46 YEARS OF RELIABLE SERVICE

Your Dependable Source for Dependable Test Instruments by

The world's most complete V-O-M line

MODEL 850
VTVM, 7" Scale

For Engineers,
Hobbyists...
in labs, maintenance!

Start with these Models

... the 310, Miniature V-O-M; the 630, Standard V-O-M; the 630 PLK, streamlined V-O-M with transistorized overload protection. The new 630-M one million ohms per volt V-O-M. Add to these the dozens of other standard models shown in this catalog and you will find the exact Triplet instrument for your needs. Triplet offers the broadest line of multitesters in the industry.

Rectangular
PL SERIES
2 1/2", 3 1/2", 4 1/2"

M SERIES
2 1/2", 3 1/2", 4 1/2"

Round Phenolic
2 1/2", 3 1/2"

Now Choose from 4 Basic Panel Instrument Models

A complete stock of standard Triplet panel instruments in 2 1/2" to 4 1/2" sizes. In round: phenolic; rectangular: phenolic or clear plastic; and new slim rectangular style with easy view scale.

New Flexible Panel Meter Design

G SERIES
2 1/2", 3 1/2", 4 1/2"

Two
Mounting
Styles

An all new meter design that features flexibility and interchangeability, with optional mounting bezel for modern "Picture Window" appearance.

Self-shielded, Exact, Reliable—DC instruments have the famous Triplet BAR-RING movements—more torque, faster response, greater ruggedness.

Modern design provides a dominant scale with plenty of dial area.

ALUMINUM BOTTOM PLATES

Now in 42 Sizes

Widest variety of standard sizes. Will fit all Bud chassis.

CLASSIC CABINETS

The ultimate in fine cabinetry. Designed and fabricated for sophisticated instrumentation and systems. Novel combination of patterned aluminum panels and extruded aluminum frame.

ALUMINUM CHASSIS

Now in 63 Sizes

Unsurpassed range of standard sizes. Reinforced welded corners. 5005 H-14 aluminum.

CLASSIC DOORS

Will fit any rack or cabinet with 19" panel space by attaching to panel mounting rails.

FLANGED PANELS

Made of 16 gauge steel with 1/2" flange all around. Standard 19" width. 12 sizes. Choice of five colors.

FRESH

IDEAS

BUD PRODUCES THE
WIDEST RANGE OF
STYLES AND SIZES OF
ELECTRONIC
CABINETS AND SIZES.

Newark HAS A
COMPLETE LINE OF
BUD PRODUCTS IN
EACH OF ITS 7
STOCKING
WAREHOUSES.

In its 112,000 square feet of space Bud has the facilities for large scale production. It is the nation's leading producer of sheet metal enclosures and accessories. Its cabinets, racks, cases, boxes and other fabrications are overwhelmingly preferred by this country's major manufacturers and assemblers. Bud products are used principally by the electronic, nuclear energy, aerospace, communications and instrument industries.

Each Bud product is the result of specialized engineering and fabrication processes. All material has been selected to provide the maximum service.

All Bud cabinets, chassis and other components are produced in a wide range of sizes so that the engineer and designer can select the proper type and size for his purpose without compromising the physical properties of his system. There are 1,500 sheet metal products from which to choose.

In addition to offering a myriad of standard products Bud offers special sheet metal fabrication for one or a thousand pieces. Your Newark Sales Engineer will be happy to explain this service.

See Index for Complete Listing of Bud Products.

NOW

TO SERVE YOU BETTER...

NEWARK HAS A NEW HEADQUARTERS!

Newark has a new main office and warehouse... designed and stocked to give you even faster service on the finest brand-name industrial electronic products. Our new national headquarters features:

- 150,000 square feet
- Speedy automated order handling
- Single story efficiency of operation
- Convenient location
- 250 car parking area

PLUS these services that have made Newark the nation's leading 1-point source for brand-name Industrial Electronic Products:

- Same day shipments
- Multi-million dollar inventory
- 7 strategically located warehouses
- Telex, TWX and WATS lines for instant communications
- Nationally known standard brands of proven quality
- Over 600 lines of leading manufacturers
- More than 70,000 items with that famous double guarantee—the manufacturer's . . . *AND* Newark's
- Factory OEM pricing
- 46 years of experience and progress
- AAA-1 rated company
- Ultra-modern facilities
- Outstanding reputation for leadership

AND THESE SPECIAL SERVICES FROM NEWARK!

- Emergency department for special handling of your critical replacement needs
- "Custom Stocking" Program—tailored to your requirements. Tell us your projected requirements. We'll build our inventory around your needs.
- Fast, firm quotations from our Bid Department on quantities larger than listed, or items not shown in catalog. Credit available to rated companies.

UNIBLOC MRTL and MILLIWATT MRTL SERIES

Low cost, plastic encapsulated integrated circuits. Temperature range +15°C to 55°C.

MRTL TYPES

Type	Function	1-999	1000-4999
MC715P	Dual 3 input gate	1.00	.75
MC723P	J-K flip flop	1.35	1.00
MC724P	Quad 2 input gate	1.08	.81
MC725P	Dual 4 input gate	1.08	.81
MC788P	Dual buffer (non-inverting)	1.35	1.00

Type	Function	1-999	1000-4999
MC789P	Hex inverter	1.08	.81
MC790P	Dual J-K flip flop	2.00	1.50
MC792P	Triple 3 input gate	1.20	.90
MC799P	Dual buffer	1.08	.81

* Trademark of Motorola Inc.

MILLIWATT MRTL TYPES

Type	Function	1-999	1000-4999
MC717P	Quad 2 input gate	1.08	.81
MC718P	Quad 3 input gate	1.00	.75
MC719P	Dual 4 input gate	1.08	.81

Type	Function	1-999	1000-4999
MC783P	Triple 3 input gate	1.20	.90
MC798P	Dual buffer	1.35	1.00

LINEAR CIRCUITS — FIG. B

Type	Function	1-24	25-99	100-999
MC1110	Emitter-Coupled Amp.*	25.00	20.00	15.00
MC1430	High gain oper. Amp.	12.00	10.00	8.50
MC1431	High Input Imp. operational Amp.	14.25	11.85	9.50
MC1511	DTL-MECL Level Trans.	13.45	11.80	10.75
MC1512	MECL-DTL level Trans.	15.30	13.50	12.25
MC1513F	A/D Ladder Network	45.00	37.50	30.00

MC1530	High gain oper. Amp.	27.00	22.50	18.00
MC1531	High input imp. operational amp.	30.00	25.00	20.00

* 5 pin TO-5 package

MVTL INTEGRATED CIRCUITS

Noise immunity from 2 to 5v; logic swing 4 to 10v; propagation delay 50 nsec at +25°C; Temp. Range from 0 to +70°C; for application to 1 MHz.

MC650G	Dual 3 input NAND/NOR gate	8.65	7.60	6.90
--------	----------------------------	------	------	------

MC651G	R-S flip flop	12.00	10.50	9.55
MC652F	16 14 Pin Sockets	14.45	12.70	11.55

INTEGRATED CIRCUIT PATCHBOARDS

These 16-socket patchboards are designed to allow rapid interconnection and evaluation of individual integrated circuits or complete logic designs. With three supply voltages at each socket, double pin jacks, 22-pin I-C edge connector or a 9 BNC coaxial connector Input/Output arrangement, plus banana plugs

for power connection between boards. Complete breadboarding flexibility with simple "plug in-plug out" changes possible. Designed using 1/16" glass epoxy with 2 oz. gold plated runs, rated for DC to 50 mc freq. and -65°C to +150° temp. performance.

Type	Function	1-24	25-99	100-999
XC83	16 10 pin sockets for TO-5 cases.	150.00	125.00	100.00

Type	Function	1-24	25-99	100-999
XC72	16 14 Pin Sockets for IC and 14-pin flat packs	250.00	225.00	200.00

Texas Instruments Integrated Circuits

MEM5021-32	Integrator of ternary type	360.00	245.00

MOS MULTIPLEXER CIRCUITS

MOS multiplexer circuits feature 10¹⁰ ohms input impedance to gate, zener gate protection, square law transfer characteristics, gate, zener gate protection, square law transfer characteristics, low crosstalk and low "on" resistance. Multiplex applications include analog and time division multiplexing and chopping.

Type	Bdss	BVgss	1-99	100-999
MEM2004	-30	-40	67.75	45.40
MEM2005	-30	-25	55.50	37.18
MEM2009	-30	-30	40.00	26.60

MOS INTEGRATED SERIES—SHUNT CHOPPER

MOS integrated choppers have no offset voltage, high on-to-off ratio, close thermal track and stability.

Type	On-to-off Ratio	Frequency (kHz)	1-99	100-999
MEM1006	200 db	100	37.50	25.10

PA909

Offer optimum in performance, size and reliability. Hybrid circuits fabricated utilizing transistor and diode elements in combination with thin film resistors and capacitors. Fabricated with diffusion techniques in single silicon epitaxial monolithic substance. All integrated circuits feature planar epitaxial passivated construction and are enclosed in hermetically sealed package.

TYPE D 12X207—TO-5

Medium frequency amplifiers with 3 very high gain transistors in combination with 5 resistors. Input impedance is 10 Kohms min. and noise voltage is 10 mv max. between 400 and 100,000 cycles. High frequency 3 db point of these amplifiers is 40 kc.

Type	Supply v. (min)	Volt. gain (mv)	Max. opt. volts	1-99	100-999
D12X207-2	30	500/850	6	75.00	50.00
D12X207-1	20	350/700	4.5	60.00	40.00

TYPE D 12X218—12-LEAD FLAT-PACK

Amplifier circuit featuring unity voltage gain with minimum input impedance of 50 megohms. Output resistance is a minimum of 1.5 Kohms. Supply voltage: 45 volts.

Type	Op. temp. rng.	1-99	100-999
D12X218	-25 to +125°C	82.50	55.00

TYPE D 12X257—TO-5

Video amplifier with 2 transistors exhibiting ft's in excess of 600 mcs. Broad band capabilities up to 25 mcs.

Type D12X257. 1-99 45.00 100-999 30.00

LOW LEVEL SWITCHES—6-LEAD FLAT-PACK

Contain 6 diodes, 4 resistors and 2 transistors. Feature extremely low offset voltage, low capacitances, and low leakage current. PA345 is tighter spaced than PA358.

Type	1-9	10-99	100-999
PA345	44.75	29.95	19.90
PA358	39.40	26.25	17.50

TYPE PA-107—TO-5

High-performance operational amplifier with low input.

Type	Output V swing	1-9	10-99	100-999
PA107	20 V. peak to peak	85.60	63.75	42.50

VIDEO AMPLIFIER—TO-5

Typical bandwidth of 50 mcs. Input impedance is 20 ohms; output impedance is 500 ohms.

Type	Output V swing	1-9	10-99	100-999
PA108	1 v. peak to peak	38.30	25.50	17.00

TYPE PA113—TO-5

3-stage direct-coupled amplifier featuring high current and high power gains. Easy application of either negative feedback for high gain stability, or positive feedback for monostable, bistable or astable applications.

Type	Supply V		1-9	10-99	100-999
	Min.	Max.			
PA113	4.5	15	15.15	10.10	6.75

TYPE PA116—TO-5

Summing amplifier featuring high gain and accurate addition of AC signals. Circuit can also be used as a stable high gain voltage amplifier. Low input and output capacitances with a large output voltage swing. Current gain bandwidth without feedback; 100 mcs.

Type	Current gain	1-9	10-99	100-999
PA116	100,000	78.75	52.50	35.00

AUDIO FREQUENCY AMPLIFIER

Designed for general purpose high gain applications. Features typical current gain with feedback of 6,000. Power supply voltage 12 volts. Also has option for additional stages and provisions for incorporation of a feedback circuit.

Type	Bandwidth (typ.)	1-9	10-99	100-999
PA114	1 mc	27.00	18.00	12.00

DIODE QUADS FOR GATING RING DEMODULATION APPLICATIONS—TO-5

Close matching of forward voltage and low leakage currents.

Type	Description	1-9	10-99	100-999
PA908	shunt quad	16.87	11.25	7.50
PA909	series quad	16.87	11.25	7.50

THIS INTEGRATED CIRCUIT LISTING IS COMPLETE TO THE DATE OF PRINTING, AUGUST 15, 1966, BUT NEW ITEMS ARE CONTINUALLY BEING DEVELOPED AND ARE ADDED TO THE NEWARK STOCK. CHECK WITH THE NEWARK INDUSTRIAL DEPARTMENT FOR ANY NEW INTEGRATED CIRCUITS NOT LISTED. ORDERS WILL BE BILLED TO YOU AT THOSE PRICES IN EFFECT AT TIME OF SHIPMENT.

MIXING PRIVILEGES

Pricing for mixed quantities of integrated circuits: Price benefit given where single order consists of mixture of Integrated Circuit types listed on the price list & in the same type package. Types within the following groups may not be added to any other group in calculating price cut.

- A:—SA10 and SA11
- B:—SA20 only
- C:—Any SF or SG prefixed types
- D:—SM10, SM20, SM30, SM40 series
- E:—SM50 series
- F:—SM60 and SM70 series

HIGH RELIABILITY PLASTIC ENCAPSULATED TRANSISTORS

- Plastic packages
- One-piece construction

- Heat and moisture resistant
- Reduce cost of electronic systems

Cutaway model at left shows simple, rugged TO-92 package. The solid, one piece construction provides excellent protection for active element and fine connecting wires, assuring stable performance under condition of severe shock or vibration. The plastic compound meets MIL-STD 202-C, for moisture protection. The model at right shows the TAB-PAC package, which is used in the TAB-PAC SILECT power transistor. Provides 10 watts at 75°C case temperature.

PLANAR SILICON PHOTO DEVICES

Type LS-400. Microminiature. Designed for photo switch-switching, tape-read-out, differential amplifiers, and proportional control. VR, 30 volts; BVR, 50 volts at 100 μ a; BVF, 8 volts at 100 μ a.
Type LSX600. Ideally suited for line read-out application, and high density matrix equipment. Velocity indicators, encoders, tape and card readers. Coll. Emit. v., 50 v; emit-coil. v., 7 v.

SILICON ZENER DIODES

Nominal zener voltage is tested at the 1/4 power point. Dynamic impedance is measured at two points. Rating from 2.4 to 150 Mw.

Case 53. 150 mW diffused. "A" suffix indicates ±5 tolerances. Other units ±10%.

Motorola Diodes

DO-4—10 WATT LOW VOLTAGE ZENER DIODES

No suffix indicates $\pm 10\%$; "A" suffix indicates $\pm 5\%$. Standard polarity cathode to case.

Motorola Textbooks and Lab Kits

TEXTBOOKS AND HANDBOOKS

NEW SILICON RECTIFIER HANDBOOK

An adequate source for rectifier-circuit design. Handbook highlights: computing single and multi-phase circuit values; heat sinking proper device cooling; voltage and current surge protection; Multi-Cell approach to very high power rectification; practical rectifier circuits. 216 pages. **52F856. NET** **1.50**

INTEGRATED CIRCUITS TEXTBOOK

A must for those involved in the design and applications of integrated circuits. Based on Motorola's Integrated Circuits Design Course, 385 Page guidebook covers both integrated circuit design philosophy and practical production know-how. **52F102. NET** **12.50**

SWITCHING TRANSISTOR HANDBOOK

A reference handbook devoted to design of high frequency switching circuits. This 365 page switching transistor manual not only provides detailed design procedures for saturated-mode and avalanche-mode circuits, but relates device characterization and reliability data. **52F862. NET** **2.50**

POWER CIRCUITS MANUAL

This 196 page circuits digest offers working circuits or design ideas when using semiconductor. Provides device, design and circuit data for power inverters and converters. RF transmission, automotive ignition systems and lighting and motor control plus unique device characteristics. **52F861. NET** **2.00**

NEW SEMICONDUCTOR DATA BOOK

Completely revised and updated, this semiconductor data book includes all of the latest Motorola devices (210 pages on integrated circuits alone), maximum ratings, complete electrical-mechanical specifications, case outlines, important curves, and selection and cross-reference data. EIA registered

type number index and short form specification table, indexed to 1536 pages in this hard cover industry reference. Book answers an electrician's semiconductor needs. **52F860. NET** **3.95**

ZENER DIODE AND RECTIFIER HANDY LABS

NEW

ZENER DIODE LAB KIT—MZK100

100 premium quality 1-watt surmetic zener diodes. Assortment of 37 voltage types (3.3 to 100 volts) stocked in compact 15-drawer cabinet.

NEW

RECTIFIER HANDY LAB KIT MODEL MRK-200

84 popular, first-quality rectifiers and molded bridges in ratings you need most for lab and benchwork requirements—0.25 to 35 amps, 200 to 3,000 volts.

MICROTAB TRANSISTORS

The new microtab transistor series are extremely small in size (.070x.070x.085") and perform the same as their larger counterparts. They are ideal where microminiature transistors are required such as instrumentation or hybrid circuits.

RECTIFIER STACKS

TYPE 4JA211

GERMANIUM LOW CURRENT STACKS

Small and lightweight, with excellent regulation. May be arranged in stacks of up to 12 fins for more than 160 various circuit configurations. Outputs up to 6 amps at 55° C ambient. Up to 630 PRV.

TYPE 4JA411, 4JA1011

SILICON LOW CURRENT STACKS

High temperature operation, up to 150° C. Ratings up to 18 amps at 23° C ambient; up to 3360 PRV. Offer high efficiency plus excellent regulation. Hundreds of stack combinations for a variety of circuit conditions. 4JA1011 35 amp. one cycle surge rating.

SCR COMBINATION STACKS

Packaged building blocks include silicon controlled rectifiers, compatible rectifiers, heat sinks, interconnections and all hardware. Installation requires only mounting bolts and connections.

SERIES C3512 and 13, C4012 and 13, C1012 and 13, C1112 and 13, C1212 and 13

Rated up to 13.65 amps per fin free convection cooled, up to 23.5 amps per fin forced cooled at 25° C ambient. In two fin sizes, 3"x3" and 5"x5", and five SCR types.

SERIES C5014, C5514, C6014, C8015

Provide up to 102 amps per fin free convection cooled at 30° C ambient. Specially designed aluminum extrusion for maximum heat dissipation when used with C50, C55, C60 or C80 SCR. Available in hundreds of circuit configurations.

TYPE 4JA3512

SILICON MEDIUM CURRENT STACKS WITH 5" FIN

Square fin assembly for optimum use of 1N2154 series, 25 amp cell. Provides wide range of power applications with DC outputs up to 108 amps at 55° C ambient, up to 1800 PRV.

TYPES 4JA2011, 4JA2511, 4JA3511

SILICON MEDIUM CURRENT STACKS

For wide range of power applications. Type 4JA2011 provides up to 32 amps at 55° C ambient, up to 1800 PRV. Type 4JA2511 gives up to 50 amps at 55° C ambient, up to 1800 PRV. Type 4JA3511 gives up to 65 amps at 55° C ambient, up to 1800 PRV.

SILICON HIGH CURRENT STACKS

TYPES 4JA7012, 4JA9013

Lightweight stacks provide up to 165 amps DC at 40° C ambient, up to 1000 PRV. Type 4JA7012 uses 5"x5"x1/8" flat copper fin heat sink. Type 4JA9013 has 7"x7"x3/8" flat aluminum fin.

TYPES 4JA7014, 4JA9015

Designed for free convection cooled applications which require a maximum amount of current in a relatively small space. Fin is anodized aluminum, 4" x 4" x 5".

TYPE 4JA9013

DC outputs up to 420 amps at 40° C ambient, up to 1000 PRV. Free convection cooled with 7" x 7" x 3/8".

For Ordering Information Concerning

G.E. Rectifier Stacks see page 103

Rectifiers & Diodes

GE RECTIFIERS (Continued)

TYPES 4JA421, 4JA422 POTTED RECTIFIER CIRCUITS

Rectangular design with solder lug. Available in wide variety of circuit configurations. Use Types INS36-540, IN1095 silicon cells.

Type	Current up to	Ambient Temp.	PRV. up to
4JA421	0.65 amp	25° C	10,000
4JA422	1.50 amps	25° C	2,000

TYPES A723 AND A725 HIGH VOLT SERIES

A7 Controlled Avalanche Rectifiers available in convenient pre-assembled, potted assemblies with wire lead terminals. Available up to 10,000 PRV. Up to 820 ma at 50°C ambient. Self-protected

against normal voltage transients. Available in many circuit configurations. Type A723 is rectangular block series. A725 is axial lead cartridge series.

Ordering rectifier stacks: order by series type number e.g. 4JA1D11; and include required current, voltage, transient voltage, max. ambient temp., phases, circuit configurations, and load. SCR series specify connection and/or supply circuit diagram.

SEMICONDUCTOR MANUALS

G.E. Transistor Manual—Seventh edition; full of information. 52F675. Each.....2.00

EXPERIMENTAL/HOBBYIST ELECTRONIC COMPONENTS

Featuring electronic components for the experimenter, with schematic diagrams for building battery charger, tachometer, SCR ignition system, flashers, stereo amplifier, all-band receiver, plug-in speed control for tool or appliances, light dimmer, and other items. Most of these projects are described in the new Electronic Components Hobby Manual listed below.

Type	DESCRIPTION	Net
GE-X1	SILICON CONTROLLED RECTIFIER. 117-volt solid state switch. Controls up to 4.7 amps.	5.00
GE-X2A	LIGHT ACTIVATED POWER SWITCH. It will conduct up to 1/4 ampere. up to 25 volts.	2.80
GE-X3	HIGH CURRENT SILICON CONTROLLED RECTIFIER. For up to 13 amps @ 50 PIV.	4.80
GE-X4	CONVENTIONAL HIGH CURRENT SILICON RECTIFIER. 2C amp rating. For up to 200 PIV.	1.60
GE-X5	HIGH SENSITIVITY SILICON CONTROLLED RECTIFIER. For special circuits up to 1.6 amps and 50 volts. Activated by extremely low signal power (a momentary signal power of 200 micro watts or less).	3.55
GE-X6	PHOTO CONDUCTIVE CELL. Cadmium sulfide end-illuminated. Up to 250V peak AC/DC.	1.40
GE-X7	REED SWITCH. Carries from 15 volt-amperes to micro-amps. External magnetic actuation.	.80
GE-X8	MED. SPEED. NPN TRANSISTOR. Germanium. For low level switching and amp.	.70

Type	DESCRIPTION	Net
GE-X9	MED. SPEED, PNP TRANSISTOR. Germanium alloy. For medium power amplification and switching at low frequency.	.85
GE-X10	UNIUNCTION TRANSISTOR. Three-terminal semiconductor. Has low value of firing current, stable negative resistance, stable firing current, high pulse current capability.	4.95
GE-X11	ZENER DIODE. Rated 8.2 volts at 1 watt.	2.25
GE-X12	TRIAC—With schematic for building remote control for appliances.	5.30
GE-X13	DIAC—With schematic for building lamp dimmer or AC motor control.	1.60
GE-X14	THYRECTOR—With schematic for building dual voltage power supply.	1.15
GE-X15	THERMISTOR—With schematic for building adj. temp. alarm.	
GE-X16	SILICON CONTROLLED RECTIFIER — With schematic for building battery-operated fluorescent light.	3.45
2N107	AUDIO PNP TRANSISTOR. Alloy junction.	.55
	AUDIO PNP TRANSISTOR. Low voltage, high frequency transistor.	.75
2N170	UNIUNCTION TRANSISTOR.	1.49
GE-M100	GERMANIUM MESA TRANSISTOR.	1.50

New Electronic Components Hobby Manual. 199 pages, covers fundamentals, electrical theory, troubleshooting, device symbols and 35 projects for your car, entertainment, home and workshops. 52F678. NET1.50

SARKES TARZIAN

SINGLE PHASE BRIDGE RECTIFIERS

Extruded heat sinks and fans incorporated into assemblies where required, feature Tarzian Silicon Bridge Rectifiers rated from 2 to 400 amp. and 30 to 480 V on single phase bridges and from 15 to 500 amp and 35 to 560 V on three phase bridges. Avalanche silicon rectifiers are used throughout.

Sarkes Tarzian Avalanche Regulators & Rectifiers

Silicon rectifiers for high temperature applications. All are now avalanche type. They provide "built in" protection against reverse transient overvoltage spikes. Use of avalanche type rec-

tifiers eliminates need for protective components and circuitry normally used to protect standard rectifiers. Elimination of such crutch type components, reduces costs, saves space.

"CENTRE-KOOLED" SELENIUM RECTIFIERS

Featuring center cooling by means of spacers. Each spacer acts as an individual spring to guarantee constant assembly pressure. Higher leakage resistance assured by protective end plates of bakelite. Color-coded for polarity identification. All rated at 130 volts. Av. wt., 6 oz.

KLIPVOLT SUPPRESSORS

Designed to help reduce transient voltages to as low a value as possible without changing circuit characteristics or adding excessive cost. It is recommended that these non-polarized suppressors are selected to circuit requirements, not matched to the silicon rectifiers they are intended to protect. Available in polarized* and non-polarized one phase or three phase applications. * S-594 has mounting stud on each end and others have single stud. Peak discharge current for all units is 2.5 amps.

1 WATT ZENER VOLTAGE REGULATORS (FLANGELESS)—DO-13

These zener regulators are designed primarily for continuous feeding in automated assembly processes. All of the units are process-selected so that they may assure extremely sharp zener "knees" and excellent voltage regulation over the entire operating temperature range. These devices have $\pm 20\%$ tolerance. Add "A" to type number for $\pm 10\%$ tolerance.

Type	Vz @ Ist	Ist mA	Zzt @ Ist	1-99	100-999

GENERAL PURPOSE SILICON RECTIFIERS Continued

10C SERIES SILICON RECTIFIERS—DO-13

High reliability series of inexpensive silicon rectifiers will meet or exceed the electrical specifications of over 340 popular JEDEC and mfr. numbered types. Flangeless low leakage hermetically sealed, 1.3 amp. (1300 mA) type. Peak reverse voltage ratings to 1000 volts. Rated at 50°C.

Type	Peak Reverse Voltage Rating (V)	1-99	100-999
10C1	100	.32	.29
10C2	200	.35	.32
10C3	300	.38	.36
10C4	400	.42	.38
10C5	500	.47	.43
10C6	600	.52	.46
10C8	800	.75	.65
10C10	1000	1.70	1.20

MINIATURE SILICON RECTIFIERS—OO-27

Oper. Temp. Range: -65° to 150°C. Max. DC output (@ 75°C) and reverse current rating (@ 100°C) are full cycle average values. Case dimensions are 0.375"x0.200" dia. approx.

SILICON BRIDGE RECTIFIER ASSEMBLIES

Pre-engineered and completely assembled single phase bridge rectifier stacks. The 1/2 and 1.2 amp series are sub-miniature assemblies of diodes on glass melamine board. All others are tin mounted assemblies. All diodes and rectifiers used are hermetically sealed to withstand extremes of temperature and humidity. Dual amp. ratings on B12 and B25 types are without and with fan cooling.

*Into resistive or inductive load. Add 10-30% for capacitive load.

SILICON CONTROLLED RECTIFIERS

Fig. C—25 TO 60 AMP. COMMERCIAL TYPES

These 25 to 60 amp rectifiers are capable of extremely stable operation at temperatures up to 175° C base temp. Very low reverse leakage (10ma, full cycle). "Quad-sealed", a 4-layer process assures high resist. to humidity, shock, and vibration. May be mounted in any position. 1.219L x .625" dia.

Choose from the broad International Rectifier Silicon Controlled Rectifier line for your precision switching circuit needs. Covering the current range from 3 to 350 amperes, over a voltage PRV range of 25 to 1200 volts. International Rectifier JEDEC "A" series in 5 and 10 amp types provide a wider temperature range as well as more sensitive switching characteristics. The Fast Turn Off Types are available in 5, 16, and 70 amp series. They are designed for inverters and other DC switching applications.

International Rectifier Semiconductors

Silicon Photocells Selenium Photocells

CADMIUM SULPHIDE PHOTO CONDUCTIVE CELLS

These cells do not generate electricity, but are "light-sensitive resistors." Used for operating relays, counting devices, door openers, turning on street lights, etc. Type CS-020-G8 is sealed in glass. Types CS-120U6 and U16 are unmounted and will operate directly on 117 volt AC or DC. The type CS-120 cell is enclosed in a plastic case.

Type	Approx. Size	Max. Appl. V.	1-99	100-999
CS-020-G8	1/2x1x1/8"	20	4.50
CS-120-U6	1/2x3/4x1/16"	120	1.95

CONTROLLED RECTIFIER HANDBOOK

This controlled rectifier handbook contains 110 pages and is full of pertinent illustrations. The book stresses the importance of the physical properties of silicon controlled rectifiers and their effect in application. The handbook contains chapters on the structures of controlled rectifiers, operation, static, dynamic and gate characteristics and cooling and test methods.

53F091. NET. **2.50**

SILICON PLUG-IN TUBE REPLACEMENTS

Solid state rectifiers replace medium and high voltage tubes. Rugged construction, long life, no warm-up time, no filament supply required, low operating temperature. *High altitude types.

Type	Max.		Replaces Tube Types	1-9	10-99
	L."	D."			
ST-2*	2.65	1.25	5Y3, 5AU4, 5AW4, 5AZ4	5.50	4.95

PHOTOCELLS AND SUN BATTERIES—FIG. B

Selenium cells are used extensively in light meters and other photographic and optical devices. Silicon cells have higher light conversion efficiency particularly in sunlight. All types listed are supplied with flexible leads and provisions for mounting. Case dimensions: 1 1/8x1 1/8x3/16".

Type B2M. 1/2x3/4". NET. 1-99.....1.50 100-999.....1.35

SSM	High efficiency type	4.95	4.40

TRANSISTOR SOLAR RADIO PACK

I.R.'s Transistor Radio Solar Pack is available in voltage ratings of 4.5V. It feeds a constant charge to the batteries while the Solar Packs are supplying the radio with its power. Housed in a handsome plastic case which protects the solar cell from damage. The Transistor Solar Pack is supplied with unique mounting pads which attach easily to any radio case or cover. No soldering necessary because the 6" leads are supplied with battery terminals.

Fig. A

GENERAL PURPOSE & FAST SWITCH SILICON JUNCTION DIODES

Low leakage, excellent stability; DO-7 package. Ratings at 25°C. * Indicates MIL approval.

LOW COST 1 WATT AMPLIFIER

PCA-2-14. Low cost circuit provides one watt output with the least number of components. It uses TO-18 output transistors which are mounted with a heat sink clip. Provided with 12 or 16 ohm speakers.

NET. 1-994.55 100 UP4.00

2 WATT COMPLEMENTARY AMPLIFIER

PCA-1-14. Low cost circuit provides two watts output when driven from a crystal cartridge. It features very high stability and reliability along with a low operating temperature and compact size.

1 WATT COMPLEMENTARY AMPLIFIER

PCA-1-9. Circuit provides 1 watt output from a 9 volt battery or power supply. It features low battery drain along with a highly reliable and compact circuit without using any transformers.

NET. 1-996.00 100 UP4.00

4 WATT COMPLEMENTARY AMPLIFIER

PCA-3B-18. Amplifier provides 4 watts output per channel from a crystal cartridge. It has bass and treble controls as well as loudness and balance controls. The amplifier is temperature stabilized by a thermistor and contains a low noise input transistor.

B-5000

ENCAPSULATED NPN SILICON POWER TRANSISTORS

The Bendix B-5000 plastic Encapsulated Silicon Power Transistor is a new concept in solid state power handlings. This reliable, low-cost device is taking over many new applications where silicon power formerly could not be considered.

Fig. C

FULL WAVE RECTIFIER ASSEMBLIES

A miniature series of bridge and doubler modules designed for printed circuit applications. Double seal assures moisture resistance to environmental specs of MIL-STD-750A, FWB types

(bridge rectifiers) measure 1/2x1/2x1/4", with pin leads 1/4" long; FWD types (doublers) measure .50x.40x.20" with 5/8" pin leads.

MINIATURE SILICON DIFFUSED RECTIFIERS — Fig. C

General-purpose diffused silicon rectifiers featuring high forward conductance, low leakage currents, and reliable performance. Unique methods of encapsulating the rectifier assure permanent resistance to parameter degradation due to moisture diffusion.

Meet or exceed environmental testing per MIL-STD-750A. Surge current rating: 25A. Operating temperature range: -55 to +100°C. Body size: .250x.095"; 1.110" leads.

CONANT COLOR-CODED INSTRUMENT RECTIFIERS

General replacement rectifiers for all types of meters and relays. Color-coding makes it easy to select correct replacement. Maximum AC input of all units 5 volts. Aver. shpg. wt., 3 oz.

Series 500. Designed for use in apparatus drawing up to 30 milliamps. Reverse voltage, 2.25 DC. Disc diameter, .500". Active area, .15 square inches.

Series 160 and 160-C. Designed for applications requiring better than average frequency response. Recommended for conventional circuits using meter movements drawing up to 5 milliamps. Disc dia., .166". Active area, .019 square inches.

21F109. Conant Instrument Rectifier Book. NET15

THIS SEMICONDUCTOR LISTING IS COMPLETE TO THE DATE OF PRINTING, AUGUST 15, 1966, BUT NEW ITEMS ARE CONTINUALLY BEING DEVELOPED AND ARE ADDED TO THE NEWARK STOCK. CHECK WITH THE NEWARK INDUSTRIAL DEPARTMENT FOR ANY NEW SEMICONDUCTORS NOT LISTED. ORDERS WILL BE BILLED TO YOU AT THOSE PRICES IN EFFECT AT TIME OF SHIPMENT.

NPN PHOTO DUO-DIODE—TYPE 1N2175

The 1N2175 is a sub-miniature, symmetrically diffused silicon photo readout device. The two junctions are symmetrical so that either diode terminal can be biased either positively or negatively. Due to this unique design, AC or DC bias voltage can be used. The small size and high light sensitivity of this unit makes it particularly useful in high speed readout of punched cards and tapes.

Type 1N2175. NET 1-99 11.50 100-999 8.00

- **NEWARK SERVICE** is the fastest, most efficient in the industry. It cuts your lead time to the absolute minimum.
- **YOUR ORDER** is filled the same day it is received.
- **EMERGENCY REQUIREMENTS** are sped to you within minutes.
- **PHONE, WRITE, WIRE** for the electronics equipment you need.

NEW TYPE 3 CdSe

A photoconductive cell with peak spectral response of 7350 angstroms, fast response and very high light to dark resistance ratio. Can be used for high speed switching or counting. Sensitive to near infra red. For use with incandescent or neon lamps. Temp. range: -50°C to $+75^{\circ}\text{C}$. (*) With and without heat sinks.

NEW TYPE 5 CdS

Photoconductive cell has a peak spectral response of 5500 angstroms (closely matches the human eye), most stable, lowest memory photocell available. Can be used in light measuring applications and precision low speed switching. For use with incandescent, fluorescent or neon lamps. Temp. range: -50°C to $+75^{\circ}\text{C}$. (*) With and without heat sinks.

NEW DUAL ELEMENT

Dual element photoconductive cells are photocells which contain two separate elements with two separate leads and one common lead. Maximum Power: 125 mw. @ 25°C. Resistance tolerance at 2 ft-c: $\pm 33\frac{1}{2}\%$. Temperature range: -50°C to $+75^{\circ}\text{C}$. 7 Photoconductive materials. Dia. x length .36x.18".

Raysistors & Photoconductive Cells

RAYTHEON RAYSISTORS

• Ideal replacement for Switches — Relays — Potentiometers

Four terminal optoelectronic device which performs a variety of control functions, providing noise-free control of AC or DC signals over a wide dynamic range without transients or contact (or wiper) chatter. Since there are no moving parts, the Raysistor is exceptionally rugged and has inherently long life in typical applications as variable resistors, solid state switches, relays and voltage or signal isolators. Unit operates on the principle of controlled light acting on a photoresistive element. No electrical or mechanical connection exists between the control and signal circuit. * With Socket.

THE RAYSISTOR — APPLICATIONS. Complete twenty-seven page book fully covering Raytheon Raysistors—applications, technical specifications, advantages. Generous use of charts and schematics. Size: 8½ x 11". Shpg. wt., 4 oz. **.35**

Hermetically-sealed solid-state light dependent resistor using a cadmium selenide (EM1502), cadmium sulphide (EM1505) photosensitive material designed for use in optoelectronic control circuitry. Fast switching speed suitable for chopper and other control and switching applications requiring

RAYTHEON PHOTOCELL

operation up to one kilocycle. Coupled with a high voltage capability, provides a very low noise variable resistor which is ohmic over a wide range of voltage and illumination. The T0-5 package permits use of standard mounting hardware.

GENERAL ELECTRIC PHOTOCONDUCTIVE CELLS

Hermetically sealed after evacuation and back filled with dry air to reduce the moisture content to approx. .015%. Cells come in three basic sizes, four power ratings, and multiple resistance ratings. Wide range enables the designer to select a maximum power dissipation of 75, 250, 300 or 600 mw. By using cells to operate many devices directly, amplifying stages can be eliminated and overall circuits greatly simplified. Cells have very high sensitivity and spectral response peaks in the visible light

range. Near maximum response obtained over large portion of the spectral region. All are in glass-metal packages. Have flexible leads and small size to dissipation ratio. No external shields required. May be used for annunciators, anemometers, camera aperture control. * Dia. excludes flange.

† Plastic encapsulated (not hermetically sealed), cadmium-selenide device.

PHOTOCONDUCTIVE CELL-LAMP COMBINATION

Photoconductor-lamp combination includes cadmium-sulfide (PL5C1 is cadmium-selenide) photoconductive cell and a variable illumination source enclosed in a light-tight package. Photoconduction is controlled by varying the voltage to the light source. Intended to be used for circuit isolation as a potentiometer free of moving-contact noise, and for low-level switching.

Solar Cells & Semiconductor Cooling Units

HOFFMAN SILICON CELLS

HIGH EFFICIENCY SOLAR CELLS

Speed of response 10 microseconds or less, depending on load resistance. Light source: a solar simulator with spectral distribution of space sunlight as determined by F.S. Johnson of NLR with intensity equiv. to 140 mw/cm² earth orbit sunlight. Size: 0.4 x 0.8"; active area, 0.28 sq. in.

STANDARD SOLAR CELLS

Operating and storage temp. range -65°C to +175°C. Speed of response 10 microseconds or less depending on load resistance. Spectral response 0.4 to 1.15 microns, peak at 0.85 microns. Measured at tungsten light source with a color temp. of 2800° K @ a light level which corresponds to 100 mw/cm² of sunlight as correlated by means of a standard solar cell. Cell test temp. is 28°C.

WAKEFIELD SEMICONDUCTOR COOLING UNITS

NEW SNAP-ON CIRCUIT BOARD HEAT SINKS

Series 140 supplements the Series 200 Featherweight Heat Sinks. Types 140, 141, and 142 fit popular press fit diodes and SCRs as plus JEDECTO-8. Case dia. ranges from .480 to .505. Provides thermal resistance as low as 10°C/w. Material: highest thermally conductive aluminum. Finish: black anodize is standard.

Stock No.	Type	Size	1-499	500-999	1000-2499	2500-4999
58F376	140	1.035 x .520 x .930	.14	.12	.105	.095

58F378	142	1.035 x .520 x 3.00	.185	.175	.165	.158

NEW CIRCUIT BOARD COOLER FOR TO-5 TRANSISTORS

Type 150. Ideal for use where space is limited. Requires only 0.375 in.² area. In applications permitting 1 3/8" height above the circuit board, this lightweight, economical Cooler has good performance characteristics with TO-5 cases: case rise 40°C @ 1 w with bright aluminum natural finish.

Stock No.	Type	Size	1-499	500-999	1000-2499	2500-4999
58F379	150	1.375 x 1.00 x .375	.061	.051	.041	.036

NEW THERMAL CLAMP FOR TO-1 CASES

Type 255. For push/pull driver or low power output applications. Gives retention of cases to chassis or heat sink. 2 cases can be mounted. 3°C/w per TO-1 transistor or 1 1/2°C/w for both. Mtg. ctr.: .687, tol. ±.001 or ±.005. Material: 1100 aluminum alloy. Finish: none.

Stock No.	Type	Size	1-499	500-999	1000-2499	2500-4999
58F380	255	1.726 x .375 x .476	.063	.053	.043	.038

NEW SHELF REGULATING COMPONENT OVENS

Statitemp Series. Provides a stable thermal environment. Temperature gain (defined as ratio of change in ambient temp. to change in control temp. at constant voltage and component dissipation, as measured by the temp. dependent characteristic of the component) is 30:1 for 115°C. types, 15:1 for 80° models. Low power drain; unaffected by component current. Operate from 24VDC. Aver. wt. approx. 5 gms.

NEW THERMAL RETAINERS FOR TO-5 CASES

The TO-5 case style, including the Kovar header type, is best heat sunked at the bottom face of the flange, and all Series TR-254 Heat Sinks provide this preferred method. All five types intended as thermal links from transistor case to a cooler or chassis member acting as the heat sink. Type 254-S1 has built-in electrical insulation. Material: Type 254-S1; 6061-T6 aluminum with gold irridite finish.

Stock No.	Types	1-99	100-499	500-999	1000-2499	2500-4999

NEW DELTA BOND 152 THERMALLY CONDUCTIVE ADHESIVE

Type 152. High conductivity adhesive used: As general adhesive, for bonding semi-conductors to chassis heat sinks, fabricating heat sinks or thermal links, for permanent bonding of all materials with highly thermal conductive interface. Porous and nonporous surfaces. Excellent dielectric strength. Bond shear strength, 1" overlap psi, 30 immersion in water unaffected. Temp. range -70°F to +300°F.

Stock No.	Type	1-9	10-24	25-49	50-99

300 SERIES RADIAL RECTIFIER COOLERS

Radial fin coolers for rectifier or stud mounting transistor applications. Adaptable to stack arrangements. Uses standard teflon insulating washers. Accommodates press-fitted and stud-mounted rectifiers and transistors up to 1/16" hex case. Semiconductor mounting surface and one mounting foot unanodized.

Depend on NEWARK for the Latest Top-Quality Equipment. Complete On-the-Shelf-Stocks — Lowest Prices — Fast Service.

Wakefield Semiconductor Cooling Units

600 SERIES CIRCUIT BOARD COOLERS

Low profile, flat surface coolers ideal for printed circuit and externally mounted applications. Models 601 and 603 especially designed to accommodate the TO-8. Models 621, 623 and 641 accept all standard transistor case styles and case sizes up to 1 1/4". Shpg. wt., 16 oz.

SERIES 680 CIRCUIT BOARD COOLERS

Provides optimum natural convection cooling per unit volume occupied above the circuit board. Mounting in any position is possible since it permits free air flow in any direction. All have 1.81" sq. base with 1.50" bwtm. mtg. holes.

One Purchase Order—To One Source
for All Electronic Components.

PAMOTOR MINIATURE AXIAL FANS

Long life-20,000 + operational hours, Continuous Duty at 45°C without maintenance. Higher air delivery at greater static pressures. All metal construction. Shaded-Pole and Induction type motors. Impedance protected 50-60-400-cycle operation.

3 1/2", 4 1/2" & 5 1/2" models with air-delivery from 50 to 300 CFM. Universal 4 1/8" mounting on all 4 1/2" models. Conforms to applicable portions of Mil Specs and U/L standards. One year warranty against defects in workmanship and material.

3 1/2" INDUCTION TYPES (58-65 CFM) SPECIFICATIONS

BARBER-COLMAN

TUBE COOLING FAN

Model DYAB617-2. High speed motor and fan for cooling power tubes and boosting current ratings of vacuum capacitors. Shaded Pole motor is not radio-interfering. Size: 2 1/4" x 2 3/8" x 1 1/8". Shaft 1/8" dia. For 110v. 50-60 cycles AC. Wt. 1 lb.

IMC Magnetics Corp. Fans & Motors

THE "BOXER" — LOW-BUDGET, TOP QUALITY FAN

Aerodynamically designed impeller delivers 115 cfm free air from any operating position, 15% more than any other comparable fan! Only 4 1/16" square and 1 1/2" deep with rugged, all metal frame for greater heat dissipation and longer fan life. Has heavy-duty terminals, easily accessible, can be re-soldered as often as desired. Positive, shock and vibration proof mounting. Extra large diameter bearing lubricated for life. Reversible air-flow, just flip fan for change of direction. Two models for every application: Boxer Standard and Boxer Ball Bearing for longer life. Up to 5 years at +70°F for standard, and 25,000 hours at 175°F for ball bearing. Lightweight 1 lb., 8 oz. Shpg. wt. 2 lbs.

"BOXER" — AIR BEARING FANS

Air bearing fan offers unparalleled life and reliability! The rotor operates on a cushion of air so that there is no metal-to-metal contact. Since there are no oils or greases acting as lubricants, high and low temperatures have no effect upon the fan's performance. Gives long-life performance at all temperature levels between -60°F and 175°F. Though designed primarily for use in air, the Boxer-air bearing operates equally well in most gases over a wide range of pressures. Lo Speed model is also available for use where quiet operation is essential and extremely long life a must. Free air capacity is 115 cfm. Input is 115 vac. Operation is 50/60 cps, single phase, 0.2 amps current. Lo Speed has free air delivery of 66 cfm. Current at 60 cps. is 0.1 amp. 4 1/16" x 4 1/16" x 1 1/2". Shpg. wt. 2 lbs.

3 1/4" IMCool 300 THIN PROFILE TUBEXIAL FANS

Thin tub-axial fans for use where high cooling capacity, lightweight and space considerations are critical. For mounting airmovers on panels of enclosures with minimum projection into the working area. 3 1/4" Dia. with only 1 1/4" depth. Can be mounted in any position for continuous duty. Stainless steel shafts and die cast aluminum housing, weighs only 8 oz. Input 115 volts. Cap. required: 220 VAC. 400 cycles except #60 cycles *200 volts. Shpg. wt. 1 lb.

IMCair CENTRIFUGAL BLOWERS — Models B2 and B3

Designed for applications where low air flows are required at relatively high pressures. Compactly designed, metal housings will not distort under heat as do their plastic counterpart. Continuous duty operation, single phase shaded pole motor with bearing life of 10,000 hours at 125° F. Size: B2, 3 3/8" h. x 4 3/4" w. x 3 1/2" d. B3, 5 5/8" h. x 5 7/8" w. x 5" d. For operation from 115 volts, 50-60 cycles. Shpg. wt.: B2, 2 1/2 lbs.; B3, 3 1/2 lbs.

HI FI BOXER

Type WS 2107-9. Very low noise level for hi-fi equipment. Free air delivery 50 cfm; will exhaust avg. enclosure 10-30 times per minute. Metal housing resists breakage and acts as efficient heat sink, adding life to motor and bearing. Impeller aerodynamically efficient 5-blade design. 115 VAC, 1 phase, 60 cycles. Other specs. same as model above. Supplied with mounting kit, instructions for universal mounting system. Fits any cabinet.

Newark Can Supply All Industrial and Special Purpose Tubes Whether Listed above or not . . .

- Phone, Write, Wire for Prices on Items Not Listed
- Complete Stocks — Best Service
- One Purchase Order to One Source for Everything in Electronics
- Same Day Shipment from On-the-Shelf Stocks

Westinghouse Industrial Power Tubes

Industrial & Special Purpose Tubes

INDUSTRIAL RECEIVING-TYPE PREMIUM TUBES

PREMIUM TUBES. For critical industrial and other equipment requiring exceptional stability of tube characteristics, long tube life, and reliable performance. RCA Premium Tubes, superior to their corresponding commercial prototypes, are subjected to special test and controls on critical characteristics, environmental test (such as shock, fatigue, vibration, altitude) and also to special life test.

ORTHICONS

For Color Pickup at Black-and-White Studio Lighting Levels

Unmatched Picture Quality in Black and-White Pickup

RCA CAMERA TUBES

A broad choice of tube design features are available: field or non-field mesh design; glass, thin-film semiconductor, or special long-life targets; precision construction; anti-ghost image section design; microdamp construction; tube size; and matched sets for color pickup.

NEWARK Maintains Seven Giant Warehouses to Insure Faster Delivery From Stock.

National Electronics Special Purpose Tubes

READOUT TUBES

- Non-Fading
- Best Readability
- Longest Life

Cold cathode neon glow discharge tubes for in-line display of numbers, letters or symbols. Red-orange neon glow has best readability even under high ambient light. Simplicity, ruggedness and long life for effective display at low cost. No variation in colors or intensity, readout tubes are the only active display that will not fade with age. Manufactured under license from Burroughs Corp.

VIDICONS

Tube Type	Description	1-4
GL-7038	For film pickup applications . . . monochrome or color . . . a direct replacement for the 6198A	185.00
GL-7325	High sensitivity for live pickup . . . lower lag at low light . . . ideal for industrial use	185.00
GL-7735A	Highest sensitivity, lowest lag at low light levels . . . for studio or remote pickup	185.00
GL-7687	For cameras with automatic sensitivity control . . . similar to 7735A	185.00
GL-7226	Low heater power . . . for transistorized cameras . . . good live pickup	315.00
GL-8511	Also designed for transistorized cameras . . . high-sensitivity photoconductor	315.00
GL-7262A	Low heater rating of 0.6 watt . . . excellent sensitivity and low lag at low light	250.00
GL-7263A	Specially designed to withstand severe shock, vibration and high humidity	430.00
GL-8507	Extended resolution capability . . . higher amplitude response . . . similar to GL-7735A	250.00
GL-8541	For transistorized cameras . . . similar to GL-8507 except 0.6 watt rating . . . high sensitivity, low lag	310.00
GL-8572	Broadcast film pickup Sep. field mesh of 7038	250.00
GL-8604	Similar to 8572, except low heater power.	310.00
GL-8573	Live industrial—high sensitivity, short length, low heater power. Sep. field mesh.	310.00

AMGLO INDUSTRIAL FLASHTUBES

H-88-0

H-88 SERIES SIGNAL STROBOSCOPIC & PHOTOGRAPHIC FLASHTUBES

Flashtubes ideal for aircraft strobe beacons, photographic speedlight, etc. Operating volt: 450-900. Max. Input: 125 joules/flash. Max. Power: 10 watts. Output: 4500 Lumen sec at 125 joules; 10 joules—1 million lumens.

HD-2

HD SERIES REFLECTIVE BASE FLASHTUBES

Ultra high efficiency, increase in reflector working area. Neoprene mounting. Xenon filled pyrex tube with pyrex cover for up to 100,000 flashes.

Stk. No.	Type	Description	Max. Input	1-9	10-49
62F2200	H-88-0	Tube only	8.25	7.42	
62F2201	H-88-T	With Trigger Band	8.80	7.92	
62F2202	H-88-B4	With 4 Pin Plug In-Base	9.35	8.41	
62F2203	HD-1	U-shaped	50J/450V	10.45	9.40

Flashtube Engineering Manual. Design and theory of strobolight circuits. 62F2206. 1.00

U-35-B

U-35 SERIES STROBOSCOPIC TUBES

Use electrolytic or oil capacitors usually 1 to 2 MFD for high flashing rates and 2 to 4 MFD at rates to 30 per second. Volt: 300-600 VDC. Max. joules/Flash — 50 joules. Trigger coil ST-25. Min. self-ion. V: 1500.

Stk. No.	Type	Description	1-9	10-49
62F2207	U-35-O	Tube only	7.15	6.43
62F2208	U-35-T	With Trigger Band	7.70	6.93
62F2209	U-35-B	As above, mounted in 3 pin base (78S6 Socket)	8.25	7.42
62F2210	U-35-BS	Similar to U-35-B but with silver stripe to facilitate triggering	8.80	7.92

FLAT FIELD REFLECTORS

Special aluminum construction to maintain 86% reflective efficiency. 4-pin plug-in base (78S4 socket). T in part no. denotes ST-25 trigger coil in base. Uses H-88 tube. 350-600 VDC. 150 joules max. input.

FLAT FIELD REFLECTOR ASSEMBLIES

ARA400SD-H88-P4. Assemblies utilize new flat field Semi-diffused finish for photographic or industrial use. Reflector dia: 4-7/8" depth, 3-7/8". Voltage: 350-600 VDC. Tube used: H-88.

Power tetrodes, except: † power triodes, ‡ high vacuum rectifier, † beam pentodes. Beam pentodes feature patented Penta vane-type suppressor grid—used by leading manufacturers of commercial, military, and Amateur single-sideband equipment.

PL-177A is ruggedized; PL-8295A and PL-8432 are ceramic for increased reliability, decreased cooling requirements, ability to tolerate high temperatures, severe shock and vibration. Figures: A—8295A; B—6569; C—177A; D—175A.

Industrial & Special Purpose Tubes

AMPEREX (Continued)

1.5" Tubes

Type	Resp.	Description	NET
150AVP	S-11	Intended for optical spectrometry, flying spot scanners, etc.	74.00
150UVP	S-13	Ultra violet version of 150AVP	225.00
150CVP	S-1	Infra-red version of 150AVP	90.00
XP1010	S-11	Low noise 150AVP for X-ray spectrometry	97.00
XP1011	S-11	Ruggedized 150AVP	103.00

2.0" Tubes

Type	Resp.	Description	NET
XP1000	S-11	10 stage version of 53AVP	86.00
XP1002	S-20	Tri Alkylne version of 53AVP	275.00
XP1004	S-13	Ultra violet version of XP1000	350.00

2.0" Tubes (extremely fast rise time)

Type	Resp.	Description	NET
56AVP	S-11	14 stage fast PM for cherenkov counters, etc.	295.00
56CVP	S-1	Infra-red version of 56AVP	350.00
56UVP	S-13	Ultra violet version of 56AVP	550.00
XP1020	S-11	12 stage better transit time of 56AVP	585.00

3.0" Tubes

Type	Resp.	Description	NET
XP1030	S-11	Large surface tube for scintillation counting etc.	107.00
XP1031	S-11	9% resolution version of XP1030 for gamma spectrometry	147.00
XP1032	S-13	Ultra violet version of XP1030	980.00

5.0" Tubes

Type	Resp.	Description	NET
54AVP	S-11	Intended for large surface applications	160.00
54UVP	S-13	Ultra violet version of 54AVP	1050.00
58AVP	S-11	14 stage fast PM for large surface applications	535.00
XP1040	S-11	Integral flat window version of 58AVP	595.00

9.0" Tubes

Type	Resp.	Description	NET
57AVP	S-11	Fast, extremely large surface tube	645.00
60AVP	S-11	Extremely fast version of 57AVP	1395.00

SYLVANIA

GOLD BRAND TUBE TYPES

Features exceptional stability, maximum uniformity, extreme physical ruggedness, 10,000 hour design life. For critical commercial and industrial service. These qualities are designed and built in.

CATHODE RAY TUBES

Line width measured at the center face by the shrinking raster method at the current or brightness specified. Reference MIL-E-1, Par. 4.12.6.1. The brightness shown for 3" and 5" round tubes is for 2"x2"

raster size. Useful scan is limited on this axis to a value less than full screen dimension. All voltages are measured with respect to cathode.

Special Purpose Tubes Mullard

MASTER 10M SERIES TUBES

- 10,000 hours of effective performance.
- Tube-to-Tube Uniformity.

A selected series of individually, laboratory-tested tubes, ideal for today's technically advanced and exacting electronic equipment. Meets more stringent requirements. Gold protected pins, individual plastic foam cushion packaging for protection during handling and shipping. Each Master 10M tube guaranteed for 10,000 hours of effective performance within two years of date of purchase. Recommended for the full range of electronic equipment. Specify 10M after type no. when ordering.

SPECIAL PURPOSE TUBE

An extensive range of more than 700 dependable special purpose tubes for virtually every industrial application. Includes Cathode Ray Tubes, Image Converters, Photosensitive Devices, Counting and Indicating Tubes, Electrometer, Trigger and Voltage Reference Tubes, Thyrons, Power Triodes and Tetrodes, Microwave Tubes, etc. Each tube reflects traditional MULLARD quality construction and performance.

8020/100R	As 250R exc. 5V, 6.5A Fil. 40kV max. inv. v. 100MA avg. 1.5A peak pl. curr.	26.50
KY21A	Grid controlled mercury vapor-rect. 2.5V, 10A Fil. 750 MA avg. 3 peak pl. curr.	33.80
RX21A	Half-wave mercury vapor-rect. 2.5V, 10A Fil. 750 MA avg. 3A peak pl. curr.	32.80

TRIODES

2C39A	High mu, ceramic-metal plan. triode 100W pl. diss. 6.3V 1A Fil. 1000V max. pl.	20.75
2C39WA	Suited for use in grid-isolated VHF and UHF circuits.	29.00
3-400Z/8163	Small 0-bias pwr. triode providing 1kW pep as a low distortion class B linear.	34.00
3-1000Z/8164	Larger vers. of 3-400Z. 7.5V 21A Fil. No bias with plate v. below 3000V.	78.00
3CPN10A5/7815	High mu ceramic-metal planar triode for pulse serv. to 3 GC 6V 1A Fil.	30.75
3CX100A5/7289	Improved version of 2C39.	28.50
3CX2500A3	Ceramic Med.-mu pwr. triode, forced air cooled. 7500W output up to 110 Mc. with 4000 plate v. 7.5V 54A Fil. 2500W plate diss.	200.00
3CX300F1	Ceramic-metal replacement for discontinued glass metal type 3X3000A1	210.00
3CX300F1	Ceramic-metal replacement for discontinued glass metal type 3X3000F1	210.00
75TH	Med.-mu triode. 5V. 6.3A Fil. 3000V max. on plate 75W plate diss.	43.00
75TL	Low-mu version of 75TH.	43.00
100TH	High-mu pwr. triode. Full ratings to 40 Mc. 5V. 6.3A Fil. 100W plate diss.	26.00
100TL	Low-mu version of 100TH.	26.00
250TH	High-mu pwr. triode. Up to 1KW in class C with 39W drive. 5V 10.5A Fil. 250W plate diss.	45.00
3CX2500F3	Same as 3CX2500AC exc. flexible leads to simplify grid and fil. conn. Ceramic type.	45.00
250TL	Low-mu version of 250TH.	83.00
304TH	Med.-mu pwr. triode. Up to 1200W class C with 53W drive. No forced air below 40 Mc. 5 or 10V, 25 or 12.5A. Fil. 3000V max. on pl. 300W pl. diss.	83.00
304TL	Low-mu version of 304TH.	85.00
450TH	High-mu pwr. triode, up to 1800W class C with 46W drive, cooled by pl radiation and convection. Ratings to 40 Mc. 7.5V 12A Fil. 6000V max. on pl. 450W pl. diss.	85.00
450TL	Low-mu version of 450TH.	55.00
592/3-200A3	Med.-mu pwr. triode. Ratings to 150 Mc. Cooled by radiation and forced air. 10V 5A Fil. 3500V max. on plate 200W plate dissipation.	224.00
750TL	Med.-mu pwr. triode. 7.5V 23A Fil. 10kV max. on plate. 750W plate dissipation.	224.00
6C21	Pulse-modulator triode. Radiation and forced air cooled. 8.2V 18A Fils. 30kV max. pl. v. 15A max. pulse pl. curr., 300W pl. diss.	99.00
25T	Med.-mu triode. Full Ratings to 60 Mc. 6.3V 3A Fil. 2000 V max. pl. v. 25W plate diss.	37.00
35T	High-mu triode. Full Ratings to 100Mc. 5V 4A Fils. 2000 max. pl. v. 35W plate diss.	41.00
1000T	High-mu pwr. triode. 3000W class C with 60W drive. Forced air cooled. 7.5V 16.5A Fil.	169.00
5867A	Pwr. triode, 350 W PL Diss 5V. 15A. fil.	30.60
6696A	Hi Pwr. triode., 60 KW PL. Diss. 13V. 220A fil.	1105.00
6697A	Air cooled Ver. 6696A 35 KW PL. Diss.	1330.00
7211	Same mech. as 2C39 but 1/3 larger elect. 6.3V 1.3A Fil. 100W pl. diss.	88.50
7289/3CX100A5	Same as 3CX100A5.	26.50
7698	Same as 7211 except has no air cooler on anode.	88.50
7815/3CPN10A5	Same as 3CPN10A5.	30.75

TETRODES & PENTODES

4-65A/8165	Pwr. tetrode. Full Ratings to 150 Mc. 6V 3.8A Fil. 3kV max. on pl. 65W pl. diss.	27.00
4-125A/4021	Rad. beam pwr. tetrode. Ratings to 120 Mc. 375W class C with 2.5W drive. 5V 7A Fil. 3000V max. on pl. 125W plate dissipation.	36.00
4-250A-5D22	Compact pwr. tetrode. Forced air cooled. Full Ratings to 110 Mc. 1kW Class C with 2.5W drive. 5V 14.5A Fil. 4000V max. on pl. 250W pl. diss.	46.50
4-400A/8438	Compact pwr. tetrode. Forced air cooled. Full Ratings to 110 Mc. 1100W class C with 6 W drive. 5V 14.5A Fil. 4000 V max. on pl. 400 W pl. diss.	48.00
4-1000A/8166	Rad. beam pwr. titrode. Forced air cooled. Ratings to 110 Mc. 3400 W class C with 15W drive. 7.5V 21A Fil. 6000V max. on pl. 1000W pl. diss.	131.50
4CX250B/7203	Compact pwr. tetrode. Air cooled. 6V 3A Fil. 2000V max. on plate. 250W pl. diss.	35.60
4CX250K/8245	Compact pwr. Tetrode. Coaxial construc. for cavity oper. Forced air cooled. Ratings to 500 Mc. Useful to 1500 Mc. 6V 3A Fil. 2kV max. on pl. 250W pl. diss.	64.00
4CX250R/7580W	Rugged compact pwr. tetrode. Forced air cooled. Ratings to 500 Mc. 6V 3A Fil 2000V max. on plate. 250W plate dissipation.	44.50
4CX300A/8167	Pwr. tetrode. Air cooled. 6V 3A Fil. 2500V max. on pl., 300W pl. diss.	54.00
4CX350A/8321	Like 4CX250B but higher gain and power. Ratings to 500 Mc. Forced air cooled. 6V 3.6A Fil. 2000V max. on plate. 350W pl. diss.	48.50
4CX350F/8322	Same as 4CX350A/8321 except has 26.5V 800 MA Fil.	51.50
4CX1000A/8168	Pwr. tetrode. Forced air cooled. Excellent high gain and low distortion Ratings to 110 Mc. 6V 10A Fil. 3000V max. on plate. 1000W pl. diss.	181.00
4CX1000K/8352	Ident. to 4CX1000A, but gives better UHF performance to over 400 Mc.	193.00
4CX3000A/8169	Pwr. tetrode. Ratings to 150 Mc. 10V 48.5A Fil. 3KW pl. diss.	420.00
4CX5000A/8170	High pwr. tetrode. Forced air cooled. 16KW class C with 150W drive. Ratings to 110 Mc. 7.5V 78A Fil. 7500V max. on pl. 5000W pl. diss.	495.00
4CX10000D/8171	Electrically ident. to 4CX5000A/8170, but larger anode radiator to reduce cooling air requir. or permit up to 10KW pl. diss.	550.00
4E27A/5-125B	Pwr. pentode with neutralization requir. simplified or eliminated. Ratings to 75 Mc. 375W class C with 2W drive. 5V 7.5A Fil. 4kV max. on pl. 125W pl. diss.	45.00
4PR60B/8252	Pulse mod. tetrode. Replaces 715C and 5D21. Supersedes 4PR60A. 300KW pulse pwr. with less than 1KW drive. 26V 2A Fil. 20kV max. on pl. 60W pl. diss.	107.00
4PR65A/8167	Tetrode for pulse mod., amp., or osc. 6V 3.8A Fil. 15kV max. on pl. 65W cl. diss	43.00
4W20.000A/8173	High pwr. trans. tetrode, water cooled, ratings to 250 Mc. Coaxial term. 10V 25A Fil. 1400V 1.8A bombarder 8kV max. on pl. 20KW pl. diss.	2030.00
4X150A/7034	Compact pwr. tetrode. Air cooled. 6V 3A Fil. 2kV max. on pl. 250W cl. diss.	23.15
4X500A	Pwr. Tetrode for VHF. 500 W. PL. Diss. 5V. 14A. fil.	127.50
7203/4CX250B	Identical to 4CX250B/7203.	35.60

UHF-TV POWER AMPLIFIER KLYSTRON

4KM70LA	4 cavity, 12.5 KW output, for channels 14 to 36.	4725.00
4KM100LA	4 cavity, 25 KW output, for channels 14 to 36.	7650.00
4KM150LA	4 cavity, 50 KW output, for channels 14 to 36.	9345.00

Panel Meters *Simpson*

SIMPSON "WIDE-VUE" PANEL INSTRUMENTS

All have self-shielded type movement. DC Ammeters up to 50 amps are self-contained. All meters are accurate $\pm 2\%$ of FS. Model 1227 and model 1257 mount in 2.17" dia. hole. Models 1329, 1349, and 1359 mount in 2.75" dia. holes. Plastic Covers for maximum protection of meter face. Average shpg. wt. 1 lb.

Simpson Panel Meters

"WIDE VUE" PANEL INSTRUMENTS

TAUT-BAND "WIDE VUE" DC MICROAMMETERS

These panel meters have 25% fewer parts thus reducing chance of failure; built to conform to Simpson's rigid quality and performance standards. Performance tested for equivalent of 30 years of actual use without a single failure. Higher sensitivity with lower resistance; high accuracy with better repeatability.

Accuracy $\pm 2\%$. Spade pointer with case construction of molded black phenolic base with high temp. black plastic cover. Supplied with mounting and terminal hardware. Shipping weight: 6 oz. (1227 T), 8 oz. (1327 T), 10 oz. (1329 T).

SIMPSON 1 1/2" WIDE-VUE PANEL INSTRUMENTS

Simpson's popular Wide-Vue styling is now available in 1 1/2" size in DC, AC rectifier type, and as VU Models 1212 and 1214 have the Simpson self-shielded movement (calibrations not affected by stray magnetic fields). 1212 accurate to 2% of full scale, 1214 accurate to 3% of full scale at 25°C. Both models mount in 1.50" dia. holes. Size: 1.76"x1.76"x1.32". Scale length is 1.5" at 90°

Arc (38.1 mm). Standard calibration either magnetic or non-magnetic panel with lance type pointer. Base constructed of molded black phenolic plastic with high temperature cover. All models are supplied complete with the necessary mounting and terminal hardware. 8-32 studs are used for terminals. Average shipping weight, 3 1/2 oz.

EDGEWISE PANEL METERS

Core magnet meter movement. Self shielded. Needs 1/2 the panel area of usual 2 1/2" meter; yet comparable scale length (1 1/2"). Complete mtg. hardware. DC acc.: 2% of full scale. Standard scale—Black numbers on a white background. Dustproof, molded lucite case.

Accurate comparative readings by mounting meters side by side. Saves space—makes every square inch count. Quick, simple mounting. Meters are supplied complete with mounting hardware. Terminals: Solder (ammeters, stud). Shpg. wt., 12 ozs.

All DC meters have the Simpson self-shielded movement (Calibration not affected by stray magnetic fields or magnetic mounting.) †External Multipliers, Model 183, are furnished on 3 1/2" and 4 1/2" DC meters 1000 volts and higher. All others are self-contained. ‡DC ammeters are self-contained for ranges up to and including 50 amperes. Higher range DC ammeters (50MV) listed are calibrated for 5 ft. leads and require external shunts. Accuracy: $\pm 2\%$ of full scale; Scale Length: Model 25 & 27—2.5" (63.7mm), Model 29—3.9" (99.0mm). Average shpg. wt. 1 lb.

LABORATORY QUALITY AC INSTRUMENTS

Manufactured to high standards of accuracy to insure long life and excellent performance. All instruments listed below have moving iron vane type movements — no rectifiers are used. Reasonable accuracy with any waveform; with sinusoidal input the accuracy is guaranteed

to ± 3% of full scale. External resistors furnished with meters having a range of 500 volts or higher. All models mount in 2¼" holes. Other dimensions same as DC counterparts. Mounting template and hardware furnished with all meters. Average shipping weight, 1 lb.

Segmental Voltmeters make it possible to measure very small changes in input conditions. Significant portion of the overall voltage or frequency range is expanded to occupy full scale length. Thus, only that segment of the range that is important appears. AC Segmental Voltmeters are available in either average sensing or true

R.M.S. sensing units. When working with sine wave currents or when other measurements will be made with average sensing equipment averages sensing meters are preferred. When working with distorted wave-forms true R.M.S. sensing meter would probably be preferred. Average shpg. wt. 1 lb.

SQUARE RUGGED AND SEALED METERS

Metal cased panel instruments are ideal for use in field test equipment or wherever rigorous environmental conditions are encountered. They are completely sealed, commercially ruggedized, glass window, metal cased and shielded, not affected by steel panel mounting. The movement shielded by steel en-

closure will not be affected by magnetic panel materials or stray R.F. Accuracy: ±2% F.S. @ 25° and 60 cy. Sine Wave. For durability and long service life the meters are of metal construction Scale Length: Size 3 1/2" = 2.9" (74 mm); Size 4 1/2" = 3.9" (101 mm); Size 4"x6" = 4.7" (120 mm). Average shpg. wt. 1 lb.

SINGLE CONTROL CONTACTLESS METER RELAYS

Intended for those applications in which utmost reliability of operation on small differential or small power is desired. Set points are adjusted thru external, front adjusted gear drive. Set point is indicated by separate lance pointers. Sensing is accomplished thru an infinite life lamp and photoconductors. A solid state switching circuit and D.P.D.T. slave relay are provided (internally) for each control point. Slave relays will switch 10 amperes @ 115 volt; extremely adjustable over 95% of the scale arc. Control point indication is within 2% of actual switching. Control Point Differential: difference between "on" and "off" is within .5% of Full Scale. Power Requirements: 115 Volts A.C. 50-500 CPS. D.C. power required for sensing and switching is provided by the external power module furnished with the relay. Output:

D.P.D.T. relay contacts for each control point. Contacts rated @ 10 amperes, 115 A.C. resistive. Meter Indication: Continuous, unaffected by control point setting. Control Circuitry: Fail-safe. Both slave relays "open" in event of power failure. Average shpg wt., 1 lb.

SIMPSON PANEL METERS

WATTMETERS — DYNAMOMETER TYPE

Self contained, dynamometer-type. Measure DC and single-phase AC power to 250 cps. Normally calibrated for non-magnetic panels. Available in magnetic panel calibration. Frequency range of 25-125 cycles. Mount in 2 3/4" holes. Scale length, 2.3 inches. Accuracy 2% of full scale. Shpg. wt. 1 lb.

JBT FREQUENCY AND ELAPSED TIME METERS

resets automatically.

TIME METERS

Record elapsed or operating time of electronic equipment. Popular for xmitter tube life, etc. Registers in 1/10 hour steps to 9999.9 hours . . . then

55F691. Type 31-EX. 110-125V . . .	16.75
55F699. Type 31-EXW. 6 digits, 0-99, 999.9 hours, 60 cy. 110-125 volts. NET	16.95
55F692. Type 31-EX-200. 230v. NET	17.50
55F698. Model 31-ES. 110-125 volts, 60 cycles. As above except with square black molded case. 3"x3". NET	17.50

FREQUENCY METERS

Each vibrating reed responds to a different frequency. Input frequency is indicated by reed with greatest swing. All operate from 100-130v. with accuracy of ±.3% or better. All have 3 1/2" molded case with MIL-M-6B mounting. Shipping weight 12 oz. each. Type 31-FX. 5 reeds cover 58-62 cycles.

55F685. NET	23.65
Type 34-FX. 9 reeds cover 56-64 cycles. 55F686. NET	27.25
Type 33-FX. 9 reeds cover 380-420 cps. 55F687. NET	34.10

TIME-FREQUENCY

Type 31-FE. Uses a separate exciting coil for the reeds to achieve close control of reed amplitude and frequency. Ideal for use on motor generator set and on electrical equipment where maintenance routine calls for periodic servicing. Tenths shown in red, all others in white on black backgr'nd. 58-62 cps. Time meter reads 0-9999.9 hours. For 100-130v AC. Saves panel space on motor generator sets. 5 reeds indicate at 4.7v. 3 1/4" metal case. Shpg. wt., 12 oz.

55F688. NET	33.00
-----------------------	-------

3 1/2" ELAPSED TIME PANEL METERS

Widely used by research labs, manufacturing plants, broadcasting stations, etc., to keep life and performance records based on operating time. Meters use self-starting synchronous motors. They indicate up to 99999.9, then recycle and begin again at 00000.0. Model 55-3 1/2" round. Model 57-3 1/2" rectangular. Case depth for all models: 2 9/16".

Panel Meters

G SERIES PANEL INSTRUMENTS

Three sizes; 2½", 3½", and 4¼" models with black molded plastic cases and clear molded plastic fronts. An all new meter design that features flexibility and interchangeability, with optional mounting bezel for behind panel mounting. Self shielded, exact, reliable—DC instruments have the famous Triplet BAR-

RING movements—more torque, faster response, greater ruggedness. Provides a dominant scale with plenty of dial area for multiple scales. DC Scale lengths: 4¼ in., 4.035", 3½ in., 3.163", 2½ in., 2.536". AC Scale lengths: 4¼ in., 3.43", 3½ in., 2.688", 2½ in., 2.155".

G/P SERIES PORTABLE INSTRUMENT FOR SCHOOL OR LAB

• Diodes protect against instantaneous overloads on DC movements.

Now you can make all types of electrical measurements right in your own lab or shop set-up with these new economically priced portable instruments. ±2% accuracy on DC and AC Iron Vane Type. ±3% accuracy on AC Rectifier Type and Ohms.

• Bar-Ring construction in DC movements assures self-shielding.

Five-way binding posts. Knife-edge pointers. Rugged case and movement construction safeguards against rough handling. Overload protection of all models guards against electrical damage from misuse. Case dim. 4¼"x3½"x4¼".

Ideal for communications equipment and industry. All feature polished jewel bearings. DC meters are of the D'Arsonval type, with exclusive Bar-Ring self-shielded construction and one piece die-cast frame. AC instruments are of the moving van type, and have a light moving system. Long life under adverse conditions. Meters are accurate within $\pm 2\%$.

CONTROL DESCRIPTIONS

ON-OFF CONTROLS

Models 503-KH. (Single set point) and 503-KD (double set point). Compacts packaged complete with power supply, control circuitry and load relays coupled to an Optical Meter Relay. Screw type terminal connections are at rear of meter barrel (illustration). Control circuit is a reliable phase sensitive AC bridge, switching SCR on or off as the meter photocell changes resistance. The SCR "on" energizes the load relay coil. All circuit components wired failsafe below set point on KH and between set points on KD. Units easily converted from automatic on-off control to push button reset latching circuit. SPDT relay contacts—load rating: 5 A, resistive at 115 VAC. Dial arc: 4". *Taut Band movement.

‡ AC Load Compact. Meter range is 47 mV AC, matching secondary of current transformers (below). Dial reads 0-150% Load. Operates with any transformer listed. Use to monitor or control by measuring motor load. Be sure to order appropriate transformer for each unit.

ON-OFF TEMPERATURE CONTROL

Models 603-KH (single set point) and 603-KD (double set point). Same circuit description as 503-KH & KD with addition of electrical cold junction compensation, automatic thermocouple break protection & copper error correction. Medium resistance thermocouple actuated pyrometers. Taut Band. Damped against vibration. Dual Fahrenheit-Centigrade mirrored scales. Dial arc 5". Adjustable for thermocouples 0-10 ohms. For control or alarm applications.

TIME PROPORTIONING-TEMPERATURE CONTROL

Model 603-KTP. Compensation and Thermocouple break protection same as 603-KH & KD but control circuit provides proportional control from relay output. Ratio of relay, on time to "off" time proportional to deviation from set point "on" time 3%, adjustable to 6%. Time cycle settable to 5, 10, or 15 seconds. Capable of straight line control better than ±1 degree F. Taut Band, damped against vibration.

Panel Meters and Pyrometers **api**

SUPER CALIBRATED TAUT BAND PANEL METERS

This listing offers the largest available selection of Taut Band meters in three different calibration types: 1% Tracking, 0.5% Tracking and 1% Accuracy. Choice of 4 1/2 in. or 5 1/2 in. size. All have high sensitivity self shielding bar ring movements, Taut Band suspension. Frictionless design allows near perfect repeatability. Easily converted from front panel mount to Stylist mount with bezel kit.

TRACKING VS ACCURACY

Most electronic meter applications require better tracking (electrical linearity) instead of full scale accuracy. Tracking is a meters ability to proportionately divide a full scale indication. Example: a 100 μ A 1% tracking meter with a 100 division scale. Used in a VTVM, may require 102 μ A to indicate full scale. Exactly 1/2 that full scale indication (51 μ A should put the indicator at 50 divisions ± 1 and 25.5 μ A at 25 divisions ± 1 . Tracking is more important in any application where zero or full scale indication is set electrically; tachometers, PH meters, thermistor bridge temperature meters etc. Meters with good full scale accuracy are used for absolute measurements like Volts, Amps, thermocouple temperature readings etc.

502 and 602. 1% Tracking, 2% Accuracy (indicates 2% Tracking, 502-1 and 602-1. 1% accuracy. Have mirrored scales and knifed pointers.

502-II. 0.5% Tracking, 2% Accuracy. Mirrored scales & knifed ptrs.

METER DIMENSIONS

Model	Height	Width	Barrel		Model	Height	Width	Barrel	
			Dia.	Depth				Dia.	Depth
502	4.15"	4.60"	2.79"	1.85"	503	4.27"	4.71"	2.79"	1.86"

MODEL 503 PYROMETER 2% ACCURACY

Thermocouple pyrometers are medium resistance, have automatic bi-metal cold junction correction and copper error compensation. External resistor adjusts for varying thermocouple resistance up to 10 ohms. Mirror scale reading in Fahrenheit and Centigrade. 1/C is Iron Constantan; C/C—Copper Constantan; C/A—Chromel aluminum. Knife edge pointers. Dial arc is 4". Phenolic case. See table for dimensions. Shpg. wt.: 1 lb.

MODEL 603-1 PYROMETER 1% ACCURACY

Same as Model 503 but with a larger case, 1% accuracy.

MODEL D-1 PORTABLE PYROMETER

Pocket size thermocouple activated pyrometers designed for checking laboratory ovens, oil baths, appliances, refrigerators, air conditioners, solder pots, furnaces, etc. Allows quick, accurate measurements. Features Taut Band frictionless meter, highly resistant to shock, responds to smallest input. Dial calibrated in F° and C°. Has mirrored scale for accurate readings. Movements have bi-metal cold junction correction and copper error compensation. Tough vinyl covered case has aluminum trim for protection, push button latch. Rugged and compact (5 1/2 x 3 3/4"). Supplied complete with 3 foot Chromel-Constantan rust proof thermocouple. Shpg. wt.: 1 lb.

Weston Panel Meters

PIVOT-JEWEL PANEL INSTRUMENTS 1900 SERIES

The 1900 Series is an integrated line of a-c and d-c panel instruments, providing selected sizes, scales, and ranges. All instruments are provided with zero correctors. Clear plastic fronts. Specially treated Alnico 5 magnets provide long term reliability and stability. Spring back jewels with locking nuts for

fine adjustment. 3 1/2" size has scale length (100° arc) of 2.7". 4 1/2" size has scale length (100° arc) of 3.9". Lance pointers on all models except 1946, which has knife-edge pointer. 2% accuracy with plain scales and lance pointers or 1% accuracy with mirrored scales and knife-edge pointers.

PANEL METERS

Weston meters feature ±2% accuracy in series 301, 302 and 304 panel meters. Available in 3 1/2" round and 3 1/2" square types. Meters can be mounted on non-magnetic or magnetic panels affecting their readings. Bakelite Cases completely sealed against dust. Spring back jewels with locking nuts for fine adjustments. Superior response time with minimum power consumption. Scale length: 2 1/2". Terminal length 1 1/2". Shpg. wt. 1 lb.

Weston Meters & Accessories

● **NEW WESTON SERIES 1201 EDGEWISE PROJECTED MOVING POINTER PANEL METERS**
 A true flat scale edgewise instrument at a price comparable to mechanical pointer types. Since the pointer is projected on the same plane as the scale divisions, parallax errors are eliminated. All-glass optical system. Self-shielding CORMAG movement—these units can be mounted

side-by-side with no loss of accuracy, are unaffected by panel material, normal magnetic fields. With lamp (5V, 2.86A AC/DC req.); bulb life 10,000 hrs. Choice of horizontal or vertical mounting. All units white markings on black background, $\pm 1\%$ full-scale accuracy, except $\pm 2\%$. Scale length $4\frac{1}{2}$ " Wt. 1 lb.

WESTON SERIES 1209 PROJECTED MOVING SCALE PANEL METERS

- Large Scale in a Small Package
- Self-Shielded "Cormag" Movement
- 1% Accuracy
- Eliminates Parallax Errors
- Self-Illuminated

This moving-scale instrument provides an 8" meter scale in only $2\frac{1}{2}$ inches of panel width. Simple, foolproof optical system projects moving scale onto a coated window. Because the hairline is on the same plane as the scale image, these meters may be read at oblique angles without parallax errors associated with pointer-type meters. With standard #44 pilot lamp (requires 6-8 volts AC/DC, .25 amp). Lamps are easily replaced from front of panel. All units feature $\pm 1\%$ accuracy and employ Weston "Cormag" self-shielded movements. Scales have 100 divisions, choice of white markings on black background or black on white. Solder terminals. HxWxD: $3x2\frac{1}{2}x4\frac{1}{4}$ ".

NEWARK—Your One Dependable Source for Everything in Industrial Electronics

Weston Test Equipment

MODEL 80 SERIES MULTI-RANGE ANALYZERS

Model 81

Model 80-R

Model 80

The first multimeter design in years incorporating features wanted by the man on the bench. Extremely easy to read, these units offer maximum operating convenience, ruggedness, and unusually high accuracy (1% on most ranges). Portable types have panel and scale slanted at an ideal viewing angle. All types have 5 1/2" meters with a unique refractive anti-

MODEL 80-R RACK MOUNTING VOM

Non-custom made rack mounting 1% VOM. Ranges: DC volts, 5KV/1KV/250/100/50/25/10/2.5/1/.25 (at 20K ohms/volt); AC volts, 5KV/1KV/500/250/50/10/2.5 (at 5000 ohms/volt); DC current, 10/1 amps/100/10/1 ma/50 ua; ohms, 5 ranges from 2K to 20 meg-ohms; DB scale, -10 to +10 DB. 1% accuracy on ohms and DC scales; AC scales, 1.5%; 1 & 5KV scales, 2% DC and 2.5% AC.

62F1092. Type 80-9008002. NET 94.50

MODEL 80 VOM

Identical electrically to Model 80-R, but for portable or bench service.

62F1085. Type 80-9008001. NET 89.50

MODEL 81 DC VOLTMETER

Ranges: 1000/250/100/50/25/10/5/2.5/1/1/25 at 20,000 ohms/volt. Accuracy is ± 1% (except ± 2% on 1000 volt range).

82F1086. Type 81-9008102. NET 68.50

MODEL 81 DC MILLIAMMETER/AMMETER

Ranges: 10/3/1 amps/300/100/30/10 ma (10 ma range has 50 mv drop for use with external shunts). Accuracy is ± 1%.

62F1087. Type 81-9008101. NET 68.50

parallax face. With fuse and diode overload protection, polarity reversing switch. Model 80 types supplied with test leads. Model 81 and 82 types less leads, with 5-way binding post terminals spaced to accept standard double banana plugs. Model 80-R is for standard 19x5 1/4" rack mounting; portable models measure 8 1/4x6 5/8x7 3/8". Approx. wt., 3 lbs.

MODEL 81 DC MICROAMMETER/MILLIMETER

Ranges: 100/30/10/3/1/3/1 Ma. Accuracy is 1% on all ranges.

62F1088. Type 81-90081003. NET 68.50

MODEL 82 AC VOLTMETER

Ranges 1000/500/250/50/10/2.5 volts at 5000 ohms/volts. Overall accuracy is 1.5%; use of film resistors and selected germanium diodes results in temperature and frequency error less than 1% for a change of 10°C, and frequencies from 25-2000 cps. Ranges below 250V are usable to 15 kc.

62F1089. Type 82-9008201. NET 71.50

MODEL 82 AC MILLIAMMETER/AMMETER

Ranges: 5/2/1 amperes/500/200/100/50 ma. Transformer-rectifier circuit causes losses less than 1.5 va for 5 amp range at 60 cps. Accuracy: 2%, 60-400 cps; 1.5% from 25-100 cps; usable to 5 kc.

62F1090. Type 82-9008202. NET 71.50

MODEL 9959 CARRYING CASE

Leather carrying case with handle, for portable Models 80, 81 and 82.

Model 9959. Handsome leather carrying case for the above. Sturdy and practical.

62F1125. NET **3.25**

Model 9924. Multiplier disk (x10). Extends range to 10 times normal full scale value. Not usable with cosine corrected instruments.

62F1137. NET **2.20**

LIGHT METER

Model 614 Foot-Candle Meter.

A highly competent precision instrument that is recommended for commercial lighting surveys and any measurements requiring a wide range of light values. Any type of commercial lighting can be measured directly with this compact Foot-Candle Meter. Ranges are selected through the operation of a conveniently located range-changing switch. The photo-electric (Photronic) cell is mounted on a hinge, so that it will pick up measurements from a wall or ceiling without unnecessary moving of the meter. Three ranges: 0 to 100 foot-candles, 0 to 250 foot-candles, and 0 to 500 foot-candles; each with a separate scale. With Viscor and cosine correction filters. Entirely self-contained in a sturdy bakelite case, equipped with a hinged cover and leather carrying strap. Size: 7¼x3¾x2½". Shpg. wt., 2 lbs.

62F474. NET **164.00**

PORTABLE METERS

Model 901. Features a curved, shadow reducing, wide angle window that is non-breakable and specially treated against electrostatic effects. Self-shielded permanent magnet moving coil type. Accurate within 0.25 of 1%. Has 5½" hand calibrated mirror scale and knife edge pointer. Size: 7½x3¼x3¾". Wt. 5 lbs.

Simpson Test Equipment

255 MULTI-PURPOSE TESTER

- Diode protected taut-band movement
- Ideal for heating and utility services-men

Well suited to the needs of servicemen in many fields, such as gas appliances, electrical utilities, heating equipment. This tester includes the VOM functions of the popular model 260, as well as providing a temperature measurement range of +100 to +1050° F. Has low millivolt drop on the DC ranges; ideal for checking transistorized equipment. DC ranges: 0-50, 0-250 millivolts; 0-2.5, 0-10, 0-50, 0-250, 0-1000 volts; 0-50 microamperes (with both 50 and 250 mv drop); 0-1, 0-10, 0-100, 0-500 MA with 50 mv drop. AC ranges: voltage: 0-2.5, 0-10, 0-50, 0-250,

0-1000; amps: adapter available to read to 500 amps. Resistance ranges: 0-2K, 0-200K, 0-20 megohms. Complete with test leads, 5 ft. thermocouple lead and operator's manual. Size: 5 1/4 x 7 x 3 1/4"; wt. 3 1/2 lbs. **62F1693. NET 90.00**

250 LOW MILLIVOLT DROP VOM

- FITS 260 LINE ADAPTERS AND ACCESSORIES
- 20,000 OHMS PER VOLT DC

Perfect VOM for transistor circuitry. Model 250 contains all of the built-in features of Simpson's well-known model 260, and includes low millivolt drop on current ranges. Has provision for using the entire line of "add-a-tester" adapters, high voltage probes, and other 260 series accessories. Ranges: DC volts: 0-50, 0-2050 mv; 0-2.5, 10, 250, 500, 1000 volts at 20K-ohms/v.; AC volts 0-2.5, 10-50, 250, 500, 1000 volts at 5,000 ohms/v. DC microamperes: 0-50 (with both 50 and 250 mv drop); DC ma: 0-1, 10, 100, 500 (50 mv drop); DC amps: 0-10 (50 mv drop). AC volts: 0-2.5, 10, 50, 250,

500, 1000; DB (1 mw into 600 ohms ref. level): -20 to +10; -8 +50. Resistance: 0-2K, 200K, 20 meg-to +22; +6 to +36; +20 to ohms. Self-shielding, diode-protected, taut-band movement. Complete with test leads and operator's manual. Size: 5 1/4 x 7 x 3 1/4". Wt. 3 1/2 lbs. **62F1692. NET 60.00**

263 DUAL SENSITIVITY VOM

Dual sensitivity Volt-Ohm-Milliammeter with accuracies of $\pm 1\frac{1}{2}\%$ DC and $\pm 3\%$ AC F.S. Overlapping ranges offers greater accuracy expressed as a percentage of reading. Diode overload protection (Prevents movement burning out even on 200,000% overload). External battery replacement makes battery replacement easier. Uses 1 1/2 volt alkaline battery, insures greater stability on low ohms scale. Input protected with an internal 1 amp fuse. DC Volt Accuracy: 0-0.15 to 1500 $\pm 1\frac{1}{2}\%$; 0-3000 to 6000 $\pm 2\frac{1}{2}\%$. AC Volt Accuracy: 0-2.5 to 1500 $\pm 3\%$. Comes complete with test leads No. 0115 and operator's manual. Dimensions: 6" x 7 1/4" x 3". Shpg. wt., 4 lbs.

62F1193. NET 85.00

466 5" PORTABLE OSCILLOSCOPE

A small, handy scope designed to take on practically any radio-TV service job. Vertical amplifier: ± 1 db 15c to 100kc; 6 db down at 250 kc, usable to 1 mc. Maximum vertical deflec. sensitivity: 30 mv/inch. Sweep range: 15c to 80 kc. Maximum input voltage: 400 v. peak. Calibrating voltage (at 117.5 VAC source voltage) 1 v. peak-to-peak, $\pm 10\%$. Horizontal amplifier has flat response within ± 1 db, 15c to 20 kc; down 6 db at 100 kc. Maximum horizontal deflection sensitivity is 0.7 volt/inch. Sensitivity with Z-axis (intensity) modulation: 20 volts rms extinguishes beam. Input resistance (with attenuator set at x1) 0.1 megohm (with attenuator at x100) 0.5 megohm input capacitance, 40 mmf. Operates from 117 VAC 50/60 cycle, 50 watts. Supplied complete with input cable No. 0100 and operator's instruction manual. Unit weighs 19 lbs.; shpg. wt. 40 lbs. Size: 7 7/8 x 12" x 16 1/2"

62F347. NET 170.00

604 "MULTICOLOR" RECORDING MULTIMETER

Accurately measures and permanently records a wide range of voltage and current values. The ideal instrument for university and industrial research labs, and other situations where permanent records of varied measurements are needed. Inkless recording using fast sequential impressions on pressure-sensitive paper—no pen-and-ink maintenance problems. Three chart speeds: 1" / 3" / 12" per hr.; impressions made every 2 sec. High torque, shock-proof taut-band meter movement. Ranges: DC volts: 0-1, .5, 2.5, 10, 25, 100, 250, 500, at 20,000 ohms/v. AC volts: 0-10, 25, 100, 250, 500 at 5000 ohms/v. DC microamperes: 0-50, 250; DC ma: 0-1, 5, 25; DC

amps: 0-1, .25, 1.0. AC current: 0-2 ma. Chart drive: self-starting synchronous motor, operates from 115 VAC 60 cps. Chart paper width, 2.3". Unique marking system indicates range in use, avoids confusion. Accuracy of recording: $\pm 2.5\%$ F.S. AC response flat from 15-10,000 cps. Temp. deviation: 1% of reading per 10°C., max. Size: 9 1/4 x 4 3/4 x 4". Complete with No. 7500 test leads and two rolls of chart paper. Wt. 5 1/2 lbs. **62F1689. NET 200.00**

62F1691. NET 30.00

312 EXTRA HIGH IMPEDANCE WIDE SCALE VTVM

The input resistance of this instrument is 16 megohms, not 11 megs as in most other VT-VM's. 40% higher input impedance means 40% less circuit loading and correspondingly greater accuracy in readings. Extra-large, easy to read seven-inch scale eliminates squinting. Voltage ranges: DC 0-500 mv, 0-1.5, 5, 15, 50, 150, 500, 1500 volts at 16 megohms input resistance; AC RMS: 0-1.5, 5, 15, 50, 150, 500, 500, 1500 volts at 1 meg minimum input impedance; peak-to-peak: 0-4, 14, 40, 400, 1400, 4000 volts. Resistance ranges: R x 1, 10 ohms center scale.

Accuracies are $\pm 3\%$ of full-scale value on all voltage ranges, $\pm 3\%$ of arc on resistance. Frequency response is flat $\pm 3\%$ from 51 cps to 3 megacycles on AC voltage ranges through 150 volts with special RF probe, range can be extended to 250 mc. Operates from 105/125 VAC, 50/60 cycles. Modern smartly designed case measures 7 3/4 x 6 3/4 x 3 3/4". Comes complete with No. 0150 AC/ohms/DC probe and operator's manual. Wt. 4 3/4 lbs.

62F1688. NET 85.00

383A "CAPACOHMETER" CAPACITOR CHECKER

In-circuit capacitor leakage tester utilizes a pulse technique to detect many "marginal" capacitors. Measures the leakage resistance of defective paper, mica or ceramic capacitors; indicates directly the capacitance of good ones over a range of 10.0 mmf to 10.0 mf. All measurements are made under load conditions. Avoid tedious adjustment of bridge circuitry and balancing controls. Borderline capacitors which cause costly "callbacks" are detected immediately with the pulse test.

Operates from 105/125 VAC, 50-60 cycle. Comes complete with test leads. Shpg. wt. 12 lbs. **62F345. NET 99.95**

458 7" COLORSCOPE

Specially designed for color TV troubleshooting. Frequency response is flat within ± 1 db to 4.5 mc under wide-band operation; color burst frequencies are faithfully displayed with greater than 40 mv (rms)/inch vertical sensitivity. On narrow band operation, response is flat within \pm db. 10 to 300,000 cps; sensitivity greater than 15 mv/inch. Has horizontal sweep to 250 kc and 1-volt peak-to-peak calibrating voltage. With vernier and compensated

decimal step attenuator; provision is made for 2-axis modulation. 105/125 VAC, 50-60 cycle. Size: 11 x 16 1/2" x 14 1/2"; unit wt. 29 lbs., shpg. wt. 38 lbs. Complete with operator's manual. **62F339. NET 375.00**

260 VOM SERIES 5

- New Ruggedness From Spring Back Jewels • Greater Repeatability
- Increased Linearity and Stability • Higher Accuracy $\pm 2\%$ DC $\pm 3\%$ AC
- Input Protected With an Internal 1 Amp Fuse

Simpson 260. Volt-Ohm-Milliammeter. Handier, more sensitive, more accurate. Polarity Reversing Switch for faster, easier DC measurements. Full-Wave Bridge Rectifier System gives more accurate VAC measurements. Easy access to all components. Ranges—VDC (20,000 ohms-per-volt): 0-250 MV, 0-2.5 V, 0-10V, 0-50V, 0-250V, 0-1000V, 0-5000V. 260-5P GOOF-PROOF VOM SERIES

The World Famous 260, long the standard in the V.O.M. Field, now is available in a foolproof overload protected model. The 260-5P incorporates a unique S.C.R. circuit which senses overload conditions and trips a protective relay. The entire tester is protected — even when 110 volts is applied to the 1 milliamp or 50 milliamp range, no damage is caused. No chance of "fooling" this protection, either as with some other "burnout proof" V.O.M.'s. It can't be reset — even momentarily — until the overload has been removed. A "must" for labs, schools, shops or wherever mortality rate of V.O.M.'s is apt to be high. Complete with test leads and operator's manual. Size: 5 1/4"x7x3 1/8". Wt. 9 1/2 lbs.

NEW V-O-M DEMONSTRATOR

The "260" demonstrator reduces the amount of time needed to develop skill in using the Simpson "260" V-O-M. It makes everything easier to see and understand. The V-O-M teaching aid stands 34" high, and is big enough for students to read easily several yards away. The "ZERO ADJUST" is mechanically coupled to the pointer, and permits setting the pointer to any desired position on the scale. It is quicker and easier to test the individual reading skill of the entire class. There is no need for double checking each student. It is easy to build realism and proper operating techniques by setting the range and function selector knobs to conform with the problem under discussion. The "260" is lt. wt. and portable, dim. 34"x22"x2".

Simpson Test Equipment

NEW SIMPSON 160 VOM

SIMPSON 160. Compact version of World Famous 260. The Simpson 160 Volt-Ohm-Milliammeter is a rugged, accurate, compact operating instrument used for measuring electrical characteristics of circuit and circuit components. It indicates measurements for DC and AC voltages, direct currents, resistances and decibels. The Simpson 160 VOM features a small tester with a taut band suspension type movement with diode overload protection. The tester features one knob range selection, polarity reversing switch, banana type jacks and easily replaceable batteries. Most of the component parts are mounted on a printed

circuit board. This simplifies assembly, reduces maintenance and extends the useful life of the instrument. The Simpson 160 VOM is furnished with one pair of three foot test leads. DC Voltage (Sensitivity: 20,000 ohms per volt), AC Voltages (Sensitivity: 5000 ohms per volt), Accuracy: DC Voltage and Current $\pm 3\%$ of full scale, AC Voltage $\pm 4\%$ of full scale. Frequency Response: The 2.5 and 10 volt ranges are within ± 1 dB from 30 cps. to 1 megacycle, the 50 volt range to 150,000 cps. and the 250 volt range to 50,000 cps. Dimensions: $4\frac{1}{2} \times 3\frac{1}{2} \times 1\frac{3}{4}$ ". Shpg. wt., 12 oz. 62F1723. NET **47.95**

269-2 VOLT-OHM-MICROAMMETER

Improved 100,000 Ω/V incorporates self-shielded meter movements with spring backed jewels. Damage to meter pivots eliminated. Two new ranges, 400 V. AC and 800 V. DC. Ampere range coverage changed from 16 to 8, and Ohm Center Scale changed to 12 ohm. Accuracies: $\pm 2\%$ DC and $\pm 3\%$ AC of full scale. External battery compartment. With test leads No. 0115, operators manual, 4000V DC probe extension. Protected with internal 1.5

715 HIGH SENSITIVITY AC VTVM

Sensitivity: 10 millivolts full scale on lowest range. Input impedance: Minimum of one megohm at 1 KC. Frequency response: flat within one decibel between 10 cps and 400 KC. One percent tolerance precision resistors used throughout as internal multipliers. Meter scale provides DB markings on both the voltage range positions. AC rms volts 0-0.1, 0.03, 0.1, 0.3, 1.0, 3.0, 10, 30, 100

and 300. Decibels: total range, -52 to $+52$ DBM (at Zero DBM, reading is one millivolt across 600 ohms). Scale reads -12 DB to $+2$ DB. Accuracy on all ranges: $\pm 5\%$ of full scale. Unit requires 110-125 VAC, 50-60 cycles. $7\frac{1}{2}" \times 5\frac{1}{2}" \times 3"$ D. Gray hammertone finish. Complete with operator's manual, and shielded input cable. Shpg. Wt. 3 lbs. 62F1182. NET **70.00**

311 VACUUM TUBE VOLT-OHMMETER

Multirange all purpose VTVM cuts circuit loading effects to minimum. Accessors RF probe can handle AC voltage to 150 V RMS or 400 V peak-to-peak. High voltage breakdown exceeds 2000 volts. ACCURACY. VDC $\pm 3\%$ of full scale; VAC $\pm 5\%$ of full scale; DC Resistance $\pm 3\%$ of linear arc. RANGES: VDC and VAC 0-1.5, 5, 15, 50, 150, 500, 1500 volt. AF Voltage: 0-1.5, 5, 15, 50, 150, 500, 1500; RF Voltage (with probe): 0-1.5, 5, 15, 50, 150 (50 cps to 100 MC.) Peak-to-Peak voltage: 0-4, 14, 40, 140, 400

plete with No. 7594 AC/DC/Ohms probe, No. 0733 ground lead and operator's manual. Size: (HWD) $7\frac{1}{2} \times 5\frac{1}{2} \times 4\frac{1}{2}"$. Shpg. wt. 6 lbs. 62F375. NET **75.00**

303 AC-DC VACUUM TUBE VOLT-OHMMETER

High accuracy, features low current consumption and wide voltage and resistance ranges. Can be used as a DC voltmeter, an ohmmeter, an AC voltmeter, an AF voltmeter, an RF voltmeter (with RF probe) and an output meter. Has zero-center scale for FM discrimination alignment. Input resistances: DC, 10 meg-ohms (DC probe has 1-meg isolating resistor) AC and DC volts: 0-1.2-12-60-300-1200. Frequency response AF volts: 0-1.2-12-60, flat to 100 KC. Resistance, ohms: 0-1000-100,000 and 0 1 10-1000 meg ohms. Db: -20 to

$+63$ in 5 ranges. Large $4\frac{1}{2}"$ meter. Polarity reversing switch. Includes DC probe, No. 0067 and AC-Ohms probe. No. 0068, ground lead, No. 0069 and operator's manual. In bakelite case. Size, $7 \times 5\frac{1}{4} \times 3\frac{3}{8}"$. For operation from 105-125 volts, 60 cycles. Shpg. wt., $6\frac{1}{2}$ lbs. 62F304. NET **80.00**

303 RT ROLL TOP VOM

Same as above, but in safety roll top bakelite case. 62F327. NET **90.00**

- Small compact size
- Large easy-to-read scale
- Accuracy: $\pm 3\%$ DC scale $\pm 5\%$ AC scale

270-3 30-RANGE 20,000 OHMS/VOLT VOM

30-range multi-scale instrument. Includes all of the excellent features of the world-famous 260, plus a mirrored scale; knife-edge pointer; and printed circuit. It offers dependability and repeatability, ruggedness, and the higher accuracy necessary for many production and laboratory applications. The instrument has an easy-to-read 4½" meter at top of front panel. 3 operating controls and 8 circuit jacks are located directly below the meter. 7 DC voltage ranges (at 20,000 ohms per volt) are: 0-250 MV, 2.5V, 10V, 50V, 250V, 1000V, and 5000V. 6 AC ranges (at 5,000 ohms per volt) include: 0-2.5V, 0-10V, 0-50V; 0-250V, 0-1000V, and 0-5000V. 4 AF output voltages with 0.1μf internal series capacitor are 0-2.5V, 0-10V, 0-50V, 0-250V. Three resistance ranges: 0-2000 ohms center, 0-200,000 ohms (1200 ohms center), and 0-20 megohms (120,000 ohms center). 4 volume levels include —20 to +10 db., —8 to +22 db., +8 to +36 db., and +20 to +50 db. Variable resistance to ohmmeter circuit is used to compensate for aging of internal batteries. Heavy bakelite case is black with reinforced walls for maximum durability. Entire instrument slips in and out of case in one piece. Size: 5¼x7x3⅞". Shpg. wt., 4.2 lbs.

METER SAFE/GUARD

Model 12621. Fast, easy to install. Provides meter movement protection for series 1, 2, 3, or 4, 260 (or any other 20,000 ohm per volt VOM). Prevents electrical damage to the meter movement, regardless of the polarity, even with currents of as much as 200 milliamperes applied. Use with AC or DC. Has low leakage, sharp knee characteristics.

62F1698. NET 1.95

COLOR-BAR/DOT-CROSSHATCH GENERATOR

Model WR-64B. Produces time-tested color bar signals needed for adjusting a and troubleshooting color TV circuits as well as dot and crosshatch patterns for adjusting convergence in color receivers, and for adjusting linearity and overscan in both color and black and white receivers. Crystal-controlled RF Oscillator for stable picture carrier. Crystal-controlled synchronizing pulses. Crystal-controlled sound carrier for accurate adjustment of receiver fine tuning. Fixed number of dots and lines for ease in checking our scan. PATTERN control (Color-Bar/Dot/Crosshatch). CHROMA control to check receiver color sync-lock action. FUNCTION control with OFF—STANDBY—PATTERN—PATTERN + Sound positions. Convenient panel switches for shorting out the red, blue, or green guns of the color picture tube. Complete with RF output cable, cable-carrying bracket attachment, three leads for connection to red, blue, and green grid connections, and instruction booklet. Width 13½", height 10", depth 8", weight 13¼ lbs.

62F085. Model WR-64B. Factory wired and tested. NET **189.50**

CRYSTAL-CALIBRATED MARKER GENERATOR

Model WR-99A. Supplies a fundamental frequency RF carrier of crystal accuracy for use in aligning and trouble-shooting TV (color and black and white) and FM receivers and other electronic equipment operating in the range of 19 to 260 Mc in 8 bands on fundamental frequencies. Built-in crystal calibrator, heterodyne detector, amplifier and speaker provides calibrating beats at 1 Mc or 10 Mc intervals throughout entire tuning range which is covered by 8 bands. A built-in 4.5 Mc crystal provides necessary accuracy for alignment of intercarrier-if amplifier and discriminators. At least 0.1 volt output VFO ranges; 0.05 volt crystal frequencies, into a termination of 90 ohms. Provides signals for adjusting vertical or horizontal linearity. Precision matched impedance/resistance pad attenuator, 0-60 db in 5 db steps. Special modulation input available for re-transmission. Provision for use as Heterodyne Frequency Meter. Provides dual markers 4.5 Mc apart for bandwidth checks and RF alignment. Triple markers for sound-if alignment and bandwidth checks. Adjustable dial pointer for accurate registration with crystal-calibration check points. Wt. 21 lbs.

62F054. Model WR-99A. Factory wired and tested. NET **256.50**

TELEVISION/FM SWEEP GENERATOR

Model WR-69A. For visual alignment of both TV and FM receivers. Has preset switch positions for all VHF TV channels, the FM broadcast band, and TV video, chrominance, and IF frequencies. VHF output is on fundamental frequencies only; no beat notes of harmonics are used. Exceptionally good linearity is provided by a precision vibrator capacitor. Continuously adjustable sweep width and flat output make for accurate sweep response displays. Special sample-voltage terminal on panel permits use with marker-adder units in alignment. Dual-piston attenuator provides smooth even attenuation over 60 db range for TV and FM channels and 70 db range and video. IF/Video output frequency continuously tunable from 50 Kc to 50 Mc in 6 ranges. Sweep-frequency bandwidth continuously adjustable from 50 Kc to 20 Mc on IF/Video and FM; 12 Mc max. on TV channels. Return trace blanking. Two continuously adjustable bias voltages, 0 to -12 volts, available on front panel. Width 13½", height 10", depth 7", weight 16 lbs.

62F071. Model WR-69A. Factory wired and tested. NET **295.00**

RF/IF/MARKER ADDER

Model WR-70A. For RF, IF, and video sweep alignment of both color and black and white TV receivers. Provides sharp, easy-to-read markers for alignment. A choice of four different marker shapes is available, permitting use of marker type best suited to the response curve. Designed for use with conventional marker and sweep generators and the WR-59 and WR-69 series TV sweep generators. Marker signal is added to the sweep-response curve after the sweep signal is taken out of the receiver under test. Eliminates or reduces distortion of sweep curve by the marker. Permits trap alignment without marker 'suckout.' Hi-Q markers — high in amplitude, narrow in width. Power supply voltage stabilized for rock-steady trace display. Wt. 11 lbs.

62F072. Model WR-70A. Factory wired and tested. NET **87.00**

RF SIGNAL GENERATOR WITH SWEEP FEATURES

Model WR-50B. Designed for maintenance, troubleshooting and instructional purposes. Provides an accurate source of CW or amplitude-modulated signals from 85 Kc to 40 Mc. Suited for aligning and signal tracing AM, FM, Hi-Fi and Citizens' Band and amateur radio receivers. A 400-cycle output provides a practical means for checking a audio amplifier circuits. Built-in crystal calibrating oscillator circuit with front panel crystal socket. Permanently attached shielded RF output cable. Built-in DC blocking capacitors. Two-step RF attenuator switch plus a continuously variable attenuator control. Vernier tuning. Sweep output is provided at 455 Kc. and 10.7 Mc for sweep alignment both AM and FM IF circuits. A return-trace blanking circuit is included to provide a zero reference line. Width 5¾", height 7¾", depth 4¾", weight 5 lbs.

62F086. Model WR-50B. Factory wired and tested. NET **65.00**

62F089. Model WR-50B(K). As above KIT FORM. **45.00**

AUDIO SIGNAL GENERATOR SINE/SQUARE WAVE OUTPUT

Model WA-44C. For measurement of frequency response characteristics of audio amplifiers, and testing of loudspeakers and enclosures or finding impedance of LC combinations. Switch selection for sine-wave or squarewave output. Simple one-scale dial. Separate 60 cps line frequency output for intermodulation distortion measurements. Wide frequency range, 20 cps to 200,000 cps. Less than ½ of 1% distortion over the audio-frequency range. Operated from a 50/60 cycle, 105-125 volt source; covers in four bands a range from 20 cps to 200,000 cps. The circuit of the sine-wave function consists of a "Bridged-T" oscillator with a cathode follower output stage. The square-wave output is developed by using the sine-wave oscillator output to drive a clipping and shaping circuit. Produces a stable signal with an amplitude variation of not more than 1.5 db. Total harmonic distortion is limited to 0.25% over the range of 30 cps to 15 Kc. Width 10½", height 7", depth 6½", weight 10½ lbs.

62F013. Model WA-44C. NET **98.50**

COLOR PICTURE TUBE TESTER

Model WT-115A. Designed specifically for testing TV color picture tubes, tests each gun for emission quality inter-electrode leakage, and shorts. Readily portable large, 3-color, sensitive meter with two scales: Red/green 'quality' scale, with reference marks from 0 to 10, separate yellow scale to indicate interelectrode leakage. Sensitive meter and cut-off adjustment control for evaluating the true emission of each gun. Neon shorts indicator. AC line-voltage adjustment for accurate measurements. Test procedure includes 2-minute and 4-minute tests for determining warm-up performance of tube. Tests color picture tube in-set or out-of-set. Built-in cable and socket assembly. Wt. 8 lbs.

62F1780. Model WT-115A. NET **89.50**

STEREO FM SIGNAL SIMULATOR

Model WR-52A. Designed to generate signals required for service, alignment, and maintenance of mono and stereo FM receivers and multiplex adaptors. Provides the following signals. Composite stereo output for either right or left channel; FM stereo output for either channel (100 mc FM carrier is adjustable to permit selection of a quiet point in the FM band, RF deviation is adjustable 0-75 Kc); Monaural FM output (a switch is provided to disable the 19 Kc oscillator for low-distortion mono output); 100 mc sweep output to check receiver RF/IF alignment (sweep rate is 60 cps., sweep width is adjustable 0-750+ kc); Audio signals of 400 cps, 1 and 5 kc; Crystal-controlled 19 kc and 38 kc signals for multiplex circuit adjustments; 67 and 72 kc output signals for SCA trap circuit adjustments; special internal test signal to check phase adjustment of stereo signal. Direct unterminated cable is used with composite stereo and audio signal outputs, and a terminated cable for RF output to 75 or 300 ohm antenna input. Complete with connecting cables. Size 13½"x10x8"; shpg. wt., 21 lbs.

Test Equipment

SENIOR VOLTOHMYST
Model WV-98C. Provides direct reading of peak-to-peak voltages of complex waveforms found in video, sync, and deflection circuits. New mirrored scale provides more accurate readings. Measures complex waveforms directly from 0.2 to 4200 volts in 7 overlapping ranges. Measures RMS values of sine waves from 0.1 volt to 1500 volts. Measures from 0.01 volts to 1500 volts dc on two 3" to 1" ranges. Input resistance: 11 megohms. Measures resistance from 0.2 ohm to 1000 megohms on a single scale. Frequency response: 30 cps to 250 Mc with WG-301A Crystal Diode Accessory probe— ± 1 db 30 cps to Mc (1.5 and 5 VAC ranges). Electronic protection against burn-out. Size: 7"x6 $\frac{1}{2}$ "x3 $\frac{3}{4}$ ". Ship. wt. 6 lbs.

COLOR TEST JIG

Model 11A1015. A must for any serviceman now servicing or planning to service color TV receivers. The RCA Color Test Jig makes a one man service call out of costly two man cabinet pulling jobs. It eliminates the necessity of removing picture tube from cabinet and of reconverging tube when chassis is returned. Convergence control panel provides dynamic as well as static convergence. This versatile unit can be used with CTC-4, 5, 7, 9, 10, 11, 12 and 15 chassis. Supplied with factory installed safety glass and kine mask. Includes kit with all necessary components and instructions for installation of and RCA Tri-Color Kinescope. (Kine not included.) Finish matches that of your other RCA test instruments. Shipping wt. 93 lbs. (less tube).

VOLTOHMYST

Model WV-77E. Flat frequency response $\pm 5\%$ from 40 cps to 5 Mc on the 1.5, 5 and 15 volt RMS ranges and the 4, 14, and 40 volt peak-to-peak ranges. Measures DC from 0.02 volt to 1500 volts, RMS AC from 0.2 volt to 400 volts, and resistance from 0.2 ohm to 1000 megohms—all in seven overlapping ranges. Full-scale accuracy is $\pm 3\%$ on DC and $\pm 5\%$ on AC. Meter is electronically protected against burnout. Separate scales are provided for low AC measurements. Color coded scales for easier, faster readings. Fuse in ohms circuit prevents burnout. Ultra-slim probes and extra-flexible cables are included. Instruction sheet is provided.

5" OSCILLOSCOPE

- Flat response from 10 cps to 4.5 Mc
- Adjustable sweep oscillator has excellent linearity

Model WO-91B. The RCA WO-91B is a reliable, heavy duty, precision instrument especially suited for use in production and servicing both black and white and color TV receivers, monitors, broadcast equipment, TV distribution systems, hi-fi systems and communications equipment. A multi-scale graph screen makes peak to peak voltage measurements as easy as with a VTVM. Applications include waveforms analysis, square wave testing, and observation of circuit and vacuum tube characteristics. A 2-stage sync separator makes it easy to check TV horizontal and vertical sweep synchronization. Complete with WG-300B Direct/Low cap. probe and cable, ground cable, alligator clip, clip insulator, green-graph screen, instruction book. Size: 9x13 1/2 x 16 1/2". Ship. wt., 30 lbs.

269.00

ELECTRON-TUBE MICROMHOMETER

- Measures transconductance up to 100,000 micromhos in six ranges.
- Meter completely burnout proof.

Model WT-100A. A precision laboratory measuring instrument which tests tubes under typical operating conditions as specified in the tube manufacturers' technical manuals. It is particularly useful in production line testing, design and development work, pre-selecting for critical applications, quality control programs, and preventive maintenance. Measurements performed: AC heater current from 0.02 ampere to 10 amperes; DC filament current up to 250 ma. voltage drop across rectifier tubes and semiconductor diodes; transconductance from 10 micromhos to 100,000 micromhos. Within the range of its facilities it will test: vacuum tubes—diodes, triodes, tetrodes, pentodes, heptodes, hexodes, octodes, and multi unit types; gas tubes—thyratrons, voltage regulators, cold-cathode and hot cathode rectifiers; semi-conductor diodes—small dry-disc rectifiers, germanium and silicon diode types. Size: 23 1/2 x 8 x 18 1/2". Ship. wt. 50 lbs.

989.00

ULTRA-SENSITIVE DC MICROAMMETER

- Six direct-current ranges for measuring current from 0.002 to 1000 microamperes.
- Voltage drop for full scale deflection only 0.5 volts.

Model WV-84C. Application: a battery operated vacuum tube microammeter designed for measuring minute direct currents, for making current and voltage measurements in electrolysis and corrosion investigations, and for checking in light meters, ultra-violet and infrared detectors, and spectrophotometric devices. Self-contained batteries permit use almost anywhere. Low drain tubes extend battery life and protect the delicate meter against burnout due to accidental overloads. When used as a voltmeter, it is especially suited to measurements in circuits where loading is a critical factor. Size: 7 1/2 x 6 1/4 x 1 1/2". Ship. wt., 10 lbs.

AC CLAMP-ON AMMETER ADAPTER FOR 310 VOM

Checks all line loads instantly, accurately, safely—without breaking the circuit or interrupting work. Easy range switch. RANGES: 0-6-12-30-60-120-300. Clips around single wire to read AC amperes direct. Use dwith Adapter 101 to divide instantly two-conductor cords. A lever securely locks the Model 10 to Model 310 when used in combination. Model 10 can be left attached to Model 310 when the latter tester is used as an AC-DC VOM only. The only necessary change is to remove the lead plug from the Model 310 VOM jack and insert it in the jack provided in the Model 10 housing. Case is black molded plastic with engraved white markings. Ideal for checking wiring circuits, motor loads, appliance loads. Its use expanded with leads below.

Model 101

SENSITAK

Model 11, 12

Model 13

Model 14, 15

SENSITIVE SOLID-STATE METERING RELAYS

Combines silicon, solid-state amplifier and a reed contactor, epoxy encapsulated and temperature compensated. Operates from an 8 VAC $\pm 10\%$, 20 MA primary power source. Reed normally open and has 15 watt capacity, AC or DC. They may be solder mounted on printed circuit boards. Any number of relays may be used in series or parallel for high or low limit functions.

MODEL 11A OVER-VOLTAGE LATCHING RELAY

Contacts will close if signal exceeds 1V or 1MA. Contacts remain closed until the primary power is interrupted.

60F2820. NET. 14.65

MODEL 11B UNDER-VOLTAGE LATCHING RELAY

Contacts close when signal falls below 1V or 1MA. Closed until primary power interrupted.

60F2821. NET. 17.95

MODEL 12A OVER-VOLTAGE ON/OFF RELAY

Contacts close when signal exceeds 1V or 1MA. Open when signal drops below 1V or 1MA.

60F2822. NET. 14.65

MODEL 12B UNDER-VOLTAGE ON/OFF RELAY

Contacts close when signal drops below 1V or 1MA. Open when signal exceeds that.

60F2823. NET. 17.95

MODEL 13 POWER SUPPLY

Supplies 2 relays continuous duty .4 relays intermittent duty.

60F2824. NET. 5.50

MODEL 14 SERVO/DIFFERENTIAL RELAY

Can be operated as servo relay, differential relay, and phase detector. Solid state, AC operated. Epoxy-encapsulated, all silicon, incorporating 2 dry reed switches. Signal normally derived from four-arm bridge excited by a low voltage AC power source. When bridge is balanced reeds are open. When bridge is unbalanced, reed in direction of unbalance is closed. Requires primary power source and phase sensing signal derived from the same primary power source. Primary power requirements: 1 Watt, 120V $\pm 15\%$, 60 to 400 cps. Operating range: -40 to $+85^\circ\text{C}$. Unaffected by temperature and voltage variations. Response time 5 millisecond. size, $1\frac{1}{16} \times 1\frac{1}{32} \times 1\frac{1}{8}$ ".

60F2825. 14—Octal Plug. 21.75

60F2826. 14A—6" Wire Leads. 21.75

60F2827. 14B—Turret Lugs. 21.75

MODEL 15

Micro sensitive solid state servo/differential relay. Incorporates high gain Silicon Solid State Amplifier requiring a primary power source and a phase sensing signal source derived from the same primary power source. The relay output consists of dry reeds with 15W AC or DC switching capacity. Current amplification factor 10^8 . Primary power requirements: 1W, 120 V $\pm 15\%$, 60 to 500cps. Unaffected by a shock or temp. variation in range of -40 to $+85^\circ\text{C}$. Designed for use directly with low level transducers.

60F2828. NET. 31.95

NEW MODEL 16 SERIES RELAYS

Operate at ambient temperatures of -40 to $+85^\circ\text{C}$, have less than 1 millisecond response time, high input impedance, and high signal sensitivity. Reed switch has 15 watt or 250ma max. cap. up to 125 VAC or DC (resistive load). Electrically isolated from amplifier to 1,000 VAC. Capable of multi-million operations at rated load.

60F2829. EACH. 6.30

INDUSTRIAL MEASUREMENTS AND CONTROLS CORP.

SOLID STATE OSCILLOSCOPE

- Triggered sweep
- Extended frequency response

- Calibrated sweep times
- Calibrated vertical attenuator

Model S-3. Ideal for industrial maintenance departments, traveling servicemen and lab use. Input impedance: 1 megohm shunted by 20 uuf. Display tube, 3" flat face with external graticule. Vertical sensitivity, .05 V/div. linear over 8 divisions (2"); Attenuator freq. compensated—10 steps, .05V to 50V/div., 3% accuracy. Freq. response—DC to 6 mc. Rise time @ 2 div. amplitude .075 usec. @ 4 div. 0.1 usec. Horizontal: Sweep speeds—1 usec./div. to 500 milliseconds/div. in 18 steps. Accuracy capability better than $\pm 3\%$. 1 usec. to 50 MS/div. $\pm 10\%$. 100 to 500 MS/div.; Continuously variable uncalibrated sweep than $\pm 3\%$. 5X Multiplier increases max. sweep rate to 0.2 usec./div. Trigger Modes: Free run; Internal speeds; 5X Multiplier increases max. sweep rate to 0.2 usec./div. Trigger Modes: Free run; Internal \pm or $-$ slope; External \pm or $-$ slope, trigger level is adjustable; Automatic sweep stability—when in triggered mode trace is definitely triggered at the slope and level set; Trigger delay — delay between signal reaching the trigger level and start of sweep is approximately 0.75 usec. Power Supply: 15 watts @ 105-135 VAC line. Overall size, 14" x 6" x 8 3/4". Shipping weight, 20 lbs.

62F1070. NET. 450.00

MODEL 840 SIGNAL COMMANDER

A sensitive, battery-operated field strength meter for precise VHF and UHF measurements. Completely portable, all-transistor unit has two linear scales, 0-100 uv and 20-40 db reference to 1 mV. Switched attenuators extend range to 100,000 uv and 100 db. Plug-in tuning modules available covering VHF and UHF TV, and 50-900 mc. Accepts both 50- and 72-ohm unbalanced systems without adapters. Frequency measurements accurate to $\pm 5\%$; signal strength measurements accurate to ± 1.5 db. Operates on two 8.4 volt mercury batteries (not supplied). Size, $9\frac{1}{2} \times 5\frac{1}{4}$ ". Shpg. wt., 3 1/2 lbs. Less modules, and antenna.

MODEL 855 CRT COMMANDER

Tester and Rejuvenator. Fool-proof tests of color CRT's. Tests all CRT's, even new 110" 23 inch tubes. Measures emission relative to identical cutoff conditions. Tests for life expectancy, gas, leakage shorts and opens. Test is achieved by triode connecting the elements of the tube under test. Result is meter reading indicative of tube's contrast capabilities. Exclusive built-in voltmeter with D'Arsonval movement. Has two ranges: 0 to 1000 volts, 0 to 50K volts, 20,000 ohm/perm volt. Dynamic electron gun test: grid cut off as low as 1u Amp Gas test 1 megohm sensitivity. Improved rejuvenation method. Revitalizes cathode and enlarges grid aperture. Compact and lightweight. Size: 9"x12"x5 1/2". Shpg. wt., 7 1/2 lbs.

62F1060. NET. 89.95

MODEL 860 COLOR COMMANDER

Precision adjustment is available for critical horizontal and vertical linearity settings, fine tuning, static and dynamic convergence, and all color adjustments. Crystal controlled and silicon solid-state construction insures stable and reliable operation. Battery powered, consumes 1/2 watt, less than standard flashlight lamp. Patterns include single cross hatch for centering, single dot for static convergence, 20x15 cross hatch for fine tuning, dynamic convergence, linearity; 3-bar color pattern, full dot, single vertical bar, single horizontal bar, multi-horizontal bar, and multi-vertical bar patterns. Small and lightweight. Size: 5"x9"x4". Shpg. wt., 3 1/2 lbs. Less batteries. Uses 9 penlite cells.

B&K Test Equipment

TV ANALYST

Model 1076. Provides RF and IF test pattern signals to trouble shoot. Check resolution, bandwidth, shading and contrast capabilities with test pattern in flying spot scanner. 4.5 mc, 400 cycle FM modulated sound signal. Sync signal adjustable to ± 50 volts. Sweep pulses; yolk and transformer test; high voltage indicator. White dot, crosshatch and color bar patterns for color sets. Bias supply and AGC keying pulse. 17" x 10 $\frac{1}{4}$ " x 10". Shpg. wt., 36 lbs.

329.95

B & K CAPACITOR ANALYST

Model 801. Measures capacitance and leakage resistance in both in-circuit and out-of-circuit. Designed to operate on 105-125 volts 60 cycle AC, but will operate from 90 to 140VAC after a 2 min. warm-up. Can detect "shorts" in normal circuits where the capacitor tested is shunted by more than 25 ohms. Detects "Opens" in circuits where the capacitor tested is more than 25 pfd or shunting resistance is more than 50 ohms. Unique circuit determines how capacitor stores energy and returns it to the circuit. Spots marginal electrolytics that need replacement and predicts the life expectancy of electrolytic capacitor of 3 volts or more. Meter movement is protected against overloads. Easy to test low-voltage transistor circuit capacitors as well as those in vacuum-tube circuits. Electrolytic tests up to 2000 mfd, using a balanced bridge. One knob makes it easy to select the desired function and range. Simplified internal design, easily portable. Weight, 8 $\frac{3}{4}$ lbs.

109.95

NEW TRANSISTOR EQUIPMENT ANALYST

Model 870. For FM or AM, auto home and portable radios and transistorized TV and audio amplifiers. In-circuit transistor test permits quick determination of operation of any stage of amplification. Out-of-circuit transistor test reads Beta directly on meter scale and tests for leakage current. Built-in power supply with a 5 amp output and low ripple. Out-put voltage 1.5 to 15 volts in eight 1.5 v. steps plus 6.8 and 13.6 volts for auto radios. Fused input and output. Bias supply with variable 1.5 to 15 volts output. AM and FM generator outputs with vernier tuning: 250kc to 2000kc with AM modulation, 10mc to 11.4mc with AM or FM modulation 88mc to 108mc with FM modulation. DC volt-ohm-milliammeter with burn-out-proof meter movement. 400 CPS grade output or modulation. Modulation on AM not less than 30%. Deviation on FM not less than 70kc at maximum level setting. Separately adjustable audio modulation and RF output controls find incorrect bandpass in IF's and discriminator on FM. All solid state construction. Size: 15 $\frac{1}{2}$ x 8 $\frac{1}{2}$ x 9". Shpg. wt., 22 lbs.

199.95

NEW COLOR GENERATOR

Model 1245. For quick and easy checking and adjustment of: convergence, demodulator alignment, color sync, color fit, horizontal and vertical size, linearity and overscan. Small, lightweight solidstate. Dots only one raster line high and .25 sec. wide. Free of retrace lines. Station quality waveforms for absence protection and least convergence time through minimizing need for brightness, contrast and line readjustment. Precise waveforms permit accurately setting color killer control without a B&W telecast. Built-in gun killer works on any picture tube. Output is at RF with more than 50,000 μ V of signal on Channel 3, 4 or 5. This generator provides crystal-controlled keyed rainbow color bar display; dot, crosshatch, horizontal line and vertical line patterns. Size 27 $\frac{1}{2}$ " h x 8 $\frac{1}{2}$ " d x 8 $\frac{1}{2}$ " w. Shpg. wt., 3 lbs.

134.95

DYNAMIC MUTUAL CONDUCTANCE TUBE TESTER

- Multiple socket selection
- Simplified switch selection

Model 707. Provides multiple socket selection to quick check most TV and radio tubes. Simplified switch selection. Includes provisions for future new sockets. Tests all types of tubes. Automatic compensation for line voltage variation. 4 $\frac{1}{2}$ " meter with "Replace-Good" scale. Lists common tube types on socket panel. Complete reference chart in cover. 7, 9, and 10 pin straighteners on panel. Checks each section of multi-section tubes separately. Tests for all shorts, grid emission, leakage and gas. Grid emission test is adjustable, with sensitivity to over 100 megohms. Makes quick "life" test. Professional, dynamic mutual conductance tube tester that combines multiple-socket speed with high Gm accuracy—plus obsolescence protection. Size: 16 $\frac{1}{8}$ x 15 $\frac{1}{4}$ x 5 $\frac{7}{8}$ ". Shpg. wt., 15 $\frac{1}{2}$ lbs.

189.95

NEW DYNA-JET TUBE TESTER

Model 606. This multiple socket design has reduced the number of settings for testing each tube from 17 required in many other types of testers to only 4. You can test for all shorts, grid emissions, leakage and gas; and check cathode emission the accurate way—under simulated load conditions! With the really portable Model 606, you won't reject the good tubes, and you'll quickly find the bad ones, reducing call backs, selling more tubes, and increasing service profit. You'll find "tough dogs" and weak tubes with the exclusive adjustable grid emission test, which has the sensitivity of over 100 megohms. Molded tube sockets have phosphor bronze contacts for long, trouble-free life. Simplified heater voltage setting with power-on indicator. Each section of a multiple section tube is checked. Size 11" w x 8 $\frac{1}{2}$ " h x 4 $\frac{1}{2}$ " d. Operates from 105-125v., 50-60 cycles A.C. Shpg. wt., 8 lbs.

79.95

NEW CRT TESTER AND REJUVENATOR

Model 485. Tests and rejuvenates black & white and color TV picture tubes without removing tube from set. Provides correct filament voltage (0-13 v.) for all tubes. Tests and rejuvenates all hi G-2 and low G-2 tubes including those requiring a G-2 voltage as low as 25 volts. Tests new rectangular color tubes. Corrects each color gun separately. Uses DC on all tests. 4 $\frac{1}{2}$ " meter and neon bulb indicators for easy reading. Leatherette 10 $\frac{1}{2}$ " x 11 $\frac{1}{2}$ " x 4 $\frac{1}{2}$ " luggage type case. For 117 VAC, 50/60 cps. Shpg. wt., 10 lbs.

89.95

NEW VOLT OHM MILLIAMMETER

Model 120. The most comprehensive unit of its type ever offered in its price range. It features 61 ranges and functions specifically designed for use in industry, laboratories, maintenance shops and schools. 20,000 ohms per volt DC. 5000 ohms per volt AC. Rugged 50 microamp meter: $\pm 2\%$ accuracy. Extra-low resistance and voltage ranges. Wide frequency response AC and dB ranges. Mirrored scale, burn-out proof meter. Size: 7" x 5 $\frac{1}{2}$ " x 3 $\frac{1}{2}$ ". Shpg. wt., 4 lbs.

51.95

NEW B&K PORTABLE VTVM

Model 175. Built in battery eliminator. Single AC/OHMS/DC test probe with switch. Transit carry-meter is shunted to provide protection in transit. Pilot light. Accuracy: $\pm 5\%$ AC, $\pm 3\%$ DC full scale. Operates on: 117V, 50/60 CPS, AC. AC Voltmeter, 7 Ranges (RMS): 0-1.5-5-15-50-150-500-1500 volts full scale. DC Voltmeter, 0-1.5-5-15-50-500-1500 volts full scale. Input Resistance: 11 megohms (1 megohm in probe) Sensitivity: 7 $\frac{1}{4}$ megohms-per-volt on 1.5 volt range. Size: 7 $\frac{1}{4}$ " x 5 $\frac{3}{8}$ " x 4 $\frac{1}{4}$ ". Shpg. wt., 6 lbs.

Test Equipment

PRECISION APPARATUS TEST EQUIPMENT

NEW WIDE RANGE SINE AND SQUARE-WAVE GENERATOR

Model E-310. Used for amplifiers, PA, transmitter modulation response tests, input and output impedance measurements, ultrasonic voltage source, and loudspeaker resonance tests. All tubes preaged to assure long term stability of calibration. Logarithmic, etched dial scale with Vernier and Fast tune dials provides accurate resetability. Frequency Range: Sine and square waves from 5 Hz to 600 kHz in 5 decimal bands. Output Level: Sine Wave, 10 V. RMS into 600 ohms; Square Wave, 10 V. P-P, 4 position step attenuator and continuous amplitude control. Calibration Accuracy: $\pm 2\%$ or 1 Hz. Distortion: Less than 1% from 5 kHz to 600 kHz. Supply Voltage: 117 VAC 50/60 Hz standard; 220 V. AC 50-60 Hz. available. Heavy-gauge, steel case, blue-grey ripple and aluminum panel and tuning dial. $11\frac{1}{2} \times 9 \times 11\frac{1}{4}$ ". Ship. wt. 24 lbs.

199.95

63F065. NET

NEW MULTI-BAND SIGNAL MARKING GENERATOR

Model E-200C. Exceptionally stable and accurate, this general purpose RF signal generator serves in conjunction with PRECISION Sweep Signal Generators or other similar sweep signal generators. Frequency coverage: 88 kc to 440 mc (to 110 mc on fundamental). $6\frac{1}{2}$ " brushed aluminum dial: direct reading in 10 bands up to 440 mc -1% accuracy. 0-1000 point vernier scale: direct reading to 1 part in 1000 for hand-calibration & frequency spotting. Circuit: 6AU6 in stable ECO circuit; 6U8 sine-wave audio oscillator-modulator; 5Y3 full wave rectifier. 400-cycle sine wave audio oscillator. Dual-shielded RF attenuators. Four types of signals: Unmodulated RF; 400 cps; modulated RF; Externally modulated RF; 400 cps audio output. Built-in AVC-AGC bias substitution. 117V, 50/60 cycles, AC. $13 \times 11\frac{1}{2} \times 6\frac{5}{8}$ ". Weight: 16 lbs.

NEW VACUUM TUBE VOLTMETER

Model V75. For general use in schools, labs, production lines, radio-TV and appliance service shops. Polarity reversal switch for time saving diode leakage checks and other work in semiconductor circuitry. Transit switch position for meter movement protection. Built in battery eliminator. No ohmmeter battery required. Single high-impact Cycloc Dual Purpose Uni-Probes for withstanding rugged production service, and lab use. Inherent protection from its vacuum tube insures no harm from application of a wrong input voltage. DC Volts: $\pm 0-1.5$, 5, 15, 50, 500, 1500. AC V. (RMS) 0-1.5, 5, 15, 50, 150, 500, 1500. Resistance: Full Scale 1000; 10,000; 100,000, 1, 10, 100, 1,000 Megohm. Mid-scale 10, 100, 1000, 10,000, 100,000 ohm, 1 meg. 10 meg. Accuracy: $\pm 5\%$ full scale AC and $\pm 3\%$ full scale DC. Operates on 117 V. 50/60 Hz. Dimensions: $7\frac{1}{2} \times 5\frac{3}{8} \times 4\frac{1}{4}$ ". Weight: 6 lb.

NEW WIDE BAND OSCILLOSCOPE

Model ES-550B. For general purpose use for lab., schools, production line, and service shop; for color and b&w TV servicing. For multiplex alignment and solid state and vacuum tube equipment. Has 60mc. wide frequency response and 5" scope screen, 3-position vertical & horizontal step attenuator, freq. compensated: $\times 100$, $\times 10$, $\times 1$. response: 10 Hz. to 5 mHz. 3000-V. intensifier mode potential; amplified Auto-Sync Circuit. Four-way sync selection (internal neg., internal pos., external, and line) Direct-reading P-P voltage calibrator permits oscilloscope tube used as vacuum-tube voltmeter. Vertical pattern reversing switch, linear multi-vibrator sweep circuit 10 Hz to 100 kHz; automatically synchronized 30 Hz & 7875 Hz. sweep for TV sync-pulse analysis; amplified sweep retrace blanking. Built-in 60 Cps. phasing & blanking controls. Power Input: 117 VAC 60 Hz standard; High contrast filter-type illuminated graticule. Dimensions: $18\frac{1}{2} \times 14\frac{1}{2} \times 8\frac{1}{4}$ ". Shipping weight 47 lbs.

NEW VOLT-OHM-MILLIAMMETER

Model 120. For general use in schools, laboratories, production lines, and radio-TV and appliance service-shops. Has 61 ranges (+ & -) Extra-high 6000 V. range, Extra-low ohms, current and voltage range, Mirrored, No-Parallax scale standard without extra cost. Transit meter movement protection Polarity reversing switch. DC V. (20,000 ohms/V.) 0-0.3, 1.2, 3, 12, 60, 300, 600, 1200, 6000. AC V. (5,000 ohms/V.) 0-1.2, 3, 12, 60, 300, 600, 1200, 6000. AC Output Ranges: 0-1.2, 3, 12, 60, 300, 600 V. (Built-in 600 V. blocking capacitor) Response: ± 1 db from 15 Hz -100 kHz on low voltage ranges. DB Scales: 8 wide-frequency db ranges -20 to +77 db; Resistance Full-scale 200, 2000, 200,000 ohms. Dc Polarity reversing switch for ease of measurement and quick front-to-back diode check. Precision 1% Multipliers and shunts: extra wide-vision meter with polished mirrored scale. Model 120 VOM complete with batteries, test leads and technical manual which describes the device in detail. Dimensions: $7 \times 5\frac{5}{8} \times 3\frac{1}{8}$ ". Shipping Weight: 4 lbs.

JAMES ELECTRONICS, INC. COMMERCIAL CHOPPER

- 50 to 70 C.P.S.
- S.P.D.T.
- Long Life

Model C-1800. Commercial type chopper for modulating low level microvolt and millivolt signals. For use in DC amplifiers, recorders, experimental analog instrumentation and comparators. Non-resonant read assembly insures stable operation over environmental changes of temperature, vibration and shock experienced in test and control equipment. Chopper is designed to maintain operational specifications with considerable driving frequency variations. SPDT with 150 ± 15 degree closure. Drive is 6.3 volts RMS at 50-70 cps., octal base. Noise less than 8 mv. RMS into 1 megohm. Size $1\frac{1}{2}$ " dia. by $2\frac{1}{2}$ ".

SENCORE Test Equipment

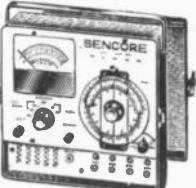

TC-136 TUBE TESTER
Ideal for the serviceman on call. Weighing ONLY 7 lbs. But, checks all tubes including Noyars. Nuvisors and Compactrons plus 10-pins. Functional cover serves as data manual. Simple set-up with only four controls. All steel construction with detachable hinge cover. Sensitivity of 100 megohms. Grid leakage read right off the meter. Wt. 9 lbs.
62F427. NET 74.50

CRT CHECKER AND REJUVENATOR
Model CR133. Recommended for color CRT's. Tests color guns individually; AC line voltage adjustment insures highest accuracy and safety; G2 voltage variable from 25-325 VDC to check all present and future tube models. Indicates shorts between any two elements. Two plug-in cables have all required sockets — no adaptors needed. Rugged steel case measures 10x9x3½". Wt., 10 lbs.
62F422. NET..... 89.95

TR-115 TRANSISTOR CHECKER
Test transistors for leaks, opens and shorts. Ratio check as well as Beta, good-bad. Equivalent check data for Japanese type and all American made transistors.
62F735. NET..... 24.95

FS-134 FIELD STRENGTH METER
Completely transistorized, battery powered portable. Frequency of 50-100Mc, 160-230Mc, 460Mc-900Mc. (channel 2-channel 83) Sensitivity Zero adjustment nullifies noise. Input 75 ohms (300 with matching Trans.) Indicated signal strength 0-5db. Band width 500Kc. 4" logarithmic scale calibrated in 60 db range, 2-2000 My range. Other controls include fine tuning, audio level, calibration. Indicates FM and AM signals. Size: 10x9x5". Shpg. wt., 9 lbs.
62F743. NET 199.50

NEW LO-BOY STANDARD COLOR BAR GENERATOR
Model CG10. Small, compact. Ten standard RCA type Color bar patterns; NTSC phased colors. Crosshatch, individual vertical and horizontal lines, and adjustable white dot patterns — no lines missing on crosshatch. Interlace control. Stops dot bounce that varies from set to set. All steel construction with a vinyl finish. Low in warm-up time. All solid state design with battery powered long life "C" cells provides all patterns instantly. With new Zenler diode, the 12 volt battery can "wear down" to almost 9 volts before the circuits are affected. All new patent pending counting circuits use new silicon transistors. No internal timer controls are used. Timer controls are brought out as simple operator's controls on the front panel. Weight: 7 lbs.
62F745. NET 89.95

Model RC121. Complete range of carbon resistors, capacitors, electrolytics and rectifiers for on-the-spot substitution. Contains: CARBON RESISTORS: 12 resistors 1 watt from 10 ohms to 5600 ohms. 12 resistors ½ watt from 10K to 5.6 megohms. POWER RESISTORS: 20 wire wound—20 watts from 2.5 to 15,000 ohms. CAPACITORS: 10 at 600 volts from 100 mmfd.

NEW TRANSISTORIZED COLOR GENERATOR AND ANALYZER
Model CG135. All solid state insures instant signals with no warm up time. Six jump out proof "Unijunction" counters guarantee solid patterns at all times below zero and up to 140°F. Produces all patterns needed for installing color TV, converging or trouble shooting. Connect to antenna terminals and tune receiver to channel 4. Can be returned to channel's 3 or 5. Unmodulated video (2V PP ±) for color circuit isolation and sync pulses. Color gun interruptors with switches on front panel are guaranteed not to load circuit. Wt. 8 lbs.
62F746. NET..... 149.50

NEW 5-INCH-WIDE BAND OSCILLOSCOPE
Model PS127. Vertical amplifier response flat within 1DB from 10 CPS to 4.5 MC and only 3DB down at 6.2 MC insures true waveform reproduction. Vertical amplifier sensitivity of .017 volts RMS for one-inch deflection on wide band (without band switching). High input impedance of 2.7 megohms shunted by 99 MMFD (or 27 megohms with 9 MMFD built-in low capacity probe) insures minimum circuit loading. For the first time waveforms viewed in the TV horizontal and vertical output circuits with built-in low capacity probe up to 5000 volts peak-to-peak. Vertical amplifier attenuator controls calibrated in peak-to-peak volts. Set waveform to one-inch in height and read directly. Horizontal amplifier sweep range from 5 to 500 KC in five overlapping steps and horizontal frequency response from 10 CPS to 1 MC within 3 DB guarantee linear sweep and positive synchronization. External inputs for horizontal sweep and synchronization on front panel. Provisions for intensity modulation, and direct connection to deflection plates on read. Tops in performance, operational simplicity, and appearance. Comparable to much higher costing oscilloscopes. 12"x9"x15½". Weight 25 lbs.
62F747. NET 189.50

NEW IN-CIRCUIT TRANSISTOR TESTER
Model TR-139. Checks Transistors or diodes in-circuit without disconnecting a single lead. The same procedure is used for in-circuit and out of circuit testing. Transistors can be matched, sorted, and selected for specific required values of beta and ICBO. True AC beta reading on a large 6-inch meter. Measures the ratio of AC signal on the base of the transistor to that obtained on the collector. Beta reading slightly more accurate when checked out of the circuit. Gives leakage current (ICBO) of any transistor directly on the meter. Checks both rectifiers and diodes either in or out of the circuit. In-circuit test gives a "go or no go" indication. Out of circuit testing measures the actual front to back conduction in microamps. A special circuit protects even the most delicate transistors and diodes, even if the leads are accidentally hooked up to the wrong terminals in the transistor. Clip type test leads included. Plug in jacks on front panel for adaptation to other applications. Large 6" face sensitive 200 microamps. Zener diode regulated power supply. All steel case, leatherette covered. 9"x7½"x6". Weight 8 lbs.
62F748. NET..... 89.50

SUBSTITUTION UNIT
to 0.5 mfd. RECTIFIERS: Universal Selenium—0.5 amps—800 PIV and Universal Silicon 0.5 amps—800 PIV. ELECTROLYTICS: 10 dual electrolytics 2-450 VDC. Each section can be used independently. 4 test leads. Wrinkle black steel cabinet, 6x10x3½". Wt., 6 lbs.
62F732. NET..... 39.95

Amprobe Test Equipment

AMPROBE SNAP-AROUND VOLT-AMP-OHMMETERS

The most popular and asked for tools of their type. Only one volt or amp range is revealed in its unbreakable plastic window at any one time. Rotary scale eliminates guesswork and reading errors. Currents may be measured instantly and accurately. Pointer-lock freezes needle at the reading with the flick of a switch. Allows you to take readings in darkness or hard to see areas and then read away from the conductor. A valuable tool in balancing circuits, tracing faults and grounds, and diagnosing operating troubles without shutting down equipment. Built-in 25 ohm mid scale ohmmeter on RS-3 and RS-1000. Accuracy within $\pm 3\%$ FS. One hand operation. With case and leads.

AMPROBE RECORDERS

Rugged, compact instruments in their own genuine leather case. Especially designed for high accuracy, dependability, and ease of operation. Small size and easy loading plus a unique design feature permits them to be used either as monitoring/recording devices or as indicating instruments making these recorders extremely versatile. Can be used as round the clock trouble shooters without the need for an operator to be present. Power requirements: 115VAC, 60 cycles, 2.5 watts. Accuracy: AC amps and volts $\pm 3\%$ FS; AC expanded scale volts $\pm 1.25\%$ FS; Temperature $\pm 3^\circ\text{F}$ on $+20^\circ\text{F}$ $\pm 4^\circ\text{F}$ on -50°F to $+100^\circ\text{F}$; $\pm 5^\circ\text{F}$ on $+50^\circ\text{F}$ to 250°F . Chart Speed is 12"/hr. Supplied with 1 roll each of the necessary strip charts. Other chart speed available. Weight 20 oz. *With resistance bulb thermometer (FL-RBT-1)

MINIATURE FOUR CHANNEL EVENT RECORDER

• Easy to Install

Model 92. Designed to monitor from one to four ON-OFF operations. Recording is a clear, black line indicating the number, duration, relation, and chronological time of these operations. Portable or rack mounted. RETMA standard panels are available for mounting. Drive motor operates on 120 Volts, 60 cycles. Pen actuators operate on 24 VDC. Supplied with 1 in/hr. gear train. Additional gear trains available (See listings on this page.) Less Power supply for Pen Actuators. Shpg. wt., 5½ lbs.

62F1223. NET

• Easy to Operate

92.00

POWER SUPPLY FOR PEN ACTUATORS

Model 921. Power supply operates from 120 volt 50/60 cycle to supply 24 VDC which will operate all four channels.

BASIC OSCILLOSCOPE UNITS

Millen's complete self-contained portable oscilloscopes are basic components for permanent incorporation into more specialized equipment. As transmitter modulation monitors, no additional equipment or accessories are required. The well known trapezoidal monitoring patterns are secured by feeding modulated carrier voltage from a pickup loop directly to the vertical plates of the cathode ray tube and audio modulating voltage to the horizontal plates. By the addition of such units as sweeps, pulse generators, amplifiers, servo sweeps, etc., all of which can be conveniently and neatly constructed on companion rack panels, the original basic scope unit can be expanded to serve any conceivable application. Sensitivity: vertical 100 volts P to P; horizontal, 120 volts P to P. Controls: intensity, Focus, Horizontal Centering, Vertical Centering, Power and Horizontal Input Selector. For 105-125 volts, 60 cycles AC. Less CR tube. Shpg. wt., 13 lbs.

MILLEN MODULATION MONITOR OSCILLOSCOPE

Model No. 90932. Amateur Band Monitor Oscilloscope is a complete oscilloscope for monitoring the modulated r-f output of a transmitter. Built-in link-coupled tuned circuits cover all amateur bands 3.5 to 54 mc. All circuits and accessories are built in. The monitor will display the r-f envelope and/or the trapezoidal monitoring pattern of single side band transmitters or amplitude modulated transmitters. The cathode ray beam responds instantly and provides information not available in moving coil meters. Provides a continuous complete picture of the overall performance of the transmitter. For trapezoidal display, the horizontal display is taken from the modulator output. The overall power supply voltage is 1040 VDC which is high enough to provide a very sharply focused trace with good intensity. The beam is blanked during standby by the operation of a 6.3 volt relay. High voltage rectifier consists of two selenium stacks which eliminate the need of a rectifier tube and its attendant heat. Uses 2BP1 CR tube. **87.00**

Hickok Test Equipment

INDUSTRIAL AND COMMUNICATIONS TUBE TESTER

Model 752A. Portable mutual conductance tube tester providing fast and accurate evaluation of an electron tube. Tests VR tubes for firing point, regulating voltage, and current range. Takes 4, 5, 6, 7, 9, and 10-pin miniature, 7-pin in-line and 8-pin round subminiature (corn, Compactron, Novar 5 and 7-pin Nuvisor tubes. Gm ranges: 0-1500; 3000; 6000; 15,000; 30,000 micromhos. Inter-element leakage indicated on meter, sensitivity 10 megohms.

Test voltages: Filament, 0-117 VAC in 19 steps; signal, 0.25, 0.5, 1.25, 2.5 VAC; plate, 75 and 150 VDC; screen 56 and 130 VDC; Grid bias variable 0 to -40 VDC; extra negative supply, -40 VDC; diode test, 20 V RMS; OZA test; 287 V RMS. Cathode activity/line test. Dual section tubes tested without setup change. Self-bias test jacks on panel. Bias and line fusing. Illuminated meter and roll chart. Roll chart lists over 1600 types. Size: 16 $\frac{3}{4}$ "x18 $\frac{1}{2}$ "x7 $\frac{1}{2}$ " D. Shpg. wt., 27 lbs. 62F198. NET **365.00**

INDUSTRIAL AND LABORATORY TUBE TESTER

Model 500. Has features found in Hickok's Cardmatic testers. Complete range of test settings. Gm measurements under duplication of operating conditions. Tube sockets: 4, 5, 6, 7 pin, octal, loctal 7, 9, 10 pin miniature, 7 & 8 pin subminiature, compactron, novar and 5, 7 pin nuvisor. Four μ mo ranges to 60,000 μ mhos. Gas test circuit, sensitive to .05 μ amps. Leakage meter. Push button test of dual section tubes. Safety switches

prevent damage. 19x15 $\frac{1}{2}$ "x7". For operation from 105-125v., 60 cycles. Shpg. wt. 35 lbs. 62F1755. NET **585.00**

PORTABLE LAB TUBE TESTER

Model 539C. Industrial and laboratory portable Gm tube tester. Tube sockets: 4, 5, 6, 7-pin, octal, loctal, 7, 9, and 10-pin miniature, 7-pin in-line and 8-pin miniature. Compactron, Novar, 5 and 7-pin Nuvisor. Socket covers provided for 7 and 9-pin and octal. Gm ranges: 60,000; 30,000; 15,000; 6000; 3000; 600 micromhos. Rectifier diode and VR ranges. Inter-element leakage indicated on meter or neon lamp, sensitivity: 50 megohms. Test voltages: filament, 0-117 VC in 20 steps; signal, .025, 0.5, 1, 2.5 RMS; plate, 66 and 150 VDC; screen, 56 and 130 VDC; fixed bias variable 0 to -40 VDC. Self bias terminals on panel. Roll chart has data for latest industrial and entertainment tubes. Three 1% accuracy Hickok meters: Gm, VR voltage and leakage; line voltage; twin range bias meter. Size: 15 $\frac{1}{4}$ "x18 $\frac{1}{4}$ "x7 $\frac{1}{4}$ " D. For 105/125 VAC, 50/400 cps, 40 watts. Shpg. wt., 35 lbs.

62F133. NET **525.00**

HIGH SPEED GM TUBE AND TRANSISTOR TESTER

Model 6000A. Tests all the new tubes including Compactrons, Novars, Nuvisors, and 10-pin headers. A high speed, extremely accurate tester. Instant line adjust and automatic short indication. Covers 3,000 to 15,000 μ mhos in 3 ranges. Shows gas evaluation. Able to determine the reserve capacity of tubes which could cause trouble in the future. A filament continuity button to check for open filaments. Filament voltage from 0.6 to 117 volts in 19 steps. Complete with removable socket plate that accommodates practically all tubes in use today. (7-pin, octal, loctal, 7- and 9-pin noval, Novar, Compactron, Nuvisors, 10-pin "headers.") Red leatherette portable case size: 16 $\frac{3}{4}$ "x11 $\frac{1}{4}$ "x7 $\frac{1}{2}$ ". Panel gold anodized. For 105-125 VAC, 60 cycles, 40 watts. Shpg. wt.: 21 lbs. 62F171. NET **239.50**

HICKOK ADAPTER

Model CA-4. Adapter for testing compactrons, 10-pin "headers," 9-pin novars and Nuvisors. For use with all current Hickok manual tube testers. Wt., 6 lbs. 62F101. NET **59.50**

MULTI-SOCKET TUBE TESTER

Model 799. "Mustang" model with mutual conductance tests in a unique solid-state design. Tube sockets: 7, 9, 10-pin Sylvaria, Novar, Octal; 5, 7-pin Nuvisor; and new 10-pin decal. Two continuously variable Gm ranges: 1000 to 5000, and 5000 to 20,000 μ mhos. 105-125 volts., 30 watts. Transistorized sensing circuit provides 50 megohm leakage tests and u α gas tests. Gas tests spot tube faults, and multisocket design eliminates complex, time-consuming switching. Color-coded "permutator" switch triples effective socket coverage.

Removable panel accommodates sub-chassis for future tube additions, through direct access to switching circuits. Size: 15 $\frac{1}{2}$ "x18 $\frac{1}{2}$ "x6 $\frac{1}{2}$ " H. Shipping weight, 21 lbs. 62F1759. Model 799. NET **199.95**

TUBE-TRANSISTOR TESTER

Model 800A. Checks leakage between tube elements up to 10 megohms. Includes transistor and diode check. Filament continuity test is provided to greatly speed the testing of series-string tubes. Push button reverses meter for testing special tubes such as the 117N types. Tube sockets for 4, 5, 6, 7-pin, octal, loctal, noval and 7-pin miniature noval 5 and 7-pin nuvisors, novars, compactrons, and 10-pin types. Circuits

test tubes under simulated operation conditions. 0-3,000, 6,000, 15,000, micromhos are directly indicated on the meter dial. Calibrated Gm circuit provides increased accuracy in testing of latest tubes. Selector control on panel permits a reserve capacity test to evaluate the reserve strength of a tube under test. Time saving tube reference chart contains test data for all popular tubes. Power supply 105-120 volts AC, 50-70 cycles, 40 watts. Portable case covered red leatherette with brass colored hardware, panel is gold anodized aluminum with red and black lettering. Size: 16 $\frac{3}{4}$ "x11 $\frac{3}{4}$ "x7 $\frac{1}{4}$ ". Shpg. wt., 21 lbs. 62F182. NET **219.95**

DYNAMIC BETA IN-CIRCUIT TRANSISTOR TESTER

Model 890. Unique circuit measures AC Beta with equal accuracy in or out of circuit. Measures parameters: AC Beta; Rin (transistor input resistance); Z Ohms (base-emitter circuit impedance); Ic. Measures AC Beta, Ic and lcb α out-of-circuit. In-circuit AC Beta measurement accuracy \pm 5% (150 ohms minimum circuit impedance). Portable and completely self-contained. Utilizes an AC bridge principle. Useful for incoming inspection of transistorized products and sub-assemblies. Beta Ranges: 0-50, 0-100, 0-200. Furnished complete with test cable. AC Test Signal: Variable 1000 cps sine wave-Calibration setting at 5 μ a, 100 mv. protected against overload. Portable carrying, 6 $\frac{1}{2}$ "H, 9"D, 10 $\frac{3}{4}$ "W. Shpg. Wt., 8 lbs. 62F102. NET **155.00**

PORTABLE TRANSISTOR TESTER

Model 870. Features two units in one. Measures large signal DC Beta on power transistors as well as small signal AC Beta on low and medium power transistors. Has variable collector voltage. Collector test current is variable up to 2 amps, permitting Beta measurements on power transistors rated at 5 amps or more. Provides low voltage, high current tests which makes it excellent for switching transistors. Controls provide maximum set-up flexibility combined with speed-engineered layout for volume testing of transistors. Includes roll chart giving test data for over 2000 transistors. Large easy to read panel meter. Tech. Spec: Beta ranges 0-100 & 0-300, extendable to 600. Beta test collector voltage variable from 0.5 volts. Accuracy within 5% for both AC & DC Beta. Requirements—115 volts AC, 40 watts. Size: 7 $\frac{7}{8}$ "x11 $\frac{3}{4}$ "x14 $\frac{1}{2}$ ". Shpg. wt., 22 lbs. 62F149. NET **355.00**

SOLID STATE DIGITAL DISPLAY MULTIMETER SYSTEM

- Three Digit Readout
- Bright Neon-Type Tube Display
- 1 mc Counter Response
- Fully Transistorized

Model DMS-3200. A precision electronic instrument which displays reading in digital form instead of difficult to read pointer system. Consists of a main frame and a number of plug in units which are described below. Reliability and long life are achieved through the use of solid-state circuitry throughout and all transistors and diodes are silicon type. The counter has a response of 1 mc, assuring reliable count and readout of input pulse trains. Has metal-film and wirewound resistors in critical areas. Has built in power supply for main frame and plug

in. Has a low power consumption—14 watts. Display var: 1/2 second to 6 second reading. Count time: 100 msec. Features: die cast aluminum front and rear panels; slip out top and bottom sections; slip out construction of printed circuit boards, and heavy duty handles. Rich black and chrome color combination. Size: 9 1/4" W x 6 3/8" H x 12 7/8" D. Ship wt. 10 lbs.

Stock No.	Type	1-9	10-24
62F1761	DMS-3200	320.00	304.00

PLUG IN UNITS FOR USE WITH ABOVE

Model DP-100. Plugs into main frame above to provide digital display of DC voltages from 0.1 millivolt to 1000 volts, with an accuracy of $\pm 0.1\%$ full scale. Five ranges: 0.0 to 99.9 millivolts; .000 to .999 volts; 0.00 to 9.99 volts; 00.0 to 99.9 volts; 00 to 999. volts. Excellent AC rejection for reading accuracy; 80db at line frequency. Size 3" H x 8 1/4" W x 10" D. Ship wt. 3 1/2 lbs.

Stock No.	Type	1-9	10-24
62F1762	DP-100	175.00	166.25

Model DP-170. Ohmmeter Plug-in, when used with the DMS-3200 Main Frame, provides digital display of resistance measurements from 0.01 ohms to 1,000 meg-ohms. The wide range of resistance measurements, coupled with accuracy of $\pm 0.1\%$ F.S. $\pm 0.2\%$ of reading, makes this a remarkable unit. Four terminals are provided so that lead resistance does not cause inaccuracies on extremely low resistance measurements. In addition a guard terminal is provided so that spurious leakages in components are automatically balanced out. Aluminum case. Size: 3" x 8 1/4" x 10". Shpg. wt. 3 1/2 lbs.

Stock No.	Type	1-9	10-24
62F1764	DP-170	240.00	228.00

Model DP-150. 1 Mc. Counter. Measure frequency of simple or complex waveforms from .1 cy. to 1 Mc.; period from 999 sec. to .1 msec. Overrange capability allows 7-digit resolution, accurate to $\pm .001\%$. Provision for event totalizing and manual reset. Input: 1 megohm shunted with 40 pf, overload protected. 10 mv max. sensitivity. Provision for internal check at 1c, 1kc, 100kc; Schmitt trigger output on front panel for use as time mark generator, scope trigger, etc. Shpg. wt.. 4 lbs.

Stock No.	Type	1-9	10-24
62F1763	DP-150	195.00	175.00

Model DP-200. Capacity meter Plug-in when used with the DMS-3200 Main Frame, provides digital display of capacity measurements from 1 picofarad to 9,999 microfarads. Design is all solid state. Eight ranges: 000. to 999. picofarads; 0.00 to 9.99 nanofarads; 00.0 to 99.9 nanofarads; 000. to 999. nanofarads; 0.00 to 9.99 microfarads; 00.0 to 99.9 microfarads; 000. to 999. microfarads; and 0.00 to 9.99 millifarads. Size: 3" x 8 1/4" x 10". Ship wt. 3 1/2 lbs.

PORTABLE VTVM

Model 470A. Uses only two scales for all measurements including peak to peak. Large easy to read meter with 6" arc top scale. High sensitivity range for transistor bias testing. AC and DC ranges are: 0-5, 1.5, 5, 15, 50, 150, 500, 1500 volts. Peak to peak ranges: 0-1.4,

4, 14, 40, 140, 400, 1400, 4000 volts. Resistance ranges (center scale = 10): X1, X10, X100, X1000, X10,000, X100,000, X1 meg, X10 meg. Input resistance: DC volts, 17.7 megohms; AC volts 17.7 megohms paralleled with approximately 150 mmf. Frequency range: 15 cps to 2.5 mc. Includes 48" long removable test lead and probe. Has range switch for use on AC, DC and Ohms ranges, and 48" long common lead. For 115 VAC, 50/60 cps, 15 watts 6 3/8" x 7 1/2" x 4 1/2". Shpg. wt.. 10 lbs.

BURNOUT-PROOF VOM

Model 455A. A versatile, compact portable volt-ohm-milliammeter, which provides automatic overload protection. YOU CAN'T BURN IT OUT! A unique protection circuit incorporates an interlocked combination of relay, fuse and neon lamp to protect against any conceivable overload. Sensitivity: 20,000 ohms per volt DC and AC AC and DC ranges: 3, 15, 60, 150, 600, 1200 volts. Resistance: 0-100 megohms in 4 ranges. Accuracy of $\pm 3\%$ DC, $\pm 5\%$ AC, and ± 3 of arc on resistance scale

is provided in the Model 455A. Features: single function range selector switch; batteries instantly accessible—snapped in or out; attractive streamlined, high impact phenolic case. Center scale ranges: 5, 500, 5,000, 500,000 ohms. Size 8 1/2" x 5 7/8" x 3". Ship. wt. 3 3/4 lbs.

HICKOK TEST EQUIPMENT

WIDE BAND SERVICE TECHNICIAN'S OSCILLOSCOPE

Model 677. Designed to provide service technicians with a high quality instrument at low cost. Has calibrated screen with full cathodic correction to facilitate use in both waveform and peak to peak observations and measurements. Has preset horizontal and vertical sweep positions. Vertical amplifier has frequency response flat to within 3 db from 5 cycles to 4.5 MC. Sensitivity 40 MVRMS. Horizontal amplifier has

response within 3 db from 5 cycles to 350 KC. Power input: 117VAC, 50/60 cycles, 90 watts fused. Size: 14"x9 1/2"Wx18 1/2"D. Shpg. wt., 36 lbs. **62F1750. NET 214.50**

TRANSISTOR ANALYZER

Model 850P. Provides evaluations of a transistor to determine its ability to function under a specific circuit condition. Highly accurate indicating meters, within $\pm 2\%$ of full scale. Checks power transistors with collector currents of up to 500 MA. An excellent aid in demonstrating transistor theory in technical educational schools. Panel selector quickly sets operator's choice of circuit-use conditions to detect suitability of transistor to operate from signal sources of varying impedances. Can be used as "breadboard" to build up amps, oscillators. Checks parameters in 3 configurations. Common base, common emitter, and common collector. Battery operated. Portable case with aluminum panel. Size: 8x16 1/2x13 1/2". Shpg. wt., 22 lbs. **62F166. NET 169.50**

LABORATORY OSCILLOSCOPE

Model 770A. 5" wide-band and general purpose oscilloscope. Calibrated 4MC DC vertical amplifier with 8-step and vernier attenuator. Three operational modes of internal sweep generator: free-running, driven, and automatic. Eighteen direct reading calibrated sweep rates from 0.5 sec/div to 1 usec/div. 5 times sweep magnifier, accuracy within $\pm 3\%$. Model has vertical and horizontal deflection systems and incorporates sweep magnification on internal sweep functions. Internal calibrating signal provides 60 cycle square wave. Flat-faced, post-accelerated CRT. Illuminated, cathode ray grid.

Works with 105-125 volts, 50/60 cycles; 130 watts furnished complete with operating manual. 60 cycle line sweep adjustable over about 180°. Shipping weight, 57 lbs. **62F1760. NET 585.00**

AM-FM SWEEP AND MARKER GENERATOR

Model 288AX. Provides the necessary signal voltages for servicing AM and FM receivers as well as TV receivers. A crystal controlled 100Kc and 1000Kc oscillator provides an accurate frequency standard. A wide choice of frequency ranges, sweep widths and methods of modulation plus a new ultrasonic range of 35Kc to 110 Kc, make this a versatile generator. High output voltage permits visual stage by stage alignment of IF stages, limiter, and discriminator on both AM and FM receivers. Power and voltage measurements, as well as determination of resonance in alignment work, are materially aided by a self-contained decibel meter with range of -10 to +38 db. Sweep synchronizing voltage is brought out to front panel. Output control; vernier control w/decade steps of 1, 10, 100. Pwr. requirements: AC 110v, 50-70 cycs. Complete w/crystal, cable assm. mtr. ld., instruction book. 16x13x7" Wt., 33 lbs. **62F1752. NET 315.00**

AEROVOX DECADE BOXES

• Provide Accurate Standards of Resistance, Capacitance & Inductance

Type ALD-42

Type ARD-15

Type ACD-23

Type ARD-41

All units provide accurate standards of resistance, capacitance, and inductance. Ideal for laboratory and experimental use. Decade boxes of the highest quality are available in ranges most needed for electronic and electrical laboratories for a price below that of equivalent quality standards. Boxes are available in 11 units; 4 resistance decades, 3 capacitance decades, and 4 inductance decades. Face plates are black with white numerals for maximum legibility. Heavy duty construction of seamless, drawn steel and gray enamel housing insure trouble free operation and unimpaired accuracy. New resistance model ARD-41

is housed in special high impact plastic case which is capable of rugged handling. In "Use" column of the following table, C indicates the Capacitance Decade Box, L the Inductance Decade Box, and R the Resistance Decade Box. Except for ALD-42 the Capacitance Decade Boxes have operating ranges of 400 to 20,000 cps. ALD-42 has a range of 400 to 5,000 cps. The new decade box, ARD-41, has a range of 0 to 1.1 megohms in 1 ohm steps, combining all the three other resistance decades into one compact box. Multiple-dial Capacitance Decade Boxes have the highest value multiplier to the left so that readings are instantly visible.

CLAROSTAT TEST EQUIPMENT

POWER RESISTOR DECADE

Type 240C. This handy power resistor box permits changing resistance values in a working circuit at the flip of a switch. This is an instrument that no lab, shop, or serviceman can afford to be without. Saves time and work in developing new circuits where some values are unknown. Ideal for checking voltage regulation of power supplies, since load can

be varied over a wide range. Handles any value from 1-999,999 ohms in steps of 1 ohm. Power rating is 225 watts. Maximum voltage should not exceed 1,000 VDC, or 660 VAC. Housed in ventilated metal cabinet. Size: 13" x 8 1/2" x 5 1/4". Shipping weight, 11 pounds.

62F730. NET 110.00

CLARO-DEC PRECISION RESISTANCE DECADE BOX

Serves many applications with all the versatility needed for the job. Claro-Dec (within established parameters of current) are used whenever accurate steps of resistance values between .1 and 900K ohms $\pm 1\%$ or required. Two piece molded housing. Temp coefficient less than 100ppm. Temp. 40°C max. at rated current. Derated to 0 at 85°C. Color: Grey. Shpg. wt., 3 oz. a (pproximate) per individual unit.

AC VOLT-WATT METER KIT

Model 261K. Excellent for audio design and production line applications. Provides measurements of amplifier gain/response, amplifier power output, network response and output level. Specs. VOLTMETER: Ranges: 0.01, 0.03, 0.1, 0.3, 1, 3, 10, 30, 100, 300, 1000 RMS volts. Frequency response: ± 0 db 10 cps-150 KC, -3 db at 50 KC; Input Impedance: 2 Megohm; Accuracy: $\pm 4\%$. Specs. WATT-METER: Ranges: 0.15 mw, 1.5 mw, 15mw, 150mw, 1.5W, 15W, 150W; Frequency Response: ± 0 db, 10 cps-100 KC; Accuracy: $\pm 5\%$; Internal loads: 4, 16, 600 ohms for 40W and 8 ohms for 80W. External Loads: 4, 8, 16, 600 all to 150W. The DB scale reads directly in dbm on 600 ohms load (-20 to +2 db). Relative voltage db on the same scale (0 db = 0.774 volt). Successive power ranges are 10 db apart. Power: 105/125V, 50/60 cps, 15W. Size: (HWD) 8 $\frac{1}{2}$ "x5 $\frac{3}{4}$ "x7". With instructions. Shpg. wt. 6 lbs.

MODEL 250K AC VTVM AND AMPLIFIER KIT

Model 250K. High sensitivity, wide-band AC VTVM and AMPLIFIER of laboratory accuracy and quality. It measures AC voltage from 100 microvolts to 300 volts in 12 ranges. A function selector switch on the panel converts the instrument to a wide-band amplifier with a gain of 60 db on the 1 MV range, and a maximum output of 5 volts RMS. Stabilized power supply incorporates voltage regulator; DC-biased filaments and hum-adjust pot. Voltmeter voltage ranges: 1, 3, 10, 30, 100, 300 RMS m.v. and 1, 3, 100, 300 RMS volts. Max. Hum and Noise: -40 db @ 2 mv in. Amplifier max. output v. 5 RMS v. Power Req. 105-125 VAC, 50/60 cps. 15 watts drain. Grey steel cabinet. Kit complete with instructions. Size: (HWD) 8 $\frac{1}{2}$ "x5 $\frac{3}{4}$ "x7". Wt., 7 lbs.

MODEL 232-K PEAK-TO-PEAK VTVM KIT

Features high circuit stability and accuracy. Uses 1% precision resistors throughout. Directly measures p-p voltage of complex and sine waves on scales of 0-4, 14, 42, 140, 420, 1,400 and 4,200 volts. Resis. ranges: 0-1,000 megs in 7 steps. 7 non-skip ranges on the 4 functions of: +DC volts, -DC volts, AC volts, Ohms. Frequency response: 30 cps to 3 mc. Up to 250 mc with PRF probe. DC-RMS sine voltage ranges: 0-1.5-5-50-150-500-1,500 volts. $4\frac{1}{2}$ " meter in a burn-out-proof circuit. Zero center for TV-FM discriminator alignment. Calibrates without removal of cabinet. Complete with all parts, less solder. Compact in size: 8 $\frac{1}{2}$ "x5x5". For 110-120 V. 50-60 cy. AC. Kit complete with instructions. Wt., 5 lbs. With Uni-Probe.

EICO® Test Equipment & Kits

MODEL 380 SOLID STATE NTSC COLOR GENERATOR

Compact solid-state color signal and dot-bar generator provides precisely shaped, completely standard color signals essential for setting-up and servicing color TV. Instant operation. Unit incorporates 33 transistors . . . provides completely standard, fully saturated NTSC color signals including both chrominance and luminance signals as specified. Saturated transistors for switching and delay provides square "clean"

waveforms without significant overshoots or ringing for excellent signal definition. RF output: 0-50,000 μ V into 300 ohms. Video output: both positive and negative polarities; 0-10V, p-p into 4.7 ohms. 13 horizontal lines; 10 verticals. Crosshatch: 13 horizontals; 10 verticals. Dots: 130 for static and dynamic convergence adjustments. 117 VAC, 60 cps. 8 1/2 x 5 1/4 x 6 3/4". Wt. 8 lbs.

62F768. Factory wired. **159.95**

NEW MODEL 378K AUDIO GENERATOR KIT

Extreme versatility and positive error elimination are now yours for any application where a stable, accurate audio sine wave must be used. Precisely metered output controlled by 8 position decade and line attenuators. Highly accurate, switch - selected frequencies from lops to 100kc in 1 cycle steps. Positive setting detent switches need no interpretation. Frequency accuracy: $\pm 5\%$. Distortion less than 0.1% (20cps-20kc). Output voltage ranges: 0-3, 10v into hi-z (10k min.); 0-.003, .01, .03, .1, .3, 1V into ext. 600 Ω load—or with int. load into ext. hi-z. Output meter accuracy: $\pm 5\%$ of full scale. Power requirements: 120V, 50/60 cps, 40 Watts. Size: (HWD): 8 1/2" x 12 1/2" x 9". Weight, 13 pounds.

UTILITY TESTER KIT MODEL 540-K

- Neon lamp AC leakage test circuit
- Multi-range AC/DC voltmeter

A versatile instrument that can be used as a multi-range AC/DC voltmeter, an ammeter, an ohmmeter, a wattmeter, and a leakage detector. 3 1/2" meter. All voltage ranges (0-7.5-15-150-300 volts) and current range (0-15 amps) are AC/DC. 0-1000 direct reading ohms. Neon lamp ac leakage test circuit permits continuity check of resistors between 1000 ohms and 2 megohms and capacitors above .0005 mid. Direct reading of power line voltage up to 300 volts AC/DC. Panel outlet permits metering current up to 15 amps drawn by any appliance. Provides "good-bad" readings on 6 or 12 volt storage batteries. Size: 3 3/4 x 6 1/4 x 3 1/2". With instructions. 3 lbs.

MODEL 369-K TV/FM SWEEP MARKER GENERATOR KIT

The EICO 369 feeds sweep signal only to i.f. strip being aligned. At the output end of the circuit a demodulator cable picks off the signal, demodulates it, and feeds the demodulated signal to a mixer stage inside the generator where the markers are added. Then this combined signal is fed on to the oscilloscope. This means that the marker signals are not affected by the receiver circuitry and that traps in the receive. will not reduce or eliminate the marker. It means that a TV technician can align TV and FM i.f. strips faster and more accurately. Five Ranges: 75 - 316 mc; 32 - 85 mc; 16 - 40 mc; 7.5 - 10 mc and 3.5 - 9 mc. All five ranges are fundamentals and tuning the desired frequency is simplified by a 6:1 vernier dial and a 330° scale. Output impedance is 50 ohms. A 6BQ7-A sweep oscillator and rf output cathode follower, a 12AT7 variable and crystal marker oscillator, a 12AX7 blanking diode and first aac amplifier, a 6DR7 second aac amplifier and aac series regulator. For 110-120v A.C. Shpg. wt. 18 lbs.

632K CRT TESTER AND REJUVENATOR KIT

Includes universal multi-socket cable that accommodates any CRT, black and white or color including those for transistor TV's. 1000 volt DC supply for repairing CRT defects, 150 volt variable negative supply for checking contrast range of CRT. Variable filament voltage in three ranges: 0-5, 5-10, 10-15. Grid cut-off voltage and filament voltage read on 4 1/2" meter. Beam current read on meter on "BAD - ? - GOOD" scale. Neon lamp for short-open circuit testing. Each gun of color tube tested separately. Comes in a luggage-type

pyroxylin covered wood carrying case. Size: 9 3/4" H x 12" W x 5" D. For 105-130 VAC, 60 cps. Shpg. wt., 12 lbs.

MODEL 488K ELECTRONIC SWITCH KIT

Allows simultaneous observation of 2 patterns on a single scope screen. Direct comparison of voltage and current amplitudes, waveforms, frequencies and phase relationship. Separate amplitude control for each pattern. Positioning control permits superimposing. Each of the 3 switching rate ranges is continuously variable. Low: 10-100 cps. Med: 50-400 cps. Hi: 250-2,000 cps. Sinusoidal frequency response of 0-30,000 cps (useful to 300,000 cps) at -2 db. Continuously variable gain control with negligible phase distortion. 400 v. peak-to-peak maximum input. Input imped. of 100,000 ohms. Output imped. 50,000 ohms. With all parts except leads. Size: 6x6x6". Shpg. wt. 7 lbs.

MODEL 435K DC WIDEBAND 3" OSCILLOSCOPE KIT

Dc to 4.5Mc flat response for reproduction of 3.58 Mc. sync burst and oscillator signal in color television servicing. Distortionless V&H trace and retrace blanking. Directly coupled push-pull vertical amplifier, eliminating low frequency shift and distortion in wave forms. Zener diode control of square wave calibration. Sweep range 10 cps. to 100Kc. in four ranges with vernier adjustment. Automatic sync limiter and amplifier. V-amp: -1, -3 db from Dc to 4.5 Mc response and 18Mv/Cm RMS (50Mv-P-P) Sensitivity input 1 megohm shunted by 35mmfd. Square wave 200 Mv P-P ±5%. Vert. attenuator 1, 10, 100 and 1000 positions. 3V blanking at 2.2 megohms. Sawtooth output 10V at 10 to 100 Kc P-P. Variable output impedance to 300 ohms. 9 tubes plus silicon diode and Zener diode with WKS013P1 3" anti-bloom CRT. 8 1/2 x 5 3/4 x 12 3/4". Shpg. wt. 15 lbs. Model 435K.

STANDARD SINUSOIDAL TYPE CVS HARMONIC-FREE TRANSFORMERS

The Sola Constant Voltage Transformer is a static-magnetic voltage regulator designed to keep its output within $\pm 1\%$ with input variations up to $\pm 15\%$. Completely automatic, no tubes, moving parts or manual adjustments. Current limiting characteristic protects transformer and its load equipment. All have new low stray-field design. Practical for most built-in applications. Harmonic content of output voltage wave is less than 3% total RMS at any load above 25% of rating. At lighter loads it never exceeds that of most public utility sources. May be used to provide a sine-wave source of stabilized voltage for the most exacting applications. All have screw type terminals in outlet box. Figure A and B units can be modified for accessory use by installing cord-receptacle kit listed below. All are 95-130 or 190-260 volts, 60 cycles, AC input, except *95-130 volts, 60 cycles; **95-130, 175-235 or 190-260 volts, 60 cycles; ***190-260 or 380-520 volts, 60 cycles; †50 cycles.

400 CYCLE TYPE CVS CONSTANT VOLTAGE TRANSFORMERS

Fig. F provides stabilized output voltage despite great variations of input voltages. Compact and light weight, the CVS series was designed for component applications on ground support equipment, inverters, data processing, etc. Features 118 volt output $\pm 1\%$ load regulation from full to no load, 115 volt nom. input less than 3% total rms harmonic content. Will operate at 50°C ambient temperature. Capacitors for the CVS line will be rated for 400 cycle operation.

NORMAL HARMONIC TYPE TRANSFORMERS

Embodies all the voltage stabilizing and other characteristics of the Standard Sinusoidal Type CVS listed above except output voltage wave shape is not sinusoidal. Average of 14% total RMS harmonic content in output voltage wave. Recommended for applications where sine wave voltage supply is known to be unnecessary, such as filament supplies, etc. All have screw type terminals in outlet box except Figures D and E. Figures A and B units can be modified for accessory use by installing cord-receptacle kit listed below. All are 95-130 volts, 60 cycle input except *95-130 or 190-260 volts, 60 cycles; **95-130 or 175-235 or 190-260 volts, 60 cycles; ***190-260 or 380-520 volts, 60 cycles.

FIG. A. FIXED CONSTANT VOLTAGE DC POWER SUPPLIES

Will withstand high transient overload without damage or output voltage drop. Self-protecting on continuous overload. Output regulation $\pm 1\%$ or less over 100-130v. input range. 1% ripple except 281200 and 281250 which are $\frac{1}{2}\%$. Load regulation less than 4% from 20% to full load. Efficiency approx. 75%. Output impedance approx. 3 ohm. Mounted on standard 19x5 $\frac{1}{4}$ x 9 $\frac{3}{4}$ " panel for rack mounting. Protective iridite coating. Input 100-300, 60 cyc. AC.

Superior Variable Transformers

METERED KNOB ASSEMBLIES FOR BACK OF PANEL MOUNTED UNITS

Can be combined with standard cataloged powerstat variable transformers that are designed or adaptable for back panel mounting. Easily adapted for retrofitting existing installations. Large functionally designed knob turns freely while meter remains stationary. Accurate voltmeter insensitive to stray magnetic fields. Consists of metered knob, mounting screws and complete wiring and installation instructions.

VS150—Where 120 volt duty is required. Has 0-150 meter scale.

VS300—Where 240 volt duty is required. Has 0-300 meter scale.

NEW METERED KNOBS POWERSTAT® VARIABLE TRANSFORMERS

Designed for back-of-panel or general utility mounting. Excellent for use in laboratories, and inspection and test applications where voltage must be controlled without the necessity of installing a separate way of measuring voltage. Have knobs which include a stationary direct-reading voltmeter; Accuracy of $\pm 2.5\%$ of full scale. and on 240 volt types have 0-300 volt scales.

"POWERSTAT" VARIABLE TRANSFORMERS

An autotransformer of toroidal core design with a movable brush-top riding on the Gold-plated bared portion of the winding. Delivers from 0 to or above line voltage. Operating temp. rise is less than 50°C above ambient. Special Gold plated plating and polishing process produces a glass-smooth commutator surface which is forever free of oxides.

(F) with fuses in the output brush leads and terminal boards enclosed. Knock-outs in enclosures permit wiring with BX or equivalent. (T) terminal boards enclosed. (2PF) parallel blade plug. (2TF) 2-blade twist lock plug. (3PF) polarized 3-blade plug. (3PN) standard 3-blade plug. (3TF) polarized 3-blade twist lock plug. (-2) 2-gang. (-3) 3-ganged. Single phase except where otherwise noted. All 136-236 and 1156-1256 units have POWER-KOTE coils for greater stability.

POWERSTAT VARIABLE TRANSFORMERS FOR 400/800 CYCLE SERVICE

For high-frequency uses in aircraft, ships, missiles, and industry. Single- and three-phase 400/800 cycle, manual and motor-driven air-cooled 28-, 120-, and 480-v models in 56 VA to 8.7 KVA ratings. Perform some tasks as conventional 60-cycle units but weigh $\frac{1}{2}$ as much and occupy $\frac{1}{2}$ the space. Operate at -55° to $+40^{\circ}$ ambient at full rated load (reducing to $+80^{\circ}\text{C}$); altitudes to 50,000 ft.; up to 95% rel. humidity; vibration, shock and incli-

nation per MIL-T-17113; corrosion resistance per QQM-151-A and other military specs. Types HL and HMS units available with either 28 VDC or 120 V, 400-cycle AC motors with std. speed of 60 sec. for full range travel. Manual units knob-operated, but screw-driver slot method of turning optional for HS and HMS single phase. Open construction unless specified * enclosed, † indicates square frame construction. Specify mtg. when ordering.

LW136B

Type EN

Type UC1MB

VARIABLE TRANSFORMER WITH ISOLATED SECONDARY

Powerstat type LW-136B is a double wound assembly with an isolated secondary on a single core. The one phase unit can be connected for either 120-volt or 240-volt, 50/60 cycle input and can be used as a source of 0-30 volts isolated output; either a 120-volt or 240-volt line corrector; or either a 120-volt or 240-volt limited range "buck-boost" variable transformer. The three-phase, three-gang unit can be connected for either 240-volt or 480-volt, 60-cycle input and can be used as a source of 0-60 volts isolated output; either a 240-volt or 480-volt line corrector; or either a 240-volt or 480-volt limited range "buck-boost" variable transformer. Gray enamel finish. Spg. wt., LW136B—25 lbs. LW136B-3—77 lbs. Features POWERKOTE coils.

MULTI-PURPOSE POWERSTAT

Type 5-1011. Miniaturized for 400/1600 cycles, 1 phase service has connections for use as limited range variable transformer, low voltage output variable transformer, and line corrector. As limited range variable transformer with 115-volt input, may connect for output of 83-113 V, 2.6 amp., 0.29 max. KVA; or 98-130 V, 2.6 amp., 0.34 max. KVA; or 116-149 V, 2.6 amp., 0.39 max. KVA. As low voltage output variable transformer with 115 V, input may connect for an output of 0-26 V, 2.6 amp., 0.068 max. KVA. As line corrector may connect to correct to output of 115 volts, 2.6 amp., 0.30 max. KVA from input of 90-113 volts, 104-133 volts or 117-149 volts. Only $1\frac{1}{4}$ " in dia., $2\frac{1}{4}$ " depth behind panel. Wt., 1 lb.

SUPERIOR POWERSTAT VARIABLE VOLTAGE TRANSFORMERS

Rotation of brush tap delivers a continuously-adjustable voltage from AC power lines over range from zero to or above line voltage. Manual and motor-driven, open and enclosed air-cooled types are available for 120, 240 and 480 volt, 25, 50/60 cycle, single and three phase service in rating from 1.8 KVA to 2.1 KVA. Current rating available over entire range of output voltage. Zero waveform distortion, negligible maintenance, gold-alloy plated commutator, excellent regulation, POWERKOTE coils. †Unencased.

Superior Regulators & Transformers

NEW IES SERIES VOLTAGE REGULATOR

Regulates output voltage through controlled firing of inverse parallel pair of SCR's connected in the shunt leg of an autotransformer. Solid state circuitry and smaller, lighter units are featured. No vacuum tubes, motors, blowers or relays are used. Wide operating frequency range: 50 or 60 cycles $\pm 10\%$. Maintains output voltage within 100 millivolt rms band for any combination of input voltage and load current changes and for changes in load power factor from 1.0 to 0 lagging. Distortion will not exceed 3%. Speed of response instantaneous for most applications. Time constant response: 30 milliseconds. Operated at ambient temperatures from 0 to 50°C. Temperature coefficient: 0.01%/°C; output voltage will change 0.01% for a degree C change. Mounted in cabinet. All except Type IE9115 have cabinets which can also be rack mounted by removing the feet. Provisions for high remote sensing. Also features a removable plug-in circuit board. High VA efficiency (up to 95%). Includes an overcurrent protection circuit which senses the magnitude of flowing current in SCR leg and removes gate drive from SCR's when current exceeds pre-set magnitude.

FLEXIFORMER PACKAGED TRANSFORMER

Model TP150. This transformer is a self-contained toroidal primary coil incased in durable high impact plastic; the center opening permits hand-winding the proper number of secondary turns for the desired turns ratio. The primary consists of a strip-wound silicon-steel core having a coil of 400 turns of copper wire. Input rating: 120V, 50/60 cycles, at 150VA. As a current transformer, maximum primary current is 400A. With 5-way binding posts for connections. Size, 6 x 5 3/4" x 4 3/4"; shpg. wt., 6 lbs.

5F770. 1-11 NET EACH 25.00
12-99 NET EACH 21.25

TP150

Model TP1000. Similar to above, except rated 1000VA at 120V 50/60 cycles. Maximum input voltage: 175V, 60c; 145V, 50c.

5F645. 1-11 NET EACH 75.00
12-99 NET EACH 63.75

TP1000

Everything in Electronics from One Complete Source

SLO-SYN SYNCHRONOUS/STEPPING MOTORS

Standard Types. Rugged bi-directional motors that can be used either as AC constant-speed motors or DC stepping motors. Rated for continuous duty at 40°C max. Types with suffix P1, P2, etc. have planetary gear speed reduction assemblies mounted on motor to lower speed and increase torque; assemblies are in dustproof enclosure, employ nylon gears. Types with RC suffix have built-in phase shift network for single-phase operation; other units operate from 2-phase current, require external RC network for 1-phase use (see below for components). Avg. shpg. wt., 6 1/2 lbs.

Variable Transformers

OHMITE "V.T." VARIABLE TRANSFORMERS

VT02E
In Case

VT1, VT02, VT3

VT02-2

VT8

VT20

VT4

Six sizes for a wide range of electrical ratings. Excellent regulation at any point within the rated load. Output free of wave form distortion. Deliver full rated current at any brush setting. Have overvoltage feature, except those marked "No Overvoltage", and high-current low-voltage to meet transistorized power supplies and high current applications. All units single phase except Two-in-Tandem. All may be used to over 400 cps. Screw terminals and solder lugs on all models

except types VT1, VT02, and VT3 which have solder lugs and accept push on connectors and have 3/8-32 threaded bushings for single mount. Shafts may be extended from the brush or base side. VT20 has a collet shaft lock for repositioning without scoring shaft. Dials on overvoltage models calibrated for overvoltage and normal line connection. Knob, dial, mounting hardware supplied.

RAYTHEON VOLTAGE REGULATORS

RVA & RVC Series: combination of resonant electrical circuit and reactance magnetic circuit providing regulated output voltage. Electrical component consists of input winding, resonant circuit with winding capacitor, output winding and compensating winding. Magnetic component of laminated core with shunt be-

tween input and output windings. RVC available in line (S), filament (6.3S), and plate/filament (570S, 800S, & 780S) voltage values. VR Series of linear reactor, non-linear reactor and capacitor. VR set-up auto transformer gives higher voltage to capacitor for energy storage. Cannot be damaged by overload or continuous short circuit across output terms. Current limited to 200% of rated load. All regulators operate at standard 60 cyc. input.

Depend On Newark For All Your Industrial Needs

Voltage Regulation & Control Devices

G-E "VOLT-PAC" VARIABLE TRANSFORMER

Provides continuously adjustable output voltage. Handles short duration current surges up to 10 times rated current and overload current up to 2 times rated current for approximately 1/4 hour without overheating. Maximum output currents applicable up to 100% voltage. Core consists of high grade strip wound silicon steel, plus moulded phenolic winding form to insulate coil from form. Types for 50-60 cycles, except (*) for 60 cycles only. Cased units with enclosed terminal boards, plug-and-cord-set units, motor-operated units, multiple-core units, three-phase units, and automatic control units are available through Newark.

120V INPUT — UNCASED, SINGLE CORE

All units provide 0-140V overvoltage output except * 0-132V, † no overvoltage 0-120V only. *Max. amps†: output into constant-Z load at or below 120V; at overvoltage "rated" current should not be exceeded. Uncased, with exposed terminals.

REGULATED DC POWER SUPPLIES

Furnish fixed DC output voltage within ± 1% tolerance while input AC voltage varies ± 15%. All units feature rugged magnetic and semiconductor circuitry and are designed for chassis or standard 19" rack mounting. Short-circuit current is limited to approximately twice the rated value. Can be installed with either polarity grounded. Input voltage range: 97-130VAC, 60 cps, 40°C ambient. Output ripple level 1% rms max. Efficiency 70-85% for normal output levels; efficiency may decrease for unusually low output levels.

Write NEWARK For Information On The Complete Line Of GE Voltage Regulation & Control Devices.

T Technitrol Pulse Transformers

TECHNITROL LOW POWER PULSE TRANSFORMERS
 Pulse transformers are specifically designed to accommodate wide range voltage and frequency changes without producing distortion in the wave form. High permeability core and insulation withstanding temperatures from -55°C. to +105°C. Meet all requirements of MIL-T-27A to insure dependability.

SERIES T
 Designed for blocking oscillator and interstage coupling.
Series T, Type TE. Electrical characteristics are the same as the above, with pig-tail leads. Size: 1 1/2 x 1/4 x 1 1/2". Leads are two inches minimum. Shpg. wt., 1 oz.
Series T, Type TP. 7-pin printed circuit leads, 1/4" long. Overall size: 1 1/2 x 1/4 x 1 1/2". The electrical characteristics are the same as listed above. Shpg. wt., 1 oz.

SERIES M
 Specifications include: pulse width from 0.05 to 5.0 μ sec., pulse repetition rate up to 10 mc, and test voltage of 500 volts DC. Shipping weight is approximately 1 ounce.
Series M, Type MP. 4-pin printed circuit leads, 1/4" long. Overall size: 1 1/2 x 1/4 x 1 1/2". The electrical characteristics are the same as above.

GENIE SERIES
Type G. Miniature 3 winding transformers meet MIL-T-27B Grade 5 Class S, also MIL-T-21038A. Printed circuit assembly or conventional wiring techniques may be used. Leads are #22 AWG soft phosphor bronze. Electro-tin plated as per MIL-T-10727.
 #22 AWG. Size: .35" x .425" x .650".
Type H. Sub-miniature case 3 winding transformers meet all physical and environmental requirements of MIL specs listed under Type G. Leads are #22 AWG soft phosphor bronze.
 #24 AWG. Size: .250" x .350" x .500".

ULTRA MINIATURE TRANSISTOR TRANSFORMERS

Designed primarily for transistor audio application but can be used wherever low power is involved. Useful range, below 1 mw level. Constructed of fine wire, wound in nylon bobbins with special nickel alloy steel laminations. Dimensions $\frac{3}{16}$ x $\frac{3}{16}$ except UM-110: $\frac{1}{4}$ x $\frac{3}{16}$.

NEW LOW CURRENT CONTROL TRANSFORMERS

Versatile series of low current control transformers suited for pilot lamps, miniature relays, low current-low voltage power supply application. Primaries 117 volt, 50-60 cycles. Three isolated 12-volt secondaries (one with center tap). Can be series or parallel connected.

POWER TRANSFORMERS

Shielded against magnetic and electrostatic fields by one piece drawn steel cases. Vacuum impreg. coils, compound filled under heat and pressure to resist moisture. Cores are high grade, non-aging silicon steel. All trans-

formers are guaranteed to operate at rated values with EIA heat rise standards. For operation from 110-120 volts, 50-60 cps. AC. Type PCC-250 has 2nd fil. 5 Volts/2 amp.

Type PCC
Type PCR

Type PSR
Type PSC

STEP-DOWN TRANSFORMERS

Type SD. For operating 115 volt equipment from 230 volts, 50-60 cycles AC for source, "Sealed in Steel" corrosion-proof. With 8 ft. cord, plug, standard receptacle on case.

STEP-STEPDOWN AUTOTRANSFORMERS

Type PSU. Designed specifically for use with air conditioners in converting a 208 volt unit to a 230 volt line. 60 cycle operation, 208 v/230 v, 230 v/208 v. Converting from 230 volt unit to a 208 volt line is done by a simple connection inside outlet box. Unit is for air conditioners using 1 to 2 hp motors.

MINIATURE TRANSFORMERS

Top efficiency miniature transformers. Designed for a wide range of civilian and government applications. Used by many manufacturers of hearing aids and a variety of miniature electronic devices where maximum efficiency is necessary. Ideal for original equipment and for replacement.

CONVERTER-EPOXY MOLDED TOROID-DC TO DC

Ideally suited for powering all kinds of battery operated equipment, these transistor power supply transformers give a wide range of voltage and power from which to choose. Complete instructions included. All case Type TM1.

MULTI SHIELDED-LINE ISOLATION

50/60 Cycles. Units have been specifically designed for critical circuitry where minimum coupling capacity is imperative and battery-isolation is desired.

LINE ISOLATION TRANSFORMERS

380 to 1500 Cycles. Meet MIL-T-27B, Class R specifications. Applicable to communications, lighting and equipment systems requiring isolation. All units are static shielded.

MILITARY STANDARD TRANSFORMERS

These transformers bear government classification and part numbers as shown below. Dimensions, mounting centers, terminal arrangements, and markings are all in accordance with government specifications. All units will meet the requirements

of Grade 4 MIL-T-27B specifications for Class R operation. Input, Output, and Interstage Transformers are 300 to 10000 CPS; Maximum Altitude 50000 ft. Case style AJ.

INPUT

MIL-T-27B LOW FREQUENCY HIGH Q INDUCTORS

Units have magnetic shielding as well as more on frequencies ranging from 60 to 300 cycles. bucking construction. Designed to a Q of 40 or Split winding termination.

Thordarson MIL-T-27B Transformers

ALIGNAIRE INDUCTORS—VARIABLE

Ideally suited for hard to align or frequently changed circuits. Applicable to mid-audio tuned freq. circuits. Case type AL-1— $1\frac{1}{2} \times 1\frac{1}{2} \times 2\frac{1}{2}$ ex-cept case type AL-3— $1\frac{1}{2} \times 1\frac{1}{2} \times 2\frac{1}{2}$ (not illus.).

Triad Transformers

TYPE HS-HSM HERMETICALLY SEALED TRANSFORMERS

Case	Size						Wt. lbs.
	A	B	C	D	E	I	
AH	1 3/4"	1 3/4"	1 3/4"	1 1/4"	3/8"	6-32	4 oz.
AJ	1 3/8"	1 3/8"	2 3/8"	1 1/8"	1/2"	6-32	9 oz.
EA	1 13/16"	1 13/16"	2 3/4"	1 3/8"	1/4"	6-32	1 lb.
FA	2 1/4"	2 3/4"	3 1/8"	1 1/2"	1/4"	6-32	1 1/2 lb.

HS-HSM series transformers are designed to meet MIL-T-27B requirements. Equip. using these transformers need not be re-designed to submit for MIL. approval.

These transformers are permanently marked with electrical and test data as specified in MIL-T-27B. All are "Climate" treated. Avg. wt. 10 oz.

TYPE R COMBINED PLATE AND FILAMENT TRANSFORMERS—Primary 115 Volts, 50-60 Cycles

All types are "Climate" treated for protection against moisture and for elimination of lamination chatter. Hold temp. rise below 55°C. Only copper foil static shields, grounded to the case and core, are used. Leads are UL approved. All connection data permanently marked on case. Small in size.

TYPE SP "RED SPEC" TRANSISTOR TRANSFORMERS

Type SP. Designed especially for use in transistorized and printed circuit applications, these units come in tough epoxy-molded cases, weigh 1/10 oz.! Incorporate .020" dia. strong nickel-alloy leads spaced on standard 1/10" grid ctrs. to fit printed circuit boards. Base dimensions: .310x.410". Lead length: 3/4". Meet MIL-T-27B specs. *SP-66 is an output-isolation transformer. Shpg. wt., 1 oz.

"Red Spec"

SP-310 Magnetic Shielding Case

Type SP. All models have tough epoxy-molded case, weigh only 1/10 oz.! .02" dia. nickel-alloy leads are 3/4" long, no stripping or tinning. Base size, .310 x .410"; height, .465". Operating voltage 150 VDC. Meet MIL-T-27B spec. *SP-66 is an output-isolation transformer. Shpg. wt., 1 oz.

Toroidal Inductors

Epoxy Molded Toroidal

EC Series
EC SERIES. Powdered nickel alloy dust cores closely approach perfect inductor with high "Q", high stability with level and temp. High res. to shock and vibration. Ind. coils held to 2% inductance tol. Supplied in molded epoxy to meet MIL-T-27B. Size: 1 1/8 dia. x 2 3/8" ht. Shpg. wt., 1 1/2 lbs. EK series comes with plastic coated leads. Size: 1 1/8"D. x 3/8"H.

DI-T TRANSISTOR TRANSFORMERS

DI-T. Smaller than the Deci-Ouncers DO-T's. Power ratings and other characteristics of the DI-T's are identical to those of the DO-T's, except frequency response is approximately ± 2 db. 250 cps to 20kc. Hermetically Sealed to MIL-T-27B-TF4RX.

DI-T200 Series. Have uninsulated leads spaced on .1" radius for printed circuit boards. Hermetically sealed to meet MIL-T-27B-TF4RX $\frac{5}{16}$ " dia. x $\frac{1}{4}$ " H., except DI-T200 Series, $\frac{3}{8}$ " H. Wt. 1/15 oz.

"OUNCER" AUDIOS

Famous one ounce audio transformers represent the acme in compact quality transformers. High fidelity from 30-20,000 cps. Maximum output level +8 db at 6.3 mw. Application: Input and Mixing, Interstage and Output Transformers. Fully impregnated and sealed in a drawn aluminum housing. Size: $\frac{7}{8}$ " dia. x $\frac{1}{16}$ ". Wt. 1 oz.

DO-T TRANSISTOR TRANSFORMERS

Provides unprecedented power handling capacity, reliability, plus ultra small size. Hermetically sealed, metal cased to MIL-T-27B-TF4RX. Greater power rating, ± 2 db, 200 cps -20 KC. Low distortion. Anchored leads stand 10 lb. pull test; tinned and insulated copper conductors. For transistor use only. Size: $1\frac{1}{2}$ " long; $\frac{1}{16}$ " diameter. Weight $\frac{1}{10}$ oz. (*) Assorted.

400-CYCLE FILAMENT TRANSFORMERS

These new transformers combine smallness of size and lightness of weight with the maximum possible reliability. These versatile midgets are suitable for either ground or airborne use applications. Molded specifically to meet MIL-T-27B-TF5SX specifications. Primary, 105/115 volts, 380-1000 cycles per second. Secondary, 6.3 volts, center tap.

*Assorted.

Inductors

MINIDUCTORS

Meet Mil. Spec.
MIL-T-278-TF5RX

Hi Q in miniature form. Meets Mil. Spec. MIL-T-278-TF5RX. Ideal for transistor use and printed circuits. High temp. stability (-55°C to 100°C). ML-1 to 4, and MO-15 to 1 are medium low frequencies—400 cyc., MM and MW for medium frequencies and MH for high frequencies. ML case 1/16" x 3/16" x 1/16". Wt. 1/5 oz. MM and MH cases 1/16" D x 1/4" H. Wt. 1/100 oz. MO case 3/4" x 1 1/16" x 1 1/16" H. Wt. 1 oz. MW case 2 3/32" D x 1 3/32" H. Wt. 1/4 oz. (*) Assorted.

VARIABLE INDUCTORS

Variable units for use in tuned audio circuits. Adjustment of set screw on side of case permits change in inductance of +85% to -45% of mean value shown. In die-cast case. Size: 1 1/2" x 1 1/4" x 1 1/8". Weight, 5 1/2 oz. *Assorted.

TVC HERMETIC VARIDUCTORS

The MQ series are ideal for audio, carrier and supersonic fields. Laboratory adjusted to 1% tolerance, inductance is virtually independent of frequency, temperature and vibration. Low hum pickup. Shielded case affords high permeability. Hermetically sealed to meet MIL-T-27B. Case similar to HVC above. *Assorted.

Transformers & Filters

HERMETICALLY SEALED COMPONENTS

Hermetically sealed audio units that meet MIL-T-27B-TF4RX specifications. For use where a maximum of sealing and quality construction is required. Compact Audio Units below employ glass bead headers or terminals. Units in RC-25 case are $1\frac{1}{2} \times 1\frac{1}{2} \times 1\frac{1}{2}$ " Mtg. (slot center) $1\frac{1}{2}$ to $1\frac{3}{8}$ ", and weigh 2 oz.; RC-50 case units are $1\frac{1}{2} \times 1\frac{1}{2} \times 2\frac{1}{8}$ ", weight $\frac{1}{2}$ lb.; SM case units $1\frac{1}{2} \times 1\frac{1}{2} \times 2\frac{3}{8}$ ", weight 0.8 oz. Response ± 2 db except ± 4 db. $\frac{1}{2}$ center tapped. (*split).

UTC INTERSTAGE AND LINE FILTERS

BMI and BMI types are band-pass units. HMI and HML types are high-pass units. LMI types are low-pass units. Filters with 1 in type number are interstage, input imp., 10,000 ohms, L in type number are line units. All housed in hermetically sealed cases, shielded to reduce hum pick-up to 150 mv per gauss at 60 cycles. Base area, $1\frac{1}{2} \times 1\frac{1}{2}$ ". Mtg. ctrs., $\frac{3}{4} \times 1\frac{1}{4}$ ". Ht.: BMI, LMI, BML, $1\frac{1}{8}$ ". HMI, HML, LML, $2\frac{1}{2}$ ". Average weight, 8 ounces. *Assorted.

TRANSISTOR INVERTER TRANSFORMERS

Highly efficient, small size transistor inverter transformers, hermetically sealed to MIL-T-27BTF4RX specs. Transitory peaks that often damage driving transistors have been greatly reduced by new winding coupling method. Optimum results at approximately 1000 cycles. DC output shown is for 12/14 or 24/28 V battery. With 6/7 V battery, current ratings are same but output voltages are halved. Shpg. wts. H-97, $\frac{3}{8}$ lbs.; H-98, $\frac{3}{4}$ lbs.; H-99, $1\frac{1}{4}$ lbs.; H-100, $2\frac{1}{4}$ lbs. (*) Assorted.

POWER LINE ISOLATION TRANSFORMERS

Ultra shielded, hermetically sealed units simulated battery operation from power line. Less than 1/10th mmd. effective capacity between primary and secondary permits isolation formerly obtained only from battery power. Separate terminal for each shield. Input and output terminals on opposite sides of case. Meet MIL-T-27B specs. Primary and secondary — 115 V/50/60 cycles. (*) Assorted.

FILAMENT/TRANSISTOR TRANSFORMERS

Type FT Channel Frame. Primary; 115 volts. 50/60 cycles. Test Volts RMS: 1500. All units are low temperature rise vacuum-sealed against humidity with special impregnating materials to prevent corrosion and electrolysis. Approximate weight: 2 lbs. Taps on Primary FT-13 and FT-14 to modify secondary nominal V. -6% +6%, +12%.

OSCILLOSCOPE TRANSFORMER

Type H-198. Highly shielded scope transformer in hermetically sealed Mil-T-27BTF4RX specs. 800, 1600 & 2400 V. plate windings (no CT) supply approx. 1000, 20000 or 3000 V. DC at 5 ma. allowing great flexibility in application. Has 1.25 V.-2A rect. fil. winding connected to one end of RV winding. Separate 6.3 V. 6A fil. winding insulated to withstand anode voltages. Pri. 115V 50/60 cycle. Case similar to SM. Size 3 1/2 x 2 3/8 x 4 1/4". * Assorted.

SPRAGUE

TRIGATE PULSE TRANSFORMERS FOR LOW-COST SCR CIRCUIT APPLICATORS

For SCR triggering applications where excellent low cost performance is required. Balanced pulse characteristics and energy transfer from primary to secondary and tertiary windings. Min. saturation effect. Fast pulse rise time and increased current capability to prevent SCR di/dt failure. Transformer leads polyurethane insulated magnet wire. May be soldered directly to terminals or other circuit components without need for removal of

wire insulation. For operation over temp. range of -10°C to +70°C.

MICROTRAN TOROIDAL INDUCTORS

Toroidal inductors have found increasing use in the frequency range from 200 cps to 200 kc in wave filters, oscillators, frequency discriminators, power supplies and interference filters. Inductance is virtually independent of operating frequency, AC or DC level, temperature variations and vibration. Adjusted to ±2% of the nominal inductance.

QGL & QGM SERIES

QGL & QGM SERIES

Style-M. Molded, high temperature epoxy resin. Pig tail turret leads. Useable for printed circuit application. Gold plated .02" x 2" leads. 7/8" D x 3/8" H. #3 clearance hole. Wt. 5 oz.

Style-F. Micro crystalline wax dipped. #27 x 4 plastic leads. 3/8" D x 9/32" H. 3/32" clearance hole. Wt. 1/4 oz.

QIL SERIES

Style-M. Molded in high temperature epoxy silver plated lugs. 1-3/16" D x 1/2" H. #6 clearance hole. Wt. 1 1/2 oz.

Style-F. Micro crystalline wax dipped. #27 x 4" plastic lead. 1" D x 13/32" H. 7/32" clearance hole. Wt. 3/4 oz.

QKL & QKM SERIES

Style-M. Molded in high temperature epoxy silver plated lugs. 1 3/8" D x 3/4" H. #8 clearance hole. Wt. 3 3/4 oz.

Style-F. Micro crystalline wax dipped. #27 x 4" plastic leads, 1 1/4" D x 9/8" H. 7/32" clearance hole. Wt. 2 oz.

QPL SERIES

Style-M. Epoxy molded. Silver plated turret lugs. 2" D. x 1" H. #10 clearance hole. Wt. 6 oz.

Style-F. Micro crystalline wax dipped. #24 leads. 1-15/16" D x 7/8" H. 11/32" clearance hole. Wt. 5 oz.

QTL SERIES

Style-F. Micro crystalline wax dipped. 4" #24 lead. 2-7/16" D x 1" H. 3/8" clearance hole. Wt. 9 oz.

Style-H. Hermetically sealed with teflon terminals in a metal case. 2-9/16" D x 1-5/16" H. Wt. 1 lb.

TRANSISTOR BLOCKING OSCILLATOR TYPE TRANSFORMER

For conversion of low voltage DC to high voltage, MIL-T-27B sealed. 400 cycles approximate repetition rate. Wt. 2 lbs.

**Dependent on load and bias conditions. Frequency varies from 100 to 2800 CPS.

*Output when transformer is used in blocking oscillator circuit with single capacitor input rectifier.

MICROTRAN TRANSISTOR TRANSFORMER SELECTOR KIT

Model 400K. 9 transformers in one kit! For servo, audio instrumentation and control circuitry! Impedance range of 150-200,000 ohms. Sizes: from 3/8" cube to 3/4x3/4x1". 4" color coded leads. Includes complete design data: Nomographs and circuitry for determining correct transformer impedances for class A and B transistor amplifiers. Power versus DBM chart, terminal connection sheet, guide to MIL-T-27B cross reference index. With outline drawings for later selection of stock items with these same electrical ratings in many other mechanical constructions.

Collins Toroidal Coils

MOLDED PLASTIC TYPE MPF

Molded in high temperature resin. All have tinned brass terminals. Excellent Q characteristics. Normally used in the range of 1 KC to 15 KC. Useful for filters, oscillators, and tuned transformers. Mounts with 3-48

screw. Tapped hole. Ambient temperature range: -55°C to +105°C. Size: 0.738" H. x 0.888" L. x 0.375" W. VALUES OF INDUCTANCE IN 2% INCREMENTS ARE AVAILABLE FROM 5mh TO 3H.

NEWARK CAN SUPPLY ALL COLLINS TOROID INDUCTORS AND TRANSFORMERS.
CALL, WRITE OR WIRE FOR PRICES ON ITEMS NOT LISTED IN THIS CATALOG.

CORE TYPE MP-254 TOROIDS

Molded Plastic Type MP-254. Features exceptional Q below 5KC. Useful for critical filters, oscillators and tuned transformers in the above range. Provides filters of sharp characteristics and highest power capabilities. Molded in hi-temp resin.

Tinned brass terminals. Mounts with 8-32 screw. Tapped hole. 2" dia., 1" thk. Values of inductance in 2% increments are available from 20Mh to 36th.

MOLDED PLASTIC CORE TYPE 848 TOROID—FOR FREQUENCIES UP TO 100 KC

Low permeability core material for use in the frequency range of 2KC to 100KC. Molded in hi-temp resin. Tinned brass terminals. Coefficient of inductance: ±180 PPM/° C over AN.

Mounts with 6-32 screw. Tapped hole. Ambient temp. range: -55°C. to 105°C. Values of inductance in 2% increments are available from 2mh to 500mh.

MOLDED PLASTIC CORE TYPE 930 TOROID—FOR FREQUENCIES UP TO 10 KC

Provides higher Q, power level and stability, with only slight increase in weight and volume. For use in frequency range of 500 cycles to 10KC. Molded in hi-temp resin. Tinned brass ter-

minals. Ambient temp. range: -55°C. to +105°C. Mounts with 6-32 screw. Tapped hole. 1 1/16" D x 3/32" Thk. Values of inductance in 2% increments are available from 5mh to 17.5h.

TYPE MIC TOROIDS

Meets MIL-27A, Grade 4, Class R. For almost any application requiring a high Q microminiature inductor. Essentially no external magnetic field and no capacitive coupling to nearby circuitry. Automatic machine insertion. Insulation

resistance is 10,000 megohms minimum at 100 v DC. 100 v RMS dielectric strength. Ambient temperature range is -55°C to +85°C. Inductance change with temperature is ±2% over-range of -20°C to ±85°C. AC and DC saturation—Ultra linear to high excitation levels.

Capacitors

TYPE AFH TWIST PRONG ELECTROLYTICS

Designed for filter audio bypass applications in radio-TV and amplifier equipment. Also used in many industrial applications. Manufactured to exceed requirements of EIA Spec. RS-154. 85°C

operation; high purity aluminum foil throughout; moisture resistance seal. For use over a wide temperature range with minimum change in capacitance. Positive lugs on bakelite base. Can common negative with twist for upright mounting on metal chassis. Bakelite metal mounting washers furnished. Shpg. wt., 4 oz.

Capacitors

TYPE CRE ULTRA MINIATURE ELECTROLYTICS

Ultra miniature tubular aluminum cased electrolytics with tinned copper leads. Ideal for use in by-pass, filters and coupling applications. Temp. range: -30°C to +85°C. All welded construction and high purity ingredients insure low leakage, long shelf life. Furnished with heat shrinkable mylar tubing. SIZE: Diameter x length.

Capacitors

TYPE K323Z METALLIZED POLYCARBONATE CAPACITORS

Hermetically sealed Polycarbonate film provides high capacitance stability, low dissipation factor, low dielectric absorption and high insulation resistance. Self-heals in the rare 100 VDCW

case of dielectric breakdown. Operating temperature: -65°C to +125°C of full rating. Standard tolerance is 20%. Other tolerances available on special order.

For Plastic Sleeve add suffix "P" and add .02 to unit price.

TYPE QE—COMPUTER GRADE ELECTROLYTICS

High reliability, long life, 65°C operating aluminum electrolyte capacitor for energy storage use. For computers, power supplies, industrial use in control and test equipment. Manufactured under controlled conditions with highest purity ingredients.

Hermetically sealed with pressure type safety vent. Low screw inserts and heat shrinkage mylar tubing keep overall size near to can size shown. Shipping weight 5-14 oz. depending on can size.

METALLIZED MYLAR "WRAP & FILL" CAPACITORS

Type V148Z. Light weight, high insulation resistance, long stable life. For use in printed assemblies and light weight portable and airborne equipment of all types. Can be mounted in banks

using a minimum amount of space. Self-healing and are of instrument quality. All leads are solder-coated copper-weld wire. Tolerance: ±10%.

TYPE PTT PEE-WEE ELECTROLYTIC

Miniature polycap electrolytic encased in polycap tubes with special Aerovox plastic end-fill which binds to the ceramic case. Operating temp. range is minus 30°C plus 65°C. Cap. at 25° is minus 10% plus 250%. *Sizes A: 1/4x3/8, B: 1/4x3/4, C: 1/4x7/8, D: 3/8x3/8, E: 3/8x3/4, F: 5/16x7/8, G: 3/8x1, H: 3/8x3/4, J: 3/8x7/8, K: 3/8x1, M: 3/8x1 1/4, N: 3/8x1 3/8, O: 3/8x1 1/2, P: 1/2x7/8.

TYPE V146XR AEROFILM "WRAP & FILL" MYLAR CAPACITORS

Aerovox V146XR capacitors offer high resistance to humidity and excellent stability with temperature where a metal case is not needed. Extremely small size makes these ideal for use in miniaturized circuits. Mylar wrapped, epoxy end filled.

Standard tolerance is $\pm 10\%$. Power factor will not exceed 1% at 25°C. Operating temperature range of -65°C to 85°C at full voltage rating and to 125°C with derating. Extended foil construction. Leads are solder-coated Copper-Weld wire.

Capacitors

High quality units in Polycap (Polyester Film) casing material which have high insulation resistance, low dielectric absorption and power factor. Relatively small capacitance change over 0° to 85°C.

V161 AEROFILM TUBULAR CAPS

Epoxy end fill will not flow, soften, or melt at any operating temperature. Tolerance $\pm 20\%$. Operating temp. -30° to $+100^\circ\text{C}$. Aver. shpg. wt., 2 oz.

P8292ZN METALLIZED-PAPER CAPACITORS

Impregnated metallized paper.
Modified plastic tubular type
Duramite end-sealed capacitors
in paper cases. Operating temp.
-30° C to +100° C.

TYPE P95ZN MICRO-MINIATURE METALLIZED PAPER CAPACITORS

Type P95ZN. Metallized paper miniature units offer small size, rugged construction and high reliability. Special construction offers strong lead connections and dipped resinous conformal coating provides good moisture barrier. Standard tolerance $\pm 20\%$. Operating temperature -55°C to +125°C.

CERAMIC CAPACITORS

Type MC91 and MC905.

These capacitors have greater volumetric efficiency and unique characteristics for inherent reliability. Units have a temperature range of -55° to +125°C. Capacitance change at 0 VDC is +10% and -15% at rated voltage +10%, and -30%. Maximum power factor is 2.5%. Gold dumet leads are standard.

CERAFIL CERAMIC CAPACITORS

Ultraminature ceramic capacitors. Meets MIL-C-11015C. Oper. temp. -55°C to +85°C or derate 50% to +125°C. Temp. Coeff. 100 volts applied +10 -35%. Power factor 2.5% max. Leads 1 1/2 inch min. tinned copper. Below .01 mid, .25 gauge, .01 and above .22 gauge. Tolerance: ±20%. 100 VDCV. 300 VDCT. Aver. Shpg. wt., 4 oz.

GENERAL PURPOSE BYPASS COUPLING DISKS

Type IDI. Industrial ceramic disk capacitors offering small physical size with high capacity. Used mainly for bypass coupling and filter applications.

Maximum protection against humidity, voltage breakdown, vibration. Rated at 500 WVDC, flash tested at 1500 VDC.

Ceramic Capacitors

INDUSTRIAL CERAMIC CAPACITORS Temperature Compensating Tubulars

Popular values in accordance with the latest revision of specification MIL-C-20 and EIA specification RS-198. Uninsulated units are furnished color code, packaged in bulk.

Insulated units are stamped with MIL part number, temperature coefficient capacity and tolerance. Voltage rated at 500 VDCW.

DISK CAPACITORS

Type DI. General purpose disk ceramic capacitors with 1000 WVDC. Tolerance: $\pm 10\%$. Ideal for by-pass, filtering, coupling applications. Sealed to prevent high voltage break down.

HIGH VOLTAGE DISK CAPACITORS

Type HVD. General purpose high voltage, Hi-Q disk ceramic capacitors for use in voltage supplies of television receiver, radio, Hi-h etc. Humidity proof and high voltage break down are basic characteristic. Tested under standards higher than normal usage.

1500 WVDC, $\pm 10\%$ tolerance—Type HVD-15

TYPE P09—AEROVOX HYVOX

Immersion-proof units in sturdy rectangular metal can. High voltage screw type pillar terminals fitted with soldering lugs. Intended for heavy-duty continuous service in transmitters, amplifiers, etc. Type MB bracket is supplied unless otherwise specified except on units with base sizes 3 3/8" x 3 3/8" and 3 3/8" x 4 9/16" where type MS bracket is supplied. MSB bracket is available for all sizes on request. Standard tolerance $\pm 20\%$ — 10% . Average weight 5 pounds.

TYPE P 30M BATHTUBS

High-quality bypass capacitors recommended for applications where high reliability and superior performance is required. Drawn metal cases, hermetically sealed with neoprene bakelite terminals. These units are Hyvol M impregnated for operation at temperatures from -55°C to $+25^{\circ}\text{C}$. Standard tolerances $\pm 20\%$ - 10% . Wt., 8 oz. Available on special order with terminals on top or bottom.

SPRAGUE

THE MARK OF RELIABILITY

TVA Atom Electrolytics

The only small size electrolytic especially designed for 85°C (185°F) operation on voltages to 450 working volts D.C. Unit is engineered to

withstand extra high temperature, high ripple currents, plus high surge voltages. Metal case construction with outer insulating tube. Wt., 3 oz.

Electrolytic Capacitors

SPRAGUE
THE MARK OF RELIABILITY

TVL TWIST-LOK ELECTROLYTICS

Withstands extremely high temperatures, ripple currents and surge voltages. Self-mounting, with twist-prong tabs that go through chassis or connect to washer for above-chassis mounting. For 85°C operation up to 450 Working Volts DC. Shpg. wt., 6 oz.

"TRANSI-LYTIC" CAPACITORS (31D)

Miniature low-cost capacitors for use in transistorized pocket and "personal portable" ra-

dios. Plastic case with thermo-setting resin end-seals results in excellent resistance to high humidity conditions. See case size table at top of page.

SPRAGUE

THE MARK OF RELIABILITY

Miniature Capacitors

SPRAGUE TYPE TE LITTL-LYTICS (30D)

Ultra-small electrolytic capacitors made for transistor circuitry and other sub-min. applications. Temp. Range: -20°C to +85°C. Ultra-low leakage current. Clear Plastic Sleeves.

TYPE 192P PACER FILMITE "E" CAPACITORS

Extended foil film section terminates in end active section. Controlled dimensions. Mv caps with wire leads assuring non-conductive use automatic insertion equipment.

80 VOLT PACERS TOLERANCE ±10%—TEMP. RANGE -55°C TO +85°C

HYPERCON CERAMIC DISCS

Ultra-miniature ceramic discs ideal for use in transistorized circuitry. Designed for bypass and coupling applications but particularly well-suited for any low voltage use where high capacitance and low power factor are important considerations. Superior to electrolytic capacitors of similar capacitance value because of the very low power factor of Hypercon Capacitors. Capacitance Tolerance: GMV.

MINIATURIZED DISC TYPES FOR TRANSISTORIZED CIRCUITRY

Tiny ceramic capacitors for by-pass and coupling application. Low self inductance and flat plate construction permits higher self-resonant frequency and high by-pass efficiency in all TV and transistorized circuitry. Good performance under severe conditions of humidity and vibration. TH dia. .335 to .905, TG dia. .275 to .655.

TYPE 155P-156P MOLDED METALLIZED PAPER CAPACITORS
Molded phenolic case metalized paper tubular capacitors offering excellent humidity resistance. At 85°C the minimum product of insulation resistance and capacitance is 40 megohm-microfarads. Will withstand 200% of rated voltage. Operating temperature range: -40°C to +85°C. Tolerance ±20%.

FORMULATION C-23 MONOLYTHIC CERAMIC CAPACITORS

Monolithic ceramic capacitors for transistorized circuitry. C-23 formulation insures high K—these units provide high capacitance in small physical size. Solid homogeneous blocks are protected against moisture and mechanical damage by a resin dip. Well suited for use in all frequency ranges through 1000 mc.

HYPASS SUPPRESSION CAPACITORS

Exclusive 3-terminal Network—Feed-thru capacitors assure very effective VHF current by-passing. Bypass VHF oscillation up to 150 MC. Suppress TVI from Short-Wave Transmitters, Diathermy Machines, Electronic Heating Apparatus, etc. Eliminate Interference caused by Line-conducted radiation between neighboring TV sets. Temperature operation: -40°C to +85°C. Currents up to 20 amps. *Have female screw terminals. †Bulkhead mounting.

Capacitors

BLACK BEAUTY CAPACITORS DIFILM (MYLAR PAPER) MOLDED (160P)

For high humidity and high temperature operation up to 105°C. From 220v. through 6000v. thru 12,500v. they will operate at 1600v. the units will operate at 105°C. (221°F) with no voltage derating. From 85°C. (185°F). Wt., 3 oz. Tolerance ±10%.

Unique dual dielectric rated for operation at 125°C without voltage derating. High insulation resistance—at 125°C, minimum product of insulation resistance and capacitance is 10 megohm-microfarads for 200 V units or 40 megohm-microfarads for 400

and 600 V units. Hermetically sealed, with glass to metal solder seal terminals. Tolerance: ±10%.

36D "POWERLYTIC" ALUMINUM ELECTROLYTICS

For applications requiring maximum capacitance in a given case size. Low ESR and leakage current; extremely long shelf life. Withstands military environmental conditions including -55°C storage tests. Tol. 3-50v, +75% to -10%; 75-450v, +50% to -10%. Av. shgp. wt., 4 oz. With plastic outer tube.

SIZES FOR 36D CAPACITORS

D. x L. Including plastic outer case	
AA, 1 1/8 x 2 3/16	CC, 2 1/8 x 4 1/16
AB, 1 1/8 x 3 3/16	CD, 2 1/8 x 4 1/16
AC, 1 1/8 x 4 3/16	DC, 3 1/8 x 4 3/16

TYPE 132D "CUP TYPE" TANTALEX CAPACITORS

Stable in performance characteristics over entire temperature range: -55°C to 85°C operation at full rating, 100°C operation with 15% derating. Extremely low leakage. Large capacitance in small physical size. -15, +20% tolerance. *Case sizes (D.x.L.): PP-2.18x1.54; RR-2.28x1.14; SS-3.75x4.64.

POWERLYTIC ALUMINUM ELECTROLYTICS

Type 39D. Type 39D capacitors supplement the original Type 36D Poterlytic by offering lower capacitance values in smaller cases with axial leads. The end seals are made of an approved molded phenolic, which is an important feature in establishing the long life of the Type 39D capacitors. These capacitors are designed for operation at temperatures up to 85°C. Type 39D capacitors have very low effective series resistance and leakage current.

CERAMIC CAPACITORS

Series 5 GA. Tiny, tough, dependable in every application. Low self-inductance of silvered flat-plate design means very high by-pass efficiency in all TV circuits. Designed for 85°C (185°F) continuous operation. Flat plate construction permits higher self-resonant frequency than tubular ceramic or molded mica capacitors. Tough moisture proof coating. Tol. ±20%. 1000 WVDC.

NEWARK Saves You Time and Money

Capacitors

SUBMINIATURE—TYPE 96P—VITAMIN Q

Inserted tab construction. Glass-to-metal hermetically sealed. Operates from -55°C to $+125^{\circ}\text{C}$. Terminals are insulated from metal case. Impregnated with vitamin Q. Tolerance of $\pm 10\%$. Meets "latest" MIL-C-25 specs. Section insulated from can.

MIL-C-25C CAPACITORS

Inserted tab construction. Positive hermetic seal assured by glass-to-metal solder-seal terminals. Vitamin Q impregnant. Will exceed latest Mil Specs. Temperature Range -55°C to $+125^{\circ}\text{C}$. Tolerance $\pm 10\%$. Bare metal case. Vibration grade 3 CP04. Mil C-25C capacitors.

Type 150D and CS13 Solid Tantalums

STANDARD SERIES 150D & MILITARY TYPE CS13

Type CS13. Hermetically sealed solid tantalum capacitors to Mil-C-26655 Revision 2D. Plastic insulating sleeves. Extremely low leakage current and stability with both temperature and time. Temperature range: -80°C to +85°C; +125°C with 1/2 voltage derating. Combines true miniaturization with characteristics previously unobtainable in electrolytic capacitors. Type 150D same as above except commercial series.

HIGH-VOLTAGE DOORKNOB CERAMICS

Capacitor body has female threads for interchangeable screw-in terminals. Molded in non-flammable, moisture-resistant, thermosetting plastic. Guard rings lengthen the surface creepage path.

Type 20DK-T5. Complete with 7 terminals. 1" dia. x 3/4".

Type 30DK-T5. Complete with 2 terminals. 1 1/16" dia. x 1 1/4".

J-135 "CERAMICENTER" CERAMIC ASSORTMENT KIT

- Handy metal drawers — Save Time and Effort

710 capacitors of 57 different values in handy reusable "Kleer-Pak" plastic boxes. Kit includes: 290 Type 5 GA, 1000 WVDC ceramic disc capacitors in 31 different values from 5 mm to 20,000 mmf; 145 Type 5HK "High K" bypass and coupling capacitors in 7 different values from .001 mfd. to .01 mfd. @ 1000 WVDC and .02 mfd. to .1 mfd. @ 500 WVDC; 100 Type 10 TS, 1000 WVDC temperature stable capacitors in 12 different values from 100 mmf to 20,000 mmf; and 175 Type TG, 50 WVDC disc capacitors in 7 different values from .005 to .1 mfd. Cabinet, 30 3/4" x 5 1/2" x 1 3/4". Ship. wt., 29 lbs. **172.50**

DEPEND ON NEWARK FOR THE LATEST TOP-QUALITY EQUIPMENT

TYPE 600D HIGH GRADE ALUMINUM ELECTROLYTICS — PLASTIC INSULATING SLEEVE

Offer combination of extended temperature range and high voltage rating. Dual rated, may be used for 85°C or 125°C operation. Withstands 2000-hour life test at either temperature, and corresponding working voltage. And vibration from 10 to 2000 cycles at 15 g. Features excellent capacitance stability, dissipation factor and

DC leakage current after high temperature shelf testing. Closely approximate electrical requirements of MIL-C-3965 tantalum foil capacitors, at about half the cost. Compact size, weighs only about one-third as much as equivalent tantalum types. Tolerance is -10%, +75%, up to 75 WVDC; -10%, +50% for 100 WVDC up. Sizes shown in chart are for bare can only; add 1/4" to dia. and 1/16" to length for insulating sleeve. Avg. shpg. wt., 3 oz.

TYPE DYR OIL FILLED BATHTUBS

Widely used in military, communications, and industrial electronic equipment. All types are drawn case "bathtub" configurations provided with integral drilled mounting flange. Available in F (-55°C to +85°C). All styles supplied with terminal style B, non-removable soldered lug. Single, dual and triple capacitance units available.

Cornell-Dubilier Capacitors **CDE**

DIPPED MICA DIELECTRIC CAPACITORS

Type CD10. Silvered mica capacitor with a plastic coating. Combines excellent stability, dielectric strength, "Q", dielectric constant, chemical inertness, moisture resistance and puncture resistance. Oper. temp. -50°C to 125°C. Tolerance $\pm 5\%$ except (**) 20% and (**) 10%. Aver. shpg. wt., 1 oz.

CM SERIES DIPPED MICA CAPACITORS

Multi-coated to meet rigid humidity requirements. Oper. temp.: -55°C to 125°C. Tolerance: $\pm 5\%$ except (**) $\pm 10\%$. Types listed below are old CD numbers as follows:

CD15.....CM05. CD19.....CM06.
CD30.....CM07. CD42.....CM08.

Cornell-Dubilier Capacitors

MINIATURE DIPPED MICA-DIELECTRIC CAPACITORS

Types CD6 and CD7 are micro-miniature, radial lead, dipped silvered mica capacitors. Operate within temperature range -55°C to +125°C. Excellent for applications not critical with regard to extreme conditions of humidity. Have phenolic coating with epoxy impregnation; affords protection for one cycle of the moisture resistance test of EIA Specification RS153. Meets MIL-C-5B. Capacitance tolerance: ±20% (M), ±10% (K), ±5% (J), ±2% (G). The last three figures of the type number indicate the DC working voltage.

DIMENSIONS

CD6 — .265" x .135" x .095" CD7 — .320" x .270" x .160"

"BLACK CAT" MOLDED TUBULAR CAPACITORS

Dual, dielectric, molded tubular capacitors made of DuPont Mylar and Kraft assuring high temperature operation, exceptional moisture resistance, and high reliability. CDE's "FIXFIL" impregnant (a solid thermosetting compound) and a rugged plastic case make these capacitors ideal for the most rugged usage. For operation at temperatures from -40°C to +125°C without derating. Tolerance: ±10%. Shpg. wt., 3 oz.

Cornell-Dubilier Capacitors

TYPE BBR AND BR "BLUE BEAVER" ELECTROLYTIC CAPACITORS

Compact aluminum cased, cardboard insulated DC electrolytics. Type BR section tabs and leads are riveted. Type BBR negative lead is riveted and positive lead is solidly crimped to an aluminum stud. Voltage ratings up to and including 150 volts feature etched cathodes. Operating temperature range is -20C to +85C up to 450 volts and to +65C for higher voltage.

WIDE-RANGE ELECTROLYTIC TYPE ESS7515

Type ESS wide range printed circuit electrolytic is an exact replacement for eight original standard electrolytics used in home receivers. A replacement for units of 150 V; 50-30 mfd.; 70-30 mfd.; 75-30 mfd.; 80-40 mfd.; 80-50 mfd.; 70-50 mfd.; 80-50 mfd. A good replacement for many single and dual units within the ratings indicated. Size: 1" D. x 2 1/2" L.

Cornell-Dubilier Capacitors

NLW ELECTROLYTIC CAPACITORS

Type NLW. Rugged physical construction. Hermetically sealed aluminum foil electrolytic capacitors. Low leakage currents; freedom from shorts. Long shelf and operating life. Suitable for printed circuits. Tinned copper leads with plastic sleeves. Temperature range, -40°C to +85°. Tol. -10% to +150%.

TUBULAR ELECTROLYTIC ASSEMBLY KIT

Assortment of tubular electrolytics widely used in entertainment repair. Single and dual sections—plus one wide-range printed circuit unit for 8 standard 150V capacitors and covers a multitude of service replacements. Types are: BBR, BR, BBRD, and ESS.

COMPUTER GRADE HIGH CAPACITANCE TYPE FAH

Designed for use in computer power supplies and other applications where banks of high capacitance filters are required. Low leakage current, minimum ESR, high 120cps ripple currents, molded terminal block with safety vent seal, provided with screw terminals, plastic insulating sleeve. Dual rated as shown, minimum operating temperature 20°C.

MYLAR DIELECTRIC FILM ENCASED

Type WMF. Ultra compact Mylar dielectric tubular capacitor encased in a thin, tough Mylar film wrapping and end sealed with a high density thermosetting plastic. A most desirable unit where a metal case unit

is not indicated. Extremely small in size, has high resistance to humidity and excellent capacitance stability with temp. and life. Temperature range: -55°C to +125°C. Tolerance: 10%.

Cornell-Dubilier Capacitors

DPMS DIELECTRIC SIDE-LEAD TUBULARS CAPACITORS

Type DPMS has two dielectrics—Mylar Polyester Film and a film of high grade paper. Features a "dipped" rock-hard casing which holds wire leads rigidly at fixed spacings. High humidity resistance. Crimped side leads for uniform mounting. -55°C to +125°C. Derate working voltage 25% for +125°C operation.

200 VDCW ± 10% Tol.

TYPE MFP SPACE-SAVER FLAT-OVAL POLYESTER FILM CAPACITORS

Type MFP is similar in construction to the type WMF. It is designated however, with a flat, pressed section to give an oval configuration that finds widespread use in many applications requiring the space saving characteristics of this form factor. In ratings of 0.01 mfd. and above, the MFP is frequently used as an alternative to the type WMF of the military grade type CTM. The WFP and epoxy end seals bonded to the wrapper end leads. The unit is highly moisture and humidity resistant. Maximum operating temperature range is -55° to 125° C—85°C at full rated voltage with deratings of 10% and 50% at 100°C and 125°C respectively. Standard tolerance is ±20%. 1/2" minimum copperweld leads. Thickness and width (W) tolerances are: up to and incl. .484", ±.032"; .500" to and incl. 1.000", ±.062"; larger than 1.000", ±.093".

MINIATURE RADIAL-LEAD POLYESTER FILM CAPACITORS

A flat space saving configuration, excellent for ultracompact assemblies. MYLAR dielectric. Dipping process assures high moisture and humidity resistance. Epoxy impregnated casting. Fix-til-impregnated capacitor section—no impregnation leakage even at maximum operating temperatures. Uniform dip coating control assures protection of capacitor section—no possibility of shorts caused by contact of an uncoated case to chassis. Max. operating temperature is 125°C-85°C at full rated voltage. 10% derated at 100°C and 50% derated at 125°C. Leads are #22 AWG including 0.068/100V; 0.047/200V; 0.022/400V, and 0.068 at 600V. Above these ratings, leads are #20 AWG. Tol. ±20% or ±10%. Wire lead spacing: 9/16" for 3/4" dim. L and 3/16" for 1/8" dim. L.

Electrolytic Capacitors

WIDE APPLICATION RANGE TWIST-PRONG ELECTROLYTIC CAPACITORS

Wide application range Twist-Prongs provide proper replacement for any electrolytic marked with a capacitance within range on wide application label. Proper replacement instantly available. Highest purity materials.

Tolerance from nominal rated capacitance:

Rated DC Voltage	Capacitance Tolerance
3-50 volts, inclusive	-10% to +150%
51-350 volts, inclusive	-10% to +100%
351-450 volts, inclusive	-10% to +50%

Capacitors

CORNELL-DUBILIER

CERAMIC CAPACITORS

Models CK05 and CK06. Ultra-miniature rectangular case ceramic capacitors which meet the requirements of MIL-C-11015. They are rated at 200V DCW over the entire operating temperature range which ranges from -55C to +150C. The capacitors may be described as high reliability packaged in small sizes. The tempera-

ture characteristic is MIL CW specified as maximum capacitance change of -2%, or +56% when the temperature cycled is per MIL-C-11015. Units are stocked and are available in the latest revision of MIL-C-11015 with a tolerance of ±10%. These tiny capacitors come in a premolded case. Size: CK05, .2x.2x.1. CK06, .3x.3x.1.

PLASTIC CAPACITORS, INC.

TYPE AM METAL CLAD MINIATURE CAPACITORS

Type AM metal clad miniature capacitors utilize metallized mylar film as the solid dielectric and are hermetically sealed. High performance exceeding the most rigid tests for humidity and temperature. Windings are extended foil (non-inductive) construction. The capacitors are self healing and non-sparking. Tolerance is 20%. Sizes shown are for diameter and length. Power factor is less than 1% at 25°C.

TYPE "OF" HIGH V. GLASS CAPACITORS

Plastic film dielectric. Useful for high voltage power filter. Mount in any position. Temperature range -55°C. to +85°C. Tolerance ±10%. 1/8x8-32 screw terminals except * marked have tinned copper pigtails. Heavy wall, hard glass case.

Capacitors

WSR GLASS ENCASED MONOBLOC CAPACITORS

These capacitors are hermetically sealed in glass and have a

wide range of capacitance values, characteristics, and sizes; combine inherent stability with monolithic structure. They enjoy long life and are available to established Reliability, standard Military, and Commercial specifications. Type 8005: 290 Length. Type 8025: 390 length. Lead length 1.50 min. 24 AWG tinned copper leads.

GENERAL PURPOSE TYPE 8005-000 — 100 DCWV, WSR CHAR., 10% TOL.

SUBMINIATURE MOLDED CAPACITORS — STYLE 390

Meets Military specifications MIL-C-11015 with a capacitance range up to 330 pt ±10%, 20%; 390-580 pt ±20%+100-0% (GMV); 820 and above +100-0% (GMV). Working voltage of 100 volts DC. at 85° C or 50 volts at 125° C. Constructed of

high quality molded plastic to assure resist ance against moisture and humidity. Dia.: .095, L: .250, Lead L.: 1.25 min. #22 AWG (.025) tinned copper leads.

Capacitors

SUBMINIATURE MONOBLOC CERAMIC CAPACITORS

Monobloc construction allows volumetric efficiency up to 20ml/cu. in. Tolerance within $\pm 10\%$ for capacitance from 10 pf to 100 pf when measured at 1mc with .5 to 1 VRMS across the capacitor including COG dielectric. For values greater than 100pf tol-

erance is within $\pm 10\%$ —when measured at 1kc with .5 to 1 VRMS across the capacitor. Maximum capacitance change $\pm 15\%$ of the 25°C value over the temperature range -55°C to 125°C .

Ceramicon

WEECON CERAMIC CAPACITORS

The square shape saves space. Made from same materials and with same manufacturing techniques as Erie's tubular and disc capacitors, used

and proven by years of testing. Flash test: 100% tested @ 3 x DCWV. Capacitors listed are 10% tol., except (*) ±5 pf. (**) ±.25 pf, (†) ±5%, (‡) ±20%.

MIL-C-11015B DISC CERAMICS

MIL-C-1105C capacitors meet requirements for TV, industrial electronics and military equipment at 85°C. All .156" thick. Style 831: .290 disc. dia., .250 lead spacing. Style 801: .360 disc. dia., .250 lead spacing. Style 811: .359 disc. dia., .357 lead spacing. Style 841: .675 disc. dia., .375 lead spacing. 600 VDC. 1500 VDC Flash Test. Shpg. Wt., 1 oz.

GENERAL PURPOSE CERAMICONS—

Capacitors

TYPE NPO CERAMICONS

Tubular capacitors. For frequency determining applications. Frequently used as temp. compensating elements in circuits which must be temp. stabilized. Type 301, .4" l. x .2" d. Type 315, .562" l. x .250" d. Type 316, .812" l. x .250" d. Wt. 1 oz.

± .25 PF TOL.

TYPE N750 TUBULAR CERAMICONS

Have negative temperature coefficient of 750×10^6 mml/°C. Tolerance at working voltage 600 volts D.C. is ±5%.

MIL C-20-D TUBULARS

Ideally suited for applications where temperature coefficient is not important, such as nonfrequency determining circuits. These

ceramicons meet performance specifications of EIA Standard RS109 for class 1; temp. comp. class 2 HI-K.

100V TRANSISTOR CAPACITORS

Ultra miniature. Capacitance Tolerance 80% to 20%. Style 835, 805, & 855 have a thickness of .125 and lead spacing of .250. Style 845 has a thickness of .125 and lead spacing of .375. Style *815 and *845 have a thickness of .172 and lead spacing of .375 with a duel Ceramicon. Shpg. wt., 1 oz.

25-VOLT TRANSCAPS

Thin-film ceramic capacitor combines high capacitance with small size. +80%, -20% capacitance tolerance.

CERAMIC TRIMMERS

Provide maximum stability and ease of adjustment. Capacity change constant per degree of rotation. Silver electrodes are fired onto ceramic rotor and base. Dust-proof. Stellite base, 500 wkg. volts DC. .843" x .656". 1 oz. (*Indicates bent leads.)

MINIATURE CERAMIC TRIMMER

insures inherent reliability. Heart of the 539 is optically smooth bearing surface which exists between

MINIATURE CERAMIC DISC TRIMMERS

Stable under the most exacting conditions. The top of the base and the underside of the titanium dioxide rotor are lapped optically flat, eliminating air space variation with temperature changes. Capacity is changed by varying the amount of the overlap. Capacitance change per degree of rotation is approximately constant. .300" high x .375" wide in the body.

(Following trimmers mfg'd. to app. req. of MIL-C-81)

PLASTIC TRIMMERS

Ideal for applications calling for a low minimum capacity and a high ratio of maximum to minimum capacity. Types 532 and 535 have molded plastic dielectrics with a minimum of leakage.

Stk. No.	Type	Mfm. Range	1-49	50-99	100-249	250-499	500-999
19F2969	532-000-8R	1-8	.33	.28	.22	.14	.125
19F2970	532-001-3R	0.5-5	.42	.35	.281	.164	.146
19F3031	535-000-4R	0.7-3	.42	.35	.281	.164	.146

CERAMIC TRIMMERS — PHENOLIC BASE — TYPE 557

Excellent stability and high maximum to minimum capacitance ratio. The basic 557 type with its many variations features a .500" dia. ceramic rotor, lapped and silvered on the underside, and a silvered ceramic dielectric stator disc with lapped

bearing surface. Temperature coefficient and nominal capacitance range are stamped on the rotor. Maximum capacitance is indicated when arrow molded into rotor points toward the stator terminal. Exclusive ERIE design.

GLASS TRIMMER CAPACITOR — EXTERNAL SPLIT BUSHING

For applications allowing extension of the adjustment screw. Suited for high volume, economic usage in electronic equipment. Linear, non-reversing capacitance change with rotation. Maintains proper screw torque under varying conditions of vibration and shock. Insul. Res: 10¹³ ohms mm. at 25°C. Op. Temp.: -55°C to 125°C.

BROAD BAND EMI FILTERS

Miniature filter for low voltage circuits. High capacitor with a ferrite enclosed lead provides an L section filter. Non-polar for use in either low voltage DC or AC

lines. Four mtg. arrangements. Temp. mg.: -55°C. Working volt. 50VDC at 105°C, 28 VDC at 125°C. Dielectric strength: 110VDC at 25°C. (50 ma. max. charging current.) Meets applicable requirements of MIL-F-15733.

1201

Specifications for 1201 & 1202 are: Capacitance, 1000 mmf. at 1 KC., .5 to 5 VRMS, 25°C, working voltage: 200VDC, operating temperature range: -55°C to +125°C. DC resistance 0.01 ohms max. DC and low frequency current 5 amperes max. RF current 0.25 amperes max.

Type 1201 is a bushing type. Lockwashers and hexnuts supplied. L. .812x250 Dia.

Type 1202. Same as Type 1201 but size is .999 L.x.375 Dia. Hex nuts and lockwashers are supplied.

Specifications for 1203 & 1204 are: Minimum attenuation 50db from 100 MC to 2000MC over a temperature range of -55°C to +125°C. Capacitance: 2000 mmf. min. at 1 KC., .5 to 5VRMS, 25°C. Working voltage: 500VDC. DC resistance: 0.10 ohms max. DC and low frequency current: 5 amps. max. RF current: 0.25 amperes max.

Type 1203 is a miniaturized eyelet type Size: Overall L. .718x.218 Dia

Type 1204 is an eyelet type similar to type 1202. But size is 1.187 L.x.328 Dia.

SUBMINIATURE EMI FILTER

Featured improved volumetric efficiency. Long-lasting and easy to mount. Supplied with lock washer and hex nut as standard. Min. Attenuation per Mil.-Std. 220A; 50 db from 200 MC to 2000 MC over range from -55°C to 125°C. Working Voltage: 100VDC.

Stk. No.

Filters and Capacitors

MINIATURE R.F.I. FILTERS—MINIATURE 6 & 12 CHANNEL R.F.I. FILTERS

Minimum attenuation: 45 db from 100-200 Mc, 50 db from 200 Mc to 2000 Mc, over the temp. range of -55°C to $+125^{\circ}\text{C}$ measured in accordance with Mil-Std.-220A. Capacitance: 2500 pf min. at 1 Kc, 0.5 to 5 Vrms, 25°C . Working voltage: 350 VDC. Insulation resistance: 20K megohms min. at 100 VDC, 25°C (50 ma max. charging current). D.C. resistance: .01 ohms per section. D.C. and Low Frequency current: 5 amps max. per section.

New button mica capacitors exceed requirements of MIL-C-10950 for life test and temperature cycling at 200°C . All-welded hermetic glass seal plus gold-plated exterior metal provides extremely high resistance to moisture. All have a capacitance tolerance of $\pm 10\%$. All are MIL-C-10950 designation.

FP AND WP CAPACITORS

Vertical mounting dry electrolytics for all filter and audio by-pass circuits, and TV applications. All types include deep etched anodes and etched cathodes. All hermetically sealed in aluminum cases. Can be negative; separate positive terminals provided for each section. With mounting washers. Shipping weight, 6 oz.

HARDWARE FOR MALLORY CAPACITORS

For FP or WP types, use MP, BP, PS and MW-100 units; for all upright tubulars, use VR brackets or TH Spring clips. BP-4A is for mounting 1" FP's in chassis punches for 1 3/8" water. *Metal. †Phenolic. Average weight, 3 ounces.

Tantalum Capacitors MALLORY

MALLORY SERIES MTP

Available in 43 sizes with a capacitance greater than other conventional wet or solid foil capacitor. Oper. temp. —55 to 85°C Tol. ±20%. Size: A, .115D x .400L; B, .145D x .590L; C, .225D x .775L; D, .115D x .312L.

TANTALUM CAPACITORS

Type TAP. Tantalum Capacitors possess extremely long operational life, double seal construction, and excellent low temperature characteristics. Operating temp. —55° to +85°C. DC leakage is less than 1 microamp after 10 min. of rated voltage. Tol., —15% to +75%. Terminals: Axial leads 1½" long, tinned for easy soldering. Sizes: *, .238"L x .500"Dia.; †, .238"L x .660"Dia. Type TNT Subminiature Tantalum Capacitors have the largest capacity per unit volume available. Usable in both military and commercial aircraft control and communications. Also for hearing aids, printed circuits, etc. Operat. temp. —55°C to +85°C. Double case silver cases withstands 40 hr. salt spray test. Leads withstand 5 sec., 3 lb. axial pull. Sizes: ** 500"L x .165"Dia. †† .350"L x .165"Dia. Tol. —15% to +75%. Wt., 2 oz.

MINIATURE TYPE TANTALUM CAPACITORS

Miniaturized versions of XT units. Outstanding in both military and commercial uses! Extra rugged. Operative —55°C to +175°C. Excellent low-temp. characteristics. "Axial lead construction" of solderable heavy wire bonded to term. stops lead connection breakage. High voltages in single small case avoid interconnecting separate units. Double sealed corrosion-resistant case. True metal-to-glass hermetic seal. Long shelf and operating life. 0.65" diam. Aver. Shpg. Wt., 2 oz.

MALLORY Capacitors

SOLID TANTALUM—MIL-C-26655B-CS13

New solid electrolytic tantalum capacitors made to meet or exceed MIL-C-26655A and MIL-C-26655B requirements. Provide stable operation over a very wide temperature range. Made especially for use in computers, printed circuits, battery powered equipment, etc. Have metal case

hermetically sealed. With mylar sleeve. Tolerances on all capacitors. $\pm 10\%$. WVDC for CS13 type are at $+65^\circ\text{C}$. WVDC for TAS type are at $+85^\circ\text{C}$. Operating range of all capacitor types is -80°C . to $+125^\circ\text{C}$.

COMPUTER GRADE ELECTROLYTIC CAPACITORS

• Pressure sensitive safety vent construction. Computer grade capacitors; may be operated -40°C to $+85^\circ\text{C}$. Max. DC leakage current is .0-v square root of CV, where C=measured capacity, V=rated DC voltage. Dissipation factor = ESR/Xc. Tolerance: -10 , $+75\%$ for 0-150 volt units; -10 , $+50\%$ for 151-450 volt

• May be operated -20° to $+85^\circ\text{C}$. units. Supplied with Mylar insulating sleeve and $\frac{1}{32}$ " long post terminals with #10-32 screws. Sizes do not include terminals or sleeve; Lug terminals, special capacitances, working voltages, and sizes available on special order.

HC CAPACITORS

Plastic case electrolytics for high-capacity, low-voltage applications such as dry disc rectifier filters, movie equipment, etc. All are polarized. Two screw terminals. 10 oz.

Capacitors

MALLORY PVC MYLAR CAPACITORS

Constructed of aluminum foil and 100% DuPont Mylar. Has radial leads for adaptability to printed circuit applications. Encapsulated in moisture-proof, flexible polyvinyl chloride allowing leads to be bent

in any manner to accommodate mounting without danger of cracking. Unaffected by soldering iron heat. Can be operated at 105°C and at two times rated voltage with no performance derating. Exceptionally low capacitance drift characteristics. Temp. range: -40°C to +105°C. Tolerance ±10%. Shpg. wt., 2 oz.

GULTON "GLENCO" MINIATURE CERAMIC CAPACITORS

MIL-C-11015 TYPE CK05 & CK06
Ceramic capacitors exceeding all military MIL-Type CK05 & CK06 requirements. -55° to 150°C without derating. Power factor less than 2.5% at 1 KC. Insulation resistance at 25°C greater than 100,000 megohms. Capacitance tolerance: ±10%. Leads #22 AWG tinned copper. Molded plastic case.

Capacitors CORNING

MIL-C-11272B CYFM GLASS CAPACITORS

Completely frozen in glass with a true glass to metal seal at the 106A) conditions for over 1200 hrs. Immersed in boiling salt water for 450 hrs. and saturated in steam at 15 lbs. gage press, for 150 hrs. without altering

their performance. Highly resistant to nuclear radiation. Exposures to radiation levels of 10^{18} NVT result in no significant changes in properties. VDCW is 300v & 500v from -55° to $+125^{\circ}$ C. Std. Tol. is $\pm 5\%$ or $-0.25\mu\text{uf}$ whichever is greater.

TYO CAPACITORS

For printed circuit or point to point wiring. Permits upright or flush mounting on circuit boards. Has $1\frac{1}{4}$ " gold-plated Dumet leads. Proven glass dielectric and foil are fused together to form single monolithic capacitive element to achieve unexcelled electrical and dimensional stability. These capacitors meet the

environmental and electrical requirements of MIL-C-11272B. Range: at 25° C IR is greater than 100,000 megohms. Voltage rating is 300 WVDC from -55° C to $+125^{\circ}$ C.

JFD Trimmers

JFD precision bore solid dielectric Piston Trimmer Capacitors with special anti corrosion metalizing. Meets or exceeds MIL-C-14409B. Glass operate from -55°C to +125°C; quartz, -55°C to +150°C with no derating. Standard, miniature and subminiature sizes for panel mtg. and prt. ct. mtg.

Features: Six patented precision antibacklash drive mechanisms: Hi-Life, Standard panel mount, MCD, Miniature Telescoping, sliding piston and direct traverse. Five dielectric materials and matched metalizing for homogeneous bond of metalizing to dielectric. Low T.C., low loss and inductance. All

have highest level shock and vibration resistance. Highest reliability is assured through industry's most exacting quality control program.

Green Glass "N" prefix units with higher Q increase delta C's 50% over other comparable sized units. Low cost "Y" suffix units combine Hi-Life adjustment mechanism with standard glass dielectric are physically interchangeable with corresponding standard units.

JFD Trimmers have been exclusively selected for the Apollo, Gemini, Minuteman and L.E.M. Programs among a multitude of others.

PANEL MOUNT MINIATURE TANK CIRCUITS

Precision miniature piston capacitor across an air core coil. Patented telescopic tuning for more space economy and faster assembly. Low temperature coefficient, low loss and inductance due to superior construction. High levels of shock and vibration resistance. Size $\frac{9}{16} \times \frac{1}{2} \times \frac{1}{4}$ " with 10-32 x $\frac{1}{4}$ " bushing.

MINIATURE SERIES

JFD Miniature Trimmer Series features exclusive telescoping tuning assembly for miniaturization. Up to 50% savings in length for a given capacitance range. Mechanical stops at both ends of adjustment. Available in glass dielectric and electrically

superior quartz dielectric. $\frac{3}{16}$ " Dia. VC are glass dielectric, MQ are same physical dimensions with quartz dielectric. (*) Panel mount types. (**) Panel mount quartz; (†) Printed ckt. quartz; (‡) Printed ckt. board. PC No.'s available from Newark.

PIN-TRIM SERIES

Features sub-miniature design with very high sensitivity. It delivers more capacitance per cubic inch than any other conventional variable piston capacitor plus the advantages of premium reliability and unique adaptability. Special adjustment features 102 turns per inch. Ultra linear tuning assures absolute repeatability. Low inductance for high frequency use with Q factor of 500. In stand-

ard glass (PT) and Green Glass (NPT). A sub-miniature $\frac{1}{8}$ inch diameter unit offering ultra sensitive tuning. Panel Mount types have 3-48 mounting bushings. NPT panel types have 4-48 bushings. Operating temperature -55° to +125°C. Working volts, 500 volts DC. Insulation resistance 10 megohms. Meets MIL-C-14409A Specs. Shpg. wt., 5 oz.

FIXED METALLIZED INDUCTORS

Precision metallized miniature inductors feature large space economy, fast assembly and reduced weight. The inductor employs a silver film bonded to the glass dielectric. This construction results in a low temperature coefficient of inductance and low distributed capacitance. All leads are made of silver plated copper. High Q over a broad frequency range. All inductors are available in panel or printed circuit types. Temperature: -55°C to +125°C (*)—Q measured at 75.0 MC. (**)—Q measured at 25 MC.

TYPE SC SEALCAPS

Designed to meet military specs. for missiles, communications, telemetry and test equipment. JFD trimmer, capacitors meet or exceed applicable requirements of spec. MIL-C-14409. Compact-

Ideal for space applications. SC-SCY (glass) QS-NQS (quartz) NSC (0483 Green Glass) miniature (SC, QS) or new Hi-Life design (NSC, NQS, SCY) in (†) panel mount or (*) printed circuit versions. Hi-Life adjustment mechanism has exclusive anti-backlash features and a 500 cycle adjustment life, exceeding Mil-C-

ness. Tuning Sensitivity—multi-turn adjustment. Tuning Linearity—no reversals. Stability.

14409B by 600%.
"Y" series SC interchangeable with SC series with the added feature (Hi-Life mechanism).
NSC has approximately 50% greater delta C than SC series, superior Q and long life adjustment mechanism.

MAX-C SEALED CAP CAPACITORS—MIL-C 14409B

Max-C embedded electrode technique gives three times more capacity than standard metalizing in standard glass. Sealed cap construction for (*) Panel Mount or (†) Printed Circuit types † is available in three series: MC, "Y" series and NMC.

NOTE: The above capacitance ranges are also available in Super Max-C design: MCD and NMCD types. MCD drive mechanism with 10,000 cycle adjustment life is a precision, direct traverse mechanism wherein the screw rotates, re-

"Y" series reduces Max-C, has added advantage of Hi-Life mechanism. "N" series has approximately 30% greater Δ C and Hi-Life mechanism.

maining in a fixed position throughout adjustment range. MCD and NMCD670 series with extended shaft are ideally suited for knob tuning. Same electrical characteristics as above.

STANDARD PANEL MOUNT SERIES

JFD Precision capacitor for all panel mounting purposes. Available in glass, quartz and new green glass "N" prefin with new improved long life adjustment. VC99 is designed for high voltage and power RF applications. Has closed end to prevent

arcing at high altitudes. Rated at 2500 WV, DC. Test 5 KVDS. All units 1/4"—Quartz 5/16" Dia. by approximately 2" long. *Standard panel mount. †Standard panel mt. quartz.

LOW COST DIRECT TRAVERSE TRIMMERS

Direct Traverse Trimmers by JFD are designed for use in high quality commercial or instrument applications and communications equipment. Uses direct traverse mechanism with expanding self-aligning spring-clip piston. Also features standard panel

Capacitors ARCO - ELMENCO

DUR-MICA CAPACITORS

The Dur-Mica is a silvered mica capacitor with a plastic coating. It combines excellence in stability, dielectric strength, "Q", dielectric constant, chemical inertness, moisture resistance and puncture resistance. Operating temperature range -55°C to 150°C. Standard tolerance ±5% except (*) Min. tolerance ±1.0 Pf and (**) Min. tolerance ±0.5.

Shpg. wt., 1 oz. except DM-10, 1/2 ounce.

All ELMENCO dipped mica capacitors meet or exceed requirements set forth in MIL-C-5C specifications. Portions of the ELMENCO DM series are the specific values and case sizes tabulated in the MIL-C-5/18 detail specification.

ARCO - ELMENCO Capacitors

TYPE CM-15 MINIATURE SILVER MICAS

Smallest molded silver micas made. In low-loss phenolic cases, $\frac{1}{2}$ by $\frac{1}{2}$ by $\frac{3}{16}$ in. Standard tolerance $\pm 5\%$; tolerances of $\pm 2\%$

and $\pm 1\%$ available on special order. All are 500 volts DC working. *Closest tolerance ± 5 mmf. Wt., 1 oz.

MOLDED SILVERED MICA CAPACITORS

Manufactured in accordance with MIL-C-5 specifications and EIA Specification RS-153. Color coded in accordance

with MIL-C-5. Temp. Range: -55°C to 85°C . Vibration frequency: 10 to 2000 cps. $\pm 5\%$ tolerance.

SILVERED TYPE CM19 & CM20 500 VDCW 25/32x7/16x7/32 in.

TYPE 30 MICA PADDERS

Made of the finest quality clear India ruby mica. Phosphor bronze adjusting plates assure permanent resilience and freedom from mechanical fatigue. All parts are heavily plated; mica film completely enclosed. Rated 500 volts DC flash. 250 WVDC. Size $\frac{7}{8} \times 1\frac{1}{8}$ in. Shpg. wt., 3 oz.

ARCO DUR-MICA KITS

Individual clear plastic boxes, labeled for easy handling. Type CM-15. Kit # 1. Contains one each of 46 capacitors. Values: 1 mmf.—510 mmf. Shpg. wt. $\frac{1}{4}$ lbs. **14F830. NET 45.00**
Type DM-15. Kit # 10. Five each of 51 capacitors. Values: 1 mmf.—820 mmf. Tol. $\pm 5\%$. Shpg. wt., $\frac{1}{2}$ lbs. **14F840. NET 57.00**

DP TUBULARS

DP Tubulars are Mylar paper dielectric non-inductively wound and vacuum dipped to obtain solid impregnation and rugged moisture-resistant coat. Leads are radial and crimped to facilitate use in printed circuits. Will operate at 125°C at full rated voltage. Leads are tinned copper #20 gauge and are 1 1/2" min. below the crimp. Standard tolerance is ±10%.

Disc Capacitors

TYPE UK ULTRA-KAPS

For transistor circuit applications, ideal for any low voltage use requiring extremely high capacities and low power factors. TOL: (GMV) Guaranteed Minimum Value Rated: 3 VDC Working.

TYPE DF FLAT PLATE HI-KAPS
Ideal for use in bypass or filter applications. New extremely thin design has high capacity and low mass weight. Uses new Centralab ceramic for stability and permanence. No. 20 tinned wire leads. 600 VDCW, 1200 VDC test. Size: $1\frac{1}{2} \times 1 \times \frac{1}{2}$ " except * $1\frac{3}{4}$ ". Shpg. wt., 3 oz.

19F364	DF-104*	.1	+80-20%	1.23	1.05	.83	.525	.394

Primarily intended for by-pass coupling or filter service where high capacity is necessary and controlled stability is secondary. Disc ceramic capacitors have a higher dielectric constant, greater voltages, and higher capacities in less space than paper or mica types. Construction enables these units to operate for long periods of time under extreme moisture, temperature, and vibration. 1000 volts DC working except #, which are 600 volts DC working. Tol. $\pm 10\%$ except #, $\pm 20\%$, ± 5 mmf, \pm GMV; ** $-80-20\%$ (A) $\frac{1}{4} \times \frac{1}{2}$ "; (B) $\frac{3}{8} \times \frac{3}{8}$ "; (C) $9\frac{1}{2} \times \frac{3}{8}$ "; (D) $1\frac{1}{2} \times \frac{3}{8}$ "; (E) $\frac{3}{4} \times \frac{3}{8}$ "; (F) $\frac{7}{8} \times \frac{3}{8}$ "; (G) $2\frac{3}{8} \times 1\frac{1}{4}$ ".

NEW CERAMIC CAPACITOR KIT

MODEL DDK-200 KIT. Contains a carefully balanced inventory of 200 disc capacitors required most in replacement applications. All are 1000 WVDC except (*) 600 WVDC. Value desired can easily be located and removed from labeled, reusable clear plastic packages. Housed in one drawer, heavy gauge steel 6x4x1" cabinet finished with durable blue enamel.

3000-6000 V HI-VO DISC CAPACITORS

Highly efficient for by-pass-coupling in high frequency circuits under conditions of extreme humidity or temperature. Maintain performance at temperatures up to 85° C. Tested at twice rated working voltage before shipment. Leads #22 tinned copper wire 1½" min. length. Insul.: Double coating phenolic resin "DUREZ"

and high temp. vacuum wax impregnation. Tol. ±20%. Volt. DD30 series, 3000 VDCW, 6000 VDC test; DD60 series, 6000 VDCW, 12,000 test. Sizes: (A) .290" dia.; (R) .385" dia.; (C) .590" dia.; (D) .690" dia.; (E) .840" dia.; (F) .969" dia.; (G) 1.0" dia.

Model CPK-150 Kit. Contains 150 sealed polystyrene foil capacitors, rated at 500VDCW and with a ±5% tolerance. Included are 17 selected values in a range from 22 pF to 10,000 pF. There are 5 to 20 pieces per value, based on estimated frequency of use. The polystyrene film dielectric of these units permits use in place of mica, Mylar, paper, and ceramic capacitors. They not only substitute for the above types of capacitors but generally outperform them. Capacitance drift: 0.3% or less

POLYSTYRENE CAPACITOR KIT

after temperature cycling of +25, -25, +70, and +25°C. Insulation resistance is 5,000 Meg. /mf or 500,000 Meg., whichever is lower at 100 VDC, +25°C., 80% R.H. "Q" factor is over 2,000 at 1 mc, +25°C., and operating temp. range is from -10°C., to +70°C.

The assortment in this kit is packaged in a 1-drawer Equipito cabinet finished in blue baked enamel. Contents are fully labeled. **18F2404. NET 25.55**

Capacitors

TYPE CK—50 VDC

Type CK capacitors are designed for high capacity low voltage demands of transistor circuitry. Proven for use in transistor radios. Working voltage: 50 VDC. Leakage resistance initial: over 7500 megohms. Leakage resistance after humidity: over 1000 megohms. Leads: #22

tinned copper, 1 1/2" minimum length. Max. thickness .235". Power factor: 2% max. at 1 KC. Insulation: Phenolic vacuum wax impregnated. Tolerance: all +80 -20%. Max. capacity change: +25°C to +45°C = ±30%.

NEWARK STOCKS THE WORLD'S MOST COMPLETE INVENTORY OF INDUSTRIAL ELECTRONICS EQUIPMENT

NEW PACKAGED TRANSISTOR AMPLIFIER

Type TA-12-B. Ultra-miniature, high-gain audio amplifier is a perfect example of component density, having over half a million components per cubic foot. The TA-12-B four-stage amplifier features patented layered construction techniques. Base Plate: Grade L-5A low loss stearite as per JAN-1-10. Non-hygroscopic, it is unaffected by heat, humidity, vibration, or common acid. Transistors: Employing high gain, low noise hermetically sealed miniaturized transistors. Gain: 73 db. min. at 1-KC. Input impedance: 2,500 ohms nominal. Signal to noise

ratio: Maximum noise 30db. below signal for signal input of 25 micro-volt at 1-KC. Input shorted to ground for no signal noise. Power output: Up to .5 mw. Volume control: 25,000 ohms. Frequency characteristics: ± 5 db. from 300 to 20,000 CPS. Leads: A.W.G. No. 28 gauge wire, min. length $1\frac{1}{2}$ ".

TYPE 200 "BROWN DEVIL" RESISTORS

High quality, compact wire-wound resistors for voltage-dropping, bias units, bleeders, etc. Extra-sturdy all-ceramic vitreous enameled. Protected against shock, vibration, heat and humidity. Have

standard resistance tolerance of ±5%. 8-watt units have 1x⁵/₁₆" cores; 12-watt units, 1³/₄x³/₁₆" cores; 20-watt units, 2x³/₁₆" cores. All have 1¹/₂" leads. Average shipping weight, 3 ounces.

OHMITE Fixed Resistors

Lug type, wire-wound with vitreous enamel. Wire of the finest alloy and largest possible size is used for each resistance. The original uniform close spacing of the turns is maintained by the anchoring effect of the vitreous enamel. The wire is securely welded to the terminal lugs. Tolerance: 5%. Shpg. wt.: 10-50 watts, 4.0 oz.; 100-200 watts, 1 lb.

Resistors-Kits-Calculators OHMITE

OHMITE "LITTLE DEVIL" RESISTORS

Molded composition resistors meet all requirements for MIL-R-11E, except *. Minimum resistance under MIL spec is 2.7 ohms for 1/2 watt and 10 ohms for 1/4 watt. Meets salt water and high humidity requirements. Unexcelled for low noise level. Dissipate heat rapidly—can be used at their full wattage ratings at 158°F. ambient temp. 1 1/2" leads. WT., 2 oz. Figures in large, bold type are 10% EIA values. All values available in ±5% tolerance.

OHMITE "LITTLE DEVIL" KITS

Most commonly used resistors with a plastic cabinet included at no extra cost. Cabinet has 5 drawers and 40 compartments. 9x4 1/4x5 1/4". Wt., 7 lbs.

Model CAB-4. 1/4 watt ± 10% assortment with 150 resistors in values below.
13F164. NET19.50

Model CAB-10. 1/2-watt ± 10% assortment with 150 resistors in values listed below.
13F165. NET18.00

Model CAB-2. 1-watt ± 10% assortment with 125 resistors in values below.
13F166. NET22.50

Model CAB-3. 2-watt ± 10% assortment with 125 resistors in values below.
13F167. NET30.00

"LITTLE DEVIL" COLOR CODER

Type #5190. Set dial to resistor's EIA color code . . . read resistance directly. Gives MIL equivalents and chart showing availability of various resistances. Shpg. wt., 2 oz.

51F989. NET10c

OHM'S LAW CALCULATOR

Type #5182. Easy-to-use rapid calculator. Solve electrical problems involving various applications of Ohm's Law—has a parallel-resistance calculator. Made of vinyl. Slide-rule scales. Size: 9x3". Shpg. wt., 3 oz.

51F982. NET1.50

Type #5180. As above, but on cardboard. Shpg. wt., 2 oz.

51F983. NET25c

CAPACITOR CALCULATOR

Type #5184. Provides quick answers on capacitance problems. With one setting of slide, capacitor calculator gives the solution to problems involving frequency, reactance, power factor, dissipation factor, equivalent series resistance, impedance and phase angle. Incorporates A, B, C, D, slide rule scales. Includes important capacitance formulae and comparison chart. 7"x2 1/2". Durable, heavy, varnished cardboard. Shpg. wt., 2 oz.

Resistors

OHMITE MOLDED VITREOUS ENAMELED RESISTORS—SERIES 99

TYPE 991 MILITARY AXIAL LEAD POWER RESISTORS

Meets the requirements of MIL-R-26C insulated styles RW67V, RW68V, RW69V. Tolerance $\pm 5\%$ 1000VAC insl. brkdwn. Vitrified, permanent markings. Leads $1\frac{1}{2}$ in. long. Resistors utilize a single layer winding of high grade resistance alloy on a ceramic core.

Axial type terminal leads and the resistance wire are both welded to metal end-caps which fit snugly over the core ends. A jacket of tough, moisture-resistant, vitreous enamel material is molded around the resistor. The use of the molding technique provides the advantages of a uniformly thick, dense, smooth covering. Av. Shpg. wt., 4 oz.

TYPE 995 "MOLDED VITREOUS" AXIAL-LEAD RESISTORS

All welded vitreous enamel resistor with 1000VAC insulation. Resists chipping, breaking, and protects against moisture, salt spray, and salt immersion. Vitrified markings resist high temperatures, solvents, and abrasions. Standard resistance tolerance: $\pm 5\%$. Leads tinned, $1\frac{1}{2}$ L. All sizes 20 gauge except $1\frac{1}{2}$ w.: 24 gauge. Leads can be bent sharply at the body. Uniform dimensions permit use in automated assembly insertion equipment.

RESISTOR SIZE

Precision Resistors

DALE

TYPE RH-MIL-R-18546

Resistors are wire wound type with special resistance-temperature characteristics and housing configurations designed to meet MIL-R-18546 specifications. Constructed to provide a flat surface and

recommended for chassis mounting to assure proper heat dissipation. Molded construction in a die-cast, gold anodized-radiator finned aluminum housing. 100% impervious to moisture and salt spray. Heavy duty leads.

CARBON-FILM PRECISION RESISTORS

Type DC and DCS. Low cost miniature resistors designed for excellent protection from moisture, salt spray and other environmental conditions. Ideal for applications requiring high stability and accuracy combined with long reliable load life. Pure crystalline carbon film (no binder or filler). Excellent high frequency characteristics. Tolerance 1%. Full power to 70°C, derating at 0 at 165°C. Sizes: DC-1/4—Dia. .109 x Lt. .468 DCS-1/2 Dia. .171 x Lt. .562.

Texas Instruments Resistors

sensistor®

TEXAS INSTRUMENTS SENSISTOR® SILICON RESISTORS

All are solid state temperature sensing resistors. Temperature compensating, temperature sensing. Positive temperature coefficient thermistors. TM $\frac{1}{8}$, TM $\frac{1}{4}$, and TC $\frac{1}{8}$ feature large positive temperature coefficient of resistance (approx. 0.7°C). TM $\frac{1}{4}$ & TM $\frac{1}{8}$. Molded case. Tolerance of $\pm 10\%$. Axial leads, Full lead at 100°C. Derated linearly to 150°C. Size: $\frac{1}{8}$ " dia. x $\frac{1}{2}$ " length. TG $\frac{1}{8}$. Features round welded case. Has glass-to-metal hermetic seal between case and leads. $\pm 10\%$ tolerance. Full load at 125°C. Derated linearly to 200°C. Size: $\frac{3}{8}$ " dia. x $\frac{1}{4}$ " height. TG $\frac{1}{8}$. Hermetically sealed, designed to meet or exceed all electrical requirements of MIL-T-23648A for positive-TC thermistors $\pm 10\%$ tolerance. Ambient and Storage Temp. Range: -65°C to 150°C. Power dis. (at 25°C)—250 mW; at 100°C—125mW. Wt. 1 oz.

Stk. No.	Type	Watts	Resistance Range	1-49	50-249	250-499	500-999

*Temperature coefficient: ± 150 PPM †Temperature coefficient: ± 50 PPM

Resistors provide long-term stability over a wide range of operating temperatures. Low resistance, low noise connections. Conformal construction features larger core with larger film area for heat dissipation. Unaffected by load and environmental conditions. Resistor leads tinned copper. Rugged cap type construction. Buffing is limited. Withstands 20 pounds axial pull. Shipping weight: 1 oz. 1% tolerance.

● TYPE CR "EPOXY-PLUS" CARBON FILM RESISTORS

High moisture resistance. Insulation res. over 100,000 meg. Operate at full rated power at 70°C. amb., derated linearly to zero at 165°C. for characteristic B, 150°C. for characteristic C, to MIL-R-10509D. Size: CR- $\frac{1}{8}$, .25" Lx. .095" dia.; CR- $\frac{1}{4}$, .375" Lx. .105" dia.; CR- $\frac{1}{2}$, .6" Lx. .175" dia. 1% tolerance.

GLASS HERMETIC RESISTORS

Hermetically sealed in hard glass for stability and reliability. Impervious to moisture. 1% ohmic tolerance. Meets or exceeds all requirements of Specification MIL-R-10509C for Character-

istic B. Alloy end caps high-temperature sealed to glass shell. Size: CG $\frac{1}{8}$ -0.240 Length x 0.125 dia. CG $\frac{1}{4}$ -0.360 Length x 0.140 diameter.

Precision Metal Film Resistors

Precision metal film resistors for all industrial or military requirements. The application of metal film "across the board" for all film resistor types means it is possible to reduce the numerous classes of film resistors to just four. The four classes cover all requirements from the most

precise (1%, 100 PPM/°C) down through the types formerly covered by carbon film and thin oxide. Temperature cycling is less critical when metal film resistors are used throughout the circuit. Performance and Price encroach on composition resistor applications.

Mil Standard Resistance Values

Specify Stock Number and Resistance.

"S" TYPE RESISTORS

Type S. These resistors are made to meet the problems of small space and high ambient temperatures. Ideal for miniature power units, high-gain, low-signal amplifiers, computers, missiles, aircraft instruments. Meets MIL-R-11804D, char. P specs. Full rating at 130°C ambient. Extremely low noise level. Less than 0.1% resistance change under one year of aging. 1/2 watt rating. Voltage rating, 350 volts. Dimensions: 1/2" long x 1/16" diameter. Terminal length, 1/4". A temperature coefficient of ±0.03% per degree C. These high quality, accurate resistors provide excellent performance at temperatures up to 200°C. 1% Tol.

MIL Values Available in All Aerovox Resistors on Special Order

SPRAGUE RESISTORS

SPRAGUE AXIAL-LEAD "BLUE JACKET" POWER WIREWOUND RESISTORS

Designed for industrial applications demanding utmost stability under extreme operating conditions. Well suited for printed circuits, terminal boards, and point-to-point wiring applications. Unique all-welded end-cap construction eliminated

moisture paths along the leads and anchors the leads securely to the resistor. Power rating is based on a max. temperature rise of 300°C above a 40° ambient at full rated wattage. Will meet electrical performance characteristics of MIL-R-26C. Available only in values shown.

MAKE NEWARK YOUR ONE POINT SOURCE FOR ALL YOUR ELECTRONIC NEEDS

NEWARK speeds your project by off-the-shelf supply of over 70,000 items in current demand.

Resistors

RPC PRECISION WIREWOUND RESISTORS

MIL-R-93C — ±1% Tolerance

High precision top quality unsealed wire-wound resistors, in all standard sizes. Wound on statite forms on specially developed machines which maintain correct wire tension at all times to minimize inductance. Thermally aged and stabilized to insure long service life within the guaranteed resistance tolerance. Ideal for use where tolerance specifications are restricted. Available in 1/3, 1/2, 1 and 2 watt sizes. Meets MIL-R-93C Spec.

RPC Type AFB Equivalent to IRC type WW8J 1/2 Watt—Mil. Type RB15B—1/2" dia. x 1 1/2" long

YSI Thermistors

PRECISION THERMISTORS

Thermistors which match a published resistance-temperature curve and thus each other to $\pm 1\%$ not only at 25°C but over most of their useable range of -80°C to $+150^\circ\text{C}$. Each thermistor is provided with resistance-temperature data for each degree C and with tolerance curves both in resistance variation and temperature sensing interchangeability. Base resistance from 100 ohms to 1 Megohm at 25°C available to ease circuit design impedance matching problems. Useful as transducers for measurement and control circuits where precision of YSI thermistors allow interchanging of transducers and multiple monitoring from single circuits. In control circuitry direct dialing of set points is possible as is trigger action at a specific temperature since resistance at any useable temperature is known to close tolerances. Also useful as temperature compensating devices for transistors, meters, circuits, etc. Physical size: .09" in diameter; .09" thick #32 solid tinned copper leads, 3" long. Thermistors are epoxy encapsulated for ruggedness and long life. Each thermistor supplied with data and with dissipation information, time constant, and instructions. Rated at 25°C .

- Low Cost Precision Thermistors
- Matches Standard Curves— 80°C to 150°C

TEFLON® PRECISION THERMISTOR PROBES

YSI interchangeable thermistors in chemically impervious form for sensing or control use. The interchangeable precision thermistors listed above, but additionally encased in a 2" length of chemically impervious Teflon, 3" leads extend 1" beyond the probe for convenience in attaching leads. Leads are insulated from each other by a smaller Teflon tube around one lead. Probes can be used straight or can be bent by finger pressure to exact configuration required for placing the thermistor where you want it. .11" max. in diameter.

Can be assorted for quantity prices.

- Precision — $\pm 1\%$ at 25°C .
- Easily bent to required shape
- Chemically impervious Teflon casing

THERMILINEAR® THERMISTOR DEVICES

Linear Output Thermistor Networks

A composite precision thermistor device which, in conjunction with the precision resistors supplied, provides linear voltage output or linear resistance change with change of temperature. Sensitivities of 20 mv/°C. and more are common, 400 times the sensitivity of an IC thermocouple. Linearity deviation is as little as 2 parts in 1000 from 0 to 100°C . Combined absolute accuracy, linearity and interchangeability specifications of as little as 3 parts in 1000 from 0 to 100°C . Greater accuracies, interchangeabilities, and linearities available for shorter standard ranges. Parts guaranteed to stay within tolerances for three years. Useful for direct digital temperature indication with DVM or linear recorder. Provides linear temperature compensation with thermistor sensitivity. Time constant: 1 second, in well-stirred oil bath. Parts consist of composite thermistor and resistor assembly. Thermistor composites are manufactured to absolute accuracy tolerances of $\pm 0.15^\circ\text{C}$ from -30 to $+100^\circ\text{C}$. For complete information and technical data, write Newark. Type 44018: additional thermistor composites for replacement or multiple input work.

Thermistor Composite

Resistor Composite

Stock No.	Type	Range	Linearity	1-9	10-29	30-99

THERMISTOR AND VARISTOR DESIGNER'S KITS

Each of the kits below provides a wide range of resistances and physical sizes of thermistors and varistors.

KW125 THERMISTOR WASHER KIT

Includes mounting kit A828 plus two each of the following: 11X1; 12X15; 14X4; 21W1; 22W6; 24W6. Shpg. wt. 1 lb.

29F111. NET 13.50

KP50 THERMISTOR PROBE KIT

Contains one each of the following thermistors: 21A3; 31A11; 41A11; 51A11; 61A11; 71A11. Shpg. wt. 1 lb.

28F112. NET 14.50

KR75 THERMISTOR ROD KIT

Contains one each of the following thermistors: 33S1; 36S1; 41R1; 41S2; 43R1; 51R1; 51R2. Shpg. wt. 1 lb.

29F113. NET 8.75

VECO EXPERIMENTER KIT

Veco Experimenter Kits are designed to acquaint personnel with the various types of thermistors and varistor applications and preparations of prototype models.

M-168. Contains: 2 each type thermistor, bead, disc and washer. 1 varistor washer.

29F114. NET 5.00

M168A. 2 each type thermistor, probe and rod. 2 each washer (varistor) 1 set mounting hardware.

29F115. NET 10.00

PACKING GLAND

Type A819. Made for use with Veco bead thermistors in glass probe units. Made of stainless steel. All steel parts are zinc plated and chromate dipped. Has neoprene sealant. Has effective temperature range of -40°F to +200°F.

Stock No.	Type	1-10	11-24	25-49	50-99
29F116	A819	4.00	3.20	3.00	2.80

Technical characteristics and schematics to assist in the solution of circuitry design problems are also included.

KD25 THERMISTOR DISC KIT

Includes one each of the following: 11E2; 12E2; 15D1; 18E2; 21E2; 22E6; 23D34; 25D4; 31E2; 32D12; 33D10; 35D6; 41D2. Shpg. wt. 1 lb.

29F134. NET 10.50

KTBI THERMISTOR BEAD KIT

Kit includes tweezers for handling thermistors plus one each of the following thermistors: 32A48; 43A2; 51A30; 21A2; 31A2; 41A2; 51A2; 61A2. Shpg. wt. 1 lb.

29F135. NET 19.50

KV100 VARISTOR KIT

Contains A818 mounting kit plus the following Varistors: 023L4; 023W1; 063L4; 114L1; 124W1; 143W1; 155L2; 165W2. Shpg. wt. 1 lb.

MODEL 46

Rectangular wirewound type. Resistance tolerance $\pm 5\%$. Tempco 50 ppm. Power rating 1.0 watt at 70°C. Operating temperature -65°C to 175°C. Meets MIL specs. Number of turns 15 ± 3 . 46-1-1 has 6" teflon leads. 46-2-1 and 46-4-1 have PC pins. Size .180 x .315 x 1 in. Mtg. hole centers .750. Wt. 3.6 grams max.

MINIATURE ROTARY SWITCHES

88-3-8

88-3-10

88-5-6

Makes practical many printed circuit board switching applications. Unique "lift off/drop on" cam-actuated wiper action reduces switch arcing and noise. Militarized design withstands severe environments per MIL-STD-202B. Single pole with 10 active non-shorting positions. Contact current rating 250 ma at 28 VDC. Continuous rotation. Temperature range: -65°C to 150°C.

Type 88-3-8. Screwdriver adjust, PC pin. Size: .18 x .50" dia.

Type 88-3-10. Knob adjust., PC pins. Size: .27 x .55" diameter.

Type 88-5-6. Screwdriver adjust, solder hooks, panel bushing mount. Size: .455 x .50" diameter.

84-3-10

84-5-6

MODEL 84 SINGLE TURN

Meets or exceeds MIL specs. Power rating 1.5 watts at 70°C. Tempco 50 ppm. Temperature range -65°C to 175°C. Case diameter 1/2". Model 84-3-8, screwdriver adjust, PC pins. Model 84-3-10, knob adjust, PC pins. Model 84-5-6, panel bushing mount, solder hooks.

Model 11

12

14

Model 25

Model 30

PRECISION TURNS COUNTING DIALS

Accuracy of better than 0.1% when used with 10-turn pot. Fast numeral transfer takes place in less than one division. Unique

PRECISION TURNS-COUNTING DIALS

Model 10. Ten turns. Registers 999 total count. Black anodized, white numerals. One inch diameter.

Stock No.	Type	Shaft Diameter	1-9	10-24	25-49	50-99	100-249	250-499
12F2771	10-1-11	1/4"	8.75	8.31	7.88	7.44	7.00	6.56
12F2772	10-3-11	1/8"	9.75	9.26	8.78	8.29	7.80	7.31

Model 11. Eleven turns. Registers 1099 total count. Satin chrome, black markings. 1" diameter.

Stock No.	Type	Shaft Diameter	1-9	10-24	25-49	50-99	100-249	250-499
12F2773	11-1-11	1/4"	7.75	7.36	6.98	6.59	6.20	5.81
12F2774	11-3-11	1/8"	8.35	7.93	7.52	7.10	6.68	6.26

Model 12. Ten turns. Registers 999 total count. Brake lever close to body for use in restricted panel space. Black anodized, white markings. 1" diameter.

Stk. No.	Type	Shaft Dia.	1-9	10-24	25-49	50-99	100-249	250-499
12F2926	12-1-11	1/4"	8.75	8.31	7.88	7.44	7.00	6.56
12F2927	12-3-11	1/8"	9.75	9.26	8.78	8.29	7.80	7.31

Model 14. Ten turns. Registers 999 total count. Housing squared off sides and bottom for use where space is severely restricted. Black anodized, white markings. 1 3/16" wide x 2 9/32" high.

Stk. No.	Type	Shaft Dia.	1-9	10-24	25-49	50-99	100-249	250-499
12F2928	14-1-11	1/4"	8.75	8.31	7.88	7.44	7.00	6.56
12F2929	14-3-11	1/8"	9.75	9.26	8.78	8.29	7.80	7.31

one-finger brake lever prevents dial creepage or loss of setting no matter how severe vibration or shock encountered.

DIGITAL DIAL

Model 25-1-13. Three digit dial reads to 1099 in 11 turns. Fine calibrations allow settings to 1/10 of a digit accuracy. 2 to 1 gear ratio between setting knob and device shaft for extremely fine settings. Mounts directly to panel. Satin chrome finish with black plastic turn-knob. 1 13/16" dia. 1 5/8" protrusion from panel.

Stock No.	Type	Shaft Diameter	1-9	10-24	25-49	50-99	100-249	250-499

AMPHENOL

1" MICRODIAL® WITH BRAKE

Series 3000. Ten-turn, precision counting dial provide maximum accuracy and convenience with Amphenol Micropot potentiometers. Concentric scale Microdial with finger tip brake ideal for the series 205 and 111B Micropots and for all potentiometers having ten turn adjustment and 1/4" diameter shaft. White numerals on black scale. Smooth, silent gear action. Size 1 1/4" with finger grip. Shpg. wt. 10 oz.

SERIES 1360 CONCENTRIC SCALE MICRODIALS®

Numbers Molded—Resist Wear

New concentric scale dial for use with Amphenol Micropots. Manufactured of molded plastic with numbers and graduations molded in depth to resist wear. Similar in operation to the 1320 series except outer knob actuates the dial. Available in five combinations of red, gray and black. Turns dial: White with black numbers. With brake. Wt., 8 oz.

CONCENTRIC SCALE MICRODIALS®

Composed of 2 concentrically mounted dials: Smaller counts up to 10 turns; larger counts increments of turn. (100 equal divisions). Attachment to actuation shaft eliminates backlash. Accelerating turn-counting dial removes confusion. Cont. operation in either direction. No stops in dial itself. Finger tip brake. #6 Allen wrench packed with each unit. Dia: 1 3/16". Depth: 1 3/16". Shaft Dia.: 0.252". Shpg. wt: 8 oz.

Amphenol Microdials-Trimmers Potentiometers

3141 DIGITAL MICRODIAL

Remarkably accurate (1000:1 indexing accuracy). Measures only $1\frac{1}{2} \times 1\frac{1}{2}$ " and protrudes only $\frac{3}{32}$ " from a panel. Digits are magnified by convex lens in recessed window. Three-digit, ten-turn dial rotates continuously forward or backward with push-pull fingertip brake to lock settings. Will mount on panels $\frac{1}{16}$ - $\frac{3}{16}$ " thick. Natural brushed aluminum finish. Shaft dia. $\frac{1}{4}$ ". Shpg. wt. 2.75 oz.

DIRECT-READING MICRODIALS®

- Inline Digital Presentation
- Control Knob Mounted Directly on Shaft

Inline digital presentation provides greatest accuracy of perception when forced fast reading and setting are required. Rugged, sealed construction. Control knob mounted directly on the shaft to provide greatest sensitivity and accuracy. Packed with #6 Allen Set Screw Wrench, 1 adapter ring for use when panel thickness exceeds $\frac{1}{8}$ ". Depth $1\frac{1}{2}$ ". Panel face dia. $2\frac{1}{16}$ ". Panel face dia. $1\frac{1}{16}$ ", depth $1\frac{1}{32}$ ". Finger tip braking on some models. *Has anodized aluminum control knob (meets 50 hour salt spray test). Shpg. wt., 8 oz.

NEW 2901 METAL FILM TRIMMERS

The Amphenol 2901 is the only infinite resolution trimmer offering a temperature coefficient as low as 50 ppm/°C and zero noise level at the trimmed position. You just set it and forget it. This half-inch square trimmer is humidity-proof, vibration proof, and shock-proof. Designed for high temperatures. Entire case is insulator. Meets MIL-R-22097B. Color coded wire lead type is $0.5 \times 0.187 \times 0.5$ ". Gold plated printed circuit pin type is $0.5 \times 0.220 \times 0.5$ ". Wt., 3 qms.

2750 SERIES (RT 12)

Designed to withstand the specifications detailed in MIL-R-27208A, style RT 12. Leadscrew actuated, wirewound, humidity-proof, high temperature type. Operating temperature is -65°C to $+175^\circ\text{C}$. Stranded copper wire leads, color coded, teflon insulated. $1\frac{1}{2}$ " minimum length. Total resistance tolerance is $\pm 5\%$. Power rating is 1 watt at 70°C derated to 0 at 175°C . The leadscrew provides complete range of adjustment in just 22 turns nominal. Size, $1.25" \times 0.19" \times 0.32"$.

AMPHENOL WIREWOUND TRIMMERS

Micro-Minature Trimmers. —65° to +125°C. 1 watt at 40°C. .75 x .16 x .31". Up to 52% higher resolution than many trimmers selling up to six times the price. Silver brazed terminations virtually eliminate end resistance. Self-locking leadscrew, and low mass contact design permits the 2600 to withstand acceleration and shock up to 50 g's. T.C., 30 ppm nominal. Damage proof clutch. Rated one full watt at 40°C, derated to zero at 125°C. Factory tested. 2610P is humidity-proof version.

999 TRIMMER MOUNTING BRACKET

For any .28" W x 1.25" L Trimmer; Models 992, 993, 994, and 2850 series. Easily adjusted—no special tools needed. Self-locking. Aluminum with gold anodized finish.

Stk. No.	Type	Size	1-9	10-24	25-49
12F1635	999	1.19 ₃₂ " L x 1.4 ₃₂ " W x .5 ₁₆ " H	.81	.75	.88

General purpose wirewound Series 992 available in resistance ranges of 50 ohms to 10K. Resistance tolerance: ±10% to 100 ohms; ±5% 100 ohms and over. Power rating: 1 watt @ 40°C, 0 watt @ 105°C. 100% continuity checked. 100% noise tested. Dust proof; O-ring seal. Usable potentiometer range: 93% to 100%. Insulation: 0.2" double amplitude 2-30 cps, 20 g's, 30-2000 cps. Acceleration 100 g's. Shock: 50 g's. Load life: 500 hours operation. Dielectric strength: 1 minute at 1100V rms, 60 cycles. Gang mountable.

2151B WIREWOUND POTENTIOMETERS

Type 2151B. For industrial-commercial use. 7/8" diameter. Wirewound. Dual slip-ring commutator insures accurate voltage. Metal wiper contact "hugs" insure precise setting stability. No backlash. Rotational life: over 2,000,000 revolutions. Strap terminations welded direct to terminal lugs. High temperature thermosetting.

Plastic does not change size or shape under humidity or moisture variations. Molded phenolic case meets MIL-R-12934D. Temp. range: —65°C to +85°C. Wt. 1 oz.

2850 SERIES (RT 11)

Meets Mil-R-27208A, STYLE RT 11. Rated one full watt at 110°C, the 2850 is a high temperature (—65°C to 175°C), humidity proof, wirewound precision trimmer. Silver brazed internal terminations minimize end resistance to one ohm or 0.25% of total resistance. Total resistance tolerance is ±5%. Extra long ceramic mandrel provides more turns of resistance element, superior resolution. 12" tinned teflon insulated leads.

994 SERIES

General purpose, wire-wound model with resistance range of 50 to 10,000 ohms, ±5% from 100 to 10,000 ohms, Temperature range, —55°C to +105°C. Acceleration is up to 100 G's. Humidity-proof; meets military salt spray test as well as sand and dust specifications. Power rating is 1 watt @ 40°C. Size: .36"H x .28"W x 1.25"L.

Potentiometers

STYLE AS 1/2 WATT MINIATURE POTENTIOMETERS

The smallest, high-quality, molded, composition potentiometer available. Only 1/2" in diameter. Locking type shaft is standard. Max. continuous voltage across entire element—350v. 1/2-watt at 70°C. Derate

linearly to zero at 120°C ambient. Can be used throughout range from -55°C to +120°C. Type AS potentiometers meet the 200 hour salt spray test of QQ-M-151 and exceed the performance requirements of MIL-R-94A as E.I.A. requirements. Shipping weight, 4 ounces. Tol. $\pm 10\%$. * $\pm 20\%$.

TYPE AB 2-WATT POTENTIOMETERS

Molded composition 2-watt variable resistance control units. Type CMU (Fig. D) has 7/8" L x 1/4" slotted shaft. Type CLU (Fig. A) has locking nut, 3/8" L x 1/4" slotted shaft mounts in 3/8" hole on panels up to 1/8". Types CA, CB and CU (Fig. B), and Type CCU dual (Fig. C) have 2" long, 1/4" shafts. Mount in 3/8" hole on panels up to 1/4". All are $\pm 10\%$ tolerance, except * $\pm 20\%$. Types CU, CCU, CMU, and CLU are linear taper; Type CA clockwise log; Type CB counter-clockwise log; size 3/8" x 1 1/2" diameter. Type CCU size, 1 1/4" x 1 3/8" dia. With lock washer and mtg. nut. Shpg. wt., 4 oz.

Stock Potentiometers-Mil Units Are Stamped With Mil And Commercial Designations.

1 1/2 WATT MINIATURE RHEOSTATS

Model E. 1 1/2-Watt Miniature Rheostat. (Rating on metal panel.) Smaller than many 1- or 2-watt potentiometers. Rugged, all-ceramic and metal construction. Use where 1 1/2 watts dissipation is needed but space is limited. Operates at a maximum hot spot temperature rise of 300°C at an ambient of 40°C, but also useful for operating at high military em-

bients, derated linearly to zero at 340°C. Specifications: Overall diam.: 3/8". Shaft diam.: 1/16". Resistance range: Up to 5000 ohms with vitreous enamel; higher values available with Ohmicone inorganic coating. Resistance tol.: ±10%. Standard Mounting: for panels up to 1/4", 1/4"-32 threaded Bushing. With non-turn washer. Rotation: 300° ±5°. Shpg. wt., 1 1/2 oz. † Silicone-ceramic coating.

The Complete Line of **WARD LEONARD** RESISTORS are Available From

NEWARK ELECTRONICS CENTER, NEW YORK, N.Y.
NEWARK INDUSTRIAL ELECTRONICS,
GRAND RAPIDS, MICH.

12 1/2 WATT MG WIRE-WOUND CONTROLS

MG controls have a continuous DC rating of 12.5 watts at 35°C (ambient). Volume is 1.1 cu. in. and outside control diameter is only slightly larger than standard knob rotation arc at 15 1/2". Mechanical rotation: 294°; electrical rotation: 275°; peak audio rating at 50 watts. Voltage breakdown of 900V RMS. Contact arm insulated.

Only 1/2" diameter. Rated 1/4 watt linear, watt audio. 1/2"-32 x 1/4" bushing with nut. Shaft: 1/4" diameter x 1" FMS, MLC (steel); MLCN (nylon). SPST(*) switch rated 2 amperes at 125 VAC, UL approved. Printed ckt. MTC has open screwdriver slot. New MTC is supplied in resistance values from 100 ohms to 3 1/2 megohms, in standard linear taper.

Taper No. 1: Logarithmic used in audio circuits where percent of change is small at start of rotation.
Taper No. 2: Reverse logarithmic used where percent of change must be large at start of rotation.
Taper No. 4: Linear taper where percent of resistance change is directly proportional to rotational change on a straight line.

DIVISION OF GLOBE-UNION INC.

1/5 WATT MINIATURE COMPOSITION CONTROLS

Style RV1. Meets MIL-R-94B. Ideally suited for guided missiles, geophysical equipment and miniature amplifiers. Linear taper. Tol: $\pm 10\%$. Dielectric strength: 900 VAC-RMS. Resistance elements completely enclosed permitting sealing and potting without damage. Brass terminals. Tin plated leads. Locating lug—left only. Stainless steel screwdriver slotted shaft, $1/8"$ dia. Mech. rotation $260^\circ \pm 3^\circ$. Bushing mtg. nut and lockwasher supplied.

JMP. Shaft $7/8"$ long from mtg. surface. $1/4"$ —32 NEF-2A thd. **JML.** Shaft $1/2"$ long from mtg. surface. Locking type bushing $1/4"$ —32 NEF-2A thd. $3/8"$ long from mtg. surface. Shaft locking nut furnished.

HOT MOLDED CARBON POTENTIOMETERS MIL-R-94 STYLE RV6

Rated 0.5 watt @ 70°C, derated to zero power @ 120°C. Working voltage 350 VDC across end of terminals. Mechanical and electrical rotation $295 \pm 3^\circ$. Voltage breakdown 750 VAC between terminals and ground for 1 minute. Available with standard or locking type bushing. RV6L Locking Bushing. RV6N Standard Bushing. Diameter: $\frac{1}{2}$ ". Shpg. wt., 5 oz.

SERIES 76 SUPER SET TRIMMING POTENTIOMETERS

SUPER SETABILITY made possible through 10 times the resolution — 15 times greater winding length ever offered in this configuration. Trimming costs in critical circuits drop, performance of circuit improves. Because of small size, packaging size decreases. Mechanical travel: 14 turns approx. Effective travel: 11 turns $\pm \frac{1}{4}$ turn. Resistance Range: 100 ohms to 20,000 ohms.

Resistance tolerance $\pm 5\%$. Power Rating: .75 watts @ 85°C—derated linearly to 0 power @ 150°C.

NEW SERIES 63 HOT-MOLDED CARBON TRIMMING POTENTIOMETERS

Designed specifically for application on printed circuit boards, this new configuration permits extremely close board-to-board spacing. Power Rating: .25 watt @ 70°C. Working Voltage: 350 VDC across end terminals, but power not to exceed rating. Resistance Range is 100 Ω to 1 megohm, linear. Resistance Tolerance: ±20%. Mechanical & Electrical Rotation 295° +3°. Voltage Breakdown is 750 VAC between terminals and gnd. for 1 min. Torque 0.5 to 3 oz. in. Diam. 1/2"; body length 1 1/2". Wt., 1 oz. appr.

Type 63M1. Plastic Shaft and Faceplate. Solder Lug

SERIES 42JA SINGLE TURN POTENTIOMETER

All types of applications ranging from ultra critical military systems to ultra dependable industrial equipment. Power Rating: 3 watts at 40°C. Resis. Tolerance: ±5%. Electrical rotation 330°±5°. Mechanical rotation: 360° continuous. Resolution from .35% at 500 ohms to .051% at 100K ohms. Linear output. Max. speed of rotation: 90 RPM. Body dia.: 1 1/4". Shaft length: 1/2"; Shaft dia.: .249". Approximate weight, 3.2 ounces.

SERIES 57M, 57M9, 57EJA, 57EJB SINGLE TURN POTENTIOMETERS

A high performance potentiometer in a 1/2" dia. housing. Series 57M is rated at 1.5 watts at 40°C. Series 57EJ 2 watts at 70°C and features glass sealed terminals. Shaft length: 57M and 57EJA 1/2" beyond bushing. Series 57M9 is similar to Series 57M except it has locking bushing mtg. and a 1/8" shaft. Series 57EJB is similar to Series 57EJA except it has locking bushing mtg. and 1/8" shaft. Common Specifications: Res. Tol.: ±5% independent. Linearity: ±2%. Mechanical and electrical rotation: 320°±5%. Dielectric Strength: 1000 VAC. Corrosion resistant housing per QQ-M-151. Centerless grd. stainless steel shaft. Approx. wt., 1/2 oz.

Potentiometers and Dials

SERIES 62JA

10-TURN COMMERCIAL POTENTIOMETERS

Designed specifically for industrial instrumentation application.

Resistance tolerance $\pm 5\%$. Linear functional output; absolute linearity $\pm 25\%$ 500-100K ohms, $\pm 5\%$ 100-250 ohms. Power dissipation 2 watts @ 25° C. Dielectric strength 1000 volts AC. Effective rotation 3600° nominal. Insulation resistance 1000 meg-ohms. Operational life of 100,000 shaft revolutions. Maximum speed of rotation is 60 RPM. Weight approximately 1.34 oz.

SERIES SC42-970 SIN/COS SINGLE TURN POTENTIOMETER

Used in radar, computer and servomechanisms, or any application requiring two output voltages accurately proportioned to the sine and cosine rotation angle. Total Resistance: 16K, $\pm 10\%$. Power rating: 2.46 watts at 40°C. 360° cont. rotation. Resolution: 0.14% of max. peak to peak voltage. Max. shaft speed: 30 RPM. Shaft length: $1\frac{1}{16}$ " dia., .2498". Body dia.: $2\frac{1}{16}$ ".

"CLARODIAL" 10 TURN SCALE DIALS

Calibrated dials designed for multi-turn potentiometers up to 10 turns or other rotary devices. Requires only 1 inch of panel space. The knob attaches directly to the shaft and the body of the dial is mounted rigidly to the panel. Accurate readings with a ratio of 1000 to 1 for 10 turns are provided with zero backlash and reading error. Anodized aluminum. $\frac{1}{4}$ " shaft.

43C2 2 WATT WW POTENTIOMETERS

2 watt, wire-wound control. Tolerance $\pm 5\%$ for all ohmages. $\frac{1}{8}$ screwdriver slotted bushing. Diam. $1\frac{5}{32}$ " x $\frac{3}{8}$ " deep. Fabricated in accordance with MIL-R-19 Style RA20. Meets the need for a high quality resistance device incorporating high stability under extreme climatic and operational conditions. Shpg. wt., 4 oz.

DK60-G2C COAXIAL RELAYS

SPDT R.F. switch with DPDT auxiliary contacts and special "isolated" connector in de-energized position. Low VSWR: less than 1.15:1 from 0 to 500 mc. Long-life expectancy greater than one million operations. Power rating: 1 kilowatt through straight connectors; to 10 watts through "isolated connector". Maximum operating temperature: 100°C. Pure silver contacts. Shpg. wt. 1 lb.

Stk. No.	Type	Coil Voltage	Size	Each
24F2000	DK60-G2C	6V-DC	3 $\frac{3}{4}$ " x 2 $\frac{3}{4}$ " x 1 $\frac{1}{2}$ "	20.80

ELECTRONIC ANTENNA SWITCHES

Both fully electronic. Includes tube. Will handle a full kilowatt. Type DKC-TRM-1 requires 150 V at 5 ma and 6.3 V at .3 amps.

Model DKC-TRP has built-in power supply for plug into 120 VAC circuit. Both switches are fully TVI-proof. Shpg. wt., 2 lbs.

Stk. No.	Type	Power Supply	Frequency	Each
24FX2004	DKC-TRM-1	90-120 VDC	1.8-60 Mc	17.00
57F1704	DKC-TRP	120 VAC	1.8-30 Mc	37.00

UHF CONNECTORS

A complete line of connector styles suitable for every UHF application. Panel-mounting connectors require a $\frac{3}{16}$ " hole, no screws necessary. Connectors are made of precision-machined brass which is then

silver-plated. They lock firmly, provide a tight, firm connection. Females designed for low-loss operation with moisture and humidity-proof construction. Shipping wt. for each connector is approx. 1 oz.

ENCLOSED PLUG-IN AC RELAY WITH NEON LAMP

Type 1210-N. A miniature neon lamp lights each time the coil is energized, or indicates a circuit fault when lamp is dark. Ideal for detecting circuit faults in relay banks, mass relay arrangements, or where relays are visibly located at intermediate switching points of the circuitry. Precludes the use of circuit testers. Coil Res. 1000 ohms. Contacts rated 10 amps at 115 VAC, 60 cycles, non-inductive load. Size: $2\frac{3}{4} \times 1\frac{1}{2} \times 1\frac{1}{2}$ ". Shipping weight, 3.5 ounces. *8 pin octal plug. †11 pin plug.

GUARDIAN 900 SERIES RELAYS

Number of parts and assembly time reduced by 50%. Eliminates cold flow. Higher voltage breakdown. Contacts D.P.D.T. can control up to 10 amps tact D.P.D.T. can control up to 10 amps resistive load at 115 V.A.C. Coil Values 24, 115 or 230 V.A.C. and 6, 12 or 24 V.D.C. 2 point. Single screw mounting. Unitary field and core, no gap between core and field piece. For 115v., 60 cycles. *UL Approved. Size $2\frac{1}{2} \times 1\frac{1}{2} \times \frac{1}{2}$ wide.

32-POLE DC RELAY

Type IR-805-S. Group selector relay can simultaneously make common up to 32 circuits. All circuits insulated from ground. Contact blades molded in thermosetting phenolic. Phenolic plunger housing, 32 poles made common upon energization. Coil Res. Ohms 72. Size, 2¹/₂" x 1¹/₂" x 2¹/₈". Shpg. wt., 6 oz.

INTERLOCKING RELAY 115V. AC

Two interlocking AC relays in sturdy metal frame bracket. Used to maintain circuits continuously without coil power consumption. Unit is electrically pulse operated with mechanical hold and electrical release. Contacts rated at 10 amps., 60 cps. non-inductive. Size, 1¹/₂" x 1³/₄" x 2⁷/₈". 4PDT contacts. Shipping wt., 5.5 oz.

HEAVY DUTY INDUSTRIAL RELAY—AC

Type IR-220. Rugged unit breaks up to 20 amperes, at 230 volts. Armature is equipped with Phenolic contact mounting block carrying 5/16" dual contacts. Phenolic is tested at 1500 volts breakdown to ground. Contacts are silver alloy. Relay is available in SPST-NO contact combination only. Contact rating at 60 cycles, 20 amps, 230 V non-inductive load. Size: 3x1⁷/₈" x 1³/₄". Shipping wt., 5.5 oz.

SOLID STATE TIME DELAY RELAYS

Series TDO-62C30-115A. 2PDT 5 amp. commercial time delay relay. 10 turn pot .5 to 30 seconds. Recycling time: 100 milliseconds. Accuracy to 10% of a nominal setting over the temperature range. Plug-in mtg. Termination: octal socket. Temperature -10°F to +100°F. F. 115 VAC ±10% 50/60 cycles.

62F1912. NET

16.32

Series TD. High reliability; all silicon semiconductors, precision tantalum capacitors. High resolution 15 turn pot. Recycle-time: 50 milliseconds. Accuracy: ±5% of nominal setting over complete voltage and temperature range. Repeatability: ±1% of nominal setting. 3PDT—10 amps. Temperature: -40°F to +150°F.
