Abbreviations

WN..... What's New!
SR..... Stories of Research

A

Absolute altimeter. See Instrument.
Acceleration. See Measurement.
Accelerator, linear. See Nuclear physics, tools.
Adjustable-speed drive
 d-c motor, 8-to-1 range. R. W. Moore. Nov., 1947. p. 184-5.
 d-c, selenium rectifier. July, 1947. p. 103-4.
 d-c, wide range. Jan., 1946. p. 25.
 improved by compensation. R. H. Wright. Aug., 1941. p. 50-1.
Mototrol. WN. Aug., 1943. p. 102.
Rototrol, description and application. W. H. Formhals. May, 1942. p. 51-4.
Rototrol, for mine hoist. J. G. Ivy. July, 1944. p. 124-7.
simplified system. WN. May, 1941. p. 32.
various systems, including Rototrol. G. A. Caldwell. Aug., 1942. p. 75-80.
wide-speed range with servomechanisms. G. A. Caldwell. Sept., 1945. p. 157.
 See also Arc-furnace control.
Agro-industry, Everglades. May, 1946. p. 66-72.
Air circuit breaker. See Circuit breaker.
Air cleaning. See Electrostatic air cleaning.
Air conditioning
 commercial, developments. Jan., 1946. p. 31.
 reversed cycle. R. D. Heitchue. Aug., 1941. p. 39-42.
 war applications. Aug., 1943. Inside-front cover.
Air-cooled transformer. See Transformer.
Aircraft
 a-c electrical system. J. D. Miner. Sept., 1945. p. 148-53; Jan., 1944. p. 10.
 commutation at high altitudes. H. M. Elsey. Sept., 1945. p. 144-7.
 generators. Jan., 1946. p. 18.
 launching, Electropult. Sept., 1946. p. 160-1; Jan., 1947. p. 22.
 power supply, d-c. J. C. Cunningham and H. E. Keneipp. March, 1946. p. 57-61.
 See also Brush; Circuit breaker; Compressed-air gun, windshield testing; Generator, d-c; Instrument, tympanometer; Measurement, engine torque; Motor, d-c, brake development; Radio; Relay; Turbine, gas.
Aircraft carrier. See Elevator.
Airplane. See Aircraft.
Airport
 equipment, packaged. Jan., 1944. p. 11.
 lighting control. WN. Nov., 1944. p. 192.
 wind indicator, smoke. WN. Sept., 1944. p. 159.
 See also Lighting.
Alloys, high-temperature. See Metal; Testing.
All-weather approach lighting. See Lighting, airport runway.
Altimeter. See Instrument, absolute altimeter.
Analog computer. See Calculator.
Analyzer. See Calculator.
Angstrom, defined. Nov., 1943. p. 117.
Appliance
 Disney movie. WN. Nov., 1945. p. 174.
 See also Electric iron; Heating, radiant; Laundry.
Approach-angle indicator. See Lighting, airport.

Arc blow. See Welding, arc.
Arc furnace
 circuit breaker. WN. Nov., 1947. p. 190.
 control, developments. Jan., 1946. p. 24.
 control, regulators. H. G. Frostick. Nov., 1945. p. 188-91.
 review. Nov., 1945. Inside-front cover.
 suppression of surges. W. R. Stewart, S. B. Griscom, and J. E. Hobson. May, 1941. p. 11-4.
Arc welding. See Welding, arc.
Asbestos-Fosterite insulation, mica substitute. E. L. Schulman. March, 1947. p. 61-3; Jan., 1947. p. 9.
Atom
 counter. WN. May, 1941. p. 32.
 Geiger counter. WN. May, 1941. p. 28.
 smashing. May, 1941. p. 5-7.
 See also Nuclear physics.
Atomic bomb. See Nuclear physics; Uranium, production.
Atomic power. See Nuclear energy.
Atomizer. See Turbine, gas.
Automatic reclosing. See Circuit breaker.
Autotransformer for differential protection. See Bus-differential protection.
Aviation. See Aircraft; Airport; Lighting; Turbine, gas.
Axial-flow compressor. See Compressor.

B

Bacteria. See Ultraviolet, bacteria control.
Balance-beam regulator. See Arc-furnace, control.
Balancer
 electronic, microbalancer. Jan., 1946. p. 8; Jan., 1947. p. 19.
Balancing, dynamic, low speed. WN. Nov., 1941. p. 95.
Banking of transformers. See Transformer, distribution.
Barrier-layer rectifier. See Rectifier, disc type.
Bearing
 air-lubricated. Jan., 1947. p. 23.
 cleaning. Jan., 1947. p. 18.
 molded, marine. SR. March, 1945. p. 64.
 See also Lubrication, stability; Testing.
Bearing tester. See Magnetic tester.
Bergius. See Coal.
Betatron. See Nuclear physics, tools.
Beverage, refrigeration. Jan., 1946. p. 32.
Binoculars, production. WN. May, 1943. p. 71.
Biplane marker. See X-ray.
Blackout. See Lighting.
Blades. See Turbine, steam.
Blower, steam-driven. Jan., 1945. p. 18
Bomb. See Hydro-bomb.
Boric-acid fuse. See Fuse.
Boron nitride, high-temperature lubricant. Jan., 1947. p. 10.
Brazer, transformers, portable. Jan., 1945. p. 23.
Brazing, radiant furnace, principles and practice. A. K. Phillippi. May, 1945. p. 84.
Brick making. See Dielectric heating.
Broadcasting. See Radio.
Brush
 aircraft motor. Jan., 1944. p. 7.
 high-altitude. H. M. Elsey. Sept., 1945. p. 144-7; SR. Aug., 1943. p. 81; Jan., 1947. p. 3.

Bus-differential protection
 air-core coupler. WN. Feb., 1942. p. 26.
 autotransformer. WN. Aug., 1942. p. 86.
 prediction of performance. E. C. Wentz and W. K. Sonnemann. Feb., 1942. p. 28-31.
 simplified with air-core couplers. E. L. Harder. May, 1942. p. 43-5.
Bushing. See Condenser bushing.

C

Cable supports, glass fiber. WN. Aug., 1943. p. 104.
Calculating board. See Calculator.
Calculator
 analog. Jan., 1947. p. 20.
 description of new, a-c. H. A. Travers. July, 1944. p. 111-4.
 mechanical transient analyzer. G. D. McCann and H. E. Criner. March, 1946. p. 49-56; Jan., 1946. p. 31.
 review, July, 1944. Inside-front cover.
 synchronous motor. WN. Nov., 1947. p. 190.
Capacitor
 automatic-switching control. WN. Aug., 1941. p. 63.
 case finish. WN. Nov., 1944. p. 191.
 d-c. Jan., 1947. p. 13.
 high-frequency. WN. Aug., 1941. p. 62; SR. March, 1944. p. 57.
 insulation. SR. Sept., 1944. p. 143.
 motor starting. M. A. Hyde and R. E. Marbury. May, 1944. p. 70-3.
 oscillations in welding. R. E. Marbury. Nov., 1943. p. 126.
 portable. WN. Aug., 1941. p. 64.
 series, relay. WN. March, 1946. p. 64.
 transmission lines. R. D. Evans and R. L. Witzke. Feb., 1943. p. 24-6.
Capillarity, review. May, 1945. Inside-front cover.
Carbon brush. See Brush.
Carrier current. See Transmission line.
Cascade transformer, high voltage. See Nuclear physics, tools.
Casting
 precision, description of process. H. W. Giesecke. Nov., 1946. p. 180-2.
 precision, turbine blades. Jan., 1947. p. 15.
Castle Dome, copper mine. March, 1947. p. 48-9.
Cathode. See Electronic.
Cathode ray. See Oscillograph.
Cathodic protection, water heater. Jan., 1947. p. 3.
Ceramic. See Insulation, porcelain.
Chesapeake & Ohio
 locomotive, drive. T. J. Putz and C. E. Baston. Sept., 1947. p. 132-5.
 locomotive, reasons for. C. Kerr. Sept., 1947. p. 130-2.
Chronology, electrical engineering. Sept., 1946. p. 146-7.
Circle diagrams for power lines. C. F. Wagner and G. D. McCann. Aug., 1941. p. 57-60.
Circuit breaker
 aircraft. WN. Sept., 1945. p. 141.
 air, panelboard. WN. May, 1945. p. 94.
 arc-furnace. WN. Nov., 1947. p. 190.
 automatic reclosing for rural distribution. WN. Aug., 1942. p. 86.

Circuit breaker (continued)
comparison, oil and air. M. H. Hobbs. July, 1947. p. 98-102.
compressed-air. WN. May, 1942. p. 62.
developments. Jan., 1946. p. 21; Jan., 1947. p. 27.
high-current, railway. Jan., 1946. p. 21.
high-voltage, compressed air. B. P. Baker. Feb., 1943. p. 8-10.
oil, developments. Jan., 1945. p. 6.
panelboard, simplification. WN. Aug., 1943. p. 103.
review. July, 1947. Inside-front cover.
single-pole operation. J. E. Hobson and H. N. Muller, Jr. Feb., 1942. p. 23-5.
See also Condenser bushing.

Circuit interruption
review. July, 1947. Inside-front cover.
See also Circuit breaker; Recloser.

Coal, gasification and liquefaction. Sept., 1947. p. 143-9.

Coast guard. See Marine, ice breakers.

Coca-cola cooler. Jan., 1946. p. 32.

Cold-room, high-power laboratory. WN. Nov., 1941. p. 96.

College laboratory, steam. F. K. Fischer and W. R. Harris. Sept., 1946. p. 142-4.

Color, industrial greys. WN. Nov., 1946. p. 188.

Color television. See Radio, television.

Combustion. See Turbine, gas, studies.

Communication. See Radio; Transmission line, carrier current.

Commutation
high-altitude brushes. H. M. Elsey. Sept., 1945. p. 144-7.
movies. WN. Nov., 1945. p. 175.
review. Sept., 1945. Inside-front cover.

Commutator
inspection of. WN. Aug., 1943. p. 102.
insulation. See Mica, substitute.

Compressed air. See Circuit breaker.

Compressed-air gun tests airplane windshields. May, 1943. p. 45.

Compressor, axial-flow, principles. A. I. Ponomareff. March, 1947. p. 40-6.

Computer. See Calculator.

Condenser. See Steam condenser.

Condenser bushing
manufacture, dielectric heating. March, 1946. p. 34.
oil-impregnated. WN. Feb., 1943. p. 40.
review. May, 1944. Inside-front cover.
sealed-type H. J. Lingal and W. G. James. May, 1944. p. 66-9; Jan., 1945. p. 4; Jan., 1947. p. 8.

Conservation
of energy, Einstein relation. F. Seitz, Jr. March, 1946. p. 35-8.
of energy, review. March, 1946. Inside-front cover.
See also Tin.

Construction. See Casting, precision; Manufacturing methods.

Contact, non-bounce. W. V. Johnson. May, 1942. p. 60; WN. May, 1941. p. 29.

Contact lamp. See Lighting, airport contact.

Contour forming. See Machine-tool, profile-tracing control.

Control
machine-tool load, electronic. G. A. Caldwell. July, 1945. p. 104.
profile milling for propellers. H. E. Morton and G. A. Caldwell. May, 1945. p. 72.
See also Adjustable-speed drive; Electronic; Motor speed control; Servomechanisms.

Controlled atmosphere. See Furnace.

Copper forming. Jan., 1947. p. 15. See also Metal.

Copper-oxide rectifier. See Rectifier, disc type.

Corona, elimination in rotating machines by Coronox. C. F. Hill, L. J. Berberich, and J. S. Askey. Aug., 1941. p. 43-7.

Coronox. See Corona.

Corrosion
bright-plating. SR. May, 1944. p. 75.
inhibiting oil. Jan., 1947. p. 2.
oxidation research. SR. Nov., 1947. p. 186.
prevention, varnish, torpedo. Jan., 1947. p. 2.
protection, cathodic. Jan., 1947. p. 3.
protection, sprayed metal. Jan., 1947. p. 3.
ratings for metals. H. D. Holler and R. A. Frye. March, 1945. p. 56.
titanium treatment. Jan., 1944. p. 13.
See also Electroplating.

Crane, a-c, reactor control. W. R. Wickerham and C. B. Risler. May, 1945. p. 77.

Creep, measurement. SR. Nov., 1942. p. 125.

Cross-pointer instrument. See Instrument, aircraft, blind landing.

Crush grinding. Jan., 1947. p. 18.

Crystal accelerometer. See Measurement.

Crystal rectifier. See Radar.

Current-limiting fuse. See Fuse.

Current transformer. See Transformer, instrument.

Cutouts. See Fuse, high-voltage.

Cyclotron. See Nuclear physics, tools.

D

Damping, ceramic dashpots. March, 1945. p. 46.

Dashpot. See Damping.

Deck-edge elevator. See Elevator, aircraft.

De-ion principle. See Circuit breaker, review.

Demand meter. See Metering.

Demonstration truck. See Power, distribution.

Dielectric heating. See Heating, high-frequency.

Diesel-electric locomotive. See Locomotive.

Differential protection. See Bus-differential protection.

Diffusion pump. See Pump, diffusion.

Direct current, commutation, review, Sept., 1945. Inside-front cover.

Disconnecting switch, load-break. WN. May, 1941. p. 31.

Distribution
equipment economies. A. C. Monteith. Sept., 1944. p. 147-52.
networks for generating stations. J. S. Parsons. May, 1947. p. 93-4.
recloser, rural circuit. WN. July, 1947. p. 128.
secondary networks. Jan., 1947. p. 28.
underground. July, 1947. p. 102.
See also Fuse; Powerhouse, auxiliary drives; Secondary network.

Distribution transformer. See Transformer.

Dredge, sea-going. Sept., 1947. p. 155.

Drive. See Adjustable-speed drive.

Drydock, floating. Sept., 1947. p. 160.

Dust collecting. See Electrostatic air cleaning.

Dynamometer
engine. Jan., 1946. p. 27.
engine testing. R. H. Wright. May, 1942. p. 39-42.
high-speed, development. Jan., 1945. p. 21.

Dynamotor. See Generator, d-c.

E

Einstein, relation between energy and mass. F. Seitz, Jr. March, 1946. p. 35-8; review. March, 1946. Inside-front cover.

Electric iron, wartime standards. Jan., 1944. p. 18.

Electric shovel. See Shovel.

Electric torpedo. See Torpedo.

Electrical engineering, men and achievements. Sept., 1946. p. 146-7.

Electrical iron testing. See Testing.

Electrigrage. Jan., 1944. p. 15.

Electron
characteristics, review. Nov., 1943. Inside-front cover.
emission. SR. Nov., 1943. p. 123.

Electronic
cathodes. Jan., 1947. p. 31.
fish fence. Sept., 1945. p. 147.
furnace control. SR. May, 1945. p. 82.
generator microwave, klystron. S. Krasik. Nov., 1946. p. 176-9.
generator microwave, magnetron. J. W. Coltman. Nov., 1946. p. 172-5.
generator microwave, resonatron. F. W. Boggs. March, 1947. p. 57-60.
heating. Jan., 1946. p. 5.
high-frequency oscillator. WN. Sept., 1945. p. 141.
industria applications, grids. Nov., 1943. p. 106-10; Jan., 1947. p. 8.
photomultiplier. SR. July, 1946. p. 128.
regulator, paper mill. Nov., 1947. p. 162-6.
See also Arc-furnace control; Balancer; Furnace, atmosphere control; Heating, high-frequency; Instrument, remagnetizer; Machine tool, load control; Mass spectrograph; Mass spectrometer; Measurement, dew point; Motor speed control; Oscillograph, cathode ray; Radar; Rectifier, ignitron; Steel mill; Ultraviolet, measurement; Vacuum, leak detection; Welding, resistance; X-ray, timing.

Electron microscope, dust analysis. SR. Nov., 1945. p. 192.

Electroplating
periodic reverse-current. G. W. Jernstedt. May, 1947. p. 89-92.
tin. J. Raymond Erbe. Nov., 1942. p. 117-22.
See also Corrosion.

Electropult, aircraft launching. Sept., 1946. p. 160-1; Jan., 1947. p. 22.

Electrostatic air cleaning
applications. Jan., 1944. p. 13.
cleaning of Precipitron. WN. Nov., 1943. p. 136.
flyash. March, 1945. p. 33; Jan., 1946. p. 7.
general. May, 1942. p. 46.
oil mist. Jan., 1944. p. 13.
Precipitron. May, 1943. p. 42-5.
railway cars, developments. Jan., 1945. p. 23; Jan., 1946. p. 8.
welding fumes. WN. May, 1944. p. 96; C. H. Allen. July, 1945. p. 120.
See also Lamp, fluorescent; Ore separator.

Electrostatic generator. See Nuclear physics, tools.

Elevator, aircraft, deck-edge. Jan., 1946. p. 23.

Enamel
high-temperature. Jan., 1947. p. 12.
scrape-test device. SR. Nov., 1942. p. 124.

Energy
definition. Nov., 1943. p. 117.
relation of matter. F. Seitz. March, 1946. p. 35-8; review. March, 1946. Inside-front cover.
sources. C. C. Furnas. Feb., 1943. p. 2-7; review. Feb. 1943. Inside-front cover.

Engine testing. See Dynamometer.

Everglades, Agro-industry. May, 1946. p. 66-72.

Excitation. See Generator, a-c.

Excitation control, marine. S. L. Lindbeck. May, 1947. p. 87-8.

F

- Fan, steam-driven, developments. Jan., 1945. p. 18.
- Fault clearing, by single-pole breaker operation. See Circuit breaker.
- Fault detection, insulation, transformer. Jan., 1946. p. 26.
- Film, ultra thin. SR. May, 1945. p. 82.
- Filter, air. See Electrostatic air cleaning.
- Fischer-Tropsch. Sept., 1947. p. 143-9.
- Fish. See Electronic, fence.
- Fission. See Nuclear energy; Nuclear physics.
- Flexitest. See Relay.
- Floodlighting. See Lighting.
- Flow gauge. SR. July, 1944. p. 118.
- Flow switch. WN. Nov., 1943. p. 136.
- Fluorescent lamp. See Lamp.
- Fluorescent lighting. See Lighting.
- Fluorescent powders. See Lamp, fatigue of luminescents.
- Flyash. See Electrostatic air cleaning.
- Force, definition. Nov., 1943. p. 117.
- Fosterite-asbestos insulation, mica substitute. E. L. Schulman. March, 1947. p. 61-3; Jan. 1947. p. 9. See also Insulation; Plastics.
- Frequencies, 60 cycles to ultra-high. J. E. Hill. Sept., 1946. p. 134-40.
- Frequency meter. See Vibration.
- Fuel, high-octane, production and significance. Nov., 1944. p. 162-8.
- Furnace
arc, review. Nov., 1945. Inside-front cover.
atmosphere control. WN. May, 1941. p. 29.
- Furnace brazing. See Brazing.
- Furnatron. See Heating, furnace control.
- Fuse
boric acid. WN. Nov., 1941. p. 94.
boric acid for 69 kv. WN. May, 1942. p. 62.
current-limiting. WN. May, 1944. p. 96.
cutout. WN. May, 1942. p. 63.
high-voltage. H. L. Rawlins and J. M. Wallace. Sept., 1944. p. 153-7; WN. March, 1944. p. 64.
surge-resisting. WN. Nov., 1947. p. 192.
- Fuze, proximity. Jan., 1946. p. 23.

G

- Gas analysis. See Mass spectrometer.
- Gaskets, nylon. Jan., 1947. p. 9.
- Gasoline, high-octane; manufacture. Nov., 1944. p. 162-8.
- Gas synthesis, fuel. Sept., 1947. p. 143-9.
- Gas turbine. See Turbine, gas.
- Gauge. See Flow gauge.
- Gear
cases, for marine. Jan., 1944. p. 4.
forming, high loading. Jan., 1947. p. 15.
grinding. T. J. Putz and H. W. Semar. July, 1946. p. 117.
marine. Jan., 1944. p. 3.
shaving. Jan., 1947. p. 18.
- Geared steam-turbine locomotive. See Locomotive.
- Gearmotor. See Motor, gear.
- Geiger counter. WN. May, 1941. p. 28.

Generator

- aircraft, high frequency. J. D. Miner. Sept., 1945. p. 148-53.
- a-c, Boston Edison. Sept., 1947. p. 155.
- a-c, central-station developments. C. M. Laffoon. May, 1947. p. 84-6.
- a-c, Dow Chemical. Sept., 1947. p. 155.
- a-c, excitation, general. C. Lynn. July, 1947. p. 115-20.
- a-c, excitation, ignitron. Jan., 1947. p. 23.
- a-c, excitation, ignitron, description. R. F.

Generator (continued)

- Lawrence and C. R. Marcum. May, 1946. p. 86-8.
- a-c, excitation, ignitron, development. Jan., 1946. p. 17.
- a-c, excitation, ignitron, purpose. C. M. Laffoon. May, 1946. p. 85.
- a-c, grounding methods. S. B. Griscom. Feb., 1943. p. 33-9.
- a-c, grounding of neutral. A. A. Johnson. May, 1943. p. 66-8.
- a-c, hydrogen cooling. R. B. Roberts. Sept., 1947. p. 138-42.
- a-c, industrial. J. G. Partlow. Nov., 1947. p. 172-4.
- a-c, motoring protection. L. L. Fountain. Nov., 1946. p. 190-1.
- a-c, 3600 rpm. Sept., 1946. p. 131-3.
- central-station, developments. Jan., 1947. p. 26.
- d-c, dynamotor for aircraft. Jan., 1944. p. 25.
- high-frequency, electronic. WN. Sept., 1944. p. 158; WN. Sept., 1945. p. 141.
- high-frequency, klystron. S. Krasik. Nov., 1946. p. 176-9.
- high-frequency, magnetron. J. W. Coltman. Nov., 1946. p. 172-5.
- high-frequency, resonator. F. W. Boggs. March, 1947. p. 57-60.
- ultra-high-frequency, radar. Jan., 1946. p. 2, 4.
- See also Aircraft; Brush; Commutation; Power supply, mobile sled.
- Gibson method, waterwheel testing. H. I. Howell. May, 1944. p. 85-8.
- Glass
ultraviolet lamp. Jan., 1947. p. 10.
See Insulation, heat; Synchro-tie.
- Glass fiber. See Cable supports.
- Glass melamine. See Insulation, high-temperature for panels.
- Glass seal. See Metal to glass.
- Glue, plastic. SR. Sept., 1947. p. 150.
- Gradiometer, magnetic. SR. Sept., 1946. p. 141.
- Grain-oriented steel
extent of grain orientation in Hipersil. SR. Nov., 1941. p. 74.
- Hipersil, new magnetic steel for transformers. J. K. Hodnette and C. C. Horstman. Aug., 1941. p. 52-6; WN. May, 1941. p. 30.
- radio-transformer cores. C. C. Horstman. May, 1943. p. 65.
- thin-gauge Hipersil. C. C. Horstman. July, 1944. p. 120-3; Jan., 1944. p. 32; Jan., 1945. p. 31; Jan., 1947. p. 12.
- Grand Coulee. Aug., 1941. p. 47.
- Grinding. See Crush grinding; Gear.
- Ground-fault neutralizer. See Transformer.
- Grounding. See Generator, a-c.
- Gyroscope. See Motor; Stabilizer.

H

- Halide-treated brush. See Aircraft, commutation, high-altitude.
- Heat. See Hilsch tube.
