

RADIO STATION WGGGA

"WHERE GAINESVILLE GREET'S THE AIR"
1240 ON YOUR DIAL

Operated By
GAINESVILLE BROADCASTERS

GAINESVILLE, GA.

October 26, 1941

Mr. Kermit Geary,
Rfd. #2
Walnutport, Pennsylvania

Dear Sir:

We are indeed pleased to verify your report of reception of WGGGA, Gainesville, Georgia on October Tenth, 1941, from 2:28 to 2:42 A.M. We have been very busy here just getting our station going so have been forced to delay in answering your kind report. Then too, we have been short in personnel so that the staff has long hours and not any time for correspondence.

Our equipment is RCA All the way. The transmitter is the RCA-250-K, a new line of RCA transmitters. The antenna is a 205 foot verticle made by Wincharger and has nine miles of ground system.

We went on the air on regular schedule October tenth and are broadcasting seventeen hours per day, beginning at six in the morning and continuing until eleven P.M.

I am sorry we do not have more time to tell you more about our station. If you hear us testing or on our regular schedule, and we do test frequently about two in the morning, feel free to write us and we will answer your letter as soon as possible.

Again thanking you for your kind report and wishing you the best of reception I remain

Yours Sincerely,

F. K. Brown

Dear Sir:

Thank you very much for your letter regarding our test broadcast. You were just a little mistaken on a few points, but you did hear us. We were not testing NEW equipment, but testing and checking equipment in use. While I am Chief, we will probably be making a number of tests, since I am re-wiring the complete station. It is good to know that we put ~~px~~ out such a good signal. We have, of course, a 250 watt transmitter with a single antenna tower about $\frac{1}{4}$ wavelength high.

You said you heard "I can do anything you can do" and "When your hair has turned to silver" along with a tone test. Well, I am sorry to say that none of these were broadcast by WMOC. But, we were broadcasting and you did hear us.

Thanks once again for your letter.

Very truly yours,

Bob White

Dear Sir:

This letter is to confirm your report concerning Radio Metter,
WMAC, Frequency Check Broadcast on February 17, 1964.

WMAC operates on 1360 kilocycles with a 200ft. antenna. We
operate on 500 watts, our antenna is non-directional, and
we use a Gates BC-500T transmitter.

Thank you for your letter.

Sincerely,

Don Cobb, Manager
Radio Metter

Mix 98.1 & NewsRadio 720

300 Mooty Bridge Road, Suite 204
LaGrange, GA 30240

February 23, 2000

Dear Mr. Geary,

Thanks for your interest in WGSE..NewsRadio 720. We are a daytime station only. WGN in Chicago is a clear channel station and the FCC requires that there be no other station signals that interfere with that frequency for a 750 miles radius. Our transmitter site is 739 miles from Chicago therefore, our signal is only on during the day.

Our format is now news/talk and we operate at 10,000 watts of power. On the weekends we frequently simulcast with our sister station which is Hot Adult Contemporary operating at 25,000 watts - WMAX-FM.

Thanks for listening and I like to invite you to please tune in again. Good luck in your endeavors.

Thanks,

Susie Sullivan
Program Director

P.S. The female announcer you heard was me.

WZAL

AM — 2,500 WATTS — 1540 KC

12 N. CEDAR STREET • SUITE 311 • McDONOUGH, GEORGIA 30253
PHONE (404) 957-1540

KERMIT: As of Thursday, 2/28/85, we had received 16 reports - several with tone reception @ 4.0 watts.

Dear Friend:

Enclosed is your QSL and other literature about WZAL.

Enjoyed talking with you on the phone.

Jim

WZAL has three transmitters - all remotely-controlled from its studio in downtown McDonough. The transmitter site is approximately 1½ air miles south of the studio.

WZAL's main transmitter is a C.S.I. 2½ kw unit, with cutback to 1 kw for critical hours operation. Our standby transmitter is a Gates BC-1-G, which operates at 1 kw. This transmitter has a cutback to 500 watts, which we do not use. Our PSA transmitter is an L.P.B unit - about the size of a breadbox. It's totally solid state and operates at 4.0 watts. Its normal range is about two miles in all directions.

The C.S.I. T2.5A transmitter was installed new in 1979. The BC-1-G is vintage 1960's, when WZAL signed-on as WJGA-AM in Jackson, Georgia. The AM was moved to McDonough in 1979, and has been separately owned and operated since 1980. WJGA-FM remains in Jackson, Georgia - about 17 air miles to the southeast of McDonough.

The L.P.B. transmitter was installed new in September, 1980, shortly after WZAL applied-for and was granted a limited PSA. Our tower is very close to McDonough and its residential areas - hence, the decision to operate from 6 AM, even at the miniscule wattage. On a decent car radio you can carry the 4.0 watts about four to five miles. Our main problem during PSA time is not co-channel interference, but adjacent channel splatter from WCKY-1530.

Our tower and ground system were installed in early 1979. The tower is 196 feet high. The tower is unlighted (due to its relatively short height and the lack of any nearby airfields).

On the personal side, I did some DXing in the 1960's. At that time I lived about 20 miles north of Atlanta (McDonough is 30 miles south). Using the only radio I could afford - a Lafayette HE-40 with four tubes and selenium rectifier - and a fifty foot longwire, I nevertheless had some "great moments." I have a QSL from KORL-650 Honolulu, heard one winter morning around 4 AM EST during a WSM silent period. Just recently my wife surprised me with a Realistic DX-400 PLL receiver, so I'm enjoying "scouting the bands" when my schedule permits.

Many thanks for your report.

Jim

rwh

January 21, 1992

Mr. Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary:

I am in receipt of your letter dated January 18. Thank you for writing the station and letting us know of your reception.

Indeed, your receiver did pick up WSTH-AM on the morning of January 10, 1992. WSTH-AM is licensed to Columbus, Georgia, with transmitter and tower in Phenix City, Alabama, which is adjacent to the city across the Chattahoochee River. Our daytime signal is 5,000 watts, with night signal of 500 watts. Because you received our broadcast at 6:25 am, our power was apparently running 5,000 watts.

Solar Broadcasting actually owns three radio stations which simulcast one signal. WSTH simulcasts with WSTH-FM, a station licensed to Alexander City, Alabama. We also own an AM facility in Alexander City, WXTH, which also rebroadcasts our FM signal.

My assumption is that, at approximately 6:30 am, when you lost our signal, many "daytimers" were signing on the air, thus creating more interference. As you know, our frequency of 540 kHz can be quite powerful under favorable conditions.

Again, I thank you for your letter, and wish you continued luck and success at your listening post.

Most sincerely,

A handwritten signature in blue ink, appearing to read "Len Shackelford", written over a horizontal line.

Len Shackelford
Operations Manager
WSTH-AM/WSTH-FM/WXTH-AM

Waynesville GA

12/16/90

Dear Mr. Geary,

I am writing in response to your letter to our radio station (WQCH). I thought this might be the only response you might receive since our General Manager is usually too "busy" to take time to do these things. Your letter was on the counter in the lobby and I figured he'd probably just "file" it like he usually does. One person wrote recently asking for a station profile and said it was the third time he had written and enclosed return postage but had not yet received a reply.

I am the announcer you heard on 11/29/90. I was rather surprised and thrilled to be heard so far away. We recently acquired a new Harris 5000 Watt AM Transmitter and that may have helped us reach that far. At 5:30pm each day, the FCC requires us to switch to 75 Watts to prevent interference.

You were pretty much "dead-on" with our programming except for a couple of items. I have no knowledge of an 'Interfaith Bible' (5:19'14); we have a Causby Food-Mercury but no Tate Food-Merc.; also there is no 'Sherritt's Pharmacy' and we have not had a live broadcast from North Main Street, except from 'Goody's Family Clothing' - which I believe was on the 29th. A few of the other items may have

been from interference from the other station
you mentioned.

Our News Director is Joan Butler, in regard
to your very nice compliment concerning the stories.
I was only the announcer, but I hope I didn't sound
too "Country" since I was born and raised here in
Lafayette (pronounced Luh-FAY-Uht).

I am enclosing some information about WQCH and the
area, along with a bumper sticker.

Thank you for such a nice letter and I wish
you and yours a Merry Christmas!

Sincerely,
Mickey McConnell
406 Wisteria Rd
Lafayette, GA 30728

Dear Listener:

I am pleased to verify your reception of WNML (AM) operating at 1670 KHZ with transmitter located in Warner Robins, Georgia. WNML operates with a daytime power of 10 kW and a nighttime power of 1 KW. Our antenna system is non-directional. Miscellaneous technical details follow:

Transmitter: Harris DX-10 solid state with AMS-G1 stereo exciter.

Antenna: LBA 6 wire symmetrical folded dipole 92 m high.

Elevation: tower base 125m AMSL

Location: 32 38 19 83 38 33

Initial Broadcast: 4 May 1998

Programming: sports talk/ simulcasts with WNML-FM 96.5 MHz (Gray, Ga.)

Your reception report is greatly appreciated.

Walnutport, PA 18088

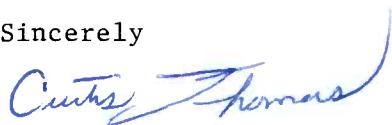

Dear Mr. Geary:

This letter is to confirm your reception of the W F A M Station signal on the date of January 20, 1988.

The only discrepancy is the fact that "Contact America" is a live via satellite program which ends at 5:00 pm and is followed by a local church program from 5:00 to 5:15. There is no way to confirm any direct quotations; however, the address and telephone numbers quoted are correct.

The power output of W F A M is 5,000 WATTS on high power, which is reduced to 280 WATTS at sundown.

Thank you very much for letting us know you heard!

Sincerely,

Viola Wren

PHONE (404) 335-3155

February 10, 1992

Dear Sir: *Kermit*

Several weeks have passed since I signed on for the radio test January 20th. A total of 14 DXers. tuned in and wrote for confirmation. It was a cold, clear, full moon morning with 25 degrees F. here. The sound test that I aired was the same that was used for a DX test approx. 25 years ago. The only change was 1000 watts then to 5000 watts now. Same studio, tower and location. We now program C & W and Southern Gospel music. The Audubon message was for a lifelong interest in birds and nature. Almost everyone writing was sure of the "Old Favorite" Songs (ie) "Yellow Rose of Texas" and "Sweet Georgia Brown". I enjoyed looking for each listeners town/city location in the Atlas. Areas of water seemed to be near each listener. Our transmitter is a ten year old Harris model. The tower is 210 feet tall and 10 feet from a small stream. The transmitter is remote controlled via telephone lines from the studio 2½ miles away in downtown Commerce. I enjoyed this contact with you.

Sincerely, *William Carson*

November 8, 1991

Dear Mr. Geary,

It was indeed a pleasure to receive your correspondence of October 29, and to learn of the quality of our broadcast at such a distance from St. Marys.

Concerning the programming which you logged on the evening of Monday, October 28, 1991, I offer the following:

1800 - 1805 USA Radio News

1805 - 1806 "Station Support Message: How do you spell relief? P-R-A-Y-E-R!"

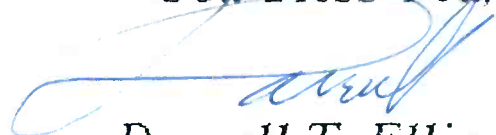

1806 - 1806:30 Good News Verse

1806:30 - 1808 Sign Off Message

1808 Off The Air

On behalf of Mr. Hafer and the staff here at AM 1190, I wish you "Happy Listening."

God Bless You.

Darrell T. Ellison
Public Service Director, WECC

1190•AM

We Celebrate Christ!

03 January 1991

Mr. Kermit Geary
1266 Riverview Dr.
Walnutport, PA 18088

Dear Mr. Geary,

Greetings in the Name of our Lord Jesus Christ. We here at WECC were pleased to receive your letter dated 20 December 1990. It is of great interest to us that our signal has been received at such a great distance.

WECC is owned by Casey Broadcasting, and has been on the air for five years, our General Manager is Paul Hafer. We are a commercially supported station with a format of contemporary Gospel music, and Bible based teaching programs. We are limited to day time only operation.

At the present time, WECC operates with live announcers during A.M. and P.M. drive periods, and during the noon hour, with other periods operating by automation. Our automation system is manufactured by SONO MAG Corporation, mixing is accomplished by way of HARRIS' Medalist -12 mixing board and processed by a MIC MAZE model CSP 2013 processor. The signal is fed to a HARRIS SX 2.5 A transmitter (placed in service Summer 1990) by way of a TEXAR EAGLE AM Modulation Controller. Our effective radiated power is 2.5 kilowatts by way of a UP-300 folded unipole antenna from LBA Incorporated.

In reviewing our logs for 18 December 1990 however, I fear our signal may not have been so clear as you believed. We carry no advertising for either a mobile home dealership or a drug store. Our log indicates spots at that time for an automobile dealer (Kings Bay Chrysler Plymouth, Kingsland, GA.) and a bowling center (Northside Lanes, Jacksonville, FL. (904) 757-1838,) these commercial spots would have been followed by a promotional spot for a program which would have ended as indicated by your log, and followed by music.

On behalf of Mr. Hafer and our staff, I wish to express thanks for your letter and extend to you an invitation to tune us in if you are travelling in the Southeast Georgia - Northeast Florida area. Should you find yourself in St. Marys, please feel free to visit us here at WECC>

In Christ's Service,

Darrell T. Ellison
Public Service Director
WECC AM 1190

Route 9, Box 280E, St. Simons Island, GA 31522 • (912) 638-1100 • (912) 576-1100

January 12, 1999

Mr. Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary:

Thank you for the kind reception notice in your letter of December 11, 1998. I have enclosed a copy of your letter and am please to verify that, according to the logs of News/Talk 1100 WCGA, you did in fact receive our station.

It is always a thrill to get letters from folks who listen to WCGA at a great distance. We value all our listeners, especially those who work at hearing our signal.

For your information, WCGA uses a Harris DX-10 transmitter into a series L-C net housed in a Kintronics Labs enclosure fed to a Ron Nott 6-wire folded unipole attached with 36 inch stand off insulators to a Stainless, Inc. brand G-25 model 24 inch face solid rod tower. My wife and four children and I plowed in 36,000 linear feet of number 10 AWG soft-drawn copper and silver soldered them to the 6 inch 99.99% pure .32 mil copper strap which lies at the base of the tower. The copper strap is attached to the tower via a silver soldered connection.

This whole project is a labor of love for me and the staff. Art Manning is someone about whom a book should be written. He is retired VOA and at one station had over 3,000 acres of curtain and rhombic antennas and a staff of 400 plus.

Let us know how we can improve, especially in the area of your expertise and interests. Please let us know how to design a response card that would be much sought after by DXers. I want to have a cool card that will be in demand and will stimulate a desire to hear our station.

Thank you again for listening. Please spread the word. And if you pray, keep us in your prayers.

Sincerely,

A handwritten signature in blue ink that reads 'Wesley Cox'. The signature is fluid and cursive.

Wesley Cox
General Manager

CC: Art Manning

WCOP 1350 AM STEREO

WITH CHRIST ORIENTED PROGRAMMING

Mr. Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary,

Thanks for your time on the early morning of November 11, 1990.

It sure was great to hear from you with reports of up to 10 over S-9 there in Walnutport, PA.

WCOP uses a Continental 315R-1 5 KW transmitter, and were at full 5 kw 0430-0455. We went on directional low power (500 watts 0455-0500)

Your log of our transmission on November 11, 1990 between 4:30-4:55 matches our log.

Again, thank for listening and the best to you in your DX listening.

Sincerely,

Bill Bruton
Station Manager

"The Voice of Savannah"

Post Office Box 1247
Savannah, Georgia 31402
Telephone (912) 964-7794

Dear Mr. Kermit Geary:

I am glad to hear we're coming in so well there! For 5,000 watts at 1290, our signal does carry quite well.

We've made considerable improvements in our signal since October 1, 1979, which was our first day as WWSA. WTOC AM and FM was purchased by Bluegrass Broadcasting in 1979 and we changed the call letters to WWSA (Working with Savannah) on the AM and WCHY, Y-94 (country format) on the FM. WTOC-TV was purchased by another conglomerate who decided to keep the call letters the same. This forced us to change the AM and FM signs.

We remain a 24 hour-a-day station and have no definite maintenance period. I'll take us down for maintenance occasionally on Sunday night and Monday mornings. However, since the installation of our new Harris MW5-A transmitter took place, we very seldom need to be off the air completely. The old 1946 RCA BTA-5F transmitter, which was the main makes an excellent stand-by. We keep it in good operating condition at all times.

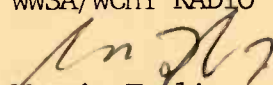

I am enclosing for you both an AM and FM coverage map. You'll note the AM map shows us on a non-directional pattern day-time. We radiate in sort of "butterfly" pattern night-time, which expands to the east and west only. Our northerly and southerly coverage is very minimal at night.

Thank you for your interest in our station and if you're ever in Savannah, please come visit our brand new facilities at 245 Alfred Street of Highway 80 on the west side of Savannah.

Happy DX'ing!

Sincerely,

WWSA/WCHY RADIO

Martin Foglia
Chief Engineer

MF/bh

NOTE: WWSA AM's call letters have been changed to WCHY AM due to simulcasting of simulcasting. WCHY AM/FM.

America's Greatest Music

April 29, 1993

Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary,

Thank you for your letter requesting confirmation of your reception reports from 1991 and 1992.

I'm sorry that no one has answered your previous requests. Please accept our apologies.

In reference to your reception reports, I do not have ready access to information regarding WBNM's transmitter power on September 24th, but I'm fairly certain the power was 2.5Kw, and that a remote control failure had allowed the station to stay on the air during post-sunset hours. It is my understanding that this happened frequently in the past, and that KMOX had complained several times about the problem. However, your log of what you heard on WBNM on that date is an accurate description of the programming on WBNM at that time.

On January 14th, 1992, again, WBNM was operating at 2,500 watts, from our normal daytime antenna. And again, your description of programming is accurate.

I note that in early April, you had difficulty receiving WBNM. I should point out that WBNM has had transmitter difficulties since February, and was silent for about 7½ days. Also, the difficulties manifested themselves in the form of reduced modulation. WBNM is back to full strength, with good modulation again, as of Monday, April 26th.

I would be interested in further reception reports from you and other members of your organization. Again, I apologize for the lack of response earlier.

Sincerely,

Dave Stewart
Chief Engineer, WBNM/WNEK/WNEK-FM

Dear Mr. Geary:

I certainly do appreciate your fine letter reporting your reception of our station's special broadcast to the DX listeners on February 1st.

When we receive letters written as well as yours was we too enjoy being of service to you.

I was indeed surprised to read your report and find that our signal was so strong in that vicinity.

We have a Western Electric Grid modulated, 250 watts, transmitter which feeds a $\frac{1}{4}$ wave vertical lingo antenna.

I wish to thank you again for your exceptionally interesting letter, and may I also wish you much success with your DX reports.

Please consider this as your verification.

Sincerely yours,

Howard C. Jewett
Chief Engineer

Mr. Kermit Geary
R. D. 2, Box 289
Walnutport, Pennsylvania

Dear Mr. Geary:

This will confirm your reception of WDOL on the morning of Sunday, November 24, 1957. Your report was very accurate. As a matter of fact, I am surprised to know our 1000 watts reaches so far so late in the morning.

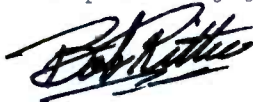

You may be glad to learn that WDOL will be a full time station in the early part of 1958. The power will be the same with directional antenna at night. Your side of the tower will be open though and you should be able to pick it up 24 hours a day ... that is when the weather permits.

It is my voice on the sign-on. The sign-on and sign-off are all pre-recorded.

We will be happy to verify reception reports from everyone in the National Radio Club that receives our regular broadcast signal. We do not have frequency checks. We sign-on at 5 A.M. Monday through Saturday and of course at 6A.M. on Sundays.

Hope to hear from you again soon.

Respectfully yours,

Bobby Ritter
Program Director

This letter will serve as the verification of reception report for the test program broadcast by WEKS, Marietta, Georgia, on March 16, 1987 from 1:05am to 1:35am.

WEKS is a class two 10,000 watt daytime only radio station which operates on a U.S. clear channel at 1080 kHz. It broadcasts a directional signal pattern southeast toward the city of Atlanta from a three tower antenna array located on a 10 acre site in Marietta, Georgia. The transmitter is a 1965 RCA BTA-10U AM broadcast transmitter.

WEKS' sister station is WEKS-FM which broadcasts on 104.1 MHz with 60,000 watts ERP from a tower height 1,200 feet above average terrain.

Thank you for taking part in this test. It was very interesting to hear from so many people who listened from great distances away.

Mr Kermit Geary
RD 4 Box 321
Walnutport, PA 18088

Dear Kermit,

Thank you very much for your reception report for WGIG dated 2-23-81. The information you provided is correct, and we hereby verify.

I'm glad to know that we put in a signal at sunset and at night some times. Anytime you hear us on our regular schedule let me know!.

I believe that WGIG came on the air in early 1949, so you must have one of the first veries from WGIG.

Thank you very much for the comments on the audio. That seems to be the hardest thing for an AM station, to keep the audio clean, and I devote quite a bit of time to it. The audio response on WGIG is nearly flat to 15KC.

We also operate WSBI-FM at 100.7MC with 60kW ERP.
Again, thanks for your report!

Sincerely,

Bob LaFore
Chief Engineer

December 19, 1984

Mr. Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary,

I am pleased to confirm your reception of WJYA on 1080KHz on December 13, 1984. The details you provide indicate that it was indeed our station to which you were tuned.

Your report comes as a bit of a surprise to me since WJYA-AM operates directionally. Our pattern is basically a cardioid with the main lobe beamed southeast and nulls toward Hartford and Dallas, Texas. You were listening almost directly in one of the pattern minima.

The similarity between our programming and WKAP is not coincidental. WKAP is operated by LWB-Allentown Corporation. WJYA is owned by the LWB-Atlanta Corporation. They are basically the same company.

We appreciate the report. Merry Christmas!

Yours,

A handwritten signature in black ink, appearing to read "John Moore", is written over the typed name.

Dear Sir:

Verification of report of DX reception:

The data which you submitted is identical with that appearing on our log for Sunday morning November 18, 1951. Your greatful report was received and read with much interest. Your valuable letter will be placed in the files of our now growing DX reports for proof of our coverage.

Any additional reports of reception of our signal will greatly be appreciated.

Yours very truly,

Charlie H. Parish, C. E.
Radio Station WFPM

P.S. Incidentally, your report was the only report received for that particular time(day). Regular sign-on time for Sunday: 6 AM EST. Other recent reports from these cities: Westfield, N. Y., Mount Holly, N. J., Paxton, Ill.

WSMA

10,000 WATTS**1550 KC • 1560 Mt. Paran Rd., N. W. • Atlanta 5, Ga.****MAILING ADDRESS:**

Drawer G - Northside Sta.
Atlanta 5, Georgia

Thank you very much for your Report of Reception of our test broadcasts on Feb 13, 1962. Your report has been verified and logged in the station files. Reports have been received from as far as California, Canada, and New Zealand, and all reports are sincerely appreciated.

WSMA uses a 10,000 watt Gates Transmitter, type BC-10P, with Gates and Ampex audio equipment. Our 196 foot tower is located just east of US Highway 41, some ten miles north of the city of Atlanta. The tower is within sight of Dobbins Air Force Base and the Lockheed Aircraft Plant. The studios are in the Belmont Hills section of Smyrna, Georgia.

WSMA will operate normally during the daylight hours, with test broadcasts between 12:01 AM and 6:00 AM EST at irregular intervals. It is hoped that WSMA-FM will be on the air in the near future.

Reception reports, such as the one received from you, enable us to establish our radiation pattern and to verify our engineering specifications. Again, may we thank you, and invite you to visit the WSMA facilities if you are ever in the Atlanta-Smyrna area.

Sincerely,

WSMA Engineering Staff:

General Manager
Radio Station W J Y I
Box 491
Marietta GA 30061

Dear Sir,

I was happy to hear a portion of "The Music of Your Life" programming from WJYI on the evening of Monday, December 14, 1981. I submitted a report of my reception at that time, but I am sorry to inform you that I have not received a reply to my letter. I am sure that a lack of time at the start of your new operation is the reason for the oversight.

At this time, therefore, I am enclosing a copy of my previous letter, with the request that you kindly check over it, particularly with regard to my logging of a local advertisement at 5:19½ P.M., E.S.T. If the report is accurate, kindly send me a reply confirming my reception of WJYI on 1080 kiloHertz on December 14th.

Thank you for your attention to this request. I shall be looking forward to receiving your reply.

Best wishes to WJYI for continued success with "The Music of Your Life" programming. I enjoy listening to it, and a local station, WKAP-1320, Allentown, Pa., has recently started the same programming with favorable audience acceptance after 30 years of Top 40 rock.

Thank you again for your reply. Return postage is enclosed.

Very truly yours,

Kermit Geary

*Mr. Geary,
Sorry you did not receive our
first reply. I wrote back a few days
after we received your first letter to
confirm you info. It was very interesting
to me to find out our signal carried this.
I thank you for writing. Yvonne Stuey*

Dear Kermit,

What a nice surprise to hear that you heard us all the way in Pennsylvania!

We are a new Contemporary Christian radio station with 10,000 watts of power. Our operating hours at the present time are sunrise to sunset. If possible in the future we plan to extend those hours.

Enclosed is one of our brochures and a coverage map that we hope you will find of interest. Some of the programs in the brochure have changed, but it is basically correct.

Thank you for your letter, and we are pleased to know that you were able to hear us!

Sincerely,

Dear Mr. Geary:

In regards to your letter of October 16, 1958.

We were running frequency tests on the night of Oct 16th, and were programing the program which you reported.

We here at WGSR are always glad to hear from listeners to our frequency tests, especially one as far distant as yourself.

The reason for no station identification between 2:01 to 2:17 was because the consulting engineer in Atlanta was trying to make a correct frequency measurement.

I hope we meet again on another frequency check and from all the folks here at WGSR we wish you many hours of good listening to the 1570 spot.

Thanking you once again for your report I am,

Yours truly,

NEWS TALK SPORTS 1480

October 17, 2000

Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Kermit:

This will confirm your reception of our new expanded band AM radio station WAWX 1630 KHz on October 2, 2000.

WAWX began full time operation at 5:00 AM EDT on Monday, October 2, 2000, and is simulcast with WRDW 1480 KHz. This simulcast will continue for approximately six months.

WRDW, by the way, is Augusta's oldest radio station having begun operation in 1935. WAWX and WRDW are part of the Beasley Broadcasting Group of stations.

WAWX operates with a non-directional pattern with 10,000 watts daytime power and 1,000 watts night time power. The transmitter is a new solid state Harris 10 KW unit. WRDW and WAWX are diplexed together and use the same tower.

We appreciate your reception report very much as it helps us determine how well the new facility is operating.

Sincerely,

Dear Mr. Geary:

Thank you very much for your report of our reception in Walnutport. It is encouraging to hear that our signal is heard for such a distance.

After checking with our log for January 15, we find that your report tallies accurately with our log. This is to verify same.

Thank you again for your interest and your report. We shall certainly strive to keep our signal strong and clear. If we can be of any further assistance to you, please do not hesitate to write us.

Very truly yours,

Mr. Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary:

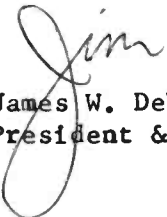

This letter will serve as verification that you received WZAL on December 9, 1984, from 5:19 to 5:24 PM Eastern Standard Time. At that time of day we are in "critical hours," and operate with a reduced power of 1,000 watts.

Enclosed is a coverage map and program guide. If you want a REAL challenge, try receiving us during pre-sunrise, when we operate at 4.0 watts. During December we are on pre-sunrise power until 7:30 AM (in January we are on 4 watts until 7:45 AM). There are very few stations on the air in the eastern U-S on 1540 kilohertz between 6 and 7 AM.

As a child I used to "DX" the AM band with a Lafayette HE-40 receiver that cost \$39.95 in the early 1960's. I used a 50 foot long wire oriented east-west. My best AM catch was KORL, 10,000 watts at 650 kHz around 4 AM one Sunday or Monday morning when WSM Nashville was off the air. Off the top of my head, I also remember hearing KQEO, 920 kHz around 3 AM. They were 500 watts directional east-west at that hour. I also did some daytime AM DX'ing, and during the winter heard many big stations hundreds of miles away. My listening post was in Marietta, Georgia - about 20 miles northwest of Atlanta.

I would like to purchase a decent communications receiver to do some occasional listening again. How much is a Hammarlund set like your HQ-180? I like the tube types. Hope to hear from you again soon.

Sincerely,

James W. DeVan
President & General Manager

PS - Our transmitter is a CSI 2.5A-T. CSI is a Florida company. The transmitter was installed new in 1979. It utilizes four final tubes: 4-1000A's. The tower is 196 feet high.

RE: RECEPTION OF WWVN, 1550, Vienna, Ga.

Dear Mr. Geary:

This will confirm your logging of WWVN, Vienna, Ga., on the morning of December 14th, 1981, in periods from 6:12 to 6:26 A.M. I have heard the tape recording you made of that reception and was amazed at the strength of the signal. Had it not been for medium interference from other stations, the quality would have approached local.

The astonishing thing about this logging was that in that time period, at that season of the year, WWVN was operating with the pre-sunrise power of $27\frac{1}{2}$ watts.

I was manager of WWVN at that time. The station has since been sold, and I am now in the cable television business, which is why this confirmation is on different letterhead.

Sincerely,

Bill Goodson

Dear Sir:

I am glad to hear we're coming in so well there! For 5,000 watts at 1290, our signal does carry quite well.

WWSA
1290 AM

wchy
94fm

We've made considerable improvements in our signal since October 1, 1979, which was our first day as WWSA. WIOC AM and FM was purchased by Bluegrass Broadcasting in 1979 and we changed the call letters to WWSA (Working with Savannah) on the AM and WCHY, Y-94 (country format) on the FM. WIOC-TV was purchased by another conglomerate who decided to keep the call letters the same. This forced us to change the AM and FM signs.

WWSA
1290 AM

wchy
94fm

We remain a 24 hour-a-day station and have no definite maintenance period. I'll take us down for maintenance occasionally on Sunday night and Monday mornings. However, since the installation of our new Harris MW5-A transmitter took place, we very seldom need to be off the air completely. The old 1946 RCA BTA-5F transmitter, which was the main makes an excellent stand-by. We keep it in good operating condition at all times.

WWSA
1290 AM

wchy
94fm

I am enclosing for you both an AM and FM coverage map. You'll note the AM map shows us on a non-directional pattern day-time. We radiate in sort of "butterfly" pattern night-time, which expands to the east and west only. Our northerly and southerly coverage is very minimal at night.

WWSA
1290 AM

wchy
94fm

Thank you for your interest in our station and if you're ever in Savannah, please come visit our brand new facilities at 245 Alfred Street of Highway 80 on the west side of Savannah.

The Business Leader

October 17, 1990

Kermit Geary
1266 Riverview Drive
Walnutport, PA 18088

Dear Mr. Geary,

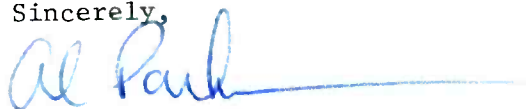

This is confirmation of your reception of our AM station, WBNM, on 1120 kiloHertz on Friday, September 21, 1990, at 7:42 p. m. We have just recently changed call letters from WYGO. You must have heard a disk jockey make a mistake using the old call letters.

Our AM used to be WYGO, simulcasting 100% with WYGO-FM. On September 3, 1990, we changed to WBNM and began broadcasting the Business Radio Network.

As for our power, we are 10,000 watts during daylight hours and we reduce to 2,500 watts during critical hours. Our sign-off time in September was 7:45 p. m., so you picked us up just moments before signing off, at which time our power was 2,500 watts.

Thank you for your letter. It is nice to hear from listeners, especially those as far away as yourself!

Sincerely,

Al Parker

Albany, Georgia

MR. KERMIT GEARY
R. F. D. #2,
WALNUTPORT, PA.

1, MAR. 53.

Dear Sir:

We are happy to confirm your reception of our station during our frequency check broadcast on 22, Feb., 1953., and thank you for the exceptionally nice report.

WJAZ uses a Gates 250 C-1 Transmitter, with two type 810 triodes as power amplifiers and two more 810's as plate (high level) modulators. The antenna consists of a single (non directional) "windcharger" tower, 230 feet high, with the ground elevation here being 205 feet above sea level. The ground is part red clay and part sandy loam with a conductivity of 4×10^{-14} e.m.u.

The terrain around Albany consists largely of rolling foothills, with farming, cattle raising, pecans, lumber milling and naval stores being principal occupations and products of the area. Albany itself is a rapidly growing modern city of approximately 33,000 and has two other radio stations. WJAZ has its application on file for a T-V construction permit, however this is being contested by another station applying for the same channel.

Your report appreciated and much continued pleasure and success to you in your D-X'ing.

Yours Sincerely
James W. McGehee

Walnutport, Pa. 18088

Dear Kermit,

This will verify your reception of the WPPI test on January 13, 1996 from 5:00 to 5:01 a.m., Eastern standard time. Although you only heard the test for a short period, there is no doubt you heard us.

WPPI operates with 500 watts non directional power from 6:00 a.m. to 9:00 p.m. Monday through Friday, 6:00 a.m. to 6:00 p.m. Saturday, and 7:00 a.m. to 6:00 p.m. on Sunday. Weekday programming consists of oldies, except for The Ludlow Porch (Talk) show 9:00 a.m. to 12:00 p.m., and black gospel 7:00 p.m. to 9:00 p.m. sign off. On Saturdays, we program oldies 6:00 a.m. to 1:00 p.m. (This is my shift) and black gospel till 6:00 p.m. sign off. On Sundays, we program Southern gospel 7:00 a.m. to 12:00 p.m., and oldies till our 6:00 p.m. sign off.

It is always interesting to see just how far out this thing can go; so far on this test we have gotten reports from Pennsylvania, Missouri, Tennessee, and Louisiana. We have been heard as far north as Connecticut and Wisconsin and as far west as Iowa on previous tests.

I want to thank you for your report and your interest in the test. It makes it worthwhile to come in early for this kind of thing.

Wishing you continued success in DXing, I am

Very truly yours,

Bill Alisauskas

WALB

ALBANY, GEORGIA

October 29, 1943

Mr. Kermit Geary
R.F.D. # 2,
Walnutport,
Pennsylvania

Dear Sir:

Your reception of WALB as indicated in your report was correct according to our schedule for October 26. However it must have been due to freak conditions as we have never received a report from that area prior to October 26, 1943 on which date we received your report along with one from Point Pleasant, West Virginia. The strange thing about your report is that at 6:00 PM CWT we changed over from a non-directional antenna to a directional array which shoots most of our signal toward the South, and according to Hoyle you should not have been able to hear us at all, instead of the signal dropping off as slightly as you indicated. As you probably know radio waves sometimes do strange things.

Our transmitter is a Collins model 20K feeding one 193 foot vertical tower when non-directional and feeding two 193 foot towers when directional.

We appreciate your report and would appreciate any other reports which you may be able to send us.

Yours truly,

DeForest T. Layton Jr.
Chief Engineer

DEAR MR. GEARY:

THANK YOU SO MUCH FOR YOUR LETTER OF JANUARY 27, 1936, IN REFERENCE TO YOUR RECEPTION OF OUR NIGHT OWL CLUB PROGRAM ON SUNDAY, JANUARY 26, 1936 FROM 1:00 TO 1:30 AM, EST.

PLEASE ACCEPT THIS LETTER AS CONFIRMATION OF YOUR RECEPTION OF THE PROGRAM WATL BROADCAST AT THAT TIME. YOUR LOG OF THE MUSICAL SELECTIONS PLAYED WAS CORRECT IN EVERY DETAIL.

THIS STATION IS PLANNING TO HAVE A MIDNIGHT 'TILL DAWN PROGRAM EVERY SATURDAY NIGHT, THE FIRST ONE TO BE GIVEN TOMORROW NIGHT, FEBRUARY 1ST. WE WOULD APPRECIATE IT VERY MUCH IF YOU WOULD LISTEN IN AND LET US KNOW HOW THE PROGRAM SOUNDS.

THANKING YOU AGAIN FOR YOUR LETTER, AND ASSURING YOU THAT WE WILL BE VERY GLAD TO VERIFY YOUR RECEPTION OF ANY OF OUR FUTURE PROGRAMS, WE REMAIN

Dear Sir:-

We received your letter regarding our program on the last frequency check and thank you very much for your kindness and interest in reporting same to us. This confirms your reception of this station and we are certainly glad to know that we are getting out as well as your report indicates. We are using an RCA 250K transmitter with 250 watts input, antenna is a 190 ft vertical. All equipment is RCA with exception being the Western Electric mikes. If you are interested in seeing some pictures of the layout here regarding programs both in studio and remotes, you can find two pages in the April 27th edition of Life magazine. Thank you again for your report, I remain

Dear Sir:

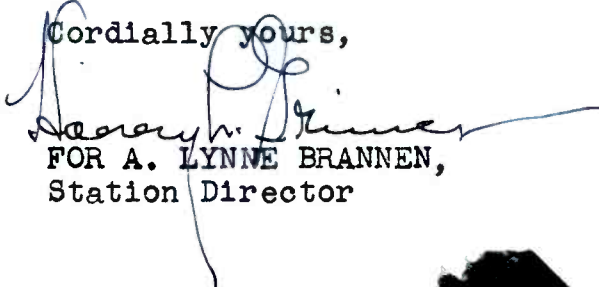

Thank you for your very interesting letter of the 23rd, reporting most completely on reception of our Alarm Clock Program of last Sunday morning. Of course, your report is verified.

The technical information given is appreciated by our engineers and operators, and your letter is, in fact, probably the most interesting we have received from a great distance.

We shall greet you on the air next Sunday Morning, and hope you'll be listening. Incidentally, the Announcer you will hear will be Mr. Brannen...owner, operator, chief engineer and Director of WGAU. The pianist will be the writer of this letter.

Thanks again, and we hope you'll tune in often.

Cordially yours,

FOR A. LYNNE BRANNEN,
Station Director

Walnutport, Penn.

Dear Mr. Geary:

We take pleasure in verifying your report on reception of our signals, during our recent frequency check program, of February 6. Your report checks perfectly with our logs.

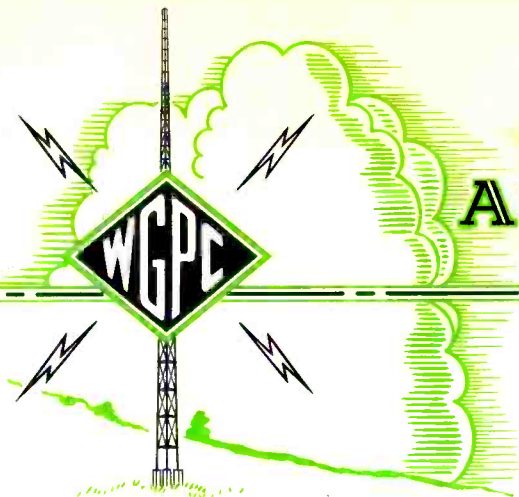

I was somewhat surprised upon hearing that we were putting such an excellent signal toward Penn. We received many reports from the north and north east, but none of them gave us such a nice report. However, you are using an excellent receiver, and you probably have an ideal receiving location. There is also a possibility that you were in the path of strong sky wave.

Perhaps you would like to know what kind of set-up we have down here. It is a complete RCA installation, put in only about six months ago. The transmitter is an RCA 250-K, the console is an RCA 76-B1, and the modulation and frequency monitors are RCA's. The tower is a 306 foot self-supporting vertical.

Wishing you the best of DX, and thanking you again for the fine report, I remain

Sincerely Yours,

George Fariss

Dear Mr. Geary:

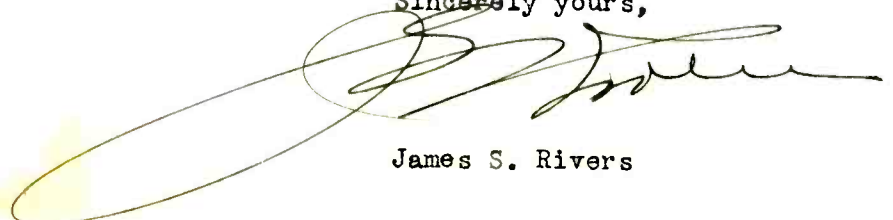

We appreciate your report covering our frequency test of December 4. We have received quite a number of such reports from different parts of the country. You might be interested in having information pertaining to our city.

Cordele is in Crisp County, which is located in the center of the peanut, cotton and pecan producing section of the State of Georgia. Station WMJM receives it's power from the 1st county owned Hydro-electric power plant in the world.....The Crisp County Power Commission. The City of Cordele is on the U. S. Highway No. 41, which extends from the Canadian border to the tip of the State of Florida. Cordele is situated in such a manner that it is ideal for all types of business and manufacturing enterprises. There are 3 railway outlets and 2 bus lines. Cordele has a population of more than 8,000.

Trusting that someday in the near future, you will be able to pay us a visit.

Kindest regards and best wishes, I remain,

Sincerely yours,

James S. Rivers

Dear Kermit,

Thank you for your reception report of WNEG, Toccoa, Georgia on December 7, 1985! Please pardon my delay in getting back to you but with the Christmas rush we've been extremely busy!

No doubt you were tuned to WNEG! The station announcer on the tape was Angela Austin and she got a real kick out of hearing the recording!

We are a daytime only station with a constant sign on time of 6:00 AM local time with no presunrise power limitation. We use a Gates BC-500 transmitter with a power of 500 watts. It's about 12 years old but it still does a super job.

Toccoa, Georgia is located in the northeast corner of the state about 8 miles from the South Carolina line and 35 miles from North Carolina. We also operate a TV Station (Channel 32) in conjunction with the radio station.

If you're ever in the Toccoa area, stop by and visit with us. Thanks again for your reception report which we are happy to confirm!

Sincerely,

Roy E. Gaines, Gen Mgr
