

The **NASA** Journal

VOLUME XLXIII NUMBER 5

MAY 2013

North American Shortwave Association — America's Shortwave Broadcast Club

Quality Radio Equipment Since 1942

1102S

The Bonito 1102S RadioJet shortwave receiver combines innovative design with the advantages of modern computer technology. It has a frequency range of 40 kHz to 30 MHz with an excellent sensitivity of .03 µVolts on a noise level of -137 dBm with an extreme resolution of 144 dB at a sampling of 24kHz. The Noise floor is extremely low, because there are no active parts between the antenna and the ADC. Strictly speaking, this radio is not an SDR, although it is exclusively controlled by computer. So far, no SDR has defined, controlled, read or computed anything like the RadioJet. Bonito RadioJet is a short wave receiver with a built-in USB audio device and a 24kHz multichannel IM Jack or to put it simply: The most obvious application of modern radio technology. The software has been designed in such a way that its size and its coloring can be customized to any screen. This can be achieved with the presets or user-defined. The center piece of this RF-receiver is the supplied software. It makes all the different applications possible. An IF-Input-Device is built into the RadioJet so that the radio is like an external USB-Audio recorder and an easy installation without a complicated driver is assured: simply plug and play. The supplied standard software features: Reception and recording of transmissions in USB, LSB, CW, AM, FM and DRM. All filters are completely variable and can have their waviness and notches drawn by hand with the equalizer. S-meter and spectroscopy have an extremely accurate dBm-scale and can be calibrated. This device derives its power from the USB connection. BNC antenna input. Made in Germany. 4.5 x 1.25 x 4 inches. This device requires a USB cable (not supplied).

Order #5789 \$699.95

PERSEUS

The Microtelecom Perseus is a cutting-edge, multimode, software defined receiver covering 10 kHz to 40 MHz. Enjoy world class performance: 3rd order IP; +31 dBm. Sensitivity: -131 dBm. Dynamic Range: 104 dB (BW 500 Hz CW). Nine six-pole front end bandpass filters prevent overload of the A/D converter. There is a 3 step attenuator plus switchable low noise preamplifier. An impressive full span lab-grade spectrum display function is featured. An almost magical spectrum record feature allows you to record up to an 1600 kHz portion of radio spectrum for later tuning and decoding. A Wide/Narrow noise blander has recently been added. The audio source is via your PC soundcard. The Perseus operates from 5 VDC and comes with an international AC power supply, AC plug converter, SO239 to BNC RF adapter, USB cable and CD with software and detailed manual. Made in Italy.

Order #0122 \$999.95

The Shuttle Pro V2 hand controller adds great ergonomic versatility to your Perseus receiver. It allows one-handed access to nine fully programmable push buttons as well as a shuttle/jog knob for analog type tuning.

Order #5319 \$99.95

C. CRANE

24HC

The Crane 24HC 12.2 inch, 24 hour wall clocks are used by governments, hospitals, aviation, radio stations, police departments, the military, shipping companies, shortwave listeners and ham radio operators around the world. Just add one "AA" battery (not included) to make it tick. 1.4 lbs.

24HC Order #2520 \$19.95

DUST CAP

If you carry your communications receiver, consider purchasing a metal, gasketed dust cap for the antenna input. Designed to go over an SO-239 (or N) jack.

Order #5907 \$1.89

RF

SDR-IQ

The RFspace SDR-IQ™ with RF DSP™ offers unprecedented performance with a frequency coverage of 500 Hz to 30 MHz in 1 Hz steps. (Please note the low end tuning range is 500 Hz, not 500 kHz). It features the fastest and highest resolution plug and play spectrum display available. The SDR-IQ™ comes with the latest version of SpectraVue™ software. It supports AM, WFM, USB, LSB, N-FM DSB and CW with fully adjustable DSP Filter bandwidths and FFT sizes of 2048 to 262144 points. The resolution bandwidth is as low as 0.031 Hz. The SDR-IQ™ is the smallest SDR with RF DSP™ that samples the whole HF band at once and performs the initial filtering at a 67 MHz sample rate with 23 bit accuracy. It has a high performance Analog Devices 14 bit analog to digital converter and sends 16 bits of I/Q Data to the PC via USB (no messy soundcard cables required). The SDR-IQ is USB powered so no power supply is required. Works great with laptops running on batteries. It offers incredible receive performance and high resolution spectrum display capability. The rear panel has a USB port, serial port and BNC antenna input jack. The SDR-IQ software CD works with Windows 2000, XP and Vista. Made in the United States.

Order #0106

\$509.95

NetSDR

The RFspace NetSDR is a high performance networked software defined receiver with 1.6 MHz bandwidth. The NetSDR uses a high performance 80 MHz, 16 bit ADC with both dithering and randomization for best performance. The output I/Q bandwidth is configurable via software. PC communications are handled over a 100 base-T port using 24 or 16 bit I/Q words. The NetSDR is a complete plug and play solution. As opposed to other SDRs in the market, there is no need for additional preamplifiers, preselectors or code development. The unit is compatible with the Metrotech SpectraVue and SDR-Radio software that will have you up and running in minutes. The software includes analog and digital mode demodulation and I/Q capture of spectrum at up to a 1.6 MHz bandwidth. The SDR Radio software allows the use of the NetSDR over the Internet. The full 1.6 MHz waterfall and demodulation audio can be transported via a 5 KB/s link. For those interested in writing their own applications, RFspace supplies a fully documented protocol for communicating with the hardware. There is no need to calculate the down converter DSP parameters. The NetSDR just needs the center frequency, attenuator and preselector filter settings, output sample rate and mode to begin streaming data. Other solutions require complicated USB interfacing that is platform specific. The NetSDR utilizes straight TCP/IP and Ethernet for all communications. This offers the highest possible performance due to the highly optimized Ethernet drivers on PC, Mac and Linux systems. The NetSDR packets are fully routable so that the receiver may be placed at remote locations. Multiple receivers can also be combined and their data transported over a higher data rate Ethernet pipe using simple switches and routers. In this application, each NetSDR can be set to a different IP address or port.

NASA Notes

Richard A. D'Angelo • 2216 Burkey Drive • Wyomissing, PA 19610 • rdangelo3@aol.com

Anker Petersen and **Bent Nielsen** inform us that the Danish Shortwave Club International (DSWCI) released its 15th edition of its outstanding *Domestic Broadcasting Survey* (DBS-15) edited by DSWCI Chairman, Anker Petersen. Similar to prior years, DBS-15 is divided into three parts. Part 1: the 41st edition of the Tropical Bands Survey covering all active broadcasting stations on 2300 - 5700 kHz, including clandestine stations. Part 2: domestic stations on international shortwave bands above 5700 kHz broadcasting to a domestic audience. Part 3: deleted frequencies between 2 and 30 MHz which have not been reported heard during the past five years, but may reappear. All buyers of DBS-15 will get a username and password to the monthly updates on the tropical bands published as "Tropical Bands Monitor" on the club's website. The 24 pages A-4 size DBS-15 is available by e-mail as pdf-format (about 400 kB). A limited number is also available printed on paper. It is sold by the treasurer: DSWCI, c/o Bent Nielsen, Egekrogen 14, DK 3500 Vaerloese, Denmark; E-mail edition: DKK 35,00 or USD 7.00 or EUR 5,00 or GBP 4,50 or SEK 40,00 or IRC 3; Printed edition: DKK 70,00 or USD 14,00 or EUR 10,00 or GBP 9,00 or SEK 80,00 or IRC 6. Payment by cash notes are accepted whereas checks and postal money orders are not accepted. If you have EURO as national currency, you are advised to pay to our representative in Germany, Andreas Schmid (Lerchenweg 4, D-97717 Euerdorf, Germany. E-mail: schmidandy@aol.com). If you want to pay via PayPal, you have to contact Andreas Schmid, before you send your payment. Payment via PayPal only in US\$ currency and only for persons, living outside the European Union (EU). We hope to have a review of the DBS-15 in an upcoming Shortwave Center.

Jeff White sends an update on the annual

National Association of Shortwave Broadcasters (NASB) meeting in Birmingham, Alabama May 15-17. **Jerome Hirigoyen**, Head of Business Development and International Broadcasting at Telediffusion de France (TDF), will be one of the speakers at this year's annual NASB meeting. Hirigoyen will give a presentation about TDF's large shortwave transmission facility in Issoudun, France that is used by many of the major international broadcasters, including Radio France International. The meeting will take place at the headquarters of EWTN, the global Catholic television network which also operates shortwave station WEWN in the suburbs of Birmingham. Meeting participants will have the opportunity to tour the large shortwave station in a scenic mountaintop area, where station personnel will serve a barbecue lunch as well. Other speakers at the NASB annual meeting will include **Dr. Dowell Chow**, President of Adventist World Radio; **A.J. Janitschek** of Radio Free Asia; **Mike Rosso** and **Dave Hultsman** of shortwave transmitter manufacturer Continental Electronics; **Mark Allen** of Rohn Tower Company; and various representatives of EWTN/WEWN itself. Shortwave listeners, broadcasters and anyone with an interest in shortwave broadcasting is welcome to attend the meeting in Birmingham, which is free of charge, including a welcome reception and lunches on Thursday and Friday. More information, an agenda and other details on nearby hotel accommodations can be found at <http://shortwave.org/meeting/meeting.htm>. The Holiday Inn Express in Irondale, Alabama will provide free transportation between the hotel and EWTN for the meeting. Questions about the NASB meeting may be directed to nasbshortwave@gmail.com.

That's it for this month. Enjoy this month's edition of *The Journal*; it's another good one.

Rick Barton, Box 1804, El Mirage, AZ 85335

I took note of long long time DXer Errol Urbelis' questioning of the need of some DXers to list frequencies down to 2 or 3 numbers after the decimal point. I agree with him that one would still hear the same station if they just tuned to the nominal frequency. But I appreciate the accurate readings, as this has helped me in the past either ID a station, or at least put me on the path to IDing a hard to hear station.

Say I hear a weak tropical using 2350 at 10:00 UTC. I use references to look up who might be there at that time, and I see that "Radio Pokii-Pokii of the Polynesians" is on 2350 until 1100. But reporters have listed an irregular use of 2349.50 by "The Voice of Zamboobia". By using my BFO and zero-beating the carrier down, now I know that, most likely, it is Zamboobia that I am hearing—if I get a reading at or close to 2349.5.

I will know if they are both on the air at the same time if I hear a collision of two stations, and one is throwing a predictable het whine over the other consistent with a signal that would be just below nominal frequency. This happens rarely, but, when it does, I am grateful for the input of others who have used this more accurate, if seemingly picky, listing of frequencies.

73 and best wishes for good listening ...!

Kevin Molander, kmolander@earthlink.net 3130 Toyon Street, #3, Martinez, CA 94553

Over the last four years or so, I have been using a Grundig YB 400 PE with a 17' reel antenna. My brother used the same radio in the late 1990's and was able to verify 127 countries very quickly. Instead of the 17' reel antenna, he strung a long wire above his house and later used a Drake R8 to boost the total up to 127 verified. He had an extra YB 400PE—he gave me this radio in May, 2009.

Back in the early 1970s (1974–1977) I was heavily addicted to medium wave. I was a teenager and my friends thought my hobby was rather odd. I never saw it that way. Around 1977, I lost interest in medium wave dxing because I felt that I had pulled in about all of the stations possible from my location in Concord, CA. I drifted away from the hobby—but—radio has always been something I knew I would return to.

I have been listening to shortwave radio off and on since 2009. There have been several extended periods of time during that period when I put the hobby on hiatus due to time constraints, over-exposure to static and interference and general laziness. I began listening again somewhat seriously about 6 months ago. I would, as in the past, dx with the YB 400PE plugged in to an outlet here in my apartment with the reel antenna strung around the ceiling. I am very surprised with the number of stations I can pull in here in the apartment. Propagation must be a factor—all of the local interference has seemed to be a lot less bothersome than at other times in the past. My favorite spot for sw'ing is out along the Carquinez Strait (north side of Martinez). However, lately, the reception in my apartment has been pretty impressive—especially during the 5:00 am to 8:00 am hours. A couple of months ago, I took the Yacht Boy out to the Strait, and,

unfortunately, I found that the battery terminals were crusted over with oxidation. I suppose it had been a long time since I replaced the batteries.

Fortunately, I have a back-up radio (a Sangean ATS 909). I have had this radio for several years. However, it gathered mothballs as I always thought the Yacht Boy was far more sensitive and selective. I performed a simple experiment (this was about 3 months ago). I plugged the Yacht Boy into the wall outlet and compared it to the Sangean (not plugged in and relying on it's batteries). I alternately hooked each radio up to the 17' reel antenna I have strung along my apartment ceiling. To my surprise, the Sangean very much out-performed the Yacht Boy. The Sangean was considerably more sensitive than the Yacht Boy. The difference is quite substantial. The Yacht Boy is now gathering mothballs and the Sangean has taken center stage!

I like to get up early - usually by 5:30 or so. Before breakfast, before showering, I head over to the Sangean and put the headphones on. Lately, the conditions have been ripe for pulling in numerous stations from Asia and Oceania. This morning, Radio Free Asia (transmitting from North Mariana Island) was very listenable as was Radio Nikkei and Deutsche Welle's transmission from Singapore. In the evening, Radio Nacional da Amazonia (11780) comes in with an armchair quality signal.

In June, if everything goes as planned, I will be driving up the Alaska Canadian Highway. I'll be taking my Sangean with me. If there are any club members in British Columbia, Yukon Territory (probably not!) or Alaska, I would love to hear from you. Any tips you may be able to offer me - when to listen and what I might be able to hear - would be greatly appreciated.

Richard A. D'Angelo <rdangelo3@aol.com>, 2216 Burkey Drive, Wyomissing, PA 19610

Here is a rundown of this month's QSL returns. The Voice of Vietnam via Moosbrunn verified an electronic report with an e-mail reply from VOV Online promising a reply from the English Service and apologizing for the delayed response because "we have resumed work from a week-long Lunar New Year holiday." China Radio International via Baoji verified an electronic report with an electronic reply in 9 days from "Ying Lian" in the English Service of CRI indicating a QSL card will be send soon. Radio Havana Cuba verified an electronic report for 5040 kHz with an electronic e-mail reply from Prof. Arnaldo Coro Antich * AKA Arnie Coro *, Senior Advisor/Consultant to the Director General, Frequency Manager, Senior science and technology editor of Radio Havana Cuba in one hour. Arnie notes that "I enjoy very much sharing my time between engineering and journalism, as the Senior Advisor/Consultant to the Director General of the station and the senior science, technology and the environment journalist of RHC." Finally, Radio Bayrak verified with a full data personal letter and full data card ("The best station in the nation") with a big envelope of goodies in 472 days from initial report and 152 days from a follow up report from v/s Mustafa Tosun, Department Head - Transmissions. His letter was dated November 27th so there was quite a delay in getting the package to me in late March. Among the items in the package were several tourist booklets in English, several local magazines in Turkish, a booklet about Myths and Legends in English, several city maps, Gazimagusa, Girne, Iskele and Lefkosa, other road maps of North Cyprus, half dozen tourist "things to do" brochures and two tote bags. I presume the late November posting was by surface mail and the size and weight of the package made the postal trip a long one. Naturally, I am quite pleased to received this bundle of stuff.

That's it from Wyomissing! 73, Rich

Thanks to all contributors, 73s from Jerry Lineback. Thanks to all contributors, 73s from Jerry Lineback. That is all for this month. Please send your musings and thanks. 73, Jerry. 

Listening Review

Alan Roe • 33 Atbara Road • Teddington, TW11 9PA, United Kingdom • alan-roe@tiscali.co.uk

Hello. Welcome to Listening Review for May 2013. This month I am going to spotlight:

The Voice of Vietnam

For no reason that I can think of, I have not listened so often to this station over the last few months, however there are several features each week that are well worth a listen. My attention was restored with the news of a new Monday evening program called *Colorful Vietnam - Vietnam's 54 ethnic groups* which premiered on 1 April. I therefore decided to dedicate this edition of Listening Review to Voice of Vietnam.

For this review, I am going to concentrate on my favorite feature programming which follows on from the daily *News* and *Current Affairs* programs.

Saturday: *Saturday Report*

This feature immediately follows the news and provides a more in-depth report on some cultural event in Vietnam, and usually includes recorded comments from people involved in the event. On 13 April, the program featured a newly established voluntary club of the Vietnam National Museum of History which:

"includes pupils, students from universities and high schools in Hanoi. [...]. The club is not only a place for students to learn more about the national history and culture through the museum's objects, but also offers them the chance to meet and exchange ideas with well-known historians as well as improve their foreign language skills through meeting foreign visitors and volunteers."

It sounds an interesting idea. I think that any initiative which encourages young people to learn about history and in particular to take an interest in museums is worth doing.

Saturday: *Weekend Music*

The final ten minutes or so each Saturday presents some enjoyable Vietnamese music. On 13 April we heard two delightful romantic melodies from Hue "... which has long been an inspiration for writers and poets..." with songs called "Lovely Hue" and "Rain in Hue City". Very enjoyable.

Sunday: *The Sunday Show*

I have long enjoyed this weekly series "... showcasing Vietnamese traditional culture". The program on 7 April was about paintings by the artist Le Tri Dung who specializes in painting the 12 zodiac animals, and Truong Nhuan who first encouraged him, and now collects Dung's paintings. The zodiac animals are very important in the lives of the Vietnamese people as they:

"...symbolize the changes of the heaven and earth and bring calmness to people's minds whenever spring comes. The 12 zodiac pictures reflect good wishes, good luck, hope, and harmony between human beings and nature. That's the reason why Vietnamese people for many years have hung pictures of zodiac animals at Lunar New Year."

A very nicely presented program, which included recorded comments from both Dung and Nhuan, and a little background music to add interest (although if reception is marginal that may have just sounded like interference).

Most weeks there's time for a typical Vietnamese song to round out the broadcast, as was the case today.

Wednesday: *Letter Box*

Letterbox is typically read by two presenters – each of whom reads alternating paragraphs of the script. There's little interaction between the two presenters, and it

is a slightly formal presentation which may as well have been read by a single presenter. Never-the-less, they do a nice job of discussing the comments included in the letters received, which makes for an interesting program. On 10 April, the program included letters and comments by listener names well known to me: Roger Tidy from the UK, Gilles Letourneau from Canada and Christer Brunstrom from Sweden. Most editions end with a Vietnamese song, as did today with "Lullaby of the Nation".

Monday: Colorful Vietnam – Vietnam's 54 Ethnic Groups

This is the new weekly program. Maybe it was just me, but I saw the title and just assumed that the program was going to be all about Vietnam's *minority* ethnic groups. Not so. From the first program on 1 April, we find that the program scope also includes the *majority* ethnic group:

"... the Viet or the Kinh people - account for 90% of Vietnam's total population. The Viet people live throughout the country, but are concentrated in the river deltas and urban areas. [...] The Viet people lived mainly from agricultural production, including wet rice cultivation. Their farming was based on the lunar calendar and placed emphasis on crop seasons. Compared with other ethnic groups, the Viet people's farming reached a higher level of productivity."

The second episode on 8 April continued the account by describing the creation of a:

"... traditional culture – the Red River civilization. [...] The Red River delta, [...] was the original habitation of the ancient Viet people. The Viet ancestors tamed wild rice for cultivation. [...] People's lives have depended largely on nature, gradually forming customs, habits, rituals and beliefs such as worshipping ancestors and the Gods of Rain, Wind, Thunder and Lightning. The Red River delta civilization has produced a wide range of arts, including cheo classical opera and water puppetry."

This reminds me that if you ever get a chance to visit Hanoi, it is well worth attending one of the water puppetry per-

formances available there. A bit touristy maybe, but they are still fascinating and hugely entertaining and, really, not to be missed.

Once again, as with many of the Voice of Vietnam programs, use is made of recorded interviews from local Vietnamese people (in Vietnamese with translation read in the studio) to add interest to the program.

These early programs have set the scene nicely, but I must confess that I am looking forward to the program moving on to the remaining 53 minority ethnic groups of Vietnam.

In conclusion....

All programs are presented by Vietnamese native speakers. Whilst I don't have any special issue with whether presenters are native speakers or not, I do generally prefer such presenters. It seems (to me) to make for a more "authentic" program. It can be a little disconcerting to pick up a station with a presenter with a strong Australian accent – only to find that you are once again hearing China Radio international!

I do like Voice of Vietnam. They have some interesting and varied programs. However, perhaps unsurprisingly, the programs all do seem to "accentuate the positive". You'll find little criticism of anything that happens in Vietnam. This is perhaps typified by a short item broadcast between the News and Letter Box program of 10 April which reported on:

"The main topic of a meeting of the Party's Central Committee of Communications and Education Commission: [...] In order to give overseas Vietnamese and foreign friends a more accurate view of Vietnam and counter biased views from western information sources overseas, communication work should be pursued more actively. One way is to enhance international co-operation in communication."

The report goes on to state that a number of foreign reporters and editors have written about Vietnam, but have never been to the country and so have written in a biased

and subjective way. After reporters had visited the country, then the reports were less biased. The report finished with a comment by the President of the Vietnam Friendship Union:

"Our task is to make people understand Vietnam better. Our goal is to get people who know nothing about Vietnam to visit and love Vietnam, get those who already love Vietnam to love Vietnam more, and get those who oppose Vietnam to be less aggressive. We need to introduce Vietnams' culture, traditions, values and problems to foreign friends so they will support us in our industrialization and modernization efforts."

Whilst not directly about the Voice of Vietnam, I do think that the above item typifies exactly the approach of the station.

In Europe, Voice of Vietnam is being heard very well in the evenings on 9625 kHz at 1700UT via Moosbrunn, whilst in N. America I gather that 12005 kHz at 0100 and 0230 via Woofferton is providing good reception for the A-13 season.

The last 7-8 months of daily programs can be heard on-demand via the Voice of Vietnam webpages at <http://vovworld.vn/en-US.vov>, where you will also find scripts of some of the programs. However, I can no longer find a way to download programs for later listening (this facility used to be available, but seems to have got lost in a web-site redesign last year).

To finish, here is the complete Voice of Vietnam Program Schedule:

Daily:

¶ *News*

¶ *Current Affairs* (mon-fri)

¶ Feature Programs (*see below*)

Monday features:

¶ *Colorful Vietnam*

¶ Outstanding Personalities

Tuesday features:

¶ Society

¶ Business

Wednesday feature:

¶ Letter Box

Thursday features:

¶ Economy

¶ Discovery Vietnam

Friday features:

¶ Rural Vietnam

¶ Culture

Saturday features:

¶ Saturday Report

¶ Weekly review

¶ Weekend music

Sunday features:

¶ Culture & Sports

¶ Sunday Show

That's all for this time – I'll be back in July, and look forward to your comments about anything that you've heard on the short-waves.

Alan

Shortwave Center

John Figliozi • 45 Algonquin Road • Clifton Park, NY 12065 • jfiglio1@nycap.rr.com

*This month we republish, by permission, a transcript of the program *The Media Report*, first broadcast on Radio Australia and ABC Radio National on December 21, 2012, focusing on a subject of key interest to all of us in NASWA.*

The Future of Radio – The Media Report (December 21, 2012)

Host: Richard Aedy (RA)

Guests: James Cridland (JC), Radio futurologist and writer, London (Twitter: @JamesCridland)

Bridget Griffen-Foley (BG-F), Fellow, Department of Modern History, Politics and International Relations and Director, Centre for Media History, Macquarie University (Twitter: @bgriffenfoley)

Tony Walker (TW), Manager, Digital Radio, Australian Broadcasting Corporation

RA: Hello, this is the *Media Report* on RN. I'm Richard Aedy. And today's show is all about the future of what you're listening to now.

Radio has a lot going for it. It's immediate; if something happens, radio can tell you straight away. It's portable; it goes where you go. It's the most intimate medium; it feels much closer than television or the papers, and many people listen for its companionship alone. It's also the only medium you can engage with and still do something else—whether that's cooking, or gardening, cleaning or driving—you can listen and get stuff done. But radio listening is down a bit in most developed economies and people within it are thinking hard on what to do about this.

I'm not going to pretend for a moment that I'm objective about radio. I'm a broadcaster, and a big listener too. But there are people with a little more distance. One of them is the

London-based radio futurist, James Cridland. He confirms that the numbers are softer.

JC: Slightly down. If you look at over the last 10 years, it's down about 10 per cent or so. And when you look back at the last 10 years, you can probably understand why that might be; we never had smartphones, there wasn't a thing called YouTube. All of the massive changes, which have happened in the media, have happened in the last 10 years and that's actually had quite little effect on radio's total listening.

Now when you start looking at particular parts of the audience—when you start looking, for example, at young people, then you can see a bit more of an erosion there. One of the questions for the industry is, what happens to younger audiences? Will younger audiences still tune in to radio as much as they have done when they get older, or is this actually the beginning of a trend where radio consumption will begin to go down?

RA: Tony Walker, who retires this week as the ABC's head of digital radio, says essentially there are two audiences.

TW: We've got audiences who have been with us, you know, for 30, 40, 50, 60 years in some cases, and who rely on us doing the job that we have always done for them. They get up in the morning, they turn on a radio station, they'll listen to that radio station until the end of the day. They don't want anything to change about that experience—that's all they want and they want

that to keep getting better, but they don't want it to change.

On the other hand, there's another audience that is much younger, some of whom engage with us—perhaps through Triple J or perhaps through ABC2 TV. We are only a very small part of their daily media experience. They, in many cases, might be engaging with ABC content on third-party platforms like Facebook, where they don't even know that what they're hearing or watching is ABC content. Makes it much more difficult for us to engage with them to impress ourselves—as a brand that they know and they trust—upon them in the same way that those older audiences have known us and accepted us.

RA: Shortly, you'll hear more about the challenges radio faces, but as the media historian Bridget Griffen-Foley points out, the medium has dealt with them before—most notably the arrival of television in the 1950s.

BG-F: Radio adapted to that through a number of means. One was embracing the Top 40 music format. Another conscious decision was to move into, what was called at the time, conversation radio which is now what we know as talkback radio. And there was also an increased commitment to improved news and even traffic services, and a real attempt to connect even more closely to the communities, something that radio had always been very good at anyway.

By the early 1960s, what had been a fairly sharp decline in advertising revenue for radio had started to turn around. There also, of course, had been some decisions to withdraw from things such as serials and drama and to just accept the fact that that was almost inevitably taken over by television.

Radio survived the introduction of television. It faced another major threat in the second half of the 1970s with the introduction of community radio, the introduction of FM radio, and then in 1980, the introduction of commercial FM radio. Again, some AM radio stations decided to invest in FM, and really through the 1980s, there was a recognition that AM radio would be focused

more on talk and that FM would be focused more on music.

RA: The internet and the vast choice it offers listeners, is the key to what's going on now. So, how will the NBN [*Ed. Note: The National Broadband Network, a national high-speed broadband network intended to cover all Australians wherever they live.*] with much faster broadband for everyone, affect radio? TW says the medium will still have advantages because it's broadcast.

TW: One of them is the capacity of broadcast to be able to engage with very, very large numbers of people, all at the same time. So, broadcast, I think, will have sustaining value around news, around things that you need to know about now—sport is an obvious one. In the case of emergency broadcasting for example, which is an area of the ABC has become very, very important to Australians, right across the country. And in, you know, critical national moments where, for one reason or another, where it is important that the, sort of, the nation is able to be brought together.

That's the value of broadcast, I think, and that would be the continuing value of broadcast, where we can get people together through those big transmitters that we have that cover vast areas of Australia. The question then becomes, if that's what...where the continuing value lies, then what else, what other value is there for broadcast radio?

RA: Because that's not all we do, of course those things you've outlined.

TW: Not all we do. You know, we engage you know, we provide sheer entertainment high quality entertainment, which our audiences have appreciated tremendously. I think that's where broadcast is going to really start to struggle.

RA: And that's the rub. The main form of entertainment, of course, is music.

JC: I don't think that the outlook for music radio, that just plays music, is a very good one. If you're a radio station and all you do

is you play the hits, all you do is you play nine great songs in a row, every hour all day, then I cannot see why, in five years' time, people won't be doing that job better using Spotify, using Pandora, if it comes to your territory, using, you know, a variety of different other tools, rather than sitting there and listening to somebody else's choice of music on a device that doesn't have a skip button. You know, I would find that really difficult to explain to my baby daughter, you know, when she's 5 or 6, when she's listening to songs on the radio, Daddy, Daddy, why isn't there a skip button? Why can't I choose another song? You know, to me, that's fairly obvious.

So, I think, actually, one of the really interesting things about where the future of radio might be headed, is to concentrate on the things in between the songs; so concentrate on what you and I might call, the talk. But actually, you know, a good presenter, a good entertaining DJ who is the reason why you end up tuning in.

Hamish and Andy is an obvious example of people who are entertaining, you know, intelligent, that just happen to be on a music station. But if you're looking at radio as being a non-stop music service where the only thing...the only reason to end up tuning in to the radio is because of the music, then I think at some stage we should probably give up and concentrate on something else.

RA: Most music stations have seen listeners depart over the last five years—most, but not all.

TW: Triple J is defying that trend. Listening is growing for Triple J. Why would that be happening? It's because, I think, they've kept their content offer—what it is that they specialize in, which is music for an audience aged 18 to 24—at the absolute center of what it is that they do. Everything that they do revolves around that offer. They have then managed to distribute their presence—that is, you know, who they are: Triple J brand—across every available platform. So they're on the radio, as they always have been. They have a very strong pres-

ence online. They have a very strong mobile presence. They have a presence on new third-party streaming platforms, so, such as Spotify for example, or Rdio, another one. And as soon as those services became available in Australia, then Triple J made sure that it was a part of those services.

RA: So wherever their audience is...

TW: So wherever their audience is...

RA: They're there...

TW: And they are also offering the audience a very big opportunity to be part of what goes on the radio as well. So, something like, the hottest 100, which is a well known audience vote, if you like, that Triple J's been doing for the best songs of every year and have been doing it for 20 or so, years. The audience owns that process and...and are passionate about their involvement with that process. And there are parties all round the country every year around that, and CDs released every year with, you know, the hottest 100, which the audience has voted for.

RA: This is the *Media Report* on RN. I'm Richard Aedy. We'll be right back.

Montage: We are InterFM...All we need to do is play a small selection of popular songs over and over again...You'll find that kind of carrying on every day here on WJR...

RA: Today's show is all about the changes radio is going through and its future. You've already heard about some of the challenges, but are the professionals paying enough attention?

BG-F: Radio managements, for several years, now have been trying to acknowledge the, sort of, multimedia environment. So, through their websites, for instance, they will...they may have a camera in their studios. There's additional information about programs on their websites. I think the moment when Austereo, in 2008, renamed its program directors—PDs of course have been referred to for decades—content directors, that, kind of, marked a real, sort of, shift in how radio saw itself and was being seen.

So there was a conscious recognition of the fact that radio, but sort of, online brands needed to be developed and built on. So, within Austereo, for instance, the brands of someone like Hamish and Andy that needed to be leveraged both for audience popularity but also for advertisers.

RA: James Cridland says radio has to embrace the opportunities offered by its competitors.

JC: Things like SoundCloud and Audioboo—these types of websites where you can post audio for anybody to go and have a listen to—I think those types of websites are really good for the future of radio, because that's what you're actually doing; you're creating radio that happens to live on a different platform. But you're still creating some great radio, some great, in many cases, spoken words, some great soundscapes that people can go and have a listen to. And I think those are a really interesting, sort of, take on where the future of radio is.

Similarly, you have a look at the large amount of listening to podcasts. It's the way that I tune in to your radio program. And I think quite a lot of these services are services that actually make radio broader, make radio more available to audiences. And for that reason, I think they're very, very worthwhile, when you have a look at where radio might be headed.

RA: I'm interested that you mention podcasting because, like you, well I use it to get shows that I particularly enjoy that tend to be made in the US or the UK, and I know it's become increasingly important to Radio National where I work, but I still get the feeling that it's a minority pursuit compared to traditional radio listening.

JC: There's no doubt that any new platform is still a minority. Having said that, I think, that when you start looking at how people are consuming radio, then you actually see that the future of radio is very much a multi-platform medium. So, if you were to look 15 years ago, in the UK, you could only listen to the radio on one device—it

was an FM/AM radio. You couldn't find radio on anything else. Now there's radio online of course, there's radio through your TV—every single TV in the UK has some radio stations on there, much the same as every single TV in Australia as well—and actually what you're beginning to see here in the UK is, for example, the total amount of listening to FM/AM radio, is actually less than two-thirds of the total amount of listening to radio as a whole. So, a third of all radio listening is actually happening on a new platform—whether it's DAB, whether it's the internet, whether it's through your TV as well.

And of course, some of these new platforms are going to be very minority. Some of these new platforms are going to be, you know, for the real specialists. But then you can say that about other media as well. And, you know, some of the interesting records that you would go out and buy but you could only buy from that particular record store, or some of the interesting magazines that you had to traipse across town to go and find the international magazine seller—so all of that kind of stuff is still there in terms of radio as well.

RA: What about the car James? Because depending on where you are, you're listening in the car, can be a really high percentage of the total and yet, for most of us, most cars have, well—an AM/FM tuner. Some of them only have FM, yet we are increasingly moving towards digital broadcasting—your DAB's a big thing in the UK, it's a smaller thing here—until we have digital in the car, it's going to be an issue isn't it?

JC: Yes, I think so, and, I think, one of the things that we're working at particularly hard in Europe, is making sure that new cars have a DAB set inside them. It's something which is, you know, obviously, hugely important for where the future of radio's headed. Having said that, you know, only 20 per cent of radio listening is in the car in the UK. It's much lower than in the US where it's around 50 per cent. But it's still a very important place to end up being.

I think we're in a good state here, in that over a quarter of all new cars are now available with a DAB set already installed. I think that figure will go up as Germany continues to look at DAB. And I think that has great knock-on effects for other places in the world. I think once you start looking at, potentially in the future, turning off FM, and turning off AM—they've already turned off AM in many parts of Scandinavia, and they're talking about turning off FM here in the UK and in Norway as well. Once you start having a look at that, of course, every car will have to have a DAB set in there, in some way, shape or form. And that's going to be very important for the medium to continue to be healthy and happy.

RA: James Cridland says another thing the medium has to pay more attention to, is the smartphone.

JC: When you look at radio on your smartphone, then it's actually a really dull user experience at the moment. You get a frequency, if you're very lucky you get a station name and that's about as far as you go. And I think one of the challenges for radio in the future, is to make sure that radio looks and works just as nicely as everything else on a smartphone, or on your TV, or in the car. So, images of the songs that you're listening to, images of the presenters, more information that you can actually go off and find and so on.

RA: Well, so far you've heard about audiences, about the NBN, and about music and other platforms. But what about the oldest platform of them all—AM?

TW: AM's got some very big challenges, not the least of which are technical ones. The noise table in the big metropolitan cities—in other words the level of interference—is growing because there's just so much more, sort of, electrical activity going on, and therefore it's difficult, particularly the closer you are to CBDs [*Ed. Note: central business districts*], to listen to AM radio. So the AM radio listening experience is an uncomfortable one, an increasingly unpleasant one.

AM radio which is where the big audiences are in cities like Melbourne and Sydney—the market leaders are old AM radio stations that don't do very much more other than put an opinionated voice at the end of a microphone...

RA: With older audiences.

TW: ...with older audiences and they are very, very successful. But those audiences are, frankly, dying off.

RA: Not as fast as they used to...

TW: Not as fast as they used to.

RA: ...we're all living longer.

TW: Yes, we are and arguably there are going to be more 60-year-olds, but they're a different...I'd argue that they're a, sort of, slightly different kind of 60-year-old. You know, as people come through from, you know, their 20s to their 30s to their 40s, to their 50s, all of the things that we've been talking about earlier—all of the new behaviors, all of the very high levels of awareness of other sources of, you know, multiple sources of opinion—are all going to come through...

If those people who aren't working in media organizations have the same skills and the same abilities to be able to make content and the same capacity to be able to distribute it to audiences, you know, via the internet, in all sorts of forms—audio, video, you know, multimedia content—then what is...what differentiates professional media workers from non-professional media workers? And whether, you know, when somebody who's in their 40s now, gets to their 60s, I think that they're going to be very different from the type of audiences that have been prepared to sit down and spend their mornings with, you know, Alan Jones or Ray Hadley or whoever else.

RA: That will be interesting I think. Bridget Griffen-Foley believes that the influence of broadcasters like Ray Hadley and Alan Jones [*Ed. Note: Australian commercial talkers al*

la Rush Limbaugh et al] may have peaked already.

BG-F: What we've seen in recent months concerning Alan Jones in particular, does suggest that social media is challenging radio's dominance or perceived influence. I think that, politically, radio will still continue to be somewhat important, but that role is changing. With all of the changes surrounding radio now, it is increasingly possible for listeners to tailor their listener experience. So, I suspect it may be the case of really, sort of, polemical strident political voices talking increasingly to the converted—people who agree with them.

RA: Bridget mentioned digital radio; it's come up a few times today. Tony Walker, you'll remember is retiring as head of digital radio at the ABC this week.

TW: It's very unclear what's going to happen with digital radio in Australia. It's only available in five capital cities to date. That means it's getting out to about 63 per cent of the overall population—but there's still... there's something of a digital divide in Australia. If you live in, you know, Melbourne, Sydney, Perth, Brisbane and Adelaide, you can hear digital radio but you can't if you don't. And the government has yet to decide what the continuing rollout framework for digital radio is going to be.

There are some people who think that the NBN will trump digital radio as a technology. Therefore in the minds of some people there's a question about whether there'll be a complete rollout of digital. So that has implications for broadcast radio.

RA: And you're listening to broadcast radio—or maybe the podcast. Or you could be streaming it from the web. In any case, this is the *Media Report*, I'm Richard Aedy.

Montage: News Radio...As you know, four out of five cars have a radio...If it's on trend, look a bit higher because we'll be on it... We thought maybe 3D radio...What about some of the people who listen?.. Say we're looking for a particular sound, pop open the audio

recorder, send us that sound; maybe we'll use it in the show...to power them up. Oh, yes. Here we go. Here we go, and welcome to 3D radio...and now we just chat normally... yes...and you'll be able to hear, speaking like this and our thoughts... This new app basically is the entirety of radio lab in one little phone-sized package... radio...from... WNYC...

RA: The challenge for radio is to stay central to listeners' lives despite the many options all of us now have when it comes to consuming, and creating content of our own. For James Cridland, this comes down to one word—relevant.

JC: A relevant radio station to listen to, is a radio station that talks about things that you're interested in, that gives you news and information about things that matter to you. Now that might be your local area. It might be many other things. It might be a community of common interest. I happen to listen a fair amount to 612 ABC Brisbane, at home, here in London. There's a good reason for that, my partner comes from there. And so therefore she likes finding out what's going on where many of her friends and family are. Now that's a community of common interest and, you know, and I think that's one interesting area. And that's something computer algorithms can't necessarily deal with. It's much harder for a computer algorithm to sit there and work out what news stories might I be interested in, you know, all of that kind of thing.

So I think that's one of the things, but you can then, actually, have a look at the wealth and breadth of radio which is available through the ABC. I might sometimes want to be listening to something from Triple J, something from ABC Radio National something from one of the local stations. Now, actually, there's no reason why a computer couldn't work out the things that I'm interested in from the wealth of different stations and give me ABC Radio James—something which is a little bit brighter in terms of making sure that I'm listening to great national program, but I still get local news, I only get traffic and travel when it

relevant for me, when it knows that I'm going to leave for the day. It knows who I don't like on the radio as well as who I do. You can do all of this stuff now with technology with smartphones with all of that kind of thing. And I think that ensuring that radio is relevant to its audience is really important.

There's a radio station here in the UK, who's playing around with a fair amount of this. When you listen online you register, you tell the radio station who you are and a little bit about you—you know, how old you are, whether you're a boy or a girl, you know, and so on and so forth—so that the adverts on this particular station are tailored to me. So I don't hear adverts for tights and for lipstick, because I'm not very interested in tights or lipstick—at least, you know, certainly during the week. So therefore, it gives me a much more relevant listen in terms of some of the output.

RA: But to be relevant, you've got to know your audience and be prepared to listen to them. This isn't always as easy as you'd think.

TW: We have, you know, a Reithean heritage as a public broadcaster, which essentially put public broadcasting somewhere above the audience—that was the origin of public broadcasting. It was a notion that Reith—Lord Reith the founder of the BBC—had about an educated class making decisions about what, you know, a working class needed to know to have a rich and fulfilled life. And that's a heritage that I think has stayed with public broadcasting all the way through.

I think in the early days of audience engagement, when we started to hear talk about user-generated content and audiences making their own...you know, engaging in their own creative endeavors and making content that sat alongside the content that we, as professional media makers made, I think there was, sort of, a lot of nervousness and quite a bit of pushback from inside the organization. Understandable—because it was a very fundamental and stark contradiction with that sense of heritage that

we had of making our own decisions about what was good content, and we would make the decisions about what our audiences were going to hear. You know, occasionally we would hear from audience and they'd say, well we want you to do this and we want you to do that and we'd say, yes, well of course, you know, we're the public broadcaster—we're owned by you, we will respond. But in the end, I always thought that that, sort of, Reithean heritage again, to use that term, made it very difficult for us to connect with audiences in the way that we now have to.

RA: So what of the future then? Well, of the three people you've heard from today, Bridget Griffen-Foley, the historian, has the most distance from the medium and it may mean that she's the most realistic.

BG-F: Radio is possibly moving from being more of a mass outlet to a niche outlet. With the proliferation of stations, partly through digital radio, radio groups will be looking to attract listeners who have interests aligned with those of their stations. And that does suggest that the huge mass audiences that we've seen in the past for some radio stations, and indeed, radio programs or radio presenters, may be decreasing.

RA: I do hope she isn't right. James Cridland, who consults to the industry, is more optimistic.

JC: Yes, I am, I mean, I'm optimistic because I know the power of radio and you only have to ask people who are caught up in the Victoria bush fires about the power of radio or the Queensland floods. Radio is a tremendous medium; it's intimate. It's a medium which is really easy to make now; all you need is a mobile phone and you can make amazingly engaging and fantastic radio, and I think that's something that we can't do easily with television. We can't actually do a very good emotive job with the internet, but radio is a really unique medium that I believe has a fantastic future.

RA: Tony Walker, retiring this week, after something like three-and-a-half decades in the business, is somewhere in the middle.

TW: The old idea of radio as a box that sits on your kitchen bench and delivers you a linear stream of content that you might like or dislike is well and truly gone. I'm very optimistic about the capacity of an organization like the ABC to continue to produce high quality, relevant, engaging content that audiences are going to value. We have to make sure that we get that content out on every single platform and on every single device where the audiences are and make sure they know about it. And then we will continue to be important in people's lives.

RA: I hope we can pull that off, obviously.

I'd like to thank our guests. James Cridland is a radio futurist and consultant. Professor Bridget Griffen-Foley is a media historian at Macquarie University and author of *Changing Stations: The Story of Australian Commercial Radio*. Tony Walker's just finishing as the ABC's head of digital radio, and one of its deeper thinkers.

The show is produced by Kyla Slaven. Our sound engineer's Timothy Nicastrì.

NASWA Flashsheet

Are you getting the latest hot information about what is happening on the shortwave bands? If you have not signed up for the club's electronic *Flashsheet* service, you are missing out on timely news and information about the DX scene that will enhance your shortwave listening pleasure. If you are a current member of the club and want to receive the electronic *Flashsheet* just drop **Rich D'Angelo** (rdangelo3@aol.com) a note with your e-mail address, location and membership expiration date from your mailing label. You can participate by sending your latest logs to the electronic *Flashsheet* edited by **Mark Taylor**, markokpik@gmail.com. The club's electronic *Flashsheet* helps members stay on top of the action with breaking shortwave news and information. The electronic newsletter is an excellent supplement to the monthly *Journal* for the timely dissemination of DX loggings and breaking news.

NASWA Yahoo Group

Join moderator **Dan Ferguson**, the club's Yahoo Group, and other club members to discuss reception of shortwave radio broadcasts, program content, propagation, reception conditions, loggings, hot news and information as well as radio equipment and accessories and any topics related to shortwave radio in general. Please keep in mind that loggings, QSL news, schedule changes should also be reported to the appropriate column editor of the *Journal* for publication. This forum is a supplement to, not a replacement of, The *Journal*. Subscribe by going to <http://groups.yahoo.com/group/NASWA/>. Any club members wishing to participate in the NASWA Yahoo Group, moderated by Dan Ferguson (k4voa@zerobeat.org), but not interested in registering direct with Yahoo should contact Dan direct by e-mail for further information. Dan can manually add you to the group. 

International Broadcasting

Dr. Kim Andrew Elliott • 5001 25th St. North • Arlington, VA 22207 • kimelli@verizon.net
http://www.kimandrewelliott.com

Reform eludes US international broadcasting

The Broadcasting Board of Governors, the top authority of US international broadcasting, consisting of Voice of America, Radio Free Europe/Radio Liberty, Radio Free Europe, Radio/TV Martí, and Middle East Broadcasting Networks Inc (Alhurra and Radio Sawa), is down to four members, plus the ex officio Secretary of State. And one of those four members, Michael Lynton, despite being the "presiding governor" in the absence of an actual chairman, has not attended a meeting since January.

The member who resigned, on April 9, is Dennis Mulhaupt, a Republican. He wrote to President Obama: "I write to submit my resignation from the Broadcasting Board of Governors (BBG) effective today. Over my tenure I, along with some of my board colleagues, have consistently advocated for necessary and far-reaching reform of the governance structure and organization of U. S. international broadcasting (USIB). My belief in the importance and need for these reforms has only grown stronger the longer I have served. I hope that the administration and Congress will address soon the urgent issues facing USIB and the BBG, the components of which do such vital work advancing freedom and human rights in many countries throughout the world."

Mr. Mulhaupt did not provide a reason for his resignation. Michael Meehan, acting chair of the April 12 BBG meeting, in announcing Mulhaupt's resignation, said "we hope that he's fine," hinting at a health issue. Mulhaupt did address the need for reform, suggesting that he was frustrated by the lack of movement towards the reform of USIB. He also described the work of USIB as "advancing freedom and human rights," which is a strange and unhelpful way to describe what is supposed to be a news organization.

Mr. Mulhaupt served as chair of the board of Radio Free Europe/Radio Liberty. BBG members Susan McCue and Victor Ashe take over as chair and vice chair of the RFE/RL board. On 15 April, Judy Bachrach, writing in the journal *World Affairs*, described a strange event in which Governor Ashe was asked by Masha Gessen, the recently appointed head of RFE/RL Russian, to leave a Washington dinner in her honor, even though he had been invited. When Kevin Klose, acting president of RFE/RL, learned about this, he also prepared to leave with Ashe. At that point, Gessen relented, and Ashe was allowed to attend. It's a complicated story, which you can find at www.worldaffairs-journal.org/blog/judy-bachrach/moscow-potomac, with even more at [BBG Watch \(usgbroadcasts.com\)](http://BBGWatch.usgbroadcasts.com). But there is probably more to it than one would typically get from either of these sources.

It's not duplication, it's "parallax."

Acting RFE/RL president Kevin Klose was one of the USIB entity heads who spoke at the April 12 meeting of the BBG. He is clearly not reform minded. He noted he was deeply interested in collaboration with the other entities, the names all of which he could not remember. (There really are too many of them for most people to remember.) But he also spoke of the "rubric" of "overlap and duplication." Noting that cars and truck have two headlights, he said "we need parallax."

"I don't buy it that there is duplication and that there is overlap.... We accept that there are differences" between RFE/RL and VOA, but "we need to emphasize our common strengths and not get into a dialogue with anybody about overlap and duplication because we don't do that."

Mr. Klose mentioned "parallax" and "depth perception." My website, employing depth

perception, has documented many instances of duplication and overlap in USIB. In USIB, one cannot swing a cat without hitting an instance of duplication. A casual perusal of the USIB websites provides the evidence. Duplication is a significant form of waste in federal spending. There is never a legitimate excuse to waste the taxpayers' money.

Save the entities. Sink USIB.

Mr. Klose no doubt thought he was giving a passionate defense of his entity and of the jobs of his entity's employees. What entity heads, who spend so much of their energy trying to preserve their entities, don't seem to realize is that USIB, if its limited budget continues to be drained by duplication, and if its scarce resources are divided among competing entities, has no chance of competing with the real competition out there in the real world. And that will be to the detriment of all the entities and all their employees.

I give Mr. Klose credit, however, for coining "parallax" as a surrogate (if you will) term for "duplication." I think members of Congress, journalists, senior distinguished think tank fellows, and other gullible Washington types will swallow it whole. I think the "parallax" concept will ensure that USIB continues to fall short of its potential.

In a recent national survey in Cambodia, respondents were asked how many minutes of a newscast from the United States should be about Cambodia, about the United States, and about the rest of the world. Ethics regulations prevent me from providing the three numbers here (although the BBG could make them public), but suffice it to say that the result is more news about Cambodia than VOA can do well, and more US and world news than RFA can do at all. In the present structure of USIB, the one that the entity heads are trying so hard to preserve, there is no provision for a station that provides news in the proportions that audiences in Cambodia and elsewhere want. In other words, there is no provision for success.

Data from comScore, which employs representative panels of internet users, shows the number of visitors to the RFE/RL, VOA, and BBC websites in Russia. Again, I can't provide the numbers, but can hint that RFE/RL and VOA are fighting it out rather far below the BBC Russian website, which is soaring. Keep in mind that the UK spends less on international broadcasting than the United States. The BBC World Service, however, has the advantage of not frittering much of its budget on duplicated efforts, and not dividing scarce resources among competing entities. comScore shows a similar situation in Vietnam between the VOA and RFA websites versus a considerably more successful BBC Vietnamese website.

Television is playing a greater role in US international broadcasting. For example VOA is developing television services for Burma. RFA is developing television services for Burma. There are several other instances where more than one entity is increasing its television products for a single target country. When radio prevailed, the taxpayers might have been able to afford duplicated efforts of two entities. The entities might have been able to divide talent and other scarce resources between them. In television, however, the days of profligacy are over. As the entire federal government looks to reduce spending, duplicated television services cannot be justified. And there is not enough talent, not enough outlets in target countries, not enough of other resources to divide between entities. In the television age, preservation of multiple USIB entities is folly.

VOA Radiogram

This experimental weekly VOA program of text and images via a 50-year-old short-wave broadcast transmitter continues, with better results than I ever imagined. More information at voaradiogram.net.

Views expressed above are my own. More international broadcasting news at www.kimandrewelliott.com.

ALGERIA New SW sites Ourgla and Bechar discussion. Wavescan NWS216 - April 2013 (Extract). High Frequency Coordination Conference Update: The Algerian Radio does have a service on shortwave, using the facilities of TDF, Telediffusion de France, in Issoudun. But this appears to be temporarily, as engineer Lotfi Chelali of Algeria's TDA explained to us that they are building two shortwave transmitter sites in Ourgla and Bechar, each with a 300-kilowatt DRM-capable transmitter. These sites are expected to be on air within the next year. The programming is intended for the countries of the Sahel in northwestern Africa; Mali, Niger, Nigeria, Mauritania, Chad and the Polisario front areas. (via Ian Baxter-AUS, SW TXsite Apr 16)

AUSTRALIA Changes relate to the off-shore relay of Singapore. The new 250 kW RIZ type shortwave transmitter came into usage now at Kranji, moved here from mothballed Skelton Cumbria site of Babcock in U.K. (wb)

HCJB Australia plans to expand its Japanese service. For A13 schedule, they will repeat weekend morning programs aired at 2230 on 15525 in the evening our time. It will be at 1100 on 15400, Saturday and Sunday. This is good news in the shrinking SW world. (Toshi Ohtake, Japan SW Club)

AZERBAIJAN *The Voice of Talyshistan*: March 20, 2013 - on the eve of the traditional celebration of the Iranian people Novruz marks the beginning of the new year, at 19.00 in Shushi aired the first program radio program "Tolyshistoni Sado" - "Voice Talyshistana" the Talish and partially in Azerbaijani. The world's first radio program broadcast daily in the language of the Talysh people. Every day at this time and further - to repeat several times a day - an hour in the waves AM-9677 on air sound Talish language, poetry and songs...- Next - about the creators of "Voices Talyshistana." This is - a joint project of the Caucasus Center Iranian Studies and center "modus vivendi". Technical support is provided by us "Impulse" for which we are very grateful to its professional staff. The team of "Voices Talyshistana" - Talysh, carriers of different dialects, as well as employees of our department of Iranian Studies YSU involved talyshvedeniem and azerbaydzhanistikoy. I should be happy to note that my students, young talented scientists and graduate students, an excellent job with this new for these activities. - Please comment on another aspect of what is happening - an inappropriate response to the creation of broadcast in Azerbaijan. On Azerbaijani sites write that radio allegedly will turn off ... - Inadequate response to Azerbaijan at the number of our projects, in general, used to. We are accused of politicizing our conferences, cultural events, publications and so on. Of course, the same charges will be heard in connection with the new project. Most of Azerbaijan cares absurd question - why is it we learn culture people who do not reside in the territory of Armenia. Leaving aside the absurdity the question

in an academic perspective - what else does Iran studies if No Iranian peoples? - I want to simply forward the question to ask it. Why not carried out, in particular, talyshvedcheskih conferences and radio broadcasts Talish and television in the world where live representatives of the indigenous people of this ancient Caspian? I do not think it makes sense to turn off anything today. Rather, it will still a strong reaction among the Talysh that quite undesirable for Azerbaijan Republic. First, the radio has a Web site, and each new instant distributed in YouTube. So with the current spread of technology Information jam radio - a relic of the Cold War ... (Viktor Rutkovskiy, Ekaterinburg, Russia/open_dx) 6 April on 9677 kHz 06.15 to 06.30 SINPO - 35343. Said the woman. Growling under. After 06.30 there is no transmission, but the transmitter was turned on. (Alexander Golovihin, Togliatti, Russia/ "open_dx")

9677.74, Tolışstoni Sədo (*Voice of Talyshstan*), Stepanakert, Nagorny Karabakh, *0900-0956*, Mar 29, ID, music, Talysh talk, local music with short anns, end of programme at 0950, open carrier until 0956 s/off, distorted audio, 45343. (Beryozkin/DX Window) Also heard at *1500-1505, Apr 09, 3 time pips, and ID at 1500:03, frequency ann, some local Persian music, but distorted audio, compared to Voice of Justice broadcast at 1400. (Bueschel-Germany/DX Window)

9677.73, *Ādalātin Sāsi Radiosu (Voice of Justice)*, Stepanakert, Nagorny Karabakh, 1410-1422, Tu Apr 09, commentary by woman in - probably - Azeri, and often "between play" break interlude as "Dr. Schiwago" music theme, S=9+5dB. Empty transmitter stayed on the air until 1500. (Bueschel-Germany/DX Window) 9677.7, *Aedalaetin Saesi Radiosu (R Voice of Justice)*, Stepanakert, Nagorno-Karabakh, observed March 09-14 with very old known schedule Tue and Fri only at 1400-1425, repeated on Wed and Sat at 0600-0625. The circulated schedule with broadcasts on all weekdays is non-correct. Main news for this station is that since March 13 Radio Voice of Justice has a new transmitter and new studio with clear speaking in Azeri; it is for the 1st time in their history. (Rumen Pankov-BUL, dswci DXW March 20) 9677.42, *1400-1410, Tu 19.03, *Ādalātin Sāsi Radiosu (Voice of Justice)*, Stepanakert, Nagorno-Karabakh I/S, talk in Azeri. 24333. Scheduled with 10 kW Tu/Fr 1400-1425. (Anker Petersen-Denmark/PlayDX) 9677.54, 0945-1000*, Sa 30.03, Voice of Talyshistan (New station!), Stepanakert, Nagorno-Karabakh Talysh talk, song,

ann. 25232. Scheduled daily (?) with 10 kW 0900-0959. (Anker Petersen-Denmark/PlayDX) 9677.50, 1220-1240, Sa 30.03, Voice of Talyshistan (New station!), Stepanakert, Nagorno-Karabakh Talysh talk and songs. 24232. QRM CRI Urumqi 9685 in Russian. Scheduled daily (?) with 10 kW 1200-1259. (Anker Petersen-Denmark/PlayDX)

New schedule for *Voice of Justice*, according to monitoring on March 23:

0400-0427 9680 Azeri Fri/Sat, new time
0900-0959 9677v Azeri Fri/Sat, new time
1200-1259 9677v Azeri Fri/Sat, new time
1500-1559 9677v Azeri Fri/Sat, new time
1400-1427 9677v Azeri Wed/Fri cancelled
0600-0657 9677v Azeri Thu/Sat cancelled
(Ivo Ivanov-BUL, wwdxc BC-DX TopNews March 26)

(Beryozkin-Russia and Méndez-Spain/DX Window). Also heard at 0130-0135, Apr 13, Portuguese phone-in conversation about Amazonas, 55444. (Petersen-Denmark/DX Window)

9820, **R 9 de Julho**, São Paulo, SP, 2025-2050, Apr 05, Portuguese religious comments, 24322. Also 0558-0630, Apr 06, "estamos apresentando Com a Mae Aparecida", Portuguese religious, "Tres horas y oito minutos", 24322. (Méndez-Spain/DX Window)

CENTRAL AFRICA REPUBLIC Radio ICDI looted in Central African Republic: The Seleka rebels have taken over the capital city of the Central African Republic and ousted President Bozize. Please con-

tinue to pray for our staff. Their safety is ICDI's top concern. Please pray that the Central African people will come to a peaceful resolution of this conflict. There is a great deal of uncertainty, but we do know that rebels and looters have taken property from the ICDI office in Bangui. One of ICDI's dedicated employees was able to call and he shared his story of trying to protect the office from further looting. Here is an excerpt of that conversation: "At 9:30 I was at home and Seraphin called me and said 'I heard that ICDI was looted.' My heart broke and I got up and took my moped and I hurried over here to ICDI, and yes, it was being looted...it seemed like they had started to loot it around 8 o'clock. So I got there, and I yelled 'Hey, what are you all doing!?' This is a Central African's house, why are you looting it like this?' I encountered 5 Seleka soldiers in the building. They were grabbing stuff, and at the same time, others were carrying it out... In the main room, they brought the safe into the hallway, and threw it there. They tried to open it by shooting it with their guns, but they couldn't do it. I told them, 'there's not even anything in it anyway' and they left it...My heart hurt." We will share more information as it is available. (Jim Hocking, ICDI/SWBulletin)

CHINA 4500, Xinjiang PBS, Urumqi, 2350-2400, Apr 05, Mongolian ann, song, 55444 // 6190 (55444). (Petersen-Denmark/DX Window) Also heard at 1624-1626, Mar 23, Mongolian, 55544. (Beryozkin-Russia/DX Window)

5050, **Beibu Bay R**, Nanning, Guangxi, 2300, Apr 05, ID ann including "96 point 4" in Chinese, music clips, Asiapop duet sounded like Indie music, 45444. (Bell-South Africa/DX Window)

6185, China Huayi Broadcast Company (CHBC), Fuzhou, 1210-1233, Apr 03 and 04, Chinese with "Culture Homeland" program, mostly fair with some adjacent QRM. For several years now have attempted to contact Qiao Xiaoli, the CHBC QSL manager, but without any success until Apr 04, when I received this reply to yesterday's reception report sent to 2883752@163.com: "I am very glad to verify your reception of CHBC, as of your clip audio, it is CHBC programme and it include an station ID , so here is the confirmation: Date: April 3, 2013. Time: 1210-1218 UTC same as 2010-2018 BJT. Frequency: 6185 KHz. Station: China Huayi Broadcast Company. Language: Chinese. Programme: "Culture Homeland". Please find an e-qls as an attachment. Qiao Xiaoli < Jonathan Short >. Attached was a

very nice blue CHBC eQSL card with full data. I am very pleased to make contact again with Qiao Xiaoli, as in the past he was excellent at verifying CHBC reception reports from listeners outside China, sent to him in English! He lives in Changshu (Jiangsu Province). (Howard-CA/DX Window)

R. Free Sarawak has been announcing a change of frequency to 15430 at 1100 starting from today (March 30). The language is Iban. At this stage I don't know the txer site. (Rob Wagner-Australia/EDXP) 15430, R. Free Sarawak. After having moved from 15430 to 15425, and then 15420, this station is being heard here on 15430 again tonight, Apr 19. I cannot confirm the txer site - some say Sri Lanka, Taiwan or Palau - take your pick! (Rob Wagner-Australia/EDXP)

eQSL **Voice of Iranian Kurdistan** 4870 via address secretariat.pdki@googlemail.com. (Patrick Robic-AUT, A-DX Apr 11)

COLOMBIA 5909.93, **Alcaraván R**, Puerto Lleras, 0345-0555, Mar 27, Apr 05 and 14, religious comments in Spanish, Latin American songs, ID: "Alcaraván Radio 1530 AM, y en onda corta 5910

kHz, Alcaraván Radio", 24322. (Beryozkin-Russia and Méndez-Spain/DX Window)

CYPRUS CBC Nicosia weekend program, BBC Zysi relays have gone for ever. Checked CBC Greek weekend program on March 22 at 2210, usually Interval signal, program 2215-2245 Fri/Sat/Sun relays via BBC Zysi site. **NOTHING** heard on Friday March 22 night, not even on program start, the carrier of the 3 SW outlets to UK at 314 degrees anymore. (wb, wwdxc BC-DX TopNews March 22) Its been missing for several weeks, with the closure of the BBC (not Babcock!) SW relay station on Cyprus next weekend, it seems that these relays of CyBC may have been discontinued some time ago. I don't know when the final broadcast was, has anyone heard it at all during 2013? (Dave Kenny-UK, BrDXC-UK March 23)

The **BBC World Service's** Cyprus shortwave relay station closed on April 1, meaning listeners are no longer able to listen to the famous World Service broadcasts. Shortwave broadcasts of World Service Arabic will also end by the end of April. The closure of the Cyprus shortwave relay station will see the loss of 26 jobs. These are Foreign and Commonwealth Office and Babcock employees who are funded by the World Service. Peter Horrocks, director of the BBC World Service, said that the changes reflected listening trends, as audiences increasingly embrace TV, mobiles and the internet over shortwave radio. "The changes are in line with our overall strategic aim of ensuring that we are able to respond to changing audience needs and invest in the way audiences consume news," he said. "Shortwave audiences are declining as radio audiences come to rely increasingly on medium wave and FM, and there has been a rapid growth of television and digital media." The UK government's 2010 Comprehensive Spending Review set the World Service the target of saving £42m by April 2014. It has already achieved nearly £30m with the loss of five language services and around 480 jobs. According to the BBC, World Service English shortwave transmissions will be reduced to six hours a day, with 1.5m listeners likely to be lost as a result. Currently, there are between seven and 19 hours of shortwave depending on region. The distribution changes - which include cuts to medium wave transmissions - are designed to save £4.8m in 2013/14. It's a large chunk of the £12m savings the World Service is targeting in its third phase of cuts as a result of a 16% reduction to its grant-in-aid. The World Service first set-up in

Cyprus in 1957 when it established the British East Mediterranean Relay Station (BEMRS) in Limassol, which was one of the most powerful broadcasting stations on the island. (via Andrea Borgnino IWOHK, SW TXsite April 8)

DIEGO GARCIA 4319 USB, **AFRTS** feeder, Diego Garcia, 1720, Apr 07, relay in English, 33333. (Giroletti-Italy/DX Window) Also heard at 2220-2309, Apr 05 and 11, "Somebody That I Used to Know" by Gotye, brief ann, more Indie pop, 35443. (Bell-South Africa and Beryozkin-Russia/DX Window)

ECUADOR 4781.70, **R. Oriental**, Napo. 1056-1123 on Apr 24. While I was listening to R. Caiari, at 1059, Radio Oriental showed up, covering it. Advs: "Comercial en Ferretero, Comercial Moscoso el quintal de fierro". ID on passing: "Por Radio Oriental", San Juanito mx, ann: "estamos con la información con Ecuavisa. ID: "A través de Oriental", adv: "Casa Ramirez". At 1118, it was necessary to switch to due to mixed QRM with R. Tarma, sx nx. No rcprn thereafter. 33333. (Pedro F. Arrunátegui-Perú in Chasqui DX/Dxplorer)

FINLAND 6170, **Scandinavian Weekend R**, Virrat, 2230-2355, Fr Apr 05, Engl ID, requested reception reports to P. O. Box 99, FI-34801 Virrat, Finland; pop music, 34433 QRM CRI in Portuguese 6175. 11690 not heard. Also heard at 0430-0440, 0940-1050 and 1510-1520, Sa Apr 06, Finnish ann and songs, at 0430 22422 (QRM 6165 Ru and 6175 Vt), else 25332. 11720 only weak in the afternoon (15121). (Petersen-Denmark/DX Window)

FRANCE RFI seems to have started to QSL again. A couple of nice e-QSL's for their FM relays have been received from Chrystelle Nammour (chrystelle.nammour@rfi.fr). (Vashek Korinek-South Africa/DXplorer)

PAPUA NEW GUINEA Rcvd the following QSL e-mail from Father Paul Kote, Director of **Radio Maria**, a Catholic FM network in PNG in response to a recording I sent him of the Catholic Radio Network broadcast on 4960 on Jan 3, 2006 from 1201-1331. "Dear Bruce, Elizta, the audio technician has verified the recording as from St. Gabriel radio from Vanimo (PNG). This radio station is now operated by radio Maria. We are transmitting through 103.5 FM. Many greetings and have blessed day. Thanks, Fr. Paul Kote" WRTH never identified this station as St. Gabriel Radio in its 2006-2008 editions nor did it have any address for sending reports. Apparently, CRN had some problems and Radio Maria was established in 2006 as a new Catholic broadcasting network in PNG. Both organizations were headquartered in Boroko while the St. Gabriel Radio transmitter was in Vanimo as indicated above. Very pleased to get this, especially from a station no longer operating. This was always a tough catch on WCNA even though it had as much power as Wantok R. Light and R. Fly. (Bruce Churchill-CA/DXplorer) Concerning Radio Maria PNG I can add that currently they are working on establishing their FM network. But the tx technician told me, that they also want to reactivate shortwave. (Harald Kuhl-Germany/DXplorer)

PERÚ 4774.96, **R Tarma**, Tarma, 0030-0100, Apr 13, Spanish ann and songs, several ID's, 14232, Utility QRM. (Nilsson-Denmark and Petersen-Denmark/DX Window)

4835.03, **Ondas del Suroriente**, Quillabamba, 0056-0058, Apr 12 and 13, R Felicidad ID 0056 and 0058, followed by a longer ID with frequencies, etc. Quite good strength. (Nilsson-Denmark/DX Window)

4984.20, **R. Voz Cristiana**, Chilca, Huancayo. 1110-1140 on Apr 17, ID: "Estamos cumpliendo una gran comisión, transmite Radio Voz Cristiana para el Perú y el Mundo". I checked fq both on LSB and USB, px: "Siempre en Conexión con Dios", promos: "Escuche el magazin de las mañana todos los jueves y viernes", mx: huayno with rlg lyrics. ID: "Radio Voz Cristiana". Note: Canned ID is given approx. every 5 minutes. 44444. (Pedro F. Arrunátegui-Perú in Chasqui DX/DXplorer)

5980.00, **R. Chaski**, Juliaca. 1134-1202 on Apr 7, rlg px religioso about "Salmo 110, con la Semántica", a transcription pgm from R. Trans Mundial. rlg mx, hymns, ID " Escuche la palabra de Dios en la región

Cusco a través de Radio Chaski 630 kHz...". 44444. (Pedro F. Arrunátegui-Perú in Chasqui DX/DXplorer)

9674.85, **Pacifico Radio** - Lima. Advertis and canned anncts 0740, then a pop ballad at 0746. ID at 0752 and thanking listeners for listening. Fair signal and at equal level to the plasma TV signal from next door! Best heard in LSB. Apr 16. (Rob Wagner-Australia/EDXP)

ROMANIA We are sorry to announce that **Radio Romania International** will be leaving the World Radio Network at the end of March. If you would like to contact Radio Romania International, you can email them here: eng@rri.ro. (WRN Newsletter 15 March via Mike Terry/BDCX)

R Romania Int heard in Spanish at 1910 tune-in today, 12 April, on new 11805 ex-11795, still in parallel with 9665. 9665 meanwhile completely wipes out REE Spain in English on the same channel, although fortunately, parallel 11615 to Africa is well heard. (Alan Roe, Teddington, UK)

RUSSIA 6085, **R Rossiï**, Krasnoyarsk, Krasnoyarsk, 2309-2347, Apr 09, Russian regional programme, 44444. (Beryozkin-Russia/DX Window)

6160.00, **R Rossiï**, Pomorye, Koskovo, Arkhangelsk, 0125-0130, Apr 13, Russian ann, opera and romantic song, 34343. (Petersen-Denmark/DX Window) Also heard at 0340-0400, Apr 05, Russian regional programme, 54554. (Beryozkin-Russia/DX Window)

RWANDA A13 schedule for **Deutsche Welle** in English via Kigali:

0400-0500 5905 9470 12045
0500-0530 5905 9470 9800 12045
0530-0600 9800 12045
0600-0630 12045 15275 17800
0630-0700 15440 17800
1900-1930 11865 11800 15275
1930-2000 11865 15275
2000-2100 11800 11865 12070
2100-2200 11800 11865 12070
(BDXC)

SAUDI ARABIA French and English broadcasts from BSKSA currently observed as follows:

French: 0800-0953 on 17785, 1400-1553 on 17660
- Radio Riyadh

English: 1000-1227 - Radio Jeddah on 17785 at 0752-0800 heard with instrumental music instead of English. (Rumken Pankov 25 Mar/BDXC)

SOMALIA A station called **R. Puntland** plans to start on shortwave in June on 6140 and 13800. Power should be up to 25 kW in June. (WRTH - World Radio TV Handbook Facebook page 14th April). This report in English from www.raxanreeb.com (11th April): Garowe (RBC News) Puntland president Dr. Abdurrahman Faroole has officially opened a new radio which will be aired from Garawe. The establishment of this radio which can be heard on shortwaves has been going on for two years in the Puntland capital Garawe. Italian government has funded the radio project and will be the voice of Puntland administration. The radio is on the air now for testing and the enrolment of staff that will be running the radio is underway. (Alan Pennington-UK, BDXC via Jerry Berg/DXplorer) Interesting. But 13800 to me sounds more like they will transmit from leased facilities abroad into Puntland rather from inside the "country"? Or do they plan an international service for listeners abroad? (Harald Kuhl-Germany/DXplorer) As far as the NASWA Country List is concerned, it seems far too early to say. As Harald suggests this might be broadcasting TO Puntland, rather than FROM Puntland. And even if FROM, more research into the history and current status will be needed. Once people start hearing it, and we have more details, the NASWA committee will convene, research, discuss and make a decision. (Don Jensen-WI, NASWA CLC Chair) Puntland is a region of northeastern Somalia which declared itself an autonomous state in 1998. (Alan Pennington-UK, Apr 15, BrDXC-UK yg/TopNews)

13800, **Radio Puntland**, Somalia, 1400, Apr 17, S10 252. Folgende Information erhielt ich soeben von der Station: Der Testbetrieb von Radio Puntland auf 13800 lief heute mit nur 50 (!) Watt, da es Intermodulationsprobleme am Sender gibt. Deswegen wurde auch die Bandbreite auf 6 kHz begrenzt, was die momentan geringe Signalstaerke des 25 kW Senders erklaert. 50 Watt AM, einer meiner schoensten Empfaenge der letzten Jahre! (Christoph Ratzler-AUT, A-DX Apr 17) First reported log of this new station - RAD. I've just web tuned to the Univ of Twente web SDR rx a few minutes ago, before and at 1400 (April 19). I observed a carrier in the waterfall, some tone as modulation, currently showing, but OC only. (Horacio Nigro-Uruguay/DXplorer) Good window is 1400 till around 1426 Iran

sign-on. When/if they get the 25kW tx operating, this will be easy to hear. (Jari Savolainen-Finland/DXplorer) Jari has also reported this is an Elcor 25 kW unit built in Costa Rica and financed by the Italian government - RAD.

SOUTH AFRICA A13 schedule for **Channel Africa** in English from Meyerton Mon-Fri:

0300-0400 3345 5980-me 0400-0500 3345
0500-0600 7230 0600-0700 7230 15255
0700-1200 9625 1500-1600 9625
1700-1800 15235
(HFCC/BDXC)

SPAIN 9660, **REE**, English broadcast is being heard today (Sunday 31 March 2100-2200) not 9650 as shown at http://programasdx.com/ree_a13.html for their week-end transmission to Europe. (Alan Roe, Teddington, UK)

SRI LANKA BBC World Service has announced the suspension of its FM broadcasts via SLBC (Sri Lanka Broadcasting Corporation). It follows continued interruption and interference to BBC Tamil programming on SLBC in breach of their agreement with the BBC. The BBC took similar action in 2009 when its services were also disrupted by SLBC. Audiences in Sri Lanka can continue to listen to the BBC in Tamil and Sinhala on SW and online. (BBCWS press release 26 March/BDXC)

SUDAN Summer A-13 of **Radio Omdurman Sudan**:

0230-0400 NF 7205 Arabic, ex 7200
1430-1600 NF 7205 Arabic, ex 7200
1900-2100 NF 7205 Arabic, ex 7200
(DX Mix Georgi Bancov & Ivo Ivanov-BUL)

Summer A-13 of **La Voix du Soudan**, without frequency changes:

0400-0700 on 9505 Arabic/French/Swahili
1600-1900 on 9505 Arabic/French/Swahili
(DX Mix Georgi Bancov & Ivo Ivanov-BUL)

TAJIKISTAN Ovozi Tajik in Russian as before with 0800-1000 on nothing has changed now confidently accept them at a frequency of 7245 (Shukhrat Rakhmatullaev, Tashkent, Uzbekistan / "deneb-radio-dx")

UGANDA 4750, **Dunamis SW**, Mukono(t), 1530-1600 Apr 01, Christian songs. Very hard interference

from R Bangladesh on the same frequency. Very poor, 22131. After 1600 I could not hear the station, because was not any signal at all. The next few days I tried to listen again to the station, but there was not any signal at all. (Dritsas-Greece/DX Window) It may be testing after a silent period. (Ed/DX Window)

USA VOA reducing shortwave broadcasts (Press Release): **Voice of America** is reducing some of its radio transmissions this weekend and ending shortwave broadcasts to regions where audiences have alternative ways of receiving VOA news and information programs. The transmission reductions allow VOA to comply with budget cuts required by sequestration and to avoid furloughs of staff members. When the new broadcast schedule goes into effect on March 31st, cross-border shortwave and medium wave broadcasts to Albania, Georgia, Iran and Latin America will be curtailed, along with English language broadcasts to the Middle East and Afghanistan. The new broadcast schedule calls for reductions in some shortwave and medium wave radio broadcasts in Cantonese, Dari/Pashto, English to Africa, Khmer, Kurdish, Mandarin, Portuguese, Urdu and Vietnamese. Direct radio broadcasts to all of these regions will continue. The transmission reductions are expected to have minimal impact on audience numbers since primary modes of delivery will remain. Shortwave and medium wave broadcasts will continue to regions where they draw substantial audiences, and to countries where other signal delivery is difficult or impossible. (DX Mix News, Georgi Bancov & Ivo Ivanov-BUL, via Dan Ferguson-SC)

EWTN: Global Catholic Radio Network now has 220 AM and FM radio stations, newest ones being in Alabama, Louisiana, Nevada, North Dakota, South Dakota and West Virginia. Mother Angelica of EWTN in Alabama just celebrated her 90th birthday. (EWTN via Marlin Field-MI) Also on SW. (RAD)

VIETNAM 7210, **VoV 1** Buon Ma Thuot hrd from 0930 w/ man and woman ancrs in VV and various types of background mx in domestic svc. Faded in circa 0915 and at 0930 SINPO 24542. Trending up in signal strength after 0930 (SINPO 35443 by 0955) and dominating the channel over what was presumed AIR Kolkata. By 1025 tune out SINPO was 45544. Slight xmtr hum but not bothersome. Buon Ma Thuot is in the Central Highlands of the former S. Vietnam. New xmtr site for me in Vietnam. (Bruce Churchill-CA/DXplorer)

ZIMBABWE While radios play a very important role in many societies especially the third world, Zimbabwean police have declared war on solar powered radios. In many African countries Zimbabwe included radio is the most important medium of communication and communities rely on it to keep themselves informed on news, local and international events. Low literacy levels and poor newspaper circulation makes dependence on newspapers negligible. Poor infrastructure is also another reason why people depend on solar powered radios as most rural areas have not been electrified. On the 19th of February 2013, police spokesperson Assistant Commissioner Charity Charamba told a news conference in Harare that possession and distribution of solar powered Short wave radios was illegal. She accused some opposition parties of distributing the 'illegal devices' to unsuspecting members of the public with the intention "to sow seeds of disharmony within the country especially now that the country is about to embark on the referendum and harmonised elections." (Radio Dialogue via Liagkas Zaxarias-Greece/PlayDX)

Schedules, news and other information about shortwave broadcasting activity can be send to Richard A D'Angelo, 2216 Burkey Drive, Wyomissing, PA 19610 or via e-mail to rdangelo3@aol.com (please indicate in the subject that your contribution is for Listeners Notebook). Thanks!
73, Rich 

Pirate Radio Report

Mike Rohde • 2615 Willow Glen Road • Hilliard, OH 43026 • hfpirates@gmail.com

Welcome to the May pirate report. We summer is nearly here and along with that comes the poor DX conditions of the season.

Well, the word is out that there was a US op that got the knock from the FCC in the last thirty days. Understandably the result of that has been that most of the ops are rather skittish to be active in the near term time frame.

On a more positive note; this month I am very pleased to present an interview with Rave on Radio. Rave has been a recent staple and has been around a lot longer than that, I had no idea that he dated way back to 1994.

So, here we go let's see what Rave on Radio has to say.

Q: When did you first become interested in pirate radio?

A: I had all been an avid SWL since the mid 1970s. In the early 1980's I stumbled upon my 1st "numbers station" - V2a (the Cuban numbers station to be exact) "attencion. attencion" into the 5 number groups in Spanish. That left me staring at my radio for a while....I had no idea what it was...I eventually found out more about numbers stations. Similarly I became interested in pirate radio in the early 90's, when I stumbled upon my 1st Pirate station "Altered States Radio" in the fall of 1993. I became a HUGE fan of Pirate broadcasts and recall a few highlights from other stations that fall like: "...tonight's show is sponsored by (some name) College - you'll never even know you were there"; and "what do you need to drink after a long day of peace talks in the hot desert? A Netan-yoo-hoo". I can still recall how "Up Against the Wall Radio" opened their shows: a long machine gun blast into their ID "You're listening to Up Against the Wall Radio". Cracked me up then & it still does just thinking about it today. Needless to say, I was hooked.

After hearing many more pirates that same fall (such as WLIS, Radio Doomsday, Solid Rock Radio, Voice of the Runaway Maharishi, etc.), I realized that I just HAD to try to get on the air myself - and did so on 2/26/94 (the log in the April 1994 edition of the ACE is below) and again on 4/2/94 (May 1994 ACE below). After that, the radio (an old tube type Hallicrafters) started acting up and had to be abandoned to the dumpster.

A log from the April 1994 ACE:

RAVE ON RADIO: 7417vU, 2/26, *2225-2252*, S9 +10dB! "This is a test of Rave On Radio" several times, reports to PiPa only! Non-stop "Rave" mx &; repeat of test announcement. Xmtr drifted & buried Heavy Dude R! PSE QSL. (TRUMMEL,MO)

Q: Is or was there any particular individual that inspired you?

A: Andrew Yoder was a huge inspiration. I think he wrote a book back in the late 80's or early 90's about pirate radio but I'm not certain of that.

Q: How would you describe your programming or programming style?

A: We like to play GOOD music of any type except classical & rap. We tend to stick to what one would call rock and roll, bluegrass, OLD (that means "real") country & western (not what passes for C&W today), folk, as well as old(er) time TV & radio ads/commercials. We also enjoy playing entire albums on the air, and have been broadcasting a "railroad" themed series of shows (3 so far). We also broadcast on certain "memorable" days (like the anniversary of the Kent State shootings and the assassination of Fred Hampton), as well as on certain birthdays (Bob Dylan's for instance) and certain death anniversaries (such as that of Earl Scruggs).

Q: Is there something in particular that you hope to accomplish with your operation? Or in short why do you do it.

A: We do what we do just to give people an outlet from regular FM radio and SW. The music on the radio today S**KS and so we try to fill a gap. Also, it still mystifies us how a tiny little transmitter and some wire stuck up in a tree can yield reports from 2/3rds of the Continental US. We also like to remind our listeners about certain historical events (birthdays, anniversaries, etc.).

Q: If you wanted to deliver a message to your listening public or would-be listening audience what would that be?

A: Our message to listeners is that we do this for YOUR enjoyment and ALWAYS welcome requests for certain albums, songs, or themed shows.

Q: Which pirate stations do you enjoy listening to and why?

A: We enjoy listening to just about any pirate who is on – in particular, we enjoy “Radio Paisano” and “Radio Casablanca” plays some GREAT music, but we think that everyone does a great job these days (how do you NOT love Anne Hoffer Radio??).

Q: Are there any pirate operators/stations that you admire and why?

A: I admire the big signals out there (Wolverine Radio comes to mind) as we have a tiny transmitter and literally have no idea what we are doing most of the time since we broadcast from nearby woods and its often pitch black by mid-show, but we get reports from as far East as NH & VA, as far south as FL & GA, and recently as far west as MT so we are doing something right.

My, many thanks to Rave On Radio!

Black Cat Radio, 6925 USB, 2316-2358*, 04-05-13, SIO: 343 Program of rock tunes by such groups as The Ramones, White Stripes, Gore Gore Girls, The Cult, Teenage Bottlerocket, etc. Reception reports to blackcatradio1@gmail.com. [Lobdell-MA]

beamed to the jungle State of Loreto in 9 indigenous languages. This is also at the end of the electric power grid. This has presented problems with power surges damaging the TB-1000 1 KW transmitter. Since

it was installed in July 2012 it has been off the air 3 times. Once it was repaired by instructions via SKYPE/Video and twice by our engineer from Canada. The last time more line voltage protection, including a Ferro resonant transformer was added. The receivers are fixed tuned units from Galcom. These are sent to the rural areas. Hope this information is helpful. Your friend, Ray Rising

- 2325 **AUSTRALIA VL8T** Tennant Creek 1120 M ancw/ sports talk; fading fast; no longer readable by 1132; no sign of 2310; 3/20. (Rippel-VA)
- 2485 **AUSTRALIA VL8K** Katherine 1243 Aussie talk; poor sig but no ute blob; I am relieved to note, tho some het maybe from a lcl device; somewhat better on //2325-VL8T; 3/12. (Hauser-OK)
- 2850 **NORTH KOREA KCBS** Pyongyang 1000-1120 Noted here w/ audio during band check; 3/17 & 22. (Wilkner-FL) 1105 Spirited talks by M ancw into martial mx; 3/28. (Rippel-VA)
- 3205 **PNG-NEW GUINEA TERRITORY NBC Sandaun/R. West Sepik** Vanimo (P); 1246 Mx on v. poor sig, but the only 90m PNG freq w/ anything (except 3325 probably Indonesia instead); have all the others s/off by now?; R. Howard rpted this one reactivated Feb 28; 3/12. (Hauser-OK)
- 3329.5 **PERU Ondas del Huallaga** Huánuco *1000-1040 M ancw chat; difficult sig in Florida; alas there every day same time; heard using the notch on the R7; 3/15 & 23. (Wilkner-FL)
- 4319U **DIEGO GARCIA AFN** 0000 M ancw/ nx; ute beep on top; using 1.4k filter; 3/23. (Wilkner-FL)
- 4451.2 **BOLIVIA R. Santa Ana** Santa Ana de Yacuma 0000-0020 Noted here w/ fair sig; best heard in USB; 3/23. (Wilkner-FL)
- 4699.9 **BOLIVIA R. San Miguel** Riberalta 0958-1015 M vclist; strong sig; 3/23. (Wilkner-FL)
- 4700 **UNIDENTIFIED** 0101 Two JBA carriers, maybe a bit of modulation from one; checking this out again upon inquiry from T. Nilsson, Sweden; around 0300 he was hearing something, the audio clip of which sounds to me like HoA mx; i.e. new freq from V. of the Broad Masses of Eritrea as per many other logs, but not a time when I monitor much, VOBME would not be on at 0100; so my theory remains that one of them I hear is Bolivia & the other maybe a 5 x 940 harmonic; 3/12. (Hauser-OK)

- 4716.6 **BOLIVIA Radio Yura** Yura noted 1030-1045 Last to s/on usually w/ 4699.9 R. San Miguel & R. Lipez much earlier; 3/14-16. (Wilkner-FL) 0000-0010 Mx; strong sig; 3/22. (Wilkner-FL) 4716.76 0053 (P); Ballad vcl mx; 0104 ancments ment. Bolivia, events or ads; fair but best S. American sig around here now; occasional QRM from carrier on hi side, ute; 3/14. (Hauser-OK)
- 4750 **INDONESIA-SULAWESI RRI Makassar** 1249 Deliberate talk, spelling, think it's the "Kang Guru Indonesia" weekly Australian EE lesson from RRI Makassar; also songs at 1250 & 1259-1301 which could have passed for S. Asian, but this one is slightly on the low side; 1301 ancment; R. Howard has rpted KGI around this time on Tuesdays; 1306 W w/ Indo ancment from RRI Makassar; fair; 3/12 & 14. (Hauser-OK)
- 4754.9 **BRASIL R. Imaculada Conceição** Campo Grande 0845-0910 Locutor em português, strong sig using the new Drake R7; forgotten the exc. audio of this now vintage radio; 3/16. (Wilkner-FL)
- 4781.5 **ECUADOR R. Oriental** Napo 1102-1105 (T); So weak I couldn't ID the lang; poor-JBA sig; 3/12. (Handler-IL) 4781.56 0057 Singing here is the best S. American sig, no doubt the variable HCLE7, R. Oriental, Tena, Napo; 3/21. (Hauser-OK) 4781.76 (P); 0111 In SS; 3/15. (Hauser-OK)
- 4789 **PERU R. Visión** Chiclayo 0825 Off the air; speculation re operate 24 hours a day may be incorrect; 0900 noted; 3/12. (Wilkner-FL) 4789.9 0650 The one noted here; 3/18. (Wilkner-FL)
- 4789.84 **INDONESIA RRI Fak Fak** 1050 (P); M anc in lang w/ lengthy talks; fading fast & nearly into the noise by 1100; 3/28. (Rippel-VA) 4790 1303 Indo talk; rough modulation; louder than 4750; this 4790 sig was not there a few minutes earlier before 1300; 1303 mx; 1305 beeps like a protracted time sig mixed w/ other audio; all vs CODAR; 1306 mx; overmodulated w/ some distortion; 1314 ancment in Indo; 1325 fading down; RRI Fak Fak, which just reactivated after almost 10 months; 3/12. (Hauser-OK)
- 4795.87 **BOLIVIA R. Lipez** Uyuni 0923-1045 M anc w/ mx; noted on as early as 0900; was broadcasting last March and left the air after a week; if in need of QSL the time may be now; steady sig in Florida; 3/12, 16 & 18. (Wilkner-FL)
- 4805 **BRASIL R. Difusora do Amazonas** Manaus 1005-1015 Noted w/ locutor em português & unusually strong sig; 3/12. (Wilkner-FL)
- 4810 **PERU R. Logos** Chazuta 0925-1117 Beautiful flauta Andina w/ incredibly strong sig; from 1045-1105 drowning out CODAR totally; then quickly into f/out; flutter by 1117; 3/12 (Wilkner-FL)
- 4824.86 **BRAZIL UNIDENTIFIED** 0047 PP; Weak mx vs CODAR; 0102 sounds like a hymn; still not sure which of the two ZYs this be; 3/16. (Hauser-OK)
- 4824.96 **BRAZIL UNIDENTIFIED** 0051 PP; Sounds like preacher, could be David Miranda; poor w/ flutter, but no sign of a het on hi or lo side from Peruvians; (P) R. Canção Nova, Cachoeira Paulista SP; J. Freitas points out that RCN is Catholic, so if it was really Miranda, it must be from the other ZY on 4825, R. Educadora, Bragança; he could also be on a Peruvian in Portunhol; 3/16. (Hauser-OK)
- 4825 **UNIDENTIFIED** 0057 One of the better 60m LA sigs here; mx sounds relg; CODAR; 0058 SS ancment; 0106 something about the Vatican; (P) LV de la Selva Iquitos, Perú but I should have measured the freq since that one is on 4824.5; pretty sure it was not as far up as 4826.5, i.e. R. Sicuani; 3/13. (Hauser-OK)
- 4826.5 **PERU R. Sicuani** Sicuani 0840 Noted as the first Peruvian on in the lcl morning; M anc; 3/12 & 16. (Wilkner-FL) 0230-0245 The one noted here; 3/18. (Wilkner-FL)
- 4835 **AUSTRALIA VLBA** Alice Springs 0835-0840 The one noted here; 3/18. (Wilkner-FL) 1302 EE; Still here w/ poor sig; 3/18. (Hauser-OK)
- 4835 **PERU Ondas del Surorient**e Quillabamba 0000-0035 Noted here en espanol; 3/10. (Wilkner-FL)
- 4840 **USA WWCR** Nashville 0049 WWCR-3 is already on, w/ DST now starting at 0000 UT instead of 0100; 3/12. (Hauser-OK)
- 4876.2 **BRASIL R. Difusora Roraima** Boa Vista 0906-0930 PP; M anc into ballads; v. strong; 3/12. (Wilkner-FL) 4876.7 0245 The one noted here; 3/18. (Wilkner-FL) 4878.5 0932-0953 Brazpop vcls; M anc w/ PP talk; ID followed by more vcls; phone calls from listeners; fair; 4/8. (DiAngelo-PA)
- 4885 **BRASIL R. Clube do Pará** Belém 0530-0650 Braspops & ballads; good; 3/18 & 19. (Wilkner-FL)
- 4910 **AUSTRALIA VLBT** Tennant Creek 0820-0830* M anc w/ talk; audio improving as S. Hemisphere moves toward fall; 3/12 & 18. (Wilkner-FL)
- 4915 **BRASIL R. Difusora Macapá** Macapá 0820-0835 Quick ment. of Macapá; good; 3/18. (Wilkner-FL)
- 4939.9 **PERU R. San Antonio** Atalaya 0948 Locatura y locutor en español y musica; 1000 lost to China; also 0000-0100; great sig w/ locutor con la ID twice; exc. mx & good, steady sig w/ the R7 here; 3/12. (Wilkner-FL)
- 4985 **BRASIL R. Brasil Central** Goiania 1000-1015 Usually weak in the morning; covered by RTTY 2300-0100; speculation RTTY may be lcl; 3/7. (Wilkner-FL)
- 4965.1 **BRASIL R. Alvorada** Parintins 0900-0930 M anc in PP; good; 3/12 & 18. (Wilkner-FL)
- 4974.92 **PERU R. Pacifico** Lima 0907-1000 The one noted here....and other days recently; 3/12. (Wilkner-FL)

- 4975 **BRASIL R. Nossa Voz** 0900-0940 Locutor em Português; período de música do Brasil; 3/12. (Wilkner-FL)[DBS-15 lists this as R. Iguatemi-ed.]
- 4976 **UGANDA UBC Radio Kampala** 0400 EE; ID & nx; f-p; 3/15. (Brossell-WI)
- 4990 **SURINAME R. Apintie** Paramaribo 0846-0959 M ancr in listed Dutch w/ sound fx; M & W ancrs w/ talk; occ. ute on top; trnx M. Coady log; 3/10 & 12. (Wilkner-FL) 0814-0835 M ancr in listed Dutch; ballads & talk thru BoH; weak but clear; 3/19. (Barbour-NH)
- 5010 **INDIA AIR Thiruvananthapuram** 0018 IS; ancmnts at 0020; short vcl into talks by W ancr; SC mx at 0022; 3/13. (Rippel-VA)
- 5010 **UNIDENTIFIED** 0056 Weak sig w/ W talking; could be FF; expected a leapfrog from RHC-5040 over Rebelde-5025, but the FF on 5040 seems like a different voice (I have only one receiver, the DX-398 on the porch, at hand); maybe Madagascar?; 3/13. (Hauser-OK)
- 5019.9 **SOLOMON ISLANDS SIBC** Honiara 0910-0930 Noted here w/ Havana powered down; 3/16. (Wilkner-FL)
- 5025 **CUBA R. Rebelde** Havana 1308 Song in EE, "Devil Went Down to Georgia" by Charlie Daniels Band w/ hot fiddling worthy of Kyle Dillingham; could it be Australia?; Naah, back-announce in SS, so R. Rebelde as usual; also mentioned FM 96.7, so was this a separate R. Rebelde FM prg on SW?; 3/14. (Hauser-OK)
- 5039.1 **PERU R. Libertad** JunIn 1100-1120 M ancr w/ chat; f/out; 3/22. (Wilkner-FL) 5039.22 1000 SS; M ancr w/ talk; good; 3/12. (Wilkner-FL)
- 5040 **CUBA RHC** Havana 0550 In SS instead of EE, which continued on the overkill 49m chs; also: now what?; at 0540, RHC is in EE this hour today, unlike SS yesterday; also // 4 x 49m channels; 3/18 & 19. (Hauser-OK) 2336-0000 EE prg on 60m outlet re stamp collecting & Arnie Coro w/ Science & Technology feature; IS at 0000 followed by SS prg; good; 3/23. (DiAngelo-PA)
- 5050 **CHINA Beibu Bay Radio** Nanning 2258 (P); Ballad, M ancr at ToH in unid lang; though sounding very much like CC; bit of mx & more talk; v. poor, too much adjacent ch. splash to tell if //9820 or not; 3/18. (Barbour-NH)
- 5050 **USA WWRB** Manchester 2314 WWRB is active today, some preacher; usually runs //3215 or 3195, but none of the 3 MHz chs audible this early; 0053 medical discussion w/ hum; 0104 big band mx fill on both 5050 & 3195; 0249 both w/ distorted piano hymn; 3/16. (Hauser-OK) 0057 Extra WWRB txmitter is on again w/ gospel huxter about the papacy; 3/24. (Hauser-OK)
- 5110v-CUSB **USA WBCQ** Monticello 0131 World of Radio 1660 monitoring; confirmed on Area 51, starting just after 0131; 3/16. (Hauser-OK)
- 5460 **PERU R. Bolivar** Cd. Bolivar 0000-0020 Noted here w/ mx; 3/4. (Wilkner-FL)
- 5745 **USA VOA** Greenville *0227-0300* Open carrier until mx at 0230 when Radiogram prg commenced w/ Kim Andrew Elliott hosting; talk re digital txmission modes & software; also, various digital txmission modes used by amateurs were b/cast; M ancr gave the e-mail address as radiogram@voanews.com; good; 3/17 & 24. (DiAngelo-PA)
- 5765U **GUAM AFN** Barrigada 0853-0913 Chat re "...since 1775...the navy...Capt. John Paul Jones..." & discussion touching of sentencing guidelines; 3/12 & 16. (Wilkner-FL) 1250 Back on night freq w/ discussion re Groupon, unseems NPR WESUN; 3/24. (Hauser-OK)
- 5890 **USA WWCR** Nashville 0526 WWCR-4 back here w/ Bro. Scare, so last night's 7520 instead was an anomaly; 3/15. (Hauser-OK)

Apologies for a light column this month. Somehow, I was dropped from the Flashsheet distribution list. I will be including missing logs in next month's column.

- 21540 **KUWAIT Radio Kuwait** 1345 Arabic with two males speaking, one may have been by telephone. Fair signal. 2/25/13. (Handler-IL)

On the Shortwaves

www.ontheshortwaves.com • Devoted to the history of shortwave broadcasting and the shortwave broadcast DXing hobby

< www.ontheshortwaves.com > Update, March 24, 2013 -- Under "DX History/Stations," we have posted a promotional brochure from the late Crosley-owned American shortwave station WLWO. WLWO started out as 8XAL, Harrison, Ohio, in 1924, simulcasting WLW. Originally 100 watts, it soon increased power to 250 watts, and it moved to Mason, Ohio in 1929 (having become W8XAL in 1928). It increased power to 10 kw. in 1932, to 50 kw. in 1940 (by which time it had become WLWO), and soon thereafter to 75 kw. Like all the privately owned American shortwave broadcasters of the time, it had its own Latin American service, which expanded greatly when the station went into U.S. government service in March 1942, well before the government took over all U.S. shortwave broadcasting in November of that year. This brochure appears to date from around mid-1940. -- And we have posted another "Wavescan" entry under "Specialized Resources": "Catalina Radio-2: The World's First Wireless Newspaper" (March 24, 2013).

< www.ontheshortwaves.com > Update, March 31, 2013 -- Shortwave station lists, together with loggings and feature articles in club bulletins and radio magazines, have long been prime sources of DX information. Some of these lists were commercial, while others were produced by clubs. Posted under "DX History/Lists, Logs, Guides & Columns" is one of the most comprehensive lists, one prepared by the Universal Radio DX Club in 1946, the year before the *World Radio Handbook* started publication. Those bands looked mighty busy.

< www.ontheshortwaves.com > Update, April 7, 2013 -- Following up on the 1946 Universal Radio DX Club shortwave station list that we posted last time, we have posted another URDXC list, this one from 1953. It is under "DX History/Lists, Logs, Guides & Columns." -- And under "Specialized Resources," "Wavescan," another entry from Dr. Adrian M. Peterson: "BBC East Mediterranean Relay Station Cyprus, Pt. 2" (March 31, 2013).

< www.ontheshortwaves.com > Update, August 14, 2013 -- It has been a long time since United Nations Radio has had a regular presence on shortwave. However, it still produces programs, which it posts on line and which are rebroadcast by various stations around the world. On World Radio Day, February 13, 2013, the U.N. issued a series of six postage stamps commemorating U.N. Radio, and under "DX History/Philately" we have posted a file showing the first day covers, together with information about the stamps from the U.N. philatelic bulletin. U.N. stamps denominated in U.S., Swiss and Euro funds are valid postage for mailings from the U.N. facilities in New York, Geneva and Vienna respectively. -- And we have posted another "Wavescan" episode under "Specialized Resources," "Wavescan": "Elephant Radio in India: 75th Anniversary of Radio in Lucknow" (April 7, 2013).
