VOLUME XLVIII NUMBER 5

MAY 2009

Quality Equipment From Universal Radio

GRUNDIG

SATELLIT 750

The Grundig Satellit 750 is an exciting new portable that brings the world to you! You will get complete coverage of all long wave, medium wave and shortwave frequencies as well as FM (stereo to the earphone jack). Plus the Satellit 750 also receives the VHF aeronautical band (118-137 MHz). Your shortwave coverage includes the reception of the single sideband (SSB) mode allowing the reception of ham radio operators, maritime and shortwave aeronautical stations. You can select either wide or narrow selectivity to reduce co-channel interference. You can tune your favorite stations by the conventional tuning knob, quick keypad entry or via the 100 memories. Two speed tuning (1 and 5 kHz) increments are available. And you will enjoy the fidelity you have come to expect from Grundig enhanced by separate bass and treble controls. The radio features both an Earphone Jack and a Line Output Jack. The built in 24 hour clock has a dual alarm and sleep feature. This radio can simultaneously display the frequency and the time on the large backlit LCD. It will also indicate external/internal antenna selection, battery status, selectivity setting, memory, selected bandwidth and attenuator status. Long distance AM band reception is possible with the built-in 360° rotatable, directional ferrite antenna. External antennas may also be attached. 14.65 x 7.24 x 5.75 inches 5.25 lbs. Includes AC adapter or may operate from four D-cells (not supplied). One year limited manufacturer's warranty.

List \$400.00 Order #0750

\$299.95

Switchable BNC jacks are provided for FM and shortwave antennas. High impedance (500 ohm) terminals are provided for simple shortwave wire antennas. There is also a mini jack available for the AM and longwave bands.

Visit our website for great used equipment values too.

Separate bass and treble controls allow you to tailor to your listening tastes.

You can tune the world on your Satellit 750 via a conventional tuning knob, keypad entry, Up-Down buttons or memory selection.

GRUNDIG M300PE

The Grundig M300PE MiniWorld covers: AM and FM plus seven shortwave bands (49, 41, 31, 25, 22, 19, and 16 meters) and fits in your pocket. The digital display shows frequency, 12 hour time and activation of the alarm and sleep timer. It operates on two standard AA cells. A telescopic antenna is featured for AM and SW reception and the AM band uses an internal ferrite loop antenna. The Mini 300 comes with earphones, carry strap and pouch. 3.8 x 7 x 1.2 inches 4 oz. (55:170x23 mm). All Grundig shortwave radios feature a one year limited warranty.

► Purchase your Satellit 750 from Universal Radio for a limited time and receive a **FREE Grundig M-300PE** with your order!

The CLEAR MED is a handy clear plastic stand supports your Grundig G4 or G6 at the optimum viewing angle. Size: 6.75 x 4.5 x 4.75 inches (5.2 inches on the slant).

CLEAR MED

Order #0022

\$8.95

UG295

Order #2122

\$2.95

This optional jack adapter changes the BNC to an SO-238 to accept a PL-259 plug.

NASA Notes

Richard A. D'Angelo • 2216 Burkey Drive • Wyomissing, PA 19610 • rdangelo3@aol.com

The radio listening world was saddened recently with the sudden passing of **Brian Smith** who died in late March after suffering a brain aneurysm. Brian was active in Ontario DX Association (ODXA) matters and along with **Harold Sellers** had attended the 2006 Winter SWL Festival. Brian was ODXA's chairman, and was also very well known as the QSL manager for Toronto's AM740 station. He was only 52 years old. **Rich Cuff** attended the memorial service that took place in Bolton, Ontario the last weekend in March.

Dr. Adrian Peterson, DX Editor at Adventist World Radio (AWR), provides information about AWRs 2009 DX contest on Silent Shortwave Stations which runs throughout the month of June. AWR invites listeners to search through their QSL collections and assemble all QSLs that verify the reception of shortwave stations and/or shortwave transmitters that are no longer on the air. In addition to the regular awards worldwide, there will be special awards for those who include a reception report of AWR's DX program, "Wavescan", via radio Miami International WRMI, in Miami Florida. Here are the details: (1) List what you consider to be the five best QSLs from shortwave stations or transmitters that are no longer on the air; (2) Describe the reason why you consider each card to be one of the best in your collection; (3) Enclose a photocopy or each of these five cards, preferably in color, though black and white is acceptable (do not send originals); (4) Send at least three reception reports on any AWR broadcast from KSDA Guam, or any AWR relay broadcast via any relay station anywhere in the world. All reception reports will be verified with a contest endorsement on the QSL card; and (5) where possible, please enclose three radio cards for inclusion in the Indianapolis QSL collection (no amateur or CB cards). All contest entries must be

postmarked at the listener's location in any country of the world on any date during the month of June, and they must be delivered to the AWR postal address in Indianapolis no later than the end of July 2009. Return postage in the form of currency notes in an international currency, mint postage stamps, or IRC coupons would be appreciated. Also, where possible, provide a self addressed envelope. The only address for the 2009 "Silent Shortwave Station Contest" is: Silent Shortwave Station Contest, Box 29235, Indianapolis, IN 46229 USA. There will be a special award for the world winner, one of the **Jerry Berg** radio history books; and *World Radio TV Handbook* or *Passport to World Band Radio* for continental winners. In addition, there will be special awards for those who send in a reception report on the broadcast of "Wavescan" over WMRI shortwave in Miami, FL.

The 2009 version of the Danish Shortwave Clubs International (DSWCI) outstanding Domestic Band Survey (DBS) was published in early May. I should have a review copy shortly so expect to read a detailed account of this annual publication in *Shortwave Center* in the very near future. However, based on past years, the quality of the DBS is top notch so I recommend that you get your copy early. The 2009 DBS via e-mail in PDF format costs US\$8.00 or EUR 5,00 or 5 International Reply Coupons ("IRCs"). The printed version costs US\$16.00 or EUR 10,00 or 9 IRCs. The 2009 DBS can be ordered from DSWCI, c/o Bent Nielsen, Egekrogen 14, DK 3500 Vaerloese, Denmark. If you want to use Paypal, please contact Andreas Schmid at schmidandy@aol.com for further information.

Here is a quick reminder that **Bob Padula's** Australian Shortwave Guide (ASWG), Edition No. 23 for the A09 Season is now available.

Our Motto: Unity & Friendship

The ASWG Edition No. 23 is a no-frills reference, covering the five-month international shortwave transmission period commencing March 29 2009, and concluding on October 26 2009. It provides comprehensive information of shortwave broadcasting schedules for transmissions intended for Australia, New Zealand and the Pacific Islands, for broadcasts in all languages. The complete schedules for Radio Australia and CVC-Australia are also included. Ordering from outside Australia: US\$10.00 / 10 Euro / 6 British Pounds / A\$10 - cash, five international reply coupons, Australian mint stamps to the value of A\$10, international bank transfer, international bank draft, PayPal (boppadula@mydesk.net.au). Orders

and payments should be sent to: Robert J. Padula, 404 Mont Albert Road, Mont Albert, Victoria 3127, Australia.

Please remember to direct all communications about subscriptions, bulletin delivery issues, Mother's Day gift ideas, the use of PayPal as a payment method, etc. to **Bill Oliver** at the club's Levittown address or to his new electronic address, billoliver@verizon.net. The regular postal address is the familiar 45 Wildflower Road, Levittown, PA 19057. Inquires sent to Wyomissing only slow down the process. Thanks!

That's it for this month. Enjoy this month's edition of the *Journal*; it's another good one. 

FRENDX: Twenty-Five Years Ago (May 1984)

In John Herkimer's Shortwave Center, Dan Robinson, then of the VOA East Africa Bureau, gave his reactions to the Sony-2002 receiver and Ralph Perry reviewed the novel "Aunt Julia and the Scriptwriter" by Peruvian author Mario Vargas Llosa. In Technical Topics, James Herkimer discussed Sherwood Engineering's latest modifications for the NRD-515 communications receiver and Eric Falkenhan wrote about a simple but useful antenna system that he used for many years. Andy Robbins returned with another edition of "Contact." Finally, Michael Schmitz wrote part 2 of "DXing in Europe." Once again Terry Ward filled in as Listeners Notebook editor. Sam Barto's QSL Report column featured an array of Latin pennant illustrations in addition to the 115 countries being reported. Log Report "A" was missing this month. In Log Report "B", editor Jerry Berg noted a new Peruvian, Radio Libertad, on 4910 and Radio Sandino was being heard intermittently on 6200. In Log Report "D", editor Wallace Treibel reported a deluge of logs. Randy Erickson of The Association of North American Radio Clubs issued a press release inviting listeners to its 1984 convention scheduled for Toronto, Canada sponsored by the Ontario DX Association. 

NASWA Flashsheet

Are you getting the latest hot information about what is happening on the shortwave bands? If you have not signed up for the club's electronic *Flashsheet* service, you are missing out on timely news and information about the DX scene that will enhance your shortwave listening pleasure. If you are a current member of the club and want to receive the electronic Flashsheet just drop **Rich D'Angelo** (rdangelo3@aol.com) a note with your e-mail address, location and membership expiration date from your mailing label. You can participate by sending your latest logs to the electronic *Flashsheet* edited by **Mark Taylor**, markokpik@tds.net. The club's electronic *Flashsheet* helps members stay on top of the action with breaking shortwave news and information. The electronic newsletter is an excellent supplement to the monthly *Journal* for the timely dissemination of DX loggings and breaking news.

Calendar Of Events

- May 7-8 Annual Meeting.** The **2009 National Association of Shortwave Broadcasters and US DRM Group** will be held in Nashville, TN 7 and 8 May 2009. It will be co-hosted by World Christian Broadcasting and WWCR. Additional information will be available at a later date.
- May 8 Meeting. Boston Area NASWA Chapter.** The Boston Area DXers have found a new location for meetings. Inquiries about the BADXers may be sent to Paul Graveline at 978-470-1971 or Internet: ctreditor@aol.com. The URL for the BADX guys is <http://www.naswa.net/badx/>
- May 9 Meeting. The Columbus, Ohio NASWA Chapter** will be meeting at Universal Radio in Reynoldsburg at 10:00 AM. Further information is available from Mike Rohde at 614-527-1398 or via e-mail at merohde@columbus.rr.com. The purpose will be to gather other SWL/ DX listening enthusiasts together for informative discussions and sharing of knowledge and information about the hobby.
- May 9 Meeting. The Cincinnati/Dayton Monitoring Exchange (MONIX)** meets at the Lebanon Citizens' National Bank (LCNB), 425 West Central Avenue (Ohio 73), Springboro, Ohio at 7:00 PM. For more information contact Mark Meece at 937-743-8089 or e-mail at antennapig@siscom.net. For additional information about MONIX, check out their web site at <http://www.siscom.net/~mmeece/monix.html>
- May 11-17 Annual General Meeting (AGM) and DX Camp.** The **Danish Shortwave Club International** will hold its AGM and DX Camp from May 11th through May 17th at Vardeborg, Vejers Beach, Denmark. For further information contact Bent Nielsen (bent.elin@webnetmail.dk), Egekrogen 14, DK-3500 Vaerloese, Denmark. More information will be available later on.
- May 18 Meeting. Tar Heel Scanner/Shortwave Listening Group.** Red, Hot and Blue restaurant, 6615 Falls of the Neuse Rd., Raleigh, NC. Dinner @ 6:30PM, meeting @ 7:30PM. Meetings the 3rd Monday of each month. Info, Curt Phillips, 919-773-4522, <mailto:curt@nerdster.net> [curt@nerdster.net](http://www.nerdster.net).
- May 22 Meeting. The Reading Area DXers** will hold another meeting at The Flying Dog in majestic Earlville, PA (Route 562 and Airport Road). Members gather around 5:30 PM near the bar area before heading into the restaurant for dinner and further discussions. Contact Rich D'Angelo (2216 Burkey Drive, Wyomissing, PA 19610; 610-678-0937; rdangelo3@aol.com) for further information about future meetings.
- Jun 6 Meeting. Reading International Radio Group** will hold its next meeting on Saturday October 4 at 2:30 PM in Room 3, Reading International Solidarity Centre, 35-39 London Street, Reading. All are welcome, for further details email Mike Barraclough mikewb@dircon.co.uk or phone 01462 643899.
- Jul'09 Conference.** The **15th National and International Meeting of DXers and Shortwave Listeners** will be held in Cuernavaca City, Morelos, Mexico from 31 July through 2 August 2009. This is the annual gathering in Mexico of radio enthusiasts hosted by Magdiel Cruz Rodríguez, Organizer macruz_dx@yahoo.com.mx. Further information is available at <http://www.gratisweb.com/dxmexico/cuernavaca2009.htm> or <http://www.gratisweb.com/dxmexico/english.htm>. Complete travel details are available at <http://www.gratisweb.com/dxmexico/location.htm>.
- Aug '09 Conference.** The National Association of Shortwave Broadcasters will host the **HFCC/ASBU B09 frequency planning conference** from 24-28 August 2009 in Puna Cana, Dominican Republic.

- Aug '09 Convention. The European DX Council** will hold its annual conference from 28 through 30 August 2009 in Dublin, Ireland. It will be hosted by the Irish DX Club. See this month's NASWA Notes column for up to the minute information.
- Sep '09 Convention. The International Radio Club of America** will hold its 2009 convention from 17 through 19 September 2009 at the Days Inn, 2120 Menaul Blvd. NE, Albuquerque, NM 87107 (Near I-40 and Hwy 25). Guest room rates are \$44.95 for one person or \$54.95 for two people. Phone number for reservations is 505-884-0250. Registration fee is \$25.00 (not including the banquet) payable to Mike Sanburn, P. O. Box 1256, Bellflower, CA 90707-1256. His e-mail address is mikesanburn@hotmail.com.
- Mar'10 Convention. The 23rd Annual Winter SWL Festival**, sponsored by NASWA, will be held at the Best Western—The Inn at Towamencin on 5 and 6 March 2010. Richard Cuff and John Figliozzi co-chair the organizational committee. Although it is early, you don't want to miss this special Fest event. See you there!
- May'10 Annual Meeting. The 2010 National Association of Shortwave Broadcasters and US DRM Group** will be held in Hamilton, Ontario on 13 and 14 May 2010. It will be hosted by Galcom International. Additional information will be available at a later date.

Members are invited to submit items to be included in this calendar to Rich D'Angelo (Internet: rdangelo3@aol.com) or Ralph Brandi (Internet: ralph@brandi.org). 

NASWA Yahoo Group

Join moderator **Dan Ferguson**, the club's Yahoo Group, and other club members to discuss reception of shortwave radio broadcasts, program content, propagation, reception conditions, loggings, hot news and information as well as radio equipment and accessories and any topics related to shortwave radio in general. Please keep in mind that loggings, QSL news, schedule changes should also be reported to the appropriate column editor of the Journal for publication. This forum is a supplement to, not a replacement of, *The Journal*. Subscribe by going to <http://groups.yahoo.com/group/NASWA/>.

Musings

Robert D. Wells, 544 Thompson Street, Peshtigo, WI 54157-1441

North American shortwave proposed survey sounds like a great idea and it should receive a very high response. Whatever the results may be, there should be a survey conducted periodically. Say, once every 3 or 5 years to monitor the listener participation and what they are using for equipment. It should also include the various programming monitored.

This survey would also be a guide for the broadcaster on current trends in listener interests.

It should include the current total number of club members and the number of years they were club members. This would also be used to invite more new members and hopefully too keep shortwave alive. Too many broadcasters are leaving the airwaves because of budget cuts, equipment failure and political intervention.

The survey would be offered with a reasonable deadline and participation strictly voluntary.

Justifying the survey would be in tune with the large shortwave business. It's possible the BBC could again broadcast to North America. And VOA could transmit to all former countries instead of a select few.

We can't afford to lose any more shortwave stations worldwide despite the other alternatives such as AM, FM, TV, Wi-Fi Internet, Sirius Satellite and iPod and MP3. I suppose

each one has its usefulness but the subscriber growth rate is slow or even at a stalemate. Shortwave is still the old standard that is actively productive. Shortwave might be old fashioned but its still the best and most useful median.

I most certainly would be willing to participate in doing this proposed survey. The article in the Journal mentions it would be done through a website or e-mail. Well, I'm not on the Internet. I rely on the telephone or mail service, having no problem with either one.

One last item, shortwave listening is a hobby with much dedication. It would be a sad day when all shortwave is shut down and goes the way of the passenger pigeon. The world still needs shortwave radio. The proposed survey is very important to everyone, even if some don't agree.

Also, before I end this letter, I do believe the NASWA club should have membership cards for each member, whether or not the member is a licensed ham operator, to have something to show friends and other members of other shortwave clubs and for another means of keeping track of members for the club business manager. This should make accounting a little easier. It's a thought worth looking at.

Stephen Wood <hauula7@msn.com>, South Yarmouth, MA

Does anyone have a current address to QSL R. Nacional De Venezuela ? WRTH lists one in Miami but I'm not sure that this will work, although I'm not sure why. Thinking it might be better to send a report direct to Venezuela. This may be a misperception on my part though. Any help would be greatly appreciated .

Brandon Jordan <bcdx.org@gmail.com>, Memphis, TN

These are some initial loggings from an overnight Perseus SDR recording spanning 4600-6200 KHz made from 0245-1220 UTC, antenna used is a Wellbrook ALA100. These almost 10 hours worth of recordings take up 257 GB drive space.

One note from recent DX over the past week or so around the Equinox. One of the prime DX windows for Latin stations for me, and to a smaller degree with African and Asians, is the dawn at transmitter enhancement that spans some 15 to 30 minutes around local sunrise at the transmitter. Stations that are nothing more than a weak carrier all night can surge in strength and many times produce remarkable audio. It appears that for a week or two around the Equinox, this enhancement is practically non-existent. I recall noticing this when I was actively DXing back in the Spring of 2007, and I now notice the same thing this past week.

Sheryl Paszkiewicz <paszkiewiczsheryl@yahoo.com>, Manitowoc WI

After being in the hobby many years, I find I do not devote the time to logging one station which is a relog as I did the first time I logged it when I sent a report and QSLed it. As a result, I find myself adding logs to my personal lists which I do not submit to bulletins. I am now listening more for my enjoyment than competitively. While I don't like reading a logging of an open carrier, I agree that it alerts one to monitor that freq if he needs the station. On the other hand, I also don't like reading 2 paragraphs of a logging either.

Marlin A. Field, 128 Oak Street, Hillsdale, MI 49242

Jorge Zambrano, who has been in the United States with his wife on furlough, has been forced to stay longer than planned because of his illness. HCJB is asking for donations to help cover his medical expenses.

Giovanni Serra <dxe_gterra@fastwebnet.it> Roma, Italy

Ciao from the sunny Roma.

It's springtime here in my city: during last week of March and the first days of April, weather was sometimes windy, cloudy & rainy, with some sunny hours and mild temperature during late morning & afternoon.

Just improved my Radio shack with a new comfortable black leather like high backed wheels armchair: sometimes, it sends me to sleep, especially when listening SW Radios all night long.

Even if the Sun is still spotless, during the period above mentioned, there were some nice openings in the night toward Latin America on 60 meter Tropical Band.

March 29th, caught R. Cultura Ondas Tropicais, Brazil on 4845.23 kHz, just appeared after s/ off of R. Mauritanie, and a presumed R. Buenas Nuevas, Guatemala on 4799.79 kHz. April 3rd, listened an unidentified Rádio on 4955 kHz: possible, but very tentative, the Peruvian R. Cultura Amauta. April 4th, listened an unidentified Radio from Brazil on 4824.99 kHz, well recognizing the typical intonation of Brazilian speakers: some DX bulletins reported Radio Cancao Nova approximately on this frequency. During late night or at early morning before sunrise, also listened the usual LA R. Rebelde, R. Clube do Para, R. Brasil Central and, sometimes R. Difusora de Macapa (April 5th, I did not hear it some hours before sunrise). Before sunrise, also I briefly listened sometimes the powerful WWCR on 5070.01 kHz and VOA from Sao Tome on 4960 KHz. March 28th late night (but I briefly heard it other nights too), I logged the rare Australian VL8K Katherine on 5025 kHz with its English program; at around 2230 - 2240 UT, as Australia faded out, very slowly appeared R. Rebelde with a barely audible audio just over the background rustle, then increasing its signal and audio to fair / good during the night. Really, I think this is one of the most fascinating things of Radio listening. During night, usual poor or fair conditions on 60 meters for Tajik R. on 4765.04 or 4765.05 kHz, and for some Chinese, Tibetan and Indian Radios as well (please, see logs of mine on the appropriate columns). Strong R. Mauritanie listened on 4845 kHz during late night just before Brazil on about this frequency. Instead April 2nd, a barely audible listening, with a tentative identification, for R. Nacional, Bata, Equatorial Guinea on 5005 kHz.

That's all for now. Till the next.

Gerry Dexter <gdex@wi.rr.com>, Lake Geneva, WI

National Geographic Traveler magazine, in its April 09 issue, contains a brief interview with well known travel writer Paul Theroux (The Great Railway Bazaar, etc.). His response to the question "What's the single most crucial thing to take on a trip?" was: "A very small shortwave radio to alert you to world events, the possible horrors of the place you're in, and to give you something to listen to in the hours of the night, when you're alone in the dark."

Don Jensen <dnjkenosha@wi.rr.com>, Kenosha, WI

As usual, Theroux' observation is on target. Gerry's posting also reminds us that we should consider reading, or re-reading some of Theroux' travel writings. Since most DXers are, to one degree or another, geophiles, The Great Railway Bazaar is highly recommended as a starting point, and right up there with it would be The Old Patagonian Express. Fun reads both!

Mike Rohde <merohde@columbus.rr.com>, Columbus, OH

Forgive if this is a dumb question. Normally to terminate the ends of a dipole you pass the wire through the insulator wrap the end around the wire and solder it. Do you do that for a mechanical connection, an electrical connection or both?

This is what I am getting at: In other words rather than solder the end back on to the wire can I tie a bowline knot to terminate the wire end to the insulator. Will this have a negative effect on the antennas performance?

Frank N. Haas KB4T kb4t@kb4t.us

Performance of the antenna is affected by its physical length (relative to frequency monitored) and height above ground. The manner in which you terminate the ends of your wire antenna affect its length only. Soldering the ends is a nice neat thing to do but doesn't usually add much mechanical strength. (Solder isn't a very strong metal.) Mechanical strength comes from the manner in which the wire is twisted over itself prior to soldering. More twists usually means more strength. Soldering the wire protects it from the elements and electrically shorts the coil created at the end of the wire by the twisting. At shortwave frequencies, this very small coil has no noticeable effect even if left unsoldered.

If the wire is small enough and pliable enough to allow you to tie a bowline knot, go for it. It will work just fine. I wonder though: If the wire is pliable enough to be tied in a knot, is it strong enough for the application?

I don't know where you live or what the climate is like so my next few comments will be general in nature.

Assuming you want the antenna to survive for a long time, be sure you use wire strong enough to last under the wind and climate conditions normal to your area. My favorite antenna wire is hard drawn 13 gauge insulated, stranded all copper (not Copperweld) wire. I buy this from Davis RF (<http://www.davisrf.com>). Lots of folks like buying general purpose 14 gauge insulated solid copper wire used for interior house wiring. I find that such soft solid wire tends to break too easily especially in windy conditions. Where the feedline connects to the wires of the antenna, I do my best to weatherproof the electrical connections to slow down the corrosion process. Scotch 2210 Mastic & good quality electrical tape are perfect for this. Check with your local 2 way radio shop and see if they will give you remnants from a professional weatherproofing kit. These contain the mastic and tape.

At the ends, make sure you create a good mechanical termination that won't come undone. That means twisting the wire around itself enough times to assure it won't come undone. 2 inches of such twisting is usually plenty. On the other side of the insulator, consider using quality 1/4 inch or 3/16 inch UV resistant black nylon rope to tie the insulator to its mount or tree limb. Davis RF can supply that as well. A local marine supply house probably has something similar. The biggest problem with wire antennas is the ease with which cheap rope fails and the antenna falls to the ground. Invest in quality and you will enjoy years of good service.

I have enjoyed the use of a 295 foot rectangular loop antenna here at my station for more than 2 years without any sort of failure. In my climate, that's a long time!

Good luck & Good Listening!

Mike Rohde <merohde@columbus.rr.com>, Columbus, OH

Well, we had our 7th meeting of the Columbus chapter of NASWA this month and were pleased to have none other than Mr. George Zeller do a presentation on Pirate Radio. We had 15 people in attendance and George did his usual great job on the topic. It was interesting to observe the group as George presented as once in a while you would catch a smile or smirk from some attendees that indicated that everyone was really enjoying the event. Fred had a very nice selection of items for door prizes that were greatly appreci-

ated. Fun was had by all! Again we here in Columbus would like to thank George for his time, his wit, his humor and knowledge on this topic. We would also like to thank Fred Osterman for his devoted support of the Columbus chapter of NASWA. The entire crew at Universal Radio has always gone out of their way to make us feel at home there.

Following George's presentation Ronnie Stroup presented a review of the Grundig Satellite 750 that he won at this years Winter Fest. His efforts and organized presentation were appreciated.

I should mention that after many years of going to the winter fest and coming to about every meeting of Columbus, NASWA (it is a 1 1/2 hours drive each way for the meetings) Ronnie Stroup and his brother-in-law/ best friend Dave Balint joined NASWA this year at the Fest! Welcome to the family! Now I will have to stop referring to them as the step children, hi.

Richard A. D'Angelo <rdangelo3@aol.com>, 2216 Burkey Drive, Wyomissing, PA 19610
It is always an unpleasant experience when the hobby loses someone but Brian Smith's sudden passing was more so because he was only 52 years old. Although not a NASWA member, Brian was very active in the Ontario DX Association serving as its Chairman at the time of his death. I had a chance to meet him at the 2006 Winter SWL Festival.

You never know what will happen when you send out a reception report. Recently, Henrik Klemetz was reviewing some old cassette tapes and he came across one that he thought I would be interested in. It was a Dutch pirate, Pirate Freaks Broadcasting Service on 15050 kHz, broadcasting in December 1990 where the announcer thanked me for my reception report. I checked my QSL files and I did verify them back in 1990. Thanks Henrik for sharing the MP3 file.

In April, I was on a golf trip to the Myrtle Beach area. While in the Myrtle Beach area, I had planned to visit with Dan Ferguson provided he was able to pull himself away from the many beach parties he attends as a retiree. I had an old Hallicrafters SX-100 that a friend unloaded on me recently. Dan was interested in providing this relic a good home so I transported the beast south for its retirement. However, my schedule down south was more complicated than I imagined and the plan fizzled. I have no idea if the SX-100 operates or not, but I am sure it will once Dan finishes doing to it whatever he will eventually do to it.

Here is a rundown of this month's QSL returns. People's Broadcasting Station Nei Mengg verified through China Radio International with a full data "Laoshan Velodrome" card. Democratic Voice of Burma via Wertachtal verified an electronic report with a full data e-mail attachment from Media Broadcast from v/s Michael Puetz. The reply noted, "Please send your answer and reception reports to QSL-Shortwave@media-broadcast.com. You can find the active MEDIA BROADCAST (DTK) schedule at www.media-broadcast.com/en/radio/kurzweille.html." Furusato no Kaze verified with a no data personal letter from v/s Sunouchi Tomoyuki explaining that "Unfortunately, as you know, we do not issue any verification cards (SWL/QSL card), but according to the description you gave us, we can confirm it was our Japanese program "Furusato no Kaze"." Enclosed were brochures about the return of abductees. Radio Farda via Wertachtal verified with a date/frequency/language "Illuminate Your World" card. The card neglects to indicate "Radio Farda" and leaves blank the transmitter location box. A far cry from good job Dave Walcutt performed in handling such chores. CVC Africa verified with a no data electronic reply from v/s Brigitte who apologized for the delay in getting back to me. She works on the CVC-TV side which was presenting the program feature short-wave so my report went to the TV people who do not have a QSL card.

Easy Listening

Richard D. Cuff • 42 North 37th Street • Allentown, PA 18104 • richard@thecuffs.us

When you don't know what to listen to...consider the RNW archive

I'll bet most NASWA members have fond memories of listening to **Radio Netherlands** over the years...whether it was the *Happy Station* or *Media Network* or *Newsline* or the *Weekly Documentary*, there was no doubt that Radio Netherlands produced top-quality programming. Of course, RNW still does...but, alas, no longer via shortwave to North America...there's *The State We're In* and *Curious Orange* and *Bridges With Africa*, three programs that are at the top of their genre...and *Newsline* remains a weekday staple.

You may remember that, for many years, Radio Netherlands produced weekly documentary programs that took a single issue and drilled deeply into it, producing many fascinating, highly detailed, well-produced radio programs. Thankfully, Radio Netherlands has made many of them available for on-demand streaming.

So, if you're stumped for something interesting to listen to, consider visiting the Radio Netherlands documentary archive. Visit the Radio Netherlands website at <http://rnw.nl>, click on <Radio Programmes> in the left margin, then look for <Documentaries> at the bottom of the page. I counted more than 50 documentaries available for listening...surely you'll find something there that piques your interest. Even if the program is several years old, you'll find it interesting listening. In some instances, you'll find an archived program to be eerily prescient as well.

Bits and Pieces

Voice of Nigeria – VONScope

Quick...name the most populous English-speaking countries in the world...did Nigeria come to mind? Although it has approximately 150 million people in an area twice the size of California, it's easy for Nigeria to not appear on your mental radar screen of English-speaking countries. Nigeria has long maintained an external-facing shortwave presence with the **Voice of Nigeria**; it broadcasts daily on shortwave in English from 0500 to 0700 on 15120, 1000 to 1500 on 9690, and 1700 to 2100 again on 15120, all times UT. It's tough to consider the **Voice of Nigeria** as an Easy Listening catch via shortwave, at least here in Eastern Pennsylvania. Most certainly not in the same class as Radio Netherlands in the good old days. Well, VON's website, <http://voiceofnigeria.org>, has long mentioned live webcasting as "coming soon", and this has now gone live...at least for part of the day and part of the time. It seems to be a hit-or-miss proposition, but if you're looking for something out of the ordinary, you should add it to your list. I'll highlight some of the specific programs on the VON schedule from time to time.

VONScope (weekdays 0500) is a weekday 30-minute news magazine featuring stories about Nigeria as well as world news of interest to Africa and Africans. The program features an economic news segment as well as sports news. The program features interviews and audio actuality, which helps to keep the program interesting. It's a decent way to hear about Africa from an African perspective.

New Series from the BBC World Service

Something Understood

This is a new spiritually themed weekly half-hour program. Longtime World Service South Asian correspondent Mark Tully uses music, prose and poetry to explore religious topics. A late April edition focused on the last words of Jesus on the cross, with Tully interviewing a UK clergyman and delving into the physical, emotional, legal and spiritual aspects of Jesus' words. West African shortwave airtimes that may reach North America include Saturdays 1832 and Sundays 1332; Webcast air times include Sundays 1432 and 2132.

Letter From...

In a resurrection of one of the most beloved features of the World Service, Alastair Cooke's *Letter From America*, comes this new series that is a topical essay, like the old program, but from various leading global commentators. The program is only nine minutes long, versus the old 15-minute length of *Letter From America*, but nonetheless might be worth a listen. If you're trying to catch the World Service on shortwave from its West Africa services, try Sundays 2132. XM listeners can try Sundays 0632 and 2332, plus Mondays 0132. The live webcast air times are Saturdays 1032 and 2332, plus Sundays 0232.

New programs from the Voice of Turkey

These have already been on the air since January, but this is the first time I've had a chance to mention them. Thanks to Rich D'Angelo for passing along this info.

This World is Ours

One of the most important items on world agenda is global warming and this program will delve into the global and environmental factors causing our old planet to suffer

unfortunately even more in the coming decades. The causes of what has caused this alarming situation both in Turkey and the world will be concentrated on and the possible remedies will be discussed.

From Fortress to Fortress

The fortress shedding light on the ancient civilizations which flourished in Anatolia, merged into one another and created new syntheses are what this program discusses.

Turkish Pop Music from Past to Present

Among the music programs which we believe will most enrich our broadcasts will be this particular one. It will feature the chronological history of Turkish pop music as of the 60s, giving examples of the musical terms, jargon and singers of those years.

The note from the VOT also adds that "...as always, our broadcasts will be punctuated with more feature programs from culture to arts and history to international relations, all geared to fulfill your demands and wishes."

The Voice of Turkey's English Service can be heard in North America at the following times and frequencies:

0400-0500 UTC on 6020 and 7325 kHz

2300-2400 UTC on 5960 kHz

Sorry for an abridged column...

The combination of work and family responsibilities has left little time for my listening hobby for the past couple months. Hopefully things will ease soon...

See you in June!

DX Target: Open Radio for North Korea Radio in Support of Reconciliation between North and South

By Richard A. D'Angelo

The Korean Peninsula has been a trouble spot for a long time. Over the years there has been a massive collection of clandestine stations getting their messages out to address unification, among other issues. Some of them include Radio Echo of Hope, which began in June 1973, however, prior to that, it was active under the name Voice of Reunification. Another was the Voice of the People, which began in June 1985. Also, there was the Voice of National Salvation, which became an active station in August 1985. This DX Target will focus on a recent addition to the "peace" process on the Korean Peninsula, Open Radio for North Korea ("ORNK").

Background

An independent Korean state or collection of states has existed almost continuously for several thousand years. Between its initial unification in the 7th century from three predecessor Korean states until the 20th century, Korea existed as a single independent country. In 1905, following the Russo-Japanese War, Korea became a protectorate of imperial Japan, and in 1910 it was annexed as a colony. Korea regained its independence following Japan's surrender to end World War II ("WW II") in the Pacific in 1945. After WW II, a Republic of Korea ("ROK") was set up in the southern half of the Korean Peninsula while a Communist government was installed in the north ("DPRK"). During the Korean War (1950-53), United States troops and United Nations forces fought alongside soldiers from the ROK to defend South Korea from DPRK attacks supported by China and the Soviet Union. An armistice was signed in 1953, splitting the peninsula along a demilitarized zone at about the 38th parallel.

South Korea was able to achieve rapid economic growth with per capita income rising to roughly 14 times the level of North Korea. In 1993, Kim Young-sam became South Korea's first civilian president following 32 years of military rule. North Korea on the other hand continues to be firmly ruled by Kim Jong Il.

In June 2000, a historic first North-South summit took place between the South's President Kim Dae-jung and the North's leader Kim Jong Il.

Geography

North Korea is located in East Asia on the northern half of the Korean Peninsula. North Korea shares a border with three states, including China along the Yalu River, Russia along the Tumen River, and South Korea along the Korean Demilitarized Zone ("DMZ"). The Yellow Sea and the Korea Bay are off the west coast and the Sea of Japan (also called East Sea of Korea) is off the east coast.

South Korea is located in East Asia, on the southern half of the Korean Peninsula jutting out from the far east of the Asian land mass. The only country with a land border to South Korea is North Korea, lying to the north with 238 kilometers of border running along the DMZ. South Korea is mostly surrounded by water and has 2,413 kilometers of coast line along three seas. To the west, is the Yellow Sea, to the south is the East China Sea, and to the east is the Sea of Japan or East Sea.

The Korean Peninsula extends for about 1000 kilometers southward from the north-east Asian continental landmass. The 8,460 kilometer coastline of Korea is highly irregular, and North Korea accounts for 2,495

kilometers of this. About 3,600 islands lie adjacent to the Korean Peninsula, mostly along the south and west coasts.

The Mission of ORNK

Open Radio for North Korea broadcasts radio programs to the listeners in North Korea. For the most part, the station broadcasts programs prepared by producers with a message for North Korea citizens. The station encourages participation. Anyone who wants to deliver his/her voice to the North Koreans is welcome to participate in the program.

According to the station, the messages it broadcasts belong to the participants. ORNK is not limited to any political, economic, social, cultural or religious sphere. Any message can be broadcasted as long as it does not violate intellectual property rights and ethical regulations on international broadcasting.

ORKN supports *true* reconciliation between the North and South Korea. The station believes that "sincere conversation is necessary for true reconciliation between the people of North and South Korea." ORNK hopes to provide opportunities for open communications and conversations between the people of North and South Korea and the global community.

Finally, the ORNK organization provides consulting service about broadcasting to the North Koreans. Anyone interested in broadcasting to the North Korean people but does not know how, can use the resources of their organization to make broadcasting a reality.

Open Radio for North Korea's Executive Director Young Howard has said that the *"Inter Korean Summit Meeting in 2000 was the beginning. Now is the time for the Korean people all over the world, including the people in North and South Korea to play major roles in the process of reconciliation. For this to come true, conversation with North Koreans living in a closed society is necessary. However, channel of conversation with North Koreans remains restricted. We would like to open up a channel."* He has noted that South Korean society is free and open and that compared

to the past, a wide range of information on North Korea has been made public. Nevertheless, he sees a need for more improvement in South Korea. The North Korean society is closed compared to the South Korean society. Executive Director Howard has stressed that more efforts must be made in North Korea by allowing external broadcasting including radio and television as well as the Internet needing to be made public. He considers the station's mission to deliver the voice of North Koreans to the North Koreans. The Executive Director believes the station's role will be completed when North Koreans become the owner of the station.

ORKN Programming

Open Radio for North Korea broadcasts a variety of programs into North Korea. One of the programs is personal messages of separated families in Korea, including abductees' families and families of prisoner's of war, and North Korean defectors' families. Another program is a student college program, a public access program where students broadcast through one of fourteen participating colleges their own program for North Korea. The topics vary from love stories of young people, to book reviews and songs, and history discussions. For the most part, programs consist of educational and cultural messages for the reconciliation and cooperation between the two Korean peoples.

Open Radio for North Korea admits to support by the United States Congress although Tae Keung Ha of ORNK notes that the U.S. government does not tell them what you can and cannot be said on the radio programs. They enjoy full autonomy in program development and presentation while adhering to journalistic ethical standards that are observed by any journalist in any open media.

Vincent Brossel of the Asia desk of Student Media Without Borders in Paris once noted that the station's goal is to increase the press freedom in North Korea and to break the walls between the South and the North Korean people. He stated that for many years, Reporters Without Borders published

an international press freedom ranking with North Korea being the worst country. North Korean freedom of expression suffers from government control, censorship, propaganda and repression. North Korean people are prevented access to free information. Brossel believes that the only to break the wall of censorship is to promote the free radio, thus he supports the Open Radio for North Korea initiative. Supporting the project provides a chance to the North Koreans to hear something different from the usual propaganda fare they must live with on a daily basis.

When North Korea recently defied international calls for restraint and launched a rocket, purportedly to put a satellite in orbit, it wasn't long before a covert correspondent there was on her cell phone to editors in Seoul. For South Korean radio station founder Young Howard, this represented breaking news from a hostile, inaccessible land.

People were celebrating a colossal success, she whispered. "If we have starved, it has been in sacrifice of this glory," she quoted the train passengers as saying. "The Americans cannot dismiss North Korea's new weapon." Howard knew differently because U.S. intelligence reports said the rocket never made it into orbit. Within hours, Open Radio for North Korea was broadcasting its own report to listeners across the border. "News out of Pyongyang violates the basics of journalism," he said. "We tell the other side of the story."

Howard's station is among half a dozen Seoul-based operations that each day dispatch news and opinions into North Korea. Some, like Open Radio, are the work of concerned outsiders. Others are run by defectors, many of whom use pseudonyms because they know vengeful officials could persecute family and friends left behind.

Considering the shortage of radios in North Korea and the penalty for owning one, the broadcasters don't know how many people actually hear their voices. For Howard, it's like putting a message in a bottle and tossing it out to sea. "We don't expect any answers," said the 40-year-old father of

three who was born in Busan, South Korea. "We're just putting information out there in the hope that people's loved ones will hear."

By far the most popular program for Howard's station is "Unsent Letters," which broadcasts messages from outsiders seeking to get word to friends and family in North Korea. It's an electronic bulletin board of sorts. Often the communiqués are sentimental recollections, bits and pieces of memory filled with raw emotion.

Experts are divided on the role the radio stations play in the lives of North Koreans. Some call them tools of change, while others say their operators are frustrated defectors shouting into the wind.

How to Hear and QSL ORNK

This past DX season, Open Radio for North Korea operated on 9,930 kHz from the facilities of KWHR in Naalehu, Hawaii broadcasting to North Korea and the three eastern provinces in China. Transmissions were from 1200 to 1230 UTC. Recent schedule information indicates that ORNK can be heard on 11,640 kHz from Tashkent, Uzbekistan at 1300 to 1400 UTC and on 7,510 kHz from Yerevan, Armenia from 2100 to 2200 UTC. The station has received reception reports from around the globe with many of the letters appearing on the station's website (<http://www.nkradio.com>).

The station will verify listener reception reports. Executive Director Young Howard sent a date/frequency letter confirming reception in a reasonable time frame. My reply arrived in about 50 days. Receptor reports in the English language reports can be sent to the station at:

Open Radio for North Korea
P. O. Box 158
Mapo, Seoul 121-600
Republic of Korea

Alternative, electronic e-mail reception reports can be sent to the station using the following electronic address: nkradio@nkradio.com.

As always, remember to send in any Open Radio for North Korea logs to electronic *Flashsheet* editor Mark Taylor and to Wally Treibel for the *Log Report*. Of course, those

interesting QSL verifications should be sent to Sam Barto for inclusion in the *QSL Report* column. Good luck with this DX Target.

From the April 2009 NASB Newsletter...

The Happy Station Show Returns

Press release from Keith Perron

After an almost 15 year absence on the shortwave dial *The Happy Station* Show returned this March. The Happy Station is one the longest running shows ever on shortwave, having begun in March of 1927 when Philips Radio started broadcasts over station PCJJ as a way to reach the Dutch East Indies (Indonesia). Sometime in 1928 a very young Edward Startz created the Happy Station. He changed PCJJ to PCJ, which he said stood for Peace, Cheer and Joy. The show continued until the start of the war. During WW2 the only shortwave done by the Dutch was via the BBC in London broadcasting back to Holland with Radio Orange. After the war around 1946 the Dutch Government founded Radio Nederland Wereldomroep and Edward Startz returned to microphone as presenter of The Happy Station Show. Edward remained with the show for 43 years, way past the legal age to retire in the Netherlands.

In January 1970 Tom Meijer, who was working for the Dutch section of Radio Nederland, took over as host. This was a major transition. With Tom, the show took on a new life and energy. The Tom Meijer era was one of fun, with Tom making you feel that the Sunday broadcasts were bringing all the listeners together for a family gathering. It truly was your Sunday family show of smiles across the miles. Tom Meijer stayed with Happy Station for 21 years until he retired. After he left the show it was first taken over by long time Radio Netherlands announcer/producer Pete Myers and then by Jonathan Groubert. The Happy Station Show was canceled in 1995.

Why return Happy Station? The Happy Station had and still has a very loyal audience,

and now the time is right to return with the same message of Peace, Cheer and Joy and Smiles Across The Miles that Edward and Tom brought listeners every week.

What is different? One of the major changes with the Happy Station today is it won't be a Radio Netherlands production. Instead it will be independently produced and distributed. Radio Netherlands has given permission for the new producer and presenter to use the name Happy Station, as long as it's made clear there is no affiliation with Radio Netherlands.

The new Happy Station host will be Keith Perron, a Canadian broadcaster who has been based in Asia for almost 10 years. He has worked as an announcer/producer with CKUT Montreal, Radio Canada International, Radio Havana Cuba, CHMB Vancouver, China Radio International and has freelanced for Monitor Radio, CBC Radio and others over the last 17 years.

The new Happy Station Show won't be produced in Holland, but will be based in Taipei, Taiwan and will be distributed using many different channels and all aspects of technology, new and old, to bring the show to the audience. The first will be shortwave on the frequency of 9955 kHz via WRMI (Radio Miami International) for listeners in North and South America. After the show's first transmission on shortwave, it is uploaded as a podcast so fans of the show not in the target region will be able to tune in. A plan is in place to bring it on shortwave to other regions of the world; this will be announced at a later date. A Facebook page has also been set up where listeners can send in pictures and recorded messages, which will be used on the show.

With the revival of The Happy Station Show there will also be a Happy Station youtube channel, where listeners will be able to upload videos from wherever they are in the world. The new host of the show will also present videos and a behind the scenes look at the new show and its new surrounding.

For listeners who remember the Spanish version of the show, La Estación de la Alegría, Keith will at a later date present both editions. At the beginning the show will be bi-weekly. When the Spanish edition comes at a later date, it will alternate with the English Happy Station.

For those who fondly remember Tom Meijer, you will also have a chance to hear him again in guest spots as well as some of the songs he recorded at Radio Netherlands over the years. The first edition was a tribute to

Tom and the original Happy Station with contributions from listeners from around the world and some very famous voices from the shortwave dial.

For more information, audio samples and pictures contact:

Skype: pcj.happystation

Email: pcj.happystation@gmail.com

Telephone: +886 938408592

Facebook: The New Happy Station

Post: Happy Station Show Attn: Keith Perron, 8th Floor, No47, Lane 31, Section 1, Sanmin Road, Banciao, Taipei, Taiwan (ROC), 22070

The current shortwave schedule for The Happy Station is 0100-0200 UTC Thursday to Latin America and 1500-1600 UTC Thursday to North America—both on 9955 kHz. These transmissions can also be heard via a live Internet stream at www.wrmi.net

Shortwave—My View

by Keith Perron

Guest commentary for the NASB Newsletter (your responses are welcome)

My very first job on shortwave radio was around 19 years ago when I did some replacement work for Radio Canada International's English language service to Asia. During that time I have seen so many changes, but not always for the best. Since around 1991 all of us have seen shortwave broadcasters drop frequencies, cut back on programming and reduce broadcast hours. The question that many of us who work in this medium and listen is: Is this the right way to go? Yes it's true that since the internet took off, broadcasters such as the BBC, Deutsche Welle, Radio Netherlands and others now have another means of distribution and can attract a different audience that normally would not listen on shortwave. But! To cut off an audience of hundred of thousands or I would even go as far to say millions of people who have shortwave radios and are regular listeners is very short sighted. Myself and many others are asking why, why, why? What's going on?

I think we need to examine when all this started happening. In the early 90s just after the collapse of Communism in Europe, stations started to think how to get listeners to listen. This is around the same time many managers of SW stations started to retire. The new generation of managers (I should also state not all) are just that: managers. Many of them know nothing or little about radio—let alone shortwave—to be able to create programs for an international audience that wants to tune in. It's almost like when lawyers and accountants took over the music industry.

Many of the new generation of station managers think that switching off shortwave and relaying on internet and satellite is the way to go. A few years ago I was at a radio conference in Tokyo, Japan and the director of a well-known station—sorry, I won't mention any names—said that shortwave is dead. During the question and answer period of his speech, I had a number of questions I wanted to shoot off. My first question was "Have you ever listened to shortwave or do you even own a shortwave radio?" His answer was "No!" And he's running

a shortwave station? My second question was "How do you know people don't listen to shortwave?" Well, this was when I could not believe my ears. He said that recently he and a number of other directors from Radio Blablabla went to the US, Canada, Australia and some countries in Africa and found no one listened to shortwave, let alone radio. This led me to my third question: "Where exactly did you go?" His reply: New York, Boston, LA, Brisbane, etc, etc, etc. That's when I and a few others in the room started to giggle. I then said, "Wait a min. Did you go anywhere without a 4 or 5 star hotel? Did you go anywhere in the US or Canada which is not a big city?" He said "No!" He then added they could get a much larger audience by having programs relayed on local FM and AM stations. My reply to him was "That's great! But when do your programs air?" This is when he seemed a bit shocked, as I was well prepared and started to list off some relays. I said yes, your station Radio Bla bla bla is on local radio in Canada on the CBC (Canadian Broadcasting Corporation). Would you like to know the time? 4am. Radio Sweden is also on the CBC at 2:30am. Oh, your program is also on NPR in Burlington, Vermont at 5:30am; Seattle, Washington on Sundays at 11pm. And I went on and on and on. I said yes, the domestic relays are good, but you have no control over when local stations put you on air, whereas before people could listen on any number of frequencies at almost anytime. And you're bringing in a new audience? Who? It was at that point he said he needed to run to another appointment.

Another point is content. In the last 15 years or so it seems that all shortwave stations do is news and more news, all trying—I say TRYING—to be like a mini BBC or VOA. After a while if you tune in you will find that the majority of the news put out by the small to medium international broadcasters is all the same. If I want to find out what's going on in my corner of the world I tune to the BBC. Why would I listen to Radio Bla bla bla for an hour to hear the same thing that's being broadcast by the BBC? If I tune to stations like Radio France, Deutsche Welle, Radio Netherlands or Radio Canada International, I want to hear something different.

Like a good program about music, culture or something silly. I strongly believe that if SW wants to catch an audience, stations need to do something different. People at one time did and still do tune in for interesting content, interesting personalities, but now it's nothing more than generic McDonald's for the ears. It's no wonder people don't tune in as much.

My next point is budget. Yes we have seen budgets at stations cut, but maybe it's time to not cut back on programming, but rather to look at the way you do programs. Radio Canada International, which has had severe cut backs since the early 90s, could be a case in point. RCI, like some other international broadcasters, have so much overhead it's not funny. At RCI you have in-studio technicians. What luxury. In almost every station I've worked at as an announcer/producer you did your own technical work. And now with the new studio technology it's even easier than it was 10 years ago when tape and LP's were still widely used. When I was at China Radio International, I used to produce and present a daily 30-minute current affairs program called Real-Time China. How many people helped me? Zero! I would set up interviews, research, write, edit and transmit the program to master control for broadcast to North America and Europe. But yet stations like RCI and others have people that do these things for the producers and presenters. I mean really, what luxury! So when cuts are made, where is it? First programming, then frequencies and third staff. Then what do you have? Programs no one hears or let alone listens to!

Something that many programmers and managers don't think of is how important SW is even to a region like North America. Do any of them know how many people tuned in during the aftermath of Hurricane Katrina? From what I've been able to find out, SW was the only way to hear news, as many of the local stations had no power or were knocked off air when their transmitter sites were damaged. During the 2005 tsunami, which devastated Indonesia, Sri Lanka, India, Thailand, and Maldives with almost 300, 000 people killed, shortwave was the only way to send and receive infor-

mation. In 2006 an earthquake off the coast of Taiwan damaged an underwater fiber optic cable which made internet traffic come to a snails pace. I remember for almost 2 months trying to listen to radio online, but it was impossible. But guess what? My radio worked. During the earthquake in China that killed nearly 70,000 people in Sichuan Province, SW was also the only way to keep local people informed and to inform relief workers who were in the region. I could continue to give more examples.

Let's move to China. Some stations feel that maybe shortwave to the People's Republic is not a good idea because of the amount of jamming done by Chinese authorities with FIRE Drake. This is silly. I lived in Beijing for over 8 years and never had a problem to tune in. Yes it's true that frequencies directed to China were jammed, but all I had to do was tune to a frequency for let's say Africa or Eastern Europe, and had no problem to listen. This is the magic of shortwave. You can have a program directed only to Europe or somewhere else, but you can also listen in a different region as the signal is bouncing around. Try listening to online radio in China from VOA! BLOCKED! Radio Canada International, BLOCKED! And the station websites which are not blocked from RFI, DW, RN or Radio Sweden can't be listened to online because of the Great Firewall Of China which slows down everything so much it can take up to an hour—sometimes more—for a program to be downloaded.

So finally. Is shortwave dead? No! Stations, managers and programmers just need to stop thinking of the internet and domestic relays as new toys. If it's not broken, don't fix it, improve it. My feeling is that over the next 10 years or hopefully less, the stations, people and governments that have cut shortwave will wake up and say "What have we done?" Yes it's true that nowadays there is much more competition with the 300 TV channels that are delivered to our homes, or we can just click and listen to our favorite program. But radio and shortwave is still the most economical medium.

To end, I would like to say to every international broadcaster: Produce interesting programs that will make people want to listen on shortwave. Yes, music does not sound that great on SW, but if you have good radio personalities and interesting programs people will listen. Promote shortwave as a very economical means to reach millions of people. Look into how to improve your shortwave signal instead of just cutting it. And do something for all the loyal shortwave listeners that are now cut off and have no other way to tune in anymore. Bring back the respect we all once had.

Editor's Note: An audio version of this commentary running about 11 minutes is available as an mp3 file upon request from info@wrmi.net.

Two stalwarts of shortwave respond to Keith's remarks...

Anyone who has heard me speak about shortwave in the post-SRI era will know that I concur completely with Keith Perron's assessment. It's as though we were in collusion. I assure you, we are not! His perception is, in my view, spot-on. My praise, compliments and congratulations go to him for adding his outspoken voice to this subject, and for his courage to stand up to management in Tokyo. The gentleman concerned obviously lost a lot of "face", but it was his own fault. Hats off to you, Keith!

Bob Zanotti
Swiss Radio International
Switzerland in Sound

Bravo!!! and many of them to Keith for some extremely cogent comments on the present state of affairs in SW broadcasting, or should I say international broadcasting.

Keith certainly hit the nail right on the head in taking the bean counters and the so called "managers" to task for their attitudes and total lack of knowledge about the business they were in, as well as the advantages of using SW as a broadcast medium. When Keith was recounting the

time he attended the conference in Tokyo and gave that unidentified station director a good grilling in the Q & A session, I could just visualize the squirming in his seat that this incompetent person must have done. This director might just as well have been the director of a shoe factory, because he certainly didn't have a clue about what SW is all about! Let's hope that many of this person's international broadcasting colleagues read Keith's comments. I can't help but wonder though, whether it would have any effect at all even if they do.

Keith's commentary made me realize just how fortunate I was during in my career in international broadcasting. Having had a technical background I had a great interest in the engineering side of SW broadcasting and was well versed in things like back of the beam coverage and out of target area reception, several of the things that Keith mentioned in his commentary. I was extremely fortunate, since at one time I was producing the majority of the weekend feature programs heard on all of RCI's English transmissions, to have been allowed to decide which programs went on which transmissions to the various target areas. I'm sure that there were very few of my international broadcasting colleagues, program producers at other stations, who enjoyed this freedom. I have always been extremely grateful for this.

I did however suffer the slings and arrows of management during program evaluation sessions, whose theories did not match what I had heard directly from listeners whenever I attended an SWL gathering in Canada, the USA or Europe. According to the management people I shouldn't run anything on my programs that lasted any longer than two and a half minutes. The theory being that the listeners' attention span was only that long for any given topic. What utter rubbish, as I'm sure the vast majority of my listeners would agree. I never agreed with that particular dictat, and I never did adhere to it! I guess I was lucky and just kept getting away with it!

Keith's commentary should be required reading for anyone in management of the stations that are left on SW these days. Sadly it's too late for the stations that are no longer on the air.

DRM USA and NASB Annual Meetings

Last Call for Registration for 2009 NASB-DRM USA Annual Meetings

You can still register for the 2009 NASB-DRM USA annual meetings in Nashville, Tennessee on May 7 and 8. Anyone interested in or involved in shortwave radio is welcome to attend. The meetings will take place at the Holiday Inn Express in downtown Nashville. Registration is completely free of charge; you only need to pay your own travel and lodging expenses. If you plan to attend and have not already done so, please notify NASB Secretary-Treasurer Dan Elyea that you will be attending. His e-mail is: fsiyfr@okeechobee.com.

Here is the latest tentative agenda for the work sessions of the meetings:

Thursday, May 7, 2009—DRM USA Annual Meeting

9:00 am—Opening of DRM USA Annual Meeting in the Holiday Inn Express Amphitheater. Welcome remarks from World Christian Broadcasting, WWCR and DRM USA officers. The Amphitheater meeting room is sponsored by **TCI International**.

9:05 am—The Latest Developments in Digital Radio Mondiale—Adil Mina of Continental Electronics and the DRM Consortium will report on what is happening with DRM around the globe.

9:30 am—WinDRM: Amateur Radio's DRM Evolution—One of amateur radio's digital voice and image transfer modes was derived from DRM's Dream receiver/transmitter software. Mel Whitten, who holds amateur radio callsign KOPFX, will talk about how these amateur modes were developed, how they are used and the transmitting and receiving equipment used.

10:00 am—A Profile of Ten-Tec—the Tennessee company that makes HF radios for amateurs and shortwave listeners. The Ten-Tec RX-320D was one of the first DRM software-capable receivers on the market. The speaker will be Gary Barbour.

11:00 am—Question and Answer Session with NASB Attorney Edward Bailey

Friday, May 8, 2009—NASB Annual Meeting

9:00 am—Opening of NASB Annual Meeting in the Holiday Inn Express Amphitheater. Welcome remarks from NASB officers. The Amphitheater meeting room is sponsored by TCI International.

9:15 am—Panel Discussion: The State of Shortwave Listening and Broadcasting in Europe. Panelists will include Michael Murray, former Secretary General of the European DX Council.

9:45 am—Sports Programming on Shortwave—Independent producer Bruce Baskin will tell about his experiences with World Cricket Today and World Baseball Today on shortwave.

9:55 am—Update on Digital Aurora Radio Technologies DRM project in Alaska by Don Messer

10:15 am—New Technologies from Galcom International—an update on Galcom's new suitcase-sized transmitter and the possibility of a low-cost DRM receiver.

11:00 am—Madagascar World Voice, African shortwave project of World Christian Broadcasting

11:30 am—Kintronics and its involvement in HF broadcasting, by Tom King, President, Kintronics Labs of Bristol, Tennessee

2:00 pm—NASB Business Meeting, including plans for next year's annual meeting in Canada

4:00 pm—NASB Business Meeting ends, conference ends. Brief closed meeting of the NASB Board.

Hotel Reservation Details

The Holiday Inn Express at 920 Broadway in downtown Nashville is accepting reservations for hotel rooms during the 2009 NASB Annual Meeting. The rate is \$125.00 per room for single or double occupancy (plus local taxes). You can guarantee your reservation with a credit card, and your reservation can be canceled without penalty until three days prior to arrival. To make your reservation, call toll-free (in the U.S.) +1-888-465-4329, and be sure to mention that you are part of the National Association of Shortwave Broadcasters meeting in order to get the special conference rate. The group code is NAS.

Items from the Association for International Broadcasting (AIB)

Azerbaijan citizens have been without access to international radio services carried via local broadcasters since the end of December. Affected are RFE/RL, VoA and the BBC. Azerbaijan's National TV and Radio Council ruled that national frequencies could not be used for international radio stations, although the international stations had agreements in place for rebroadcasting in the country. Speaking in Prague, RFE/RL President Jeffrey Gedmin said the decision was regrettable and "deeply disappointing." "We are known there as a source of independent, credible, accurate news and information," Gedmin said. "This decision to knock us off the air and, by the way, others -- the Voice of America, the BBC -- is going to rob the people in this country of important information that they need to react and act on as they're leading their lives and trying to grow and build civil society." The media freedom representative for the OSCE, Miklos Haraszti, said "With this decision, the monopolisation by government-friendly voices of the airwaves of the broadcast media is practically almost complete, and that's a very regrettable start to the eve of the next year." Turkey's TRT appears to be exempt from the ban, continuing to broadcast in Azerbaijan.

Pharos has completed a major contract for BBC World Service. In the role of prime

contractor, Pharos was selected to supply content management and automation for 68 channels of radio programming together with automation for live and time-shifted content payout. Central to the project is a Pharos Mediator content management platform which has been chosen to integrate the network's ingest, media workflow, transfer management, router control and payout. Mediator includes a task-specific web-based user interface which guides operators and supervisors through the workflow and allows search and browse of any material from their desktop. World Service workflows are prioritised and resources managed by Mediator based on the demands of an integrated programme schedule. A total of 32 channels are configured as complete payout-capable subsystems, each safeguarded by a fully mirrored channel. "This latest contract was awarded after a lengthy OJEC process," said Nigel Fry, Head of Transmission & Distribution at BBC World Service. "A full audit was conducted which Pharos passed with high recommendations. Pharos was then commissioned to look at our current operation and to co-operate with staff in creating an outline requirement for a future payout and routing infrastructure to cover the entire World Service operation." Find out more on this story at the AIB website.

Please notice:

The recently announced postage increase requires that NASWA dues be raised \$1.00 a year for all members. Granted, a 2¢ increase amounts to only 24¢ a year, but this is the second and perhaps third such increase since NASWA dues were last raised and they're starting to add up. Beginning June 1, 2009 dues will be \$30.00 for U.S. members, \$32.00 for Canadian members, and \$37.00, \$41.00, and \$43.00 for overseas members depending on their location. You may prepay if you wish. Please add \$1.00 when using PayPal.

6; update by Dave Kenny-UK/WWDXC
TopNews/Bueschel, Germany)

BELARUS I have checked the Belarusian
home service channels in 49 and 41 meter
bands at various times, since I noted them
off on Apr 01. The stations seem to have
reduced their schedules considerably from
0400-2200 during B08 to 1500v-2100 in the
present A09 period. Their sign on times
have been observed as follows in April:

*1430: BR1 in Brest 6010, Hrodna 6040,
BR2 in Hrodna 7265, BR1 Hrodna
7280 (ex 7110).

*1440: BR1 in Brest 6070, Minsk 6080.

*1500: BR1 in Minsk 6115, Mahilio 6190,
Mahilio 7135 (ex 7145).

MADAGASCAR/SOUTH AFRICA 5895 via Meyerton-AFS ? From March 20, WRN was transmitting Radio Mada on 5895 kHz to Madagascar at 1700-1730 and 0400-0430 UT. WRN says the last broadcast was Monday April 6 at 0400; they suddenly stopped, not sure why. (Glenn Hauser-OK, April 8/Cumbre DX)

Details:

A station calling itself Radio Mada Internationale (but apparently not connected with the domestic station called Radio Mada that has been on the air since 1995) has begun daily broadcasts on shortwave. The station supports the deposed president Marc Ravalomanana. Broadcasts are scheduled at 0400-0430 and 1700-1730

UT on 5895 kHz. There are also broadcasts every three hours from 0300 UT on the website at <<http://www.radiovazogasy.com>>

The station is an initiative of Tiako I Madagasikara (I Love Madagascar, TIM) which is a political party in Madagascar founded by a group of individuals on July 3, 2002 to support President Marc Ravalomanana. It is now the largest party in the National Assembly of Madagascar with 106 of 127 seats, after the parliamentary election held on September 23, 2007 (Source: Wikipedia).

The existence of this station was first reported by Glenn Hauser on the DX Listening Digest mailing list. The location of the transmitters is not yet known. (Andy Sennitt-HOL RNW Media Network, Mar 22)

Where is Radio Mada coming from politically? Some items from Jan and Feb on the website call the TGV movement "terrorist", and they are pro-democracy and constitutionalism. In fact, they publicize pro-Ravalomanana demonstrations scheduled for March 21 in Paris and Reunion. So now the resigned president has a clandestine voice. (Glenn Hauser-OK-USA, DX Listening Digest Mar 24)

I presume this is the same Radio Mada that has a website at <<http://www.radiomada.com/>> (Andy Sennitt-HOL, DX Listening Digest Mar 23)

(DX Mix, Bulgaria)

SOMALIA *Radio Hargeisa*, the national radio of Somaliland, has resumed regular broadcasts on shortwave, apparently from a new transmitter. Radio Hargeisa was established in 1948, but first started broadcasting in December 1951. However in 1988, it was destroyed by the forces of Siyad Bare, the last Somali dictator. For the past year, it has been undergoing some major improvements to its services and reception.

On Monday, Somaliland students in Yemen were able to listen to Radio Hargeisa for the first time in many years, while on Wednesday it was received in Japan for the first time on 7145 kHz at 1759 UT [Other reports say that tests started a year ago on 7120 kHz].

On Friday, Somaliland students studying in neighbouring countries were able to listen to Radio Hargeisa. The station broadcasts Somali music, news and other current affairs, mainly broadcasts in the Somali language. (Source: SomalilandPress)

Andy Sennitt adds: Radio Hargeisa has been reported sporadically on various 7 MHz frequencies in recent years, but apparently from a low power transmitter. The headline in this report from SomalilandPress was Radio Hargeisa goes global, which indicates that a new higher powered transmitter is now in regular use (April 4th, 2009 - 16:15 UTC by Andy Sennitt, Media Network blog/ DX Listening Digest/Hauser-OK)

URUGUAY A month ago, Mr. Gustavo Cirino, who is a person in charge of the technical matters of various radio stations in Uruguay and knows me from the multiple queries for updated data from radiostations for many years, called me consulting for the general use of SSB on the shortwaves by broadcast stations. He told me that URSEC, the country's regulatory telecom authority, had just urged *Radio Sarand Sport*, Rivera, to reactivate the SW on 6045 or to resign to it. The power had to be 2 KW, but using a transmitter of such power would have been so much in terms of electrical consumption. An alternate way, he thought would be to use SSB, which appears to be feasible. I have been in contact with him, and now I am expecting more info as starting date, real power to be used, equipment and antenna to use, if LSB. The schedule would be the same as on MW (890) and simulcasting it. The authorized beam is to HFCC CIRAF zone 14 (Argentina, part of Paraguay, etc.)

In the past (1980s) a 6010 **SODRE** transmitter was also fired on LSB beamed to the Antarctic Uruguayan base, but this lasted for short time and was experimental. Later SODRE discarded SSB broadcasts. Currently 6125 is active from them, but with low power and lately reported with low modulation. (Nigro, Uruguay in DXplorer, Apr 07/DSWCI DX Window/Petersen, Denmark)

Pirate Radio Report

Chris Lobdell • P.O. Box 146 • Stoneham, MA 02180-0146 • crlobdell@verizon.net

Hi and welcome to the May edition of *The Pirate Radio Report*. I'd like to say thanks to all of you who responded to my request of reports! Lots of logs thanks to Brian Alexander-PA, Dave Balint-OH, John Fisher-MA, Mike Rohde-OH and George Zeller-OH. Gee Ohio is a real hotbed of pirate DX when you add George Zeller to the mix!

Barnyard Radio, 6925 USB, noted at 2349 UTC on March 30th. Playing lots of punk music, including the Dead Kennedy's, comedy, the world famous Kidney Stone Cowboy [Rohde-OH]

Blue Ridge Radio, 6925 USB, noted on April 4th at 2330 UTC, playing bluegrass music, ID, weak signal. [Alexander-PA]

Dead Cat Radio, 6925 USB, heard on April 11th at 0205 UTC sign on. Sign on with Gregorian Chants, Dixieland Jazz, ID 0216 UTC. [Alexander-PA]

Gypsy Radio logged on 6925 USB, on April 3rd at 0009 UTC. Accordion music, ID and uncopyable gmail address. Announcer mentioned his wife Olga. ID as "This is Radio Gypsy, Goodbye For Now". [Rohde-OH]

KPR Radio, 6923.5 USB, noted on April 1st at 0141 UTC. Various types of music including country, old blues, rock. IDed as "This is KPR free from the tyranny of Obama". [Rohde-OH]

Message From Mars, 6924.8 AM, noted on April 1st at 0132 UTC with warning "Remember This Warning, Do Not Return To Mars". Station has been popping up the last few days. [Rohde-OH]

Northsea Radio, 6925 USB. Heard on April 11th at 2100 UTC. "R" rated pirate songs. Sounds of seagulls, seals and IDs. Strong. [Alexander-OH] 12 April 2009, 6925 USB at 0048 UTC with various pirate songs and sea shanties. ID by OM at 00:51 with seagulls in background "North Sea Radio" Good signal. [Fisher-MA]

Radio Free Euphoria, 6875 kHz heard at 0027 UTC. Tuned in on March 29th to hear David Bowie tune. May have signed off at 0030. Lots of static crashes. [Rohde-OH]

Radio Josephine, 6925 USB, Heard on April 3rd at 2336 UTC. Pop oldies such "Brandy" by The Looking Glass. Announcer said this was the station's maiden broadcast. [Rohde-OH]

WTCR-20TH Century Radio, 6925, heard at 0140 UTC on April 12th with various Motown and soul music, IDs, "I Heard It Through The Grapevine", etc. [Balint-OH]

The Voice Of KAOS, 6925 USB, heard on March 28th at 1458 playing "Jail House Rock" with QRM from MAC at 1500 UTC. [Rohde-OH]

Voice Of Doom, 6925 USB, on April 5th at 0215 UTC. Constant talking by male. Too weak to copy content but caught ID at 0224 sign off. [Alexander-PA]

Voice of Spike heard at 6925 USB at 0016 UTC on April 18th. Apparent new station with a format of Spike Jones novelty tunes. OM announcer says that they are the only pirate, and indeed the only radio station, with such a format. Played numerous Spike Jones tunes including "Der Fuhrer's Face." Modest level in local noise, but generally audible. Gave voiceofspike@gmail.com for reports. [Zeller-OH]

WEAK Radio, 6925 USB, on April 4th at 0200 playing some great tunes from the '70s. Led Zeppelin, Procol Harum, Alice Cooper. Big signal and low noise tonight. [Rohde-OH]

Wolverine Radio, 6925 USB, logged on March 29th at 0035 UTC, playing lots of Beatles tunes. Booming signals until a major fade at 0115 UTC. [Rohde-OH]

Happy Pirate DX!

ESTADOS UNIDOS.

We are so glad to receive a new report from you again. Your
information is correct as always and we can say that you are a
faithful listener of Radio Educacion.

To us it is very important to know that the tuning of our lis-
teners around the world is constant too and keep informing us
about the quality of the radio signal.

We had the chance to know you and your wife Anette through the
photo of you both in Greece.

We are sure that you enjoyed the trip to that beautiful and
historical place. Thanks a lot.

We are sending your QSL card and greetings to you and yours.
Keep listening to Radio Educacion.

SINCERELY YOURS.

LIC. LUIS ERNESTO PI-DROZCO,
GENERAL MANAGER.

Dear Richard D'Angelo,

Thanks for your reception report. We have found it to be most helpful and have even used it to correct a problem with our broadcast over Radio Africa. The very specific details that you included are very beneficial.

Also, thanks for the picture. It's very interesting to see some of those who are listening. It adds another dimension to the letters we receive.

Sincerely,

[Handwritten signature]

- 2310 **AUSTRALIA VL8A** Alice Springs 1220 New age & pop mx; rising nicely to exc.; ID as 105.7 FM at BoH; // 2325 & 2485-marginal; 3/17. (Brown-MO) 1256 The best w/ M & M conversation in EE audible; //2325 weaker but no sig at all detectable on 2485; either off or more likely stuck on the daytime freq 5025 as occ. happens; so I check 5025 at 1308; as always dominated by R. Rebelde but it is fading regularly at the rate of 40 times per minute; abnormal; & likely indicator of another weaker sig slightly off-freq causing such a subaudible het; i.e. 0.67 Hz away; this was still the case at 1339; as Cuba weakens gradually but so does Australia as we are well over an hour past sunrise here which was at 1235 UT; never could pull any VL8A audio however; under Cuba 5025; has anyone else noticed the two are 0.67 Hz apart when they normally overlap until 0830 or after 2130?; perhaps someone further West will have had better copy of VL8K on 5025 this date past 1400; 3/20. (Hauser-OK) 1312 None of the 120m VL8s were audible; but I checked 5025 again in case VL8K was still stuck on its daytime freq at night; yes, at 1317, R. Rebelde still exhibiting fades of 40 per minute; the same SAH as 24 hours earlier; 0.67 Hz presumably caused by Katherine; 3/21. (Hauser-OK) 1151 "Saturday Night Country" in EE w/ ancr interviewing an Australian C & W performer & playing some of his mx; fair; //2325-poor; //2485-poor; //9580 RA Shepparton-armchair; 3/28. (Taylor-WI)
- 2325 **AUSTRALIA VL8T** Tennant Creek 2055-2104 Pop song; M & W in EE; (P) nx from ToH; best heard in SSB w/ strong static crackles via approaching storm at my QTH; & at 2104; I pulled the antenna from my NRD-525; poor; //2310-barely audible & //2485-v. poor; 3/18. (Serra-Italy) 1150 Intrvrs of several personalities through ToH; fair; stronger than //2310 & 2485; 3/28. (Strawman-IA) 0940 (P); W ancr apparently intrvring M w/ occasional ments. "Australia" popping up from the noise; ballad or torch song at 0950; v. weak w/ static crashes; this was barely audible using USB on a 70 ft wire; you'd need a fairly lrg antenna to bring much detail in; my best ever recep was of VL8A in 2001 when I heard & taped a definite ID; but this was off a 160 ft wire; 4/10. (Coady-Ontario)
- 2380 **BRAZIL R. Educadora** Limeria 1157 M & W ancrs in PP; 1200 "Radio Educadora, Limeria"; more talk; (P) nx; fair; G. Hauser points out that this was well after sunrise lcl time & might have been something else; but what?; 3/18. (Taylor-WI)[??-ed.]
- 2485 **AUSTRALIA VL8K** Katherine 1252 The VL8s are still "showering" far beyond their up & down NT-only target area; 2485 best w/ discussion in EE; //2310- barely audible & nothing but a carrier detectable on //2325; 3/18. (Hauser-OK) 1246 I continue to be amazed by the VL8 stns making it thru on 120m even when not much else is happening trans-Pacifically on 105, 90, 75 or 60m; 2485 was peaking at S9+10 as they were talking about the new Israeli PM; much stronger than 2325-barely audible modulation & 2310-only a carrier; only sig audible on 90m; w/ mx; was 3385; which would be RENB Rabaul-PNG; at 1249; today's sunrise in Enid was 1217; 4/1. (Hauser-OK)
- 2850 **NORTH KOREA KCBS** Pyongyang 1218-1225 M ancr in KK w/ long talk; marginal recep; f/out; no // noted this AM; 3/31. (Brown-MO)
- 2980H **COLOMBIA R. Vida Nueva** 0630-0720 2nd harmonic of 1490; SS relg ballads & talk; weak but readable; good clear ID at 0708; tnx to H. Klemetz for the help IDing this one; also heard earlier at 0250-0315+; 4/9. (Alexander-PA)
- 3200 **SWAZILAND TWR** Manzini 0302-0309 M ancr buried in the noise; poor; 3/13. (Parker-PA)
- 3215 **USA WWCW** Nashville 0547 Earlier heard lite squeal on WWCW-1 when using 7465; now heard also on same txmitter when on 3215 during talkshow; 3/24. (Hauser-OK)
- 3220 **ECUADOR HCJB** Pifo 0941 M ancr w/ SS talk re Christo; v. good; 3/31. (Brown-MO)
- 3240 **SWAZILAND TWR** Manzini 0311-0315 M ancr in listed Shona; 40dB sig; exc.; 3/13. (Parker-PA)
- 3250 **HONDURAS R. Luz y Vida** San Luis 1120-1125 M ancr in EE w/ New Testament; W ancr following along in SS; in the clear 40dB sig; exc.; 3/6. (Parker-PA) 1158 M ancr in SS re time for thanks & rejoicing; good; 3/17. (Brown-MO) 0315 EE prg of relg nature, fairly good sig but static from on going storm; 3/29. (Field-MI) 0326-0347 M ancr w/ SS ancmnts & ID; short instrumental mx segment followed by M w/ a long relg talk; fair; 4/9. (D'Angelo-PA)
- 3253S **USA WWRB** Morrison 0947-0955 Spur; M ancr w/ EE preaching followed by choir singing; poor; // fundamental 3185-good & spur 3117-fair; 4/6. (D'Angelo-PA)
- 3255 **SOUTH AFRICA BBC** Meyerton 0320-0333 Nx re financial crisis; feature on Tibet; ID & short mx interlude; in the clear w/ 50dB sig; exc.; 3/13. (Parker-PA)

- 3279.9 **ECUADOR LV del Napo-R. Maria** Tena 0145-0150 M anc in SS; 20dB sig just above noise floor; p-f; 3/20. (Parker-PA) 0945 M anc w/ SS inspirational talk over lite mx; fair; 3/31. (Brown-MO) 0956-1016 Rustic LA vcls followed by several SS acments at 0959 & ID at 1000 accompanied by flute mx; after another LA vcl a M anc an over-modulated spiritual talk w/ light instrumental mx in the b/ground; p-f; 4/6. (D'Angelo-PA)
- 3280 **CHINA V. of Fujiang** Shanghai 1202-1205 Chatty W anc in CC; poor; //4950-poor; //5075-good; 3/30. (Brown-MO)
- 3305 **PNG R. Western** Daru 1212 Monotone talk by M anc in Tok Pisin; W anc interjecting occ.; weak but steady; 3/26. (Brown-MO)
- 3309.98 **BOLIVIA R. Mosoj Chaski** Cochabamba 1010 Strong sig w/ indigenous mx; 3/22. (Wilkner-FL) 0043-0106 M anc & "whistling" mx; talk b/w Quecha mx selex's; barely audible at ToH w/ mx; M & W anc at 0102; poor; 3/27. (Barbour-NH) 3310 2354 Trying to f/up w/ good carrier but little-to-no audio; 3/25. (Brown-MO)
- 3315 **PNG-ADMIRALTY ISLANDS R. Manus** Lorengau 1230 //3305-R.Western; poor; f/out; 3/26. (Brown-MO)
- 3320 **SOUTH AFRICA R. Sondergrense** Meyerton W anc in Afrikaans; pop mx; synchro LSB needed to avoid digital QRM; 40dB sig; exc.; 3/20. (Parker-PA) 2356 M & W anc w/ talks & correspondents; good; 3/25. (Brown-MO) 0330 EZL songs in EE; ancments in Afrikaans; good; in the same time period the following were noted at lvls ranging from p-f: 3345-Channel Africa; 3255-BBC Meyerton; 3240-TWR Swaziland; 3/26. (Ronda-OK)0431-0450 T/in to hear their usual exc. pop mx & found classical Strauss waltz w/ occ. talk by M & W anc; good; 4/5. (Evans-TN)
- 3325 **INDONESIA RRI Palangkaraya** 1210-1220 W anc in Indo w/ (P) nx; joined by M who appeared to be rpter in the field & another in studio; poor; declining; prg running in // to slightly stronger Manokwari-3987.05; nothing heard from co-ch. PNG; Indos dominating this morning w/ only a couple of PNGs present; 3/23. (Evans-TN)
- 3325 **PNG-BOUGAINVILLE R. Bougainville** 1030 Seemingly the one noted here; 3260 also in; 3/23. (Wilkner-FL)[3260:R.Madang-ed.]1220 M anc in Tok Pisin; still w/ talk by W at 1235 re-check; poor; 3/27. (Ronda-OK)
- 3329.59 **PERU Ondas del Huallaga** Huánuco 0000-0030 Noted every day in April w/ good Peruvian mx noted; weak; troubled by CHU-3330; need IF notch or v. narrow filter; again at 1020-1040; 4/5. (Wilkner-FL)
- 3339.99 **HONDURAS HRMI** Comayagua 0720-0733 Contemporary SS relg mx; SS ID at 0730; EE relg talk w/ SS translations at 0731; fair; 4/10. (Alexander-PA) 3340 0223-0239 Slow mx in SS; good 30-40db sig but w/ SS outband net on USB; 3/20. (Parker-PA) 0640 SS talk & mx; fair w/ sorte QRN; 3/25. (Robertson-CA) 0947 Honest-to-God fire & brimstone revelations in EE & SS; good; 3/31. (Brown-MO) 0332-0403 LA vcls w/ SS & EE IDs at 0338 & 0340; M anc w/ brief SS talk b/w LA mx selections; p-f; 4/9. (D'Angelo-PA)
- 3345 **PNG-NEW GUINEA TERRITORY R. Northern** Popendetta 1038-1050 (P); W anc in Tok Pisin w/ talk re "education" at t/in; M & W anc b/w mx bits; pop-like mx selection; poor; fading under band noise by t/out; 4/8. (Barbour-NH)
- 3350 **COSTA RICA REF** Cariari de Poroci 0457-0505 W anc & ID at 0458; "Radio Exterior de Espana"; other ancments & ID; mx; pips at ToH; mx break; M & W w/brief ancments; lcl mx w/ M anc b/w songs; best heard in SSB w/ S9+5 of peak; moderate QSB w/ rustle; crackles at times; poor; 3/18. (Serra-Italy) 0240-0243 Anc in SS; usual 80dB rockcrusher sig; 3/20. (Parker-PA)
- 3365 **PNG R. Milne Bay** Alotau 1210-1218 (P) PNG pop mx occasionally breaking through the noise; short ancment in (P) EE also heard; v. marginal; threshold lvl sig; other PNGs weak today w/ the exception of R. East New Britain on 3385; 3/21. (Evans-TN)
- 3375.1 **BRASIL R. Educadora** Guaruja 1008-1012 (P); Ancrs w/ PP banter; mx at 1012 then rapidly deteriorating during lcl sunrise; poor; 3/26. (Barbour-NH) 0920-0938 (P); Chatter-box M anc in PP intro short vcls; W w/ mention Sao Gabriel w/ echo FX ancments; accordion mx; sig dropping out as day-light crosses Brazil; 4/1. (Brown-MO)
- 3385 **PNG-NEW BRITAIN R. East New Britain** Rabaul 1241 Dabarae vcls; poor but steady w/ RTTY QRM; 3/25. (Brown-MO)[William informs me that Dabarae is the PNG version of reggae-ed.] 1020-1037 Ancrs w/ talk n Tok Pisin; ads/promos; including one in EG re "...Saturday night.. brought to you by (??) Industries."; local ballad at t/out; fair at best; over the past few years, this has been the most reliable PNG I can pick up here in NH; 4/8. (Barbour-NH)
- 3396 **ZIMBABWE ZBC** Gweru 0237-0315 In vern. w/ hi-life mx; EE ID; 3/25. (Howard-CA)
- 3810 **ECUADOR HD2IOA** Guayaquil 0940 M anc w/ SS time ancments; good; 4/1. (Brown-MO)
- 3905 **PNG-NEW IRELAND R. New Ireland** Kavieng 1231-1241 (P); Surfacing thru AOR QRM, from time-to-time; w/ island mx; f/out; 3/26. (Brown-MO)
- 3925 **JAPAN R. Nikkei** Tokyo-Nagara 0838-0902 Interviews; poor; 3/28. (Turnick-PA) 0945 Radio drama in JJ; almost f/out by ToH; 4/1. (Brown-MO) 1142 Semi-classical mx reached S9 on peaks; 4/3. (Strawman-IA)

- 3975 **HUNGARY Hungarian Radio** Jazbereny *0400-0423 Opening ID & ancments by M ancr in Hungarian; followed by nx; another ID at 0404 followed by prg of feature rpts hosted by W ancr; fair w/ slight ARO QRM; 4/1. (D'Angelo-PA)
- 3987.05 **INDONESIA RRI Manokwari** 1136-1204 Pop mx w/ short ancments by M & W ancr; ancment at 1159 followed by SCI; nx at 1200; poor si initially; improving to good after 1155; surprised to find them so strong, as other RRI's were at carrier lvl or missing today; 3/21. (Evans-TN)
- 3990 **CHINA PBS** Gannan Hezuo [UTC?-ed.](P); Asian sounding W ancr poking thru AOR QRM; fair; not // w/ other Xinjiang PBS freqs; also listed on 3990; 3/26. (Brown-MO)
- 4319U **DIEGO GARCIA AFN** 1350-1402 "You are listening to A-F-N"; Dr. Joy Browne call-in prg; giving advice to callers; p-f; 3/19. (Howard-CA) 0004 "Sporting News Flash" at t/in; ad/promo w/ phone number; two M ancns at 0008 tho not much to work with; v. weak w/ co-channel "data" QRM; 3/27. (Barbour-NH)
- 4330 **CHINA Xinjiang PBS** Urumqi 1208 W ancr w/ talk to correspondent; f-g; 3/31. (Brown-MO)
- 4409.83 **BOLIVIA R. Eco** Reyes 0000-0030 M ancr "en espanol"; 0130 pulsating sig here makes difficult to copy; this pulsation noted for last year; lcl origin UTE also present; 4/4 & 5. (Wilkner-FL)
- 4451.06 **BOLIVIA R. Santa Ana** Santa Ana de Yacuma 2300-0000 Noted during bandscan; 4/1. (Wilkner-FL) 4451.2v 0030-0100 The one noted here under EE voice ute; 3/21. (Wilkner-FL) 0000-0030 Time period noted on very irr. basis via various FL locations; 4/5. (Wilkner-FL)
- 4460 **CHINA CNR-1** Beijing 1208 M & W ancr w/ CC nx; poor; 3/17. (Brown-MO)
- 4500 **CHINA Xinjiang PBS** Urumqi 0142-0153 Some fine CC lyrical songs w/ two W ancns; in listed Mongolian; after each song; best heard in SSB w/ QSB; slight rustle & static at times; fair; 3/22. (Serra-Italy) 0003-0018 W ancr w/ exotic ballads & talk; poor & deteriorating under band noise by t/out; 4/5. (Barbour-NH)
- 4554.16 **BOLIVIA R. Virgen de Remedios** Tupiza 0000 (T); Noted w/ v. weak sig; vox ute occasional issue; not noted 1000-1100 if them; 4/3-5. (Wilkner-FL) 4554.25 2300-0000 (T); Noted during bandscan; 4/1. (Wilkner-FL)
- 4700 **ANDAMAN & NICOBAR ISLANDS AIR Port Blair** 1358-1516 (T); This is the one off-freq here from regular 4760; has been confirmed now by J. Jacob-India; tnx to J. Savolainen-Finland for first pointing out the possibility that this was perhaps one of the 4760 AIR stns; Port Blair back on 4760 1330-1440 on 3/19-21; 3/18. (Howard-CA)
- 4716.55 **BOLIVIA R. Yura** Yura 0042 Vcl mx; poor under S9 storm static; 4/4. (Strawman-IA) 4716.64 0100-0130 CP mx & W ancr; f-g; also 1000-1030 w/ varied s/on times; 4/2-4. (Wilkner-FL)
- 4750 **UGANDA R. Dunamis SW** Mukono 1840-1905* (P); Non-stop mx; (P) Afropops; ancment over mx at 1848; end prg at 1903:50; s/off at 1905; PWBR 2009 rpts 1900*; best heard in SSB w/ S9+ of peak; fast QSB; rustle & static; poor-almost fair w/ NIR12; 3/17. (Serra-Italy)[nice catch-ed.]
- 4754.9 **BRAZIL R. Imaculada Conceição** Campo Grande 0420-0455 M ancr in PP; 20dB sig battling CODAR; near good at times but poor overall; 3/11. (Parker-PA) 4755 0118 (P); Man in PP; possibly live; giving what sounded like a sermon; 4/12. (Taylor-WI)
- 4760 **ANDAMAN & NICOBAR ISLANDS AIR Port Blair** 1445-1500 (P); Indian accented EE w/ sermon about Good Friday; relig songs; 4/10. (Howard-CA)
- 4765 **UNIDENTIFIED** 0131-0303 Ancr w/ PP talk 0132 theme type mx; apparent call-ins; DJ chatter & talk; long f/out & 0146 ute blast on USB; 0150 f/in to chicken clucking & DJ chatter; 0154 speech before an audience & ute blast; 0157 fanfare & ancment; too weak to copy; then f/in & out w/ ancr talk & various mx selections until 0302 when I gave up; 0306 I left the radio on while writing this & a second stn; (P) Tajik Radio abruptly f/in w/ talk in unid. lang & contemporary-like mx came in on top of what was left of the unid.; making the freq a real mess; several lists show Tajik Radio to s/on at 0300; so this makes me further believe that what I heard was not Tajikistan; 4/12. (Taylor-WI)
- 4765.04 **TAJIKISTAN Tajik Radio** Yangiyul 2323-2340 M ancr in vern. w/ some lcl chants w/ instrumental mx; best heard in SSB but clear in AM too; QRN rustle 7 static; p-f; 3/28. (Serra-Italy) 4765.05 1907-1917 Lcl mx; W & M w/ ancments in vern. b/ w instrumental mx; M ancr from 1910; best heard in SSB w/ S9+ of peak; moderate QSB; rustle & static crashes; almost fair w/ NIR12; 3/17. (Serra-Italy) 4765 0105 (P); Light pop-like mx; M & W ancr w/ talk; format similar to my logs of CODAR free, ex-4635; poor under CODAR; 4/6. (Barbour-NH)
- 4769.96 **NIGERIA R. Nigeria** Kaduna 1737-1748 M ancr in vern. until 1740; brief drum beat; diff. M ancr; drum beat & more talk; best heard in SSB w/ moderate QSB & strong rustle; lite static crackles; from 1741 het nulled w/ NIR12 &/or inter-audio filter; poor; 3/18. (Serra-Italy)
- 4775 **SWAZILAND TWR** Manzini 0401-0415 M w/ short talks in GG b/w beautiful hymns; 60dB sign & outstanding audio; 3/11. (Parker-PA)
- 4780 **DJIBOUTI R. Djibouti** Atta 2024-2038 Lcl mx & Afropop; AA ancment at 2031 into (P) nx until 2036; ment. Djibouti; Rwanda; best heard in SSB w/ S9+20 of peak & strong/almost lcl audio; slight het; lite QSB & static at times; re-checked with s/off at 2100*; good; 3/17. (Serra-Italy)

- 0346-0415 Nice HoA vcls until 0359 when W ancw w/ ID & AA talk; prior to mx bridge at 0400; nx & ToH followed by a discussion prg; fair; 3/18. (D'Angelo-PA) 0310 AA chanting; f-g under heavy CODAR; 4/2. (Strawman-IA)
- 4790 **INDONESIA RRI Fak Fak** 1125 Ancw in Indo w/ slow paced talk; anthem; diff. ancw w/ faster talk; fair; 3/18. (Taylor-WI) 1320 Since I last rpted RRI Fak Fak missing; there have been signs of it on some mornings; but definitely back w/ lo-fi phone intrvw vs CODAR; 3/21. (Hauser-OK) 1215-1235 W ancw in Indo w/ (P) nx; short anthem or theme type mx at 1220 followed by short talk segments by W b/w mx bridges; slow pop mx at 1225 w/ W ancments; //3987.05-Manokwari prior to 1220 then similar prg but not exactly //; poor w/ CODAR; peaking around 1225 then declining; 3/23. (Evans-TN) 4790.03 1251 Pop mx; fair; actually stronger than CODAR; 3/21. (Strawman-IA) [UTC?-ed.] Early '60s style mx; good; clear & overwhelming CODAR; 3/31. (Brown-MO)
- 4790 **PERU R. Vision Chiclayo** 0416-0425 Usual preacher in SS addressing congregation over PA system; blasting in w/ 60dB sig & v. loud audio; on a morning when the openings to S.Am were generally poor; this stn is so frequently received here at enormous lvls that I often wonder about their listed "500 watts"; if accurate; they must have an extra-ordinary antenna!; 3/11. (Parker-PA) 0710-0730 M w/ SS talk; full stn ID's heard at 0722 & 0730; non-stop talk during this period but nothing relg heard; poor; reception was further hindered by deep fades & a faint het even w/ ECSS engaged; 4/11. (Barker-PA)
- 4799.79 **GUATEMALA R.Buenas Nuevas** San Sebastian 0253-0359 (P); M ancw w/ mx & talk; (P) ID at 0305; mx & talk resume; from about 0336 heard no audio; re-check at 0352 w/ two slow lcl songs; then again no audio from 0359; best heard in SSB w/ QRM carrier on; moderate QSB; static at times; from 0358 strong cw at times muffled w/ NIR12; barely audible; poor; 3/29. (Serra-Italy) 4799.8 0225-0235 M ancw in SS; song w/ singing children; W w/ call-in; 50dB sig; exc.; best in LSB to avoid het via 4800; 3/13. (Parker-PA)[carrier/het prob. 4800 XERTA-ed.]
- 4800 **CHINA CNR** 1 Geermu 2341-2346 M & W ancws in CC w/ one brief tune; ancments over mx at 2342; more mx & talk w/ many ment "Zhong Guo"; heard in AM w/ S9+10 of peak; slight rustle & QSB; fair; 3/28. (Serra-Italy)
- 4800 **MEXICO XERTA** Mexico City 0432-0445 W ancw w/ "gansta' rap; rock & slow pops; M ancw w/ ID over Chuck Mangione horns at 0442; solid 60dB sig & exc. audio; coming in like a lcl; 3/4. (Parker-PA)[gangsta rap!?!-ed.]
- 4805 **BRAZIL R. Difusora do Amazonas** Manaus 0935-0950 (T); M ancw in PP; only recent log w/ CODAR dominant; 4/3. (Wilkner-FL)
- 4805 **PERU R. Rasuwilca** Ayacucho 1035 CP flauta andina; M ancw w/ brief ID; back to mx; strong sig w/ CODAR absent; 1053 CODAR faded back in & dominated; 4/5. (Wilkner-FL)[great catch-ed.]
- 4810.01 **ARMENIA Armenian Nat'l Radio** Yerevan 1919-1930* Non-stop AA ballads w/ orchestra; ancment at 1928 ment. Yerevan; v. brief tune at 1929; s/off at 1930*; best heard in SSB w/ S9+10 of peak & strong; almost lcl audio; slight QSB & LSB ute; good; 3/17. (Serra-Italy)
- 4810 **INDIA AIR Bhopal** 1246 Sub-continent vcls; weak; steady grey-line; 3/18. (Brown-MO)[great catch-ed.]
- 4815 **BRAZIL R. Difusora** Londrina 1012 Brazilian ballads & Brasops; W ancw w/ occ. banter; M ancment. "Radiodifusora" at 1026; fair listening in USB to avoid ute; 4/5. (Coady-ODXA/SLRC)[Are Brasops the Brazilian version of Afropops?-ed.]
- 4820 **TIBET Xizang PBS** Lhasa 2357-0011 Lyric song; W ancw over mx at 2359; one long pip at ToH; brief ancment; anthem & W w/ ID; M & W ancw until 0003; then some field rpts w/ M & W banter over mx; more talk w/ ID ancment at 0009; best heard in SSB w/ slight QSB & static; f-g; 3/28. (Serra-Italy)
- 4824.51 **PERU La Voz de la Selva** Iquitos 1025-1105 W ancw w/ long talk; M w/ mx bridge; 3/23. (Wilkner-FL)
- 4824.99 **BRAZIL UNIDENTIFIED** 0024-0102 M & W w/ typical Brazilian PP intonation; mx break & ancment after 0030 ment. Brasileiro; mx & talk w/ frantic W ancw; best heard in USB w/ Xizang-4820 splatter; fast QSB w/ rustle & crackle at times; lite het; from 0047 used LSB to avoid lite CODAR; p-v. poor w/ NIR12; 4/4. (Serra-Italy)
- 4826.46 **PERU R. Sicuani** Sicuani 1025-1100 The one noted here; 3/23. (Wilkner-FL)
- 4835 **AUSTRALIA VLBA** Alice Springs 0821 //4910-VL8T; weak w/ ute QRM; 3/30. (Brown-MO)
- 4835 **INDIA-SIKKIM AIR Gangtok** 1341-1355 (P); Heard w/ a weak sig in (P) Hindi w/ SC songs; not often this makes it above threshold lvl; 4/6. (Howard-CA)[nice!-ed.]
- 4840 **INDIA AIR Mumbai** 2356-0008 Hind choral chant; M ancw in vern.; from 2358 W w/ vocal chants w/ instrumental mx; ancment at ToH; diff. M w/ sing-song chant; brief ancment at 0002 followed by W ancw; heard best in LSB to avoid lite vox splatter; fast QSB w/ S9+15 of peak; static; poor-almost fair w/ NIR12; 4/3. (Serra-Italy)

- 4840 **UNIDENTIFIED** 0208-0231 Talk by various ancrs in unid. lang. w/ some slow mx breaks at times; M & W ancr w/ talk & (P) ancments; one time pip at 0230 & continuing w/ barely audible talk; best heard in SSB w/ fast QSB & strong rustle; increasing QSB from around 0210; poor-almost fair at times; barely audible from 0230; no idea if LA (more feasible) or India after sunrise in there; 3/22. (Serra-Italy)
- 4845 **MAURITANIA RTV Mauritanie** Nouakchott 0650 M IN AA w/ non-stop talk from 0650-0700; did not hear an ID before; after or at 0700; buried in band noise by 0705; 3/16. (Barker-PA) 0106 M ancr w/ AA political speech; f-g w/ up-side het; 3/17. (Brown-MO) 2345 W ancr in AA; into vcl mx at 2347; fair; 3/25. (Ronda-OK) 0700-0725 M ancr w/ AA ID at ToH; into a stern-sounding M ancr; possibly an imam; until 0715; this was followed by a brief musical selecx & diff M ancr over mx; f-g; 3/26. (Barker-PA) 0021-0103* Non-stop strings w/ some percussion beats & M chanting & brief talk; sudden s/off at 0102:57 circa; heard w/ S9+10 of peak; better in LSB w/ inter-audio filter to avoid CODAR; f-g; 3/29. (Serra-Italy) 0728 Running late w/ lcl guitar mx; v. good; 3/30. (Brown-MO) 0800-0810 ID at ToH into what sounded like AA nx until 0805; M ancr w/ more AA talk; strong for Mauritania; but w/ lcl lightning crashes; 4/3. (Barker-PA)
- 4845.23 **BRAZIL R. Cultura Ondas Tropicais** Manaus 0103-0205* Appeared after R. Mauritanie s/off; M w/ enhanced; frantic PP talk for futbol w/ some: "Gooool!"; ancments & (P) ID at 0132 ment. ondas tropicais; other ancments & mx breaks; almost clear ID at 0134; ".kilohertz, ondas tropicais Manaus."; then non-stop LA mx; 0201 final ID & fqy quote then s/on only [carrier??-ed.] until 0205 then off; best heard in LSB w/ inter-audio filter to avoid CODAR; moderate QSB w/ S9+10 of peak; rustle & lite crackle; v. poor-poor at times w/ NIR12; 3/29. (Serra-Italy)
