offers true 24-bit audio performance for outstanding recordings. It comes with a complete set of synchronization and VTR emulation options; and an intuitive front panel design that makes setup easy. Features: large display with cut titles, status indicators and detailed menu prompts; supports all frame rates in both NTSC and PAL formats; sample rates extend from 44.1 kHz to 96 kHz; standard internal hard disk provides 2 hours of 8-track recording (optional drives can extend storage capacity to over 96 hours of track time); includes balanced XLRs for analog I/O; AES/EBU digital I/ O; LTC and VITC; sync to word clock, AES black, or video reference signals; RS-422 P2 protocols for VTR emulation (emulates BVW-75, DVW-500 and PCM-7040); GPI/O; control I/O for keyboard titling and multi-machine remote control. Production/Editing: cut-copy-insert editing with tape-style scrub; jog/shuttle; auto locate; auto punch; read-modify-write; varispeed; crossfades; offsets; individual track slip; and more. Storage: supports hard disks of unlimited size; current internal hard disk options range up to 50 gigabytes for total recording times in excess of 12 hours for 8 tracks at standard broadcast 48 kHz sample rate. For recording on the go, check out the front panel drive bay, which supports high-density SCSI removable disks and hard disks. Rear panel SCSI allows use of external drive arrays. A 250 MB Zip® drive is included for economical storage, and can be used to load software upgrades received via e-mail downloads. Note: the TCR8 now also includes DVD-RAM!

ALESIS

ADAT-XT20/ADAT-LX20 - Multitrack Recorder

The Alesis ADAT-XT20[™] offers a new standard in audio quality while remaining completely compatible with the huge foundation of 100,000 ADATs in use worldwide. Using ADAT Type II, the modular digital multitrack recording format that writes 20-bits to tape, the XT20 records 8 tracks of true, linear 20-bit digital audio onto tape (16 times more detailed than the 16-bit sound of compact discs), without using external converters or multiplexers. Features: intelligent software-controlled tape transport; familiar track copy, tape offset and track delay functions; 20-bit, 128-times oversampling D/A converters; onboard 10-point autolocation system, automated punch in/out; compatible with ADAT Type I (16-bit); six-pound die-cast aluminum chassis; balanced analog I/O via 56-pin ELCO connector; unbalanced RCA analog I/O (x8); optical digital I/O; optional remote controller (BRC).

ADAT-LX20 provides an economical solution for capturing the power of the ADAT format. It offers the same 20-bit ADAT type II digital recording format as the XT20, but lacks some of the high-end control features such as the 10-point autolocation system (ADAT-LX20 offers 5 locate points, etc.)

FOSTEX

VR800 - Multitrack Recorder

If you're looking for the ultimate in digital recording affordability, check out the VR800 digital multitrack from Fostex. Small, compact, yet incredibly powerful, it's the ideal partner for any digital mixing console, offering simultaneous recording of 8 tracks to the media of your choice via the ADAT optical interface. The VR800 has the ability to record at 16 bits with a sampling frequency of 44.1kHz across all of its 8 tracks. But one of the great things about the VR800 is that you're not limited to just 8 recording tracks. You get 24 uncompressed tracks in all. With this type of power you can record different versions, then choose which of the 8 tracks you wish to record or play back. The VR800 uses a digital non-linear recording system, so non-destructive Copy Paste, Move Paste and Erase functions are available, along with Undo/Redo commands. A handy preview feature enables you to repeatedly listen to data 1 second before and after any locate point. Ease of editing is also aided by the ability to display scrubbed audio graphically, making intricate "on-the-fly" edits simple. Handy locate tools include Auto Locate, Auto Return/Play and Auto Punch In/Out. A built-in metronome with eleven signature types, tempo control and MIDI clock output means your recordings will always be in time. And in addition to supporting MTC, MMC and Fostex System Exclusive Message, the VR800 also features Word Out for high-precision synchronization with external devices. Finally, your chosen media can be split into 99 "virtual reels" each with their own characteristics such as name, locate points, tempo and MIDI timing.

D-108/D-160V2 - Multitrack Recorders

Fostex D-108 and D-160V2 are the next generation of "stand-alone" digital multitrack recorders improving on the industry standard 16-bit linear recorders, the D-90 8-track and D-160 16-track machines.

Key features of the D-108 include Fostex's widely acclaimed FDMS3 disk management technology allowing, for example, up to 1,548 track minutes of 44.1kHz full-bandwidth recording on an 8.2 GB hard drive (products ship standard with 5.2 GB hard drive; 8.2 GB hard drive is optional). A total of 24 tracks are available, of which 8 can be simultaneously recorded or played back at any one time allowing you to keep multiple "takes" of your tracks. The D-108 also offers an additional 99 memory locate points in addition to the 6 memory edit points, 99 "virtual reels" and a new graphical preview function, all of which are easily displayed on the large FL display. The most innovative function is the ability to export and import the tracks of any project as PC standard .WAV files to facilitate editing, processing and sound file conversion using any popular PC-based editing software. SCSI-2 is standard, with balanced I/O and comprehensive timecode facilities available on optional plug-in cards.

D-160V2 is a 16-	track machine. It also ships	with a 5.2 GB hard drive.

MX-2424 - Multitrack Recorder

The MX-2424 is a revolutionary product – a 24-bit, 24 track digital audio hard disk recorder. It ships with a 9 GB internal drive, which equates to roughly 45 minutes of recording time across all 24 tracks. If that's not enough, you can slave more drives off the SCSI Wide port on the back panel, or build a drive into the front panel standard drive bay. The front panel can also be used to install an approved DVD-RAM drive for back-up, using increasingly affordable DVD-RAM media (optional). Also, the MX-2424 can record to Macintosh (SDII format) or PC (.WAV format) hard drives, allowing you to later export to the computer for other functions. The MX-2424 can provide 24 tracks of recording at up to 48kHz, or it can be switched into a 12-track 88.2 kHz or 96 kHz recorder. The analog I/O option (not included at base price) has 96 kHz converters built in, so you REALLY CAN record 24-bit, 96kHz audio right from the machine without interpolation. Features: unlimited virtual tracks; 100 levels of undo; non-destructive or destructive recording modes; SMPTE synchronization, Word Clock, MIDI time code and MIDI machine control; the included ViewNet MX software runs on either Mac or PC, and connects with standard ethernet lines to provide DAW style editing, as well as system set-up screens and virtual track management; AES/EBU and S/PDIF 2 channel I/O. Options: digital I/O cards offer 24 channels of TDIF, Lightpipe or AES/EBU I/O; analog I/O card (the analog and digital slots are separate, so the analog option and one digital option may be installed simultaneously); RC-2424 remote control.

SAW SERIES - Recording/Editing Software

Based on the already established and popular SAWPlus32 design, the new enhanced SAWPro is the ultimate SAW product for the professional, incorporating 24-bit/96 kHz capabilities, and new enhanced 3D rendered graphics, simultaneous playback of up to 32 mono or stereo tracks, and support for up to 12 stereo sound cards, translating into a maximum of 24 input/output channels.

With SAWPlus32 easily record and edit up to 32 mono or stereo tracks with 16-bit resolution (CD and DAT-quality sound files) directly on your computer's hard drive. SAWPlus32 supports up to twelve stereo sound cards for a maximum of up to 24 physical inputs and outputs, and automatically converts 8 bit, 16 bit, mono or stereo files of any samplerate, playing them all seamlessly in sync – live…in REAL-TIME! The elegance and speed of the SAW's design offers unmatched efficiency in taking a project from conception to completion.

SAW32 is identical in design to SAWPlus32, but has 16 mono/stereo tracks and supports up to 6 stereo devices.

Even the most basic of the SAW products, the SAW32LITE offers the same functionality as SAWPIus32, but has 8 mono/stereo tracks and supports up to 3 stereo devices.

SONIC FOUNDRY

SONIC FOUNDRY'S AWARD-WINNING SUITE OF PRODUCTS IS THE TOTAL BROADCAST PRODUCTION SOLUTION.

ACID PRO[™] is the definitive production library. ACID PRO, and the Loops for ACID library offer a fast and easy, royalty free alternative to subscription libraries and music bed services. Use any of your own audio content, in .WAV or .AIF format, combined with anything from the Loops for ACID library and you've just created a customized music bed for a fraction of the price you might normally have spent with a service. ACID now includes wave editing and digital effects such as reverb, chorus, and delay.

Vegas Pro[™] is Sonic Foundry's ultimate broadcast production tool. Music beds and background elements can be combined, mixed, and edited quickly. Create multiple versions very easily from a single Vegas project. Record voice-overs directly into Vegas and edit with speed, power, and convenience that you've never experienced before. Save to .WAV or streaming file formats and you're ready to go directly from Vegas to air.

Sound Forge[™] 4.5 is still the standard by which audio editors are measured. 48 tools, effects, and processes including drag and drop audio mixing for voice-overs, compression, EQ, non-destructive play list editing, and batch processing. This is the workhorse that you can depend on. Sound Forge also supports DirectX plug-ins such as the improved Noise Reduction or unique Acoustic Mirror.

CD Architect[™] provides layout tools that are unmatched in the industry and supports over 150 recorders. CD is still a great way to get audio from place to place and CD Architect allows you to read audio tracks from CDs, record from DAT, or digitize material through your sound card.

SONIC DESKTOP

SMARTSOUND - Soundtrack Software

SmartSound[®] is the revolutionary new family of audio software products that allows broadcast professionals to create soul-stirring soundtracks in minutes instead of hours. It is the first and only software to approach audio creation from a visual creator's perspecitve - not a musician's. And because of its patented, award-winning technology, visually creative people can open the program and begin creating emotion packed, precisely timed soundtracks with amazingly professional results in minutes.

it's simple. SmartSound takes fully orchestrated, high-quality, real music and sound effect files and embed them with special information. This information allows the patented software process to manipulate the audio in almost any way you choose - automatically. This gives you complete control over the soundtrack creation process without the need for time consuming sound editing of difficult music compostion.

The software includes a complete library of 50 royalty-free, movie-guality selections written and performed by top hollywood professionals. These selections are designed to work with SmartSound's patented technology. You can save your finished soundtracks in most industry standard audio formats.

The optional Audio Palette and Sound Pallette series of CD-ROMs lets you add as much "Smart enabled" music and sound effects as you want - at your own pace. Each pallette contains plenty of versatile selections within specific areas of interest including: action, film scoring, documentary, narration, romance, commercials, sound effects and many more. New palettes are released each month.

BROADCAST PRODUCTION SUSSEE

01V Digital Audio Mixer

AX16-AT ADAT Audio I/O Expansion Card

AX88 Analog Audio I/O Expansion Unit

Do All of Your MultiTrack Recording, Mixing and Sound Processing On Your Desktop

The Yamaha DSP Factory gives you a constant supply of audio production firepower. It is based around the DS2416 PCI audio card with stereo analog and digital I,'O jacks. The PCI card includes DSP chips with plenty of muscle to handle all of your recording, mixing and effects processing needs. In other words, your computer's processor never limits the DSP actory's extensive capabilities – all it is to do is run your favorite recording software. DSP Factory expands to fit your specific needs with the AX44 4-ch nnel I/O breakout box, the rack mount AX88 with 8 channel of 24-bit ana og I/O, or the AX16-AT PCI card providing two pairs of ADAT-format optical connectors.

Get the full power from your DSP Factory with Minnetonka MxTrax software (specially bundled with DSP Factory). MxTrax takes full

AX44 Analog Audio I/O Expansion Unit

advantage of all the processing power in the DS2416 PCI card to offer real-time mixing with drag-and-drop custom mixers, non-destructive waveform editing, EQ, dynamics processing, automation and more.

For even more power and flexibility, add Yamaha's O1V, a fullfeatured programmable 24-input digital mixer to your system. Its extensive analog mic and line inputs, digital inputs, effects and automation will come in han dy during recording. Plus, you can map the O1V's faders and knobs to MXTrax to act as a hardware controller for on-screen mixing.

However you configure your DSP Factory, you're ertain to wind up with a killer broadcast production system that's cost effective, excellent sounding and easy to use.

SOUNDSCAPE

IBOX8LINE 8-channel TDIF to analog interface sold separately

MIXTREME - 16 Channel PCI Audio Card

The Mixtreme PCI card provides 16 channels of 24-bit digital input and output via two industry standard 8-channel TDIF (Tascam Digital Interface) ports, but it also has 24-bit digital mixing and real-time DSP effects plug-ins.

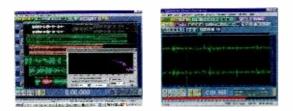

The fully configurable Soundscape V2 mixer puts a 24-bit, 16 in/out, 16 bus virtual digital mixer at your fingertips, running high-end DSP effects plug-ins from Wave Mechanics, TC Works and of course, Soundscape. DSP-based mixing has a very important advantage compared to computer based (i.e. native) effects and mixing. The latency (delay) for most computer-based mixers is anything from 100 ms upwards, which creates an extremely annoying delay when you try to record while playing back other tracks, or if even you just want to use the "real-time" effects. Mixtreme has a real DSP-based digital mixer on-board, and so what you hear is real-time.

Mixtreme's dual TDIF ports allow direct connection to a digital console or Tascam DA-88 (see page 64). Optionally, you can connect two IBOX8LINE 8-Channel TDIF to analog interfaces to Mixtreme, for 16 channels of 20-bit analog I/O. For ADAT users, there is the IBOX8ADAT TDIF to ADAT converter, and you can connect two of these, or combine an ADAT and analog interface.

Soundscape is now offering the Mixtreme 2000 PowerPAK that includes the Mixtreme card, plus the Soundscape iBOX 2-line interface, plus a bundle of software including: Nemesys GigaSampler LE synth program, Sonic Foundry ACID "Style" loop player and loops, Emagic's MicroLogic AV sequencer/audio recorder/editor, Sonic Foundry SoundForge XP 4.5 recording/editing software, Seer Systems SurReal synth engine, Wave Mechanics Reverb, plus Soundscape's Audio Tool Box – real time DSP studio multi effects plug-ins.

YAMAHA

DSP FACTORY DS2416 - Digital Recording Hardware

The DSP Factory DSP2416 offers the mixing power of the Yamaha O2R digital mixer complete with 24 channels of digital mixing, on-board digital effects and dynamics processors plus 16 tracks of hard disk recording with up to 32-bit resolution. Features: 24-channel, 32-bit digital mixer with 10 bus outputs and 6 aux sends; 4-band parametric EQ; 26 dynamic processors, 2 effects processors equal in quality to the REV500 (see page 24); channel delay on 20 channels; 8 track simultaneous recording with 16 track playback with up to 32-bit resolution; signals to and from recorder and mixer remain in the digital domain; compatability with a wide variety of control software programs; stereo analog I/O on RCA connectors; stereo digital (coaxial) I/O.

It is easy to expand the DSP Factory by adding multichannel interface boxes. The AX44 installs into the drive bay of a PC tower and provides four 1/4" analog nputs (two allow mic level) and four 1/4" analog outputs, plus a headphone jack. Two AX44s can be be connected to one DSP2416 card to provide eight additional analog inputs and outputs.

The AX16AT is a PCI card that provides two pairs of ADAT optical connectors for transfering 16 tracks of digital audio to and from the DSP2416 card at resolutions of up to 24-bit.

For maximum I/O power choose the AX88. This single-space rack unit offers eight 24-bit, balanced inputs and outputs. Main inputs 1 and 2 offer front panel XLR/phone combo jacks and main outputs 1 and 2 also feature XLR and 1/4" connectors on the back panel. Input levels are selectable for +4dBu and -10dBv. The AX8816X links to an AX88 for an additional 8 channels of I/O (for a total of 16 channels).

MxTrax[™] (see page 68), an easy-to-use multi-tracking and mixing software program offered by Minnetonka Audio Software, is designed specifically for the Yamaha DSP factory.

EAS - EAS Encoder/Decoder System

From the maker of the trusted ARC-16 remote control system comes this very "broadcast-friendly" EAS system. Features: six balanced audio inputs; one button weekly test is completely self contained, minimizing interruptions to busy operators and reducing training time; familiar telephone-style keypad makes entry fast, easy and natural; 80-character display shows the whole command at once; menus are organized to make routine tasks quick and easy; broadcast-quality audio storage helps maintain a consistent air sound, even in the auto-forward mode; a plain paper printer is included, logging all system activity for you; three RS232 interface ports for computer control and monitoring; works with Burk's ARC-16 and other transmitter remote controls; 600 ohm balanced output; line/monitor output; eight direct digital inputs and outputs. Options: RX-4 EAS monitor receiver system with four receiver modules, individually adjustable balanced outputs, builtin selectable monitor amp and speaker (specify AM, FM or NOAA Weather receivers); LX-4 EAS audio switch with four independent program channels that accept one common EAS channel.

TFT

EAS911 - EAS Encoder/Decoder System

With over 20 years of emergency broadcast experience and 4 years of development and testing with the FCC, TFT has developed a comprehensive, yet intuitive and easy to use EAS system - the EAS 911. This modular system can be configured to fit a wide variety of applications. Features: sequentially lighted keys guide operators through EAS tests or alerts with ease; all programming. tests and entry are performed on front panel buttons (no external programming device required); help key provides operational and program assistance; practice key allows off-line operator training; available with up to 10 audio inputs; optional plain paper printer and built-in digital recorder available; control from multiple locations (up to 16) with optional remote control status modules via twisted pair wiring up to 5000 feet away. The EAS911R4 encoder/decoder (priced below) includes printer, digital recorder and four audio inputs. Options: EAS930A multi-module receiver comes standard with 3 receivers (AM, FM, or NOAA Weather) with space for a fourth module; EAS941A remote control status module that duplicates major system functions; EAS940A program/transmitter interrupt unit that automatically interrupts program audio and inserts EAS audio for unattended operation applications.

PERSONAL MONITOR SYSTEMS AND HEADPHONE AMPLIFIERS

Rolls has introduced a complete headphone submixing and distribution system. The HM Series combines a main stereo mix with up to four mono auxiliary mixes, and distributes all signals

out via a standard DB25 cable to the remote units. There you make your own mix. Plus, we've added compression and equalization to further custom tailor your mix. You won't find a more complete headphone monitoring system.

Rolls also offers the PM50s and PM50sOB (optional battery) Personal Monitor Amps. These units mix a 1/4" TRS stereo monitor signal with an XLR microphone signal. They make the perfect "more me" box - you mix your own voice/ instrument with the main mix.

The PM52 replaces a monitor speaker. It requires no power - you simply plug this inline with monitor speakers, plug in your headphones and play.

Finally, our very popular line of headphone amplifiers are sure to keep even the most particular listener happy. The HA43 is a simple four-channel heaphone amp with a single 1/4" TRS stereo input and four 1/4" TRS stereo outputs. The RA53 Five

Channel and RA62 Six Channel Headphone Amplifiers feature individual channel inserts and a variety of input options. You need volume? We got it. All our Monitor Systems and Headphone Amps are loud. Even drummers love 'em.

ROLLS

RA62 - Headphone Amplifier

This inexpensive headphone amp offers 6 stereo channels with independent output controls on each channel. The stereo input includes a pan control and a mono switch to mix two mono sources. Insert jacks are provided so each can be used independently.

STR-19 SERIES - Stick-On Series Rack Mount Units

Easily mount your RDL Stick-On series audio/electrical units into one 19" rack mount system. Each holds 10 or 12 stick-ons with velcro attachments and allows for uncomplicated cable harnessing. STR-19A mounts up to 12 Stick-Ons in compact 19" rack mount. STR-19B mounts up to 10 Stick-Ons at an angle, allowing for easier adjustments of all Stick-On units.

SMK-12 - Stick-On Series Mounting Kit

The SMK-12 allows removable surface or edge mounting of RDL Stick-Ons onto a panel with velcro fasteners. Panel attaches to surface with screws or foam adhesive pads.

SS 2.1/BNC

Composite – AES/EBU Switcher/Router

Passive switching/routing with 2 composite audio, video or AES-EBU inputs to 2 composite audio, video or AES-EBU outputs, or vice-versa.

SS 2.1/TERM Stereo Audio Switcher/Router

Passive switching/routing with 2 stereo inputs to one stereo output or vice-versa.

3X2 Dual Stereo Audio Switcher

Active crosspoint switcher with 3 stereo inputs and 2 stereo outputs.

6X1 Stereo Audio Switcher/Router

Passive switching/routing with 6 stereo inputs and one stereo output, or vice-versa.

SS 3.1 Stereo Audio Switcher/Router

Passive switching/routing with 3 stereo inputs and one stereo output or vice-versa.

DSC-20 Dual Satellite Controller

Adds remote control capability to the Scientific-Atlanta Encore, DSR-3610, AD-4595, Virtex StarGuide II/III, Com Stream and Wegener receivers, allowing memory/service - audio changing by automation systems or contact closures.

USC-16

Universal Satellite Channel Controller

Offers remote control capabilities with multiple channel/memory selection for the Scientific-Atlanta 7300/DAT-32 series, ENCORE, DSR-3610 and AD-4595; Comtech/Fairchild DART-384, and Ariel type receivers.

PBB-24 Programmable Button Box

Provides 24 SPST buttons to remotely control external equipment and/or be configured to generate user-programmable ASCII strings.

IPC-1/IPC-2 Level Converters

IPC-1 is a bi-directional IHF to professional level converter. IPC-2 is a twin IHF to professional level converter.

8X2D Dual Stereo Audio Switcher Active crosspoint switcher with 8 stereo inputs, 2 stereo plus 2 mono outputs.

10X1 Stereo Audio Switcher/Router Passive switching/routing with 10 stereo inputs and one stereo output or vice-versa.

SS 8.2 Stereo Crosspoint Audio Switcher Crosspoint switching/routing with 8 stereo inputs, 2 stereo plus 2 mono outputs.

Allows telephone interfacing with programmable DTMF to ASCII conversion, along with 16 relay operation.

Stereo Audio Switcher/Router Series

SS2.1/BNC offers passive switching/routing with 2 composite audio, video, or AES/EBU inputs to 2 composite audio, video, or AES/EBU outputs. **Features:** remote control/status; RS-485 multi-drop serial port; last selected source memory; BNC connectors.

SS2.1/TERM offers passive switching/routing with 2 stereo inputs to one stereo output or vice-versa. **Features:** remote control/status; RS-485 multi-drop serial port; last selected source memory; pluggable screw terminal connectors.

SS3.1 passively switches or routes three stereo inputs to one stereo output or vice-versa. Features: step input with manual or automatic sequencing; remote control/status; RS-485 serial port; input one is normally routed to the output; gold contact relays; balanced I/O.

3X2 is designed to accommodate 3 stereo inputs and 2 stereo outputs. The inputs may be assigned to either or both stereo outputs. **Features:** multi-turn input trimmers; remote control via serial port or contact closures; two control modes (alternate action mix mode and latching control); cascade multiple units; active balanced I/O.

6X1 passively switches or routes 6 stereo inputs to a single stereo out. **Features:** front panel selection switches with LED indicators; front panel safety lockout; programmable power-up selection; output muting; remote control with status; remote step input; RS-232 serial port; balanced I/O.

8X1 DAS routes any one of eight AES/EBU digital inputs to split outputs.

8X2D accommodates 8 stereo inputs, 2 stereo and 2 mono outputs controlled via front panel switches with LED status indicators. Features: internal silence sensor with LED indicator; multi-turn input trimmers; programmable power-up selection; output muting; remote control with status; remote step input; RS-232 serial port; active balanced I/O.

SS8.2 provides active crosspoint switching with 8 stereo inputs, 2 stereo plus 2 mono outputs.

10X1 passively switches or routes 10 stereo inputs to one stereo output or vice-versa. Features: front panel selection switches with LED indicators; front panel safety lockout; programmable power-up selection; output muting; remote control with status; remote step input; RS-232 port; balanced I/O.

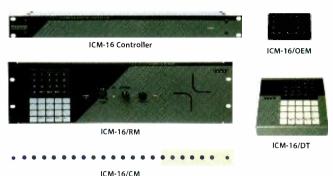

SS12.4 accommodates 12 stereo inputs and 4 stereo outputs with matrix-style audio routing. **Features:** front panel 16-character, 2-line display shows source and destination descriptions; rotary encoder knob; three switching modes (mix, overlap and immediate); multi-turn input and output trimmers; RS-232 and RS-485 ports; optional remote control units.

SM6 lets six stereo inputs feed a single stereo output (or dual mono). Sources are added to the mix via front panel push-button select switches. Features: 15-turn input trim pots; supports balanced or unbalanced sources.

PM64 - 32x32 Router/Level Controller

This programmable, fully balanced router/level controller delivers 32x32 matrix switching, level control and metering for audio signals. Suitable for recording studios, production facilities and broadcast applications, the PM64 is the most technologically advanced router in its class. Each source and/or destination level can be controlled via internal programming and MIDI/RS-232 ports. Wiring is accomplished by means of DB25 connectors or screw terminals (via optional DB-8 terminals) on the rear of the unit. Besides routing line level audio signals, this unit is capable of automating outboard devices by means of MIDI command capability. Each setup can be stored into non-volatile internal memory (90 program storage capacity for any application). **Features:** 32x32 inputs and outputs configured as mono or stereo pairs (expandable to 1000x1000 with multiple units); level control range -100dB to +10dB in 1dB increments; meter range -30 dBV to +20 dBV; program memory for 32 input levels, 32 output levels and 16 channel MIDI patch map; gold plated DB25 female connectors.

STUDIOHUB

STUDIOHUB - Console Harnesses and Studio Wiring System

This plug-and-play system makes studio wiring and rewiring simple. Using CAT-5 shielded twisted pair (STP) cables, StudioHub efficiently routes both analog and digital signals throughout a facility. STP cable, widely used in the computer industry, is preferred for analog and digital signals in broadcast for many reasons: 100-ohm impedance and low capacitance range; excellent performance at audio frequencies; wide bandwidth and wide availability.

Starting with easy-to-use console harnesses consisting of connector hubs and pre-wired cables (customized console pin-outs at one end; RJ-45 at the other), StudioHub dramatically reduces time for on-site wiring. Beyond console harnesses, StudioHub has pre-wired source cables, connector blocks and companion amplifiers for the rest of your studio equipment. Accessories include: balancing amplifiers, microphone pre-amps, headphone amps and various switching and adaptor plates using the StudioHub's standard RJ-45 connector type, and the unique DC-Link auto power system.

StudioHub comes in complete console and studio wiring packages (as well as custom ordered parts and accessories). Pre-made console harness kits include cabling for all console A+B inputs, and program and monitor outputs (specify console type when ordering). All harness cables are 7 ft. standard.

The 1HUBHARNESS for a 6-channel console includes cables for 12 inputs, 2 outputs and 4 monitors. 2HUBHARNESS for an 8-12-channel console includes cables for 24 inputs, 4 outputs and 8 monitors. 3HUBHARNESS for an 18-channel console includes cables for 36 inputs, 6 outputs and 12 monitors. 4HUBHARNESS for a 20-24-channel console includes cables for 48 inputs, 8 outputs and 16 monitors.

To go beyond console wiring, studio wiring kits include pre-made cables and MatchJack™ adaptors to connect your console harness to all source equipment. MatchJack adaptors connect RJ-45 patch cables to various source equipment I/Os and are available with active amplifiers to balance consumer gear, or as passive connector adaptors.

The SMSTUDIOKIT package for a 6-channel console studio includes 1 Hub power supply, 2 MatchJack output amplifiers, 1 MatchJack input amplifier, 1 mic XLR connector with well mount, 1 headphone amplifier with well mount, 6 single MatchJack adaptors, 2 dual MatchJack adaptors, 3 each 7', 10', 12', 15', RJ-45 patch cables. MIDSTUDIOKIT for an 8-12-channel console studio includes 1 Hub power supply, 2 MatchJack output amplifiers, 1 MatchJack input amplifier, 2 mic XLR connector with well mount, 2 heaphone amps with well mount, 12 single MatchJack adaptors, 4 dual MatchJack adaptors, 6 each 7', 10', 12', 15', RJ-45 patch cables. LGSTUDIOKIT for an 18-channel console studio includes 1 Hub power supply, 4 MatchJack output amps, 2 MatchJack input amps, 3 mic XLR connector with well mount, 3 heaphone amps with well mount, 18 single MatchJack adaptors, 6 dual MatchJack adaptors, 8 each 7', 10', 12', 15', RJ-45 cables. XLSTUDIOKIT for a 20-24-channel console studio includes 1 Hub power supply, 4 MatchJack output amplifiers, 2 MatchJack input amplifier, 3 mic XLR connector with well mount, 3 heaphone amps with well mount, 24 single MatchJack adaptors, 8 dual MatchJack adaptors, 12 each 7', 10', 12', 15', RJ-45 cables.

Capture the Warmth. Vintage-style.

When it comes to capturing the essence of a musical moment, every muance... each subtlety... it's hard to beat the warmth of a vintage-style, large-diaphragm microphone.

That's why we created the new AT4047/SV. It offers the sonic characteristics reminiscent of early F.E.T. studio microphones and delivers the consistent performance and reliability you've come to expect from A-T's 40 Series.

The AT4047/SV gives you a perfect blend of classic sound and modern precision engineering. We call it a contemporary replication of vintage condenser technology. You'll call it amazing.

FIRST CHOICE

ENG 618 ENG

You've spent years perfecting your voice with just the right articulation and timbre to get you into broadcast. You need a microphone that faithfully delivers that sound to your audience. That's why broadcasters everywhere choose the Electro-Voice RE20 and RE27N/D. Their wide-band response and Variable-D[®] design delivers an outstandingly clear performance every time. Variable-D[®] eliminates the up-close "proximity effect" bass boost that makes other directional inicrophones sound "muddy."

Why not check out EV's entire family of problem-solving broadcast microphones. Every one guaranteed unconditionally against malfunction from even accidental abuse, for two years from the date of purchase. The first choice of professionals...

EVERY TIME, EVERYWHERE.

MB806A (shown with optional receiver models)

FREEDOM SERIES - Wireless UHF Mic Systems

Build your own wireless mic system with the Sony Freedom Series. The system offers 800 MHz UHF transmission quality with 94 selectable frequencies in the range from 794 to 806 MHz; frequency-synthesis tuning to protect against unwanted interference by allowing instant channel switching; space diversity reception for added protection against a weak signal; comprehensive LCD displays and high-quality microphones.

Choose from the professional vocal handheld microphone (WRT807A) or one of three lavalier mic elements (ECM models numbers) with plug-on or beltpack transmitter (WRT808A or WRT805A). Then combine with the dualantenna single channel receiver (WRR-802A) or for greater expandability, the 6-channel rack mount receiver (MB806A) which requires a UHF synthesized tuner module (WRU-806A) for each microphone (one module included in price of MB806A).

For television reporting, the system also features camera mount receivers. Call today for more information on this great system from Sony.

ENG-100 - ENG Wireless Mic System

The Telex ENG-100 is designed to perform reliably under the harsh conditions of news gathering, but is also appropriate for event or corporate video, industrial and institutional applications. This rugged, compact receiver offers 100-channel frequency agility within the 668 to 746 MHz RF frequency range. Two integral antennas and a built-in Posi-Phase diversity system assure reception in the most difficult situations. The ENG-100 also features a headphone amp, an adjustable audio output control and is powered by 2 "AA" batteries. A variety of mounting options are available including Anton Bauer side and sandwich mount, NP-1 or BP-90 mount kits and a universal strap mount.

The LT-100 beltpack transmitter offers 100 tunable channels, selectable hi/ low power output and adjustable mic gain. The SH-100 handheld transmitter can be ordered with a Telex cardioid electret mic element (CE8) or Audix cardioid dynamic mic element (OM3).

DC-8A - Dial-Up DTMF Controller

This dial-up remote control allows the user to control a facility from any touch-tone telephone. The DC-8A will answer the phone line after the programmed number of rings (up to 20), accept an access code of up to 8 digits and if valid, will allow the control of 8 form-A relays and the monitoring of 8 logic level status inputs. **Features:** audio hybrid allows user to send and/or receive external audio, while controlling the unit; the pager alert function can activate up to 3 digital pagers and display the telephone number and the status input(s) which triggered the alarm; programming is performed with a standard touch-tone phone; nearly all functions can be programmed remotely; defeatable CPC control; user programmable tone acknowledgment defeat; may be configured for stand alone program DTMF tone decoding; each relay may be configured for momentary, latching or interlocking closures; front panel LED indicators for DTMF tone detection, off-hook (line connected) status, ring signal, and power; open collector outputs for remote ring and off-hook conditions.

SRC-8A/SRC-8B - Remote Relay Controls

The SRC-8A serial remote control provides a means of adding eight channels of remote control to RF, wireline and fiber-type STL systems. The SRC-8A may also be used with dedicated modems (US Robotics "courier" only) from 1200 to 9600 baud. The SRC-8A consists of two units. The SRC-8T which is located at the origination end (studio) and the SRC-8R which is at the receiving end (transmitter site). Both units look identical and may be mounted within 25 feet of the STL system or modems. Each unit is supplied with a 12 vac wall transformer, modular cord and a modular 9-pin D-sub adaptor. The units are supplied with or without 8 opto-isolated inputs on the SRC-8T and 8-SPST relays on the SRC-8R. Features: TTL/CMOS compatible or opto-isolated 5-24 vdc inputs (wet or dry); form 1-A relays; removable screw terminals or WAGO clamp-style wire captive terminals; relay and input status LED indicators; on-board switching power supply; aluminum chassis.

BURK TECHNOLOGY

ARC16 - Transmitter Remote Control

Now, you have a choice: full-time studio control and monitoring, dial-up telephone control - or both. Because of its modular design, the ARC-16 offers features never before available in a 16-channel remote control system. With the studio controller, you have a constant link to your transmitter, for instantaneous response. The 32-character LCD display shows out-of-tolerance conditions at a glance, and makes it easy to make adjustments. The ARC-16 offers control and metering of studio equipment, including program automation, EAS, security, status control and alarm functions at both the studio and transmitter site. The two-unit-system has 16 channels of analog metering, 16 status channels and 32 control outputs. Indicators and connections for external audible alarms alert the operator to out-of-tolerance conditions. The Enhanced Speech Interface lets you take control using the telephone keypad from any touch-tone phone. It can be used as the only control, or in addition to the studio controller. Features: digitally-recorded human voice for dial up; built-in subcarrier generators; built-in alarms and multiple site control. Options: AutoPilot[®] for Windows makes automatic operation of a studio/transmitter facility easy.

CONEX

DT-55 - Remote Control

The DT-55 telephone remote control answers a phone line, accepts a user determined access code, then allows remote control of 10 SPDT relays and the remote monitoring of 10 external switch contacts or logic levels. The levels are magnetic latching. On power loss and restoration, the relays can retain their prior states or return to the de-activated state. Each relay can be set, cleared or activated momentarily (for as long as the button is pushed down on the calling telephone). Additionally, the DT-55 can be set up to act in an interlocking mode. When a button is pressed, its associated relay is set and all other relays are cleared. Features: Miniature screw-clamp terminal strips for easy connection to your external circuits; easily distinguishable tones indicate the high-low or open-closed status of the ten external inputs; status lights indicate the ringing signal, power, DTMF tone detection, line connection and access; switch-selectable access code; compact size.

DAVICOM

M-A-C - Remote Control

The M-A-C System can control up to 32 analog (metering) inputs, 64 digital (status) inputs and can monitor 16 audio inputs. It can control up to 64 relays and offers 16 RS-232 serial communication ports for external equipment. The menu-driven software built into the unit allows the user to easily program complex operations such as: switching to a back-up transmitter, controlling the emergency power source, monitoring VSWR of several antennas, etc. **Features:** easy to set up and operate; extra level of security for system supervisors; flexible reporting of alarms; operation via telephone or PC; relays included in main unit; up to 16 RS-232 ports allow you to talk to other equipment at the site without the need for extra modems; programmable delays before action or return-to-normal conditions; multiple relay activation on a single condition; works with any vendor'd sensor products; "virtual" inputs and relays for establishing conditional actions. A communication software package, MACOMM, which offers a full graphical interface for fast and simple operation, is also supplied with each unit.

MACNET (sold separately) is a central management software that can be used to collect alarms and reports from an entire network of sites. MACNET uses a map-style graphical interface to make it quick and easy to monitor conditions from a variety of sites. MACNET is a decision assistance tool for the communication network operator. All the decisions are taken by the operator but MACNET will promptly supply him or her with all the information required to make the right decision and know exactly what is going on at the transmission sites. MACNET runs on Windows 95/98 and its database is Microsoft ACCESS[™] compatible.

MOSELEY

MRC1620 - Remote Control System

The MRC1620 system consists of a remote terminal that allows an optional control terminal or IBM PC with TaskMaster20 software to monitor and control a remote facility from both dedicated and/or dial-up control points. The MRC1620 remote terminal comes equipped with 32 relay isolated command outputs (16 raise/16 lower), 16 TTL status inputs and 16 analog metering inputs with the required terminal connectors.

The remote and control terminals are simple to operate and easy to understand. All status channels are simultaneously displayed on a set of 16 LEDs. The front panel displays read-outs of selected channel number and telemetry data. LEDs indicate operation mode, alarms and other system parameters. During alarm conditions, intelligent automatic corrective action can be taken by the remote terminal under the direction of the TaskMaster20. The remote terminal comes equipped with the appropriate modems to communicate over dedicated circuits (STL/ TSL/ FMSCA, 2/4 wired leased lines or standard dial-up lines).

SINE SYSTEMS

RFC-1/B/RAK-1/RP-8 - Remote Control

The RFC-1/B is an affordable, full-featured transmitter remote control system that can be accessed through a standard telephone or cellular phone. Readings are reported with a natural sounding human voice. The basic system consists of an RFC-1/B and an RP-8 Relay Panel. (Sold separately)

RP-8 is the interface to outboard equipment. It provides eight channels of telemetry input and control output (multiple RP-8s can be used to expand the system to 64 channels). The RFC-1/B can be programmed to perform power/pattern changes and take readings automatically. It can also be programmed to alert station personnel during an alarm condition.

AK-1 adds a modem, parallel printer port, battery backed power supply, telephone line surge suppression and front panel indicators to the RFC-1/B in a sleek rack-mountable aluminum chassis. The 2400 baud 'AT' modem provides external control by computer and the parallel printer port allows simultaneous printer and modem operation. In addition to being controlled manually via telephone, the RFC-1/B and RAK-1 can perform tasks automatically, based on the date and/or time of day (i.e. pattern changes). Up to 80 timed events can be programmed into the system.

530-00 - FM Off-Air Modulation Analyzer

The 530-00 combines a frequency-agile, wideband FM receiver with very linear demodulation and metering circuitry for precise measurement of FM broadcast carrier modulation. Features: carrier modulation scale displays total modulation or independent positive and negative deviation in three ranges and resolutions; peak hold function and program peak measurement integration; adjustable peak flasher (1% increments); stereo pilot injection level shown in percent and dB; demodulation stereo program metering has an 80dB range and 1dB resolution for level and noise measurements of the L, R. sum and difference channels; front-panel display of signal strength and multipath effects; tunable receiver with eight presets; automatic switchover to direct RF sample (if desired); continuous coverage of the FM broadcast band; preset alarm indicators for poor reception conditions; manual selection of forced-mono mode and program de-emphasis; headphone jack.

MODULATION SCIENCES

MODMINDER - FM Modulation Monitor

Increase modulation with less processing, and still stay within FCC limits. ModMinder[™] gives you more accurate measurement of modulation in accordance with the most recent FCC standard. FM ModMinder registers only those longer events that the FCC really cares about. The end result is you may be able to boost your modulation up to 3 dB depending on the type of processing you use. Digital technology improves measurement accuracy by 500% and user-selectable response time allows less processing without sacrificing loudness. Remote software included for dialup access. ModMinder FMMM2 includes an internal demodulator.

STL15C/R15C - Composite STL System

The Marti STL-15C transmitter and companion R-15C receiver form a high quality, frequency synthesized, radio communications link. Depending upon the available channel bandwidth, the systems can transmit composite stereo with two subcarriers, or digital stereo audio when used with external modems. Features: unexcelled composite stereo separation, noise and distortion specs; high interference rejection receiver; 9.5 watts of power; new narrow channels provision for automatic switching; 2-year limited warranty.

*STL15C/R15C Composite Stereo System Mfr. List \$6,000.00 Call For BSW Price

STL10/R10 - STL System

For mono operations or for non-composite stereo applications, choose the STL10 Package. Separate right and left units can be linked for stereo operation with greater interference rejection, superior noise specifications and lower channel crosstalk than most composite systems. Four optional sub-channels are available. **Features:** excellent square wave response; user selectable audio processing; low pass and band pass filtering for minimum overshoot and high selectivity; extensive front panel test features and builtin automatic switching capability.

*STL10/R10 mono system Mfr. List \$3,550.00 Call For BSW Price

MOSELEY

DSP6000 - Digital STL Encoder/Decoder

Your key to an STL system that can pass CD quality audio is the DSP6000. This digital encode/decode system is designed to be used with Moseley PCL6000 or PCL606 Series STLs. Features: 90 dB SNR with only .01% distortion; operates in existing channel allocations from 100 to 500 kHz, coexisting with established analog radios; higher system gain (up to 25 dB over analog STLs), constant SNR - unaffected by fades, no crosstalk, no degradation with multiple hops.

The standard system comes equipped with an encoder and decoder for two (right and left) audio channels and one data channel with provisions for up to two auxiliary program channels and one additional data channel.

STARLINK 9003T1 - T1/E1 Audio Transmission System

The Starlink 9003T1 is a powerful, all-digital modular system for transmitting CD quality audio over T1/E1 lines. It provides great flexibility in configuring multiple channel STL/TSL. Perfect for LMAs and duopolys, its configuration options are limited only by the imagination. This system utilizes a range of personality modules and daughter cards in a 3-rack unit mainframe. The mainframe can house up to eight application-specific modules including 16-bit PCM linear digital audio, ISO/MPEG layer II or apt-X source coding, drop/insert and variable-rate digital mux, speech/fax/data cards, T1/E1 and more. A building block "any card, any slot" approach is used resulting in lower cost, greater flexibility and enhanced reliability. The use of international standard digital I/Os allows the system to seamlessly connect to the outside world. This commitment to open architecture gives you the power to choose solutions that will work with existing and future investments. Linear digital audio can be delivered by use of a source coder module, a source decoder module, two T1/E1 line drivers, external CSUs and the mainframes. Full duplex T1/E1 audio transmission is possible by the addition of another source encoder and decoder pair. A digital four-port mux allows additional compressed audio channels to be carried by the system. In addition, data and voice cards for transmitter control and operational communications can be added into the system. Several STL/TSL pre-packaged systems are available, or configure a system to your specifications. Call for more information.

*Pricing Is Based On Configuration

STARLINK SL9003Q - 4-channel STL

Continuing its four decades of leadership and innovation in broadcast products, Moseley is proud to offer the Starlink SL9003Q - their latest technology and the world's first open-architecture, all-digital, 4-channel linear audio Studio-Transmitter Link. Utilizing spectrally efficient QAM (Quadrature Amplitude Modulation) technology, the SL9003Q delivers four 16-bit linear audio channels and two data channels over a single narrow-bandwidth 950 MHz STL channel. This uncompressed audio is absolutely uncompromised and can be configured with up to two pairs of stereo audio (it's like getting two radios for the price of one). AES/EBU I/Os, combined with a built-in variable rate converter, provide seamless connection to the all-digital air chain without compression. Plug-in MPEG audio modules and a digital multiplex allow for additional program, voice, FSK async and sync data channels. The high spectral efficiency of the SL9003Q is achieved by user-selectable 16, 32 or 64 QAM. Powerful Reed-Solomon error correction, coupled with a 20 tap adaptive equalizer, provide unsurpassed signal robustness in hostile RF environs. An ultra-linear 2 Watt average transmit power out is achieved with redundant RF power modules. Other features include: user-selectable 200-500 kHz channel bandwidth; built-in T1/E1 connectivity; minimal processing delay; full metering and diagnostics. Attain the peak performance you seek with the Starlink SL9003Q.

*Pricing Is Based On Configuration

Sound Advice.

1.

Demand UNCOMPRESSED 16-bit linear audio in your alldigital air chain. Compression means compromise and we just won't hear of it.

Select a digital STL that can be configured with UP TO TWO PAIRS of linear stereo audio. It's like getting two radios for the price of one. 3.

Exercise yourChooFREECOM OFSTLCHOICE. ChooseADAP32, 44.1 or 48kHzENVIaudio sampling.with uIt's your broad-16, 32cast — select therates.rate that worksis alwbest for you.16

Choose a digital STL that CAN ADAPT TO ANY RF ENVIRONMENT with user-defined 16, 32 or 64 QAM rates. (Flexibility is always a good thing.) 5.

Purchase a 950 MHz RF STL. The channel allocation is free, and the money you save over a T1 STL goes straight to your bottom line.

Moseley's Starlink SL9003Q is the only 4-channel digital studio transmitter link on the market with all these features. Not just an STL, a sound investment.

111 Castilian Drive • Sarta Barbara, CA 93117-3093

RF Equipment STL

MOSELEY

PCL6000 SERIES - Composite STL Systems

The PCL6020, 6030 and 6060 systems employ a synthesized reference oscillator to eliminate fixed frequency crystals. Monaural or composite operation is available from a single system. By selecting appropriate jumpers, you can enable wideband composite stereo or 15 kHz monaural basebands. Two PCL6000 systems can be used in a dual discrete configuration to transmitright and left stereo programs with no measurable crosstalk. Receiver IF bandwidth can be factory or field set for channel spacing of 100 kHz to 500 kHz.

If you have no adjacent channel interference, the PCL6020 will offer superior performance. The PCL6030 and PCL6060 are designed for hostile RF environments where adjacent channel rejection is required.

CROWN

FM SERIES - Integrated FM Transmitter Systems

More than just an FM exciter or amplifier, a Crown integrated FM transmitter system combines built-in audio processing and stereo generation in one rugged, compact unit. Each model provides excellent signal quality, ease of use, and economical long-term reliability with a variety of features including: quick set-up; built-in digital metering and diagnostics; 87-108 MHz userselectable frequency range; 100/120 VAC, 220/240 VAC or DC operation. Reliable operation is a major design criterion. With Teflon circuit boards and copper heat spreaders in the RF chain, the unit functions with less head and improved life span. A unique Automatic Level Compensation (ALC) circuit protects the unit from voltage, temperature and VSWR variations. If operating parameters move outside the safe operating range, the ALC automatically reduces output power to safe limits until normal conditions are restored.

Highly efficient power amplifiers are part of the FM transmitter system 1 kW and 2 kW transmitters. The FM2000T 2 kW transmitter is broadband and 75 to 80% efficient across the band. It includes a power amplifier, power supply and FM100T driver and features hot-swappable S00 watt power modules, a responsive protection mode and a power-factor-corrected power supply. The FM1000T 1kW transmitter includes power amplifier, power supply, FM30T driver and four hot-swappable 250-watt power modules. All Crown units feature a 3-year warranty.

QEI

E SERIES - FM Exciters/Transmitters

The E series establishes a new level of FM performance with the advantage of highest power emergency back-up available in an exciter style package. QEI took the field-proven design of the model 695 exciter and incorporated high power FET amplifiers to deliver uncompromised performance as a transmitter, exciter, booster or translator (option). Features: frequency synthesized in 100 kHz increments (10 kHz optional); phase locked; "on-carrier" direct FM; unconditionally stable solid state amplifier and ultra low distortion, crosstalk and noise. 75 to 1000 watts.

*Call For BSW Pricing

QUANTUM SERIES - Solid State FM Transmitters

QEI's Quantum Series of FM broadcast transmitters are totally solid state and provide an unsurpassed broadcast signal with utmost efficiency. All Quantum transmitters under 6 kW fit in a cabinet only 59" high, facilitating air freight shipping and easy installation. Quantum allows you to buy precisely the amount of power you need between 1.2 and 9.6 kilowatts in 600 watt increments. QEI's exclusive cableless, solid state power combiner eliminates all trouble prone connections and high loss cabling. A single phase power supply facilitates installation for a range of applications.

QUANTUM SERIES - Broadband Emergency Transmitters

Now there's a cost-effective alternative for groups desiring complete transmitter backup for multiple frequencies. This broadband line features remote control frequency agility so a single transmitter can back up multiple sites within a given market. Modular systems can be configured to your specific power requirements.

*Call For BSW Pricing

QEI

FMQ SERIES - FM Tube Transmitters

QEI's FMQ series FM broadcast transmitters are conservatively designed for years of trouble-free service. Available in 3.5, 5, 10, 20 and 30 kW models, these transmitters utilize an inherent broadband design to provide a superb broadcast signal. The FMQ power amplifiers utilize a single triode in grounded grid service. This grounded grid triode design offers inherently greater stability, better performance and is less critical in operation than its tetrode counterparts. FMQ series transmitters are supplied with the 675B exciter and optionally with the model 695 exciter.

BROADCAST TOOLS

USC-16/XP-3 - Satellite Channel/Transponder Controllers

The USC-16 provides remote channel selection for DAT-SEDAT digital audio cards installed in Scientific Atlanta DAT-32 series, Comtech/Fairchild DART-384 and Ariel receivers, along with 16 memory selections for Scientific Atlanta ENCORE, DSR-3610 or AD-4595 receivers. It features a 2400/9600 baud serial port for computer control, status and easy programming.

The XP-3 provides remote transponder selection for Scientific Atlanta, Comtech/Fairchild and Ariel receivers. It allows selection of the three transponder channels via user's remote control systems or switch contacts. It's equipped with a wire captive terminal strip providing remote control and status, along with local switches for transponder selection.

DTMF-16/DEN-8 - DTMF Decoder/DTMF Generator

The DTMF-16 listens to practically any audio source and activates its appropriate optocoupler output when it hears any of the sixteen DTMF tones. Jumper selectable modes are available for momentary, interlocking-latching, two-tone and anti-falsing. Applications include backup transmitter control over STL, radio or telephone coupler, remotely controlled audio switcher, etc. It is also perfect for interfacing networks to your automation, controlling remote satellite receivers, etc. **Options:** the SILENCER option board lets you send inaudible DTMF control signals via your RPU, satellite, dedicated loops or standard dial-up phone lines. Your talent or producer in the field can fire IDs, start breaks, light up an attention flasher, or control just about anything right in the program path, without getting any tones on the air.

The DEN-8 is a DTMF generator that takes up to 8 contact closures and generates separate, user programmed DTMF sequences from 1 to 10 digits long. Act ve balanced output with level control.

MONITOR TWO

POINT SEVEN

MONITOR ONE/MONITOR TWO/POINT SEVEN

- Studio Reference Monitors

Arrakis Monitor One[™] is a compact near-field reference speaker with wide frequency response, accurate transient reproduction, clear imaging and high power handling capability. Alesis' exclusive SuperPort[™] technology and proprietary 6.5" mineral-filled low frequency driver give Monitor One solid high-power bass transients and low frequency response that outperforms comparable near-field monitors. Its 1" silk-dome high frequency driver adds accurate high-end to the system.

Monitor Two™ offers the same accurate tonal balance and imaging of the Monitor One but with a 10" three-way speaker design, producing a larger sound field, extra deep bass and exceptional mid-frequency detail.

Point Seven are two-way speakers with a 5" woofer and 1" dome tweeter. Magnetic shielding makes them perfect for use with computer-based workstations, video editing suites, MIDI studios, or any facility using video monitors. Additional features include front ported venting system for tight bass response and high power handling capability.

PH5VS/PH150 - Powered Monitor Speakers

Audix has combined great sound quality and very competitive pricing in these compact powered monitor sets (one speaker holds the amplifier, the other is a satellite speaker). The PH5VS features a 5 1/4" woofer and 3/4" tweeter driven by a 25-watt-per-channel internal amplifier. It is housed in a durable, high impact plastic cabinet with a wire mesh speaker grill, making it ideal as a portable set of monitors. Inputs to the amplifier are RCA unbalanced. The speaker pair is connected via a standard speaker cable with 1/4" connectors (included).

The PH150 is housed in a dense particle-board cabinet with front porting. It features a 3/4" polycarbonate-dome, ferrofluid tweeter and a 5 1/4" long-excursion, rubber surround woofer powered by an internal 45-wattper-channel amp. High-quality crossovers ensure superb definition and clarity. PH150s provide a great sounding, inexpensive and space-saving solution for monitoring in small production rooms. Amplifier inputs are balanced (floating ground) via RCA connectors. 1/4" speaker connection cable is supplied.

Both models come with shielded cabinets for use near magnetically sensitive computer components.

NEW FROM EVENT!

PS Project Studio Biamplified Direct Field Monitor Systems

t's about confidence. Confidence that your monitoring system is accurate. Confidence that what you're litearing from your speakers isn't being colored. Confidence that your mixes will sound the way you meant them to sound when they get played in the bar, or in your living room—or in the office of a record company executive.

The new Project Studio monitors inspire that confidence, giving you the same precise, accurate sound as their respected forebears, our award-winning 20, 20 series. So when you hear the vocal sounding sweet and in balance with the music, you'll know that it truly is sweet and balanced.

We accomplish this through the use of custom driver components, as well as amplifiers and electronic crossovers designed specially for those components. That's right, amplifiers—one for the woofer, and one for the tweeter. Giving each driver its own amplifier means the amps can be far more efficient, since each one is dedicated to a specific frequency range. The result: Increased dynamic range. Higher SPL. Greater transient response. Interved damping. Smoother

phase response. Lower intermodulation distortion.

Ch, yes, and great sound.

The result: Confidence that what you near is what you get. No faciling with EQ to compensate for a speaker's deficiencies. No wondering if you have too little or too much bass. Just knowing that what you near is real; that a mix done on a Project Studio monitor will translate accurately to other playback systems

You Can Trust.

ELECTRO-VOICE

SX80/SX100+/SX300/SX500+ - Loudspeakers

The SX300 is a two-way, high efficiency portable speaker system with 300watt long term power handling capability, utilizing a 12" low frequency driver and a molded-in constant-directivity horn. It's lightweight (39 lbs.) and made of very durable polypropylene structural foam with molded-in handles and attachment points for secure mounting and suspending. It can be easily fitted with a tripod stand and makes an excellent loudspeaker for remote work. SX300a is a powered version with an integral 300 watt power amplifier and a net weight of only 47 lbs.

The SX500 has a larger 15" woofer and handles 400 watts of power. The SX100+ (12") and SX80 (8") are lighter weight, lower output models. The SB121 and SB180 add woofer systems for powerful concert bass.

20/20 - Monitor Speakers

EVENT

Searching for accurate studio monitors? Don't spend a small fortune. Designed by industry veterans Frank Kelly and Walter Dick, the Event 20/20, 20/20p and 20/20bas speaker systems offer reliable, flat monitoring that's very affordable.

The 20/20 is a passive speaker with the following features: a 25mm silkdome tweeter with aluminum voice coil support and ferrofluid cooling that doesn't cause ear fatigue over long listening periods; 8" mineral impregnated precision polypropylene woofer with highly damped rubber surround for consistent and smooth extended range frequency response without the need for added EQ; a very solid laminated MDF cabinet with extra acoustical damping to reduce standing waves; a front mounted, large diameter bass port; 2nd order passive crossover.

The 20/20p amplified speakers feature two 100-watt amplifiers housed within one speaker (one drives the powered cabinet, the other the satellite monitor). This affordable set includes one master unit and one standard 20/20 satellite.

The powered 20/20bas includes the components of the 20/20 with the following additions: an active asymmetrical 4th order crossover; a 130-watt amplifier designed specifically for and directly connected to the woofer; a 70-watt amplifier designed specifically for and directly connected to the tweeter; front panel power on/clip LED; a combination 1/4"/XLR input with level adjustment; precision HF and LF adjustments; power cord.

Atlas-Soundolier's single rack space MXVA monitor panels are active devices for aural and visual monitoring of eight or sixteen different speaker and line level circuits in any combination. Each input is individually selectable using an easy-to-position jumper. MXVA's offer easy visual assessment using twelve-segment LED bar graphs that provide 33 dB of resolution and monitor any combination of line level (1V reference) – 25 Vrms, 70 Vrms and 100 Vrms simultaneously. The bottom ten LEDs are green and have a VU ballistics response. The two red LEDs at the top of the bar graph are peak to provide instantaneous level indication. LED meter sensitivity is -30 dB to +30 dB. Units offer the capability to aurally monitor individual channels via an internal speaker, headphone jack, line level output or output to an external speaker. Panel functions include a channel selection knob, channel audible monitoring level control and headphone jacks.

WOHLER

ATSC/DVB SERIES - Amplified Speakers

Wohler Technologies offers accurate, self powered monitoring systems in compact rack mount units. These speakers provide excellent magnetic shielding with optimally focused, high fidelity sound for operators in an "ultra near field" working environment.

AMP-1A (shown top) is a basic self-powered speaker system with three power amps, five speakers, and balanced and unbalanced inputs. AMP-2 (not shown) offers wider frequency response in a 2RU enclosure.

ATSC-series (shown bottom) are powered stereo speakers designed specifically for flexible monitoring of the 6 audio channels of ATSC/DVB programming. Features: choose from 6 channel analog, 3 channel AES or encoded ATSC/MPEG-2 input versions; simultaneous visual monitoring of all 6 channels; left/right and front/surround "phase" indicators.

*Price Based On Configuration

Speakers Accessories

OMNIMOUNT

Speaker Mounting Brackets

Installing speakers is no easy task - unless you use Omnimount speaker brackets. Only Omnimount offers models that allow you to mount speakers from assorted angles and locations. Weight handling ranges from 1 to 255 lbs. Call BSW with your requirements and we will suggest the proper Omnimount for vou.

*Price Based On Configuration

Speaker Mounting Brackets

Pivotelli supports are made from the finest solid premium grade steel which is contoured at all edges and joints and coated with durable nylon finish for maximum protection. Tightly clamping grips mean you never have to drill holes in speakers or other equipment. Pivotelli supports come in a wide range of styles from simple single pivot to complex multiple pivot systems. They can accommodate cabinet sizes from 7-1/2" to 47" and weights up to 176 lbs. safely and securely.

Studio Solutions

by Middle Atlantic

Contact your BSW Sales Associate for more information.

The all-new Edit Center line of professional studio furniture has been specifically designed for the rigorous demands of broadcast, video editing and post-production environments.

Edit

Featuring two choices of high-pressure laminate desktops, the Edit Center System can be quickly arranged to suit any user's preference by simply rotating the unique Side Bay Racks to the desired angle. Desks are available in two widths: 60" and 84", and in your choice of two styles of attached overbridge (with two under-bridge rackbays, or with an under-bridge open span), and feature rotating speaker monitor platforms as standard equipment.

Multiclesk?

The all-new MultiDesk System 2 studio furniture line is equally suited for the professional radio broadcast, audio recording, or video production studio. The modular MultiDesk System 2 is an excellent economical alternative to custom studio furniture.

Acoustical Panels

Our new wall panels provide effective acoustical treatment for problem rooms. Panels are faced with 100% polyester fabric, which will not rip, tear, or crack like foam products, and feature resin-hardened edges which are beveled for aesthetics. Offered in 4 sizes and two attractive colors, all 2" thick.

ARRAKIS

ARRAKIS

MODULUX FLEX-STUDIO - Studio Furniture

The new Flex-Studio is a complete, modular furniture package that can be assembled in dozens of different ways to meet nearly any studio design. It can be assembled left or right-handed as well as in all of our standard configurations: 'Short L', 'Long L', and 'Unbalanced U'. All pedestal returns have front equipment racks and rear access doors. The table pedestals have both inside and outside access doors. The tabletop equipment pod provides rack mount space for tabletop equipment. A 60-inch interview table is standard and designed to be placed on any 60+ inch outer edge of the studio. The console table is 36 inches deep and 45 inches wide to accommodate most consoles. A 37 inch width, console spanning, copy stand completes the package.

Modulux is a top selling studio furniture system with nearly 2000 studios sold worldwide. As a standard Modulux product, the new Flex-Studio features solid oak trim, high pressure laminate table surfaces, complete laminate finish inside and out, ease of assembly and fast delivery from factory stock.

Standard colors are medium gray tabletops, beige side panels and red oak trim (custom configured Modulux furniture packages are also available).

DESK*STAR FURNITURE

Desk*Star furniture is specifically engineered for digital audio radio studios. The line is specially designed for compact consoles, interview areas, video monitors, kneewells and keyboards.

Desk*Star is a modular approach to studio layout with 5 basic building blocks: (1) an "L" shaped console table; (2) a 42" high sloped equipment rack; (3) a 45 degree joining table; (4) a double pedestal cabinet; and (5) a 14" tabletop equipment rack pod. These components can be purchased and arranged in any desirable layout.

Wilson Art-brand tabletop laminates and solid oak trim are combined for quality furniture that is attractive and durable, yet inexpensive. And best of all Desk*Star is easy to assemble. Several pods and convenience accessories are also available.

IT-1220 - Balanced Isolation Transformer

Designed for the most critical, ultra-low-noise installations, the IT-1220 can supply 20 amps of balanced AC power. It drastically reduces hum and buzz caused both by ground currents from power supply filtering and by radiation from supply cables into sensitive signal sources, such as microphones. Features: up to 16 dB improvement in background noise floor in system-wide installations; toroidal transformer with center-tapped secondary is the most efficient design, with the least magnetic field leakage; soft start circuit prevents turn-on transients and high in-rush currents; extreme voltage shutdown; spike suppression; RFI filtering and ground fault interrupter protection.

It's interesting how a single word like "consolidation" can have so many implications.

But, when it comes to the Scoop Reporter II, it means only one thing: Real Savings! That's because the Scoop Reporter II is the world's first codec to combine ISDN, POTS, auto-battery backup, 3 channel mixer, PC programmability, and lots more! As a result, "consolidation" means a cost effective, "all-in-one" solution that inspires confidence when you are out in the field.

ACD-5001 - ISDN Audio Codec

The AEQ ACD-5001 is a dual multi-format audio codec for ISDN lines, with terminal adaptors built in, offering all the combined utilities needed for establishing either two independent mono audio channels plus auxiliary data, or one stereo link with the highest possible audio quality and easy operation. The ACD-5001 receiver is designed with the same outstanding features as the MPAC-02 (below) and makes an excellent partner for remote broadcasting. The ACD-5001 is equipped with a full-duplex intercom, allowing simple and independent communication with both audio channels, without external wiring and operations. The monitoring capability permits the oversight of all signals transmitted and received without causing any interference to the communication. Features: audio coding algorithms including G.711, G.722 (statistical and H.221/H.242), LD-Extend and ISO/MPEG for mono, dual and stereo transmission at 64 and 128 kbps; up to 15 kHz stereo audio; up to 11.5 kHz bi-directional audio; adaptive echo cancellation using G.711 for maximum quality performance in analog telephone network connections; built-in intercom for direct in line operation; independent dialing for each B channel, with sub-addressing capability; generously sized LCD screen; phone call status on-screen; intercom microphone input and headphone output on front panel; alphanumeric phonebook with 32 inputs; DTMF tone generator for remote equipment control.

MPAC-02 - Portable ISDN Audio Codec

The AEQ MPAC-02 is a multiformat, dual channel, portable audio codec for ISDN remotes and makes an excellent partner with the ACD-5001 (above). It offers the best possible audio and data connections, a user-friendly interface for the journalist with a full set of features for the technician. Offering two-way communications in two independent audio channels on a single ISDN line (the two B channels can be used independently), the MPAC-02 enables the setting-up of simultaneous program and coordination circuits. Levels for all input channels, mix, monitoring, program and coordination are independent. The ability to connect to a standard telephone line, easy access to the dial keypad on the front panel and a back-lit LCD screen with intuitive messages make the MPAC-02 a one-box solution for remotes. Features: digital hybrid with frequency extender, compatible with TH-02EX MKII and TLE-02, operative on analog telephone lines; a digital audio codec G.726/16 kbps for external modem connection; G.711, G.722 (statistical and H.221/H.242), LD-Extend and ISO/MPEG LII for mono, dual or stereo transmission on ISDN lines; up to 15 kHz stereo audio; up to 11.5 kHz bi-directional audio; 3 microphone and 1 mic/line inputs with XLR/jack combo connectors; 3 stereo headphone outputs with independent level controls; independent dialing for ISDN B1 and B2 channels with sub-addressing capabilities.

SCOOP REPORTER II - Combination ISDN/POTS Codec

Following the success of the original Scoop Reporter, with thousands of units installed worldwide, AETA Audio's Scoop Reporter II combines more standard features making it the most convenient, compatible and costeffective codec for remote broadcasts. The "all-in-one" Scoop Reporter II can handle POTS calls as well as ISDN transmissions! Its ISDN offers the highest performance with bi-directional 20 kHz audio at 128 kbps. While ISDN certainly is the preferred method for remote broadcasts, there are still situations with limited advance notice or where ISDN simply isn't available. Now you simply carry one codec and take advantage of 7.5 kHz POTS capability that will guarantee you get on the air, anywhere, anytime! With a built-in 3-channel mixer, it's primed and ready for your sports or talk broadcast teams. Powered by internal "D" batteries, external 12 volt or AC voltages, the codec will always remain powered. And a speed dial directory with 99 presets containing dial-up and codec settings makes it easy to use. Features: supports G.711, G.722, ISO/MPEG Layer II and J.52; PC programmable; LCD display; balanced XLR mic inputs; AUX in/out; metal chassis.

DSM100/PRO-LINK - Digital Audio Transceiver

APT's WorldNet[™] DSM100 incorporates high quality apt-X100 data compression, enabling real-time transmission of full duplex digital audio (7.5 kHz mono to 22.5 kHz stereo) on low capacity circuits such as ISDN and Switched 56. Features: simultaneous transmission/reception of full bandwidth mono or stereo audio over low capacity digital links; sample rate converter; timecode and RS-232 auxiliary data facilities; balanced analog and digital (AES/EBU) I/O.

The Pro-Link ISDN Manager combines a fully featured terminal adaptor with an intelligent inverse multiplexer to provide a wide range of bandwidths while automatically maintaining transmission security under adverse conditions. An intelligent device, it synchronizes up to six ISDN B-channels at 64 kbps with a minimal delay. Its integral six-channel terminal adapter allows direct connection to ISDN network terminating units.

Complete Remote Solutions at a *MART*[®] Value.

MARTI – The Remote Experts

For over 50 years, *MARTI* has been synonymous with value and service for remote broadcasting products. As the radio industry changes, so has *MARTI*. Discover our complete line of cellular, POTS codecs, frequency agile RPU/STLs, exciters and accessories — all at a *MARTI* value.

The New GX-500 is now easier to operate and service. A powerful new option has been added - an add on cellphone adapter. The adapters are "Model Specific", and are available for some digital cell phones.

Today's telephone remotes demand a smart solution and that solution is SMARTI: the family of field proven, adjustable bandwidth POTS codecs. Utilizing MPEG compression and DSP technology, SMARTI gives you superior audio quality with phone line convenience and a 33.6 KBps internal modem.

Three different power levels are available for the oneand two-frequency Remote Pickup Transmitters. The 2-watt unit (RPT-2) and the 15-watt unit

(RPT-15) are shown here. They are available in both US UHF and VHF frequency ranges as well as export frequencies. The third model available is the RPT-30, a 4 input, 30-watt (maximum power dependent on the frequency) unit.

Call BSW for more information 800-426-8434

MARTI

DXP.1/DXR.1 - Mono Codecs

The DXP.1 and DXR.1 contain an upgraded version of G.722 (Turbo G.722) that allows sending bi-directional 15 kHz audio using both B channels of an ISDN line or two SW56 circuits (112/128 kbps). They automatically drop back to the normal 7.5 kHz when sending at 56/64 kbps. A major advantage of G.722 is that it is a widely used international telephone standard, providing the best chance for compatibility with the outside world. These codecs are low-propagation delay (allowing real-time program backfeed) and low in cost, both in terms of transmission data rate and hardware required. They are ideal for sports, talk or any type of mono programming.

SMARTI LITE - Standard Telephone Codec System

Similar to the RKS-411, the downsized RKS-111 SMARTI LITE can send and receive 7.5 kHz audio over a single standard analog telephone line with true broadcast audio quality. SMARTI LITE offers a single XLR connector (mic/line switchable with level control) and one headphone jack. Unlike the RKS-411, SMARTI LITE also comes with a handy battery package (battery, AC to DC power cable, 12V battery adaptor cord) so it may easily battery operated in the field. SMARTI LITE offers three different operating modes: MPEG 2 Layer III, low delay G.728, and direct analog telephone interface. Plus, it uses the fastest modem speed available and automatically adjusts speed up and down to match the telephone line conditions. Within easy reach, its functions are menu driven from the telephone style keypad and displayed on the easy to read 2x16 backlit LCD display. Features: supports up to 33.6 kbps depending on the phone line (7 kHz audio at 24 kbps); full duplex data connection for attaching two computers via data port; 10 telephone number storage (up to 70 characters each); up or down event timer; 2 relay contact closures for control at both ends of link; headphone jack with program and return switches; operates from 90 to 264 volts (50/60 Hz) without setting switches or jumpers.

TELOS

ZEPHYR/ZEPHYREXPRESS - Network Audio Transceivers

Zephyr is the ideal solution for remote broadcasts, ad hoc networks, voiceovers, commercial distribution, backup to microwave and satellite links, and many other applications. On just one ISDN circuit, Zephyr can convey 20 kHz duplex stereo audio, and it can transmit 15 kHz mono audio using only one of an ISDN line's two channels. MPEG audio Layers III and Layer II, as well as G.722, are provided for the highest audio quality and compatibility with nearly every installed codec. Features include a built-in ISDN terminal adaptor with NT-1 and 9600 baud RS-232 bi-directional data for communications and control. Available V.35 connection allows Zephyr to connect with Switched 56 and other data links. Zephyr includes full metering, a headphone jack, mic/line inputs, and input protection limiting.

With the ZephyrExpress sending live audio from the field via ISDN has never been easier. Telos lightens your remote broadcast burden by combining a full-featured codec, an ISDN terminal adaptor, and an audio mixing/ monitoring system, all in a road-rugged chassis. With ZephyrExpress, there is no need to lug additional electronics. It includes the complete features of the standard Zephyr. You get MPEG Audio Layers III and II, as well as G.722 for the compatibility and performance you require. G.711 allows you to place a voice-grade call to any standard telephone, saving you the expense of an additional circuit at the remote site. The three-input mixer has two mono mic level and a two-channel line level input. Two independent headphone outputs have selectable source controls for monitoring local and/or return audio. Optional hard and soft carrying cases are also available.

COMREX

LXT/R - Single Line Frequency Extender

This basic system restores the low end on telephone transmissions, offering a substantial improvement for telephone remotes. LXT/R combines encoding/decoding functions and a telephone coupler in one unit and can be set up to send or receive with a flip of a front panel switch. A high frequency enhancement circuit has been added to the encoder for improved audio quality. Compatible with all Comrex One Line Systems. An LXT/R is required on both send and receive ends of the telephone line.

MIX-MINUS BRIDGE - Multiple Mix-Minus Interface

While mixing remote audio sources to program can be easily done on a studio console, it can be very difficult to manage the audio fed back to each remote site. The MIX-MINUS Bridge makes it easy to handle this process by creating up to 5 separate mix-minus feeds (a sum of all program audio except for the audio coming from that device). These feeds are necessary because hosts at remote sites cannot tolerate the time delay associated with modern audio processing. The MIX-MINUS Bridge sends a backfeed to all devices from the studio's audition bus. Inputs are separately selectable, levels are individually controllable, and an IFB feed is available to each source for producer cues.

MIXMINUSBRIDGE

Talent in...Caller out it's that simple

You know us for our tough remote gear, now put our DSP knowledge

Our latest innovation.

the Innkeeper 1 packs the quality and features of an expensive digital hybrid into an affordably priced unit. For example, Innkeeper 1 continuously adapts to the phone line during every call. We don't just tune to the phone line at the beginning of the call and then lock in to those line parameters. Our algorithm uses the actual transmit signal to identify network conditions. Within the first second of speech we've tuned and corrected to remove the transmit signal from the caller outputs. If the line characteristics change during the call, we adapt. We

to the test.

continue to adapt until there's no crosstalk. This approach allows the Innkeeper 1 to achieve stable performance over a variety of network conditions, typically exceeding 50dB of trans-hybrid loss. Perked your interest? If this is the type of performance you expect from a hybrid, you'll find it in the Innkeeper 1. Any other questions? We've got the answers...and the performance to back it up. For more information, contact BSW at 1-800-426-8434.

AUDIO ONLINE - Telephone Information System

This telephone information system is designed specifically for radio stations. It's perfect for "listener information" lines providing concert information, weather/ski/surf reports, school closings, road/traffic conditions, contest rules, etc. AUDIO ONLINE is caller-interactive; the caller can select from a menu of multiple messages. The system is fully automatic and operates unattended. The system consists of special multi-line telephone modem boards and software that runs on a regular DOS-based PC (user supplied). Messages are recorded on the computer's hard drive. An 80MB drive will store over 2 hours of messages. Up to 16 phone lines can be answered simultaneously with AUDIO ONLINE with hundreds of messages available to callers. A call counter tracks the number of times each message has played.

*Two-Line Version Starts At \$995.00 Mfr. List Call For BSW Prices

DIGISTOR II - Digital Message Storage System

DigiStor II is a digital multi-message storage system that is ideally suited for telephone "information lines", e.g., concert, ski report, sports scores, etc. DigiStor II will store up to 8 minutes of monoaural audio with a bandwidth of 6.5 kHz for automatic playback via a regular telephone line. Up to 8 messages are stored in digital flash memory with no battery backup needed. Recording and playback is via local or remote control. DigiStor II can record from either a mic or line level source.

DIGISTORII Mfr. List \$795.00

Call For BSW Price

MIXMINUS PLUS - Differential Summing Amplifier

MixMinus Plus is a differential summing amplifier designed to add a "Mix-Minus" output to a broadcast audio console. This output is typically used to feed the send input of a telephone hybrid device. MixMinus Plus subtracts the hybrid receive signal from the program output, creating a program mix, minus the receive audio. The null adjustment will provide 40 dB rejection of the receive audio Signal (30 Hz - 3 kHz).

MIXMINUSPLUS Mfr. List \$195.00

INOVONICS

PBX - Remote Telephone Line Switcher

The PBX allows as many as 7 devices to share a single line for both incoming and outgoing calls. Features: up to 7 devices per unit – 2 or more PBXs can be daisy-chained to accommodate additional devices if needed; incoming calls are selectively routed to the proper extension with DTMF touch-tone commands; "priority channel" gains immediate access to the line (useful for alarms and signal problem notifications); easy installation.

*PBX000 Mfr. List \$420.00 Call For BSW Price

JK AUDIO

INNKEEPER 1 - Digital Hybrid

The JK Audio Innkeeper 1 digital hybrid gets high-quality audio in and out of the telephone for talk radio. It connects audio signals to a standard analog telephone line without the variations in quality found with traditional analog hybrids. It is especially good at preventing transmit/receiver crosstalk. In the real world, when you send the radio host's voice down the telephone line, it has a tendency to bleed over into the caller's audio. The hybrid must adapt to the phone line in order to properly separate transmit and receive audio. The Innkeeper 1 uses a 16-bit digital signal processor to continuously monitor the phone line and audio signals to deliver better separation. The dual-convergence algorithm achieves superb trans-hybrid loss, typically exceeding S0 dB. **Features:** 16-bit DSP technology; proprietary auto null algorithm; auto answer/disconnect; front panel headphone jack; monitor speaker terminals on back; Voice Presence Compensation for richer caller audio; balanced XLR mic/ line input; balanced XLR caller output; balanced XLR user defined output. **Options:** Guest Module 1 remote control keypad.

TELOS TWO - ISDN Telephone Hybrid

The Telos TWO ISDN hybrid offers amazing new ISDN capabilities for audio professionals. With the TWO, the first telephone hybrid that works with digital phone lines (BRI/U or S), users can exploit the ability of the ISDN network to cross-connect with POTS lines, eliminating the studio side of telco A/D-D/A conversion. You get pure digital caller audio, right from the central office – along with truly independent send and receive paths, lower noise and distortion, and caller ID functionality. Besides ISDN connectivity, TWO offers other important advantages: it contains two digital hybrids, so you can conference two callers internally, and all mixing and conferencing is done completely in the digital domain. AES/EBU as well as analog outputs give you maximum output flexibility. Features: 2 digital telephone hybrids; 20-bit A/D converter; automatic high-precision sample rate conversion; unmatched send/receive separation using Telos' Adaptive Cancellation technology; sophisticated AGC/ limiting functions; caller ID and fully adjustable caller ducking; Ethernet and RS-232 ports; simultaneous AES/EBU and analog I/O.

GENTNER

TELOS

TS612 V.2.5 - Multi-line Telephone System

The popular Gentner TS612 Version 2.5 multi-line telephone system makes it easy to manage call-in broadcast programming. The TS612 contains two digital hybrids that provide a high-quality interface to six telephone lines (expandable to twelve). The dual hybrids allow the TS612 to operate as a single-studio telephone system able to conference up to four callers simultaneously or as a two-studio system able to conference two callers to each studio. The TS612 supports a dedicated "phone-like" call-screening control surface. An off-air screener takes incoming calls and places them in a screened-hold queue. The on-air talent or producer presses the NEXT button on the main control surface and the call is immediately On-the-Air. The integrated mixminus provides superior audio quality and easy installation. Automatic gain control (AGC) provides consistent audio levels on all calls. Features: Split-Caller mode brings the two hybrid outputs to the audio console independently; Split-Hybrid mode brings the two hybrid outputs to the console independently and returns your program mix to the TS612 on two separate channels; Previous-Hold places calls on hold automatically when you select another line; Two-Button Hold allows you to place a single call on hold when two or more lines are conferenced; 6 lines (expandable to 12); auto mix-minus; RS-232 control (enhanced); Aux I/O control (enhanced). Options: on-air screening software.

TELOS

ONE-X-SIX - Multi-line Talk System

The ONE-x-Six has all of the telephone interface equipment needed for talk show programming. A single rack mount unit houses both a Telos ONE digital hybrid and a six-line, broadcast phone system which includes all of the most popular features found in Telos' Direct Interface Module. For system control, the ONE-x-Six is packaged with a desktop Switch Console (sold separately). Special function buttons on the Switch Console are used to automatically select the next caller, to control external recorders and delays, and to access several other unique features. Using your ONE-x-Six could not be easier. The Switch Console is used to place calls, put callers on the air or on hold, and to conference. A standard telephone set may be used for call screening. The ONEx-Six is very easy to install – all six phone lines are connected using standard RJ-11C plugs and all audio connections are XLR.

Optional PC software compliments the ONE-x-Six. Two versions of Call Screen Manager are available. Host Software provides for a director position and any number of talent positions using a single PC. Remote Software allows communications between the studio and talent located at a remote site via modem. Call for more information.

TWOX12 - Digital Multi-Line Talk System

Even if you have noise-free digital telephone service at your station, keeping talk show audio clean and pure isn't easy. You've got to transform digital call-in lines to work with your old analog phone system. Wouldn't it be great to have a talk show system that connects directly with digital lines without all the hassle of analog conversion? The solution is the TWOx12 Talk Show system from Telos - the world leader in broadcast telephone technology. The Telos TWOx12 brings ISDN clarity right into the studio, without any messy analog conversion. Just plug them in and you're done. The TWOx12 is the easiest, most efficient upgrade path from analog to digital. It's the only multi-line talk show system that you can use right now with your existing POTS lines, and upgrade for use with ISDN lines later. Features: single rack mount package includes two high-performance digital telephone hybrids and a 12line broadcast phone system (Desktop Director) for high-quality conferencing between callers - and no need for any external equipment; unmatched send/receive separation using Advanced Adaptive Cancellation technology; hybrid automatically adjusts to phone line conditions, eliminating the hollowness, feedback and distortion that occurs when send audio "leaks" into the caller output signal; clear, user-friendly front panel meters and controls for unparalleled ease of setup; AGC/limiting functions plus threeband dynamic equalization ensure consistent caller audio levels and spectral consistency; studio-grade 20-bit A/D conversion, combined with noise gating and shaping, delivers crystal clear caller audio, even when using POTS lines.

Along with the digital hybrids, up to four Desktop Directors (12-line broadcast phone system) can be used with the TWOx12 to maximize flexibility and control. Features: intuitive, "quick read" status symbols make line selection easier than ever; hosts receive immediate information about line availability, on-hold and ready-for-air queue status; Busy All function lets talent clear contest lines with just the touch of a button; simultaneous baseband analog and AES/EBU outputs; automatic high-precision sample rate conversion for send to caller input; caller ID support and fully adjustable caller ducking helps hosts stay in control; built-in Ethernet connection for remote control and easy software upgrades.

For even more control, add optional Windows®-based Assistant Producer call screening software to facilitate instant producer/host communication via LAN or WAN.

Even if you don't have ISDN in your studio yet, the TWOx12 gets you ready for the future. Start with POTS inputs and upgrade to ISDN inputs later, whenever you're ready. Call BSW today for more information on this advanced digital talk show system.

TALK DIGITAL TO ME

The advantages of ISDN are clear: Faster set-up, intelligent call handling and the superior performance of ISDN audio. And now Telos Systems brings the benefits of ISDN to the talk show environment.

The TWOx12 digital talk show system plugs right into ISDN BRI phone lines. Your callers sound louder and cleaner with the isolation performance that only a true four-wire system can deliver. And if you don't have ISDN in your studio yet, the TWOx12 lets you start with POTS and upgrade to ISDN whenever you're ready.

As easy as picking up the phone. Call management is fast and efficient

with our new Desktop Director, a fully integrated telephone and switch console. Intuitive, user-friendly operation is enhanced by the exclusive Status Symbols,[™] graphical icons that convey line and caller status at a glance.

And finally, a real breakthrough in telephone technology. Up to 12 callers can be routed to the two all-digital hybrids. Self-contained, easy-to-install and maintain, the TWOx12 simplifies even the most complex talk shows.

Ready to talk digital? For more information, call BSW at 1-800-426-8434.

Wire/Cao/Iing

HOSA

BSW can supply you with cables and connectors for virtually any audio or broadcast RF application. Below is a list of common cables for professional audio. Call us for pricing and more information on the cables you need.

Audio Cables

Sturdy pre-molded cables carry lifetime warranty against failure due to manufacturer defect.

HOSA

Hosa has a complete line of multichannel snakes that are perfect for interfacing your outboard recording gear to consoles, etc. Eight color coded, low-capacitance leads are bundled into a single, tough rubber jacket. Available in virtually any combination of RCA, 1/4", XLR and TRS in lengths from 6.6' to 23.1'. Also available with ends for ADAT, Tascam, Fostex, Yamaha and other popular recorder interfaces.

*Price Based On Configuration

Call For BSW Prices

Adaptors

Stock up your toolbox so you're never caught unprepared. Lifetime warranty against failure due to manufacturer defect on all adaptors.

CONNECTRONICS

BODGE PLUGS - Emergency Audio Connectors

No tool kit is complete without a set of Bodge Plugs. Each plug has either two or three color-coded, spring loaded, quick connect terminals. By pushing the end of the terminal a slot is opened to receive and hold securely a bare wire or test probe. 45 different adaptor cables can be quickly made in the field without the need of soldering.

SNAKE - Wire And Cable Cover

This unique product makes an excellent covering for bundles of wire or cables. When your wires are tucked inside the Snakeskin they become a single audio "snake" cable that is easy to manage, providing a sleek, clean appearance. The wraparound design provides 100% coverage that holds wires snugly in place. Wires can be covered with or without ends attached and can be branched out at any point along the snake. Since Snakeskin is expandable, you can add wires to your bundle at any time. Choose 1/2" or 1" styles for your particular application.
