CREDITS:

The detailed information in this log was provided by you the user of this log book. Many of you have sent in your tips directly to us or to the column editors of the National Radio Club "DX NEWS" magazine. We greatly appreciate your efforts.

COMPILED BY: NRC Information Services - Mike and Sue Knitter

PRINTED BY: Franklin Press, Inc., Milwaukee, WI

HISTORY OF THE LOG:

Formerly called the "National Radio Club Domestic Log".

The first edition of the NRC Domestic Log was published by mimeograph and hand typed stencil in Boston in 1968, with John Callarman providing the typing and the original Boston Publishing Committee the hand labor. The second and third editions were published in Boston as the Boston Publishing Committee changed the method of print for National Radio Club publications to commercial offset. There was a "mid-term" edition published by the New Jersey Publishing Committee in 1975, and a new edition of the NRC Log done in the fall of 1976. The NRC has published this book every two years since 1976 and continues to plan on publishing the log every two years.

The roots of the NRC Log, though, date back to the 1930's when RADEX magazine published a log, and the 40's and 50's when then Newark News Radio Club BCB editor Carroll Weyrich produced an annual medium wave log.

The accuracy of an endeavor of the nature of the NRC Log cannot be guaranteed, primarily because changes occur daily in the vast amounts of information contained in a publication of this nature. Such items as call letters, frequencies, locations, power, and antenna pattern are relatively stable. FCC information keeps this material up to date. "DX NEWS" is the publication of the National Radio Club and keeps the log as "up to date" as possible through the periodic "Log Updater" and thru the "AM Switch" Column, edited by Jerry Starr. Non-members can contact the club at its Poquonock, Connecticut address to determine how to subscribe to the updaters as well as how to subscribe to "DX NEWS", or you may wish to use the handy form located on the last page of this log.

Network, formats, schedule, and address information is considerably more volatile and since there are no central sources to which all this information must be reported, it requires close monitoring by many people to keep this information up to date. Members of the National Radio Club around the country have been asked to help keep tabs of these changes. Their efforts are responsible for the accuracy of this log.

Any assistance from users of the log to make corrections to information contained in the publication would be of great help to other users, as well as make the next issue more accurate. Information should be sent to the appropriate column editor or by sending the material to: NRC Information Services, AM RADIO LOG, P.O.Box 24, Cambridge, Wisconsin 53523-0024 USA.

How This Log was Made

Every effort has been made to insure that this edition is an exact duplicate of the technical information you would find if you had access to the FCC Database and, therefore, is the most accurate AM log available to the public.

There is no way to produce a totally accurate log since the AM industry is in a constant state of change. Call letters are changed at a rate of 50 or more a month. Many stations change frequency each year. Between the time this log was printed and the earliest time it could be delivered to you there have doubtless been many additional changes. There is just no way to solve this problem with the printed log. There are, however, several ways for you to keep your log updated.

First is the Updater Service offered by the NRC, for the casual user this is ideal. More information on how to obtain this service can be found elsewhere in this book.

For the more serious AM enthusiast a membership in the NRC brings you automatically updates 30 times each year by way of the AM SWITCH column in the Club's magazine DX NEWS. This column is also generated from information supplied by the FCC by the same staff which produces this Log. As a bonus you will also get a wealth of AM information including monitoring reports from members, AM DX information, technical features for improving your AM and DX receptions, news from the Broadcasting Industry and other AM related features. Membership information can be found near the end of this book.

The combination of this log and a membership in the NRC provides you with a source of the most accurate AM information available to the public short of the professional services which cost hundreds of dollars per year. In fact, we pride ourselves in being MORE accurate than some of the "professional" services and regularly include corrections of these services in the AM SWITCH.

While there are other logbooks available which contain AM information none offer updates until their next edition which is, at the best, on an annual basis. Some of the radio hobby magazines offer a limited amount of this information but are hampered by the long turnover time involved between information acquisition and delivery to their subscribers only twelve times per year.

The NRC is a non-profit organization run by radio enthusiasts for radio enthusiasts and has been in continuous operation for over 50 years. The people who operate and publish the NRC AM RADIO LOG and DX NEWS magazine, some with many years background in the professional broadcasting field, are as interested as you are in the need for accurate and fast information. We hope you will consider joining us as we explore the ever changing world of AM broadcasting and distant reception.

If you are already a member of the NRC, the information in this log contains all updates from the AM SWITCH column up to and including this edition:

+++++++ Volume 55, Issue 29 ++++++

Power Variations on the United States Broadcast Band: Pre Sunrise, Post Sunset, Canadian and Mexican Clear Frequency Operations.

In the past few years a number of new variables have entered into the operating schedules on the AM Broadcast band in the United States. Prior to that a daytime station was just that, a station which signed on the air at sunrise and off the air at sunset.

With the exception of a handful of "L1" stations which could stay on the air past their local sunset until the time of sunset at the dominant station of the frequency (WHEB-750 Portsmouth, NH for example can operate until it's local sunset time in Atlanta, GA) daytime licensed stations went off the air when the sun went down.

Several years ago an agreement was signed between the Canadians and the United States which would allow extended or fulltime operations by stations on frequencies previously designated as Canadian Clear frequencies. Nearly all U.S. stations on these frequencies were daytime only. In turn, the U.S. allowed some new Canadian stations on the previously designated United States clear frequencies.

The same agreement made it possible for daytime stations on nearly all of the "Regional" frequencies to extend their schedules up to two hours after their local sunset. The term "PSSA" or Post Sunset Power came in to join the already existing "PSA" or Pre Sunrise powers which had existed for years allowing daytime stations to begin operations at 6:00am local time even though it might not be sunrise time yet. And like the PSA's, the PSSA's were often at odd and low powers. The maximum power for either PSA or PSSA is 500 watts although you will find powers as low as a few watts. The power permitted is derived from a formula which determines the maximum amount of interference the daytime station may offer to the dominant or fulltime stations on their frequency.

The PSA's were fairly simple with only one power level to be used for PSA operation and a standard 6:00am to sunrise schedule. The PSSA's, however, were a hodge-podge. Not all stations were allowed the full two hours after sunset. Some only got an additional 15 minutes, others 45 minutes, etc. To add to the confusion some stations got different extended times depending on the time of the year. A station may, for example, operate only 15 minutes later one month, 30 minutes the next month and no extra time the following month. And as if that wasn't confusing enough, most stations had a variety of power levels for PSSA operations which varied with the months. Some stations actually had a different power each month as well as different amounts of extended time. To say the whole situation was a big sticky mess would be an understatement.

Since the PSA's are constant and of single power levels they are included in this log. However, the PSSA's are not included since the volume of PSSA information is simply beyond the scope of the log. To include all the PSSA powers and times would increase the size of the log nearly three-fold and, consequently, increase the cost of the log tremendously.

Suffice it to say that you may be listening to a station listed as "Daytime" operating at night. These are PSSA operations or stations operating under the "Canadian Clear" rules. It does not indicate an error in the log.

Just as we are going to press with this logbook the pact between the United States and Mexico was signed. The pact will permit expanded hour operations by U.S. Daytime Stations on the Mexican Clear frequencies. Some stations will be permitted up to two (2) hours after sunset while a lesser number will be allowed to operate 24 hours. About a hundred of these stations will not get any extended hours at all. Since the information concerning the hours and powers of these stations will not be available for several months, we were not able to include this information into this present

logbook. However, as soon as this information is available, it will be included in the Log Update as well as in the pages of the DX NEWS magazine. Of course, it will be included in the next logbook. In the meanwhile, you will no doubt hear some "daytime" stations on the frequencies designated as "Mexican Clears" in the logbook on the air after their local sunset.

The FCC is presently looking for a method to simplify the PSSA powers and hours. If this comes to pass we may be able to offer this information in the next edition of the NRC AM LOG.

One additional point should be cleared up concerning PSA's. You will often find a PSA power assigned to a station already holding a fulltime license which would seem to be pointless. If the station already operates 24 hours, why the need for a PSA?

Consider a fulltime station which is "U2", directional at night only. They can, with a PSA Authorization, switch to their non-directional daytime mode with up to 500 watts at 6:00am in the months that would otherwise require directional operation for another hour or so. The station may be able to add increased coverage during this time by operating a PSA even if the 500 watt limit is less than their normal nighttime power.

The same is true of stations which have separate Directional Antenna (DA) patterns day and night. The night pattern is nearly always more severe than the day pattern. The more hours the day pattern can be operated, even at only 500 watts, will normally provide improved coverage in the dark hours between 6:00am and local sunrise. Many stations with severely restrictive night patterns have found improved coverage with 500 watt PSAs, even better than their 5000 watt night directional coverage.

Finally, if you are a DXer and hear daytime stations operating before sunrise or after sunset, be sure to inquire in your reception report if this was a PSA or PSSA mode you were hearing. Often you will be rewarded with a verification letter for a very low power. A verification for 10 or 20 watts can be a prized addition to your QSL collection. These receptions are not as improbable as they might seem. The writer of this article is the proud owner of a number of low power QSLs including a station nearly 400 miles away heard operating with 4 watts! Good Hunting.

-Jerry Starr
Editor AM Switch Column

LOG BOOK SUPPLEMENT ORDER FORM

U.S. and Canada Orders Only

ENLARGED TYPE EDITION over 150 pages thick, 3 hole punched, 8 1/2 x 11" size, computer generated fresh when you order with current station information. NOTE: This item may take 4-6 weeks to process, keep in mind that this item will be current when it arrives at your door.

Price Schedule:

NRC member, U.S. & CanadaUS\$19.95
 Non-member, U.S. & CanadaUS\$22.95

PERSONALIZED "STATIONS BY STATE". You pick the choice, listed below, of how you want the listing to appear. 3 holed punched, 8 1/2 x 11" size, computer generated fresh when you order with current station information.

NOTE: This product (and ONLY this product) CAN NOT be returned for refund.

Select one of the following sort options:

[1] By Frequency:

SS	Calls	Freq	Location of Station	State	Network	Format
	WASG	550	Atmore	AL	U/USR	GOS/C&W

NRC AM RADIO LOG ORDER FORM

Keep your logbook current throughout the year.
Order your NRC AM RADIO LOG Updaters.

Yes! I'd like to order the following updaters. Each Updater is US\$2.00, (Outside the US and Canada, Airmail Rates: US\$3.00 each for Caribbean, Central & South America, US\$5.00 each for Europe, North Africa, US\$7.00 each for All Other Countries; Surface Rates: US\$3.00 each for All Countries Outside US and Canada). You may order all five in advance and we will automatically send you the updater when it becomes available. If you order each Updater separately, we recommend that you make a photocopy of this Order Form. Each Updater is required to keep your AM Radio Log book current.

_____ Updater #1 will be available approximately January 1989

_____ Updater #2 will be available approximately May 1989

_____ Updater #3 will be available approximately September 1989

_____ Updater #4 will be available approximately January 1990

_____ Updater #5 will be available approximately May 1990

How to Use the Log

HOW TO USE THE NRC AM RADIO LOG:

Example of Log Record:

CP WABC Jackson WI D3 250 1000 CH1000/p14 A1 C&W/CHR/K M rFM[2100-2400]
C:0600-2400 P.O.Box 24, 53523 Add 1000 nites

First Line, First Column: Station Status:

- AP = Application; someone, somewhere has applied to the FCC for a change to an on-the-air station (AP= U1 1000/1000). Application information can be found under the Station Status information section, (2nd line, 4th column). This is the first step in the process, if the FCC agrees, then they will be issued a Construction Permit.
- CP = Construction Permit; station has been granted a permit by the FCC to undergo change or will be undergoing change. An explanation of the CP can be found under the Station Status information column, (Second Line, 4th Column). Some CP changes may take some time to take effect, some-times even years.
- NW = New station; station has been granted permission to operate by the FCC/CRTC but may not yet be on the air, even if call letters have been granted by the FCC or CRTC.
- PO = Present Operation, station has applied for (AP=PO:1450KHz) or has been granted a Construction Permit (CP=PO:1450KHz) on this frequency, however it is still currently operating under the frequency listed to the right of the "PO:". This information is listed under the Station Status Information section (2nd line, 4th column)
- SA = Station Application; Someone, somewhere has applied to put a station on the air. This does NOT mean that the station is on the air, as this is ONLY an application. Many of these applications never see daylight. Next step, if granted to operate by the FCC, is "NW".
- SX = Synchronized Transmitter, used by a station to extend its coverage in its local signal area, i.e.- to get a signal to the other side of town.
- TO = To another frequency; the station currently operates on this frequency and has either applied for the other frequency (AP=TO:1450KHz) or has been granted a CP by the FCC for the other frequency (CP=TO:1450KHz). This information can be found under the Station Status Information section (2nd line, 4th column).

First Line, Second Column, Call Letters:

The call letters of the station, or an indication that it is an American Forces Radio Service (AFRS), American Forces Caribbean Network (AFCN), or a Voice of America (VOA) station. Those that do not have call letters assigned to them yet are assigned by us with just the first letter of their call assignment (W, K, C, or V).

How to Use the Log

First Line, Third Column, Location, City of License:

City of License is shown or in certain cases, cities of authorized station identification, in the case of two cities located, the primary city is listed first.

First Line, Fourth Column, State/Province:

The postal abbreviations for the state or province is shown.

AL Alabama	KY Kentucky	ND North Dakota	PR Puerto Rico
AK Alaska	LA Louisiana	OH Ohio	VI Virgin Islands
AZ Arizona	ME Maine	OK Oklahoma	AB Alberta
AR Arkansas	MD Maryland	OR Oregon	BC British Columbia
CA California	MA Massachusetts	PA Pennsylvania	MB Manitoba
CO Colorado	MI Michigan	RI Rhode Island	NB New Brunswick
CT Connecticut	MN Minnesota	SC South Carolina	NS Nova Scotia
DE Delaware	MS Mississippi	SD South Dakota	ON Ontario
DC Dist. of Columbia	MO Missouri	TN Tennessee	PQ Quebec
FL Florida	MT Montana	TX Texas	SK Saskatchewan
GA Georgia	NE Nebraska	UT Utah	PI Prince Edward Isl.
HI Hawaii	NV Nevada	VT Vermont	NF Newfoundland
ID Idaho	NH New Hampshire	VA Virginia	NT North West Terr.
IL Illinois	NJ New Jersey	WA Washington	YT Yukon Territory
IN Indiana	NM New Mexico	WV West Virginia	
IA Iowa	NY New York	WI Wisconsin	
KS Kansas	NC North Carolina	WY Wyoming	

First Line, Fifth Column, Antenna Patterns:

The symbols and their meanings follow:

- D1 Daytime (sunrise to sunset) operation only, nondirectional antenna.
- D3 Daytime operation only, directional antenna, same pattern at all times.
- D4 Daytime operation only, directional during Critical Hours (CH) (sunrise to two hours after sunrise and two hours before sunset to sunset) only.
- D5 Daytime operation only, directional during non-critical hours, non-directional during critical hours.
- D6 Daytime operation only, different patterns during critical hours and noncritical hours.
- L1 Limited time operation (usually based upon sunrise or sunset at the dominant station's location on a clear channel), non-directional.
- L3 Limited time operation, directional antenna.
- N2 Night time (sunset to sunrise) operation only, directional.
- SH Specified hours, as directed by the station license. Numbers showing pattern correspond to numbers under "U" category. Specified hour stations are those who would normally be limited but because of financial or other considerations, have petitioned for a waiver of the minimum schedule -- 0600-2200 local time.
- ST Shared time operation; broadcasting time shared with a second station on the same channel (or in one case, three stations share time). Numbers same as under "U" category.
- U1 Unlimited time operation, with non-directional antenna.
- U2 Unlimited time operation, directional at night (sunset to sunrise) only.
- U3 Unlimited time operation operation, directional all hours, same pattern day and night.

How to Use the Log

- U4 Unlimited time operation, directional, different patterns day and night.
- U5 Unlimited time operation, directional day, non-directional night.
- U6 Unlimited time operation, directional night and critical hours, same pattern.
- U7 Unlimited time operation, directional all hours, but three different patterns (day, night and critical hours).
- U8 Unlimited time operation, directional critical hours and night (different patterns), non-directional day.
- U9 Unlimited time operation, directional non-critical day hours and nights (different patterns) but non-directional during critical hours.
- U10 Non-Directional Day, Directional Critical Hours, Non-Directional Nights

First Line, Sixth Column, Daytime Power:

Daytime power in watts (sunrise to sunset) power.

First Line, Seventh Column, Nighttime Power:

Nighttime power in watts (sunset to sunrise) power.

First Line, Eighth Column, CH/PSA Power:

This column shows powers used in certain special hour categories -- Pre-sunrise authority (p); Critical Hours (CH); and Canadian Restricted (cr). PSA powers are used from 0600 local time to sunrise time specified in the license when that sunrise time is later than 0600, with daytime antenna facilities. (On certain clear channels, the PSA time begins at sunrise of a dominant station located east of the PSA station.) Some PSA powers are authorized but not used. Critical Hours are sunrise to two hours after sunrise and two hours before sunset or sunset. Canadian Restricted Powers are used during critical hours.

First Line, Ninth Column, Network:

This column shows network or audio news services, including state, provincial, and regional networks. These are:

US National

- Ac American Contemporary (ABC)
- Ad American Direction (ABC)
- Ae American Entertainment (ABC)
- Af American FM (ABC)
- Al American Information (ABC)
- Apr American Public Radio
- At ABC Talk Radio
- C Columbia Broadcasting System (CBS)
- IBN International Broadcasting Network
- K Larry King Talk Program
- M Mutual Broadcasting System (MBS)
- MCN Music Country Network (WSM 6 nights 2200-0200 ELT, not on SU)
- N National Broadcasting Company (NBC)
- Nb National Black Network
- Nt NBC Talk Net
- Np National Public Radio
- Ns The Source (NBC)

How to Use the Log

NOTE: Many network stations do their own newscasts, using only voice cuts from the audio services or the networks. Some will pick up the network commercials and integrate them into their own broadcasts without using network newscasts.

First Line, Tenth Column, Formats:

Some of the abbreviations seen in this column are:

- AC = Adult Contemporary. A format for Adults, a more wide selection of music, with selections from country, soul and rock fields. Main target audience is 25-49, with secondary from 18+.
- anTLK= All night talk type program or programs. (See Nt and At under Network)
- AOR = Album Oriented Rock. A music format that stresses the most popular cuts from current and past hit rock albums.
- B: = Black programming. (See also UC)
- BBD = Big Band Music. Emphasis on the big band music.
- CLA = Classical music. Fine arts programming.
- C&W = County & Western (includes all type of County and Western music)
- CHR = Contemporary Hit Radio. Formally called "T40", based on most popular music of the day, songs are selected for mass appeal, current hits compromise at least 30% of the total music played. Jingles and

How to Use the Log

sweepers are common.

- CP = Childrens Programming. Music, talk, and other programming for those under 12 years old, with some adult programming on the subject of children.
- EDU = Educational.
- ETH = Ethnic programming (usually that foreign language programming) could add SS, PP, FF, etc to indicate the language used.
- EZL = Easy Listening Music. Same as Beautiful Music, also see "MYL".
- GOS = Gospel. Heavy emphasis on Gospel music, with little paid religion programming.
- JAZ = Jazz music.
- MYL = Music of Your Life, Copyrighted (Al Ham productions, Inc.).
- NOS = Nostalgic. Adult Standards. An expansion of MYL, EZL, & BBD, with early 60s & 70s ballads in among the BBD and lots of Broadway musicals.
- NWS = All News Programming.
- OLD = Oldies. Music which was once a popular hit but is no longer topping the charts. Another description is music from the beginning of rock (50's) up to about 1975.
- REL = Religion. Program of paid time preachers, World Tomorrow, Back to the Bible, etc.
- S: = Spanish Language/Programming.
- SPT = Sports.
- TLK = Talk format. General interest and "service talk" programming (i.e., gardening shows, health shows, pet shows, etc.) and phone-in shows. Generally heavy into news.
- UC = Urban Contemporary. Formerly "B:Sol". Soul, Black, Disco, Rhythm and Blues are under this category. The common ground is service to the black community plus an attraction to the general audience. Presentation and music choices vary widely.
- VAR = Variety. Mixture of all of the above. Grab bag, (for the station that has a little of everything).

First Line, Eleventh Column, Stereo Status:

- K = Kahn System, Includes those stations using STR-84 Exciter
- M = Motorola System, Includes units manufactured by Delta Electronics
- Mag = Magnavox System

First Line, Twelfth Column, Other:

You guessed it, whatever doesn't belong somewhere else will be found here, including the following item:

"No PSSA" this indicates that this station does not have Post Sunset (PSSA) Authority from the FCC to operate. There are only a handful of stations that do not have the PSSA Authority.

How to Use the Log

Relay stations

"rCBK 540" indicates the station relays CBK which operates on 540 khz.

"//FM Stn." indicates the station relays its FM side, and the FM side may or may not have the same call letters as the AM station.

Second Line, First Column, Schedule:

This column shows the schedule, in Eastern Local Time, though the symbol at the start of the column denotes the time zone in which the station is located. Those time zones are (Eastern Time Zone is the reference):

A: Atlantic ELT plus 1	H: Hawaiian ELT minus 5
C: Central ELT minus 1	N: Newfoundland ELT plus 1 1/2
E: Eastern	P: Pacific ELT minus 3
M: Mountain ELT minus 2	Y: Yukon ELT minus 4

Some time zones or specific locations inside them do not switch to daylight time. For those areas, the designation (+1) is used. This means convert the schedule to ELT during daylight time months by adding one hour. Time zones for the Canadian Low-Power Relay Transmitters (LPRT) show the time of the station being relayed. Times in parentheses, when the day is not specified, apply to the Sunday schedule, even though the actual sign-off time may be a Monday morning, ELT.

Other schedule related abbreviations used:

SP = Silent Period	NSP = No silent period	v = varies
A = Approximately	OC = Open Carrier	TT = Tone test
SS = Sunset	LSS = Local sunset	
SR = Sunrise	LSR = Local sunrise	

Second Line, Second Column, Address:

The station's mailing address. When a post office box and a studio address are both known, the NRC Log chooses the PO Box address. Zip Codes for addresses may also be found under the "other" Column, if the information was too long to include in its entirety.

Addresses for French stations in Quebec - many of the addresses are shown in the English form, perhaps a project for next time. You can do this yourself by remembering a few basic rules:

- 10 Main Street in French is 10, rue Main
- 21 Glenn Blvd. in French is 21, blvd Glenn
- 10 East Main Street in French is 10, rue Main est.
- West is ouest, North is nord, South is sud, East is est
- Post Office Box 444 in French would be B.P. 444 (Boite Postale)

Where no address is given, the Postal Code is listed. If the city has multiple Postal codes, the Postmaster Zip Code is given.

How to Use the Log

Second Line, Third Column, Station Status and CP Information:

Information pertaining to Construction Permits and Station Applications. Examples of what may be found in this column are as follows:

"AP=TO:1450 KHz" - Indicates that the station has an application pending (AP) for a move to 1450 KHz from the present frequency that the station is listed.

"CP=TO:1200 KHz" - Indicates that the station has been granted a construction permit (CP) for a move to 1200KHz from the present frequency that the station is listed.

"CP=PO:740KHz" - Indicates that the station has been granted a construction permit (CP) to move to the frequency where it is currently listed, it is presently operating (PO) on the frequency shown in this column.

If you have any information that corrects or updates any of the following material we would appreciate it if you would write it down in a letter or on a postcard and send that information to:

NRC Information Services
AM Radio Log
Post Office Box 24
Cambridge, WI 53523-0024

Thank you for your cooperation in making this a very accurate logbook.

Enjoy the Logbook and Good Listening!

- () \$36.00 Airmail Delivery of DX NEWS to all other countries. This includes a one-time new subscriber fee of \$1.00

RENEWAL (second and later years) is \$1.00 less than rates listed above.

Updater #1

for the National Radio Club's AM Radio Log

This updater contains material taken from the pages of DX NEWS, up to and including Volume 56 Issue 16, January 23, 1989. Now of course, not all material taken from the pages of DX NEWS magazine have been incorporated within this fine piece of work. Verification signers as well as general comments from the various DDXD and Musing sections have not been included. You will notice that the material has been arranged by frequency.

Some of you also submitted material directly here. Your initials, well at least some of the ones we remembered to write down, can be found under the Issue column. They are: FV- Fred Vobbe, RR- Richard Reese, KC- Ken Chatterton, BH- Bill Hardy, EB- Eric Bueneman, SK- Sue Knitter.

Some notes to ponder while you are sweating over this stuff.

1-- Items are arranged in column form: Frequency, Call letters, State or Province, Location, Change/Comment, and DX News Issue material taken from.

2-- When there is more than 1 entry per station, please check the DX News Issue number, this will tell you the order the material appeared in DXN. Obviously material taken from Issue 10 will have precedence over material from Issue 4. Issue 30 is from the previous volume, in other words, material from Issue 1 has precedence over Issue 30. Also, you may wish to reference the particular DX NEWS issue for more details.

If you're still baffled, drop your question to us here. ----> Please include an SASE, a mint U.S. 1st Class Stamp, or two IRCs.

ORDER FORM

Keep your logbook current throughout the year.
Order your NRC AM RADIO LOG Updaters.

Yes! I'd like to order the following updaters. Each Updater is US\$2.00, (Outside the US and Canada, Airmail Rates: US\$3.00 each for Caribbean, Central & South America, US\$5.00 each for Europe, North Africa, US\$7.00 each for All Other Countries; Surface Rates: US\$3.00 each for All Countries Outside US and Canada). You may order all five in advance and we will automatically send you the updater when it becomes available. If you order each Updater separately, we recommend that you make a photocopy of this Order Form.

- _____ Updater #2 will be available approximately May 1989
- _____ Updater #3 will be available approximately September 1989
- _____ Updater #4 will be available approximately January 1990
- _____ Updater #5 will be available approximately May 1990

Updater #2

①

for the National Radio Club's AM Radio Log

This updater contains material taken from the pages of DX NEWS, up to and including Volume 56 Issue 26, May 29, 1989. Now of course, not all material taken from the pages of DX NEWS magazine have been incorporated within this fine piece of work. Verification signers as well as general comments from the various DDXD and Musing sections have not been included. You will notice that the material has been arranged by frequency.

Some of you also submitted material directly here. Your initials, well at least some of the ones we remembered to write down, can be found under the Issue column. They are: KC - Ken Chatterton, SW - Steve Whitt, FV - Fred Vobbe.

Some notes to ponder while you are sweating over this stuff.

1-- Items are arranged in column form: Frequency, Call letters, State or Province, Location, Change/Comment, and DX News Issue material taken from.

2-- When there is more than 1 entry per station, please check the DX News Issue number, this will tell you the order the material appeared in DXN. Obviously material taken from Issue 23 will have precedence over material from Issue 17. Also, you may wish to reference the particular DX NEWS issue for more details.

If you're still baffled, drop your question to us here. ----> Please include an SASE, a mint U.S. 1st Class Stamp, or two IRCs.

NRC AM RADIO LOG ORDER FORM

Keep your logbook current throughout the year.
Order your NRC AM RADIO LOG Updaters.

Yes! I'd like to order the following updaters. Each Updater is US\$2.00, (Outside the US and Canada, Airmail Rates: US\$3.00 each for Caribbean, Central & South America, US\$5.00 each for Europe, North Africa, US\$7.00 each for All Other Countries; Surface Rates: US\$3.00 each for All Countries Outside US and Canada). You may order all five in advance and we will automatically send you the updater when it becomes available. If you order each Updater separately, we recommend that you make a photocopy of this Order Form. Each Updater is required to keep your AM Radio Log book current.

_____ Updater #1 will be available approximately January 1989

_____ Updater #2 will be available approximately May 1989

_____ Updater #3 will be available approximately September 1989

_____ Updater #4 will be available approximately January 1990

_____ Updater #5 will be available approximately May 1990

Updater #3

for the National Radio Club's AM Radio Log, 9th Edition.

This updater contains material taken from the pages of DX NEWS, up to and including Volume 56 Issue 30, September 26, 1989. Now of course, not all material taken from the pages of DX NEWS magazine have been incorporated within this fine piece of work. Verification signers as well as general comments from the various DDXD and Musing sections have not been included. You will notice that the material has been arranged by frequency.

Some of you also submitted material directly here. Your initials, well at least some of the ones we remembered to write down, can be found under the Issue column. They are: MO - Mike Oswald, OA - Oile Alm, RO - Rod O'Connor, EB - Eric Bueneman, CC - Chris Cuomo.

Some notes to ponder while you are sweating over this stuff.

1-- Items are arranged in column form: Frequency, Call letters, State or Province, Location, Change/Comment, and DX News Issue material taken from.

2-- When there is more than 1 entry per station, please check the DX News Issue number, this will tell you the order the material appeared in DXN. Obviously material taken from Issue 30 will have precedence over material from Issue 28. Also, you may wish to reference the particular DX NEWS issue for more details.

3-- "AP:" means Applications from Existing Facilities and "CP:" means Grants to Existing Facilities.

If you're still baffled, drop your question to us here. ---->
Please include an SASE, a mint U.S. 1st Class Stamp, or two IRCs.

Updater #4

for the National Radio Club's AM Radio Log, 9th Edition.

This updater contains material taken from the pages of DX NEWS, starting with Volume 57, Issue 1, October 9, 1989 up through and including Volume 57, Issue 13, January 8, 1990. Now of course, not all material taken from the pages of DX NEWS magazine have been incorporated within this fine piece of work. Verification signers as well as general comments from the various DDXD and Musing sections have not been included. You will notice that the material has been arranged by frequency.

Hint: This updater can be placed in front of your log book in your 3-ring binder, thus saving the task of entering each item in the log.

Some of you also submitted material directly here. Your initials, well at least some of the ones we remembered to write down, can be found under the Issue column. They are: TH- Tim Hall, BM- Bill Moser, WH- Wayne Heinen, HK- Howard Kemp, BW- Bob Walker, PB- Phil Boersma, DB- Doug Beard, HD- G. Harley DeLeurere, RE- Robert Eddy, CK- Christine Klik, OA- Olle Alm, DX- the many DX Audio Service subscribers, DS- Doug Smith.

Our apologize go out to Dave Lewis for losing his contributions which should have gone into Updater#3. The info got into the logbook database, but was misplaced when it came to entered it into the Updater#3 program. The material from Dave will appear in the next logbook this coming fall.

Some notes to ponder while you are sweating over this stuff.

1-- Items are arranged in column form: Frequency, Call letters, State or Province, Location, Change/Comment, and DX News Issue material taken from.

2-- When there is more than 1 entry per station, please check the DX News Issue number, this will tell you the order the material appeared in DXN. Obviously material taken from Issue 12 will have precedence over material from Issue 8. Also, you may wish to reference the particular DX NEWS issue for more details.

3-- "AP:" means Applications from Existing Facilities and "CP:" means Grants to Existing Facilities.

4-- Those addresses starting with "c/o" are the license application addresses and not necessary of the actual station location itself.

5-- Updaters 1, 2 and 3 are still available thru the NRC Publication Center.

Add into the U.S. National Network list the following:

SRN - Satellite Radio Network

Add into the Canada Regional Networks the following:

SCW - Star Country. This Country and Western network program is on the air daily from 1800-0900 EST and originates from St. Catharines, ON. As of Dec 89, 28 Canadian country stations are taking this network feed.

If you're still baffled, drop your question to us here. ----> Please include an SASE, a mint U.S. 1st Class Stamp, or two IRCs.

Updater #5

for the National Radio Club's AM Radio Log, 9th Edition.

This updater contains material taken from the pages of DX NEWS, starting with Volume 57, Issue 14, January 15, 1990 up through and including Volume 57, Issue 25, May 7, 1990. Now of course, not all material taken from the pages of DX NEWS magazine have been incorporated within this fine piece of work. Verification signers as well as general comments from the various DDXD and Musing sections have not been included. You will notice that the material has been arranged by frequency.

Hint: This updater can be placed in front of your log book in your 3-ring binder, thus saving the task of entering each item in the log.

Some of you also submitted material directly here. Your initials, well at least some of the ones we remembered to write down, can be found under the Issue column. They are (in no particular order): TH- Tim Hall, KR- Kermit Reid, DH- Dale Hamm, BH- Bill Hale.

If you sent material to us but didn't see it in this updater, do not fear, it wasn't lost, it has been entered into the log book database. We just forgot to place it into the Updater files. We apologize if your material didn't see print here.

Some notes to ponder while you are sweating over this stuff.

1-- Items are arranged in column form: Frequency, Call letters, State or Province, Location, Change/Comment, and DX News Issue material taken from.

2-- When there is more than 1 entry per station, please check the DX News Issue number, this will tell you the order the material appeared in DXN. Obviously material taken from Issue 26 will have precedence over material from Issue 14. Also, you may wish to reference the particular DX NEWS issue for more details.

3-- "AP:" means Applications from Existing Facilities and "CP:" means Grants to Existing Facilities.

4-- Those addresses starting with "c/o" are the license application addresses and not necessary of the actual station location itself.

5-- Updaters 1, 2, 3 and 4 are still available thru the NRC Publications. ALL updaters are required to bring your log book up-to-date.

If you're still baffled, drop your question to us here. ----> Please include an SASE, a mint U.S. 1st Class Stamp, or two IRCs.
