ELECTRONICS
Member ABC and ABP

Vol. 27, No. 6A

Published monthly with an additional issue in June by McGraw-Hill Publishing Company, Inc., James H. McGraw (1860-1948), Founder. Publication Office, 99-129 North Broadway, Albany 1, N. Y.

Executive, Editorial and Advertising Offices: McGraw-Hill Building, 330 W. 42 St., New York 36, N. Y. Donald C. McGraw, President; Willard Chevalier, Executive Vice-President; Joseph A. Gerardi, Vice-President and Treasurer; John J. Cooke, Secretary; Paul Montgomery, Executive Vice-President Publication Division; Ralph B. Smith, Vice-President and Editorial Director; Nelson Bond, Vice-President and Director of Advertising; J. E. Blackburn, Jr., Vice-President and Director of Circulation.

Subscriptions: Address correspondence to Electronics—Subscription Service, 99-129 N. Broadway, Albany 1, N. Y., or 330 W. 42nd St., New York 36, N. Y. Allow one month for change of address. Subscriptions are solicited only from persons engaged in theory, research, design, production, maintenance and use of electronic and industrial control components, parts and end products. Position and company connection must be indicated on subscription orders.

Single copies 75¢ for United States and possessions, and Canada; \$1.50 for Latin America; \$2.00 for all other foreign countries. Buyers' Guide \$3.00. Subscription rates: United States and possessions, \$6.00 a year; \$9.00 for two years. Canada, \$10.00 a year; \$16.00 for two years. Other western hemisphere countries, \$15.00 a year; \$25.00 for two years. All other countries \$20.00 a year; \$30.00 for two years. Entered as second class matter August 29, 1936, at the Post Office at Albany, N. Y., under act of Mar. 3, 1879. Printed in U.S.A. Copyright 1954 by McGraw-Hill Publishing Co., Inc.—All Rights Reserved. BRANCH OFFICES: 520 North Michigan Avenue, Chicago 11, Ill.; 68 Post Street, San Francisco 4; McGraw-Hill House, London, E.C. 4; Washington, D. C. 4; Philadelphia 3; Cleveland 15; Detroit 26; St. Louis 8; Boston 16; 1321 Rhoades-Avery Bldg., Atlanta 3, Ga.; 1111 Wilshire Blvd., Los Angeles 17; 738-9 Oliver Building, Pittsburgh 22. ELECTRONICS is indexed regularly in The Engineering Index.

GENERAL ELECTRIC

**ELECTRONIC COMPONENTS, EQUIPMENT AND ALLIED PRODUCTS
FOR ALL COMMUNICATION AND INDUSTRIAL APPLICATIONS**

General Electric has been building high-quality electronic components and equipments for many years. Both are available not only for communication use and radar, but also for industrial electronic applications such as high-frequency heating, controls, etc.

Each component line manufactured by General Electric is backed up by our capable design engineers, finest manufacturing facilities, and renowned development and research laboratories. Components and equipments listed below are merely representative of the complete line. For further information, please get in touch with the nearest General Electric Sales Office.

FOR INFORMATION ON G-E APPARATUS PRODUCTS LISTED IN THE DIRECTORY SECTION BUT NOT SHOWN ABOVE, PLEASE TURN TO PAGE 12

CAPACITORS

STANDARD COMMERCIAL TYPES Fixed Paper-dielectric Capacitors

A-c/d-c dual-rated Pyranol* capacitors for motors, controls, electronic equipments, and other applications will reduce inventories, simplify design problems, and increase standardization. Capacitors in the voltage ranges 236 through 660 volts, a-c, and 400 through 1500 volts, d-c, are now dual-rated and can be used for either a-c or d-c applications. Other a-c and d-c ratings available: 0.01 to 75 mu f, 236 to 660 volts, a-c, and 100 to 100,000 volts, d-c.

Write for Bulletin GEC-809.

G-E CAPACITORS TO MEET MIL-C-25A SPECS 100 to 12,500 Volts, D-c—0.01 to 15 Microfarads

These fixed paper-dielectric capacitors are designed to meet the rigid requirements of the joint Army-Navy specifications for use in electronic equipment for the armed forces. Hermetically sealed in metallic containers, these capacitors for d-c applications are available in Characteristics E and F and in case styles CP-53, -54, -61, -63, -67, -69, and -70. In addition to regular applications, these units may also be used at higher temperatures, higher voltages for short-life applications, and with a-c voltages. Write for Bulletin GEC-810.

*Registered trade-mark of General Electric Co.

CAPACITORS

G-E DRAWN-OVAL CAPACITORS (DUAL A-C, D-C RATED) 330 A-c/600 D-c to 660 A/c

1500 D-c Volts, 1 to 10 Microfarads

These are dual-rated a-c/d-c capacitors in drawn seamless containers. They are designed to supersede present rectangular case types (shown left with smaller drawn-oval units). Drawn-oval capacitors are smaller, lighter, mechanically stronger, use less critical material, and cost 10 to 20 per cent less than standard fixed paper-dielectric capacitors. Write for Bulletin GEA-5777.

G-E TANTALYTIC CAPACITORS

The Tantalitic capacitor was developed to fit certain direct-current, low-voltage applications where aluminum electrolytics and paper capacitors have not proven entirely satisfactory, and is suggested for applications where superior performance and small size are the major factors.

The Tantalitic capacitor is a foil-type, tantalum-electrode, electrolytic unit, similar in construction to an aluminum electrolytic capacitor, but, because of the characteristics of tantalum foil and the electrolyte employed, is smaller in size. The Tantalitic capacitor has lower leakage currents, longer shelf life, and a wider range of temperature operation (-55°C to $+85^{\circ}\text{C}$), without derating, than the conventional aluminum electrolytic capacitor. Tantalitic capacitors, in a wide range of ratings, are currently being used in telephone equipment and military communication and electronic equipment.

Write for Bulletin GEC-808.

MICRO-MINIATURE TANTALYTIC CAPACITORS

Designed for low-voltage, applications where superior characteristics and size are important. Applications: In miniaturized assemblies with transistors: In hearing aids, and military applications employing transistors.

ENERGY STORAGE

These d-c Pyranol* capacitors for phototube and similar light-duty energy-storage applications are the result of years of experience in the design and manufacture of capacitors for this type of service. They are relatively lightweight, small, stable capacitors having a life consistent with the application involved. Write for Bulletin GEA-4646.

SUBMINIATURE METAL-CLAD TUBULAR CAPACITORS

Subminiature metal-clad tubular capacitors are available with Permafil solid dielectric for operation from -55°C to $+125^{\circ}\text{C}$, or with Pyranol* liquid dielectric for operation from -55°C to $+85^{\circ}\text{C}$, without derating. Silicone end seals of all welded construction provide maximum resistance to thermal and physical shock and permit soldering up to the bushing without danger of seal damage. Butt welded leads can be supplied either axially or at right angles. Permafil units combine small

size and no liquid leakage with high insulation resistance and ability to withstand extreme temperature cycling. Pyranol units are 20 per cent smaller than comparable oil-filled capacitors. Both types meet performance requirements of MIL-C-25A and can be supplied in standard case sizes in either tab or extended foil designs. Ratings range from .001 to 1.0 uf in voltages of 100, 200, 300, 400, and 600 d-c working. Write for Bulletin GEC-987.

* Registered trade-mark of General Electric Co.

HFP CAPACITORS

These high-frequency, liquid-filled, parallel-plate capacitors are specifically designed for use in the resonant circuit of high-frequency electronic oscillators, such as those used in electronic-heater applications. They may be operated at relatively high voltages and will carry heavy currents continuously at frequencies of 50 kilocycles to several megacycles. Write for Bulletin GEA-4365.

CAPACITORS

PERMAFIL CAPACITORS: Permafil high-temperature capacitors are designed to meet the performance requirements of MIL-C-25A Characteristic K capacitors, and are suitable for operation in ambient temperatures from -55 to +125 C at full rated voltage.

Permafil, used as the impregnant instead of mineral oil, is a solid resinous material having excellent electrical characteristics over a wide temperature range. Since it is a compound, the processing and manufacture of Permafil capacitors can be controlled to exacting specifications and results in units that are reliable at elevated temperatures. Because the impregnant is solid, it obviates possibilities of leaks. Write for Bulletin GEC-811.

PULSE-FORMING NETWORKS

These capacitor pulse-forming networks, Type E, are for applications in radar and industrial equipment where the normal (exponential) capacitor discharge shape is not suitable and where an impulse having a definite energy content and duration is required. Write for Bulletin GEA-4996.

| Ratings | D-c Voltage | Mu f |
|---------------|-------------|--------------------|
| Case Style 53 | 400 | .05 to 1 |
| Case Style 61 | 400 | .10 to 1 |
| Case Style 61 | 400 | .05-.05 to .50-.50 |

SPECIALTY TRANSFORMERS FOR ELECTRONIC EQUIPMENT

HERMETICALLY SEALED: A complete line of hermetic transformers in 11 standardized case sizes was specifically designed to meet the performance requirements of the government MIL-T-27 specifications. These units, featuring drawn-steel cases and silicone bushings, are the most dependable, leakproof transformers it is possible to provide and can be used on a wide range of applications.

CAST PERMAFIL: The most recent member of the General Electric line of electronic transformers is the "hermetically sealed" group of units called cast permafils. Core-and-coil assemblies of these transformers are completely immersed in a solventless resin, which when "set", provides a tough, shatter-resistant solid structure. They are also approximately 20 per cent smaller and lighter than metal-clad, hermetically sealed units of comparable ratings.

Cast-permafil transformers, which are formed in MIL-T-27 case sizes, offer the protection of metal-clad, hermetically sealed units, yet have no metal cases. Consequently, there is no danger of case puncture and resultant moisture contamination.

CORE-AND-COIL: Usually applied where moisture resistance is not an important factor, and where size and weight must be kept to a minimum. Composed of automatically wound coils imposed on finest-grade silicon-steel core laminations, they are of the same uniform high quality as our encased transformers. Made to exacting tolerances to provide excellent electrical characteristics. Terminal boards top- or bottom-mounted, or with leads, and with mounting studs or brackets to meet special requirements.

PERMAFIL TYPE: For electronic applications. They utilize a special core-and-coil construction which permits size and weight advantage comparable to and, in many instances, better than conventional core-and-coil unit. Protected by a tough coating of Permafil (a synthetic resin developed by G.E.) which makes them highly moisture resistant. Particularly adaptable to aircraft use where size and weight requirements are extremely critical.

AIRCRAFT TRANSFORMERS

General Electric manufactures a complete line of standard 400-cycle aircraft transformers which includes general-purpose transformers, phase-changing transformers, high-temperature silicone transformers, ballasts for fluorescent lamps, ignition transformers for cabin heaters, de-icers, and jet engines. General Electric builds transformers to individual specifications, both military and commercial.

GOOSENECK FILAMENT TRANSFORMERS

Are used as components of radio and television transmitter equipment, and allied devices which require high operating voltages above ground. Construction type shown in the photograph permits a substantial reduction in size and weight—critical factors in many installations. A cost saving is also effected over similar ratings of enclosed-type construction.

COMPOUND FILLED

Particularly suitable for applications where moisture or humidity is excessive. For such applications, they are far superior to core-and-coil units. If immersion-proof unit is not required, they are more economical than hermetically sealed transformers. They

have wide application in the electronics field, such as in frequency-modulation, carrier-current, and speech-input equipment. An especially useful feature is the universal mounting—the units can be top- or bottom-mounted for open or underdeck wiring.

CONTROL, MACHINE-TOOL, AND SIGNAL TRANSFORMERS

Designed in standard sizes from 0.0075 to 0.200 kva to supply low-voltage circuits for most economical operation of numerous industrial, commercial, and household equipments. A complete standard line of normal reactance, high-reactance, and warp-stop transformers is available to meet most applications. However, special units built from standard parts can be designed for special applications.

A complete line of transformers is available for specific use with machine tools. Designed so that 23 ratings will meet requirements of most foreign, as well as unusual domestic, applications. These units have front-mounted terminal boards and built-in circuit protection.

VOLTAGE REGULATORS

AUTOMATIC VOLTAGE STABILIZERS:

For equipment that requires stable a-c input or for stable output of 115 and/or 230 volts in sizes from 15 to 5000 va, standard G-E stabilizers can be used to cut costs, save space.

With rated load at unity power factor, they maintain output within $\pm 1\%$ for line variations of 95 to 130 or 190 to 260 volts. Quiet, automatic, they provide quick recovery when subject to simultaneous line and load variations, and voltage surges.

Special designs can be furnished in ratings in excess of 5000 va, or with special voltages, if desired.

If your product is composed of one of the following items, it will pay you to investigate stabilizers: television and radio equipment; telephonic apparatus; sound equipment; lighting circuits; photometers; x-ray equipment; rectifiers (full wave); electrochemical apparatus; test equipment; and precision processes; photographic equipment; electronic circuits; calibration devices; color comparators. Write for Bulletin GEA-5754.

INDUCTROLS (Hand or Automatic)

For industrial and electronic applications where voltage or current is to be maintained within very narrow limits or where a source of smoothly variable voltage or current is required, G.E. has developed a complete line of low-voltage, dry-type, induction voltage regulators known as Inductrols. There is a choice of hand operation, manually controlled motor operation, or automatic operation. Inductrols are available for regulation up to 200% raise and 100% lower as tabulated below. Write for Bulletin GEC-795.

SATURABLE REACTORS

Their features are: 1. provide control in an a-c circuit by means of a direct current. 2. provide a wide range of control with smooth adjustment over entire range. 3. d-c control power required is small, obtainable from any reasonable combination of available current and voltage. 4. very efficient, even at light loads. 5. voltage drop in reactor at full saturation is small, permitting 93% or more of the voltage to be applied to load. 6. compact, sturdy, no moving parts. 7. control power readily obtained from inexpensive rectifier. 8. conveniently installed in least crowded part of the building for remote control operation. 9. provide a means of insulating the d-c control from the a-c circuit. These units are for use as control devices for numerous automatic and manual control applications.

 † This rating is for 60-cycle service only. Rated for intermittent (1-hr) service.
 ‡ 200% raise, 100% lower regulation.
 § Connectable for either 120- or 240-volt service.

AMPLISTAT
Magnetic Amplifier

This amplistat is a complete d-c to d-c magnetic amplifier of the self-saturating type. It is complete with reactors and rectifiers mounted in a metal enclosure on a standard base. The plug feature permits convenience of connection and ease of removal for testing the rest of the circuit. Features include: High Gain—Isolation—Input windings galvanically isolated from output. Reliable—Rugged construction, little, if any, maintenance. Static—No moving parts. No warm-up time—Has no tubes. Compact—Fits easily on control panels and chassis.

Application: This amplistat is a complete packaged d-c amplifier applicable to a wide range of control and instrumentation purposes. The following are a few of the many possible combinations of SIGNAL SOURCES (Thermocouples, Strain Gages, Thermistors, Photocells, Phototube amplifiers, Bismuth-wire magnetic-field sensitive resistors, Shunts, Resistance-type temperature bulbs, other Amplistats) with CONTROLLED DEVICES (Relays, Solenoids, Small-motor fields, Generators, Amplidyne fields, Power Rectifiers, Lamps, Heating elements, other Amplistats).

ELECTRONIC AMPLIDYNE: An extremely responsive amplifier combined with a motor amplidyne set, useful in many types of motor control where precise regulation of current, voltage and speed is necessary or desirable.

APPLICATION—Control speed, limit loads, hold tension, speed up acceleration, position precisely, assure quick stopping. Readily adaptable to programming and processing control.
RATED—As a regulated adjustable-voltage power supply for d-c motors up to 1½ hp. As regulated exciter for large adjustable-voltage drives up to 200 hp. The unit has an output of 1½ kw, 250 volts. Can be arranged for use on 220- or 440-volt, 3-phase, 60-cycle power supply.

The G-E electronic amplidyne is applied as a part of a complete control system. Write for Bulletin GEA-4889A.

HIGH-VOLTAGE COMPONENTS

High-Voltage Radar Transformers and Reactors (Oil-Filled)

SELENIUM POWER SUPPLIES:

These hermetically sealed d-c power supply units employ selenium rectifier stacks. They are suitable for supplying the high potential necessary for cathode-ray tubes, television camera tubes, radar-indicator scopes, electron microscopes and other applications where low regulation, light weight, and small size are primary considerations. Illustrated is a unit rated 7000 volts, 0.1 ma or .35 ma d-c. It is designed for 215 volts, 2000 to 20,000 cycles a-c input. An additional pair of terminals, supplying 45 volts a-c when 215 volts are applied to the input terminals, makes the unit especially suitable for use in the tank circuit of an audio-oscillator.

PULSE TRANSFORMERS—Oil-filled, Hermetically Sealed:

Oil-filled, hermetically sealed pulse transformers in peak voltage ratings of from 10 to 100 kv or higher and in peak power ratings up to 30,000 KW or more are now available for use with either hard-tube or line-type modulators.

These compact units, designed for operation on pulse durations ranging from 0.1 to 20 microseconds—normally for a duty cycle of 0.001—are ideal for such applications as pulse voltage step-up or -down, impedance matching, phase reversing or non-reversing, isolating load from source. The pulse transformers also permit measurement of plate current of transmitter tubes.

RESONANT REACTORS—Oil-filled, Hermetically Sealed: Precision reactors are required for resonant-charging, line-type, radar modulator circuits. They are designed to operate at full d-c load with an a-c current superimposed and insulated to withstand test voltages of two times normal operating voltage. Currently available in peak operating voltage ratings from 5 to 50 kv and current rating up to 3.0 amperes, these sturdy units have a wide range of inductance ratings from 0.25 to 300 henrys which remain constant within 5% from full to 50% full load current.

FILAMENT TRANSFORMERS: Oil-filled filament transformers for special applications or for use with any of the standard high-voltage rectifier tubes. These compact units can be provided with or without tube socket mounted integral with the high-voltage terminal. Illustrated is a hermetically sealed, low-capacitance filament transformer rated 5 volts, 11 amperes, and insulated for 18-kv operation.

FRACTIONAL-HORSEPOWER MOTORS

Synchronous Induction Motors: High torque at slow synchronous speed for remote control devices, indicating instruments, timing devices, etc. For low-inertia applications requiring rapid changes in rotation. Synchronous speed: 75 rpm, 75 oz. in. torque. Motor starts, stops, reverses, within 1/2 cycle of power supply. Smaller size delivers 2 oz.-in. at 100 rpm.

Output: up to 660 V., 165 watts, 5 min. on, 15 min. off duty cycle.

Permanent-Magnet Motors: New permanent-magnet, totally enclosed, shunt motors for aircraft operation (very high ambients), blower, actuator, tuner and other applications. Can be dynamically braked by shorting armature terminals and reversed by use of relays. Explosion-proof, shock-resistant. 0.01 hp, 10,000 rpm, 27.5 V. input, 130 rpm with gear reduction. With radio interference filter.

Taxi Dynamotors: Compact, lightweight units convert low-voltage d-c power to high-voltage d-c for mobile radio transmitters in taxis, police cars, trucks, buses, railroads, fire departments, forestry radio transmitters, etc. Input: 6-28

HERMETICALLY SEALED RECTIFIER EQUIPMENTS

Typical of the rectifier equipments now being offered for military and commercial use. Unit on right, rated 3 kv, .068 amp, d-c output, contains a plate transformer, filament transformer, and resonant charging reactor in the same tank, (dimen. are only 6 3/4 x 5 1/4 x 9 in.). Unit on left is a large three-phase full-wave rectifier rated 12 kv, 0.72 amp, d-c output. Lower tank section contains a three-phase plate transformer, filament transformer, and filter reactor. Upper enclosure houses the rectifier tubes and auxiliary equipment.

CASCADE-TYPE RECTIFIERS

In laboratory or factory testing and power-supply applications where smooth high d-c voltages are required, cascade connections of from one to four conventional 35-kv, 32-ma rectifiers can be furnished for single-phase operation from 115—230-v, 50- and 60-cycle power supply. Output-voltage ripple peak to peak not to exceed 0.1% per ma. Control panel furnished which provides smooth output-voltage control over complete range from zero to max. Panel also contains overload relays and meters to indicate output voltage and current and filament voltage.

SWITCHBOARD COMPONENTS

PANEL INSTRUMENTS: 3 1/2-inch Types:

General-purpose, small panel instruments for use in radio and communications equipment where compactness (particularly minimum depth behind the panel) is essential. Internal-pivot design construction with pivots solidly mounted to the inside of the shell moving coil. Element assembly is a self-contained unit supported by a high-coercive fabricated magnet. A strong, compact instrument with fast response and excellent damping. Available

in a variety of ratings, in round and square cases: Type DO-71 voltmeters, ammeters, milliammeters, and microammeters for measuring d-c voltage and current; Type AO-72 voltmeters, ammeters, and milliammeters for measuring a-c voltage and current.

2 1/2-inch Types: Same construction and appearance design as the 3 1/2-inch types. Type DW-71 for d-c measurements: ammeters (1 to 30 amp), milliammeters (1 to 500 ma), microammeters (50 to 500 ua), and voltmeters (1 v to 300 v). Write for Bulletin GEC-368.

4 1/2-inch Types: Internal construction similar to 2 1/2-in. and 3 1/2-in. types. Rectangular case 4 21/32 in. long and 4 1/16 in. high. D-c, Type DO-78, scale length 3 1/2 in., and a-c, Type AO-58, scale length 3 in. Ratings available similar to 3 1/2-in. DO-71 instruments.

| D-C, TYPES DW-71, DO-71, AND DO-78 | | | A-C, TYPES AO-72 AND AO-58 | | |
|------------------------------------|--------------|----------------------------|----------------------------|--------------|----------------------------|
| Type | Rating Range | Approx. Resist. Range Ohms | Type | Rating Range | Approx. Resist. Range Ohms |
| Ammeter | 1 to 50 amp | 0.001 to .05 | Ammeter | 1 to 100 amp | 0.00031 to .138 |
| Milliammeter | 1 to 500 ma | 0.10 to .68 | Milliammeter | 10 to 500 ma | 0.43 to 1060 |
| Microammeter | 20 to 500 ua | 70 to 2030 | Voltmeter | 1 to 500 v | 2 to 100,000 |
| Voltmeter | 1 to 500 v | 1000 to 500,000 | | | |
| Kilovoltmeter | 1 to 5 kv | 1,000,000 to 5,000,000 | | | |

OPERATING TIME METER—Type KT:

Type KT time meters provide an accurate, inexpensive method of measuring the life of electron tubes, record to operating time of the machines or devices to which they are connected. They are available in three forms: for panel switchboard mounting, portable, and conduit mounting. They also can be furnished to measure operating time in hours, tenths of hours, or minutes. These time meters are designed for applications including electron-tube life tests, punch presses, mo-

ing machines, etc. For use on 60-, 50-, or 25-cycle a-c circuits. Voltage rating is from 115 to 460 volts for the three available forms of the meter. Write for Bulletin GEC-472.

GENERAL PURPOSE, AUTOMATIC TIME SWITCH—Type T-27

One of the most versatile of all G-E time switches, the T-27 can control one to three circuits for as many as 10 ON-OFF operations per day. Can be furnished with omitting device to skip a day or more, and with astronomic dial for dusk-dawn operation. Powered by the famous Telechron* motor, the T-27 is available for 25-, 50-, or 60-cycle operation and from 115 to 460 volts. Contacts are rated 35 amperes at 230 volts. Dimensions are 10 3/4 by 5 3/8 by 4 7/8 inches. Write for Bulletin GEA-535.

*Registered trade-mark of General Electric Co.

LONG-SCALE SWITCHBOARD INSTRUMENTS

Accuracy ±1%

VOLTMETERS • AMMETERS • WATTMETERS

Types AB-18(a-c) and DB-18(d-c)
Size: 4 1/4" by 4 1/4"

Long-scale, compact instruments intended for general switchboard service on large and small equipments. Excellent for control stations, test equipment, and other installation in limited space. 5 instruments can be mounted side-by-side on a 24-in. panel. Drawn-steel, dust-proof covers for semiflush mounting. New convex glass cover, with scale mounted flush with case front, reduces shadows to minimum and results in greater readability. Antiparallax scale and pointer, magnetic damping, and external zero adjusters.

General Electric switchboard instruments include voltmeters, ammeters, wattmeters, frequency meters, power-factor meters, varimeters, synchroscopes, temperature meters, and ground detectors. The above are available as standard instruments in all common ranges and can be furnished in many special ratings and constructions; for example, thermocouple types for measurement of h-f current or rectifier types for high-sensitivity a-c measurements. For a more complete listing and special applications write for Bulletin GEC-218 or contact local G-E Office.

Types AB-16(a-c) and DB-16(d-c)
Size: 8 3/4" by 8 3/4"

WATTMETERS: 25-125 cycle; Accuracy—±1%; Operating Principle—Electrodynamometer; Single-phase and Polyphase Types

VARMETERS: 3-phase, 3-wire; 2-phase, 3-wire; 2-phase, 4-wire; 3-phase, 4-wire; 5 amp; 120-208 v; 25 cycles to all commercial frequencies; Accuracy — ±1%; Operating Principle — Electrodynamometer with autotransformer.

FREQUENCY METERS: 120 v; 60 cycles; Accuracy—22.5-27.5 cy—0.08 cy, 45-55 cy—0.15 cy, 55-65 cy—0.15 cy, 40-65 cy—0.25, 20-90 cy—1.00 cy, 350-450 cy—1.50 cy; Operating Principle—Resonant-circuit.

POWER-FACTOR METERS: 3-wire, 3-phase, 25-125 cycles; 4-wire 3-phase, 25-125 cycles; 5 amp, 120-600 v; Accuracy—±.01 power factor for rated current, voltage and frequency; Operating Principle—Polarized-vane.

SYNCHROSCOPES: 25 cycles with external impedor; 50 and 60 cycles, self-contained; 120 v; 360° rotation; Operating Principle—Polarized-vane.

PORTABLE & RECORDING INSTRUMENTS

PHOTOELECTRIC RECORDER—Type CE: For special temperature measurements, developmental testing, high-speed recording, laboratory investigations, physiological research, and equipment tests. Provides direct ink records, and is ideal for any test where only a small amount of energy is available for the operation of the recorder. Sensitivities obtained as low as 1.0 microampere, full scale. Response periods as fast as 1/5 second. 4 different motor arrangements provide chart speeds from 1/2 inch per hour to 72 inches per minute. Write for Bulletin GEC-254.

INSULATION-RESISTANCE METER: An electronic instrument designed to measure insulation resistance over a range of 0 to 20,000 megohms. Measurements indicate poor insulating materials and materials contaminated by dirt or moisture. This instrument also makes possible the study of the effects of temperature and humidity on insulation. Consists of an electronic rectifier, a bridge circuit which contains Thyrite* resistance material, and an electronic-tube voltmeter, all in one enclosure. Meter is available in range of 5 to 20,000 megohms and has four scales. Over the range of 5 to 20,000 megohms, tests are made at a constant 500-volt d-c potential; and from 0 to 5 megohms at 0 to 250 volts. The meter is small, compact, portable — convenient for production and service testing, simple to operate. Write for Bulletin GEC-753.

*Registered trade-mark of General Electric Co.

CURRENT LIMITED HIGH-POTENTIAL TESTER: By limiting the output current to a maximum of 5 milliamperes, the tester effectively minimizes most of the hazards encountered with high-potential testing equipment. Features: output current limited to below the maximum current which an operator can let go; non-destructive testing; line surges virtually eliminated in output; indicates voltage on sample regardless of wave shape, internal voltage drop, or variation in line voltage; faults indicated by glow lamp on panel. Output voltage: 0.3500 volts.

RMS. Output current limited to less than 5 milliamperes when shipped. Maximum load for full output voltages: .005 mfd. Write for Bulletin GEC-700.

GAUSS METERS: Indicates flux density and direction of flux in magnet gaps. Used for measuring: Flux density in gaps of instrument magnets; of blocked d-c relays and breakers; of blocked rotor-generators or motors. Field gradient across air gaps. Direction and density of leakage flux emitted from perimeter of magnets. Flux density in iron portions of magnetic circuits. Strength and direction of stray fields of many permanent and electromagnets. Magnetic properties encountered in laboratory work. Available in ranges from 25 to 20000 gaussess.

INDICATING FLUXMETER: A convenient means for accurately measuring flux densities and total flux. Determines magnetic properties of permanent magnets and d-c electromagnets. Measures flux distribution in a magnet gap, leakage flux along sections of a permanent magnet or electromagnet.

THERMOCOUPLE VACUUM GAGE Measures pressures encountered in laboratory studies and in many manufacturing and chemical processes. Range of 1 to 200 microns of mercury for glass vacuum systems and from 1 to 500 microns of mercury for metal systems. Valuable for checking pressures for vacuum-tube evacuation, vacuum dehydration, and vacuum-heat treatment of metals, metalizing, and vacuum processing of vitamins. The thermocouple vacuum gage is sensitive to both condensable and noncondensable gases, and does not require recalibration when tubes are interchanged. Three different mountings are offered; portable-case style, relay-rack type, and panel type.

PORTABLE INDICATING INSTRUMENTS

A new line of instruments, functionally designed to give the greatest convenience and readability and using precision stabilized shunts and resistors to achieve sustained accuracy. These high-accuracy instruments are suitable for laboratory use as well as for field applications and production tests where high precision is essential.

Type DP-11: Designed for general testing where a dependable, easily read instrument with 1/2 of 1% accuracy is required. Ideal for trouble shooting and maintenance work where accurate readings must be taken under adverse lighting conditions. Size—7 3/8" x 7 7/8" x 3 1/4". Scale length—5.5 inches. Pointer—Knife edge with mirror scale. Damping—Magnetic. Zero Adjuster—External. Shielding—excellent shielding from stray magnetic fields.

Type DP-12: Specifications are similar to DP-11 above, except accuracy is to 1/4 of 1% full scale.

OSCILLOGRAPH — Type PM-18: Records 2, 3, or 4 rapidly or slowly changing currents and voltages simultaneously. Records steady-state phenomena, such as wave shape of alternating currents and voltages, and also transient phenomena of short duration when the quantity to be recorded can be initiated by the closing or opening of a synchronizing switch provided within the oscillograph.

The PM-18 is regularly furnished with a film-pack holder which produces 12 separate oscillograms, 2 1/4" wide by 3 1/4" long to record spot speeds up to 12,000 inches per second.

Three film holders available to meet almost every recording requirement. A Polaroid-Land film holder that will produce a picture in a minute is also available. Makes finished photographic records in about one minute and eliminates need of a darkroom. For those applications which require a longer record, a continuous drive paper holder is available. Write for Bulletin GEC-580A.

SELENIUM, GERMANIUM, and COPPER-OXIDE RECTIFIERS

General Electric manufactures selenium rectifiers for every type of electronic and industrial application. The G-E selenium cells are produced by a unique "evaporation" process which produces exceptionally good electrical characteristics.

LONG LIFE—Because of their low forward voltage drop and low backward leakage, G-E selenium stacks age less. They offer the design engineer a quality, non-expendable component which will last in service. The characteristics are uniform from stack to stack, assuring better performance of the end equipment.

STABILITY AND RELIABILITY are two other important features of G-E selenium rectifiers. They have excellent initial characteristics and do not deteriorate with time and use.

SIZES AND RATINGS are available to meet practically any re-

quirement. They have been used successfully from a few milliamperes at 500,000 volts to over 100,000 amperes at 9 volts. Whenever direct current is required their application should be considered. The three basic types of construction used in G-E selenium rectifiers are shown in the illustrations.

There are many electronic applications for selenium rectifiers. General Electric selenium rectifiers are ideal for voltage doubler circuits, voltage tripler circuits, clipping or slicing operations in electronic applications, or wherever rectification or d-c blocking is required. G-E miniature selenium rectifiers are used for blocking, electronic computer, magnetic amplifier, communication and signal circuits. Other applications include supplying power to operate d-c relays in control circuits and as components in electronic equipment.

STANDARD STACK CONSTRUCTION

Standard construction of a typical G-E selenium stack consists of cells mounted on a metal stud, separated by spacers and spring contacts. Any rectifier circuit or combination of circuits can be assembled in a single stack. Various mounting and screw-terminal connections are available.

Standard construction is such that the stack can withstand a high-potential test of 1500 volts to ground. However, if required, these stacks can be specially constructed to withstand 2500 volts or higher to ground. After assembly, the stack is dipped in a moisture and corrosion-resistant paint for protection.

In converting a-c to d-c power, they have the following advantages:

LONG LIFE—No replacement necessary over normal operating life of associated equipment.

REDUCED MAINTENANCE EXPENSE—No moving parts to wear out, no lubrication required.

TUBE-MOUNTED CONSTRUCTION

Phenolic tube construction is used when a less expensive and lighter-weight rectifier stack is desired. Good strength can be attained up to 10 cells on a single assembly.

In some cases, where a less expensive and lighter-weight construction is desired, the cells are mounted on a phenolic tube. This eliminates the metal mounting stud and end insulation washers. Because of the reduction in strength of such construction it is recommended that not more than 10 cells be mounted on one tube.

RECTIFIER FEATURES

LOW OPERATING COSTS—High rectifier efficiency.
SIMPLE INSTALLATION—Lightweight and compact.
INSTANTANEOUS OPERATION—No filament to heat.
FLEXIBILITY—Can be used wherever rectification or d-c blocking is required.

General Electric miniature selenium rectifier stacks are specifically designed for use in electronic circuits. To operate at high ambient temperatures, and from $-50C$ to $125C$, these small compact assemblies have stable electrical characteristics. Slow aging and long life is due to their low forward resistance and low reverse current.

APPLICATIONS include use in blocking, electronic, computer, signal, magnetic amplifier, communication, control circuits, and to operate small relays, solenoids, and precipitators.

Assembled from 3 sizes of small selenium cells: $5/32''$, $9/32''$, and $15/32''$ diam. rated 2 D-c MA, 8 D-c MA, and 25 D-c MA respectively at 26 v RMS. Special construction is available which utilizes a $3/32''$ diam. cell rated at 75 microamps at 26 v RMS.

Assembled without spacer washers in 2 types of totally enclosed casings. Textolite* tubes capped by metal ferrules are satisfactory for normal environmental operating conditions. To meet severe government environmental specifications, hermetically sealed, metal-clad casings are used for the miniature rectifier stacks.

May be used with half-wave rectifiers and in full-wave center-tap or bridge-connected circuits simply by using one rectifier stack for each circuit element. They may also be connected in parallel to obtain multiples of current ratings, or in series to obtain multiples of voltage ratings. Bridge assemblies are available if required.

*Registered trade-mark of General Electric Company.

MINIATURE

Miniature selenium rectifiers are available in standard ratings of 50 ma and below at 26 volts to 5200 volts RMS. Stacks are available either in Textolite* tubes or metal-clad casings to meet government specifications for environmental protection. Either lead or bracket mountings can be furnished.

COPPER-OXIDE RECTIFIER STACKS

These are five features of Copper-Oxide Rectifiers: no unforming • ability to withstand momentary current overloads • ability to withstand momentary voltage overloads • longest proven life of all existing metallic rectifiers • highest efficiency at low voltages.

The above features make them ideal for the following applications: Magnetizing (Copper-oxide rectifiers are especially suitable for certain types of magnetizing circuits which require the rectifier to withstand high current inrush and momentary voltage overload.) • Circuit breakers (Perhaps the most widespread use of copper-oxide rectifiers is in the field of circuit breaker operation. Here the unique characteristics of copper-oxide rectifiers are especially important.) • Blocking • Metering • Polarization relays • High-speed relays • Electroplating • Electrolytic reduction • Telephone and Telegraph equipment • Control contacts • Low-voltage, high-current power supplies • Testing equipment • High-voltage surge protectors • D-c welders.

INDUSTRIAL GERMANIUM RECTIFIERS

These new metallic rectifiers are of the broad-area type. Their rectifying properties are instantaneous since they do not require artificial forming. They may be operated at extremely high current densities with a large d-c output obtained from a very small germanium rectifier.

Lowest forward drop per ampere giving best regulation of existing metallic rectifiers • Highest output voltage per cell permitting use of fewer cells • Best current output, smallest size and lightest weight per watt output of existing metallic rectifiers. • High efficiency • No forming required • No

loss of rectification after remaining idle. The regulation is less than 6% when operated at the high current densities permissible with germanium. Usually, with most metallic rectifiers, it is between 15 and 20% at their normal current densities. They have a broad application in power conversion where size and weight requirements are at a premium.

Typical EB-5 board with short-circuit strips

Typical EB-6 board with hinged cover

TERMINAL BOARDS

For use where leads are brought to any part for permanent or temporary connection, especially if many wires are involved.

Type EB-5 are fabricated terminal boards. Each is equipped with the necessary washerhead binding screws for circuit-wire connections.

Type EB-6 are fabricated terminal boards of the same construction and dimensions as the

Type EB-5, except that clamp-type connectors are furnished. Boards will accommodate wire sizes from No. 18 to No. 10 inclusive. Where more than 12 poles are required for a particular application, combinations of the standard boards may be used. Write for Bulletin GEA-1497.

CONTROL and TRANSFER SWITCHES

Type SB-1 design is extremely flexible and can be applied to meet special requirements. Features include: square operating shaft with cams to provide positive contact operation; silver-to-silver contacts; better protection of live parts; compact design; ample space for connecting leads; choice of operating handles; permanent-finish Textolite* escutcheons; wide range of stages and contact positions, the number of circuits to be controlled determining the number of stages and contacts needed. Switches having up to 16 stages are commonly furnished. The maximum number of positions, or throws, is twelve.

Rating of Type SB-1 switches is 600 v, 20 amp continuous, 250 amps for 3 seconds. Interrupting rating depends upon voltage and character of circuit, as well as number of contacts in series. Write for Bulletin GEA-4746. *Registered trade-mark of General Electric Co.

CAST-GLASS BUSHINGS

In ratings up to the 15-kv power-transformer impulse level and for currents up to 800 amp, permit the successful design of hermetically sealed electric apparatus. Heat-proof, leak-proof, shockproof bushings for use in vital communication and commercial application where severe operating conditions are continually encountered. Available in a wide variety of sizes and shapes in both single- and multi-conductor designs, they offer the following advantages.

1. Attached directly to apparatus, making gaskets unnecessary and providing a hermetic seal. Designers may utilize all the advantages of present-day insulating materials without fear of reduced dielectric strength caused by the entrance of moisture. 2. Make possible design of more compact, lighter-weight apparatus at lower cost for airborne and other specialized equipment uses. 3. Thermal characteristics of the glass used have been co-ordinated with those of the metal parts which are directly sealed into the bushing to produce strain-free seals which are capable of withstanding thermal shocks far in excess of operating conditions.

CAM-OPERATED SELECTOR SWITCHES

These small, compact switches can be used to control from one to 20 circuits, in any operating sequence within the limit of 12 positions (30 degrees apart). The contact mechanism consists of one to 10 two-circuit G-E Switchettes. Snap-action, double-break contacts provide a high current rating and minimize arcing. Light weight, easy mounting, positive and reliable operation make this device ideal for aircraft application. Meets 50-hour salt-spray test in accordance with Spec. AN-QQ-S-91. Also available is a line of lightweight limit switches specially designed for aircraft and electronic applications.

INDICATING LAMPS

Types ET-5 and ET-6 offer high visibility, low wattage, and long life. Consist of telephone-type lamp with contacts mounted within an insulated tube and with a vitreous-enamel resistor for any standard voltage up to 660 v. For any panel

thickness up to 2 in. Color cap provides excellent vision from any angle. Available in 6 colors.

ULTRASONIC GENERATOR

For Cleaning Small Parts:

Quickly and thoroughly removes oil, grease, chips, dirt, lapping compounds, and other contaminants from surfaces, corners, and small holes of precision-built, irregularly shaped parts. Time, labor and floor space are saved.

Equipment comprises an electronic power unit (essentially a high-frequency oscillator) in a 45-inch-high cabinet. A transducer assembly with a quartz crystal is housed in a 4-inch round diameter well. Parts are cleaned in any suitable container placed in this well. Operated at 300 kc, 500 kc, 750 kc, or 1 mc. Power input is 500 W at 115 V, 50/60 cycles. Write for Bulletin GEA-6056.

AIR CIRCUIT BREAKER

Switching and better protection of power circuits is secured by using air circuit breakers. Type AK-1 breakers are available for switchboard mounting for use, for example, as main power-supply breaker in TV transmitters or are individually enclosed for isolated installations. Current ratings from 15 through 400 amperes up to 600 volts a-c and 250 volts d-c. See GEA-5915 for full details.

CONTROL ACCESSORIES

A-c or D-c SOLENOIDS, CR9503

Simplify complex installations: in direct or remote control requiring short powerful thrusts. Wide selection: 32 different sizes of solenoids of uniform construction are available for push- or pull-type operation and for use on a-c or d-c circuits up to and including 550 volts. Used to push or pull in a straight line, or to provide mechanical motion at a remote or inaccessible location. They may be operated remotely from a push-button station or automatically by limit switches, pressure switches, float switches, or other pilot circuit devices. Cut-out switches are available for use on d-c circuits. Write for Bulletin GEA-5163.

15-AMP. CONTACTOR, CR2810-1265

For small motors; this normally open, single-pole, single-throw contactor is small, self-contained, and inexpensive. The coil is of the layer-wound type, requires only a few watts of power, and is connected directly across the line. The connections are easily made: all terminals are in the top molded part. A form is available which includes a non-insulated interlock, permitting the use of a momentary-contact push button for operating the contactor; the combination provides under-voltage protection. Complete line of magnetic motor starters available.

| Type | 110 v | 220 v |
|----------|-------|-------|
| Open | 1/2 | 1/2 |
| Enclosed | 1/2 | 1 |

GENERAL PURPOSE RELAYS, CR2790E

Used to control pilot circuits in response to remote control switch or thermostat, or for direct control of small motors driving pumps, fans, etc., and as a FHP motor starter, or in conjunction with a magnetic switch controlling larger motors, and signal systems. Comes in open or in general purpose case. Explosion-proof and water-tight case available as kits. 3 contact arrangements available; double-pole, double-throw; double-pole, single-throw; single-pole, single-throw. Protection against hazard from restarts after power failures can be provided with the double-pole form when one pole is used as a holding interlock in the coil circuit together with a momentary-contact push-button station. Enclosed forms have convenient conduit entrances at top and bottom. Write for Bulletin GEC-257.

PUSH-BUTTON STATIONS

For control circuits of magnetic controllers designed for push-button control. Standard- and heavy-duty stations available which may consist of various combinations of momentary-contact buttons, maintaining-contact buttons, selector switches, and indicating lights, for surface or flush mounting. Standard-duty station recommended for use with contactors rated up to and including 150 amp. Write for Bulletins GEA-3469 (Standard Duty) and GEA-5043 (Heavy Duty).

OILTIGHT PUSH-BUTTON UNITS A new push-button unit with building-block construction. It provides flexibility to meet requirements for special units by simple combination of the basic elements, which consist of separable operators, a removable color ring for identification, and a basic contact block. Operators and contact blocks are furnished separately. Single, double, or tandem contact blocks are quickly and easily attached to any type of operator. Write for Bulletin GEA-5779.

G-E CALROD* SOLDERING IRONS

General Electric soldering irons are highly efficient for all work requiring soft soldering. Reserve-heat capacity of G-E irons makes them outstanding for continuous, high-speed production soldering.

FEATURES

- CALORIZED COPPER TIPS**
Durable, interchangeable, designed for extra-long life.
- Calorized coating retards corrosion and oxidation, prevents freezing of tips to tip holder—increases tip life.
- IRONCLAD COPPER TIPS**
Couple quick heat transfer of copper with long-wearing qualities of iron—for extra-long life.
- CALROD HEATING ELEMENTS**
Provide quick, dependable heating.
- STAINLESS-STEEL SHELL**
Provides high corrosion resistance and low heat loss.
- PLASTIC HANDLE**
Cool, easy to grip.
- CORD STRAIN INSULATOR**
Will withstand pull of 35 pounds.

* Registered trade-mark of General Electric Co.

MIDGET SOLDERING IRONS

Cat. No. 6A210
1/4 in. dia. tip

25 Watt - 6 Volt

Cat. No. 6A214
Midget Soldering Iron - 3/16 in. tip

Cat. No. 6A212 - 1/8 in. dia. tip

LIGHTWEIGHT INDUSTRIAL IRONS

Cat. No. 6A273
1/4 in. dia. chisel tip

60 Watt - 120 Volt

Cat. No. 6A283
3/16 in. dia. pyramid tip

INDUSTRIAL SOLDERING IRONS

75, 100, 110, 125 W.
115 or 230 V.

6A161 - 6A162 Series

6A200, 6A201, 6A202 Series
100, 200, 300 W. 115 or 230 V.

115-VOLT TRANSFORMERS

Specially designed, 115-volt transformers available as optional equipment in two types. Single-tap transformer Cat. No. 6A362,

for one soldering heat. Four-tap transformer, Cat. No. 6A364, gives wide range of heats for close temperature control of tips.

ELECTRONIC TIMER, CR7504-A142

For 60- and 50-cycle, 115- or 230-volt, a-c circuits. Three standard models, with selection from 0.06 to 120 seconds in ranges of 20:1. Relay may be connected to be normally energized or normally de-energized during the stand-by period; it is always de-energized during the timed period and energized after timing out. Extremely useful for timing operations of short duration or to provide automatic control for various stages of industrial processes. Repetitive accuracy:

±2% on all settings above 0.5 second.

The unit includes one standard vacuum tube and a magnetic relay with double-pole, double-throw contacts rated 10 amperes a-c at 230 volts. Time setting is adjustable by a potentiometer with dial which reads directly in seconds. Potentiometer and dial-plate assembly may be removed easily for remote counting, if desired. Write for Bulletin GEA-5255.

SELSYNS, CR9890

Indicating or control selsyns are a reliable, accurate, and rapid means of communication. They are used successfully in such applications as indicating the positions of valves, governors, bridges, turntables, dampers, etc. Selsyns have been very successful in servo systems where the selsyns operate to guide the action of the power units. Two types of selsyns are available—the high-accuracy type which has an accuracy of ± 1 degree and the general purpose type which has an accuracy as close as ± 5 degrees. Selection can be made from a variety of sizes suited for each application. A complete line of indicators and transmitters including selsyns is available. Write for Bulletin GEA-2176.

HERMETICALLY SEALED RELAY CR2791G

1-, 2-, 3-, and 4-pole, double-throw, 6-pole normally open 1 to 300 V, D-C, 5 AMP:

The G-E hermetically sealed relay operates in its own atmosphere, completely independent of conditions outside its rugged electro-tin plated, drawn-steel housing. During manufacture, the interior has been exhausted, vacuum baked to remove all moisture, filled with dry nitrogen to a pressure of one atmosphere and sealed. Thus, it always operates in the same clean, dry atmosphere, and at a constant pressure. Result, reliability of operation and extended service life. Operating mechanism is sealed and completely impervious. Used in the electrical systems and electronic equipment of military and civilian aircraft, in shipboard and portable land-based electronic equipment.

Ambient temp . . . -55 C to 125 C; Vibration . . . Withstands vibration from 10 up to 500 cps at 10 g with max. excursion of 0.060 in.; Shock . . . over 50 g; Mechanical damage . . . over 100 g; Terminals . . . Compression-glass header (solder hook or plug-in pins). Designed to meet or better all provisions of MIL-R-6106 (Joint Military Service Specifications for Relays) and AN3304, and performance requirements of MIL-R-757B. Glass reinforced Polyester compound for stack insulation provides greater dielectric strength and arc resistance plus superior impact strength—added life for the relay. Relay will withstand instantaneous voltage surges up to 1500 volts without failure. Write for Bulletin GEA-5729.

| Load Type | Normally Open Contacts | Normally Closed Contacts |
|-----------------------------------|------------------------|--------------------------|
| Resistive (28 v d.c.) | 5 amperes | 5 amperes |
| Resistive (115 v, 400 cycle A.C.) | 5 amperes | 5 amperes |
| Inductive | 1.5 amperes | 1.5 amperes |
| Motor | 1.5 amperes | 1.5 amperes |

RELAYS SUBMINIATURE RELAY

For electronic applications where high shock and vibration resistance, high speed, and low capacitance are essential. Ambient temperature range from -55 C to +200 C. Available with wide range of coil voltage for either DC or 400-cycle AC operation. Contacts single-pole, double-throw, rated 2 amp resistive at 28 volts DC or 115 volts AC. Vibration from 5 to 500 cps at 10 g acceleration with maximum excursion of 0.060 in. Available with plug-in or solder hook terminals. Size 3/4 in. dia, 1 in. high.

GENERAL-PURPOSE PHOTOELECTRIC RELAY

This general-purpose, photoelectric relay, CR7505—K100G3, including a double-pole, double-throw magnetic relay, operates from the interruption of a beam of light, making it simple for items on a production line to be counted easily and quickly. The relay also makes possible automatic weighing with a beam scale and automatic signaling for elevators or doors to save valuable time. Available with a complete line of accessories to operate over light-beam distances of 9 to 30 feet, up to 150 operations per minute. Write for Bulletin GEA-3533D.

THY-MO-TROL* DRIVE

Electronically Operated, Adjustable-speed Drive; Full-range, Stepless Speed Control Standard Ratings from Fractional- to 30-hp Larger Sizes Available

A complete equipment consisting of an anode transformer as required, control station, a rectifier panel, a control station, and a suitable d-c motor. It operates from any power line. Starting, stopping, reversing, and adjustment of speed are all controlled from the single compact control station. Acceleration is automatic, and motor protected against overload.

*Registered trade-mark of General Electric

Operating Features

- 1. FULL RANGE**—A single dial—small as a radio volume control, mounted in the push-button control station—gives complete adjustment of motor speed, from low to maximum, without steps. Gives exact speed wanted.
- 2. HOLDS SPEED**—Regardless of ordinary load fluctuations, Thy-mo-trol electronic circuits hold speed constant within extremely narrow limits. Provides both full speed-range and flat speed-load characteristics.
- 3. CURRENT-LIMIT ACCELERATION**—Regardless of the speed-control setting when the START button is pushed, full-wave Thy-mo-trol acceleration is smooth because of electronic current limiting. Starting is extremely fast because of sustained maximum torque during acceleration. No sudden application of excessive torque; therefore, no shock to the machine. No current peaks on the line.

4. FULL TORQUE—Although motor may be scarcely turned over, it can deliver full torque right up to the current-limit point. This means maximum machine output.

5. OTHER THY-MO-TROL ADVANTAGES—Speed can be preset before starting; saves space; no stop for speed change; easy to control automatically; operates direct from a-c line, no d-c supply needed.

Applications

Drill presses, to increase speed range and variety of work handled. Grinders, for precise speed selection and improved finish. Milling machines, to increase work range handled, and to simplify design. Propeller testing, for accurate, smooth speed control. Cable reels, to maintain constant tension. Conveyors, to match speed and many other applications.

THERE'S A G-E ELECTRONIC TUBE FOR EVERY PURPOSE

Essential Characteristics of Typical G-E Industrial and Transmitting Tubes, With Special Section on Recommended Receiving and Cathode-Ray Types and Five-Star High-Reliability Tubes.

FULL INFORMATION, DETAILED DATA ON THESE OR OTHER G-E TUBES SENT ON REQUEST.

THYRATRONS—Grid-controlled Gaseous-discharge Rectifier Tubes

*Temperature ratings are expressed in terms of the ambient temperature range over which the tubes will operate.
 †These ratings apply only when the tube is used for ignitor firing.
 ‡These ratings apply only when the tube is used in thyatron welding-control service.
 §Temperature range condensed mercury C.

IGNITRONS—High-peak current, Pool-cathode Tubes

| Welding-Control Types* Water-Cooled | Size | Supply Volts | Maximum Ratings | | | |
|-------------------------------------|------|---|-----------------|--|------------------------------------|--------------------------|
| | | | Kva Demand | Corresponding Average Anode Current, Amp | Maximum Average Anode Current, Amp | Corresponding Kva Demand |
| GL-5550/GL-415 | A | 250-600 rms | 300 | 12.1 | 22.4 | 100 |
| GL-5551/FG-271 | B | 250-600 rms | 600 | 30.2 | 56.0 | 200 |
| GL-5552/FG-235-A | C | 250-600 rms | 1200 | 75.6 | 140 | 400 |
| GL-5553-A | D | 250-600 rms | 2400 | 192.0 | 355 | 800 |
| GL-5822 | C | 220-600 rms | 424 | 20 | 70 | 188 |
| GL-6346 | B | Temperature-controlled types. Ratings same as for 5551/FG-271, 5552/FG-235-A, and 5553/FG-258-A respectively. | | | | |
| GL-6347 | C | | | | | |
| GL-6348 | D | | | | | |

| Power-Rectifier Types† | Typical D-c Output Voltage | Maximum Ratings | | | |
|------------------------|----------------------------|-----------------------------|----------|------------------------|----------------------|
| | | Peak Inv. and Forward Volt. | Peak Amp | Continuous Average Amp | Average Amp 1 Minute |
| GL-5564/GL-507 | { 300△ 600△ | 2100 | 3600 | 400 | 800 |
| GL-5779 | { 125△ 350 | 2100 | 2400 | 300 | 600 |
| GL-5554/FG-259-B | { 300△ 600△ | 2100 | 900 | 100 | 200 |
| GL-5555/FG-238-B | { 300△ 600△ | 2100 | 600 | 75 | 150 |
| GL-5630 | { 300△ 600△ | 2100 | 1800 | 200 | 400 |
| GL-6228/GL-506 | { 17500○ 17500○ | 20000 | 1200 | 150 | 300 |
| | | 20000 | 200 | 50 | 50 |
| | | 20000 | 900 | 150 | 300 |

* Ratings are for voltages of 600 volts rms and below.
 † For frequency-changer welding control. Peak current = 1500 amperes, peak inverse and forward voltage = 1200 volts.

† Typical ignitor requirements for power-rectifier ignitrons are 75-125 volts, 15-20 amperes. Maximum requirements are 150 volts, 40 amperes. ○ Six-phase double-way circuits. △ Six-phase double-wye single-way circuits.

All data subject to change without notice. The listing of any G-E tube type does not necessarily imply availability.

G-E FIVE-STAR HIGH-RELIABILITY TUBES
FOR ANY CRITICAL APPLICATION - - -

A complete line of high-reliability tubes—33 miniatures and subminiatures (listed below)—for every critical application where reliable tube operation is a "must"! Recent price reductions have cut costs in some cases by as much as 50% over original prices for many types.

Investigate your tube applications now for sockets that can be filled by a Five-Star High-Reliability type. Change to Five-Star tubes for increased equipment reliability, increased customer good will. Booklet ETD-548-C gives full facts. Write today!

G-E RECOMMENDED TYPES Receiving and Cathode-Ray Tubes for AM, FM, Television Receivers

This list of Recommended Types covers the new equipment demands of the manufacturers of AM, FM, and television receivers and provides a convenient reference to these frequently used types.

Because these types were selected to cover the needs of the commercial radio and television manufacturers, the listing excludes special-purpose receiving types as military, computer, and industrial receiving tubes. The omission of such types does not imply a lack of their suitability for their own class of service.

| Filament | Diodes | Triodes | | | Hep-todes | Gated-Beam Tubes |
|-----------------------|--|---|--------------------------------------|---------------------------------|----------------|------------------|
| | | Single | Twin | With Diodes | | |
| 0 through 2.8 volts | 1B3-GT | | | | 1R5 | |

G-E RECEIVING TUBES
G-E CATHODE-RAY TUBES

In addition to the recommended types, G-E also produces a wide line of other high-quality, dependable receiving tubes and cathode-ray tubes for AM, FM, television and industrial and measurement applications. For further information, contact your nearest Tube Department Regional Sales office listed below.

Type numbers of metal tubes are shown in bold-face type.

Type numbers of miniature tubes are shown in italics.

* Rated for TV sweep applications.

HELPFUL INFORMATION TO MEET YOUR WIRING NEEDS

... ON MAGNET WIRE

◀ This 32-page bulletin contains extensive selection and specification information and data including valuable data tables on both Formex* and Deltabeston* magnet wire.

The properties of Formex magnet wire—such as dielectric strength, toughness, heat aging, moisture resistance, solvent resistance—are discussed at length in this bulletin. A complete section of several pages is devoted to the advantages of Formex—explains why Formex takes less space, has more feet of wire per pound, demonstrates its winding-space factor, shows why Formex is easy to wind, has low first cost, and facilitates manufacturing processes. The types of Formex magnet wire are described in the detail necessary to assist you in selecting and specifying the magnet wire to meet your requirements.

This bulletin also contains a section devoted to Deltabeston magnet wire for Class Band Class H applications—asbestos-insulated, glass-insulated and film-insulated with Teflon**. You'll find complete information on the properties and advantages which make Deltabeston magnet wire unsurpassed in performance where extreme heat and other severe operating conditions exist.

... ON WIRES, CABLES, AND CORDS

◀ General Electric's line of wires, cables and cords of interest to designers and manufacturers of electronic, industrial, and electrical equipment is fully described in this 24-page publication. A special section is devoted to General Electric cords—Deltabeston, rubber, Geoprene, PreenX*, and rip cords. Product, application, and specification information is given to enable you to select the proper G-E wire, cable, or cord for your product.

* Registered Trade-Mark General Electric Company
 ** DuPont Trade-Mark for Tetrafluoroethylene Resin

SPECIAL APPLICATIONS

In cases where products may require special applications, G-E engineers, constantly engaged in the development of new or improved wires, cables, and cords, will gladly give assistance to product designers and manufacturers.

For information on special applications, please write to the nearest General Electric Construction Materials Division office or the Wire and Cable Department, Construction Materials Division, General Electric Company, Bridgeport 2, Connecticut. Just send in the coupon for your copy of these helpful, informative publications.

G-E (KOR-LES) "COOL BLUE" POWER RESISTORS — (For Military Application)

Designed to meet Characteristic "V" of
MIL-R-26B-350°C Operating Temperatures

Standard Resistance Values

.50 through 40,000 Ohms

HIGHER POWER RATINGS—made possible by refractory base and glaze with temperature coefficients matched to eliminate crazing, checking and pin holing.

LIGHTER WEIGHTS—Core-less construction reduces weight up to 50% compared with other standard sizes.

VITREOUS ENAMEL COATING—permits high temperature operating without deterioration due to aging.

GREATER DEPENDABILITY—resistance wire is embedded in a matching refractory base for extra mechanical protection—wire bunching is virtually eliminated.

G-E DELAY LINES

Delay Lines provide a means for delaying electrical signals by desired and definite amounts of time. Limitations are allowable attenuation and waveform distortion. Practical for delay times as high as 10 microseconds. Usually employed in lengths which provide a delay ranging from 0.1 to 5.00 microseconds. Bulk lines furnished to be cut into desired lengths.

DELAY LINE APPLICATIONS: Many applications exist in laboratories engaged in research and development of special circuits for electronic devices. The original application was to radar equipment.

Rendering receivers insensitive for a definite time interval immediately following a transmitter signal. Generation of pulse signals of predetermined and definite width.

Oscilloscope applications—to delay signals with respect to the servo sweep, and for single-pulse transients.

Electronic calculators—time delay.

Color television—delay circuits.

ADVANTAGES: Lightweight and flexible • Low distortion • Fast rise time • Physical and electrical uniformity • Operates at ambients up to 100° C.

G-E CUSTOM BUILT
PRECISION METAL PARTS

Custom production of close tolerance parts fabricated from light gauge strip and wire stock. Electronic Tube Parts — Sleeves — Spacers — Cups — Cathode Parts — Terminals — Switch Parts — for every exacting requirement in the Industrial field. Parts formed from new multislide, four slide and high speed automatic punch presses assure rapid low-cost production.

G-E TUBE SHIELDS

Miniature wrap-around types now available in 1-7/8" . . . 1-1/4" . . . and 1-1/4" flared sizes. Fabricated from pre-coated steel. Improved production techniques permit G.E. to price these shields below most others on the market today. Bulk orders promptly delivered. Tell us your specifications . . . receive an economical G-E quotation!

G-E PRINT-WIRE CIRCUIT BOARDS

A Typical G-E Electric
"Print-Wire" Circuit Board

ADVANTAGES: 1. Eliminates wiring errors.

2. Reduces assembly cost.

3. Makes possible dip solder techniques.

4. Reduces physical size and weight.

5. Eliminates variations in distributed capacity and coupling between circuits.

6. Design changes can be made easily.

CONDUCTOR FINISHES: silver flash, silver plate, gold flash, gold plate, solder plate.

OVERALL SIZE LIMITATION: Boards may be any size to customer's specifications within a maximum of 24 inches overall.

GERMANIUM PRODUCTS

The complete General Electric line for use in
electronic and electrical power circuits requiring
DETECTION . . . RECTIFICATION . . . AMPLIFICATION!

- (1) Matched at +1v so that current through higher resistance unit is within 10% of lower resistance unit.
- (2) Consists of 4 balanced diodes. With 15 ma forward current, the voltage drop of each diode is 1.3v min. and 1.7v max. All diodes are within 0.1 volt of each other, and voltage drop of a pair is 0.03 volts of each other.
- (3) Consists of 4 balanced diodes. With 15 ma forward current, the voltage drop of each diode is 1.2v min. and 1.8v max. All diodes are within 0.2v of each other and voltage drop of a pair is 0.1v of each other.

GERMANIUM DIODE HANDBOOK, complete specifications on G-E germanium diode products. Contains diode and rectifier characteristics and applications, curves on resistance, voltage, temperature, efficiency, circuit diagrams covering AM, FM and TV receivers, radar, carrier current. \$1.25 post-paid. Send your check or money order today to: General Electric Company, Section X764, Electronics Park, Syracuse, New York.

GERMANIUM DIODE INTERCHANGEABILITY CHART IS FREE UPON REQUEST

OSCILLOSCOPE—Type ST-2B

Better high frequency response than any other scope in its field! Permits a choice of short, medium or long persistence CR tubes. Incorporates identical direct coupled vertical and horizontal amplifiers.

SPECIFICATIONS

Freq. Response—DC to 400 kc at 2db—Identical amplifiers
Sensitivity—AC 10 mv/in. rms—DC 28mv DC/in.
Low Capacity probe—freq. resp. 2 cycles to 400 kc of 2db
Sweep—Triggered or recurrent 2 cycles to 30 kc
Built-in-Calibrator—0.1 to 300 volts peak to peak

**OSCILLOSCOPE—Type ST-2A**

Excellent for head-end position work. Unsurpassed for stability and fine trace. Delivers maximum sensitivity without sacrifice of frequency response. Use it to check hum, noise, distortion, modulation. Fits many applications where waveform study is essential.

SPECIFICATIONS

Vertical Freq. Response—20 cycles to 500 kc at 2db
Horizontal Freq. Response—10 cycles to 100 kc
Sensitivity—AC 15 mv/in. rms—DC 2 volts DC/in.
Low Capacity probe available—200mv/in. rms
Sweep—Hard tube sweep 10 cycles to 100 kc
Built-in Calibrator—0.3 to 300 volts peak to peak

**OSCILLOSCOPE—Type ST-2C**

A 5" scope for general purpose work. Particularly useful for maintenance of microwave installations and television stations. Wide frequency response without recourse to peaked amplifier coupling circuits, resulting in excellent transient response.

SPECIFICATIONS

Vertical Freq. Response—20 cycles to 3 mc
Horizontal Freq. Response—10 cycles to 100 kc
Sensitivity—75 mv/in. rms
Low Capacity probe available—Sens. 1 volt/in. rms
Sweep—Recurrent hard tube sweep 10 cycles to 100 kc
Built-in Calibrator—0.3 to 300 volts peak to peak

**GERMANIUM DIODE CHECKER—ST-12A**

For use in laboratories, quality control groups, service shops. Measures the static characteristics of diodes.

SPECIFICATIONS

Forward Ranges—Current—0.3, 1.2, 6 and 12 ma full scale. Voltage—3 and 1.2 v full scale.
Inverse Ranges—Current—60, 120, 300 and 1200 ua full scale. Voltage—3, 12 and 120 v full scale.
Power requirements—105-125 v, 50/60 cycle, approx. 10 w.

**BINARY SCALER
Model 4SN1A4**

Provides scale of 2 in self-contained unit that cuts installation and maintenance to a minimum. Suitable for direct coupling—no intermediate stages necessary. Fits standard octal socket. Speeds up to 200 kc. Resolution time 4 microseconds.

**NEW COMPLETE CATALOG**

Complete specifications, descriptions, charts, and photographs of G-E electronic test equipment. Write today for your copy: General Electric Co., Section X-764-1, Electronic Park, Syracuse, New York.

**SWEEP GENERATOR—Type ST-4A**

Variable Permeability Sweep completely electronic, with no moving parts. For TV receiver maintenance, TV production and development laboratories, wide band amplifier study, transmission line impedance measurements.

SPECIFICATIONS

Freq. Range—Continuously variable, 4 to 110 mc; 170 to 220 mc
Sweep Width—Linear from 500 kc to greater than 15 mc
Output Voltage—Greater than 0.1 volts from 4 to 110 mc
Greater than 0.5 volts from 170 to 220 mc
Attenuation—Continuously variable down to 20 microvolts
Leakage—Stray field—less than 10 microvolts induced in 2 in. loop
6 in. from case in any direction
Phase Range Control—Greater than 360 degrees

**MARKER GENERATOR—ST-5A**

Functions as a crystal referenced calibrator from 10 mc. to 300 mc. When used with the General Electric sweep generator, it provides a multiple of crystal controlled markers spaced 1.5 or 4.5 mc. apart . . . and can be used to supply a marker or markers at any frequency from 10 mc. to 900 mc.

TV APPLICATION—12 crystal controlled channel frequency picture markers plus an accurate hand calibrated VFO covering the range of 20 to 50 mc. makes this unit directly applicable to TV alignment problems.

**DUAL REGULATED POWER SUPPLY**

Type ST-9A Has twin outputs and features electronic overload protection. Instruments cannot be harmed by short circuits on the regulated outputs. Built-in modulator permits observation of hum and noise tolerances by duplicating them on the equipment.

SPECIFICATIONS

#1 Regulated—Continuously variable, 0-500 v, max. current 100 ma.
#2 Regulated—Same as #1
Parallel #1 and #2—Continuously variable, 0-500 v, max. current 150 ma
Unregulated—Approx. 650 volts no load, max. current 200 ma
—75 Volts—VR tube regulation, 0-2 ma
—150 Volts—VR tube regulation, 0-4 ma
Filament Supply—6.3 volts a-c at 10 amps
Regulation—Better than 1/2% + 1/2% volt
Ripple and Noise—Less than 10 mv p to p on all regulated outputs

**POWER SUPPLY—Type YPD-2**

A high-quality, electronically regulated unit designed for use in laboratories, broadcast stations, and wherever a closely regulated variable DC voltage source at medium current consumption is required.

SPECIFICATIONS

DC Voltage Output—250-450 v, (positive or negative may be grounded to chassis)
DC current Output—0-300 milliamperes
AC Output—6.3 volts 10 amperes unregulated
Regulation—Less than 1% from minimum to maximum current
Ripple—Less than 5 mv peak to peak
Output Impedance—Approximately 2 ohms at 30 cycles, decreases with increasing frequency

**FREQUENCY AND
MODULATION METER—Type ST-13A**

Quality FM Communications meter. Gives hairline accuracy plus provision with oven accessories for future split-channel adjustments. Measures both carrier frequency displacement and modulation. Accessories include External antenna mount and cable.

SPECIFICATIONS

Freq. Ranges—One or two specified frequencies in the following ranges: 25 mc to 50 mc, 72 mc to 76 mc, 148 mc to 174 mc
Reference Oscillator Accuracy—0.01% from 32°F to 122°F.
External connection, internal wiring and a socket provided for 6 V oven operation where wider temperature range with greater accuracy is required.
Inputs—18 in. collapsible whip antenna and fifty-ohm BNC connector.
Outputs—Low and high RF outputs for receiver alignment.
Power—Internal batteries.

Telechron Synchronous Timing Motors

For automatic devices, instruments, control equipment—wherever time is a factor in product performance—Telechron Synchronous Timing Motors are your best assurance of dependability.

Telechron motors are CONTINUOUSLY ACCURATE . . . because they're true synchronous motors with one rotation for every cycle of the alternating current source. Lightweight rotors enable virtually INSTANT SELF-STARTING . . . reach full speed in approximately 3 cycles. All gears and bearings are PERMANENTLY LUBRICATED . . . by a generous

oil reservoir sealed into the dust-free rotor unit.

With Telechron motors, you get the benefit of dependable Application Engineering Service. Engineering specialists in timing problems study your requirements . . . torque, temperature limits, running period, etc. . . . recommend the motor best suited, and at lowest cost.

Write for complete catalog and application data sheet. Telechron Department, General Electric Company, 602 Homer Ave., Ashland, Massachusetts.

SPECIFICATIONS

| Type | Speed* of Rotation | Torque—pound-inches | | | Rated watts input | Over-all dimensions (inches) | Net Wt. (oz.) | Shipping Wt. (lbs.) |

| C5M | 1 rpm. 2 4 | 2.00 1.00 0.50 | 1.60 0.80 0.40 | 0.80 0.40 0.20 | 12 | 3-3/8 x 3-3/4 x 3-3/4 | 32 | 2-1/2 |
| IM-9*** | 1 rev. in any of following periods: Minutes—5, 15, 30, 60 Hours—1, 2, 3, 4, 6, 8, 12, 24 Days—1, 2, 3, 7, 14, 30 | | | | | 3-1/2 x 3-1/2 x 2-11/16 | 18 | 2 |

* Standard direction of rotation facing terminal shaft end—clockwise, except for IM-9 which is counter-clockwise. Reversible rotation available in some models.

** Intermittent maximum peak torque .104 dependent on duty cycle.

*** Type IM-9 provides a totally enclosed circular gear train. Adaptable to most instrumentation and especially for chart drives. Has special backlash eliminators.

INSTRUMENTS— Fig. A is damping magnet once used in GE indicator. B is Carboloy magnet now used . . . permitting smaller design, cutting costs, improving calibrations.

CONTROLS— Fan control uses Carboloy magnet because (1)

(2) It occupies small space and gives higher energy per unit per space. (3) Offers higher stability. (4) Cost is low.

MAGNETS— To save weight, Scintilla magneto features new rotor made with Carboloy permanent magnet (B) to replace old rotor (A). Rotor weight is cut 100 percent.

MINIATURE MOTORS— One tiny Carboloy magnet replaces electromagnet and components . . .

makes possible the small design of this battery-operated motor. Magnet gives years of dependable service.

IMPROVE YOUR ELECTRICAL PRODUCTS WITH CARBOLOY PERMANENT MAGNETS

Interested in improving your product? . . . having it weigh less and cost less to build?

Then throw away that electro-magnet. *Replace it now with a high-energy Carboloy permanent magnet!*

Hundreds of manufacturers in the field of electronic and electrical devices have done just this. More are doing it every day. The illustrated applications on this page show you some typical results.

For more evidence . . . and for expert engineering advice and design assistance, contact the Carboloy organization *now*. Skilled Carboloy magnet men are at your service. Carboloy production lines can supply you with high-quality magnets to meet your most exacting specifications. All sizes, all shapes available; cast or sintered.

Send today for free Carboloy Magnet Design Manual PM-101 and for Standard Stock Catalog PM-100.

OUTSTANDING ADVANTAGES OF CARBOLOY PERMANENT MAGNETS

- 1 Cool—generate no heat
- 2 Require no electrical energy
- 3 Cost nothing to operate
- 4 Eliminate coils, windings, wiring, etc.
- 5 Need no maintenance—no coils to burn out, no slip rings to clean or replace, etc.
- 6 Simplify mechanical assemblies—exert strong tractive force for holding, lifting and separating devices that eliminates component parts, makes product design and fabrication simple.
- 7 Save space—great magnetic strength in small sizes
- 8 Powerful—and power is constant
- 9 Combine electrical and mechanical features—transform electrical energy into mechanical motion; mechanical motion into electrical energy
- 10 No power failures ever
- 11 Resist moisture—no coils to collect dampness
- 12 Give uninterrupted operation
- 13 Create savings—often eliminate costly, power-supplying parts
- 14 Simple—no operating parts
- 15 Reduce weight, product size
- 16 Supply a permanent source of energy

HEARING AIDS—New all-transistor, all-magnetic "Radioear" uses Carboloy magnets in both receiver and microphone. Magnets eliminate failure once caused by high operating temperatures.

KEPCO VOLTAGE REGULATED POWER SUPPLIES

KEPCO manufactures the most complete line of DC voltage regulated power supplies. These units are available as standard models. Workmanship is of a quality with the highest existing production standards and best instrument electronic practices consistent with the intended use of the item as a continuous duty voltage regulated power supply.

DC POWER SUPPLY SPECIFICATIONS

KEPCO Voltage Regulated Power Supplies are conservatively rated. The regulation specified for each unit is available under all line and load conditions within the range of the instrument.

REGULATION: As shown in table for both line fluctuations from 105-125 volts and load variations from minimum to maximum current.

***REGULATION FOR BIAS SUPPLIES:** 10 millivolts for line 105-125 volts. 1/2% for load at 150 volts.

†All AC Voltages are unregulated.

All units are metered except Models 131, 315 and 3100.

All units are designed for relay rack mounting or bench use.

VOLTAGE STABILIZERS

TEN WAYS BETTER

1. Deliver accurate AC voltage within $\pm 1/2\%$
2. Stabilize output with more precision
3. Regulate better at full load
4. Hold up better under overload
5. Better no-load to full-load regulation
6. Accept wider input voltage range
7. Less voltage change as units heat up
8. Less change in output as frequencies fluctuate
9. Smaller, lighter, more compact; no moving parts
10. Cost less to operate

Standard catalog types rated from 15 to 2000 watts as illustrated, are available through 125 authorized distributors. All models operate on input of 95 to 130 volts, 60 cycle, single phase current; compensate within 1/20 second; maintain voltage within $\pm 1/2\%$ of rated output. Special custom-built units in ratings from 5 to 10,000 watts are also available to meet special needs. Write for complete information.

STANDARD CONTROL KNOBS

Raytheon control knobs offer CUSTOM style and quality at STANDARD cost. Made of tough, durable "Tenite II" (cellulose acetate butyrate), injection molded with anodized aluminum inserts and dual setscrews. All types and sizes to fit 1/4-inch diameter shafts. Miniature (70 series) round, dial and pointer knobs also available for 1/8-inch shafts.

MATTE OR MIRROR FINISH

Black knobs available with high gloss "mirror" finish for commercial applications or non-reflecting "matte" finish for government equipment. Manufacturers interested in colored knobs are invited to submit their requirements for quotation.

(All Knobs Shown 1/2 Size)

WELDPOWER*

STORED ENERGY WELDING UNITS

Raytheon Condenser Weldpower Control Units and Weldpower Welding Heads are designed especially for precision welding light gauge non-ferrous and ferrous metals. They are widely used in the Electronics industry for assembling tubes and other components; attaching pigtails to condensers, resistors, batteries, etc.; welding contacts involving similar or dissimilar metals and countless other small part assembly jobs.

Weldpower welding is precisely repetitive, completely dependable. It offers the important advantages over soldering, conventional AC welding or other assembly methods of time saved, fewer rejects, increased production and lower cost. Write for complete information.

*Reg. U. S. Pat. Off.

Raytheon stored energy Weldpower Control units are available in three models with appropriate Weldpower heads.

Model 60-A
Capacity:
63 watt-seconds

Model 225-A
Capacity:
225 watt-seconds

Model 1100
Capacity:
1080 watt-seconds

CUSTOM BUILT TRANSFORMERS

Raytheon can furnish custom engineered transformers to fit any special need. Typical units include: single or polyphase power transformers, blocking oscillators, servo transformers, chokes, audio components, filters, saturable magnetic components, etc. Cased or open types to meet the most exacting MIL specifications, as well as Underwriters' Laboratories and R.T.M.A. requirements.

TOROID-L UNITS

TOROID-L coils wound on powdered permalloy cores, high permeability solid materials or stamped "O" cores. Facilities for all types of winding including litzendraht winding, winding heavy wire on wedding ring coils and square coils wound from strip materials. Other Toroid-L Units include: transformers, filter networks for audio or ultrasonic work, lumped parameter delay lines and magnetic amplifier coils. Write for specific information.

RAYTHEON MANUFACTURING COMPANY

REFLEX KLYSTRON OSCILLATORS
Self-Contained and External Cavity

Table with columns: Tube Type, Maximum Frequency Range, Power Output, Resonator Potential, Focus or Control Grid Potential, Maximum Temperature Coef., Filament Current, and Class. Lists various tube models like RK-5777, 2K28, 6133, etc.

†1 = Mechanical Inductive, 2 = Mechanical Capacitive, 3 = Non-Contacting Plunger, 4 = Thermal Capacitive, A = Coaxial Cable, B = Waveguide

MAGNETRON OSCILLATORS for Pulse and CW Operation

Table with columns: Type No., Heater (Volts, Amps), Band or Range Mc., Maximum Ratings (Anode Kv, Anode Amps, Duty Cycle), Class*, and Typical Operation (Min Power, Pk Kw). Lists tube models like RK5J26, RK4J30, etc.

* Class 1 = Tunable-CW, 2 = Fixed Frequency-Pulsed, 3 = Tunable-Pulsed, 4 = CW Electro-mech. Freq. Mod., 5 = Fixed Frequency-CW

MAGNETRON PULSE TRANSFORMERS

Raytheon through its Microwave and Power Tube Operations and its Transformer Division is in a unique position to serve you on your combined magnetron and pulse transformer package requirements.

In stating your requirements or on requesting data on any of our power tubes please address Raytheon Manufacturing Company, Power Tube Sales, Section PJ-01 Waltham 54, Massachusetts.

ALL *Performance - Guaranteed* PRODUCTS

MAGNETICS inc. TAPE WOUND CORES

Only Magnetics, Inc. offers Tape Wound Cores, guaranteed to meet your performance specifications. The industry's widest selection of standard cores, over 120 standard sizes gives you a size choice:

Inside Diameter . . . from 0.375-in. to 4.500-in.

Outside Diameter . . . from 0.500-in. to 6.500-in.

Height . . . from 0.125-in. to 4.500-in.

Gauge of Tape001, .002, .003, .004, .006-in.

Materials . . . Hy-Mu 80, 48 Alloy, Orthonol, Magnesil and all other commercially available high permeability materials.

Cores are normally furnished encased in protective plastic boxes, cushioned in special wide temperature compound. Tape is hydrogen annealed to provide exact characteristics to meet your performance specifications.

MAGNETICS inc. LAMINATIONS

Magnetics Inc. Magnetic Laminations are performance guaranteed to meet all production requirements of the electrical and electronic industries. Substantially burr-free, flat laminations in both nickel-iron and all grades of silicon steels are available in standard shapes, such as Rings, EE 24-25, EE 26-27, EI 11, EI 21, EI 75 and EI 375, and in standard gauges from .025 through .006. Laminations are hydrogen annealed when necessary for guaranteed performance. Complete core assemblies can be provided and dies of both tungsten-carbide and hi-carbon, hi-chrome are provided to meet any requirement.

MAGNETICS inc. MAGNETIC SHIELDS

Performance Guaranteed Shields, usually made from Mumetal or A.E.M. 4750, can be made from any other commercially available magnetic or non-magnetic material. Shields are dry-hydrogen annealed, as necessary, and fabricated or drawn to meet production requirements. These shields can be furnished painted or lacquered in any color to your specification.

SHORT FORM CATALOG

Hewlett-Packard offers over 250 measuring instruments for manufacturing, industrial and scientific research, equipment maintenance, communications and military use.

Each *-hp-* instrument gives you the economies of fast, accurate performance, broad usefulness, and dependable service. Each has the familiar *-hp-* characteristics of simple operation, minimum adjustment, independence of line voltage or tube changes, generous overload protection and highest quality design and construction.

This catalog gives brief details of major *-hp-* instruments. For complete information, see your *-hp-* representative, or write direct.

-hp- Oscillators - Signal Generators .01 to 10,000,000 cps

-hp- 200 SERIES AUDIO OSCILLATORS

Four widely used *-hp-* oscillators have been redesigned into two compact, lightweight instruments offering wider frequency range, more operating simplicity, highest accuracy and stability. New Models 200AB and 200CD replace Models 200A through 200D, retain the time-tested RC circuits that insure

constant output, low distortion; require no zero set. *-hp-* also offers Model 202D for sub-audio, audio, supersonic and carrier tests; and Model 200I, a spread-scale oscillator for interpolation or where frequency must be known precisely.

-hp- 650A TEST OSCILLATOR

Highly stable, wide band (10 cps to 10 mc) multi-purpose test oscillator for audio, supersonic, video, and rf measurements. Output variable from 100 mV to 3 v. Frequency range 10 cps to 10 mc. ± 1 db. Output impedance 600 ohms with voltage divider. \$490.00

Frequency range 10 cps to 10 mc. ± 1 db. Output impedance 600 ohms with voltage divider. \$490.00

| Instrument | Primary Uses | Frequency Range | Output | Price |
|------------|--|-------------------|------------------|-----------------|
| -hp- 200AB | Audio tests | 20 cps to 40 kc | 1 watt/24.5 v | \$120.00 |
| -hp- 200CD | Audio, ultrasonic tests | 5 cps to 600 kc | 160 mw/20 v * | 150.00 |
| -hp- 200I | Interpolation and frequency measurements | 6 cps to 6 kc | 100 mw/10 v | 225.00 |
| -hp- 200T | Telemetry, carrier current tests | 250 cps to 100 kc | 160 mw/20 v * | 350.00 |
| -hp- 201B | High quality audio tests | 20 cps to 20 kc | 3 w/42.5 v | 250.00 |
| -hp- 202A | Low frequency measurements | .01 cps to 1 kc | 20 mw/10 v | 465.00 Δ |
| -hp- 202B | Low frequency measurements | 1/2 cps to 50 kc | 100 mw/10 v | 365.00 Δ |
| -hp- 202D | Low frequency measurements | 2 cps to 70 kc | 100 mw/10 v | 275.00 |
| -hp- 204A | Portable, battery operated | 2 cps to 20 kc | 2.5 mw/5 v | 175.00 |
| -hp- 205A | High power audio tests | 20 cps to 20 kc | 5 watts | 405.00 Δ |
| -hp- 205AG | High power tests, gain measurements | 20 cps to 20 kc | 5 watts | 440.00 Δ |
| -hp- 205AH | High power supersonic tests | 1 kc to 100 kc | 5 watts | 565.00 Δ |
| -hp- 206A | High quality, high accuracy audio tests | 20 cps to 20 kc | +15 dbm | 565.00 Δ |
| -hp- 230A | Carrier test oscillator | 35 cps to 35 kc | +14 dbm/600 ohms | 275.00 |
| -hp- 233A | Carrier test oscillator | 50 cps to 500 kc | 3w/600 ohms | 475.00 |
| -hp- 234A | Carrier test oscillator | 160 cps to 160 kc | +14 dbm/600 ohms | 300.00 |
| -hp- 650A | Wide range video tests | 10 cps to 10 mc | 15 mw/3 v | 490.00 Δ |

* Closed circuit. Internal impedance 600 ohms.

-hp- Distortion Wave Form Analyzers - 20 cps to 20 kc

-hp- 330B DISTORTION ANALYZER

Measures total audio distortion. Wide band 20 db gain amplifier. VTVM usable separately. \$410.00

Wide band 20 db gain amplifier. VTVM usable separately. \$410.00

FM, AM-FM MOD.

-hp- 330C, for FM broadcast measurements. Special VU meter meeting F.C.C. requirements. \$440.00
 -hp- 330D, for AM-FM broadcast measurements. AM detector and VU meter to meet F.C.C. requirements. \$455.00 Δ

| Instrument | Primary Uses | Frequency Range | Characteristics | Price |
|-----------------------|----------------------------------|-----------------|--|-----------------|
| -hp- 330A | Wave form analyzer | 30 cps to 16 kc | Variable selectivity; measuring range 1 mv to 500 v | \$625.00 |
| -hp- 330B | Measures total audio distortion | 20 cps to 20 kc | Includes input amplifier, VTVM | 410.00 Δ |
| -hp- 330C | For FM broadcast measurements | 20 cps to 20 kc | Special VU meter to meet F.C.C. requirements | 440.00 Δ |
| -hp- 330D | For AM-FM broadcast measurements | 20 cps to 20 kc | AM detector and VU meter to meet F.C.C. requirements | 455.00 Δ |
| SQUARE WAVE GENERATOR | | | | |
| -hp- 210A | Transient and frequency response | 20 cps to 10 kc | Output 50 v peak-to-peak 1,000 ohm impedance | 150.00 |

-hp- Vacuum Tube Voltmeters - 2 to 700,000,000 cps

-hp- 400D VACUUM TUBE VOLTMETER

Best *-hp-* voltmeter ever built! Covers all frequencies 10 cps to 4 mc. Extremely sensitive, wide range, accurate within 2% to 1 mc, measures 0.1 mv to 300 v. Direct reading in dbm. 10 megohm input impedance insures negligible loading on circuits

under test. New amplifier circuit with 56 db mid-range feedback assures utmost stability, freedom from change due to external conditions. \$225.00.

| Instrument | Primary Uses | Frequency Range | Voltage Range | Input Impedance | Price |
|------------|---|------------------|-----------------------------|----------------------------------|----------|
| -hp- 400A | General purpose ac measurements | 10 cps to 1 mc | .005 to 300 v 9 ranges | 1 megohm 24 μ fd shunt | \$185.00 |
| -hp- 400B | Low frequency ac measurements | 2 cps to 100 kc | .005 to 300 v 9 ranges | 10 megohms 24 μ fd shunt | 195.00 |
| -hp- 400D | Wide range ac measurements. High sensitivity | 10 cps to 4 mc | .0001 to 300 v 12 ranges | 10 megohms 14 μ fd shunt | 225.00 |
| -hp- 404A | Portable, battery operated | 2 cps to 50 kc | .0005 to 300 v 11 ranges | 10 megohms 20 μ fd shunt | 185.00 |
| -hp- 410B | Audio, rf, VHF measurements; dc voltages; resistances | 20 cps to 700 mc | .1 to 300 v 7 ranges | 10 megohms 1.5 μ fd shunt | 245.00 |

-hp- Voltmeter Accessories (not listed) include voltage dividers, connectors, shunts and multipliers to extend the useful range of your equipment.

Δ Includes new lightweight all-metal cabinet with carrying handles. Also available for rack mounting at slightly lower prices.

Data subject to change without notice. Prices f.o.b. factory.

NEW!

hp 524B ELECTRONIC COUNTER

with plug-in units to fit your exact measuring need

Frequency 10 cps to 220 mc, interval 1 μ sec to 100 days and period 0 cps to 10 kc—all are measured instantly, automatically, directly by the revolutionary new *-hp-* 524B. You buy just the instrumentation you need; later add inexpensive plug-in units to double, triple versatility of this complete coverage instrument. Operation requires no calculations or technical training. Counter has high impedance, sensitivity, accuracy, quality construction. \$1,915.00 Δ .

-hp- 525A Frequency Converter extends Counter's basic 10 cps to 10 mc range to 100 mc; increases video sensitivity to 0.1 v, 10 cps to 10 mc. \$225.00.

-hp- 525B Frequency Converter gives Counter range from 100 to 220 mc at 0.25 v sensitivity. \$225.00.

-hp- 526A Video Amplifier increases Counter's sensitivity between 10 cps and 10 mc to 10 millivolts for low level work. \$125.00.

-hp- 526B Time Interval Unit measures interval 1 μ sec to 100 days with accuracy of 0.1 μ sec \pm 0.001%. Reads direct in seconds, milliseconds, microseconds. \$150.00

(Plug-in units supplied in aluminum storage cases)

Other -hp- Frequency Measuring and Monitoring Equipment

-hp- 100D SECONDARY FREQUENCY STANDARD

Swift, sure frequency comparison, new convenience in standardizing with minimum external equipment. 100 μ sec time markers, built-in oscilloscope, sine or rectangular waves. Low impedance; short-time stability 1/1,000,000. Performs most functions of primary standards in rf or supersonic ranges. \$615.00 Δ .

-hp- 335E TV MONITOR

Channels 2 through 83. Exceeds F.C.C. requirements. Compact, only 12 $\frac{1}{4}$ " high, rack mounted. Low cost, all purpose, for visual and aural frequency monitoring, aural modulation. Long-term dependability, precise accuracy, highest stability, no adjustment during operation. Forced ventilation, re-indication features. \$1,950.00.

-hp- 512A/B FREQUENCY CONVERTERS

Two new *-hp-* Frequency Converters extend range of *-hp-* 524A Electronic Counter without loss of accuracy and with increased sensitivity. *-hp-* 512A covers frequencies 10 to 100 mc, 512B covers 100 to 220 mc. Complex setups eliminated, are easily used by non-technical personnel. *-hp-* 512A, 512B, \$350.00.

-hp- 522B ELECTRONIC COUNTER

Compact, low cost, versatile instrument for frequency, period or time measurements. Range 10 cps to 100 kc. Reads direct in cps, kc, seconds or milliseconds. Count automatic, reset, action repetitive. Stability of time base 1/1,000,000. Display length variable. Easily used by untrained personnel. \$915.00 Δ .

| Instrument | Primary Uses | Frequency Range | Characteristics | Price |
|---------------------------------|--|---|--|--------------------|
| -hp- 100C Secondary Standard | Audio, supersonic calibration | 100 kc, 10 kc, 1 kc, 100 cps | Accurate within $\pm .001\%$ Sine waves only | \$ 465.00 Δ |
| -hp- 100D Secondary Standard | Frequency, time measurements | 100 kc, 10 kc, 1 kc, 100 cps, 10 cps | Stability 1/1,000,000 (short-time) Sine or rectangular output. Marker pips | 615.00 Δ |
| -hp- 335B Frequency Monitor | FM broadcast station monitor | 88 to 108 mc | Frequency deviation ± 3 kc; accuracy $\pm .001\%$; modulation 0 to 100 kc | 935.00 |
| -hp- 335E TV Monitor | TV visual, aural and % mod. monitor | Channels 2 through 83 | Indicates visual, aural carrier frequency deviation, % modulation aural carrier | 1,950.00 |
| -hp- 500A Frequency Meter | Rapid frequency measurements | 10 cps to 50 kc | 10 ranges $\pm 2\%$ accuracy. Input 0.5 to 200 volts | 210.00 |
| -hp- 505A Electronic Tachometer | Measurements of high speed machinery | 600 to 3,000,000 rpm | 10 ranges $\pm 2\%$ accuracy | 220.00 |
| -hp- 505B Electronic Tachometer | Same as 505A | 10 to 50,000 rps | Same as 505A except calibrated in rps | 220.00 |
| -hp- 510A Mixer | Measure frequency continuously with <i>-hp-</i> 500A and 100 D/C | 20 cps to 200,000 cps | Mixes two frequencies, delivers difference to <i>-hp-</i> 500A | 200.00 |
| -hp- 512A Frequency Converter | Extends <i>-hp-</i> 524A range to 100 mc | 100 kc to 100 mc | Fast, direct readings of signals to 100 mc with 524A. No charts, interpolation. Min. input 0.01 v | 350.00 |
| -hp- 512B Frequency Converter | Gives <i>-hp-</i> 524A range 100 to 220 mc | 100 mc to 220 mc | Same as 512A except for frequency coverage and input 0.14 v RMS min. | 350.00 |
| -hp- 520A Nuclear Scaler | For counting high-rate pulses | Capacity 100 counts in 2 decades. 10,000,000 pps counting rate | 100:1 divider for operation of low speed scalars | 615.00 Δ |
| -hp- 522A Electronic Counter | Wide-range frequency, period measurements | 10 cps to 100 kc | Frequency measuring gate time is 1 sec. or multiples; standard frequency counted for period measurement 100 kc | 790.00 Δ |
| -hp- 522B Electronic Counter | Wide-range frequency, period, time interval measurements | 10 cps to 100 kc | Measures rate of occurrences 0.00001 to 100,000/sec.; time interval 10 μ sec to 27.8 hrs.; periods of frequency count 1/1,000, 1/100, 1/10, 1, 10 sec. and multiples. Direct readings in cps, kc, sec. and millisec. | 915.00 Δ |

Δ Includes new lightweight all-metal cabinet with carrying handles. Also available for rack mounting at slightly lower prices.

Data subject to change without notice. Prices f.o.b. factory.

-hp- Signal Generators -10 to 11,000 mc

-hp- 612A UHF-TV SIGNAL GENERATOR

450 to 1,200 mc. Master oscillator-power amplifier generator for UHF-TV measurements including gain, selectivity, sensitivity, image rejection. Directly set and read; no charts; no interpolation. Low incidental fm. high-quality broad band pulse modulation to 5 mc. May be modulated internally or externally (CW, pulse, or pulse modulated. (Cycles per sec. 100 to 100,000; pulse width 100 nsec or longer.) \$1,200.00.

ulated internally or externally (CW, pulse, or pulse modulated. (Cycles per sec. 100 to 100,000; pulse width 100 nsec or longer.) \$1,200.00.

| Instrument | Frequency Range | Characteristics | Price |
|------------|--------------------|---|-----------|
| -hp- 608A | 10 to 500 mc | Output 0.1 μ v to 1 v into 50 ohm load. Pulse or CW modulation. Direct calibration. | \$ 850.00 |
| -hp- 612A | 450 to 1,200 mc | Output 0.1 μ v to 0.5 v into 50 ohm load. Pulse, CW or amplitude modulation to 5 mc. Direct calibration. | 1,200.00 |
| -hp- 614A | 800 to 2,100 mc | Output 0.1 μ v to 0.223 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration. | 1,950.00 |
| -hp- 616A | 1,800 to 4,000 mc | Output 0.1 μ v to 0.223 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration. | 1,950.00 |
| -hp- 618B | 3,800 to 7,600 mc | Output 0.1 μ v to 0.223 v into 50 ohm load. Pulse, CW, FM or square wave modulation. Direct calibration. | 2,250.00 |
| -hp- 620A | 7,000 to 11,000 mc | Output 0.1 μ v to 0.071 v into 50 ohm load. Pulse, CW, FM or square wave modulation. Direct calibration. | 2,250.00 |
| -hp- 622C | 5,925 to 7,725 mc | Output 70 μ v to 0.223 v into 50 ohm load. FM or square wave modulation. Separate power meter and wave meter section. | 1,750.00 |
| -hp- 624C | 8,500 to 10,000 mc | Output 3.0 μ v to 0.223 v into 50 ohm load. Pulse, FM or square wave modulation. Separate power meter and wave meter section. | 2,265.00 |

-hp- Waveguide Test Equipment - 2.6 to 18 kmc

Basic, low-cost test equipment with utmost flexibility for assembly of exact instrumentation for waveguide test. Covers entire range of its waveguide size.

Simple, rugged design; accurate, multi-purpose operation.

| Instrument | "I" 1 1/2" x 1 1/2" 2.95-5.85 kmc. | "G" 2" x 1" 3.95-5.85 kmc. | "J" 1 1/2" x 3/4" 5.85-8.2 kmc. | "H" 1 1/4" x 5/8" 7.05-10.0 kmc. | "X" 1" x 1/2" 8.2-12.4 kmc. | "P" .702" x .391" 12.4-18.0 kmc. |

†For use with bolometer or crystal. §For use with bolometer only. *Complete assembly including carriage. ■Mounts in 809B Carriage—See next page. ■ Includes Thermistor, installed. See page 6.

△ Includes new lightweight all-metal cabinet with carrying handles. Also available for rack mounting at slightly lower prices. Data subject to change without notice. Prices f.o.b. factory.

-hp- Regulated Power Supplies

-hp- 715A POWER SUPPLY

-hp- 715A is a versatile source of regulated beam and reflector voltage for operating most test bench klystron tubes. Beam voltage 250 to 400 v; reflector voltage 0 to 900 v; 6.3 v filament. Internal, 1,000 cps square wave modulation, also 60 cps fm modulation, both on reflector voltage. \$300.00.

-hp- 712B POWER SUPPLY

This new -hp- instrument features high regulation of 0.01%, 0.1 millisecond transient response, internal impedance 0.1 ohms in series with 25 μ H; full-load maximum voltage drop less than 500 μ v, sealed transformers, chokes and capacitors. 0 to 500 v, 200 ma supply and -300 v tap providing a 50 ma, 300 to 800 v supply for klystron operation. \$365.00 Δ .

| Instrument | Primary Uses | Characteristics | Price |
|---------------------------------|---|--|-----------------|
| -hp- 710A Power Supply | General purpose regulated plate and filament supply for lab and field use | 180 to 360 volts at 75 milliamperes | \$ 85.00 |
| -hp- 710B Power Supply | Same as 710A | 100 to 360 volts at 75 milliamperes | 100.00 |
| -hp- 712B Power Supply | Similar to 710A/B. Meets requirements for heavy duty field and lab work | 0 to 500 volts at 200 milliamperes 0.01% regulation | 365.00 Δ |
| -hp- 715A Klystron Power Supply | Regulated beam, reflector source for low power klystrons | 250 to 400 volts at 50 milliamperes | 300.00 |
| -hp- 717A Klystron Power Supply | Regulated beam, reflector source for Type 5721 klystrons | 800 to 1,000 volts at 25 milliamperes | 375.00 |

Equipment below available for most waveguide frequencies

See table at left for data, prices.

-hp- 809B UNIVERSAL PROBE CARRIAGE

-hp- 810 WAVEGUIDE SLOTTED SECTIONS

Convenient, all-purpose -hp- 809B carriage comes with six different -hp- slotted section waveguide and coaxial. Mounts section covering frequencies 3,000 to 18,000 sections interchange in 30 seconds! Non-built carriage calibrated in mm to mm; dial gauge may be mounted. Operates with -hp- 442B Broad Band Probe or -hp- 440A Coaxial Detector in combination, or with -hp- 444A Untuned Probe.

-hp- 810A/B Slotted Sections. -hp- 810B, mounting in 809B carriage, is a flanged waveguide section with accurately machined tapered at ends to minimize reflection. Available in 5 waveguide bands, 3.95 thru 12.5 kmc. -hp- S810A, complete slotted section assembly including probe carriage. Available for 2.6 to 3.95 kmc band only.

-hp- 420A CRYSTAL DETECTOR

Employs a silicon crystal to detect rf signals in Type N coaxial line. Covers frequencies 10 mc to 12.5 kmc. Flat frequency response, excellent conversion efficiency. Modified 1N21 crystal.

-hp- X382A PRECISION ATTENUATOR

Precision broad band attenuation to 50 db. Completely independent of frequency; phase shift constant at all attenuations.

Calibrated range 0 to 50 db, maximum error $\pm 2\%$ of db reading. 8,200 to 12,400 mc. VSWR less than 1.15 full range. Radical new design with rotating attenuator films.

-hp- 281A WAVEGUIDE-COAX ADAPTERS

For convenient transition between waveguide and coax systems. Each unit covers a full waveguide range with VSWR less than 1.25. Equipped with Type N connectors.

-hp- 444A UNTUNED PROBE

A 1N26 crystal plus small antenna in a convenient, easy-to-use housing. Variable penetration depth, no tuning required. Sensitivity equal to single- or double-tuned probes. Frequency range: 2.6 to 18.0 kmc. Mounts in 809B Carriage.

-hp- 487A THERMISTOR MOUNT

For fast, accurate waveguide power measurements. Each mount covers full range of its waveguide frequency. No tuning required, VSWR less than 1.5. Rugged construction, high temperature coefficient permanent thermistors virtually eliminate delays due to detector element burn-out.

-hp- X885A PHASE SHIFTER

For accurate, precisely controlled phase variation throughout X-Band frequencies. Ideal for microwave impedance, transmission measurements, antenna and system design. Direct reading, low power absorption, 360° (electrical) range.

-hp- 752 MULTI-HOLE COUPLER

Directional couplers available in 2 models with coupling factors of 10 and 20 db ± 0.7 db over full range of a waveguide. VSWR better than 1.05. Directivity 40 db or better over entire range. Available as a 3-terminal network.

-hp- 485B DETECTOR MOUNTS

To measure power over complete waveguide range in conjunction with -hp- 430B Power Meter and barretter. Also measures relative level, or detects rf energy using 1N21 or 1N23 crystal. Semi-tuned by movable short to VSWR 1.25.

-hp- 870A SLIDE SCREW TUNERS

For flattening waveguide systems. The position and penetration of a probe is adjusted to set up a VSWR which is used to cancel existing VSWR in system. VSWR values up to 20 can be corrected with accuracy of 1.02 VSWR.

Δ Includes new lightweight all-metal cabinet with carrying handles. Also available for rack mounting at slightly lower prices.

Data subject to change without notice. Prices f.o.b. factory.

-hp- Oscillators — Signal Generators .01 to 10,000,000 cps

-hp- 200 SERIES AUDIO OSCILLATORS

Four widely used -hp- oscillators have been redesigned into two compact, lightweight instruments offering wider frequency range, more operating simplicity, highest accuracy and stability. New Models 200AB and 200CD replace Models 200A through 200D, retain the time-tested RC circuits that insure constant output, low distortion; require no zero set. -hp- also offers Model 202D for sub-audio, audio, supersonic and carrier tests; and Model 200I, a spread-scale oscillator for interpolation or where frequency must be known precisely.

-hp- 650A TEST OSCILLATOR

Highly stable, wide band (10 cps to 10 mc) multi-purpose test oscillator for audio, supersonic, carrier and intermediate frequency tests. Frequency range 10 cps to 10 mc. Output 15 mw/3 v. ± 1 db. Output impedance 600 ohms with voltage divider. \$490.00.

| Instrument | Primary Uses | Frequency Range | Output | Price |
|------------|--|-------------------|------------------|-----------------|
| -hp- 200AB | Audio tests | 20 cps to 40 kc | 1 watt/24.5 v | \$120.00 |
| -hp- 200CD | Audio, ultrasonic tests | 5 cps to 600 kc | 160 mw/20 v * | 150.00 |
| -hp- 200I | Interpolation and frequency measurements | 6 cps to 6 kc | 100 mw/10 v | 225.00 |
| -hp- 200T | Telemetry, carrier current tests | 250 cps to 100 kc | 160 mw/20 v * | 350.00 |
| -hp- 201B | High quality audio tests | 20 cps to 20 kc | 3 w/42.5 v | 250.00 |
| -hp- 202A | Low frequency measurements | .01 cps to 1 kc | 20 mw/10 v | 465.00 Δ |
| -hp- 202B | Low frequency measurements | 1/2 cps to 50 kc | 100 mw/10 v | 365.00 Δ |
| -hp- 202D | Low frequency measurements | 2 cps to 70 kc | 100 mw/10 v | 275.00 |
| -hp- 204A | Portable, battery operated | 2 cps to 20 kc | 2.5 mw/5 v | 175.00 |
| -hp- 205A | High power audio tests | 20 cps to 20 kc | 5 watts | 405.00 Δ |
| -hp- 205AG | High power tests, gain measurements | 20 cps to 20 kc | 5 watts | 440.00 Δ |
| -hp- 205AH | High power supersonic tests | 1 kc to 100 kc | 5 watts | 565.00 Δ |
| -hp- 206A | High quality, high accuracy audio tests | 20 cps to 20 kc | +15 dbm | 565.00 Δ |
| -hp- 230A | Carrier test oscillator | 35 cps to 35 kc | +14 dbm/600 ohms | 275.00 |
| -hp- 235A | Carrier test oscillator | 50 cps to 500 kc | 3w/600 ohms | 475.00 |
| -hp- 236A | Carrier test oscillator | 160 cps to 160 kc | +14 dbm/600 ohms | 300.00 |
| -hp- 650A | Wide range video tests | 10 cps to 10 mc | 15 mw/3 v | 490.00 Δ |

* Output 100 ohms. Internal impedance 600 ohms.

-hp- Distortion and Form Analyzers — 20 cps to 20 kc

-hp- 330B DISTORTION ANALYZER

Measures distortion as low as .01% (100 db). Measures total audio distortion. Includes input amplifier, VTVM usable separately. Wide band 20 db gain amplifier. VTVM usable separately. \$410.00.

FM, AM-FM MOD

-hp- 330C, for FM broadcast meter meeting F.C.C. requirements for AM-FM broadcasters. Will rectify AM carrier, plus AM model 330C. Model 330C. \$455.00 Δ .

| Instrument | Primary Uses | Frequency Range | Characteristics | Price |
|------------------------------|----------------------------------|-----------------|--|-----------------|
| -hp- 330B | Wave form analyzer | 30 cps to 16 kc | Variable selectivity; measuring range 1 mv to 500 v | \$625.00 |
| -hp- 330C | Measures total audio distortion | 20 cps to 20 kc | Includes input amplifier, VTVM | 410.00 Δ |
| -hp- 330D | For FM broadcast measurements | 20 cps to 20 kc | Special VU meter to meet F.C.C. requirements | 440.00 Δ |
| -hp- 330E | For AM-FM broadcast measurements | 20 cps to 20 kc | AM detector and VU meter to meet F.C.C. requirements | 455.00 Δ |
| SQUARE WAVE GENERATOR | | | | |
| -hp- 215A | Transient and frequency response | 20 cps to 10 kc | Output 50 v peak-to-peak 1,000 ohm impedance | 150.00 |

-hp- Vacuum Tube Voltmeters — 2 to 700,000,000 cps

-hp- 400D VACUUM TUBE VOLTMETER

Best -hp- voltmeter ever built! Covers all frequencies 10 cps to 4 mc. Extremely sensitive, wide range, accurate within 2% to 1 mc, measures 0.1 mv to 300 v. Direct reading in dbm. 10 megohm input impedance insures negligible loading on circuits under test. New amplifier circuit with 56 db mid-range feedback assures utmost stability, freedom from change due to external conditions. \$225.00.

| Instrument | Primary Uses | Frequency Range | Voltage Range | Input Impedance | Price |
|------------|---|------------------|--------------------------|-------------------------------|----------|
| -hp- 400A | General purpose ac measurements | 10 cps to 1 mc | .005 to 300 v 9 ranges | 1 megohm 24 μ fd shunt | \$185.00 |
| -hp- 400B | Low frequency ac measurements | 2 cps to 100 kc | .005 to 300 v 9 ranges | 10 megohms 24 μ fd shunt | 195.00 |
| -hp- 400D | Wide range ac measurements. High sensitivity | 10 cps to 4 mc | .0001 to 300 v 12 ranges | 10 megohms 24 μ fd shunt | 225.00 |
| -hp- 404A | Portable, battery operated | 2 cps to 50 kc | .0005 to 300 v 11 ranges | 10 megohms 20 μ fd shunt | 185.00 |
| -hp- 410B | Audio, rf, VHF measurements; dc voltages; resistances | 20 cps to 700 mc | .1 to 300 v 7 ranges | 10 megohms 1.5 μ fd shunt | 245.00 |

-hp- Voltmeter Accessories (not listed) include voltage dividers, connectors, shunts and multipliers to extend the useful range of your equipment.

Δ Includes new lightweight all-metal cabinet with carrying handles. Also available for rack mounting at slightly lower prices.

Data subject to change without notice. Prices f.o.b. factory.

NEW!

hp 524B ELECTRONIC COUNTER

with plug-in units to fit your exact measuring need

Frequency 10 cps to 220 mc, interval 1 μ sec to 100 days and period 0 cps to 10 kc—all are measured instantly, automatically, directly by the revolutionary new *-hp-* 524B. You buy just the instrumentation you need; later add inexpensive plug-in units to double, triple versatility of this complete coverage instrument. Operation requires no calculations or technical training. Counter has high impedance, sensitivity, accuracy, quality construction. \$1,915.00 Δ .

-hp- 525A Frequency Converter extends Counter's basic 10 cps to 10 mc range to 100 mc; increases video sensitivity to 0.1 v, 10 cps to 10 mc. \$225.00.

-hp- 525B Frequency Converter gives Counter range from 100 to 220 mc at 0.25 v sensitivity. \$225.00.

-hp- 526A Video Amplifier increases Counter's sensitivity between 10 cps and 10 mc to 10 millivolts for low level work. \$125.00.

-hp- 526B Time Interval Unit measures interval 1 μ sec to 100 days with accuracy of 0.1 μ sec \pm 0.001%. Reads direct in seconds, milliseconds, microseconds. \$150.00

(Plug-in units supplied in aluminum storage cases)

Other -hp- Frequency Measuring and Monitoring Equipment

-hp- 100D SECONDARY FREQUENCY STANDARD

Swift, sure frequency comparison, new convenience in standardizing with minimum external equipment. 100 μ sec time markers, built-in oscilloscope, sine or rectangular waves. Low impedance; short-time stability 1/1,000,000. Performs most functions of primary standards in rf or supersonic ranges. \$615.00 Δ .

-hp- 335E TV MONITOR

Channels 2 through 83. Exceeds F.C.C. requirements. Compact, only 12 $\frac{1}{4}$ " high, rack mounted. Low cost, all purpose, for visual and aural frequency monitoring, percentage aural modulation. Long-term dependability, precise accuracy, highest stability, no adjustment during operation. Forced ventilation, re-indication features. \$1,950.00.

-hp- 512A/B FREQUENCY CONVERTERS

Two new *-hp-* Frequency Converters extend range of *-hp-* 524A Electronic Counter without loss of accuracy and with increased sensitivity. *-hp-* 512A covers frequencies 10 to 100 mc, 512B covers 100 to 220 mc. Complex setups eliminated, are easily used by non-technical personnel. *-hp-* 512A, 512B, \$350.00.

-hp- 522B ELECTRONIC COUNTER

Compact, low cost, versatile instrument for frequency, period or time measurements. Range 10 cps to 100 kc. Reads direct in cps, kc, seconds or milliseconds. Count automatic-reset, action repetitive. Stability of time base 0.000001. Display length variable. Easily used by untrained personnel. \$915.00 Δ .

| Instrument | Primary Uses | Frequency Range | Characteristics | Price |
|---------------------------------|---|---|---|--------------------|
| -hp- 100C Secondary Standard | Audio, supersonic calibration | 100 kc, 10 kc, 1 kc, 100 cps | Accurate within \pm .001% Sine waves only | \$ 465.00 Δ |
| -hp- 100D Secondary Standard | Frequency, time measurements | 100 kc, 10 kc, 1 kc, 100 cps, 10 cps | Stability 1/1,000,000 (short-time) Sine or rectangular output. Marker pips | 615.00 Δ |
| -hp- 335B Frequency Monitor | FM broadcast station monitor | 88 to 108 mc | Frequency deviation \pm 3 kc; accuracy \pm .001%; modulation 0 to 100 kc | 935.00 |
| -hp- 335E TV Monitor | TV visual, aural and % mod. monitor | Channels 2 through 83 | Indicates visual, aural carrier frequency deviation, % modulation aural carrier | 1,950.00 |
| -hp- 500A Frequency Meter | Rapid frequency measurements | 10 cps to 50 kc | 10 ranges \pm 2% accuracy. Input 0.5 to 200 volts | 210.00 |
| -hp- 505A Electronic Tachometer | Measurements of high speed machinery | 600 to 3,000,000 rpm | 10 ranges \pm 2% accuracy | 220.00 |
| -hp- 505B Electronic Tachometer | Same as 505A | 10 to 50,000 rps | Same as 505A except calibrated in rps | 220.00 |
| -hp- 510A Mixer | Measure frequency continuously with -hp- 500A and 100 D/C | 20 cps to 200,000 cps | Mixes two frequencies, delivers difference to -hp- 500A | 200.00 |
| -hp- 512A Frequency Converter | Extends -hp- 524A range to 100 mc | 100 kc to 100 mc | Fast, direct readings of signals to 100 mc with 524A. No charts, interpolation. Min. input 0.01 v | 350.00 |
| -hp- 512B Frequency Converter | Gives -hp- 524A range 100 to 220 mc | 100 mc to 220 mc | Same as 512A except for frequency coverage and input 0.14 v RMS min. | 350.00 |
| -hp- 520A Nuclear Scaler | For counting high-rate pulses | Capacity 100 counts in 2 decades. 10,000,000 pps counting rate | 100:1 divider for operation of low speed scalars | 615.00 Δ |
| -hp- 522A Electronic Counter | Wide-range frequency, period measurements | 10 cps to 100 kc | Frequency measuring gate time is 1 sec. or multiples; standard frequency counted for period measurement 100 kc | 790.00 Δ |
| -hp- 522B Electronic Counter | Wide-range frequency, period, time interval measurements | 10 cps to 100 kc | Measures rate of occurrences 0.00001 to 100,000/sec.; time interval 10 μ sec to 27.8 hrs.; periods of frequency count 1/1,000, 1/100, 1/10, 1, 10 sec. and multiples. Direct readings in cps, kc, sec. and millisecc. | 915.00 Δ |

Δ Includes new lightweight all-metal cabinet with carrying handles. Also available for rack mounting at slightly lower prices.

Data subject to change without notice. Prices f.o.b. factory.

-hp- Signal Generators - 10 to 11,000 mc

-hp- 612A UHF-TV SIGNAL GENERATOR

450 to 1,200 mc. Master oscillator-power amplifier generator for UHF-TV measurements including gain, selectivity, sensitivity, image rejection. Directly set and read; no charts, no interpolation. Low incidental fm, high-quality broad band video modulation to 5 mc. May be modulated internally or externally, amplitude modulated or pulse modulated. (Good if pulses $> 7 \mu\text{sec}$ or longer.) \$1,200.00.

450 to 1,200 mc. Master oscillator-power amplifier generator for UHF-TV measurements including gain, selectivity, sensitivity, image rejection. Directly set and read; no charts, no interpolation. Low incidental fm, high-quality broad band video modulation to 5 mc. May be modulated internally or externally, amplitude modulated or pulse modulated. (Good if pulses $> 7 \mu\text{sec}$ or longer.) \$1,200.00.

| Instrument | Frequency Range | Characteristics | Price |
|------------|--------------------|---|-------------------|
| -hp- 608A | 10 to 500 mc | Output 0.1 μv to 1 v into 50 ohm load. Pulse or CW modulation. Direct calibration. | \$ 850.00 |
| -hp- 612A | 450 to 1,200 mc | Output 0.1 μv to 0.5 v into 50 ohm load. Pulse, CW or amplitude modulation to 5 mc. Direct calibration. | 1,200.00 |
| -hp- 614A | 800 to 2,100 mc | Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration. | 1,950.00 |
| -hp- 616A | 1,800 to 4,000 mc | Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, CW or FM modulation. Direct calibration. | 1,950.00 |
| -hp- 618B | 3,800 to 7,600 mc | Output 0.1 μv to 0.223 v into 50 ohm load. Pulse, CW, FM or square wave modulation. Direct calibration. | 2,250.00 |
| -hp- 620A | 7,000 to 11,000 mc | Output 0.1 μv to 0.071 v into 50 ohm load. Pulse, CW, FM or square wave modulation. Direct calibration. | 2,250.00 |
| -hp- 623B | 5,925 to 7,725 mc | Output 70 μv to 0.223 v into 50 ohm load. FM or square wave modulation. Separate power meter and wave meter section. | 1,750.00 |
| -hp- 624B | 8,500 to 10,000 mc | Output 3.0 μv to 0.223 v into 50 ohm load. Pulse, FM or square wave modulation. Separate power meter and wave meter section. | 2,265.00 Δ |

-hp- Waveguide Test Equipment - 2.6 to 18 kmc

Basic, low-loss components offer utmost flexibility for assembly of exact instrumentation required. Each unit covers entire range of its waveguide size.

Simple, rugged, standard design; accurate, multi-purpose operation.

| Instrument | "B" 1 1/2" x 1 1/2" 3.95-5.85 kmc. | "G" 2" x 1" 3.95-5.85 kmc. | "J" 1 1/2" x 3/4" 5.85-8.2 kmc. | "H" 1 1/4" x 5/8" 7.05-10.0 kmc. | "X" 1" x 1/2" 8.2-12.4 kmc. | "P" .702" x .391" 12.4-18.0 kmc. |

†For use with bolometer or crystal.

‡For use with bolometer only.

*Complete assembly including carriage.

§Mounts in 809B Carriage—See next page.

Δ Includes new lightweight all-metal cabinet with carrying handles. Also available for rack mounting at slightly lower prices.

Data subject to change without notice. Prices f.o.b. factory.

-hp- Regulated Power Supplies

-hp- 715A POWER SUPPLY

-hp- 715A is a versatile source of regulated beam and reflector voltage for operating most test bench klystron tubes. Beam voltage 250 to 400 v; reflector voltage 0 to 900 v; 6.3 v filament. Internal, 1,000 cps square wave modulation, also 60 cps fm modulation, both on reflector voltage. \$300.00.

-hp- 712B POWER SUPPLY

This new **-hp-** instrument features high regulation of 0.01%, 0.1 millisecond transient response, internal impedance 0.1 ohms in series with 25 μ H; full-load maximum voltage 500 v, sealed transformers, chokes and condensers. 0 to 500 v, 200 ma supply and —300 v tap providing a 50 ma, 300 to 800 v supply for klystron operation. \$365.00 Δ .

less than 500 μ v, sealed transformers, chokes and condensers. 0 to 500 v, 200 ma supply and —300 v tap providing a 50 ma, 300 to 800 v supply for klystron operation. \$365.00 Δ .

| Instrument | Primary Uses | Characteristics | Price |
|---|---|--|-----------------|
| -hp- 710A Power Supply | General purpose regulated plate and filament supply for lab and field use | 180 to 360 volts at 75 milliamperes | \$ 85.00 |
| -hp- 710B Power Supply | Same as 710A | 100 to 360 volts at 75 milliamperes | 100.00 |
| -hp- 712B Power Supply | Similar to 710A/B. Meets requirements for heavy duty field and lab work | 0 to 500 volts at 200 milliamperes 0.01% regulation | 365.00 Δ |
| -hp- 715A Klystron Power Supply | Regulated beam, reflector source for low power klystrons | 250 to 400 volts at 50 milliamperes | 300.00 |
| -hp- 717A Klystron Power Supply | Regulated beam, reflector source for Type 5721 klystrons | 800 to 1,000 volts at 25 milliamperes | 375.00 |

Equipment below available for most waveguide frequencies

See table at left for data, prices.

-hp- 809B UNIVERSAL PROBE CARRIAGE

-hp- 810 WAVEGUIDE SLOTTED SECTIONS

Convenient, all-purpose **-hp-** 809B carriage mates with six different **-hp-** slotted section waveguide and coaxial. Mounts sections *interchange in 30 seconds!* Precision-built carriage calibrated in mm to mm; dial gauge may be mounted. Operates with **-hp-** 442B Broad Band Probe or **-hp-** 440A Coaxial Detector in combination; or with **-hp-** 444A Untuned Probe.

-hp- 810A/B Slotted Sections. **-hp-** 810B, mounting in 809B carriage, is a flanged waveguide section with accurately machined tapered ends to minimize reflection. Available in 5 waveguide bands, 3.95 thru 18.0 kmc. **-hp-** S810A, complete slotted section assembly including probe carriage. Available for 2.6 to 3.95 kmc band only.

-hp- 420A CRYSTAL DETECTOR

Employs a silicon crystal to detect rf signals in Type N coaxial line. Covers frequencies 10 mc to 12.5 kmc. Flat frequency response, excellent conversion efficiency. Modified 1N21 crystal.

-hp- X382A PRECISION ATTENUATOR

Precision broad band attenuation to 50 db. Completely independent of frequency; phase shift constant all attenuations.

Calibrated range 0 to 50 db, maximum error $\pm 2\%$ of db reading. 8,200 to 12,400 mc. VSWR less than 1.15 full range. Radical new design with rotating attenuator films.

-hp- 281A WAVEGUIDE-COAX ADAPTERS

For convenient transition between waveguide and coax systems. Each unit covers a full waveguide range with VSWR less than 1.25. Equipped with Type N connectors.

-hp- 444A UNTUNED PROBE

A 1N26 crystal plus small antenna in a convenient, easy-to-use housing. Variable penetration depth, no tuning required. Sensitivity equal to single- or double-tuned probes. Frequency range: 2.6 to 18.0 kmc. Mounts in 809B Carriage.

-hp- 487A THERMISTOR MOUNT

For fast, accurate waveguide power measurements. Each mount covers full range of its waveguide frequency. No tuning required, VSWR less than 1.5. Rugged construction, high temperature coefficient permanent thermistors virtually eliminate delays due to detector element burn-out.

-hp- X885A PHASE SHIFTER

For accurate, precisely controlled phase variation throughout X-Band frequencies. Ideal for microwave impedance, transmission measurements, antenna and system design. Direct reading, low power absorption, 360° (electrical) range.

Directional couplers available in 2 models with coupling factors of 10 and 20 db ± 0.7 db over full range of a waveguide. VSWR better than 1.05. Directivity 40 db or better over entire range. Available as a 3-terminal network.

-hp- 752 MULTI-HOLE COUPLER

Directional couplers available in 2 models with coupling factors of 10 and 20 db ± 0.7 db over full range of a waveguide. VSWR better than 1.05. Directivity 40 db or better over entire range. Available as a 3-terminal network.

-hp- 485B DETECTOR MOUNTS

To measure power over complete waveguide range in conjunction with **-hp-** 430B Power Meter and barretter. Also measures relative level, or detects rf energy using 1N21 or 1N23 crystal. Semi-tuned by movable short to VSWR 1.25.

-hp- 870A SLIDE SCREW TUNERS

For flattening waveguide systems. The position and penetration of a probe is adjusted to set up a VSWR which is used to cancel existing VSWR in system. VSWR values up to 20 can be corrected with accuracy of 1.02 VSWR.

Δ Includes new lightweight all-metal cabinet with carrying handles. Also available for rack mounting at slightly lower prices.

Data subject to change without notice. Prices f.o.b. factory.

Microwave Power Measuring Equipment

-hp- 430B MICROWAVE POWER METER

No computations! Provides instantaneous, automatic power readings direct in db or mw at all frequencies for which there are suitable bolometer mounts. For CW measurements, uses either

1/100 amp. fuse or Sperry 821 barretter. Also measures CW or pulsed power with negative coefficient thermistor. Operates with all mounts in adjacent table. \$250.00.

-hp- 475B/476A BOLOMETER MOUNTS

-hp- 476A Universal Bolometer Mount measures rf power 10 to 1,000 mc. No tuning or adjustment. VSWR less

than 1.15, 20 to 500 ohms. \$85.00. **-hp- 475B Tunable Mount** (upper), continuous 1,000 to 4,000 mc. \$200.00.

| Instrument | Primary Uses | Frequency Range | Characteristics | Price |
|--------------------------------------|-------------------------|----------------------------|--|------------------|
| -hp- 430B Microwave Power Meter | Measurement of rf power | Depends on Bolometer mount | .01 to 10 mw \pm 5% accuracy | \$250.00 |
| -hp- 475B Tunable Bolometer Mount | Measurement of rf power | 1,000 to 4,000 mc | Matches 50-ohm line to 100 or 200 ohms | 200.00 |
| -hp- 476A Universal Bolometer Mount | Measurement of rf power | 10 to 1,000 mc | No tuning required VSWR less than 1.25 | 85.00 |
| -hp- 477A Coaxial Thermistor Mount | Measurement of rf power | 10 to 10,000 mc | Broad band, low VSWR, no tuning | 75.00 |
| -hp- 485 Waveguide Detector Mount | Measurement of rf power | 2,600 to 18,000 mc | Full coverage of waveguide band | See Table page 4 |
| -hp- 487A Waveguide Thermistor Mount | Measurement of rf power | 4,000 to 12,000 mc | Full coverage, no tuning, 1.5 VSWR | See Table page 4 |

-hp- 477A COAXIAL THERMISTOR MOUNT

For frequency range 10 mc to 10 kmc. VSWR less than 1.5. Thermistor element is 200 ohm negative. Input connector type N, output Type BNC. \$75.00.

Microwave Impedance Measuring Equipment

-hp- 805A/B COAXIAL SLOTTED SECTION

Range 500 to 4,000 mc. High accuracy, negligible slope, minimum loss. Parallel plane design, VSWR of section and connectors, 1.04. **-hp- 805A**, 50 ohm N coaxial connector. **-hp- 805B**, 45 ohm $\frac{7}{8}$ " rigid transmission lines. \$475.00.

-hp- 806B COAXIAL SLOTTED SECTION

For continuous coverage at all frequencies from 3,000 to 12,000 mc. For use with **-hp- 806B** carriage. Section and connector VSWR 1.04 to 1.05. 50 ohm impedance, negligible slope. Type N connectors, \$200.00.

| Instrument | Primary Uses | Frequency Range | Characteristics | Price |
|------------------------------------|---|--|--|-----------------|
| -hp- 440A Band Pass Filters | Eliminates harmonic voltages from UHF systems | Cutoff frequencies A-700 mc B-1,200 mc C-2,200 mc D-4,100 mc | 50 db rejection at 1.2 cutoff freq. | \$ 40.00 |
| -hp- 415A Standing Wave Indicator | VSWR indicator or null indicator | 300 to 2,000 cps Normal freq. 1,000 cps | 0 to 60 db. attn. Max. sensitivity 0.3 μ v | 200.00 |
| -hp- 417A VHF Detector | Measure reflection coefficient, VSWR | 1,000 cps \pm 40 cps | Min. 3 millivolts or 0.3 μ v; accuracy \pm 2% | 365.00 Δ |
| -hp- 803A VHF Bridge | VHF bridge detector (for -hp- 803A) | 10 to 500 mc | Approx. 5 μ v sensitivity | 250.00 |
| -hp- 803A VHF Bridge | Measurement of VHF impedance, VSWR | 50 to 500 mc | 2 to 2,000 ohms impedance -90° to $+90^\circ$ phase angle | 495.00 |
| -hp- 805A Coaxial Slotted Section | Measurement of VSWR | 500 to 4,000 mc | For Type N Connectors, flexible cables | 475.00 |
| -hp- 805B Coaxial Slotted Section | Same as above | Same as above | For rigid $\frac{7}{8}$ " RG44/U line | 475.00 |
| -hp- 806B Coaxial Slotted Section | Same as above (Mounts in 809B) | 3,000 to 12,000 mc | For Type N Connectors, flexible cables | 200.00 |
| -hp- 809B Universal Probe Carriage | Supports 806B section, also G, J, H, X and P 810 Waveguide sections | | Accepts 442B and 444A probes | 160.00 |

-hp- 803A VHF BRIDGE

Gives fast, direct readings of any impedance between 50 and 500 mc. Measures by sampling electric and magnetic fields in transmission line. Usable for comparative measurements 5 to 700 mc. Impedance range 2 to 2,000 ohms. Phase angle -90° to $+90^\circ$, at 52 mc and above. Also measures SWR, % reflected power, VHF system flatness. \$495.00.

-hp- 417A VHF DETECTOR

For use with 803A Bridge; or general laboratory use. Super-regenerative receiver, 10 to 500 mc. 5 bands. Approx. 5 μ v sensitivity over entire band. Direct reading frequency control, thoroughly shielded. \$250.00.

-hp- 415A STANDING WAVE INDICATOR

For all waveguide or coaxial slotted sections. Gives readings in VSWR or db. Single frequency operation; 300 to 2,000 cps. Low noise level, 0.3 μ v sensitivity, 60 db. calib. attenuator. \$200.00.

Δ Includes new lightweight all-metal cabinet with carrying handles. Also available for rack mounting at slightly lower prices.

Data subject to change without notice. Prices f.o.b. factory.

Amplifiers for General Use and Fast-Circuit Work

-hp- 460A/B AMPLIFIERS

Complete instrumentation for distortion-free fast pulse measurement. *-hp- 460A Wide Band Amplifiers*, in cascade with *-hp- 460B Fast-Pulse Amplifiers* offer up to 90 db gain, 125 open circuit output. This permits full deflection of 5XP CRT, or 2-inch deflection of 5CP tubes. Rise time 0.0026 μ sec; can amplify milli-microsecond pulses; gives over 100 mc bandwidth to your standard oscilloscope. 460A, \$185.00; 460B, \$225.00. Connecting cables, plugs, accessories—prices on request.

-hp- 450A AMPLIFIER

Time-tested, general purpose instrument, 20 db or 40 db gain, for use wherever wide frequency range and high stability are needed. 10 cps to 1 mc. Negligible phase shift, no spurious responses. \$140.00.

-hp- 490A/491A TRAVELING-WAVE TUBE AMPLIFIERS

Two new broad band linear instruments providing a new, simple way to amplify, modulate, or increase power to 1 watt. Full S-Band coverage—2 to 4 kmc; 30 and 35 db gain, millimicrosecond pulse modulation, radical new coupled-helix design. High gain, low noise. *-hp- 490A*, \$1,100.00. *-hp- 491A*, \$1,100.00 (Includes capsulated tube).

Complete coverage

In electronic test instruments—complete coverage

In development—at work designing instruments that advance electronics.

In instrumentation—and most complete systems the ones that give you require.

In frequency coverage—of useful electronic

useful frequencies, too. For example, *-hp-* signal generators offer solid frequency coverage from 10 to 11,000 mc; *-hp-* voltmeters from 2 to 700,000,000 cps, oscillators from 0.01 to 10,000,000 cps.

In personal service—*-hp-* has selected the best independent organizations in America to give you personal help with measuring problems. Electronics specialists—men trained by Hewlett-Packard—save you time by helping select the exact *-hp-* instrumentation you need—and following through to be sure the equipment is properly utilized to serve you best. These men are located in major business centers—as near as your telephone. Call them when you need personal help, — in your plant, today.

A New High in Rectifier Performance!

NEW VICKERS SELENIUM RECTIFIER

combines

HIGH VOLTAGE

HIGH AMBIENT

LONG LIFE

**Gives you more watts per dollar
initial cost... lower annual cost**

*Vickers offers
a selenium rectifier
which combines
the most desirable
features
sought by
users of
rectifiers*

HIGH VOLTAGE

40-volt rating with:

- **Low leakage:** leakage of new Vickers rectifier averages 2 milliamperes per square inch — one-half that of conventional rectifiers.
- **Low inverse loss:** heating as a result of low inverse loss at high voltage averages less than 5°C. — one-half that of conventional rectifiers.
- **High dielectric quality:** new Vickers rectifiers withstand surges up to twice rated voltage.

HIGH AMBIENT

- Operate in ambient temperatures up to 125°C.
- No derating for 50°C.
- New Vickers rectifiers operate at temperatures that would destroy ordinary rectifiers — withstand accidental temperature excesses due to overload or cooling malfunction.

LONG LIFE

- Newly developed inorganic barrier is inherently stable.
- Inverse characteristics actually improve in service.
- Life test now past 25,000-hour mark.

PILOT LIGHTS

designed to meet every requirement for indication . . . automation . . . miniaturization

DIALCO

WHILE designing a new product (or improving an old one), you will profit substantially by including a *Dialco* Pilot Light. *Low in cost, compact, and dependable* under severest conditions, *Dialco* Pilot Lights render a vital three-fold service:

Enhanced appearance: The glow of light and sparkle of a lens add colorful visual attraction.

Greater safety: A timely warning flashed by a pilot light can prevent damage to equipment.

Added service: Discs inserted behind lenses can be used to deliver specific messages, such as "FUEL LOW", "EMPTY", "GYRO", "ON", "OFF", etc.

THE COMPLETE LINE: At *Dialco* you have a virtually unlimited selection of Pilot Lights—from *sub-miniature types* to *giant units* with 1½" lenses. Such special features as MIL spec insulation, water-tightness, dull-black finish, and others may be specified. For NEON lamps, *Dialco* provides Pilot Lights with **built-in resistors** (patent #2,421,321) for 115 or 230 volts; also simple external resistors for all higher voltages.

EVERY ASSEMBLY IS AVAILABLE COMPLETE WITH LAMP: Assure complete satisfaction—let the *Dialco* Engineering Dept. assist you in selecting the *right* lamp and the *most suitable* pilot light for your needs.

SAMPLES ON REQUEST — at once — no charge

Sub-Miniature Units Shown approx. 70% actual size:

(A) No. *TT-51*; No. *TT-51A* with No. 327 lamp. For edge lighting. Red or other color filters, black top . . . (B) No. *8-3730-111*, for MIL-P-7788 panel . . . (C) No. *4-1930*, light shield . . . (D) No. *8-1930-111*, non-dimming . . . (E) No. *11-1930-111*, mechanical dimmer; No. *3-1930-111*, polaroid dimmer.

Units requiring ⅛" to 1" mounting clearance holes: 70% actual size:

(F) No. *521308-991*, for neon lamps, with multi-vue cap . . . (G) No. *922210-111*, for T3¼ lamps, dimmer type for aircraft . . . (H) No. *47901*, for S-6 lamp, with light shield cap . . . (I) No. *303529-211*, for S-11 lamp; for heavy duty industrial equipment.

PRESENTS THIS PROVEN GROUP OF electronic instruments

8 WIDE-RANGE AUDIO **oscillators** 0.001 cps to 520 kc

MODEL 440-A

Features

Frequency range, continuous from 0.001 cps. to 100 kc
Distortion less than 0.1% at any output level
Excellent frequency stability and resetability
Amplitude variation less than ± 0.25 db
Frequency calibration $\pm 1\%$
Both Sine and Square Waves simultaneously
Hum less than 0.1% at any output level

| Model | Frequency Range | Frequency* Accuracy | Output | Dis-tortion | Power Consumption | Price |
|----------|--------------------|---------------------|------------|-------------|-------------------|----------|
| 400-A | .009 cps to 1.1 kc | 2% | 25 mw/10v | 1% | 45 watts | \$350.00 |
| 410-A** | .02 cps to 20 kc | 2% | 10 mw/5v | 1/10% | 150 watts | \$950.00 |
| 420-A | .35 cps to 52 kc | 2% | 25 mw/10v | 1% | 45 watts | \$290.00 |
| 430-B** | 4.5 cps to 520 kc | 2% | 50 mw/10v | 1% | 45 watts | \$120.00 |
| 400-C*** | .009 cps to 1.1 kc | 2% | 100 mw/10v | 1% | 65 watts | \$375.00 |
| 420-C*** | .35 cps to 52 kc | 2% | 100 mw/10v | 1% | 65 watts | \$325.00 |
| 440-A** | .001 cps to 100 kc | 1% | 100 mw/10v | 1/10% | 120 watts | \$495.00 |
| 440-B** | 1 cps to 100 cps | 1/20% | 100 mw/10v | 1/10% | 110 watts | \$950.00 |

All oscillators except 430-B and 440-B have both sine wave and square wave.

6 VARIABLE ELECTRONIC **filters** 0.01 cps to 200 kc

MODEL 330

Features

Unity Pass band gain with 24 db/octave attenuation rates and reduced corner frequency attenuation
Ultra-low frequency coverage with adjustable center frequency and band width
Low internally generated noise
Input and output buffer stages
Electronic regulated supplies
Five decade bands

| Model | Type | Frequency Range | Frequency* Accuracy | Noise & Hum | Power Consumption | Price |
|---------|-----------|--------------------|---------------------|-------------|-------------------|----------|
| 310-A** | Band Pass | 20 cps to 200 kc | 10% | 3 mv | 40 watts | \$275.00 |
| 330-A** | Band Pass | .02 cps to 2 kc | 5% | 0.1 mv | 50 watts | \$450.00 |
| 330-M** | Band Pass | 0.2 cps to 20 kc | 5% | 0.1 mv | 50 watts | \$450.00 |
| 340-A | Servo | 0.1 cps to 100 cps | 5% | 10 mv | 40 watts | \$350.00 |
| 350-A** | Rejection | .02 cps to 2 kc | 5% | 0.1 mv | 50 watts | \$450.00 |
| 360-A** | Rejection | 20 cps to 200 kc | 10% | 5 mv | 40 watts | \$275.00 |

*Slightly higher at ends of dial.
***Rack panel construction.

**Available for rack mounting at \$5.00 additional.

A NEW **CATALOG** GIVING COMPLETE DESCRIPTIONS OF THE ENTIRE LINE IS AVAILABLE UPON REQUEST. PLEASE WRITE

INSTRUMENT COMPANY

Dept. B, 580 MASS. AVE., CAMBRIDGE 39, MASS.

for control of SHOCK and VIBRATION

ALL-METL VIBRATION ISOLATORS

Types M44 and M64 . . . have non-packing, wire-mesh damper; meet latest Government specifications for airborne electronic equipment; ruggedized; light weight, operate over wide temperature range. **ASK FOR BULLETINS 534, 536**

UNIT VIBRATION ISOLATOR

Type 915 . . . to isolate vibration and noise caused by high-speed motors, motor-generator sets, and rotating machinery; load ratings to 200 pounds. **ASK FOR BULLETIN 532**

AIR-DAMPED VIBRATION ISOLATORS

Types 780 (JAN#2), 770 (JAN#1), and 6475 (Miniaturized) . . . to protect airborne equipment; meet latest Gov't specifications; give maximum protection under normal service conditions. **ASK FOR CATALOG 523-A**

ISOLATORS for VERY LIGHT LOADS

Small, rubber, vibration isolators for light-duty, low-cost service; load ratings from 2 ounces to 9 pounds. **ASK FOR CATALOG 504-B**

RACKS and MOUNTING BASES

To meet dimensional and material requirements of JAN-C-172; also special sizes to fit customer's needs; built with ALL-METL or AIR-DAMPED unit Barrymounts. **ASK FOR CATALOG 523-A**

SHOCK MOUNTINGS — CUP TYPE

To absorb high-impact shocks; equal stiffness in all directions; self-captivating metal parts; steel or aluminum shells; load ratings to 1800 pounds. **ASK FOR CATALOG 504-B**

SHOCK MOUNTINGS — PLATE TYPE

Particularly suited to mount mobile communications equipment, shipboard equipment, and in vehicular use where shock protection and high stability of mounted equipment are required. **ASK FOR BULLETIN 541**

ENGINEERING DATA FILE

Lists all Barry bulletins, technical articles, reprints. Files your own copies for ready reference. Gives the names, addresses, and telephone numbers of all Barry sales representatives.

SHOCK-TESTING MACHINES

Types 150-400 VD and 20 VI . . . produce the types of shock required for Government acceptance testing of airborne equipment; specifically designed for uniformly reproducible shock testing in development engineering and quality control work. **ASK FOR BULLETINS 533 and 535.**

COMPLETE ENGINEERING SERVICE

- **Application engineering** — Our Field Engineering service gives you the full benefit of the widest practical experience, backed by complete testing and development laboratory facilities.
- **Development engineering** — When a totally new design is needed, our engineers can analyze your problem and develop an isolating system to solve it.
- **Consulting engineering** — Barry engineers can set up and carry out scientifically designed tests to learn how shock and vibration affect your products, can tell you how to protect your equipment, and can help you solve a variety of problems in shock and vibration.

THE BARRY CORPORATION 700 PLEASANT ST., WATERTOWN 72, MASS.

OHMITE[®] FOR LONG LIFE AND DEPENDABILITY

RHEOSTATS

All-ceramic and metal, close control rheostats for unsurpassed dependability and smoothness of operation. Ten stock sizes, 25 to 1,000 watts.

RESISTORS

A wide range of dependable, fixed, adjustable, tapped, and non-inductive, power wire-wound resistors. Also a wide range of precision resistors.

TAP SWITCHES

Five compact models, 10 to 100 amperes, AC, up to 12 taps. All-ceramic and metal construction. Silver-to-silver contacts, with self-cleaning rotor contact.

R. F. CHOKES

Single layer R. F. plate chokes and power line chokes, on steatite or plastic cores. Protected by a special moisture resistant coating.

Be Right with **OHMITE[®]**

WRITE on Company Letterhead for Catalog and Engineering Manual No. 40

OHMITE[®] offers an unusually complete line of MIL TYPE RHEOSTATS AND RESISTORS

The ONLY COMPLETE LINE

MIL-R-22A RHEOSTATS

Ohmite can furnish rheostats to meet MIL-R-22A requirements in each of the 26 type designations. These severe requirements again prove the dependability of Ohmite rheostats. All-ceramic construction, close control, and smooth operation insure years of trouble-free service. It will pay you to standardize on Ohmite rheostats.

MIL-R-26B wire-wound RESISTORS

Ohmite offers an unusually complete line of tab-terminal, ferrule-terminal, axial-terminal tubular resistors, and tab-terminal, flat type resistors that meet the most rigid requirements (char. "G," "J," and "F") of MIL-R-26B. Ohmite offers 33 of the 38 resistor styles listed in MIL-R-26B, in a complete range of resistance values.

OHMITE[®]

FIRST IN RESISTANCE PRODUCTS

OHMITE MANUFACTURING COMPANY, 3607 Howard Street, Skokie, Illinois (Suburb of Chicago)

OPEN TYPE. Circuit switching — power and dynamotor loads — plate circuit — low capacitance.

TRANSPARENT PLASTIC COVER. Most R-B-M relays now available in low cost transparent plastic cover.

HERMETICALLY SEALED. Stud or bushing mounting — solder or plug-in headers — circuit switching — power — low loss applications.

PROGRESS REPORT...

SINCE OUR ANNOUNCEMENT IN FEBRUARY 1953 OF THE FIRST SUCCESSFUL TRANSISTOR-MAGNETIC SERVO AMPLIFIER, WE HAVE DEVELOPED A LINE OF STANDARD, AND MINIATURIZED CONTROLLERS. These . . .

Servo Magnetics

are ready now as standard components for your servo loops.

MODEL 420-B

Transistor-magnetic circuitry driving the MK 14 Mod O motor. Small size, light weight, and simple to use. Designed initially for reliable operation in a miniaturized airborne computing loop.

MODEL 456-B

One premium tube, conservatively used, approaches in reliability the mag output stage. Power gain, 6X10⁶; Zero stable to 71° C! Developed for potentiometer follow-up, but works equally well with synchro data. For MK7 Mod O motor.

MODEL 465-B

All mag circuit for MK7 Mod O motor. Full output with 1 ampere turn of control. Supplied with control windings for any current sensitivity. Quick disconnect fasteners and sealed octal header.

Their versatility and reliability is such that they can be used as standard components, like a servo motor or autosyn. No damping tachometers or power supplies are required. There are only six connections: 2 for input, two for output, 2 for 117 V. 400 cps. Precise regulation of line voltage and frequency is not necessary. Often the nameplate carries full applications data, and system connections.

THESE AMPLIFIERS HAVE RADICALLY NEW CHARACTERISTICS . . .

- ZERO STABLE WITH LINE VOLTAGE, TEMPERATURE AND FREQUENCY.
- POWER SUPPLY—400 CPS LINE ONLY.
- BUILT IN SERVO LOOP STABILIZATION.
- HERMETICALLY SEALED AND POTTED.
- MINIATURIZED AND LIGHT WEIGHT.

Bypass costly development time and delivery delay in your systems work with these time-tested amplifiers. Whether standard or special, meticulous production techniques insure complete reliability. Delivery on special prototypes is prompt, because of our backlog of engineering designs. These amplifiers are backed by a continuing research and development program.

SERVO AMPLIFIER

TYPE 420B SER.

LINE VOLTAGE 117 V. 400 \sim
 OPERATING AMBIENT 55° C MAX.
 STORAGE AMBIENT 75° C MAX.

LOCKING BUSHINGS FOR TYPE 65 CONTROL.

LOCKING BUSHINGS FOR CONTROL TYPES 25, 252, 95, 35, 90, 45.

Since it pioneered the field years ago, Sorensen has been the acknowledged leader in electronic power control. Its standard line includes a wide variety of instruments in a broad range of capacities to meet practically any needs; all are notable for sound design, conservative rating, and fine workmanship. Most items can be delivered quickly in reasonable quantities. Sorensen invites your inquiries concerning special instruments to meet unusual requirements.

AC REGULATORS

Utilizing the original Sorensen circuit and incorporating the SAFETY DIODE, these regulators are noted for economical operation, accuracy, and easy maintenance.

ELECTRICAL CHARACTERISTICS

| Models available (numbers indicate voltage & current) E-6-5A E-6-15A E-6-40A E-6-100A E-12-5 E-12-15 E-12-50 E-28-5 E-28-10 E-28-30 E-28-70 E-28-150 E-48-15 E-125-10 E-200-5 (Also Model SWR-5 with output either 6VDC @ 10 amp or 12VDC @ 5 amp) | Input | 95-130 VAC, 1 ϕ , 50-60 cycles. 120/208 3 ϕ , 4-wire wye for the E-28-150. The E-28-70 requires 190-260, 1 ϕ power. |
| | Reg. accuracy | $\pm 0.2\%$ against line or load at 105-125 v. input |
| | Ripple | 1% RMS max. |
| | Load range | 1/10 to full load |
| | Output range | Adjustable $\pm 10\%$; down to 20% at lesser accuracy |
| | Recovery time | 0.2 seconds on all models up to 1 KW rating, increasing to 0.5 seconds at 10KW |
| | Miscellaneous | Normally for rack mounting - cabinets available. Normal finish - gray wrinkle. Meters standard in some models; available in all. |
| | Note | "A" model output either 6 or 7 volts |

B-NOBATRONS (high-voltage, low current, regulated DC supplies)

These B-Supplies have been designed to meet the broadest technical and economical requirements. The internal impedance figures given are from measurements in accordance with IRE specifications for measurement of power supply internal impedance.

ELECTRICAL CHARACTERISTICS

| UNIT | 325BB | 350B (dual supply) | 560BB | 500BB | 600BB | 1000BB |
|--|---------------|-----------------------|---------------|---------------|--|-------------|

| Max. bias circuit impedance | 25000 ohms | - - - | 25000 ohms | 25000 ohms | 50000 ohms | - - - |
| Internal impedance (max.) | 2.0 ohms | 2.0 ohms | 2.0 ohms | 2.0 ohms | 2.0 ohms | 2.0 ohms |
| AC input range is 105-125 volts, single phase, 50-60 cycles. | | | | | | |
| AC voltage (C.T., unregulated) | 6.3 @ 10 amp. | - - - | 6.3 @ 10 amp. | 6.3 @ 10 amp. | 6.3 @ 15 amp. | - - - |

* (1). 175-350 VDC at 0-60 Ma in each of two supplies simultaneously. Each adjusted independently, but with a common negative. (2). 175-350 VDC at 120 Ma in a single supply. (3) 0-175 VDC at 0-60 Ma in a single supply. For condition (3) maximum regulation is 1.5 volt.

NOBATRON-RANGERS (Wide-range variable regulated DC sources)

ELECTRICAL CHARACTERISTICS

| | | | |
|---------------|--|--------|---------|
| Input range | 95-130 VAC, 1 ϕ , 50-60 cycles for SR30 and SR100. 190-260 VAC, 1 ϕ , 50-60 cycles for the SR2. | | |
| Reg. accuracy | $\pm 0.25\%$ at any voltage setting. | | |
| Ripple | 1% RMS max. | | |
| Output | Model | SR-100 | SR-30 |
| | VDC | 5-135 | 5-30 |
| | Amps | 1-10 | 3-30 |
| | | | SR-2 |
| | | | 100-300 |
| | | | 1-10 |

These versatile and popular instruments have electrical characteristics similar to the standard Nobatrons, except that output voltage is continuously adjustable. Circuitwise, they incorporate adaptations of the Nobatron circuit.

FREQUENCY CHANGERS

Electronically controlled, these instruments give accurate control of voltage and frequency, with good wave shape. They may be placed next to the load, eliminating the need for costly installation.

ELECTRICAL CHARACTERISTICS

| | |
|-----------------------|---|
| Input voltage range | 95-130 VAC, 1 ϕ , 50-60 cycles for the FCD250. 208 or 230 VAC \pm 10%, 1 ϕ , 50-60 cycles for the FCD1000 and FC1000. |
| Output voltage | 115 VAC, 1 ϕ , adjustable between 110-120 volts |
| Output frequency | FCD250 & FCD1000 — 400 cycles, adjustable \pm 10%. FC1000 — 60 cycles, adjustable between 45-65 cycles. |
| Output voltage reg. | \pm 1% |
| Output frequency reg. | \pm 1% in standard model \pm 0.01% with auxiliary frequency standard (fixed output) |
| Load range | 0-250 VA in the FCD250 0-1000VA in the FCD1000 and FC1000 |
| Distortion | 5% maximum |

\pm 0.01% REGULATION MODELS

Extremely precise, these are nonetheless rugged, serviceable instruments. The AC regulator is used primarily in calibration applications; the DC source is designed to power the Beckman Model DU Spectrophotometer.

ELECTRICAL CHARACTERISTICS

| | | |
|---|--------------------|---|
| Super-accurate AC Line Regulator Model 1001 | Load range | 0-1000 VA |
| | Input volt. range | 95-130 VAC, 1 ϕ , 55-65~ |
| | Load P.F. range | 0.7 lagging to 0.95 leading |
| | Output voltage | 115 VAC 1 ϕ (adjustable from 110-120 volts) |
| | Distortion | 3% max. |
| | Time constant | 0.1 seconds |
| | Reg. accuracy | \pm 0.01% |
| DC Power Source for Spectrophotometers Model E-6/2-5 Nobatron | Input volt. range | 95-130 VAC 1 ϕ , 50-60 cycles |
| | Output #1 for lamp | 6VDC adjustable \pm 5% at 5 amperes |
| | #2 for filament | 6VDC at 100 Ma. |
| | #3 for bias | 2VDC adjustable \pm 10% at 100 Ma. |
| | Filtering #1 | 1% max. |
| | #2 & 3 | 0.05% max. |
| | Reg. accuracy | \pm 0.01% against line changes |
| | Time constant | Output voltage is insensitive to fluctuations in input line |

TUBELESS REGULATED DC SOURCES

These units have been designed for heavy-duty industrial applications. Tubeless, and utilizing magnetic amplifier principles, they offer the utmost in reliability.

ELECTRICAL CHARACTERISTICS

| MODEL | MA6/15 | MA2850 |
|---------------|--|---|
| Input | 190-230 on 208 line, 1 ϕ , 60~ | 190-230, 3 ϕ , 4-wire, wye, 60~ |
| | 210-250 on 230 line, 1 ϕ , 60~ | |
| Output | 4.5-7.7 VDC at 0-100 amperes 8.5-15.4 VDC at 0-75 amperes | 23-32 VDC at 0-50 amperes |
| Ripple | 1% max. RMS | 3% max. RMS |
| Reg. Accuracy | \pm 1% against line and load combined | \pm 1% against line and load combined |
| Time constant | 0.2 seconds | 0.5 seconds |

LE EQUIPMENT

ORS — The characteristics are similar to 60-cycle equipment, except that regulation accuracy is \pm 0.5%, distortion and capacities are 250, 500, 1200, and 2500 VA. NOBATRONS — With the same general specifications as 60-cycle instruments are available with outputs of 6 VDC at 40 amperes, 12 VDC at 10 amperes, and 28 VDC at 10 amperes.

CALLY SEALED & MILITARIZED REGULATORS

ments of many Sorensen instruments can be hermetically sealed by the Fosterite process (Sorensen does this under West) or by standard potting. Sorensen also builds equipment to meet MIL-T-27 and JAN specifications on resistance to humidity, etc.

L CATALOG

ation on all the instruments in the Sorensen line will be found in the new general catalog. For your free copy, write ad to Sorensen & Co., Inc., 375 Fairfield Ave., Stamford, Conn. In Europe, correspond directly with Sorensen A. G., Zurich 2, Switzerland.

special *ElectroniK* recorders

function plotter

Automatically plots one variable directly as a function of another. One variable actuates the pen; the other, the chart drive. 11 inches full travel of both X and Y axis. See Data Sheet No. 10.0-5a.

duplex two-pen recorder

Simultaneously measures any two independent variables. Two separate measuring systems, each driving a pen which can traverse the full 11-inch chart. Any desired combination of ranges. See Data Sheet No. 10.0-6.

duplex function plotter

Two-pen version of the Function Plotter. Plots two different "X" variables as a function of a common "Y" variable. Wide selection of ranges for pens and chart measuring systems. See Data Sheet No. 10.0-17.

narrow span potentiometer

Measures spans as narrow as 100 microvolts, readable to 0.1 microvolt . . . needs no pre-amplifier. Available as a precision indicator, strip chart recorder, or circular chart pneumatic controller. See Data Sheet No. 10.0-8.

1/2-second recorder

Pen speed is only 1/2 second for full 11-inch chart travel. Improved velocity damping prevents overshoot. Chart speeds as fast as 4" per second are available. See Data Sheet No. 10.0-13.

components

amplifiers

For use with converter and balancing motor, for null detection and error signal correction. See Data Sheets 10.20-3a and 10.20-4.

| Amplifier No. | Input Impedance (ohms) | Sensitivity* (volts) | Overall Voltage Gain |
|---------------|------------------------|----------------------|----------------------|
| 357504-20 | 80,000 | 3×10^{-6} | 1×10^6 |
| 357504-21 | 80,000 | 1×10^{-6} | 3×10^6 |
| 357504-5 | 400 | 4×10^{-6} | 1×10^6 |
| 356899 | 2,200 | $.05 \times 10^{-6}$ | 40×10^6 |

*Approximate sensitivity, when used with motors listed below.

balancing motors

2-phase induction, reversing

Totally enclosed, self lubricated. High torque at low speeds. See Data Sheet No. 10.20-2b.

| Ratings for 115 volt, 60 cycle operation† | | | | |
|---|---|----------------|-----------------|-----------------|
| Shaft Speed, rpm | 27 | 54 | 162 | 333 |
| Maximum Torque, inch-ounces | 85 | 43 | 19 | 11 |
| Intermittent Rated Torque, inch-ounces | 30 | 15 | 5 | 4 |
| Maximum Power, inch-ounces per minute | 6300 at 17-18 rpm | 6700 at 35 rpm | 8150 at 100 rpm | 8750 at 190 rpm |
| Power Required, all speeds | Line Field, 9.5 watts Amplifier Field, 4 watts | | | |

†Motors for 25 and 40 cycle service are also available. Above motors may be used on 50 cycles.

converters

Proved by years of service in *ElectroniK* recorders. Convert low power d-c signals to alternating voltages at nominal frequencies of 25, 40, 60 or 400 cycles. For null detection or error voltage measurement. Extremely low thermal emf; thorough shielding against pickup. See Data Sheet 10.20-1.

Electrical Characteristics of 400 cycle Converters (60 cycle converters similar except as noted)

Driving Coil Input: 18 volts, 94 milliamperes, 400 cycles (within 10%). (60-cycle model: 6.3 volts, 60 ma.)

Contact Rating: SPDT switching. Nominal rating 6 volts to 1 microvolt. 1.0 milliamperes, maximum power, 100 micro-watts.

Symmetry: Within 5%.

Vibration Resistance: Output voltage varies less than 2% under accelerations up to 10 g.

Stray Pick-up: Electrostatic: 2×10^{-10} volts per ohm of input circuit impedance. Electromagnetic: 2×10^{-5} volts, constant to 2×10^{-6} volts.

adjustable span recorder

The instrument of a hundred ranges. Calibrated dials on front of the case permit adjustment of span from 1 to 50 millivolts . . . shift of zero by plus or minus 100% of maximum span. See Data Sheet No. 10.0-10.

high impedance recorder

Records data from sources having impedance ranging from 0 to 50,000 ohms, with negligible loading effect on source. Spans down to 2 mv. Excellent stray rejection. See Data Sheet No. 10.0-14.

ElectroniK null indicator

The modern successor to the galvanometer is this electronic d-c null balance detector. Needs no special mounting. Vibration-resistant, stable and fast. Takes heavy overloads; no "loss of spot." Sensitivity 0.6×10^{-9} amp/millimeter. See Data Sheet 10.0-12.

YOUR own research program can be accelerated through the use of these and many other *ElectroniK* instruments, Brown Electronic Components and special primary elements. Your nearby Honeywell field engineer will be glad to consult on your specific requirements. He's as near as your phone.

POLARAD MICROWAVE EQUIPMENT

MICROWAVE SIGNAL GENERATING EQUIPMENT

950 - 11,500 MC

| Model No. | Frequency Range MCS/sec. |
|-----------|--------------------------|
| MSG-1 | 950-2400 |
| MSG-2 | 2150-4600 |
| MSG-3 | 4450-8000 |
| MSG-4 | 6950-10,800 |
| MSG-4A | 6950-11,500 |

MSG 1-2

MSG 3-4

Signal Generators
Direct reading, single dial frequency control, with internal FM and pulse modulation circuits, as well as provisions for external synchronization. Delayed and undelayed sync output. Frequency accuracy $\pm 1\%$. Attenuator accuracy ± 2 db. Extremely stable. Rugged construction.

MICROWAVE SIGNAL ANALYZING EQUIPMENT

10 - 35,000 MC

LSA Laboratory Spectrum Analyzer
with 5 interchangeable R.F. heads

| R.F. Head | Frequency Range in MC |
|-----------|-----------------------|
| LTU-1 | 10-1000 |
| LTU-2 | 940-4500 |
| LTU-3 | 4460-16,520 |
| LTU-4 | 15,000-21,000 |
| LTU-5 | 20,850-35,000 |

5 interchangeable R.F. heads provide continuous coverage from 10 MC to 35,000 MC. Single dial tuning allows for quick and simple display of any frequency spectrum. Frequency dispersion from 250 KC to 25 MC with an internal marker measuring frequency differences up to ± 12.5 MC on a 5 in. CRT display.

10 - 21,980 MC

TSA Bench Model Spectrum Analyzer
with 3 interchangeable R.F. heads

| R.F. Head | Frequency Range in MC |
|-----------|-----------------------|
| STU-1 | 10-1000 |
| STU-2 | 915-4560 |
| STU-3 | 4370-21,980 |

3 interchangeable R.F. heads provide continuous coverage from 10 MC to 21,980 MC in a portable, table-top spectrum analyzer. Single dial tuning allows for quick and simple display of any frequency spectrum. Frequency dispersion from 250 KC to 25 MC with an internal marker measuring frequency differences up to ± 12.5 MC on a 5 in. CRT display.

MICROWAVE GENERAL LABORATORY EQUIPMENT

DC - 11,000 MC

**Micro Power Meter—
Model P-1**

Measures RMS power from DC to 11,000 MC, utilizing a single power sensitive probe. The elimination of hot wire barreters and other delicate components enables the probe to withstand overloads up to 150% without burnout or other damage. Simple operation. Rugged construction.

Frequency Range: DC-11,000 MC
Single Probe Operation
Power Ranges: 0-20 mw
0-100 mw

**Klystron Tube Tester—
Model K-100**

Compact, portable instrument designed to test performance quality of all commercially available klystron type tubes. Provides complete metering facilities, control adjustments and convenient tube data chart. Safety features.

complete coverage of the range 10 to 50,000 MCS/SEC.

650 - 10,750 MC

Signal Sources

Microwave power output with a direct reading, single dial frequency control. Provisions for external square wave and FM modulation.

Model KX, Klystron Power Supply, especially designed for Polarad Signal Sources is available. Works with all 5 models. Has 1000 cps square wave output for modulating purposes. Stable output.

MINIMUM POWER AVAILABLE FROM POLARAD SIGNAL SOURCES IN THE RANGE OF 650 TO 10,750 MC

| FREQUENCY RANGE | MODEL SSR 650-1300MC | MODEL SSL 1050-2350MC | MODEL SSS 2200-4550MC | MODEL SSM 4350-8250MC | MODEL SSK 8000-10,750MC |
|------------------------------|-------------------------|--------------------------|--------------------------|--------------------------|----------------------------|
| MINIMUM POWER AVAILABLE (mw) | 150 | 80 | 15 | 10 | 13 |
| Low Range | 400 | 150 | 60 | 70 | 30 |
| Middle Range | | | | | |
| High Range | 100 | 100 | 40 | 15 | 10 |

12,700 - 50,000 MC

Signal Generators—12.7-39.7 KMC—A new line of signal generators covering the K and Q Bands. Internal square wave modulation and provisions for external modulation. Power meter to check internal R.F. and external source R.F. Power.

Signal Sources—12.7-50.0 KMC—A new line of signal sources providing microwave power in the K, Q and V Bands. Internal square wave modulation and provisions for external modulation.

| Signal Generators | Frequency Range in KMC | Signal Sources |
|-------------------|------------------------|----------------|
| Model No. | | Model No. |
| SG-X12 | 12.8 to 17.5 | SS-1218 |
| SG-6178* | 15.75 to 16.25 | SS-1516 |
| SG-QK368* | 16.25 to 16.75 | SS-1617 |
| SG-6253 | 18.0 to 22.0 | SS-1822 |
| SG-6254 | 22.0 to 25.0 | SS-2225 |
| SG-QK289 | 27.27 to 30.0 | SS-2730 |
| SG-QK140 | 29.7 to 33.52 | SS-3033 |
| SG-QK291 | 33.52 to 36.25 | SS-3336 |
| SG-QK292 | 35.1 to 39.7 | SS-3540 |
| | 37.1 to 42.6 | SS-3742 |
| | 41.7 to 50.0 | SS-4150 |

*Provided with internal pulse and FM modulation.

8500 - 9600 MC

12,700 - 39,700 MC

Sweep Generator—Model I

The new X-Band Sweep Generator provides R.F. energy swept continuously from 8,500 to 9,600 MC. Allows the use of HF testing techniques in the microwave region. Two independent sweep amplifiers provide a simultaneous visual display of reflection and transmission characteristics.

Output Variation: ± 1 DB max. Sweep Rate: 12 CPS. Frequency Range: 8,500-9,600 MC Output: +12 DBM.

Spectrum Analyzers

| Model No. | Frequency Range KMC |
|-----------|---------------------|
| SA-X12 | 12.8 to 17.5 |
| SA-6178 | 15.75 to 16.25 |
| SA-QK368 | 16.25 to 16.75 |
| SA-6253 | 18.0 to 22.0 |
| SA-6254 | 22.0 to 25.0 |
| SA-QK289 | 27.27 to 30.0 |
| SA-QK140 | 29.7 to 33.52 |
| SA-QK291 | 33.52 to 36.25 |
| SA-QK292 | 35.1 to 39.7 |

A new line of portable spectrum analyzers covering the K and Q Bands, presenting the frequency distribution of R.F. energy on a 3 in. CRT display. The units are self-contained including an R.F. section, display unit and power supply.

10 CPS - 20 MC

Wide Band Video Amplifier—Model VT

An oscilloscope deflection amplifier for the measurement and viewing of pulses of short duration and rise time.

Frequency Response: flat from 10 cps to 20 mc.
Amplifier Gain: 320 (50 db.)
Phase: Linear with frequency.
Output: 120 V. pk. to pk.

POLARAD COLOR TV & B/W EQUIPMENT

TV PICTURE AND SIGNAL GENERATING EQUIPMENT

Color Synchronizing Generator—Model PT-201

Furnishes NTSC color TV subcarrier frequency component and contains divider network to yield 31.5 KC signal. Provides driving, blanking and synchronizing pulses, as well as vertical and horizontal dots for linearity checks. Utmost stability assured by driving all pulses from leading edge of crystal controlled oscillator.

Output Signals: (4 to 6 Volts, 75 Ohms, pos. & neg. polarity):
Synchronizing Signal
Camera Blanking Signal
Horizontal Drive Signal
Vertical Drive Signal
Composite Video Output
NTSC Color Subcarrier Freq. (3.579545 mc/s)

Black & White Synchronizing Generator—Model PT-104

Same as color synchronizing generator. Furnished without Subcarrier Frequency Generator.

Subcarrier Frequency Generator—Model PT-202

Modifies any existing standard (B/W) synchronizing generator in accordance with NTSC color TV standards by supplying NTSC color subcarrier frequency of 3.579545 mc/s \pm 0.0003%. Also, contains divider network to yield 31.5 KC signal.

Color Bar Generator—Model PT-203

Provides color TV test signals, NTSC standards, for color TV equipment, networks and components. Supplies complete composite video signal in the form of seven fundamental color bars simultaneously with seven gradations of gamma bars.

Output Signals: Composite Video (2 outputs) (Sync. negative & positive)
Signal Information:
7 Bars of Color
7 Bars of Gamma Gradations
White Dot Pattern (Vert. and Hor.)
Ext. Video Input for Mixing:
2 Volts neg. polarity

Other Equipment Available

An NTSC Color TV Flying Spot Scanner, furnished as a completely packaged unit supplying a standard color video signal. And, a Monoscope Signal Source—Model PT-102 used for transmitting a laboratory quality black and white test pattern.

TV MONITORING EQUIPMENT

Color Video Monitor—Model M-200

Consists of two portable units—uses 15 inch RCA tri-color Kinescope. Checks quality of NTSC color video signals in studio, on transmission, or in factory. Excellent synchronizing stability. Displays highest definition transmitted pictures with exceptionally good color rendition. All controls on front panel. Instrument may be rack mounted or employed as field test equipment.

Signal Polarity: Positive, Negative, Balanced
Input Video Signal: 0.5 to 2.0 Volts, peak to peak
Input Impedance: 66 mmf across 2.2 megohms
Resolution: 250-300 lines (Full Utilization of NTSC Color Signal Bandwidth)
Linearity: Better than 2% across raster
Horizontal and Vertical

Studio Picture Monitor—Model M-105

A portable instrument used to check the picture quality of video signals in either a black/white or color television system. The unit employs a 12½" aluminized kinescope and is capable of presenting high definition transmitted pictures.

Signal Polarity: Positive, Negative, Balanced
Input Video Signal: 0.25 to 2.0 Volts, peak to peak
Input Impedance: 66 mmf across 470,000 ohms
Retrace Time: 4 microseconds
Resolution: Greater than 450 lines

Portable Wave Form Monitor—Model T0-1

Portable instrument designed for waveform analysis and amplitude measurement of NTSC color and B/W video signals in television circuits. It may be used, however, as a general purpose instrument. Means are provided for calibrating or comparing signals observed, and for selecting desired vertical amplifier bandwidth.

Deflection sensitivity:
Greater than 0.1 Volts/in.
Hor. expansion: 20 tube diameters
Input Signal Level: 0.05 to 300 Volts peak to peak
Frequency Response Vertical Amplifier:
I.R.E. —3.5 db at 2 mc.
Normal —3.0 db at 4 mc.
Line Test—3.0 db at 6 mc.

Other Monitors Available:

Model M-102: High quality picture and wave form monitor.

Model 102MPS: 7" Kinescope, portable picture monitor.

Power Supplies

| Model No. | Output Voltage | Output Current |
|-----------|----------------|----------------|
| PT-110 | 400-450 V. | 250-300 Ma |
| PT-111 | 250-300 V. | 100-400 Ma |
| PT-111D* | 250-300 V. | 100-400 Ma |
| PT-112 | 250-300 V. | 150-800 Ma |

25 mc

ADVANCED = ANTENNA PERFORMANCE

► From Gabriel's *integrated* facilities for development and production came the unsurpassed antenna performance shown here . . .

► Gabriel *integrates* its antenna specifications with your system requirements. Ask a Gabriel Field Consultant for recommendations.

GABRIEL MICROWAVE ANTENNA

Field proved the world over, Gabriel Parabolics are produced for commercial, industrial, and military frequencies.

Request Catalog EMP for complete specifications in these and other frequencies.

◀ **7000 mc.** — 7000 mc. Railroad Microwave System Operates in mid-west weather conditions ranging from -27° to 110°F — and often mounted where difficult access makes reliability critical. Photo courtesy of Philco.

Important features are **COMPLETE COVERAGE** — 5925-7425 mc · **HIGH GAIN** — to 42.5 db over isotropic source · **LOW VSWR** — 1.13 max. · **LOW SIDELOBES** — better than 22 db down.

2000 mc. — 2000 mc. NATO Mobile Military Microwave Relay 24-channel communication relay using Gabriel 2000 mc offset feed antenna. Broadband characteristics of Horn Feed cover entire 2000 mc band. ▶

Important specifications are **HIGH GAIN** — better than 30 db over isotropic source · **LOW VSWR** — 1.2 max. over 1750-1990 mc band · **BEAMWIDTH** — H plane 6° , E plane 5.7° · **LOW SIDELOBES** — better than 23 db down.

GABRIEL HIGH GAIN UHF-TV BROADCAST ANTENNA

From station after station, in metropolitan and smaller communities, come verified reports of increased signal coverage — at relatively low cost — with Gabriel's radically new transmitting antenna. ▶

Request 24-page Report ETV for complete performance characteristics.

Important features are: **HIGH GAIN** — 25 and 14 power gain models available · **IDEAL VERTICAL PATTERN** — Cosecant squared radiation pattern for uniform field strength · **SHAPED HORIZONTAL PATTERN** — Omni-directional or cardioid as site requires · **NULL FILL-IN** — standard on all models · **TROUBLE-FREE** — mechanical design with greater strength, no de-icing, no insulator except as seal · **ELECTRICAL BEAM TILT** . 7° if desired.

GABRIEL COMMUNICATIONS ANTENNAS

◀ A complete line for wide-range dependable mobile communications for increased signal power with wider coverage at great savings over cost of high power station and mobile transmitters. Request 24-page Catalog EMC.

HIGH GAIN BEACON ANTENNAS — Gabriel HW series covers 450-470, 144-174, 108-144 mc bands. Gain up to 6.5 db over $\frac{1}{2}$ wave dipole, with equal power radiation in all horizontal directions and low VSWR.

MOBILE ANTENNAS — Gabriel's complete line with bases, springs, and rods, meets every mobile communications need. Typical models are famous "disguise" Model SPPB-71 for all police frequencies; Model SPP-3 series of swivel-base, spring, and whip antennas; Model SPP-18 roof-top model for 140-165 mc.

THE GABRIEL COMPANY ENDICOTT STREET, NORWOOD, MASS.

BALLANTINE

World's Leading Electronic Voltmeters

AUDIO to 150 kc MODEL 300

Voltage Range..... 1mv—100v
 Frequency Range..... 10cps—150kc
 Accuracy..... 2% ENTIRE RANGE
 Input Impedance..... ½ meg shunted by 30µf

INFRASONIC to 30 kc MODEL 316

Voltage Range..... 20 mv—200 v pk-to-pk
 Frequency Range..... 0.05 cps—30 kc
 (Down to .01 cps with corrections)
 Accuracy..... 3% ENTIRE RANGE
 Input Impedance..... 4.4 meg shunted by 50 µf

SUB-AUDIO to 150 kc MODEL 302B Battery Operated

Voltage Range..... 100µv—100v
 Frequency Range..... 2cps—150kc
 Accuracy..... 3% 5cps—100kc
 5% elsewhere
 Input Impedance..... 2 meg shunted by 15 µf*

TRUE RMS INDICATION MODEL 320

Voltage Range..... 100 µv—320 v
 Frequency Range..... 5 cps—500 kc
 Accuracy..... 3% 15 cps—150 kc
 5% elsewhere
 Stability of Internal Calibrator..... 0.5%
 Input Impedance ...
 10 megs shunted by 25 µf below 10 mv
 10 megs shunted by 8 µf above 10 mv

PEAK-to-PEAK MODEL 305

Voltage Range..... 1mv—1000v pk-to-pk
 Frequency Range..... 10cps—100kc (sine wave)
 Pulse width..... 3µsec—250µsec
 Min Rep Rate..... 20 pulses per sec
 Accuracy..... 5% for pulses
 Input Impedance..... 2 meg shunted by 15 µf*

DC & AC PRECISION CALIBRATOR MODEL 420

Voltage Range..... 0-10 v RMS; Pk-to-Pk; or DC
 Frequency (Std Model)..... 1 kc
 (other values on special order)
 Accuracy (long term) ... Better than 0.5% above 1 mv
 Distortion and Hum..... Less than 0.5%
 Setting Resolution... Approaches 0.01% above 10 mv
 Output Impedance (AC)..... 2-20 ohms depending
 on range setting

AUDIO to 2 mc MODEL 310A

Voltage Range..... 100µv—100v
 Down to 40 uv at reduced accuracy
 Frequency Range..... 10cps—2mc
 As null detector 5cps—4mc
 Accuracy..... 3% 10cps—1mc
 5% elsewhere
 Input Impedance..... 2 meg shunted by 15µf*

SENSITIVE INVERTER MODEL 700

For Measuring DC Voltages when
 combined with any AC Voltmeter
 Voltage Range..... 1µv—100v DC
 Ratios DC Input to RMS Output..... 1:100 & 10:1
 Accuracy..... 1% 100µv—100v
 Input Resistance..... >10 meg for 1:100
 50 meg for 10:1

AUDIO to 6 mc MODEL 314

Voltage Range..... 1mv—1000v
 (100µv—1mv without probe)
 Frequency Range..... 15cps—6mc
 Accuracy..... 3% 15cps—3mc
 5% elsewhere
 Input Impedance..... 11 meg shunted by 7.5 µf
 (1 meg shunted by 25µf without probe)

DECADE AMPLIFIER MODEL 220A

For Increasing the Sensitivity of any
 AC Voltmeter by 10 or 100 times
 Voltage Range..... 10µv—50mv
 Frequency Range..... 10cps—150kc
 Accuracy..... 2% ENTIRE RANGE
 Input Impedance..... 5 meg shunted by 15µf

ACCESSORIES are available for all voltmeters to extend voltage measurements down to 20 uv and up to 10 kv, and to measure alternating currents from 0.1 uamp to 10 amp, and to provide DC from the Model 300 Voltmeter to drive external recorders or remotely located meters.

Famous for SENSITIVITY • ACCURACY • STABILITY

Each Ballantine Voltmeter

- Has only ONE voltage scale with decade range switching.
- Provides the same accuracy of reading at ALL points on the logarithmic voltage scale.
- Has a linear decibel scale.

- May be used as a high gain wide band amplifier.
- Responds to the average value of the input voltage wave, thus avoiding "turn-over" discrepancy.

WRITE FOR MORE DETAILED INFORMATION TO—

*Shunt capacitance is 8µf on all ranges except two most sensitive ranges.

These terminals are made of glazed Alumina Ceramic. Lugs and eyelets are hot tinned brass and metallized areas are silver fired on ceramic, copper electroplated and tin fused for soft soldering. Im-

mersion in 60/40 solder at 450°F for 1½ minutes for dip soldering will not injure the metallic coating. For complete information and quotations call, write or wire today.

WHITNEY BLAKE

FOR POWER SUPPLY
AND ELECTRONIC
APPLICATIONS

CORD and CABLE

FEATURE ADVANCED DESIGN
PROVIDE LONG
DEPENDABLE SERVICE

Over a half-century of experience in the wire industry . . . a development laboratory constantly searching for improved materials, better construction . . . the finest equipment for extruding rubber, neoprene, polyvinyl chloride, polyethylene, nylon, and other insulating materials . . . highly skilled workers . . . a rigid quality control system . . . all combine to assure you that Whitney Blake cord and cable are the best available.

We are prepared to help solve your cord and cord set engineering problems as well as to furnish a wide variety of products under the following general classifications.

MICROPHONE CABLES with neoprene jackets. Write us about our new microphone cord with semi-conductive cotton shield. It has improved flexibility and longer service life with excellent electrical characteristics.

SOUND SYSTEM WIRES with rubber, Plastite® or textile insulation.

TELECABLE Multi-pair Intercommunication Cables with semi-rigid Plastite insulation and Plastite jacket 6, 11, 12 and 26 pair in #24 and #22 AWG. Light weight for easy installation. Water resistant for use in damp ducts. Other constructions upon request.

Flexible Cords

DYNAPRENE® neoprene jacketed cord and rubber jacketed cord for power supply. Listed by Underwriters' Laboratories.

CORD SETS and CABLE ASSEMBLIES custom built to your specific requirements. Using either standard cordage or cord designed to fit your particular application, Whitney Blake can fabricate regular line cords or special purpose cords having attached or integrally molded rubber or Plastite fittings.

Contact our representative in your area for additional information and help with your wiring problems.

model A100 will operate continuously at a 200°C ambient.

PULSE TRANSFORMERS

Airpax has the engineering ability, experience and facilities for difficult pulse problems.

POWER—AUDIO—FILTER TRANSFORMERS

The Fosterite process offers a method of encapsulation which permits great savings in weight and size, yet hermetically sealed and void free. Considerable skill is required in its application—we have the skill needed.

AIRPAX has a lot to offer in transformers. Fully qualified under MIL-T-27, we have an unusually well equipped laboratory, production facilities for competitive prices, experienced and trained engineers for top design and quality.

Magnetic Amplifiers

Magnetic amplifier designs to fit your problem completely require good and careful engineering. We will welcome a chance to show you our personal interest in your application.

Toriodal windings

VIBRATORS

400 cycle vibrators permit great saving in space and weight. Transformer size is drastically reduced, filter components are much smaller.

CATHALOY*

CATHALOY A30** For long life

This is an active grade 0.1% aluminum-nickel alloy designed for use in high speed electron tube production. Exhaustive testing has confirmed it as a preferred replacement for active alloys with silicon and magnesium reducing elements. Its chief advantages are long life, rapid activation, no interface impedance, no inter-electrode leakage caused by sublimed films, and a high emission value.

Composition

| | |
|-------------------------|-------------------------------|
| Aluminum.....07/.12% | Copper.....0.10% max. |
| Silicon......03% max. | Carbon......08% max. |
| Magnesium......01/.06% | Titanium......02% max. |
| Iron......0.10% max. | Nickel plus Cobalt. .99% min. |
| Manganese....0.12% max. | |

Physical Properties

| | |
|--|---|
| Density..... | .322 lb./cu. in. |
| Temperature coefficient of resistance..... | .00895 ohm/ohm/°F. (32°—212°F.) |
| Electrical resistivity..... | { 55.08 ohms/Cmf (68°F.) 159.18 ohms/Cmf (1000°F.) |
| Temperature coefficient of expansion..... | 8.97 x 10 ⁻⁶ in./in./°F. (68°—932°F.) |

Mechanical Properties***

| Temper | Tensile Strength (x 1000 psi) | Yield Strength (x 1000 psi) 0.2% offset | % Elongation in 2 inches | Rockwell Hardness |
|------------|-------------------------------|---|--------------------------|-------------------|
| Annealed | 75 max. | 15/30 | 55/30 | B70 max. |
| Half hard | 70/90 | 35/75 | 27/12 | B65/80 |
| Hard drawn | 90/120 | 75/105 | 18/8 | B80/100 |

Cathaloy A30 is used wherever an active alloy is now specified. The new features of this material will permit long life with freedom from interface buildup. It is recommended for general purpose entertainment type electron tubes.

*Reg. U.S. Trademark

**Manufactured under U.S. Patent

***These are average values representing the mechanical properties to be expected of normal wall tubes useful in comparison with other materials. These do not represent the mechanical properties of very small thin wall tubing.

CATHALOY A31 For strength

This is a premium grade 4% tungsten-nickel alloy designed for cathode use in ruggedized electron tubes. The necessity for this new alloy for indirectly heated cathodes has been demonstrated by the increase in requirements for strength, long life and reliability. Under electron tube test, Cathaloy A31 has demonstrated high hot strength and maintenance of good emission characteristics over long periods of life.

Composition

| | |
|-----------------------|--------------------------------|
| Tungsten...3.75/4.25% | Copper.....0.10% max. |
| Silicon......05% max. | Carbon......08% max. |
| Magnesium. .01/.06% | Titanium......02% max. |
| Iron......0.10% max. | Nickel plus Cobalt 95.25% min. |
| Manganese 0.12% max. | |

Physical Properties

| | |
|--|---|
| Density..... | 0.323 lb./cu. in. |
| Temperature coefficient of resistance..... | .00549 ohm/ohm./°F. (32°—212°F.) |
| Electrical resistivity..... | { 96.61 ohms/Cmf (68°F.) 145.30 ohms/Cmf (1000°F.) |
| Temperature coefficient of expansion..... | 8.74 x 10 ⁻⁶ in./in./°F. (100°—930°F.) |

Mechanical Properties***

| Temper | Tensile Strength (x 1000 psi) | Yield Strength (x 1000 psi) 0.2% offset | % Elongation in 2 inches | Rockwell Hardness |
|------------|-------------------------------|---|--------------------------|-------------------|

| Hard drawn | 100/125 | 80/105 | 12/4 | B95/110 |

Cathaloy A31 is resistant to bowing during assembly and processing. Its recommended use is for any electron tubes subjected to shock and vibration.

Superior Tube
The big name in small tubing

All analyses .010" to 5/8" O.D.
Certain analyses in light walls up to 2 1/2" O.D.

A new series of cathode alloys from SUPERIOR TUBE

CATHALLOY P50 For extremely long life

This is a passive grade nickel alloy designed for extremely long life, reliable electron tubes. Experiments with Cathalloy on electron tubes have shown the low rate of barium evaporation, minimum of sublimation, and freedom from surface impedance required of passive cathodes. Cathalloy is the only passive alloy available commercially in seamless and WELDRAWN* forms. It is also supplied in beam cathode form.

Composition

| | | | |
|----------------|----------|--------------------|----------|
| Carbon..... | .02 max. | Copper..... | .05 max. |

| Drawn | 95/120 | 75/105 | 10/4 | B90/105 |

Cathalloy P50 is used for power output tubes requiring low grid emission and for tubes which need a seamless passive cathode. Cathalloy is especially treated to provide good uniformity.

STANDARD ELECTRONIC PRODUCTS

Superior Tube is the world's leading fabricator of nickel sleeves for indirectly heated oxide-coated cathodes in electron tubes. These parts are manufactured to exact specifications within close tolerances and using a wide variety of different alloys. Superior Tube engineers can work hand in hand with you to develop parts and special characteristics.

Cathode Sleeves. Made in round, oval, elliptical and rectangular shapes. These cathodes are available in:

Seamless—from .010" to .121" O.D. inclusive with wall thicknesses from .0015" to .005" inclusive. Larger diameters and heavier walls can also be produced. May be cut to practically any length desired. Bead (emboss) may be located anywhere except within .040" from the end of the cathode.

Lockseam** Produced from nickel strip especially rolled for the purpose. From .040" to .185" O.D. inclusive with wall thicknesses from .0021" to .0035". Lengths are from 9 mm to 50 mm inclusive. Vertical and circumferential beads permissible.

Disc Cathode. Superior is now ready to offer to the industry a new disc cathode for use in guns for color TV picture tubes. This is smaller in design than the present assembly which has been used so successfully in monochrome guns for the past eight years. In addition to the two big advantages of the present type disc cathode, namely choice of materials and close control of the E dimension (distance from the top of ceramic to top of emission cap), the new assembly has the following advantages:

1. The cathode surface area is reduced, which means less power input.
2. Lower heat radiation due to less power, which means constant temperature and cooler continual operation.
3. A smaller shank and emission cap, which means better transmission of electrons to the TV screen.
4. The smaller guns which are now possible permit the manufacturer to bring the guns closer together in the mount. This means better control of the deflection of the electron beams.

Precision Electronic Systems Instruments

The Servoscope® is designed for testing and analyzing feedback control systems and very low frequency electronic systems. The instrument accepts carriers without adjustment and produces suppressed carrier envelopes sinusoidally modulated over the frequency ranges listed below. For D.C. systems, either sinusoids or square wave signals are available by turning a selector switch. The output frequency and voltage are indicated by direct reading meters. The transfer characteristics, frequency, and transient response of a system may be quickly evaluated in the following manner: The test signal is supplied to the system and also displayed on the Y axis of a D.C. oscilloscope. The oscilloscope can be conveniently switched from Servoscope test signal to system response. A built-in synchronized linear sweep serves as a time base for the X axis of the oscilloscope. Phase measurements are read directly on a dial which shifts the signal with respect to the time base. The attenuation, and transient data are directly available from the oscilloscope pattern.

Frequency Range: Model A—0.1 to 20 cps
Model B—0.15 to 30 cps
Model C—0.3 to 60 cps
Special—From 0.001 cps.

Signal Carriers: Models A and B 50 to 800 cps
Model C 50 to 2000 cps

Amplitude: 0 to 20 volts RMS

Reading Method: Pattern shift or Rotating pattern

Phase lead or lag accuracy: 1 degree

Servoscope

MODEL 1100

Servoboard

MODEL 1110A

Servoboard® components are precision experimental mechanical parts available as a kit or as separate items. Parts include various gears, shafts, bearings, bearings, dials, component brackets and mounting hardware. The Servoboard is designed to provide means for quickly synthesizing the electromechanical parts of a control system. The method of clamping provided allows the components to be located in any position.

Precision Electronic Systems Controls

Servo Amplifier—60 cycle—D.C.

MODEL 1120

The Model 1120 Servo Amplifier is a three stage vacuum tube amplifier with full output of 10 watts. The power supply is self-contained and transformerless. No AC line is required. The amplifier is furnished with a built-in motor for convenient operation with a two phase Servo motor. It has a feedback network accepting three single ended inputs. It is designed for connection to servos with multiple feedback loops. It is also available with a chopper to convert D.C. control signals. The power supply has a tapped secondary winding for impedance matching with motors of 300 to 3000 ohms.

Laboratory Equipment

MODEL 1121

This Laboratory Equipment is designed and developed to provide a complete, reliable, low cost electro-mechanical building block for constructing feedback control systems. With these units, systems can be built with a minimum of time and effort. All units are designed to mount in standard racks with the circuit boards held in place by patch cords. The equipment includes: A.C. and D.C. Servo Analysis and Synthesis Equipment, Vacuum Tube Amplifiers, Magnetic Amplifiers, Servoboards, Servoboard Rack Assemblies, Demodulators, and a Patch Cord Network—Insertion Units, Jack and Patch Cord. The units can be used individually or grouped in a cabinet for use in the laboratory or as specialized equipment.

Servo Amplifier

MODEL 1121

A small, lightweight, and efficient amplifier for 60 cps servo motors. Measures 3 1/4" x 5 1/2" x 3 1/4". Weighs 3 1/4 lbs. Inputs A.C., D.C. or combination. Rated output: 10 watts continuous or 18 watts reversing. Operates from 115 v.a.c. line. 60 cycle model available.

5000 Volt R. F. Power Supply

MODEL 1122

Ideal for applications requiring minimum size and weight. Measures 4" x 2 3/8" x 5 1/2". Weighs 2 lbs. Transformer hermetically sealed in epoxy resin casting. Output: 5000 v.d.c. at 500 microamps. Input: 275 v.d.c. 40 ma. 6.3 v.a.c. 1.0. Operating freq: 30 kc. Ripple: less than 1%.

Crystal Controlled Signal Generator

Positive crystal control from 100 to 150 Mc; precision zero-beat frequency measurement of output level from 100,000 microvolts; and measurement of modulation free from FM distortion features of the Model 2400 Signal Generator make it possible to produce signals "on-the-head", to know signal sensitivity without guessing, to standardize squelch threshold and other settings. Ideal for testing and calibrating airline radio equipment, radar receivers and TV tuners. Write for product literature and information.

Battery Standard

MODEL BS-100

For accurate comparison, measurement of frequency from 1 Kc to 100 Mc. The crystal-controlled crystal oscillator circuit provides accuracy of one part per million. Permits comparison of any standard of frequency. The Model BS-100 is strong and rugged. Features Standard harmonic outputs of 2, 3, 10, 50 and 100 Mc. Also available for 100 Kc harmonic outputs from 100 Kc to 100 Mc. Frequency range 15 Mc; 25 millivolts; 100 to 100 Mc.

VHF Receiver Converter

MODEL RC 50-200

This converter, in conjunction with a receiver tuned to 30 Mc, provides a general purpose receiver for the 50 to 200 Mc range. Signal sensitivity, frequency stability, and rejection of spurious responses are unusually high. Has an internal 115V, 50/60 cps power supply.

Further inquiry is invited for product applications in the fields of radio, electronics, servomechanisms, metrology and automation.

*TRADE MARK

VHF

Receiver

MODEL R-5200

This is a professional quality A.M. and F.M. receiver covering 50 to 200 Mc. The directly-calibrated 72-inch bandspread dial has all portions of the scale masked off except the frequency region of interest. Sensitivity, selectivity, stability and spurious rejection are outstanding.

Heathkit MODEL O-9

OSCILLOSCOPE KIT

MODEL O-9

\$59.50

Shipping
Wt. 28 lbs.

New features unheard of in a kit oscilloscope have been added to the already popular Heathkit series. All top quality components are used including a brand new RCA 5U1 CRT. Ten other first line tubes complete the lineup. Voltage regulation provides a rock steady pattern regardless of normal line voltage variations. A built-in blanking amplifier eliminates the retrace line entirely. Other important advantages are a phasing control, Z axis input, direct connections to the deflection plates, 1 volt peak-to-peak calibration voltage and a calibrated grid screen.

Wiring is simplified by the use of the harness technique which also results in a neat professional appearance. Extremely wide vertical bandwidth allows accurate reproduction of even a 500 KC square wave. Excellent focusing characteristics are made possible by the use of the new RCA 5U1 CRT and a spot shape control. One of the most versatile of test instruments, the Heathkit O-9 Oscilloscope will be invaluable in the radio and TV service shop, as a work project in schools and for all types of circuit investigation work in the laboratory. Its new features make Model O-9 comparable in every way to many commercially built oscilloscopes selling for as much as \$400. Don't pass up this opportunity to add a really fine instrument to your service or experimental lab.

Heathkit

VOLTAGE CALIBRATOR KIT

The use of a Voltage Calibrator will greatly increase oscilloscope usefulness. Provides a convenient method of making peak to peak voltage measurements by establishing a relationship between the unknown wave shape and the Voltage Calibrator. Voltage ranges 0-100 volts peak to peak. The Voltage Calibrator features direct reading scales and a regulated power supply system.

MODEL VC-2

\$11.50

Shipping Wt. 4 lbs.

Heathkit

ELECTRONIC SWITCH KIT

The Heathkit Electronic Switch Kit will further extend scope usefulness by permitting simultaneous observation of two individually controlled traces. Continuously variable switching rates 10 cps to 2,000 cps in three ranges. Will also serve as a square wave generator over the range of switching frequencies.

MODEL S-2

\$23.50

Shipping
Wt. 11 lbs.

Heathkit VACUUM TUBE VOLTMETER KIT

The beautiful new 1953 Heathkit Model V-6 VTVM, the world's most popular kit instrument, now offers many outstanding new features in addition to retaining all of the refinements developed and proven through the production of over 70,000 VTVM kits. The Heathkit VTVM now features extended voltage ranges with 50% greater coverage on the DC range. New 1 1/2 volt low scale provides well over 2 1/3 inches of scale length per volt permitting faster measurements with greater accuracy. AC and DC ranges are 0-1.5-5-15-50-150-500-1500 volts (1,000 volts maximum on AC). Ohmmeter ranges are X1, X10, X100, X1,000, X10K, X100K (1 meg. Measures .1 ohm to 1,000 megohms. Other features are db scale, center scale zero adjust and polarity reversal switch. High 11 megohm input resistance virtually eliminates circuit loading.

The low anti-inflation price of this tremendously popular kit includes all tubes, necessary constructional material, test leads and the construction manual.

MODEL V-6

\$24.50

Shipping
Wt. 6 lbs.

Heathkit AC VACUUM TUBE VOLTMETER KIT

MODEL AV-2

\$29.50

Shipping
Wt. 5 lbs.

A new amplifier type AC VTVM that makes possible those sensitive measurements so essential in laboratory or audio work. Ten voltage ranges covering from .01 RMS full scale to 300 volts RMS full scale. Input impedance 1 megohm with frequency response 20-50,000 cycles. Ten DB ranges from -52 to +52 DB. Four diodes in meter bridge circuit for maximum linearity.

Heathkit

HANDITESTER KIT

The ever popular Handitester is now supplied with a Simpson 400 microampere meter movement. Provides AC and DC voltage ranges 0-10-30-300-1,000-5,000 volts. Ohmmeter ranges 0-3,000 and 0-300,000 ohms. DC current measurements 0-10 and 0-100 milliamperes. A completely self contained portable instrument.

MODEL M-1

HEATHKITS for the ENGINEER

Heathkit VISUAL AURAL SIGNAL TRACER KIT

MODEL T-3 **\$23⁵⁰**
Shipping
Wt. 10 lbs.

Designed especially for service applications in AM-SW-FM-TV repair work. RF and audio two channel input. More than adequate sensitivity—new noise locator circuit—calibrated wattmeter—substitution speaker—visual signal indication. Can be used with scope and VTVM, checks phono cartridges, phono mechanisms, microphones, tuners, etc. Let the Heathkit Visual Aural Signal Tracer help you.

Heathkit CONDENSER CHECKER KIT

An instrument designed solely for its particular job. Not a "sideline" or a multiple function instrument. Measures value and quality of unknown condensers and resistors. Capacity range .00001 mfd to 1,000 mfd. Resistance range 100 ohms to 5 megohms. Sensitive electron beam indicator—five polarizing test voltages—safety spring return leakage test switch. An amazingly accurate instrument at this low price.

MODEL C-3 **\$19⁵⁰** Shipping
Wt. 8 lbs.

Heathkit SIGNAL GENERATOR KIT

MODEL SG-8 **\$19⁵⁰**
Ship. Wt. 8 lbs.

The standard service instrument for alignment work. .1 volts output from 160 KC to 110 MC. Calibrated harmonics up to 220 MC. Internal (400 CPS) and external modulation. Pre-calibrated coils for all 5 bands. Good stability and accuracy. All test leads included.

Heathkit GRID DIP METER KIT

One hand operation. 5 pre-wound coils cover 2—250 MC. Controlled sensitivity. Usable as an oscillator or an absorption wave meter. Extra low frequency coils available.

MODEL GD-1B **\$19⁵⁰**
Ship. Wt. 4 lbs.

Heathkit LABORATORY REGULATED POWER SUPPLY KIT

MODEL PS-2 **\$33⁵⁰**
Ship. Wt. 20 lbs.

A regulated variable 160-450 volt DC output power supply for the lab or service shop. Accurate voltage and current measurements with large Simpson meter. AC supply 6.3 volts at 4 amperes—standby switch eliminates warmup time. Low hum content—5 tube circuit. AC and DC output voltages isolated from panel for maximum operational flexibility.

Heathkit RESISTANCE SUBSTITUTION BOX KIT

MODEL RS-1
Ship. Wt. **\$5⁵⁰**
2 lbs.

Choice of 36 switch selected resistance values 15 ohms to 10 megohms. All standard RTMA 1 watt 10% resistors. Buy several for those lab and service applications.

NEW Heathkit 20,000 OHMS PER VOLT MULTIMETER KIT

Here is the solution to all service problems requiring a portable measuring device of high accuracy. 20,000 ohms/volt sensitivity on DC and 5000 ohms/volt on AC. Full scale voltage ranges of 1.5, 5, 50, 150, 500, 1500 and 5000. DC current ranges of 150 microamperes; 15, 150 and 500 milliamperes; and 15 amperes. Resistances are measured from .2 ohms to 20 megohms in 3 ranges and decibels from -10 to +65 db.

Model MM-1 uses standard commercially available batteries and is not affected by strong RF fields as encountered in and near transmitting equipment. 1% precision resistors on a very easily wired ring type range switch and a highly accurate Simpson 50 microampere meter fully qualifies the Heathkit Multi-meter for close tolerance laboratory and service work. The meter movement is placed in a recessed position for maximum non-glare readability. The kit includes the attractive black bakelite cabinet, 2 color meter scales, test leads, batteries and all other necessary components. Overall cabinet size is 5½" wide x 4" deep x 7½" high.

MODEL MM-1 **\$26⁵⁰**
Ship. Wt. 6 lbs.

Heathkit TUBE CHECKER KIT

MODEL TC-2 **\$29⁵⁰**
Shipping Wt. 12 lbs.

Checks overall tube quality, filament continuity, and individual elements for shorts and opens. Features chart illumination, harness type wiring, and large 3-color meter scale.

Portable Model TC-2P at \$34.50. Wt. 14 lbs. No. 91-8 Cabinet only at \$7.50. Wt. 7 lbs. No. 355 TV Picture Tube Adapter at \$4.50. Wt. 1 lb.

Heathkit LABORATORY GENERATOR KIT

MODEL LG-1 **\$39⁵⁰**
Ship. Wt. 16 lbs.

A professional laboratory instrument designed for extreme accuracy in frequency and output level. Colpitts oscillator operates in 5 ranges from 150 KC to 30 MC. Panel meter calibrated in output voltage and percent of modulation. Output in excess of .1 volts. Features complete shielding of oscillator, buffer and attenuator sections; regulated power supply and 50 ohm output cable. Comparable instruments priced many times higher than the cost of this new kit.

Heathkit AUDIO WATTMETER KIT

MODEL AW-1 **\$29⁵⁰**
Ship. Wt. 6 lbs.

Measure output power levels directly with the Heathkit Audio Wattmeter. Flat response to frequencies from 10 CPS to 250 KC. Full scale ranges of 5 MW, 50 MW, 500 MW, 5 W and 50 W. Db calibration from -10 to +48. Uses non-inductive built-in load resistors providing impedances of 4, 8, 16 and 600 ohms. Meter bridge uses 4 germanium diodes.

HEATH COMPANY • Benton Harbor 14, Mich.

SERVICEMAN • AMATEUR • STUDENT

Heathkit IMPEDANCE BRIDGE KIT

MODEL IB-2
\$59.50
Ship. Wt. 15 lbs.

Modern design with built-in 1 KC generator for AC measurements. A choice of the Wheatstone, Maxwell, Hay or capacitance comparison bridges for measuring resistance, capacitance, inductance, dissipation factor and storage factor. 1/2% resistors and precision mica condensers provide maximum accuracy. Completely AC operated.

Heathkit DECADE RESISTANCE KIT

MODEL DR-1
\$19.50
Ship. Wt. 4 lbs.

Individual switch selection of twenty 1% precision resistors in 1 ohm steps from 1 to 99,999 ohms. Sturdy ceramic wafer switches featuring silver plated contacts and smooth, positive detent action.

Heathkit COMMUNICATIONS RECEIVER KIT

MODEL AR-2
\$25.50
Ship. Wt. 12 lbs.
(Less Cabinet)

Full coverage from 550 KC to 35 MC on 4 bands, with good sensitivity and selectivity. Features electrical bandspread, BFO, headphone jack, slide rule dial with ham band identification, RF gain control, noise limiter and phone-standby-CW switch. Top quality, high gain components used throughout. Pre-wound coils in a shielded turret assembly and a transformer operated power supply assure trouble-free performance.

Cabinet available separately. No. 91-10. Shipping wt. 5 lbs. Price \$4.50.

Heathkit AUDIO OSCILLATOR KIT

MODEL AO-1
\$24.50
Ship. Wt. 11 lbs.

Features sine or square wave coverage from 20-20,000 cycles in 3 ranges. Variable 10 volt output level at 600 ohms impedance. Thermistor controlled linearity—precision multiplier resistors—distortion less than .6%. An outstanding instrument value at this amazing low price.

Heathkit Q METER KIT

MODEL QM-1
\$44.50 Ship. Wt. 14 lbs.

A typical Heathkit invasion of the laboratory instrument field. Here is the first successful low priced Q meter ever offered in kit form. Oscillator supplies RF in the range of 150 KC to 18 mc. Reads Q directly on calibrated meter scales. Measures Q of condensers, RF resistance and distributed capacity of coils. Calibrate capacitor with range of 40 mmf to 450 mmf with vernier ± 3 mmf. All measurements made at the operating frequency.

Heathkit AMATEUR TRANSMITTER KIT

MODEL AT-1
\$29.50
Ship. Wt. 16 lbs.

Power input up to 35 watts on 80, 40, 20, 15, 11 and 10 meters. Can be crystal or VFO excited. Complete with modulator input socket and VFO power output provisions. Other desirable features are good shielding, AC line filter, key click filter, standby switch and a 52 ohm coaxial output. Model AT-1 is AC operated and is suitable as an exciter for a higher powered rig. Complete with full instructions for construction and use.

Heathkit TELEVISION SWEEP GENERATOR KIT

MODEL TS-3
\$44.50
Ship. Wt. 18 lbs.

Simplify your TV alignment jobs with the new Heathkit TS-3. Full coverage on fundamentals from 4 MC to 220 MC at an output of well over 100,000 microvolts... Automatic blanking and wide range phasing. A triple marker system ranges from 19 MC to 180 MC using a Colpitts oscillator plus the 4.5 MC crystal controlled oscillator for check points (crystal finished). Provisions are also made for using an external marker. Featured is the new sweep system, using an *INCREDUCTOR changeable inductor. Sweep width is variable from 0 to 12 MC at the lower frequencies and increases to 0-50 MC at the highest... Other advantages are power supply regulation, constant RF output level, independent marker and RF output control circuits, low impedance output and properly terminated output cables. The construction manual is complete in all detail and with a reasonable amount of Model TS-3 will serve faithfully for many years to come.

*Trademark, C.G.S. Laboratories, Stamford, Connecticut

Heathkit DECADE CONDENSER KIT

Switch selected 1% silver mica precision condensers providing capacity range of 100 mmf. to 0.111 mfd. in steps of 100 mmf.

MODEL DC-1
\$16.50

Shipping Wt. 4 lbs.

Heathkit AUDIO GENERATOR KIT

A new extended range 18 cycles — 1 megacycle audio instrument at a remarkably low price. Five continuously variable output ranges—600 ohm output impedance—low distortion figure, less than .4% from 100 cps through audible range.

MODEL AG-8
\$29.50
Ship. Wt. 11 lbs.

Heathkit BAR GENERATOR KIT

Small, compact and easy to use, Model BG-1 supplies horizontal or vertical bars for TV linearity adjustments. Output cable clips directly to the TV receiver antenna terminals.

MODEL BG-1
Ship. Wt. 6 lbs. **\$14.50**

Heathkit BATTERY ELIMINATOR KIT

MODEL BE-4
Ship. Wt. 18 lbs. **\$31.50**

6 or 12 volt operation with current and voltage constantly monitored. Double protection with a fused transformer and automatic overload relay. Well filtered output and all heavy duty components. Designed for auto radio repair and as a storage battery charger.

ELECTRO TEC

PRECISION-MINIATURE

slip ring assemblies AND COMMUTATORS

offer all these advantages:

EXCLUSIVE* ELECTRO TEC TECHNIQUES

*insure closer tolerances, absolute uniformity,
and the ultimate in miniaturization*

Electro Tec units are the product of an exclusive manufacturing technique that results in accuracy unattainable by conventional fabricating methods. In this process a plastic is moulded around the wire leads. Accurate machining reduces this blank to the proper shape, complete with grooves. Hard silver is deposited into the grooves by electroplating to produce the required rings. Final machining insures concentricity and dimensional accuracy. The result is one-piece, unitized construction with conducting rings of 60 to 70 Brinell hardness.

Diameters of these assemblies range from .045" to 24" cylindrical or flat. Cross-sections may range from .005" to .060" or more. Rings are polished to a jewel-like finish and can be held to 4 micro-inches or better. Even the smallest sizes withstand a 1000 V.A.C. breakdown test. Most types easily withstand rotational speeds up to 12000 rpm.

**ELECTRO TEC Assemblies are Specified by the Nation's
Leading Precision Instrument and Equipment Manufacturers for Proven
Greater Dependability, Longer Life, Smoother Functioning.**

The uniformly superior performance of Electro Tec slip ring and commutator assemblies in thousands of industrial and governmental applications has resulted in wide adoption of these component units by most leading manufacturers of precision instruments and equipment. Although these products provide improved performance and extra dependability, prices are strictly competitive. Write today for fully illustrated literature.

- ONE PIECE, UNITIZED CONSTRUCTION
- ABSOLUTE MINIMUM TORQUE FRICTION
- DIAMETERS FROM .045" TO 24.0"
- MINIMUM 1000 V.A.C. HI-POT INTER-CIRCUIT
- UNIFORMLY HARD SILVER RINGS PLATED INTO GROOVES ON PRECISION MACHINED ONE PIECE PLASTIC FORM
- SPECIAL SURFACE DEPOSITS PREVENT TARNISH, MINIMIZE FRICTION, BRUSH NOISE AND PRACTICALLY ELIMINATE WEAR

BUSS Fuses

FUSETRON dual-element Fuses and Fuse Holders

for Protection of Radios, Instruments and Electronic Equipment

FAST ACTING FUSES for PROTECTION OF INSTRUMENTS, Etc.

 Formerly called 8AG
Dimension $\frac{1}{4} \times 1$ inch, Glass tube.
Provide high speed action necessary to protect instruments.
Test specification—carry 100%, open at 200% in 5 seconds.
AGX are listed as approved by Underwriters' Laboratories.
Voltage Symbol Amperes
or 250 less MJB $\frac{1}{500}, \frac{1}{200}, \frac{1}{100},$ or $\frac{1}{32}$
" MJW $\frac{1}{16}$ or $\frac{1}{8}$
" AGX $\frac{1}{8}, \frac{1}{4}, \frac{3}{8}$ or $\frac{1}{2}$
125 or less AGX $\frac{3}{4}, 1, 1\frac{1}{2}$ or 2
The MJW fuses are special low resistance fuses.

BUSS FUSES — SFE STANDARD

Fuses of different amperages are of different lengths — to make it impossible to insert too large a size — thereby preventing over-fusing.

Glass tube — diameter $\frac{1}{4}$ inch. Length as per table below.

| Voltage | Symbol & Amperes | Length Inches | Pounds per 100 |
|------------|------------------|----------------|----------------|
| 32 or less | SFE4 | $\frac{5}{8}$ | .70 |
| " | SFE6 | $\frac{3}{4}$ | .71 |
| " | SFE9 | $\frac{7}{8}$ | .72 |
| " | SFE14 | $1\frac{1}{8}$ | .77 |
| " | SFE20 | $1\frac{1}{4}$ | .83 |
| " | SFE30 | $1\frac{1}{2}$ | 1.05 |

BUSS GLASS TUBE FUSES, $\frac{1}{4} \times 1\frac{1}{4}$ inch

| Voltage | Symbol | Amperes |
|-------------|--------|--|
| 250 or less | AGC | $\frac{1}{8}, \frac{1}{4}, \frac{3}{8}, \frac{1}{2}, \frac{3}{4}, 1, 1\frac{1}{2}, 2$ or 3 |
| " | MTH | 4, 5, 6 or 8 |
| 32 or less | AGC | 5, 6, $7\frac{1}{2}, 10, 15, 25$ or 30 |

20 ampere size is an SFE 20 fuse.

BUSS CERAMIC TUBE FUSES, $\frac{1}{4} \times 1\frac{1}{4}$ inch

| Voltage | Symbol | Amperes |
|-------------|--------|------------------|
| 250 or less | ABC | 10, 12, 15 or 20 |

FUSETRON FUSES, $\frac{1}{4} \times 1\frac{1}{4}$ inch

Glass tube — Dual-Element type

LONG TIME-LAG OR SLOW BLOWING TYPE

These fuses avoid needless blows from starting currents or surges. They have a fuse link which operates only on very high overloads or short-circuits — they have a thermal cutout which functions on low overloads — the thermal cutout cannot operate quickly at any load, hence long time-lag is obtained. Yet protection is afforded against short-circuits or continued overloads.

Test specification—carry 110%, open at 135% in 1 hour.
Approximate blowing time: at 200% load MDL 25 sec. MDX 12 sec.
at 300% " " 8 " " 3 "
at 500% " " 3 " " $\frac{1}{2}$ "

125 and 250 volt sizes listed as approved by Underwriters' Laboratories.

Shipping weight 0.9 lbs. per 100.

| Voltage | Symbol | Amperes |
|-------------|--------|--|
| 250 or less | MDL | $\frac{1}{100}, \frac{1}{32}, \frac{1}{16}, \frac{1}{10}, 1, 1\frac{1}{2}, 2, 3, 4, 5, 6, 7, 8, 10, 15, 20, 25, 30,$ $\frac{1}{10}, \frac{1}{2}, \frac{6}{10}, \frac{8}{10}$ or 1 |
| 125 or less | MDL | $1\frac{1}{4}, 1\frac{1}{2}, 2, 2\frac{1}{2},$ or $2\frac{3}{4}$ |
| " | MDX | $3\frac{3}{4}, 4, 5, 6\frac{1}{4}$ or 7 |
| 32 or less | MDL | $3\frac{3}{4}, 4, 5, 6\frac{1}{4}, 8, 10, 15, 20, 25$ or 30 |

PIG-TAIL FUSES

Pig tail fuses are available in both ordinary and FUSETRON dual-element fuse types.
Write for full information.

BUSS FUSE CLIPS & CLIP ASSEMBLIES

for $\frac{1}{4}$ inch Fuses (SFE 4, 6, 9, 14, 20 AGX, AGC, ABC, MDL, MDX, MJB, MJW, MTH fuses).

Spring bronze clips are made of Herculyon. This metal gives great gripping strength and retains spring under adverse conditions.

Beryllium copper clips combine low electrical resistance with great gripping strength. This means cooler operation of clips and fuse.
4548 Spring bronze clip, nickel plated.
4592 Beryllium copper clip, Silver plated.

Assemblies consist of clip, terminal screw, brass terminal, and mounting screw.

4431 uses No. 4548 clip — described above.

4432 uses No. 4592 clip — described above.

BUSS FUSE BLOCKS

Blocks are made of bakelite with mounting holes. Clips are of spring bronze.

Fuse blocks are made in many sizes and types.

Tell us your requirements.

BUSS PANEL MOUNTED HOLDERS

for $\frac{1}{4}$ inch Fuses

Holders are inserted through hole in panel and locked in place by nut on holder. Can be used on panels up to $\frac{5}{16}$ thick.

Bayonet type knob requires only quarter turn to remove fuse. No screw driver is needed.

Normal current carrying capacity: 15 amperes.
HJM for $\frac{1}{4} \times 1$ inch fuses (AGX, MJB, MJW, SFE 14)
HKP for $\frac{1}{4} \times 1\frac{1}{4}$ " " (ABC, AGC, SFE20, MDL, MDX, MTH)

IN-THE-LINE HOLDERS

for $\frac{1}{4}$ inch fuses

These holders are for mounting fuse in wire. Holders consist of body and bayonet type knob — two contacts ready to be staked on ends of wire — a pressure spring that is used under contact in base of holder.

Holders can also be mounted in panel up to $\frac{5}{16}$ inch thick by means of a No. 9969 Spring nut (not furnished). Flat spot on holder permits it to be locked against rotation.

Normal current carrying capacity: 15 amperes.

Shipping weight, holders: 4 lbs. per 100.

| Symbol | Description |
|--------|---|
| HDI | for $\frac{1}{4} \times 1$ inch fuses (AGX, MJB, MJW, SFE 14) Takes No. 18 or smaller wires. |
| HDI-A | for $\frac{1}{4} \times 1\frac{1}{4}$ inch fuses (ABC, AGC, MDL, MDX, MTH, SFE 20) Takes No. 18 or smaller wires. |
| HDI-B | for $\frac{1}{4} \times 1\frac{1}{4}$ inch fuses (as above) Takes No. 14 or 16 wires. |

No. 9969 Spring nut for panel mounting above holders.

Holder-and-Fuse Assemblies

Assembly consists of holder, fuse and 19 inch loop of No. 14 wire already staked and soldered to terminals.

Offer simplest way to install protection. Wire can be cut to give leads of desired length. A spring nut, furnished with holder, can be used to mount holder on panel up to $\frac{3}{32}$ inch thick.

Now a Complete Service
 in all sizes of Slip Ring Assemblies

an assembly with 14 concentric, hard silver electro deposited machined plastic rings. Dovetail locks in place. Mated blank insures accuracy. Diameter approx. 11", thickness approx. 5/16".

→ Cylindrical assembly with 25 rings. Three wide rings accommodate large contact area brushes for high current capacity. Length 14", O.D. approx. 5 3/8".

an assembly with 30 rings of various widths to accommodate various contact requirements. Diameter approx. 4-5/16", designed for easy mounting.

Cylinder type assembly approx. 3 3/4" long with 24 hard silver rings. 1 5/8" O.D. with thickness less than

ELECTRO TEC is now tooled up, with new expanded facilities for production of large Slip Ring Assemblies to exact customer specification. Sizes range up to 24" in diameter, either cylindrical or disc type.

The exclusive ELECTRO TEC PROCESS*—the electro-deposition of hard silver rings into an accurately machined plastic blank—consistently yields a high degree of dimensional accuracy, excellent concentricity, and a jewel-like ring finish. This process also eliminates expensive tooling and mold charges, frequently lowers costs to 30% of other methods of manufacture. The silver rings are uniformly hard for long life—75-90 Brinell.

ELECTRO TEC one-piece construction precludes dimensional variation due to accumulated errors. The plastic base is fully cured before rings are plated into it, thus preventing separation of base material from the rings.

ELECTRO TEC LARGE SLIP RING Assemblies are widely used in Radar Equipment, Fire Control Systems, Test Tables and many other critical applications. Light weight combined with rugged durability recommends their use in airborne applications.

Every user knows the ELECTRO TEC reputation for quality and superiority in miniature and sub-miniature slip ring assemblies.

Quality Components for the Radio-Electronics Industry

by **AMPHENOL**

new

165 SERIES miniature connectors

These new miniature AN-type connectors are obtainable in two connector sizes and six contact configurations. 165 series connectors, besides their very small size, are pressure-proof and completely waterproof.

A N connectors

A complete selection of plugs, receptacles and fittings, a wide variety of insert contact arrangements. AMPHENOL AN connectors have many unique features, including gold-plated contacts and famous 1-501 blue dielectric material.

RF connectors

Made in strict accordance with government specifications, AMPHENOL RF connectors are the most efficient link between coaxial cables now available. Series include N, BN, HN, BNC, C, LC, Push-on, and splices, fittings and adapters.

RG cables

Ninety RG-/U coaxial cables are now being precision manufactured in AMPHENOL's up-to-date cable plant. In addition, AMPHENOL makes special cables, including aluminum jacketed ALJAK, miniature, triaxial, and low-noise.

26 SERIES miniature connectors

Miniature connectors with 5, 7 or 9 contacts, rack & panel or hex nut sizes. Hood and clamp hardware available for hex nut connectors. Fine materials, electrical efficiency, makes the 26 series ideal in miniaturized application.

Blue RIBBON connectors

Famous AMPHENOL blue Ribbon connectors now available with pin or barrier polarization. Keyed shells and latch-lock cans are available for the barrier connectors. Both types have gold-plated contacts, AMPHENOL blue dielectric.

new

Qwik microphone connectors

Modern design makes the new QWIKs the most attractive, most efficient microphone connectors for every audio application. QWIKs are lightning-fast to use—plugs click-in to receptacles, disconnection is easily made with one hand.

AMPHENOL

AMERICAN PHENOLIC CORPORATION

VICTOREEN ELECTRONIC COMPONENTS

HI-MEG RESISTORS

Victoreen Hi-Meg resistors are designed for applications requiring extreme stability and accuracy. Elements are vacuum sealed in glass tubes then aged for lasting stability.

SPECIFICATIONS

Resistance R.T.M.A. Values.... 10^6 to 10^{12} ohms

**Tolerance from Specified Value $\pm 10\%$
 Temperature Coefficient $-0.15\%/^{\circ}\text{C}$
 Voltage Coefficient $-0.03\%/V$
 Maximum Voltage 1000 V
 *Higher Values to Order
 **Also available within $\pm 5\%$ or $\pm 2\%$ of specified value up to 5×10^{12} ohms.

CARBON DEPOSITED RESISTORS

Carbon deposited resistors, sealed in glass and with inert gas are available for applications where long term accuracy and stability are required. Impervious to mechanical damage, humidity, deviations of pressures, fumes, etc.,

they are capable of operating up to voltages of 15 KV or wattages up to 10 watts. They can be furnished in 2 - 5 - 10% tolerances. Temperature coefficient averages 0.0005 with voltage coefficient almost nil.

VOLTAGE REGULATOR TUBES

Current voltage regulator tubes are used to provide a wide range of battery-operated R.F. generator high voltage power supplies, voltage limiting, voltage limiting, coupling in D.C. amplifiers, and almost all voltage limiting applications.

Tubes meeting JAN or MIL specifications are supplied on special order.

GENERAL SPECIFICATIONS

Many standard voltages: 50 to 30,000 volts (nominal)

D. C. starting voltages: About 5% above nominal
 D. C. regulated voltage tol. from nominal: Varies ± 2.0 to $\pm 5.0\%$

Voltage regulation: $\pm 1.5\%$

Maximum rating regulation current: Varies 100 to 1000 μa (except glow tubes to 250 MA)

Regulator tubes for operating 18 KV, 25 KV and 27 KV, designed for regulation and protection of the kinescope in color and chrome TV are available in quantity. Regulation will be made on special orders for any starting point between 50 and 30,000 volts.

SUBMINIATURE ELECTROMETER AND D. C. AMPLIFIER TUBES

Type 5800 tetrode and the type 5886 pentode 10 mil filament power subminiature tubes are designed specifically for electrometer applications where low grid current is a paramount consideration.

Applications where high transconductance is desired.

The type 5828 is a conventional low filament power triode.

Type 5803 is a low filament power subminiature triode designed for electrometer applications.

Other subminiature types include the 5799 high vacuum half wave rectifier and the VX-10 thermal time delay relay.

SPECIFICATIONS

| TUBE TYPE | DESIGNATION | TYPICAL SERVICE | PLATE VOLTS (volts) | ACCEL. GRID VOLTS (volts) | CONTROL GRID VOLTS (volts) | PLATE CURRENT (μa) | CONTROL GRID CURRENT (amps) | Mu | Gm** (μmhos) |
|-----------|-------------|-----------------|---------------------|---------------------------|----------------------------|---------------------------------|-----------------------------|------|---------------------------|

filament 1.25 volts at 10ma. *JAN tubes available except for 5828.
 Higher Gm may be obtained at the expense of high Ic by operating at higher Ib.

COUNTER TUBES

Victoreen Counter tubes are a series of quenching geiger tubes designed to cover the general field of beta, gamma, X-ray and alpha ray measurements. Some meet the needs of laboratory reliability and accuracy, others are

adapted to the more rugged requirements of portable operations.

A convenient socket, our part No. 380-26, is available for probe or chassis mounting of the IB85 and 6306 tubes.

SPECIFICATIONS

| TUBE TYPE | DESCRIPTION | OPERATING VOLTAGE (volts) | THRESHOLD VOLTAGE (volts) | PLATEAU LENGTH (volts) | PLATEAU SLOPE PER 100 v (%-100V) | ACTIVE LENGTH (inches) | WALL (mg-cm ²) | LIFE (counts) | TYPE BASE |

Speed Nuts® ...

FASTEST THINGS IN FASTENINGS®

FOR RADIO-TELEVISION AND ELECTRONIC EQUIPMENT

TYPES FOR EVERY USE

-  Wire & Cable Clips
-  Wood Anchor Nuts
-  Control Knob Clips
-  Yoke Clamps
-  "IF" Can Retainers
-  Chassis Mounting Fasteners
-  Switch Retainers
-  Bezel Fasteners
-  Terminal Fasteners
-  Iron Core Clamps

"J" TYPE

"U" TYPE

PUSH-ON TYPE

Push-On type SPEED NUTS are lightning-fast, zip over integral studs, rivets, tubing, nails or other unthreaded parts.

They provide a bite-lock that grips securely on smoothest, hardest surfaces. These self-locking, one-piece fasteners eliminate costly threaded parts, reduce machining of die castings. They provide line balance, reduce costs, speed-up production... are the last word in low cost fastening efficiency.

SPECIAL TYPES: "U"-TYPE SPEED NUTS are available in many special designs to meet a broad variety of applications.

example shows the "U" type ring shaped soldering tab for electronic connections. SPEED NUT is used over bakelite panel.

HOW TO APPLY

START BY HAND ...

QUARTER TURN TO REMOVE
LOCKED POSITION
D-SHAPED STUD ASSEMBLY

... zip down, lightning fast, over studs, or any unthreaded part. Locks on smooth surfaces; equally effective on metal or plastic.

An exclusive Tinnerman feature is its use over studs. Diagram shows how to lock position for tension grip of spring stud where removable.

COIL FORM FASTENERS

The SPEED NUT principle of spring tension fastening is particularly adaptable to fasteners for retaining coil forms in communications equipment. SPEED NUT Coil Form Fasteners are quickly and easily installed and assure vibration-proof adjustments. Millions of SPEED NUT fasteners are performing cost-cutting assembly jobs on all types of radio, TV and communications equipment.

C 4801

C 6601

C 6811

SPECIAL TYPES: Coil tube assembly is simplified by any one of these three SPEED NUTS. Only a few seconds to complete trouble-free attachment of coil tubes. SPEED NUTS provide constant pressure to maintain tuning adjustment. Note that C6811 has "L" shaped locking tab. C4801 retains coil tube only and has clearance hole for core rod.

Core screw is first threaded into SPEED NUT. Prongs provide correct tension on screw.

Coil tube is inserted into the SPEED NUT and retained by means of 4 small barbs on inside of SPEED NUT.

Assembly snapped into place. Tab on SPEED NUT fits hole in coil tube to prevent SPEED NUT turning.

COMPRESSION RINGS

Easily adapted to all thermo-plastic knob-to-shaft assemblies, they eliminate inserts, set screws; provide lower mold costs, permit thinner walled hubs. Insure permanent attachments and prevent cold-flow loosening.

TUBULAR TYPE SPEED CLIPS

HOW TO APPLY

1. Snap into place by hand. Cam-like prongs compress, then spring out when inserted into hole, holding Clip in position.
2. Line up second part of assembly; start rivet or unthreaded stud into Clip.
3. Seat rivet; turned-in end of SPEED CLIP bites rivet making a locked, vibration-proof attachment. Perfect where only one side of the assembly is accessible!

Provide easiest, safest attachment for wire harness installations in electronic equipment. It can be pre-assembled on wire bundles; opens and closes without the use of tools for easy disassembly. Positive locking feature prevents accidental opening. Has extruded insulation. Available in clamp sizes from 1/8" to 1 1/2"

IT'S NO SECRET...

At this time our company is working on electronic projects for the defense departments of our country. Missile guidance systems . . . firing error indicators . . . and special communications equipment about which the strictest security must be maintained . . . but what we're privileged and proud to reveal

NO SECRET. The competence which makes these achievements possible is in our engineering staff.

Members of this group average more than ten years of experience in this complex, diverse field.

Whenever you face a problem which may be solved by the use of electronic, electro-mechanical, hydraulic or pneumatic equipment, we feel sure these men can help you . . . **LET'S TALK IT OVER.**

WE REPRESENT OVER ONE HUNDRED TOP MANUFACTURERS OF MAJOR AVIATION PRODUCTS. A NEARBY BRANCH WILL BE HAPPY TO SERVE YOUR NEEDS. DO MORE BUSINESS . . . REALIZE MORE PROFIT WITH AIR ASSOCIATES EQUIPMENT.

ILLINOIS ELECTROLYTIC CAPACITORS

...A COMPLETE CAPACITOR LINE OF TIME-TESTED QUALITY!

ILLINOIS electrolytic capacitors for every application — design or production.

Newest addition to the ILLINOIS line are the MINIATURE and SUB-MINIATURE electrolytic capacitors illustrated at the left with pencil for size comparison.

These Types MT and SMT capacitors are especially designed for use with transistors, printed circuit applications, portable equipment and wherever minimum capacitor size and weight are required. Case styles are of $\frac{1}{8}$ ", $\frac{3}{16}$ ", $\frac{1}{4}$ " and $\frac{3}{8}$ " diameters.

Available in capacity ranges from $\frac{1}{2}$ to 100 mfd and from 3 to 75 W.V.D.C. All aluminum construction, hermetic sealing, tinned brass connecting leads, operating temperature range — 20°C to +65°C.

Write for new ILLINOIS catalog — now!

IHT This popular pigtail type in aluminum can features internal inverted construction that assures immunity to shock and vibration. Available with or without outer cardboard insulating sleeve, with brass-tinned wire leads or solder lugs in capacity ranges from 1 to 2,000 MFD and from 3 to 700 W.V.D.C.

IHC Ideal for replacement or original equipment, this type has flexible wire leads, is sealed with high temperature compound, has electrolytic grade cardboard tubes and has radial or tangential clamps attached. Supplied in common negative/ four section types or dual negatives with separate cathodes. Available in capacity ranges from 25 to 250 MFD and from 5 to 500 W.V.D.C.

LN Has screw neck type mounting, expanded aluminum cans and is available in $\frac{1}{4}$ " to $\frac{1}{2}$ " diameters. Capacity ranges from 8 to 80 MFD and from 450 to 600 W.V.D.C.

BT (Bathtub) Developed for military, fixed and portable communication equipment. Has hermetically sealed, drawn metal case with corrosion resistant finish. Will stand shock and vibration. Fully meets government JAN specifications. Available in any capacity range required and from 25 to 600 W.V.D.C.

PE For use in all communication equipment, fixed and mobile. Plug-in octal base, hermetically sealed. Features new molded through pin design. Available in types to meet all government JAN specifications.

UMT Specifically designed for use in high quality equipment. Complete line meets all government JAN specifications. Hermetically sealed, shock resistant. Newly designed molded capacitor design and terminal construction.

UMS Inverted screw mounting, hermetically sealed. Entire line fully meets all government JAN specifications.

UMC Popular for use in telephone equipment, power factor correction voltage stabilization, high current energy sources, motor starting and other types of phase shifting networks. Available in capacity ranges up to 10,000 MFD and from 5 to 500 W.V.D.C.

UMP Ideal for communication, radio and TV. Standard twin prong mounting. Uses recently developed molded capacitor construction and will operate efficiently under wide temperature ranges. Remains stable under all operating conditions. Available in capacity ranges from 40 to 3,000 MFD and from 10 to 525 W.V.D.C.

Doelcam

Master-precision

MILITARY COMPONENTS

IN EVIDENCE of the exceptional performance of DOELCAM *Master-precision* components, a measure of accuracy is presented with each unit illustrated. Tested and perfected for military use, DOELCAM electromechanical instruments for measurement and control are now standard components in automatic pilots, guided missiles, airborne instrumentation and fire control computers. DOELCAM'S expanded manufacturing facilities now make it possible to offer these *Master-precision* components in production quantities for military applications. An outstanding engineering staff with broad experience in the field of instrumentation is available for assistance on your specific problem. For more detailed information — write for bulletins.

for better electronic equipment

For Aircraft,
Electronics, Instruments

AN

AN Series . . . conforming to Specification MIL-C-5015B. 15 diameters and 260 insert layouts. 6 shell styles, AN3100 to AN3108. Plastic inserts.

For Aircraft
Vibration Resisting—Moisture Proof

AN-E

AN-E Series . . . environment resisting. Meets Specification MIL-C-5015B. *Completely sealed from cable to cable.* Integral cable clamp. New grounding lugs. Improved sealing grommet and new grommet follower. Resilient inserts in two types.

For General Circuitry in
More Rugged Applications

K, RK

K, RK Series . . . *Special Acme thread.* Rugged. 8 basic shell shapes, 8 diameters, and 204 catalogued insert layouts. The all-purpose, quality line.

For Rack-and-Panel
Chassis Applications

DP

DP, DPB, DPD, DPD2, DPD2R, DPR, DPA (miniature), and DPM Series . . . rectangular in shape with many insert layouts in DPB and DPD.

For Audio

P, O

P and O Series, the original microphone series . . . 22 shell styles and 7 insert layouts. "P" plugs in steel.

For Microphone and Low Level Circuits

X, XK, XL

X, XK and XL Series . . . 23 basic shell styles and 8 insert layouts for cord-end or wall mounting.

For Instruments and
Radio Circuitry

D, U

Sub-Miniature Connectors . . . The D and U Series for cord-end, rack-and-panel, or wall-mounted applications. The D Series has 3 basic shapes, up to 50 contacts. The hermetically-sealed U Series, cylindrical with 4 basic shell sizes, accommodates up to 12 contacts in 12 insert layouts. DH Types used for hermetically-sealed miniature components.

For High Pressure
Applications

GS

Hermetically-Sealed Connectors . . . with steel shells and contacts to withstand high pressures. Available in the GS, KH, DH, and U Series. Insulation is a vitreous material, fused under high temperature to shell and contacts, thus forming a true hermetic seal.

For Open Flame Protection

STEEL SHELL FIREWALL

AN-K and Cannon K Firewall or High Temperature Connectors . . . offer you the greatest variety of this type of connector. Cannon made the first firewall connector and is still the leader in the field. Wall- or box-mounting receptacle. Straight or angle 90° plugs. Crimp-on contacts . . . no solder to melt. Inserts of asbestos-filled or glass-filled material.

Reliable

Selenium Rectifiers

INDUSTRIAL TYPE RECTIFIERS

These have proved reliable through years of service in various voltage and current combinations up to several hundred kilowatts. Useful for a multitude of applications: power supplies, magnetic amplifiers, electroplating, battery charging, etc.

HALF-WAVE RADIO TYPE RECTIFIERS

These stacks can meet the needs of many small power applications as for instance, relay operation. Millions are in use in radio and TV. Available for black and white as well as color TV in ratings up to 750 MA.

EMBEDDED RECTIFIERS

For adequate protection in military and other stringent uses. Recommended for use where size and weight are important considerations such as in aircraft applications.

CARTRIDGE ASSEMBLES

... From tiny, single cell diodes to several thousand volts. Phenolic or glass encased, wide range of half-wave, bridge and center tap types.

HIGH TEMPERATURE TYPES

These selenium rectifiers are capable of operating in an ambient temperature of 125°C. with no increase in the size of the cell as compared with a similar rectifier operating in a normal ambient.

HERMETICALLY SEALED UNITS

Built to special requirements to meet unusually severe conditions. Designed to meet individual needs.

RECTIFIERS FOR MAGNETIC AMPLIFIERS

Designs will be submitted to meet individual requirements.

Our engineering department will be glad to aid you in the solution of your rectifier problems. Submit your requirements and let us make recommendations . . . without obligation, of course! See our catalog in Sweet's Product Design file.

TRANSISTORS

Types RR14, RR20, RR34, 2N34, 2N36, 2N37 and 2N38 intended for applications in low level audio circuits. Particularly applicable where small size and economy of operation are desirable.

Type RR21 intended for applications in low level audio circuits requiring power outputs in the 10 milliwatt range.

Type RR38 intended for applications requiring economy of operation at low power levels. Particularly applicable as the output stage for hearing aids and personal receivers.

Type RR66, photo transistor.

Types RR83 and RR87 intended for service in switching applications such as flip-flop, multivibrator and pulse circuits.

Waterman POCKETSCOPE

The Pocket-Size Oscilloscope

S-14-A

HIGH

6 INCHES

S-14-B

WIDE

6 INCHES

S-15-A

TWIN

6 INCHES

...light... compact... accurate... portable

Featuring small size, light weight and outstanding performance the HIGH, WIDE and TWIN POCKETSCOPES have become the "triple threat" of the oscilloscope field. Their incomparable versatility, reliability and accuracy have skyrocketed this team of truly portable instruments into unparalleled demand. Each oscilloscope features DC coupled amplifiers in both vertical and horizontal channels.

HIGH

The S-14-A HI-GAIN POCKET-

SCOPE provides the optimum in oscilloscope flexibility for analysis of low-level electrical impulses. Extremely light weight (12 $\frac{3}{4}$ lbs.), compact in size (12 x 5 $\frac{3}{4}$ x 7 in.), dependable and accurate in performance. Vertical and horizontal channels: 10mv rms/inch with response within 2DB from DC to 200 KC and pulse rise of 1.8 μ s . . . non-frequency discriminating attenuators and gain controls with internal calibration of trace amplitude . . . repetitive or trigger time base with linearization from $\frac{1}{2}$ cycle to 50 KC with \pm sync or trigger.

WIDE

The S-14-B WIDE BAND POCKETSCOPE is ideal for investigations of transient signals, DC signals, aperiodic pulses or recurrent waveforms. Vertical channel: 50 mv rms/in. within -2DB from DC to 700 KC . . . pulse rise time of 0.35 μ s. Horizontal channel: 0.15v rms/in. within -2DB from DC to 200 KC . . . pulse rise of 1.8 μ s. Attenuators and gain controls are non-frequency discriminating . . . trace amplitude calibration . . . repetitive or triggered time base from $\frac{1}{2}$ cycle to 50 KC . . . \pm sync or trigger . . . trace expansion, filter graph screen and many other features . . . 14 lbs. . . 12 x 6 x 7 inches.

TWIN

The S-15-A POCKETSCOPE is a portable, twin tube, high sensitivity oscilloscope with two independent vertical as well as horizontal channels. It is indispensable for investigation of electronic circuits in industry, school and laboratory. Vertical channels 10

mv rms/in. with response within -2DB from DC to 200 KC and pulse rise time of 1.8 μ s . . . horizontal channels 1v rms/in. within -2DB from DC to 150 KC . . . non-frequency discriminating controls . . . internal signal amplitude calibration . . . linear time base from $\frac{1}{2}$ cycle to 50 KC, triggered or repetitive, for both horizontal channels.

S-11-A

The S-11-A INDUSTRIAL POCKETSCOPE is a small, compact (5x7x11 inches), and lightweight (8 $\frac{3}{4}$ lbs.) instrument for observing electrical circuit phenomena. The flexibility of the POCKETSCOPE permits its use for AC measurements as well as for DC. The vertical and horizontal amplifiers are capable of reproducing within -2DB from DC to 200 KC with a sensitivity of 0.1v rms/in. . . repetitive time base from 3 cycles to 50 KC continuously variable throughout its range . . . variations of input impedance, line voltage or controls do not "bounce" the signal—the scope stabilizes immediately.

RAYONIC CATHODE RAY TUBES BY WATERMAN

| TUBE | PHYSICAL DATA | | STATIC VOLTAGE | | DEFLECTION* | | LIGHT OUTPUT** |
|------|---------------|--------|----------------|------|-------------|-----|----------------|
| | FACE | LENGTH | A3 | A2 | VERT | HOR | |
| 3JP1 | 3" | 10" | 3000 | 1500 | 111 | 150 | 352 |
| 3MP1 | 3" | 8" | | 750 | 99 | 104 | 33 |
| 3RP1 | 3" | 9.12" | | 1000 | 61 | 86 | 44 |
| 3SP1 | 1.5x3" | 9.12" | | 1000 | 61 | 86 | 44 |

*Deflection in volts per inch.

**Light output of an element of a raster line (one mm long and not exceeding .65 mm in width) in microlumens.

The basic properties of the cathode ray tube that concern the designer or the user are: deflection sensitivity, unit line brightness, line width, static voltage requirements and physical size. A comparison between cathode ray tubes manufactured by Waterman Products Company is shown in the table adjoining. These tubes are available in P1, P2, P7 and P11 phosphors. 3JP1, 3JP7, 3SP1 and 3XP1 are available as JAN tubes.

Write for your complimentary copy of "POCKETSCOOP" . Official Waterman publication.

PULSESCOPE

by

Waterman

Oscilloscope that Portrays the Pulse

Classic Examples of Precision Engineering...

The PULSESCOPES are cathode ray tube oscilloscopes that portray the attributes of the pulse: shape, amplitude, duration and time displacement. All PULSESCOPES have internally generated markers with the basic difference that in the SAR PULSESCOPE the markers initiate the sweep while in the others the sweep starts the markers.

BROAD

The S-6-A BROAD BAND Scope is a PULSESCOPE

in performance, POKETSCOPE in size. The instrument measures DC as well as AC signals. Unique DC calibration methods permit rapid measurements of either positive or negative, AC or DC signals. Vertical amplifier sensitivity of 0.2v rms/inch, and response to 5 mc within 3DB... pulse rise time of 0.1 μ s... internal markers from 1 to 1000 μ s... repetitive or trigger sweep from 5 cycles to 500 KC with 5X sweep expansion... sweep, marker and DC calibrating voltage available externally. Size 8 3/4 x 6 3/4 x 13 3/4 in. Weight 22 lbs. Operates from 50 to 400 cycles at 115 volts AC.

LAB

The S-5-A LAB PULSESCOPE is a JANized (Gov't Model No. OS-26)

portable, AC, wide band-pass, laboratory oscilloscope ideal for pulse as well as general purpose measurements. Internal delay of 0.55 μ s permits observation of pulse leading edge. Includes precision amplitude calibration, 10X sweep expansion, internal trace intensity time markers, internal trigger generators and many other features. Video amplifier 0.1v p to p/inch... pulse rise time of .035 μ s or response to 11 mc. 1.25 to 125,000 μ s triggered or repetitive sweep... internally generated markers from 0.2 to 500 μ s... trigger generator from 50 to 5000 pps. for internal and external triggering. Operates from 50 to 400 cycles at 115 volts AC.

SAR

The S-4-C SAR PULSESCOPE is a JANized (Gov't Model No. OS-4)

portable instrument (31.5 lbs.) for precision pulse measurements for radar, TV and all electronic measurements. Portrays all attributes of the pulse... internal crystal controlled markers of 10 and 50 μ s available for self-calibration... in R operation a small segment of the A sweep is expandable for detailed observation with a direct-reading calibrated dial accurate to 0.1%. Video amplifier band-pass up to 11 mc... optional video delay 0.55 μ s... pulse rise and fall time better than 0.07 μ s... R pedestal (sweep) 2.4 to 24 μ s... video sensitivity of 0.5v. p to p/inch. Easily convertible from μ s to yards. Operates from 50 to 400 cycles at 115 volts AC.

RAKSCOPE

Because the panel is only 7" high and fits any standard rack, the S-12-B RAKSCOPE admirably fills the need for a small oscilloscope of wide versatility. With all the features of the S-11-A POKETSCOPE, the RAKSCOPE is JANized (Gov't Model No. OS-11), and has many additional advantages; the sweep, from 5 cycles to 50 KC, is either repetitive or triggered... vertical and horizontal amplifiers are 50 mv rms/inch with band-pass from 0 to 200 KC... special phasing circuitry for frequency comparison.

MINIATURIZING YOUR EQUIPMENT?

Specify **SIMPLEST, MOST COMPACT**

AMPERITE THERMOSTATIC DELAY RELAYS

MOST ECONOMICAL, HERMETICALLY SEALED

STANDARD

MINIATURE

Provide delays ranging from 2 to 120 seconds.

- Actuated by a heater, they operate on A.C., D.C., or Pulsating Current.

- Hermetically sealed. Not affected by altitude, moisture, or other climate changes.

- Circuits: SPST only — normally open or normally closed.

Amperite Thermostatic Delay Relays are compensated for ambient temperature changes from -55° to $+70^{\circ}$ C. Heaters consume approximately 2 W. and may be operated continuously. The units are most compact, rugged, explosion-proof, long-lived, and — inexpensive!

TYPES: Standard Radio Octal, and 9-Pin Miniature.

PROBLEM? Send for Bulletin No. TR-81

BALLAST-REGULATORS

- Amperite Regulators are designed to keep the current in a circuit **automatically regulated** at a definite value (for example, 0.5 amp).
- For currents of 60 ma. to 5 amps. Operates on A.C., D.C., Pulsating Current.
- Hermetically sealed, light, compact, and most inexpensive.

T9 BULB

Maximum Wattage Dissipation: T6 1/2 L—5W. T9—10W.

Amperite Regulators are the simplest, most effective method for obtaining **automatic regulation** of current or voltage. Hermetically sealed, they are not affected by changes in altitude, ambient temperature (-55° to $+90^{\circ}$ C), or humidity. Rugged; no moving parts; changed as easily as a radio tube.

24 Hour Magnetic Tape RECORDER / REPRODUCER

THE MOST VERSATILE RECORDER ON THE MARKET

All these features in a single unit:

1. 24 hours of continuous recording and playback on one roll of Mylar magnetic tape.
2. Separate record and playback amplifiers plus unique index system enables any part of recording to be located within seconds and played back, without disturbing what is being recorded.
3. Built in voice-operated relay permits many days of continuous monitoring — records only when a signal is present.
4. Recording may be preserved indefinitely or erased in whole or part, and tape re-used many times.
5. Instant speed shift — 4" or 8" per sec. Manufacturers of communication equipment, electronic test equipment, capacitance voltage dividers, slotted lines, and magnetic recorders.

PRODUCTS OF EXPERIENCE

ADVERTISERS: How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications — a matter of a few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history — the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Ask them to show you what your potentials can be.

ABC **NUCLEONICS** ABP

A McGraw-Hill Publication

New time-saving AMF Everlock pre-assembled screws and lockwashers. In types, sizes and materials to meet your needs.

fasten it and forget it...

Another **Amf** Product

Specify

Tight, vibration-proof fastenings—for the life of your product.

New AMF Everlock pre-assembled screws and lockwashers give you both . . . fast, one-operation application and vibration-proof tightness. Everlock washers, with the exclusive alternating chisel edges, actually bite into the surface of both screw and part. Even under the most punishing vibration, Everlock fasteners stay secure—for good!

Everlock locknuts spin down finger-free. After contact with work only 1/4 turn gives a sure, permanent 6-way lock. Combine unequalled speed of application with true vibration-proof performance.

On your next order for fasteners, specify AMF Everlock—and *fasten it and forget it*. Sizes, types and materials to meet any specifications.

Write for information or contact your nearest AMF Everlock Representative.

OF THOMPSON-BREMER & COMPANY

Why it pays to make Rome your source of special electronic cables

10 conductor shielded, Neoprene-jacketed electronic cable

Special 8 conductor, shielded, mobile transmitter cable

2 conductor, polyethylene-insulated, shielded, Neoprene-jacketed microphone cable

8 conductor, Rome Synthinol®-jacketed, TV camera cable

Special Rome Synthinol 901® hook-up wire—8 mil wall with nylon sheath

Special 136 conductor, Rome Synthinol-insulated, electronic cable

When you have an electronic wiring problem it pays to go to a specialist, such as Rome Cable. Wires and cables made by Rome, first, are designed by engineers with training and experience in electronic applications. Further, Rome Cable has the manufacturing knowledge and facilities to produce unusual constructions . . . with quality controlled step by step. By standardizing on Rome wires and cables you assure dependable performance for your product and add obvious quality . . . with a component engineered to your requirement.

Rome manufactures a wide range of hook-up wires, intercommunication cables, coaxial cables, electronic computer cables, R. F. transmission line, television camera cables as well as other special constructions.

COMMERCIAL TYPE HOOK-UP WIRES

Rome offers commercial type hook-up wires with three standard insulations.

Rome Hi-temp—a rubber insulation with exceptionally high resistance to heat and moisture. Underwriters' approved for 75° C.

Rome Synthinol—a polyvinyl chloride thermoplastic compound, highly resistant to acids, oils, alkalis, moisture and flame. Underwriters' approved for 80° C.

Rome Synthinol 901—offers all the advantages of Synthinol plus higher resistance to heat deformation, shrinkage and cracking, also improved solderability. Underwriters' approved for 105° C.

MILITARY HOOK-UP WIRES

Rome manufactures military type SRIR, SRHV and WL, complying with Joint Army-Navy Specification JAN-C-76, as well as shipboard types SRI and SRIB conforming to Specification MIL-C-915 A (SHIPS). Insulated with Rome Synthinol, these wires are made in a complete range of specification sizes.

a touch
of
tomorrow
in

Heiland
INSTRUMENTS

Heiland meets tomorrow's challenge today by anticipating the future needs of scientists and testing engineers for more accurate, more versatile and more dependable instruments. This unceasing effort to foresee the demands of the future, results in the design and development of ultra-modern instruments that meet every requirement of science and industry.

Heiland Research Corporation

130 East Fifth Ave., Denver, Colorado

Heiland

700 SERIES MULTICHANNEL RECORDING OSCILLOGRAPH—For recording of static and dynamic current phenomena—Simultaneous recording of as many as 60 separate channels on either 8 or 12 inch record widths and with record speeds as high as 144 inches per second assures accurate measurement of events occurring in the 0 to 5000 cps range.

Features include relay rack, table or aircraft mounting; convenient one surface operation; daylight loading; selective record speeds; trace identifier; scanning system; precision timing lines; AC or DC models available.

Heiland

MODEL 119 — SIX CHANNEL AMPLIFIER SYSTEM — Carrier linear and integrating type amplification of static and dynamic phenomena for oscillographic recording is simple and accurate when using the Heiland Amplifier System in conjunction with the Heiland Recording Oscillograph.

Among its many features are: One surface operation; high sensitivity; high power output; local and remote calibration; carrier amplification 0 to 1000 cps; linear and integrating amplification 5 to 3000 cps; relay rack, table or aircraft mountings; plug-in units.

Heiland

MODEL 82-6 — SIX CHANNEL BRIDGE BALANCE & STRAIN INDICATOR UNIT—Provides a simple and accurate means of calibrating, measuring and controlling static and dynamic phenomena from resistive type transducers before applying such phenomena to the galvanometer circuits of the recording oscillograph.

Designed for relay rack, table or aircraft mounting. Each of the six separate channels may be individually calibrated to gages of different resistances and having two, three or four external arms. A micro-ammeter is provided to aid in calibration and also serves as a static strain indicator.

Heiland

MODEL 500B — PORTABLE RECORDING OSCILLOGRAPH — Provides maximum portability when it is desired to record up to 12 separate phenomena and with small size and economy as controlling factors.

Record width—4 inches; record length—100 feet; highly accurate timing system; daylight loading; easy access; shock mount base; wide range of record speeds.

Heiland

MODEL 401 — PORTABLE SIX CHANNEL RECORDING OSCILLOGRAPH—The Heiland 401 recording oscillograph has its own self contained storage battery power source. Its low cost, small size and ability to record up to six separate phenomena on two inch recording media have made this instrument popular for laboratory and industrial testing as well as in schools and universities.

Included in its features are: Accurate timing system; choice of record speeds; local or remote operation; direct monitoring; daylight loading.

Heiland

GALVANOMETERS—Heiland Galvanometers are employed in recording oscillographs to transfer minute voltage and current variations to the photographically processed record where they can be measured and studied. Heiland galvanometers are available having natural frequencies up to 5000 cps and sensitivities such that only a few micro-amperes are required for each inch of deflection on the record.

Their small size permits as many as sixty elements to be placed adjacently in a 12 inch space. One common magnet assembly provides the necessary magnetic field for each group of 12 galvanometers. Each magnet assembly is individually heated and thermostatically controlled.

Its features are: high sensitivity; broad range of frequencies; hermetically sealed; plug-in connection; precision balance; low zero drift; high amplitude recordings.

* The type 1N35 is a pair of matched germanium diodes assembled in brackets for easy mounting. The resistance of the units are matched to within 10% at 1.0 volt in the forward direction. Ratings shown are for each diode.

** The type 1N40 consists of four matched germanium diodes whose resistances are balanced within ±2.5% in the forward direction at 1.5 volts. In addition, the forward resistances of each pair of crystals are matched within 3 ohms. The crystals are mounted on a standard octal base which is enclosed in compact metal radio tube shell. Ratings shown are for each diode.

*** Diodes 1N111 and 1N112 are specifically designed and tested for computer use. The reverse resistance of these diodes is measured at +55°C by sweeping Eb/Ib from 0 to -70 volts at 60 cps. Recovery time measurements are made at 0.5 and 3.5μ. To insure maximum stability all units are visually observed for any evidence of flutter, drift, hysteresis, zero or negative AC resistance in the reverse voltage region, or increasing AC resistance with increasing forward voltage.

MAGNETIC RECORDERS

the finest tape recorders

AMPEX AUDIO RECORDERS

Series 300 console

Series 350 table top console on base

Series 600 single case portable

Model 450 console on base

For uses where utmost reliability, "perfect" fidelity and accuracy of timing are of prime importance, Ampex Tape Recorders are universally preferred. America's four major broadcasting networks, the country's leading phonograph record manufacturers and various important musical organizations are among those whose usage has established Ampex as the world's standard of excellence in sound recording.

SERIES 300—THE SUPREME AMPEX

These, the finest of the Ampex line, are the machines used where speaking or musical performances justify the best recordings it is possible to make. Because of their supreme reliability, the 300 Series machines are used by major radio networks to originate, delay and rebroadcast important radio shows. Record manufacturers use the Series 300 for master recordings because of their high signal-to-noise ratio and low flutter and wow.

SERIES 350—THE STANDARD AMPEX

Newest of Ampex's general purpose audio recorders, the 350 has a 30° slant on the top-plate. This puts reels, editing knobs and all controls within easier reach of the operator. Tape editing is faster and less tedious. A three motor tape transport (also used on the higher priced Model 300) provides excellent tape control and utmost reliability of operation. The Series 350 is unusually accessible for servicing.

SERIES 600—THE MOST VERSATILE AMPEX

The Series 600 brings Ampex standards of quality within the reach of the most limited budget. Weighing less than 28 pounds, the Ampex 600 is the first truly miniaturized recorder which can provide full professional quality for remote broadcast pickups, schools and conservatories, high fidelity enthusiasts and other semi-professional users.

MODEL 450—FOR BACKGROUND MUSIC

For background music, automatic broadcasting and TV test patterns, the Model 450 Continuous Tape Reproducer provides up to 8 hours of continuous unrepeated program. The Model 450 uses 14-inch NARTB reels with double track pre-recorded tapes. Starting, stopping, reversing and program repeating are controlled automatically with no attention from a standby operator.

SERIES 3200—FOR TAPE DUPLICATION

Designed to make duplicate tapes at minimum labor cost, the Ampex Tape Duplicator makes from 1 to 10* duplicates simultaneously and employs a time-saving speedup. Double track tapes are made in one pass. Fidelity is high (see specifications). Duplicates of any standard tape speed can be made from masters of any standard speed.

*User has the option of buying from 1 to 10 slaves to operate from one master unit.

AMPEX DATA RECORDERS

Ampex magnetic tape machines retain test data in "live" electrical form. Hence a playback of the data is like a rerun of the original test. The tremendous "memory capacity" of magnetic tape retains more complete and detailed information than any other data recording method. The data can be scanned, speeded up, slowed down, automatically reduced or converted to any other electrical, visual or physical form. To cover the widest range of data situations, Ampex data recorders are offered with various frequency ranges, numbers of tracks and modes of recording.

F-M CARRIER TYPE RECORDER—MODEL 306*

Explosions, shock waves, geophysical data and other highly transient phenomena can be recorded on the Model 306 with excellent "instantaneous" accuracy. Because the data signals modulate an fm carrier, the accuracy of the recording is unaffected by minor tape imperfections.

Also, the Model 306 is able to record the vast majority of all mechanical occurrence, since it covers the extremely useful frequency range from 5000 cycles/sec. down to zero (D.C.).

OPTIONS: One to 14 tracks
Rack, console or combination mounting
Record and playback, record only or playback only

WIDE RANGE DIRECT RECORDER—MODEL 307*

With a frequency response from 100 to 100,000 cycles per second, the Model 307 is particularly suited to steady state data occurring over a wide range of frequencies. The 307 has had extensive application in fm-fm telemetering, sharing this field with the Model 500 described below.

OPTIONS: Same as Model 306

PULSE WIDTH RECORDER—MODEL 303*

This model can record any type of phenomena that lends itself to pulse width coding. Pulses can range from 60 to 1000 microseconds and will be accurate in duration to closer than 2 microseconds. Since each track on the machine may record commutated data consisting of many channels, it is possible to record hundreds of parallel data channels on one tape on a Model 303 machine.

OPTIONS: Same as Model 306

"LOW FLUTTER" WIDE RANGE RECORDER—MODEL 500

The Model 500 is a four-track, two-speed magnetic tape recorder designed to achieve extreme stability of tape motion while recording information in the frequency range between 100 and 100,000 cycles. Thus it is able to record fm-fm telemetering data without introducing any objectionable data error from small variations in tape speed. It has the lowest known flutter and wow characteristics of any tape recorder—less than 0.1% peak-to-peak by RDB standards.

Console mounting only
Four tracks only

SEISMIC DRUM RECORDER—MODEL 700

The Model 700 is a highly specialized instrument for seismic exploration for oil. It records 26 channels of information in fm-modulated form on a single tape, 4"x40 1/16". The tape is mounted on a constant speed drum, and is replaceable after each test shot. Frequency response is within ± 1 db from 3 1/2 to 300 cps, with a corresponding dynamic range of more than 45 db. The total time alignment between all data channels is closer than 1 millisecond.

Rack mounting only

* These models are available as two-track Combination Recorders. One 303 track plus one 307 track becomes a Model 309; one 306 track plus one 307 track becomes a Model 311.

Write today for further information and complete specifications.

MAGNETIC RECORDERS

3 Soldering Operations in 1 Easy as ABC

with KESTER® "SOLDERFORMS"

A First step in resistance soldering of this high-precision oscillator coil consisted of soldering screws and stud to can cover. Used Kester "Solderform" Disc and Rings composed of 5% Silver—95% Lead Alloy. Melting Point 680°F.

B Three glass terminals were soldered to cover with Kester "Solderform" Rings comprised of 63% Tin—37% Lead Alloy. Melting Point 361°F.

C Final operation, hermetically sealing cover on can, used Kester "Solderform" Ring 28.5% Bismuth—28.5% Tin—43% Lead Alloy. Softening Point 250°F.

MAKES MANY TOUGH JOBS SIMPLE

Tough jobs like this one can be made easy by Kester-engineered "Solderforms." Progressively lower melting temperatures at the various points of solder contact were mandatory, so as not to loosen each previous solder bond. And, typical of all Kester "Solderform" applications, the completely assembled coil successfully met all exacting tests, including 45 lbs. air pressure under alternate hot and cold water immersions.

KEY TO LOWERED PRODUCTION TIME

You'll find that Kester "Solderforms" are the definite answer to many severe production operations involving solder... speeding up production and lowering waste and rejects. Besides a wide variety of shapes and precise job-engineered composition, Kester "Solderforms" come to you dimensionally stable; every single Kester "Solderform" is guaranteed to be delivered in its exact pre-formed shape, ready for immediate use.

IF YOU MAKE Capacitors, Resistors, Switches, Transformers, Speaker Assemblies, Relays, Meters, Gauges, Fire Control Parts, Fuses, Badges & Emblems, Movements & Controls ... and many others ... you should INVESTIGATE KESTER "SOLDERFORMS"

How ALLEN HEAD precision fastenings apply to...

RADIO • TELEVISION • INSTRUMENT AND GENERAL ELECTRICAL MANUFACTURING

For greater strength: Allen Head Screws permit the use of smaller sizes. For instance a No. 6 Allen Head Cap Screw is equivalent to a No. 8 conventional screw.

For space economy: Allen Head Screws permit closer spacing of screws, eliminate projecting heads.

For greater holding power: Allen Head Screws are insurance against avoidable costly service operations.

In hard-to-reach places: Allen Head Screws, plus Allen Hex Keys and Drivers start screws easily and save awkward "fingering in."

For fine adjustments, close, snug fit between key and screw permits delicate adjustments that stay put.

For tamper-proof settings in gauges and instruments, Allen Head Screws can be set below surface and wax sealed.

If vibration is a factor, the precise Class 3 fit of Allen Head Screws will build longer trouble-free life into the product.

For a ready-made threaded hole, the new Allenut offers greater holding power and positive anchor in soft metals.

Allen Head Screws are available as standard items in a wide range of sizes ranging upward from No. 2 x 1/8". NC and NF threads. Popular sizes also available in 18-8 stainless steel. Set screws stocked in Allen-point, oval, flat cone and half dog points (full dog, special).

Sold only through leading distributors. Write the factory for technical information or regarding any special requirement.

Allenut and Allen Flat Head Cap Screw used to hold thin metal plate to metal base. Allenut has been pressed into counterbored hole. Will not fall out or turn against driving action.

Allen Head Cap Screws contribute to compact designing. Can be countersunk without allowing for wrench clearance.

Allen Heads permit close spacing impossible with conventional heads.

Firm grip without the use of weak slots or projecting heads.

NOW! . . .

from the world's largest producer of gyros . . .

RATE GYRO

Type No. 15814-1-A

Overall Size—2" x 2"

MOTOR: 26 volts, 400 cps, 3 phase with rated speed of 22,000 rpm and a rotor moment of inertia of 175 gram-cm².

PICKOFF: 26 volts, 400 cps, single phase with "E" type variable coupling. With resistive load of 10,000 ohms. Tuned output is 6 to 7 volts at maximum rate. Null is 30 millivolts with an armature travel of 2½° to 3° either side of null.

DAMPING: Accomplished by fluid flotation of gimbal. Damping factor is 0.5 to 0.7 of critical, but values up to and including 1.0 of critical can be provided.

NATURAL FREQUENCY: 50-55 cps (undamped).

WARM-UP TIME: One minute.

RANGE: Maximum rate is 450 ± 20°/second. Minimum detectable rate is less than 1.5°/second. Other maximums and minimums are available.

ENVIRONMENTAL CHARACTERISTICS: -20°F. to 140°F. temperature operating range. Maximum shock is 60 g. Vibration operating range of 5 g. from 20 to 300 cps. Positive hermetic seal. **WEIGHT:** 13.5 ounces complete with mounting bracket and electrical connector.

FREE GYRO

Type No. 14108-1-A

Overall Size—3⅜" x 5⅝"

MOTOR: 26 volts, 400 cps, 3 phase with rated speed of 22,000 rpm and a rotor moment of inertia of 1260 gram-cm².

DRIFT RATE: Will not exceed 1° per minute when subjected to Scorsby test at amplitude of ± 15° and rate of approximately 6 cpm (corrected for earth's rotation).

PICKOFF: Autosyn type with peak value of 20 volts. Initial slope of output voltage curve about null position is 0.35 volts per degree ± ten per cent. Phase shift is less than 20 degrees. Residual voltage is less than 50 mv.

WARM-UP TIME: Within two minutes.

OPERATING LIFE: Rated at 500 hours. **ENVIRONMENTAL CHARACTERISTICS:** Maximum operating temperature 195°F. and a minimum of -20°F. Maximum allowable shock is 60 g. Maximum operating vibration of 7 g. (from 10 to 500 cps). Maximum excursion not to exceed 0.5 inches. Positive hermetic seal.

WEIGHT: Approximately 4.2 lbs. **CAGING AND UNCAGING:** Can be caged remotely by applying 26 volts, 400 cps single phase and 28 volts DC power. Will cage from any position of gimbal within 30 seconds with gyro rotor at full speed. Application of 28 volts will uncage within 0.1 seconds.

COMPLETE FREEDOM ON 2 AXIS

TWO AXIS-GRAVITY ERECTED

VERTICAL GYRO

TRANSMITTER

Type No. 14104-1

Diam.—6 1/8" Height—6 3/4"

Weight—6 1/4 lbs.

Designed for use as a remote vertical reference where vertical stabilization is required. The instrument is essentially an electrically driven, vertical-seeking gyro with separate Autosyn transmitter pickoffs on the pitch and bank axes. Sealed in an aluminum case against environmental conditions.

- Operating temperature range: -55°C to +70°C.
- Operational limits: 360° in roll and pitch with controlled tumbling of the pitch axis at near 90°.
- Erection device: A two-ball erection system maintains the gyro in a vertical position to within ¼° of vertical position with respect to the earth.
- Caging: From any position at full rotor speed in less than 45 seconds.

VERTICAL GYRO TRANSMITTER

FOR RADAR AND AUTO PILOT CONTROL

TYPE 14110-1-A

FEATURES: Includes quick erecting mechanism which makes the remote unit ready for operation within 3 minutes. • Two ball erection system. • Non-tumbling stops. • Inclined axis (1 degree) to minimize turn error.

Power Requirement . . . 115 v, 1 phase, 400 cps Starting . . . 19 w .9 P.F. Running . . . 13 w .85 P.F.

Gyro Speed . . . 22000 RPM

Gyro Moment . . . 600 gram cm²

Erection rate (normal) . . . 3°/minute

Autosyn excitation . . . 26 v, 400 cps

Weight . . . 2 3/4 lbs.

Size . . . 3 1/8 diameter x 5 1/6 long

business*

RESEARCH

ENGINEERING

MANUFACTURING

ere, at the Scintilla Division of Bendix, the word SERVICE is much more than the name of a department. It is a vitally important part of our over-all operations. Together with Research, Engineering and Manufacturing—Service might well be termed the fourth dimension of our business.

To implement this policy of following through to see that every customer gets the full performance built into each product, the Scintilla Division has a worldwide service organization backed up by factory-trained service men strategically located to meet service emergencies.

Service data, covering installation, operation and repairs as well as adequate distribution of parts, makes up a complete service program.

Just another reason why the name Bendix has become "The Most Trusted Name in Ignition."

For the most
complete line of
**AIRCRAFT
INVERTERS**

The Red Bank Division of Bendix Aviation Corporation is the logical place to find your answer to aircraft inverter needs—and for three significant reasons. First, we offer the widest range of inverters. Second, we design and build each inverter as a complete, unified mechanism. Third, we are equipped to design and produce inverters for all kinds of special-purpose applications . . . and, in fact, are now engaged in developing inverters up to 5000 VA and for high temperature, high altitude applications.

For
"RELIABLE"
**ELECTRON
TUBES**

With electronic controls taking over more and more operational functions in aircraft, it's becoming increasingly important that the electron tubes used be dependable under conditions of high altitude, continuous vibration, varying voltages and frequent shock. Because of their advanced design and construction . . . born of never-ceasing research and special production skills . . . Bendix Red Bank Regular and Special Purpose Reliable Electron Tubes have the dependability necessary to meet severe operating conditions.

For complete details on our aircraft inverters or electron tubes . . . or on our dynamotors, voltage regulators, fractional D.C. motors or A.C. and D.C. generators . . . write

Depend on

Bendix
Red Bank

Some bright spots in the Sales Picture!

There are literally *hundreds* of ways in which **DRAKE** Socket Assemblies and Signal Lights can help an appliance sell itself!

The evident promises they give of greater *safety*, more *economy*, higher *efficiency* in use can tip the prospective buyer's decision *your way* . . . the fulfillment of those promises when the appliance is put to work in the home or store helps build the satisfaction which brings a customer back again for *your brand*.

Almost endless possibilities for practical application, both for warning signals and for illumination, can only be barely suggested by the examples illustrated:

- A . . BEEHIVE JEWEL LIGHT ASSEMBLY, for many applications . . Lamp replaceable from front of panel.
- B . . GERMICIDAL, with ultra-violet lamp for purifying and deodorizing.
- C . . JEWEL LIGHTS, with wired leads, for use where signal lights must be practically infallible . . Terminals can't short.
- D . . SWITCH SOCKETS, for concealed illumination at working areas.
- E . . INDICATOR BATTERY, with neon lamps and necessary resistance, for use in limited space.
- F . . SHIELDED LIGHT SOURCE.
- G . . REFLECTOR SWITCH TYPE ASSEMBLY, for concentrated illumination on work areas.
- H . . LAMP BANK, consisting of two series groups in parallel.

It costs so little to get the extra sales punch and performance advantages precision-made, *use-proven* **DRAKE** Socket and Signal Light Assemblies can give your unit. Write Dept. EB, and tell us what type of appliance you have in mind. Our broad experience often suggests low-cost possibilities which you may have overlooked.

OVERALL STURDY CONSTRUCTION

MELAMINE JACKS

Material Key:

- MELAMINE MOLDED PLASTIC
- BRASS, CAD. DICHROMATE PLATED
- BRASS, NICKEL PLATED

The design of the #J-1 series jack represents an optimum combination of electro-mechanical elements. A BRASS THREADED BUSHING is molded as an integral unit with the MELAMINE BODY. Melamine material possesses excellent mechanical and electrical properties, and, further, offers a natural resistance to fungus. The BERYLLIUM COPPER SPRING CONTACT is heat treated and silver plated. Terminal lug is solder dipped.

Red, black, yellow, blue and white bodies available for color coding.

FG AUDIO AMPLIFIER

FG AUDIO AMPLIFIER

The Type FG 5/10 KW audio amplifier consists of a push-pull power amplifier stage driven by a high fidelity driver amplifier. The power stage contains either two or four triodes (WL-5736) depending upon whether 5- or 10-kilowatts output is desired. Supply for the final stage uses selenium rectifiers. Power supply may be 3 phase, 50 or 60 cycle, 220, 230, 240 or 440, 460, 480 volts. Output 5 or 10 KW into a resistive load over a frequency range of 30-10,000 cps. Used for powering laboratory testing equipment under controlled conditions; powering supersonic transducers; supplying power at audio frequencies and for exploring high frequency vibration phenomena. The amplifier is entirely self-contained and is completely protected against overload or incorrect operation by air breakers. There are no exposed voltages outside the enclosure. Interlocks automatically remove high voltages when either of the side doors are opened, or front panels are removed. See D.B. 85-950 for full information.

OPERATIONAL CHARACTERISTICS

Response: Uniform ± 1.5 db, 30-10,000 cps with resistance load.
Distortion: RMS harmonic distortion 5% or less, 50-10,000 cps.
Hum and Noise Level: 45 db or more below full output.
Audio Input Level: 10 milliwatts maximum.
Input Impedance: 150 or 600 ohms.
Output Voltages as specified: Arranged for 6 voltages in arithmetical progression.
For example: 120-240-360-480-600-720-volts.
Power Supply: 220, 230, 240 or 440, 460, 480 volts 3-phase, 50 or 60 cycles.
Permissible Voltage Deviation: $\pm 5\%$, including regulation and variation.
Permissible Voltage Unbalance: $\pm 2\%$ average of three phases.
Regulation: When output voltage regulation is required, the amplifiers can be modified on special order, to provide regulation not over 10% at any frequency in the range of 60-3,000 cycles into resistance loads. Regulation is defined as $\frac{V_1 - V_2}{V_2} \times 100$, where V_1 = output voltage at no load, V_2 = output voltage at full load.

PORTABLE BALANCERS

TYPE HQ PORTABLE BALANCER

Static and dynamic unbalance are usually present in rotating parts after fabrication. Undesirable vibration and noise inherent in mass produced rotors can be eliminated by balancing dynamically with production type balancing machine tools. However, where conditions are such that balancing a rotor in its own bearings is necessary, a portable balancer is indicated.

In the Type HQ portable balancer, relatively simple, accurate and reliable means are provided, by a wattmeter and sine-wave alternator, for determining the amount of unbalance, and the angular location and magnitude of the correction weights.

The balancer consists of an indicating

wattmeter, with necessary interconnection, switching and control devices, assembled in a carrying case; one or more velocity type pickups; and either a sine-wave alternator for hand held models or a keyed type sine-wave generator for mounted models. The alternator or generator, and pickup assemblies are supplied in a separate carrying case. Seismic mountings for pickups are also available. The apparatus may be used normally in a speed range of 600 to 6000 r.p.m. The range may be extended downwardly to 200 r.p.m. by means of an auxiliary low speed seismic mounting. For applications above 600 r.p.m., high speed seismic mountings are available. Request descriptive Bulletin 85-920 for complete details.

SURGE COMPARISON TESTERS

MOBILE

PORTABLE

This Westinghouse surge comparison tester simultaneously tests turn-to-turn, phase-to-phase and coil-to-ground insulation; one equipment for most testing needs. With every test set-up, high frequency and high potential qualitative tests of resistance, impedance, and turn balance are made—results are obtained by a single scope observation. High turn-to-turn voltages are applied without excessive winding-to-ground stress. Non-destructive testing is assured on even

fractional h-p motors; however, destructive fault location is possible in many cases.

Surge Potential: 10 kv Peak; Negative to Ground.

Power Input: 115-125 volts, 60 cycle, 7 amperes in Portable Model

16 amperes in Mobile Model

Request Descriptive Bulletin 85-960 for complete information.

MICARTA

LAMINATED SHEETS AND SHAPES

MOLDED PIECES

MICARTA 444

MICARTA SHEETS AND SHAPES

Twenty grades of sheets, most of which are available in black or tan. Fillers include paper, cotton, asbestos and glass. The most commonly used by communication engineers is Micarta tan (254) and black (464), both of which are paper base plastic. Either color supplied in 36" x 36" sheets, 1/32" to 2" thick.

MOLDED MICARTA

For large production quantities of simple or complicated shapes. Material placed in the mold may be in one of four forms: (a) wood flour and plastic, (b) impregnated cloth or paper in laminated form, (c) impregnated cloth or paper chopped

MICARTA "444"

This form of Micarta offers a practical and economical means of obtaining molded forms or shapes with low-cost equipment and dies. Examples of the shapes are shown at left. A tan or green product, processed in flat sheets of vari-

Micarta 259 is made of melamine resin in a base of glass cloth. It is white, fire-resistant and very strong. Standard Micarta shapes include angles, channels, zees, rods and tubes. All are produced in six or more grades, in various dimensions.

into small pieces, or (d) a combination thereof. Grades using sheets and chopped pieces make the strongest parts; those containing wood flour are useful for intricate shapes,

ous thicknesses, from cotton cloth impregnated with a phenolic resin binder. Micarta "444" is a practical material for post forming many parts ordinarily made of drawn sheet steel.

For complete details on Micarta, request Bulletin B-5878

Hiperthin Cores

HYPERTHIN CORES—Toroidal cores of ultra-thin high permeability magnetic material wound over ceramic spools for computer static storage elements and high frequency pulse applications.

These cores are available in various types of materials such as HIPER-

SIL® (3% silicon iron), HIPER-NIK® (50% iron-nickel), ORTHO-NIK (50% iron-nickel, rectangular hysteresis loop) and 4-79 Permalloy, all in thicknesses of 1 mil, $\frac{1}{2}$ mil, $\frac{1}{4}$ mil and $\frac{1}{8}$ mil. Standard spool sizes are shown and number of turns of magnetic material can be varied to suit application.

MODERN EQUIPMENT FOR MAINTENANCE-FREE ELECTRONICS USE

Fosterite treated transformers utilize Type C Hipersil® cores in a one loop design to achieve a standard design transformer that will fit most applications with minor adaptations. The Fosterite coating applied to these units gives the best protection available for uncased transformers against humidity, immersion and temperature extremes. In addition to standard communications and radar applications, these transformers are being used extensively in other air-borne equipment.

Low Power Pulse Transformers — These pulse transformers are designed for use in low

power, low voltage pulse circuits. The four general types are: (1) Blocking Oscillator or regenerative drive, (2) Pulse Trigger or current transformer, (3) Low Power Pulse output transformer, and (4) Coupling Transformers.

Charging Reactors—Charging reactors are used between the D-C power supply and Pulse-forming network in low voltage pulse circuits. Depending on circuit constants and repetition rates, they operate as resonant, hold-off diode, or linear types.

WESTINGHOUSE ELECTRIC CORPORATION, P. O. BOX 868, PITTSBURGH 30, PA.

MAGNETIC AMPLIFIERS MAGAMP

MAGAMPS, Westinghouse magnetic amplifiers, of either the self-saturating type or simple saturable reactor type, can be designed for a wide range of specific applications. They can be either designed to operate from control input powers as low as milli-microwatts or designed to deliver output powers of several kilowatts. They can be constructed to operated from any a-c supply voltage, either single or poly-phase, ranging from a few volts to several hundred volts, and at frequencies ranging from the lowest power frequency to the megacycle range.

MAGAMPS have been applied in servo systems as complex as aircraft autopilots, in the control of motors from the smallest fractional horsepower size to the largest steel mill drive, in the regulation of gen-

rator voltages from the miniature aircraft unit to the central station generator. They have been used to amplify the minute outputs of thermocouples, photocells, ionization chambers, and strain gauges. Other applications have included arc welding controls, ignitron firing controls, paper mill reel control, automatic battery chargers, and isolation metering of d-c voltages and currents.

MAGAMPS are available in the 3700 series under five general numbers, as shown in the table below. They may also be engineered for specific applications. This service is available through the Materials Division, Westinghouse, East Pittsburgh. For complete descriptive information, request Technical Data 52-600.

OPERATING CHARACTERISTICS OF 3700 SERIES MAGNETIC AMPLIFIERS

| Size of Assem: Dia. | 1 1/4" | 1 1/2" | 2 1/4" | 3 1/4" | 4 |
| Height | 1 1/2" | 1 1/2" | 2 1/4" | 2 3/4" | 2 1/2" x 2 units |

1. Power output at top of linear region of control curve.
 2. Control ampere-turns from cutoff to top of linear region of control curve.
 3. The figure of merit, M_u , is the ratio of power gain to time delay for 63% response. Power gain is the ratio of the change in output power for a change in input power at the optimum value of load resistance. The time delay is expressed in cycles of supply frequency (60 cycles).
 4. Time delay is given by equation of the form $T = k_1 \frac{N^2}{R} + k_2$ cycles of supply frequency where $\frac{N^2}{R}$ equals $\left(\frac{N^2}{R} \text{ for control circuit A} \right) \text{ plus } \left(\frac{N^2}{R} \text{ for control circuit B} \right) \text{ plus } \left(\frac{N^2}{R} \text{ for control circuit C} \right)$.
 5. RMS value given if output is A-C, average value given if output is D-C.
- For further information, request T.D. 52-600.

THE MOST COMPLETE LINE IN THE INDUSTRY

Westinghouse instruments are designed, manufactured and approved under the most severe National Standards to meet exacting engineering requirements. The completeness of the lines of Westinghouse instruments gives the builder and the ultimate user the widest choice of matched instruments for any application.

The general points to consider when selecting instruments are: 1. Accuracy desired; 2. Scale range; 3. Single or multiple scale; 4. Size; 5. Appearance.

With literally hundreds of types available—for measuring all electrical quantities, temperature, position and time—Westinghouse brings you the results of over 65 years' experience in designing and manufacturing better instruments for better performance. We built our first instruments in 1888 and have samples to prove it.

Westinghouse representatives and specialized instrument sales engineers are available all over the country to help you make the proper selections.

SWITCHBOARD As the name implies, these instruments are standard equipment on switchboards in power and switching stations, aboard ships, and in the factory. They also are generally applied to control boards and test boards in laboratories and on production lines and to large radio transmitters because they provide maximum accuracy and readability for this type of service. For complete explanation of types of A-C or D-C Switchboard Instruments available, request Catalog Section 43-200.

PANEL Westinghouse Panel Instruments are available for measuring direct current, alternating current, audio frequency, radio fre-

quency, decibels and elapsed time. Available in sizes of 2½, 3½ and 4½ inches, in surface or flush mounting styles and in round or rectangular design. Catalog Section 43-300 is available free on request.

PORTABLE Because of their broad scope of operation, portable instruments are required in a wide variety of ranges, sizes and accuracies. Each type has many different applications . . . but each application can best be served with a particular instrument. The portable instruments shown below represent only a small portion of the varieties available. To aid your selection of the best instrument for your particular application, request Catalog Section 43-100.

RECORDING Westinghouse Recording Instruments are available in switchboard, portable and wall mounting styles in direct current and alternating current types and with round or strip charts. The Recorders are furnished with a broad line of movements to meet all electrical measuring requirements. For complete data ask for Catalog Sections 43-400 and 43-415.

AUXILIARIES These include self-contained units for extending the application of instruments into the measurement of speed and for the measurement of high values of a-c and d-c current and voltage. The general auxiliaries Westinghouse features are Tachometer Generators, Portable Transformers, External Resistors and Shunts in a wide selection of ratings. Request Catalog Section 43-800 for complete details, ratings and descriptive data.

TYPE P-5 LINE (Accuracy ½ %)

The Type P-5 series of Westinghouse instruments is designed to withstand severe portable service and still maintain the highest degree of accuracy over long periods of time. A combination of high-grade mirrored dials and knife-edge pointers eliminates parallax and

assures accurate reading. Scale length is 5 inches and divisions are arranged to aid quick reading. Maximum versatility is achieved with multi-range scale, some of which incorporate seven ranges. Pre-aged Moldarta* case does not warp or deteriorate.

| | | MILLIAMMETERS | 0-5 TO 0-750 | |
| | | VOLTMETERS | 0-1 TO 0-750 | |
| TYPE PX-4 FOR DIRECT CURRENT (Also Radio-frequency and Rectifier Types) | Ammeters | 0-.25 to 0-300 | Voltmeters | 0-1 to 0-750 |
| | Radio frequency | 0-.5 to 0-20 | Rectifier type | 0-.5 to 0-150 |
| | Milliammeters | 0-1 to 0-3,000 | Millivoltmeters | 0-2 to 0-100 |
| | Radio frequency | 0-75 to 0-800 | Volt-Ammeters | 0-1.5 to 0-150 volts |
| | Rectifier type | 0-1.5 to 0-20 | | 0-.15 to 0-60 amperes |
| | Microammeters | 0-25 to 0-1,000 | | |
| | Rectifier type | 0-500 | | |

(For Complete Ordering Information, See Catalog Section 43-100)

INSTRUMENTS

PORTABLE INSTRUMENTS

P-14 VOLT-AMMETER

P-14 HINGED COVER

P-12 VOLTMETER

K-24 AMMETER

K-25 VOLTMETER

TYPE P-14 LINE (Accuracy 1%)

The Type P-14 portable instrument includes features of larger portables, including magnetic shielding, plus added advantages of extremely light weight and smaller overall dimensions. Its accuracy, versatility and low cost make it ideal for field and radio testing. Up to 4 voltage or

current ranges available with multi-range scales. Combinations such as 3 current and voltage ranges in the same instrument make this an extremely versatile instrument. Measuring only 5 1/4" x 4 1/4" x 2 1/2"; both hinged cover and open-faced models are pocket size.

FULL SCALE RANGE OF STANDARD RATINGS

TYPE PA-14 FOR ALTERNATING CURRENT

| | |
|---------------|----------------|
| Voltmeters | 0-1.5 to 0-750 |
| Ammeters | 0-.5 to 0-50 |
| Milliammeters | 0-5 to 0-500 |

TYPE PX-14 FOR DIRECT CURRENT

| | |
|-----------------|-----------------|
| Voltmeters | 0-.75 to 0-800 |
| Millivoltmeters | 0-10 to 0-5,000 |
| Ammeters | 0-.5 to 0-50 |
| Milliammeters | 0-1 to 0-2,000 |
| Microammeters | 0-20 to 0-5,000 |

Also available in rectifier and thermocouple types.

(For Complete Ordering Information, See Catalog Section 43-100)

TYPE P-12 LINE (Accuracy 2%)

The Type P-12 line includes single and multiple range ratings for complete D-C and A-C current and voltage measurements. It meets all requirements, including shielding, insulation, etc. required for 2% portable instruments in A.S.A. C39.1. Provides the same high degree of reliability,

overload capacity and range coverage contained in larger types.

LIGHTWEIGHT: A-C instruments weigh from 1 to 1 1/2 lbs. D-C instruments from 1 1/2 to 2 lbs.

POCKET SIZE: A-C—4 1/4" x 3 1/4" x 2 5/16" D-C—4 1/4" x 3 1/4" x 1 3/4".

FULL SCALE RANGE OF STANDARD RATINGS

TYPE PA-12 FOR ALTERNATING CURRENT

| |
|--|
| Self Contained Current—From 5 milliamperes to 50 amperes |
| Self Contained Voltage—From 1.5 volts to 300 volts. Also available in rectifier types. |

TYPE PX-12 FOR DIRECT CURRENT

| |
|---|
| Self Contained Current—From 20 microamperes to 50 amperes |
| Self Contained Voltage—From 10 millivolts to 800 volts |

(For Complete Ordering Information, See Catalog Section 43-100)

SWITCHBOARD INSTRUMENTS

24-LINE (Accuracy 1%)

4 1/2" Class—Circular Scale, Rectangular Front—Round-body Case for Flush Mounting. Because of its extra-long scale, the 24-Line instrument combines high readability with minimum panel space require-

ments, particularly useful where panel area is at a premium. The pointer travel gives a scale length more than twice as long as other types which require the same panel space.

25-LINE (Accuracy 1%)

6" Class—Rectangular Case—Flush or Projection Mounting—Optional Internal Illumination. Westinghouse 25-Line instruments meet the requirements of many special installations. Simplicity of design,

uniform appearance, interchangeability and availability of movements for any measurements, make this instrument especially suited for modernization as well as for new installations.

FULL SCALE RANGE OF STANDARD RATINGS—24 and 25 LINES

DIRECT CURRENT

| |
|---|
| Ammeters—0-1 to 0-50 (self-contained) |
| Ammeters for use with shunts—0-50 or 0-100 millivolts |
| Voltmeters—0-2 to 0-800 (self-contained) |
| Milliammeters—0-1 to 0-500 |
| Wattmeters—120 or 240 volts, 0-50 or 0-100 millivolts for external shunts. (25 line only) |

ALTERNATING CURRENT

| |
|--|
| Ammeters—(24 line)—0-1 to 0-20 (self-contained) |
| (25 line)—0-1 to 0-50 (self-contained) |
| Ammeters for use with transformers—0.5 |
| Voltmeters (24 line)—0-150 to 0-600 (self-contained) |
| (25 line)—0-15 to 0-800 (self-contained) |
| Voltmeters for use with transformers—150 |
| Wattmeters for use with transformers—5 amperes—120 volts |
| Frequency meters—(24 line)—120 volts, 60 cycles |
| (25 line)—120 volts, 25 or 60 cycles |

Westinghouse

P.O. BOX 868, PITTSBURGH 30, PA.

RECORDING INSTRUMENTS

TYPE G-40 DIRECT ACTING STRIP CHART RECORDER (Accuracy 1%)

Perfection of detail in chart drive, chart roll, chart threading and inking system, makes Type G-40 Recorders easier to operate and has removed many causes of lost records. Available for switchboard or portable applications.

Chart has double perforations for positive traction or driving drum. Accurate synchronous motor clock, furnishes drive power for chart. Chart speeds of $\frac{3}{4}$ ", $1\frac{1}{2}$ ", 3" or 6" per hour or per minute.

TYPE A
PORTABLE
SWITCHBOARD
RECORDER

G-40 PORTABLE RECORDER

TYPE A ROUND CHART RECORDER (Accuracy 2%)

A low first-cost, low-maintenance recording instrument for a variety of applications where chart records of 2% accuracy are adequate for their purpose. Extra-sturdy construction makes this a particularly convenient instrument for field service jobs. Portable, switchboard

mounting, wall mounting or detachable socket-mounting cases are available. Scale length is 2 inches, but chart has suppressed zero scale with divisions comparable in size and readability to those of much longer scales.

PANEL INSTRUMENTS

33-LINE (Accuracy 2%) — 2½" Class

Scale Lengths, 1.5" to 1.8". Four different flush mounting types of cases are available: the Military Standard; the round, wide-flange instrument; the round, narrow-flange type;

the rectangular type. Projection mounted instruments also are available in round case. Cases are interchangeable.

35-LINE (Accuracy 2%) — 3½" Class

Scale Lengths, 2.06" to 2.4". Available as a complete line in five types of cases and mounting covering Military, Laboratory, industry and radio applications. The ratings cover the

broadest field consistent with prevailing requirements for instruments of this class. Cases are interchangeable without adapters

37-LINE (Accuracy 2%) — 4½" Class

Scale Lengths, 2.8" to 3.2". The largest of the miniature panel instruments. The self-contained ratings cover the broadest possible field for this class of instruments. Higher

ratings may be obtained by using external resistors, shunts or transformers. Five types of cases are interchangeable throughout the line.

TUBULAR RESISTOR

PORTABLE SHUNT

CURRENT TRANSFORMER

AUXILIARY EQUIPMENT

SECTIONAL TUBULAR RESISTORS FOR D-C INSTRUMENTS:

The sectional construction of these resistors permits a wide range of accurate measurements of high voltages with one milliamper instrument. Resistance values $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$ or 1 meg-

ohm are standard, and combinations of these may be easily and quickly put together to form any complete unit. Designed for panel mounting or portable use.

TYPE G AND GG SHUNTS FOR D-C MEASUREMENT:

Type G and GG shunts provide a complete line for use with indicating or recording instruments for measuring direct currents beyond the range of self-contained instruments.

Portable and switchboard types are available in 50 and 100 millivolt sizes with many different current ratings.

PORTABLE POTENTIAL AND CURRENT TRANSFORMERS:

For measuring electrical quantities greater than the self-contained ranges for which the instruments are rated, these portable poten-

tial and current transformers offer a convenient and accurate means of increasing the usefulness of an instrument.

SELENIUM RECTIFIERS MAGAMP

Westinghouse MAGAMP Selenium Rectifiers have three classifications according to reverse leakage current. The upper limits for Classes A, B and C are 0.3, 0.4 and 0.5 milliamperes per square inch respectively, at 15 volts 400 cycles per second. Table below lists the sizes that are available, giving the active area for each size, the rated half-wave forward current, the maximum limit for forward voltage drop, and the maximum leakage currents at 15 volts, 400 cycles for Classes A, B, and C rectifiers.

Although leakage limits are given here for 400 cycles per second, Westinghouse MAGAMP Selenium Recti-

fiers are equally suitable for 60 cycle applications. The 60 cycle leakage current is approximately one-half the 400 cycle leakage current at any given voltage at room temperature.

Westinghouse Type K cells are tested individually and retested after assembly and sealing or treatment with a protective coating. Unless otherwise specified, the insulation of all rectifier assemblies is given a 60 cycle one minute withstand test, at twice the terminal voltage rating plus 1000 volts, between cell terminals and mounting brackets or case. Request Technical Data 52-650 for complete information.

1. The manufacturer reserves the right to substitute rectifiers of a higher class when necessary to expedite orders unless "no substitution" is specified. The milliamperes limits shown determine the class designation.
 2. Leakage values at 60 cycles are approximately one-half the leakage values at 400 cycles at room temperatures.
 3. Applies to both 60 and 400 cycles at ambients up to 75°C.
 *Can be supplied in any desired cell combination for full-wave and bridge circuits.

MAGNETIC METALS AND ALLOYS

These metals offer a wide variety of permeability characteristics, low hysteresis losses and high purity. Where their characteristics are particularly suited to the requirements of the application, these alloys are superior to other magnetic materials and will improve performance.

Hipernik® — An alloy of iron and nickel with small amounts of manganese and silicon added. It has high initial and maximum permeability and low hysteresis loss. It has a wide range of applications — sensitive relays, a-c meters, magnetic shields, audio transformers, instrument transformers, reactors, etc.

Hiperco® — An iron-cobalt alloy containing $\frac{1}{3}$ cobalt, $\frac{2}{3}$ iron and 1 to 2% of another element to increase the electrical resistivity. Used primarily for aircraft equipment where size and weight saved is a vital factor. Transformers, generators, motors and high speed aerial cameras are some of the uses.

Hipernik V® — A 50% iron-nickel grain oriented alloy. Supplied in torodial coils of .002" and .005" lamination thickness. Both material and core are carefully processed under laboratory control to assure uniform characteristics.

Conpernik® — An iron-nickel alloy of the same chemical composition as Hipernik, but of different electromagnetic characteristics produced by a special annealing process. It is most applicable where a component having high ratio of reactance to resistance (high Q) is required. Also used in choke coils and other components having a high d-c component of current.

Other Alloys that serve a wide range of functions are Kovar®, Puron*, Cupaloy*, K42B®, Refactaloy® and Discaloy®. These are used for electrodes, contacts, for scaling glass and metal, for tube lead-in wires, and for high strength at elevated temperatures.

INDICATING LAMPS — SWITCHES

Rectangular Minalite® is a medium sized low-drain indicating lamp designed for extreme angular visibility and to provide the utmost in sturdiness, compactness, and appearance. Its design matches modern rectangular switchboard devices, such as instruments, relays and control switches. It is intended for general indicating or signal purposes on switchboards, control desks, etc.

Round Minalite® is a compact, medium-drain indicating lamp developed especially for miniature steel switchboards, providing the maximum illumination in the smallest possible space. Since some rigidity was sacrificed to obtain the long slender construction, which permits close center spacing between adjacent lamps, it is intended only for such applications where the wire size is not larger than No. 18.

Complete information on component parts, hardware, receptacles and resistors available are contained in Catalog Section 37-200, which will be sent free on request.

The Westinghouse Minatrol® Switch is a compact control switch of smaller dimensions than the conventional Type W control switch, designed particularly for use on miniature switchboards. It is available in forms to suit the varied requirements of control switch applications, and will handle the full control voltage without interposing relays. Its flexibility of application is practically the equivalent of the Type W switch.

Construction — The Minatrol is a rotary-type switch with the same design features which have made other rotary-type control switches outstanding in performance. The switch handles 125 or 250-volt control circuits directly, using toggle switches with quick-make and quick-break contacts mounted in unit-construction frame. It occupies only about one-fourth of the switchboard space required by the conventional switch and has a pleasing appearance, unmarred by the mounting screws.

Performance — The current-carrying capacity and interrupting ability of the Minatrol is ample to handle the usual control circuit without the use of auxiliary interposing relays or intermediate control voltages. The switches are rated at six amperes continuous and can interrupt a non-inductive load of three amperes at 250 volts and six amperes at 125 volts d-c. The switch will interrupt highly inductive currents up to five amperes at 125 volts d-c or up to one ampere at 250 volts d-c. On a-c, values can be at least doubled at 250 volts maximum.

Classification — The Minatrol control switches are of two types:

1. Type C, for stay-put and spring return with fixed handles.
2. Type S, for stay-put with removable key handles.

Two standard lengths are available, one to accommodate a maximum of four switch units, and the other a maximum of eight switch units. A special twelve-switch unit length is available on order. Request Catalog Section 37-175 for complete information.

MODERN EQUIPMENT FOR MAINTENANCE-FREE ELECTRONICS USE

CIRCUIT BREAKERS AB De-ion®

The sturdy moldarta breaker cases form complete self-enclosures, protecting workers and preventing tampering. Standard construction features are the De-ion arc quenchers, quick-make and quick-break mechanisms, and thermal-magnetic trip elements. Request Price List 29-060.

AB DE-ION CIRCUIT BREAKERS comprise a complete line of fuseless protective devices for distribution, power, lighting and electronic circuits. They are used in individual mountings, built-in applications, separate enclosures, switchboards and panelboards.

CONTROL RELAY

PUSHBUTTONS are available in a complete line of Standard, Heavy Duty, and Oil-Tite* units to meet the requirements of manufacturers of electronics equipment. The pushbuttons and selector switch units are rated for continuous current of 10 amperes—see Maximum Interrupting Capacity tabular example at right. For complete information as to types, sizes, interrupting capacities, etc.; request free Descriptive Bulletin 15-000.

CONTACTORS of the famous Westinghouse Life-Linecontactor® design are available in four general classes: Reversing Mounted Life-Linecontactors • Size 00 Multi-Pole Relay • Mounted Life-Linecontactors* • Unmounted Contactors. In addition, they may be modified with built-in pushbuttons, selector switches, control transformers or special combinations of modifications to

RELAYS built for heavy-duty service on industrial electronic equipment are offered in both a-c and d-c. Among the types available are: Thermal Overload • Magnetic Overload • Time Limit • Thermostatic • Auxiliaries • Mechanical • Multi pole • Shunt Coil • Vibrating.

Sheldon LIGHT-WEIGHT THERMAL DELAY RELAYS

are ideal for many industrial, aeronautical, mobile, marine and electronic applications where dependable, quiet, maintenance-free delay control of an electrical circuit is desired. Although currently available in 6.3V., 26.5V. and 117V. A.C./D.C. gas filled or vacuum, with time delays of 5 seconds to 300 seconds at 25°C the Sheldon Thermal Delay Relays can be adapted to any control requirement not covered by existing types.

Sheldon Thermal Delay Relays have been used for many years by leading manufacturers (and users) in civilian and defense products where dependability and high quality are important requirements.

general specifications

- **HEATER INPUT:** 5 watts (approx.) at 6.3 V., 26.5 V. and 117 V. A.C./D.C.
- **CONTACT RATING:** For relays with delay periods up to 75 seconds, 3 Amps at 150 volts D.C. or 250 volts A.C. For relays with delays of 105 seconds or more, contact rating is 3 Amps at 450 V. A.C./D.C.
- **CONTACTS:** Silver; Single Pole, Single Throw, either normally open or normally closed.
- **DELAY PERIODS:** From 5 seconds to 5 minutes, Factory pre-set (See listing on reverse side.)
- **AMBIENT TEMPERATURES:** For a range of temperatures from -60°C to $+80^{\circ}\text{C}$, there is a slight variation in timing from the room temperature timing.
- **BULB:** Standard T9 Radio Receiving Type Bulb.
- **BASE:** Standard Radio Receiving Type Intermediate 8-PIN Octal Base. Heater terminates in pins 2 and 3; Contacts in pins 5 and 7.

Precision Professional Equipment

FOR TELEVISION and BROADCAST STATIONS
ACCEPTED and USED by ALL MAJOR NETWORKS
FOR RELIABILITY • VERSATILITY • PERFORMANCE

TELOP I... TELEVISION OPTICAL PROJECTOR

Telop I is one-man operated, economical and reliable. It projects low-cost, easily produced "commercials" for increased profits. The Telop completely eliminates keystone; any two photographs, glass lantern slides, or opaque cards can be projected, also small objects, with superposition, lap dissolves or fadeout. Metal slides holding either five or eight 4"x5" cards may be used for projection.

3A... TELEJECTOR

Compact, portable unit for automatic, remote control of standard 2" x 2" transparencies. Provides uninterrupted continuity with studio effects of fading, lapping and superposition. Slide turrets can be changed instantly.

60A FOUR-WAY FILM MULTIPLEXER

A precision arrangement of mirrors for operation of pairs of projectors simultaneously in a single TV camera or individually into two separate cameras. Also available as a 62A two-way moving mirror multiplexer (illustrated) or a 61A two-way fixed mirror multiplexer.

35A MANUAL CONTROL BOX

Gray's Control Box is especially designed for use with the Telector. Control Box laps, fades, superpositions and permits remote changing of slides.

TELOP II... PROJECTOR

For smaller TV stations... one man operated... will project any combination of slides, transparencies, opaque cards or photographs. Eliminates costly film strips and live talent, yet achieves clear sharp pictures with superposition, lap dissolves and fade-out effects. Small initial investment assures greater profits because of low production and operating cost.

55A FILM CAMERA TURRET

One camera can serve up to 8 projectors with Gray camera turret. Mounted on heavy, welded steel frame, the turret revolves 360 degrees on heavy duty ball bearings with positive placement. Requires minimum space.

13A LIGHT BOX

This attachment will back-light 3/4" x 4" transparencies and make them part of a "commercial" along with opaque cards or other copy. The box mounts directly behind the slide holder groove in the optical channel opening of the Telop.

63A TELEJECTOR SHELF

The Gray Telector shelf is of steel construction. Strong, sturdy, it is easy to attach to Multiplexer stand. Telector mounts on shelf.

11B VERTICAL SCROLL DRIVE

The Vertical Scroll Drive will televise rollstock and broadcast running commentary or "commercials"—with or without sound accompaniment. Attaches to the optical openings of the Telop.

12A HORIZONTAL TAPE DRIVE

Horizontal Tape permits televising of 8 mm. news ticker tape. Tape can be projected on any part of screen—top, bottom or middle and superposed on copy televised from another Telop optical opening.

15R REVERSE CLOCK

Designed for time spots and announcements. Clock face is small enough to permit superposition of commercial or other copy. Also available in 15A direct reading model.

106SP TRANSCRIPTION ARM

106SP Transcription Arm meets the strict requirements of modern, highly compliant pick-up cartridges. 3 Cartridge slides furnished, enable GE 1-mil, 2 1/2 mil, or 3 mil cartridges or Pickering cartridges to be instantly installed. Fairchild cartridge slides also available.

108B VISCOUS-DAMPED TONE ARM

Radically new suspension development on the viscous damping principle for perfect tracking of records and elimination of tone arm resonances. For all records—33 1/3, 45, and 78 RPM. Solves all record reproducing problems.

602B EQUALIZER

The new 602B Equalizer provides balanced output, permitting operation of the Equalizer into either a balanced or unbalanced line. A convenient control allows instant switching from conventional records to micro-groove.

GRAY

RESEARCH

and Development Co., Inc., Hilliard St., Manchester, Conn.

Division of the GRAY Mfg. Co. Originators of the Gray Telephone Pay Station, Gray Audograph and the Gray PhonAudograph.

Gray, as a special service to its many TV customers, now has available a custom-made test pattern with individual call letters for TV stations.

SETS THE STANDARD FOR

precision potentiometers

LOOK TO TIC for the most complete line of advanced PRECISION POTENTIOMETER designs for every application. TIC engineering means outstanding potentiometer performance in your system. The extreme variety of standard models available guarantees the optimum specifications and dimensions, whatever your potentiometer requirement in computers, control systems, and precision instrumentation.

potentiometers are available in miniature and sub-miniature sizes. TIC has been especially successful in operation at high amplitudes. All designs feature rugged construction and excellent performance under adverse environmental conditions.

Potentiometers, Type RFT, feature a special design for super-fine trimming in precision instrumentation. Complete resistance represents less than 4% resistance variation. Convenient design permits stacking of Metfilm units for maximum use of limited panel space.

Potentiometers, type M10T, feature high accuracy resulting from servo control of windings. One piece construction of base and housing yields precise, rugged unit. Anodized aluminum cover provides sealed enclosure but does not impede working parts. Spring loaded ball bearings in single bore provide precise, rigid shaft with very low rotational friction. Universal choice of servo or tapped hole mounting.

Standard construction, available in 2 inch and 1 5/8 inch diameters, allows assembly of multi-gang units by user, greatly simplifies construction of "bread-board" units in experimental work. Servicing of large units facilitated by use of unitized potentiometers, period replacement should failure occur during operation.

LINEAR precision potentiometers ranging from 7/8" to 3" in diameter feature high linearity and resolution, together with long life and low noise. Rugged one-piece construction of aluminum base and close mechanical tolerances of mounting surfaces assure realization of electrical accuracy in external system. Standard TIC potentiometers will meet applicable MIL specifications for humidity, salt spray, shock, vibration, and corrosion resistance.

NON-LINEAR functional outputs are available in most standard TIC potentiometers, including sinusoidal, logarithmic, arithmetic, and square laws—and many others. In addition, TIC engineers will design highly accurate non-linear potentiometers based on mathematical data submitted for special applications.

TRANSLATORY potentiometers, Type RVT, are actuated by linear rather than rotary motion of shaft. Wide range of resistance values can be furnished in units with shaft lengths from 1/2 inch to 12 inches. Special design permits inclusion of up to three resistance elements with separate brush arms and take-offs in a single housing.

STANDARDIZED types ST18 and STC18 ball-bearing potentiometers are designed to conform to the latest industry standard potentiometer dimensions. Now high electrical and mechanical precision can be achieved within minimum volume. Type STC18 embodies conventional unitized construction. Also available with plug-in type mounting as type RVBC 1 5/8".

GENERAL SPECIFICATIONS

Electrical
 Rated temperature coefficient of resistance wire: 0.002% per °C.
 Ambient temperature range: -55°C to +80°C.
 Equivalent noise resistance: 140 ohms, maximum.
 Dielectric strength: 1000V DC breakdown test, 5-sec duration.

Mechanical
 Housing: Precise-machined aluminum with corrosion-resistant Alumilite finish.
 Mechanical rotation: 360° continuous.
 Starting torque: Less than 1 oz-in.
 Life: 500,000 complete revolutions at 60 rpm, or less.

ADVANCED PERFORMANCE MULTITURN POTENTIOMETERS

ervo potentiometer Type M10T servo-corrected for .025% accuracy at low cost. Winding may be corrected for resistive loads of up to twenty times the potentiometer total resistance. Extraordinary mechanical precision and high electrical accuracy combine with a new method of servo-controlled winding of the resistance element to produce a new concept in multiturn precision potentiometers.

Electrical Specifications

Resistance Range: 1000 ohms to 10,000 ohms $\pm 5\%$.
Independent Linearity: 0.05% standard, 0.025% or better, special.
Effective Electrical Angle: $3600^\circ + 1^\circ - 0^\circ$.
Power Rating: 5 watts at 40°C derated to zero at 80°C .
Leakage Resistance: Terminals to shaft 50 megohms minimum at 500 volts DC.
Voltage Breakdown: All terminals shall withstand 1000 volts (rms) AC to shaft.
Ambient Temperature Range: -55°C to $+80^\circ\text{C}$.
End Coil Resistance: .025% of total resistance (maximum).
Equivalent Noise Resistance: 100 ohms maximum.
Temperature Coefficient of Resistance Wire: .00002 per $^\circ\text{C}$.

Mechanical Specifications

Base and Bearings: One piece machined aluminum base houses spring-loaded ball bearings in a single through bore.
Mounting: Universal type offers choice of servo or tapped hole mounting.
Mechanical Rotation: $3660^\circ \pm 2.5^\circ$ limited by rugged lead screw stops which withstand 100 inch pounds applied torque.
Maximum Starting Torque: 1.3 inch ounces at 20°C .
Terminals: Gold-flash, blind solder pot.
Enclosure: Corrosion-resistant stainless steel cover, bonded to base to exclude dirt, moisture, and corrosive atmosphere. Provides no support to working parts.
Weight: 5 ounces nominal.

STANDARDIZED BALL BEARING PRECISION POTENTIOMETERS

Types ST18 and STC18 feature compactness, ball bearings for low friction, and high electrical accuracy. Linear and non-linear windings are available. Servo-mount dimensions conform to latest industry standards. Type STC18 is electrically identical to Type ST18. Unitized construction to permit rapid assembly and dis-assembly of ganged units by user. Also available with plug-in type mounting using type RVBC1-5/8.

Electrical Specifications: (Types ST18 and STC18)

Resistance Range: 100 ohms to 100 K ohms $\pm 5\%$ standard, $\pm 1\%$ special.
Independent Linearity: 0.5% of total resistance standard, to 0.2% of total resistance special.
Winding Angle: $320^\circ \pm 2^\circ$ standard. $\pm 0.5^\circ$ special. Non-standard winding angles available.
Power Rating: 3 watts at 25°C derated to zero at 80°C .
Ambient Temperature Range: -55°C to $+80^\circ\text{C}$.
Temperature Coefficient of Resistance Wire: .00002 per $^\circ\text{C}$.
Taps: Available at specified locations on the resistance winding.
Equivalent Noise Resistance: 140 ohms maximum.
Voltage Breakdown: 1000 volts DC all terminals to shaft.

Type
ST18

Mechanical Specifications: (Types ST18 and STC18)

Housing: One-piece machined aluminum base with black aluminum, corrosion-resistant finish.
Bearings: Two ball bearings for low rotational friction.
Mechanical Rotation: 360° continuous or limited by stops if specified.
Maximum Starting Torque: 0.5 ounce inches per section.
Ganging:
Type ST18 units may be ganged on a straight through shaft, using one-piece stainless steel clamp rings which permit precise phasing of ganged units.
Type STC18 features unitized construction allowing user to assemble multi-gang units with ease. Spring-loaded drive-arm joints sliders of successive sections, limiting backlash to 0.06" per ganged section.
Weight: 3 oz. for single section, 1 oz. per additional section.

ST18

POTENTIOMETER TEST EQUIPMENT

For the measurement of potentiometer noise, linearity, and non-linear conformity.

Write for complete specifications.

Type 394-A PONO GOMETER® (Potentiometer Noise Tester)
 A precision potentiometer noise tester designed for laboratory production control in the manufacture of single or multiturn potentiometers. Monitoring the transient contact noise resistance appearing between the wiper and resistance element, both audible and visual indications are given when threshold level is exceeded.

Range: Equivalent Noise Resistance threshold level adjustable from 10 to 5000 ohms. Lower levels can be set up by means of accessory equipment.
Wiper Exciting Current: Constant 1 milliampere. For other values accessory current sources can be set up.

TIC PRECISION POTENTIOMETER HANDBOOK AND CATALOG

A truly authoritative reference on the theory, design, performance, and application of precision potentiometers. Handbook includes detailed and illustrated engineering description of

- Potentiometer terminology
- Circuits for optimum potentiometer adjustment
- Non-linear loading techniques
- Causes of resolution and residual noise
- Potentiometer design and construction procedures

and many other pertinent subjects. Catalog section, included under same cover as handbook, lists complete specifications on standard TIC potentiometers and test equipment. Loose-leaf format permits the accumulation of technical information on new developments in potentiometer design and new TIC models as they are introduced. Price: \$2.00 per copy, (including subscription to future material.)

INSTRUMENTATION

PHASE MEASUREMENT

Type 320-AB
Phase Meter
PROVEN PERFORMANCE
EASE OF READING
SIMPLICITY OF OPERATION

For direct 0-360° Phase angle measurements. Used in conjunction with Audio Facilities, Ultrasonics, Servo-mechanisms, Geophysics, Vibration, Acoustics, Aerial Navigation, Electric Power Transformation, Signalling, and mechanical applications of Torque Measurement, Dynamic Balancing and Printing Register.

PHASE ANGLE RANGE

0-360° without ambiguity

Type 322-A
Precision Phase Meter
HIGH PRECISION
EXTREME ACCURACY
VERSATILITY

Phase measurements from 0-360° without ambiguity. Highly stable and sensitive circuitry plus precision meter scales provide utmost accuracy of measurements, even with most complex wave-forms. Used in similar applications to type 320-AB where extreme precision is required.

0-360° without ambiguity

Type 324-A
Video Phase Meter
WIDE FREQUENCY RANGE
HIGH ACCURACY
DIRECT READINGS

For rapid and accurate measurement of Phase Angle through the Video Range. Used in Phase Equalizing Networks, Single Sideband Video Translation, Reactance Tube Modulators, Phase Shift Oscillators, Chromaticity Sub-Carriers TV, Neutralization Circuits, Broadband Negative Feedback Circuits, Polyphase Selectivity Methods, Antenna Array Phasing, and Phase Delay Line Measurement.

0-360° without ambiguity

Type 704-A
Secondary Phase Standard
EXCELLENT STABILITY
HIGH INPUT IMPEDANCE
NEGLECTIBLE DISTORTION

Precision electronic Phase Shifter. Shifts phase of sinusoidal signal by any angle 0-360° in four 90° ranges. Used for measurement with Phase Shifting Capacitors, Time Base Circuits, Transmission Networks, Multi-phase Voltage Rotation, Phase Detection Circuits, AC Thyatron Control, Feed Back Amplifiers, Servo Systems, Synchros, Resolvers, Power Factor, Gyros, and CRO Sweeps.

0-360° Variable

Type 706-A
Ultra-Sonic Phase Standard
HIGH PRECISION
EXCELLENT STABILITY
SIMPLICITY OF OPERATION

Generates two voltage signals whose phase difference is known to $\pm 0.1^\circ$. Multiple frequency Lissajous pattern is used for precise indication of angles established. Operation is at a single predetermined frequency specified by the user. For precise calibration of radar ranging circuits and phase detectors as well as for phase measurements.

0-360° Variable

Type 7000-A
Primary Phase Standard
LISSAJOUS PRESENTATION
EXTREME ACCURACY
CALIBRATES PRECISELY

Generates two sinusoidal voltages whose phase relationship may be determined with ease to within $\pm 0.05^\circ$ or better. Multiple frequency Lissajous pattern presentation is independent of calibration of precision phase shifter. Used in highly precise calibration of phase sensitive devices and for phase measurements in amplifiers, synchros and resolvers.

0-360° Variable

AMPLIFIERS

Type 500-A
Wide Band Decade Amplifier
WIDE BAND RESPONSE
HIGH STABILIZED GAIN
ZERO PHASE SHIFT

Featuring high input impedance, low output impedance, and compactness, this general purpose laboratory instrument provides 20 volts output over wide frequency range with stabilized gains of 10, 100, and 1000.

FREQUENCY RANGE

5cps—2 mc on gain 1
5cps—1.5mc on gain 10
5cps—1 mc on gain 100

Type 501-A
Compressor Amplifier
WIDE INPUT RANGE
UNIFORM OUTPUT
NEGLECTIBLE DISTORTION

Accepts an input signal of varying amplitude and provides output signal having the same waveform, of nearly constant amplitude. Operation is effective over a large input dynamic range and a wide frequency range with essentially zero distortion.

100cps to 1.0mc for compression

Type 511-A
Power Amplifier
NEGLECTIBLE DISTORTION
HIGH VOLTAGE OUTPUT LEVEL
PHASE SHIFT COMPENSATION

Low distortion, low noise and excellent phase characteristics throughout the frequency range 50cps-50kc. Four outputs available to match various loads (5, 25, 200 or 1200 Ω). Phase compensation circuit permits overall phase shift to be maintained at a constant value with varying gain. Output voltage up to 120 volts into a 1200 Ω load. Operates into loads varying from pure resistance to pure reactance.

50cps to 30kc (down 1 db at 50kc)

OSCILLATOR

Type 410-A
RF Oscillator
EXCELLENT STABILITY
HIGH OUTPUT LEVEL
LOW OUTPUT IMPEDANCE

12 volts available from 100 kc to 10 mc. with minimum distortion. Up to 30 volts obtainable. 1000 cycle modulation provided. Used as a signal source for radio frequency bridges, transfer oscillator for frequency counters, and for general laboratory measurements.

FREQUENCY RANGE

100kc to 10mc in signal

IMPEDANCE MEASUREMENT

Type 310-A
Z-Angle® Meter
EASE OF OPERATION
HIGH ACCURACY
VERSATILITY

Measures impedance directly in polar coordinates as an impedance magnitude in ohms, and phase angle in degrees: Z $\angle\theta$. Used in measurement of impedance, inductance, capacitance, resistance, dissipation factor (D), storage coefficient (Q), and plotting impedance functions. Internal sources of 60 and 400 cycles.

FREQUENCY & IMPEDANCE RANGE

30cps to 2kc 0.5-10
30cps to 20kc 0.5-60
30cps to 40kc 0.5-50

Type 311-A RF
Z-Angle® Meter
EASE OF OPERATION
FREEDOM FROM COMPUTATIONS
RAPIDITY

Companion instrument to Type 310-A Z-Angle Meter, Type 311-A offers same convenient impedance measurements over RF band. For laboratory use and measurement of broadcast antennas and transmission lines.

MAGNITUDE RANGE

Input: 7 to 200 or 1/7 to 1/200
Summing: 1 to 10 \pm

COMPUTER

Type 250-A
Complex Plane Analyser
VERSATILE
EASILY OPERATED
ELIMINATES COMPUTATION

Complex vectors quickly and accurately multiplied and divided. Simplifies network analysis and control system design. Used with vector plots on complex frequency plane to solve root locus problems, antenna array design, plotting propagation patterns, fitter design, frequency response and transient behavior.

CHATHAM

ELECTRONIC TUBES

Hydrogen Thyratrons

— for Pulse Voltage Generation

TYPE VC-1257
Hydrogen filled, zero bias thyatron with hydrogen generator for generation of pulse power up to 40 megawatts.

TYPE 5948/1754
Hydrogen filled, zero bias thyatron with hydrogen reservoir for generation of peak pulse power up to 12.5 megawatts.

TYPE 5949/1907
Hydrogen filled, zero bias thyatron with hydrogen reservoir for generation of peak pulse power up to 6.25 megawatts.

TYPE VC-1258
Zero bias miniature hydrogen thyatron for the generation of peak pulse power up to 10 KW.

● A NEW CONCEPT OF HYDROGEN THYRATRON DESIGN! The tubes illustrated represent a departure from conventional hydrogen thyatron designs and are a result of several years of concentrated development work. They are primarily employed in the generation of peak voltages of peak voltages durations in the order of microseconds.

Custom-built Electronic Equipment

20 Megawatt Hydrogen Thyatron Test Equipment built by CHATHAM to customers' specifications.

● CHATHAM specializes in the development, design, and construction of custom-built electronic equipment to exactly meet customers' requirements. Our capable staff of engineers will furnish prompt estimates or, if desired, will call to discuss your problem personally. Call or write today.

Pulse life test equipment built by CHATHAM checks receiver type tubes under pulse conditions.

5 Mega-radar modulator built by CHATHAM to rigid military standards.

ELECTRONICS AND EQUIPMENT

TYPE 6AS7G TWIN POWER TRIODE

A Twin power triode, intended primarily for voltage regulation. Features triode balance within $\pm 10\%$ at rated plate current, absence of plate current drift and grid current. Heater 6.3 volts, 2.5 amps. Characteristics for each section: Amp. factor 2.0, mutual conductance 7000 micromhos, plate res. 270 ohms, plate dissipation 13 watts.

TYPE 1Z2 RECTIFIER

A small bulb, high voltage, vacuum rectifier. Low cathode heating power and low dielectric losses make tube suitable for radio frequency supply circuits. Filament 1.25 volts, .275 amps. Inverse peak anode voltage, 15000, average plate current 1.5 ma., peak anode current 8.5 ma.

TYPE 6336 TWIN POWER TRIODE

A reliable twin power triode intended primarily for voltage regulation. Features high permeance and plate dissipation. Heater 6.3 volts, 4.75 amps. Characteristics for each section: Amp. factor 2.7, mutual conductance 11000 micromhos, plate resistance 250 ohms, plate dissipation 30 watts.

TYPE 395-A COLD CATHODE GAS TRIODE

Requires no filament supply and is used in many grid controlled rectifier and relay applications. Maximum D.C. anode current—10 ma. Maximum D.C. anode voltage—150 volts

TYPE 4B32 RECTIFIER

A rugged half-wave Xenon filled rectifier. Operates in any position throughout an ambient temperature range of -75°C to $+90^{\circ}\text{C}$. Filament 5 volts, 7.5 amp... Inverse peak anode voltage 10,000 average anode current 1.25 amps.

TYPE 5651 WA VOLTAGE REFERENCE TUBE

A reliable and rugged cold cathode voltage reference tube designed for extreme stability over a wide ambient temperature range. Operating voltage 86 volts, operating current 1.5 to 3.5 ma. Voltage regulation, 2 volts maximum.

TYPE 3B28 RECTIFIER

This rugged half-wave Xenon filled rectifier will operate in any position and throughout an ambient temperature range of -75°C to $+90^{\circ}\text{C}$. Filament 2.5 volts, 5.0 amps... Inverse peak plate voltage 10,000, average anode current .25 amp.

matchless
performance*

depend on

deposited carbon resistors

for accuracy and stability

Dalohm deposited carbon resistors are manufactured under rigid controls to deliver matchless performance and economy in any high-low resistance range.

Pure carbon in crystalline form is bonded to a selected ceramic core, and then sealed against moisture with a special silicone coating having high dielectric strength, excellent thermal conductivity, and high resistance to abrasion.

- From 1 Ohm to 200 Megohms, depending on type.
- Temperature coefficient 150 PPM per degree C for lower resistance ranges up to 500 PPM per degree C for higher ranges.
- 1% accuracy. 2%, 5%, and 10% tolerances also available.

new HERMETIC SEAL—RUGGEDIZED

**deposited
carbon
resistors**

Completely solder sealed in a newly-developed envelope of non-hydroscopic ceramic. Ideally suited for use in UHF equipment where only the optimum of quality may be tolerated. Ruggedized for incorporation into "snap-in" component clips. Production tested for resistance to thermal shock, salt-water immersion and humidity.

Advertisers: How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

At present, there is very little cross-over in the subscriber lists of the publications—a matter of a few percentage points.

It is quite possible that you are getting an effective presentation of your products and abilities in this excellent issue, but are missing an effective presentation before one of the fastest growing fields in the country's history—the field of atomic energy.

The sales representatives of NUCLEONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great field. Ask them to show you how your potentials can be.

Carefully crafted for matchless performance

depend on

miniature power resistors

...made to survive

Conform to Applicable JAN and MIL Specifications

Dalohm miniature power resistors—the answer to those tight specifications—are carefully designed and skillfully made for all applications where the equipment must survive the most severe environmental, shock and vibration conditions. Completely welded from terminal to terminal, coated with special silicone material, and impervious to moisture, salt ions, vapor, and gases.

RH TYPES—Silicone sealed in a die-cast, black anodized radiator finned housing and mounts on sub-panel for maximum heat dissipation. Three wattage ranges: RH-25, 25 Watts, RH-50, 50 Watts, RH-250, 250 Watts.

RS TYPES—Silicone sealed offering high dielectric strength, maximum heat dissipation, and maximum resistance to abrasion. Three wattage ranges: RS-2, 2 Watts; RS-5, 5 Watts, RS-10, 10 Watts.

- Temperature coefficient 0.00002/Deg. C
- Ranges from 0.1 Ohm to 55,000 Ohms depending on type
- Tolerances 0.05%, 0.1%, 0.25%, 0.5%, 1%, 3%, 5%.

WWA & WWL

TYPES—For critical applications. Encapsulated for Hermetic sealing. Built to surpass MIL-R-93A.

- Temperature coefficient 0.00002/Deg. C
- Ranges from 0.05 Ohm to 3 Megohms
- Tolerances as low as 0.05%

new ruggedized miniature power resistors

Dalohm "ruggedized" miniature power resistors answer not only the space problem, but the shock problem. They are designed for trouble-free performance under the most exacting and demanding conditions of shock and vibration. Sealed in silicone and housed in black metal tubing. (Suggested mounting clip: Atlas E-E Corp.). Same characteristics as RS Types.

MYCALEX glass-bonded mica is the unique CERAMOPLASTIC

MYCALEX glass-bonded mica has ceramic rigidity, plus greater dimensional precision than any plastic or ceramic; MYCALEX glass-bonded mica can be molded and machined like a plastic. Dimensional stability and temperature endurance are superior to any plastic and complex insert inclusions can be tightly molded. Incorporating the best features of both ceramics and plastics plus special ones of its own, MYCALEX glass-bonded mica is a unique ceramoplastic.

PROPERTIES

- Electrically stable; properties are unvarying with age.
- Low electrical loss.
- High dielectric strength.
- High arc resistance — cannot carbonize.
- Can be machined, ground or lapped to as close tolerance as any metal.
- Permanent dimensional stability. Free from warpage, flow or age distortion.
- Unaffected by humidity — zero moisture absorption.
- Impervious to water, oil, organic solvents.
- High temperature endurance.
- High thermal shock resistance.
- Inserts may be included in molded grades.
- Resistant to radiation effects.

NOTE The MYCALEX glass-bonded mica materials, designated below, are all inclusive formulations of and manufactured only by the Mycalex Corporation of America.

THERE ARE DIFFERENT GRADES FOR DIFFERENT PURPOSES

| 410 | 555 | KM Series | 400 | 500 | K Series |
|--|--|--|---|---|--|
| Continuous operating temperature limit 650°F. This grade of MYCALEX glass-bonded mica is moldable with or without inserts. | Continuous operating temperature to 900°F. A new grade of MYCALEX glass-bonded mica having high temperature endurance; moldable with or without inserts. | Moldable, not readily machinable capacitor dielectric of MYCALEX glass-bonded mica, with dielectric constant indicated by KM number such as 10, 20, 30, etc. | Continuous operating temperature limit 700°F. Readily machinable grade of MYCALEX glass-bonded mica. Not moldable, inserts must be cemented in. | A new superior grade of MYCALEX glass-bonded mica for higher continuous temperatures to 1000°F. Readily machinable; not moldable, inserts must be cemented. | Machinable capacitor dielectric of MYCALEX glass-bonded mica, higher dielectric constant indicated by K numbers as 10, 15, 20. |

MYCALEX glass-bonded mica CAN CONTRIBUTE TO ELECTRICAL DESIGN

Components of given capacities can be made smaller, more lighter in weight when the high thermal endurance, structural dimensional precision, dimensional stability, and ideal insulating properties of MYCALEX glass-bonded mica are used. Tight inserts eliminate corona and produce tight seals. Elements can be tied into inserts.

COMPLETE STORY IS YOURS FOR THE ASKING

Mycalex Corporation of America is the world's largest manufacturer of glass-bonded mica products. Our facilities are devoted exclusively to the manufacture of glass-bonded mica and actually exceed those of the rest of the industry. Our extensive research, development and engineering departments are completely integrated with an ultra modern manufacturing plant. These facts are stated to emphasize the engineering service offered, without obligation, to our present and potential customers.

Our engineers are ready to advise you

If you will send us sketches, blueprints or models of any products in which MYCALEX glass-bonded mica might be used as electrical insulation, our engineers will be glad to make suggestions as to the most economical and effective ways to employ our products in your designs. Address requests to J. H. DuBois, Vice President-Engineering, at Clifton, N. J. address below.

Our Engineers Handbook and Catalog is recommended as a valuable addition to your technical file. Your copy will be sent free promptly upon request. If you want to machine MYCALEX, ask for our informative free booklet "From One Machinist To Another"; also "How to Design Parts to be Machined from MYCALEX glass-bonded mica." A complete file of Data Sheets on MYCALEX Tube Sockets also available.

CUSTOM-ENGINEERED TRANSFORMERS

- Wheeler transformers are custom-engineered to meet your specific requirements. Your needs come first with us.
- Wheeler makes its own magnet wire . . . from the copper rod to the finished, insulated and tested product . . . with quality under our control every step of the way.
- Wheeler uses the most modern winding techniques and equipment.
- Wheeler's facilities for the production of intricate coils and assemblies are unexcelled.
- Wheeler affords fullest protection to its transformers with latest techniques in wax and varnish impregnation and FOSTERITE® encapsulation.
- Wheeler transformers are subject to specially devised engineering and test procedures throughout manufacture, and must individually undergo a final comprehensive test before shipment.

**PRESTO SR-11 COMPLETE
STUDIO CONSOLE TAPE RECORDER**

Never so much quality, operational ease and value offered at modest price. Embodies the famous Presto R-11 tape mechanism, matching amplifier-power supply in a sturdy, well designed console cabinet. Three motors for accurate drive; 15" and 7½" per sec. speeds. Price: under \$1000.

**PRESTO RELIABLE LONG-PLAYING
TAPE REPRODUCER PB-17**

Automatically reversible for continuous playback of background music. Frequency response uniform from 50 to 8,000 cps (±2 db). Tape speed: 3¾" per sec. Reels up to 14" dia. (4,800' of tape) with dual track. Mechanism will re-cycle or stop after 8-hours of play.

MILWAUKEE TRANSFORMERS

provide performance that exceeds the demand

Hermetically sealed components that perform superbly and lastingly in airborne and ground applications.

Yours for the asking — a well-illustrated brochure describing Milwaukee transformers and production facilities.

YOU can get precisely what you want to meet the most stringent applications from Milwaukee Transformer Company. Every Milwaukee unit is made to exceed the requirements of the demand — be it military or commercial — and well over one thousand different transformers have been designed and built for our clients. Engineering, laboratory and production facilities are always ready to answer your call — whatever the need. Phone, wire or write without obligation.

MODELECTRIC WIRING HARNESS AND CONTROL ASSEMBLIES

Assembling electrical harnesses and controls may be costing you too much in time and plant space under today's competitive conditions. Then it's time to call on **MODELECTRIC**.

• WE SPECIALIZE SOLELY IN WIRING HARNESSES & ASSEMBLIES; also CONTROL & TIMING ASSEMBLIES for your Electronic Product, Appliance, Dispensing Equipment, Machine Tool, and other special electro-mechanical equipment. This includes relays, connectors, timers, switches, terminals, controls, etc.

• With a Modelectric Assembly you can end your electrical worries and ACTUALLY PROFIT from greater economy, proved dependability, precise uniformity and ten years of experience. Our engineers will be pleased to diagnose your problem, and custom build assemblies to your product at SAVINGS to you.

RELY ON

PRECISION • QUALITY • DELIVER

Communication Accessories Company introduced the first miniaturized toroids to the electronic industry in 1948. Promptness of service, quality product, and efficient production has made Communications Accessories Company one of the largest manufacturers of toroids and filters.

In addition to standard types listed herein and shipped from stock, engineers with thousands of custom designs behind them are capable of handling the most exacting requirements. Any conceivable arrangement of closely coupled windings and multiplicity of taps may be supplied. By a wide variation of winding techniques special required characteristics can be obtained. Inductance, distributed capacity, temperature stability and other parameters are controlled with laboratory precision. Recent developments in core materials make possible low dissipation factors up to several hundred KC.

By rigid controls throughout each step of the manufacturing process, the customer is sure to receive only the highest quality component available. Whether the requirement is for one or a million—call on Communication Accessories Company. You will be pleased with the results.

IN ORDERING...

Add suffix "A" to above numbers for clear bushing
Add suffix "B" to above numbers for tapped bushings
Replace "MP" prefix with "HS" for metal encased toroids
(see back page for description).

TYPES
HS206
HS848
HS608
HS073

TYPES
HS930
HS395

Hermetically Sealed

CASED TOROIDS

CAC "HS" series provides metal enclosed, hermetically sealed units complying with MIL-T-27 specifications—mounting area minimized—extremely low hum pickup due to high permeability cases—terminals of proven design using teflon assure a permanent seal at temperature extremes—rugged construction—convenient mounting facilities—to insure stability, cores are thermo-cycled prior to encasement—standard inductances are maintained in stock for rapid delivery—order standard inductance values by replacing prefix "MP" of molded series with "HS".

Miniaturized

Hermetically Sealed

FILTERS

All types of filters—toroidal inductors and special capacitors for maximum stability, sharpness, and attenuation—advanced design and printed circuit techniques make possible high degree of miniaturization—hermetically sealed construction.

MAGNETIC AMPLIFIERS

Designed and Produced to Fit YOUR Application

Toroidal construction and quality materials provide: high gain per stage—fast, stable response—long, maintenance-free life—extreme ruggedness.

Designs to allow: multiple, electrically isolated input and output windings—line frequencies 60 cycles, 400 cycles and higher—operating temperatures—55° C to +100° C—hermetic sealing to military specifications.

Printed in U.S.A.

Goat manufactures a line of tube shields for 7 & 9 Pin Tubes in the miniature field and split wraparound and seamless for various Loktal Tubes. For complete specifications write for our Catalog E52.

MINIATURE TUBE SHIELDS
Series G1700

PLAIN

G1702 is a plain shield for a 7 pin miniature with .812 I.D. used with our G1710 and G1770 Base Clips.

G1705 is a plain shield for a 9 pin miniature with .850 I.D. and used with our G1780 Base Clip. (Above used with wafer type sockets.)

FLUTED

G1700 - The fluted tube is furnished for 7 pin only and is used where tight fit on the tube is necessary.

LANCED

G1702-2 is a lanced shield for 7 pin miniatures.

G1709 is a lanced shield for 9 pin miniatures.

These shields are used where tight fit on the tube is required and allows for expansion.

BEADED

Beaded shields for the 7 and 9 Pin Miniatures are used with Saddle Socket type only which includes our G1707 for 7 pin and G1706 for 9 pin and covers various lengths of tubes.

STANDARD TUBE SHIELDS

G1332 Series

SEAMLESS

G1332 Series - seamless and fluted for GT/G, G and Loktal tubes in numerous variations. Complete specifications are listed in our E52 Catalog.

WRAPAROUND—LOKTAL

G1222 Series are wrap-around shields manufactured in four sizes to fit various tube types—Rings G691-1 and 2 are used on wraparound shield under high vibration conditions.

WRAP-AROUND—MINIATURE

G3560 is a wrap-around shield for effective shielding at low cost.

All GOAT miniature tube shields are produced from coated, cold-rolled steel stock. The particular finish—whether zinc, cadmium or electrolytic tin plate—varies, depending on availability of materials.

TUBE CLIPS

Miniature and Standard

GOAT base and ground clips are manufactured to exacting specifications to assure positive electrical grounding of the tube and tube shield. Like the tube shields, GOAT clips are classified for miniature and standard tube use. The miniature clips are of the prong base clip type, the spring steel prongs affording a firm grip on the shield yet permitting deliberate removal as often as necessary. The standard clips include this type as well as ordinary prong clips, tube ground clips and dual-purpose base ground clips.

SPEECH EQUIPMENT AND ACCESSORIES

Collins complete line for AM and FM broadcasting is listed in the Collins Speech Equipment Catalog. It pictures and describes a wide variety of high quality speech input consoles, remote equipment, rack mounted audio units, test and control apparatus, transducers, power supplies, meter and jack panels, terminal boards, cabinets — everything needed in building a new station or modernizing an old one. Collins Speech Equipment Catalog should be kept in the files of all broadcast engineers as a standard reference work. Your nearest Collins office will be glad to supply a copy to your station upon request.

INDUSTRIAL COMPONENTS

Autotune, a Collins patented automatic rotary positioning device used for accurate remote control of communication receivers and transmitters by means of adjustable positions. It can also be used for the control of many types of industrial equipment.

Autopositioner, a mechanism which will set a shaft accurately to any one of several fixed positions by remote control. It is fast and quiet and is built for long service.

Hysteresis Motors, 370A Series motors designed primarily for operation from vacuum tubes. Have split windings for operation directly from the plate circuits of two push-pull direct-coupled amplifiers driven 90 degrees out of phase. High starting torque . . . absolute synchronous rotation.

Mechanical Filter gives a close approach to the ideal rectangular selectivity curve by using resonant mechanical elements, rather than tuned electrical circuits. Many operating frequencies and band widths are available. When used in a receiver's IF strip, the carrier and one sideband of an AM signal can be accepted while the other sideband is rejected. 3 kc bandwidth filter is ideal for AM or SSB.

AMATEUR EQUIPMENT

75A-3 Receiver incorporates the Collins Mechanical Filter — a new concept in receiver performance. Either 3 kc or 800 cycle bandwidth selected by a front-panel switch. AM signals can be tuned to accept the carrier and either one of the sidebands at will while the other sideband is rejected. Ideal for reception of single sideband signals. It is an extremely stable double conversion superheterodyne receiver, covering the 160, 80, 40, 20, 15, 11 and 10 meter bands. Permeability tuned; crystal controlled h-f oscillator; dial calibrated directly in frequency; extremely sensitive with great tuning accuracy and high signal to noise ratio; 50 db image rejection on all bands; automatic noise limiter; amplified, delayed AVC with quick recovery; miniature tubes.

Price including 3 kc mechanical filter, less speaker \$530.00
10" speaker in matching cabinet 20.00
35C-2 Low Pass Filter inserted in well shielded transmission line from 32V-1, 2, or 3, provides approximately 75 db attenuation of harmonic emissions at the television frequencies. Price \$40.00

AVIATION EQUIPMENT

618S 144-Channel HF Transceiver, 100 watt power output on 144 crystal controlled channels. Automatically tuned elements insure maximum flexibility and high power output.

180L-2 Antenna Tuning Unit, automatically matches 618S output to aircraft antenna. Can be used with any transmitter having an output impedance adjustable to 52 ohms and 50 to 150 watts power output.

51R-3 VHF Navigation Receiver, fulfills navigation and communication receiving requirements of all types of military, commercial and private aircraft using the 108 to 136 megacycle band.

17L-3 180-Channel VHF Airborne Transmitter, frequency range 118.0 to 135.9 megacycles. All 180 channels easily selected on a simple, positive remote control system. Power output conservatively rated at 8 watts.

17L-4 360 Channel VHF Transmitter, 1/2 ATR size to make room for additional equipment. 25 watt power and 360 automatically tuned channels assure instantaneous VHF communications in all high density areas. Maximum stability is maintained through pretuned crystals. Maximum selectivity is assured with 50 kc spacing.

radiation and harmonic interference kept to a minimum. Unit weighs 25 lbs.

360-Channel VHF Airborne Transmitter, full 360 channels in the range of 118.0 -135.9 mc. 50 watt power out with phone emission. Meets ARINC Spec. #520.

360-Channel VHF Airborne Communications Receiver, companion to 17M and 17L-4 Transmitters. Completely new design to meet ARINC Spec. #520 for 45 kc bandwidth. Has the sensitivity, selectivity and spurious response rejection characteristics required for flight and port traffic control.

Marker Beacon Receiver is completely dependable, highly selective and free from spurious response. Operates lights with minimum "twilight" indication.

3 VHF Airborne Omni-range Antenna, for use with 3 navigation receiver. Drag, 2.63 lbs. at 250 m.p.h.

1 VHF Airborne Communication Antenna, for use with Collins VHF two-way communications system.

Airborne Glide Slope Antenna mounts on nose of aircraft, and provides greatly improved pickup and receiver performance.

7-2 Glide Slope Receiver, designed for reception of 150 cps tone modulated glide slope signals on any of twenty channels in the UHF range.

FD-103 Integrated Flight Systems simplifies ILS approaches by presenting precise steering information in conjunction with simplified pictorial type instruments. Instrumentation also simplifies enroute navigation.

FD-101 Navigation System, provides the pilot continuous position information by automatically computed triangulation, using two VOR systems.

For requesting complete technical information on any Collins products please specify equipment type number.

478C IFS Test Equipment, bench tester for IFS Computer, automatic pilots and other flight director equipments.

479T-2 Signal Generator, a precise ramp-test equipment for airborne VOR localizer and glide slope receivers.

4795-3 Audio Signal Generator is used in precision bench testing of omni-range, localizer and glide slope receivers. Output signals for VOR, localizer, and glide slope audio circuit investigations are provided.

GROUND STATION EQUIPMENT

430 Series Transmitters, choice of 12 different models — 1 or 2 kw, conservatively rated — phone, CW or FSK.

Transmission on any of ten instantly selectable, pre-set channels over entire range from 2 to 30 mc. Common sub-unit construction provides wide variety and low cost.

30K-5 Transmitter, 2 channels, pretuned to any frequency between 2 and 30 mc. 300 w CW. 250 w phone.

32RA-9 Transmitter, 4 channels, pretuned to any frequency between 1.5 and 15 mc. 75 w CW. 50 w phone.

51J-3 Receiver provides continuous coverage from 500 kc to 30 mc, with very high stability and tuning accuracy.

51M-7 VHF Rack Mounting Receiver, single channel, pretuned to any frequency between 118 and 136 mc.

51N-2 Receiver, single channel, for A1, A2 and A3 reception, pretuned to any frequency between 2 and 24 mc. Mechanical filter kits available.

242F VHF Transmitters, rack mounted, providing single frequency operation between 118.0 and 136.0 mcs.

Choice of 200 watts or 50 watts power into 52 ohms.

**SUPPOSE YOU
DREAMED UP ONE
LIKE THIS?**

It does happen, you know... an inspired twist, a new application... a microwave component that seems impossible to produce.

Yet, so many fine ideas lie dormant... never leave the design board for want of production know-how, like the microwave assembly below. Luckily, in this case, the illustration is only an artist's conception. But suppose you dreamed it up and it had to be produced, with all its complicated bends, exacting tolerances, specialized finishes.

That's where the many years of unique production experience and the unusual facilities of Budd Stanley could help you in so many ways.

For we at Budd Stanley are manufacturing specialists in microwave components only. We constantly tackle the seemingly impossible design and engineer new production methods of our own to accomplish its manufacture... exactly as you specified it.

So, if you are designing or wish to specify a component that seems difficult to produce... write, phone or wire us. We'll be glad to lend our know-how to your problem.

Langevin

**Model
 5116**

- LENGTH 9"
- WIDTH 1 3/8"
- HEIGHT 3 1/8"

— ideal for inclusion in facilities
 built to meet FCC requirements

Model 5116 is a miniature, plug-in, two stage, low noise, preamplifier or booster amplifier designed for use in radio and TV broadcast systems, recording studios and sound systems. While important space saving has been effected in the design of this amplifier, Langevin sacrificed none of the fine performance and dependability which make the Langevin Model 116-B an industry-wide criterion of excellence. In fact performance characteristics are considerably improved. Included are such quality features as gold-plated plug-in connectors and push-button metering facilities.

**SPACE SAVING
 THAT REALLY COUNTS!**

61% reduction in volume permits mounting of 33 Model 5116 units in the space required by 12 of the very popular Langevin Model 116-B.

Photo below, illustrates the extremely compact racking possible with the new Model 5116. Note complete accessibility and uncongested appearance. Units at extreme right are Langevin 5117 Program/Monitor Amplifiers.

WRITE TODAY—
 for complete data and specifications on the Langevin line of miniature plug-in equipment including program, booster and monitor amplifiers, power supplies, etc. Please address requests on company letterhead.

Redesigning? BONDEZE may provide one answer to your overall cost reduction program!

BONDEZE is Phelps Dodge magnet wire with a special thermo-plastic film applied over the insulation. It offers a quick, economical means of bonding wires together, turn to turn, through single application of heat or solvents.

BONDEZE offers unusual opportunities for redesign of windings and in many cases influences finished product design with overall savings to the user.

Any time magnet wire is your problem, consult Phelps Dodge for the quickest, easiest answer.

BOONTON RADIO

BOONTON · N.J. · U.S.A.

Corporation

would you like to avoid

miniature
SLIP RING
commutator

performance problems?

We build superior rotating contacts from hand drawn work hardened precious metal, with diameters accurate to $\pm .0005''$ and a concentricity of at least .001 T.I.R.

We specialize in meeting your difficult miniature slip ring and commutator requirements.

A CURRENT EXAMPLE

REQUIREMENT:

10 grooved rings connected to a 10 segment commutator within the same assembly.

1000 V R.M.S. rings concentric to commutator .002 T.I.R.

(actual size)

SIZES diameters .032" and up
CROSS SECTIONS .005" to .060" ring thickness
FINISH 4 micro inches or better
BREAKDOWN 1250 volts R.M.S. hi-pot
RING HARDNESS 70 brinell minimum
ROTATION SPEED to over 20000 r.p.m.
RING CONSTRUCTION silver, gold or any specified material
CONTACTS any number, grooved or flat

Our design experience and systems production enable us to better understand your problems.

THE
DESIGNERS & BUILDERS
OF

MOTORS

The Model DM85 a 28 volt reversible 4 oz. in output unit, is typical of the high performance intermittent and continuous duty servo motors, converters, and tachometers we have developed and produced to our customers' and our own specification. Motor form sheets are available.

The S-12 Camera is an example of our experimental and production models. These include automatic sensors and servo controls to insure proper exposure and synchronization under all conditions. Current research is aimed at securing high framing rates with a high resolution and large format.

RECORDING CAMERAS

TIMING DEVICES

The Model 10260 Pulse Memory Delay illustrates our past and present proven ability to design, prototype and produce special intervalometers, programmers, and pulse limiters. May we become better acquainted through an evaluation of your specific requirements?

The high gain unit, 2AC21-3, utilizes magnetic amplifiers and is capable of delivering 5W at 115V, 400 cycles. This and other modular electronic packages, which are the working units of our airborne electronic computers and servo controls, may be adaptable to your commercial or military problem.

Greater Efficiency for Every

Miniaturization of all Types

Low Capacitance Change With Temperature

MIFILM CAPACITORS

Types 612, 613, 614 and 615

Subminiature size with PLASTIC "MYLAR" DIELECTRIC, Miracle X Impregnated. A revolutionary advance in Miniature Capacitors—smaller than comparable units, only $\frac{1}{2}$ space factor of paper capacitors. Metal enclosed hermetically sealed. Extremely high insulation resistance, 10^{15} ohms. Relatively high over complete operating temperature -65°C to 150°C . Power factor less than .5%. Sizes from 173° dia. x $\frac{1}{2}^{\circ}$ long (.001 mfd, 600 VDC) to $.750^{\circ}$ dia. x $1\frac{1}{8}^{\circ}$ long (1 mfd; 600 VDC). Available with extended foil construction or with tab construction. We are equipped to custom-build these capacitors to your specified sizes and put them into any case style or type of mounting and still provide the same extremely small space factor.

Type 612—Extended foil construction, one end grounded
Type 613—Extended foil construction, both ends insulated
Type 614—Tab construction, one end grounded
Type 615—Tab construction, both ends insulated

*DuPont trademark for polyester film.

MIRACLE X IMPREGNATED CAPACITORS

Types 512, 513, 514 and 515

Paper dielectric, metal enclosed, hermetically sealed. High voltage rating available. Capacity change less than $3\frac{1}{2}\%$ from -65°C to $+125^{\circ}\text{C}$. Meets or exceeds miniature size requirements of MIL-C-25. Available in tab or extended foil in all styles.

Write for complete catalog covering all types of Good-All long-life capacitors.

Radio Manufacturers of America

CAPACITORS

Capacitor Requirement

High Insulation Resistance

Superior Humidity Resistance

*MARBELITE CAPACITORS

"Hard as Marble." Impregnated and sealed in plastic. Thermo setting plastic end-fill. Cannot pull out. Exceptionally high initial insulation resistance maintained proportionately over entire temperature range. Operating temperature -50°C to $+100^{\circ}\text{C}$. Generally smaller than RTMA specifications. Standard sizes from .001 mfd to 1 mfd in 100 to 1000 VDC. Can be further miniaturized. Power factor 1% or less. SPECIAL CONSTRUCTION AVAILABLE FOR USE IN PRINTED CIRCUITS.

Type D-503-ML—Specially designed to meet EXTREMELY HIGH HUMIDITY conditions. Easily PASSES NEW HUMIDITY TEMPERATURE LIFE TEST. Impregnated and sealed in thermo setting plastic. Jacketed in special metal lined tubes of paper foil sandwich construction. Unaffected by 30 or more humidity cycles.

Type 503ML—Designed also to meet EXTREMELY HIGH HUMIDITY conditions. Same construction but jacketed in regular metal lined tube of paper foil sandwich construction.

Type 503—Designed for general application where space factor is extremely essential. Meets high humidity condition. Marbelite Impregnated Paper tube enclosed, wax coated. OUR BEST SELLER by far—Millions are in use now throughout the world.

*Trademark Registered.

METALLINED CAPACITORS

All Good-All Capacitors now are available ENCLOSED in Marbelite Impregnated Metal Lined tubes. They are practically unaffected by humidity or climatic conditions, eliminate troublesome field failures. Extremely low capacitance change with temperature. Thermo setting, hard-as-marble, "Marbelite" plastic end-fill provides life-time sealing—eliminates costly pull-outs. Extremely durable. Small, compact, economical, and of same high quality electrical properties found in hermetically sealed capacitors.

Type 522ML—Designed for all radio and TV circuits. Successfully used in instrument field. Available in exceptionally close tolerances. Impregnated in Miracle X. Jacketed with foil paper sandwich tube. Capacity change less than 5% over operating range of -55°C to $+125^{\circ}\text{C}$.

Type 522—Same as 522 but jacketed with paper tube. Excellent for use in circuits to be encased. Available in special miniaturized sizes.

Type 520ML—Impregnated in highest quality capacitor oil. An economical capacitor with high humidity resistance.

HALOWAX IMPREGNATED CAPACITORS

Types 501, 502, 504, and 505

Excellent capacitance change with temperature. Operating temperature range -55° to $+85^{\circ}$. Paper dielectric, metal enclosed, hermetically sealed. Available in tab or extended foil in all styles.

620-621 CAPACITORS

Mylar Dielectric in commercial construction. Impregnated in Miracle "X" and enclosed in plastic impregnated paper tube with plastic end-fill. Especially adaptable to your own requirements. Sizes equal or smaller than metallized paper capacitors yet with greatly improved properties as to insulation resistance and life expectancy.

Our engineers are always ready to work with you on any capacitor problems. We are equipped to custom-build capacitors to your specifications including your very special needs and size requirements for extremely high humidity resistance capacitors.

VARIAN...

top performance in every KLYSTRON application

Designers and equipment buyers specify Varian klystrons for optimum performance because they know that only Varian klystrons combine extreme precision and reliability with excellent frequency stability and ample power. Designed and built by the acknowledged leader in klystron development, Varian klystrons offer outstanding performance advantages in these and many other applications:

Microwave relay transmitters and receivers
Telemetry systems
UHF television transmitters
Radar receivers—local oscillators

- Coherent and pulsed radar transmitters
- Guided missile applications
- Microwave test equipment
- Particle accelerators—power tubes

COMPARE THESE FEATURES

FOR RADARS AND BEACONS

Unmatched high altitude performance without presaturization—excellent frequency stability—low noise—rapid warm-up—rugged—reliable.

FOR MICROWAVE RELAY SYSTEMS

Ample power to override noise—excellent frequency stability—economy of operation—long life.

FOR LABORATORY TESTING

Smooth, single-shaft tuning over a wide range—matched waveguide output—excellent microphone characteristics—linear reflector tracking.

FOR UHF TELEVISION

Integral cavity construction for economical operation and simple installation—wide band-width for color TV—high power gain—long life.

VARIAN HAS A PRODUCTION KLYSTRON...

that meets the requirements of these typical applications:

| APPLICATION | FREQUENCY RANGE (Megacycles) | POWER RANGE | TUBE TYPES |
|-------------------------------|------------------------------|---------------|-----------------------------------|
| Radar & Beacon Oscillators | 8500 — 10,500 | 25 — 140 mw | V-270, V-290, V-151, V-153, V-155 |
| Relay Transmitters | 8500 — 11,000 | 100 W — 9 KW | V-23, V-63, V-27, V-82, V-45 |
| Television Transmitters | 9100 — 12,200 | 450 mw — 9 KW | V-54, V-63, V-27, V-82, V-45 |
| Local Oscillator Transmitters | 5100 — 7500 | 30 mw — 1 W | X-26B, X-26D, X-26E, X-26F |
| Television | 470 — 890 | 15 KW | VA-6237, 38, 39, 40, 41 and 42 |
| Laboratory Testing | 8200 — 12,400 | 450 mw — 8 W | X-13, V-21, V-27, V-54, V-58 |

Advertisers: How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications — a matter of a few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history — the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Ask them to show you what your potentials can be.

Special Transformers?

"Just give me the basic data now and we'll start an ETC engineer on the problem right away!"

That's one of our specialties here at ELECTRONIC TRANSFORMER COMPANY. When stock jobs simply won't do, give us the necessary specs over the telephone. Very probably we'll come up with a sound recommendation as we talk it over, *on your first call*.

Custom-designing, custom-building transformers for specialized purposes is our sole business . . . We've concentrated on them for government and industry since 1938. ETC's highly skilled engineering staff, fully equipped laboratories and production department are set up for rush jobs, difficult jobs, *important jobs*.

Let's show you what we can do with *your* special transformer problem. See for yourself how we can come through for you over the telephone . . . or write us if you prefer.

Read the Facts!

WITH THREE TIMES THE DIELECTRIC STRENGTH of nitrogen and equaling oil at modest pressure, Sulfur Hexafluoride provides a safe and convenient means of insuring reliable operation, increased power and voltage output, compact design and ease of maintenance of electronic equipment.

INERT, NON-TOXIC, NON-FLAMMABLE AND EXTREMELY STABLE, Sulfur Hexafluoride is easy and safe to handle. Its vapor pressure changes but slightly over a wide temperature range. One of the heaviest known gases, SF₆ has only a slight tendency to diffuse into the atmosphere when equipment is being filled or recharged. Small amounts of air do not materially affect its dielectric strength. That means making repairs or filling apparatus becomes a simple operation.

FIND OUT MORE about SF₆. Send in this coupon and get your free copy of the technical bulletin on this remarkable new dielectric gas. Specifying your intended use will enable us to make helpful suggestions on the most effective way of using Sulfur Hexafluoride in your equipment.

ELECTRONIC Test and Production INSTRUMENTS

For the producer of electronic or microwave systems, FXR provides a distinctive service . . . with quality components that measure up to the finest standards of design, craftsmanship and performance. The FXR line of Test and Production Microwave Equipment consists of Electronic Instruments and Waveguide Components.

These Electronic Instruments, which include Antenna Pattern Analyzers and High Power Pulse Modulators, were designed throughout by FXR en-

gineers and produced in quantity in our own large plant. The Waveguide Components consist of such units as rotary joints, waveguide switches, horns, cavities, dummy antennas and loads, antenna scanners, and duplexers.

Whether for tube production, radar systems, microwave relay units, or guided missile applications . . . whether the project is large or small . . . FXR has the experience and facilities to produce your special needs accurately, swiftly—at lowest cost.

Custom Engineered and Built

HIGH POWER PULSE MODULATORS

These rugged line type modulators are custom engineered for continuous operation. Ease of operation, minimum of high voltage hazard, and maximum accessibility of all components are uppermost considerations in the design.

14 MEGAWATT UNIT

Type Z821A

- Input voltage 440 or 550 volts—3 phase
- Internal signal generator for trigger pulse
- Output pulse for external synchronization
- Motor driven high voltage and heater controls
- Automatic voltage backdown on magnetron sparking
- Output voltage—90 kv at 160 amperes
- Output Z = 560 ohms
- PFN—2.0 microseconds at 500 cycles/sec
- Maximum duty = .001
- Internal pulse voltage and current viewing facilities

ONE MEGAWATT UNIT

Type Z820A

- Input Voltage—190—250 V single phase
- Provisions for mounting internal synchroscope
- Remote control operation
- Motor driven high voltage and heater controls
- Output Z = 1000 ohms
- PFN1—0.5 microseconds at 2000 cycles/sec
- PFN2—2.5 microseconds at 400 cycles/sec
- Internal pulse voltage and current viewing facilities

Data subject to change without notice. Prices on application.

Custom Engineered and Built

ANTENNA PATTERN ANALYZERS

Type T705A

FXR ANTENNA PATTERN ANALYZERS are general purpose test equipments designed for measuring the radiation patterns of rotating antenna systems. The analyzer, a receiver and indicator unit, has the following characteristics:

- Visual pattern display
- Response vs angle of rotation
- 1 to 10 kmc
- Four plug-in r-f heads
- Superheterodyne receiver
- Single knob oscillator control
- CW or pulsed operation
- Field or laboratory use

PRECISION MICROWAVE TEST EQUIPMENT

With its comprehensive line of Precision Microwave Test Equipment, FXR has developed a new, fresh-as-grass approach to the problems of microwave measurement. Every FXR product has been carefully evaluated in the light of latest advanced developments, the greatest accuracy and convenience in use, and the *cost-conscious* needs of the

quality-conscious engineer who employs it . . . in the laboratory and on the production line. A large, fully equipped FXR plant . . . a well-rounded, growing staff of seasoned engineers . . . are capable of fulfilling your exact requirements with the fastest service in the industry, at costs well below the "sit-and-wait" variety.

Advertisers: How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

At present, there is very little cross-over in the subscriber lists of the two publications—a matter of a few percentage points.

It is quite possible that you are getting an effective presentation of your products and abilities in this excellent issue, but are missing a presentation before one of the fastest growing fields in the country's history—the field of atomic energy.

The sales representatives of NUCLEONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great atomic field. Ask them to show you that your potentials can be.

B&W

Components

B&W TOROIDS

From sub-miniature types tinier than a Lifesaver to husky "doughnuts" bigger than a telephone dial, if it's toroidal, B&W makes it. Over 20 years experience in winding all types of coils for military, commercial, and amateur electronic gear goes into these B&W Toroids.

Small quantities for prototypes or large production runs can be promptly supplied to your exact specifications. Or, if you prefer, B&W engineers will gladly work with you in developing new toroids for your particular needs.

B&W "AIR-WOUND" INDUCTORS

Highly efficient "air-wound" coils embodying extremely low losses, real space saving economy, and minimum weight were first pioneered by B&W. Now backed by over 20 years experience in this specialized field, B&W offers a complete line of "air-wound" inductors in types ranging from the versatile "Mini-inductor" to large, high power commercial units.

In addition to these standard items, B&W regularly manufactures coils for special requirements. The range in size up to the giant coils illustrated above may be designed for virtually all r-f applications.

Inquiries for any requirements will be given prompt consideration.

B&W FILTERS and TOROIDAL ASSEMBLIES

These space-saving toroidal units are a direct result of B&W's specialized experience in designing and manufacturing all types of toroids and associated assemblies.

Whether you need standard high-pass, low-pass, band-pass, or band-suppression filters or discriminators for r-f or audio frequencies . . . chances are B&W engineers have produced similar equipment in their collective engineering experience.

What's more, B&W's unmatched production facilities and full complement of test equipment assure that specifications will be matched in each and every unit.

BARKER & WILLIAMSON

Coils, Sub-Assemblies

B&W MULTIPLE-LAYER COILS and CHOKES

sal-pie, progressive-universal, bank wound, and . . . in fact just about any kind of coil you have ever needed has been produced by B&W. Types range from miniature inductors and midjet r-f, oscillator, and choke coils to giant tank coils and chokes for power transmitters or other r-f service.

Factory is fully equipped to design, produce, and test coils of practically any dimensions and with electrical characteristics to meet exacting requirements.

B&W COMMUNICATIONS EQUIPMENT

Complete Radio Relay System • Mobile or Fixed Station Teletype Systems • Control Units for Teletype Systems • Direction Finding Equipment • Single or Dual Frequency Teletype Receiver Converters • Frequency Shift Keying Exciter Units, MO or Crystal • Low, Medium, and High Power Radio Transmitters • High Power Amplifiers • Switching Equipment.

In addition to complete facilities for designing, manufacturing and testing special communications equipment for military and commercial applications, B&W maintains a complete line of products for amateur radio. Write for details today.

Unit Instruments and Coaxial Accessories for VHF-UHF MEASUREMENTS

on Antennas, Lines, Coaxial Components,
Lumped and Distributed Networks and Circuits

The compact and inexpensive instruments listed on these pages permit rapid and accurate measurements of Impedance, VSWR, Reflection Coefficient, Voltage, Power and Attenuation. Their versatility, ruggedness and convenience in use make them extremely adaptable in laboratory or field.

These are reliable, light-weight equipments in which specific functions are isolated in separate compact units. Combinations of these units permit innumerable setups for almost any vhf-uhf application.

Type 874-LB Slotted Line

The Type 874 Connector is the basis for G-R's completely integrated system for u-h-f measurements. Any two of these connectors plug smoothly into each other, completely eliminating the need for male and female parts — electrical uniformity is excellent — all units are designed for use on 50-ohm systems.

precision-tooled instrument in- ble for laboratory impedance rements and determinations of R or mismatch... at any fre- y from 300 to 5000 Mc.

erior electrical characteristics and operating conveniences, coupled compactness and light weight, this device extremely useful in work as well as in the development atory.

no other way are the fundamen- of high-frequency wave propa- n more effectively illustrated. The d Line clearly indicates positions ima and maxima, and determines ge-amplitudes and effects of diff- load terminations. It is a widely , low-cost demonstration piece ollege or high school laboratory s.

Features

- Frequency Range: 300 Mc to 5000 Mc
 - Accuracy: constancy of probe coupling $\pm 2\frac{1}{2}\%$ or better
 - Characteristic Impedance: 50 ohms $\pm 1\%$, throughout — inner conductor is supported at its ends only, minimizing discontinuities
 - Connectors: Type 874 with standing-wave ratio less than 1.05 to 4000 Mc
 - Probe Penetration: fully adjustable
 - Probe Travel: 50 cm
 - Probe-Carriage Drive: free sliding for rapid travel; vernier for fine adjustment
 - Scale: calibrated in centimeters — can be shifted to simplify calculations
 - Accessory Micrometer Vernier: for measurement of high standing-wave ratios by the "width of minimum" method
 - Portability: weighs only 8½ lbs.
- | | |
|--|----------|
| Type 874-LB Slotted Line with crystal detector | \$220.00 |
| Type 874-D20 Adjustable Stub for tuning with crystal | \$11.00 |
| Type 874-LV Micrometer Vernier Attachment | \$23.00 |

The field of application for the Slotted Line and Admittance Meter is much enlarged due to the many accessories now available for measurements on antennas, lines, coaxial components, and lumped and distributed networks.

The Constant-Impedance Adjustable Line simplifies impedance measurements and eliminates line-length corrections between measuring point and unknown — the Balun and new Adaptors to v-h-f and u-h-f transmission lines make possible accurate measurements on balanced tv receiving-antennas and transmitting systems — the Component Mount and Insertion Unit provide a means for accurate high-frequency measurements of resistors, capacitors, and inductors — a variety of Adaptors permit connection to all commonly used systems.

Type 1602-B Admittance Meter . . . \$295

Type 1602-B Admit- Meter is a versatile in- tent for the rapid and ate measurement of tance, impedance or R over a 20 to 1500 ange — direct reading en 41 and 1500 Mc. It e used to match a load ne, to compare directly ppedance of one circuit nponent to that of an- , as well as for direct lnce measurements.

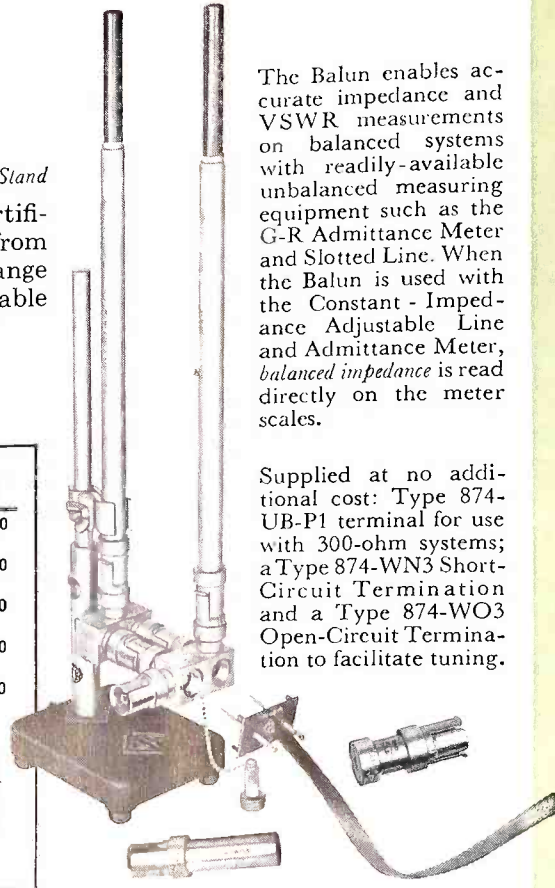

- ★ Scales are direct reading and independent of both fre- quency and calibration of the detector
- ★ No sliding balance — conductance (or resistance) and susceptance (or reactance) adjustments are independent
- ★ Accuracy of both conductance and susceptance readings up to 1000 Mc is $\pm (3\% + 0.2 \text{ millimho})$ over a 0 to 20 millimho range — from 20 to ∞ millimho, accuracy is $\pm (3\sqrt{M}\% + 0.2 \text{ millimho})$; "M" is scale multi- plying factor — above 1000 Mc, errors increase slightly — for matching, 3% accuracy to 2000 Mc
- ★ Admittance Meter is supplied with an Ad- justable Stub and Variable Air Capacitor for use as susceptance standards, a 50-ohm Termination for the conductance standard, two Patch Cords for connection to detector and generator, a Panel Connector for the detector, and a wooden storage case.

Type 874-UB Balun . . . \$75.

Shown with accessory 874-D20 Stubs and 874-Z Stand

a coaxial transformer which uses an artificial half-wave line for converting from balanced to unbalanced impedance. Range is 54 to 1000 Mc — instrument is tuneable for maximum accuracy.

The Balun enables accurate impedance and VSWR measurements on balanced systems with readily-available unbalanced measuring equipment such as the G-R Admittance Meter and Slotted Line. When the Balun is used with the Constant - Impedance Adjustable Line and Admittance Meter, *balanced impedance* is read directly on the meter scales.

Supplied at no additional cost: Type 874-UB-P1 terminal for use with 300-ohm systems; a Type 874-WN3 Short-Circuit Termination and a Type 874-WO3 Open-Circuit Termination to facilitate tuning.

| Frequency Range (Megacycles) | Type (Two of each required) | Total Price |
|------------------------------|--|----------------------------|
| 470 to 1000 | 874-D20 Adjustable Stubs | \$22.00 |
| 350 to 525 | 874-D20 Adjustable Stubs and 874-L10 Air Lines | \$32.00 |
| 275 to 380 | 874-D20 Adjustable Stubs and 874-L20 Air Lines | \$33.00 |
| 225 to 280 | 874-D20 Adjustable Stubs and 874-L30 Air Lines | \$34.00 |
| 170 to 280 | 874-D50 Adjustable Stubs and 874-L30 Air Lines | \$36.00 |
| 174 to 216 | 874-VC Variable Capacitors and 874-L10 Air Lines | Price available on request |
| 140 to 174 | 874-VC Variable Capacitors and 874-L20 Air Lines | |
| 88 to 140 | 874-VC Variable Capacitors and 874-L30 Air Lines | |
| 54 to 88 | 874-VC Variable Capacitors and 874-XL Series Inductors | |

Type 1217-A Unit Pulser . . . \$195.

NEW! is a highly useful addition to the growing line of Unit Instruments. Used with other Units and Accessories, it permits transient studies on a wide variety of networks. . . pulse modulation over complete vhf-uhf television band. . . wave testing of amplifiers. . . and a variety of other pulse measurements.

- Large Variety of Pulse Repetition Rates — 30, 60, 100, 200, 500 cycles, 1, 2, 5, 20, 50, 100 kilocycles
- Wide Range of Pulse Durations — continuous coverage from 0.2 μ sec to 60,000 μ sec
- Fast Rise Time — 0.05 μ sec; fall time 0.15 μ sec with open circuit shunter
- Output Voltage — 15 μ v and 1M Ω — top of pulse is flat within 5% of maximum amplitude a times.
- Excellent Stability — no time jitter visible on scope
- High Pulse Amplitude — permits use of time delay circuit — may be used directly on deflection plates of oscilloscope
- Variable Pulse-Amplitude Control — per zero to maximum settings
- Output Voltage — 20 v, on open circuit positive or negative pulses
- Output Impedance — 200 ohms for positive pulses, 1500-ohms for negative
- Self-Contained Oscillator — unit is independent of external synchronizing signal
- External Synchronization — where repetition rates are required, 25 v rms sufficient for locking from 0 to 100 cps
- Power Supply — Type 1203-A Unit Power Supply is recommended
- Dimensions are 10 $\frac{1}{2}$ x 5 $\frac{1}{2}$ x 6 $\frac{1}{4}$ inches
- Weight is 5 $\frac{1}{4}$ lbs.

NEW!

Type 1216-A Unit I-F Amplifier . . . \$365.

Shown above with 874-MR and 1209-A Unit Oscillator

the basic element in a high-frequency null detector for use with Slotted Line, Admittance Meter and other measuring equipment. The signal to be detected and a local-oscillator frequency are mixed in the Type 874-MR Mixer Rectifier to produce a 30-Mc difference frequency which is detected by this I-F Amplifier. With this system, any signal from 50 to 5000 Mc may be reliably and conveniently detected.

- 4-stage, high-gain, 30-Mc amplifier is terminated in rectifier and panel meter — modulation on signal is amplified by cathode follower with 0.4 Mc bandwidth and is available at binding posts for monitoring
- 90-db amplifier gain over 0.7 Mc bandwidth at 30-Mc center frequency — bandwidth sufficiently wide to detect pulsed signals
- High Sensitivity — less than 2 μ volts from 400-ohm source for 1% meter deflection; 50 μ volts for full scale deflection
- Accurate built-in 70-db attenuator provides reliable measurement of relative signal levels — enables accurate high-frequency attenuation measurements
- Two internal power supplies in Unit — one for the amplifier and one for the local oscillator to be used in detection
- AVC provided for null-detection
- Dimensions are 5 $\frac{1}{2}$ x 10 $\frac{1}{2}$ x 6 $\frac{3}{8}$ inches; Net Weight is 8 $\frac{1}{4}$ lbs.

874-VI Voltmeter Indicator, \$70. and 874-VR Voltmeter Rectifier, \$30.

Connecting Cord, \$5.50
are used in conjunction to measure monitor voltage, and for converting detectors into 50-ohm signal generators. The crystal detector is used in the Voltmeter Rectifier. The Indicator consists of a milliammeter, sensitivity control and a circuit for calibrating the crystal detector to the desired level between 0.1 and 2000 Mc. Measurement accuracy is ± 0.05 volts. Frequency range, 15 to 2500 Mc suitable for resonance correction above 1000 Mc.

Type 1000-P6 Crystal Diode Modulator . \$40.

permits wide band, amplitude modulation of oscillators over a 20 to 1000 Mc carrier range. With this modulator, any standard tv-receiver's video signals can be used to "picture modulate" a signal generator operating at any vhf or uhf frequency. . . 50-millivolts r-f and 0.2 volt at modulation terminals produces 30% amplitude modulation; modulating frequencies may be any value from 0 to 5 Mc.

Type 1000-P7 Balanced Modulator . . . for full 100% amplitude modulation of frequencies from 60 to 2500 Mc.

This unit is particularly designed for pulse work such as radar and tv receiver testing where 100% linear modulation, good rise-time characteristics, and negligible incidental f-m are essential. . . \$225.

Unique design bucks out carrier between pulses, permitting maximum double-sideband modulation; suppression between pulses is 60 db throughout frequency range — as much as 10 mv r-f output into 50-ohm load — one-volt peak modulation produces full r-f output from zero initial condition

NEW!

Basic Connector
50-ohm, air-dielectric line \$1.15

Connector and nut for G and fits
— 874-P62 for use with 62-ohm cables. Price \$1.75, for any other size, \$2.50

Changes for 874-P58, 874-P62 available for \$2.50

874-C Cable Connector for 50-ohm, 874-A2 Cable or equivalent \$1.70
874-C8 for RG-8/U Cable \$1.70
874-C58 for RG-29/U, RG-55/U, RG-58/U Cable \$1.70
874-C62 used with RG-62/U (not matched) \$1.70

874-Y Cliplock rolls around mated connectors holding them securely in place. 10 Cliplocks \$1.75

NEW!

874-QU3 Adaptor to 3/8 inch UHF line . . . \$87. . . . couples to standard 50-ohm u-h-f transmission line . . . enables direct connection of any G-R coaxial test-equipment to antenna systems for impedance and VSWR measurements at the operating frequency.

These elements are silver plated for minimum loss. Electrical characteristics are excellent; VSWR is less than 1.03 to 920 Mc.

NEW!

874-QV2A Adaptor to 1/8 inch line . . . \$46. . . . similar to 874-QU3 except couples to 51.5-ohm v-h-f transmission line. When used with the Admittance Meter for rapid and reliable antenna testing, VSWR of this adaptor is less than 1.02 over the complete v-h-f band.

Adjustable Stub with calibrated cm- travel, position of termination; 20 cm \$11.00

Adjustable Stub 50-cm travel; movable termination scale \$12.00

Adjustable Line (not constant impedance) travel \$14.50

874-L10 10-Cm Air Line with 874-B Connector at each end \$5.00

874-L20 20-Cm Air Line \$5.50

874-L30 30-Cm Air Line \$6.00

874-LK Constant-Impedance Adjustable Line is an air-dielectric, coaxial line which telescopes to change length; 50-ohm impedance remains constant along line regardless of setting \$36.00

Ethylene cable with shielded conductors; 50-ohm or more; \$5.50

Shielded Cable— double-shielded with 874-C58 connector and Type 274-ND Double Shielded \$5.50

874-Z Stand for supporting coaxial systems; includes heavy base, horizontal and vertical rods and three universal clamps \$15.00

874-WN Short Circuit Termination for establishing reference conditions \$2.25

874-WN3 has "short" 3-cm further away \$2.75

874-W0 Open Circuit Termination with shielding cap \$1.75

874-W03 with "open" 3-cm further down the line \$2.50

874-T Tee for connecting elements in shunt with a coaxial line \$8.50

874-EL 90 Degree Ell for right-angle bends \$6.50

874-JR Rotary Joint permits rotation of one section with respect to other \$9.00

874-LR Radiating Line enables coupling to field within a line \$7.50

874-MB Coupling Probe for electrostatic coupling to external fields \$3.25

874-MA Adjustable Coupling Loop can be clamped in any desired position \$5.50

874-WM 50-ohm Termination provides impedance match to 50-ohm systems from dc to several thousand Mc \$17.50

32A Patch has 3-ft. 50-ohm shielded cable with 874-C58 connector and Type 274-ND Double Shielded \$5.50

Assemble-ment adaptor, shielded, 50-ohm, 874-C58 connector \$2.00

874-F1000 Low-Pass Filter for reducing harmonics above 1000 Mc \$10.00

874-F500 Low-Pass Filter cuts off at 500 Mc \$16.00

874-GA Adjustable Attenuator is precision-tooled, 120-db continuously-adjustable type for use from 100 to 4000 Mc. It can be used to produce known voltage ratios for attenuation measurements and for converting oscillators simply and inexpensively into signal generators when used with the Type 874-MR Mixer Rectifier \$55.00

874-GF 20-db Fixed Attenuator with maximum power input of 1/2 watt and 0.5 db accuracy to 2000 Mc; useful to 5000 Mc \$18.00

874-GG 10-db Fixed Attenuator similar to 874-GF \$18.00

874-K Coupling Capacitor, blocks dc and low audio frequencies \$8.50

874-MR Mixer Rectifier for mixing signals from 50 to 5000 Mc. Conversion to a G-R Unit and the Type 874-MA Amplifier as an amplifier for high-frequency demodulation \$32.50

874-X Insertion Unit for mounting "home-made" attenuators, v-h-f transformers, impedance matching networks, and other components. Shielding sleeve slides over opening \$8.25

874-M Component Mount for minimizing stray effects when measuring impedance of R-L-C components and other circuit combinations, from dc to 5000 Mc. Can be used with Slotted Line or Admittance Meter. 874-WN3 and 874-W03 are supplied to simplify measurements \$25.00, complete

| To Adapt to Type | Order (Jack) | G-R Type (Plug) | Price |
|------------------|--------------|-----------------|-----------------|
| N | 874-QNJ | 874-QNP | \$3.75 & \$4.50 |
| C | 874-QCJ | 874-QCP | \$4.75 & \$6.25 |
| BNC | 874-QBJ | 874-QBF | \$4.75 & \$4.75 |
| UHF | 874-QUJ | 874-QUF | \$4.00 & \$4.25 |
| HN | 874-QHJ | 874-QHF | \$6.50 & \$6.50 |

874-Q7 Adaptor to G-R Type 774 Connector \$3.75

874-Q2 Adaptor for connecting Type 874 system to Type 274 Connector, binding posts, banana plugs \$3.50

874-Q6 Adaptor fits G-R Type 274-NF Lead Assembly \$2.25

NEW!

874-VC Variable Capacitor
(Shielded Case supplied)

is a general-purpose tuning element for use at lower frequencies where adjustable stubs and lines are inconvenient because of their large physical sizes.

The unit features milled aluminum rotor and stator, high-temperature polystyrene insulation, precision ball bearings for smooth operation, an accurately-engraved dial drum and well-shielded enclosure. Capacitance variation is 56 μf at 1 kc. Minimum capacitance setting remains essentially constant at 14 μf to 200 Mc; maximum capacitance setting is 70 μf to 50 Mc . . . \$42.50

VHF and UHF Standard Signal Generator

Butterfly Tuning Circuit has wide range and no sliding contacts . . . frequency-calibration accuracy is $\pm 1\%$, direct reading . . . attenuator provides continuously-adjustable voltages from 0.5 μV to 1.0 volt, open circuit . . . internal 1-kc amplitude modulation; provision made for 30-cycle to 15-kc external modulation, adjustable from 0 to 50% with panel dial . . . panel meter indicates carrier output-voltage or modulation percentage.

- Type 1021-AV, 50 to 250 Mc . \$595.
- Type 1021-AU, 250 to 920 Mc . \$615.

These units are reliable, easily-operated power sources widely used in measurements with bridges, slotted lines and other coaxial equipment.

Type 1651-A Bolometer Bridge . . . \$325.

a flexible bridge-circuit for measuring r-f power in milliwatt range; useful in educational laboratories as well in industrial research and development for innumerable applications. A variety of G-R Thermistor Units and Bolometer Holders are available for measurements from 0.500 mw. Other measurements can be made using a variety of power-sensitive elements with resistances from 25 to ohms at frequencies up to 4000 Mc.

GR Unit oscillators

are compact and highly-efficient sources of power for maximum versatility. They are ideally adapted for use in industrial laboratory or college experimentation class. One Type 1203-A Power Supply and several oscillator sections permit maximum coverage at minimum cost.

- Type 1211-A Unit Oscillator . 0.5 to 50 Mc . \$295.
- Type 1215-A Unit Oscillator . 50 to 250 Mc . \$190.
- Type 1208-A Unit Oscillator . 65 to 500 Mc . \$190.
- Type 1209-A Unit Oscillator . 250 to 920 Mc . \$235.

Type 1203-A Unit Power Supply, for use with Unit Oscillators . . . \$40.

Type 1213-A Unit Crystal Oscillator . . . \$130.

a source of standard frequencies at very-high and ultra-high frequencies. The heart of the unit, the crystal, is plated, welded to absorb shock, hermetically sealed, and has low temperature coefficient of frequency. (Type 1203-A Power Supply recommended).

When adjusted to Station WWV, instrument-stability is approximately one part per million can be relied upon for long number of hours.

Type 720-A Heterodyne Frequency Meter . . . \$410.

a completely self-contained and portable instrument for rapid and accurate measurement of frequencies from 10 to 3000 Mc. (fundamental range, 100-200 Mc.)

Measurement accuracy is $\pm 0.1\%$. Many operating conveniences: butterfly tuned circuit avoids difficulties inherent in manual tuning; adjustable panel-antenna eliminates need for direct connection to source under measurement; panel meter, internal speaker or terminals for head-phones available for detection

Export Distributors: International Standard Electric Corp., 67 Broad St., N. Y.

Federal's MOBILE RADIO COMMUNICATION EQUIPMENT for INDUSTRIAL USE

FT-153-A-10CZ
TRANSMITTER RECEIVER

134 A
CONTROL UNIT

FT-153-A-10CZ Fixed-Station equipment designed for office desk installation, with telephone-type control.

Improve plant operations with Federal Mobile Radio equipment. More efficient dispatch of fork-lift trucks, cranes, yard trucks to jobs within and around factory buildings. Easy to install—Low in cost—Dependable operation. Three types of equipment available with RF power output of 10 watts at 162 Mc.

FT-153-10 "Transit-Call"
Transmitter and Receiver
for standard mounting.
Total weight is under 29
pounds.

FT-156 "Transit-Call"
Transmitter and Receiver
designed for dashboard
mounting.

COMPLETELY
SELF-CONTAINED

DELAY LINES and PULSE TRANSFORMERS

Delay Lines:

The new Federal Delay Lines are of the lumped constant type. They are compact, lightweight, efficient and meet military requirements. They are hermetically sealed against dust, dirt and moisture.

RANGE OF DELAY.....0.3 to 45 microseconds
IMPEDANCE RANGE.....100 to 10,000 ohms
MINIMUM RISE TIME.....0.5 microseconds

Pulse Transformers:

Of miniaturized construction, compact and efficient. Meet government specifications and are hermetically sealed.

DUTY CYCLE......1 maximum PULSE WIDTH......5 to 7.0 microseconds
RISE TIME......05 microseconds minimum

FILTERS

Various filters are available including high-pass, low-pass and band-pass for audio and carrier type applications. Meet commercial and military specifications. Hermetically sealed against dust, dirt and moisture. Use toroidal type high Q coils.

TOROIDS

With high Q performance they are self shielding and available in hermetically sealed cases, encapsulated, or unsealed and to meet military requirements.

POWER TRANSFORMERS

Hermetically sealed, compact, rugged and high quality types to meet commercial and military specifications. Meet Class A, B or H temperature requirements. Also available in lightweight, high temperature, 400 cycle aircraft type.

FEDERAL TRANSFORMERS ARE DESIGNED AND BUILT TO MEET CUSTOMER SPECIFICATIONS.

MINIATURE ANTI-CAPACITY SWITCHING KEY

For airborne and other equipment—whenever compactness and light weight are prime factors. A miniature, light-weight design with 8 "Break-Make" contacts. Two groups of 12 contact springs each are actuated by a molded phenolic drive roller with a simple motion of the lever. Both sides are non-locking. Contact springs are molded into units of 4 springs each, formed and pre-tensioned which will reduce adjusting of springs after assembly to a minimum. The complete spring pileup consists of 6 interlocking molded blocks, mounted into frame with a screw. Meets military requirements.

"SINGLE-CRYSTAL-STABILIZED" GERMANIUM DIODES Featuring HERMETICALLY-SEALED CONSTRUCTION

Designed to be built into compact modern electronic equipment. Even under adverse conditions it will insure long life and the ultimate in reliable performance.

These Types Available:

1N34 . . . 1N34A . . . 1N38 . . . 1N38A . . . 1N39 . . . 1N48 . . . 1N51 . . . 1N52 . . .
1N54 . . . 1N54A . . . 1N55 . . . 1N55A . . . 1N56 . . . 1N56A . . . 1N58 . . . 1N58A
. . . 1N63 . . . 1N64 . . . 1N65 . . . 1N69 . . . 1N70 . . . 1N75 . . . 1N81.

MINIATURE TRANSFORMERS

Hermetically Sealed input, output transformer-stage Audio Transformers, featuring Federal's new hermetically sealed transformer. Hermetically sealed power transformers and chokes. Meets government specifications.

TELEPHONE TYPE RELAYS

Telephone type relays available with a variety of contact combinations and coil resistances. Single and double coil combinations available with coil resistances from a few ohms to several thousand ohms.

Federal

RADIO-TV SELENIUM RECTIFIERS

The revolutionary circuit elements that have led the way to important design advances in TELEVISION & RADIO RECEIVERS & ELECTRONIC EQUIPMENT. Wherever DC power is required there is a Federal Radio-TV Selenium Rectifier to do the job... and do it with an efficiency and reliability that is backed by the outstanding reputation of Federal—America's oldest and largest manufacturer of Selenium Rectifiers.

*These rectifiers have two sections—characteristics given apply to one section only; if both sections are used in series, voltage input is 320 volts.

†The characteristics given for this rectifier are based on its use in a half-wave rectifier circuit with a 3-cell battery load.

‡The characteristics given for this rectifier are based on its use in a full-wave rectifier circuit with a 3-cell battery load.

• 'A' after code number indicates locking lug.

FEDERAL'S RADIO-TV SELENIUM RECTIFIER HANDBOOK

80 pages of valuable designs, characteristics and application. Available for 50 cents (coin only).

SELENIUM RECTIFIER EQUIPMENTS

**QUALITY-BUILT
MAGNETIC AMPLIFIERS**
Powered by Quality Controlled

Federal

SELENIUM RECTIFIERS

Presently used in a wide range of successful applications for industry and the Armed Forces, such as:

- Voltage Control
- Temperature Control
- Current Control
- Photoelectric Control
- Speed Control
- Counting
- Position Control
- Automatic Regulation

Federal Selenium Rectifiers, in partnership with the right magnetic components, provide Magnetic Amplifiers outstanding for:

- Stability • Accuracy • Long Life
- High Gain • Fast Response
- Low-cost Operation

Submit your magnetic amplifier requirements to Federal—write to Dept. F-53-B

POWER SUPPLIES: Designed to furnish a dependable and constant source of D-C power. Whether for industrial or laboratory use, these equipments are available in sizes to serve your requirements. For industrial requirements they are used to power magnetic equipment such as chucks, brakes, clutches, screens, separators, drums and pulleys, and also provide power for lifting magnets, relays, circuit-breakers and D-C motors.

ENGINEERING & MANUFACTURING FACILITIES

THE SELENIUM RECTIFIER DIVISION

Offers Its Outstanding Engineering and Manufacturing Facilities to

GOVERNMENT CONTRACTORS

**Consult us for Aircraft,
Ground and Naval Requirements**

The Selenium Rectifier Division of Federal—the nation's headquarters for selenium rectifiers—is ready to serve you with start-to-finish production of power supplies, battery chargers, voltage regulators, engine starters, cathodic protection and other units—compact, rugged, quiet, dependable power equipments designed for any DC output.

Federal knows selenium rectifiers. Federal has unmatched power conversion experience . . . an experience backed by years of successfully meeting the rigid requirements of contracts for military equipments. And Federal has the capacity to deliver your orders—when you want them!

Mail us your specifications today!

SELENIUM RECTIFIERS for Industrial Service From AC to DC . . . Milliwatts to Kilowatts

Low-cost power conversion . . . efficient, dependable . . . from a-c to d-c. Introducing new, broad range adaptability in diverse fields, conditions and applications. They obtain direct current from any alternating current source. They are small, light, easy to install. They meet all needs of an unattended service.

FOR COMPLETE DATA Write for Federal's Data Booklet on Selenium Rectifiers. An informative guide to characteristics and applications of the industry's most comprehensive line of high quality rectifiers. Address Dept. 913.

The FEDERAL System of ENCAPSULATION

Federal's method of encapsulating selenium rectifiers and allied components presents an entirely new approach to civilian and military equipment design — particularly where environmental or other unusual conditions necessitate special applications. It is now possible to encapsulate transformers, capacitors, resistors and other components—into single blocks of equipment. Such a method facilitates the replacement of individual as well as entire components without the necessity of time-consuming disassembly. Assures excellent thermal shock characteristics and resistance to vibration and cracking of the sealed unit over wide temperature ranges. Embedments withstand low temperatures to minus 100°C as well as high temperatures to plus 125°C. Send for F-534 for complete details.

FEDERAL CONTACT PROTECTOR

Federal's Contact Protectors are a sure way to longer life for relay contacts, eliminating circuit failure and interference caused by arcing.

1. Suppresses contact arcing
2. Extends Contact Life by more than 1000 times
3. Reduces circuit failure due to contact erosion (locking, surging, etc.)
4. Minimizes RF Interference
5. Has negligible effect on speed of operation of circuit
6. Needs no attention
7. Is easily installed
8. Requires little space
9. Is low in cost
10. Available as hermetically sealed unit to meet all JAN specifications.

Federal Telephone and Radio Company

A Division of INTERNATIONAL TELEPHONE AND TELEGRAPH CORPORATION

100 KINGSLAND ROAD, CLIFTON, N. J.

In Canada: Federal Electric Manufacturing Company, Ltd., Montreal, P. Q.
Export Distributors: International Standard Electric Corp., 67 Broad St., N. Y.

FEDERAL VARIETY OF CABLE TYPES

Federal's cable department produces a variety of H-F cable types. Some of these cables are produced by Federal exclusively. All are made to the most exacting standards of quality and control. The materials used

are the finest research has developed, assuring top electrical characteristics. Initial dimensional precision helps to maintain stability over a wide temperature range.

SOLID DIELECTRIC COAXIAL CABLES

consist of a solid or stranded inner conductor, dielectric material, one or two copper wire braids, a synthetic resin protective jacket and, in some cases, a protective armor or

metal braid. Dual coaxial cables are similar in design to the solid dielectric types, except that two accurately-spaced inner conductors are used.

LOW-CAPACITANCE COAXIAL AIR-SPACED CABLES

have a construction similar to that of the solid dielectric types, except that air is made a portion of the dielectric. One method of accomplishing this effect and still maintaining a high dielectric strength is through a con-

struction involving an inner conductor in a thin-walled dielectric tube. This is achieved by means of a dielectric thread wound in a long spiral.

SPIRAL DELAY, HIGH IMPEDANCE LINES

There are four types available with delays of 1 microsecond per foot; .2 microsecond per foot; .1 microsecond per foot and .042 micro-

second per foot. 1 microsecond per foot delay line is ideal for color TV use.

TELEVISION ANTENNA LEAD-IN WIRE

consists of two accurately-spaced conductors over which is extruded the dielectric material. These lead-in wires have no braid, jacket or armor except in special cases. The advances

in television have meant ever-new approaches to the design of TV lead-in to the point where it has taken many varied forms, the latest being the tubular shaped "pipeline" lead-in

SPECIAL CABLE PROBLEMS

Federal Telephone and Radio Corp. maintains a stock of most of the required types. When requirements are so special that they cannot be met by Federal's cable types, Federal research and engineering facilities are readily available to develop any new cable constructions. Charges are based on quantity. Special Orders — like all Federal production — are executed under the high standards maintained by Federal "Quality Control." Every length of cable is carefully checked to see that it meets all tests indicated for the type ordered. Toughness, heat resistance, moisture resistance, dielectric strength, cold-bend — these are just a few of the many tests that must be passed before approval for shipment is given. Federal's consulting service is yours for the asking.

Federal also manufactures many types of plastic-insulated wires and multi-conductor cables for television, intercom and numerous special purposes.

COMMUNITY TV COAXIAL CABLE

FEDERAL'S "BIG 5"—The answer to any Community TV lead-in problem... Engineered for long life, low line loss and **DEPENDABLE** all-weather signal transmission... over the longest link. Federal's K-14, RG-11/U and RG-59/U are the H-F coaxials you can specify with utmost confidence... for community TV Distributing Systems in any area... for any amplifier system used.

Wherever the annoying, profit-eating problems of signal leakage and revenue loss exist, the answer is Federal's new K-125 and K-126 non-radiating alternates for RG-11/U and RG-59/U—used in conjunction with Federal's K-14—the primary lead-ins famous for lowest line loss, low cable runs and fewer amplifiers required. Both K-125 and K-126 are double-shielded and double-jacketed.

All of the "BIG 5" are made to Federal's high standards of quality and that means *dependable, all-weather transmission performance!*

Principal characteristics of Federal's "BIG 5" of Community TV

| TYPE | ZO Impedance Ohms | Capacitance per ft. micro-micro farads | ATTENUATION DB per 100 Feet | | | | Jacket OD Mills (Max.) | Weight per 1000 Ft. (lb.) |

An Original Development
by Federal

RG TYPE CABLES

WITH THE NEW
LOW-TEMPERATURE
NON-CONTAMINATING
THERMOPLASTIC JACKET

Federal is supplying low temperature non-contaminating jackets on all cable types which now call for it and will also supply such compounds for specific cables to meet customers' requirements. The low temperature, non-contaminating jacket was an original Federal development.

The new RG types are outstanding for their longer service life under the most adverse conditions. Their non-contaminating feature means there is no reduction in dielectric strength due to molecular migration.

New HR* WIRES

14 to 24 AWG

High impact strength, resists thermal shock. Impervious to the action of corrosive chemicals and highly resistant to most organic solvents. Water absorption is nil therefore the corona formations and surface flash-over are minimized. Low cold flow. Covers a wide temperature range (-55°C-150°C) to cover any application for hook-up wire. Also can be used at lower temperatures and higher temperatures for short periods.

TEFLON INSULATED WIRE and CABLES

Your inquiries are invited on these new Federal wires and cables.

*Heat Resistant

Copper, T—Tinned Copper, S—Silver Plate Copper, B—Bronze, OD in mils (max.)
Vinyl, PE—Polyethylene, NCV—Non-contaminating Vinyl, OD in mils (max.)
Information in column to right under RG Type Cables.
Braid (Jacket dimension given is over armor)
Inner conductors.
*Conductor Strands column indicates material by same abbreviations as +
copperweld.

In Canada: Federal Electric Manufacturing Company, Ltd., Montreal, P. Q.
Export Distributors: International Standard Electric Corp., 67 Broad St., N. Y.

P. Roy Marshall of the Bendix Aviation Corporation says:

“We save more than the cost of a mold on every run... thanks to Plaskon[®] Alkyd”

“As compared to the expense of fabricating commutators and other complex parts from sheet stock, we save many times the cost of the mold on every run by using PLASKON Alkyd reinforced with glass fibers.”

So successful has been Bendix aviation experience with Alkyd, that they are using it for 24 critical parts in which lack of strength and dimensional stability would be disastrous.

And other electronic manufacturers, with increasing frequency, are turning to PLASKON Reinforced Alkyd for molding intricate parts that previously had to be made by costly, multiple-assembly operations.

They are discovering that PLASKON Alkyds save

them time and money, and that, because of the superior strength and electrical qualities of Alkyd, better products can be made.

Other PLASKON Alkyds include granular and putty type compounds. Like Reinforced Alkyds, these have the excellent electrical properties, dimensional stability and molding characteristics that help solve many production headaches in jobs for which they are specified.

Why not find out what PLASKON products can do for you? Our technical staff is ready at all times to discuss your problems, help you find the right material for your needs. Write today or call your nearest PLASKON Man. He'll be glad to assist you without obligation.

advantages for the electronics industry

with **PLASKON**® reinforced ALKYD

Elimination of costly fabrication reduces production costs

Provides solid mounting for inserts

High dielectric strength

Superior arc resistance

5. Extreme dimensional stability

6. Great impact strength and shock resistance

7. Resistance to heat and fire

8. Can be molded to extremely close tolerances

9. Outstanding structural strength

Dimensional stability of Plaskon Reinforced Alkyd allows close-tolerance molding of this disassembled commutator. Excellent bonding with metal saves cost on expensive metal inserts. Strength of material allows molding of thin sections. Most important, PLASKON Reinforced Alkyd saves money by cutting down rejects. Pieces shown are molded by Bridges Plastic Products, Inc. (Los Angeles).

For further information on PLASKON plastics and resins address BARRETT DIVISION, Allied Chemical & Dye Corporation, 40 Rector Street, New York 6, New York. Whitehall 4-0800.

Dage designers have earned the title of "connector specialists." Dage engineers specialize in custom designed radio frequency connectors. Besides offering you a complete line of standard connectors, Dage can produce all types of coaxial connectors to the closest tolerances.

Dage produces the finest in type BNC, improved

BNC, N, C, MC, Sm, and special radio frequency connectors. Dage improved BNC connectors are the newest addition to the *complete* Dage line. Dage products are all precision built and inspected to insure maximum performance. . . . And all Dage products are manufactured according to rigid military specifications. Specify Dage Radio Frequency Connectors for your standard or special connector needs!

CASTING RESINS for ELECTRONIC APPLICATIONS

Stycast® 2850 GT

WIDE TEMPERATURE RANGE
 100°F to +400°F (to +500°F for short periods)
THERMAL EXPANSION COEFFICIENT
 Approximately the same as aluminum and brass
GOOD ADHESION **LOW SHRINKAGE**
 Gray Opaque

Stycast® TPM

ELECTRICALLY OUTSTANDING

LOW LOSS — HIGH Q — White Opaque

| | |
|---|----------------|
| Dissipation Factor | } Below .0009 |
| 60 to 10 ¹⁰ cps | |
| Dielectric Constant | } 2.36 to 2.38 |
| Volume Resistivity, Ohms-cm ³ , above 10 ¹³ | |

Stycast® 35

Polystyrene Casting Resin
 Dissipation Factor below .0005
 Easy to Cure

Stycast® 1030 CM

Tough and Rubbery — Black Opaque
 — Useful at very low temperatures. Extremely low exotherm

Stycast® 40

CRYSTAL CLEAR **WATER WHITE**
 For preliminary embedments or where visual inspection is required

Stycast® 5050 CM

Simple to use — Black Opaque — for Production Items
 Temperature Range —67°F to +300°F
 Cures rapidly at room temperature

Stycast® 4030 CM

Hard and Rigid — Black Opaque
 Good Surface Finish — Easy to Use
 Cures at Room Temperatures

PLASTIC ROD and SHEET STOCK

Stycast® 0005

RF and Microwave Insulation
 Low Loss — A thermosetting plastic —
 does not flow at high-temperatures —
 machines easily

| | |
|--------------------------------|---------------------------------|
| Dissipation Factor below .0005 | } at 60 to 10 ¹⁰ cps |
| Dielectric Constant 2.53-2.56 | |

Stycast® Hi-K

Any Dielectric Constant
3 through 20

Wide temperature range — Excellent machineability
 Dissipation Factor, 60 to 10¹⁰ cps, below .001

PLASTIC FOAMS

Eccofoam S

Stock which can be
 cut into a wide variety
 of shapes. High bulk densities
 available to +300°F. Available
 in bulk densities from 3 to 25 lbs. cu. ft.

Eccofoam FP

Supplied in liquid form. For
 foamed-in-place electronic
 embedments, sandwich
 structures, radomes, etc.

IMPREGNANTS for WINDINGS

Ecco W 28G

Low viscosity — Solvent-free —
 Excellent adhesion —
 Useable to +400°F —
 Volume Resistivity
 at 75°F above 10¹⁶
 at 300°F above 10¹³ } ohms-cm³

Ecco W 44HT

Solvent free
 Long "pot life"
 Wide temperature range
 Easy to use
 High Dielectric Strength

Frequency Absorber 853

One of several absorbers and/or attenuators for
 absorbing electrical energy. Can be molded to size, made
 resilient or rigid.

Conductive Plastics and Adhesives

Produced in several bulk resistivity ranges.
Release 1225
 Prevents adhesion of plastic to molds used in cast-
 ing and laminating.

Vacuum Tube Coating 453B

Resilient unicellular
 coating for sensitive
 components to be
 embedded.

Laminating Plastics for Fiber Glass

Ecco L44 for non-porous, void-free
 laminates in low loss applications — radomes, printed circuits, etc.

Ecco L28 for fiber glass laminates of high volume and
 surface resistivity — High dielectric strength — temperature
 range —100°F to +400°F. For terminal strips, mounting
 boards, etc.

Options Available on all of the above products.
 Write for them.

VARI-L VARIABLE INDUCTORS

ELECTRICALLY

This line of A-F, R-F, V-H-F Saturable-Core Reactors for Sweep Tuning is growing in all directions:

- HIGHER** in Power, Frequency, Stability, Efficiency
- LOWER** in Cost and Space Requirements
- WIDER** in Range of Usefulness

as the result of continuing emphasis on production engineering and product reliability. Chances are that, in designing to many special requirements, we have touched on problems similar to yours — and that there may be a Vari-L Inductor to suit your needs. Even if you need something "special," our policy of "Design for Adaptability" has possibly created a Vari-L Inductor that will require only slight modification, at slight cost, to do your job, too. And it costs you nothing to ask. Be sure to give full details.

TRADE NAMES

of electronic and allied products.

They are intended for your use in determining the manufacturer's name when only a trade name is known.

This is why
printed circuit
was invented!

The printed circuit is the inevitable and successful result of inventive man's effort to do old things in new and better ways. The old way of installing an electrical circuit, in such fields as radio, television, hearing aids, automatic signals and other low-voltage applications, was a slow, expensive hand-process which was susceptible to error. Many a complex system had real nuisance value for the manufacturer. The new way eliminates all this because the circuit itself is etched, or printed, onto a sheet of copper foil bonded to a base material. Copper-Clad Phenolite—by National—holds the secret of success in printed circuits. The Phenolite

core is a scientifically compounded laminate possessing *all* the properties and characteristics demanded for the job. Among these are high dielectric and mechanical strength, resistance to heat, moisture, solvents, oils, acids, alkalis. It is light in weight—can be machined, punched, sawed, drilled. Phenolite is the perfect material for printed circuits . . . and for many other uses in the electrical, electronics, and general industries.

There are 35 standard grades of Phenolite, each with special qualities. May we demonstrate their value to you . . . show you how these remarkably versatile materials can help you?

PRINTED CIRCUIT . . . THE NEW WAY!

(Top) Copper-Clad Phenolite showing the etched conductor pattern for an audio amplifier. (Bottom) Here is the same etched circuit with tubes and other components in place. We have a complete bulletin crammed with ideas and data about our laminated plastics. May we send you a personal copy? Address Dept. AF-6.

UNIVERSAL COIL WINDING MACHINES

efficiently designed to meet coil-winding needs — safely, simply, economically

"LATTICE-TYPE" COILS

Radio and Television

No. 84 Winding Machine

| Model | Wire Range | Max. Dia. | Traverse | RPM | Coils at Once | HP | Floor Space |
|-------|------------|-----------|--------------|---------|---------------|-----|-------------|
| 84 | #19-42 | 5" | 1/32"-1 1/2" | 400-750 | 1, 2, 3 or 4 | 1/4 | 26" x 31" |

"Gainer mechanism" and calibrated "strap-type" tensions insure accurate, uniform winding, also quick change-over. Simple design, rugged construction assure long life.

LAYER-WOUND COILS

Cotton-Interwoven or Non-Insulated

Nos. 96 and 103 Winding Machines

| Model | Wire Range | Max. Dia. | Traverse | RPM | Coils at Once | HP | Floor Space |
|-------|------------|-----------|--------------|----------|---------------|-----|-------------|
| 96 | #19 to 46 | 6" | 1/16"-3 1/4" | 500-1800 | 1 or 2 | 1/4 | 30" x 26" |
| 103 | #19-38, 46 | 7" | 1/2"-8" | 200-1200 | 1 or 2 | 1/2 | 40" x 36" |

Wire and cotton mechanically guided. Automatic counter. Quick change-over. Adjustable for wide range of coil sizes.

GUTTER-WOUND COILS

for Heavy Duty

No. 98 Winding Machine

| Model | Wire Range | Max. Dia. | Traverse | RPM | Coils at Once | HP | Floor Space |
|-------|------------|-----------|----------|--------|---------------|-----|--------------|
| 98 | #8-20, 30 | 1 1/2" | 1/4"-12" | 35-135 | 1 or 2 | 3/4 | 4'9" x 3'10" |

Automatic guiding. Wire turns placed in grooves formed by preceding layers—for maximum density. Automatic stop at end of coil or end of each layer, as required.

SPOOL-WOUND COILS

No Insulation Between Layers

No. 102 High Speed Winding Machine

| Model | Wire Range | Max. Dia. | Traverse | RPM | Coils at Once | HP | Floor Space |
|-------|------------|-----------|--------------|----------|---------------|-----|------------------------|
| 102 | #20-44 | 3 1/4" | 1/16"-2 7/8" | 500-4700 | 1 Per Head | 1/2 | 51" x 24" (3 heads) |

Standard machine, 3 individually operated winding heads. Output is synchronized on basis of handling time per coil. Wire-layer length quickly adjusted. Automatic stop.

PAPER-INSULATED COILS

In Stick Form

Nos. 104 and 107 (Automatic Feed) Winding Machines

| Model | Wire Range | Max. Dia. | Traverse | RPM | Coils at Once | HP | Floor Space |
|-------|------------|-----------|----------|--------|---------------|-----|-------------|
| 104 | #19-42 | 4 1/2" | 1/16"-5" | 0-2500 | 3 to 14 | 1/2 | 48" x 35" |
| 107 | #19-42 | 4 1/2" | 1/16"-5" | 0-2500 | 4-30 | 1 | 76" x 42" |

Coils wound in stick form—3 to 14 on No. 104; 4 to 30 on No. 107. Sensitive "strap-type" tensions insure smooth flow of finest wires. Paper or acetate sheet automatically inserted. Uniform overlap at all diameters. Adjustable traverse mechanism. Automatic stop. Rapid transfer of wire turns.

PAPER-INSULATED COILS

Hand-feed

No. 108 Stick Winder — modern - - - flexible

| Model | Wire Range | Max. Dia. | Traverse | RPM | Coils at Once | HP | Floor Space |
|-------|------------|-----------|----------|----------|---------------|-----|-------------|
| 108 | #20-42 | 5" | 5/16"-4" | 325-2300 | 4 to 30 | 1/2 | 72" x 36" |

Manually-operated machine designed for production & job work. Quick set-up. Maximum flexibility. Dial control of adjustments. Strap tensions. Round or rectangular coils. 1/2 in. min. inside diameter with 24, 25, or 26-in. paper.

UNIVERSAL WINDING COMPANY

P. O. BOX 1605, PROVIDENCE 1, R. I.

Chicago Office and Demonstration Room, 9 So. Clinton St., Chicago 6, Ill.

The security of experience. Pyramid has more experienced personnel in years of actual designing and manufacturing of capacitors than any other manufacturer.

The advantage of leadership. Pyramid supplies capacitors to all leading TV set manufacturers, and to ALL Branches of Government. Being so close to initial product developments, the design engineer, purchasing agent and production man benefit by new developments in the Pyramid line.

The control of specially designed facilities.

Pyramid is the only manufacturer of capacitors whose plants were planned and built specifically for the entire manufacturing process of capacitors from drawing board conception through reception of raw materials, fabrication, packaging and shipment.

what is available from **Pyramid**

commercial
MIL-SPEC
capacitors

The guarantee of one standard. All Pyramid capacitors are one quality, made of the same quality materials demanded by rigid military specifications. Pyramid capacitors have a low leakage factor due to the non-hygroscopic insulating material used on all production. Pyramid delivers the best at no premium.

A complete line of capacitors—full ranges in all ratings and types.

BURTON-ROGERS COMPANY
42 CARLETON STREET
CAMBRIDGE 42, MASS., U.S.A.

In Filter Networks & Toroids our Specialist is "Burnell"

TC-11 Most useful frequency range lies between 2KC and 25KC. Maximum available inductance 1 HY for lower end of frequency range.

TC-12 Most useful range between 15KC and 150KC, maximum inductance 500 MHYS at lower frequencies.

TC-13 Most useful frequency range between 40KC and 400KC. Available up to 100 MHYS with best optimum characteristics below 10 MHYS.

TC-14 Recommended for 200KC to 1 megacycle. This is best employed at inductances less than 1MHY.

MINIATURE TELEMETERING FILTERS

In view of the large number of filters that are employed in telemetering equipment, the size of the filters is a major contributing factor to the size of the equipment. As the approximate volume of a set of twenty standard telemetering band pass filters is 1500 cubic inches, even for ground based equipment this bulk can be objectionable. This is particularly true of mobile station. Our cognizance of this led to the development of a series of miniaturized filters that necessitates practically no sacrifice of desired attenuation characteristics.

The tremendous advantage of these new filters can be seen from the fact that a set of the same twenty filters would have a volume of less than 300 cubic inches representing a reduction by volume of 80%. Every telemetering filter now being supplied in the standard case is also available in the new miniaturized version.

INTERSTAGE FILTERS

These are economical band pass filters designed to operate either from a triode plate or cathode follower to the grid of a tube. A voltage gain of ten or more can be provided depending upon the desired band width. Range of center frequencies available lies between 60 cycles and 50,000 cycles.

Base dimensions: 1-3/16 x 1-11/16

WE ARE PROUD OF OUR RECORD AS A MOST PROGRESSIVE FIRM IN THE ENGINEERING AND MANUFACTURING OF FILTER NETWORKS AND RELATED COMPONENTS. ENGINEERS AND ENGINEERING BUYERS AUTOMATICALLY THINK OF "BURNELL" IN RELATION TO FILTER DESIGN PROBLEMS AS WELL AS PRODUCTION REQUIREMENTS FOR FILTERS OR TOROIDS.

TO ACHIEVE THIS ENVIABLE POSITION WE CONSTANTLY STRIVE FOR THE DEVELOPMENT OF NEW AND BETTER PRODUCTS THAT WOULD BEST SERVICE OUR CUSTOMER'S NEEDS.

LOWER SIDE BAND FILTERS

Shortly after these side band filters were introduced to the communications industry by Burnell & Company, a new interest in side band reception arose. Although other types of side band filters have been manufactured for some time, their use was limited because of extremely high cost, limited availability, and excessive volume. In attempting to overcome all of these disadvantages, our engineering staff concentrated on the development of a set of filters which would employ high quality toroids instead of crystal elements previously employed in such filters. As the effectiveness of a side band filter depends primarily upon how close the cut off frequency can be placed to the carrier frequency (and still provide sufficient attenuation) it was necessary first to determine the optimum carrier frequency at which the high Q of the toroids could permit a sharp enough rate of cut off and high enough attenuation to the opposite side band. It was for this reason that a choice of the 25kc carrier was made.

R. F. BAND PASS FILTERS

Until quite recently toroidal band pass filters were not too practicable at frequencies beyond the I. F. range. However, since developing toroids with much higher Q at radio frequencies than hitherto obtainable, we have extended the range of our filters to as high as two and three megacycles. A number of these attenuation filters have been able to replace types formerly employing expensive crystal elements. An additional important factor is the great reduction in size over R. F. filters, usually constructed with air core or "iron slug" coils.

PLASTIC FABRICATING

Printloid is equipped for the complete production of a wide variety of consumer and industrial items in any quantity. We work with any plastic material in sheets, rods and tubes. Diecutting, deep drawing, stamping, forming, finishing, and assembling in our own plant.

PLASTIC PRINTING

LETTERPRESS • SILK SCREEN • HOT STAMPING

for Containers, Displays, Dials,
Laminated Charts, Machined Parts, Etc.

PRINTED CIRCUITS

Fully equipped for production of printed circuits including photo etching and silk screen.

Vacuum forming of plastics to your specification.

Ask for brochure illustrating various plastic products fabricated to specification by Printloid.

ADVERTISERS:

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications - a matter of a few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history - the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Ask them to show you what your potentials can be.

ABC NUCLEONICS ABP

Famous Kings in History

FERDINAND V, 1452-1516, was the Spanish King of Castile and Leon. As Ferdinand II he was also King of Aragon. His policies, though severe, founded Spain's imperial greatness. He married Isabella of Castile. King Ferdinand is best-known to Americans because he and the Queen aided Christopher Columbus in his famed voyages of discovery.

In the field of electronics, industries all over America have discovered that they can always depend upon Kings Connectors for both standard and special applications. Because of the highest standards of manufacture, plus long experience, the Kings organization can meet your own specific connector requirements, whatever they may be. You'll be glad you called on Kings first.

DESIGNERS AND MANUFACTURERS OF ELECTRONIC EQUIPMENT
460 WEST 34th STREET • NEW YORK 1, N. Y.

High Resolution- Laboratory Standard DC Voltmeters

For most applications these rugged portable, self-contained nulling voltmeters replace a potentiometer, voltbox, galvanometer and standard cell combination. They are suitable for laboratory use, production line testing and field service.

Model LVM-5

Voltage Range: 0-100 Volts DC
Resolution: At least 50 microvolts between 0 and 1 volt
50 microvolts between 1 and 10 volts
5 millivolts between 10 and 100 volts

Absolute Accuracy: \pm 0.1% of reading
Input Impedance: Infinite at null

Model PVM-4

Voltage Range: 0-600 Volts DC
Resolution: At least 5 millivolts between 0 and 10 volts
50 millivolts between 10 and 600 volts

Absolute Accuracy: \pm 0.1% of reading
Input Impedance: Infinite at null

Catalog PL-2 describes these instruments completely, including their use as deflection potentiometers, null indicators and millimicroammeters. Copy on request.

IDA analog computers and accessories are manufactured by Computer Company of America, Division of Bruno-New York Industries Corp. Their usefulness in the field of dynamics has been proven over the years.

A complete line of standard computers, instruments and regulated power supplies is supplemented by the ability to design and manufacture specialized equipment for your particular applications. Your inquiries are invited.

STACKPOLE

FIXED RESISTORS

JAN-R-11 TYPES

Styles
RC10, RC20,
RC21, RC30,
RC31, RC41,
and RC42.
Write for
Stackpole
Bulletin J-2.

1/2-, 1-, and 2-Watt Sizes in all RETMA Preferred Values

Fully insulated and moisture-protected by phenolic sleeves, Stackpole resistors are available in all standard and many special values for radio, television, military and commercial uses. In addition, Stackpole offers special resistors for automotive, lightning arrestor, capacitor discharge, surge and other uses.

Write for Stackpole Catalog RC-9.

VARIABLE RESISTORS

VERSATILE SWITCHES

Small, reliable line switches are made in ratings and circuitry for every need including portable and auto radios.

Stackpole offers a dependable selection of volume and tone control potentiometers, etc. for radio, TV instruments, and other equipment. Single, ganged, and concentric designs are available in values from 500 ohms to 5 megohms and in ratings from .5 watt. Types range from the midjet LR control for TV the conservatively rated .6 watt Type LP for heavier duty wear. Special taps, extended bushings or other features can be supplied. Write for Catalog RC-9.

IRON CORE HEADQUARTERS

The widespread use of high Q coils with a consequent reduction in complicated circuitry has resulted in no small part from Stackpole engineering that has made new and better iron cores available at attractive prices. Stackpole production includes practically all types in common use — including cores for high- and low-fre-

quency coils and transformers, chokes, and side-molded types for permeability tuning — as well as numerous special types.

For all styles — standard or special — Stackpole manufacturing techniques assure iron cores of outstanding dependability and uniformity. Write for Catalog RC-9.

Fixed Composition CAPACITORS

47 TYPES

0.1 to 10.0
mmf. RETMA
5%, 10%,
and 20%
tolerances.

Type GA

Unmatched for low cost, high stability, and scarcely larger than 1/2-watt resistors, Stackpole "GA" capacitors are the most efficient way to couple or by-pass R-F circuits. Sturdily molded of high-dielectric constant material, these low-value capacitors have physical and electrical advantages that save assembly and testing time in virtually every R-F circuit. Write for Stackpole Catalog RC-9.

MOLDED COIL FORMS

for fast, low cost assembly

Inexpensive Stackpole molded coil forms permit smaller coils and pave the way for simplified point-to-point wiring with a minimum of soldered connections. Either axial or hairpin leads, securely anchored, are available. Types can also be supplied with iron core sections, thereby increasing Q materially, decreasing the amount of wire for a given inductance, and reducing stray magnetic fields. Write for details and samples to specifications.

STACKPOLE

Ceramag

THE REALLY UNIFORM FERROMAGNETIC CORES

**Lower Losses with Higher Efficiency . . .
Lighter Weight — Smaller Sizes
Much Higher Permeability**

Stackpole Ceramag Cores provide permeabilities of 10 to 1 or higher by comparison with iron cores. In addition, they have less corona and operate much cooler due to eddy current losses from their high resistivity.

Remarkable uniformity of Ceramag Cores has long been the first choice of leading television producers. Typical applications include use as cores for flyback transformer, cathode ray tube deflection yokes, width control; low-voltage; I-F pulse and coupling transformers; and others where Ceramag offers distinct advantages. Both standard and special Ceramag grades are covered in RC-9A.

LOW COST SWITCHES for instruments, radios, appliances, and small motors and similar uses

Our product—add to its convenience and "saleability" sturdy, low-cost slide switches! Over 20 fractional and new 3 amp. types for fractional HP motors are available. Most types can be supplied with or without detent, ratchet, or other features to match your specifications. Modifications, including adaptations for rotary or other operation, can be produced economically. Write for new Switch Bulletin RC-9B.

CARBON & GRAPHITE SPECIALTIES

Solve Friction, Temperature, Corrosion, Shaft Sealing, Arcing, and many other problems

at...

Is there an application here that is significant to your operation or product design? If so, our Transistor Application Engineers are ready to confer with you.

Hydro-Aire is manufacturing point-contact and junction Transistors to the very high standards of quality control for which all Hydro-Aire products have become famous. In addition, it is an essential part of the program to explore with energy and imagination the ever-widening field of new uses constantly opening up for Transistors. This is why it is in your interests to keep in touch with us, so that you will benefit from our work both in current applications and applications that will be developing in the coming months.

PLEASE WRITE ON YOUR COMPANY LETTERHEAD:

Subsidiary of Crane Co.

ELECTRO-SEAL provides the utmost in HERMETIC SEALING SERVICE!

Electro-Sealing Service—

Provides the design, enclosure, base, brackets and terminals.

Assembles, wires and seals your component in an atmosphere of dry, inert gas.

Evacuates enclosure by high-vacuum system and thoroughly tests for leaks by means of mass spectrometer.

In addition to volume production, provides small quantities for engineering samples or for limited production schedules.

Invites you to send complete engineering information and samples of parts to be hermetically sealed.

Electro-Seal Corporation

946 North Avenue, Des Plaines, Illinois

New Taylor laminates are premium in everything but price

YOU'LL LIKE everything about this new family of Taylor paper-base laminates—including their price. They're a new kind of hot-punch laminate, uniform all the way through, with no surface overlay of resin.

In insulation resistance, water absorption, power factor, flame retardance and dimensional stability, they'll meet or exceed your strictest specifications. And they punch and stake so well . . . with smooth surfaces and clean edges . . . that you can produce complex parts with maximum utilization of each sheet.

Four different grades are available in production quantities, in standard sheet size of approximately 49" by 49":

XXXXP-301 . . . *the top grade laminate* with unusually high insulation resistance, lowest water absorption . . . excellent punching and staking.

XXP-351 . . . a high grade laminate with most of the properties of XXXP-301, at lower price.

Grade 353 . . . a quality grade laminate priced for economy, with outstanding electrical and physical properties.

Grade 354 . . . an easily fabricated grade having low water absorption and good stability . . . priced for real savings.

Taylor Fibre Co. Plants in Norristown, Pa.; and La Verne, Calif. *Branch offices in Atlanta; Boston; Chicago; Cleveland; Dayton; Detroit; Indianapolis; Los Angeles; Milwaukee; New York City; Philadelphia; Rochester; San Francisco; St. Louis; and Tolland, Connecticut. Distributors in Grand Prairie and Houston, Texas; Jacksonville, Florida; New Orleans, Louisiana; and Toronto, Ontario.*

NEY

PRECIOUS METAL ALLOYS

For ELECTRICAL and ELECTRONIC APPLICATION

CONTACTS

CONTACTS, brushes, wipers, slip rings, commutator segments and similar components for electrical instruments and apparatus represent a field in which Ney Research has a long list of important accomplishments. Ney precious metal alloys specially developed for these applications are widely and very successfully used. And now enlarged manufacturing facilities have been added to meet the steadily increasing demand.

SLIP RINGS AND COMMUTATOR BARS

NEY #90 Alloy, overcomes many of the disadvantages of coin silver when used in slip ring and commutator bar applications. Actually a modification of coin silver, NEY #90 is subjected to a carefully controlled processing

that produces a uniform hardness of 120-130 Brinell which has been found best for slip ring type applications. Since performance is also markedly influenced by surface condition, especially when brush pressure must be low, NEY #90 Alloy rings are given a specially developed finish that greatly reduces wear and electrical noise. NEY #90 Alloy is available in seamless tubing in all sizes up to 4" O. D., also in the form of plate, rod, wire and fabricated parts.

TEST RESULTS

Illustrations at right are typical test results of PALINEY* #7 . . . a Ney Precious Metal Alloy . . . being used for sliding contacts on nickel-chrome wire-wound potentiometers in comparison with phosphor bronze contacts. Figures show low initial error and maintained linearity of PALINEY* #7 performance. Condition of both contacts and windings after test indicate practically no wear.

Cathode Ray Oscillograph (Top Right) showing percentage error of standard potentiometer after one million cycles or two million sweeps of phosphor bronze contact over the wire. Initial linearity was $\pm .17\%$ and the error increased to $\pm 28\%$ plus noise.

(Bottom Right) Performance of standard potentiometer modified by substitution of PALINEY* #7 contact after one million cycles or two million sweeps over wire. The initial error was reduced to $\pm .12\%$ and this linearity was maintained throughout the test.

*Reg. T.M. of The J. M. NEY Co.

Write for your copy of Ney Data Book, "NEY PRECIOUS METALS FOR NON-CORROSIVE WEAR-RESISTANT PARTS." (Bulletin R-12) or Reprints of Technical Bulletins R-13 and R-14. Or call our Engineering Department outlining your needs.

ML-200 Series

Crystals for color television are available to your specific calibration for either the ringing or oscillator circuit. This new design provides hermetic seal at an economical cost.

NOW IN PRODUCTION . . .

Newly-Designed CRYSTALS for COLOR TELEVISION

MIDLAND is ready now to supply you in quantity with color TV crystals to your exact specifications . . . and to advise with you on any phase of this subject.

MIDLAND MINIATURES

Midland has developed, and is expanding, a new series of crystal units which will comprise the MIDLAND MINIATURE line. Their small glass enclosures insure true hermetic seal and long-term stability.

Type ML-6 Range
1.0 mc.—100 mc. Supplied per mil Type CR-18, CR-19, CR-23, CR-27, CR-28, CR-32, CR-33, CR-35, CR-36, CR-48 when specified. Hermetically sealed metal holder with glass and metal base. Height of can is 3/4 in. Pins are .050" dia., spaced .486".

Type ML-6A
Identical to Type ML-6 except provided with .093" diameter pins.

Type ML-6S Range
5.0 mc.—100 mc. for those applications in which long-term stability is the paramount requisite.

Type ML-6W Range
3.0—15.0 mc. This unit is same as Type ML-6 except wire leads are provided, eliminating need for crystal socket.

Midland
PAY OFF IN PERFORMANCE

The quality of Midland Crystals—which is another way of saying the completely dependable job they will do for you—is assured by exacting tests and controls through every step of processing. The finest precision equipment and most advanced techniques known to the industry are used by Midland from selection of raw quartz to final sealing of the crystal.

That's a big reason why Midland has climbed to its present position as the world's largest producer of quartz crystals for use in 2-way communications and other electronic devices.

Midland's engineering staff is ready to help in any project involving the use of crystals.

*Whatever your Crystal need, conventional or specialized
When it has to be exactly right, contact*

Midland
MANUFACTURING CO., INC.
3155 Fiberglas Road Kansas City, Kansas

CRYSTALS

Type ML-4 Range
1.0 - 10.0 mc. Supplied per mil Type CR-5, CR-6, CR-8, CR-10 when specified. Holder is phenolic, gasket sealed. Holder size is 1 1/8 x 1 1/8 x 1 1/8 with .093" diameter pins 1/2" long spaced .486".

Type ML-13
Units of this type are currently undergoing tests on experimental basis. The unit is hermetically sealed. Pin dimensions are the same as our Type ML-6. Height of can is 1 1/2-inch.

Type ML-1A Range
2.0 - 15.0 mc. Supplied per mil Type CR-1A when specified. Holder is phenolic, gasket sealed. Holder size is 1 1/4" x 1 1/8" x 27/64" with .125" diameter pins 3/8" long, spaced at .500".

Type ML-10 Range
15.0 - 50.0 mc. Supplied per mil Type CR-24 when specified. Over-all length is 1.055". Pin contacts, .062" diameter.

ALLIED'S RELAY GUIDE

ADDITIONAL FEATURES

1. Available with Standard Ceramic Insulation.
2. Available with bakelite base and screw terminals.
3. Available hermetically sealed.
4. Available with auxiliary contacts.
5. Available for low capacity.
6. For intermittent operation only.
7. Available in double-break contact arrangement
8. Available with ceramic insulation only.
9. Listed by Underwriters Laboratories, Inc.
10. Designed to handle a maximum of 75 watts of radio frequency up to 150 megacycles when inserted in a properly terminated 52 ohm line.

NOTE 1.
Minimum coil data applies where shock and vibration are not a factor.

Here's Why
Adlake Relays
give **SURE
POSITIVE
ACTION!**

When relay is energized, coil pulls plunger down. Mercury enters thimble, gradually displacing inert gas, which escapes through ceramic plug. When thimble has been filled, mercury-to-mercury contact is established . . . assuring positive snap action under all conditions!

5 Popular Relays from

1101 MODEL

Contact Arrangement:

Normally open or normally closed
Single pole—Single throw

Available in:

Time delay types of { Slow operate—quick release
Slow operate—slow release
Quick operate—slow release

Load type: Quick operate—quick release

Maximum time delay: 20 minutes

Contact rating: Time delay relays to 15 amps.

Load relays to 50 amps.
Non-inductive, 115 v. 60 cy.

Voltage Coil: Up to 440 volts A.C. (25-50-60 cy.)

1133 MODEL

Contact Arrangement:

Normally open or normally closed
Three pole—Single throw

30 amp. capacity at 115 v. 60 cy.

Voltage Coil: Coils are available for all voltages to 440 volts, 50/60 cycles, or 220 v., D.C.

5000 MODEL ... SENS REL

(Designed for rapid operation under load conditions)

Contact Arrangement: Normally open or normally closed
Single pole—single throw

Contact rating: 5 amps., non-inductive, 115 v., 60 cy.

Voltage Coil: Up to and including 230 v., 60 cy.

Coil input: .007 amp. (less than 1 watt) at 115 v., 60 cy.

Maximum size: Height 3 1/2"; width 5 1/4"; projection, 2 3/4"

Wide Adlake line

MODEL

Arrangement: Normally open or normally closed

Available in:

- Slow operate—quick release
- Slow operate—slow release
- Quick operate—slow release

Quick operate—quick release

Time delay: 20 minutes

Rating: Time delay relays to 15 amps.

Load relays to 50 amps.

Non-inductive, 115 v. 60 cy.

To 130 v. D.C. (an external register in series with coil for higher operating voltages.)

MODEL

"MIGHTY MIDGET"

Arrangement: Normally open or closed—Single pole—Single throw

Rating: Quick acting load type only.

Rating: 30 amps. non-inductive —115 v. 60 cy.

Up to 440 v. 60 cy. and 220 v. D.C.

Dimensions: Height 3 3/8"-4 1/4"; width 2 1/2"; projection 2 3/8"

With compression type terminals to simplify installation.

Every Adlake Relay is:

HERMETICALLY SEALED

—dust, dirt, moisture, oxidation and temperature changes can't interfere with operation.

SILENT and CHATTERLESS

REQUIRES NO MAINTENANCE

ABSOLUTELY SAFE

MERCURY-TO-MERCURY CONTACT

—prevents burning, pitting and sticking.

...and every Adlake Relay is tested...and guaranteed... to meet specifications!

For complete details on the broad ADLAKE Relay line, send for your copy of the new ADLAKE Relay Catalog. Address: The Adams & Westlake Company, 1954 N. Michigan, Elkhart, Indiana; In Canada, write Powerlite Devices, Ltd., of Toronto.

Bradley POWER STACKS

SE11 Series

Ratings from 50 milliamperes to thousands of amperes. Used as power supplies, in electro-plating equipment, in battery chargers, and for numerous other applications.

Bradley

LABORATORIES, INC.

VACUUM-PROCESSED

RECTIFIERS

MODULATORS

VARIATORS AND BALANCED BRIDGES. Copper oxide (CX3 Series) and selenium (SM3 Series). Current and temperature characteristics precisely balanced. Hermetically sealed.

DIODES

Selenium (SE8L Series) and copper oxide (CX8 Series) types for low current use, providing excellent stability over a wide temperature range. Rugged and conservatively rated. Dependable operation maintained under moderate overload.

SELENIUM — HIGH VOLTAGE

SE8 Series

Ratings up to 6,000 volts peak inverse (higher in series) and 12.5 ma D.C. per unit. Diameter from 1/4" to 5/8". SE8 Series completely sealed in phenolic housings. SE6 Series hermetically sealed in glass tubes.

INSTRUMENT RECTIFIERS

CX2E Series. Rated up to 6 volts A.C., 4.5 volts D.C., 5 ma D.C. with 3-inch gold leads. Used for multimeters, computers and other low current applications requiring maintenance of calibration and electrical characteristics.

PHOTOELECTRIC CELLS

Model 1-1A

Self-generating. Convert light directly into electric energy. No external power source required. No current drain when inoperative. Rugged, lightweight, true to rating.

MAGNETIC AMPLIFIERS:

SM11 Series. Low leakage, uniform operating characteristics over a wide range of temperature variation, and a low rate of forward aging.

Bradley

LABORATORIES, INC.

Our engineering aims at top performance. Our exclusive vacuum process enables us to provide top performance at the lowest possible cost. Our engineers will be glad to work with you on your rectifier applications. We welcome special problems.

In keeping with the many NEW developments in radio, video, audio electronics, CARTER today offers an advanced line of rotary power supplies specially designed to meet present day functional requirements. Efficient, dependable, ample in capacity. Harmonious in appearance with modern recording, testing and transmitting equipment.

NEW Carter DUOVOLT Genemotors provides dependable 6/12 v. ROTARY dynamotor power for mobile radio equipment operating EITHER from 6 or 12 volt battery.

NEW Carter Change-A-Volt Dynamotors adapt existing 6 volt mobile radio to 12 volt batteries found in many new cars. No rewiring necessary.

Carter Custom Converters provide up to 500 watt capacity for operating recorders, movie cameras, projectors, business machines and many other types of AC equipment from battery power or in DC districts. Carter Custom Dynamotors are for DC to DC voltage conversion in mobile and marine communication, geophysical instruments, lab equipment. Carter TV converters operate big screen sets from 6 v. to 220 v. DC input. Carter Inductor Alternators provide HIGH FREQUENCY AC from DC input voltage. Standard Carter Genemotors are widely used to power mobile, aircraft, marine and railway radio installations. You will be amazed at the many NEW applications now served by Carter Rotary Power Supplies.

WHY ROTARY POWER?

Other type inverters produce AC by reversing the flow of DC, the same as you'd throw a switch. 120 times a second! Rotary converters actually generate AC voltage from an alternator, same as the utility stations. That's why ROTARY POWER is cleaner AC, more dependable, free from sudden failure.

the accepted leader in tape recording
Magnecorder

Mounts in case,
 rack, or console

M80 *the only professional tape recorder with every needed feature*

For precision recording, the M80 is the finest production tape recorder built. It is completely portable, yet surpasses any comparable recorder in every performance specification. It offers 15 kc response at 7½ ips, a full line of accessories, and such valuable operating features as slot loading, automatic tape lift, and remote pushbutton control.

M30

the only professional tape recorder at a popular price

The first Magnecorder to sell under \$300, the M30 utilizes the same tape drive system as the famous PT6 and PT63 Magnecorders. Unit is complete in one handy carrying case, with high and low level output for external amplifier. Model M33, slightly higher, includes power output stage and integral PM speaker.

Smartly styled for business,
 home, and school

THE PT6-JAH

the only complete line of professional tape recorders

Magnecord lightweight recorders and amplifiers answer every practical recording purpose. These units "stack" easily into multiple systems of virtually unlimited flexibility. And these same dependable, easy-to-maintain units provide an accuracy that has set the professional standards for magnetic recording.

More Magnecorders are in use than all other professional tape recorders combined. Your dealer's name is listed under "Recorders" in the classified telephone directory.

eldec SLIP RING ASSEMBLIES

meet your most **rigid** requirements!

ELDEC SLIP RINGS

guarantee the features you demand

Precision molded Eldec slip rings meet and surpass your most exacting requirements. They're molded in *one piece* for maximum insulation, high dielectric strength and higher hi-pot. Turned rings are of solid coin silver, platinum-silver or gold alloys. Concentricity to conform to your standards. Four micro-inch finishes are standard with higher finish as required. Send us your requirements. Eldec prices are competitive.

ELDEC BRUSH ASSEMBLIES

One-piece precision Molded Eldec brush assemblies are the perfect companion part to Eldec slip rings. Send us your requirements.

LET OUR ENGINEERS PROPOSE A SLIP RING AND BRUSH HOLDER ASSEMBLY TO SUIT YOUR EXACT REQUIREMENTS!

ELDEC SWITCHES

These miniature molded 1, 2 and 3 pole switches can be ganged by closed coupling to accommodate up to 60 circuits.

eldec meets those rigid production schedules for you, too!

WIRES and CABLES

The Symbol of **QUALITY** and **PERFORMANCE**

From the earliest days of Radio to the present era of Television, **CORNISH** Wire Products have contributed to the advancement of the industry. Typical of today's modern lines are the following:—

MICROPHONE CABLES

Designed for low capacitance, high insulation resistance, low attenuation—in plastic or rubber insulation to stand severe service

T-V LEAD-IN CABLES

Furnished only in pure virgin polyethylene to insure best electrical properties and long life under severe operating conditions

T-V LEAD-IN CABLES

Made hollow, of pure virgin polyethylene, for maximum efficiency in receiving Ultra High Frequency signals

INTERCOMMUNICATION CABLES

These quality cables are made in various constructions, utilizing plastic insulation for both conductors and jacket

SHIELDED INTERCOMMUNICATION

When installation conditions dictate shielded cables are recommended. Made with internal or external shield—2 and 3 conductors

Beat ^{THE} Heat with **TEF-COR**

Heat-resistant to **500°**

Advertisers:

How about
the
NUCLEAR
field?

There are a good many advertisers using this **BUYERS' GUIDE** who should also be advertising in **NUCLEONICS**.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications—a matter of a few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history—the field of atomic energy.

The sales representatives of **ELECTRONICS** are also the sales representatives of **NUCLEONICS**. They have much evidence pointing to the opportunities in this great **NEW** field. Ask them to show you what your potentials can be.

Beta

—The complete line of
high voltage power supplies

Over 1,000 Standard Designs...
Ranges from 0-300 to over 300,000 Volts

Beta-Built equipment incorporates advanced design features to assure long service life and dependable operation. Beta's experience in the manufacture of power supplies enables our organization to produce superior equipment at lower cost than "shop-built" supplies with the certainty that the requirements of the installation are met. Important, too, is the consulting

service provided by Beta Engineering Representatives to assist you in selecting the appropriate design for your requirements. Whether you require a stock design or special equipment, their services are available without obligation.

Write for detailed information on Beta-Built High Voltage Power Supplies—or for information on a specific problem.

Six Typical Designs

- 1 Model 201
0-30 KV, 2 MA, unregulated. Positive, negative or reversible polarity. Fully portable.
- 2 Model 2040-2P,N,R
0-40 KV, 2 MA, unregulated. Positive, negative or reversible polarity.
- 3 Model 2050-2P,N,R
0-50 KV, 2 MA, unregulated. Positive, negative or reversible polarity.
- 4 Model 2100-2, 5P,N,R
0-100 KV, 2 or 5 MA, unregulated. Positive, negative or reversible polarity.
- 5 Series 3000
D-C Overpotential Testers. Up to 120 KV and up to 5 MA ratings. Sharp overload cutoff characteristic. Line voltage stabilized.
- 6 Model 213
0-250 KV Cockcroft-Walton Generators. Up to 5 MA. Unregulated or regulated. Positive, negative or reversible polarity.

BETA Field Engineers are available

for consultation throughout the

United States and Canada.

Beta Electric Corp.

NEW lower priced FOCOMAG USES SINGLE FERRITE MAGNET

Another **HEPPNER** First

- Lower priced, compact. Cuts receiver costs. Uses only ONE ferrite magnet (an exclusive feature).
- Superior focusing - more uniform field. The sintered ferrite is extremely uniform throughout. Focuses all tubes up to 27".
- Completely shielded. No harmful external field.
- Extended focus range has very fine adjustment to exact focus.
- Built-in centering device.
- Flexible nylon adjusting shaft eliminates breakage.
- Picture positioning lever. You specify mounting arrangement.

Lower your set costs with this NEW FOCOMAG. Write today for further information.

WIRE PRODUCTS

HIGH TEMPERATURE CABLE

As Electronic tube size increases temperatures go up. Wire that was adequate no longer fits the bill. A new high temperature wire has been developed for operation at 650°F that has excellent qualities of dielectric strength and moisture resistance necessary for new design.

SELECT THE SIZE FOR YOUR REQUIREMENTS FROM THIS TABLE:

| AWG Size | Finished Diameter | AWG Size | Finished Diameter | AWG Size | Finished Diameter |
|----------|-------------------|----------|-------------------|----------|-------------------|
| 20 | .115" | 10 | .210" | 1 | .525" |
| 18 | .125" | 8 | .275" | 1/0 | .570" |
| 16 | .140" | 6 | .335" | 2/0 | .630" |
| 14 | .160" | 4 | .395" | 3/0 | .690" |
| 12 | .185" | 2 | .470" | 4/0 | .760" |

FIXTURE AND APPLIANCE LEAD WIRE

A complete line of Underwriters approved fixture wire and appliance lead wire with dense, firm and uniform insulation of felted asbestos. Also supplied with outer braids of cotton, rayon or glass with or without finishing compounds. Used on toasters, waffle irons and other appliances as well as usual high temperature fixtures.

HEATING CABLE

A #19 AWG Nickel Chrome conductor with special laminated insulation consisting of asbestos, Teflon* and glass with silicone impregnation and finish. Resistance .5208 ohms per foot. Insulation good up to 440 volts. Operating temperature 500°F. Widely used by central stations for maintaining proper temperature of pipelines subject to wide changes in ambient temperature.

* DuPont Trade Mark

RESISTANCE ELEMENT & UNITS

Core wound flexible heating element and units for low wattage appliances such as heating pads, curling irons, sealers, toys, etc. Insulations of asbestos or glass.

THERMOCOUPLE AND LEAD WIRE

Thermocouple wire and thermocouple lead wire with usual Iron-Constantan, Copper-Constantan or Chromel-Alumel conductors with high temperature insulation to meet MIL or AN specifications.

**Give Your Product
A HEAD START
With Gibson
ELECTRICAL
CONTACT
ASSEMBLIES**

Making complete electrical contact assemblies is a Gibson specialty that often means customers' money saved. We have the correct materials and equipment to do the job. Although we can furnish Gibson contacts of any type for assembly in your own plant, many of our customers find it economical to have us do the entire assembly job.

Engineering skill and production experience come into play. This is important because the attachment of contacts to supports is vital to total performance of your product.

Special Gibson copper alloys with high conductivity and strength are available for making contact supports—to which contacts may be welded, brazed or riveted.

Gibson contact assemblies can be made with the most economical and satisfactory combination of contact form and assembly method to suit your product. Gibson-designed, Gibson-manufactured contacts and assemblies will give outstanding performance in your electrical circuit breakers, contactors, instruments, relays, rheostats, signaling equipment, switches, tap changers, thermostats, domestic appliances, and other electrical and electronic products.

For engineering data on Gibson contacts and assemblies, write for free Cat. C-520. It's yours at no obligation.

PRECISION TRANSFORMERS AND MAGNETIC AMPLIFIERS

ATLAS has built an enviable reputation as a thoroughly reliable source of supply for custom built precision transformers and magnetic amplifiers. Designed to your performance requirements, Atlas products incorporate the latest manufacturing techniques. Comprehensive engineering, production and testing facilities allow us to produce the most exacting circuits, meet military specifications, and handle large or small quantities. Transformers can be made in hermetically sealed cans, fosterite, scotch cast or open type.

LIST OF PRODUCTS

... power transformers, magnetic amplifiers, pulse transformers, audio transformers, filter chokes, toroidal coils, filament transformers, reactors, bobbin windings, instrument transformers, layer wound coils, MIL-T-27 types, hermetic sealing and special moisture-proof coatings.

ABSOLUTE D.C. POWER SUPPLIES AND METER CALIBRATORS

These units are sources of Absolute D.C. Voltage. Their output is independent of output load and supply variations. The output voltage is constantly compared against an internal standard cell. The Meter Calibrators provide a secondary standard source of D.C. Voltage and Current.

GENERAL SPECIFICATIONS

Long Time Stability: ± 100 parts per million
 Short Time Stability: ± 50 parts per million
 Output Voltage Calibration: to $\pm .02\%$
 Output Voltage Variation: 1, 10, or 100 volt steps
 Output Impedance:
 D.C. less than 0.01 ohms
 A.C. less than 0.5 ohms to 200 kc
 Output Hum and Noise: less than 0.5 millivolts
 Regulation Factor:
 Load— $\pm 0.01\%$
 Line — $\pm 0.01\%$
 Response Time: less than 0.2 milliseconds

METER CALIBRATOR SPECIFICATIONS

| Model | Voltage | Current | Accuracy | Price |
|----------|-----------|---------------------|----------|----------|
| M30B-1 | 1.02-300V | | 0.1% | \$395.00 |
| M30B-1Z | 1.02-300V | | 0.02% | 550.00 |
| M10A-10 | 0-100V | 0-100 ma. | 0.05% | 1190.00 |
| M100A-20 | 0-1000V | 0/1/1 10/100 ma. | 0.05% | 1950.00 |

POWER SUPPLY SPECIFICATIONS

| Output Voltage | Current | Accuracy | Price |
|----------------|---------|----------|-----------|
| 0-300V | 2 amp. | 0.1% | \$ 945.00 |
| | 150 ma. | 0.1% | 495.00 |
| | 250 ma. | 0.1% | 545.00 |
| | 500 ma. | 0.1% | 645.00 |
| 0-500V | 1 amp. | 0.1% | 745.00 |
| | 250 ma. | 0.1% | 615.00 |
| | 500 ma. | 0.1% | 745.00 |
| 0-2000V | 1 amp. | 0.1% | 895.00 |
| | 20 ma. | 0.1% | 1575.00 |

Model fixed voltage supplies are also available.

SUPER-REGULATOR

The Super-Regulator converts ordinary AC to provide extremely low output ripple. Through the use of extremely high gain amplifiers and pentode series pass Super-Regulator is immune to variation in input supply preceding it. For use with either positive or negative output voltages.

FEATURES:
 Output Voltage: 200 to 350 volts
 Output Current: 0 to 450 ma.
 Regulation for Full Load Current Change: $\pm 0.01\%$
 Regulation for 10% Line Voltage Change: $\pm 0.03\%$
 Output Noise Measured over 1 Mc: 50 Microvolts or less
 Standby Current Drain of Super-Regulator: 50 Ma.
 Efficiency: 0.2% Price: \$425.00

KAY-LAB WIDE BAND D.C. DECADE AMPLIFIER

Your best general-purpose amplifier—outstandingly constructed to afford extremely low input noise across high impedance. Chopper stabilized for zero drift, delivering step-wise variable gain from D.C. to 100 kilocycles. Feedback-type circuitry provides very low output impedance. Great flexibility is derived from 0, 20, 40, and 60 DB gains. Required instrument in every laboratory and development center . . . ideal production tool.

SPECIFICATIONS

Gain: 0, 20, 40 and 60 DB
 Band Width: Up to 100 KC depending on gain
 D.C. Output Impedance: Less than 0.05 ohms
 Input Impedance: 100,000 ohms
 Hum, Noise, and Drift: Less than 30 Microvolts
 Price: \$495.00

DYNAMIC MICRO-MIKERS

The Dynamic Micro-Miker is a precision instrument for measuring capacitance and inductance. Designed for use in operating circuits with the circuit under test. It is ideally suited for audio amplifier design and transistor testing.

FEATURES:
 Frequency Range: 0 to 30 MMFD, 0 to 200 MMFD, 0 to 0.001 MFD
 Output Range: 0 to 240 Microhenries
 Frequency: 1000 KC
 Accuracy: 1% Low and Medium Ranges, 2% High Range, 2% Inductance

KAY-LAB LOGATENS

KAY-LAB logatens are non-linear attenuating networks whose output voltage amplitude is a linear function of the logarithm of the input voltage amplitude. Models available with dynamic range to 60 DB.

GENERAL SPECIFICATIONS

Input: 0.1 to 100 volts (varies with model)
 Output: 10 Millivolts to 0.3 Volts (varies with model)
 Input Resistance: 20,000 Ohms
 Output Loading: Not less than 100,000 Ohms
 Accuracy: Up to 0.5 DB of Input

LOGS AND TECHNICAL BULLETINS AVAILABLE FOR ALL PRODUCTS

AMPLIFIERS — less than 25 microvolts internal noise — 50 volts RMS output — 1 megacycle bond width — gains of 40, 60 and 80 DB.
AMPLIFIERS — PRE-AMPLIFIER, DRIVER AMPLIFIER, DETECTOR AMPLIFIER — stabilized with negative feedback and having response flat within 1 DB from 10 cycles to 50 KC.
FILTERS — complete line of rejection-type filters — from .01 to 1000 cycles — immediately available from stock.
AMPLIFIERS — selective frequency high Q amplifiers — from .01 cycles to 1 KC.
STABILIZERS — plug-in units with variable rate controls for stabilizing A.C. servo systems.
TEMPERATURE THERMOSTATS — amplifier and relay systems for exact temperature control.
ATTENUATORS — servo-positioned potentiometer systems for use with analog computers.

FABRICATED PARTS SHEETS • RODS • TUBES

VULCANIZED FIBRE THERMOSETTING PLASTICS

phenolic, melamine and silicone resins in paper,
cotton fabric, glass cloth and Nylon base materials

CRAFTSMANSHIP...

Workmen of exceptional aptitude in the special characteristics of vulcanized fibre and thermosetting plastic (phenolics, melamines and silicones) have been trained through the years by BAER specialists in fabrication of such materials. Finest craftsmanship and economy can be depended upon.

MANUFACTURING...

20,000 sq. ft. of manufacturing and storage area plus complete standard and special equipment for most efficient production of large or small orders, assure perfection of product and prompt deliveries. BAER standards are well known.

ENGINEERING...

If you have a problem relating to the use of vulcanized fibre or thermosetting plastics, BAER engineers are always available for consultation. BAER experience and manufacturing techniques are especially valuable in the solution of problems in creating odd shapes with special physical characteristics.

All materials are made in strict accordance with NEMA and/or government standards.

... COLORS

Standard colors of vulcanized fibre are GRAY, RED and BLACK.

Fish paper (electrical insulation) is SLATE GRAY.

Thermosetting plastics are available in BLACK or NATURAL, depending upon the base material.

... STOCKS

Sheets, rods and tubes in fibre and plastics are available from BAER stocks. Almost anything you want—when you want it, can be provided by BAER. Send drawings, blue prints or rough sketches for our prompt estimate.

INSULATING
TUBING and SLEEVING

INCLUDES SAMPLES AND DESCRIPTIONS OF THE FOLLOWING...

VARSILICONE Class H insulating materials were prepared by our Laboratory. Retain flexibility, electrical properties and mechanical strength in temperatures ranging from -85°F. to 500°F. Available in tubing, sleeving, lead wire cord.

FIBERGLASS-IMPREGNATED VARGLAS TUBING Fiberglass coated with General Electric's Permafil resin. Extremely tough, resistant to solvents and elevated temperatures. Highly flexible. Can be bent or twisted with little or no loss of dielectric strength. Coils and standard 36" lengths.

VARSLEEVING AND TUBING Numerous types and grades—including synthetic-treated, varnished, lacquered, and litewall and others.

VARS NON-FRAY SLEEVING Fiberglass braid normalized to remove all organic impurities. It will withstand temperatures up to 1200°F. Recommended where dielectric properties are not paramount. Three types available.

VARFLO TUBING AND SLEEVING Vinyl-coated Fiberglass in full range of sizes, colors and grades. Extremely flexible with excellent heat aging qualities. Low priced.

VARFLEX COTTON TUBING AND SLEEVING Varnish or lacquer impregnated—for applications where MIL-I-3190 Class A materials are specified. All NEMA grades.

SYNTHOLVAR EXTRUDED TUBING Made in various standard formulations of vinyl polymers. Has high dielectric and tensile strength—will not support combustion nor absorb moisture. Type EG Approved under MIL-I-631A. Several others to meet special requirements.

NEW! VARGLAS SILICONE RUBBER SLEEVING AND TUBING—the culmination of 5 years of research—for applications requiring extraordinary flexibility. Details on request.

MAIL COUPON TODAY FOR SAMPLES!

VARFLEX CORPORATION,
506 W. Court St., Rome, N. Y.

SILVER

FOR ELECTRICAL AND ELECTRONIC USES...

SILVER—because of its superior electrical conductivity, its equally superior thermal conductivity, its excellent resistance to corrosion and its ready workability—is used in many different forms on a wide variety of applications in the electrical and electronic industries.

Handy & Harman, as a leading fabricator of silver and its alloys, has developed silver in many forms to meet the industries' needs.

The list at the right is typical of the silver products readily available for your use. In addition, we are equipped to produce special silver alloys to meet special requirements. Our engineering and research departments are always ready to cooperate in solving your particular problems.

Write us if you want information about the uses of silver and its alloys.

- Fine silver (wire, strip & foil)
- Silver anodes and grain for plating
- Silver contact alloys
- Silver powders
- Silver flakes and paints
- Silver brazing alloys
- Special electronic solders
- Solder-flushed silver alloys
- Silver chloride and oxide
- Special silver alloys to your requirements

CTC Components shown include: A. capacitor; B. standard and insulated terminals; C. coil form kit; D. RF choke kit; E. coil forms

and coils; F. coil kit; G. RF chokes; H. diode clips; I. panel hardware; J. standard and custom terminal boards; K. ceramic board.

One big family with a single thought

Whether you need terminals, clips, coils, chokes, capacitors — or any of a number of electronic components — you can be sure they're right if they're made by CTC.

One continuing basic idea governs the manufacture of every CTC product. And that idea is: *quality control*. We could not guarantee our products as we do without a constant check of numerous details that determine reliable performance. Our quality control engineers see to it that these manufacturing standards are consistently maintained — right through to periodic microscopic inspection.

Pictured here are a number of components available at CTC including our three kits. These items come in standard forms and are also custom engineered to meet your particular require-

ments. We would be glad to give you complete details, including specifications and prices, on any or all CTC units — as well as information on how CTC components can be specially designed to solve your individual electronic components problems.

You will find it well worthwhile to

use components that are *guaranteed*. Write to Cambridge Thermionic Corporation, 438 Concord Avenue, Cambridge 38, Mass. West Coast manufacturers contact: E. V. Roberts, West Washington Blvd., Los Angeles 16 and 988 Market Street, San Francisco, California.

G U D E M A N

CAPACITORS

Paper-dielectric, plastic-film dielectric, metalized paper, dry electrolytic and ceramic capacitors are manufactured for commercial and military use. Among these types are high-temperature miniature paper-dielectric capacitors to meet the requirements of Specification MIL-C-25A. Other types manufactured are high-voltage paper-dielectric glass-cased capacitors, paper-dielectric capacitors in cardboard tubing, dry electrolytic capacitors in metallic or cardboard case, plastic-film dielectric capacitors in rectangular case and disc-type ceramic capacitors. Special capacitors are also designed and manufactured to meet individual requirements.

NOISE SUPPRESSION FILTERS

Low-pass, high-pass and band-pass filters are designed and manufactured to meet specifications for military and commercial applications. In addition, R-F Interference Filters for screen-booth application to handle high current with negligible voltage drop are manufactured.

PULSE TRANSFORMERS

Miniature pulse transformers are designed and manufactured to meet individual requirements for high-temperature applications. They are hermetically sealed in either metallic containers or encapsulated in epoxy resin. Metallic case types are furnished with either pig-tail or plug-in terminals. Encapsulated resin types are made with pig-tail terminals only.

DELAY LINES

Fixed, continuously variable, and decade delay lines are designed with either lumped or distributed parameters for operation over temperature ranges of -65°C to $+125^{\circ}\text{C}$. Gudeman delay lines possess low attenuation and low coefficient of thermal delay. Encased in fibre tubing, hermetically sealed containers, or encapsulated in epoxy resin.

For easier-to-tie knots that will not slip!

HEMINWAY & BARTLETT
Fungus-Proof
NYLON
LACING CORDS and
FLAT BRAIDED TAPES

- Revolutionary synthetic resin coating prevents knots from slipping.
- Laces faster and tighter with less effort. Unique "plastic memory" actually causes lacing to tighten *itself* after knot is made!
- Its greater strength means minimum breakage — minimum rejects.
- The synthetic resin coating retains the desirable malleability of wax and yet has a melting point of over 190°F. It is non-toxic to humans.
- Complies with *ALL* construction and fungus-proof requirements of Govt. Spec Jan-T-713 and Jan-T-152.

Cords and tapes are also available with wax finish.

THE SYMBOL OF QUALITY, ACCURACY, DEPENDABILITY

The equipments illustrated are typical examples of the complete line of PRD quality test components. Rigorously engineered and meticulously manufactured to the highest attainable standards, these units are now standard equipment in many of the leading research and development laboratories throughout the world. In addition to the widely diversified standard equipments offered, PRD maintains a highly qualified staff for special products development. This staff is at your service at all times for consultation.

| | 8.2—10.0 | 586-A | 1 1/4 x 3/8 | |

In addition to the General Purpose Frequency Meters listed above, PRD manufactures a complete line of Precision Frequency Meters covering the entire frequency range from 0.55 to 39.0 kmc/s. Transmission line sizes include 3/8" coaxial line and standard wave guide sizes from 0.280" x 0.140" I.D. to 2" x 1" O.D. All types are available in Reaction and Transmission styles.

The Type 500 Frequency Standard Multiplier is available to generate standard frequency signals in the UHF and microwave regions when used with the Type 417 Tunable Crystal Mount.

FOR ELECTRONIC APPLICATIONS INSULATION BY IRVINGTON

FLEXIBLE TUBING

Extruded Plastic—Varnished—Coated

The Irvington line of insulating tubing includes extruded thermoplastic and varnished types, for all conductor sizes commonly used in electronic wiring. All are characterized by high dielectric and tensile strength, excellent flexibility, smooth surfaces and resistance to acids, alkalis and fumes.

| Application | Recommended Types | Dielectric Strength* (vpm) | Breakdown voltage | Tensile Strength† (psi) | Remarks |
|------------------|---|----------------------------|--|------------------------------|--|

INSULATING VARNISHES

The varnishes listed here represent a few of the many types developed by Irvington for a wide range of uses. All these varnishes offer good-to-excellent resistance to moisture and heat, and most of them also resist the effects of oil, acids and alkalis. Dielectric strength ratings in this table are based on average short-time tests for a film of varnish on paper in the case of baking varnishes; on U.S. Navy Specifications in the case of air drying types.

TRU-OHM
RHEOSTATS

TRU-OHM PRODUCTS
Division of Model Engineering & Mfg., Inc.

For Original Equipment or Replacement Applications

TRU-OHM POWER RHEOSTATS are being specified by more and more manufacturers. We guarantee the finest RHEOSTATS . . . fastest delivery . . . smoothest variation of resistance under the most severe operating conditions.

Available in 50 watts . . . 75 watts . . . 100 watts . . . 150 watts and NOW in 25 watts . . . TRU-OHM POWER RHEOSTATS are universally interchangeable.

The next time it's time to buy RHEOSTATS . . . SPECIFY "TRU-OHM".

We invite your inquiry for our latest catalog featuring TRU-OHM RHEOSTATS and RESISTORS.

General Sales Office: 2800 N. Milwaukee Avenue, Chicago 18, Ill.
Factory: Huntington, Indiana

"Largest producers of wire-wound resistors in the U.S.A."

MANUFACTURERS: Power Rheostats, Fixed Resistors, Adjustable Resistors, "Econohm" Resistors, "Tru-rib" Resistors

international instruments

INCORPORATED

P.O. BOX 2954, NEW HAVEN 15, CONN.

1" and 1½" miniature panel meters

international instruments, specialists in the design and manufacture of miniature panel meters, **FIRST** in this country to design and manufacture a 1" barrel diameter meter, **FIRST** to produce 1" and 1½" illuminated meters, **FIRST** to produce 1½" DB and VU meters and **FIRST** to develop 1" long scale meters. This record of past achievement plus modern plant and test facilities, extensive experience and skilled personnel combine to make **international** the logical source for your miniature meter needs.

international panel meters are miniature D'Arsonval instruments housed in metal cases. Models for government or commercial applications are available. Accuracy is within $\pm 3\%$ of full scale deflection for DC readings, and $\pm 5\%$ for AC. Model 100 and 150 Meters are easily mounted by means of threaded barrel ring. Model 153 Meters supplied with mounting screws. A wide variety of ranges are available starting from 0-100 microamperes. Special scales, sensitivities, ranges, and other modifications can be produced. Consult our Engineering Department giving details of special requirements.

MODEL 150

1½" barrel diameter
Full 90° scale arc,
scale length 1.322".

MODEL 100

1" barrel diameter
Full 90° scale arc,
scale length .770".
Self-contained, ready for use.

MODEL 153

1½" barrel diameter
Designed to meet MIL-
M-3823 requirements.

**VU METER
DB METER**

Self-contained and ready for use. Available in Model 150 and 153. Also available in Model 100 with external accessory.

MINIATURE MULTITESTER

Compact combination voltohmmeter for testing resistances and AC or DC voltages. Meter has sensitivity of 8,000 ohms per volt on AC ranges, 10,000 ohms per volt on DC ranges. Accuracy $\pm 2\%$ of full scale deflection.

ILLUMINATED METER

Sealed meter has own external source of illumination. Lamps for 6, 14 and 28 volts. Easy bulb replacement. Available in Model 100, 150 and 153.

NEW MODEL 1120 SIDE INDICATOR®

Pat. Pend.

Single instrument panel opening only .516" x 1.605", scale 1.3" long. Horizontal or vertical mounting singly or with scales together. Dust-proof anodized aluminum case with clear plastic cover.

VERTICAL MOUNTING

DUAL HORIZONTAL MOUNTING

AND APPLICATION**

TORKRITE TUBING
in foreground, enlarged to show detail.

★ ★ ★

**TORKRITE
POSSESSES MANY
ADVANTAGES**

affords unmatched recycling after a maximum diameter core recycled in a given form a number of times, a minimum core can be inserted and measured in oz. approximately.

has no hole or perforation in the tube wall. This eliminates possibility of cement leakage locking or cores.

permits use of lower torque as completely free of stripping pressure.

Torkrite, torque does not increase during, as the heavier wall acts to prevent collapse and core bind.

New Torkrite is now available in various diameter tubes. Lengths from 3 1/8", are made to fit 8-32, 10-28 and 5/16-24 cores.

★ ★ ★

**Dependable Delivery at
all times.**

**CLEVELITE*
LAMINATED PAPER BASE PHENOLIC TUBING**

In seven specific grades, Clevelite is one of the finest and most complete lines of tubing available to the electronic and electrical industries.

| Grade | Application |
|-----------|--|
| Grade E | Improved post-cure fabrication and stapling |
| Grade EX | Special grade for TV yoke sleeves |
| Grade EE | Improved general purpose |
| Grade EEX | Superior electrical and moisture absorption properties |
| Grade EEE | Critical electrical and high voltage application |
| Grade XAX | Special grade for government phenolic specifications |
| Grade SLF | Special for very thin wall tubing having less than .010 wall |

High performance factors, uniformity and inherent ability to hold to close tolerances, make Clevelite outstanding for Coil Forms, Collars, Bushings, Spacers and Cores. Competent Research and Engineering facilities are always available to aid in solving those tough and stubborn design and fabrication problems. May we help you?

MAXSON UHF WIDE-BAND POWER OSCILLATOR

Model 1141B Power Supply and Modulator

Model 1141A Cavity Oscillator

Model M1141 UHF Wide-band Power Oscillator:
200 to 2500 mc/sec. — consisting of

**Model 1141A Cavity Oscillator, and
Model 1141B Power Supply and Modulator:**

Frequency Range:200 — 1050 mc/sec.
.....1000 — 2500 mc/sec.

Power Output:50 watts to 400 mc/sec.
.....25 watts to 1000 mc/sec.
.....10 watts to 2500 mc/sec.

Modulation: Internal, Square Wave, 400 or 1000 cps
.....Internal, Sine Wave, 400 or 1000 cps
.....External
.....CW

Nominal Output Impedance:50 ohms

Output Connector:Type N Jack

Input Power Requirements: 115 VAC, 60 cps, 200 watts

MAXSON PRECISION FREQUENCY and VOLTAGE REGULATORS for aircraft inverters

model M-1087 Frequency Regulator

Size:Control — 22 x 5 x 7¾ inches
.....Inverter — Depends on unit used

Weight:Control — 28½ pounds
.....Inverter — Depends on unit used

Input voltage:26 to 29 volts d-c

Frequency control over entire range of input voltage and load: Instantaneous for steady-state input voltage and load, 400 ± 1 cps

Average over 30 or more minutes*, 400 ± 0.1 cps

Frequency excursion: Maximum for transient changes in d-c supply voltage 26 to 29 volts or output load from zero to full load, ± 20 cps

Recovery: After maximum transient change in d-c voltage supply or load; to 400 ± 2 cps within 1.5 seconds; to 400 ± 1 cps within 2.5 seconds

Power consumption: (control unit†): 200 watts max.

model M-1119 Voltage Regulator

Size:5½ x 6½ x 3½ inches

Weight:1.5 pounds net, 5.5 pounds gross

Input voltage:26 to 29 volts d-c

Output-voltage control over range of input voltage and load: ± 2 volts of selected voltage between 100-130

Voltage excursion: Maximum for transient changes in d-c supply voltage from 26 to 29 volts or output from zero to full load, ± 2 volts

Power consumption: (control unit†) 200 watts max.

*In certain applications, at extra cost, this precision can be improved to practically any degree desired.

†Power to operate the regulator is taken from the inverter.

MAXSON PRECISION PHASEMETER

model P-1060

Frequency Range:
30 cps to 20,000 cps

Phase Range:
0—360 degrees

Accuracy: 0.1 degrees

Signal Level:
0.5 to 10 volts rms

Input Impedance:
10 megohms shunted by 25 μf

Display:
Decade null system

Power Requirements:
200 watts at 105—
125 volts, 60 cycles

Size: 19½" wide x 16¼" deep x 25" high. **Wt.:** 110 lbs.

Cabinet: Internally shielded walnut cabinet. Equipment when removed from cabinet is suitable for standard 19" relay-rack mounting.

903S

Standard models of Borg 900 Series Micropots offer such flexibility that they meet special design requirements. Borg has created a new standard for high-precision, multi-turn potentiometers.

Advantages of the Borg 900 Series include greater accuracy, finer resolution, lower torque, longer life, and better performance under severe and excessive

vibration, greater adaptability and versatility of application.

Standard models include: 10-turn precision Micropots in 1 to 3 gang models, 3-turn in 1 to 5 gang models, single or double shafts, servo or bushing mounts on either or both ends. Available to designers and engineers in any quantity.

SYNCHRONOUS AND INDUCTION BORG-MOTORS

STANDARD SERIES 2 POLE AND 4 POLE MODELS With and Without Gear Trains

Borg-Motors were designed specifically for instrumentation, control and timing devices. They are recommended for all applications where low torque, constant speed and long life are positive requirements.

For Complete Engineering Data

SERVO-CONTROL Borg-Motors

Two phase, 115 volt, 400 cps induction type Borg-Motors for servo control applications. Approximate size 1½" diameter x 2" long with a locked rotor torque of 0.82 ounce-inch.

Ketay

(2) i
(3) Ge.

Skilled technicians performing one of dozens of tests on size 23 Synchros. As design agent for Army Ordnance, Ketay designed all Synchros of this size.

Jones and Lamson optical comparator... one of hundreds of different methods (many of them original developments) used to insure precision.

Environmental test chamber can simulate altitudes up to 90,000 feet; produce temperatures to 100°F and controlled humidity to 98%. This chamber performs all environmental tests in accordance with MIL-E-5272.

EXPERIENCE + RESEARCH + PERFORMANCE = LEADERSHIP

The final test of leadership is the ability to deliver. Ketay offers:

- Original research to meet highly specialized requirements and unusual operating conditions;
- Application of this research to the economical manufacture of high quality products;
- Volume production to comply with stringent delivery schedules.

By providing a complete range of sizes and types... originality of design... facilities for volume produc-

tion... Ketay has established this kind of leadership.

Ketay's experience also includes: gyro components; automatic control devices for fire control and missile systems; computers and simulators; magnetic, resolver and synchro amplifiers; marine inter-communication equipment; ship's course, salinity and other remote indicators; and automatic control systems.

The Research and Development Division is staffed and equipped to participate in advanced studies during the design stage of applications involving Ketay electro-mechanical devices.

Why we choose **Winco** DYNAMOTORS

"Precision airborne communication equipment must have a dynamotor of consistently reliable quality . . . that's why we specify Winco."

says Mr. Paul Wulfsberg,
Ass't. Director Engineering and Research

COLLINS RADIO CO.

Cedar Rapids, Iowa.

WINCO DYNAMOTORS are manufactured on a wide range of rugged frames that allow for a wide design applications. Winco engineers have a decade of experience in successfully designing dynamotors to rigid military and commercial specifications. They tackle each power conversion and/or supply problem individually, either modifying a standard Winco machine, or designing a special unit to meet your exact requirements. Winco specialists then plan its manufacture on a production basis to keep costs down and final performance quality at its best. Winco dynamotors are lightweight, compact and fully enclosed and ventilated. Precise static and dynamic balance is assured by the most modern machines — each dynamotor is thoroughly tested with periodically calibrated precision meters.

Collins 185 Transmitter/Receiver, used for reliable HF communications in major air-lines and executive aircraft uses a Winco-Engineered Frame 51 Dynamotor.

SEND THIS COUPON TODAY for complete information on how Winco can supply you with reliable, efficient dynamotors and power supplies produced in volume at low cost.

Let HERMASEAL help you with HEADERS.. SEALED RELAYS.. END CAPS.. GLASS SEAL TUBES and Special Products to meet your Special Requirements

HEADERS... Kovar and Compression type ... standard or special

Simple or complex, standard or special, Hermaseal manufactures them all, 2-electrode crystal holder bases, standard and special headers up to 18-terminal headers available in a wide range of sizes, styles and patterns. Standard finish is hot solder dipped at 550° F. Hermaseal can do the wiring and supply enclosures, with either dry air fill or vacuum pumped and pressure-filled with dry nitrogen, for relays, transformers, choke coils, etc. Hermaseal hermetically sealed assemblies meet all specifications, are available in a wide range of sizes and adaptations to meet special requirements.

TERMINALS and END CAPS... Kovar and Compression type ... all kinds, all sizes

Hermaseal manufactures both Kovar and Compression Type Sealed Terminals and End Caps in an extremely wide range of sizes including miniature and sub-miniatures. Terminals for very low or very high voltage, tubular electrodes for high current-carrying capacity and with solid electrodes for moderate current requirements. Standard finish is hot solder dipped at 550° F. Hermaseal facilities are at your service for soldering terminals to your transformer covers ... evacuating and pressure filling enclosures.

METALLIZED GLASS APPLICATIONS... special or standard

Whether it be Metallized Glass Tubes or Metallized Glass Windows, you can count on Hermaseal. They are offered in hard or soft glass with platinum or silver metallizing. Hot solder dipped finish for ease in subsequent soldering operations. Hermaseal Tubes and Windows are available in a wide range of standard and special styles and sizes.

HERMASEAL can help you with any Hermetic Sealing problem

Hermaseal can help you gain improved performance characteristics and real economies in the application of hermetic seals to the production of switches, resistors, transistors, ger-

manium diodes, rectifiers, relays, coils, transformers, radio and TV parts, for the radio-electronics and allied industries. In addition to the manufacture of glass-to-metal seals

Hermaseal can help you with their installation in your product. Our development and production experience are at your service. Send specifications and sketches to Hermaseal today.

PRICES AND SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE.

GENERAL SPECIFICATIONS

(Applicable to all models)

INPUT: 105-125 V, 50-60 C, single phase

DC OUTPUT:

Voltage Range: Continuously variable over ranges specified, except for Models 62, 63, 64 and 65. The voltage ranges for the latter models are completely covered in four continuously variable segments.

Current Range: The current ranges given apply to the entire DC output voltage range, and for input voltages from 105 to 125 VAC. No "derating" is necessary.

Polarity: Either positive or negative terminal may be grounded.

AC OUTPUT: The AC output is unregulated, isolated and ungrounded. It has a value of slightly higher than 6.3 V (when fully loaded) at an input of 115 VAC. This value allows for voltage drop in connecting leads. Dual outputs may be connected in series or parallel.

DUTY CYCLE: Continuous duty at full load

METERS: Where meters are indicated, a separate voltmeter and milliammeter are provided.

OVERLOAD PROTECTION: Ample protection is provided against external overload and internal failure conditions by means of fuses.

Circuit breakers of the magnetic, "trip-free" type are employed in Models 50 and 50-R as protection against external overloads.

STYLE:

Rack Models are designed for mounting on standard 19" relay racks.

Bench Models are provided with compact, specially-designed, ventilated cabinets equipped with carrying handles. The power supply units may be removed from their cabinets for mounting in standard relay racks (except Model 25).

RATINGS AND COMPONENTS: All components used are of the highest quality and are operated well within manufacturers ratings. Hermetically-sealed, oil-filled capacitors are used exclusively. Ample safety factors are provided in the design to insure the long life, and the dependable, trouble-free operation so desirable in industrial and laboratory applications.

PRODUCTION AND DEVELOPMENT METAL FORMING FOR ELECTRONICS,
NUCLEONICS, AVIATION, MARINE AND GENERAL INDUSTRY

Today there are 8 types of
IRON POWDERS
 made by the
Carbonyl Process

These powders are microscopic particles of extremely pure iron—spherical or agglomerations of spheres. The particles differ in size, in structure and in chemical composition and are thus adaptable to many different uses. Produced in eight carefully controlled types, the particle sizes range from one-half to twenty microns in diameter. The iron content of some types is as high as 99.6—99.9%.

Now widely used in high frequency cores for many communications systems, several types

may also be used as alloying agents, as catalysts, in pharmaceuticals, magnetic fluids and many applications in powder metallurgy.

The powders make for ease of sintering. Added in metal parts, they also permit controlled shrinkage of the finished sintered part. In other applications, they impart greater ductility and strength to the finished piece. Desirable properties and qualities of powdered metal parts are enhanced by using these powders—either in whole or in part.

This 32-page book offers you the most comprehensive treatment yet given to the characteristics and applications of G A & F Carbonyl Iron Powders. 80% of the story is told with photomicrographs, diagrams, performance charts and tables. . . . We invite you to call upon our research facilities and Technical Service Department for assistance in developing new applications or new products involving the use of any of these powders. Kindly address your inquiry to Department 84.

- E** Steel-like, concentric shell structure, weight average diameter 5 microns
- TH** Steel-like, concentric shell structure, weight average diameter 5 microns
- SF** Steel-like, concentric shell structure, weight average diameter 3 microns
- J** Alloy, face-centered cubic crystal structure, higher resistivity, weight average diameter 8 microns
- HP** Soft, pure iron, high magnetism, weight average diameter 10 microns

EITEL-McCULLOUGH, INC.
San Bruno, California

of Leadership!

1934 Eimac electron-power tubes have been specified by leading users for all types of military and commercial application. The incomparable performance, reliability and quality of Eimac tubes enabled Eitel-McCullough, Inc. to become the world's largest manufacturer of transmitting tubes in just two decades.

TIMING DEVICES

SPECIALISTS IN TIME CONTROL

TYPE IE

INTERVAL TIMER

Turning knob to desired time setting starts time cycle. Progress indicated by pointer traveling towards zero. Built-in push button, to initiate timing cycle, available as optional feature.

INTERVAL TIMER TYPE IG

Similar to IE above, but without front plate and housing. Designed for built-in applications, where timer is mounted behind panel and shaft protrudes thru panel. Dial and pointer optional extras.

RESET TIMER TYPE RE

Pressing built-in start button switches circuits and starts timer. Progress indicated by independent pointer traveling towards zero. At end of cycle circuits switch back and timer resets, ready for a new cycle.

TIME DELAY RELAYS TYPES TE — TEC

Highest accuracy for precision timing. Timing cycle initiated by external means. Micrometer knob on range pointer for extremely precise setting. Progress pointer indicates time remaining.

TIME DELAY RELAY TYPE TF

For built-in applications. Provides fixed time delay between closing of external contact and switching of load circuits. Enclosed snap-type switch mechanism.

CYCLE TIMER TYPE CF

Permits automatic control of 1 to 8 circuits. Single or multiple cam units permit adjustment to any desired time sequence. May be arranged to stop at the end of one complete cycle or repeat cycle continuously.

PULSE TIMER TYPE V

Repeats electrical impulse of predetermined duration at the end of any desired time interval which may be set upon the dial. Ideal for such applications as automatic lubricators, conveyors, sludge pumps, bar screens, feed water controls, etc.

PERCENTAGE TIMER TYPE PE

Adjustable automatic timer to control percentage of time in which an electrical circuit is closed or open out of a definite time cycle. Ideal to control operating time of an oil burner, furnace, etc.

RUNNING TIME METER TYPE E

An elapsed time indicator to register total operating or idle time of any machine or system. Excellent for indicating usage time of vacuum tubes or machine tool cutter, etc., in conjunction with a preventive maintenance program.

TIME TOTALIZER TYPE ET

A highly accurate stop clock to measure and to indicate elapsed time intervals. Used wherever precise measurement of time is required. Accuracy of better than .02 of 1%.

HERMETICALLY SEALED TIME DELAY RELAY TYPE HTI

Retains high accuracy of standard Cramer timers, but is miniaturized for airborne or mobile applications. Hermetically sealed in steel case and tested to meet most rigid military applications.

SYNCHRONOUS TIMING MOTOR

Small synchronous motor for any application requiring constant speed. Exceptionally high torque for its size (30 in. ozs. at 1 rpm stall torque). Instantaneous start and stop. Wide range of speeds from 60 rpm to 1 rpm.

TYPE K

CLUTCH UNIT MOTOR

KX motor with differential gear-type clutch. Used where reset is needed or where extremely accurate clutching is required.

SPECIAL TIMERS AND ENCLOSURES

In addition to the standard panel mounting timers illustrated above, Cramer manufactures a complete line of special purpose timers, timers in special enclosures, hermetically sealed devices, etc.

Write for complete information about your timing requirements or for advice on special problems.

ELECTRICAL

- switch parts
- insulated wire & cable
- insulators
- terminals
- coil forms
- molded components
- tube sockets
- resistors

OTHER

- anti-hesive coatings
- instrument parts
- porous filters
- valve seats, liners
- solid & core "O" rings
- hose assemblies
- flexible containers
- medical goods
- pump & valve diaphragms
- "U", "V" & chevron packings
- gauges and gauge glasses
- low temp. valve seats
- bearings
- drum plugs & machined fittings
- pipe & equipment liners

LOWER PRICES MAKE MANY NEW APPLICATIONS ECONOMICAL

Fourth important price reduction by Kellogg since the commercial introduction of "KEL-F" polymers in 1948 cuts the price up to 25% in ton lots, 43% in quantities less than 100 pounds. The reduction is the result of the rapidly expanding acceptance of "KEL-F" polymers and economies in Kellogg's new large-volume production facilities. Price schedule is available on request.

FOR MORE COMPLETE DATA ON CHEMICAL, ELECTRICAL, MECHANICAL AND OPTICAL PROPERTIES OF "KEL-F" polymer write for Technical Bulletin # 1-3-53, which describes KEL-F fluorocarbons and includes data on film, effects of plasticizers, and the specifics of the material's resistance to more than 125 chemicals.

Brush holders and insulators . . . keep their shape, maintain insulation resistance in extreme temperatures and current. Thinner, lighter insulators because of high strength polymer.

Cosmotron Insulators of KEL-F plastic take high electrical loads without carbonizing or shorting. Plastic's high compressive strength, low "cold flow" prevents damage from heavy magnet loads. Low "gassing" rate helps maintain vital vacuum.

Miniature components, such as this instrument rectifier, are tougher and more efficient when insulated with KEL-F plastic. High dielectric and zero water absorption permits use of less insulation. High strength provides resistance to shock up to 100 G's.

Terminals handle up to 7500 volts without flash-over . . . under high voltage. Tough plastic insulation provides positive hermetic seal. Prohibitive to other materials, plastic defies aging.

Resistor sleeving is "flame-proof" and resists damage from tools. Non-absorbent and fungus-inert, insulation remains high under extreme environmental conditions. Sleeving remains transparent, simplifying maintenance.

Tube sockets have high insulation resistance, prevent ionization and flash-over at high altitudes or under high humidity conditions. High compressive and impact strength of plastic prevents deformation under high shock loads.

Plastic is ideal for totally "hot" wiring jobs, insulating stable up to 375°F. High strength, low loss under high voltage. Inert to highly corrosive. Non-flammable.

Tube cap connectors of KEL-F plastic permit one-piece molding of cap, resistor and lead, preventing high altitude and moisture shorts. Non-carbonization at elevated temperatures prevents tracking and shorting.

Switch rotors insulated with injection-molded KEL-F plastic give positive RF insulation without attenuation. Dimensionally stable plastic provides smooth switch action under severe thermal and humidity conditions.

KEL-F

KEL-F® Polymer... Unique, Versatile Material

... Has gained wide acceptance by meeting critical "specs" where other materials have failed. Designers and engineers find it convenient and economically sound as well as technically superior for most critical and semi-critical applications.

KEL-F trifluorochloroethylene polymers are extruded, compression, transfer and injection molded using standard equip-

ment operating at 450°F to 650°F temperatures. Molded plastic is dimensionally stable, unaffected by moisture and is readily machined, punched, drilled, stamped, polished or ground to precision tolerances.

Fluid dispersions are readily applied by spray or dip-coating for superior "baked-on" protective coatings. Finished coatings retain the properties of KEL-F polymer.

Molding, Fabricating and Coating Services Available Throughout the Country...

More than 80 companies are now qualified to render designing services and to manufacture products of KEL-F plastic. Write for "BUY-

ERS GUIDE" listing these molders, extruders, fabricators and applicators and their principal products and services.

KEL-F is available in these "stock" forms

Full-Scale Research and Applications Laboratory—for trifluorochloroethylene polymers—now in operation in Jersey City

With the building of the new Kellogg polymer plant, facilities for development and applications work have been considerably expanded.

Modern scientific research apparatus and production molding equipment are teamed with an increased staff of experienced scientists and technicians . . . to work exclusively on the development of new, improved fluorochloro-carbon materials . . . developing improved methods of fabrication . . . and new uses for KEL-F polymers.

Here, problems encountered by molders, fabricators and end-users are investigated under controlled conditions. Methods for economical utilization of unique fluorocarbon properties are studied, improved, more efficient production methods for plastics fabricators are developed and tested. Product quality and performance problems are investigated.

Technical Information Available on KEL-F Polymers:

- Bulletin #1-3-53 Physical, Electrical, Chemical and Mechanical Properties
- Bulletin #5-1-52 Properties of KEL-F (Plasticizers, Greases and Waxes)

20 MC to 1000 MC

NOISE AND FIELD INTENSITY METER MODEL NF-105

(Commercial equivalent of AN/URM-7)

Three quick-change tuning heads.
Single knob tuning for easy scanning.
Built-in impulse generator serves as calibrator.
Carrier and peak reading VTVM.
Aural slideback.
Coaxial step attenuators.
Regulated "A" and "B" supply.

150 KC to 80 MC

NOISE AND FIELD INTENSITY METER, MODEL NF-114

(Commercial equivalent of
AN/PRM-14)

Eight band turret switch.
Two tuned RF amplifiers on all bands.
Built-in impulse generator.
Carrier and peak reading VTVM.
Aural slideback.
Dry batteries or 115 Volts AC operation.
Subminiature construction.

IMPULSE GENERATOR MODEL IG-115

PULSE WIDTH: 0.0005 microseconds (5×10^{-10}
seconds).

FREQUENCY SPECTRUM: 10 KC to 1000 MC,
within $\pm 1/2$ DB.

AMPLITUDE LEVEL: 100,000 microvolts per megacycle
width adjustable over a 100 DB range.

AT-60

UHF ATTENUATORS MODELS AT-50, AT-60

50 ohm resistive T-networks of concentric line
construction.

FREQUENCY RANGE:

AT-50: DC to 4000 MC.

AT-60: DC to 3000 MC.

VSWR: Better than 1.2 at all frequencies.

ACCURACY: $\pm 1/2$ DB.

RATED POWER:

AT-50: 1 W continuous

1 KW peak

AT-60: 2 W continuous

2 KW peak

STEP ATTENUATOR MODEL AT-101

Uses AT-50 pads in a six-step coaxial
turret arrangement.

CRYSTAL MIXER MODEL CM-107

Fixed Tuned.
Frequency range to 5600 MC in 8 models.
V.S.W.R. better than 2

Isolation at 1F output better than
30 dB.
Compatible with Type "N" or UG-46/U
Type Connector.

4 KC to 110 KC

NOISE AND DISTORTION ANALYZER MODEL ND-110

BROAD BAND SENSITIVITY: -80 DBM.

NARROW BAND SENSITIVITY: -110 DBM.

Narrow band uses crystal lattice network for

proper band pass characteristics.

Measures true RMS power of sine wave or
complex signals.

Delay Lines

by Brew

accuracy
dependability
uniformity

Here is the one place where all types of delay lines are available to meet your needs . . . *distributed constant, lump constant, and solid.* The advanced design of Brew delay lines and the special manufacturing techniques assure you of the greatest possible accuracy and dependability. The large number of companies that depend on Brew for delay lines is proof of their superiority. Today you find Brew Delay Lines on many types of equipment in both commercial and government applications.

Distributed constant delay lines

Highly consistent. Attenuation as low as 1 db per microsecond. Rise times to 0.035 microsecond are possible for short delays. Characteristic impedance from 500 ohms to 2500 ohms. Standard delay tolerances 0.05 microsecond, closer if required. Hermetic seal mountings and miniaturized design.

Lumped constant delay lines

Lumped constant lines are designed and produced to meet the customer's most stringent electrical characteristics. Size, weight and mounting techniques are consistent with the electrical requirements. All lines exhibit excellent thermal and shock resistant qualities. Hermetically sealed mountings are available. Quick delivery on prototypes.

Solid delay lines

Frequency ranges from 5 to 100 MC. Bandwidth 5 MC at 20 center frequency to 14 MC at 50 MC center. Delays accurate to .1%. Low attenuation of delayed pulse. Spurious responses 40 DB below delayed pulse. Triple travel at least 30 DB below delayed pulse.

Consult Brew about your next delay line requirement and you'll get the answer you want. Yours for the asking . . . a new Brochure covering Brew Delay Lines and also describing the technique used by Richard D. Brew Co. for the measurement of delay lines.

I. C. I.'s complete and unequalled facilities are devoted entirely to the design, development and production of quality printed circuits which deliver the utmost in efficiency, economy and long life. They are finding increasingly widespread applications in the mass production of electronic devices, and in new designs for miniaturization. Wherever they are used, up to 50% savings in manufacturing costs are reported. Typical of I. C. I. design initiative is the exclusive process of plating through holes which leads to more efficient higher quality products.

Commutator—
 Courtesy of
 Remington-Rand, Inc.

"CARRY-THROUGH" For maximum economy and quality. No need for Space Consuming Large Holes for Through Continuity. Top and bottom soldering with selective dip-soldering of the bottom side only is an advantage, as shown.

"MICRO-STRIP"—I. C. I. is an approved licensee of International Telephone & Telegraph Co. for the manufacture of Printed Circuit Micro-Wave Components.

I. C. I. PLATING OF CONDUCTIVE PATTERNS facilitates dip soldering.

1. Solder, electro-plated — 60/40 alloy — permits extended shelf-life and the use of mild fluxes. When electroplating is carried through holes, dip-soldering is necessary only on one side.
2. Silver immersion is a soldering aid with short term protection against corrosion.

You will want to know more about I. C. I. Printed Circuits. Write us for detailed information and plan to take advantage of the advice and suggestions of our engineering staff.

TAKE ADVANTAGE
 OF I. C. I. ADVANCED
 MANUFACTURING TECHNIQUES

I. C. I. "CARRY-THROUGH" eliminates the need for large holes for through continuity from one side of the insulating base to the other, and makes unnecessary the use of eyelets or other hardware. Top and bottom soldering with selective dip soldering of the bottom side only is a further advantage.

I. C. I. SWITCH AND CONTACT PATTERNS are highly efficient. Flush or Raised Switches—

1. Nickel-Rhodium provides a non-corrosive wiping contact surface with excellent wear resistance. It is recommended for both continuous and intermittent operation.
2. Silver-Rhodium has excellent non-corrosive resistance. It is recommended wherever RF rules out the use of nickel because of its ferromagnetic properties.

**RESISTANCE
ALLOYS**
for electronics

EVANOHM® (NICKEL CHROME) — For high specific resistance (800 ohms c.m.f.) — low temperature coefficient and low thermal e.m.f. vs. copper.

TOPHET A® (NICKEL CHROME) — For resistors, potentiometers and high temperature applications.

TOPHET C® (NICKEL CHROME IRON) — Offers great strength in fine sizes. For rheostats and resistors.

RODAR® (NICKEL, COBALT, IRON) — An alloy for hard glass to metal seals.

CUPRON® (COPPER NICKEL) — Non-magnetic with low temperature coefficient. For rheostats and resistors.

BALCO® (NICKEL IRON) — Offers high temperature coefficient of resistance. Applications include sensing bulbs and ballasts.

FILAMENT WIRE — MODIFIED HILO®, COBANIC®, SYLVALOY®

GRID WIRE — MANGRID®, SILVER PLATED MANGRID®

CARBONIZED NICKEL — RADIOCARB A®, POLICARB®, DUOCARB®

All wires available with insulations of Enamel, Cotton, Silk, Nylon and Glass. Call or write for engineering assistance — the Wilbur B. Driver engineering staff welcomes an opportunity to work with you on special alloys for electronic applications.

REON POWER RESISTORS FOR UTMOST DEPENDABILITY

TEMPERATURE DERATING: Conservatively rated to operate at full load continuously at ambient temperature up to 40°C. Linearly derated to 0% power at 350°C.

LOAD LIFE: Guaranteed conservatively for intermittent or continuous operation for a minimum of 1000 hours. Actual life expectancy exceeds many times this.

OVERLOAD: Will withstand 10 times normal rating for 5 seconds. A safety factor allows continuous overload of twice rating.

serves the electronics industry **2** ways

the
STAVER
line of
electronic
specialties

mini-shield* and clip
Types to fit *all* miniature tubes. Locks tube in socket, prevents vibration. Engineered to accommodate variations in diameter.

sub-mini-shield

Combination shield, clip and mount, for sub-miniature tubes. Close tube-to-shield contact for maximum heat dissipation. Firm clamping action. Easy to mount.

mini-spring*

A vibration-proof tube guard that keeps a steady axial downward pressure and provides sideway support in vertical or horizontal mounting position. Locks or releases tube at touch of a finger.

speed, accuracy and reading ease

ify **Berkeley**

DIRECT READING DIGITAL INSTRUMENTS!

BERKELEY ELECTRONIC COUNTERS operate from closing contacts, photocells, magnetic or stylus pickups, or any means that will produce a positive potential of at least 1 v. Model 5001, in ruggedized industrial case with tamperproof transparent cover, handles up to 100 counts per second and lists at \$148.00; Model 410, 10,000 counts per second, \$330.00. Units with count rates to 1,000,000 per second available.

Applications:

Counting of manufactured objects, stacked sheets, motions; electrical, mechanical, physical or optical events.

BERKELEY PRESET COUNTERS produce an output signal when the desired number of counts have accumulated. Presetting is accomplished by depressing the desired pushbutton in each column of digits; manual or automatic reset. Maximum count rate is 40,000 per second. Standard models range from the 2-column Model 5422 at \$375.00 to the 6-column Model 5426 at \$795.00. Double pre-set models available.

Applications:

Counting and control of objects for packaging; coil winders; cutting stock to length; overspeed control; time delay generator; etc.

BERKELEY UNIVERSAL COUNTER AND TIMER multi-purpose instruments provide direct reading of elapsed time with accuracy to ± 1 microsecond, frequency-measurement to 1 megacycle with accuracy of ± 1 cycle, period measurement from 0 cycle upward with accuracy to ± 1 microsecond, and counting to 1 megacycle. Model 5510, \$1,100.00.

Applications:

Precision tachometry, measurement of pressure, flow, frequency, velocity, viscosity, elasticity, time interval measurement, timer calibration, timing relay, shutter action, etc.

BERKELEY FREQUENCY MEASURING EQUIPMENT covers the full range of frequency measurement applications, and includes the first complete monitoring and recording system commercially available. This system indicates in digital form frequencies to 515 mc. having input levels of 100 millivolts or more. Accuracy is ± 1 cycle \pm crystal stability. Frequency meter prices range from \$560.00 for the 20 cycle-100 KC Model 5556 to \$1,785.00 for the 0-42 mc. Model 5570. Prices of complete systems, including converters to 515 mc., selective amplifier and printed readout, on request.

Applications:

Filter and crystal testing, oscillator calibration and testing, design and testing of telemetering, transmitter and receiver equipment, transmitter monitoring, etc.

BERKELEY Nuclear Instruments

BERKELEY's complete line of nuclear instruments includes decimal scalars, count rate meters and computers, complete scintillation counting systems, and a full line of accessories.

BERKELEY BASE* Computer

*Electronic Analog Simulating Equipment
Precision computer — simulator equipment for the rapid solution of problems involving differential equations, and for the simulation of complete dynamic systems. Low in cost, compact, easy to operate.

For information and application data available on request, address Dept. G-13

Prices f.o.b. factory.

SAVE SPACE!

ACTUAL SIZE $\frac{3}{4}$ INCH SQUARE
BABY SWITCH

with the new
12-position
Brown-Hill
**SUB-MINIATURIZED
SWITCHES**

*Smallest switch of its type
ever produced commercially*

Where space is a factor and you require minimum size with maximum stability — use the new 12-position Brown-Hill sub-miniaturized switches . . . reduce size, weight and cost of your equipment. The "Baby," illustrated above, is only $\frac{3}{4}$ of an inch square — smallest switch of its type ever produced commercially. Built to exacting military specifications, these new Brown-Hill switches have high-grade phenolic for the dielectric . . . bushing mounting . . . low contact resistance . . . inductance . . . and capacitance that remains constant.

**18-POSITION
STANDARD**

**24-POSITION
STANDARD**

All our switches, both miniaturized and standard, are built to the most exacting specifications. Wiper blades on standard size models are made of solid fine silver laminated to phosphor bronze for long lasting springiness and positive contact.

- Only $\frac{3}{4}$ inch square! Smallest 12-position switch of its type ever produced commercially.
- Rotor blades and stator contacts are stamped of solid silver alloy, insuring constant low resistance and high current rating.
- High-grade, military specification phenolic is used as the dielectric throughout . . . for lowest loss and minimum moisture absorption.
- All metal parts, except silver contacts, are fabricated of non-magnetic stainless steel — rotor shaft is available in either $\frac{1}{8}$ " or $\frac{1}{4}$ " diameter.
- Sections may be ganged to fit any engineering specification.

NOW RELIABLE CAPACITORS ...for prompt delivery!

National Capacitor Company offers you a full range of quality-controlled standard* paper or plastic dielectric capacitors. These are reliable, long-life capacitors manufactured under careful supervision — free from chemical impurities which might affect the circuit and/or cause breakdown.

National's Engineering Service also makes available *special* capacitors, produced to your own specifications — under the same rigid quality control as its standard products — *for early delivery dates.*

*includes those to JAN-C-25 specifications.

National's wide selection of construction offers you the optimum in mechanical and electrical design.

Advertisers:

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications — a matter of a few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history — the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Ask them to show you what your potentials can be.

STANDARD OR SPECIAL TYPES

Each type is right for the application

When you specify Kobzy standard products or specially designed parts you are making sure of getting the quality that meets your requirements in every respect.

Kobzy has been serving many of America's leading television and electronic manufacturers for years. Uniformity in each type is assured whether you order a few or many—this also is true when you re-order.

Kobzy is an experienced, modernly equipped organization that has worked closely with engineers and designers in the radio and electronic industries over a long period of years.

The Kobzy catalog will be sent upon request. Keep it handy for reference.

Hughes Fusion-Sealed Germanium Diodes

ACTUAL DIMENSIONS
 DIODE BODY:
 0.265 by 0.130 inches (maximum)
 SHUNT CAPACITANCE:
 0.5 μ f (maximum)
 AMBIENT OPERATING
 TEMPERATURE RANGE:
 -78°C to $+90^{\circ}\text{C}$

Point-Contact Germanium Diodes
 fusion-sealed in a one-piece, gas-tight
 envelope . . . impervious to moisture,
 or other external contaminating agents.
 Flexible dumet leads are especially suit-
 able for spot-welding; or they can be iron-
 soldered as close as $\frac{1}{4}$ inch to the
 body—without special precautions.

The germanium crystal is permanently
 bonded to one lead, the cat whisker is
 welded to the other, and the point of
 the cat whisker is welded to the crystal.
 Hughes diodes are highly resistant to
 shock and vibration. Positive mechan-
 ical stability is achieved without risking
 contamination from fluxes, waxes or
 impregnants. And—each diode is thor-
 oughly tested to ensure the stability of

its electrical and physical characteristics.
 All this means: sturdy, highly reliable
 diodes.

TYPES—The Hughes line of diodes
 comprises standard RETMA, JAN, and
 many special types. Special types are
 produced according to customer speci-
 fications and are tested at high or low
 temperatures . . . for specific recovery
 time . . . for matching in pairs or quads.

Manufacturers of Specialty Rotating Equipment Including Motors, Fans & Blowers

The features of all AIR MARINE motors include Stainless steel thru-bolts, Rigid die-cast aluminum housing and Riveted stator to insure Extra-Rigid Construction assuring positive bearing alignment and uniform air gap. Motors are protected against humidity and fungus growth—can be mounted in any position—are equipped with ball bearings using lubricants for high and low temperatures—meet all AN specifications.

A15ABF-1 115 Volt—400 cycle. Blower delivering 50 CFM at 8500 RPM. Propeller fan delivering approx. 300 CFM at 8500 RPM.

B20B3—115 Volt 400 cycle single phase centrifugal blower. Delivering 140 CFM of air against 2" of water operating at 6500 RPM minimum.

A08C1—2 phase control motor for operation on 60 cycle supply 115 Volt on one phase and 40 Volt on control phase. 3.0 oz/in starting torque on above voltages. 1500 RPM. No load speed.

A15AD3—Axial blower unit for operation on 115 Volt 60 cycle single phase supply at 3300 RPM delivering 35 CFM at 0.2 S.P. This unit has special mounting bracket.

A15HF—115 Volt 60 cycle single phase capacity start & run synchronous motor running at 3600 RPM. This unit has special terminal block mounted on end of motor.

A11A-2—115 Volt 400 cycle single phase axial vane blower delivering 70 CFM at 1" static pressure at 11,000 RPM.

631 x 35 115 Volt, 60 cycle or 220 Volt, 60 cycle, 1 or 3 phase. 3450 RPM continuous duty. 250 CFM at 2 1/2" water gauge. Used in microwave generators; unattended repeater stations. Fits in space 13 1/2" long, 8 3/4" wide, 7 3/4" high.

631 x 1—115 Volt, 60 cycle motor 100 CFM @ 2 1/2" water gauge. Fits in space 9 1/2" long, 8 3/4" wide, 7 3/4" high.

450C-1—115 Volt 400 cycle phase axial—vane type blower delivering 200 CFM at 6 S.P. Weight approx. 5 lb.

Variable frequency blower for operation on 115 Volt single phase. Available with axial fan or centrifugal blower.

A15BF-15—50 to 800 cycles—single winding available with axial fan or centrifugal blower.

A15AB-2—50-60 cycle and 400 cycle operation single winding.

A15CF10—50-60 and 320-1000 cycle operation dual winding.

A15BD—115 Volt 400 cycle single phase double blower delivering 26 CFM total at 0 static. This unit has special mounting brackets.

Showing comparison between our large and small blowers

The motors and blowers on this page are representative of many varied models available. Detailed information specifications and performance data on all the above units available on request.

A11A-1—115 Volt 400 cycle single phase propeller type blower using 4" 4 blade fan.

Constantly developing to meet your exacting needs . . .

Reliability in all kinds of counting operations . . . The Post Decitron eliminates costly production oversights and allows a continuous check of product total.

Available models cover every counting need from slow speed direct counting — to amazing totals of 6000 units per second.

Preset counters permit desired total counts i.e. dozens, fifties, gross lots, etc. Warning systems can be energized by special preset models to slow down or stop machinery, sound buzzers and perform a variety of helpful functions. Lineal footage counters measure production of paper, cloth etc.

You can save production losses with compact, inexpensive, Decitron electronic counters.

Category also adaptable as lineal footage counters. Development stages is a new type of electronic relay which will only pass, but will permit slow range counts up to 2 per second. The total count on direct impulse as the objects pass through the photo head.

D-2-144
Decitron with 12 place
counts gross lots

MODEL P2
Counts in any desired total 1-100

Stupakoff

PRODUCTS

FOR THE WORLD OF ELECTRONICS

Stupakoff

CERAMIC & MFG. CO.

LATROBE, PENNSYLVANIA

GLASS-TO-METAL SEALS

Perfectly closed and durable air-tight assemblies are made with Stupakoff Kovar-Glass Seals. The use of hard glass for these seals insures the highest degree of protection against thermal shock and weathering.

Among the various types of standard Stupakoff Kovar-Glass Seals are: Single Terminal, for all feed-through applications requiring a single electrode with tubular, solid or flattened and punched center lead; High Voltage, for special feed-through application where higher voltage-flashover and surface leakage ratings are required; Stand-off Terminals, specially useful as test and connection points; Strain-Relief Terminals, patented design developed especially for welding and brazing; Multi-Header Terminals, for applications requiring a number of terminals in a limited area.

In addition, Stupakoff designs and makes special seals for use where standard designs are not applicable. All types are readily produced in large or small quantities as required.

Stupakoff Kovar-Glass Seals are fully described in our new catalog, 453, sent free upon request.

STEATITE AND OTHER CERAMICS

Stupakoff is a leading manufacturer of ceramic products for electrical and electronic applications at all voltages, frequencies and temperatures. Parts are made of Alumina, Cordierite, Forsterite, Magnesia, Porcelain, Zircite, Titanates, Stupalith and Steatite—plain, ground, metallized or assembled.

Where thermal shock conditions prevail, parts made of Stupalith will withstand extremely severe service. Stupalith parts range in weight from a fraction of an ounce to several pounds, and are made in simple or intricate shapes, by pressing, extrusion, casting or ramming. Safely used at temperatures up to 2400 F.

Stupakoff Temperature-Sensitive Resistor Ceramics are used for temperature indicating measuring equipment such as Radiosonde, for infrared light source and for heating elements. Supplied complete with terminals, in the form of rods, tubes, discs, bars, rings, etc.

For by-pass, lead-through blocking, standoffs and trimmer applications; also for temperature compensating service, Stupakoff offers Ceramic Dielectric materials having coefficients from P-100 to N-200 and high K materials up to K-6000. Made in the form of tubes, discs, and special shapes, plain or silvered.

Steatite products are fully described in catalog 951; data on other materials will be furnished upon request.

PRINTED CIRCUITS

In one compact, sealed unit a specified wired resistors and capacitors of pre-wired Stupakoff Printed Circuits save space, speed assembly, reduce costs, minimize errors. The resistors and capacitors are printed on circuits designed in accordance with the requirements of individual applications. By using Printed Circuits instead of the individual soldered connections are reduced up to 50%. Assemblies are lighter and more compact, and assembly time is reduced and better products

are produced, compact, accurately produced units in many sizes, a typical one being 1 x 1½ x 1/8 (inches).

The resistors, capacitors and conductors are printed on vitreous high-dielectric ceramic and permanently bonded to the ceramic surface by firing, and protected from abrasion and corrosion by a tough, impervious plastic coating. The components are soldered in place, ready for complete assembly.

Write for bulletin 1151, containing complete specifications of a number of typical standard circuits and detailed information on the design and construction of Stupakoff Printed Circuits.

CERAMIC-METAL ASSEMBLIES

Stupakoff specializes in the application of metal to ceramic parts for a variety of purposes, such as metallized ceramic induction coils for radio receivers and transmitters; metallized ceramic shafts for air-tuning condensers; metallized plates for making fixed rigid assemblies; printed circuits; ceramic trimmer condensers; terminals and terminal boards; strain and lead-in insulators; and many other ceramic-to-metal products.

To combine ceramic and metal parts into one permanent unit, Stupakoff utilizes extensive experience with both materials. Methods of assembly employed by Stupakoff include: metallizing, soldering, pressing, spinning and others. Among the metals assembled to ceramics are silver, copper, brass, stainless steel, monel and Kovar.

Stupakoff high-precision ceramic assemblies offer many opportunities to reduce costs, increase production and improve electrical and electronic equipment. Full details will gladly be sent upon request.

18 YEARS

The ideal alloy for glass sealing, Kovar matches the expansivity of certain hard glasses over the entire working temperature range. It resists mercury attack, has ample mechanical strength and seals readily with simple oxidation procedure. It is available as sheet, strip, foil, rod, tube, wire—or fabricated into cups, eyelets, leads and other shapes. The prominent users of KOVAR and the length of time they have employed this metal are convincing proof of satisfaction.

Kovar is a cobalt, nickel, iron alloy, manufactured under very carefully controlled conditions. It attributes its success to the following characteristics:

1. Seals readily into hard or thermal shock resistant type glass.
2. Has substantially the same expansivity as the glass from -80° C to the annealing point of the glass.
3. Produces a permanent vacuum tight seal.
4. Is readily machined or fabricated to permit the use of small and intricate shapes.
5. Is of controlled composition to permit duplication of results.
6. Resists mercury attack.
7. Is usable in any thickness; no need to feather edge on tubular or intricate shapes.
8. Is relatively inexpensive, eliminating restraints on sizes and capacity.
9. Can be welded, soldered, and brazed to other metals.

Full information on the use of Kovar is given in Stupakoff Bulletin 145, which we will send upon request.

MuMetal • Aluminum • Stainless Steel • Other Alloys

MAGNETIC SHIELDS for CATHODE RAY TUBES

Variety of MuMetal and other magnetic alloys in all standard gauges, hydrogen-annealed to assure maximum shielding efficiency.

TRICOLOR KINESCOPE SHIELDS

Multi-Metal can now deliver one-piece magnetic shields as early as two weeks from receipt of your order.

STANDARD SHIELDS

For popular 2", 3" and 5" tube sizes, Multi-Metal offers speedy delivery of these low cost units complete with light hoods, retainers, cushions and plexiglass windows.

CUSTOM BUILT SHIELDS

... to serve your specific requirements. Our design and engineering staff is always at your service to help work out your problems.

COMPLETE SHEET METAL ASSEMBLIES

ALUMINUM FABRICATION

Complete facilities at Multi-Metal include certified Heliarc welding and Sciaky spotwelding equipment.

CUSTOM BUILT ASSEMBLIES

For communications, airborne and other equipment — including large fabricated units. Send us your prints and specs for prompt quotations.

Multi-Metal's 43 years of experience and "know-how" to work for you. Send us your prints and specs for prompt quotation.

The New AUGAT "GRIP-TITE" Clamp Ring

The Augat clamp ring is a sure grip in multiple ganging of precision potentiometers.

Grip-tite potentiometer clamp rings are made of 302 stainless steel, are corrosion resistant and have withstood rigid 200-hour salt spray tests.

When clamp screw is tightened to lock the ends in position, any added take-up on screw brings all pressure to bear on cup circumference . . . prevents slippage.

SERRATED EDGES on large size clamp rings allow for maximum and minimum tolerances between the two cups . . . provide greater grip to cup walls.

THREADED TRIPLE-FOLD RING HEAD, .075" thick eliminates nut . . . avoids loosening.

| Augat | Fig. | A | B | C | D | E | F | G |
|-------|------|-------|-------|-------|-------|------|------|------|
| 5007 | 1 | 1.288 | 1.236 | 1.338 | 1.550 | .134 | 2x56 | .165 |
| 5004 | 1 | 1.680 | 1.628 | 1.730 | 1.950 | .134 | 2x56 | .165 |
| 5005 | 1 | 2.032 | 1.980 | 2.082 | 2.294 | .134 | 2x56 | .165 |
| 5002 | 2 | 1.928 | 1.876 | 1.978 | 2.203 | .075 | 2x56 | .165 |
| 5009 | 1 | 1.555 | 1.503 | 1.605 | 1.823 | .134 | 2x56 | .165 |

All rings normally supplied without screws. Samples, specifications and prices on request.

CLASSIFICATION CHART FOR SIGMA SENSITIVE RELAYS

| RELAY SERIES | SWITCH TYPE (MAX. CONTACT ARRANGEMENT) | SWITCH RATING* | SENSITIVITY | | MAXIMUM COIL RESISTANCE OR IMPEDANCE | COIL DISSIPATION (40°C rise)§ | SPEED RANGE** | MOUNTINGS, ENCLOSURES, AND DESIGNATIONS | | | PARTICULAR FEATURES | RELAY SERIES |
|--------------|--|--------------------------------|---|--|--|-----------------------------------|--|---|-------------------------|-------------------------|--|--------------|
| | | | Maximum (Standard) | "Aircraft"† | | | | Open Frame | Dust Cover | Hermetic Seal | | |
| 4 | SPDT (1-C) | 2 amp. | .02 watt DC | .05 watt DC | 12,000 ohms | 1.0 watts 85°C | .002-.015 sec. | 4F— | 4A— 4R— | 4RJ— | Medium price, sensitivity, and precision. | 4 |
| 5 | SPDT (1-C) | up to 3 amp. | .001 watt DC .007 watt AC, internal rectifier | .010 watt DC .025 watt AC, internal rectifier | 26,000 ohms (copper wire) | 1.5 watts 100°C-D.C. 70°C-A.C. | .004-.100 sec. Slow-release, with slug, available. | 5F— | 5AH— 5R— | 5RJ— 5JO— | High sensitivity, shock resistance, stability, and vibration resistance. | 5 |
| 41 | SPDT (1-C) | 2 amp. some adjustments 5 amp. | .032 watt DC 0.15VA AC 60 cps. | Not generally recommended | 12,000 ohms 190,000 ohms | 1.0 watts 100°C 2.0 VA 100°C | .002-.015 sec. Operates in 1st half cycle. | 41F— other open mountings available | 41R— 41RO— | 41RJ— 41JO— | High AC sensitivity, long mechanical life; fast—good for pulsing; high load ratings possible; low price. | 41 |
| 6 | 4PDT (4C) | 5 amp. with SPDT DPDT | .07 watt — 4C contacts .008 watt — 1C contacts DC POLARIZED | | 25,000 ohms or 12000/12000 in dual coils | 1.4 watts 100°C | .007-.12 sec. | 6FX— 6FY— 6FZ— | | 6HX— 6HY— 6HZ— | Polarized; biased, latching or 3-position (null-seeking); high gain (load power/operating power ratio); multi-contact. | 6 |
| 7 | SPDT (1-C) | 2 amp. | .002 watt, switching, gen'l. .0002 watt, keying setting DC POLARIZED | | 12,000 ohms (3500/3500 in dual coils) | 1.2 watts 85°C | .001-.007 sec. | | 7AOX— 7AOY— 7AOZ— | 7JOX— 7JOY— 7JOZ— | Polarized; biased, latching, or 3-position (null-seeking). For teletype and keying or pulsing, also switching and control functions. | 7 |
| 22 | DPDT (2-C) | 2 amp. | .04 watt DC — 2C contacts .02 watt DC — 1C contacts | | 12,000 ohms | 1.0 watts 100°C | .004-.020 sec. | | | 22RJ— | Miniature, double-pole; maximum shock resistance and precision. | 22 |

*Nominal, 24VDC or 115VAC resistive; medium-duty life, eg. 100,000 operations.

**Approximate, as governed by normal variations in driving circuit.

†Any duty involving vibration up to 10g at 55 cycles per second while in use.

‡At operate voltage, operated. Unoperated, approx. 1/2 this value. Varies inversely with applied voltage.

§Sum of ambient plus temperature rise not to exceed temperature given for each relay. Thermal time constant varies from 10 to 30 minutes. For higher temperatures, inquire of factory.

SIGMA SENSITIVE RELAYS

BASIC TYPES

...tion from basic designs, with many enclosures mounting styles. May be ...ed with a coil resistance adjustment chosen from ... of standard codes. The ...ification chart calls atten- ... to the most obvious ...s of comparison between ... series.

NEW DESIGNS

... June 1954, the 13 relays ...e right were in various ...s of development. Some ...ese may soon be cata- ...d along with the six ... series tabulated in the ...ification Chart; others ...cannot make the grade. If ...are interested in any of ... characteristics, we'd be ...lato know about it.

- | | |
|-------------------|--|
| DC POLAR RELAYS | <ul style="list-style-type: none"> • Multi-circuit heavy current switch. • DPDT or SPDT three-position non-mechanically centered. • SPDT very high speed telegraph or information repeater. • DPDT or SPDT low cost. • SPDT miniature three-position. |
| DC NEUTRAL RELAYS | <ul style="list-style-type: none"> • Sensitive high current SPST. • Very sensitive and precise miniature. • Low cost DPDT. • SPDT midget low cost. |
| AC RELAYS | <ul style="list-style-type: none"> • 400 cycle (non-rectifier). • Constant voltage temperature compensated high overload rated. • Tuned (resonant) (1200-2800 cps). • Self-synchronous aperiodic motor for pulse counting (0-60 cps). |

SIGMA RELAY MANUAL

The Sigma Relay Manual includes full data on each Sigma relay, type, series and adjustment. Available combinations tabulated with reference to important characteristics and application data. Basic loose leaf binder and approximately 260 pages, \$5.00, including one year's subscription to supplementary pages as issued. Renewal, after first year, one dollar per year. (Separate sheets in response to your inquiry at no charge.) A four page folder summarizing Sigma products is available on request.

Bird

QUALITY CONTROLLED JEWEL BEARINGS

FOR PRECISION INSTRUMENTS

Exact tolerances, uniformity through constant inspection and special mounting techniques insure the finest quality in Bird jewels.

Complete Bird Jewel Assemblies, to your specifications, will keep your production running smoothly, eliminate rejects, save time and money. Make a test in your production — send a print with specifications, and we'll provide samples for testing.

Concentricity is held to 0.0002", maximum tolerance on all ring jewels, with finer tolerances available on special order.

ADD SHOCK PROTECTION WITH

Bird

CUSHION JEWEL ASSEMBLIES

Actual tests show that Bird Cushion Jewel Assemblies perform better and are less subject to damage from vibration, shock or improper adjustments than conventionally mounted jewels.

- Inexpensive shock-proofing
- Variable cushioning for different conditions
- Mountings to specification
- Controlled movement

Let us show you how Bird Cushion Jewels will add shock protection to your instruments. Samples are available for testing in your plant — send specifications.

Over 40 years of serving industry with Quality jewel bearings.

LEEDS

The Home of RADIO

In 30 years we have served large organizations—small organizations—individuals. We have shipped small packages—big packages, to most every country in the world—and we can truthfully say that LEEDS has never had a dissatisfied customer.

That is why we can proudly say that for dependability—for quality—for values—LEEDS heads the list. All our thousands of friends continually get their equipment from LEEDS.

We carry Nationally known brands, such as National — Merit — Ohmite — Lyco — Shure — Raytheon — Superior — Amphenol — Mycalex — Middletown Mfg Co — Drake Mfg Co — I.C.A. — CBS-Hytron — Millen — and many others.

Large stock of Crystals, transformers, resistors, aluminum panels, Polystyrene rods, sheets, tubing, Capacitors, Relays, Switches—wire and other Radio and electronic equipment.

Get our quotations on your requirements. Prompt shipments and satisfaction guaranteed.

ADVERTISERS: How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications—a matter of a few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history—the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Ask them to show you what your potentials can be.

HAMMARLUND

COMMUNICATION RECEIVERS

The New "HQ-140-X"

"HQ-140-X" is a new superheterodyne type receiver that provides ham and other short wave listeners with all the advantages of professional design and circuitry. In addition, it incorporates outstanding features that have made Hammarlund "HQ's" superior quality and performance. This receiver retains the high level sensitivity and selectivity of the "HQ-129-X," and in addition features notably improved frequency stability and image ratio. It covers a continuous range of frequencies from 540 kc to 31 mc, or 50 meters to 9.7 meters, in six bands.

Head tuning is supplied on the four higher frequency bands, and automatic calibration in the 80, 40, 20, 15, and 10 meter amateur bands. Many types of noise and other interference have been substan-

tially reduced by the outstanding noise limiter and the special Hammarlund patented crystal filter.

FEATURES

TUNING RANGES: .54—1.32 mc, 1.32—3.2 mc, 3.2—5.7 mc, 5.7—10 mc, 10—18 mc, and 18—31 mc.

CALIBRATED BAND SPREAD: 3.5—4 mc, 7—7.3 mc, 14—14.4 mc, 20.9—21.6 mc, and 28—30 mc.

TUBE LINE-UP: 6C4 Oscillator, 6BA6 RF Amplifier, 6BE6 Mixer, 6BA6 1st IF Amplifier, 6BA6 2nd IF Amplifier, 6BA6 3rd IF Amplifier, 6AL5 combination detector, AVC and noise limiter, 12AU7 1st AF Amplifier and BFO, 6V6GT/G Audio Power Output, OC3/VR105 Voltage Regulator and 5U4G Full Wave Rectifier.

The "SP-600-JX"

The "SP-600-JX" communications receiver, now also available to hams, is a masterpiece of receiver design and already is world-known for its outstanding construction and performance.

Professional receiver, with its six bands covering the frequency range from 540 kc to 54 mc, is being used in large quantities by military and governmental agencies, as well as by commercial stations for both single and diversity reception.

This magnificent receiver is a 20 tube dual conversion superheterodyne. The power supply is an integral part of the receiver chassis. Operation on any of six crystal controlled fixed frequency channels within the range of the receiver is immediately available. This designates it as the perfect receiver for point-to-point and network operations. Pre-arranged day and night fixed frequencies. With crystal control you can select your desired channels immediately.

Stability is .001 to .01 percent depending on frequency to which receiver is tuned, image rejection is 80 db to 120 db down, and spurious responses are at least 100 db down. Sensitivity is 1 microvolt CW and 2 microvolts AM while selectivity for the three calibrated crystal and three non-crystal ranges is from 200 cycles to 13 kc. Radiation is negligible with no cross-talk in multi-receiver installations.

"FC" and "FNC" COUPLINGS

FEATURES—The "FC-46-S" is an insulated flexible coupling designed to provide for mechanical ganging of shafts even though angularly misaligned. The smallest dimensions have been incorporated consistent with the rugged construction necessary for general service. A high degree of electrical isolation is achieved through the use of silicone treated steatite insulation. Flashover voltage is approximately 5000 V. R.M.S. Brass hubs and spring temper phosphor bronze flexible arms are nickel plated. An exclusive and important feature of this coupling is its characteristic of uniform contact through 360° of rotation. This eliminates tendency to vibrate at high speeds and minimizes bearing wear and assures accurate tracking.

The "FNC-46-S" is a non-insulated coupling for use where electrical continuity between shafts is required. The flexible arms are held securely to a nickel plated shaft instead of an insulator.

STANDARD STOCK TYPES

| CODE FC-46-S | Insulated flexible coupling |
| CODE FNC-46-S | Non-insulated flexible coupling |

"NZ-10" CAPACITORS

FEATURES—The "NZ-10" is a compact transmitter neutralizing capacitor designed for easy and accurate adjustment. The rotor is attached to a fine-

thread lead screw which may be adjusted with smooth and precise action by a screwdriver and locked securely by a readily accessible clamping screw. A stop prevents shorting of plates at maximum capacity. Long leakage paths to ground from both rotor and stator are provided. Glazed steatite insulators and smoothly rounded aluminum plates minimize flashover.

SPECIFICATIONS—Capacity is adjustable from 2.3 to 10 mmt. Peak voltage rating is 3000 V. at maximum capacity (minimum gap) position.

HAMMARLUND MANUFACTURING CO., INC.
WEST 34TH STREET, NEW YORK 1, N. Y.

HAMMARLUND

"BFC" CAPACITORS

FEATURES—The "BFC" "butterfly" type capacitor has very low minimum capacity, low inductance and isolated rotor for use in VHF applications as a series capacitor with no rotor contact. Mechanical and electrical symmetry and stator terminal locations minimize circuit inductance.

CONSTRUCTION—Brass rotors and stators are soldered and nickel-plated. The contact wiper is heavily silver-plated beryllium-copper. Tapped studs on the silicone

treated steatite front panel permit mounting the capacitor without grounding the rotor. The sleeve bearing is nickel-plated brass.

SPECIFICATIONS—Straight line capacity. 90° rotation from minimum to maximum capacity position. Air gap is 0.030" nominal. Tested at 1200 V. R.M.S., 60 cycles between rotor and each stator. *High Speed Ball-Bearing Models Also Are Available.*

| CODE | [CAPACITY/SECTION | | SERIES CAPACITY | | PLATES | |

| BFC-38 | 40.1 | 6.2 | 20.6 | 3.6 | 10 | 9 |

"MAC" CAPACITORS

FEATURES—The "MAC" provides the low minimum capacity essential for use as a trimmer in the VHF range. It was engineered to achieve the smallest dimensions practical to meet the requirements of a miniaturized component.

CONSTRUCTION—Its silicone treated steatite base is only 3/4" x 5/8". Rotor and stator are

soldered assemblies and are of brass, nickel-plated. Rotor and stator terminals are positioned to permit short leads. The threaded bearing is provided with flat sides to permit single hole mounting.

SPECIFICATIONS—Straight line capacity. Screw-driver adjustment. Air gap is 0.017" nominal. Tested at 750 V. R.M.S., 60 cycles.

| CODE | CAPACITY | | PLATES | CODE | CAPACITY | | PLATES |

| MAC-10 | 8.7 | 1.7 | 9 | MAC-20 | 19.6 | 2.7 | 21 |

"APC" CAPACITORS

FEATURES—The "APC" trimmer capacitor originated by Hammarlund over twenty years ago is still widely recognized as the standard capacitor of its type. Its use is indicated in all classes of equipment where a compact, high quality air dielectric trimmer is required. It was designed to resist effects of temperature, moisture and vibration. Silicone treated steatite insulation is used to insure high leakage resistance.

bronze wiper assures positive rotor contact. All metal parts are nickel-plated. Terminals are tin dipped. Tapped brass mounting studs fastened to silicone treated steatite base permit mounting capacitor without grounding the rotor.

SPECIFICATIONS—Straight line capacity characteristic. Hexagonal collar on slotted shaft permits rotor adjustments. Air Gap is 0.015" nominal. Tested at 600 V. R.M.S., 60 cycles.

CONSTRUCTION—Brass rotor and stator are soldered to brass supports. Nickel-plated phosphor

| APC-140 | 140. | 6.7 | 37 |

"MAPC" CAPACITORS

FEATURES—The "MAPC" capacitor is representative of Hammarlund's efforts to meet the demand for smaller dependable components. It is a scaled-down version of the popular "APC" with everything reduced except the quality and performance characteristics. For example, an "MAPC" is about half the size and weight of an "APC." Lower minimum capacities and low inductance make the "MAPC" suitable for VHF use.

CONSTRUCTION—The standard "APC" construction is used in this capacitor. Rotors and stators are fabricated by soldering brass plates to supporting members and nickel-plating the assemblies. Nickel-plated phosphor bronze wiper assures positive rotor contact. Tapped brass mounting studs fastened to silicone treated steatite base permit mounting capacitor without grounding rotor.

| CODE | CAPACITY | | PLATES |
|----------|----------|------|--------|
| | Max. | Min. | |

| MAPC-50 | 50. | 3.2 | 19 |
| MAPC-75 | 75. | 3.9 | 29 |
| MAPC-100 | 100. | 4.5 | 38 |

SPECIFICATIONS—Straight line capacity. Screw-driver or socket wrench adjustment. Air gap is 0.0135" nominal. Tested at 600 V. R.M.S., 60 cycles.

SINGLE SECTION CAPACITOR—The "HFA" is a single section tuning capacitor similar to "HF" except that larger plates permit wider air-gaps for the same capacitance values. Resultant higher break-down ratings extend the use of the capacitor into the high frequency low-power transmitter field. A threaded sleeve bearing permits single hole mounting and the bracket supplied may be used for base mounting. A lug type terminal soldered to the bearing provides an efficient rotor connection.

DOUBLE SECTION CAPACITOR—The "HFBD" is a dual, balanced rotor

"HFA" and "HFBD" CAPACITORS

transmitting capacitor employing front and rear panels plus a ball-thrust rear bearing, but otherwise incorporating constructional features identical to the smaller "HFA." An insulated shaft extension safeguards operating personnel from the high voltages which may be applied to the rotor. The small size, rugged construction, balanced rotor and range of capacitance values and breakdown voltages make this capacitor ideally suited to many applications.

| CODE | CAPACITY | | SPACING | PLATES SECTION |
|------------|----------|------|---------|----------------|
| | Max. | Min. | | |
| HFA-100-A | 102. | 4.5 | 0.090 | 19 |

| HFBD-65-E* | 63. | 12.5 | 0.070 | 19 |

SPECIFICATIONS—Straight line capacity. Air gaps and test voltages are as indicated in table. However, "HFBD" breakdown voltages are doubled and capacitance values approximately halved when stator sections are connected in series.

60 Cycle Test Voltage:
 "HFA"—"A" 800 V. R.M.S. "B" 1200 V. R.M.S.
 "E" 1750 V. R.M.S. "HFBD"—"C" 1500 V. R.M.S.
 "E" 3000 V. R.M.S., plates have rounded edges.
 †Has front and rear supporting panels.

"RMC" CAPACITORS

FEATURES—The "RMC" was designed specifically for applications requiring an "MC" type tuning capacitor with very rigid construction. Its

| CODE | CAPACITY | | PLATES |
|-----------|----------|------|--------|
| | Max. | Min. | |
| RMC-50-S | 50. | 7.3 | 7 |
| RMC-100-S | 105. | 9.5 | 14 |
| RMC-140-S | 143.5 | 11.0 | 19 |
| RMC-325-S | 327. | 17.5 | 43 |

sturdy frame consists of heavy gauge aluminum end panels held together by three aluminum tie rods. It has a brass sleeve front bearing and a single ball thrust rear bearing for smooth tuning and a high degree of resetability. The rotor contact is a forked silver-plated beryllium-copper spring wiping against a wide disc on the rotor.

SPECIFICATIONS—Straight line capacity. Air gap is 0.0245" nominal.

"VU" CAPACITORS

A uniquely designed UHF tuning capacitor using completely new concepts. With it, conventional "lumped constant" circuits, tuned cavity techniques, can be efficiently used up to 500 rotor sections are in series to eliminate rotor wiper and the rotor. Thus, noise generated by rubbing metal-to-metal contact. Circuit connections are made to threaded studs on each side permits vacuum tube and inductor to be mounted adjacent to opposite sides of the capacitor to minimize circuit inductance.

| CODE | SERIES CAPACITY | | PLATES/SECTION |
|-------|-----------------|------|----------------|
| | Eff. | Min. | |
| VU-20 | 22.5 | 3.35 | 11 |
| VU-30 | 31.5 | 3.5 | 15 |
| VU-45 | 45.0 | 3.8 | 21 |

SPECIFICATIONS—The capacity characteristic approaches a straight line frequency curve. Air gap is .0168" nominal. Tested at 700 V. R.M.S., 60 cycles, between rotor and each stator.

"MC" and "MCD" CAPACITORS

FEATURES—The "MC" is a versatile single section tuning capacitor designed to give a choice of mountings, connections and capacity characteristics. "MC-S" capacitors have a straight line capacity characteristic. "MC-M" units have offset plates resulting in a "Midline" characteristic which more equally spaces frequencies. "MC-X" units are wide-spaced for high voltages. The

"MCD" is a split-stator panel-mounted capacitor.

SPECIFICATIONS—Straight line or "midline" capacity characteristic. Single-spaced types have 0.0245" nominal air gap and are tested at 1000 V. R.M.S., 60 cycles. Wide-spaced ("X") types have 0.0715" nominal air gap and are tested at 1750 V. R.M.S., 60 cycles.

"HF" and "HFD" CAPACITORS

SECTION CAPACITOR—The "HF" is a single section tuning capacitor employ-

DOUBLE SECTION CAPACITOR—The "HFD" dual capacitor, like the "HF" singles, incorporate advanced features providing for maximum efficiency at high frequency. Aluminum front and rear end panels are mounted on a heavy silicone treated steatite base. Wide front and rear bearings with individual silver-plated beryllium-copper wipers for each

section assure long life and maximum contact efficiency. Single hole panel mount or base mounting.

SPECIFICATIONS—Straight line capacity. Single spaced types (HF and HFD) have 0.015" air gap and are tested at 600 V. R.M.S., 60 cycles. Wide spaced types (HF-X and HFD-X) have 0.045" air gap and are tested at 1400 V. R.M.S., 60 cycles.

"HF" rotor and stator design. Extra long bearing and positive contact nickel-phosphor-bronze wiper make this unit suited to high frequency applications. Silicone treated steatite insulation. Single hole base mounting.

when **ADVANCE**

supplies your relays...

you get **ACTION**

Action on Standard Items. Choose from a wide variety of in-stock relays, available for immediate shipment from Burbank or Chicago. Light-weight, small and precision-built, ADVANCE relays stand up under rugged service. They're specified by major manufacturers the country over.

Action on "Specials." When you need a specially designed relay, ADVANCE will work closely with your engineers to determine accurately what's needed...develop it in minimum time. You'll find us ready to cooperate with you on any relay problem.

Action on Producing Relays. There's manpower here to build your relays right...on time...and at the lowest prices consistent with top quality. It's our aim to help keep your production rolling...your products operating dependably. Whatever your relay problems—call ADVANCE for action.

INTO *Your Product*

HAYDON* TIMING MOTORS

1600

BASIC, STANDARD DUTY
The 1600 Series is the basic motor of the HAYDON line. This motor offers dependable performance, small size, total enclosure, operation in any position, controlled lubrication, simple assembly and a wide range of standard speeds from 60 to 1/60 rpm. Can be supplied to military specifications.

LIGHT DUTY, SLOW SPEED
The 4400 Series offers very slow output shaft speeds from 6 hours to 1 week for all normal duties. This motor is unique in providing the speed range available in such small space, with totally enclosed gearing, at comparatively low cost. Affords many possibilities for economical design without resort to the bulk and expense of external reduction gearing.

4400

3100

HEAVY DUTY, SLOW SPEED
The 3100 Series motor consists of the basic HAYDON motor and a heavy-duty gear train in a round housing. Designed for applications requiring higher torque at slow shaft speeds, this unit is particularly suitable for chart drive use in recording and control instruments. Standard speeds from 1 hour to 14 days per revolution.

D-C, REVERSIBLE

The HAYDON 9200 Series D.C. motor for timing applications is designed for operation from 6 to 30 volts. It can be supplied uncalibrated for use with external resistance or calibrated with resistance type leads.

D-C, R F FILTER

The 9250F Series D.C. motor provides the more uniform torque and speed characteristics of a unit wound for 28 volts, and has an R F Interference filter. The current and power drain is lower and no calibration is required.

9200
9250F

6700

400 CYCLE HYSTERESIS-TYPE
The 6700 Series 400 cycle timing motor is an hysteresis type synchronous timing motor, essentially two phase. It is furnished with capacitor for self starting operation on single phase. Variations in temperature, voltage and heat do not affect timing, which is as accurate as the frequency control.

ALL HAYDON TIMING MOTORS

are totally enclosed and can be operated in any position. Write for free "Haydon Electric Timing Motors" catalog.

HAYDON CLOCK MOVEMENTS

1800

ROUND MOVEMENT
Compact round movement only 3" in diameter for use where space is at a premium, as in certain novelty, household and advertising clocks.

RECTANGULAR MOVEMENT
Features completely enclosed construction and easy installation. Back or bottom set, earlug or center mounting, choice of various arbor groups and sizes.

1802

WRITE FOR FREE "HAYDON ELECTRIC CLOCK MOVEMENTS" CATALOG

our product's performance depends on the performance of all its component parts.

When product specifications call for **TIMING MOTORS — TIMING DEVICES —** or **CLOCK MOVEMENTS** add in extra dependability by specifying **HAYDON** precision timing instruments.

HAYDON standard and custom-designed units are properly engineered and buyer-approved for accuracy and dependability . . . long-life coupled with minimum maintenance . . . adaptability to any operating position . . . correct design vital to reducing installation costs . . . plus, meticulous mass-production methods, when volume is required, bring even greater savings.

Haydon Manufacturing Company specializes in the design and mass production of custom-engineered timers for volume applications. HAYDON Timers for clothes driers, milk pasteurizers, dishwashers, and defrosters illustrate a few examples of HAYDON engineered and mass-produced units.

HAYDON* TIMING DEVICES

400 CYCLE ELAPSED TIME INDICATOR

The 7008 Series Elapsed Time Indicator is designed specifically for 400 cycle operation in airborne equipment. Barrel diameter is 1.525", length 2.45/64", weight 6 oz. Power consumption is less than 3 watts and it indicates in units of tens of hours up to 10,000 and repeats.

60 CYCLE ELAPSED TIME INDICATORS

The 5700 Series Elapsed Time Indicators provide simple, compact and accurate metering of elapsed time for 60 cycle operation. They are designed for use as inexpensive components for equipment requiring register of total operating or job time, or with existing machinery and devices.

5700

HERMETICALLY-SEALED TIME DELAY RELAYS

The 5103 Series Time Delay Relay is an hermetically sealed timer for military applications. It can be supplied for 60 or 400 cycle A.C., or D.C. The use of a relay coil for switching operation imposes a minimum load on the motor which is assigned to its true function as a time standard.

RESETTABLE TIME DELAY RELAYS

The 5900 Series Time Delay Relays provide time delay or interval timing in various ranges up to 10 minutes for such applications as the protection of power tubes, or timing portions of a complete cycle of operation.

5900

FIXED INTERVAL REPEAT CYCLE TIMERS

The 5800 Series Timers offer extreme flexibility and adaptability for timing problems requiring continuous repeat cycling, or single cycle operation to be initiated by an external circuit. These HAYDON timers are built up by various combinations of motors with adjustable, blank or specially designed cams operating a series of precision snap switches.

HEAVY-DUTY INTERVAL TIMER

The 8006 Series is a rugged, heavy-duty interval timer for general commercial, industrial and appliance applications. Construction is the simplest possible, for low cost and long life, consisting basically of a standard HAYDON synchronous motor driving through external reduction gearing a notched cam to operate a heavy switch, with a friction to permit setting.

8006

ABC

ERIE

dependable electronic components

HIGH VOLTAGE CERAMICONS

ers a wide selection of disc and molded ceramicons for high voltage service. Available ratings between 1000 V. and 30 KV. for potential tuning, by-passing and filtering applications.

ERIE "K-LOK" HIGH STABILITY DISC CERAMICONS

up to .0047 mfd at 500 V. are available in tolerances as close as $\pm 5\%$. Capacity variations with temperature, age and voltage are normally small. A truly premium capacitor.

ERIE BUTTON MICA CAPACITORS

from 15 mmf to 8100 mmf are available in tolerances as close as $\pm 2\%$. Rated at 500 W "Q" value exceeds 1000 for values up to 100 mmf. Available for maximum operating temperatures of 85°C. and 125°C. Extremely low inductance makes these very compact capacitors ideal for VHF and UHF applications.

ERIE BY-PASS AND COMPENSATING CERAMICONS

To meet exacting temperature compensation, by-passing, coupling and filtering requirements. Compensating units available from .75 to 1380 mmf. "Hi-K" by-pass units available from 100 mmf to .01 mfd.

ERIE STAND-OFF AND FEED-THRU CERAMICONS

Erie offers a wide selection of chassis-mounting capacitors designed to overcome radiation and critical by-passing problems. Available in both temperature compensating and "Hi-K" materials. Manufactured in values up to 1500 mmf with 500 V. rating.

Ceramicon, Hi-K, K-LOK, GP, Button, and Plexicon are registered trade names of Erie Resistor Corporation

ERIE

dependable electronic components

ERIE TRIMMER CAPACITORS

The largest and most versatile family of plastic and temperature compensating ceramic trimmer capacitors are available from Erie, to meet difficult tuner and converter requirements.

ERIE RESISTANCE PRODUCTS

Erie has 25 years experience in the design and manufacture of high quality resistor products. Among these products are precision pyrolytic resistors, high voltage resistors and ignition noise suppressors. Complete facilities available to produce a wide variety for specific applications.

ERIE EMBOSSED CIRCUITRY

The exclusive Erie printed wiring technique provides a circuit pattern actually embedded in the surface of a high grade laminated phenolic. Will withstand severe soldering temperatures without peeling. Drastically reduces assembly costs.

ERIE PRINTED CIRCUITS

By combining several resistors and capacitors into one rigid compact package Erie is able to offer many design and production advantages. A wide selection of diode filters, plate couplers and special circuits are available.

ERIE CUSTOM MOLDED PLASTICS

A pioneer in injection molded plastics, Erie specializes in custom molded name plates, dials, TV masks and other precision items that not only require close tolerances but also have the eye-catching sales appeal of three dimension beauty.

Ceramicon, Hi-K, K-LOK, GP, Button, and Plexicon are registered trade names of Erie Resistor Corporation.

for

SPECIALIZED ROTATING ELECTRICAL EQUIPMENT ALTERNATORS • BLOWERS • MOTORS

INDUCTION MOTORS

60 and 400 cycles
Single, two and three phase operation. 1/1500 to 1/3 H.P. 1" to 6-5/8" in diameter.

Variable and Dual Frequency Induction Motors
Motors for use on aircraft variable frequency supplies to drive fans, blowers, pumps, etc. Other EAD motors for use on dual and special frequency supplies.

SYNCHRONOUS MOTORS

Cyclo-synchronous and Salient Pole Types
60 and 400 cycles. • 1/1500 to 1/3 H.P. 1" to 6-5/8" in diameter. Constant speed, permanent magnet and A.C. excited units also available.

GEAR MOTORS

Precision units giving high torque with wide variety of gear ratios. Powered by 60 cycle, 400 cycle or variable frequency motors.

SERVO MOTORS

Small, precision motors designed for Servo use and for other special purposes where low inertia and high torque ratings are desirable.

ALTERNATORS

Power: 10 to 400 volt-amps. Wide frequency range.

2. Low Harmonic Content:
units capable of delivering a sine wave with less than 2% total distortion for instruments and test equipment.

3. Dual Frequency:
units capable of producing a combination of frequencies and voltages for special applications.

BLOWERS and FANS

A complete line of lightweight, compact fans and blowers for cooling electronic equipment or for general purpose use. Capacities range up to 1000 CFM with special designs available for high static pressures. Single and double ended — 60 cycle, 400 cycle and variable frequency.

D.C. TACHOMETER GENERATORS

These D.C. voltage generators provide a voltage signal proportional to speed, with high linearity for tachometer and control applications.

No. 306R Slide

Two-section slide with rollers for moving unit. Ball bearing action. Full travel possible. Load capacity: 50 lbs. per pair mounted vertically.

No. 308 Slide

Two-section underneath mounting slide. Ball bearing action. Glide brackets permit full travel, easy chassis removal. Load: 30 lbs. per pr.

No. 313R Slide

Same as No. 306, but with solid center track of steel or aluminum. Load capacity: 75 lbs. per pair mounted vertically; 45 lbs. mounted horizontally.

No. 330 Slide

Very inexpensive roller type slide for quantity installation. Has some slide play. Travel 4" less than slide length. Load capacity: 50 lbs. per pair.

No. 575R Slide

Same features as No. 306, but heavier sections for greater loads. Load capacity: 100 lbs. per pair mounted vertically; 60 lbs. mounted horizontally.

STEVENS TYPE M THERMOSTATS

Stevens makes the largest line of bimetal thermostats in the industry. So if you call in Stevens application engineers while your product is still in the planning stage, they'll show your designers how to capitalize on the cost and delivery advantages of using a regular production-line Stevens thermostat to satisfy your special performance requirements.

For example, Stevens Type M* bimetal disc thermostats shown are regular production used in such diverse products as appliances, fans, electronic and avionic devices, thermal timers, and instruments.

Engineered for compactness and lightness, they give quick make and break . . . close temperature control . . . reduce contact arcing . . . assure positive On and Off.

So for better performance . . . longer life . . . lower manufacturing costs—check with Stevens first. A call or letter will bring our representative on the double.

How should attenuation
be measured?
Why is interchangeability
so important?

HOW YOU CAN EVALUATE Shielded Enclosures

Selecting the proper shielded enclosures today is a big job . . . and no wonder! The unqualified statements and ambiguous terminology of some enclosure manufacturers makes intelligent purchasing extremely difficult.

To eliminate these difficulties, ACE has prepared a definitive booklet: *Evaluating Shielded Enclosures*, by Richard B. Schulz, noted authority on the suppression of r-f interference, and consultant to ACE. Here are free, factual data you should be acquainted with . . . for only by applying a realistic approach to shielded enclosure selection can you be sure of getting what you pay for.

Send for this interesting
Free Booklet

you always get your money's worth with ACE

ACE long ago eliminated guesswork as a factor in the design of shielded enclosures. Every ACE claim is backed by complete guaranteed test data, for every design is thoroughly analyzed and approved by independent engineering laboratories. Whether

you need a galvanized screen room, a copper screen room, or a solid sheet RFI enclosure (Lindsay Structure), you can depend on top performance when you choose ACE . . . *first and still foremost in the design and manufacture of every type of shielded enclosure.*

Don't be misled! There is only one ACE. You get ACE quality only when you deal with ACE Recognized Representatives.

Laboratory Standards

Throughout the world, Measurements' reputation for accuracy and reliability is your guarantee of satisfactory service.

STANDARD SIGNAL GENERATOR MODEL 65-B

| FREQUENCY RANGE | OUTPUT RANGE | MODULATION |
|-----------------|----------------------------|---|
| 75 Kc.—30 Mc. | 0.1 microvolt to 2.2 volts | AM, 0 to 100% 400 cycles or 1000 cycles External mod., 50-10,000 cycles |

STANDARD SIGNAL GENERATOR MODEL 78

| FREQUENCY RANGE | OUTPUT RANGE | MODULATION |
|--|-------------------------|---|
| 25 Mc.; 195-225 Mc. 25 Mc.; 90-125 Mc. Other ranges on order | 1 to 100,000 microvolts | AM, 8200-400 cycles 625-400 cycles Fixed at approximately 30% |

STANDARD SIGNAL GENERATOR MODEL 78-FM

| FREQUENCY RANGE | OUTPUT RANGE | MODULATION |
|-----------------|-------------------------|--|
| 86 Mc.—108 Mc. | 1 to 100,000 microvolts | Deviation 0-300 Kc. 2 ranges FM, 400 and 8200 cycles External mod. to 15 Kc. |

STANDARD SIGNAL GENERATOR MODEL 80

| FREQUENCY RANGE | OUTPUT RANGE | MODULATION |
|-----------------|---------------------------|--|
| 2 Mc.—400 Mc. | 0.1 to 100,000 microvolts | AM, 0 to 30% 400 cycles or 1000 cycles External mod., 50-10,000 cycles |

STANDARD SIGNAL GENERATOR MODEL 82

| FREQUENCY RANGE | OUTPUT RANGE | MODULATION |
|--|---------------------------------------|---|
| 20 cycles to 200 Kc. 80 Kc. to 50 Mc. | 0-50 volts 0.1 microvolt to 1 volt | Continuously variable 0-50% from 20 cycles to 20 Kc. |

STANDARD SIGNAL GENERATOR MODEL 84

| FREQUENCY RANGE | OUTPUT RANGE | MODULATION |
|------------------|---------------------------|---|
| 300 Mc.—1000 Mc. | 0.1 to 100,000 microvolts | AM, 0 to 30%, 400, 1000, or 2500 cycles. Internal pulse modulator. External mod., 50-30,000 cycles. |

STANDARD SIGNAL GENERATOR MODEL 84-TV

| FREQUENCY RANGE | OUTPUT RANGE | MODULATION |
|---------------------|--|--|
| 300 Mc. to 1000 Mc. | Continuously variable from 0.1 microvolt to 1.0 volt | Continuously variable 0 to 30% External modulation 20 to 20,000 cycles. |

STANDARD SIGNAL GENERATOR MODEL 90

| FREQUENCY RANGE | OUTPUT RANGE | MODULATION |
|-----------------|---------------------------|---|
| 20 Mc.—250 Mc. | 0.3 microvolt to 0.1 volt | Continuously variable, 0 to 100% Sinusoidal modulation 30 cycles 5 mc. Composite TV modulation. |

PULSE GENERATOR MODEL 79-B

| FREQUENCY RANGE | PULSE WIDTH | OUTPUT |
|----------------------|---|--|
| 10 to 100,000 cycles | Continuously variable from 0.5 to 40 microseconds | Approx. 150 v. positive with respect to ground. "Sync Output" 35 v. positive with respect to ground. |

SQUARE WAVE GENERATOR MODEL 71

| FREQUENCY RANGE | WAVE SHAPE | OUTPUT |
|---|--|---|
| Continuously variable to 100,000 cycles | Rise time less than 0.2 microseconds with negligible overshoot | Step attenuator: 75, 50, 25, 15, 10, 5 peak volts fixed and 0 to 2.5 volts continuously variable. |

VACUUM TUBE VOLTMETERS

MODEL 62

| VOLTAGE RANGE | FREQUENCY RANGE | INPUT IMPEDANCE |
|---|---------------------------|-----------------------|
| 0-1, 0-3, 0-30 and 0-100 volts AC or DC | 30 cycles to over 150 Mc. | Approximately 7 mmfd. |

MODEL 67

| VOLTAGE RANGE | FREQUENCY RANGE | INPUT IMPEDANCE |
|--------------------------------|--|------------------------------|
| 0005 to 300 volts peak-to-peak | 5 to 100,000 sine-wave cycles per second | 1 megohm shunted by 30 mmfd. |

CRYSTAL CALIBRATOR MODEL 111

STANDARD SIGNAL GENERATOR MODEL 80

MEGACYCLE METER MODEL 59

U.H.F. FIELD STRENGTH METER MODEL 58

| FREQUENCY RANGE | INPUT VOLTAGE RANGE |
|-------------------|--|
| 15 Mc. to 150 Mc. | 1 to 100,000 microvolts in antenna. 1 to 100 microvolts on semi-logarithmic output meter, balanced resistance attenuator with ratios of 10, 100 and 1000 ahead of all tubes. |

INTERMODULATION METER MODEL 31

| INTERMODULATION RANGE | FREQUENCIES (CYCLES) | ANALYZER INPUT VOLTAGES |
|----------------------------|----------------------------|--|
| 3%, 10% and 30% Full scale | LF: 60 cps HF: 3000 cps | Full scale ranges of 3, 10, 30 volts RMS |

MEGACYCLE METERS MODELS 59LF-59-59UHF

| FREQUENCY RANGE | FREQUENCY ACCURACY | MODULATION |
|--|--------------------|--|
| 0.1 Mc. to 4.5 Mc. 2.2 Mc. to 400 Mc. 430 Mc. to 940 Mc. | Within $\pm 2\%$ | CW or 120 cycles fixed at approximately 30%. Provision for external modulation |

CRYSTAL CALIBRATORS

MODEL 111

| FREQUENCY RANGE | FREQUENCY ACCURACY | HARMONIC RANGE |
|------------------|--------------------|--|
| 250 Kc.—1000 Mc. | 0.002% | .25 Mc. Oscillator: .25-450 Mc. 1 Mc. Oscillator: 1-600 Mc. 10 Mc. Oscillator: 10-1000 Mc. |

MODEL 111-B

| FREQUENCY RANGE | FREQUENCY ACCURACY | HARMONIC RANGE |
|------------------|--------------------|--|
| 100 Kc.—1000 Mc. | 0.002% | .1 Mc. Oscillator: .1 — 450 Mc. 1 Mc. Oscillator: 1 — 600 Mc. 10 Mc. Oscillator: 10 — 1000 Mc. |

flat bed,
versatile
2-axis recorder...*

AUTOGRAF
trademark
MODEL 2

Curves are available for observation and labeling while they are being drawn.

The versatility and labor-saving convenience of the original portable Autograf have now been built into an instrument which handles standard 11" x 16½" graph papers. Model 2 has the same scales and ranges as Model 1 (0-5 millivolts to 0-100 volts each axis); same speed (full scale X and Y in one second); same input impedance (200,000 ohms per volt). In addition, depressed zero available each axis, larger recording area (twice as big), flat bed, easy-reading design.

**THE AUTOGRAF
MODEL 1**

general purpose 8½" x 11" X-Y recorder — is doing duty in hundreds of laboratory applications: chemical, electrical, electronic, wind tunnel, computer... And on production lines: measuring motors, filters, tubes, transistors, airfoils, amplifiers, rectifiers, magnetic circuits and materials, nuclear devices, etc. . . .

**AUTOGRAF
CURVE FOLLOWER**
plots or reads out Y vs. X. Either Model 1 or Model 2 can be furnished as a recorder/curve follower.

**AUTOGRAF
POINT PLOTTER**
Models 1 and 2 may be fitted for point plotting from keyboard or other digital sources.

A new high accuracy, easy-to-read, multi-range servo-voltmeter with fast response. Scales 0-3 millivolts to 0-300 volts. Zero left or zero center. Designed for indication, control, or analog to digital conversion.

**BOTH AUTOGRAF
MODELS ARE OUTSTANDING
FOR THEIR VERSATILITY**

the stiffer the "specs" the better we like it

Virtually every project in the electronics manufacturing field involves operations within the scope of the D. E. Makepeace Company. As specialists, Makepeace is able to supply electronic assemblies for components which meet the most exacting specifications.

WAVEGUIDE TUBING AND MICROWAVE ASSEMBLIES

Long experience in the manufacture of precision drawn waveguide tubing, enables Makepeace to meet tolerances much tighter than specified in MIL-T-85-B. This precision is maintained in the production of components such as rotary joints, crystal mixers, antenna feeds, and many specialized assemblies to meet various requirements.

We shall be glad to confer with you on the design and manufacture of prototypes and production runs. Our exceptional testing facilities are at your disposal.

COLLECTOR RINGS AND BRUSHES

Because Makepeace pioneered in the production of solid and laminated precious metal slip rings, a range of sizes and special alloys is available to meet almost any requirement for space, weight, electrical noise, torque, or power handling capability.

In addition to the rings and brushes themselves, Makepeace has utilized its experience in this field in the design and manufacture of complete self contained ring and brush assemblies. The design of such a unit often poses unusual problems. The Makepeace engineering group having met many of these problems, can plan and manufacture a unit to meet your specifications. Before such an assembly is shipped, it is checked out and completely tested for electrical noise, voltage breakdown, impedance matching, power handling capability, and other test specifications as required.

Attleboro, Mass.

Sales Offices: New York • Chicago • Los Angeles • Columbus

TYPE 2003
Same as Type 2007 (at right) except Tube 12AT7 and 5 pig-tail components are external.

TYPE 2007, BASIC UNIT
Contains shock-mounted fork, double triode and all circuitry. Output, 400 or 500 cycles. Accuracy ± 1 part in 50,000. Octal base container, $1\frac{1}{2} \times 4\frac{1}{2}$ ". Weight, 10 oz. Power required, 75 to 200 V.-D.C. at 1 to 5 m.a. and 6.3 V. at 300 m.a. Designed for MIL equipment.

TYPE 2001-2, BASIC UNIT
Frequencies, 200 to 3000 cycles. Dividers and multipliers available for lower and higher frequencies. Output, 6 V.—JAN construction.

TYPE 2005, UTILITY
Provides 10 Watts at 110 V. Precision frequencies from 50 to 500 cycles. Input power, 50 to 500 cycles, 45 Watts.

TYPE 2121-A, LAB. STANDARD
Outputs, 60 cycles, 0-110 Volts, 10 watts; 120-240 cy. impulses. Input, 50-400 cycles, 45 Watts.

TYPE 2111A, POWER UNIT
50 Watt output. 0-110-220 V. at 60 cycles or any frequency 50 to 1000 cycles.

Precision FREQUENCIES

**GUARANTEED ACCURACY
1 PART IN 100,000 (.001%)
except where otherwise noted**

- WIDELY USED
IN SUCH FIELDS AS**
- Aviation, Navigation
 - Ordnance, Ballistics
 - High Speed Photography
 - Viscosity Measurement
 - Fluid Flow
 - Nuclear Physics, Telemetering
 - Chemical Reaction
 - Radiation Counting
 - Computers
 - Facsimile
 - Fire Control
 - School and Indl. Research Labs.
 - Accurate Speed Control

The basis of these frequency standards is an electronically actuated high-precision fork, temperature-compensated and hermetically sealed against barometric changes. The partial list of uses at the right not only suggests the broad range of applications but also proven dependability where there can be no compromise with accuracy. Please request details by Type No. Our engineers are available for advice or cooperation on related problems.

Advertisers:

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE should also be advertising in NUCLEONICS.

Particularly in instrumentation laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

At present, there is very little cross-over in the subscriber lists of the publications — a matter of a few percentage points.

It is quite possible that you are not making an effective presentation of your products and abilities in this excellent issue, but are missing an excellent presentation before one of the fastest growing fields in the country's history — the field of atomic energy.

The sales representatives of NUCLEONICS are also the sales representatives of NUCLEONICS. We have much evidence pointing to the opportunities in this great field. Ask them to show you how your potentials can be.

BOGUE

HI-CYCLE GENERATORS

For precision Hi-Cycle power generating equipment to meet one of a myriad of special power requirements ranging from highest quality laboratory power to precision electronic testing, industry relies on Bogue Precision Power. Bogue as the recognized leader in the Hi-Cycle field offers these performance characteristics—

LOW HARMONICS

CLOSE VOLTAGE REGULATION

400 CYCLE REGARDLESS OF LOAD & INPUT VARIATIONS

For example, Bogue special 400 cycle single shaft, two-bearing synchronous motor driven units eliminate belts, gears and other special speed changers, yet, faithfully deliver 400 cycles—exactly—no load to full load regardless of voltage variations . . . truly the standard of 400 cycle power . . . the reason so many prominent companies have been depending on equipment built by Bogue Electric Manufacturing Company . . .

5 KW portable regulated 400 cycle motor-generator set with integral control panel.

Variable frequency 320 to 1000 cycle M-G set. Bogue magnetic amplifier maintains voltage and frequency to within one-half of 1% of any preset value.

5 KW low harmonic set. 400 cycle regardless of input voltage, loading or heating.

400 cycle voltage & frequency regulated inverter. Operates from 28 volt DC supply.

The Authority on High Cycle Power

BOGUE

56 IOWA AVENUE • PATERSON, 3, NEW JERSEY

Low harmonic 400 cycle AC generator and low ripple 28 volt DC generator, synchronous motor driven.

Dual output 10 KW, 400 cycle and 200 amp. 28 volt output, portable unit.

NEW! TWINPLEX COMMUNICATION UNITS

TYPE 177, MODEL 1

TYPE 178, MODEL 1

This Twinplex communication system makes possible a 2-channel radio circuit whereby 2 non-synchronous or synchronous telegraph transmissions modulate a single radio carrier wave by causing the carrier to assume one of four specific frequencies with 400 cps separations.

The transmitting equipment consists of the Twinplex Combiner Type 177 Model 1 and an RF Frequency Shift Keyer such as the Northern Radio Type 105 Model 4. The Combiner converts the four possible conditions of two telegraph signals (M1-M2, M1-S2, S1-M2, S1-S2) respectively into one of four voltages related in a 0-1-2-3 manner. The Combiner output voltage modulates the FS Keyer.

The receiving equipment consists of the Twinplex Converter Type 178 Model 1 and a single or diversity receiver such as the Northern Radio Type 110 Dual Diversity Receiving System. The Converter demodulates and separates the four audio tones from the radio receiver(s) into

two channels each carrying the originally transmitted intelligence. The Twinplex Converter replaces the standard FS Converter for this purpose.

The two telegraph channels provide the same operational flexibility as the two separate single channel FS systems. One can, for example, simultaneously receive channel #1 or 60 wpm teletype channel #2 on high-speed Morse or Division Multiplex. It further permits reception of channel #1 signals on standard FS converters (tunable to cps shift) without need for a Twinplex Converter: this is valuable for "Parallel Circuit Operation" where the intelligence of channel #1 is intended for pick-up by other receiving stations which are not equipped for Twinplex Reception in addition to the main receiving stations which are so equipped. Reception of channel #2 (or of both channels) requires the receiving end to be equipped with a Twinplex Converter.

NEW VARIABLE MASTER OSCILLATOR

- Long-time stability 1 cycle per megacycle
- Variable to ANY frequency from 2 to 4 mc within 1 part per million

The Northern Radio Company Variable Master Oscillator provides a continuously variable source of radio frequency energy with a stability of approximately 1 cycle per megacycle in the range of 2 to 4 megacycles. It has sufficient output to replace existing oscillators wherever a more stable and variable unit is required. It may be used as the basic control oscillator for diversity receivers, high frequency transmitters and other communications devices, or as a laboratory standard for test and measurement functions.

Its ease of operation and direct reading of frequency make it an outstandingly useful device where precise frequency control must be maintained by completely unskilled personnel. No curves, interpolations or calculations of any kind are required in its use. Frequency is set approximately to the desired value by rotating the oscillator dial. The last three digits of the frequency automatically pulls in to the value pre-set on the switches and holds with an accuracy that exceeds that of most temperature-controlled crystal oscillators.

The unit also provides a crystal controlled Beat Frequency oscillator for use in single or diversity receiving systems to provide stabilized BFO injection to the receivers.

An output is also provided from the high stability time base oscillator to make available its 100 KC frequency for use as a secondary standard. The stability of this output is one part in five million over any 12-hour period.

HIGH FREQUENCY OSCILLATOR

- Output Frequency: 2—4 MC continuously variable.
- Stability for any combination of temperature range from 0 to 50° C., and line voltage of 115 or 230 ± 10%: Approximately 1 cycle per megacycle.
- Output Level: 1/2 watt into 75 ohm load. Level control on rear of chassis.
- Readability: ± 2.5 cycles per second. Direct digital readout on mechanical and electronic counters.
- Resetability: Absolute.

TYPE 173, MODEL 1

BEAT FREQUENCY OSCILLATOR

- Output Frequency: 400—800 KC crystal controlled.
- Output Level: 3.5 volts into 1000 ohm load. Level control on rear of chassis.

TIME BASE CRYSTAL OSCILLATOR

- Output Frequency: 100 KC.
- Stability for 0 to 50° C and ± 10% Line Voltage change: 0.2 parts per million for any 12 hour period 1.0 part per million for thirty days.
- Output Level: Approximately 2 volts.
- Output Impedance: Approximately 100,000 ohms.

TYPE 174, MODEL 1

FREQUENCY SHIFT DIVERSITY CONVERTER

For use with either single-receiver frequency diversity systems or 2-receiver space diversity systems. The Type 174 Model 1 provides solid copy of signals which are 14 db below white noise level—making it the outstanding unit of today. By means of plug-in units, any reasonable number of channels is available between the frequencies of 425 and 3315 cps for either frequency or space diversity operation. For standard FS operation, the plug-in networks provide shift adjustments from 100 to 1000 cps shift.

- Normal Input Level: -40 to +10 VU (Zero VU = 1mW into 600 ohms). (Satisfactory operation on fades to -60 VU).
- Limiter Recovery Time: Negligible for a 40 VU differential between Mark and Space frequencies.
- Output: 65 ma into 2000 ohms floating (self-contained line battery).

- Keying Speed: Maximum of 40 dot cycles with narrow band frequency diversity. Up to 400 dot cycles with wide band networks.
- Monitor: 2-inch Cathode Ray tube input phone jack
2 input volume level indicators
1 output current indicator

MULTI-CHANNEL FREQUENCY SHIFT TELEGRAPH SYSTEMS

Today's constantly growing demand for greater, faster, more dependable communications has made the need for improved Multiplex equipment more acute than ever before. In response to this need, Northern Radio Company now makes available several new Frequency Shift Multi-Channel Telegraph Systems. Reflecting the heritage of Northern Radio's constant research and precision manufacture over the years, these multi-channel systems display novel concepts of design together with outstanding performance, fidelity and operating economy.

These Multi-Channel Telegraph Systems are audio carrier systems capable of multiplexing such circuits as telephone lines, VHF, UHF, or radio frequency links—or practically any type circuit from which a two-wire audio circuit can be derived. Designed to meet any speed requirements, these systems are fully electronic, without relays or moving parts to wear. They can be used for high-speed printer, Morse or time division Multiplex circuits, as well as such applications as Telemetry, Control Circuits and Servo-Mechanisms. Instantaneous and complete sending end channel control permits any binary code groups, either "Clear Text" or "Cryptographic," to be channelized without need for additional phasing or synchronizing equipment, while paralleling of channels will allow for transmission of other type codes, such as 3 element cable code. The completely independent operation of each channel, including its own power supply, localizes faults to one channel only, leaving other channels unaffected. Individual channel separation filters are used at both transmitting and receiving ends. This arrangement allows for sending telegraph or control signals over a circuit carrying, simultaneously, other forms of intelligence; or for two-way communications on the same line.

The audio frequency shift principle of transmission provides for high fidelity of signal reproduction over a wide range of signal levels as well as under severe noise or interference conditions. Circuit requirements of any speed, shift and center frequency can readily be met. The systems illustrated is for use on printer circuits up to 100 WPM channel capacity. The system arrangement is very flexible, permitting grouping of the basic units into various arrangements of Multiplex Systems. These systems can be made to accommodate a large variety of channel numbers and speeds to meet any individual requirements. The flexibility is further improved by the fact that the racks, power control units, and terminal connection panels are the same for both transmitting and receiving terminals.

TEST BAY FOR TONE TELEGRAPH SYSTEMS

Northern Radio Company Test Bay for Tone Telegraph Systems provides a complete terminal of test equipment for testing, alignment and maintenance of Frequency Shift Telegraph Systems. Equipped with such equipment, it performs the following functions: (1) rapid and simple precision measurements of mark, space and center frequencies at transmitting and receiving terminals; (2) precision adjustment of FS Tone Keyers to specified frequencies; (3) accurate tuning of FS Converters; (4) rapid evaluation of signal distortion;

(5) measurements of tone and telephone line levels at both receiving and transmitting ends; (6) measurement of telephone line attenuation; (7) over-all system checks and alignment; (8) performance tests of Tone Multiplex Systems and associated equipment; (9) quick localization of systems faults; and (10), monitoring of all wave forms such as keying, keyed tone, etc.

The Test Bay consists of Electronic Square Wave Keyer (Dotter), Cathode Ray Oscilloscope, Frequency Counter, Volume Level Indicator and Rack including blank panels, patch cords and test probes.

BUYERS' GUIDE

A new and superior precious metal film, perfected after more than three years' research, gives Metalohm resistors unmatched stability in high and low ambient temperatures. One-half watt unit will operate at full rated load of 70° C, and one watt unit will operate at full rated load to 100° C. Both sizes derate to zero at 200° C. Tolerance is 1%. Moisture and vapor are positively excluded. Exceptionally rugged . . . film is fused to a solid steatite core and protected by a vitrified enamel coating. Drawn-on end caps will not pull off. Low in cost. Meet and exceed specification MIL-R-10509A. Write for complete description.

Tailor-Made Fasteners in Volume Quantities

MINIATURE BATTERY CONNECTORS

For use with small "B" batteries; afford quick and positive polarized electrical connections and worthwhile space savings on small electronic equipment.

PLASTIC INDICATOR PLUG

Snap-in type, all plastic, lettered indicator plug buttons for electrical appliances. Can be moulded in ornamental or functional designs. For blinding applications. Removable.

FISHTAIL RATCHET PLATE

Made in a wide range of sizes to hold on smooth metal, die-cast or plastic studs. For use on refrigerators, radio cabinets, washing machines and other products to hold medallions, nameplates, etc.

VIBRATOR GROUNDING FASTENERS

Holds 1/2" dia. beaded or non-beaded vibrator. Vibrator Can grounded to chassis. Holding prongs designed to hold several types of Cans.

RUBBER FOOT

Snap-in Rubber Foot for Record Changers and Phonograph Mountings eliminates threaded member, lock washer and nut thereby speeding assembly time and reducing costs.

NYLON SNAP-IN NUT

Designed for the attachment of shelf supports or channels to porcelainized sheet metal liners. Used with sheet metal screws they provide high pull-out values and no chippage.

SPEAKER MOUNTING BOLT

Pronged head prevents bolt from turning in speaker panel during application of nut and lock washer, permits one-side attachment providing production-line savings.

SHELF SUPPORTS

Plastic Shelf Supports designed to snap into porcelainized hole. Driven pin expands Trimount section securing fastener without porcelain chippage. Variety of shapes and sizes.

PLUG BUTTONS

Made to snap into hole sizes 1/8" to 3". Can be embossed with ornamental or functional designs. Removable. Supplied with various finishes, in a variety of shapes and sizes.

QUICKEY FASTENER

Eliminates need for welding or swaging studs to sheet metal stampings, facilitates nesting, eliminates damage in transit because Quickey snaps in just before final assembly.

TRIMOUNT STUDS

Designed to hold two or more thicknesses of material together. Easily installed by hand. Insure vibration proof attachment. Permanent or removable attachment. Wide variety of shapes and sizes.

DOT

Parts illustrated are representative of the thousands of different specialized fasteners and allied devices designed and manufactured in volume by United-Carr and its subsidiaries for leading manufacturers of electronic equipment. United-Carr's wide and varied experience with special fastening problems in the automotive, aviation and appliance fields provides an unequaled background of technical knowledge which may well be applicable to your special needs.

Ucinite Electrical Assemblies

BATTERY CONNECTORS

Wired snap-on units for use with batteries equipped with United-Carr electrical snap fasteners. Wiring to customer's specifications.

BANANA PINS

Four sizes of plugs with one-piece beryllium copper springs. Adaptable mounting ends in threaded, staking, or solder lug types. Similar Mating Jacks also available.

ANODE CONNECTORS

Plug button contacts for positive, firm connections. Corona resistant neoprene or silicon shields in straight or right angle types. Wiring to customer's specifications.

TUBE SOCKETS

Ceramic octals and special types. Ring or saddle mounting. Open ended plates for shock mounting with rubber grommets. J A N types.

TUBE CAPS

Positive gripping, heat treated steel springs in corona resistant metal housing. Insulated or non-insulated. Wired to specifications. Type shown has silicon shield for special application.

SNAP SWITCHES

Precision, momentary contact push-button switches. Small and dependable. Several circuit arrangements. Water tight version shown.

TEST JACK

Ucinite's quality jack for .080 probes. Beryllium copper contacts. Nylon insulation in colors. Metal shell for firm dependable mounting.

VIBRATION ISOLATORS

Equiflex (1 to 1 ratio) metal mounts ensure long life, fit small spaces, can be used in any direction. Three sizes, cup or plate mountings.

SHOCK MOUNTS

in several sizes— and durometer of washings can be varied. Threaded Teenuts or plain Insulated versions if

SWITCHES

switches manufactured by licensee. Variety of push-button as to specifications.

Newtonville 60, Massachusetts

AGE or PREHEAT up to 100 vacuum tubes for 50 hour reliability tests . . .

You can quickly apply any nominal voltage and/or load to any tube element for practically all receiving and many transmitting types with the P.T.L. Aging Rack. Plate, filament, screen and grid voltages may be varied as desired.

Multiple banks of ten production-type sockets accommodate octal, small seven, noval nine or subminiature tubes. Each bank is individually controlled so that up to ten different tube types may be aged simultaneously.

Self contained filament and plate power is supplied together with adequate bias voltages. Overload protection is included in all circuits.

Among Users of PTL Equipment are:

RCA, IBM, Eclipse Pioneer
Essex Wire, Ford Instrument,
Philco, General Motors,
Electric Auto Lite, Remington
Rand, Westinghouse

Fast, accurate, VISUAL INDICATION of the null point for A-C bridges

With the P.T.L. Type 239 Bridge Null Indicator you can see by simultaneous and independent indications, the reactive and resistive unbalances of A-C bridges on a 3" cathode ray tube. After a simple initial set-up, no further manual operation is required.

The indicator amplifier has gain sufficient to give 1 inch deflection for 20 microvolts of input signal. At maximum sensitivity, the hum and noise level is less than 2 microvolts. Continuous tuning in 9 ranges adequately reduces harmonic errors from 20 cps to 20 Kc. A.V.C. is incorporated to reduce overload distortion and speed production testing. The equipment is very useful in a laboratory as well as being essential for fast production testing of audio coils, condensers, etc.

Other production equipment:

SPERRY GYROSCOPE COMPANY

SPERRY KLYSTRON TUBES and *Microline*† INSTRUMENTS

Starting from its sponsorship of the development of the klystron in 1938, Sperry has had vast experience in the manufacture of these tubes for low, medium and high power applications. As a result of Sperry's pioneering in microwave measuring techniques, this company has a complete line of *Microline* instruments which include every type of device essential to precision measurement, in the entire microwave field.

For further information on the equipment listed below or on new development of klystrons and microwave test units, write or telephone our Special Electronics Department or our nearest District Office.

| Description | Frequency Range in MC | Output Power | Beam Voltage | Reflector Voltage |
|----------------------------------|------------------------|--------------|--------------|-------------------|
| Klystron | 750 to 990 | 5w | 1000 | 0 to -1500 |

**Your Regulated High Voltage
 Problems can be Economically
 Solved, Now, by the Originators
 of the Corona Discharge V-R Tube**

ANTON

Typical Rugged AEL Corona Discharge V-R Tubes

**FIXED REGULATION
 300V to 10,000V**

- stabilized voltages
- currents up to 2 milliamperes
- low dynamic resistance
- unlimited life
- size—ranging from sub-miniature T3 bulb to larger volume stainless steel shells

**VARIABLE REGULATION
 550V to 750V**

- Just a turn of a screwdriver makes $\pm 50V$ adjustment possible
- Stabilized voltage at every point
- Currents up to 50 micro-amperes
- no hot cathodes
- unlimited life

Variable Corona Discharge V-R Tube conceived and developed in its entirety by AEL

**ANTON Corona Discharge V-R Tubes
 New Freedom for Circuit Designers**

**TYPICAL
 APPLICATIONS**

- Color TV Receivers and Monitors
- Airborne Radar Power Supplies
- Voltage Reference Tubes
- Cathode Ray Oscilloscopes
- Radiac Power Supplies
- All high voltage low current power supplies

Also available at AEL is a complete line of nucleonic tubes and instruments. We welcome the specifications of your individual requirements.

UNEQUALLED FOR
ACCURACY and DEPENDABILITY

MURPHY & MILLER

TEST CHAMBERS

• ALTITUDE SIMULATION • HUMIDITY SIMULATION • LOW TEMPERATURE • HIGH TEMPERATURE

Advanced design features, highest quality materials and superior craftsmanship go into every M & M test unit to assure accurate tests and dependable operation. Before you specify or buy *any* test equipment — see what Murphy & Miller has to offer you.

MODEL LTA 12
12 CUBIC FT. TEST SPACE

ALTITUDE SIMULATION UNIT

- Altitude Ranges over 200,000 ft.
- Temperature Range from +300°F to -120°F
- Humidity cycle 20% to 95% from +35°F to 185°F
- New design — greater capacity per horsepower — lower operating cost . . . greater efficiency

Available in units with 12 and 27 cubic ft. of test space, M & M Altitude Simulation Chambers offer every standard and optional feature for faster, more flexible testing. Optional features include Program Controlled Heating, Cooling and Humidity Cycles, Automatic Recorders, Special Wiring, etc. etc.

MODEL H 12
12 CUBIC FT.
TEST SPACE

HUMIDITY TEST CABINET

- Provides Relative Humidities between 20% and 95%
- Temperatures from +185°F to +35°F
- Instant response of humidity system insures accurate testing
- Uniform temperature and humidity throughout test cycles.

High capacity heating, refrigeration and forced air systems insure fast, accurate temperature rise and pull-down Program control cycle for temperature, humidity and cooling available. Models manufactured with test spaces from 12 to 48 cubic feet.

DRY ICE FUNGUS HUMIDITY

NEW SLOPING FRONT UNITS

- Exclusive sloping front for easier viewing . . . faster loading
- Available in single units or combinations

Compact, portable and inexpensive, M & M Slope Front test cabinets are made for low temperature (dry ice refrigerant) Fungus, humidity testing. Cabinets are fully automatically controlled.

Write for illustrated literature and complete specifications.

ADVERTISERS

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who are also advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a constant turnover of use in the electronic and the nuclear field.

But, there is very little cross-over between the subscriber lists of the two publications — a matter of a few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent magazine, but are missing such presentation before one of the fastest growing fields in the country's history — the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Let them to show you what your potential can be.

ABC **NUCLEONICS**
A McGraw-Hill Publication
330 West 42nd St., New York 36, N.Y.

A SERIES

The standard 10-turn model... the first helical precision potentiometer... still the most popular. Threaded bushing.

C SERIES

A 3-turn model, combining high setting accuracy with space-saving behind the panel. Threaded bushing mount.

MULTI-TURN HELIPOTS®

All available in both linear and non-linear versions

B SERIES

A 15-turn, large diameter model. For extreme accuracy and resolution. Servo or bushing mount.

D SERIES

A 25-turn model. Provides even greater accuracy and resolution than the B series. Threaded bushing.

E SERIES

A 40-turn model. Extremely long coil provides highest accuracy and resolution. Threaded bushing mount.

AN SERIES

An ultra-precision 10-turn model. Manufactured to closest tolerances throughout. Servo or bushing.

CN SERIES

An ultra-precision 3-turn model. Provides extreme accuracy and small size. Servo or bushing mount.

AJ SERIES

A miniature 10-turn model. Only 7/8" dia. by 1 1/2", yet offers a coil 18" long. Servo or bushing mount.

Resistance is ±1% for series A, ±1% for all others
Resistance is ±0.5% for all series

Operating temperature range is -55° to +105°C for series T, -55° to +90°C for series V, -55° to +80°C for all others
Design details subject to change without notice, certified drawings available on request
At 80°C

G SERIES

moderately priced, continuous-rotation model. Small in size, yet extra-rugged. Threaded bushing mount.

T SERIES

An all-metal, continuous-rotation model. Features very low torque... very small size. Servo or bushing mount.

SINGLE-TURN HELIPOTS®

All available in both linear and non-linear versions

J SERIES

A two-inch diameter, continuous-rotation model. External clamps for easy phasing. Servo or bushing.

L SERIES

A three-inch diameter, continuous-rotation model. External clamps for easy phasing. Servo or bushing.

Y SERIES

A 1 1/4" diameter, continuous-rotation model. External clamps for easy phasing. Servo or bushing.

V SERIES

An all-metal, continuous-rotation model. Features wide choice of non-linear outputs. Two-hole servo.

One Source For

POWERSTAT VARIABLE TRANSFORMERS

deliver a continuously adjustable output voltage from a-c power lines

A POWERSTAT variable transformer is an autotransformer of toroidal core design with a movable brush tap that is rotated to deliver any required output voltage from zero to, or above, line voltage. Important features include: excellent regulation, high efficiency, conservative ratings, zero waveform distortion, rugged mechanical construction and smooth control. Numerous standard POWERSTATS in ratings from 150 VA to 100 KVA are available for 120, 240 and 480 volt, single and three phase operation. Most are offered in either manual or motor-driven models. The chart lists some of the most-called-for types. Others — designed for specific applications — are available for every requirement. Consult us about your specific needs.

*These units are supplied with an "L" terminal which allows connecting in parallel to limit the output voltage to the applied voltage. If "L" type connection is used on other models, the "L" must be included in the type number when ordering.
†When these POWERSTATS are "L" connected so that the output voltage does not exceed the applied voltage, the frequency range is 50/60 cycles.

STANDARD TYPES FOR VARIOUS APPLICATIONS

POWERSTAT VARIABLE TRANSFORMERS for

OIL-COOLED OPERATION

TYPE O-1126

By immersing a POWERSTAT in transformer oil, the rating above normal air operation is increased and duty in a corrosive atmosphere is possible. A standard line is offered in various ratings and sizes.

EXPLOSIVE ATMOSPHERES

TYPE X-1126

To provide safe operation in hazardous areas where a small arc of spark could cause an explosion, explosion proof POWERSTATS are available. Standard models are approved by Underwriters' Laboratories for Class I, Group D service.

HIGH CURRENT NEEDS

2106LC

rect line voltage variations to maintain a specified output voltage and supply a limited output voltage range. A multitude of ratings are available.

LIMITED OUTPUT RANGE

Relatively large amounts of power can be controlled by small POWERSTATS when used in conjunction with a fixed output transformer. This combination is known as a POWERSTAT Corrector. It can be used to correct line voltage variations to maintain a specified output voltage and supply a limited output voltage range. A multitude of ratings are available.

Look to SUPERIOR ELECTRIC for all VOLTAGE CONTROL NEEDS

Voltage Control Apparatus

STABILINE AUTOMATIC VOLTAGE REGULATORS

maintain a constant output voltage regardless of line or load changes

MADE IN 2 DISTINCT TYPES TO MEET YOUR NEEDS EXACTLY

TYPE IE (INSTANTANEOUS ELECTRONIC)

TYPE EM (ELECTRO MECHANICAL)

For the most exacting control. Completely electronic with no moving parts. Correction is instantaneous. Waveform distortion does not exceed 3%. Output is held to within ± 0.1 per cent of nominal for wide line variations and to within ± 0.15 per cent for load current or load power factor change from lagging .5 to leading .9. Standard types are listed below. Special units can be ordered to meet specific requirements.

... for controlling large industrial loads or providing zero waveform distortion. Consists of an electronic detector circuit controlling a motor-driven POWERSTAT variable transformer that feeds a buck-boost auxiliary transformer. Features include: high efficiency, insensitivity to magnitude and power factor of load and no effect on system power factor. Standard models are offered in ratings from 2 to 100 KVA.

SHIELDED WIRE

- New 125° C shielded wire. Miniature size, high abrasion resistance. Stable capacitance over temperature range.

NYLEX LACING CORD

- Round Nylon cord—will flatten over conductors causing less deformation of insulation.
- 24-36-50 Lb. sizes

LOW CAPACITY PROBE CABLES

- B.I.W. #411A Flexible probe cable—8.5 mmf/ft.

HOOK-UP WIRE

TYPE SRIR, with glass braid covering in colors. Gauge sizes #24 to #8 stranded, solid or flexible. Insulation: Extruded synthetic resin; flameproof, resists oil, easily strips.

Covering: Closely woven fibreglass in solid colors; white, black, brown, red, orange, yellow, green, blue and any of 100 combinations.

Coating: Smoothly finished with tough flame resisting lacquer. Voltage rating: 1000 RMS, diameter no larger than ordinary 600 RMS.

TYPE SRIR, plain or with nylon braid in colors.

TYPE SRLV, plain or SRLV(J) with nylon sheath: small diameter 300 volt, 105° C rating, in all colors for miniature wiring.

TYPE SRMV, plain or SMRV(J), nylon jacket: 600 volt, 105° C hook-up wire.

TYPE SRHV, with either glass braid or nylon sheath: for voltage ratings of 2500, 5000 and 10,000 DC in electronic applications.

TYPE ANRW, plain or with cotton braid: for good abrasion and heat resistance. Insulated with neoprene compound for 600 volts, withstands baking at 250° F without damage—for leads on coils and transformers.

TYPE SRHT (Synthetic Resin High Temperature) is the nation for a series of hook-up wires for high temperature applications, and is made in gauge sizes #26 to #6, in all colors, various types of coverings to be serviceable under different conditions and temperature ratings.

SRHT(GS): rated at 200° C, has a tinned copper shielded silicone treated fibreglass braid.

SRHT(SG); **(SN)**; **(GV-22-2)**; **(GV-22-3)**: single, two and three conductor wires for telemetering use.

SRHT(NN): rated at 125° C, is nylon braid covered and finished with flexible nylon coating.

SRHT(CV): rated at 150° C, is covered with a unique abrasion resistant braid saturated with silicone resin.

SRHT(GV): rated at 200° C, is covered with fibreglass saturated and finished with silicone resin.

SRHT(GF): rated at 250° C, is covered with glass braid saturated and finished with "Teflon."

With our engineering experience and wide range of products, we are able to help solve all your wire and cable problems.

CAL-TRONICS

DESIGNS — BUILDS — INSTALLS — SERVICES

ELECTRONIC TEST EQUIPMENT

COMPUTER SYSTEMS TEST UNIT

We specialize in the design and manufacture of complete production test facilities for use in testing the most advanced, complex radar, computing, and missile guidance systems and components.

Typical of the type of equipment we build is the Computers Systems Test Unit shown at right. Built to solve a manufacturer's problem, this test unit makes static precision alignment of a computer sub-system of a radar fire control system, and records dynamic accuracy by simulating an actual attack.

Shown below are additional types of specialized electronic test equipment which we build.

PRECISION RATIOMETER

A laboratory, production or field instrument to be used primarily for determination of impedance ratios or absolute values of resistors.

SLIDEBACK VOLTMETER

A versatile laboratory or field instrument designed for calibration of precision voltages, either on an absolute or relative basis.

Whether your product has military or commercial applications, Cal-Tronics has the engineering experience—plus the most modern facilities—for building equipment to meet any electronic testing problem.

Advertisers

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications—a matter of a few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history—the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Ask them to show you what your potentials can be.

Centralab rotary switches solve a wide variety of electronic applications

Chances are you'll never design an "electronic husband awakener". But the uses for Centralab Rotary Selector Switches are as broad as your imagination

- Available in standard ($1\frac{7}{8}$ " diameter) or miniature size ($1\frac{1}{2}$ " diameter).
- Standard or special switching combinations — up to 12 positions or up to 6 poles per section.
- Single or multiple sections.
- Indexing: 30° or 60° (standard or miniature); 90° (standard only).
- Phenolic insulation — NEMA Grade XXXP. MIL Grade P3115B.
- Steatite insulation — JAN Grade L-5 for low loss characteristics.
- Shorting or non-shorting types.
- All hardware heavily cadmium plated.
- Clips and contacts silver plated spring brass.
- Solid silver alloy contacts available.

Centralab has complete facilities for volume production of custom switches: Modern, highly mechanized production plants . . . plus Centralab engineering specialists are at your service.

If you need something new . . . come to Centralab . . . we may have it!

Microwave Products

DIC-2217 — KLYSTRON MOUNT FOR 2K25, "X" BAND

A standard DICO design for operation in the range of 8.5 to 9.6 kmc. An adjustable uncalibrated output padding attenuator is provided. Incorporated in each shielded D.C. input lead is a polyiron absorbing slug, to prevent entrance of interfering energy or radiation of local oscillator energy in the "X" Band region.

DIC-6113 — DUPLEXER ASSEMBLY

This is a typical custom made waveguide component, demonstrating Diamond's ability to manufacture accurately to customer's specifications.

DIC-6028 — FREQUENCY METER, "S" BAND

This reaction type frequency meter covers the range of 2.15 to 4.3 kmc. Similar meters for the 1.4 to 2.3 kmc and 3.5 to 6.5 kmc ranges are available. Normally manufactured as reaction type meters, they are also available in the transmission type.

Illustrated above are a few of the many DICO designed and manufactured microwave components, produced under highest quality-control standards. For more complete information on DICO microwave components and test equipment send for catalog 953.

Arnold Magnetic Materials

TYPES "C" AND "E" CUT CORES

"E" Cores are made from Silectron strip (highly oriented steel) in 1, 2, 4 or 12-mil wide variety of window areas, for high and low applications. Sizes range up to 12-mil strip, and from fractions of a pound to hundreds of pounds in thin-wound cores. Ultra-thin (12-mil or less) can also be supplied. Strip of the proper width is

wound on a mandrel, then heat treated, bonded and cut into halves. Careful control results in accurately dimensioned and matched core halves whose effective air gap at the butt joint is very small.

In 3-phase applications, the use of "E" Cores provides weight and size reduction, as well as higher efficiency and possible cost savings. Rigid standard tests are employed for both "C" and "E" types of cores, and special tests where required.

TAPE WOUND CORES

Upon the specific properties of the tape, Tape Wound Cores are made of Deltamax, 4-79 Molybdenum Permalloy, Mumetal, 4750 Molybdenum Permalloy, or Silectron . . . in standard thicknesses of 1, 2, 4 or 12-mils, and in tape gauges of 1/2 and 1/4-mil.

Any size core can be supplied, from a gram to hundreds of pounds. Toroidal cores are made in 22 standard sizes with protective nylon cases. Special sizes of toroidal cores, and all square or rectangular Tape Wound Cores, are produced to individual requirements.

Used for magnetic amplifiers, pulse transformers, current transformers, wide-band transformers, non-linear retard coils, peaking strips, reactors, etc., this gapless type of core construction results in maximum effective working permeability with minimum flux leakage.

MOLY-PERMALLOY POWDER CORES

For inductors, filters, broadband transformers and networks, for frequencies up to 200 kc, these Toroids provide a small volume. Characterized by low current and hysteresis losses.

at 50 to 200 kc. Many of these cores may be furnished stabilized to provide constant permeability ($\pm 0.1\%$) over a specific temperature range.

Toroid Cores are supplied in standard permeabilities: 125, 60, 26 and 14. They provide constant permeability over a wide range of flux density. Toroid Cores are recommended for frequencies up to 75 kc; the 60 Mu at 10 to 50 kc; the 26 Mu at 30 to 75 kc; and the 14 Mu

These Moly Permalloy Powder Toroids are available in a wide range of sizes, to obtain nominal inductances as high as 281 mh/1000 turns. They are given various types of enamel and varnish finishes, some of which permit winding with heavy Formex insulated wire without supplementary insulation over the core.

ALNICO MAGNETS

Arnold manufactures permanent magnets of Alnico, although Alnico is the preferred type due to the energy product of that alloy.

Alnico Magnets are quite hard and somewhat brittle and may be machined only by grinding. Most sizes and shapes are manufactured as sand castings and are made to the customer's drawings and specifications. Some types and shapes of Alnico Magnets are carried as stock items.

Some small sizes of magnets may be furnished in sintered Alnico, but special shapes made in this way require rather expensive dies.

COMPOSITION-ELEMENT CONTROLS (Series 48)

Pat. Pending

5/8 DIA. FOR MINIATURIZATION

Linear, 500 ohms to 5 megohms. Taper, 2,500 ohms to 2.5 megohms; 10% resistance at 50% C.W. rotation. Rated at 0.2 watt for linear units. 300° rotation. Shaft locking device may be incorporated upon request. Single and multiple units available.

Engineering Bulletin No. 121

COMPOSITION-ELEMENT CONTROLS (Series 47)

15/16 DIA.

Linear, 500 ohms to 5 megohms. Tapered, 1,000 ohms to 5 megohms. Rated at 0.25 watt for linear units. Standard taps at 37½%, 50% and 62½% of effective rotation. 300° rotation without switch; 330° with switch.

Engineering Bulletin No. 117

COMPOSITION-ELEMENT CONTROLS (Series 37)

1-1/8 DIA.

Linear, 500 ohms to 10 megohms. Tapered, 1,000 ohms to 10 megohms. Rated at 0.5 watt for linear units. Standard taps at 37½%, 50% and 62½% of effective rotation. 300° rotation without switch; 330° with switch.

Engineering Bulletin No. 112

COMPOSITION-ELEMENT CONTROLS (Series 51)

Pat. Pending

2" DIA., HI-VOLTAGE, HI-RESISTANCE

Resistance range, 5,000 ohms to 50 megohms for linear units. Rated at 1 watt. Insulation, 10,000 volts D.C. to ground, 4,000 volts maximum across end terminals.

Engineering Bulletin No. 119

Armed Services requirements as to corrosion-resistant materials and plating, low-temperature operation, vibration, rigid electrical and mechanical specifications, etc., can be incorporated in any of the Clarostat units.

WIRE WOUND CONTROLS (Series 49)

Pat. Pending

3/4 DIA. FOR MINIATURIZATION

Linear, 10 to 10,000 ohms. Rated at 1 watt. Mechanical and Electrical rotation 300°. 360° Mechanical rotation available. Max. 355° Electrical. Shaft locking device may be incorporated. In single or multiple units.

Engineering Bulletin No. 104

WIRE WOUND CONTROLS (Series 43)

1-1/8 DIA.

Linear, 1 to 10,000 ohms. Tapered, submit your requirements. Rated at 2 watts, for linear units. Mechanical rotation 300° Electrical 280° without switch; 260° with switch.

Engineering Bulletin No. 116

WIRE WOUND CONTROLS (Series 58)

Linear, 1 to 50,000 ohms. Tapered, 5 to 25,000 ohms. Non-inductive 1 to 12,000 ohms, linear only. Linear, 3 watts. Mechanical rotation 300° Electrical 280° without switch; 240° with switch.

HOUSE OF RESISTORS**

HIGH-PRECISION CONTROLS (Series 42a)

Pat. Pending

Up to 18 sections in one unit assembly. Single shaft. No back lash. Linear: 10 to 100,000 ohms standard. Max. resistance: 350 ohms per degree of rotation. Tapered, submit your requirements. Linearity up to $\pm 0.5\%$. Power rating for linear units, 3 watts per section. Standard rotation; Mech. 290°; Elec. 280°

Engineering Bulletin No. 142

PLUG-IN ULTRA-PRECISION (Series 52)

Pat. Pending

Multiple sections in one unit assembly. Single shaft. Linear: 10 to 100,000 ohms suggested values. Up to 200,000 ohms available. Resistance tolerance $\pm 0.5\%$ where resolution permits. Linear and Non-linear available to $\pm 0.25\%$. Power rating for linear units 3 watts at 40°C per section. Effective rotation 358° Continuous rotation or limited rotation.

Engineering Bulletin No. 152

WIRE WOUND CONTROLS (Series MH)

"HUMDINGER" *

Ultra-compact potentiometer or rheostat. 2 to 1,000 ohms, only linear resistance feasible. Rating, 1 watt. Intermediate taps are special. Metal dust-proof cover available.

Engineering Bulletin No. 103

POWER RHEOSTATS (Series 25 & 50)

Pat. 2,346,598

Full power rating even at $\frac{1}{2}$ of rotation. 25-watt, $\frac{1}{2}$ to 2,500 ohms; 50-watt, $\frac{1}{2}$ to 5,000 ohms. Linear and tapered. Tandem units available. 25G and 50G approved under MIL-R-6749 specifications.

Engineering Bulletin No. 115

"GREENOHM" * POWER RESISTORS

Fixed, 4 to 200 watts; adjustables, 10 to 200 watts. $\pm 5\%$ for values of 50 ohms and higher. $\pm 10\%$ for values below 50 ohms. $\pm 1\%$ special. Intermediate taps, upon order. Widest choice of mountings and terminals. Non-inductive units made to specifications.

Engineering Bulletin No. 113

"GREENOHM JR." * POWER RESISTORS (Series GJ)

C7GJ, 7-watt, 0.5 to 5,000 ohms. C4GJ, 4-watt, 0.5 to 1,000 ohms. Standard resistance tolerance $\pm 10\%$. Breakdown voltage between surface and resistance element, > 2500 volts A.C. Ceramic tube casing. Inorganic materials throughout. Pigtail terminals, standard.

Engineering Bulletin No. 110

STANDEE* SERIES KS — ABOVE-CHASSIS-MOUNTED POWER RESISTORS

| Model | Power (Watt) | Resistance Range (ohms) | Dim. "L" |
|-------|--------------|-------------------------|----------|
| A6KS | 10 | 1 to 6,000 | 1-1/2 |
| A8KS | 15 | 1 to 9,000 | 2 |
| A10KS | 20 | 1 to 12,000 | 2-1/2 |
| A12KS | 25 | 1 to 15,000 | 3 |
| A16KS | 30 | 1 to 20,000 | 4 |

Standard resistance tolerance $\pm 10\%$.

Engineering Bulletin No. 146

Submit your resistance problems to Clarostat. Clarostat Engineering and Manufacturing Facilities through experience in the varied Allied Electric and Electronic Fields have the ability to meet unusual requirements by modifications of existing resistors and controls.

30 YEARS OF CAPACITOR EXPERIENCE

MICAMOLD pioneered the development, design and manufacture of capacitors — and is still producing under the original management.

MICAMOLD METAL ENCASED PAPER CAPACITORS — hermetically sealed and available in all the Military Standard styles and many special designs. Micamold also manufactures complete lines of oil filled capacitors for industrial applications. Another Micamold first — the exclusive Ambirite line — the only paper capacitors for operation at 150°C.

MICAMOLD ELECTROLYTIC CAPACITORS are manufactured in all Military Standard styles, and types for radio, television and industrial applications. The Motorlytics are for capacitor motor starting.

MICAMOLD's exclusive electrolytics include: Thermalytics, the only capacitors capable of operation up to 100°C, and Chromalytics that work at voltage ratings up to 700VDC.

MICAMOLD MOLDED PAPER CAPACITORS — hermetically sealed in rectangular cases are the only complete line of Military Standard styles. A commercial case size is manufactured in the same case sizes for industrial applications. **MICAMOLD TROPICAPS** are molded tubular capacitors that afford protection from exposure to high humidity or even total immersion. The case is non-flammable and not injured by severe mechanical and thermal shocks.

MICAMOLD originated and introduced the first **MOLDED MICA CAPACITORS** thirty years ago. The company manufactures Military Standard styles from CM15 through CM70, and also makes the same types for industrial uses. Another Micamold first — the development and manufacture of high temperature types AO, AW and AV for operation to 150°C.

MICAMOLD manufactures all types of Paper, Electrolytic and Mica Capacitors, Radio Frequency Interference Filters, Pulse Networks and Delay Lines.

The Micamold Catalog giving complete specifications is available upon request.

SANBORN 150 SERIES OSCILLOGRAPHIC RECORDERS

The **BASIC** four-channel assembly includes: Cabinet, Recorder, and, for each channel, a **BUILT-IN** unit (A), which comprises a Driver Amplifier with frame, and a Power Supply with control panel.

**A NEW
design concept
that brings even
greater versatility
to industrial
OSCILLOGRAPHIC
RECORDING**

You have a **CHOICE** of readily interchangeable, plug-in Preamplifiers (B) for **EACH** channel, as described below.

The new Sanborn 150 Series offers greater operating efficiency and convenience, and encompasses a *variety of uses* which include the accurate recording of almost every phenomenon whose frequency spectrum lies in the range from 0 to 100 cycles per second.

A *wide selection* of plug-in preamplifiers, or "front end" units, such as (B) above, are completely interchangeable in any or all channels of the 150 Series amplifier section, where they simply plug in to the driver amplifier and power supply, (A) above, which are already in place.

Available plug-in Preamplifiers include: AC-DC, CARRIER, SERVO-MONITOR, DC COUPLING, LOG-AUDIO, and LOW LEVEL. Blank plug-in assemblies are also available for users to make input circuits for special measurement problems.

And, there are the popular Sanborn advantages: a high torque movement (200,000 dyne cms per cm deflection), direct *inkless* recording in *true rectangular coordinates*, and provision for code and time markings.

A new catalog on Sanborn Oscillographic Recording Systems and their components will be sent gladly on request.

SANBORN COMPANY

INDUSTRIAL DIVISION

195 MASSACHUSETTS AVENUE

CAMBRIDGE 39, MASS.

OTHER SANBORN IMPROVEMENTS

Extended frequency response.
Improved regulated power supply.
Individual stylus temperature control for EACH channel.
Improved, single control, paper speed selector. Nine speeds — 0.25 to 100 mm/sec.
Recorder slides out, if desired, for better view of recorded events, or for notations on record (illustrated at right).
Improved control of input signals by use of 1, 2, 5 ratios on attenuator.

ROBINSON All-Metal Vibration and Shock Mounts for Airborne Electronic Equipment...

Outstanding feature of Robinson Mounts is the employment of resilient, primary load-carrying cushions of metal wire (MET-L-FLEX). These MET-L-FLEX cushions are fabricated in such a way that all wires are continuous from top to bottom. They are inherently and permanently damped, and do not drift, pack down or wear out.

Robinson Mounts completely lack the faults and failings of outmoded mountings that incorporate rubber, organic or synthetic materials.

ROBINSON COMPLETE ENGINEERED MOUNTING SYSTEMS

For maximum protection, most problems of vibration and shock can best be overcome by a complete Robinson Engineered Mounting System. When such a system is designed for the particular equipment with careful regard to the acceleration forces, frequency characteristics, and other requirements, the greatest possible efficiency is achieved. At the same time, a Robinson Engineered System can effect decided economies. It not only permits simplified construction and "de" ruggedization of equipment, but also contributes to far longer useful life, and eliminates the need of replacements.

Model 728-4

An all-attitude engineered system designed and used for mounting an Antenna Coupler. Excellent damping and snubbing in all directions. Suitable for any small sensitive equipment requiring maximum protection. Provides for easy removal and accessibility of equipment.

Model 1128-2

Single stage mounting system incorporating these Robinson design features: 1) light weight; 2) outstanding stability; 3) high damping; 4) one piece base plate with only four attachment holes; 5) minimum vertical height; 6) complete unit ready for equipment installation.

Model K130

Center-of-Gravity type mounting designed for individual instruments such as the Oxygen Flow Indicator. This mount is the first of its kind to be successfully installed in important military aircraft. Ideal for instruments not provided for on the main instrument panel.

EXAMPLES OF ROBINSON ENGINEERED UNIT MOUNTS

(Cut-away view)

Series No. 1202

Cup type mount with unusual stability and close limiting action provided by extra thick top and bottom MET-L-FLEX buffer pads within the housing. These buffers provide a gradual increase in stiffness plus high damping. *Natural frequency:* 15-30 c.p.s. (vertical). Axial to lateral stiffness ratio selected to provide for maximum isolation compatible with stability.

For detailed information, write us, outlining your requirements.

Series No. 930

Plate type, double-acting mount. Isolates vibration and shock for positive, negative and radial loads. Particularly adapted to installations where mounts can be located about in the plane of the C.G. and where mounting or missile attitude may vary. *Natural frequency:* 12-15 c.p.s. Higher stiffnesses available.

Series No. 809

A small plate type mount, low in installation height, designed to isolate vibration and shock for positive, negative and radial loads. It is particularly adaptable for the mounting of equipment in cramped spaces. *Natural frequency:* 25-30 c.p.s. This assures a high degree of stability to the mounted equipment and effective vibration isolation at high frequencies.

Various adaptations available to meet your particular dimensional and load requirements.

Environmental Test Equipment

L-SERIES

Laboratory Unit for complete environmental testing of aircraft instruments and equipment at a temperature range from +185°F. to -100°F., relative humidity simulation from 20% to 95%, and altitude from ambient atmospheric pressure to 80,000 feet or higher.

S-SERIES

These units will automatically maintain temperature conditions within a range from -85°F. to +185°F. In addition, units which incorporate humidity conditions will provide humidity from 20% to 95% between +35°F. and +180°F. Dry and wet bulb temperature ranges can be extended to meet other requirements.

Special Engineering

Bowser Technical Refrigeration maintains a complete engineering staff to solve special test problems for the aircraft industry. All test chambers can be furnished with power drives into the test chamber. Also available as accessories are test racks to special design, optical viewing arrangements, pressurized and explosion proof connectors, special high voltage in- and outlets, radio shielding and connections for testing hydraulic equipment. To meet individual requirements, other special instrumentation, accessories and sizes are available.

EXPLOSION

Explosion chamber to meet all MIL, JAN, USAF, AN, and other specifications for testing of instruments and equipment in explosive atmosphere at altitudes up to 50,000 feet. Unlimited altitude simulation available. Bowser ignition system (Patent applied for) and safety devices, plus automatic fuel metering are typical features of this chamber.

SAND & DUST

Sand and dust chamber to meet all MIL, JAN, USAF, AN, and other test specifications for aircraft and electronic components. Provides testing facilities in air-suspended sand and dust at velocities of 100 and 2300 feet per minute. Accurate temperature control of the air is provided by automatic heating and refrigeration equipment. Electronic density indication and control are available.

BOWSER

Environmental Test Equipment

WALK-IN ROOMS

Walk-In Rooms are available with UNLIMITED altitude simulation temperature range from -100° to $+200^{\circ}$ F., and relative humidity from 20% to 95%. With sectionalized panels any size or shape room can be manufactured for use in the field. Smaller sizes are preassembled at the factory. Special accessories and instrumentation can be engineered and installed to individual specifications.

H-SERIES

Relative Humidity Simulation Unit which will automatically maintain humidity conditions from 20% to 95% at temperatures from $+35^{\circ}$ F. to $+185^{\circ}$ F. (Dry Bulb).

COOLERS

These units are ideal for all types of processing requiring precise control of heat. The wide range of temperatures down to -80° F. and lower also allows complete testing of products under conditions of extreme cold. In addition, storage of products is highly effective because of the close control tolerance and stability featured in all Bowser units. Other applications for these units are well suited are stabilization of metals, aging, expansion fitting, conditioning for tensile tests etc.

U-SERIES

These units are designed specifically for production processing of aircraft instruments, accessories and equipment. Temperature ranges from $+158^{\circ}$ F. to -80° F. Relative humidity simulation from 20% to 95% and altitude simulation to 55,000 feet are provided.

You can depend on *Sterling* relays

| | DESCRIPTION | COILS | PILE-UP | SIZE* |
|--|---|--|--|---|
|  BS | The standard long coil telephone type with twin contacts. Also available with a variety of single contacts. | Single and double wound to 52,000 ohms | Max. of 28 springs in two pile-ups | 4 1/8" long 1 3/8" wide 1 9/16-2 3/4" high |
|  GS | The short form telephone type with single contacts of various sizes and metals. | Single and double wound to 25,000 ohms | Max. of 20 springs in two pile-ups | 2 1/2" long 1 1/4" wide 1 5/8-2" high |
|  KS | The miniature type for aircraft and similar applications. Reed bearing support provides extreme life and speed. Not recommended for marginal current applications. | Single to 6500 ohms | Max. of 12 springs in two pile-ups | 1 1/2" long 1 3/8" wide single arm 1" wide double arm 1 1/8-1 7/16" high |
|  LS | The miniature type B, applicable where space is a premium and large pile-ups or greater sensitivity than the KS or TS are required. Available with either single or twin contacts and a variety of mountings. | Single and double wound to 20,000 ohms | Max. of 20 springs in two pile-ups | 2 1/4" long 1 1/8" wide 1 3/16-1 3/4" high |
|  TS | Similar to the type KS with increased coil capacity and larger spring pile-up. Mounts in most of the same enclosures designed for the type KS. | Single and double wound to 14,000 ohms | Max. of 18 springs in two pile-ups | 1 9/16" long 1" wide 1 1/4-1 5/8" high |
|  | The AC modification of type BS. An ideal multi-contact type of AC relay where only AC coil power is available. | To 220 volts 25 & 50/60 cycles Single and double wound | Max. of 18 springs in two pile-ups. Less on low voltages | Same dimensions as Type BS |
|  | The AC modification of type GS where space will not permit the use of the type BAC. | To 220 volts 25 & 50/60 cycles | Max. of 18 springs in two pile-ups. Less on low voltages | Same dimensions as the type GS |
|  MS | General-purpose small power relay. | To 220 volts AC or DC | 1C maximum 3/8" silver contacts | 2 1/4" long 2" wide 1 3/8" high |
|  PS | Compact double-pole, double-throw power relay. | To 220 volts AC or DC | D. P. D. T. 1/4" silver contacts | 1 5/8" long 1 7/8" wide 1 13/16" high |
| SEALED TYPES | Sealed enclosures for STERLING relays are available in a variety of enclosure and header types. | | | |
| | All STERLING relays may be furnished mounted on and wired to the common varieties of radio plugs. | | | |
| | The types BS and GS and their variations are available with snap action switches as well as conventional contact springs. | | | |

* Dimensions are given for height, the smaller is for relays with 2 springs and the larger is for the maximum size pile-up.

SHALLCROSS

AKRA-OHM® PRECISION WIREWOUND RESISTORS

Not only are Shallcross Akra-Ohm precision wire-wound resistors made to extremely close tolerances; equally important, they are physically protected to maintain their accuracy under difficult operating conditions. Standard ceramic bobbin types as well as new "P" Type

epoxy resin encapsulated resistors in sizes and mounting styles for MIL-R-93A and other exacting needs. Guaranteed tolerances to 0.01% and stabilities as low as 0.003% where required. Matched pairs and sets available. Write for detailed engineering bulletins on any type.

MULTI-POSITION SELECTOR SWITCHES

Shallcross regularly manufactures a wide variety of single or multi-deck selector switches having up to 180 positions and designed for dependable performance up to 250 volts 10 amperes, or 2500 volts 1 ampere A.C. Contact resistance ranges from as low as 0.0005 ohm to a maximum

of 0.005 ohm depending upon the size and material of the contacts. Standard types readily adaptable to over a thousand variations are described in Engineering Bulletins L-31, L-32. Outline your special requirements on Specification Sheet No. 6 for prompt recommendation.

PRECISION AUDIO ATTENUATORS

Improved materials and production techniques and careful quality control for Shallcross Attenuators have resulted in a line that sets higher standards of attenuation performance for practically every audio and communications use. Included are single and dual potentiometers, variable im-

pedance matching networks, V. U. meter multipliers, cueing attenuators, fixed pad, pre-emphasis and de-emphasis networks, attenuation boxes, ladder and balanced ladder controls, bridged T, straight bridged H, and straight H attenuators. Write for Attenuator Bulletin 4-A.

PRECISE MEASURING INSTRUMENTS

As long-time specialists in standard and special electrical measuring instruments.

Shallcross welcomes your inquiry for any desired types. Standard instruments include

Resistance standards • Decade Potentiometers • Decade Resistance Boxes • Wheatstone Bridges • Combined Kelvin-Wheatstone Bridges • Wheatstone-Megohm Bridges • Wheatstone-Limit Bridges • Percent-Limit Bridges • Capacitor Analyzers • Decibel Meters • Tone Generators • Telephone Test Equipment • Low-Resistance Test Sets • High-Voltage Test and Measuring Equipment.

Write for Shallcross Bulletin DC

GASTOHM® POWER RESISTORS

These tab terminal fixed power resistors dissipate more power with less weight and smaller diameters than vitreous enamel resistors. No heavy core is used. Windings are imbedded in ceramic which forms an integral coating and core. Available in 8, 12, 28, 60, 125, & 225 watt styles to MIL-R-10566 specs. Write for Engineering Bulletin L-29.

HIGH VOLTAGE MEASURING APPARATUS

Precision Shallcross kilovoltmeters, kilovoltmeter multipliers, corona-protected kilovoltmeter multipliers, hermetically sealed tubular resistors, Surge resistors, and Taylor Type corona-protected resistors. Combine close accuracy with safety and dependability. Types for voltages up to 200,000 volts or higher if required. Write for data on any type.

BOROHM® BORO-CARBON PRECISION RESISTORS

Produced by exclusive Shallcross process using automatic machine handling of resistors for maximum stability and accuracy. Temperature coefficient: 200 ppm per °C above 20K ohms; 100 ppm below 20K. 1/2, 1, & 2 watt sizes to MIL-R-10509A, Char. R. Write for Bulletin L-33.

CUSTOM-BUILT SPECIALTIES AND ENGINEERING SERVICE

Sealed networks, high voltage measuring equipment, special test sets, thermally controlled networks, precise decades and networks for computer devices, high resistance standards, and critical coil-assemblies are designed by Shallcross Engineers and built to meet your requirements. Forward your specifications for further information.

WANTED

Tough Insulation Problems

Put BH Fibreglas Sleeving or Tubing to work on tough insulation problems in your product or plant equipment and eliminate the possibilities of insulation breakdown. Whether the problem is excessive current load, vibration, extreme temperatures, greases, oils or moisture — or when flexi-

bility is essential — there is a BH product to solve it. Write for samples for laboratory and production testing. Include a few facts about your product, requirements, voltages and temperatures encountered. Let BH Fibreglas insulations do a better job for you. BENTLEY HARRIS MFG. CO., CONSHOHOCKEN, PA.

BH EXTRA FLEXIBLE FIBERGLAS SLEEVING

Remarkably flexible because no hardening varnish is used. Cuts without fraying and is non-combustible. Available in all colors. Basic sleeving withstands heat to 1200°F. Color unaffected up to 300°F.

BH SPECIAL TREATED FIBERGLAS SLEEVING

Heat resistant to 1200°F. Supplied in natural color only. Where colors are required, specify BH Extra Flexible. Cuts clean. Maximum flexibility. Unsaturated. Also available in 1/32" and 1/16" minimum wall.

OTHER BH FIBERGLAS PRODUCTS

Ben Har Special Treated Fibreglas Tubing: available in Grade A-1 — 7000V and Grade B-1 — 4000V. Flexibility combined with toughness. *Saturated Fibreglas Sleeving:* available in Grades C-1, C-2 and C-3. Special treated to prevent fraying.

BH "649"

A superior Fibreglas insulation at the price of ordinary cotton-base or rayon-base insulations. Available in Grades A-1, B-1, C-1, C-2. In all sizes from No. 24 to 3/8" inclusive. Retains rated dielectric strength even after rough handling, bending. Little or no dielectric loss in product assembly or use. Non-burning, non-fraying, non-stiffening. Stays supple after baking 12 hours at 300°F. No flowing, softening or blistering after 15 minutes at 425°F. Unimpaired after baking at 220°F. to 230°F. for 1,500 hours.

BH "1151" SILICONE RUBBER FIBERGLAS TUBING AND SLEEVING

A revolutionary, new flexible Class H (inorganic) Silicone insulation suitable for continuous operation at 400°F. No dielectric loss despite handling or bending. Won't craze or crack when used to cover bent wire. No deterioration at high spot temperature of 500°F. for 4 hours. Grades H-A-1 through H-C-2. Available in colors — in continuous coils for economical cutting.

KNOT IT . . . Take a length of BH "649". Knot it. Pull it as tight as you can. Twist it. Then loosen the knot. There is no cracking. No change in the dielectric strength.

INSULATING A BEND? . . . This is proof of BH "649" superiority. Lengths of BH "649" and Varnished Cotton-base Tubing were slipped over wire of corresponding Awg. Samples were bent to a "U" with a 1/2" radius — then baked for 98 hours at 221°F. Visible failure occurred at the bend of the varnished tubing — not in BH "649." Tests showed that — the varnished tubing dropped to a voltage strength of 12,000 volts. The BH "649" tubing only dropped from 10,400 volts to 9,400 volts.

BH Fibreglas* SLEEVINGS

*BH Non-Fraying Fibreglas Sleeveings are made by an exclusive Bentley, Harris process (U. S. Pat. No. 2393530). "Fibreglas" is Reg. TM of Owens-Corning Fibreglas Co.

COUPON

Bentley, Harris Manufacturing Company, Dept. BG-6, Conshohocken, Pa.

Please send literature and samples on BH "649" Fibreglas Tubing and Sleeving. BH "1151" Silicone Rubber Fibreglas Tubing and Sleeving. BH Special Treated Fibreglas Sleeving. BH Extra Flexible Fibreglas Sleeving. Ben Har Special Treated Fibreglas Sleeving. BH Rayon or Cotton-base Tubing and Sleeving.

RESISTORS

LARGEST SELECTION OF STOCK RESISTORS ever offered by any manufacturer is presented in W/L Catalog 15.

RELAYS

EXCEPTIONALLY LONG, TROUBLE-FREE LIFE is standard for W/L a-c and d-c magnetic relays. Write for data-packed Relay Catalog.

RHEOSTATS

CHROMIUM RING RHEOSTATS in 25 to 300 watt sizes are designed for smooth, gradual resistance change. Send for Bulletins 1105-16.

Know your three R's in control components ?

That's resistors, relays and rheostats we're talking about — and a man looking for these devices earns his A when he shops at Ward Leonard.

You get more performance per dollar . . . a wider selection of stock items . . . and quicker service on made-to-order controls from Ward Leonard than from anyone else.

Take a look at our basic three R's here. Then find out how well one of our components can meet your product's requirements by writing us. Ward Leonard Electric Co., 23 South St., Mount Vernon, N.Y.

MOTOR CONTROLS

Full line of a-c and d-c Ward Leonard motor starters and controllers, magnetic contactors and control accessories.
Write for Ward Leonard Motor Control Catalog.

DIMMERS

Auto-transformer, reactance and resistance type dimmers for theatre, auditorium, studio lighting control.
Write for Ward Leonard Dimmer Bulletins 71-78.

RHEOSTATS—Plate Type

Complete line of Ward Leonard VITROHM pressed steel plate type rheostats meets every requirement.

Ward Leonard field rheostats are offered in several multiples of field resistance values to meet various operating conditions. They are designed for a straight line relation between the steps of the rheostat and the field current.

VITROHM rectangular contact rheostats have been developed where a finer degree of control in electrically operated equipment is necessary.

Write for Ward Leonard Rheostat Bulletin 60a.

CHROMASTER

CHROMASTER is the new, simplified industrial chrome plating process for increasing life of cutting tools and wear parts three to ten times.

CHROMASTER plating units with built-in power supply are available in 50, 150, 250 amp. and larger sizes. Chromaster, economical, non-critical chrome solution, plates directly industrial steels, cast iron, and most non-ferrous metals.

Write Ward Leonard for complete CHROMASTER details.

For further information, write direct to Ward Leonard Electric Company, 23 South Street, Mount Vernon, New York

A COMPLETE LINE TRANSMITTERS • RECEIVERS • ACCESSORIES

to meet the requirements of any communications service

RADIO PAGING

MODEL 330 • 250W OUTPUT

The Model 330 is a complete, crystal controlled, amplitude modulated transmitter specifically designed for continuous-service operation in Radio Paging or similar applications. The self-contained modulator unit has ample capacity to permit 100% voice modulation at the rated carrier power output of 250 watts. This Transmitter is available for operation on 35.58 or 43.58 megacycles or on any other spot frequency within the range of 30 to 50 megacycles. Special filters and equipment shielding combine to reduce spurious and harmonic emissions to a very low value.

GROUND-TO-AIR

MODEL 310 • 50W OUTPUT

The Model 310 provides a complete two-way fixed station for operation on any single frequency from 118 to 132 mcs. within the aviation bands. The elements contained within the single compact housing include an amplitude modulated transmitter rated at 50 watts output, a crystal controlled receiver, speech with audio limiting control equipment and necessary power supplies.

The equipment is not limited in scope to this specific application however since its dependability and excellent performance characteristics are equally applicable to point-to-point, base station-to-vehicular mobile or similar VHF services.

EXCITERS

FREQUENCY SHIFT (F S K)

CONVERTERS

MODEL A4920

Model A4920 is a complete frequency shift terminal offering extremely high selectivity. Uses two separate crystal controlled receivers to permit dual diversity reception. Commercial type construction throughout. Highly conservative component rating . . . trouble-free and proven performance.

MODEL 5123

Model 5123 is a low-cost FSK converter offering excellent selectivity and S-N-R. Provides DC output to operate teletype as well as tone output. Three, optional frequency, audio tones are available for operation directly into carrier telephone systems.

MODEL A4722

Model A4722 provides a standard FSK transmitting keyer with exceptional stability at a moderate cost. Range 2 to 6 or 2.5 to 7 mcs. Separate power supply is included.

OTHER FREQUENCY SHIFT EQUIPMENT
Fixed frequency receiver for use with Model 5123 Converter . . . Crystal controlled oscillator for general purpose communications receivers . . . tone keyers . . . line amplifiers.

6 METER, 50 WATT

CIVIL DEFENSE

2 METER, 50 WATT

MODEL 234 • 50W OUTPUT

The Model 234 is a complete xtal controlled transmitter with a power output of 50 watts, intended for C-D or amateur operation within the frequency range from 50 to 54 mcs. This unit is designed to fully meet FCDA specs. Has output filter for harmonic reduction, modulation clipper/limiter followed by BP filter. Audio range is limited to 3 kcs. Emission is 6A3, amplitude modulated with band-width attenuated beyond 6 kcs. Excellent construction, conservatively rated components. Unit is similar to Model 309.

MODEL 309 • 50W OUTPUT

Model 309 is a complete xtal controlled transmitter with a power output of 50 watts, intended for C-D or amateur operation within the frequency range from 144 to 148 mcs. This unit is designed to fully comply with FCDA specs. Has LP output filter for harmonic reduction, modulation clipper/limiter followed by BP filter. Audio range limited to 3 kcs. Emission is 6A3, amplitude, modulated with band-width attenuated beyond 6 kcs. A carefully designed, conservatively rated transmitter. Unit is similar to Model 234.

OTHER EQUIPMENT FOR C-D OR AMATEUR

Model 237, 250W output transmitter, 1.75 to 1.8 mcs . . . Model 222 Mobile Transmitter, 144-148 mcs . . . Model 226 Mobile Receiver, 144-148 mcs

TRIMPOTS

TRADE MARK

**PROVIDE THE ULTIMATE
 IN CIRCUIT TRIMMING**

Simple screwdriver adjustment...

The **TRIMPOT** is a 25 turn, fully adjustable wire-wound potentiometer, designed and manufactured exclusively by BOURNS Laboratories. Electrical settings in increments of 1/4 to 1/2 % are securely maintained during vibration of 20 G's up to 2,000 cps or sustained acceleration of 100 G's. BOURNS' unique self-locking design eliminates cumbersome locknuts. Power rating is 1/4 watt at 100° F. Standard resistance values from 250 ohms to 25,000 ohms are available for immediate delivery. Information on higher and lower resistances on request.

BOURNS **TRIMPOTS** are accepted as standard components by aircraft and missile manufacturers and major industrial corporations.

**9 TRIMPOTS
 TAKE LESS
 SPACE THAN
 A 2¢ STAMP**

Tiny cross-sectional size—only 1/4" x 5/16"—and rectangular shape save valuable panel space. Instruments are easy to mount individually or in stacked assemblies with two standard screws through the body eyelets.

BOURNS also manufactures precision potentiometers to measure Linear Motion; Gage; Absolute, and Differential Pressure and Acceleration.

MFRS. OF THE WORLD FAMOUS RECORDIO

commercial equivalent of **TS-148/UP**
SPECTRUM ANALYZER

ELECTRICAL DESCRIPTION—The Spectrum Analyzer, a self contained portable unit, is a very sensitive microwave receiver whose output is displayed on a 3 inch cathode-ray tube. The analyzer employs a resonant cavity type frequency-meter calibrated to read directly in megacycles, a frequency-swept (Velocity Modulated) R-F oscillator, a crystal mixer and associated plumbing, narrow band I-F amplifiers, and both regulated and unregulated power supplies.

This versatile equipment provides a visual indication of the spectra of R-F oscillators within the range of 8470 to 9630 megacycles per second as a function of power versus frequency. Other uses are:

1. As a frequency meter for measuring frequencies of resonant cavities, echo boxes, magnetrons, and local oscillators within the range of 8470 to 9630 MC/S. The Analyzer is so sensitive that a magnetron signal can usually be picked up at some distance from the source without the use of connecting cables.
2. As a measuring device for setting the frequency of radar and beacon local oscillators in radar sets.
3. As a frequency modulated oscillator for tuning T/R Boxes and R/T Boxes in transmitter converters. It can be used to check magnetron pulling and AFC circuits.
4. As a performance tester for local oscillator tubes. Type 2K25 and 723A/B tubes may be tested by inserting them in the analyzer R-F oscillator socket and checking their output curves on the analyzer scope.
5. As a means of measuring band-widths of resonant cavities.

MECHANICAL DESCRIPTION—The equipment is built into a sheet aluminum housing. The electrical components are built on an aluminum chassis located inside the removable dust cover. As many components as possible are mounted on terminal boards to facilitate quick and easy servicing. The Analyzer is transported with an Auxiliary and Spare Parts Box in a carrying case. The Analyzer is cushioned in a shock mounted carriage. This carriage can be removed from the carrying case if it is necessary to provide a shock mounting for the Analyzer when it is used outside of the carrying case.

SPECIFICATIONS

POWER SUPPLY: 50-1200 CPS; 105-125 volts; 125 watts.
TUNING RANGE at least 8470 MC/S to 9630 MC/S.
FREQUENCY METER RANGE: 8470 MC/S to 9630 MC/S.
SWEEP FREQUENCIES continuously variable from 10 to 30 CPS.
SPECTRUM AMPLITUDE ATTENUATION variable from 3 to 70 db, uncalibrated.
OPERATING TEMPERATURE RANGE: -40°C. to +55°C.
FREQUENCY SWING OF ANALYZER RF OSCILLATOR: 40 to 50 MC/S.
OVERALL I-F BANDWIDTH AT HALF-POWER POINTS: 50 KC/S.
R-F SENSITIVITY at least -40 dbm for 1 inch scope deflection.
MAXIMUM DISPERSION OF SPECTRA: 1.5 MC/S per inch.
POWER OUTPUT: Approx. 1 milliwatt.

PACKAGED ELECTRONIC COMPONENTS

for design and production

ECONOMY

Servomechanisms, Inc., pioneers in the "packaged function" technique, offers the economy-minded designer and manufacturer of electronic and electromechanical control systems, outstanding savings in development and production costs through the use of plug-in electronic components. These standard plug-in components may be used immediately in the laboratory breadboard stage or in quantity production, thus relieving the user of design and production problems and reducing the electronic plug-in components to a purchased parts status.

This advanced design philosophy provides a new standard of **reliability, interchangeability, and ease of maintenance.** Servomechanisms, Inc., facilities are available for the development and production of special "packaged electronic functions" and complete systems.

A COMPLETE LINE OF RELAYS SERVING AMERICAN INDUSTRY

Leach RELAYS

**TROUBLE-FREE
PERFORMANCE**

"as specified"

Because all *Leach* Relays are *quality engineered* for dependable duty... they are specified *first* by leading manufacturers of industrial equipment of all types. If your equipment demands relays that are first and foremost, more dependable and longer lasting, specify *Leach* Relays... they're more dependable... *performance proves it*. Whatever your relay control problem... it's a challenge to *Leach*. Illustrated are but a few of the wide selection *Leach* provides industry, as standard equipment.

RELAYS SHOWN ABOVE CAN BE SUPPLIED WITH VARIOUS CONTACT ARRANGEMENTS. WRITE FOR DETAILS.

POWER RESISTORS

10-DAY DELIVERY

Vitreous Enameled Power Resistors

A. Fixed Wire-Wound—JAN and MIL approved in both inductive and non-inductive round and flat types.

B. Adjustable resistors from 10 to 200 watts.

C. Fixed Wire-Wound from 5 to 200 watts. Made to meet JAN and MIL specifications, inductive and non-inductive. Supplied with as many taps as required.

D. Ferrule type resistors rated from 25 to 200 watts with ferrule terminations, made to JAN and MIL specifications.

Custom Made Power Resistors

E. Wire-Wound Bobbin can be held to $\pm 0.1\%$ of specified re-

sistance tolerances or closer. Power ratings from $\frac{1}{4}$ watt.

F. Potentiometer Strip a flexible component designed for antenna rotators.

G. Specialized resistors designed by our engineering staff to answer circuit problems where size and space are factors.

H. CIMALOHM metal case chassis mounting resistors—wide ohmage and wattage ranges. Mounting centers made to specifications. Single, tapped and tapped-spaced.

Miniature Power Resistors

I. HAN-D-OHM 5 and 10 watt ceramic encased resistors to 5,000 ohms. Available with silicone coating for extra moisture-proofing and shock resistance.

Send your specifications for quantity prices

Resistors illustrated are some of the many specialized wire-wound resistors designed and mass-produced by CIMA for leading makers of electronic equipment.

CIMA has or can make a resistor to solve your wire-wound resistor problems. Resistors we manufacture comply with and exceed JAN and MIL specifications and standards of quality. CIMA'S lower price and dependable 10-day delivery puts the name CIMA first on the lists of many purchasing agents.

electronics BUYERS' GUIDE
ABC

History's first practical silver-zinc battery — Yardney Silvercel makes full use of ion exchange techniques perfected through Yardney research—and is available in capacities from 1/2 to over 100 ampere-hours. Models up to 1000 ampere-hours and more now under evaluation. Three series meet specific application needs:

LR — for long life at discharge currents smaller than the one-hour rate.

HR — for very high discharge currents.
 HRV* (*—longer life) — approaching high discharge requirements where extended life is desired.

Yardney Silvercel Batteries feature

LIGHT WEIGHT—up to 1/6 that of conventional batteries of comparable capacity.

SMALL SIZE—up to 1/5 that of conventional batteries of comparable capacity.

LONG LIFE—compares favorably with conventional batteries.

FLAT VOLTAGE—at any current drain to the end of full capacity.

HIGH DISCHARGE—continuous currents of more than ten times the numerical ampere-hour capacity value available, with little attendant capacity loss—substantially greater discharges for pulse applications.

EFFICIENT CHARGE—at currents up to one-hour-rate magnitudes.

WITHSTANDS STRESS—proven dependable under severe conditions of shock, vibration and acceleration.

WIDE TEMPERATURE RANGE—operates efficiently at 165° F; for low-temperature operation, may be short-circuit preheated within minutes at temperatures approaching—60° F with negligible capacity dissipation.

EXTENDED SHELF LIFE—up to one year in charged or discharged condition, with minimal preparation.

MINIMUM MAINTENANCE—requires little or no attention.

SPILL-PROOF CONSTRUCTION—essentially gas-free operation.

BATTERIES—available in cells or batteries of any voltage.

TYPICAL MODELS OF YARDNEY SILVERCEL

HR 85

| | |
|---------------------------------|--------------------|
| Nominal Capacity | 100.0 ampere-hours |
| Weight (filled) | 53.0 ounces |

Advertisers: How about the **NUCLEAR** field?

There are a good many adver-
tisers using this BUYERS' GUIDE
who should also be advertising in
NUCLEONICS.

Particularly in instrumentation
and laboratory equipment, there
is a cross-over of use in the elec-
tronic and in the nuclear field.

But, there is very little cross-
over in the subscriber lists of the
two publications — a matter of a
few percentage points.

It is quite possible that you are
doing an effective presentation of
your products and abilities in this
excellent issue, but are missing
such presentation before one of
the fastest growing fields in the
country's history — the field of
atomic energy.

The sales representatives of
ELECTRONICS are also the sales
representatives of NUCLEONICS.
They have much evidence pointing
to the opportunities in this great
NEW field. Ask them to show you
what your potentials can be.

MICROWAVE TEST EQUIPMENT . . . by Amerac

CO-AXIAL LINE WAVEMETERS

Models #227, #228, #229, #230 and #231—for use by either the transmission or absorption method, feature extreme mechanical stability, high accuracy of measurement and excellent frequency stability throughout the temperature range of 10°C to 40°C. Sloping panel, with easy-to-read Root counter and large meter makes for easy observation from most any angle.

Specifications

| Model | Frequency | Approximate Loaded Q | Length | Depth | Height |
|-------|-------------|----------------------|--------|--------|--------|
| #227 | 600-1800MC | 1000 | | | |
| #228 | 1700-2500MC | 1500 | 14" | 6-1/2" | 5-1/2" |
| #229 | 2300-4600MC | 2000 | 8" | 6-1/2" | 5-1/2" |
| #230 | 3500-6500MC | 2500 | 8" | 6-1/2" | 5-1/2" |
| #231 | 5800-8200MC | 2500 | 8" | 6-1/2" | 5-1/2" |

Type N constant impedance connectors for input.
BNC or UHF co-axial fittings for external video connection.
Power handling capability from 0.5mw to 1 watt (absorption).
Power handling capability from 1mw to 25 watts (transmission).

ROCKET TUBE CAVITY OSCILLATOR

The #192A is a small-size co-axial line cavity oscillator employing the Sylvania UHF Planar Triode, which provides a stable R.F. signal source in both a CW and a pulse model. It features a single knob control and utilizes fixed feedback.

SPECIFICATIONS

Frequency coverage—1000 to 4000 MC.
Tuning range—400 MC/S.
Pulse operation and max. plate operation—2000 V.
CW operation—250 V.
Output power—100 m.w. (average) at 4 Kmc.
Size—8" long, 1-5/16" diameter.

KLYSTRON CAVITY OSCILLATOR

Designed to accommodate 6BL6 and 6BM6 klystrons, the Type 198 Cavity Oscillator gives a CW signal, tunable over a frequency range from 1 Kmc to 4 Kmc. Full performance from these tubes can be gained, due to Amerac's exacting accuracy of precision machining of component parts.

FEATURES and SPECIFICATIONS

Tuning accuracy in center frequencies of ± 1 MC.
A quick-release tube socket assembly for easy tube changing.
Standard rack panel for neat assembly into your equipment.
Silver plated conducting surfaces for high RF surface conductivity.
Rhodium flash for minimum corrosion.
Female type N co-axial output connection.
Size (including panel)—19" wide, 5-1/4" high, 12" deep.

Amerac also designs and manufactures—

Directional Couplers, Transmission Line Components, Antennas, Crystal Mixers, Attenuators, Waveguide Terminations (low and high power), Co-axial Tuners, Adapters and other precision microwave equipment.

OF *Special* USE

HANDSETS

**HANDSET
STYLE No. 333**

Designed to meet exacting requirements of specific, as well as general telephone applications. Made of polished "impact" phenolic. Available in numerous combinations of receivers and transmitters, switches, cordage, and termination—to meet all requirements.

HANDSET SWITCH—STYLE No. 238

Compact, positive-acting, long-life, shorting type switch with detent action. Contacts and shorting bar made of solid silver. Designed specifically for Roanwell Handsets, but can be used in many other applications.

HANDSET SWITCH—STYLE No. 961

Exclusive leaf-type detent switch designed for long life, ease of operation, and reliability. Life to exceed 1 million operations under normal operating conditions. Similar switches available with detent soft-type action.

**CONFIDENCER
STYLE No. 916**

Noise-cancelling carbon microphone — designed, developed, manufactured exclusively by Roanwell. Permits speech to be transmitted clearly while neutralizing unwanted noises. Excellent anti-feedback characteristics.

APPROVED FOR USE
BY THE BELL TELEPHONE COMPANIES

**CARBON
TRANSMITTER RF-1
STYLE No. 0037**

Newly developed, this extremely dependable microphone combines high output with long life.

Weather resistant, made to meet or exceed usual government specifications regarding humidity, salt spray and immersion. Electrically and mechanically interchangeable with most F-1 type transmitters.

**SWITCH BOX
HANGER ASSEMBLY
STYLE No. 916**

Main housing sturdily constructed of cast aluminum black wr... finish. Patented three point snap action prevents accidental ejection of handset. Sw... ing combinations from S.P.D.T. to T.P.

New

RA-1H RECEIVER

- Provides optimum audibility.
- Almost 4 times the acoustical energy supplied by receivers commonly in use.
- 5 D.B. higher output than standard receivers.
- Maximum performance even in high humidity.

PARTICULARLY USEFUL IN: Rural areas • Noisy locations
• Long distance calls • Conference calls—where 2 or more
telephones are connected in parallel • Centralized
dictating systems • Mobile radio equipment.

THE MB MANUFACTURING COMPANY, INC.

1070 State Street, New Haven 11, Conn.

FOR VIBRATION TESTING

MODEL C-25

MB VIBRATION EXCITERS and CALIBRATORS

Producing results quickly, dependably, and often *visually*, MB Exciters have many important applications. For example: (1) Fatigue testing of mechanical and electrical structures to destruction under dynamic loads . . . (2) Determination of noise sources in automobiles, bodies and chassis, air conditioning equipment, blowers and similar equipment . . . (3) Shake testing of electrical components such as relays, switches or radio chassis to determine the ability of components to operate under high vibratory loads . . . (4) Determination of damping characteristics of rubber, steel, brass, plastics and other materials . . . (5) Identification of resonant frequencies and modes. These exciters also provide a convenient means for determining natural modes of wings, stabilizers, fin and control surfaces on aircraft structures.

These exciters are designed to conduct vibration tests to MIL-E-5272 and 41065-B and other specifications.

| Model No. | Rated Force | Total Stroke | Power Supply | Usable Range c.p.s. |
|-----------|-------------|--------------|--------------|---------------------|
| S-D. | 10 lb. | 1/2 in. | Electronic | 20 to 20,000 |
| C-31* | 25 lb. | 1/2 in. | Electronic | 4 to 70,000 |
| C-1* | 50 lb. | 1/2 in. | Electronic | 4 to 70,000 |
| C-11* | 50 lb. | 1/2 in. | Electronic | 4 to 70,000 |
| S-3 | 200 lb. | 1 in. | [Rotating] | 3 to 500 |
| C-5 | 750 lb. | 1 in. | [Rotating] | 3 to 2000 |
| C-25 | 2500 lb. | 1/2 in. | [Rotating] | 3 to 1000 |
| C-100 | 10,000 lb. | 1/2 in. | [Rotating] | 3 to 1000 |
| C-250 | 25,000 lb. | 1/2 in. | [Rotating] | 3 to 1000 |
| C-500 | 50,000 lb. | 1/2 in. | [Rotating] | 3 to 1000 |

* Also suitable for calibration of vibration pickups.

Model ACS-25 automatic cycling system for MB Models C-5 and C-25 Vibration Exciters. Exceeds requirements of MIL-E-5272. Provides for (1) Automatic control of frequency and acceleration or amplitude. (2) Automatic amplitude or acceleration control, manual frequency variation.

FOR VIBRATION MEASUREMENTS

MB VIBRATION METERS

Precision Model M-1 and M-3 meters offer complete, compact units for vibration measurements when used in conjunction with the MB vibration pickup. Provide for accurate readings of accelerations, velocities, amplitudes. Simple, rugged, battery- or AC-operated, and portable, these instruments are outstanding for quality control or research.

MB VIBRATION PICKUPS

Are sensitive to low amplitude vibration . . . can be used with wide range of equipment . . . simple field adjustment converts from horizontal to vertical use . . . electrically damped . . . maintains calibration over wide temperature ranges . . . resonant frequency below 5 c.p.s. Several models including Type 122 which is usable at temperatures up to 500°F.

FOR VIBRATION ISOLATION

MIL-I-5432 (AN-I-16a) can be met with Isomode* Type 17 vibration isolator which are available for loadings of 1/2 to 100 pounds per unit. An outstanding feature is the equal spring rate in every direction.

ISOMODE* INDUSTRIAL-TYPE ISOLATORS—these units provide large deflection ratings together with high load capacity, small size, and exceptional stability. Have equal spring rates in all directions—mount at any angle—absorb vibration for every plane. Unit load-range 50 lbs. to 2500 lbs. Write for the *Isomode Design Chart*.

OTHER TYPE ISOLATORS also available, including units for special applications Isomode grommets; mounts with small dimensions. Contact us on your specific requirements.

BUYERS' GUIDE

Only Karp can offer you these deep cuts in your enclosure costs

- Over 3000 stock tools and dies to cut your new tooling costs.
- Modern 88,000 sq. ft. plant and facilities make possible *mass production techniques*...cut your costs to the bone.
- Complete "one-stop" service: fabrication, finishing and assembly done in *one* plant—eliminates extra hidden handling costs.
- Our production output can be geared to your needs—cutting your inventory needs.
- Competent engineering and design counsel available.

Whether you need ten or ten thousand units, we can prove to you that our initial cost is low, and all the extra hidden costs are eliminated. Send us your blueprints, samples or sketches. Phone or write. A prompt quotation will follow.

MOST COMPLETE
FACILITIES FOR

ENGINEERED SHEET METAL FABRICATION

SILVER GRAPHALLOY BRUSHES

Silver GRAPHALLOY Brushes have been widely used because of LOW and CONSTANT CONTACT DROP, EXTREMELY LOW ELECTRICAL NOISE and LONG LIFE . . . especially for *rotating strain gages, thermocouple circuits, synchros, guided missiles, fire control equipment, transducers, radar and sonar equipment, servo-mechanisms, selsyns and dynamotors.*

The GRAPHALLOY process was patented 40 years ago and the name GRAPHALLOY has been our copyrighted trademark since that time. While this company has been selling GRAPHALLOY for the past 40 years recent developments have added materially to its properties. Over 30 grades are now used in a wide variety of applications. Silver GRAPHALLOY Brushes on 1/2"-diameter coin silver slip rings have been used successfully in highly critical electrical circuits at speeds up to 100,000 R.P.M. *Our Engineering Department will assist in determining the exact grade of GRAPHALLOY for your needs.*

BRUSH AND SPRING ASSEMBLY

Silver GRAPHALLOY Brushes are available for the standard Brush Holders described in the next column. Springs are supplied, as part of the assembly, to give the correct brush pressure for each brush application. Shunts are provided to insure extremely low electrical noise level and for carrying heavy currents.

COIN SILVER SLIP RINGS

Standard Coin Silver Slip Rings, both *cylindrical* and *flat* types, are illustrated below. We recommend the cylindrical type ring with three brushes per ring . . . spaced at 120°. The cylindrical type are designed for press fitting over standard steel shafting. The flat type rings are designed for nesting either on an insulated plate or for molding into insulation. Insulated slip rings of either type or slip ring assemblies can be furnished with leads attached.

FLAT

CYLINDRICAL

Standard "Flat" rings have 1/4" radial contact surface and 1/8" radial spacing between adjacent rings.

DIAGRAM BRUSH and SLIP RING ASSEMBLY

CONNECTOR (GARTER SPRINGS)

| Garter Spring Connectors | Brush Size | Brush Holder |
|--------------------------|------------|--------------|
| 127-9 | 1/8 sq. | 14326 |
| 127-9 | 5/32 sq. | 11509 |
| 127-10 | 3/16 sq. | 11570 |
| 127-14 | 1/4 sq. | 11527 |

These silver plated coil spring Connectors make for positive electrical connection to the brass body of the brush holder by snapping into the groove on the holder. The connecting lead can be pre-soldered to the Connector.

electrical
requirements

CYLINDRICAL SLIP RING and BRUSH HOLDER ASSEMBLY

CYLINDRICAL SLIP RING ASSEMBLY

GRAPHALLOY BRUSHES

are used on
such equipment as . . .

- SERVO SYSTEMS
- SYNCHROS
- SELSYNS
- CHOPPERS
- RADAR
- GYROS
- INVERTERS
- PULSE SYSTEMS
- GUIDED MISSILES
- DIGITAL COMPUTERS
- WAVE GUIDES
- SONAR
- TRANSDUCERS
- TORQUE INDICATORS

FLAT SLIP RING ASSEMBLY

ating equipment, the measure-
of changes in resistivity or emf
be brought out by means of slip
and brushes. To obtain intelli-
information under these condi-
the extraneous circuit noise level
be kept below the signal level.
Silver GRAPHALLOY Brushes, in
ination with Coin Silver Slip
n, reduce the extraneous noise
to extremely low values, they have

been used extensively in rotating strain
gage and thermocouple applications.
Noise levels as low as 20-50 microhms
in a 100-ohm circuit have been obtained
with Silver GRAPHALLOY Brushes. (We
will develop and manufacture your
complete assembly!) Commutators and
choppers for the production of square
wave signals or for pulse systems can
be manufactured to meet your circuit
requirements.

135-10

135-8

Our Engineering Department
will develop or
assist you in developing
special components
and assemblies.

GRAPHALLOY CONTACTS

GRAPHALLOY, because of its inherent non-weld-
ing and arc-quenching characteristics, is used
for contacts . . . especially where positive
action of a circuit is required.

GRAPHALLOY BUSHINGS

With military requirements demanding operation
from -100° to $+250^{\circ}$ F., GRAPHALLOY Bush-
ings, which are inherently oilless, have been used
successfully in potentiometers, synchros, cameras,
instruments and missiles. Properly designed
GRAPHALLOY Bushings will take considerable
shock (50 g.). They have replaced oil-lubricated
bushings for the following reasons:

- 1) Lower friction at room temperatures.
- 2) No oil to solidify at low temperatures.
- 3) No oil to carbonize at prolonged elevated temperatures.

ELECTRICAL INDICATING INSTRUMENTS

HERMETICALLY SEALED METERS

HM2 (2½")
HM3 (3½")
HM4 (4½")

HM Series

Marion true glass-to-metal hermetic sealing . . . long accurate life under adverse conditions of humidity, dust and hazardous atmospheres. Magnetically shielded.

MARION "REGULARS"

phenolic and metal cases — designed for commercial application where hermetic sealing or ruggedization is not required. All Alnico construction. Reliable high torque performance in moderate price range.

MODEL 52N Series 52

Accurate dependable service in smallest practical form. Model 52N (JAN MR24, MR25) 2½" round phenolic case. 52S, 2½" rectangular phenolic case. Model 52 RM, narrow flange brass case. Also available in brass case without flange, 52RMS.

MODEL 53SN Series 53

Standard 3" commercial rectangular type (Model 53SN). Also available in 3½" round phenolic case (Model 53RN) (JAN MR34, MR35).

MODEL 55

Large 4½" x 4½". Critical readability on 100° scale. Extremely accurate. Most popular case style in test equipment field.

MODEL 56

6½" x 5¼" phenolic case. Large open face with 100° scale in 5½" arc.

MODEL 57

8½" x 7" open face, extra long scale. More than a mere overgrown 3" meter. Enlarged pole shoes — higher torque movement — higher damping factor. Accurate within 1%.

RUGGEDIZED METERS

HS Series

HERMETICALLY SEALED

HS1 (1½")

HS2 (2½")

HS3 (3½")

Exceptionally accurate and sensitive even under extreme conditions of shock, vibration, mechanical stress or strain, weather and climate. Outstanding performance in any application. 2½" and 3½" types have standard A.S.A. dimensions.

RELATED PRODUCTS

NULL INDICATORS

HS2 (2½") HS3 (3½")

Ruggedized, Hermetically Sealed. Used primarily as bridge and potentiometer balance indicators and where an instrument with very high sensitivity about 1 µa per mm. or higher; the meter's shaded pole face shielded core construction give sharply logarithmic attenuation as it departs from null point and provides ample overload protection.

HM2ET (2½")

HM3ET (3½")

ELAPSED TIME INDICATORS

Two sizes, 2½" and 3½" standard JAN dimensions panel mounting. Operating range -55°C to +85°C. Hermetically sealed. Magnetically shielded. Registers in 1/10 hour steps to 9999.9 or hours to 99999. Durable, self-starting synchronous motor. Available for 110-125, 220-250 volts, 50 or 60 cycles A.C.

M-2

MULTI-RANGE METER TESTER

The only instrument of its type available today. Used for production inspection and calibration of electrical indicating instruments and to maintain high measuring standards in the laboratory. It is also used as a precise production limit bridge permitting acceptance tolerances to be set for any value from ±½% to ±20%. Overall accuracy for current measurements better than ¼ of 1%. Resistance range 0-5000 ohms. Power source 115V AC 60 cycles. Complete, no accessories required.

MARION MODEL PM1 PORTABLE BENCH TYPE INDUCTION SOLDERING UNIT

Improves and speeds up production of small components. Low cost, low powered and portable. Size: 15¾" x 21½" x 15". 150 lbs. Power supply: 115 volts 60 cycles. Draws 775 watts full load, 100 watts standby.

NEW CONFUSION-PROOF MARION MULTI-DIALER

A multi-scale instrument which exposes only one scale to view at a time. At the same time, it automatically switches the appropriate internal or external circuitry associated with that scale. Five self-contained ranges in volts, milliamperes, microamperes and amperes. Ideal for panel, bench or field.

This Story is full of Holes...

20 1/8" x 15 1/8"

1808 to be ACCURATE!

WHEN the W. L. Maxson Corp. and Electronic Associates, Inc., needed gear train panels for their computing machines, *Universal* got the nod for one important reason! Notwithstanding our years of experience and an enviable record for producing precision work—this job came to us primarily because we had the equipment* to do the job best!

Working to tolerances of $\pm .0005$ between holes, and tolerances of $\pm .0002$ on the holes themselves, interior of holes finished to 4 to 6 micro-inches, this precision boring operation on 24 ST aluminum sheets, is just one of the many jobs of its kind constantly "in work" at our plant.

*The Jig Boring Machine that handled this job, employs an optical measuring system instead of the usual threaded spindle, this machine attains an accuracy undreamed of in other machines.

"Accuracy Is A
 UNIVERSAL Word"

Thomas A. Edison, Inc.

Hermetically Sealed Time Delay Relay Model 501

Glass-sealed thermal action Time Delay Relay for cathode protection in high voltage electronic tubes, gyro erection in fire control stabilizers and aircraft autopilots and hundreds of other uses involving a time delay in an electrical circuit

Time delays: 2 seconds to 300 seconds
 Heater voltages: 6.3, 26.5, and 117 (intermediate voltages available in special circumstances)
 Heater input: 5 watts nominal (continuous excitation)
 Contacts: SPST normally open or closed. Rated for 6 amperes max. at 450 volts a.c. or d.c.
 Ambient: Compensated for -60°C to $+85^{\circ}\text{C}$

Vibration: Resists $\frac{1}{16}$ " overall amplitude at 55 cps
 Tolerances: Heater voltage: Positive contact operation with variation of $\pm 10\%$. Operating time at 25°C : $\pm 15\%$
 Weight: $1\frac{1}{4}$ to $2\frac{1}{4}$ oz.
 Seated height: $3\frac{1}{4}$ "
 Diameter: 1.275 " max.
 Shock: Resists impact of 50g

Model 207

Time delays: 5 seconds to 75 seconds
 Heater voltages: 6.3 and 27.5
 Heater input: 2.0 watts (continuous excitation)
 Contacts: SPST normally open or closed. Rated for 2.5 amperes at 125 volts a.c.; 1.0 ampere at 125 volts d.c.
 Ambient: Compensated for -60 to $+85^{\circ}\text{C}$
 Base: 7-pin, miniature button
 Seated height: $2\frac{1}{4}$ "
 Diameter: $\frac{3}{4}$ "

Model 216

Time delays: 5 seconds to 75 seconds
 Heater voltages: 6.3 and 27.5
 Heater input: 2.0 watts (continuous excitation)
 Contacts: SPST normally open or closed. Rated for 2.5 amperes at 125 volts a.c.; 1.0 ampere at 125 volts d.c.
 Ambient: Compensated for -60 to $+85^{\circ}\text{C}$
 Base: 9-pin, miniature button
 Seated height: $2\frac{3}{8}$ "
 Diameter: $\frac{7}{8}$ "

Hermetically Sealed Thermostats

STANDARD TYPE S1-1A

Manufacturing tolerance: $\pm 0.5^{\circ}\text{C}$
 Control sensitivity: Will hold temperature within $\pm 0.1^{\circ}\text{C}$ at low contact load when properly applied.
 Maximum load: 1.0 ampere
 Maximum voltage: 250 a.c. or d.c.
 Maximum temperature: 150°C
 Diameter: .388 inches
 Length: $2\frac{1}{2}$ inches

STANDARD TYPE S1-2A

Manufacturing tolerance: $\pm 2.5^{\circ}\text{C}$
 Maximum load: 0.5 ampere; 1.0 ampere in alarm service
 Maximum voltage: 250 a.c. or d.c.
 Maximum temperature: 190°C
 Diameter: .388 inches
 Length: $2\frac{1}{2}$ inches
Approved by Underwriter's Labs for fire alarm service with spacing 15 feet between centers.

MECHANICALLY SEALED Miniature, Model 210

Manufacturing tolerance: $\pm 5^{\circ}\text{F}$
 Maximum load: 1 ampere at 115 volts a.c.; 0.5 ampere at 115 volts d.c.
 Maximum voltage: 125 a.c. or d.c.
 Maximum temperature: 350°F
 Adjustability: $\pm 60^{\circ}\text{F}$ from original setting
 Diameter: .318 inch
 Length: $1\frac{1}{4}$ inches

STANDARD TYPE D8-2A

Manufacturing tolerance: $\pm 2.5^{\circ}\text{C}$
 Maximum load: 8.0 amperes
 Maximum watts: 1000
 Maximum voltage: 250 a.c. or d.c.
 Maximum temperature: 320°C
 Diameter: .550 inch
 Length: $2\frac{1}{4}$ inches

These precision-made bimetallic thermostats are permanently sealed in glass and enclosed with an inert arc-quenching gas fill. Because of their lifetime protection from corrosion and contaminating substances, these thermostats are widely used as fire detectors in marine and industrial applications. Their close temperature control and exceptional stability make them ideal for crystal oven ambient compensation and other exacting temperature control requirements.

When ordering any thermostat, give following information:
 Operating voltage and current
 Temperature setting
 Contact arrangement—are contacts to open or close on rising temperature?
 Medium to be used in
 Load—resistive or inductive

Magnetic Control Relay

Operates directly from thermocouple, photocell or vacuum tube plate current. Polarized operating characteristic makes it ideal for use as a null detector in a universally-used bridge circuit. Power consumption is so low that this Relay can be used in servo control circuits without danger of draining power from other system components. These relays have proved their reliability in military and commercial airborne applications.

Closing current: Contacts close on input currents from 30 microamperes d.c. to 12.5 milliamperes d.c. Lower closing currents available in special circumstances.

Coils: Formvar-coated copper. Resistances from 0.5 ohm to 23,600 ohms. Normal closing current may be increased 10,000 times without adverse effects.

Contacts: SPST or SPDT normally open or closed. Rated for 1/3 ampere at 28 volts d.c.

Hermetically sealed: Model 220

Gasket sealed: Model 219

Vibration and shock resistant: Relay unenergized will withstand shock of 50g in all planes without damage or change in calibration.

When ordering, specify:

MODEL NO. TYPE OF BASE CONTACT STYLE COIL RESISTANCE CLOSING CURRENT IN MILLIAMPERES D.C.

Model 219—Gasket Sealed

Model 220—Hermetically Sealed

Antenna Cutout

Hermetically sealed in glass

A SPST normally closed hot-wire type of switch designed to open when the current through the wire reaches 125 milliamperes. This switch serves to protect the input circuits of radio receivers from over-currents induced by nearby transmitting equipment.

Operating current: 125 milliamperes ± 0.25
 Ambient: Compensated for 0 to 90° C
 Shock: No damage under 60g in all directions
 Diameter: 9/16 inch nominal
 Length: 2 1/8 inches

**SPECIAL PURPOSE
INSULATED WIRE**

THE WILLIAM

AND CO., INC., WILLIMANTIC, CONN.

MINIATURIZATION WIRE

Specially developed for use in electronic equipment within the range of -55°C to $+105^{\circ}\text{C}$, and maximum operating voltage of 600 volts rms. This wire is ideal for use in miniaturized equipment as both hook-up wire and lead wire for transformers, chokes and other components, where space is at a premium and operating temperatures are high. Available in both standard and flexible . . . in solid colors or candy striped with 1, 2 or 3 tracers.

The primary insulation is Turbo 540, an extruded polyvinyl chloride compound that is resistant to the effects of water, aircraft engine fuels, hydraulic fluids, ethylene glycol, dilute acids, alkalis and fungus. Over the primary insulation there is an extruded jacket of nylon to give added mechanical protection and abrasion resistance.

LOW TENSION AIRCRAFT WIRE & CABLE

The conductor consists of a stranded tinned copper wire. The primary insulation is an extruded polyvinyl chloride compound that is resistant to the effects of water, oils, aircraft engine fuels, hydraulic fluids, ethylene glycol, alcohol, dilute acids, alkalis and fungus. This wire has excellent electrical properties and has a

rated working voltage of 600 volts rms. This wire has a protective nylon jacket, with or without shield.

For general use. Low tension construction has excellent electrical and physical characteristics, light weight, and low space

BULLETIN A-4662 GIVES MORE INFORMATION ABOUT TURBO INSULATION. COPIES AVAILABLE ON REQUEST.

put your mind at ease with ... METAL FILM RESISTORS

NOBLELOY TYPE NF

A miniature type precision resistor with metal film deposited on a low loss ceramic carrier. A layer of vitreous enamel protects metal film against unusual atmosphere conditions. Specifically designed to insure initial accuracy and high stability. Available in ½ watt ratings, resistance range 1 ohm to 3 megohm and tolerances of 1%, 2% and 5%.

NOBLELOY TYPE X & PX

Another resistor with metal film deposited on low loss ceramic carrier with excellent characteristics for critical applications. Available in two styles type X and PX. Watt ratings ½, 1, 2 and 5 watt. Resistance range 1 ohm to 30 megohm. Tolerances of ½%, 1%, 2% and 5%.

METAL CLADS

For Printed Circuit Metal Clad Stock

Metal Clad laminates are finding wide usage in printed circuit applications. Printed circuit technique involves the printing of an electronic circuit upon a metal clad laminate surface using an acid resisting ink. In a subsequent acid etching operation, the unwanted metal foil surface which is not under the printed portion of the foil, is etched away leaving only the circuit pattern or, that part of the metal foil which is under the inked portion of the laminate. Write for technical bulletin.

Dilecto METAL CLADS

Printed circuits depend upon stable, uniform core material and Dilecto has years of proven insulation service (Dilecto is a lamination thermo-setting plastic made only by C-D-F from paper, cotton, or asbestos fabric base, or a mat base). Normally, only the electrical grades of phenolic resin laminates, such as grades XXP-24 and XXXP-26, are used for metal clad sheet stock. Grades such as XXP-13, XXX-13, or GB-28M may be supplied with copper clad surfaces upon special order. Outstanding are metal clad C-D-F grades XXXP-24 and XXXP-26. These are hot pressing grades with high insulation resistance. New C-D-F Catalog E-54 gives complete data on these and other Dilecto grades of glass base metal clad laminates. Write for your copy today.

Teflon* METAL CLADS

Fiber cloth is coated with Teflon resin and laminated into GB-112T sheet stock. This base withstands high heat (C. maximum operating temperature) with the dissipation and dielectric constant extremely low over a wide frequency range. The adhesive film used to bond the metal to the Teflon base, does not degrade the inherently good electrical properties of the core material. GB-112T has practically zero water absorption. A METAL CLAD with this core offers consistent high insulation resistance with excellent dimensional and electrical stability.

Registered Trade Mark.

METAL CLAD Surfaces

Copper foil (usually .0014" or .0028" thick) is bonded on one or both faces of the sheet grade of Dilecto selected. The foil used is a special grade of electrolytic deposition copper particularly adaptable for cementing onto laminated materials. An adhesive film is placed between the metal and the Dilecto, and cemented during the pressing and curing cycle. When closer tolerances are required, C-D-F sands the Dilecto to the required thickness before bonding. Aluminum or other metal alloys may be supplied.

Better Bond Strengths

One of the most important physical properties of a metal clad product is its peel strength, the pounds pull required to separate the foil surface from the core material. Working with years of laminating know-how, C-D-F has been successful in obtaining the following average test values for its METAL CLAD sheet stocks:

| | Lbs. pull per 1" wide |
|--|--------------------------|
| XXXP-26 plus .00135" copper..... | 5 to 8 |
| XXXP-26 plus .0027" copper..... | 7 to 10 |
| XXXP-26 plus .0015" aluminum..... | 9 to 12 |
| GB-112 Teflon plus .00135" copper..... | 6 to 9 |
| Sheet sizes: Dilecto grades—38 x 38", 38 x 42" | |
| Teflon grades—16 x 36" | |

MICABOND

Only the finest mica splittings are used in Micabond tapes, plates, and fabricated parts. They are placed for completely leak-proof coverage, with strong binders used. Available in a wide range of thicknesses with many different backings including fiberglass, silk, cellophane, cotton and paper. Micabond Tapes are hand laid; flexible tapes are both hand and machine laid; both retain their electrical insulating properties at elevated temperatures.

New . . . Micabond Fiberglass! When you need maximum reliability under high temperature service, resistance to mechanical abuse, coupled with the maximum safety factor, specify Micabond Fiberglass sheets, tapes, wrappers. Composed of India Mica splittings, bonded with flexible resin and faced on one or both sides with impregnated Fiberglass cloth, these new C-D-F products are superior to varnished fiberglass combinations in deeply imbedded "hot spot" applications. Write for technical bulletin and samples.

MOLDED AND LAMINATED PLASTICS—FOR ELECTRICAL INSULATION

LAMINATED PLASTICS

DILECTO

POST-FORMING: Certain Dilecto grades (CF-1, XF, GB-SF, MEC-1F) may be formed to special shapes by heating and placing in an inexpensive cold mold. The thermoelastic properties of these Dilecto laminates open many production and design opportunities. Already widely used by the aircraft industry, Post-Forming Dilecto merits full investigation by every alert manufacturer. Write for complete C-D-F engineering service.

DILECTO ROLLED OR MOLDED TUBING finds wide usage in radio and electrical equipment because of excellent insulating and mechanical properties. Impregnated paper or fabric is rolled on a mandrel between heated pressure rolls, then oven baked or press cured in a heated mold to set up the resin.

Dilecto, a laminated phenolic material, meets the need for a non-metallic lightweight insulating material that is moisture resistant, good electrically, strong and adaptable to all fabricating operations. Some grades have exceptionally high mechanical strength, tensile, flexural, impact; others have high dielectric strength, high insulation resistance, high arc resistance and low loss factor.

Dilecto is a laminated material made from a base of either cellulosic paper; heavy fine weave woven cotton fabric or mat; asbestos paper, woven asbestos fabric or woven glass fabric or mat; and is coated with a synthetic resin.

The selection of the proper base material, the proper resin in the correct proportions is C-D-F's job, but the end user must realize how important it is that he fully understands what dividend results can be gained mechanically, and electrically, and from a cost standpoint, by getting the very best C-D-F material for the project. Here is a complete listing of Dilecto sheet grades, each one with a combination of characteristics built into the material for the specific job.

SHEET GRADE CLASSIFICATIONS (Rod and Tubing similar to sheet)

- X For mechanical applications when electrical properties are secondary.
 - P For punching (paper-based grades).
 - XX For electrical applications requiring mechanical strength.
 - XXX For high humidity applications with minimum cold flow.
 - L For mechanical applications requiring fine machining.
 - C For mechanical applications requiring toughness plus impact strength.
 - CE and LE For electrical uses requiring greater toughness than based grades.
 - GB For applications requiring high resistance and high mechanical strength. For high heat applications.
- Note: Various C-D-F grades, identified by numbers affixed to the grade classification, are available. Ask for catalog.

TEFLON

INSULATION

OUTSTANDING PROPERTIES

HEAT RESISTANCE: Due to the non-flammability and high heat resistance of Teflon,* it easily meets both Class B and Class H, AIEE standards for maximum hot spot insulation temperature. Teflon coated glass fabric laminates withstand 250°C. continuously and up to 300°C. intermittently. One factor which influences the heat resistance of Teflon is that there is no apparent degradation from oxygen, which has a definite degrading effect on silicone materials.

* Du Pont Trade Mark

MOISTURE RESISTANCE: A Teflon laminate has practically zero water absorption and its electrical properties are little affected after long exposure to high humidity. Teflon is unaffected by fungus and temperature changes. Not only has it lower moisture absorption than any other laminate known, but it tends to repel water . . . retaining high surface insulation resistance properties even under extreme humidity conditions.

DIELECTRIC STRENGTH: The dissipation factor and dielectric constant of Teflon laminates are both extremely low over the frequency range. From 60 to 100 megacycles, the dissipation factor range is between .005 to .0005 and the dielectric constant ranges from 2.8 to 2.5 when measured in a field perpendicular to laminations. As corona will slightly degrade Teflon, care should be taken in designing parts used at voltages over 2500V. Sharp corners, and other contributing factors to corona should be avoided.

CHEMICAL INERTNESS: Resistant to hot corrosive salts and most concentrated acids. Pure Teflon is unaffected by all chemical agents, excepting molten alkali metals and, under certain conditions, fluorine and chlorine trifluoride. Glass supports Teflon, when exposed at cut edges, is affected only by chemicals which attack glass. Otherwise, its properties are the same.

TEFLON TYPICAL PROPERTY VALUES COMPARED WITH GLASS-BASED LAMINATES

| | TEFLON (Unsupported) | TEFLON GB-28T (teflon resin) | DILECTO GB-112S (Silicone resin) | DILECTO GB-28M (Melamine resin) | DILECTO GB-112D (Phenolic resin) |

Tube, automatic screw machine, chamfer, cut off, punch.

A. Sheet stock, shear strips, punch. B. Sheet stock, shear, punch blank, gang saw notches. C. Sheet stock, shear strips, punch blank, mill notches.

SHEETS

TUBES

RODS

RECEPTACLES

Vulcanized Fibre is a wonderful material if you know where to find and how to buy it. We suggest on many jobs that it's best to have the fabrication and forming in C-D-F's shops. Why? Because C-D-F knows how. Since 1895 the company has put fibre to work in everything from buggy axle bushings to metal clad radio tubes. The handling of thousands of set-ups for high speed, low cost production runs gives C-D-F an "experience bank" to draw on. Shop supervisors have a wealth of short cuts, little tricks that result in lower prices for you. They know the material and its peculiarities.

LIGHT, RESILIENT, STRONG

How long has it been since you examined the unique properties of this wide range of C-D-F fibre grades? Vulcanized Fibre is arc resistant, mechanically strong, non-corroding, half the weight of

aluminum. Repeated moistening and drying in forming insignificantly alters the nature, structure or quality of the fibre.

Since C-D-F has their own paper mill, uniform, quality control is made possible. Special grades are more easily developed.

A BIG, RELIABLE SOURCE

C-D-F does business with the largest tonnage users of sheet, rod and tube fibre in the world. This means good deliveries, good prices, reliable products for every new customer. You deal with a materials engineer, a C-D-F man who knows how to give you the most value in Diamond Vulcanized Fibre. If you want to improve design, simplify purchasing, speed production, use Diamond Fibre and the facilities of C-D-F. Write for catalog, free test samples, or send us your print for quotation.

MECHANICAL PROPERTIES OF DIAMOND VULCANIZED FIBRE

| Property | Sheet thickness, tube wall or rod diameter | SHEETS | | | | TUBES | RODS | |

RESIN-IMPREGNATED FIBRE

VULCOID

C-D-F supplies Vulcoid in sheets, tubes, rods, and fabricated parts. Made from Diamond Vulcanized Fibre that has been uniformly impregnated with a special resin, Vulcoid is a material approved and identified by the Underwriters' Laboratories as Class 1 insulation. Natural greenish-tan in color, it is economical, easy to machine and punch. Property-wise, Vulcoid is an intermediate between Commercial Fibre and XX phenolic Dilecto.

USES: (requiring arc resistance and mechanical strength)—contact and connectors panels, knife switch arms and guides, arc deflector spacer bushings; (requiring dielectric strength and moisture resistance)—electrical fixture insulation, wiring devices, plugs, receptacles; (requiring moisture and arc resistance)—motor and transformer lead bushings and terminal blocks.

CONTINENTAL-DIAMOND FIBRE CO.

MOLDED AND LAMINATED PLASTICS . . . FOR THE ELECTRONIC INDUSTRY

ENGINEERING UNLIMITED

SPIRAL TUBING

GOOD DIELECTRIC STRENGTH • LOW DIELECTRIC LOSS PROPERTIES
GOOD MECHANICAL STRENGTH & MOISTURE RESISTANCE

C-D-F is a dependable source of supply for all of your coil form spiral tubing needs. Uniform, high product quality is maintained by rigid standards of manufacture. C-D-F offers you fabricating skill, backed by exacting technical and inspection control. A major C-D-F development is Grade 5 Constant Torque Tubing for use in coil forms. After threaded iron tuning core is inserted and finally adjusted, you obtain the same stable tuning rating. Constant Torque features: exact internal threading . . . every thread engaged. 3-point contact with core prevents binding and permits positive tuning and re-tuning. Outer surface of tube has no weak spots, no external embossing to cause cement leakage. Available in lengths up to 14" to take .248" to .250" core with 28 threads per inch and also 6-32, 8-32 and 10-32 screw sizes. Write for samples. Grade 5 Tubing is also custom fabricated by C-D-F in conventional shapes to accommodate other sizes of tuning cores. C-D-F produces spiral tubing in grade to meet most requirements. Use the Grade Selection Chart when requesting samples and additional information. Write for folder S-3.

 - 22 Plain Diamond Insulation Tubing. ○
 - 23 Plain Chipboard Tubing. ○
- Round □ Formed (fluted shape) △ Formed and Notched Square, Rectangular

SPOOLS SMALL, ECONOMIC

A radio coil manufacturer would use small spools, less costly than those machined down from round stock, but stronger than molded bobbins. C-D-F supplied this: a rolled Dilecto tube grooved on one end . . . stepped in the middle . . . then notch cut on other end for a flush fit. C-D-F uses special adhesive to bind the three (the body and two Dilecto spool heads) together. The assembly is sufficient strong to withstand the outward pressure of the wire. The spool never it's head! Because Dilecto is resistant to high heat and high humidity, corrosive and chemical actions, it can be used for many coil and electronic applications.

FREQUENCY-TIME COUNTERS

FOR DIRECT MEASUREMENT OF

- FREQUENCY
- TIME INTERVALS
- TIME DELAYS
- PERIOD
- REVOLUTIONS
- FREQUENCY RATIOS

MODEL 820
 100 KC, 10-LAMP FREQUENCY COUNTER

Model 820 Frequency Counter uses the 60 cycle line frequency as reference time for intervals of 0.1 and 1.0 second. Maximum count is 10,000; input range is 0 to 150 kc.

Model 830 Frequency Counter is same as 820 except that a 100-kc crystal oscillator time base provides additional gate intervals of 0.001 and 0.01 second.

Model 840 Frequency-Time Counter is a versatile 100-kc instrument for measuring frequency, period, intervals, frequency ratios, rpm, etc. Input range is 0 to 150 kc; maximum count is 100,000 (extendable with 6-digit register).

Model 850 Frequency-Time Counter provides direct frequency measurements to 1 mc, plus features listed for 840.

The above instruments are available with 4- or 10-lamp readouts. Crystal ovens, preamplifiers, rack-mounting kits, and mechanical registers can also be provided.

TOTALIZING COUNTERS

- COUNTS UP TO 10,000,000,000
- RATES TO 1,000,000 PER MINUTE
- RUGGEDIZED INDUSTRIAL DESIGN

TOTALIZING COUNTER
MODEL 335

Straight counting and scaling, Potter Electronic Counters combine advantages of electronic and mechanical techniques. Special purpose counters (for radiation measurements, etc.) also available.

- COMMON-LINE OPERATION

MODEL 471 8 MC COUNTER CHRONOGRAPH

High-speed electronic counters count number of pulses produced by crystal-controlled time-base oscillator during unknown interval. Ideally suited for timing projectiles, missiles, relays, solenoids, etc.

COUNTER CHRONOGRAPH SPECIFICATIONS

| | | | | | |

RECORDERS and PRINTERS

MODEL 960
 DIGITAL RECORDER

COUNTER TRANSLATION MATRIX AND PRINTER MODEL 950/190 prints 8-column lines of Arabic numerals corresponding to data registered on binary-coded decimal counters. Printing rate is 3 lines per second.

DIGITAL "TELEDELTO" RECORDER MODEL 960 provides permanent visual record of 8-digit numbers at rates to 150 per second on sensitized paper. Over 50,000 eight-digit numbers can be recorded on a single roll.

FLYING TYPEWRITER offers the ultimate in high-speed printing. Prints five 80-character lines a second, including letters, numbers, math symbols, and punctuation. Magnetic core memory system is used for optimum reliability.

COMPLETE SYSTEMS

The Potter Instrument Company specializes in design and manufacture of complete digital data-handling systems, including magnetic tape, magnetic core, and electronic storage systems; shift registers and shift-register accessories; adding and subtracting counters; and high-speed input and printout devices. Potter systems designers work with clients in solving data-handling problems.

TRY OUR QUALITY PRODUCTS FOR THE ELECTRONIC INDUSTRY

UHF INSULATION

REXOLITE 1422

Sheets and rods with the electrical properties of polystyrene and the machinability of free-turning brass. Rexolite 1422 is a thermosetting cross linked styrene copolymer. Dielectric constant 2.5. Dissipation factor .00015 — .0003 at one megacycle.

REXOLITE 2101 — NEW

A glass reinforced laminate with fine UHF electrical properties in the same general range as Rexolite 1422 (see left) but with the added properties of good punchability, high impact strength and surprisingly low price.

WIRES & CABLES

SPECIALTY CABLES

Communication and control cables of all types. Excellent cable engineering. Fine cabling, shielding and jacketing work.

COAXIAL CABLES

Quotations on request for both special and standard coaxial cables.

REX K-F INSULATED WIRE AND CABLES

REX K-F WIRE insulated with trifluoro monochloroethylene (per Mil-W 12349) sets new high standards for hook-up wire. Write for full information.

TEFLON INSULATED WIRE AND CABLES

Write for full information on Rex Teflon insulated wire.

REX MICROWALL WIRES AND CABLES

High precision miniature wire for up to 120° C. Continuous operation. Write for full information.

TELEPHONE WIRES AND CABLES

Quotations on request for all plastic types.

REX VJN MINIATURE WIRE

Vinyl with Nylon jacket for -55°C . to 110°C . and 300 V to 2500 V. Write for full information.

MIL-SPEC WIRES

We make practically all of the plastic insulated military specification wires.

UL WIRES

Quotations on request.

STEINER-IVES

Over 300 Feet of EXHAUST OVEN

This cathode ray tube Exhaust Oven in use at RAYTHEON is one example of the versatility of the Steiner-Ives Company as builders of ovens for the Electronics Industry. The entire system was designed and built by Steiner-Ives and installed in record time for the production of

21", 24" and 27" T.V. picture tubes. 130 Specially designed tube Exhaust Carts move tubes through heated zones and forced cooling zones where temperatures are independently and automatically controlled.

Steiner-Ives Ovens range in size and application from the smallest laboratory type to the largest used in the electronics field. The Multi-Purpose Laboratory Oven shown at the left gives an idea of this wide scope. Used for Processing, Curing, Baking, Heat Treating, Annealing, Paint Testing and Normalizing and for other work within a 200° F to 1000° F temperature range. Well insulated, welded steel construction with stainless steel interiors, these ovens are recognized for their efficiency.

The S-I Portable Belt Annealer (Model No. TS-6) shown at the right is another example of intermediate equipment used for production annealing for temperatures up to 600° C. A six inches wide endless conveyor belt carries the parts through the annealing process for a desired heat curve determined by the variable controls. Widely versatile because of its mobility (mounted on rubber wheels) and efficiency.

Write for latest literature regarding Steiner-Ives Ovens for the Electronics Industry or ask for nearest representative to call.

"We can make it hot for you."

Rack Mounting

A program of redesigning the present line of amplifiers and oscillographs so they may be mounted in standard 19-inch racks is now under way. The unit above is the BL-962 Rack Mounting D. C. Amplifier.

ACOUSTIC AND

TEST INSTRUMENTS

The following instruments are manufactured in Denmark by the A/S Bruel and Kjaer Company and distributed exclusively in the United States and Canada by Brush Electronics Company:

- BL-1012 Beat Frequency Oscillator
- BL-1502 Deviation Test Bridge
- BL-1604 Integration Network for Vibration Pickup BL-4304
- BL-4304 Vibration Pickup
- BL-2002 Heterodyne Voltmeter
- BL-2105 Frequency Analyzer
- BL-2109 Audio Frequency Spectrometer
- BL-2304 Level Recorder
- BL-2423 Megohmmeter and D.C. Voltmeter
- BL-3423 Megohmmeter High Tension Accessory
- BL-4002 Standing Wave Apparatus
- BL-4111 Condenser Microphone
- BL-4120 Reciprocity Calibration Apparatus and Accessory
- BL-4708 Automatic Frequency Response Tracer

Direct Writing, Multi-Purpose 4 and 6 Channel Oscillographs

These new oscillographs provide a choice of up to 16 chart speeds—from 10 mm. per hour to 250 mm. per second. This permits excellent resolution of a great variety of signals with economy in chart paper. Chart drive is electrically controlled; thus, speeds can be changed instantaneously. The four and six channel units are furnished in identical chassis, which may be mounted in a standard 19-inch rack or bench top console. Available with ink writing or combination ink and electric writing.

BL-320 Universal Amplifier

When used with Brush Magnetic Direct Inking Oscillograph, it is a complete package unit for measurement of strains. Simply operated, producing records which are immediately available and easily interpreted. Records either static or dynamic strains up to 100% and direction as well as magnitude of measured strain can be read from the chart.

Portable Oscillographs

- BL-201 Single channel magnetic direct-inking
- BL-202 Double channel magnetic direct-inking
- BL-221 Single channel combination magnetic oscillograph
- BL-222 Double channel combination magnetic oscillograph

The BL-201 and BL-202 record instantaneous electrical phenomena from d. c. to 30 cps and with use of Brush equalized amplifier to 100 cps. The BL-221 and BL-222 models are identical except for circuit changes which permit use of either a standard inking or electric stylus.

Magnetic Recording and Reproducing Equipment

Single and Multichannel Recorders—L Recorders.

BL-932 D. C. Amplifier

Designed for use with Brush Magnetic Direct Inking Oscillograph, also used to make recordings of many types of phenomena heretofore measured only with the aid of complicated intermediate equipment.

Voltage gain is sufficient to give 1 chart mm. deflection per mv. input. Novel design features combined with both plate and heater voltage regulation reduce effects of power line fluctuation. Zero signal drift amounts to not more than 1 chart mm. per hour. Frequency response essentially uniform from d. c. to 100 cycles per second.

BL-2304 High Speed Level Recorder

Designed for acoustical and electro-acoustical measurements, incorporating a potentiometer controlled moving-coil stylus drive system and a variable speed paper drive.

BL-1502 and BL-1507

Deviation Test Bridges

For high-speed production checking of resistors, capacitors, inductors. Indicates percentage deviation from standard on large meter with zero point in center. Full scale deflection at 7% and 25%.

BL-1012

Beat Frequency Oscillator

An audio signal generator of particular use in conjunction with Level Recorder.

BL-2002

Heterodyne Voltmeter

A high frequency selective vacuum tube voltmeter for range 20 kc to 27 mc, measures both voltage and modulation. Full scale deflection from microvolts to 10 volts.

BL-2109 Audio Frequency Spectrometer

With the BL-2109 very rapid and accurate measurements may be made of amplitude, frequency of complex a. c. voltages from 18,000 cycles per second. Sound, vibration, other phenomena in the audio range of frequencies are readily analyzed by either manual or automatic scanning of the 27 fixed 1/3 octave pass filters in the Spectrometer. Hours of measuring time are saved in sound and vibration measurements.

Other

Crystal Cutter

ELECTRIC ELEMENTS for electro-acoustical and electro-mechanical applications: Plates of Rochelle Ammonium Dihydrogen Phosphate (ADP); Lithium Sulphate; Barium Titanate (Brush Ceramics A & B); Potassium Tartrate (DKT); Cylinders, curved plates, bowls and other shapes of Barium Titanate (Brush Ceramics A & B); Bimorphs* of Rochelle Salt; Ammonium Dihydrogen Phosphate (ADP); Barium Titanate.

BA-109 Microphone

The Brush Model BA-109 microphone using the improved Acoustical® was created for public address, home recording and amateur applications. The Metalseal® crystal insures long life and reliability. Styled in rich maroon plastic and brushed chrome.

- Response from 40 to 10,000 cps.
- Output Level 54 db. below 1 volt/dyne cm².
- Non-directional.
- High Impedance equivalent to approximately .002 mfd. (1.8 meg. ohms at 1,000 cycles.)

Model "A" General Purpose

Designed for GENERAL PURPOSE applications including laboratory, studio and skilled amateur home use. The Bimorph® crystal drive element insures wide range response (100 to 8,000 cps.) and high sensitivity. High impedance; ideal for multiple installations.

BA-206 Headphone

Designed for use where high fidelity and smooth frequency response are of paramount importance. They are especially applicable to broadcast monitoring, to laboratory use in the study of sound measurements, audiometry and similar exacting headphone applications. Features exceptionally flat frequency response. Impedance of 100,000 ohms at 1000 cps; no transformer required. Ideal for multiple installation. Sensitivity is approx. 6.3 dynes/cm/volt at 1000 cps.

BA-106 Microphone

The Brush Model BA-106 is a high quality microphone incorporating the hermetically sealed Acoustical® with sintered bronze damping. Metal-seal® crystal is used for protection against conditions of high humidity. This microphone offers unexcelled response in microphones of this type and price range.

Vibration, shock or low frequency wind noise do not affect the performance of this microphone. Output level 50 db. below 1 volt/dyne/cm².

ELECTRO-OPTIC ELEMENTS—Unpolished blanks of Ammonium Dihydrogen Phosphate (ADP); Potassium Dihydrogen Phosphate (KDP) for electro-optic shutters, etc. *Trade Mark

MAGNETIC COMPONENTS

- Channel record-reproduce and erase heads
- Channel record-reproduce heads
- Multiple record-reproduce heads and erase heads

- BK-90 Record/Reproduce Head
- BK-10 Erase Head

Single-Channel Heads

The new magnetic head is designed for dual-channel recording/reproducing on 1/4-inch tape. It features: dimensional stability . . . Mu-metal shielding . . . single-hole mounting . . . high output . . . greatly extended frequency range . . . embedded construction.

* * *

FOR COMPLETE INFORMATION WRITE

Brush Electronics Company, Department K-7
Perkins Avenue, Cleveland 14, Ohio.

Cartridge Types

The BK-900 series heads were designed for single-channel recording on any magnetic medium. Available in track widths of 0.014 inch and wider. These heads have precision-lapped gap, synthetic resin dip, balanced magnetic construction, individually wound poles and accurate azimuth alignment.

Full Track Heads

- BK-1250 Record Head
- BK-1251 Reproduce Head
- BK-1252 Erase Head

These professional quality heads utilize the full width of quarter-inch tape for maximum dynamic range in the audio spectrum. Construction is similar to the BK-1090 "Redheads".

Multichannel Heads

Available in encased assembly or cartridge assembly.

Design Features

- Balanced magnetic structure with gaps at front and rear.
- All gaps in precise alignment.
- Individual channels are cast into one integral block of specially selected synthetic resin.
- Complete assembly is non-microphonic and impervious to moisture.
- Mu-metal shields between individual channels.
- Ground lead supplied for shields and pole pieces.
- Wide range temperature operation.
- Special design features may be supplied to meet your requirements.

50 KW PEAK READING RF POWER METER PM-12

The P. M. 12 Peak Reading Power Meter is designed to accurately measure the peak power of pulsed RF signals in the range of 2 to 700 MC with PRF of 800 to 10,000 pps and pulse duration of .5 micro-seconds or more.

It is capable of dissipating 50 KW peak power with an RF duty cycle of .002.

This test set may also be used as a dummy antenna, rated for 100 watts maximum average power for any frequency within its range.

The 52 ohm coaxial input circuit is fitted with a type N or UG61A/U receptacle to mate with a UG59/U connector.

This test set is 110V, 60 cycles powered and is completely self contained in a cabinet 7 in. x 9 in. x 9 in.

PRICE \$175.00

SPECIFICATIONS

| | |
|------------------------|--|
| USE..... | Peak reading power meter. Dummy Antenna. |
| POWER DISSIPATION..... | 100 Watts average, 50 KW Peak. |
| FREQUENCY RANGE..... | 2 to 700 Megacycles. pulse rate..... 200 to 20,000 pulses per second. pulse width..... .5 microseconds to DC. |
| VSWR..... | Will not exceed 1.15 at any frequency in its range. |
| ACCURACY..... | Absolute 10% Relative 1% |
| INPUT..... | 51.5 ohm coaxial, type N or UG 61 A/U receptacle. |
| CALIBRATION..... | May be recalibrated using 60 cycle ac. |
| CONSTRUCTION..... | Meets Jan specifications for moisture, humidity, shock and vibration. Meter is sealed and ruggedized, Jan approved components used throughout. |
| SIZE..... | 7 in. high, 9 in. wide, 9 in. deep. |
| POWER..... | 105 to 120 volts, 60 cycle, 10 watts. |

RF WATTMETER and DUMMY LOAD, PM-10

GENERAL DESCRIPTION: The RF Wattmeter PM-10 is an absorption type wattmeter consisting of an oil filled, air cooled, coaxial load resistor and a voltmeter calibrated to read watts. The Wattmeter is suitable for use as a field or laboratory test instrument, is completely shielded and non-radiating, permitting transmitter testing and adjustment without interference. The meter box is easily detached, permitting location of the load resistor at a remote point. In cases where power measurements are not required the load resistor may be used as a dummy load.

POWER RANGES: 0-15 watts or 0-60 watts, selected by switch on front of meter box.

DUMMY LOAD: 50 ohms impedance capable of 90 watts dissipation, in still air, with duty cycle of not more than 30 minutes per hour. With forced air cooling 90 watts continuous.

VOLTMETER CIRCUIT: Uses 1N82 silicone diode crystal, and sensitive 200 micro ampere sealed meter. May be calibrated for any scale range from 0-7.5 w to 0-60 watts. Spare crystal included.

RECALIBRATION: May be recalibrated using 60 cycle A.C.

INPUT: Coaxial Type N, using modified UG58-A/U connector.

VOLTAGE STANDING WAVE RATIO: Less than 1.15 from D.C. to 700 MC.

ACCURACY: $\pm 5\%$ from 0-60 Watts.

FREQUENCY RESPONSE: $\pm 5\%$ from 30 to 700 MC.

PRICE \$135.00

RED BANK 6-0404

HIGH POWER Waveguide TERMINATIONS

HPTXS-175

HPTS-1500

"Eilex", a new ceramic lossy material, is now available in waveguide, high power terminations and attenuators from Electro Impulse Laboratory.

This new material is extremely durable, provides a strong adhesive bond to waveguide walls, withstands temperatures up to 2000° F, and handles the thermal shock efficiently.

Eilex is stable up to 2000° F (does not emit steam or water, characteristic of dummy loads using a Portland cement and graphite mixture for the lossy material.)

The waveguide loads use walls that are poor conductors, which means a more efficient removal of the heat generated in the load, and less tendency toward pulsepower breakdown (arcing) as may occur in designs which use filling material in the waveguide.

New construction shortens path between inner surface of lossy guide to heat conducting material. Hot spots have been eliminated.

Attenuators are accurately calibrated and may be used as a termination and power measuring device in conjunction with a thermistor bridge.

HPST-1500 is an S Band, waveguide termination capable of 1500 watts dissipation in still air, and has a V.S.W.R. of less than 1.1 over the range of 2700 to 3400 mc. **Price \$185.00**

HPTXS-175 is an X Band, waveguide termination, capable of 200 watts dissipation in still air. V.S.W.R. will not exceed 1.1 over the range of 8500 to 10,000 mc. **Price \$55.00**

Many other standard terminations and attenuators available, non standard terminations made to specifications.

Actual performance records prove that these DeJUR components withstand adverse conditions of vibration, heat and moisture. Each is engineered and manufactured to meet rigid government requirements. In addition to its wide variety of stock instruments, DeJUR offers top-flight laboratory, engineering and manufacturing facilities for production of these precision units adapted to your specifications. Inquiries are invited.

MANUFACTURERS OF SCIENTIFIC PRECISION EQUIPMENT FOR OVER 30 YEARS

POLYPENCO® NON-METALLIC SHAPES

Use stock shapes for low cost fabrication

With POLYPENCO shapes, you can economically obtain the advantages of nylon, Teflon*, and Q-200.5 for a wide variety of components by fabricating them on standard metalworking tools. You also receive uniform high quality in every piece of stock. Most standard sizes are stocked now for immediate delivery.

NYLON

ROD: Diameters from $\frac{1}{8}$ " to $6\frac{1}{2}$ " in lengths from 8' to 6".

STRIP: .010" to .125" thick, $\frac{1}{4}$ " to 4" wide.

TUBING: .035" to .500" O.D., .020" to .410" I.D.

TUBULAR BAR: O.D.'s from 2" to 10" with wall thicknesses of $\frac{3}{8}$ " to $1\frac{1}{2}$ ".

SLAB: $\frac{1}{4}$ " to 1" thick, standard 10" width, discs from $\frac{1}{4}$ " to 2" thick in 6" to 12" diameters.

ROD: Diameters from .030" to 4" in lengths ranging from continuous coils down to 6".

TUBING: $\frac{1}{4}$ " to $4\frac{7}{8}$ " I.D. with walls from $\frac{1}{8}$ " to 2" thick.

SPAGHETTI TUBING: I.D.'s corresponding to American Wire Gauges 22 through 8, in lengths up to 1,000'.

TAPE: .002" to .125" thick, $\frac{1}{4}$ " to 12" wide.

SLAB: 24" or 48" squares from .125" to 1.50" thick.

TEFLON*

ROD: Diameters from $\frac{1}{8}$ " to $3\frac{7}{8}$ " in lengths from 4' to 8'.

Other shapes and sizes can be supplied on special order.

ACTUAL SIZE

Rectangular Series "G-20" Subminiature Connectors

These unique reverse pin and socket connectors are miniaturized for use in small area applications. The molding is provided with a hole for convenient, space-saving side mounting. Precision machined sockets and pin contacts are gold plated over silver for low contact resistance. The "G-20" series is available with two, three or four contacts in Melamine, Plaskon-Alkyd, or Dialyl Phthalate molding compounds.

*WORLD'S LARGEST MANUFACTURERS OF MINIATURE PRECISION CONNECTORS

Lapp

TUBE SUPPORTS for air-cooled tubes

No longer is it necessary for equipment manufacturers to design supports for forced-air-cooled tubes. After producing many such special designs, Lapp has engineered and built a complete series of insulating supports for air-cooled tubes. Use of these supports facilitates design of transmitter and other high-power circuits. Simple, compact, efficient and attractive in appearance, in porcelain or steatite, they make for economical production, easy interchangeability, and availability of replacement units. Write for Bulletin 301, with complete description and specification data.

INSULATION FOR WATER-COOLED SYSTEMS

For carrying cooling water which must undergo a change in potential of Lapp porcelain eliminates troubles arising from water contamination and conductivity, sludging and electrolytic attack of fittings. Purity, cleanliness and high resistance of cooling water is assured—for positive cooling and long tube life.

LAPP PORCELAIN WATER COILS

Twin-hole and single-hole models in sizes to provide flow of cooling water from 2 to 90 gallons per minute. Cast aluminum mounting bases, lead pipe or flexible metal hose for attachment.

LAPP PORCELAIN PIPE

Inside diameters $\frac{3}{4}$ " to 3", in straight, 90° and 180° elbows, fittings. Swivel-type connections. Standoff insulators attach directly to fitting bolts. Write for Bulletin 301 with specifications for Lapp Porcelain Water Coils and Porcelain Pipe.

LAPP GAS-FILLED CONDENSERS

Capacitance for high-voltage, high-current d

The record of more than 15 years' service, in thousands of installations, proves the reliability of the Lapp Gas-Filled Condenser. For duty at high voltages and high currents, this unit offers the advantages of extreme compactness . . . low loss . . . high efficiency factor . . . constant capacitance under temperature variations . . . grounded tuning shaft . . . and rugged sturdiness. Units available in five tank diameters, 7" to 24" . . . in fixed or variable capacitance . . . capacitances to 60,000 mmf; current ratings to 525 amperes at 1 mc; voltages to 100 Kv peak. Write for Bulletin 302.

ENTRANCE INSULATORS

To eliminate losses which occur in ordinary types of bushings at radio frequency, Lapp units use air as major insulation, porcelain path being lengthened by its "bowl" shape. In wide variety of types for most electrical and mechanical requirements.

STAND-OFF INSULATORS

Dependable mechanical and electrical performance—and trim good looks. Hundreds of standard and special types available.

Write for Bulletin 301, listing entrance and stand-off insulators.

ANTENNA STRAIN INSULATORS

The largest of the porcelain rod insulators shown develops 12,000 lb. strength. Available, as specified, with rain shield and/or corona rings. Smaller units, in porcelain or steatite, for all strain or spreader use. Engineering and production facilities also available for special performance units. See catalog 301.

PLUG-AND-RECEPTACLE UNITS for sectionalizing circuits

For panel-rack or other sectionalized circuits, Lapp offers a variety of plug-and-receptacle units. Any number of contacts can be provided (in multiples of twelve). Male and female contacts are full floating, for easy alignment and positive contact. Contacts

silver plated, terminals tinned for soldering. Insulation is steatite, the low-loss ceramic... non-carbonizing even under leakage flashover resulting from contamination, moisture or humidity. Write for complete electrical and mechanical specifications and recommendations.

ANTENNA TOWER INSULATORS

Most of the world's radio towers are supported by Lapp insulators, including the tallest guyed mast ever built. Through the Lapp "compression cone," immense loads can be carried by electrical porcelain. Write for data on Lapp footing insulators for self-supporting radiators, mast-base insulators, or guy insulators.

SPECIAL ASSEMBLIES

Business is electrical porcelain, its application, manufacture, and assembly. Our skill is in our knowledge of the capabilities, and limitations, of electrical insulation... in engineering ingenuity to meet special requirements... and in efficient production. Whenever you have need for insulating parts and associated specialties, we may be able to show you how they can be produced most economically, to perform most efficiently.

AUDIO

TRANSFORMERS

All your requirements for transformers can be met "right up to specs" at TRANSFORMERS INC. Our highly trained staff of engineers, specializing in transformers, backed by ample production facilities, the most rigid testing and inspection procedures enables us to meet the most exacting requirements. Consult us first for the following types of transformers . . .

- PRECISION INSTRUMENT
- AUDIO INPUT
- INTERSTAGE OUTPUT
- PULSE HYBRID MATCHING POWER PLATE FILAMENT
- VIDEO MODULATION
- AUTO REFERENCE
- TOROIDAL

- CLASS A
- HIGH TEMPERATURE CLASS "H"
- MINIATURE
- SUB-MINIATURE
- MIL-T-27
- COMMERCIAL GRADE

Transformers Inc. has one of the most complete laboratories for the design of audio transformers. Our plant facilities permit us to manufacture large quantities at better than competitive prices. Although Transformers Inc. does not carry any stock items a special sample department is equipped to manufacture small quantities of audio transformers that are not commonly available. We also solicit inquiries on plate power and filament transformers for either large production quantities or samples.

MINIATURE AND SUB-MINIATURE TRANSFORMERS

Air-borne electronic equipment has created a need for small transformers with particular emphasis on light weight. Small sizes are obtained by the use of special core material and light weight requirements are met by special encapsulating methods. TRANSFORMERS, INC. is a recognized source for miniature transformers for military or industrial use. We carry a large stock of special alloy laminations in a great variety of sizes.

Even greater miniaturization can be effected in special cases by either reducing the efficiency of the transformer or by making the operating requirements more stringent.

All inquiries on miniature and sub-miniature transformers will receive prompt attention. In view of our large inventory on special alloy laminations samples of miniature and subminiature transformers can be made promptly.

PULSE TRANSFORMERS

Transformers Inc. has the proper engineering, production and testing facilities for the manufacturing of all types of pulse transformers. We are currently manufacturing a great variety of pulse transformers of the miniature size used in blocking oscillators. These transformers are used in conjunction with hard vacuum tubes to produce pulses with a width as small as .1 microsecond, and with repetition rates up to 5000 p.p.s. We are also equipped to manufacture power pulse transformers as used in radar equipment.

INDUCTANCE MEASUREMENT—Any operating condition can be simulated in the range of 0-1000V A.C. and 0-5 Amps. D.C.

DEVELOPMENT OF AUDIO TRANSFORMERS—All characteristics of audio transformers in the range of .01 cycle to 10 M.C. can be measured and evaluated.

POWER LOSS MEASUREMENT—Losses as low as 15 micro watts in the range of 20 c to 200 K.C. can be measured and analyzed and possible improvements effected.

PULSE TRANSFORMER DESIGN—Circuit methods commonly used in the design of pulse transformers have been supplanted by use of special equipment.

COMPUTER PRECISION TRANSFORMERS

Voltage reference transformers and computer excitation transformers

Voltage ratio accuracy of $\pm .05\%$ can readily be obtained while accuracies as low as $\pm .01\%$ have been achieved for special applications. The phase angle can be made as small as .1 milliradian (approximately 20 seconds).

Transformers Inc. has special facilities for the accurate measurements of voltage ratio and extremely small phase angles. Special techniques have been developed by our laboratory staff to manufacture precision transformers with predictable accuracy and permanency. Any assistance required in the application of precision transformers to specific problems will be furnished free of charge by our engineering staff.

Samples of voltage reference transformers have been submitted to the National Bureau of Standards for calibration and have been found to have a voltage ratio accuracy of better than $\pm .05\%$.

MAGNETIC AMPLIFIERS

Transformers Inc. manufactures a large variety of Saturable Reactors, Transducers, Magnetic Amplifiers and Magnetic Modulators. We carry stock items in the range of 5-200 Watts output for servo amplifiers operating at 400 c.p.s.

Send for **BULLETIN 201**

HIGH TEMPERATURE TRANSFORMERS - CLASS "H"

Class "H" transformers can be divided into two distinct groups.

GROUP 1

The first group are those that operate in extremely high ambient temperatures. They are of normal weight and size.

GROUP 2

The second group are those transformers that of necessity have been made so small in size by reducing their efficiency so that the attendant losses cause high temperature rise during operation.

In addition to these two groups there is a third in which the ambient is high and miniaturization has been effected. Transformers Inc. is in a position to make samples as well as large quantities of these types of transformers.

Transformers Inc. meets all requirements for

**CLASS A • HIGH TEMPERATURE-CLASS "H" • MINIATURE
SUB-MINIATURE • MIL-T-27 • COMMERCIAL GRADES**

PAPER TUBE PRODUCTS TO YOUR EXACT SPECIFICATIONS

NIEMAND BROS. produce many types of paper tube products to meet the varied needs of the electrical and mechanical industries.

Diameters from .093" to 2" and up—wall thicknesses of .003" to .060"—printed or plain—materials such as high dielectric kraft, fish paper, foils, special protective coated and laminated papers.

We also make precision drawn paper caps from .141" to 2" in diameter, as well as special die-cut washers and parts to required specifications.

Our modern, high-speed equipment and improved methods of production result in economy and rapid delivery. Send us your specifications—our highly trained staff will be happy to serve you.

SAFETY MARGIN* Electrolytic Capacitors

ASTRON "SM" SAFETY MARGIN design affords the ultimate in performance over a wide range of operating conditions. Particularly suited for operation in tropical, hot and humid climates, they offer maximum protection under severe operating conditions for long service life.

Leading electronic equipment manufacturers favor Safety Margin Electrolytic capacitors for their reliability and quality.

Safety Margin types fill your requirements whether they are metal cased, cardboard cased or twist prong capacitors.

*Trademark

Molded Plastic Tubulars

BLUE POINT'S tough new bonded plastic shell and unique bonded seal answer all heat and moisture problems. Exclusive new material treatments and design with solid thermosetting vacuum impregnant insure absolutely dependable operation at 85°C without derating. Extremely high heat resistant qualities of the shell and BLUE POINT seal prevent leads from pulling or melting out.

METEOR* Subminiature Paper Capacitors

Operate up to 125°C without derating. METEORS* use ASTRON'S exclusive new high temperature impregnant X-250*. Over the entire operating range -65°C to +125°C, these miniaturized capacitors have high insulation resistance, low power factor plus a built-in voltage safety factor. METEORS* surpass the most exacting military specifications and are available in a variety of designs for all types of installation.

*Trademark

METALITE® Metallized Paper Capacitors

METALITE capacitors are remarkably small units designed to meet current needs for subminiature capacitors to fit into ultra compact electronic equipment. Extremely small and lightweight METALITE'S self-healing characteristics prevent failures from momentary over-voltages and surges. For operating temperatures up to +125°C HY-MET METALITE capacitors with solid thermosetting impregnant offer the desired operating qualities... stability, vastly improved insulation resistance, low RF impedance and self-healing properties.

METALITE and HY-MET in a wide variety of case styles and operating characteristics meet the requirements for all types of equipment.

OIL FILLED Capacitors

ASTRON-developed, oil filled, hermetically sealed paper capacitors are designed to meet the severe operating requirements and test conditions of specification MIL-C-25A. Designed for military as well as commercial use, they are made to the most exacting quality standards for reliable performance and maximum dependability.

Designed for military as well as commercial use, they are made to the most exacting quality standards for reliable performance and maximum dependability.

RF NOISE SUPPRESSION FILTERS

Pioneers in the development and mass production of high efficiency subminiaturized filters, ASTRON engineers have solved the most difficult and diversified noise suppression problems. Latest concepts of filter design plus the newest quality components and production techniques assure unequalled guaranteed performance plus reduced size and weight. Let ASTRON'S filter engineers solve your noise suppression problems.

ASTRON'S extensive experience and modern large scale production can solve all your capacitor and filter problems. ASTRON products are now in use in millions of leading TV sets and other electronic equipment. Start using ASTRON brand today to increase your brand acceptance. Write today outlining your requirements.

LF... HF... UHF... Microwave Test Equipment

RADA-SWEEP: An all Electronic sweeping oscillator for use in aligning radar IF strips. Swept by symmetrical sawtooth also used for sweeping the oscilloscope. Marks individually switched on or off. Separate attenuators used on pip marker and high frequency outputs. True zero level reference baseline provided on scope display.

CENTER FREQ. . . . Switchable to 30 or 60 mc—Others to order
 SWEEP WIDTH . . . Switchable to 3 or 20 mc
 MARKERS . . . Narrow pulse type crystal positioned at 25, 35, 55, 65 mc
 PRICE . . . \$395 with marks as above. Marker frequencies changed or added on special order.

RADALYZER: A gain set with a 30 MC IF for low level microwave measurements. Insertion losses of over 60 db or of only 0.2 db can be measured. ATTENUATORS: 0-101 db (steps—1, 2, 3, 5, 10, 20, 20, 20, 20). 0-10 db precision ten-turn potentiometer, calibrated. POWER SUPPLIES: Electronically regulated voltages are furnished for two external klystrons.

PRICE: \$995.00

MEGA-MATCH: Displays reflection coefficient over wide frequency range. Measures reflected energy. Used for designing broad band antennas and matching transformers, checking impedance matching of TV RF transformers and tuners, and measuring transmission line terminating impedance.

FREQ. RANGE . . . 10 to 1000 mc. FREQ. SWEEP . . . To 30 mc in width
 SENSITIVITY . . . Reflection coefficients down to approx. 0.01 up to 500 mc and 0.1 from 500 to 1000 mc can be seen. PRICE . . . \$895

MEGA-PULSER: Provides a source of very narrow pulses for use in testing the transient response of wide-band circuits and the correctness of termination of transmission lines. 3 different pulse repetition rates 100, 1000, 2000 pps., and 4 different pulse widths, 0.025, 0.05, 0.1, 0.25 micro-sec., rise and decay time

approx. 0.01 micro-sec., for wide band video amplifier transient response studies. Operates with internal or external triggers. PRICE . . . \$225.00

MICRO-PULSER: Provides rectangular pulses over a wide range of repetition rates. For testing radar systems and components, transient response of video amplifiers and other electrical networks. Has variable delay between synchronizing pulse and output pulse. Pulse output may be used to pulse modulate an RF carrier to obtain a suitable signal for testing transient response of hf broad-band amplifiers. PRICE . . . \$225

RADA-PULSER SR.: A versatile pulsed-carrier generator with continuously variable calibrated frequency range from 12 MC to 80 MC. Calibrated variable pulse widths from 0.2 to 20 microseconds. Pulse Rise and Rate of Fall: 0.03 microseconds.

OUTPUT ATTENUATOR: 50 ohms constant Z. 101 db max. in steps of 0.5 db. PRICE . . . \$745.00

SONA-SWEEP: Very similar to Kilo-Sweep. Frequency range and sweep width adapt it to measurement and alignment of ultrasonic frequency amplifiers in Sonar and carrier-current communication systems. Adapted to work on high Q systems, since sweep repetition rate is variable to below 5 cps. Covers range from 5 to 200 kc. with maximum sweep width of 20 kc. Supplied with crystal marks at 50, 100, and 200 kc. PRICE: \$525

CALIBRATED MEGA-SWEEP: The widest range sweeping available. Covers approximately 50 kc to 900 mc range, with control tuning. Maximum sweep width at least 30 mc, variable TOOTH SWEEP . . . no phasing. PRICE . . . \$495

MEGA-SWEEP: An alternate model of the above with many of features except that it lacks single dial tuning and direct indication of approximate output center frequency. PRICE . . . \$465

111-A Calibrated MEGA-SWEEP: Provides much higher output width to 40 mc, and same features as Calibrated Mega-Sweep. Includes blanking for zero level line. Frequency range and output follows:

| Frequency Range | Output Impedance | Output Voltage (Into Load) |
|------------------|-------------------|----------------------------|
| 1. 10 mc—950 mc | 70 ohm unbalanced | 0.15 V |
| 2. 450 mc—900 mc | 300 ohm balanced | 0.3 V |

PRICE . . . \$575

Model Video MARKA-SWEEP:

All electronic video sweep oscillator. Crystal positioned marks of pulse type provided at 1, 2, 5, 10, 15, and 20 Mc are fed directly to the oscilloscope. By use of external signal generator a variable frequency pulse type marker is available. Output max. is 0.3 v. from a 72 ohm internal impedance. SWEEP RANGES . . . 50 kc to 5 mc, 50 kc to 10 mc, 50 kc to 20 mc. SAWTOOTH SWEEP . . . Sweeps video output and deflects scope horizontally. Zero level baseline provided on oscilloscope. PRICE . . . \$495

Model Video TTV MARKA-SWEEP:

Combines 8 mc wide video sweeping oscillator with any one of 5 crystal positioned markers and a continuously variable marker. Metered output of 1.5 volts into 72 ohms. Specifications: SWEEP RANGE: 50 kc to 8 mc. SWEEP: All electronic linear sawtooth. MARKERS: CW—A continuously variable CW signal covering the frequency range from 8 mc is provided. Crystal Positioned—Crystal positioned marks provided singly at 0.20, 0.75, 1.25, 4.0 and 6.0 mc. Others may be substituted. AMPLITUDE MODULATION WHILE SWEEPING: Less than 1 db/mc. OUTPUT VOLTAGE: Sweep, CW and Crystal Frequency: 4.2 volts, peak-to-peak, into 72 ohms. (1.5 volts, r.m.s.) Peak and r.m.s. reading voltmeter provided at output, accurate within approximately 5%. OUTPUT ATTENUATORS: Switched—20 db, 2 db, 3 db. Continuous—Approx. 26 db. PRICE: \$695.00 for rack mounting. Cabinet \$35.00 extra.

KILO-SWEEP:

Applies sweep generator techniques of visual alignment to the 50 kc to 2 mc frequency range. Sweep width control allows continuous adjustment of width up to a maximum of 100 kcs. SWEEP . . . All electronic, linear symmetrical sawtooth. Sweep repetition rate adjustable. MARKERS . . . Up to 6 crystal positioned pulse type marks fed directly to scope vertical amplifier. at 0.5, 1.0, 2.0 mc. Others specified by purchaser. ZERO LEVEL LINE . . . Produced on oscilloscope pattern. ATTENUATORS: Switched . . . 20, 20, 10 db. Continuous . . . Approximately 26 db. PRICE . . . \$525

Industrial Instruments . . . Production Test Equipment

TELEVISION TEST EQUIPMENT

Model RF-MARKA-SWEEP: An electronic switchable TV RF sweep generator with narrow pulse markers actuated by receiver alignment. Wide sweep and narrow crystal positioned markers at picture and carrier frequencies on each of

12 VHF channels. IF band included. Output 70 ohms unbalanced and 300 ohms balanced (with matching device supplied). PRICE . . . \$795

Model IF MARKA-SWEEP: An all electronic switchable IF TV sweep generator covering all present ranges. Includes crystal positioned pulse type markers not affected by receiver. For dual IF or intercarrier receivers. Generally similar to Model Video. PRICE . . . \$325. Crystal marks (up to 9) \$15.00 each extra.

FOR COLOR

Color Bars: Various models of these color and Color Bar generators are now available for engineering, production and service. All models produce Standard NTSC colors plus black and white. Some include built-in dot generators. Prices from \$200 to \$795.00.

Model MEGA-PIX SR.: A crystal controlled 12 channel TV picture and audio modulated sound RF signal source for color, black and white. Standard Video input signal required.

SPECIFICATIONS: ACCURACY OF PICTURE AND SOUND CARRIERS: $\pm 0.01\%$ (24 separate crystals). **MAXIMUM PICTURE AND SOUND CARRIER OUTPUT:** At least 30,000 μv into 72 ohms. Attenuator built in. **INPUT IMPEDANCE:** 72 ohms. **VIDEO INPUT Z:** 72 ohms. **INPUT SIGNAL REQUIRED:** Approx. 1.4 volts, peak-to-peak, black negative. **VIDEO BANDWIDTH:** 5 mc, flat. **SOUND CARRIER DEVIATION:** Variable from 0 to 25 kc. **SOUND MODULATION FREQUENCY:** 400 cps, or by external audio. Standard emphasis provided. PRICE . . . \$990

ULTRA-PIX: UHF TV crystal controlled picture and sound RF signal source. Covers UHF channels and one VHF channel. **SPECIFICATIONS:** Same as those for Mega-Pix Sr., except: Standard unit operates on channels 3, 15, 48 and 82. Any one to three other UHF channels may be substituted on special order. PRICE . . . \$795

MEGA-PIX UHF CONVERTER: A UHF converter for the Mega-Pix Sr. (and many other VHF signal sources) which enables that instrument to operate on the following additional channels: 14, 15, 16, 47, 48, 49, 81, 82, 83, also 34, 35, 36, 37, 38, 39 and 40. PRICE . . . \$450

ULTRA-SWEEP: A precision UHF Sweeping Oscillator providing unusually high output. Designed for the production line testing of UHF TV receivers and tuners, as well as general laboratory applications. **FREQUENCY RANGE . . .** 450 mc to 900 mc. **SWEEP WIDTH . . .** Continuously variable from 0 to 50 mc. **OUTPUT . . .** 3 volts into 75 ohms terminated. **ZERO LEVEL BASELINE** produced on oscilloscope pattern. **ATTENUATORS . . .** Switched: 60 db, 20 db, 20 db, 10 db, 6 db, 3 db Continuous: Approx. 3 db. **DETECTOR . . .** built in. PRICE: \$895

ULTRA-MARKER: Provides very narrow "pip" type crystal positioned marks at UHF TV picture and sound carrier frequencies on all channels or every fourth channel. For Ultra-Sweep and other UHF sweeping oscillators. PRICE . . . \$395

Model UHF MARKA-SWEEP: Combines Ultra-Sweep and Ultra-Marker in single cabinet. Channels marked on dial, permitting rapid selection of any UHF TV channel with crystal positioned markers. PRICE . . . \$1190

OTHER EQUIPMENT

MICROWAVE MEGA-NODES: Sources of random noise provided in eight waveguide sizes. May be used for measurement of noise figure, receiver gain and calibration of standard signal sources. Noise figure obtained by comparing noise output of a system with the amount of noise introduced by the instrument. Particularly useful for checking over-all performance in radar systems. Available in following waveguide sizes covering following frequency ranges: RG 69/U—1200 to 1400 mc. RG 48/U—2600 to 3950 mc. RG 49/U—3950 to 5850 mc. RG 50/U—5850 to 8200 mc. RG 51/U—7050 to 10,000 mc. RG 52/U—8200 to 12,400 mc. RG 91/U—12,400 to 18,000 mc. RG 53/U—18,000 to 26,500 mc. **NOISE OUTPUT (ALL GUIDES):** 15.8 db \pm 0.25 db.

MEGA-NODE SR.: A calibrated random noise source providing output over a wide frequency and power range. Used in measuring noise figure, receiver gain, and for voltage calibration of standard signal sources. Reads noise figure directly without band width computation. **FREQ. RANGE . . .** 10 mc to 3000 mc. **OUTPUT IMPEDANCE . . .** 50 ohms unbalanced. **NOISE FIGURE RANGE . . .** 0 to 20 db. **METER CALIBRATION:** Linear in DB noise figure. PRICE . . . \$995

MEGA-NODE: A calibrated random noise source providing selection of several output impedances with balanced or unbalanced output. Used in measuring noise figure, receiver gain, and for voltage calibration of standard signal sources. Noise figure obtained directly from meter of the MEGA-NODE.

FREQ. RANGE . . . 5 to 220 mc. **OUTPUT IMPEDANCES:** Unbalanced . . . 50, 75, 150, 300, Infinity. Balanced . . . 100, 150, 300, 600, Infinity. **NOISE FIGURE RANGE:** 0 to 16 db at 50 ohms; 0 to 23.8 db at 300 ohms. **METER CALIBRATION:** Linear in DB noise figure. PRICE . . . \$295

ANALYZER: Analyzes signals in the 5-4400 cps region in 3 frequency ranges with broad and narrow analysis filters on each range. For studies of transient and steady state vibration signals on aircraft, ships, rotating machinery. Directly writes analysis results on non-photographic recording paper. PRICE . . . \$2500

SONA-GRAPH: Three dimensional or Fourier Analysis of transient or steady state signals 80-8000 cps on non-photographic recording paper.

NOTE: All prices are F.O.B. factory and may change without notice.

FOR COMPLETE DATA:

HIGH VOLTAGE

MODEL LAB-40

CONTINUOUSLY VARIABLE REGULATED 25 TO 40 KV DC POWER SUPPLY

Unit has a 4 to 6 KV focus tap for use with flying spot kinescope recording tubes, etc. Regulations of 0.5% at 1 milliamper. Available either with locking controls or standard knob.

With meter
\$620 Net

Less Meter
\$545 Net

MODEL LAB-30PN

• REVERSIBLE POLARITY—Continuously Variable 1 to 30 KV

Regulated DC Power Supply with regulations of 0.5% at 1 milliamper. Although rated at 1 ma. this unit is capable of 2 ma. operation within regulation specifications. This 16 tube unit is of the RF type consisting of a separate oscillator and buffer feeding the power oscillator into a doubler rectifier. Regulations accomplished through feed-back into a DC amplifier plus simultaneous output control of the buffer. Polarity reversible from front panel. Standard Rack Model—19" wide x 12" high x 13" deep. Standard Bench Model—21" wide x 14" high x 15" deep.

With Meter **\$670 Net**—Less Meter **\$595 Net**

MODEL LAB-30 is a positive polarity output regulated High Voltage DC Power Supply with same electrical characteristics and dimensions as the LAB-30PN. Available in either positive or negative polarity.

With Meter **\$570 Net**—Less Meter **\$495 Net**

MODEL MIL-30

POSITIVE POLARITY POWER SUPPLY

The **Model MIL-30** is a positive polarity, high voltage DC power supply, with an output voltage range of 15 to 30 KV D.C. at 1 ma. with regulations of .5%. The MIL-30 also has a negative 1000 Volt tap at 1 ma. regulated. Also available in positive 300 Volt tap at 1 ma. This unit is shown less housing, is built in accordance with military specifications. Dimensions: Length 15", Width 8½", Depth 9". Weight—36 lbs.

MODEL PN-60

REVERSIBLE POLARITY RF TYPE DC POWER SUPPLY

Polarity changes made on front panel. Continuously variable from 0 KV to 60 KV. Current output 1 milliamper at 60 KV. Overall Dimensions 22½" x 21" x 15". Ideal for electrostatic paint spraying, capacitor charging and testing as well as many other uses.

PN-60 Complete with Meter
\$675.00 Net

MODEL LAB-60

REGULATED DC POWER SUPPLY

0-60 KV at 1 ma. regulated. 2 ma. may be drawn from 45 KV to 0.

LAB-60 Complete with meter . . . **695.00 Net**

TELEVISION CO., INC.

3029 WEBSTER AVENUE
BRONX, N. Y. Kingsbridge 7-030

HIGH VOLTAGE

MODEL 2040 • 40 KV DC POWER SUPPLY

A ruggedly built power supply which is in constant use in laboratories and industrial plants throughout the world for condenser charging, electrostatic spraying and stress testing, etc. Nothing finer available at five times the price. Designed for constant use and will stand severe abuse. Available with either positive or negative 40 KV output. Voltage range of approx. 15 to 40 KV. The 15 to 40 KV variance in voltage is controlled through a knob on the front panel. If required for TV use, a voltage output of approx. 4 to 6 KV is available through a tap. Voltages supplied through a 4 ft. HV Safety Cable. Specify desired polarity when ordering.

With HV meter installed in front panel. **\$136.90 Net**
\$50 additional

0-100 KV DC 2 ma. OIL-FILLED 60 CYCLE POWER SUPPLIES

Suitable for use in paint spraying, flocking, electrostatic precipitation.

4 1/2 KV POWER SUPPLY

This compact, well designed, ruggedly built DC supply utilizes two 6AQ5 tubes as a parallel oscillator feeding a 1X2 rectifier tube. For an output voltage of 4 1/2 KV DC at 1 milliamper, the low voltage input requirement is 250 V at 50 milliamperes. By varying the DC input the output voltage can be varied from approx. 1 KV to 7 1/2 KV. Dimensions: 5 3/8" high x 5" deep x 4 1/4" wide. In completely enclosed metal housing (not shown). Less low voltage DC supply. **\$32.50 Net**

MODEL RG-30 • Continuously Variable 15-30 KV Regulated Power Supply

High grade supply which incorporates voltage tap in the range of 4 to 6 KV. Use with 5WP15, 5TP4 and flying tubes. Regulations better than .5% milliamper. In wide use for color development work, transcription recording systems. Power supply also available with focus and convergence voltage for RCA Tri-Color tubes at slight additional cost. **\$295 Net**
 HV meter installed on front panel. **\$50 additional**

Selenium Rectifier Power Units

D.C. POWER SUPPLIES MODEL CV-30-24

INPUT: 117V, 60 cycle, single phase.
OUTPUT: 0-30 volts at 0-24 amperes D.C.
CONTROLS: Powerstat, Heinemann magnetic circuit breaker, Klixon thermal circuit breaker, rectangular voltmeter and ammeter accurate to 2%, neon pilot light, 5 way binding posts for output.

CV-30-24 full wave rectified D.C. \$260.00
CF-30-24 2.5% ripple \$300.00
CA-30-24 0.35% ripple \$345.00

D. C. LABPACK

INPUT: 117 volts, 60 cycle, single phase
OUTPUT: 0-28 volts at listed current, continuously variable
CONTROLS: Powerstat, circuit breaker, neon pilot lamp, on-off switch, voltmeter and ammeter accurate to 3%, 5 way binding posts for output.

Model L 28-5, 5 Amperes full wave rectified D.C. \$87.50
Model LF28-4, 4 Amperes D.C. 2% ripple 107.50
Model L 28-10, 10 Amperes full wave rectified D.C. 155.00
Model LF28-8, 8 Amperes D.C. 2% ripple 170.00

The illustrated standard units represent the power supplies we manufacture. Many power supplies are designed to the exact requirements of the user, giving maximum utility together with economy. Prompt quotation and delivery. Request catalog describing these and other power supplies.

POWER CONVERSION FOR—

Production and laboratory testing of D.C. apparatus from A.C. power lines, allowing continual variation of D.C. voltage and current to simulate changing battery or line voltage conditions. Commercial operation of vibrator power packs, dynamotors, D.C. motors, relays and other devices which require D.C.

- Replacing storage or primary batteries.
- Life testing of battery operated equipment.
- Battery charging.
- High current selenium rectifier plate power supply.

ADVERTISERS

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation laboratory equipment, there is a crossover of use in the electronic and the nuclear field.

But, there is very little cross-over between the subscriber lists of the two publications—a matter of a few percent points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history—the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Let them show you what your potential can be.

Simplify Your Access Panel and Door Assemblies.

Fasten them faster with Quick-Lock

Fastening removable access doors and panels need not be a laborious and costly production or assembly operation—not if they're fastened with QUICK-LOCK.

Designed for simple installation, QUICK-LOCK requires no special tools. It speeds up mounting and demounting detachable panels with only a 90° turn required to lock and unlock it *in a jiffy*.

The flexible mounting and tapered stud makes QUICK-LOCK ideal for assembling curved sheets and insures a tight fit when locked. Stud is self-ejecting when unlocked. Minimum deflection is assured—only initial loads are carried by the helical stud. Solid supports take up increased loads.

Industrial and agricultural equipment manufacturers would do well to analyze the cost-saving features of QUICK-LOCK's simple design. A good way would be to consult a Simmons Engineer and discuss the economy of a QUICK-LOCK installation as compared to your present fastening method. Why not send for him today?

SIMMONS FASTENERS

SIMMONS FASTENER CORPORATION • 1750 NORTH BROADWAY, ALBANY, N. Y.

HERE'S EXPERT HELP YOURS FOR THE ASKING!

We've honestly earned our reputation as experts in electronic development, design and production . . . and our complete facilities are always at your service.

Our two plants have a production area of more than 122,000 square feet. They are laid out for peak efficiency in development, design, fabrication and assembly of every component in electronic projects from simple test equipment to complex radar systems.

Here are complete departments for metal working . . . welding . . . riveting . . . heat treating . . . plating . . . engraving . . . assembling . . . finishing . . . packaging and shipping. Approximately 500 trained employees and experienced electronic engineers assure accurate and efficient results.

Take advantage of our unique and complete ability to serve you, regardless of the size and scope of your electronic projects. Your inquiry will be expertly and promptly evaluated and our suggestions will be of interest and value to you. There is, of course, no obligation.

HIGH ACCURACY ELECTRONIC APPARATUS

Specialists in

PRECISION ANALOG COMPUTING EQUIPMENT

for Solving Problems in Dynamics

- 1 COMPUTATION CENTER, PRINCETON, N. J.** Located on U. S. Route 1. Owned and operated by Electronic Associates, Inc. Established to meet the demand for a headquarters where members of industry can solve their dynamic computation and simulation problems. A staff of scientists experienced in the use and application of analog computers will be available to evaluate, set up, and solve problems.
This facility will provide computer time on a rental basis, to industry, for problem solution. Complete basic and accessory Electronic Associates equipment will be available at the Center, summer 1954.
 - 2 PRECISION ANALOG COMPUTER, TYPE 16-31R.** The most accurate, versatile and dependable equipment possible at a fair and reasonable price. It features ruggedized construction, a new high gain, low drift, contact stabilized d-c amplifier with outstanding accuracy, gain, frequency response and output power characteristics. Provisions are made for expansion to larger more complete systems by the addition of standard component groups including operational amplifiers, resolvers, servo multipliers, diode function generators, electronic multipliers, and other associated input and output equipment.
 - 3 DIGI-VERTER GROUP 17-31A.** The Digi-Verter can be used to convert digital information, such as that obtained from card reading machines or tabular lists, into analog form suitable for presentation as a point plot on a Variplotter plotting board. It is designed to accept two four-decimal digit numbers and their signs from an IBM machine such as Type 513, 517, 519, 523, etc. Complete operating controls include power switch, feed switch, input switch, storage clear, and scale factor and parallax controls for both X and Y. Scale factor will provide plot expansion up to 10 times and parallax controls allow the zero-zero origin to be located anywhere on the plotting surface. The complete digital plotting system consists of the Digi-Verter, Data Input Keyboard, Model 205G Variplotter plotting board and Multi-Symbol printing head. Other models of the Digi-Verter are available for accepting input data from paper and/or magnetic tape.
 - 4 VARIPLOTTER, MODEL 205J.** A self-balancing potentiometer type recorder designed to record simultaneously two independent X vs. Y plots, both using the full plotting surface. The plotted result, in the form of an inked line, is presented on a 30 inch square of paper which is held firmly to the vertical plotting surface by a vacuum system. Static error is 0.05 per cent of full scale. Dynamic error averages 0.05 per cent of full scale plus the static error. Standard writing speed is 8½ inches per second. Sensitivity is 50 millivolts to 10 volts per inch. Where floor space is limited, the Model 205J VARIPLOTTER is recommended for your recording needs such as analog computer output, guided missile data, engine performance, etc.
 - 5 COMPLETE RANGE OF PRECISION ANALOG COMPUTERS.** Electronic Associates, Inc. is equipped to build analog computers ranging from the smallest and simplest to the largest and most complete. The computer pictured here, a typical large installation, was designed and built for the Radar Research and Development Division of Hughes Aircraft Company. It consists of 132 operational amplifiers, 13 servo multipliers, 3 resolver-multiplier channels together with control consols so arranged that the computer may be operated as a large single computer or as two smaller individual computers.
 - 6 VARIPLOTTER, MODELS 205G AND H.** A self-balancing potentiometer type recorder designed to record one variable d-c voltage as a function of a second variable d-c voltage. Model 205G is a single pen board that will present a single X vs. Y plot. Model 205H has an additional arm and pen allowing it to record two independent sets of X vs. Y data simultaneously. Static error is 0.05 per cent of full scale at 70 degrees Fahrenheit. Dynamic error averages 0.05 per cent of full scale plus the static error. Sensitivity is 50 millivolts per inch to 10 volts per inch. Maximum writing speed is 8½ inches per second. Continuously variable uncalibrated scale factor and parallax controls are provided for each axis. Accessories are available for the Variplotter, such as: High Speed Gear Box to increase the writing speed, a Function Generator Kit to enable it to be used as an input device, paper drive mechanism, so that roll paper may be used, etc.
- **FUNCTIONAL POTENTIOMETERS.** There are two types of sine-cosine potentiometers available—Type 462 which is a single unit and Type 315 which provides two sets of sine-cosine functions. Accuracy, is within 0.15% of the theoretical voltage for all points throughout 360° of shaft rotation. Angular resolution is 0.005% of 360°. Electrical resolution, expressed as a percentage of the total voltage applied across one 90 degree quadrant is within 0.05%. Card resistance is approximately 60,000 ohms per 90° quadrant and maximum voltage rating is 200 volts for both types. These potentiometers find wide use as highly accurate d-c resolvers in the analog computer field.
 - **State your problem and we will send you applicable data. Write to Dept. EBG**

LONG BRANCH • NEW JERSEY

A RELAY for every application . . .

From extremely sensitive to heavy duty relays . . . whatever the need . . . you'll find Signal Engineering Relays built to meet the severest operating conditions.

Backed by more than a quarter-century of specialized engineering experience, each relay embodies design features which insure accurate, efficient and dependable operations to meet exacting standards of performance. That is why . . . whenever performance counts . . . Signal Engineering Relays are used as components by many of the largest manufacturers of electronic equipment and devices, and for other control operations by leading industrial firms everywhere.

Many of our relays are designed to meet Navy and military applications without modification. Other standard relays available, or relay assemblies modified to fit various armed services' requirements. Tell us your requirements and we will gladly submit our recommendations.

Kenyon

TWINS

M LINE

MEETS ALL MIL-T-27 REQUIREMENTS

Completely hermetically sealed to meet MIL-T-27 specifications. Military Standard types are included. Catalog Listing M L

C LINE

MEETS ALL CIVILIAN REQUIREMENTS

A complete line to MIL electrical specifications, housed in conventional cases. Satisfactory performance at substantial savings. Catalog Listing C L

HOUSED IN CASES WITH STANDARD MIL-T-27 DIMENSIONS, BOTH LINES CARRY THE USUAL KENYON GUARANTEE

The new Kenyon Military and Commercial Lines feature the very latest practice, using the best class "A" wire and insulation now available, and the latest types of core material, to obtain minimum size at reasonable cost. . . . Cases are identical to the requirements in the MIL-T-27 specification and standard units are finished in a smooth, durable medium gray. Other colors are available on special order. Full rating information and schematic is furnished in the form of a stencil on each case. . . . Special units with other ratings and the same or similar cases are available on short delivery, in any quantity. Class B, class C, and class H units can also be delivered no special order. Where casing is not required yet sealing is important, we recommend our "Ken-Seal" molded transformers, available on special order. Write for catalog. Your inquiry will receive prompt attention.

KENYON TRANSFORMER CO., INC., 840 Barry St., New York 59

MEPCO

Time Proven PRECISION RESISTORS

Encapsulated, approved MIL-R-93A and commercial types provide positive moisture and mechanical protection. Available in all resistance values, temperature coefficients and tolerances down to $\pm .01\%$. Also, matched sets.

Hermetic sealed carbon film types unexcelled for critical applications where wire wounds are too large or costly. Resistor coated units to MIL-R-10509A. Disc and rod types for high frequency requirements. Glass sealed types for high stability and tolerances to $\pm .1\%$.

Standard JAN-R-93 and commercial steatite bobbin precision resistors. Basic lug terminal types include exclusive metal molded termination and patented internal insulation features. All types manufactured to your exact requirements.

Lead terminal precision wire wounds. Same basic design reliability as standard JAN types. Tolerances to $\pm .1\%$ matched sets, etc.

JAN-R-29 external meter multiplier resistors. Types MFA, MFB and MFC in all standard resistance values usually available from stock.

Shown on this page are but a few of the many types available either as standard items or custom manufactured to your exact specifications. Complete technical data will be furnished on request.

Simplify planning and production of Electronic Gear with ALDEN STANDARD COMPONENTS

① You have to provide for IN-OUT CIRCUITS

Alden Detachable Line Cord to bring the power in.

202 FIAC

Reduce all problems to just a simple plug mounted in your equipment. Give customer choice of desired length.

Alden Slide-in Back Connectors centrally organize all in-out leads.

Unique Alden Back Connectors avoid rat's nest, blind wiring of conventional connectors — organize leads in spread out single check point, instantly accessible, color coded and symbolized for quick identification.

Tiny Alden Sensing Elements act as "tell tales" to protect equipment, monitor operation, permit front-panel checks

Check Voltages with Alden Mini-Test Jacks
Monitor Operations with Alden Pan-i-Lite
Spot Blown Fuse — Alden Fuselite

Alden Miniature AC outlets provide power take wherever needed.

World's smallest, most AC outlets, with tabs tailored to your specs.

② You have to provide INTERNAL CONNECTORS

Alden Connectors, from 1 to 20 contacts, employ standard mass-produced components to fit every need with minimum assembly costs and space requirements: "Top connected contacts" and other unique Alden features provide extra quality and dependability.

201M/F

SINGLE LEAD DISCONNECTS
Miniature hi-voltage disconnects. Phenolic or polyethylene insulation. UL safety collar.

8101M/F

TWO AND THREE LEAD
Excellent miniature antenna lead-ins or signal connectors.

HA Series

500 Series

Metal Seal Series

Shielded Series

ONE TO FIVE LEAD
Plugs, Connectors and Sockets that answer most needs for 1 to 5 shielded leads.

Speaker Connector Series

TWO TO SEVEN LEAD
Beautiful detachable terminal connectors that do away with terminal strips, save soldering and cabling.

Non-interchangeable Series

TWO TO ELEVEN LEAD
For cables having several connectors, prevent misconnects by specifying Alden Non-Interchangeable Connectors.

212/5

212

MINI DUO-DECALS
Have only 3 parts: "Top Connected" contacts, leads, molding. Voltage breakdown exceeds that of tube base.

211

214

C-R TUBE CONNECTORS
Quality equipment for instruments, TV, radar. Magnal, duodecal, diheptal. 100% insulation each clip and lead.

TUBE CAPS for every purpose
Completely prewired — Phenolic, Injection

90 SERIES
Quality phenolics, completely insulated for radio receiver, transmitter or TV tubes.

ISL SERIES

Integrally molded with insulation, lead and grid in one piece to meet any environmental and electrical conditions.

DIAL LIGHT SOCKET

Designed for low-cost volume production, with pre-wired leads ready to drop into your equipment. 4 basic designs you can standardize on for most all needs.

81L Single Lead Clip Mounting

82ML Double Lead Clip Mounting

83UL Single Lead Snap-in

85UL Double Lead

COMPLETELY MOLDED CABLES

New Alden Technique Solves hi-voltage and corona problems

This 20,000 volt Anode Cable for Color TV comprises nylon Cap, High-voltage Disconnect and Anode Clip, molded by Alden technique to form integral unit with joints sealed against leakage and corona discharge. We mold cables to your requirements including any number of components.

③ You probably want PLUG-IN CONSTRUCTION

It's as simple as this — Alden Terminal Card Mounting System lets you organize circuitry in compact vertical planes.

PREPUNCHED TERMINAL MTG. CARD

MINIATURE TERMINALS

JUMPER STRIP
Eliminates wiring for common circuits

CARD-MTG. SOCKETS

YOUR COMPLETED CIRCUIT FOR PLUG-IN PACKAGE OR CHASSIS

— and see how easily these Terminal Cards drop into

ALDEN PLUG-IN PACKAGES. 4 SIZES: 7, 9, 11 & 20-PIN

ALDEN BASIC CHASSIS 4 SIZES: 2", 4", 8" & 17" widths

In Standard Racks

In Alden Uni-Racks

In Portable Cases

GET QUICK CHASSIS PILOTING, LOCKING AND EJECTING WITH ALDEN SERVE-A-UNITS

Alden Serve-A-Units install easily in your plug-in chassis so that 1/2 twist of front handles operate powerful nose cam to pilot, lock or eject your Side Rail guided into simple "L" Lock Frame.

Alden Slide-in Back Connectors make and break all leads as Serve-A-Units draw in or eject.

REQUEST CATALOG describing Alden's complete line of standard components to mount, house, fasten, connect, monitor your electronic circuitry. State your area of interest and we will send samples.

ALFAX

THE NEW UNIVERSAL RECORDING PAPER
for HELIX, STYLUS, ROLLER
or IMPRESSION
PRINTING and RECORDING

Now for the first time there is available a universal paper for instrument and facsimile recording applicable to any type of printing or recording means known today.

ELECTRICITY IS THE INK

Marked by voltage as low as 1 volt, ALFAX now makes possible low-cost recorders of new simple design.

ALFAX is the only paper capable of high speed recording—normal writing speeds up to 300" per second.

ALFAX records faithfully under extreme humidity, and over all temperature ranges from stratospheric to sub-tropical.

ALFAX provides a THIRD DIMENSION thru 14-step tone response.

Find how this new universal paper can serve you to PRODUCE Memories—to RECORD Computer Totals, Radar Signals, Sonar Signals, Infra Red Signals, Telemetered Data—to DISPATCH Business Records and Information—to MONITOR Any Operation, Any Process—to PROVIDE Information for Analysis Studies.

Request Booklet "Recording with Alfax"
—describe your problem.

**ALFAX PAPER &
ENGINEERING COMPANY**
WESTBORO 4, MASS.

ALDEN MONITORING RECORDERS

Providing an extremely simple method of getting permanent records of number and time of almost any actions or occurrences—with simple rugged Recorders that can be used under almost any conditions—installed by anybody.

ALDEN MAGAZINE RECORDER

Records 2 actions plus timing marks. Just plug into AC outlet and run wires to source of on-off actions.

ALDEN MULTI-CHANNEL RECORDER

Records up to 30 separate tests, actions and processes, all on 5" paper.

The basic simplicity of these recorders is made possible by the use of Alfax Electro-sensitive Paper in which electricity is the ink. This paper records under climatic extremes of humidity and temperature and making possible simple, rugged recorders without need of delicate mechanisms or complex moving parts.

FACSIMILE RECORDER COMPONENTS

It's extremely simple to explore the unique direct recording techniques made possible by Alfax Paper with these unitized facsimile recorder components.

TRANSFORMERS BY INDUSTRIAL

Manufactured in a modern and complete plant (illustrated above) with 40,000 square feet of manufacturing facilities with a railroad siding, served by D. L. & W. Railways.

For over 25 years, the Industrial Transformer Corporation has specialized its abilities on the production and improvement in the design and manufacture of Transformers. The engineering know-how and specialized skills that have resulted from this experience will become apparent to you, when you use our products.

You will find Industrial ready to cooperate with you in meeting special requirements, regardless of how difficult or unusual they may seem.

We invite your inquiries.

ITC provides the most up-to-date plant facilities for supplying you with transformers and test equipment of the highest quality.

TRANSFORMERS . . .

. . . specified for the usual
. . . demanded for the unusual

"GTC" Transformers for television receiver applications . . . custom-designed for high quality at minimum cost.

"GTC" Transformers for industrial and commercial applications . . . accurately engineered and fully recognized for finest quality.

Manufacturers specify "GTC" . . . for audio uses, communication, radar devices, test equipment, transmitters, and various other electronic-controlled devices.

"GTC" Military Transformers . . . designed to meet rigid government specifications and to perform under the most severe and continuous operating conditions. MIL-T-27 and JAN-T-27.

Skilled engineering techniques make GTC a source for transformers in highly specialized and extremely unusual applications. Utilization of these techniques results in greater dependability, quality and better construction.

Our completely self-contained plant's modern equipment guarantees transformer production in any quantity, to meet your requirements. We welcome your inquiry and will supply production samples where desired.

GRAYHILL Switches • Test Clips • Molded Plastic Parts

Grayhill Rotary Tap Switch

SERIES 3000

For Special Circuit Combination Applications

Available 1 to 12 decks, 2 to 11 contacts per deck.

A rugged index action assures rotor contact coming to rest at next position once thrown past center.

Diameter of switch 3-1/2"

Rated—20 amps., 115 v., A.C., non-inductive

Grayhill Miniature Tap Switches

SERIES 5000

For Commercial Applications

Available 1 to 6 decks—2 to 10 contacts per deck.

Shorting (make before break) or Non-shorting (break before make).

Switch rotates 360° with 10 positions—stops provided with 9 or less positions.

Bushings, 1/4" long—3/8"

Diameter of switch 1-1/32"

Rated to break—1 amp., 115 v., A.C., non-inductive.

To carry—5 amps., 115 v., A.C.

SERIES 12

For Military Applications

Available 1 to 6 decks—2 to 10 contacts per deck.

Shorting (make before break) or Non-shorting (break before make). 360° rotation with 10 positions—stops provided with 9 or less positions.

Bushings, 1/4" long—3/8"—32 thread

Diameter of switch 1-1/32".

Rated to break—1 amp., 115 v., A.C., non-inductive

To carry—5 amps., 115 v., A.C.

SERIES 24

Positive Detent Action and better feel for precision requirements.

Available 1 to 6 decks—2 to 10 contacts per deck.

Shorting (make before break) or Non-shorting (break before make).

360° rotation with 10 positions—stops provided for less than 10 positions.

Bushings, 1/4" long—3/8"—32 thread

Diameter of switch 1-1/32"

Rated to break—1 amp., 115 v., A.C., non-inductive

To carry—5 amps., 115 v., A.C.

Grayhill Push Button Switch

SERIES 2000—Snap Action

For Manual Operation

Audible click when actuated Momentary contact, single pole, single throw type.

O.D.—7/8" dia. x 1-59/64" high Bushings, 7/16" long—15/32"—32 thread

Rated—10 amps., 115 v., A.C., non-inductive

1 amp., 115 v., D.C.

Rated Life—Approx. 50,000 operations

No. 2201—Normally open

No. 2202—Normally closed

SERIES 4000—Momentary Contact

Momentary contact, single pole, single throw type.

O.D.—51/64" dia. x 1-17/32" high Bushings, 3/8" long—15/32"—32 thread

Rated—1/2 amp., 115 v., A.C.—non-inductive

Rated Life—Approx. 800,000 operations

No. 4001—Normally open

No. 4002—Normally closed

SERIES 23—Miniature, Momentary Contact

Momentary contact, single pole, single throw

O.D. 1/2" dia. x 1-3/64" high Bushings, 1/4" long—5/16"—32 thread

Rated—1/4 amp., 115 v., A.C., non-inductive

Rated Life—Approx. 500,000 operations

No. 23-1—Normally open

Grayhill Test Clips

SERIES 16—Completely insulated, alligator type

Even hinge pin is insulated.

Low contact resistance (approx. .0015 ohm)—.008" silver overlay on contact surfaces

Terminals—silver plated Finger grips—molded phenolic

SERIES 2

No. 2-2—Plug-in Adapter for equipment employing 3/4" jack centers.

No. 2-1—Banana Plug

Clips—Cadmium plated Plugs—Nickel plated Base—General purpose phenolic electrical grade, per Mil-P-14 type CFG.

Grayhill Molded Plastic Parts

Photoelectric Controls

for Every Purpose

Such as Counting, Sorting; Bin Level, Tension, Jam-up, Die Protection, Gaging, Alarms, Flame Failure, Registration, Illumination, Weighing, Positioning, Inspection, Door Operation, Smoke Detection, Timing, etc.

Complete Range

General Purpose to extreme sensitivity, and .000010 second dark time; time delay, safety relays, warm-up protection, "fail safe" circuits, dual filament light sources and many other selective features.

Designed and Built for Reliability

First quality components, rubber based tube sockets, positive lock tube shields, splashproof cast aluminum housings.

Application Engineered

Tell us what you want to accomplish or send for Catalog.

PRECISION TEST EQUIPMENT

Model PC-100 DOUBLE PULSE GENERATOR

- SINGLE OR DOUBLE PULSES, POS. OR NEG.
- OUTPUT 0-75 V, INTERNAL IMPEDANCE 220 Ω
- INTERVAL BETWEEN PULSES, 5 TO 5000 μ s
- PULSE WIDTH 1 μ s, RISE & DECAY TIME .1 μ s
- SYNC INT. OR EXT.; SYNC TRIGGER OUTPUT
- TIME MARKERS 1, 10 OR 100 μ s, ACCURACY 1%
- AMPLITUDE CALIBRATOR .1 TO 100 V, ACCURACY 2%

Model TO-100 PUSH-BUTTON TEST OSCILLATOR

- ANY 20 FREQUENCIES IN RANGE 20 ~ TO 100 KC
- STANDARD MODEL FOR FM/FM SUB-CARRIER TESTS
- STANDARD MODEL FOR AUDIO FREQUENCY TESTS
- CALIBRATED FREQ. CONTROL, $\pm 10\%$ ADJUSTMENT
- LOW DISTORTION AND EXCELLENT STABILITY
- CONSTANT VOLTAGE LOW IMPEDANCE OUTPUT
- CONTINUOUSLY VARIABLE CALIBRATED LEVEL

Model PG-200A FAST PULSE GENERATOR

- DURATION AND POSITION .05 TO 1000 μ s
- RISE AND DECAY TIMES CONSTANT .03 μ s
- SINGLE PULSES TO 20,000 PER SECOND
- 100 VOLTS, 50 OHMS DRIVING IMPEDANCE
- CALIBRATED WIDTH, POSITION AND RATE
- TRIGGER OR SINE WAVE SYNCHRONIZATION
- NEGLIGIBLE INTERACTION OF CONTROLS

Model DT-100 DIODE TESTER

- PRE-SET REGULATED REVERSE VOLTAGES
- -10, -50, -100, 0-150 VOLTS AT 5 ma
- FORWARD CURRENT TO 500 ma AT 1.0 VOLT
- CONTROLS INTERLOCKED FOR ROUTINE TESTS
- REVERSED OR SHORTED DIODE INDICATION
- TEST FIXTURE ALLOWS QUICK CONNECTIONS
- PROVISION FOR ACCESSORY DIODE HEATER

Model PS-110 CONSTANT CURRENT POWER SUPPLY

- CONSTANT CURRENT OR CONSTANT VOLTAGE
- ALL RANGES CONTINUOUSLY VARIABLE PLUS TO MINUS
- FROM LESS THAN 1 μ a TO 50 ma LOAD CURRENT
- VOLTAGE VARIABLE FROM 0 TO PLUS OR MINUS 200 V
- REGULATION AND STABILITY 0.5% OR LESS
- USEFUL IN DIODE AND TRANSISTOR TESTS

Model ES-180 ELECTRONIC SWITCH

- FOR D.C. AND WIDE BAND OSCILLOSCOPES
- FOR FAST, TRIGGERED OR RECURRENT, SWEEPS
- INTERNAL DUAL ATTENUATORS
- INTERNAL AMPLITUDE CALIBRATOR

Model PT 145 PULSE TIMER

- PRECISE MEASUREMENT OF FAST PULSES: RISE TIME, DECAY TIME, PULSE WIDTH, ETC.

ULTRA PRECISION CRYSTAL OSCILLATOR ASSEMBLIES

- COMPLETE CRYSTAL OSCILLATOR, OVEN AND OVEN TEMPERATURE CONTROL CIRCUITS

Model FS-185 FREQUENCY STANDARD

- 100 KC GT CUT CRYSTAL
- LONG TERM STABILITY, ONE PART IN 10^7 OR BETTER
- SHORT TERM STABILITY, ONE PART IN 10^8 OR BETTER

CINEMA ENGINEERING CO.
DIVISION AEROVOX CORP.
1100 CHESTNUT · BURBANK, CALIFORNIA

NEW YORK OFFICE: 101 PARK AVENUE

NEW PRECISION COUNTING SYSTEM FOR HIGH FREQUENCY

DECAVIDER* 10-100

Newly modified DECAVIDER* 10-100 extends to 100 megacycles the counting range of 10MC standard counting equipment. Single knob Decade selector switch and output meter permit instant location of unknown frequency, no auxiliary tuning required. No loss of accuracy, merely add number indicated by DECAVIDER* to number on counter.

Specifications:

Range: 10-100 megacycles.
Used with: Any standard 10MC counter or EPUT meter.
Input: 0.05 to 4.0 volts rms.
Output: 1.0 to 20 volts rms.
Average Gain: 25 db.
Price: \$495.00 FOB Caldwell, N. J.
Other DECAVIDERS* for other ranges with 100KC and 1MC counters.

Also available:—

DECALATORS* (Decade-switched crystal-controlled signal generators)
DECASWEEPS* (Decade-switched sweeping oscillators).

the manufacturer's name
when only
a trade name is known.

MINIATURE TRANSISTOR TRANSFORMER

Miniaturized transistorized circuitry in amplifiers, hearing instruments and control circuits.

MINIATURE RECEIVERS

Known for sensitivity and outstanding fidelity, widely used in headset applications.

VACUUM ENCAPSULATED PLUG-IN TRANSFORMER

Vacuum sealed against moisture, especially adaptable for printed circuits.

PRECISION PLASTIC MOLDING

Compression and injection type molding designed to meet your specific requirements.

PRECISION ASSEMBLIES

Designed and developed for miniaturization in special applications.

PRINTED CIRCUITS

Custom designed etched circuit assemblies built to your requirements.

PRECISION DECADE RESISTOR

High precision decade resistor for reliable accuracy in electronic computers.

VACUUM ENCAPSULATED ASSEMBLIES

Vacuum encapsulated electronic assemblies for particularly rugged requirements.

QUALITY METAL PRODUCTS
FOR INDUSTRY SINCE 1870

QUALITY PRECISION INSTRUMENTATION

FM SIGNAL GENERATOR

A precision FM signal source for testing FM equipment. 27-230 mc.

UHF TV SWEEP FREQUENCY GENERATOR

A laboratory instrument also suitable for production and service testing of UHF television tuners and receivers. 450-900 mc.

UHF GRID DIP OSCILLATOR

This versatile, compact instrument combines the power supply and oscillator in one lightweight unit. 400-900 mc.

MODEL 130A

VHF-UHF NOISE SOURCE

Features simple operation, long life noise diodes, and no balun requirements. 50-900 mc.

MODEL 175

SIGNAL GENERATOR

Tests receivers and transmitters operating between 2700 and 3400 mc.

BROADBAND AMPLIFIER

Increases the sensitivity of oscilloscopes and voltmeters; amplifies short pulses without objectionable distortion. 15 kc — 50 mc. 60 db gain.

MODEL 160

MODULATION MONITOR

Measures the percentage of modulation of AM transmitters operating from 100-225 mc or 225-400 mc.

SQUARE WAVE GENERATOR

Suitable for testing the transient and frequency range of wide band amplifiers, and accurately measuring their amplitude. 10 cps to 1 mc.

NEW MODEL 183

TRANSCONDUCTANCE ANALYZER AND CIRCUIT SIMULATOR

Measures transconductance under all operating conditions; reproduces any type of static or dynamic tube characteristic. Range: 0-100; 0-500; 0-1,000; 0-5,000; 0-10,000; 0-50,000 micromhos.

NEW MODEL 901

NEW FREQUENCY STANDARD MODEL 701

A source of highly stabilized frequencies covering the range from 10 kc to 50 mc at intervals of 10 kc, 100 kc or 1 mc.

NEW LONDON INSTRUMENT
Company

BOX 189E, NEW LONDON, CONN.

WHAT ARE YOUR SLIP RING ASSEMBLY REQUIREMENTS?

list them on the dotted lines:

size...

Complete PMI Slip Ring Assemblies we have made range in size from .080" diameter by .450" to 40" diameter by 6' high, weighing as much as 3100 lbs. We can make them smaller or larger—tailored to your exact requirements.

application...

PMI Slip Ring Assemblies surpass severe shock, vibration and water test conditions of MIL-E-203 and MIL-T-17113 . . . provide trouble-free operation at 60,000 feet, resist fungus and corrosion.

electrical data...

PMI Slip Ring Assemblies have a Voltage Range from microvolts to more than 20,000 volts corona free; Current Range from microamps to more than 600 amps; number of circuits more than 500; typical Brush life 14 million linear feet; Frequency from DC to more than 60 mc.; Noise Level under all custom specifications has been met or bettered.

quantity...

Production on small Synchro Slip Ring Assemblies runs as high as 1000 per day. Ample manufacturing facilities make low-cost large runs possible.

mail this page TODAY for immediate attention to your problem...

NAME POSITION

COMPANY ADDRESS

If your requirements are in the specification stage or in production, PMI engineers will submit, at your request, a design layout or evaluate your present design layout for possible measures of economy or efficiency. Our diversified experience in designing and manufacturing Slip Ring Assemblies can save you time and money. Mail this page today.

For PRINTED CIRCUITS by the THOUSANDS

Select **METHODE** for Quality in Quantity on these circuit types:

★ Single Side Conductor Panels — for Economy and Simplicity in Auto-sembly and dip soldering . . .

★ Two Sided Conductor Panels — For Compactness in applications requiring miniaturization and involving relatively few feed thru connections.

★ "Plated Through" Conductor Panels — For the complex circuit requiring a large number of feed thru connections with conductive holes to permit circuit cross-overs.

Well integrated facilities and a department specialized and experienced on custom tooled volume applications assures performance and satisfaction consistent with Methode's record in serving high production users.

Or by the Hundreds with "QUAD-KARDS"

Where the designer wishes uniformity and simplicity in assemblies which will be used in small quantities where custom printed circuit tooling would be uneconomical, pre-tooled QUAD-KARDS can be furnished in standard 2" square segments with (or without) conductors printed to specifications. Quad-Kards have standard hole punchings for tube sockets, transformers and condensers plus a grid pattern of .050" diameter holes on 1/4" centers. Undesired holes are omitted and the conductor pattern printed to the customer's layout. "Quad-Kards" may be abutted, angled or stacked during incorporation into finished assemblies. Details on request.

Advertisers:

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the publications — a matter of a few percentage points.

It is quite possible that you are making an effective presentation of your products and abilities in this excellent issue, but are missing a presentation before one of the fastest growing fields in the country's history — the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Ask them to show you what your potentials can be.

NEW

TUBE ACCESSORIES and ELECTRONIC HARDWARE

"Ventilator" shields not only improve "hot" tube performance by dissipating heat but are the most economical shields in Methode's extensive line. Easily handled and compression fitted to ground terminals on Methode laminated or printed circuit sockets, shields are available in lengths of 1-11/16" or 2-1/16" with one standard diameter which fits either seven or nine pin tubes. Available with tin or black oxide finish.

Molded phenolic plugs, with seven pins, 45° apart on .375" centers, mate with economical standard miniature sockets. Designed to save space and competitive in price with bulky wafer pin plates, these units are ideal for base assemblies on plug-in components or quick-disconnect harness assemblies. Plugs are available with or without vinyl caps or mounting saddles. General purpose or mica phenolic insulators with cadmium plated brass pins are standard.

For high voltage tubes these corona caps and socket combinations for both octal and noval sizes feature generously rolled outer surfaces. Assemblies are designed for screw mounting to condenser studs or stand offs and are available with general purpose black or low loss mica phenolic insulators. Noval caps available with 1-5/16" or 1-1/2" major rim diameter. Octal units have insulating fibre liners.

"Wire Wrap" sockets have terminals adapted for high speed solderless attachment of leads at considerable savings in assembly and inspection time. Miniature seven and nine pin units available in both laminated and molded types.

RL-277 ONLY, DIAM. = .1245

Standard Shaft: single end, 3/4" extension; specify if otherwise.
 Double-ended shaft special; specify diameter and length.
 Multiple sections can be ganged; add 3/8" to the overall length for additional section.
 Terminals will be positioned on the circumference as required for winding angle.
 Expected life of all types over 1,000,000 cycles.

THE GAMEWELL COMPANY
 Newton Upper Falls 64, Massachusetts

THE STANDARD OF QUALITY

HICKOK
INSTRUMENTS

FOR OVER FORTY-THREE YEARS

LABORATORY TUBE TESTER
All Voltages Variable and Metered

Model 700: Most complete and accurate Tube Tester. Covers wide ranges of values to duplicate the results in tube manuals. This instrument is invaluable for electronic developmental and research work. **Model 7001:** Null Reading Apparatus, for use with the Model 700 to obtain bridge type Null readings with an accuracy of 1%.

MODEL 700
Complete and accurate tube Tester available. 7 other HICKOK tube Testers available to fill all your requirements.

TRUE VACUUM TUBE VOLTMETER
Laboratory Size and Accuracy

Model 209A: Contains large 9" meter with zero-center scale. Highly accurate for servicing industrial electronic equipment. DC Volts: 0-1200 in 6 ranges. AC RMS Voltage: 0-1200 V. in 6 ranges. AC Peak-to-Peak Voltage: 0-1200 V. in 6 ranges. Capacitance 0.1 to 10,000 MMF in 2 ranges, 0-1000 MF in 5 ranges. Inductance 0.1 henries. 0.1 ohm to 10,000 megohms in 7 ranges.

MODEL 209A

SINE-SQUARE WAVE GENERATOR
For Laboratory & Industrial Use

Model 755: Provides an accurately calibrated source of sine wave and square wave functions over a wide frequency range. Sine wave total harmonic distortion below 1%. Hum level better than 90 db down. Square wave rise time less than .1 Micro second. Frequency range 10 to 250 MC. Noise level better than 90 db down. Square wave rise time less than .1 Micro second.

MODEL 755

NOISE GENERATOR
Industrial & Technician Model

Model 710: The first noise generator to be completely self-contained. Has two indicating meters. This instrument is divided into two parts — VTVM side and Generator Noise side. Permits noise level adjustments to meet requirements for testing audio and video in TV receivers. Ranges: 0-0.1, 0.5, 1.0 and 5.0 dbm. Frequency range flat from 10 to 250 MC. Noise level better than 90 db down.

MODEL 710

LABORATORY CATHODE RAY OSCILLOSCOPE
Wide Range . . . Versatile

Model 1800: Provides the ultimate in Oscilloscope function for the industrial electronic laboratory. Exceptional range, sensitivity and stability make the 1800 most desirable for the professional electronic engineer in his detailed visual study of any one electrical quantity as a function of another electrical quantity. 5 other models of HICKOK oscilloscopes are available. Write for catalog today.

MODEL 1800

**ELECTRICAL
INDICATING METERS**

HICKOK is a manufacturing pioneer and constant developer of the finest electrical indicating instruments. Today HICKOK manufactures the most accurate laboratory types with accuracies of 0.2% of full scale deflection down to small pocket portable types with accuracies of 1½%. HICKOK introduced the internal pivot design to provide the high standards of accuracy and dependability in modern instrumentation.

MODEL 46

The high HICKOK standard of quality is available in Ruggedized DC or Rectifier Type AC meters. This latest design provides the practical answer to requirements for shock-proof meters with dependable accuracy. These instruments are thoroughly engineered and tested and meet MIL-M-6A, MIL-M 10304 (Sig. C) and New Military Specification for Round Panel Instruments. Available in 2½", 3½" and 4½" Ruggedized.

MODEL 46-250

Space on an instrument panel is valuable. The need for obtaining as long a panel as possible is neatly filled with a 250 Degree Arc-Angle long scale instrument pioneered and perfected in the smaller size by HICKOK. These meters have a scale 2½ times as long as the conventional panel instruments. 250° Meters, in sealed as well as standard molded cases, are available in many sizes and ranges.

MODEL 14

HICKOK DC and AC Portable Instruments — Ammeters, Milliammeters, Microammeters, Voltmeters, Millivoltmeters, Volt-Ammeters Thermo-Meters are contained in a phenolic case lined with heavy steel shell which shields from the effects of stray magnetic fields. Scale divisions are spaced equal distances apart. Accuracy within ½ of 1%. On special order, Model 14 can be supplied with a calibration chart to provide accuracy to 0.2%. Also available is a complete line of pocket portables with accuracies to 0.5%.

The many special movements developed by HICKOK are: electro-dynamometers, self-contained frequency meters, galvanometers, true logarithmic deflections, special curves for special purposes and ruggedized designs for highest shock tests. Full technical information on the complete line of HICKOK instruments and test equipment is available on request. Kindly list details of your requirements and ask for Catalog No. 28.

ABC

MICROWAVE TRANSMISSION LINES

and COMPONENTS

for every installation requirement

FLEXIBLE WAVEGUIDES

TYPE L

INTERLOCKED

ely rectangular flexible waveguide
will both bend and twist freely and
tain excellent electrical character-
ic. Available to mate with most RG
R series rigid waveguide and also
ound waveguides. Furthermore, it
most rugged and mechanically
flexible waveguide made.

TYPE S

SEAMLESS-CORRUGATED

The only SEAMLESS rectangular flexi-
ble waveguide manufactured. RF leak-
age-free, pressurizable without a jacket,
bendable to very small radii, can be pre-
formed easily; just a few of its unique
features. Currently available to mate with
RG 52/U and RG 51/U.

TYPE V

VERTEBRA

The only rectangular waveguide possess-
ing circular mechanical symmetry. Pro-
vides bending, twisting, extension and
true shear in a single assembly. In addi-
tion, unlimited life under severe repeated
deformations. Currently available to mate
with RG 53/U and RG 52/U.

WAVEGUIDE COMPONENTS

We are staffed to design to
your specifications or manu-
facture to your drawings.
Supporting this engineering
and manufacturing capacity
is a completely equipped
Electrical Testing Laboratory
utilizing the finest in Testing
Techniques.

Technicraft specializes in
soldering and brazing tech-
niques. Facilities include
torch, furnace, induction and
resistance brazing and alu-
minum dip-brazing; a method
for every problem.

MICROWAVE TEST COMPONENTS

Components designed for application by
users. Incorporating features which give
production ease with laboratory pre-
cision. A few of our waveguide com-
ponents are:

- HIGH POWER PHASE SHIFTERS
- HIGH POWER STUB TUNERS
- PRECISION TRAVELING DETECTORS
- PRECISION SLIDE TUNERS
- MOVABLE TUNABLE LOADS
- VSWR CALIBRATORS
- DIRECTIONAL COUPLERS
- QUICK DISCONNECTS

COMBINATION ASSEMBLIES

Technicraft Type S Seamless-Corrugated
and Type L Interlocked flexible wave-
guides (see above) are frequently sup-
plied attached directly to mating rigid
without the use of flanges. Our engi-
neers can assist you in adding flexibility
to your rigid line without sacrificing
weight or electrical characteristics.

BEAM BENDER

A passive microwave relay, currently
available for use with 7000 MC/s equip-
ments. Used to change
beam direction on non-line-
of-sight courses and in
place of powered, attended
equipment, especially in in-
accessible and inconvenient
locations.

PHALO *Tel* TELEVISION CABLES

& PHALO *Tran* TRANSMISSION LINE CABLES

PHALO-X CUSTOM-MADE CABLES

A few of many possible combinations of cables made to customers' specifications

Coaxial solid "Copperweld" conductor; low-loss polyethylene insulation; bare copper braid shield; vinyl plastic jacket RG-59/U type.

Coaxial Midget.

Solid bare copper conductor; low-loss polyethylene insulation; tinned copper braid shield; vinyl plastic jacket; RG-58/U type.

Coaxial-RG11/U Type Stranded tinned copper conductor. Low-loss polyethylene insulation. Bare copper braid shield. Vinyl jacket.

Conductors in air space low-loss polyethylene tubes. Copper shield over tubes. Vinyl jacket.

Two flexible stranded bare copper conductors, parallel twin-lead construction, low-loss, polyethylene insulation standard color brown. 300 ohm shown. Conductors: copper or copperweld. Can be supplied 75, 100 and 150 ohm.

Same, 300 ohm heavy-duty cable.

PHALOTUBE — 300 ohm Tubular Television Transmission Line
Conductors: copper or copperweld

3 Conductor polyethylene
4 Conductor polyethylene
4 Conductor vinyl
5 Conductor vinyl

Four stranded tinned copper conductors, color-coded vinyl plastic insulation; one conductor has tinned copper shield and over-all vinyl plastic jacket; all four conductors cabled with jacketed conductor as core; cabled conductors covered with tinned copper shield; over-all vinyl plastic jacket.

Ten stranded tinned copper conductors, color-coded vinyl plastic insulation; two conductors twisted, covered with tinned copper shield; ten conductors cabled and filled, with shielded pair as core; cabled conductors covered with tinned copper shield, over-all vinyl plastic jacket.

Eight stranded tinned copper conductors, color-coded vinyl plastic insulation; with twisted pair as core, eight conductors are cabled and served, with vinyl plastic jacket; tinned copper shield and over-all vinyl plastic jacket.

Two core conductors AWG 16, six AWG 22.

PHALO *Com*

INTERCOMMUNICATING & SPECIAL CABLES

Braided and jacketed cables for general intercommunicating and public address system use. Many variations, incorporating other wire sizes, insulation types and thicknesses. Can be manufactured to your individual specifications.

Simplify CIRCUITRY

Have You considered all the possibilities of designing for compactness, simplicity, and increased sensitivity?

VECO THERMISTORS, as components, are supplying the solutions to many design and circuitry problems. *Investigate today!*

\$5 cash or money order will bring you the VECO Experimentors' THERMISTOR-VARISTOR Package, No. 168. 7 items and application circuitry—value over \$15!

Some Practical Uses: Time delay • Gas analysis • Volume limiting • Surge protection • Vacuum manometry • Flow measurement • Temperature control • Temperature measurement • Radar power measurement • Temperature compensation • Oscillator stabilization • new applications being developed.

VECO VARISTORS react instantaneously to current or voltage changes, and have innumerable uses such as arc suppressing and regulating source voltages.

VECO GAS ANALYSIS CELLS employ Veco glass-coated Thermistors as sensing and reference elements (no open wires, therefore no corrosion).

A request on business stationery will bring the VECO THERMISTOR DATA BOOK.

**PACKAGED
CIRCUITRY***

The Walkirt Co. manufactures a line of units for measuring time intervals, or highly repetitive activities up to 3 megacycles per second. Other units, also available from stock, will readily accomplish such functions as time sequential switching, pulse delaying, gating, amplifying, and pulse shaping.

Write for Catalog • Write our Engineering Service Department for specialized applications.

**Now Available Resin Encapsulated or "Open" Construction. Your Circuits Economically Packaged.*

TYPE: M 1243

DELAY MULTIVIBRATOR

The Walkirt Type M 1243 Delay Multivibrator is one of several stock delay units providing an externally variable delay pulse.

Freq. Range: 0-10 KC (higher speed units available) • Input: 75 V negative pulses (available from Walkirt counters) • Output: 120 V peak to peak, nominal 25 microseconds delay • Diameter: Only 1 1/4 inches.

Immediately Available in Quantity

145 WEST HAZEL ST., INGLEWOOD 3, CALIF.

RELAYS
Custom-engineered
to YOUR Specs

Class 33 — Midget, Sub-miniature — D.C. Also available in special low capacitance model.

Class 11—Versatile D.C. Latching Type also available.

Class 22—Versatile A.C. or D.C. Wide selection of variations.

Engineered and manufactured to highest standards of reliability.

Available with resistance to shock, vibration and temperature change to meet military specs.

Special variations engineered to meet exacting service and application requirements.

Whatever your service, just tell us what you need.

Send for Catalog describing Class 33, Class 11 and Class 22 Relays for A.C. or D.C., open, plug-in, dustproof, hermetically sealed and many special models.

Skillfully Designed Thoroughly Field-Tested Precision Thermal Devices

Quality Line Supported by
Helpful Engineering Cooperation
and Complete Technical Data

G-V Thermal Relays and Thermostats Have Been...

- Adopted as production components by scores of principal producers of electronic equipment
- Delivered for use on over 150 Government contracts
- In successful field use for two years

ELECTRICAL THERMOSTATS

Features: Hermetically sealed • Adjustable or fixed temperature • Rapid in response—metal shell is the sensing element • Wide variety of sizes and mounting forms • Exposure to -70°C . does not change setting • High shock and vibration resistance • Current rating—1 amp. to 10 amp. • Stable setting and precise control

THERMAL TIME DELAY RELAYS

Stainless steel mechanism welded into a single integral structure and supported at both ends for unequalled resistance to vibration and shock. Heater built inside expanding member for maximum efficiency and protection. Rolling contact action for positive operation.

Features:

- Hermetically sealed adjustable type
- Miniature and octal sizes — metal shells
- Time Delays — 3 sec. to 5 min.
- Heater voltages up to 230
- Fully temperature compensated
- Meet military specifications
- Contact rating — 6 amp. at 115 v. AC

Type RM

Type RO

Typical Uses: Delaying plate voltage application • Producing hold-over interval after interruption of power • Delaying automatic shut-down until a fault has continued for a specified period

HOT WIRE TIME DELAY RELAYS

- Features: Time delays down to $\frac{1}{2}$ second • Complete recovery in a few seconds • Delays adjustable • Hermetically sealed in metal shell
- Miniature size • Heater voltages up to 32 volts
 - Fully temperature compensated • Contact rating—3 amps. at 115 v. AC

THERMAL CRITICAL-VOLTAGE & CRITICAL-CURRENT RELAYS

- Features: Time constants—1 sec. to 200 sec.
- Adjustable operating point
 - Minimum differential
 - Independent of ambient temperature
 - Independent of frequency
 - Hermetically sealed in metal shell
 - Miniature size
 - Small, light, and noiseless

Typical Uses: Over- or under-voltage alarm or cut-off • Overload protection • Voltage or current regulation

Standard and Custom-Built CHASSIS • DUST COVERS PANELS • RACKS • CABINETS for electronic apparatus

electronics BUYERS' GUIDE
ABC

Advertisers:

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications — a matter of a few percentage points.

It is quite possible that you are not getting an effective presentation of your products and abilities in this excellent issue, but are missing a high presentation before one of the fastest growing fields in the country's history — the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Ask them to show you what your potentials can be.

NUCLEONICS

PRODUCES Printed-Circuit PANELS and
Dip Soldered Electronic Sub-Assemblies
(to your specifications)

with PLATED-THRU HOLES

Photo courtesy of
Reeves Instrument
Corporation

NOW further COST REDUCTION and PROFIT POTENTIAL accrue from Photocircuits development of cross-through connections by *plating through panel holes*. This is another good reason for having your products engineered and produced by Photocircuits Corporation.

ADVANTAGES:

1) **IMPROVED RELIABILITY**... for cross-through connections between printed circuitry on two sides of a plastic laminate since hole plating is continuous with pattern plating. No hardware need be inserted or soldered to the conductor patterns to achieve through-connection.

2) **COST REDUCTION**. Obviously, since all through-connections are achieved simultaneously by electro-plating, considerable economies are realized.

3) **VIBRATION RESISTANCE**. Dip soldered joints are more easily made and are virtually impervious to shock and vibration.

... PLUS these usual advantages of Photocircuits' Printed Circuits:

- 4) Exact Circuit Reproducibility
- 5) Reduced Assembly Time
- 6) Miniaturization
- 7) Product Improvement

NEW

HIGHLY STABLE Sensitive Logarithmic AC VOLTMETERS

NEW

Model
253

FEATURING

- Effective isolation of sensitive amplifier stages against shock and vibration.
- Provision for changing linear response of instrument to either narrow band (center frequency 400 CPS—24 DB down at 60 CPS) or to low pass (3 DB down at 1.5 KC and 20 DB down at 5 KC).
- Limiting circuit to protect meter against all overloads within range of instrument.
- Mirror scale indicating meter with two logarithmic voltage scales (10 DB overlap) and one linear DB scale —5 to +15 DB.

All Instruments having 30% scale overlap have narrow bandpass feature

BUYERS' GUIDE

7 Reasons why Regohm is a natural for your control system

This compact, electro-mechanical controller provides sensitivity, speed of response and system stabilization under severe operating conditions. Its design and operating features have made Regohm useful for automatic control systems in which heavier, more expensive and complex, but less accurate equipment had previously been the only available solution.

1 **SMALL SIZE** • Regohm is a compact, plug-in device; lightweight, extremely rugged and position-free. The unit's small size does not limit its power-handling capacity. This makes Regohm a "natural" where economy of space and weight are your major considerations.

2 **POWER AMPLIFYING** • Regohm is a high-gain electro-mechanical power amplifier. Milliwatt variations in signal energy can control energy changes millions of times greater.

3 **IMPEDANCE MATCHING** • Signal and controlled circuits are isolated, both electrically and structurally. Signal coils may have ratings from 0.01 to 350 amperes. Controlled resistors on a panel in which Regohm is plugged, can have values from zero to infinity, depending on the controlled system.

4 **SYSTEM STABILIZING** • A thoroughly reliable, sturdy dashpot aids in system damping. It can easily and readily be adjusted over a wide range to match the

dynamic characteristics of the Regohm to those of your present system.

5 **ANALYTICALLY DEFINABLE** • The response of Regohm is independent of the rest of the servo system. Its response characteristic can be expressed in terms of conventional "transfer functions." Regohm acts as an integrating error-rate proportional controller. No appreciable steady-state error can occur. Regohm's effect can be calculated in advance, simplifying the design and facilitating the prediction of performance.

6 **CONTINUOUS CONTROL** • In "closed loop" systems a high-speed averaging effect occurs as Regohm's armature oscillates over a small amplitude. This provides intermediate values between step resistances and results in continuous, stepless control in systems operating at power frequencies and below.

7 **LONG LIFE** • In properly engineered installations, Regohm's life is measured in years. Plug-in feature simplifies replacement and maintenance—there are no parts to renew or lubricate. Shelf life is substantially unlimited.

Our engineering and research facilities can help you apply Regohm to your servo system or regulator problem. Write for Bulletin 505.00, analyzing Regohm's characteristics and applications. Address Dept. E, ELECTRIC REGULATOR CORPORATION, Norwalk, Connecticut.

CONTROL COMPONENT IN: Servo systems • battery chargers • airborne controls • portable and stationary generators • marine radar • inverters • locomotive braking systems • mobile telephones • guided missiles • signal and alarm systems • telephone central station equipment • magnetic clutches • railroad communication systems.

VECTRON

PRECISION LINEAR WIRE-WOUND POTENTIOMETER

GENERAL SPECIFICATIONS

Over-all Resistance: 50 ohms to 50,000 ohms
Resistance Tolerance: $\pm 5\%$ standard ($\pm 1\%$ or $\pm 0.5\%$ if specified)
Independent Linearity: $\pm 1\%$ standard ($\pm 0.5\%$ or $\pm 0.25\%$ if specified)
Temperature Coefficient of Resistance: 0.00002 parts per $^{\circ}\text{C}$, above 250 ohms or 0.0007 parts per $^{\circ}\text{C}$, 250 ohms or less
Power Dissipation: Nominal dissipation including 2 watts at 25°C . Rated 5 watts at 5°C under specific conditions
Electrical Rotation: $320^{\circ} \pm 5^{\circ}$ standard or $357 \pm 1^{\circ}$ if specified
Resolution: Optimum—based on resistance
Terminal Assembly: Treated, electrical grade, laminated phenolic with plated terminals.

Always to Your Specification

From Vectron's three basic Potentiometer styles, $7/8$ " diameter, $1\ 1/16$ " diameter and 2 " diameter, units can be made to your individual requirements. Multiple ganged units with individual phase special stops and even specially tapped units supplied to order, individually or in quantity. Additional new sizes and types are being prepared as this publication goes to press. Standard shafts supplied in any length or detail; special bushings and shaft locks to order.

High Linearity — Superior Performance

Vectron Potentiometers provide superior performance. Uniformity and linearity beyond normal specification requirements are the result of long experience. Close tolerances and special processing insure minimum run-out and bearing angularity.

DOLIN

METAL PRODUCTS INC.

325 LEXINGTON AVE., BROOKLYN 16, N.Y.

New **VECTRON** MICROWAVE SPECTRUM ANALYZER **SA25**

A Sensitive Test Instrument for Design, Manufacture, Installation and Maintenance of Microwave Radar, Altimeter, Guided Missile, Television Relay, Communication and Control Equipment.

Accurate Microwave Measurements including:

1. Basic frequency of the carrier and all side bands
2. Undesired microwave frequencies being generated
3. Relative intensity of signals, wanted and unwanted
4. Instability in terms of frequency and power output.

Engineered to meet present and future requirements

Vectron's SA25 Microwave Spectrum Analyzer has been engineered to serve present needs while it anticipates future trends in electronic and communication equipment. As this yearbook goes to press, the Bulletins listed below are only a few weeks old. They present a complete description of and detailed specifications for the SA25 and its Interchangeable RF Heads. Improvements and new features will be covered in the literature you receive.

ENGINEERS LIKE THESE FEATURES

- 1. Interchangeable R. F. Heads for specific frequency (or band) coverage — 300 mc/s to 40 kmc/s.
- 2. Medium persistence C R T display.
- 3. 20 kilocycle bandwidth I. F. amplifier. Stable low noise circuit with higher usable gain.
- 4. Full range sweep — 2 to 20 C P S in two overlapping ranges. Single control — ready to use on either range without modification.
- 5. Standard C R T bezel for camera or hood.
- 6. Fully regulated DC supplies and stabilized "safety" high voltage supply.
- 7. Minimum controls for maximum convenience.
- 8. Amplified indication for transmission wavemeters.
- 9. Extended low frequency response — New high-speed sweep and retrace.
- 10. Improved power response linearity.

BOBBINS and COIL FORMS

for magnetic windings

The superiority of bobbin-wound coils for saving space and obtaining greater efficiency is widely recognized. Many manufacturers of field coils—radio and television—solenoids—relays and other products have solved their problems with BUCKEYE bobbins and coil forms.

TYPE "R" Bobbins having round tubes or cores are generally used for relays, solenoids and certain types of small motors. They can be supplied with round, square or irregularly shaped flanges. TYPE "S" Bobbins having square or rectangular tubes are frequently used for field coil windings, inductance windings and such. They may have round, square, rectangular or irregular shaped flanges.

Buckeye Bobbins are available in a vast range of insulating materials such as Vulcanized Fibre, Kraft Boards, Laminated Phenolics, Laminated Polyesters with Glass and many others.

DESCO TOROIDS

**Encapsulated*

*Pat. Pend.

"descaps" . . . a new series of encapsulated toroids for circuits requiring . . .

★ High Stability

Available wound on both standard and stabilized cores of 125, 60, 26 and 14 permeability.

★ High Accuracy

Guaranteed 1% accuracy. When necessary, 1/10 of 1% or 1 turn accuracy can be supplied.

★ Low Cost

Low cost is assured by our improved manufacturing methods.

and Price List

TOROIDS—FILTERS

TOROIDS: All sizes including "Wedding Rings"—Highest Q's—cased or uncased • Guaranteed .1 of 1% accuracies available with our secondary frequency standard measuring equipment. FILTERS: Hermetic sealed all types — Bandpass — Low pass — High pass—your design or ours.

TRANSFORMERS

Specializing in development and production of 60 cycle and 400 cycle MIL-T-27 transformers — hermetic sealed, plastic encapsulated or open types • Input and output transformers—reactors—power transformers—audio transformers.

UNIVERSALS

All types I. F., R. F., B. F. O. coils, etc. conforming to latest military design • All sizes Cup Core coils • Special coils — Permeability Tuned—Shielded — Unshielded • Oscillator coils — Video coils — Chokes.

Plug-in Housings 30 Models

Versatile aluminum plug-ins, with threaded bases for stud mounting coils, relays, filters, crystals, resistors, condensers, etc. • Special models with permeability tuned coil forms — various pin arrangements — etc.

ATOMIC INSTRUMENT CO.

electronic counting and control
with unitized construction for versatility

Select the instrument exactly suited to your specific counting and control application. Without high "custom design" costs, without time-consuming modifications, you can choose the right instrument for your operation from the wide variety of plug-in units available. A typical unitized instrument is the Preset Counter (right). Tell us your counting problem! Atomic has over ten "standard" counters, registers, etc. with unitized modifications to suit your needs. Ask for Bulletin G-10 for descriptions.

PRESET COUNTER

"DUZZENER" for counting in dozen and gross lots

Plug-in units are functional, compact and reliable.

A large variety of counting and control units, each performing a specific function, may be combined into a single instrument or used in units of your own manufacture. Write for details of available strips contained in Bulletin G-10.

DEKATRON counting tubes for counting, timing and computer circuitry

distributed by Atomic Instrument Co.

Many thousands of Dekatron Counting Tubes have been providing tens of thousands of hours of reliable operation since their introduction over 5 years ago. Type GC10D, 20,000 cps, is the seventh and latest model available.

*Dekatron counting tubes are manufactured by Ericsson Telephones, Ltd., G. B. and distributed exclusively in U.S.A. and Canada by Atomic Instrument Co. Complete stocks are maintained in the U.S. for fast delivery.

Atomic also manufactures a complete line of laboratory instruments for radioactivity detection and measurement. Write for catalog and new supplements.

| Capacitance Stability | 0.1% | 0.1% | 0.3% |

F-C-I high voltage capacitors use type D film, and are furnished in the popular tubular type with threaded stud mountings, or in standard CP70 metal cases. They are smaller and cheaper than competitive types, and delivery is excellent.

F-C-I Type D capacitors employ a newly developed plastic film dielectric which has important advantages over older types of material. The film has an extremely high voltage breakdown which allows capacitors to be made smaller and lighter than ever before, particularly in high voltage ratings. The power factor, dielectric absorption, and temperature co-efficient of these capacitors are much better than those of oil-paper capacitors. They approach the size of metallized paper capacitors of equal ratings and give far superior performance. When high insulation resistance is the primary consideration, type D capacitors make an excellent low-priced substitute for polystyrene or teflon capacitors.

F-C-I polystyrene capacitors are characterized by a unique combination of low power factor, high insulation resistance and low dielectric absorption. Teflon capacitors are essentially identical to polystyrene capacitors in their electrical characteristics, with one extremely important difference—teflon capacitors may be operated at temperatures up to 200° C, whereas polystyrene capacitors have a maximum operating temperature of 85° C. Furthermore the insulation resistance of teflon capacitors is many times that of polystyrene capacitors at elevated temperatures. Hence these capacitors are ideal elements for use in electronic analyzers and computers, in tuned circuits and wave filters, as standards of capacitance, and in radiation detection and power supply circuits.

F-C-I polystyrene and teflon capacitors are available in many different types of housings, as well as uncased for potted assemblies. Standard sizes available for prompt delivery are listed in the catalog.

Technical information is contained in our catalog F, which may be had upon request

Advertisers: How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications—a matter of a few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history—the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Ask them to show you what your potentials can be.

Quartz Crystals

TYPE VR6

Hermetically sealed in compact metal case, 1500 Kc to 75.0 Mc frequency range. (Jan type HC-6/u) Pin is .050" diameter, spaced .486".

TYPE CM1

Fixed air gap, 850 to 20,000 Kc frequency range. Available in standard 3/4" and G.R. 3/4", 5/8" 7/8" or .850" spaced pins.

TYPE CBC-0

Frequency range 60 to 10,000 Kc. Available with 6, 8, or 10 volts, ± 1/2 degree C. temperature stability. Standard 5-prong socket.

TYPE VD5

Frequency range 1,000 to 6,000 Kc. Single or dual crystals. Mounts in special 3-prong socket, pin diameter .562", spaced .500" x .8125"

TYPE XL100

Exact 100 Kc., used extensively in frequency standards. Mounts in 3/4" crystal socket or standard 5-prong socket.

TYPE CM5

Frequency range 1,500 to 30,000 Kc. Fixed air gap, standard .486" x .093" or standard octal socket.

TYPE DFS

Features separate 100 and 1,000 Kc. crystals in one mounting, with accuracy ±.005% over range of -10°C to +60°C when used in recommended circuits.

TYPE VDO

Frequency range 1,000 to 10,000 Kc. Single or dual crystals with 6 volt oven ± 1/2 degree temperature stability. Mounts in standard 5-prong socket.

CRAFTSMANSHIP IN CRYSTALS SINCE 1931

America's Leading Manufacturers of Unusual **VTVM-S**

Our exceptionally sensitive, stable vacuum tube voltmeters for DC, low frequency and high frequency, our micro-microammeters and our multi-meters are considered almost indispensable in any modern electronic laboratory engaged in fundamental research and development work. These instruments are also in extensive use for production testing and other applications requiring the ultimate in ruggedness and reliability.

MV-17c DC mV-meter, 0-1mV, DC

MV-12b AC mV-meter, 0-3mV, 20 cps to 250 KC

MV-22b AC mV-meter, 0-300uV, 20 cps to 10MC

and others . . .

We also manufacture dynamically compensated DC power supplies with adjustable positive, negative or zero output impedance.

MILLIVAC INSTRUMENT CORPORATION

P. O. Box 997, Schenectady 6, N. Y.

Ultra Sensitive Oscilloscopes

We manufacture the series VS-900 ultra sensitive DC oscilloscopes which were one of the main sensations of the IRE show in New York, in the Spring of 1954. They are rated to have a maximum sensitivity of 700 uV per cm DC to 500 KC and 10 uV per cm rms AC, 1 cps to 500 KC. Their drift is well below 3 mV.

We also manufacture very stable DC amplifiers for high frequency oscilloscopes. They are rated 20 or 40 db gain over a frequency range of 0-10 MC. Their drift is well below 10 mV.

VOLKERS & SCHAFFER MANUFACTURING CORP.

P. O. Box 996, Schenectady 6, N. Y.

America's most unusual companies making sensitive equipment

$$I = \frac{E}{R}$$

Elementary?

Perhaps. But the only time we won't consider a special purpose development request is when Ohm's Law says "No." Tough assignments are an Islip specialty, and our engineering staff is at YOUR service.

REACTORS

DC-AC CHOPPERS

For 60 Cycle Use

There are twenty-two different types, both single and double pole, built to rigid commercial specifications with the emphasis on long life, low noise level, and extreme reliability. Please write for Catalog 370.

DC-AC CHOPPERS

For 0-500 Cycle Use

All the usual military specifications are met with liberal factors of safety. Before any Chopper is shipped, it is tested twice over the range of -65°C $+85^{\circ}\text{C}$ to give double proof of stamina. Each production lot sample life tested. Please write for Catalog 280.

ULTRA HIGH SPEED RELAYS

Operating time 200 microseconds. Mount in any position. Will cover the range of -65°C $+85^{\circ}\text{C}$ and are factory sealed. Please write for Catalog 337.

RESONANT RELAYS

Permit remote control by radio or carrier current through frequency discrimination. Relays operate only when energized at rating and reject all other frequencies. Eleven types are offered in the range of 153-442 cycles. Please write for Catalog 335.

TESTING**

Tenney

. . . for Tenney Test Chambers are precision-engineered for maximum efficiency and can be designed to simulate the complete range of temperature, atmospheric or pressure conditions found anywhere on earth — or above it to altitudes of 120,000 ft. plus! They attain sub-zero temperatures quickly, maintain them efficiently and provide full instrumentation for accurate evaluation of complete test data.

TENNEYZPHERE ALTITUDE CHAMBERS

Designed to withstand atmospheric pressure and to simulate global conditions of pressures, temperatures and humidities. Altitudes from sea level to approx. 80,000 ft. Temperature range from plus 200° F. to minus 100° F. Also simulates desired (20% to 95%) relative humidity.

TEMPERATURE AND HUMIDITY CHAMBERS

Model TR — Precision recorder controllers permit accurate simulation and check of temperatures to +200° F. Meets all Mil and JAN specs for low- and high-temperature requirements by incorporation of temperatures down to -100° F. Humidities within 20%-95% range. Variety of standard sizes.

Model TH — Designed for a temperature range of +35° F. to +185° F., and a humidity range of 20% to 95%. Accurately simulates, controls, and checks all above-freezing temperatures. Program control to meet a wide variety of Mil specs optional. Manufactured in a wide range of standard sizes.

TENNEY SUB-ARCTIC INDUSTRIAL CABINETS

Designed for low-temperature testing of metals, radios, instruments, plastics, liquids, chemicals and pharmaceuticals. Temperature ranges of -40° F., -80° F., -100° F., -120° F., -150° F., -170° F., are standard for each size.

EDIN Recording Equipment...

versatile, precise
and dependable

Ink-Writing Galvanometers for every measuring application

Whatever your needs — high sensitivity, general purpose, frequencies to 300 cps, or transient studies, Edin manufactures the recording galvanometer, cased or uncased, to meet your specific requirements.

Features which make these Edin galvanometers such precision instruments and permit such unique performance, include mechanical centering, rigid pen support, sapphire tip, pen spring clip allowing quick pen interchangeability, low torque torsion for lower hysteresis, pen mass of less than 1/4 gram, and mounting as close as 1 1/8" center to center. Single resonant system of coil and pen assures linear phase

Galvanometers arranged in one array as housed in complete recorder.

For complete details, ask for our Bulletin Sec. B, No. 1.

2 Channel Recorder Model 8082

This Oscillograph Recorder incorporates improvements exclusively Edin. All gear drives are of nylon and noiseless. Shifts may be made simply and easily into any speed while the unit is operating or turned off. Roll or folded paper operates with equally high efficiency, because of the deposited metal drive roll and positive non-slip paper advancement. Paper may be pulled through by hand at any time if desired. Like all Edin recorders, Model 8082 transcribes in ink drawn through a non-clogging ink system, on true circular co-ordinates.

Edin Scientific Instrumentation includes: Direct Writing Recorders from 1 to 10 channels. DC, AC and Universal Carrier Amplifiers, Portable and Console Recording Systems.

Write for the Edin Catalog GC3, which carries descriptions and prices of all Edin instruments and accessories.

THE NEW FREQUENCY CONVERTER

by **AVION**

A 400-CYCLE POWER SUPPLY BENCH SIZE

- Plugs into 60-cycle line
- Delivers 100 volt-amperes
- Output frequency and amplitude adjustable through entire AN-E-19 Range: 380-420 cps
105-130 volts

MODEL 400

Frequency Regulation: Better than ± 1 cps
 Voltage Regulation: Better than $\pm 1\%$
 Harmonic Distortion: Total better than 3%

Independent of power factor

The small size (17" long x 11½" wide x 9" high), power output (100 V-A), and low cost afford the convenience of using one converter for each bench set-up. Four hundred cycle power handling capacity need be paid for only as required.

LEDEX rotary solenoids solve remote control problems!

The many production applications of Ledex Rotary Solenoids vary from the dependable, snap-action tripping of airborne bomb releases to the actuation of rugged, hydraulic valves in heavy duty materials handling equipment. These compact, powerful, shock resistant Solenoids are manufactured with diameters from 1 1/8 to 3 3/8 inches. Predetermined rotation up to 95° can be engineered to suit your product's requirements. Starting torques for 45° stroke range from 1/4 pound-inches to 54 pound-inches.

Ledex Rotary Solenoids operate on direct current and are adaptable for various types of power take-offs, mountings and dust covers as illustrated at the right.

We supply to quantity users and solicit the opportunity to be of assistance in engineering a Ledex Rotary Solenoid to meet your product's requirements.

Magnetic action move the armature along the solenoid axis. This action is converted into rotary motion by means of ball bearings on inclined races.

| Model No. | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
|----------------------|-------|--------|--------|-------|--------|-------|-------|
| Diameter inches | 1 1/8 | 1 5/16 | 1 9/16 | 1 7/8 | 2 1/4 | 2 3/4 | 3 3/8 |
| Torque lbs.-inches * | .4 | 1.0 | 2.0 | 4.0 | 7.5 | 25.0 | 54 |
| Weight lbs.-ozs. | 0-2 | 0-31/2 | 0-7 | 0-9 | 1-11/2 | 2-4 | 4-8 |

*45° stroke intermittent duty

LEDEX circuit selectors and stepping relays give remote control for multiple complex circuits.

Ledex Circuit Selectors and Stepping Relays can be remote controlled, are Rotary Solenoid operated, have positive detent action and are self-stepping or external impulsing. Many versatile designs of stepping, counting, adding and subtracting, latching, and circuit selecting relays are made possible by the combination of the Ledex Rotary Solenoid and wafer type rotary switches. Self-stepped or externally impulsed, the device is immediately adaptable to many remote control applications. A choice of wire sizes permits a wide range of operating voltages and power requirements. Various types of mountings further increase its adaptability. In addition to its positive control of multiple, complex circuits, a reserve of mechanical power is available for the performance of many duties other than switching operations.

Write today for complete information on Ledex Rotary Solenoids and Ledex Circuit Selectors.

Burroughs **PULSE** equipment
 you assemble your own
 system—**IN MINUTES**

By connecting standard cables between Burroughs Control units, you can assemble virtually any system you want. It's that easy.

Suppose you need a complex pulse sequence for test- ing the basic units required to make up the system can be ordered from Burroughs—and delivered from stock. Connect them together, and there's your system. You've avoided the time-consuming "breadboard" engineering, equipment cost, and delay on your primary project. What's more, your Burroughs Pulse Equipment can be used over and over again on different, future projects.

To meet the growing need for versatile pulse control systems, Burroughs offers a whole family of matched pulse handling units: pulse generators, coincidence detectors, flip-flops, gating circuits, etc. During the past few years, this equipment has been in use by such prominent organizations as MIT, Consolidated Engineering Corp., Wayne University, Stanford Research Institute, and many others.

Let us help you get started quicker on pending engineering work. Write us a letter outlining briefly your pulse system requirements. Dept. E-1, Electronic Instruments Division, Burroughs Corp., 1209 Vine St., Philadelphia 7, Pa.

SYNCHRONOUS CONTACTOR

Precisely coordinates electric circuits with mechanical system

Applications:

| | |
|---------------------|---------------------|
| Punch-press control | Machine tools |
| Loom protection | Pulse generation |
| Die protection | Counter-actuation |
| Computers | Stop-motion control |

Simple, accurate means for coordinating the angular position of a rotating shaft and the opening or closing of an electric circuit are provided by the Farmer ROTO-TIMER. This device comprises a cam-operated single-pole single-throw switch that can be externally adjusted through 360° in either direction from any starting position so that the switch operates at any point in the rotation of the shaft to which the drive shaft is connected.

Adjustment is made by a handwheel that operates a 25-to-1 worm gear. A scale showing the position of the operating point, in degrees from a fixed reference point, makes repeat setting easy and accurate. The operate point of the switch can be adjusted while the connected machine is in motion and, once set, is automatically held by the high pitch of the worm gear.

The switching element is a set of automatic distributor points, which are noted for long life at high speed. These contacts are actuated by a hardened and polished steel cam, once for each revolution of the drive shaft. Cams are available for either normally open or normally closed circuits. The user can adjust the duration of open-or closed-circuit time by turning a screw; a locking screw fixes this setting. The electrical system is designed to handle one ampere at 125 volts a-c. Current is fed to the contacts by brushes and slip rings allowing continuous adjustment in either direction. Screw terminals and cable clamp are provided in the housing.

Other features are: high-quality ball bearings with sealed-in lubrication; means for lubricating the actuator cam; half-inch diameter keyed drive shaft; and compact, cast aluminum housing. Overall dimensions are: 6-3/32" long, 5 3/4" wide, and 5-1/16" high.

Descriptive bulletin free on request

TIMER, electronic

Provides split-second timing with no-filament tube.

Compact, electronic timer eliminates need for frequent replacement of tubes. Timer uses type 5823 cold-cathode tube; there is no wear on tube during stand-by, and timing is instant and accurate without warm-up. No recharging time required, so immediate recycling is possible.

Ideal for short intervals. 0.03 to 24 seconds.

Easy time adjustment. Small time intervals can be spread over 320° dial.

Six time ranges. Can be furnished with full-scale range of 0.2, 0.5, 1.5, 3, 6, 12 or 24 seconds.

Eight-ampere contacts. Single-pole, normally open contacts close at start of time cycle; SPDT contacts operate at end of cycle. All contacts independent of timing circuit.

Small size. 3 3/8 x 4 3/8 x 2 inches.

Special Arrangements. To meet specific customer requirements, over 20 special arrangements have been developed. If one of these does not solve your problem, we welcome the opportunity to see what we can do.

RELAY, electronic

operated by high-speed, low-energy pulses

Type CK electronic relay picks up impulses too small to operate mechanical relay and holds circuit closed long enough for heavy mechanical equipment to be actuated by impulse.

Fast response. Relay operates on contact of less than 0.5 millisecond.

High sensitivity. Above response speed obtainable even thru contact resistance as high as 500,000 ohms.

Adjustable actuating time. Relay operates in 10 milliseconds after impulse and stays "on" for time adjustable between 0.25 and 1.5 seconds.

Isolated switch circuit. Isolation transformer allows initiating contacts to be independent of line.

Long life. Cold-cathode tube energized only when pulse is received.

Easy maintenance. Plug-in relay good for millions of operations, and neon glowlamp lasting thousands of hours, are easily replaced.

Small size. Only 3 3/8 x 4 3/8 x 3 inches.

Coils of Special Order to Customer's prints are wound Moran Electronic Components to a high quality at reasonable cost—with best possible delivery.

Moran Electronic Components Inc. offers a standard line of used Chokes of the Solenoid and Universal Pie types, ranging Inductance from .47 Micro-Henry to 25 Milli-Henry.

WEST COAST OFFICE: 5410 WILSHIRE BLVD., LOS ANGELES, CAL.

TRUFLEX THERMOSTAT METALS

TRUFLEX thermostat metals are manufactured in a wide variety of types, each with a different reaction to temperature. Uniformity of metal insures accurate and consistent performance. Precision parts fabricated to exact specifications.

COMPOSITE METALS

Available in practically any combination of precious to precious, precious to base or base to base metals. Combinations for electronics include aluminum-clad iron, nickel-clad iron for anode materials.

ALCUPLATE

Copper-clad aluminum for component cases, chassis, cooling fins, etc., light weight, excellent conductivity. Copper surface is ideal for soft soldering and electroplating.

COMPOSITE CONTACT MATERIAL

Precious metals and alloys bonded to base metals available in following types — overlay, single and double edgelay, single and double inlay, Top-layer, ready for you to fabricate into contacts.

COMPOSITE CONTACTS

General Plate can supply all types of fabricated composite contacts, buttons, rivets, contact assemblies made to customer's specifications. These contacts give electrical conductivity and long life at reduced costs.

WAVE GUIDE and COLLECTOR RINGS

RECTANGULAR WAVE GUIDES. Solid silver lined brass or aluminum. Sizes to meet specifications. COLLECTOR RINGS. Solid silver or metal on base metal. All sizes.

General Plate Products that solve your Electronic Design Problem

General Plate Composite Metals, made by metallurgically bonding one metal to another, are available in sheet, strip, tubing or wire in various widths, thicknesses and diameters.

Silver, gold and platinum-group metals bonded on base metals give solid precious metal performance at a fraction of the cost of solid precious metal. The precious metal provides specific performance requirements such as electrical conductivity and corrosion resistance while the base metal provides workability, strength, and solderability.

Composite base metals provide a new group of engineering metals with properties not available in solid metals. Their use frequently results in lower material costs as compared to solid metals.

In many electronic applications further economy results when General Plate supplies fabricated parts ready for assembly into your product. General Plate makes an infinite variety of fabricated parts, such as electrical contacts, collector rings and TRUFLEX thermostat metal parts to customer's exact specifications.

General Plate Engineers will gladly help you with your problems.

MICRO-CIRCUITS CO. PRODUCTS

Please request data sheets for your files. We shall be pleased to discuss the application to your equipment of any of the materials described below.

PRINTED CIRCUITS

We can produce, to order, a wide range of low-cost conductor and resistor networks, moisture and rain-detecting grids, commutators and switches capable of over 100 million revolutions, resistor and tuning networks on flat or tubular bases for TV and radio circuits, etc.

RESISTORS

TEMPERATURE SENSITIVE—for protection of TV and radio receiver filaments. For temperature measuring and control.

VOLTAGE SENSITIVE—for circuit stabilization and voltage regulation at low cost. Medium to high resistances.

HIGH MEGOHM—for instruments and photocell circuits. One megohm to ten-million megohms. Single resistors 1/2" to 8" long. Low-cost, printed resistor networks. An extremely versatile and time-saving series of low-cost decade units covering the above resistance range for laboratory and small production.

HIGH VOLTAGE—for high-voltage power supplies in color TV receivers, etc. Single-value resistors. Low-cost, printed-circuit, bleeder-resistor strings containing all necessary fixed resistors. Printed on bases 1" to 8" long, and rated at approximately 6500 volts per inch.

CONDUCTIVE PAINT

OVER 100 TYPES for printed-circuit and shielding uses including extremely durable baking types.

SHIELDING MICROPAINTS—for meter, circuit, and instrument cases; cathode-ray tubes; etc. Silver types priced as low as 45¢/oz. Carbon types with resistances as low as 25 ohms/inch.

AIRCRAFT ANTI-STATIC PAINT—for antenna canopies.

ORDER OUR S21 LAB. KIT of five silver and resistance paints plus accessories. \$10.47 (firm price) FOB New Buffalo, Michigan. Terms—net 30 days.

Carefully designed "choke" sections insure negligible radiation and contact losses.

VSWR:

Standing wave ratios of 20 can be corrected to 1.02 or less. Small reflections may be completely cancelled.

PRICE: \$90

See new X Band catalog.

GUIDELINE Associates

A DIVISION OF EDDCO
 57 State Street, Newark, New Jersey

HEINZE BLOWERS

TYPE DD

Double blowers for applications requiring 100 CFM of air. Powered by Type D shaded pole induction motor. Requires infrequent oiling. Non-radio interfering. For 115 volts, AC, 60 cycles, 35 watts, 3150 RPM (free air). Other voltages and frequencies on request.

TYPE DS

Single blower, with all the advantages of Type DD, but approximately half the air delivery, 115 volts, AC, 60 cycles. For CW and CCW operation, 35 watts, 3100 RPM (free air). Other voltages and frequencies on request.

TYPES ZSD AND ZRD

Quiet, dependable units, delivering 100 CFM, 4 pole motor and large balanced air rotor. ZRD has absolute minimum of vibration, 115 volts, AC, 60 cycles, 1650 RPM (free air) 45 watts. Available for 230 volts or 50 cycle operation.

TYPES ZSS and ZRS

Most compact 50 CFM blowers available. Sturdy low speed Z shaped pole induction motor, 3% balanced air rotor, 115 volts, AC, 60 cycles, 1650 RPM (free air) 40 watts. Can be supplied for 230 volt operation. Various mountings.

TYPE F

For cooling electronic tubes in transmitters, induction heaters and diathermy equipment. 115 volts, AC, 60 cycles, 3000 RPM (free air). F2S, single blower, 10 CFM. F2D, double blower, 20 CFM.

ANTENNA MOTORS

AR

AM

Low-voltage AC reversible capacitor-type motors. 24 v, 60 cycle AC operation, reversible with a switch. Free load, 3300 rpm, using a 100 mf condenser. For television antenna rotor service.

Heinze Electric Co
 485 Lawrence Street
 LOWELL, MASS

CASCADE RESEARCH

Ferrite MICROWAVE EQUIPMENT

Practical design concepts based upon precision control of Faraday rotation at microwave frequencies.

Uniline

The UNILINE is a unidirectional transmission line element used widely in microwave test measurements to provide substantial isolation between source and load with negligible loss in transmitted power. It can also eliminate "long line" effects which are detrimental to the operation of traveling wave tubes or klystrons where antennas are located remotely. UNILINE also avoids "pulling" due to impedance variations produced by scanning antennas. Loss-type attenuators are being replaced by UNILINES in many exacting microwave test applications where load isolation must be achieved without loss of transmitted power. Operation is based upon "Faraday-effect" properties of ferrites at microwave frequencies. No external power supply is required.

Gyraline

Another Cascade Research ferrite device, the GYRALINE is essentially a continuously variable microwave attenuator controlled by an applied magnetic field. It may be used on the output of a CW operated klystron to provide an amplitude modulated microwave signal without danger of undesirable frequency modulation and doublemoding. GYRALINE provides an excellent level-set attenuator since the microwave output may be controlled by varying percent modulation of the audio driving voltage applied to the GYRALINE coil. AGC functions are also possible by application of suitable control voltages to the GYRALINE coil. An external audio driver (see D-92), or source of fixed DC potential is required.

| ITEM | MODEL NO. | FREQUENCY RANGE | PRICE | PHYSICAL DIMENSIONS |
|----------|-----------|------------------|--------|---------------------|
| UNILINE | 96-104B | 9600-10,400 Mcs. | 115.00 | |
| UNILINE | 88-96B | 8800-9600 Mcs. | 115.00 | |
| UNILINE | 69-74 | 6900-7400 Mcs. | 215.00 | |
| UNILINE | 64-69 | 6400-6900 Mcs. | 215.00 | |
| UNILINE | 59-64 | 5900-6400 Mcs. | 215.00 | |
| UNILINE | 38-42 | 3800-4200 Mcs. | 225.00 | |
| GYRALINE | 1000 | 9600-11,200 Mcs. | 150.00 | |
| GYRALINE | 920 | 8500-9900 Mcs. | 150.00 | |
| GYRALINE | 720 | 6900-7400 Mcs. | 250.00 | |
| GYRALINE | 670 | 6400-6900 Mcs. | 250.00 | |
| GYRALINE | 620 | 5900-6400 Mcs. | 250.00 | |

A VIEW TO THE FUTURE

Most of the new equipment listed below will be available after June 1, 1954.

GYRALINE: 3800 to 4200 Mcs.

"S" BAND UNILINE AND GYRALINE: covering limited portions of "S" band.

"X" BAND POWER UNILINE (Covers limited portions of "X" Band): 125 watts in transmit-direction.

RUGGEDIZED "X" BAND UNILINE (Covers limited portion of "X" Band): Designed to withstand unusual shock and vibration.

LINEAR PHASE SHIFTERS: Covering same frequency ranges as Gyralines #620, #670, #720, #920 and #1000.

D-92 GYRALINE DRIVER

A flexible and convenient source of audio power for operating Models 920 and 1000 Gyralines. Circuit consists of an audio oscillator having a frequency range of 800 to 1200 cps. This oscillator drives an 8 watt resistance coupled amplifier with output impedance to match Gyraline input. Frequency response is essentially flat to 3000 cps. This unit drives the Gyraline to greater than 90% modulation. Price \$240.00.

Drivers for other Gyraline models are presently under development.

LINK

AVIATION

Hi-Precision

SERVO COMPONENTS

Link Aviation comes a new kind of flexibility for servo design and manufacture. Tested and proved in production electronic equipment, Link Hi-Precision Servo Components can be used interchangeably in laboratory prototypes and actual production models. This new technique assures improved performance during research — reduces costs in production design — saves time in tooling-up in the fast-changing electronics field.

Write Department EBI for full specifications on the typical servo parts shown here — or for the *complete* Link Servo Components Catalog.

precision base and upright plates designed to eliminate alignment problems — yet permit full design flexibility for mounting electronic and mechanical parts in a single compact unit.

precision gear boxes with gear ratio from 20:1 to 3125:1 — constructed virtually friction-free construction — low inertia — and high torque. Gear boxes in all ratios are practically backlash-proof.

Manufacturers of the world-famous Link Trainers and Simulators • servo mechanisms • graphic recorders • spur gear differentials • friction and over-drive clutches • index dials • phase angle meters • ratio voltmeters • precision potentiometers • and other special electronic devices.

Linear Phase Detectors
Model 302, illustrated, produces a D.C. voltage at its output proportional in magnitude to an A.C. 60 cycle voltage at the input with polarity proportional to the phase at the input.

Servo Amplifiers
Model 300, illustrated, provides a versatile high gain, low phase shift for use at 60 and 400 cycles. The amplifier can be coupled directly to plate servo motors or matched to a specific motor.

Summing Amplifiers
Model 301, illustrated, performs the functions of isolation with low output impedance, as a phase inverter — in conjunction with a network in the grid circuit, as a summing amplifier.

Phase Detectors
Model 303, illustrated, compares a 60 cycle voltage input of reversible phase with a reference voltage of fixed phase. Ultra sensitive. Model 303 requires only a minimum differential to energize or de-energize a relay.

CALIDYNE

VIBRATION TEST EQUIPMENT

For Tests To Air Force, JAN, MIL and Other Specifications
(environmental tests and improved product performance)

COMPLETE SHAKER SYSTEMS — Consisting of: 1. Electrodynamic Shakers with force-outputs from 25 to 12,500 lbs. 2. Power Supplies, either Rotary or Electronic, for operation over frequency ranges from 1 c.p.s. to 5,000 c.p.s. 3. Control Consoles containing all controls, indicators and interlocks for safe and accurate operation. 4. Accessories for (a) automatic programmed testing (b) indication of shaker vibration level (c) reduction of stray magnetic field.

CALIBRATION SYSTEMS: Specifically designed for calibration of vibration pick-ups, the Calidyne Model 1 and Model 6C Calibrators provide two basic and complete systems for rapid and accurate calibrations of accelerometers and velocity pick-ups. Calibration systems are factory calibrated to permit fast and accurate calibration of vibration pick-ups by ratio methods.

ACCELEROMETERS — D.C. operated accelerometers of exceptional sensitivity are available in standard ranges from 5 to 50g. Typical corresponding natural frequencies from 200 to 500 c.p.s., 15 volts output at rated g. Accessories designed for use with these accelerometers include compact nesting battery power supplies and coupling circuits as well as A.C. operated supplies.

METERS & STANDARDS — The Calidyne Company offers *The Vibration Meter* — a battery powered unit designed for use with standard velocity pick-ups. Direct reading of acceleration, velocity or displacement. *The Calivolt* is a precise tool for voltage standardization and general calibration work. Easily checked against primary laboratory standards.

Ask for technical data or engineering help on your Vibration Test problem. Write today.

ADC

Top engineering is not enough!

... in the field of custom manufacture, production techniques are essential as well. At ADC we're proud of the following achievements ... two of our many developments illustrating the application of design and production "know how".

A NEW LINE OF SUB-MINIATURE TRANSFORMERS AND CHOKES!

Available in production quantities, these tiny units measure only 3/4" x 15/16" x 1 3/8". Hermetically sealed in steel or mu-metal cases, they have performance ratings equal to transformers and chokes of a far larger size. (For example: the 1500 hy. chokes illustrated have a Q of 12 at 0.1v 50 cps.) Now a standard line with ADC, these tiny units were developed through typical ADC engineering and production techniques.

A NEW ENCAPSULATING RESIN TO MEET MIL-T-27!

Called **ADCeal**, this new encapsulating resin speeds production and lowers cost. Developed especially to meet MIL-T-27, Grade 1, Class A, this epoxy resin is available to our customers. **ADCeal** has outstanding electrical properties in the Class A range; with low shrinkage and a high degree of adhesion and flexibility.

Want top engineering and production "know how" on your iron core components? Then call on ADC. Our new catalog gives full information, write for it today!

LORD MOUNTINGS *Protect* ELECTRONIC EQUIPMENT from VIBRATION and SHOCK DAMAGE

Plate Form Vertical Snubbing Mountings
—isolate steady vibration plus severe shock. Loads up to 610 pounds per mount.

Plate Form Mountings
—Standard— isolate steady vibration. Stable, compact —easily installed. Loads $\frac{1}{2}$ to 120 pounds per mount.

Multiplane Mountings
— isolate vibration from all directions. Light in weight, small in size, they are widely used to mount electronic units.

***Temproof Mountings**
—For Airborne Electronic Equipment
• Designed for use with JAN-C-172A cases.
• Exceed AN-E-19 drop test requirements.
• Maintain efficiency from -80° to $+250^{\circ}$ F.
*Temperature-proof

Meter Mountings—protect small meters and instruments from destructive vibration. One piece construction, easily installed . . . many sizes for most commonly used models.

VIBRATION and shock are natural enemies of electronic equipment and precision instruments . . . To control the damage which these enemies can do, Lord Vibration Control Mountings and Bonded Rubber Parts are used to very profitable advantage. More than a quarter century's experience in dealing with vibration and shock is yours when you take advantage of Lord engineering assistance. The result of such consultation is full protection for electronic units and sensitive instruments by correctly designed and precisely manufactured Lord Mountings and Bonded-Rubber parts.

If You Supply Equipment to The Armed Forces . . . Lord engineers will assist you to select the type of shock and vibration protection which meets the requirements of applicable specifications. As the major supplier of flexible mountings during World War II, Lord's knowledge and experience will enable you to supply approved equipment protection which is economical, efficient and easily installed.

| APC-357501 | 0.0075 | 35 | 5x7x8 3/8 H. |

PULSE-FORMING NETWORKS

Any pulse width from 0.1 to 40 microseconds. Any impedance from 5 to 500 ohms. Any voltage rating from 1000 to 25,000 volts. Write for data sheet.

MIL-C-25A CAPACITORS

CP04 • CP05 • CP08 • CP09
CP10 • CP11 • CP53 • CP54
CP55 • CP61 • CP63 • CP65
CP67 • CP69 • CP70

Metal-cased, hermetically sealed capacitors, non-inductively wound of aluminum foil and finest kraft tissue; impregnated and filled with pure mineral oil, Tempall (askarel), or polyester resin. Write for catalog #5403 containing complete list of capacitances, voltage ratings, dimensions, and mounting styles.

OTHER TOBE PRODUCTS

Energy-storage capacitors • Metallized-paper capacitors • MIL-C-91 capacitors • Molded tubular capacitors (85°C and 125°C) • Toroidal coils • Power capacitors • Delay lines • "Durator" metal-cased capacitors for 125°C service.

RADIO INTERFERENCE FILTERS

We manufacture radio interference filters in all sizes, ratings, and styles. A few popular items are listed below; or special requirements, utilize Tobe's unequalled experience and facilities in the field in which, as early as 1929, this company was known as "the pioneer and recognized authority"

SUB-MINIATURE WIDE-RANGE

Filterette No. 1561-A . . . weighs only one ounce; in case only 1 1/8 x 1 x 11/16 inch; handles 3 amperes at 0.400 cps; provides better than 40 db attenuation from 0.150 to 400 megacycles.

MINIATURE • 20-AMPERE

Filterette No. 1547 . . . gives better than 86 db attenuation through most of the 0.150 to 1000 megacycle range; hermetically sealed in case 2 x 2 x 1 3/16 inches; operates at 500 volts d-c or 130 volts a-c to 1700 cps; meets military specifications for use from -55 to +105C.

MINIATURE • 5-AMPERE

Filterette No. 1558 . . . specially designed for aircraft service; hermetically sealed case only 1 1/4 x 1 1/8 x 1 3/4 inches; attenuation above 86 db from 0.6 to 30 megacycles; operates at 130 volts, 0-1000 cps; designed for bulkhead mounting.

FEED-THRU SUPPRESSION CAPACITORS

Using the efficient feed-thru construction originated by Tobe to provide high attenuation over a broad band, these are the simplest of all effective radio interference filters. Available ratings: 10 to 250 amperes, 125 volts a-c to 4000 volts d-c. Write for catalog.

FILTER PACKS

Multi-circuit filter packs combine, in a single, compact housing, all the elements needed to suppress radio interference in many separate circuits. Designed and built to your circuit requirements, Tobe Filter Packs provide better miniaturization than individual filters, and reduce the space to be pressurized, with no sacrifice in filter performance. Call on us for recommendations in your early design stages — where we can do the most to help you.

SCREEN-BOOTH FILTERS

Used throughout industry to keep radio interference out of shielded areas. Handle high current with negligible voltage drop. Designed for easy installation in conformity with correct electric wiring practices.

INTERNAL IMPEDANCE: .05 ohms to 1 ohm.

LONG TERM STABILITY: 0.1% per 100 hours to 0.5% per 24 hours.

IMPROVED CIRCUITRY: Temperature compensated balanced bridge d-c amplifiers, pentode connected series tubes, helipot voltage control on wide range units, 5651 voltage reference source, optional fail-safe protective system which cuts off supply or entire equipment.

CONSERVATIVE DESIGN: Performance specifications are derated to approximately 1/3 of factory test limits to insure tube interchangeability and adherence to ratings throughout life. Capacitors are sealed, oil-filled units; transformers are vacuum varnish impregnated, 40°C rise; amplifier resistors are 1%, low drift type; resistors over 1 watt are wire-wound.

METERS: Weston rectangular instruments are available on all models.

CUSTOM FABRICATION: We will manufacture single units or systems to your specifications.

now...TEFLON* with Certified performance

*Conformance to specifications assured
in FLUOROFLEX®-T rod, sheet, tube*

Resistoflex will certify each shipment of "electrical grade" Fluoroflex-T products on six vital physical and electrical properties. Qualification tests are performed on all incoming Teflon powder to determine whether it will yield rods, tubes and sheets which are in conformance with specification AMS-3651 "Polytetrafluoroethylene." Processing under a quality control and inspection system approved by the USAF under MIL-Q-5923 specification maintains the identity of each lot of material through all stages of manufacture — from virgin powder to finished product.

An affidavit accompanies each shipment attesting to its conformance with AMS-3651. Certified test reports of the actual properties of any shipment will be furnished whenever they are requested.

Be sure of optimum performance in Teflon by specifying electrical grade Fluoroflex-T. Remember, too—Fluoroflex-T products are non-porous and stress-relieved. This means better dimensional stability, less costly machining and fewer rejects. For more details, write or phone...

*DuPont trade mark for its tetrafluoroethylene resin.
©Resistoflex trade mark for products from fluorocarbon resins.

TERMALINE-THRULINE Coaxial Line Instruments

MODEL 612

TERMALINE Direct-Reading RF Wattmeters 30 mc-500 mc; 50 ohms; 1/2 W-5 KW — Load Type
THRULINE Direct Reading RF Wattmeters 25-1000 mc; 10-500 watts — "Thru" Type

TERMALINE Wattmeters

The TERMALINE wattmeter is a direct-reading, absorption type instrument for simple, fast and accurate power measurement of transmitters operating between 30 mc and 500 mc. With the TERMALINE coaxial load resistor built into the input connector of the wattmeter feeds a dc meter which is calibrated directly in RF watts. Accuracy of 5% of full scale or better is assured. Model 611 is the commercial version of the Army-Navy ME-11/U RF wattmeter, widely used by all government services. Most transmitter manufacturers use the TERMALINE wattmeter for production and field test work and recommend it to maintain performance.

Frequency Range.. 30 to 500 mc. (See Table)
 Power Range..... 1/2 watt to 5000 watts
 Impedance 50 ohms
 Accuracy 5% of full scale. VSWR less than 1.1

| Model | Freq. Range | Max. Power | Ranges Scales | Input Connector |
|-------|-------------|-----------------------|------------------------------|--|
| 611 | 30-500 mc | 60 W | 2 { 0-15 0-60 | Female N. Takes UG-21/U plug |
| 612 | 30-500 mc | 80 W | 2 { 0-20 0-80 | Female N. Takes UG-21/U plug |
| 67 | 30-500 mc | 500 W | 3 { 0-25 0-100 0-500 | Coplanar. Adapter to UG-21/U supplied. Available accessories: RG-17 and RG-19 Cable assemblies, adapters to rigid lines. |
| 67C | 30-500 mc | 2500 W (Water cooled) | 3 { 0-100 0-500 0-2500 | |
| 824 | 30-220 mc | 5000 W (Water cooled) | 1 0-5000W | |

Special scale Model 61 for low powers such as 0-1, 0-5 watts also available.

TERMALINE-Coaxial Terminations

The Termaline coaxial load resistor is designed to have a constant 50 ohm impedance over a wide frequency range. Its unique design puts reactance to work and produces an almost purely resistive load, with little or no sensitivity to frequency change. The active power dissipating portion is the outer surface of a cylindrical film-type resistor, which forms the center conductor of a special self-terminated coaxial structure.

It is as a dummy load for high frequency transmitters. Radiating, adjustment of transmitters can be made without FCC rules. Thousands are now being used in military. It is incorporated as standby in many commercial and as a test load.

50 ohms 5w.-2500w.

| Model | Max. Power | Useful Freq. Range | Max. VSWR | Input Connector |
|-------|------------|--------------------|-----------|--|
| 80-F | 5 W | 0-4 KMC | 1.2 | Type N Female |
| 80-M | 5 W | 0-4 KMC | 1.2 | Type N Male |
| 80A | 20 W | 0-500 MC | 1.1 | Type N Female |
| 81 | 50 W | 0-4 KMC | 1.2 | Type N Female |
| 81B | 80 W | 0-4 KMC | 1.2 | Type N Female |
| 82 | 500 W* | 0-3 KMC | 1.2 | Coplanar. Adapter to UG-21/U supplied. Available accessories: RG-17 and RG-19 Cable assemblies, adapters to rigid lines. |
| 82A | 500 W | 0-3 KMC | 1.2 | |
| 82C | 2500 W** | 0-3 KMC | 1.2 | |

CH—Coaxial Selector Switch

View Model 74

MODEL 74
Single Coaxial Circuit
Six Positions

MODEL 718
Single Coaxial Circuit
Eight Positions

MODEL 72R MODEL 72-2
Two Two
Coaxial Circuits Coaxial Circuits
Reversing Switch Two Positions
(DPDT, etc.) (DPDT, etc.)

50 ohm switch for use in coaxial circuits. Characteristic is maintained through all switch details and low standing result. In V.S.W.R., switch is comparable and as good as tor and cable with which it is used.

Female connectors are standard on all models to receive series plugs. Adaptors may be used to enable switch to other cable and connectors.

Model 43 Thruline DIRECTIONAL WATTMETER

Reads Directly ...
 → WATTS FORWARD
 ← WATTS REFLECTED
 ...In 50 Ohm Coaxial Lines

The Thruline Wattmeter is a direct reading wattmeter designed for insertion between transmitter and antenna or load resistor. It provides a simple, accurate means for measuring power into the load or power reflected by this load. Full scale power range and frequency range are determined by the selection of plug-in elements as shown in the table.

| FREQUENCY RANGE, MEGACYCLES | | | | |
|-----------------------------|-----------|------------|------------|-------------|
| 25-60 mc | 50-125 mc | 100-250 mc | 200-500 mc | 400-1000 mc |
| 10 W | 10 W | 10 W | 10 W | 10 W |
| 25 W | 25 W | 25 W | 25 W | 25 W |
| 50 W | 50 W | 50 W | 50 W | 50 W |
| 100 W | 100 W | 100 W | 100 W | 100 W |
| 500 W | 500 W | 500 W | 250 W | |

Note: ELEMENTS must be specified for both power and frequency range.

Thus: Element, 100 watt, 100-250 mc, is correct ordering information.

The entire instrument is housed in a rugged cast aluminum case equipped with sockets for extra elements and with a carrying strap.

Available with female "N", male "N" or female UHF (So239) connectors.

S RF FILTERS

Suppression of low order harmonics in VHF and UHF transmitters may be handled thru these filters. Insertion loss and VSWR are very

low thru pass band. Rugged construction thruout assures reliability. All are of 50 ohms impedance and are reversible with equal results. Attenuation in pass band is less than 1/2 db and in stop band 40 db or better is realized.

| PASS BAND | STOP BAND | MAX. POWER | VSWR | CONNECTORS |
|-----------|--------------|------------|--------|--|
| 0-400 MC | 500-2000 MC | 150 W | 1.35 | One male and one female N |
| 0-1200 MC | 1900-4000 MC | 100 W | 2 to 1 | One male and one female N |
| 0-1200 MC | 1800-4000 MC | 3.5 KW | 2 to 1 | Coplanar. For use with Models 67 and 67C |

Think of...

When You Think of RESISTORS

N-CAPS

Encapsulated Wire Wound Resistors. N-Caps are precision wire wound resistors: encapsulated in a hermetically sealed plastic jacket. The encapsulating process is your assurance of utmost protection against the deteriorating effects of salt water and the destructive effects of mechanical shock. N-Caps provide maximum stability over longest periods. Sizes: MIL-R-93A RB15, 16, 17, 18, 19, RB52 Series and specials. Surpasses Spec. MIL-R-93A.

HI-TEMP

Hi-Temperature Precision Wire Wound Resistors. EPR research does it again! EPR gives you the resistor that triumphs over the ravages of heat. Hi-Temperature resistors withstand continuous heat up to 200° C. They are completely encased in ceramic with axial lead mounting for easy connecting. Available with glass, silicone or teflon covered wire. Surpasses all MIL-R-93A Specs.

THE RUNT

NM-2 Precision Wire Wound Resistors. A remarkable new sub-miniature addition to the famous "N-Cap" line of precision wire wound resistors. Measures a mere 1/4" x 1/4". Power rating .1 watt. Values up to 60K ±.1%. Hermetically sealed to withstand rugged environmental conditions. "N-Caps" also available in all standard MIL-R-93A sizes.

STANDARD

Highly stabilized matched temperature co-efficient precision wire wound resistors. These types have been widely accepted because they meet general requirements, can be made with resistance values covering an extensive range and tolerances; and will withstand a considerable maximum load under severe operating conditions.

Advertisers

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' Guide who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications — a matter of few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history — the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this growing NEW field. Ask them to show you what your potentials can be.

TENSOLOX HOOK-UP WIRE

Teflon insulated for continuous use up to 250°C, "Tensolon" is available in 14 solid colors plus 819 stripe combinations and features a free-stripping, thin wall covering to MIL-W-16878A.

TENSOLEX MIL-W-76A HOOK-UP WIRE

Types LW, MW, and HW available in small wire sizes in all standard colors including spiral striping. Nylon jackets can also be supplied for greater resistance to abrasion.

SUB-MINIATURE WIRE AND CABLE

Thin wall vinyl insulation over flexible stranded conductors (AWG sizes down to #40) meets many requirements for small space factor. Available in all standard colors with or without wire braid shields.

SUPER-FLEXIBLE CABLES

Tensolite super-flexible cables, featuring the patented tensulation process, solve many problems calling for limpness and long flex life. Phonograph pick-up cables, hearing aid cordage, and telephone tinsels are regularly being supplied.

TENSOLITE WIRE KITS

For laboratory and prototype requirements, the following convenient desk size wire kits are now available from stock: Teflon Kit, SRIR Kit, Sub-miniature "1482" Kit, Flexible Cable Assortment.

SPECIAL CONSTRUCTIONS

Tensolite's engineering and development facilities are also available for collaboration in the solution of many special cable problems. Simple or complex, Tensolite will welcome an opportunity to estimate on your requirements.

- Electrical Resistance Alloys

Alloy Metal Wire Company offers the electronic industry a wide selection of alloys in a full range of sizes—and backed by 35 years experience in the metal alloy field. Wire, rod and strip are available with outstanding electrical properties, special magnetic properties, high temperature resistance, corrosion resistance, excellent spring characteristics and good mechanical properties.

Nickel alloy and stainless steel wire are also available in a variety of special cross-sectional shapes, including oval, square, hexagon, teardrop, half oval, half round, wedge, D-shape and keystone.

Alloy Metal Wire Company engineers will be happy to help you select the right material for your application. Write today for our technical handbooks.

McCoy

QUARTZ CRYSTALS
CRYSTAL OVENS
ELECTRONIC DEVICES

The McCoy M-20 "McMite" is a Subminiature hermetically sealed unit which delivers the same performance as a regular sized crystal, yet takes up just one-fifth the space formerly required.

The M-20 "McMite" Subminiature crystal unit meets MIL-C-3098A specification for type CR-55/U. It is being produced in fundamental frequencies from 5 mc up and in overtone frequencies from 15 mc up. There is no sacrifice of stability or dependability when compared with crystals mounted in the regular HC-6/U holder.

The switching assemblies shown here (2" diameter and 1 1/4" diameter) are illustrative of the space saving qualities of our M-20 "McMite" crystals.

FREQUENCY RANGE
5 mc to 110 mc

TYPE M-1

Frequency 800 kc. to 110 mc. Hermetically sealed, plated crystal. Choice of design engineers for land, mobile and airborne applications. Unit made to meet government specifications MIL-C-3098A and AR-R-916. Also ARINC No. 401. Wire leads, specify M-4.

MO-1 (OCTAL)

Hermetic or gasket seal. Holds 1 or 2 McCoy M-1 (HC-6/U) crystal units. Temperature: 65°C to 85°C (adjustable). Stability: ±5°C from nominal. Ambient Ranges: -55°C to 5°C below nominal. Power: less than 6 watts. 6, 12 or 24 volt operation.

MO-1

AMP CAPITRON TRADE-MARK HIGH VOLTAGE CAPACITORS AND PULSE FORMING NETWORKS

...with outstanding STABILITY and RELIABILITY for application in radar, missile control, and similar guided systems!

AMP CAPITRON Capacitors and Pulse Forming Networks are particularly suited for radar and guided systems not only because of their remarkable size and weight characteristics, but also because of their outstanding stability and reliability in operation. They are designed in each instance for the specific requirements as to size, shape, working or test voltage, capacitance, life or other operating conditions of the equipment in which they are to be used. Inquiries are invited.

AMP Trade-Mark Reg. U.S. Pat. Off. © AMP

- up to 70% size weight reduction
- wide temperature range
- close capacitance tolerance
- no derating
- no drift
- highest known leakage resistance
- low absorption
- dimensional flexibility

AMP is also nationally recognized leader in the field of solderless terminals, simplified wiring devices and automatic wire termination.

ED MINIATURE TERMINALS HOW FAST, IN QUANTITY?

- pressure, solder, speed nut fastener
- special designs to your requirement
- 100,000 per week in quantity production
- quality construction, low cost

Bennett miniature and sub-miniature terminals are available from stock in a wide variety of types and sizes. Or, special terminals can be engineered and produced quickly.

Typical Bennett terminals are shown at left. The new Model 630, hermetically-sealed, is available as feed-through or stand-off terminal. Design is ceramic-to-metal, leakage resistance after water immersion is greater than 10,000 megohms; voltage rating is 1,500 volts R.M.S., terminal-ring capacity 2.5 μmfd . Designed for resistor assembly on panel-boards, terminals can be installed in standard .250 punched holes on .375 centers.

HOW

Barnstead

PURE WATER

HELPS RCA

RCA requires Pure Water... copper-free to an extreme degree and free from organic impurities for trouble-free TV picture tubes. That is why RCA makes use of Barnstead 200 gph double-effect Stills in combination with Barnstead 1000 gph Demineralizers.

**LIKE RCA...
THOUSANDS OF
PLANTS THE WORLD
OVER MAKE USE OF
BARNSTEAD EQUIP-
MENT FOR OBTAINING
PURE WATER**

If you use water, in any of countless manufacturing and processing operations, you will find that Barnstead equipment producing either demineralized or distilled water, or both, will insure better products, consistent results, fewer rejects; and will cut your costs in many ways. Join the thousands of companies the world over who look to Barnstead for the solution to their Pure Water problems. Write today stating your problem. Our engineers will make recommendations without obligation... recommendations that will cut costs and increase production.

The Right
Equipment For
Your Pure
Water Needs

We Make
Both... Stills
and
Demineralizers

84 Lanesville Terrace, Boston 31, Mass.

ACTUAL SIZE

TRANSISTOR Amplifiers AVAILABLE FROM STOCK!

- EXPERIMENTAL and prototype sub-miniature transistor circuits also developed from your schematics or specifications.
- GUIDED MISSILE CIRCUITS can be printed to fit snug around the inside or outside of channels or any curved surface.
- DELIVERY of prototype and experimental units can usually be made in 3 to 6 weeks.

AND ASSEMBLIES
- PRECISION ELECTRONIC
AND MECHANICAL
SUB-ASSEMBLIES

Model 622 — Ultra-Sensitive Instruments
 Portable d-c and a-c thermo instruments for precision measurement of potentials and minute currents in electronics or laboratory research.

Model 901
Portable Test Instruments
 Available in d-c, Model 901—and a-c, Model 904, single and multiple ranges of wide coverage. Excellent scale readability and shielding. Accuracy within 1/2 of 1%.

A-C Clamp Volt-Ammeter
 (Model 633, Type VA-1) For convenient and rapid measurement of a-c voltage and current without breaking the circuit. Jaws take insulated or non-insulated conductors up to 2" diameter. Safe, rugged, versatile. Also available as a-c clamp ammeter, without voltage ranges.

Specialized and Multi-purpose INSTRUMENTS

- for
- RESEARCH
 - PRODUCTION
 - MAINTENANCE

For complex, or just routine measurement jobs, these and other specialized WESTON Instruments save time and assure dependable measurements. For information on the complete line, see your local Weston representative, or write . . . WESTON Electrical Instrument Corp., 614 Frelinghuysen Ave., Newark 5, N. J.

WESTON Instruments

Sensitive Relays
 A line of sensitive relays including the Model 705 which provides positive operation at levels as low as 1/2 microampere. Non-chattering magnetic contacts handle up to 10 watts at 120 volts.

Panel and Switchboard Instruments
 A complete line of instruments in all types, sizes and ranges required for switchboard and panel needs . . . including d-c, a-c power frequencies and radio frequency, rectifier types and D.B. meters.

Model 697 Volt-Ohm-Milliammeter
 One of a line of pocket-size meters, Model 697 combines a selection of a-c and d-c current, and resistance ranges. Ideal for maintenance testing and many inspection requirements.

Model 1411 Inductronic D-C Amplifier
 Stable amplifier provides high degree of resolution even at fractional loads. Reaches steady full scale deflection a fraction of a second. Interchangeable plug-in range standards for either microamperes or millivolts.

Industrial Circuit Tester—Model 785
 A multi-range, multi-purpose, ultra-sensitive analyzer, for laboratory and industrial checking of electrical and electronic circuits. Has 28 practical scale ranges; measures d-c and a-c voltage, d-c and a-c current, and resistance. Accessories available to extend ranges. Compact and portable; furnished in either oak or steel case.

Model 686
Electronic Tube Analyzer
 Tests tubes under exact operating potentials. Accurately determines true mutual conductance of all tubes, in accordance with manufacturers' rated operating conditions, or under special operating conditions.

High Frequency Electronic Analyzer
Model 769
 A three-in-one instrument providing a self-contained Volt-Ohm-Milliammeter, a high impedance electronic D-C Volt-Ohmmeter, and a probe type Vacuum Tube Voltmeter for use to 300 megacycles. Exceptionally stable and accurate. Has specially designed extremely small RF and D-C probe

BY LIBRASCOPE

X-Y PLOTTER & RECORDER

Compact desk or rack-mounted instrument recording two independent variables on standard graph paper, from either analog or digital inputs as continuous curve tracings or dot plots. Handles direct or remote mechanical shaft rotations without modification. Accepts special inputs to meet customer applications. In digital operation the following converters standard:

PUNCHED CARD CONVERTER
Converts punched data to display point plots.

DECIMAL KEYBOARD
For manual point plotting.

BINARY CONVERTER
Consists of 2 channels of 9 binary digit capacity.

SINE WAVE GENERATOR

Used in frequency syntheses to determine data on transfer functions of automatic control systems and components, esp. pneumatic.

ELECTRONIC COMPONENTS:

ANALOG-DIGITAL CONVERTER

A shaft position to digital encoder, 2" in dia., handles up to 19 digits per unit, utilizes unique, non-ambiguous brush system.

MAGNETIC AMPLIFIERS:

Librascope manufactures ultra-fast magnetic amplifiers for industrial servo-controls, analog and digital computers, and servo-stabilization networks.

PACKAGED CIRCUITRY:

Flip-flop cards, scan matrices and other miniaturized electronic packages are available to customer specifications.

READ AND RECORD HEADS

For recording or reading of magnetic drum memory systems in digital computers. High read-back signal, low noise factor.

MECHANICAL COMPONENTS:

SINE-COSINE MECHANISM

Self-contained unit converts angular rotation into linear sine and cosine movements or solves many trigonometric functions.

BALL & DISC INTEGRATOR

Precision unit with lifetime lubrication. Used in totalizing, rate determination, differential analysis. Also serves as closed loop servo-element or variable speed drive.

HOLLOW SHAFT DIFFERENTIAL

Precision computer component for measuring angular positions or velocity sums. May be installed or removed without disassembly of unit or differential itself.

LINKAGES

Various linkage computing elements are available, including: addition-subtraction linkages, linkage multipliers and function generators to express exponential, logarithmic and square root functions.

ENGINEERS, PHYSICISTS AND MATHEMATICIANS:

for a rewarding career with a company that offers optimum stability with job diversification, write LIBRASCOPE today. Address inquiries to Dick Hastings, Director of Personnel.

COMPUTERS TO ORDER:

Librascope manufactures mechanical and electrical analog computers and digital computers for military and commercial purposes. You are invited to submit your special computer requirements to our engineering staff.

Computers and Controls

ABP

Keithley Instruments

Vacuum Tube Electrometer (Model 210) is a line-operated dc voltmeter, has ranges of 0.8, 2, 8, 20, and 80 volts, a 10^{14} ohm input, grid current within 10^{-13} ampere, accuracy within 2% of full scale, output amplifier with 0-5kc response and 10-volt output full scale on all ranges, output terminals for balanced or unbalanced recorders and amplifiers. Can be used with accessories below and as a preamplifier which has an ultra-high input impedance.

Vacuum Tube Electrometers (Models 200, 200A) are battery-operated dc voltmeters, have ranges of 2 and 20 or 2 and 8 volts, inputs of 10^{14} ohms, grid currents below 5×10^{-13} ampere, accuracy within 2% of full scale. Accessories described below permit use as polarity-sensitive kilovoltmeters, micromicroammeters of extreme range, and meg-megohmmeters.

Electrometer Accessories multiply uses of Keithley Electrometers. Decade Shunt clips over input terminals, converts instrument to direct reading micromicroammeter with full-scale sensitivity of 8×10^{-13} ampere. Voltage dividers provide numerous ranges up to 20 kv. The Test Voltage Supply is useful in measuring resistances as high as 10^{16} ohms.

Phantom Repeater is an instrument amplifier which greatly reduces measuring errors caused by circuit loading. Input impedance is over 200 megohms shunted by 6 mmf. Gains of 1:0, 10, and 100 accurate within 2%, frequency response 5 to over 150,000 cps, output impedance less than 350 ohms, noise equivalent to less than 70 microvolts at the input.

Meter Matcher is a power frequency amplifier. Eliminates meter current errors when using a voltmeter or wattmeter. Gives 150-volt voltmeter or wattmeter effective full-scale ranges of 15 to 600 volts. Input impedance 100,000 ohms to 4.0 megohms on five input voltage ranges, max signal 150 volts rms into resistive meter loads of over 2000 ohms; response 5 to 20,000 cps. Adds less than 0.15% error to measurements.

**An Insulating Varnish
for every ELECTRICAL UNIT**

FOR EVERY ELECTRICAL WINDING, there is a Borthig Insulating Varnish that will efficiently do the job . . . including several special materials for television components and custom built coils.

BAKING VARNISHES:

No. K-252 Clear Synthetic Baking Varnish and No. F-150 Black Synthetic Baking Varnish: These excellent, general purpose baking varnishes are modern, polymerizing types and offer the maximum efficiency.

AIRDRYING VARNISHES:

No. 308 Black Synthetic Airdry and No. 353 Clear Synthetic Airdry: Where baking facilities are not available and also for application to shallow coils where deep penetration is not essential.

FINISHING TYPE INSULATING VARNISHES:

No. 400 (Homogenized) Red Enamel, No. 354 Clear Synthetic Airdry and No. 301 Black Oilproof Spirit Varnish: These protective coatings are generally applied over previously treated motor and transformer units as additional protection.

The No. 400 and No. 354 with a suitable fungicide added will meet the Army-Navy requirements for tropicalization. Ask for No. 400 F-5-X or No. 354 F-5-X.

No. 613 Red Masking Compound: For masking metal surfaces—just brush it on, allow 5 or 10 minutes to dry and peel it-off after baking cycle—surface will be clean.

No. 545 Clear Lacquer: A special material for TV deflection yokes and small coil applications.

KOCH ... World's largest fabricator of moulded Fiberglas products

This is the only one!

This Fiberglas carrying case has been accepted by the United States Air Force and the Bureau of Aeronautics United States Navy for heavy duty storage and shipping of aerial cameras and other precision instruments—without any exterior crating or protection of any kind.

It is manufactured by Koch of California—specification MIL-C-4150B(USAF). First paragraph of the specification reads as follows:

1. SCOPE

1.1 This specification covers rigid heavy duty storage and shipping cases capable of providing Method IID packing in accordance with Specification MIL-P-116 with no additional packaging of the case.

Originator of Koch Fiberglas Luggage
—guaranteed against breakage on any airline, railroad or steamship, anywhere in the world.

More than 40,000 of these cases are now in use by the Air Force and Naval Bureau of Aeronautics all over the world. To date there has not been a single casualty to a case or the valuable equipment it contains.

This case has been dropped by parachute from a plane flying 250 miles an hour at 600 feet altitude (equivalent to a free fall of 25 feet), without damaging case or contents. It has been submerged in 40 feet of water without leaking. It will not dent or puncture. It is fungus and mildew proof. Vapor and moisture transmission rate is zero.

This case, or variations thereof, is now available to manufacturers of military or civilian products that need maximum protection in handling, storage or shipping.

For full details, address:

NEW! HEATING ELEMENTS by COX

Can be permanently cemented in place on curved or flat surfaces

- Applies Heat "On the Spot"
- Temperature of Heating Element is Only Slightly Higher than Object Being Heated
- High or Low Rating per Unit Area
- Available as Wire or Flexible Sheets
- Ultra-safe—Minimum Current Requirement

Cox Heating Elements are new and completely different; when cemented in position, the elements stay in place regardless of temperature change or mechanical shock. Used by leading manufacturers, they have already proved their worth in more than 300 military applications for guided missiles, Airborne Instruments, Hydraulic Equipment, Batteries, T/R Tubes, etc.

Solve your equipment heating problems efficiently and effectively with Cox Heating Elements.

phaostron panel meters

SPECIFICATION and CUSTOM
 with Interchangeable Round or Square Bezels

1 1/2", 2 1/2", 3 1/2" and 4 1/2" sizes

- CUSTOM Panel Instruments
 (Built to JAN-I-6 & MIL-M-6A)
- RUGGEDIZED Panel Instruments
- SEALED Panel Instruments
- RUGGEDIZED SEALED Panel Instruments
 (MIL-10304)

For applications not subject to extreme shock, the Phaostron CUSTOM Meter incorporates the same basic movement as the famous Phaostron RUGGEDIZED Instruments with the exception of the shock mounts.

These Superior Metal-Cased CUSTOM Instruments are competitive in price with bakelite panel instruments. Available in AC and DC ranges with front zero adjustments, optional mirror scales, and unlimited combination of features and choice of round or square bezels.

phaostron

HERMETICALLY SEALED

1/4 to 2 watts HERMETICALLY SEALED in glass (The CA-H pictured here) and in a Specification Series (the CA-4R) which exceeds MIL-R-10509 spec. for fixed, accurate resistors.

Available also with humidity impervious paint, Kel-F or Vinyl casings. These conservatively rated resistors provide the utmost in stability, precision and dependability for high frequency applications, closely matched units and extremes of temperature.

100% Inspection on each "CARB-OHM" assures conformance to specifications and ratings.

"CARB-OHMS" deposited carbon resistors

perfectly counter-balanced armature

Contact arrangements up to and including D.P. D.T. 3 amp at 28 volts DC or 100 milliamperes at 150 volts DC resistive load.

This miniature precisely adjusted and HERMETICALLY SEALED relay is designed to operate thru wide ranges of environment including the shock requirements of MIL-E-5400 and MIL-5757B, Amendment 1. It will withstand 50 G's acceleration without malfunctioning and its use is recommended wherever extremes of shock, temperature and severe vibration are encountered.

Required coil power as low as 20 milliwatts.

Coil resistance up to 15,000 ohms.

Weight, Max. 3.0 oz.

New Instruments and Components to Aid in Design and Reduce Costs

by

TECHNITROL

Variable Pulser to Aid Laboratory Aid

Technitrol Variable Pulser is a versatile instrument which controls the output of a laboratory oscillator over a wide range of pulse rates and pulse widths.

It has been used as a low pulse rate source to study the response of component networks to isolated pulses. It has also been used as a variable pulse source to study P.R.F. sensitivity. Other uses have been as a constant frequency source for a temporary pulse generator.

Characteristics

Range of frequencies from 2 cps. to 2.0 mcs.

Characteristics optimized with rise and fall times approximately 0.04 μ s. and 0.06 μ s. respectively.

Pulse width variable from 0.2 μ s. to 10 μ s. in steps of 0.1 μ s.

Stable, accurate pulse duration controlled by electric delay lines.

Amplitude continuously variable without distortion from 0 to 45 volts.

Output pulse precedes input pulse to synchronize oscilloscopes, etc.

Tiny Encapsulated Pulse Transformers Wound to Your Requirements

Technitrol Pulse Transformers are wound on ferrite cores and cast in resin to form a $\frac{3}{4}$ " sealed unit.

Type TE has 2-inch pigtail leads of No. 20 wire. Type TP has 7-pin plug-in for miniature tube sockets. Lends itself admirably to printed circuits where holes can be drilled in the circuit board, the transformer plugged into these and the pins soldered to the circuit leads on the side opposite the body of the transformer.

Very Compact Delay Lines Designed to Fit Your Need

A Technitrol Delay Line—with not more than $\frac{1}{4}$ " diameter and $6\frac{1}{4}$ " length, or in a package—will be designed for your particular circuit application. A variety of mountings offers you a wide choice.

- Delay: 0.01 to 1.6 μ s.
- Characteristic Impedance: 400 to 2500 ohms.
- Wide Frequency Response: 0.5 μ s. at 1200 ohms.
3 db down at 5 mcs
6 db down at 8 mcs
10 db down at 10 mcs

Continuing intensive research and development is expected to make available even greater band-widths.

- Linear Phase: to 9 mcs and beyond

INSUROK PLASTICS

LAMINATED INSUROK

Available in sheets, rods, tubes, and fabricated parts, in many grades, sizes, and thicknesses. Meets practically any requirement for uniformity, machinability, dielectric, printed circuitry, and physical strength.

MOLDED INSUROK

Parts molded from specially developed plastics materials as required for your product. Standard materials also used. Produced by compression, transfer, or injection process. Metal inserts molded into position.

RICHARDSON OFFERS YOU A Complete Range of TECHNICAL SERVICES

Richardson offers its wide experience in developing special plastics materials for your product. Also, research, design, and extensive engineering services without cost or obligation. We provide molding, laminating, molded-laminates, and fabrication facilities and techniques. This assures the correct selection of material and process for each application.

RESEARCH

For over one-quarter century, Richardson has pioneered in the development of new plastics and the improvement of old.

DESIGN

Experienced engineers analyze your requirements and help you select material, form, and process best suited to your needs.

PRODUCTION

Richardson has the plant equipment and know-how to handle even the largest, most difficult molded or laminated job.

FABRICATION

Complete facilities for punching or machining parts to your design and in any quantity.

1. OUTPUT, MATCHING, COUPLING, AND POWER SIGNAL 400 CYCLE TRANSFORMERS: used where reliability and miniature size is required, such as control amplifying systems. Supplied with any special lead wires or terminations.
2. DUAL MAGNETIC AMPLIFIERS: all types used in latest 400 cycle aircraft control amplifiers for Servo Systems.
3. VARIABLE REACTOR: used today in tuned resonant circuits for vacuum tube voltage regulating systems. Suitable for experimental laboratory work where a HI-Q and wide range of inductance is required.
4. TRIPLE MAGNETIC AMPLIFIER: used in aircraft automatic pilots, by both the Army Air Force and Navy.
5. HERMETICALLY SEALED TRANSFORMERS: designed to conform to military specifications for hermetically sealed transformers, magnetic amplifiers and reactors.
6. FLY BACK: HORIZONTAL OUTPUT AND HIGH VOLTAGE TELEVISION TRANSFORMER: manufactured for extra quality performance of very low costs.

COMMERCIAL USE

Omni-Range; Dme; Line Course Computers; Automatic Pilots Navigation; Transmitters and Receivers; Oil Burner Ignition; Fly Back; Vertical Output, Linearity Controls.

MILITARY USE

Servo Amplifiers; Adjustable Reactors; Transistor Magnetic Amplifier; Class H. Transformers; Drone Control; Guided Missile; Voltage Control; Marine Control; Sonar Celco Research.

Advertisers:

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the publications — a matter of a few percentage points.

It is quite possible that you are not getting an effective presentation of your products and abilities in this excellent issue, but are missing a presentation before one of the fastest growing fields in the country's history — the field of atomic energy.

The sales representatives of NUCLEONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great new field. Ask them to show you what your potentials can be.

EXACTLY your type and size in Spiral Wound PAPER TUBES

SQUARE, RECTANGULAR, ROUND

Standard-type PARAMOUNT paper tubes used for millions of coil forms and other applications. Hi-Dielectric. Hi-Strength. Kraft, Fish Paper, Red Rope, Acetate, or any combination wound on automatic machines. Any size from 1/2" to 30" long, from .450" to 25" I.P. Produced from wide range of stock arbors or specially engineered for you.

NEW "PARAFORMED" TUBES SQUARE OR RECTANGULAR

Entirely new technique in tube making developed and perfected by PARAMOUNT. Perfectly flat side walls, sharp square inside corners, and very small radius on the four outside corners. Spiral wound, not die formed. No sharp outside edges to cut wire. No need for wedges to tighten winding on laminated core. Full rigidity and physical strength. Permits winding coils to closer tolerances. Allows faster automatic stacking of coils. Approved and used by leading manufacturers. *No extra cost!*

Celco centrifugally casts
MOTOR ROTORS!

CELCO—leading specialists in centrifugally cast rotors for military low inertia and conventional commercial motor applications, offers a complete service on rotor sizes from .375" O.D. to 4" O.D. Celco's exclusive centrifugal casting process guarantees high density with no porosity in the bars and end rings of the squirrel cage.

Other centrifugally cast products are motor housings, special bushings, rings and impeller blades which are cast from various alloys. Radio frequency induction heating equipment permits casting of high melting temperature alloys.

Celco engineers have had extensive experience in experimental and development work. The knowledge that they have gained through the years permits them to design rotors that add superior performance to your finished motor.

CONVERT MOTION TO ELECTRICAL ENERGY WITHOUT CONTACT

Model 4900

New Electro Proximity Pick-up System

Actuates Electronic or Electro-Mechanical Devices for counting parts . . . indicating position and distance . . . detecting presence of metallic mass . . . sequence timing . . . limiting control . . . operating from 0 to over 12,000 times a minute.

Produces Constant Electrical Output in Excess of 5 Volts when any metallic mass approaches the pick-up. Output voltage is independent of the speed or proximity of the actuating mass and remains constant while it's close to the pick-up and drops to 0 when removed.

Model 4900-R has built-in relay for operating power equipment.

Special Types for sensitivity up to several inches as well as hollow core pick-ups can be supplied.

Model 3010-A

Electro Magnetic Pick-up

Indicates Without Contact or "Loading" RPM . . . rate of speed or motion. For acceleration and velocity studies . . . precision ignition timing . . . ballistic research . . . many others.

Produces Variable AC Electrical Output in proportion to any magnetic object's rate of speed. It can be actuated by displacement or vibration of magnetic material in the field of the pick-up, such as a keyway in a shaft, gear tooth, pin or slot in the moving part. Low cost permits use in production machinery.

Special Magnetic Pick-ups for high temperature and deep space applications. Also available with AN type connectors.

Model 3015

New Electro Miniature Magnetic Pick-up

Designed for Small Space and Light Weight Applications. Controls electrically operated devices . . . rockets . . . guided missiles . . . etc. For mechanical or electrical counting . . . indicates rate of travel, angular or linear speed . . . vibration.

Produces Variable AC Electrical Output in proportion to any magnetic object's rate of speed. No mechanical contact with exciting metal necessary. Self-energized by built-in permanent magnet. Ruggedly constructed to withstand severe shock and vibration. Weighs only 1/3 ounce.

Model 3600-A

MEASURE STATIC OR DYNAMIC DISPLACEMENT

Electro Dynamic Micrometer

Accurately Measure Without Contact vibration in heat exchangers, motors . . . shaft whip . . . radial expansion due to high RPM . . . rate of acceleration . . . valve travel. Adds no "load" or distortion to object measured.

Independent of Acceleration or Frequency of Displacement. Measure static distance plus the amplitude of dynamic movement down to .0001 inch at any speed. Sensing unit is calibrated for direct reading. Direct viewing of displacement contour can be seen on the oscilloscope. Accuracy to within 1% of total displacement ranging from static to 200,000 RPM or vib./min.

SKL PRECISION INSTRUMENTS

FOR YOUR MEASUREMENT PROBLEMS

RELIABILITY • ACCURACY • FLEXIBILITY

VARIABLE PRECISION FILTERS: SERIES 300

All SKL Series 300 precision variable electronic filters are designed to have responses identical to constant k-pi section filters. The filters have 18 db per octave per section attenuation in the rejection band. Max. attenuation 36 db per octave for Models 302 and 306.

| MODEL | FUNCTION | CUT-OFF FREQUENCY RANGE | ACCURACY |
|-------|---|-------------------------|--|
| 300 | Hi or low pass | 20 cps to 200 kc | $\pm 3\%$, 20 cps to 20 kc $\pm 5\%$, 20 kc to 200 kc |
| 302 | Hi or low pass Band pass & rejection | 20 cps to 200 kc | " |
| 305 | Hi or low pass | 2 cps to 20 kc | $\pm 3\%$ over entire range |
| 306 | Hi or low pass Band pass & rejection | 2 cps to 20 kc | " |

WIDE-BAND CHAIN AMPLIFIERS: SERIES 200

Broad bandwidth, short rise time, stable gain, and linear phase shift make SKL Chain Amplifiers ideal for amplifying either wave signals or pulses. Each model comes with a regulated power supply.

| MODEL | BANDWIDTH | GAIN | APPLICATIONS |
|---------|------------------|-------|----------------------------|
| 202D | 1 kc - 210 mc | 20 db | Pre-amplifier |
| 200B | 1 kc - 210 mc | 10 db | Phase Inverter |
| 214B | 200 cps - 100 mc | 30 db | Pulse Amplifier for C.R.T. |
| 212A TV | 40 mc - 225 mc | 21 db | TV Distribution Systems |

504 SQUARE WAVE GENERATOR

A rise time of .05 microseconds and a wave form without tilt or overshoot characterize the performance of this moderately priced instrument. The Model 504 Square Wave Generator has a frequency range from 0.5 cps to 1 mc in eight steps. The output voltage is continuously variable from 0 to 10 volts peak to peak. The unit comes complete with its own regulated power supply.

503 PULSE GENERATOR

Provides a rectangular pulse shape with a rise time of less than 1 millimicrosecond. Pulse width is varied by changing length of external cable; minimum pulse width less than 1 millimicrosecond while maximum pulse width is unrestricted. Pulse repetition rate is variable from 50 to 150 pps. The pulse output voltage is continuously variable up to 150 volts; either positive or negative. Output impedance is 50 ohms. The Model 503 Fast Rise Pulse Generator is a convenient instrument for testing the response of any wide-band network.

600 CATHODE RAY INDICATOR

Designed to utilize the high writing speed capability of the type 5XP cathode ray tube in applications too advanced or special for standard oscilloscopes. In conjunction with the Model 610 Sweep Generator writing speeds up to 500 centimeters per microsecond may be observed. Conveniently mounted on the front panel

610 SWEEP GENERATOR

Provides continuously adjustable sweep speeds of from 0.05 to 500 centimeters per microsecond for a C.R.T. or other applications requiring a linear, rapidly-rising voltage. Used with the SKL Model 600 Cathode Ray Indicator, ignition voltages, lightning, dielectric breakdown and other very fast pulses may be displayed in detail.

WIDE-BAND TELEVISION DISTRIBUTION SYSTEM: SKL manufacturers complete T.V. distribution systems for community, apartment house, and industrial use. Details upon request.

*The Finest in
Precision Equipment*

There's a *University* Loudspeaker

RUGGED!

DEPENDABLE!

VERSATILE!

FOR EVERY COMMERCIAL AND INDUSTRIAL APPLICATION

TRUMPETS Model 7102 exemplifies the rugged construction and progressive engineering behind every University product. Model 7102 is the *only* loudspeaker ever approved by Underwriters' Labs for Class II Groups E, F, & G hazardous area duty. Features include re-entrant trumpet (pioneered by University) for compactness and greater efficiency, heavy duty 25 watt driver unit with exclusive University "W" shaped Alnico V magnet, and *built-in* line matching transformer with impedances of 16, 45, 500, 1000, 1500, and 2000 ohms. See general catalog for trumpets of all sizes.

IMPROVED WIDE ANGLE HORNS These models feature the research of University's ingenious engineering — the famous twin air columns in a single assembly. By combining two identical precision die-castings to produce a "pair of exponential horns" without other separate parts to loosen and vibrate, smooth even sound radiation free from cancellations is projected from these wide angle horns.

BREAKDOWN-PROOF DRIVER UNITS The **FIRST** driver unit with the built-in line matching transformer was introduced by University and it has never been successfully imitated. Exemplifying the highest production standards, all driver units are permanently weather-proofed, thickly insulated and constructed with the exclusive University "W" shaped gold dot Alnico V magnet.

PAGING AND INTERCOM SPEAKERS Employing the University commutate reflex air columns with hermetically sealed driver units, the directional, radial, and bi-directional speakers supply the highest efficiency and outstanding reproduction at any volume level. Due to their optimum performance and long-life qualities, these typical University pace-setting paging and intercom speakers are widely used for all types of speaker installations.

SUBMERGENCE-PROOF SPEAKERS These types are designed for use where extreme ruggedness and immunity to spray, gases, live steam or dust are essential. Function even under water, drain automatically, operate continuously regardless of exposure. Models available for directional or radial projection, wall or bulkhead mounting, swivel mount and with or without built-in line matching transformer and attenuator. Design is ideal for railroad use, shipboard, industries, docks, rough mobile work, etc. Model MM-2, illustrated, is rated at 15 watts continuous IPM, frequency 300-6000 cps, impedance 16 ohms.

FOR ALL HIGH FIDELITY REPRODUCTION REQUIREMENTS

WIDE RANGE CONE SPEAKERS Model 6201 comprises a superb 12" cone speaker with a driver type tweeter mounted coaxially. The cone speaker features a 24 oz. "W" shaped Alnico magnet and edge treated cone for distortion-free low frequency response. Tweeter has wide angle horn. A built-in LC crossover network and external high frequency attenuator are included. Capacity is 25 watts, response 45-15,000 cps, impedance 8 ohms. Other cone speakers for high fidelity, as well as submergence-proof or blastproof service for commercial and military applications.

HI-FREQUENCY TWEETERS University offers a complete line of single and double tweeter units for both 2000 and 600 cycle crossover. Exclusive University "reciprocating flare" horn construction assures uniform wide angle dispersion. A complete line of accessories are included — crossover networks, adapter for mounting tweeter on a standard cone speaker, etc. These tweeters may be added to any standard amplifier and speaker to provide the finest in high fidelity reproduction — and at a very low cost.

Advertisers

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of two publications — a matter of few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history — the field of atomic energy.

The sales representatives of NUCLEONICS are also the sales representatives of ELECTRONICS. They have much evidence pointing to the opportunities in this new field. Ask them to show you what your potentials can be.

ULTRASONICS

AUDIGAGE®

Portable Thickness Testers

for corrosion inspection and thickness gaging from one side. Ranges 0.020" to 4" or 0.060" to 12" of steel or equivalent, with accuracies up to 1%. Quartz and barium-titanate transducers.

VIDIGAGE®

Direct-Reading Thickness Tester

with 21" cathode-ray screen and direct-reading scales. Infinite choice of ranges between 0.015" and 2.5" of steel or equivalent. Accuracy from 0.1% to 1.0% according to applications. Quartz and barium-titanate transducers.

SONOGEN®

**Ultrasonic-Power
 Generators**

with a variety of barium-titanate transducers, for production and research.

MODEL 500 for accelerated small-parts cleaning. R-F Output 500W at 450 KC.

MODEL L-750 for laboratory investigations. 750 Watts of pulsed or filtered R-F power over a wide range of frequencies.

MODEL 2000 industrial generator for cleaning, emulsification, and other uses requiring considerable power. R-F Output 2 KW at 200 KC.

SQUARE

PULSE GENERATORS

for the
MILLIMICROSECOND
to
MICROSECOND RANGE

New Basic Test Instruments for NUCLEAR, RADAR, TV, UHF, and other fields in which FAST PULSE CIRCUITS are employed. Three or more pulse outputs are available in the 300 Series. The amplitude can be attenuated from front panel controls. Time delay between pulses can be varied on Models 200 and 300. Push button control for single pulse operation available in all models as a Standard Feature.

Specifications:

PULSE SHAPE: Square Pulse
RISE TIME: .001 usec. from 10% to 90% amplitude
PULSE WIDTH: .001 usec. to several usec.
PULSE AMPLITUDE: From 100 volts to .006 volts in one db steps
OUTPUT IMP: Matched to any impedance to standard coax lines. Two impedance outputs also available
POWER INPUT: 105-125 V, 60 cy, 50 watts
SIZE: 17½" x 19" x 10 3/16" (Rack Mount or Portable)

SERIES 300

Model 200
Double
Pulse
Output

Model 100
Single
Pulse
Output

10mc SCALERS

FEATURES:

1. RESOLVING TIME: 0.1 usec.
2. MAXIMUM CONTINUOUS UNIFORM RATE: 10 mc or 10⁷ counts/sec.
3. INTERPOLATION: Simple neon light indicators usually available only in slower Scalers.
4. SCALE FACTOR:
Model 410: Binary scale of 128 for maximum reliability and usefulness.
Model 412: Decade scale of 100. (Neon light interpolation in both)

Custom designs utilizing EPIC fast decades (or binary counters if desired) can be provided in the following applications:

1. Counter-Chronograph to count time intervals directly in steps of 0.1 usec. to 1.0 sec. Seven decades would indicate directly in decimal form, elapsed time in 0.1 usec steps.
2. Predetermined fast counters for counting, control, and accurate generation of time delays.
3. Inquiries are invited to provide multi-fast counter systems for counting, timing, control, and other applications.

Input and output characteristics, including connectors in these units can be customized to your individual requirements.

BUYERS' GUIDE

HOW ABOUT ENGINEERED CERAMICS For YOUR JOB?

Ceramic Engineers have developed many forms together with modern fabricating methods* which have greatly enlarged the usefulness of ceramics. Vacuum furnace manufacturers, for instance, are taking advantage of the properties of Frenchtown ceramics (particularly high strength) to take a high temperature metal coating to metal fittings can be brazed to vacuum-tightness. Frenchtown ceramics are also adapted for use as printed circuit bases, antenna housings (radomes), cavity antennas, spark plug insulators, ceramic envelopes and many others. Check our list for the properties your job requires:

ELECTRIC STRENGTH
252.4 volts mil.

RESISTANCE
Operating temperatures up to 1971° C.

THERMAL CONDUCTIVITY
Coefficient (c.g.s. units) up to 0.0180

THERMAL EXPANSION
Low as 2% cumulative at 700° C.

GET THE *Best*
IN TEFLON*
FROM ONE SOURCE

Because Teflon by Ethylene is processed under rigid control in new equipment designed especially for the processing of this material, you are assured of a satisfactory product. It is uniform in density and dimension and free from cracks, voids, and porosity.

Teflon by Ethylene is available in rods, sheets and tubing, in the following size ranges:

Molded Sheets.....
Extruded, Centerless Ground Rod..... 1/16" to 2" thick by 29 1/4" x 29 1/4" **
Extruded Tubing..... 3/16" to 4" OD inclusive 3/16" to 1" 1/16" to 3 1/2" ID 1/16" Minimum Wall

Molded Rod..... 1 1/2" to 6"
Molded Tubing..... 1 1/8" x 3/8" to 20" x 18 3/4"
Shaved Tape..... .0025 to .060 thickness and 12" wide

Also economical production of accurately machined parts or special moldings in small experimental quantities or production runs.

Are You Using
The Newest Industrial Metal

GOLD?

Gold has unique and diverse properties—physical, thermal, chemical, electrical, optical, decorative, corrosion resistant—not found in combination in any other form. One of these properties—or a combination—may do a hitherto "impossible" job for you, or economically replace steps in your present operation.

By Electroplating Gold

— you can utilize its unusual properties with great accuracy. If you are now plating gold, we can equip you to do better work at lower cost. If you've overlooked this important field altogether, we can show you how a Technic installation brings gold plating under scientific control. Write us your problem, outlining your type of production. We'll report promptly on benefits you can ensure with Technic methods.

Without obligation, find out how Electroplating Gold Can Cut Costs

NATVAR FLEXIBLE ELECTRICAL INSULATING MATERIALS

VARNISHED FABRICS AND PAPERS

VARNISHED CAMBRIC

Straight cut for application to regular smooth surfaces; bias for irregular surfaces. Supplied in all standard sizes and thicknesses, in yellow or black and in greasy, mica-dusted, or dry finishes. Yellow has higher resistance to mineral oils and is therefore used extensively in oil immersed apparatus; black has better electrical qualities and is therefore recommended for applications where dielectric strength, power factor and preservation of these qualities even under humid conditions is important. Natvar varnished cambric is manufactured to conform to the latest revisions of NEMA Standards and A.S.T.M. Specifications. Full width rolls, 25 yd. and 50 yd.; sheets, 36" x 36" and 24" x 36", standard; other lengths and sizes on special order.

VARNISHED CAMBRIC TAPE

Straight cut or seamless bias, in all standard widths and thicknesses, yellow or black, greasy, mica-dusted or dry. Characteristics same as for varnished cambric. Accurately slit for use in taping heads. Standard lengths 36 yd. and 72 yd. rolls.

VARNISHED CANVAS AND DUCK

Recommended for applications where electrical insulation is subject to severe mechanical strain and abuse. Widely used as phase insulation in rotating machines. These high strength fabrics are coated with the same high grade varnishes as Natvar varnished cambric. Full width rolls, 25 yd. and 50 yd.; sheets 36" x 36" and 24" x 36", standard; other lengths and sizes on special order.

VARNISHED SILK

Thin, high dielectric strength insulation with great flexibility and mechanical strength. Particularly applicable to relays, magnetos and other components used in airborne equipment, where space and weight are important considerations. Available in yellow only; finish, dry. Full width rolls, 25 yd. and 50 yd.; tapes, 25 yd. and 50 yd.; bias cut strips approximately 51 in.; standard; other lengths on special order.

VARNISHED RAYON

Developed as an alternate for varnished silk, and used in substantially the same applications. High tensile and dielectric strength with exceptional smoothness. Available in yellow only; finish, dry. Full width rolls, 25 yd. and 50 yd.; tapes, 25 yd. and 50 yd.; bias cut strips approximately 51 in.; standard; other lengths on special order.

VARNISHED FIBERGLAS

Class B insulation (130°C) used primarily to insulate equipment which operates at temperatures above the normal safe working range of varnished cambric. Permits higher current densities with consequent reduction in size and weight. Has great mechanical strength and excellent dielectric properties. Available in standard weave or open-weave; yellow or black; in all standard commercial sizes and thicknesses; standard finish, dry; mica-dusted on specification. Full width rolls, 25 yd. and 50 yd.; sheets, 36" x 36" and 24" x 36"; tapes, 36 yd. and 72 yd.; standard; other lengths and sizes on special order.

SILICONE COATED FIBERGLAS

Class H insulation (180°C) used wherever reduction of size and weight are vitally important. Retains its excellent mechanical and dielectric properties at higher temperatures. Full width rolls, 25 yd. and 50 yd.; tapes, 36 yd. and 72 yd.; standard; other lengths on special order.

VARNISHED PAPERS

Chemically inert rope and kraft stocks selected for uniform thickness, tensile and dielectric strength and coated with highest grade electrical varnish. Yellow varnished condenser type tissues, single or multiple ply; yellow or black varnished heavy papers, single ply. Full width rolls, single ply, 25 yd. and 50 yd.; multiple ply, 25 yd.; sheets, 36" x 36" and 24" x 36"; tapes, 36 yd. and 72 yd., standard; other sizes and lengths on special order.

COMBINATION INSULATIONS

Slot cell insulation is a combination of 100% rag paper stock cemented to a layer of varnished cambric, either straight or bias cut. The high dielectric strength and moisture resistance of Natvar varnished cambric with the toughness and abrasion resistance of rag paper make a slot cell for which will withstand pounding and chafing without impairment of electrical properties. Available in black and yellow; full width rolls, 25 yd. and 50 yd.; sheets, 36" x 36" and 24" x 36", standard; other lengths and sizes on special order.

Aboglas® insulation is a new class B insulation (130°C) consisting of a layer of varnish saturated asbestos paper sandwiched and securely bonded between two layers of varnished open-weave Fiberglas. It is less expensive than mica combinations and does not flake. Excellent resistance to down even under extreme heat, moisture, abrasive dust, oil and grease. Standard sheets approximately 36" x 36"; other sizes on special order.

Other duplex and triplex composite insulations such as silicone coated Fiberglas, Quinorgo, Mylar, etc. are also available.

FLEXIBLE TUBING AND SLEEVING VARNISHED OR LACQUERED

Electrical grade rayon (class A) or Fiberglas (class B) braid coated and saturated with high grade electrical varnish or lacquer. Available in NEMA grades and standard A.S.T.M. sizes. Wide range of vivid color coding. Standard lengths, 36"; sizes #20 to #10 available in 50 ft. spools in lacquered only. Cut pieces 3/8" or longer furnished on specification.

EXTRUDED PLASTIC TUBING AND TAPE

NATVAR 400 VINYL TUBING AND TAPE

Natvar 400, for applications requiring high resistance to both heat and oil, is approved by Underwriters' Laboratories for continuous operation at temperatures of 105°C. It remains flexible under continuous operation immersed in hot oil. It is a well balanced plastic that is tough, flexible, resistant to abrasion and tear, inert and resistant to ozone, waxes, alkalis, acids and most solvents. Available in transparent, opaque white, yellow, red, green, blue, brown, and gray. Tubing is available in sizes #24 to #15 in 500 ft. spools; #14 to 1/2" in 100 ft. coils; 9/16" to 1/2" in 50 ft. coils; 1 1/2" and larger in 25 ft. coils; cut pieces 3/8" or longer on specification. Tapes, standard length, 36 yd.; standard color, black.

NATVAR 200 VINYL TUBING

Natvar 200 is a general purpose tubing with excellent flexibility throughout a temperature range of -40°C to +85°C. Will not support combustion. Shows no disintegration or flaking when immersed in oil. In general the same inherent characteristics as Natvar 400, but slightly higher tensile strength, averaging 3600 p.s.i. Stocked in same lengths and colors as Natvar 400. Cut pieces 3/8" or longer furnished on specification.

NATVAR STYROFLEX® FILM

Specially processed flexible polystyrene film developed for insulation of UHF coaxial cables and capacitors. Excellent mechanical and electrical properties. Available in thicknesses .0004" and thicker in precision cut tapes up to approximately 10" width.

EXTRUDED PRINTED MARKERS

Printed with indelible vinyl ink on Natvar extruded tubing cut to standard lengths. All combinations of letters, numbers, and symbols available for identification of circuits, terminals, airplane electrical systems, etc. Full color range for coding.

SPECIAL PRODUCTS

In addition to Natvar standard products, there are many Natvar products developed for a special application. These materials, now in full production, are available on special orders.

Where specifications call for materials with special mechanical or electrical characteristics, check with our representative in your area, or write with us. If the materials you are looking for are not already in production, our engineers will be glad to work with your engineers to provide a practical answer.

RF POWER AND VSWR MEASURING EQUIPMENT

MicroMatch precision equipment for monitoring coaxial lines can be incorporated directly into transmitters or supplied as independent test instruments. Models are available for measuring RF power and VSWR at frequencies from 500 kc to 4000 mc at power levels from 10 milliwatts to 120 kilowatts.

In use throughout the electronics industry, M. C. Jones test equipment has gained wide acceptance for its accuracy and reliability among transmitter manufacturers, FM and television stations, network broadcasters, research laboratories, mobile communication agencies and the armed services. The M. C. Jones line includes:

- DIRECTIONAL COUPLERS • STATION GUARDIANS FOR TRANSMITTER PROTECTION • RF LOAD RESISTORS
- RF POWER AND VSWR INSTRUMENTS • ABSORPTION-TYPE RF WATTMETERS • PRIMARY STANDARD RF POWER MEASURING INSTRUMENTS

FULLY DESCRIPTIVE LITERATURE

BOGART

MANUFACTURING CORPORATION

Producers of Microwave Equipment Since 1942

THE BOGART TYPE 4428X WAVEGUIDE SWITCH IS A SIMPLE SPDT DEVICE IN RG-52/U WAVEGUIDE.

ESPECIALLY DESIGNED FOR UNIVERSAL SWITCHING APPLICATION. THIS PRESSURIZED UNIT IS COMPACT YET RUGGED AND IS SUITABLE FOR BOTH HIGH AND LOW POWER PURPOSES. VSWR IS LESS THAN 1.10 FROM 8.2—10.0 KMC/S. A SPECIAL COPLANER CONSTRUCTION PERMITS EASY ATTACHMENT OF ADAPTER ARMS (ONE OF WHICH IS SHOWN BELOW) FOR ANY WAVEGUIDE CONFIGURATION. SOLENOID EXCITATION IS AUTOMATICALLY REMOVED AT THE END OF THE SWITCHING CYCLE AND POSITIVE LOCKING IS SECURED BY MECHANICAL MEANS. TYPICAL ENGINEERING SPECIFICATIONS INCLUDE:

| | |
|-----------------|----------------|
| VSWR | 1.10 |
| ISOLATION | > 60 DB |
| FREQUENCY | |
| | 8.2—10.0 KMC/S |

YOUR INQUIRY IS CORDIALLY INVITED. OUR ENGINEERING STAFF IS PREPARED TO CONSIDER YOUR SPECIAL PROBLEM IN ANY WAVEGUIDE SIZE. MODELS 4426C (RG-50/U) AND 4421S (RG-48/U) WILL SOON BE AVAILABLE.

CONNECTIONS**

DEPENDABLE . . . DURABLE . . . EFFICIENT. Since 1894 American Beauty Electric Soldering Irons have been the standard for performance for all soldering irons.

NOW . . . American Beauty gives you precision production soldering with the new BANTAM—a light, sturdy, quick-heating soldering iron with small-diameter tip.

HEAVY-DUTY ELEMENT-IN-TIP—3438

A different, more efficient electric soldering iron than any on the market. An iron designed especially for heavy-duty or production-line use. It embodies a new type of heat application with the element permanently-embedded in the tip.

TEMPERATURE REGULATING STAND 475

Set the thermostat at the desired temperature—your iron will be ready to use without waiting.

ULTRASONIC SOLID DELAY LINES

Research and development applications for particular customers in computer and test work, etc., Standard units are now available in fused quartz and zero temperature coefficient glasses. Containers meet all applicable JAN Specifications.

500 usec unit—Model 15MS-11-31
one of our special light weight items.

Performance specifications:

Insertion loss—into 1000 ohms... 39 db
Center Frequency... 30 MC
Bandwidth to 3 db points... 14 MC
Capacity at terminals... 25 uufd
Longest secondary level below main delay in pass band... over 40 db
Ripples in pass band (peak to peak)... less than 1/2 db
Weight complete with base... 214 grams
Delay line element... 40 grams
Temp. Range... -40 to +90°C.

Unit is also available in hermetically sealed and evacuated case.

Problems in ultrasonic applications and equipment can be readily handled by our members of which have been engaged in work since 1943. Please write for literature.

ELECTRONICS BUYERS' GUIDE

ABP

8 sizes to meet circuit requirements of high stability, accuracy & low cost

Electra carbon coat resistors provide the precision, stability and accuracy to meet a variety of applications and requirements in advanced electronic circuits. Electra offers the benefits of low voltage coefficient, low capacitive and inductive characteristics in high frequency applications, in addition to small physical size and economy.

STABILITY — regardless of resistance tolerance all Electra deposited carbon resistors are equally high in stability.

ACCURACY — $\pm 1\%$ is standard but resistance value tolerances of $\pm 2\%$, $\pm 5\%$ and $\pm 10\%$ are available.

ECONOMY — When the advantages of stability, accuracy and small physical size are considered, Electra resistors are your most economical buy.

| PART NUMBER | Wattage | Maximum Rated Voltage | Resist. Range | DIMENSIONS | |
|-------------|---------|-----------------------|------------------------------|------------|--------|
| | | | | Length A | Dia. B |
| DC-1/4 | .125 | 250 | 4 Ω 250 K Ω | 9/32" | 5/64" |
| DC-1/4 | .25 | 300 | 5 Ω 1 Megs | 17/32" | 3/32" |
| DC-1/2 | .5 | 500 | 6 Ω 5 Megs | 13/16" | 11/64" |
| DC-1/4A | .5 | 350 | 3 Ω 2.2 Megs | 19/32" | 11/64" |
| DC-1/2B | .5 | 500 | 3 Ω 5 Megs | 11/16" | 15/64" |
| DC-1/2C | .5 | 350 | 2 Ω 1.1 Megs | 15/32" | 11/64" |
| DC-1 | 1 | 500 | 3 Ω 10 Megs | 15/16" | 9/32" |
| DC-2 | 2 | 1000 | 10 Ω 50 Megs | 2 1/16" | 9/32" |

* Lead Length C—Lengths of leads for all resistors shown above are 1 1/2 inches.

Hermetically Sealed Resistors Are Available in 6 Sizes From 1/4 Watt to 2 Watts.

TIME DELAY GENERATORS:

Each provides accurate and variable time intervals in several ranges. They feature low jitter, linear scales, high stability, 1,000-division dials, small repetition rate effects.

MODEL A-2

TIME DELAY GENERATOR

Time delays from 1 μ s to 100,000 μ s in 5 ranges. Short term accuracy of .1%. Blocking oscillator and wide output pulses. Jitter: .008%. Built-in calibration indicator. May be time modulated by external voltage. 8 $\frac{3}{4}$ " x 19" rack panel.

MODEL A-4

TIME DELAY GENERATOR

Time delays from 10 μ s to 10 seconds. Built-in repetition rate oscillator from .1 cps to 1,000 cps. Other features same as Model A-2.

MODEL A-5

TIME DELAY GENERATOR

Time delays from 1 μ s to 1,000 μ s in 3 ranges. Blocking oscillator output. Small size.

Rutherford makes PRECISION PULSE FORMING and TIMING EQUIPMENT

MODEL B-2

PULSE GENERATOR

A general purpose instrument with pulse widths from .2 μ s to 1,000 μ s. Internal repetition rates from 10 cps to 100 KC. May be externally triggered from 0 cps to 100 KC. Internal delays from 0 to 10,000 μ s. Positive or negative pulses. 14" x 19" rack panel.

MODEL D-2

PULSE TRAIN CALIBRATOR

For the generation of accurately timed pulse trains with spacings from 10 μ s to 200,000 μ s. Low phase lag between various repetition rates. Many different rates simultaneously available. 8 $\frac{3}{4}$ " x 19" rack panel.

MODEL G-1 PULSE and SQUARE WAVE OSCILLATOR

A source of pulses with accurate, continuously variable repetition rates. 100 KC to 1 cps in 5 ranges. Positive and negative pulse output .2 μ s wide, 30 V amplitude. 75 V square wave. May be frequency modulated by an external control voltage. Linear voltage to frequency transfer characteristic.

I'm continually amazed

at how BC Disc Hi-Kaps[®] solve space and design problems

Centralab BC Disc Hi-Kaps can amaze you too — Here's why —

- BC Discs are small in size, cut the third dimension (thickness) to a minimum. (5/32" thin.)
- Stable power factor — Initial, 1.5% at 1 KC.
- High Insulation Resistance—10,000 Megohms.
- Safe Rated Voltages — Rated at 500 VDCW, but tested continuously at 1,250 VDCW. High voltage types to 6000 VDCW available.
- Wide range of capacities — 10mmf to 20,000-mmf.
- No "intermittents" — Positive high temperature bond between ceramic and silver guarantees no movements, plus sure electrical contact.

CENTRALAB BC Discs are so small that 25 of them occupy the space of one cigarette.

CENTRALAB knows the ceramic capacitor field better than any other supplier...

- CRL introduced ceramic capacitors in the U.S. many years before any other supplier entered the field.
- Centralab manufactures from basic powders to finished product right in its own plant . . . complete laboratory control over every step in the process.
- CRL has the largest staff of development engineers of any comparable company . . . over 150 men available for consultation on your capacitor problems.
- CRL's many plants are highly mechanized for efficient, quality manufacture, and located strategically for best delivery.

Write now for Bulletin 42-4.

Advertisers:

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications — a matter of a few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history — the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Ask them to show you what your potentials can be.

Advanced Techniques and Devices for Better Design, Increased Output at Lower Cost

Micro-Processing is an advanced technique, exclusively developed by Instrument Specialties Co., Inc., which permits greater design latitude—because the springs are tempered after forming. Combined with the extraordinary spring properties of beryllium copper, M/P assures an excellent high degree of uniformity. In comparison with conventionally-made springs, M/P has shown M/P to be 2 to 10 times more accurate. With this exclusive technique, we consistently predict and rigidly control—the critical shapes, dimensions and elastic properties demanded for your specific application.

Wide ranges of applications by leading manufacturers of electronic and electrical equipment have proven the value—of both time and actual cost—obtained through using Micro-Processed beryllium copper

Quality-Control

To assure the high standards of uniformity set for all I-S springs, each beryllium copper strip and wire is laboratory tested and certified before shipping. Rigid inspection procedures are maintained at every phase of processing and fabrication.

Engineering Service

Our specialized experience and the depth of our engineering staff is at your disposal on any problem of spring design. Often you can affect a considerable economy through our Micro-Processed spring fabrication. Then, our vast experience in limitations of material properties in spring design helps you meet your production needs. There is no cost or obligation for this service.

Short Run Service

For prompt model testing, "small-fry" quantities. You can easily and economically check your design performance with regular production line quantities of beryllium copper—without the expense of regular production quantities without resorting to inaccurate prototype springs.

Our Short Run service was organically developed to handle small quantities of springs at low cost—on springs specifically to your own design. We offer this service—it's prompt and economical.

Instrument Specialties Co., Inc.—258-D Bergen Blvd., Little Falls, N. J.

■ ENGINEER'S MICROWAVE KIT . . . saves time and money in development work. Contains 9 beryllium copper, jig-hardened circular contact rings and 6 finger contact strips.

Micro-Processed* Beryllium Copper Springs to help solve your radio-electronic problems

■ FINGER CONTACT STRIPS . . . for electronic equipment—available in a variety of contours without tool cost. Length—width—mounting holes—and finish optional. For information—Write for Bulletin B-52.

■ CONTACT RINGS . . . standard—and made to order. Truly circular—to insure equal pressure from all fingers. For information—write for Bulletins C-52 and D-52.

■ COIL SPRINGS . . . the finest available combination of high strength and uniformity. Made to your specifications.

RMB

MINIATURE BEARINGS

WITH *Big Bearing* CONSTRUCTION

When you use RMB miniatures in instruments and small mechanisms, you get engineering features which you expect to find only in anti-friction bearings of much larger size. For example, RMB Type RF FILMOSEAL bearing (illustrated) available in sizes from .1969" OD, including the popular R2 size (.375" OD—.125" Bore), has these important design details:

- A—Deep groove races, uninterrupted by filling slot
- B—Balanced two-piece or snap-type ball retainer
- C—Non-rubbing capillary oil seal
- D—Dust shield
- E—Precision tolerances

In the manufacture of all RMB bearings, no matter how small, there is never any compromise with the principles of good bearing design.

Over 250 RMB
Types and Sizes

PIVOT Self-aligning

The simplest and most compact of the miniature types. Use them where size, weight and cost must be kept low, yet where you want the low friction and greater endurance of a ball bearing. Typical applications: Meter movements, small gear trains, lever pivots. Sizes: From .043" to .423" O.D.

ANGULAR CONTACT Self-aligning with inner race

Similar in capacity and application to the pivot types, but somewhat easier to install because they take cylindrical shafts. These types, as well as the pivot types, are self-aligning, will carry thrust and radial loads. Sizes: From .157" to .787" O.D.

RADIAL Without inner race

Particularly useful where loads are relatively light, low starting torque and high shock and wear resistance are important. Typical applications: Pivots for balance arms; shaft supports in control and recording mechanisms. Sizes: From .1181" to .4724" O.D.

RADIAL Deep Groove with inner race

These Conrad type precision ball bearings, with deep groove design and balanced ball retainer, provide maximum load capacity, high running speeds, long life. Typical applications: Small motors, sound recorders, computers, potentiometers. Sizes: From .1181" to .8661" O.D.

OTHER TYPES

ROLLER BEARINGS AS SMALL AS 0.4724" OD AND MANY SPECIAL TYPES AND DESIGNS NOT SHOWN HERE ARE ALSO AVAILABLE IN A WIDE RANGE OF SIZES. WRITE FOR COMPLETE

ONE SOURCE

for every Wire and Cable requirement

Electronic and Communication...
Electrical and Industrial...
in every field U.S. Wire and Cable plays an active part as a dependable manufacturer. Products of our new enlarged factory surpass all standard field and laboratory tests. Of our extensive line, the items shown here are only representative. We invite your inquiries for our Catalogue and further information.

HIGH FREQUENCY COAXIAL CABLES: These cables not only conform to, but in most cases surpass, JAN-C-17-A specifications for RG type cables. Our continual laboratory tests assure you that these cables will exceed your requirements in the Electrical, Electronic, and Industrial uses to which they will be applied.

INSTRUMENT and RADIO HOOK-UP WIRES: Furnished with Nylon, Polyethylene, Vinyl or other types of plastic insulation, or without jacket. UNDERWRITERS' LABORATORIES approved, these wires are used for Control Wiring, Automatic Dispens-

ing Machines, and in Radio & TV Equipment.

MICROPHONE and INTERCOM CABLES: A complete selection of Shielded and Unshielded types which can be used for Lead-in, Phono Pick Ups, Speaker Installations, and Public Address purposes in the Radio industry.

TV ANTENNA WIRES: Designed in all shapes (Flat, Round, Twin Leads, Tubular) to fulfill the requirements of Television, Mobile Communications, UHF, VHF, Community Antenna Systems, Antenna Rotor Leads, and other Electronic purposes.

Waveguides?

The F. C. Kent Company has long been recognized as the outstanding source for formed waveguides in the country. If you have requirements for bent and formed waveguide sections — waveguides with as many as seven or eight different bends in one continuous section of tubing—in different planes and with sharp radii; if your assemblies call for waveguide tubing to be twisted, offset, tapered, expanded or call for a transition from rectangular to round; then we wish to bring to your attention our exceptional ability as specialists in bending and forming waveguide tubing in all sizes.

TOGGLE SWITCHES FOR JAN-S-23

J-B-T now manufactures toggle switches of the
quality required by Specifications JAN-S-23 and
MIL-S-6745. The complete series ST-40 and ST-50
with screw terminals, and ST-42 and ST-52 (with
solder lugs) are available. Solid silver contacts
and rocker arms, rugged construction, and a
tested combination of lubricant, plating and
materials enable these switches to exceed many
of the requirements. Ask for Bulletin TS-4. A
convenient adhesive-backed list of Preferred
Types (PPL-23-ST) also will be sent upon request.

Smaller, lower capacity toggle switches, such as
ST-12, -13, -22, -23, -26 and -27, also designed
for JAN-S-23 will be released for sale in the
third quarter of 1954. Your inquiries are invited.

MOLDED ROTARY SWITCHES

Shorting and Non-Short-
ing... 14 or 20 Positions
... 1 to 6 Decks.

All moving contacts en-
closed — eliminates dirt
and corrosion... contact
lugs permanently inter-
grated into switch
assembly... sturdy con-
struction with 3-post

Model MS-14-2

deck suspension, double-grip collector arms, and
rectangular drive shaft through decks for pre-
cision indexing... interchangeable, electrically
and mechanically with J-B-T Series SS-14 and
20 position Laminated Switches.

Carrying capacity (not make-and-break): 1 amp.;
maximum momentary, normal 5 amp.; maximum
voltage between contacts and ground, 1000
volts R.M.S.; between decks and ground, 2000
volts R.M.S. Average contact resistance 0.007
ohms or less. Also available in 6-pole per deck
double throw construction.

LAMINATED ROTARY SWITCHES

Used widely in quality
test equipment, portable
instruments, inspection
setups and avionics
where trouble-free, de-
pendable performance
counts. Two basic types
— 14 pos. (2" dia.) or 20
pos. (2 3/32" dia.) give
extra contacts in mini-
mum space. One to six decks. Model SS-14-2

Model SS-14-2

LEVER ACTION SWITCHES

Excellent for test equip-
ment and communica-
tions systems, these
switches use the same
high quality parts as
the SS-14 series. Bracket
mounting holes 1 5/8"
apart; single deck types
may be mounted in
groups 3/4" between
centers; two-deck types, 1 1/8" between centers.

Model SS-14-114

Complete Line of Ovens for Housing any Type of Crystal or Component

—Featuring—

- Stability less than 1°C
- Wide range of operating temperatures and voltages
- Low power consumption
- Fast stabilization
- Hermetic sealing

Specifications

Operating temperatures 50°C to 120°C
 Stability ±1°C to ±3°C
 Input voltages 6 to 110 VAC or DC
 Power consumption 1 to 30 watts
 Stabilization time 5 to 30 minutes

Type CO-10
 For crystals in
 HC-6/U holders

Specify CO-14 for crystals in HC-13/U holders
 CO-15 for crystals in HC-5/U holders
 CO-16 for crystals in HC-15/U holders

BOYLE METALCRAFT CORP.

Manufacturers of Sheet Metal Products Since 1925

154 SULLIVAN STREET, BROOKLYN 31, NEW YORK

DATA-HANDLING COMPONENTS BY EPSCO

These components are units having unusual characteristics intended for application in systems where reliability is of primary importance. Every unit is taken in the manufacturing process to insure that each unit meets or exceeds its electrical and mechanical specifications.

MAGNETIC CORE STORAGE ELEMENTS

Capable of operating at exceptional high rates of data transmission with unusually low power requirements. May be used as shift registers control elements and storage elements at megacycle pulse rates.

MAGNETIC RECORDING HEADS

Regularly designed for magnetic drum recording systems Epsco recording heads are low cost units which may be advantageously applied wherever gaps of 1 mil or greater are desired.

PULSE & VIDEO TRANSFORMERS

Complete line of miniature encapsulated and hermetically sealed pulse transformers available in a wide variety of turns ratios characteristic-impedance levels, etc. Standard units available from stock—Rapid delivery can be made on both sample orders for test units and subsequent production. Unusual uniformity and temperature stability. Extremely large ratios of droop time to rise time (i.e. extremely wide bandwidth; on the order of 3000:1).

LUMPED-CONSTANT DELAY LINES

Exceptionally high delay to rise time ratios and exceptionally low attenuation—adjusted to customer specification. Units exhibit less than 0.3% change in total delay over the temperature range -65°C to +150°C.

DISTRIBUTED CONSTANT DELAY LINES

Stable miniature units having exceptional delay to rise time ratios and uniformity from unit to unit.

OMNI and LOCALIZER RECEIVERS

A.R.C. Type H-14 Signal Generator

For a quick and accurate check by pilot before take-off, or for maintenance on the bench, this is the favored and dependable instrument. Checks up to 24 omni courses, omni course sensitivity, to-from and flag-alarm operation, and left-center-right on localizer. For ramp check, RF output 1 volt into 52 ohm line; for bench checks, 0-10,000 microvolts.

The H-16 Standard Course Checker is a companion instrument to the H-14. It makes possible a precise check on the course-accuracy of the H-14 or of any other omni signal generator. Just as a frequency meter is necessary in connection with a variable frequency signal generator, the H-16 Standard Course Checker is required in connection with a VOR signal generator for a precise measurement of phase accuracy.

These instruments sold only direct from factory.

JAN MUMETAL and NICOLOI CATHODE RAY TUBE SHIELDS

FOR BETTER PERFORMANCE!

- Protects C.R.T. from external magnetic fields.
- Protects personnel against accidental tube breakage.
- Available for most types, 2", 3" and 5" tubes.
- Rigid front panel mounting.
- Tube clamp provided for all types of C.R. tubes.

JAN's CRT Shields, made of the finest grades of magnetic metals and scientifically annealed prevent distortion and intensity modulation of the electron beam due to stray magnetic fields.

These shields are designed for universal application and are specifically adaptable to JAN's bezels and shock mounts.

THE Elusive Electron

He's our benefactor . . . our servant . . . and our master, all in one. He works constantly, and seems to have unlimited powers. But, he's elusive. If conditions do not suit him, he becomes "lazy" or slips away completely.

Giant industries have originated because of him. One of these industries makes coils and transformers in which our friend lives and works. Hartford City Paper Company produces electrical papers used by many manufacturers for layer insulation, caliper .0005 and up in three finishes. They prefer Hartford's electrical papers because they cost less, and yet make the elusive electron perform at his peak.

If you make coils, condensers or transformers, you should know more about layer insulation paper. Write for samples, data sheets, and price lists.

COMPLETE LINE

RESISTANCE SOLDERING DEVICES

Production engineers recognize the resistance soldering principle as a practical answer to heavy duty and production-line soldering problems. Initial costs are offset by immediate savings in time, material, and from increased production and efficiency. When confronted by production-line soldering problems, consider employing resistance soldering in your plant!

- faster—production increased 3 to 5 times
- economical—no wasted solder, flux or power
- safe—no burn, shock or visual arc hazard
- efficient—instantaneous, controlled heat for all types of soldered joints

Advertisers

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications—a matter of a few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history—the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Ask them to show you what your potentials can be.

aircraft wire-wound trimmer potentiometers

Micro-miniature Series AP 1/2

- Two watts continuous at 80° C.
- Resistances from 10 to 20,000 ohms.
- Diameter 1/2 inch, depth 1/2 inch.
- Temperature coefficient 0.00002/degree C.
- Weight 1/4 ounce.
- Sealed well enough to permit potting.

Series AP 1 1/8

- Four watts continuous at 80° C.
- Resistances from 10 to 100,000 ohms.
- Diameter 1 1/8 inch, depth 1/2 inch.
- Weight less than 3/4 ounce.
- Temperature coefficient 0.00002/degree C.

Ohm potentiometers are individually checked through a production quality-control system that guarantees you full performance from every unit in your order.

Write for full details and prices.

HEAR and NON-LINEAR

wire-wound potentiometers

RT-7/8 and RTS-7/8 — LINEAR

- Precision wire-wound construction.
- Three watts continuous, at 80° C.
- Resistances from 10 ohms to 50,000 ohms.
- Diameter 7/8", depth 3/8"
- Weight 1/2-ounce per unit — ganging easily provided.
- Temperature coefficient of resistance 0.00002 part per degree C.

FUNCTIONAL—sine, exponential, one- or two-sided square law.

Series RT-2

- Six watts continuous at 80° C.
- Resistances from 10 ohms to 250,000 ohms.
- Diameter 2", depth 1-1/32"
- Temperature coefficient of resistance 0.00002 part per degree C.

Series RT-3

- Nine watts continuous at 80° C.
- Resistances from 10 ohms to 500,000 ohms.
- Diameter 3", depth 1 1/4"
- Temperature coefficient of resistance 0.00002 part per degree C.

potentiometers are individually checked through a production quality control system that guarantees you full performance from EVERY unit in your order.

INCREMENTAL INDUCTANCE

quickly
simply
accurately

The new Type 1002-A Incremental Inductance Bridge combines outstanding features of compactness, ease of operation, accuracy, and wide range of measurement. A visual balance indicator allows measurements to be made in a few seconds even in noisy locations. Maximum sensitivity at the balance point greatly improves the accuracy of balance. Only a single balance control is used, with crt indication.

Inductance range is from one to 200 henries. Direct current through the reactor under test is accurately controllable from one to 500 milliamperes, limited only by the resistance of the coil windings. The effect of a change of dc on the inductance value is immediately measurable, by simple re-balancing. The inductance is measured at a constant frequency of 120 cps.

For design and test work on iron-core inductors, transformers, filter chokes, and plate reactors, this compact self-contained instrument is unsurpassed.

Write today for technical details and price information.

ENCAPSULATION

... for the most exacting requirements electronic industry.

Impervious to climatic destruction — great mechanical strength—improved appearance—reduction in size and weight—tamper proof—are but a few of the advantages of this COSTLY, modern method of HERMETIC ENCAPSULATION, adaptable to the smallest component to the largest assembly.

Our engineers will be pleased to discuss your requirements with you—and embed or encapsulate samples to your requirements. Write, or phone today.

* Fosterite-Permafil-Scotchcast-Acme-Araldite-Hysol-Epon-Paraplex-Styc and many others.

YOU CAN

Solve THESE PROBLEMS in PLASTIC

Parisian Novelty Company supplies immense quantities of printed and fabricated plastic sheets, rods and tubes for hundreds of industrial and military applications all over the world.

- ★ **DIALS and DIAL CRYSTALS**
at their best when made of plastics by Parisian. All sizes and shapes. Accurately calibrated.
- ★ **IDENTIFICATION BADGES and Pass Holders**
All styles available. Tamper-proof, dirt resistant, long lasting. Your employees will be proud to wear them.
- ★ **INSTRUCTION and NAME PLATES**
Durable, soil proof, easy to read, and excellent appearance. Our plastic does not shrink, stretch or warp.
- ★ **SCHEMATICS and CHARTS**
Plastics are ideal for diagrams, charts and schematics. Resistant to wear, grease stains and corrosion. Non inflammable.
- ★ **INSULATED SPEAKER MOUNTING SCREENS**
Insulated and plastic covered ornamental screens approved by Underwriters Laboratories.

Present your plans and problems to us for prompt analysis, suggestions and prices.

DAPLUG CONNECTING LEADS

- ① (1) Self-wiping action insures contact resistance of less than 0.001 ohm
- ② (2) Spring-loaded pressure bar provides contact pressure without wear on spring element and compensates for wide variation in hole diameter found in commercial terminals
- ③ (3) Instant unlimited multiple connections at any plug body
- ④ (4) Four standard lengths—(others to specifications) in red or black

Reduces equipment setup time

Outlasts homemade leads 4 or 5 times and therefore costs less than homemade leads; tough polyvinyl insulation on highly flexible stranded wire; integrally molded in high voltage plastic—resists failure due to flexing at junction of wire and plug body; fits standard terminal posts, jacks, alligator clips and spade lugs. Needs no special adapters for most connections.

TEST EQUIPMENT

REGULATED POWER SUPPLIES include the versatile "600" series featuring multiple combinations of output voltages from single package. Regulation accuracy $\frac{1}{2}\%$ with provision for adjusting to $\frac{1}{10}\%$ for many conditions. The line includes several models each covering wide range of laboratory requirements. Also available the "400" series unitized supplies ideal for systems development and ruggedized for operation from 400 cycles power in airborne operation.

MODEL 101 ELECTRONIC LOAD is a device designed for laboratory or production testing of regulated power supplies. It provides a fast, convenient means of measuring impedance, transient response or life testing regulated power supplies under actual operating conditions. Power handling capability, 20-700 volts at currents up to 500 MA.

AUTOMATIC SOUND LEVEL RECORDER Model 6754 is a completely automatic instrument designed for airborne measurements of sound pressure levels. It will record in sequence sound levels in each of several octave wide frequency bands. Range is from 40 to 200 db over a frequency range of 30 to 10,000 cycles.

REACTOR REGULATED POWER SUPPLIES (High current) are available to customer specification. Low output impedance and low internal operating temperatures make these supplies particularly suitable for pulse and computer applications. Up to seven output voltages, regulation to 1% and ratings up to 400 VDC at 1 ampere can be furnished.

PRECISION TIME BASE CALIBRATOR Model 531 is an extremely accurate stable self-calibrating dc generator. Designed for base measurements involving linearity, pulse width, delay and as a generator of accurately timed pulses the calibrator is calibrated either microseconds or years. Accuracy as good as 0.01%.

HARMONIC SIGNAL SOURCE Model 5953 is a precise crystal controlled source of VHF power designed for X-band frequency measurements when used with a suitable harmonic generator. Power output adjustable to approximately 2 watts into 50 ohms at 245 mc. Frequency range from 200 to 250 mc. Provision is made for amplitude modulation of the RF signal by means of internal 1 mc sine wave oscillator.

GUN GAS DETECTOR Model GG/101 is designed primarily for the detection of explosive gun gases in aircraft but is adaptable for other combustible gases. Outstanding features include lightweight airborne package, extremely fast reaction time, high sensitivity, and complete alarm and control circuitry.

Components May Look Alike...

But some are standouts for performance!

Products may seem similar, but results often differ. Designed for performance and engineered for dependability, quality JOHNSON components are often the answer where other products fall short.

Examples of popular JOHNSON components are shown in the accompanying illustrations.

Miniature Capacitors—An original Johnson development, these miniature air variables are the smallest made. Rugged and dependable, they represent just one of the many types of quality variable capacitors designed by Johnson for virtually every electronic need.

Nylon Tip Jack—The finest insulated tip jack on the market today. Injection molded of tough, low loss nylon—silver plated contacts. Suited to coded application—available in 11 colors.

Pilot Lights—Shown here, the 1" and 1/2" enclosed types are just two samples from Johnson's complete line of Pilot Lights and Jewel Assemblies. Other types: Open, Variable Intensity, and UL Approved.

Tube Sockets—(4 pin Bayonets illustrated) A quality line of heavy duty steatite and porcelain sockets. Miniatures and Shields, Wafers, Bayonet, and Special Purpose types available.

Banana Plugs and Jacks—Skillfully machined and heavily plated, Johnson plugs and matching jacks are highly corrosion resistant. Studs extend full length for added strength—an industry favorite for years.

Knobs and Dials—A distinctive line of knobs and dials with that "custom look." 12 flutes instead of the usual quantity — provide comfortable touch, dial markings readily seen even under adverse lighting conditions. Made of tough, scratch resistant black phenolic.

Insulators—Strength when you need it—a line of low loss, high quality steatite and porcelain insulators. Standoff and feed-thru types as well as antenna strain insulators, feeder insulators and bushings.

Shaft Couplings—Designed for the most exacting application, no fatigue failure here. These flexible and fixed shaft couplings are capable of many thousands of operating cycles.

For complete information on all quality Johnson Products, write for your copy of the NEW General Products Catalog #975.

Selection of Tube Sockets Simplified!

Standardization saves time and extra expense!

These Johnson tube sockets do triple duty! Duty as Standard, Industrial, or Military models. Johnson's new tube socket standardization program now makes it possible to order special industrial and military sockets as well as standard commercial types from stock. Also, through standardization, small run set-up charges are avoided, and sockets ordered to special specifications can in many cases be furnished at lower cost by substituting an equal or higher quality socket from the standardized specifications listed below:

Standard: Commercial grade for general requirements. Bases, glazed porcelain or L4 steatite. Cushion washers, fungus resistant glass base melamine.

Industrial: Higher quality with glazed steatite bases, DC200 treated, phosphor bronze or beryllium copper contacts .0005 silver plated. Aluminum retaining shells or shields are Iridite #14 treated. Glass base melamine cushion washers, fungus resistant.

Military: Top quality to meet all military requirements. Bases L4 or better glazed steatite, DC200 treated. Phosphor bronze or beryllium copper contacts, heavy silver plated. Fungus resistant glass base melamine cushion washers. Solder terminal ends hot tin dipped. Retaining shell brass .0003 nickel plated. Aluminum shields or shield bases Iridite #14 treated. Threaded hardware .0002 nickel plated, unthreaded hardware .0003 nickel plated. Entire socket protected for 200 hour salt spray.

For further information on Johnson Tube Sockets, write for the new Johnson General Products Catalog #975.

DANIEL KONDAKJIAN TUNGSTEN LEADS—TUBES BASES

TUNGSTEN LEAD-IN WIRES

Quality leads make quality tubes . . . and for over 30 years The Engineering Co., under personal supervision of Daniel Kondakjian, has been making quality precision lead-in wires for vacuum tight seals, for lamps, radio tubes, electronic devices and other special applications. Precision machines, capable of holding these fine wires so that they are accurately located and carefully spaced, assure high operating efficiency and uniformity in the finished product.

Parts are made to customer's blue prints or specifications. Specializing in leads of tungsten, moly, nickel, nickel clad copper and copper alloys. Send us your blue prints or specifications. Kovar leads and stampings.

ELECTRON TUBE BASES

The quality and performance of electron tubes depend upon quality bases and caps. We make all types, including an all-glazed ceramic base. Our hydrogen-tube bases go up to 6.25 diameter. Precision equipment and careful inspection in our plant assure the finest quality in caps and bases. Our engineers will be happy to serve you in any problem.

REEVES

NEON

REEVES INSTRUMENT CORPORATION • 215 EAST 91st ST., NEW YORK 28, N. Y.

NEW ANALOG COMPUTER PACKAGING CONCEPT PERMITS MAXIMUM COMPONENT SELECTION

400 Series REAC® Expansion Consoles Combine Adaptability with Economy

Diode Function Generator, Diode Multiplier Recorder, Servo Voltmeter added to REAC Line

The Reeves Instrument Corporation assures its position of leadership in the field of analog computing equipment with the introduction of a new packaging concept, the Expansion Console of the Series 400 REAC. This year, Reeves also announces the addition of an all-electronic diode function generator, a square-law diode multiplier, a desk-mounted recorder and a servo voltmeter to its line of quality computing equipment. These units exemplify the high standards of accuracy, flexibility and adaptability which have already earned REAC equipment such a fine reputation.

The modular construction of the 400 Series REAC allows the types and quantities of components to be chosen so as to satisfy individual requirements. Not only is the initial size of the console variable but later expansion may be effected with great economy.

The new 400 Series REAC, shown above, represents an entirely new analog computer packaging concept which allows greater freedom in the choice of components and makes expansion economical.

MINIATURE FLOATED GYROS CONTROL, MEASURE MOTION

Reeves Instrument Corporation, long a quantity manufacturer of quality HIGU floated gyros, is now offering three new floated sensing devices of great accuracy, the 20 IG Floating Gyro, the 20 RG Rate Gyro and the 20 A Pendulum Accelerometer. Because the output gimbal of each of these devices is supported by the buoyancy of a fluid of its own density, friction is negligible. Thus accuracy is comparable to that of much larger units.

Though rugged enough to withstand government high-shock and vibration tests, each of the units weighs about one pound and is only two inches in diameter. The floating gyro is used to cause a structure to move at a commanded rate with respect to inertial space or in a system in which varying rates of rotation about a given axis must be mechanically integrated. It may also be used to stabilize the structure on which it is mounted with respect to inertial space and about a given input axis.

The rate gyro may be used in any system where the rate about a given axis must be measured.

The accelerometer may be used in any system where the acceleration in inertial space along a given axis must be measured.

Reeves also produces a variety of precision floated gyros in many sizes.

Six Channel Recorder

PRECISION INDUCTION RESOLVERS USEFUL FOR MANY APPLICATIONS

Reeves precision induction resolvers are employed as basic elements in analog computers, automatic control systems, angle data transmission systems and plan position indicating radars.

Miniature resolvers (equivalent to Navy frame size 15) are available for applications where compactness is essential. Standard resolvers (equivalent to Navy frame size 23) may also be ordered.

Standard production models of Reeves resolvers compute the sine of an angle with an accuracy of better than five parts in ten thousand and with an angular error of less than two minutes.

Reeves resolvers are described in detail in RICO Bulletin #57.

DIODE AUXILIARY UNITS

Among the nonlinear computing components which may be housed in the 400 Series REAC are the new diode function generator and diode multiplier. Both of these units are capable of high speed real time operation and neither employs any complicated circuit configurations requiring servicing by specialized personnel or involving high replacement costs. The function generator is capable of generating a function of two variables.

Both the multiplier and the function generator are available as separate four channel units with built-in power supplies.

SERVO VOLTMETER

A convenient accurate readout device which may be ordered either as a part of a 400 Series Console or as a separate unit is the Servo Voltmeter. The standard unit is provided with 100-volt and 200-volt scales. Accuracy is 0.025% while the dial reads directly to 0.01 volt.

SIX CHANNEL RECORDER

A new six channel recorder featuring automatic cycling may be ordered desk mounted, caster mounted or installed in a 400 Series Console. The automatic cycling provides sensitivity and offset traces prior to a run. From them, personnel studying the recording later will know immediately at what deflection sensitivity each of the channels was operated and what offset voltage, if any, was introduced to each channel.

OTHER REAC MODELS

In addition to the 400 Series, Reeves offers a wide variety of computer models. The desk-top 300 Series is ideal for small laboratories and for "on location" work. The 200 Series features single cabinets housing built-in power supplies, computing amplifiers and servos.

PROJECT CYCLONE

The REAC line of commercial computing equipment is the outgrowth of simulator development work done under contract to the Navy. Reeves is currently operating Project Cyclone, under the cognizance of the Bureau of Aeronautics. This activity, which is one of the largest analog computer installations in the world, uses essentially commercial REAC

STANDARD, MINIATURE BREADBOARD INSTRUMENTATION PARTS ECONOMICAL FOR BUILDING EXPERIMENTAL SERVOS, COMPUTERS

Reeves manufactures a complete line of precision breadboard parts for economical construction of experimental servos and computers. The line includes precision gears, mounting hangers, slotted mounting plates, etc. The use of this technique precision mechanical systems for building experimental models completely eliminates drafting and ma-

chine shop time and permits models to be modified quickly and inexpensively. Catalog RICO #10 gives a complete listing of standard (1/4" shaft) and miniature (1/8" shaft) sizes. The latter are ideal for applications where small size and light weight are important factors.

ELECTRON MICROSCOPE: System of four electrostatic and electromagnetic lenses insures extreme constancy of picture: resolution angstroms. Cold cathode gives infinite lifetime and protects against vacuum leaks. Three observation ports. Photographic recording. High vacuum pump eliminates heating and cooling system. No contamination of specimen. Automatic focusing control. Diffraction picture.

CATHODE RAY OSCILLOGRAPH: Single, double and quadruple beam.

ELECTRON DIFFRACTOGRAPH: Frequency to 50 mc.

PORTABLE MEASURING INSTRUMENTS: Electrostatic, electromagnetic, moving coil. Accuracy: 0.5% at 40-60 c.p.s. Voltmeters, ammeters, ohmmeters, microammeters, millivoltmeters. Variable frequency, and phase meters. Capacitance meters. Standard measuring bridges for resistances and capacities.

LABORATORY PRECISION INSTRUMENTS:

Galvanometers: Pointer, Mirror, Vibration.
Bridges: Thompson-Wheatstone, Wheatstone, Schering, Fault Detecting. Transformer measuring apparatus. High and medium frequency measuring instruments.

POWER SUPPLIES: Model PS-22 500-1500 volts at 1 m.a. Output voltage changes less than 0.05% from zero to full load. 0.10% change in input causes less than 0.03% output voltage change. Price \$195-\$215.

MODEL PS-22

Model PS-71 1000-5000 volts at 1 m.a. Price \$595-\$610.

VACUUM TUBE VOLTMETER: 50 millivolts full scale to 500 volts. All ranges. Input resistance 50 megohms all ranges. Accuracy: 3% of scale on all ranges.

SCIENTIFIC SPECIALTIES Corporation

IF YOU WANT TO . . .

have coils, condensers, resistors and all wiring at a fraction of their present cost, eliminate assembly errors, reduce size of product—THEN **CENTRONICS'**

PRINTED CIRCUITS (Using our own improved photo-etch process)

are for you.

KEEP AHEAD OF COMPETITION

More than likely your competitors may be contemplating using printed circuitry. In that case they will have the advantages of lower costs, smaller space and greater precision.

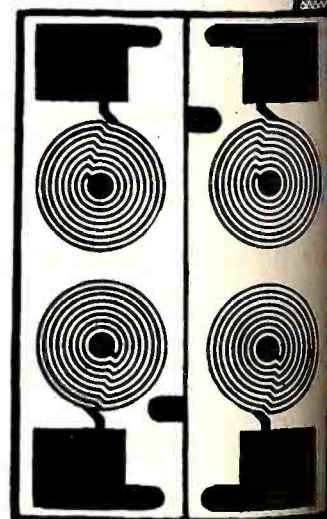

WHERE PRINTED CIRCUITS ARE BEING USED

In all phases of the electronic field. For instance TV I.F.'s, TV Tuners, UHF TV cross over networks, and switches. You can also replace the entire wiring of radios, TV sets and many other devices.

HOW TO OBTAIN MORE INFORMATION

Send for our brochure or ask for our sales engineer in your area to visit you to discuss your needs.

If you wish, send us a sketch or blue print of your product today. In return you will receive from us a sketch of your unit showing its appearance as a printed circuit and complete price quotations.

Are better than rubber
3 ways

ENGRAVED Vinylite IS ACID-PROOF

Acid etching inks, used for permanent
 stamping on metal and all non-porous
 surfaces will eat away at rubber. Vinylite
 resists this action . . . gives longer life
 by far.

**ENGRAVED Vinylite STAMP DIES GIVE
 RAZOR-SHARP IMPRESSIONS EVERY TIME**

Opaque inks will clog shallow rubber
 stamp faces rapidly. Our deep-molded
 engraved VINYLITE stamp faces have
 more than three times the depth of ordi-
 nary rubber stamps. Markings always re-
 main super sharp . . . the clearly identifying
 mark that distinguishes and labels your
 product of quality.

**ENGRAVED Vinylite STAMP DIES HAVE
 CUSHION-LIKE RESILIENCE**

Our VINYLITE molding process includes a
 timed curing that imparts to this versatile
 plastic all the elasticity of rubber. Resilient
 VINYLITE STAMP DIES resist abrasive
 action, conform to irregular surfaces . . .
 and last much longer!
 Engraved Vinylite Stamp Dies are adapt-
 able to any automatic or hand marking
 device. They can be used to stamp on
 every surface, metal, wood, fabric, paper,
 plastic, etc.

DOUGLAS MICROWAVE SPECIALISTS

SOME SPECIAL FEATURES OF A FEW OF OUR CATALOG ITEMS

Do you need a specialist for your MICROWAVE-
VAR "Plumbing" problems; or is your need for
ard or special test equipment? Design, Develop-
and Production of component parts and test equip-
in the frequency range of 1000-40,000 mcs. (and
r) is our specialty.

Our production facilities are available for "model
quantities or for large runs. We work to your
sketches or to your completely detailed drawings.

Our design facilities enable us to supply you with
pletely engineered unit for those cases where an
e drawing and specification list only are sent us.

Our requirements are engineered and manufac-
to the highest quality standards, whether the unit
ed is a simple transmission line or a complex
ed duplexer.

WE INVITE YOUR INQUIRIES.

*Our catalog, the most complete and compre-
ve in our field, is available upon request.*

MODEL 121 ATTENUATOR, FLAP

Features 270° knob rotation;
may be easily calibrated.

CRYSTAL DETECTOR MOUNT WAVEGUIDE - BROADBAND MODEL 160

Features double probe tuner to lower VSWR

DIRECTIONAL COUPLER UNI-DIRECTIONAL TUNABLE MODEL 172

Features sliding probe-on sidearm
for higher directivity

THERMISTOR MOUNT, 3/8 INCH LINE COAXIAL MODEL 360S

Features adjustable short for better match

TUNER, 3/8 INCH COAXIAL DOUBLE STUB MODEL 402

Features rotating knobs for finer tuning,
once adjusted does not shift under vibration.

Koiled Kords*

This is a KOILED KORD retracted

This is a KOILED KORD extended

KOILED KORDS are available on special order to your specifications in multi-conductor types up to 37 conductors, shielded if required. Stocked types include 2, 3, 4 and 5 conductor #23 AWG communications cords and 2, 3 and 4 conductor Underwriters' Laboratories approved SO, SJO and SV-neoprene jacketed power cords. KOILED KORDS can be supplied in 48 inch mandrel lengths or prepared into cord sets for attachment to equipment.

INFORMATION YOU SHOULD GIVE WHEN ORDERING KOILED KORDS

- Product on which retractile cord is to be used.
- Length and type of cord now being used.
- Appliance or equipment rating (if motor drive, give horsepower)
- Jacket material required: neoprene for resistance to oil, rubber for cold temperature uses.
- Number of conductors
- Gage and type of conductors — whether stranded copper or tinsel.
- Length to which cord should extend.
- Length of leads on each end
- Type of terminals or fittings on each end.
- Approximate annual requirements.
- When possible, enclose sample or drawing of cord to be duplicated.

WRITE FOR KOILED KORDS APPLICATION BULLETIN SHOWING MANY USES.

replacing GLASS with TEFLON

Chemelec Stand-Off and Feed-Through Insulators

● Tough, resilient **TEFLON** made these miniatures possible —and **BETTER**— than glass-insulated components.

COMPRESSION MOUNTING, without breakage.

WITHSTAND SHOCK and vibration in service.

NO ADDITIONAL HARDWARE NEEDED.

ASSEMBLY COSTS GREATLY REDUCED.

THE PLASTIC'S "MEMORY" securely locks insulators permanently in place. Minimum pull test 10 lbs., insulator to deck, hardware to insulator.

MINIATURIZATION is easily accomplished.

SEVEN STOCK SIZES, including sub-miniatures, in both Stand-Off and Feed-Through types. Other dimensions feasible.

WRITE for Chemelec Bulletin EC-1153.

Advertisers:

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications — a matter of a few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history — the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Ask them to show you what your potentials can be.

Chemelec Stand-Off and Feed-Through Insulators

● **TEFLON's** superior insulating characteristics made these miniatures possible—and **BETTER**—especially for high frequency, high voltage or current, high temperature service.

HIGHER surface and volume resistivity.

LOWER loss factor and dielectric constant.

HIGHER dielectric strength.

WIDER service temperature range (—110°F to +500°F).

ZERO water absorption (A.S.T.M. Test).

WON'T CARBONIZE under arcing.

WON'T DC-plate.

NON-FLAMMABLE, non-gassing, chemically inert.

INVESTIGATE Chemelec Stand-Off and Feed-Through Insulators for superior service and lower assembly costs.

SEVEN STOCK SIZES, including sub-miniatures. Other dimensions feasible.

WELDMATIC
Model 1015

ACCESSORY PLUG-IN

TWEezer-TYPE
HAND-PIECE

A major advance in precision metal joining

STORED-ENERGY WELDING SPEEDS ELECTRONIC ASSEMBLY

NEW METHOD

Welded electronic components and precision instruments (resistors, potentiometers, capacitors, transducers, etc.) show superior performance with lower production costs. All metals and most combinations joined in many shapes and thickness ratios. Milli-second weld-time permits precision welding of copper, silver, and other "difficult" materials.

STORED-ENERGY PRINCIPLE

Unitek Weldmatic equipment utilizes capacitor-discharge to make precision resistance welds. Energy stored is instantly adjustable over a very wide range to accommodate wires 0.0003 through 0.040 inch diameter and sheet metal 0.00005 to 0.020.

WELDMATIC FEATURES

Simple installation, rapid setup, versatility, easy operation, and low maintenance make the Model 1015 best for electronics assembly. Untrained operators make uniform, high-strength welds with no discoloration or deformation. Other models available for special jobs.

Write for descriptive brochure.

labor reduction in wiring — with this Centralab Printed Electronic Circuit Couplate †

- CRL PC-101 Vertical Integrator reduces wiring connections from 16 to 3.
- Four capacitors — four resistors in one package.
- PC-101 is in CRL stock for *IMMEDIATE DELIVERY* — as are 30 standard circuit couplates.
- CRL has over 150 specialized engineers for the design and development of P.E.C.'s. They can help *you* with your circuit problem.
- Hundreds of experienced production personnel and extensive, mechanized facilities produce your requirements whether hundreds or millions of couplates.
- Up to 29 different quality tests are made on each CRL Couplate before shipment.
- Centralab's experience in resistor, capacitor and ceramic materials goes back to 1923 — all these have contributed to the quality of Centralab P.E.C.'s.

Here are some of the reasons why Centralab is your only thoroughly experienced source for Printed Electronic Circuits.

- Centralab has more years of P.E.C.† engineering and production experience than any other supplier. (CRL pioneered Printed Electronic Circuits in the electronic industry.)

Write now! Before you turn the page. For Centralab's P.E.C. folder and customer specification sheets.

Centralab P.E.C.'s reduce time and cost of installation, stocking and paper work — give you consistent, accurate performance for 100 or 1,000,000 plates.

PIPELINE TO PRECISION

MODEL WWVR

A receiver of the instrument class which is setting a new standard for the reception and presentation of the world's finest standards of time and frequency as broadcast by the National Bureau of Standards from WWV and WWVH.

Model WWVR allows the operator full use of the world's finest primary standards of frequency and time. All frequencies broadcast from WWV (or WWVH) are accurate to one part in fifty million. This instrument in your laboratory will truly give you a . . .

PIPELINE TO PRECISION

—SPECIFICATIONS—

SENSITIVITY—Better than 1 microvolt on all frequencies.

SELECTIVITY—Less than 18 KC for -80db, 2.5 KC for -3db.

FREQUENCIES—Choice of three RF front ends delivered with receiver. 2.5, 5, 10, 15, 20 or 25 mc.

SMALL IN SIZE—Standard 5 1/4" relay rack panel.

DOUBLE CONVERSION—First IF amplifier at 2 MC, crystal converter to 60 KC second IF amplifier.

FRONT END—Four tuned circuits at the signal frequency for maximum sensitivity and image rejection. **AGC and AVC**—AGC system provides constant RF input to second detector. AVC system independently controls audio resulting in constant output on tones.

INDIVIDUAL INPUTS — Three individual inputs for tuned antennas plus one common input for broad-band antenna. (Balanced 300 ohm or unbalanced 72 ohm input.)

CHANGEABLE CHASSIS

SPEED-CHASSIS

The Speed-Chassis is a flexible breadboard assembly with interchangeable socket arrangements which can be mounted on a relay rack. A shield can and panel are available to make successful breadboard assemblies both permanent and neat.

Two insulated tie-point strips and one grounded tie-point strip are provided, each 14" long. Individual plates are available, with holes already punched, to fit most all needs. In addition, three sizes of blank plates are cataloged.

Send for complete specifications, prices and delivery schedules.

SEALNUTS

17 for toggle switches fits $\frac{1}{2}$ -32 thd. is of AN 3223-1. Also types for $\frac{1}{2}$ -20, $\frac{1}{4}$ -32 thds.

475 for push switches fits $\frac{1}{2}$ -32 thd. Other various pushbutton diam. and lengths.

268 for rotary shafts fits $\frac{3}{8}$ -32 thd. Also 20 and $\frac{1}{2}$ -32 thd w/large shafts.

* has three parts: black Silicone cap, nickel-plated nut, and Silicone O-ring. The nut tightens control panel for mechanical rigidity and is held by the O-ring. The cap seals the switch shaft. Sealnuts have operated without leaking at hydraulic pressures of 200 lbs./sq. in. They are able to -65°C , meet operating and service requirements of Spec. MIL-B-5423 and are approved by Army, Navy and Signal Corps.

Illustrated data sheet and samples.

at 2462023

HANDLE

371 Handle with mounting plate is designed for portable electronic equipment and control panel. Hinged grip of black anodized aluminum coated with black vinyl and swings 180° when not in use. Will lift 125 lbs. without distorted grip is comfortable to carry.

SLIDE ASSEMBLIES

ensive Chassis designed for relay rack Navy and Air Corps equip- ment available in. Materials comply with MIL-STD-130 (Ships). Mounting chassis to control panel for easy removal are easily attached, cad-plated, iridized with bronze stainless steel on bushings. Detailed

CRYSTAL TESTING EQUIPMENT

These three crystal impedance meters were specifically designed to test quartz crystals per MIL-C-3098. They are used to determine equivalent electrical parameters, such as resonance and anti-resonance resistance, series capacitance and inductance. From these parameters the crystal's performance index can be calculated. All units operate from 115 volt, 50/1000 cycle source and fit a standard relay rack. Front panels measure 7 x 19.

MODEL 459 (TS-330/TSM) C. I. Meter tests crystals in the frequency range of 1 to 15 mc. Three resistance ranges are available: 0-99, 0-990 and 0-9,900 ohms. Load capacitance is calibrated from 12 to 110 mmf., using calibration chart. Net \$560.

MODEL 531 (TS-683/TSM) C. I. Meter is used for crystals in the frequency range of 10 to 140 mc. Twelve calibrating resistors of 10, 22, 30, 40, 51, 60, 68, 82, 91, 100, 120 and 150 ohms, plus a 100-ohm variable resistor are used for resistance calibration. An adapter for measurement of anti-resonance resistance is provided. Net \$550.

MODEL 541 (TS-710/TSM) C. I. Meter tests crystals from 10 to 1100 kcs. Resonance and anti-resonance resistances from 10 ohms to 0.5 megohms are calibrated. Load capacitance calibrated from 15 to 105 mmf. Built-in voltmeter measures power dissipated in crystal. Internal ohmmeter measures crystal resistance using one of three variable resistance adapters supplied. Also supplied are two adapters for octal base and HC-5/U crystal holders, fourteen fixed calibrating resistors, and one RF cable. Net \$750.

HOW TO CHARGE MAGNETS Safely and Quickly—

New MODEL 107-A Magnet Charger has dual range charging current output—12,000 amperes for small magnets and 22,000 amperes for larger, Alnico V magnets. Any shape or kind of magnet can be charged, including core type mechanisms, using charging bar or special adapters. Booster Unit available for increasing output to 28,000 amperes. Carrying handle added for easier portability.

Unit is self-contained, simple to operate, all exterior parts can be handled during complete charging cycle without danger to operator. Rugged and designed for production charging, its average magnetizing cycle is under 5 sec. Net price \$490.

Weight: 75 lbs.-Size: 12 x 7 x 17-Operates on 110 volts, 15 watts.

INSTRUMENT CALIBRATION STANDARDS

MODEL 262B Dual Potentiometer Standards for calibrating meters to 0.1% through a range of 1 millivolt to 1500 volts and 1 microampere to 150 amperes. Uses L & N Brooks Mod. 7 pot. and Weston Mod. 4 standard cells. Voltage and current ranges separate for calibration of watt meters. Operates on 105/125 volts, 50/1600 cycles, 350 watts, with internal voltage regulator. Interlocks and hood protect instrument under test and operator from accidental overloads. Price \$14,300.

Also available are MODELS 261B and 454 Standards for calibrating AC meters to 0.5% through ranges of 10 millivolts to 1500 volts and 1 microampere to 200 amperes; MODEL 260B Standards for DC meters to 0.5% over ranges of 1 millivolt to 1500 volts and 1 microampere to 150 amperes. Detailed data and prices on request.

All prices are FOB Boonton, N. J. and subject to change without notice.

Fielden

Fielden INSTRUMENTS — UNUSUALLY VERSATILE AND ADAPTABLE

PROXIMITY METER — Capacitance Gauge

An instrument of high sensitivity for comparing, measuring, or monitoring dimensions and distortions impossible of being studied by mechanical means. Applications range from concentricity gauging of turbine shafts or thickness micrometry—to dielectric comparison of composition or contamination of non-conducting materials—whether solid, liquid or gas. Contact with sample not required—instrument is ideal for measuring minute mechanical oscillations without damping them.

FIELDEN SERIES 80 D.C. AMPLIFIERS

This instrument is a null balance amplifier which provides an output current proportional to input current or voltage. The unit combines simplicity and low cost with good sensitivity and an extremely high order of stability. Eight ranges are available, and for thermocouple use—each of the four ranges includes automatic cold junction compensation. Available in either Class I Group C & D or Class II, E, F, & G housings. This instrument is unique in laboratory and industrial instrumentation, and provides the imaginative engineer with a tool for many new applications where low cost, precision measurement of small d.c. currents or voltages is required.

TEKTOLOG Electronic Recorder

Graphically records any physical measurement in electrical terms. Connects directly to tachometers, thermocouples, pH meters, CO₂ indicators, etc. Simpler, less expensive than servo potentiometer recorders. No standardizing slide wire current needed. Accurate to $\pm 1\%$ of full scale. Four separate, easily substituted units for simplest maintenance.

FIELDEN NULL-BALANCE Recorder-Controller

Gives accurate and dependable measurement and control of temperature and other process variables. For measuring strain, conductivity, force, position, pressure, etc. Wherever an unusual combination of accuracy, stability, sensitivity, and speed are required; in heat engineering, air conditioning, and refrigeration, for example. Simply and ruggedly designed, this instrument is built by "building block" or unitized construction for quick and easy maintenance.

FORD INSTRUMENT COMPONENTS

Ford Instrument Company makes the finest precision instruments and mechanisms for industry and the armed forces.

FORD MECHANICAL DIFFERENTIALS with single spider gear—available in 3/16," 1/4" and 5/16" shaft diameters—high accuracy, low friction.

FORD TELESYN UNITS are available in wide selection of sizes—proved precision accuracy, corrosion and fungus resistance mean better synchros when you specify Telesyn.

FORD SERVO MOTORS (60 and 400 cycles) for extremely low inertia and high frequency response. 1/5; 1/2; 1 1/2; 2 1/2; 5; 10-watt models in both low and high voltage, including magnetic amplifier controlled types.

FORD ELECTRICAL RESOLVERS available in sizes 23 and 31—interchangeability, temperature compensation -60°F to +160°F, highest accuracy, adaptability, 400 cycle frequency.

Ford Instrument also makes magnetic amplifier systems, computers, converters, mechanical integrators and other instruments and equipment. Write for more details.

RATTRAY PRECISION POTENTIOMETERS

precision potentiometers have a wide scope and cover many types and sizes, in the field of wire-wound units of high accuracy, long life and stability. Rattray's potentiometers are compact, having mechanical and electrical capabilities of the highest order. The two basic lines include: single and multiple turn linear and non-linear models. Rattray has the facilities for quantity production orders; fast deliveries and special requirements in sample and special requirement quantities.

ADVERTISERS:

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications — a matter of a few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history — the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Ask them to show you what your potentials can be.

ASCOP

Now Available! Complete Time Division Multiplex Data Systems

Standardized equipment is now available for complete systems for multichannel data transmission over a single radio link or recording on a single magnetic tape track, using time-division multiplexing and pulse width coding.

ASCOP systems engineers can now choose from a complete line of units for sampling, coding, transmitting, receiving, monitoring, separating, reducing, and recording to assemble systems to meet your data transmission or recording problems.

Pulse width data systems provide, through time division multiplexing, a large number of identical data channels of moderate frequency response. The handling of information in the form of time rather than amplitude allows accurate operation independent of the characteristics of the transmitting or recording medium. Utilization of zero and sensitivity reference channels affords continuous automatic system calibration and avoids the need for frequent manual adjustment.

A typical standard ASCOP PW system handles 20 separate data channels with 5 CPS response per channel with overall system accuracy, from original data source to final reduced output record, of better than 1%. Real time output of each channel is available as a meter reading and as continuous record from a direct-writing recorder.

ROTARY SAMPLING SWITCHES

Over 40 models, single and multi-pole, with up to 180 contacts per pole and speeds up to 100 RPS. For all applications requiring high quality switching of low level signals. Bulletin 521-R.

Your inquiries are invited. Phone, wire or write to the nearest office, advising us of your requirements

1641 S. LaCienega Boulevard, Los Angeles 35, Calif.
Crestview 1-8870

MODEL TK-M4/DC-M4 PW/FM AIRBORNE SET

Uses a 30 RPS commutator to sample 28 data sources in the 0 to +5 volt range. 4 to 5 watt crystal-controlled RF transmitter is frequency modulated. Equipment is sealed and pressurized for high altitude operation, and withstands ambient temperatures from -40°F to +140°F, 100g shock, and 12g vibration.

Transmitting equipment is also available with other sampling rates and numbers of channels and in different packages for separate applications. Bulletin FBA-1.

M SERIES PW GROUND STATION

Separates and reduces all data channels in real time. Operates on signals from standard airborne sets, from FM/FM sub-carrier, or from magnetic tape recorder. Bulletin M-4

MODELS APA-1 RF PREAMPLIFIER AND AMC-1 MULTICOUPLER

Increase receiving gain and reduce noise figure for longer range RF link operation without increasing transmitter power. Permit connection of up to 4 receivers, tuned to different frequencies, to the same antenna. Bulletin APA-1.

NATIONAL CERAMIC COMPANY

TRENTON 2, NEW JERSEY

reliability in electronics

printed circuit techniques

Sanders Associates are the design adaptation engineers for "PROJECT TINKERTOY". Our background enables us to offer to industry modular electronics in a new form which is simple and economical.

Reliacube

Reliaplates

RELIACUBE — a complete electronic circuit, with all its components, in a standard unit. Can replace any circuit produced by conventional methods.

One RELIACUBE can contain this entire circuit:

RELIAPAK — an assembly of RELIACUBES inter-connected by printed circuits to form a compact, rugged, and complete electronic package.

RELIAPLATES — small printed circuits bearing electronic components. Connected onto etched panels, they form a 3-dimensional printed circuit. With RELIAPLATES bearing either standard or modular components, assembly is simplified for either hand or mechanical production, lowering costs drastically.

Sanders Associates will:

ENGINEER the conversion of your existing electronic equipment to these techniques. **DESIGN** new equipment to maximize the benefits possible. **PRODUCE** Reliacubes, Reliapaks and Reliaplates to your specifications in production quantities. Or: **TRAIN** your own personnel to set up and operate a module production line. **TOOL** a semi-mechanized production line at your plant.

components...

engineered for reliability

SUB-MINIATURE BLOWER — The "MINICUBE"® is a complete motor and blower in a 1" cube. Compact, rugged, high velocity blower for all sub-miniature applications, especially as applied to aircraft, guided missiles, etc.

Characteristics

Size — 1" x 1" x 1"

Weight — 1 oz.

Output — 3 cu. ft. air/min.

Input — 400 cps, 2 phase, 4 watts

— Readily adapted to single-phase operation —

Temp. Range — -55°C to +125°C

Acceleration — 100g

Vibration — (0-500 cps) 25g

Tested Life — over 1000 hrs.

HYDRAULIC SERVO VALVE — JAM-PROOF. Two stage, with INTERNAL MECHANICAL FEED-BACK. SELF-CLEARING; any sludge, dirt or metal particles tending to impair hydraulic system operation sheared by a force of up to 150 lbs. RESPONSIVE to high frequencies, Linear in output. Compact. Light. Reliable.

Described above is the Sanders Associates Model 11 Hydraulic Servo Valve. It may be that the characteristics of this model do not match the requirements of your particular problem, and if this be the case, Sanders engineers can adapt it to your needs.

PHASE COMPARATOR — full wave bridge comparator for use as MODULATOR, or SWITCH. Packaged bridge assembly consists of 2 complete bridges with appropriate switching resistors. Hermetically sealed in an inert gas.

Characteristics

Frequency resp. — 0-5000 cps

Max. Ref. Volt. — 120V rms

Max. Output Volt. — 50V DC

Dynamic Range — 46 db

Conversion Eff. — 85%

Max. Ambient Temp. — +125°C

Humidity — Hermetically sealed

Mounting — Octal Socket

Size — 1" diam.; 3" high

Weight — 2 ozs.

TAPE RESISTORS — ready-to-use, fixed precured and solderless — connecting. Reliohms are the electrical equivalent of conventional carbon resistors. Designed for printed circuits and modular construction. Suitable for use under conditions of extreme humidity and chemical contamination. Small size; low cost.

Characteristics

Size — 1/2" x 1/8" x 1/100"

Rating — 1/2 watt at 70°C ambient

Tolerances — 10%, other tolerances to order

Range — 100 ohms to 5 megohms

General — U.L. approved and within

JAN-R-11 requirements

Special form factor tape resistances to order.

**PLASTICON
GLASSMIKE
CAPACITORS**

glass housing, plastic dielectric, temperatures to 125° C. Resistance 10,000 megohms min. ASG type for DC applications; LSG for RF use; PAG where stability and temperature co-efficient is required. TAG and MAG for over 125° C.

**PLASTICON TYPE
"M" miniature
CAPACITORS**

with new Mylar Film*. Resistance 125,000 megohms minimum. Temperatures to 140° C., small size—light weight. Voltage ranges from 100 to 600 V DC. Available with either or both ends insulated and with any selection of brackets.

**PLASTICON
DC RECTANGULAR
CAPACITORS**

(CP70 style), voltage ranges from 600 V DC to 100 KV DC or higher. Designed for audio filter, coupling and by-pass service in electronic, control, and other similar equipment. Temperature characteristics to suit individual application.

**PULSE FORMING
NETWORKS and
CAPACITORS**

utilizing plastic films for higher volt per mil loading and lower losses in capacitor dielectric. Smaller size and weight, longer life. Stable performance at high temperatures. Ranges of voltage up to 60 KV.

**PLASTICON
HI-VOLT
POWER SUPPLIES**

in the following ranges: 2,000 V, 5,000 V, 12,000 V, 15,000 V, 30,000 V, and 50,000 V, at frequencies at 60 cycles and 400 to 1,000 cycles. Small size, light weight, engineered for various applications.

**SPECIALLY
DESIGNED
CAPACITORS**

for unusual applications where plastic film dielectric is essential. Examples: ultra high resistance (1014) capacitors for radiation counters (Nuclear), and RF power capacitors for transmitters, dielectric and induction heaters.

**ALL-PLASTIC
MOLDED
CAPACITORS**

The first all plastic molded capacitor for use in Government, Industrial Radio and TV applications. Mylar dielectric exceeds JAN C 91 electrical specification. Competitively priced with previous types of plastic tubulars.

**BATHTUB
CAPACITOR**

All plastic dielectric capacitors designed for audio, coupling and by-pass service and other similar applications. Case sizes and temperature characteristics to suit individual application.

PROTECT
YOUR PRODUCT

at point of strain

Protect product saleability too — by insuring long life for cords, cables and conductors. Genuine "GRIPMASTER" Strain Reliefs provide these vital features—

- ★ Anchor cords to housings
- ★ Eliminate taping or threading
- ★ Prevent unraveling
- ★ Prevent cord pull damage
- ★ All sizes and styles
- ★ Easy to apply
- ★ Inexpensive

Gripmaster Strain Reliefs are "tremendous trifles" that make good products better!

Ask for samples.

4 WAYS TO END ALL CORD AND CABLE SERVICE FAILURES

Economical

GRIPMASTER STRAIN RELIEFS

Interruptions due to cable and cord connection failures are eliminated because they anchor the cord to the product at the point of strain. GRIPMASTER Strain Reliefs can withstand pulls up to 100 lbs., and are acceptable to Underwriters Laboratories. All types Reg. U. S. Pat. Off.

CALIFORNIA

VACUUM TUBE RETAINERS

These retainers are used to secure Vacuum Tubes and to resist side motion of Vacuum Tubes used in radio equipment which is subject to shock and vibrations. These retainers meet the requirement of all JAN specifications. The insulated portion is made of a melamine base Fibre Glass Phenol which provides 300 volts insulation to ground and withstands a temperature of 350 F. The insulated plate can readily be fastened or released by hand.

YANKEE PRECISELY CONTROLLED DIRECT VOLTAGE

An Outstanding Improvement
In D. C. Power Supplies

Electronic type—HIGH Voltage:

Basic power unit has electronic rectification and choke input filter
Three plug-in electronic regulators available

REGULATOR TYPE 1—Standard cell reference

Impedance: Less than 0.01 ohm for wide range of frequencies
Ripple: Less than 5 parts per million (peak-to-peak) of output voltage
Drift: Less than 100 parts per million of output voltage

REGULATOR TYPE 2—Battery reference

Impedance: Less than 0.01 ohm for wide range of frequencies
Ripple: Less than 5 parts per million (peak-to-peak) of output voltage
Drift: Same as that of battery used for reference

REGULATOR TYPE 3—Glow-tube reference

Impedance: Less than 0.5 ohm
Ripple: Less than 0.01 per cent. (peak-to-peak)
Drift: Less than 1 per cent.

Voltages adjustable plus or minus 25 volts available from 100 to 500 volts at 500 ma., 1000 ma. and 1500 ma.

Electro-magnetic type—HIGH Current

Basic power unit has magnetic amplifier control, choke input filter and selenium rectifier. Two regulators available.

REGULATOR TYPE 4—Glow-tube reference

D.C. Regulation: Better than 0.1 per cent.
Recovery time: Less than 0.2 seconds.
Ripple: Less than 0.5 per cent.
Stability: Better than 0.2 per cent. (24 hour period)

REGULATOR TYPE 5—Standard cell reference

D.C. Regulation: Better than 0.01 per cent.
Recovery time: Less than 0.2 seconds
Ripple: Less than 0.5 per cent
Stability: Better than 0.05 per cent. (24 hour period)

Voltage range for electro-magnetic supplies: variable to 32 volts at 20 amperes

QUALITY RESISTORS

• WIRE WOUND PRECISION • HERMETICALLY SEALED
• ENCAPSULATED • HIGH VOLTAGE • HIGH FREQUENCY • HIGH MEGOHM

RPC resistors are designed for use in test instruments, meters, electronic computers, and scientific equipment. These units are made to meet Government Specifications and rigid industrial requirements. The high standard of these units is maintained by using *only* the finest materials and quality control methods. All test equipment and standards used for checking and calibrating are of a type equalled by only a few of the leading laboratories.

| STYLE | RPC Type | Watts Max. (Commercial) | Volts Max. | Dimensions (Inches) | | Resistance | |
|--|-------------------------------|-------------------------|------------|---------------------|-------|------------|--------------|

QUALITY RESISTORS

• WIRE WOUND PRECISION • HERMETICALLY SEALED
• ENCAPSULATED • HIGH VOLTAGE • HIGH FREQUENCY • HIGH MEGOHM

Advanced production methods, most modern equipment, and scientific skill have resulted in RPC's ability to manufacture resistors in large quantities at reasonable cost. Quality product, reasonable price and prompt delivery are assured. Large and small quantity orders are promptly filled. Today RPC supplies resistors to the best known names in American industry. RPC is one of the largest manufacturers of these resistors in which we specialize.

| WIRE WOUND PRECISION RESISTORS | RPC Type | Spec. Mil-R-93A | Dimensions (Inches) | | Resistance | | Watts | |
|---|---|-----------------|---------------------|-------|-------------|-------------|---------|--------|
| | | | Length | Diam. | Min. (Ohms) | Max. (Meg.) | Jan Mil | Comml. |

YALE & TOWNE'S *better Engineering* means better Components... cores and rods for transformers—yokes—antennae

Superior engineering know-how and precision production have given YALE & TOWNE its position of leadership in powder metallurgy. And these same factors are your assurance of the *best* in ferro-magnetic parts for TV, radio, and electronics.

With Yale & Towne ferro-magnetic cores and extruded antennae rods, you can be sure of excellent electrical

characteristics, maintained with unvarying uniformity and quality regardless of shape, size, or production requirements. As with all of the fine powdered metal products Yale & Towne has produced successfully through the years... you will find your specifications fully satisfied.

Arrange for a visit from a specially-trained Yale & Towne consultant, or write for informative literature, full details, and quotations—today!

Our recently completed addition has greatly expanded our plant facilities—permits us to offer the most extensive and modern facilities available for producing ferrites.

The world's most famous key
... symbol of industrial leadership!

BRANSON MINIATURE RELAY

... for aircraft and missile applications
Branson Type MRH relay is about the size of a miniature tube. Occupies a volume of .75 cubic inches and weighs 1.4 ounces. All contact insulation is ceramic and glass, which makes the relay extremely useful for high frequency switching applications where low, high quality capacities are required.

Branson Type MRH relay provides 2 amp. contacts in double-pole, double-throw combination. Withstands 50g shock and 20g vibration up to 500 cps. Built for ambients of 85° C or up to 200° C for special purposes. Coil resistances up to 10,000 ohms are available. Can be supplied with a plug-in arrangement or new ferrule mounting.

BOONTON, NEW JERSEY

ADVERTISERS:

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications—a matter of a few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history—the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Ask them to show you what your potentials can be.

EVER-LOK[®]

R&S RECEPTACLES, PLUGS AND CORD CONNECTORS

...FOR HEAVY-DUTY UTILITY AND INDUSTRIAL APPLICATIONS

R&S Ever-Lok heavy-duty plugs and receptacles carry full-rated load currents safely and with the greatest of ease under severe operating conditions. Industry and Utilities specify these rugged cord connectors because Ever-Lok has the right combination of features for heavy-duty service applications.

Outstanding Ever-Lok advantage is an automatic locking grip that prevents faulty contacts and accidental disconnection in service. Every Ever-Lok plug grips fast and holds forever despite every tug or pull — yet separates instantly with a finger-tip twist of the powerful bayonet type lock.

Good products need good connections — and Ever-Lok always provides a happy ending to cord connector problems.

How about the NUCLEAR field?

There are a good many advertisers using this BUYERS' GUIDE who should also be advertising in NUCLEONICS.

Particularly in instrumentation and laboratory equipment, there is a cross-over of use in the electronic and in the nuclear field.

But, there is very little cross-over in the subscriber lists of the two publications — a matter of a few percentage points.

It is quite possible that you are doing an effective presentation of your products and abilities in this excellent issue, but are missing such presentation before one of the fastest growing fields in the country's history — the field of atomic energy.

The sales representatives of ELECTRONICS are also the sales representatives of NUCLEONICS. They have much evidence pointing to the opportunities in this great NEW field. Ask them to show you what your potentials can be.

WANG
IC MAGNETIC DEVICES
 serve you in your
 electronic system as:

- Digital to analog converter
- Sequence pulse generator
- Pulse count converter
- Output display device
- Data manipulator
- Pulse generator
- Precision timer
- Number storage
- Shift register
- Pulse counter
- Synchronizer
- Rate meter

THEY*...

have learned to rely on the **ELECTRONICS BUYERS' GUIDE** for essential product information. They naturally go to the "Guide" first, when they design, when they specify and when they buy.

Over 35,000 subscribers including engineers, designers, specifiers, purchasing agents, maintenance and production personnel.

Sel-Rex
Precious Metals
for Plating

Pioneers in
 the Development
 of Modern
 Precious Metal
 Plating Processes

Outstanding developments by Sel-Rex in precious metals for plating have resulted in better quality at less cost for both decorative and industrial platers. Superior engineering skill and long experience in the plating field make Sel-Rex your best choice for all precious metal plating needs.

Sel-Rex **BRIGHT GOLD PROCESS** produces pore-free "mirror bright" deposits regardless of thickness. Eliminates need for scratch brushing or buffing. Gives excellent metal distribution and deposit is twice the hardness of conventional gold. Ideally suited for specification thickness in barrel or still plating.

Sel-Rex **BRIGHT RHODIUM SOLUTIONS** provide a brilliant, durable deposit that will withstand severe abrasion. The chemically stable solution is ideal for specification plating of protective coatings that will not corrode or tarnish in any atmosphere.

Sel-Rex **SILVER SOL-U-SALT** (Potassium Silver Cyanide) in pure crystalline form is completely soluble in water. Eliminates old fashioned mixing, calculating or filtering. Eliminates hazard of airborne dust—no insoluble particles in the bath to cause rough deposits.

Consult our engineers on any precious metal problem.
 No obligation. Detailed literature available on request.

SEL-REX PRECIOUS METALS, INC.

229 Main Street • Belleville 9, N. J. Dept. BG54

Pioneers and developers of better gold, silver, nickel, copper, cadmium and rhodium salts and solutions.

Intricate parts and precision components
can be LECTROFORMED!*

If the radio frequency component you need cannot be made by conventional methods or is difficult and costly to manufacture, the possibilities are it can be made by **LECTROFORMING**.

LECTROFORMING can produce parts of intricate design, accurate interior dimensions and with high interior surface finish up to 5 micro-inch. Combinations of metals may be used such as silver, gold, copper, nickel and iron for specific applications such as conductivity, strength and corrosion resistance. Dimensional stability is easily obtainable whereas it would be impossible to hold dimensions by any other method.

LECTROFORMING is the manufacturing of an article by the electrodeposition of metal on a form of predetermined size, shape, accuracy and finish. We welcome the opportunity to discuss your problem, no matter how difficult it may seem.

BART
BART LABORATORIES CO., INC.
 227 Main St. Belleville 9, N. J.
Pioneers in Precision Electroforming

Crystals for the Critical

JK STABILIZED G-9, G-9J

Frequency range 1 KC to 300 KC and 1.2 to 30 MC
 Hermetically sealed glass holder
 Wire mounted, gold or silver plated crystals
 6V6GT envelope, octal base
 MIL HC-15/U
 Write for engineering bulletins Nos. 9 and 14 and H-300-20JA Spec.

JK STABILIZED H-7

Frequency Range 3 to 16 mc
 Holder material black phenolic
 Pressure mounting, stainless steel electrodes
 Water and Dust Proof
 Military type FT243 holder, CAATC No. 3R1-1

JK STABILIZED G-12

Frequency range 99 to 180 kc with high stability for frequency standard use
 Also 550 to 1500 kc for high stability
 F.C.C. Approved for broadcast transmitter use without temperature control. Write for specifications H-300-097B and engineering bulletin No. 13

JK STABILIZED H-4

Frequency Range 1800 kc to 16 mc
 Holder Material Black Phenolic
 Pressure Mounting, Stainless Steel Electrodes
 Water and Dust Proof
 Military Type HC1/U Holder
 Write for engineering bulletins Nos. 2 and 8

JK STABILIZED HEAT JKO-9

Holds two type H17 units (Military HC6/U)
 Normal temperature $75^{\circ} \pm 5^{\circ} \text{C}$.
 Ambient range - 55 to 70°C .
 Heater 6.3 volts, under 1 amp.
 Standard octal base

JK STABILIZED H-9

Frequency Range 85 to 300 kc
 Holder base Black Phenolic
 Holder can Anodized aluminum
 Wire mounted plated crystal
 Water and Dust proof
 Especially light and compact

JK STABILIZED H-17

Frequency Range 200 to 500 kc and 1 to 75 mc
 Hermetically sealed metal holders
 Wire mounted, plated crystals
 Two type H-17 holders fit octal socket
 H-17 is military type HC6/U, CAATC No. 3R1-3

METALLIZED GLASS INDUCTANCES

OUR STANDARD
TOLERANCES

$\pm .0003$ I.D.

$\pm .0005$ O.D.

TO $.020$ WALL

PRECISION FORM GLASS PARTS

Equipment Manufacturers have long been seeking lower drift components to further stabilize the performance of equipment in the higher frequency ranges. When metallized glass forms were first introduced, great improvements were experienced, but constructional methods limited the shapes and electrical qualities for electronic applications. Now, another great improvement is available. BEL Fuse Inc. is now offering a wide variety of features heretofore unavailable, such as;

GLASS TUBE TRIMMERS

BEL trimmer forms and complete assemblies are available in a wide variety of ranges. Let us quote on your present parts and help design stable glass into your product.

- EXTREMELY HIGH TOLERANCES TO GUARANTEE UNIFORMITY IN PRODUCTION—Coil forms are held to $\pm .0003$ I.D., $\pm .0005$ O.D. with wall thickness down to $.020$.
- VARIANCE OF COIL WINDING PITCH TO ANY SPECIFICATION (LINEAR OR NON-LINEAR).
- ANY PATTERN METALLIZED ON GLASS FORM OR CORE.
- METALLIZED GLASS CORES TO FURTHER REDUCE DRIFT.
- BEL PRECISION INDUCTANCES CAN BE HELD TO ± 0.5 MEG. OVER 900 MEG. BAND SPREAD IN PRODUCTION QUANTITIES.
- INDUCTANCE AND CAPACITANCE COMBINATIONS METALLIZED ON ONE UNIT.
- MOUNTING BRACKETS AND COMPLETE ASSEMBLIES.
- METALLIZING AVAILABLE ON OUTER OR INNER SURFACE OF COIL FORM.

AND SPECIAL APPLICATION

Fuses

GLASS TUBE AND CERAMIC — 8AG, 3AG, 4AG, 5AG.
AND FUSE MOUNTINGS

BEL FUSE INC. specializes in glass tube Fuses to Original Equipment Manufacturers. The long list of large and small firms who list BEL Fuse as their prime supplier for both standard and specialized fuse requirements is excellent testimony to the high quality and prompt service we offer. The flexibility of the BEL Fuse Organization permits fast, efficient output of special application fuses. Our Engineering Department welcomes your special fusing problem. Full data and U.L. listings available on request.
