NATIONAL RADIO CLUB DOMESTIC LOG, THIRD EDITION, 1973-1975

Copyright © 1973 by Gordon P. Nelson for the National Radio Club. All rights reserved. No part of this book may be used or reproduced in any manner whatsoever without written permission except in the case of brief quotations embodied in critical articles or reviews. For information address:

NATIONAL RADIO CLUB, Box 99, Cambridge, Massachusetts 02138

The Third Edition of the NRC Domestic Log is respectfully dedicated to the memory of Eric DiRicco (1956-1973). Eric was a fine DX'er who gave freely of his time and effort for the betterment of the DX hobby.

CREDITS AND ACKNOWLEDGEMENTS...

*Compilation and verification of data: Russell Edmunds, Wes Boyd, Robert Foxworth, Gordon Nelson, Eric DiRicco, John Callarman, Steve Bohac, Alan Merriman, Bill Feidt

*Proofreading of final copy: Mark Katz, Ray Moore, Bill Bailey, Gordon Nelson, Hal Robie, Dan Kahn, George Kelley, Mark Connally

*Call/frequency cross index: Richard Frcho, Bob Bundy, John Clements, Bill Bailey, Mark Katz, Chuck Rossier, Randall Kane, Gordon Nelson

*Preparation of copy: Gordon Nelson, George Kelley, Chuck Rossier, Dan Kahn

*Preparation of computer forms: Dave Fischer

*Typing of call/frequency cross index: Randall Kane

*Other typing: Janice Mansfield, Gordon Nelson, Judy Shenfeld

*Supplemental information: Russell Edmunds, Dave Lewis, Joe Kureth, Gordon Nelson

Special thanks go to all of the club members who have supplied the NRC with the Updater material used in the preparation of this Edition and to the telephone information operators for invaluable services!

This, the Third Edition of the NRC Domestic Log, is not completely accurate. Since the last Edition appeared some three years ago, more than 7,000 changes have taken place and have been incorporated into the present volume. Since this averages out to about 7 changes each day, it's obvious that a completely accurate Domestic Log is a practical impossibility. Despite the volatile nature of AM station information (especially addresses and schedules) we believe this new Edition is the most complete and accurate such listing ever produced. The basic information in this Log has come from a wide variety of sources and in many cases has been validated by monitoring by members of the National Radio Club. The new Log also features an alphabetical call letter/frequency tabulation and an increased amount of blank space for comments and new information.

We invite the users of this Log to supply us with corrections and additions for use in preparation of the next Edition. Members of the NRC will receive Updaters to the Log as a regular feature in DX NEWS; nonmembers may subscribe to our Update Service and will receive new material to keep their Logs up-to-date on a regular basis (see page 205). Good DX!

Gordon P. Nelson
Chief Editor

How To Use the NRC Log

EXPLANATION OF SYMBOLS:

Column One gives the call letters of the station or an indication that it is an AFRS (American Forces Radio Service) station. Certain symbols concerned with construction permits are presented in this column. They are (*) for a new station not yet on the air, (+) for a permit to change power, location, or antenna on the same frequency, and (#) for a permit to change to this channel from present operation elsewhere in the band.

Column Two gives information naming the city or town to which the station is officially licensed; the ZIP code is also given if the mailing address is the same as the license address.

Column Three provides information regarding the licensed hours of operation and directional antenna patterns if used. The symbols are as follows:

- D1 Daytime operation only, nondirectional antenna
- D3 Daytime operation only, directional antenna
- D4 Daytime operation only, nondirectional antenna only except during critical hours
- D5 Daytime operation only, directional antenna only except during critical hours
- L1 Limited time operation, nondirectional antenna
- L3 Limited time operation, directional antenna
- N1 Night affiliate (Canadian only)
- N2 Day affiliate (Canadian only)
- SH Specified hours as directed by the station license (note: these are usually stations in areas of low population density which for financial reasons seek to operate less than the minimum number of hours specified for unlimited licenses).
- ST Shared time operation; broadcasting time is shared with a second station on the same channel
- U1 Licensed to operate unlimited time with nondirectional antenna
- U2 Unlimited hours of operation with directional antenna at night (defined as sunrise to sunset)
- U3 Unlimited hours of operation with the same directional antenna both day and night
- U4 Unlimited hours of operation; directional antennas both day and night but different patterns
- U5 Unlimited hours of operation; directional antennas during the day but nondirectional at night
- U6 Unlimited hours of operation; directional antennas at night and during critical hours (until 2 hours after sunrise and from 2 hours before sunset)
- U7 Unlimited hours of operation; directional antenna at all times but three different patterns (day, critical hours, and night)
- U8 Unlimited hours of operation, directional antenna at night and critical hours, two patterns (night, critical hours)

Further information regarding directional antenna patterns may be obtained from the NRC's NIGHT PATTERN BOOK and from several articles available as reprints from the National Radio Club.

Columns Four and Five show night and day operating powers respectively, in watts.

Column Six contains special power information for stations which must operate with special power during critical hours (CH) and for stations with Presunrise Service Authorities (PSA's). The PSA's are used during the months when local sunrise occurs after 0600 local time. Daytime stations (i.e., those licensed to operate local sunrise to local sunset) may begin operations during these months at 0600 with their PSA power. Under certain conditions a station licensed for unlimited operation may also use PSA power with their daytime antenna pattern - either to take advantage of the daytime pattern's ability to provide increased coverage of special areas (in spite of reduced PSA power) and/or because operation with a directional pattern requires the presence of a First Class licensed engineer at the transmitter site.

Column Seven gives the network affiliation (or, in the case of Canadian and Puerto Rican stations, the language used if not English).

- (Ac) - American/Contemporary
- (Ae) - American/Entertainment
- (Af) - American/FM
- (C) - Columbia Broadcasting System
- (M) - Mutual Broadcasting System
- (MB) or (Mb) - Mutual Black Net
- (MS) - Mutual Spanish Network
- (N) - National Broadcasting
- (NB) - National Black network
- (B) or (Bi) - Bilingual; French and English

Column Eight gives the mailing address of the station for reception reports. If no address is given and the station is not an LPRT (Low Power Relay Transmitter, operated by Canadian Government) or AFRS outlet, the station call letters and city are usually adequate address for reports.

Column Nine gives the schedules for fulltime and specified hours stations when this information is available. Times in parentheses (unless otherwise specified) are for Sunday operation. Because the schedules for stations operating with daytime and limited time licenses vary with the season, no attempt has been made to include these schedules. A set of maps showing the time of local sunrise and sunset throughout North America for various times of year is available from NRC Headquarters; write for further information. A number of special abbreviations are used in this column: (SP) - Silent Period; (NSP) - No Silent Period; (LSR) - Local Sunrise; (LSS) - Local sunset.

AFRS & AFCN Stations

These are generally very low powered stations operated by military authorities to provide coverage to isolated bases and sites. The AFRS (American Forces Radio Service) and AFCN (American Forces Caribbean Network) stations, being operated by a branch of the U.S. Federal government, are not licensed by the FCC; programming is usually a mixture of transcribed and locally-originated material and identifications may be infrequent. The addresses here in the NRC Log are usually adequate but reports may be routed through AFRS HQ: Deputy for American Forces Radio and Television, Office for Information for the American Forces, ASD(M+RA), Washington DC 20305.

Canadian L.P.R.T. Stations

Canada's population is spread thinly over a very large area and this makes the task of supplying adequate radio service difficult; the presence overhead of the auroral absorption zone means that even 50,000 clear channel outlets are blacked out at times. The CBC has therefore established a far-flung network of low-powered local MW relay transmitters to serve isolated communities. These LPRT's are located in Canadian Pacific Railroad stations and receive their programming from special audio phone lines; they operate with a modest power of 40 watts and are completely unattended operations. In spite of their low power, these stations are often heard by DX'ers - although the fact that several LPRT's relaying the same station may operate on the same channel can make positive identification impossible. The initial three letters of the LPRT call will often (but not always!) indicate the station being relayed; thus CBNC relays CBN, etc. Reception reports should be addressed to the station being relayed; don't expect a specific LPRT QSL, though, unless there's but a single relay on the channel...

Carrier-current Stations

These are small, low-powered operations designed to provide AM radio coverage to colleges and universities. Although many of these stations use legal sounding call letters and otherwise seem to be professional broadcasting stations, they are actually unlicensed operations manned by students. The 500-odd carrier current stations exist by virtue of an FCC Rules provision which permits unlicensed operation on the AM band as long as the effective radiation from the station is below prespecified (and very low) levels. Properly operated, such an unlicensed station will be heard no further than a mile under the very best of conditions, and frequently only for a few blocks. Some carrier current stations become careless about radiation levels, though, and may be heard over much greater distances; in such a case the station is in violation of FCC regulations, of course. Most of these stations operate in the lower part of the band, with 550, 640, and 650 kHz being favorite channels. Technical quality tends to be very good and the call letters used often reflect the name of the school, e.g., WNEU at Northeastern University, etc. These stations tend to be reluctant verifiers - especially if operating with power in excess of the legal limit; it helps to stress that you're a DX'er using very special receiving equipment and not just a casual listener when reporting to these stations. No complete list of these stations exists although at this time the FCC is proposing to bring them under its control; consult the short list in the Broadcasting Yearbook for a short tabulation.

Illegal Stations

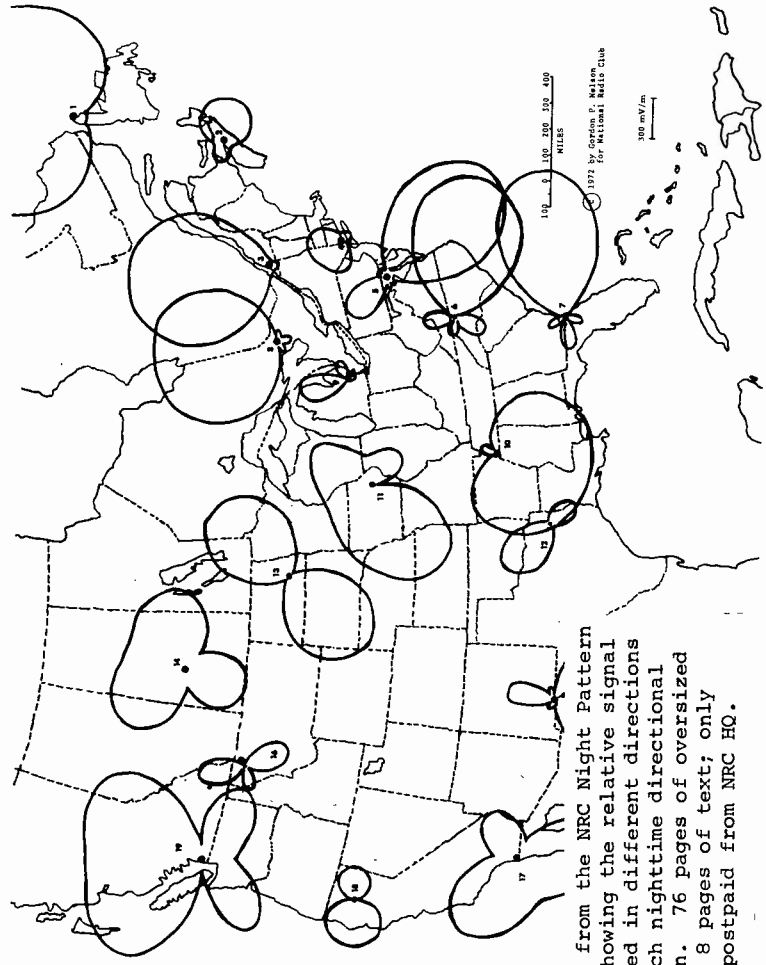

Unlike the carrier-current stations which if properly operated are completely legal though unlicensed, at any particular time there are usually quite a number of completely illegal "bootleg" or "pirate" stations on the air and these are frequently logged by the alert DX'er. These illegal operations are usually (but not always) characterized by poor audio quality, drifting frequency, and erratic schedules. Most are very low-powered operations intended for a small local audience but an occasional high-power pirate takes to the air and is heard over large distances. Most operate near or above the top of the band at 1600 kHz and several dozen are traced and closed down by the FCC every year.

for National Radio Club

A page from the NRC Night Pattern book showing the relative signal radiated in different directions for each nighttime directional station. 76 pages of oversized maps + 8 pages of text; only \$5.95 postpaid from NRC HQ.

About the NRC

The National Radio Club is the largest and oldest hobby group dealing exclusively with medium-wave DX'ing (established in 1933). The NRC's magazine-bulletin, DX NEWS, is published weekly during the winter DX season for a total of 32 issues per year and is crammed with information specifically by and for the active MW DX'er - feature and technical material, the latest FCC and DOT station information, plus page upon page of invaluable tips from our membership telling what's actually being heard on the band. The NRC was the first North American DX club to produce a handy-sized publication by offset printing - not mimeograph.

In our Musings section, DX'ers write in to tell about their latest DX'ing experiences - latest catches, new station info, descriptions of equipment - anything of interest to other DX'ers in fact. In International Digest you'll find a concise and very up-to-date listing of international MW stations being heard by our worldwide membership as well as the most accurate general information on international MW broadcasting available anywhere. In Domestic DX Digest you'll read the latest data on U.S. and Canadian stations - new stations, call changes, etc. Regular tabulated Domestic Log Updaters designed to keep the Log completely up-to-date appear regularly. During our last publication year the NRC produced about 1,000 pages of unique information in DX NEWS.

Many interesting and valuable feature and technical articles appear in the pages of DX NEWS and these include original equipment plans, reports on original scientific research pertaining to MW DX'ing, features for beginners, and much more. Annual listings of regularly scheduled frequency checks permit our members to quickly build up their domestic totals; for the international DX'er the NRC is the only source of the immensely valuable EBU monitoring data for European and African stations. For those who like contests the NRC runs several different types of competitions designed to really test DX skill and foster friendly competition. Because the NRC numbers in its membership leading experts on almost every facet of the hobby, members with questions or problems are often able to get help simply by asking in DX NEWS.

The Courtesy Programs Committee (CPC) is one of the Club's most important and interesting activities. Members of this group regularly arrange special programs dedicated to the NRC from hard-to-hear stations at special times favorable for distant reception. Literally hundreds of otherwise impossible-to-hear stations have been logged and verified through NRC Specials. All members are welcome to join the work of the CPC and this can be one of the most rewarding aspects of club activity.

Through the NRC you will be able to purchase at discount items such as NRC publications and reprints, mechanical filters for improved receiver selectivity, and other DX'ing aids from time-to-time. Our Reprint Service makes available copies of past articles from DX NEWS at a nominal cost; much unique DX'ing information especially of a technical nature is available only in reprint form. Special publications such as the Domestic Log, Night Pattern Book, and Latin American Log appear about once a year.

NRC members are among the friendliest people around and informal gatherings and DX gettogethers often take place in many parts of the country. Our annual Convention, to be held in Boston this year, will attract many members from the U.S., Canada, and foreign countries for a long Labor Day weekend of DX discussions and seminars, station tours, equipment demonstrations, and general partying...

The NRC is a nonprofit, volunteer-operated club and membership dues and proceeds from special publications go to pay the expenses of printing and mailing DX NEWS to the membership. Since the dues of each member pays for his portion of the Club's operating costs and his share of DX NEWS postage, dues depend upon postal rates. At present rates, yearly dues in the NRC are \$14.00 for Airmail delivery of DX NEWS, \$13.00 for First Class, and \$10.75 for Third Class delivery; special Airmail rates for overseas members can be arranged through Headquarters. Whether you're just a beginner or have been DX'ing for 50 years, you'll get a wealth of useful new information by joining the NRC today!

NATIONAL RADIO CLUB, BOX 99, CAMBRIDGE, MASSACHUSETTS, 02138

APPLICATION FOR NRC MEMBERSHIP

*Remittance enclosed for:

- () \$14.00 for Airmail delivery of DX NEWS (subject to change in event of postal increases)
- () \$13.00 for 1st Class delivery
- () \$10.75 for 3rd Class (slow in some places)

DX'ing Aids Available from the NRC

Each year the National Radio Club publishes about 1,000 pages of unique MW DX information in its magazine DX NEWS. Over the past dozen years many valuable and original special feature and technical articles have appeared in our pages and much is as valuable today as it was when it originally appeared in DX NEWS. Available from the NRC are reprints of the 125 most valuable past articles, totalling some 750 pages. Some of the topics covered are,

FOR DOMESTIC DX'ERS: Frequency Check List - (lists regularly scheduled equipment tests from many hard to hear stations)... Understanding Station Procedures... Networks... Clears and Channel Classifications... Principles of Directional Patterns... What is a Presunrise Authorization?... Canada's Wilderness Radio - the LPRT... and more...

FOR INTERNATIONAL DX'ERS: Latest EBU List of European and African Stations (available only in DX NEWS)... DX'ing Polynesia and Beyond... DX'ing Rare Africans Systematically... Latin American Music... Reception Reports to Latin America... Portugese for DX'ers... Transpacific Reception Does Exist... much more...

MW DX ANTENNAS: The FET Altazimuth Antenna... The Two Foot Loop... High Precision Direction Finding... Beverage Antennas for the Broadcast Band... Direct Coupled Loops... Antenna Tuners for the Broadcast Band... BCB DX Grounds... many more...

MW PROPAGATION: Auroral Control of MW DX Reception... The Limits of Midday DX Reception... MW Signal Paths... A Beginner's Guide to the Ionosphere... Summer Reception on the Broadcast Band... East-West Symmetry and the Fade In Problem... dozens more...

RECEIVERS AND EQUIPMENT: Adapting Receivers with Mechanical Filters... Subaudible Heterodynes on the BCB... How to Live with a Budget Receiver... Selecting a Receiver... Simple Audio Filters... Receiver Hot Rodding Hints... Precision Frequency Measurement... Frequency Signature Analysis for the DX'er... Selectivity Devices... dozens more...

ARTICLES FOR BEGINNERS: How to Log Your First 500 Stations... How to Log All 50 States... The First 30 Countries in English... Your First 20 Transatlantic Stations... How to Keep a Log... Tape Recording Your Catches... more...

For a free list of available reprints send a self addressed stamped envelope to NRC, Box 99, Cambridge, Ma.

DX'ers who belong to the NRC will be able to keep their Domestic Logs completely up-to-date with the Updaters which appear in DX NEWS on a regular basis. Copies of these Updaters (which generally appear monthly) are also available to nonmembers on a subscription basis; for \$2.00 a year the nonmember will receive copies of all Updater material as it appears, in DX NEWS. Contact NRC HQ...

HOW TO SEND A RECEPTION REPORT

Given sufficient skill and patience on the part of the DX'er, very few U.S. and Canadian stations will fail to verify reception reports. Many stations are reluctant to QSL, however, in part due to the large numbers of inadequate or incorrect reports received. Even worse for station-DX'er relations are the not infrequent reports which demand rather than request verification. What goes into a good reception report on the broadcast band? A number of items should go into every report without fail. Give the date of reception and the frequency and be certain to specify which time zone you are using in the report.

The most crucial part of the report - and the weak spot in most inadequate reports - is the listing of specific and verifiable program details. The object of a reception report is to supply the station with incontrovertible evidence that the particular reception did in fact occur; the station must be able to compare the details of programming supplied by the DX'er with the station log or their knowledge of their programming before a meaningful verification can be issued. No hard-and-fast rule can be given for how much program detail should be included but generally speaking the more the better. A word-for-word transcription of a one minute local advertisement would constitute excellent QSL material whereas a listing of 20 pop song titles might be worthless since stations rarely log song titles. U.S. stations are required to enter the times of identifications, commercial spots, and public service announcements in the station log; such items make good verification material. Particular emphasis should be given to program details that are unique to the station in question: exact wording of station promos and local advertising, names of announcers, exact sign-on and sign-off formats, etc. Programming which can appear on several stations simultaneously such as Network newscasts may be useless for proof of reception unless some local material is also included.

Describe the quality of reception in some detail with particular emphasis on interfering stations. Try to give some indication of whether or not the station is frequently received in your location or if the reception was a rare "fluke". Mention any other stations in the same locality that you might have heard and compare the relative reception quality. Avoid short wave reporting systems such as SINPO codes, as they are unheard of at many stations. Give some details of your receiving equipment with particular emphasis on special items such as loop antennas, etc.

Very politely request the station to check your report against their records and, if it agrees, to provide you with a card or letter to verify your reception of the station. Never demand - always ask politely! **AND ALWAYS INCLUDE RETURN POSTAGE!**
