RADIO'S JOURNAL OF RECORD

October 3, 2001

Serving Radio Since 1984

Vol. 18 Issue 28

Whether you play music or talk – September 11 changed your station

This is no short-term shift – we've just begun a national dialogue about religion (especially Islam), race/national origin, and war that will last for months – even on a music station. For example: Suddenly Dr. Laura breaks format to bring on a respected Muslim leader to take phone calls. And meanwhile, Laura's getting bumped back on some stations to make way for more topical talk shows, like

Clear Channel / Premiere's Glenn Beck. Talk radio may be changing significantly, in front of our eyes and ears.

As for music stations, the initial impulse to delete upsetting songs has given way to requests on rock stations for more bellicose tunes. ("Rock The Casbah" shows up on request sheets.) Some of that belligerence is popping up on talkshows, too – and in promotions aimed at Osama bin Laden. One thing

TRANSACTION BRIEF	15

that's evident all over the dial: Patriotism is back, big-time. Lee Greenwood's "God Bless The USA" is getting airplay on ACs and CHRs as well as country stations. And everybody's giving away flags.

After September 11, Radio glimpses its potential

Not only have radio stations – and especially the big consolidated groups – cajoled listeners to raise tens of millions of dollars for the Red Cross, the Twin Towers Fund and other disaster-related charities. They've been especially creative in doing it. M Street has seen plenty of fresh ideas, from Ebay auctions of unused station giveaways (see JacobsMedia.com), to "Bribe us to play your requests" weekends, to multi-

station morning show remotes at malls. The Clear Channel fund alone has raised over \$9M, and Infinity, Emmis, Cox, Greater Media and Entercom are just some of the groups who have speedily assembled fundraisers. In Norfolk, Entercom GM Eric Mastel was tired of the negativity about the economy, post-attack, and he put an extra \$100 in the paychecks of 80 employees, as long as they agreed to spend the money in local

stores (great publicity for the stations, too). Another get-the-economy-going promotion sprouted in Philadelphia, where WMMR jock Razz is flying to 10 different cities in two weeks to get Americans back on airliners. Radio mostly did a solid job with the news in the days immediately after September 11. Now it's flexing its muscles to do some good works – an ability some stations had forgotten they possess.

BMI
Introduces **3** new digital tools & services for Broadcasters

Electronic Music Reporting

Internet-based service that eliminates paper logs, saving you time and money.

Radio Select

Automated per program monthly music reporting via the Internet for radio stations.

TV Select

Automated per program monthly music reporting via the Internet for television stations.

Bush may try to make some political points with his final FCC nominee.

Both the Hispanic Congressional Caucus and the Congressional Black Caucus are boosting their own candidates for the fifth Commissioner's chair. Bush and the Republican Party have been courting Hispanics, and they could make another move in that direction by nominating somebody like Joe Garcia. After all – departed Commissioner Tristani repeatedly identified herself as an Hispanic-American, and some people would look on a Hispanic replacement as a way of "keeping the seat." Garcia's the executive director of the traditionally powerful Cuban-American National Foundation. Meanwhile M Street hears the Congressional Black Caucus is interested in Julie Rones, currently Senior Counsel at the U.S. Telecom Association, and a seasoned D.C. attorney.

Bush appoints VOA host Robert Reilly as Director.

Reilly was an advisor to the Reagan White House and began doing a weekly foreign policy talkshow for Voice of America in 1990. Now — he'll run the joint.

VOA has absorbed criticism from the right for its insistence on airing an interview with the chief Taliban mullah and failing to take advantage of the situation in Afghanistan. VOA has been running without a permanent director since Sanford Ungar left on June 29 to become president of Goucher College.

Andy Levin may still be the leading candidate for Tristani's old seat.

The longtime telecom policy specialist for House leader John Dingell continues to rack up support, with influential Dems like House Speaker Dick Gephardt and Massachusetts Representative Ed Markey behind Levin. He's even got some big-name Republicans on his side, including Billy Tauzin (R-LA) and Fred Upton (R-MI). Another dark-horse name is floating around, with the backing of Montana Senator Conrad Burns: Montana Public Service

Commissioner Bob Rowe. (There's also the consideration of balancing the Commission, geographically.) That fifth seat — the second and final Democratic seat — may not make a lot of difference on a 3-2 Republican Commission. But we're sure that lone Democrat Mike Copps would enjoy having a little company on the 8th floor. And this is not shaping up to be a partisan Commission – not yet.

Cross-ownership reform may be the only thing the NAB and the newspaper publishers have agreed on in years.

Both industry associations want the vintage rule dumped in the recycle bin for good. We now know that comments on the Notice of Proposed Rulemaking adopted September 13 are due by December 3 (and we expect the NAB to wait until the last day to file, as usual). Reply comments are due January 7, 2002. Powerful groups in both broadcasting and newspaper publishing strongly want restrictions removed – but we've seen little agreement about the impact, if the 26-year-old rule is clipped. Some think newspaper publishers will be more aggressive, while others think big broadcasters will move in on newspapers. The most logical combinations would be newspapers and TV – given the operating economies from combining at least some newsroom functions. M Street continues to believe there are some small-market newspaper operators waiting to pounce on local radio.

National Religious Broadcasters chooses Northwestern Radio's Wayne Pederson as its new President/COO.

The board unanimously chose Pederson to replace longtime association executive Dr. Brandt Gustavson, who died of cancer in May. Pederson will start working with the NRB on a part-time basis, then move from St. Paul to Manassas, VA to fully assume the reins by January 1. He's been overseeing Northwestern College's 8-station radio group and its Skylight program service – and has been associated with Northwestern's radio efforts for 34 years.

THE TAYLOR REPORT

Arbitron greenlights the full Philadelphia-market test for the People Meter.

ARBITRON The PPM gets a second good report card, with the latest batch of ratings released from the Wilmington, DE test market, covering the mid-Summer. The PPM still shows higher AQH audiences for TV and cable (compared to Nielsen). And "equivalent" total-day AQH audiences for radio (compared to Arbitron's diary measurements). And — just as in the first batch — high daily come for radio. But lower TSL. Radio's morning-drive and midday AQH ratings are lower with the People Meter. Evening, overnight and weekend AQH ratings are higher. This second batch of results from Wilmington includes some demographic info, for the first time. Read the report at www.Arbitron.com.

More fallout from September 11: Arbitron cautions that Phase I of the Fall survey could come up a little short in diary return. There may be a "small shortfall" in the Fall survey, especially in Phase I, due to disruptions in normal calling operations and the Postal Service airmail transport, producing a smaller-than-usual number of in-tab diaries. But diary return for Summer looks good — good enough for Arbitron to say that diary in-tab sample for Summer 2001 will be normal. That leads Arbitron to announce that it's keeping to its originally-announced schedule for releasing Summer results, beginning on October 12 with New York, Los Angeles and three more markets.

The glass ceiling still exists in the GM's office.

Women now comprise more than half the radio salesforce, and nearly one-third of all sales managers — but the progress stops there. That's according to a new study based on M Street data, just released by the Most

Influential Women group. 15% of stations in the top 100 markets are managed by women, up from 13% last year. MIW and Nassau exec Joan

Gerberding says "there is still a glass ceiling in radio." And back in the programming department, "we continue to be extremely concerned that there is so little opportunity for women in programming." Read up on the study at "RadioMIW.com."

Don't forget the local United Way/United Fund.

We'll say it, because they're too darn nice to speak up for themselves. But we've heard from several local United Way/United Fund efforts — and they're panicking because of the enormous attention paid to the Red Cross, etc. are getting after the September 11 attacks. They're 100% behind those efforts. But the local charities — not just United Ways and United Funds — are very afraid they're going to lose radio support at their most critical time of the year. There's also fear of "donor burn-out" — affecting all kinds of fundraising, both local and national.

The show must go on in New York City, and that includes Valerie Geller's 8th annual Producer's Workshop.

It will happen on Saturday, October 20 "in spite of everything", as Valerie puts it. The \$189 tuition includes lunch and a copy of Valerie's "Powerful Radio Workbook", which we'll mention is published by M Street Corp., and normally costs \$39.95. Details on the Producers Workshop at (212) 580-3385 or visit www.GellerMedia.com.

The Bayliss Charity Roast is postponed until March '02.

The annual Bayliss event is normally held in conjunction with the fall Kagan Seminar — but this year it's moving from October 18 to sometime in March 2002. The roastee is Katz chief Stu Olds, and he gets six more months to anticipate his roasting (for a good cause). The Bayliss Foundation notes that one of the ABC reporters covering the World Trade Center story is 1992 Bayliss scholarship recipient Steffan Tubbs. (BaylissFoundation.org)

RIP, Dave Hicks.

The longtime station owner and former NAB Radio Board Chairman dies of cancer, just short of his 63rd birthday. For years, Dave owned CHR WKFR-FM in Battle Creek/Kalamazoo, and he was the current licensee of rocker WRBR-FM in South Bend. Hicks passed away September 25 in Petoskey, MI.

TRANSACTION BRIEF

The following items are based on recent, noteworthy ownership-transfer applications filed with the FCC. The information is based on FCC contracts filed with the Commission and made public within the last few weeks. Market and revenue information is based on data culled from Duncan's American Radio and from M Street's own databases. When known, broker notices are included. Fax releases to Tom Taylor, (609) 883-5696.

Monterey, CA:

Mapleton Communications' third market will be Monterey, where it's buying the famous progressive country "K-Pig" and its siblings. It's a big deal for Mike Menerey and associates: they're acquiring the New Wave Broadcasting cluster that claimed nearly 15% of the market's Duncan-estimated \$21.4M in 2000 revenue. Not to mention — the world-famous Internet radio pioneer KPIG. Here's the current New Wave cluster: KPIG, Freedom, CA at 107.5 (a class A, like all of these). Dance CHR KBTU, Carmel at 101.7. Modern AC KCDU, Hollister at 93.5. Modern AC KHIP, Felton at 93.7 (simulcasting KCDU). And modern rock KMBY-FM, Gonzales at 104.3. Mapleton also inherits a joint sales agreement with J&M Broadcasting's classical KBOQ, Carmel at 95.5 MHz. Los Angeles-based Mapleton will LMA the cluster before closing. Brokers: Kalil's Frank Higney for seller New Wave, and Media Venture Partners for the buyer.

Akron, OH:

Clear Channel buys WHLO (640) from Salem. Amazingly, it turns out there still are stations in Ohio that Clear Channel could acquire, and WHLO (1-kw day, 500-w night) is one of them. Price is \$4.5M, compared to the \$8M that Salem paid for both WHLO and then-WTOF-FM back in 1996. WTOF-FM, Canton (98.1) became WHK-FM, which figured as a player in the complicated three-way deal last year between Salem, Clear Channel and WCLV owner Radio Seaway. WHLO's doing religious and southern gospel for Salem. Duncan's American Radio estimates it billed \$450,000 in 2000.

Boston, MA:

The Catholic Archbishop of Boston buys WCCM, Lawrence, MA (800) for \$1.5M. It doesn't take any divine vision to infer that WCCM will drop talk and adult standards and begin some kind of Catholic-themed programming — reportedly Spanish-language. WCCM has 1-kw day and 224-w night (protecting a couple of Canadian stations at night). It does a nice job covering the north side of Boston in the daytime. Seller is local owner Pat Costa, whose Costa-Eagle keeps WHAV, Haverhill (1490) and WNNW, Salem, NH (1110). Broker: Mike Bergner.

Lenoir, NC:

Billy McClatchey launches his new company with three separate deals in western North Carolina. Charlotte-based McClatchey has an experienced hand on board: wife Donna, the daughter of Raleigh station owner Don Curtis. She grew up in the family business, and later did radio sales in Charlotte. McClatchey is quite literally buying all three stations licensed to Lenoir: Oldies WJRI, a 1-kw fulltimer at 1340 owned by Donnie Goodale. Country WKGX, a 5-kw daytimer at 1080, owned by Rooster Bush's Furniture City Broadcasters. And country WKVS, a class A FM at 103.3 MHz, owned by Foothills Broadcasting. The principals of the FM are Wallace Respass and John Beal, and they put it on the air in 1992. Broker George Reed of Media Services Group repped the seller in the WKVS sale.

Central California:

A non-com religious FM at 106.1 in the commercial band will likely become a commercial operation as a result of this sale. La Favorita Broadcasting buys class A KCFA, Arnold, CA for \$900,000. Seller is St. Paul, MN-based Northwestern College. Buyers Nelson Gomez, Debbie Gomez and Ricardo Torres have interests in regional Mexican KBYN, Arnold (95.9), and Nelson Gomez has an interest in KNTO, Livingston, CA (95.9), which simulcasts with KBYN. Much of that programming is shared with KAFY, Bakersfield (1100), owned by the two Gomezes and Torres. Those three are also about to take over KSKD-FM, Chowchilla, CA (93.3). You might put 2 and 2 together and notice that Northwestern College is both selling this California FM and losing its head, as Wayne Pederson leaves to run the National Religious Broadcasters. We understand that Northwestern has no intention of selling its other radio properties.

McAllen-Brownsville TX:

Local non-profit Iglesia del Pueblo is paying \$1,050,000 for KIRT, Mission, TX at 1580. We hope the church won't mind if we make a small bet that KIRT (1-kw day, 302-w night) will undergo a conversion from regional Mexican to Spanish-language religion. Seller is Edward Gomez.

Cheyenne, WY:

Brothers Vic Michael and Van Michael (and their wives) are buying a couple of stations, just as Vic is selling two Cheyenne FMs to American General Media for \$5.35M. Those are oldies KRRR and KRQU. Now Vic and Van team up to acquire the Cheyenne combo of oldies/sports/talk "K-Ray" KRAE at 1480 (with 1000-w day, 65 night). And modern rock "Z105" KZCY, a class A at 104.9. Seller is Tom Bauman's KRAE, Inc. Vic owns other radio real estate in Wyoming — and obviously doesn't have a non-compete with AGM.

Statesboro, GA:

Michael Oesterle and Communications Capital Managers spend \$3.2M around Statesboro and Sylvania, GA. They're buying Sam-Mac's four-station cluster of hot AC WMCD at 100.1. News/talk WWNS at 1240 (1-kw, fulltime). And the mostly-simulcast Sylvania, GA country combo of WSYL at 1490 (1-kw, fulltime) and WZBX, a class A at 106.5. We spotted one interesting kicker in the contract: If Oesterle's able to upgrade WMCD to a CI, and then later sells it, Sam-Mac gets 25% of the net proceeds.

Riverside-San Bernardino, CA:

California Spanish-radio operator Abel De Luna shells out \$1.7M for contemporary Christian "Spirit FM" KAEH, Beaumont, CA at 100.9. It's a Class A facility, and the seller is RGB Communications (Barbara Brindisi).

Santa Rosa, CA:

Abel De Luna's Moon Broadcasting pays \$1,275,000 to make "La Furia" KTOB (1490) its second station there. De Luna's currently the licensee of regional Mexican KRRS (1460). This deal adds La Furia KTOB, Petaluma, CA, a 1-kw full-timer at 1490. Seller is David Devoto's Petaluma Broadcasting.

Jonesboro, AR:

"K-Love" cracks the Jonesboro market with the \$1.3M purchase of two FMs. The stations are KOCY, a C3 at 105.3 licensed to Hoxie, AR. And KJBR, a class A at 93.7 licensed to Marked Tree, AR. The pair is currently simulcasting classic country for seller Pollack Broadcasting. Back in July, William Pollack agreed to sell his Jonesboro-market sports KNEA (970) and oldies KKEY (95.9) to Clear Channel for \$2,050,000.

Flint, MI:

The fast-spreading contemporary Christian K-Love expands to Flint, first in an LMA with Jon Yinger's WGRI, Flint (88.9), followed by an eventual deal for Educational Media to buy WGRI for \$450,000. The LMA replaces WGRI's current black gospel format with the non-commercial "K-Love", now heard in more than 40 U.S. markets. Seller Jon Yinger retains a commercial station in Flint, which is religious WSNL at 600 KHz. Broker on the deal for WGRI: John Pierce.

Winona, MN:

Jerry Papenfuss pays \$1M to buy the only station he doesn't own in Winona. It's soft AC "Lite FM 101" KHME, which will be sold for the second time this year. Marathon sold it to Family, who's dealing it to Papenfuss. Jerry's other interests in Winona are country KAGE (1380), AC KAGE-FM, oldies/talk KWNO (1230) and country KWNO-FM, Rushford (99.3).

Utah:

Millcreek Broadcasting (Chris Devine and Bruce Buzil) pays \$2,260,000 for another FM in the Beehive State. That's KCUA, Coalville at 92.5, which has a CP to upgrade from Class A status to C3. Seller is Community Wireless-Park City, and at the moment it's simulcasting non-com KPCW, Park City, UT on KCUA — which we expect to change under Millcreek.

M Street offers customized Data Services to companies who wish to receive data on a scheduled basis. Customized data take advantage of daily updates in ownership transfers, format, and station changes. Contact M Street's Kathleen Coffey for specifics: (203) 801-5228.

*"You just have to speak
to the right people."*

Shannon Black, on-air talent at KRQQ FM, at the VADIS DC console.

"After looking at several options, we decided on the VADIS platform and DC consoles from KLOTZ," says John Decker, Chief Engineer, Capstar Communications, Tucson. "Why? First, our install would be much faster since most of the plant wiring could be reduced to a simple Ethernet line and a fiber optic cable connecting each room with our rack room.

"Secondly, all four stations were to be housed in the same facility, and we had to share audio sources all around the plant. This is a function that is part of the KLOTZ system. Our entire plant is now based on a digital audio 'backbone' that provides an improved audio signal.

"We also purchased five DC consoles. The air talent finds the DC consoles simple to operate. They can put any source in our plant on any fader of the console with a simple LCD button in the meter bridge. Giving the operator the ability to call up any source to a fader is great since each operator prefers a different arrangement of sources on the console."

- Installed in world class facilities
- Integrated platform concept
- Fiber optic networking
- Any audio source, anywhere

RADIO'S JOURNAL OF RECORD

October 17, 2001

Serving Radio Since 1984

Vol. 18 Issue 29

RADIO GOES TO WAR

The war against terrorism is changing everything in radio, from the way stations open the mail – very carefully – to the way they read the Summer and Fall Arbitrons – ready to explain to clients why news and maybe talk stations are going through the roof. The war is also changing basic station operations: Got enough fuel for the emergency generator? Got emergency programming in case you need to evacuate the building? (Albany's WGY had to do that twice, on the same

Saturday morning.) Got instructions for staff to call 911 and the local FBI after a security threat? Stations are not only looking at the mail differently, they're also checking visitors coming in the door – and in the case of Cox Radio's WBAB/WBLI on Long Island, locking the door while authorities investigate an anthrax scare. M Street predicts heightened security at station remotes and promotions, too. But President Bush wants America to keep going about its daily business, and do it with new savviness – and that's the best prescription.

Bad times = More consolidation

Perhaps "produce more consolidation" would be more like it: But M Street predicts you'll be seeing everybody from Mel Karmazin at Viacom/Infinity to major newspaper publishers advancing the argument that the pain being endured by media outlets justifies further relaxation of FCC ownership rules. And further consolidation, period. Karmazin has already said that he's entitled to some relief because of the \$200M of lost revenue and extra costs that Viacom has seen since September 11. We just saw one company's pain produce a major change: In Seattle, Barry Ackerley and family sold off their media empire of radio, TV and outdoor to Clear Channel for \$800M. More in this week's M Street Journal...

TRANSACTION BRIEF	14 - 15

Cutbacks hit radio from the bottom to the top

Budget problems are forcing out top Infinity lieutenant John Gehron, who's leaving by the end of the year as Senior VP and chief programming resource. Budget cuts are doing the same to lots of weekenders, overnights and evening jocks, as stations lock in syndicated fare or plug in the Prophet System or some other

voice-tracking technology to import programming from outside the station. It's not just people: Vendors report that some marketing campaigns have been curtailed or cancelled for the Fall Arbitron. And execs are scrutinizing travel & entertainment budgets (if they still exist) and facilities and engineering expenses. The trick is: Don't cut to

the bone, and thus endanger the long-term growth prospects. But today's mostly public companies don't have much leeway. One other very prominent top-level change: Sirius Satellite Radio founder David Margolese is out, the victim of delays in the consumer launch and a sagging stock price.

Our roots are in broadcasting. Our skill in RF engineering is unparalleled. Our track record in tower construction and operation is unsurpassed. We build towers. You lease them. It's an experience you can rely on.

To find out more about American Tower, call our broadcast development and sales office at 781.355.2005, fax us at 781.329.2096 or visit us at www.americantower.com.

FREE WEBSITE ANALYSIS

Can your site cope with the demands of driving ratings and revenue?

Find Out Right Now
at www.FirstMediaWorks.com

At NAB 2001, we premiered a free educational service to the broadcast community. The Online Site Analysis. The response was overwhelming. So we've decided to make the analysis a Free and permanent fixture on our website. Visit www.firstmediaworks.com today and put your station's website to the test. Or, better yet, contact us and we'll walk you through the process. Either way, you'll learn what you can do right now to improve your website. Regardless of who you work with. Like all of our Internet systems for Radio, the Online Site Analysis was designed by broadcasters, for broadcasters.

You may order the most comprehensive listing of all the radio stations in the U.S. and Canada: The M Street Radio Directory, Tenth Edition is available now for \$79.00 plus \$7 shipping and handling.

Yet another fight over EEO: 33 civil rights groups petition the Supreme Court to bring it back. The ACLU, NAACP, NOW, the Urban League, Rainbow/PUSH Coalition, and the National Association of Black Owned Broadcasters are just some of the organizations asking the High Court to reinstate a portion of the FCC's EEO rules. David Honig of the Minority Media and Telecommunications Council argues that the EEO policies are "universally credited with opening the electronic media to minorities and women." The courts have recently junked several versions of the rules that started in 1969 — most recently the set crafted by ex-Chairman Kennard. The civil rights coalition will try to interest the Supreme Court on three different grounds. And it says the EEO rules are about recruitment, not quotas, and therefore pass constitutional muster.

The former Mike Rice stations — now dark by FCC order — may soon return to the air under Interim operators.

The FCC shows it's working on selecting interim operators for five currently-dark frequencies in Missouri and Indiana. The Commission announces that it's gotten an informal objection to an app for an interim facility at 98.3 licensed to Columbia, MO — which used to be Mike Rice's modern rock "Buzz" KFMZ. Rice no longer holds the licenses the FCC revoked (or the CPs and apps he had interests in). But he does retain the physical assets, such as transmitters, towers, studios, etc. An interim operator could buy or lease those from Rice — or could build its own. The interim operator situation is important in Terre Haute (home of the former WBOW, WZZQ and WBUZ) and Missouri (home of the ex-KFMZ and KBMX) — That's because M Street believes it will be years before the FCC designates new permanent operators for any of them, which must be done via auction. In his most recent filing, Mike Rice describes the FCC's treatment of his case as "persecution."

VOA, the punching bag. Conservatives especially are teeing off on the D.C.-based foreign broadcasting service that normally operates in relative peace and quiet. Not now: Critics think it hasn't been tough enough, journalistically, on the Taliban and Osama bin Laden. The Voice of America says its most important attribute is its reputation as a fair and accurate news service that isn't influenced by U.S. government policy. Its detractors hope incoming Director Robert Reilly will turn things around to their liking. And Republicans like California House member Ed Royce are calling for the creation of a new "Radio Free Afghanistan" service.

After five years, the FCC is still trying to shut down Michigan pirate Rev. Rick Strawcutter and his "Radio Free Lenawee 99.3FM."

The government's frustrated attempts show again how hard it is to deal with committed pirate operators who may not offer the FCC much leverage. Strawcutter is both a church pastor and the active mail-order seller of some very controversial videotapes, some of which advocate white supremacy and extreme positions on gun rights. Now the U.S. Attorney's office has asked District Judge Gerald Rosen to issue an injunction against Strawcutter and allow the government to confiscate equipment.

Keep your eye on Wayne Pederson, new President and COO of the National Religious Broadcasters.

He's looking to expand the NRB's ties with its younger members: "Some of them view the NRB as institutional, and we have to get them involved." And Pederson will be looking at the Internet: "It's time to enlarge the tent [in religious broadcasting] for the Internet." Pederson's also reaching out to the newest class of broadcasters: "Low Power FM will be a part of things. . . It's a reality, even though we had some concerns." The NRB could see memberships from the new LPFM licensees, many of whom are church-related. Pederson succeeds legendary leader Dr. Brandt Gustavson. After 34 years at Northwestern College in St. Paul, he's relocating to Manassas in January.

An unprecedented display of cooperation by public radio stations is raising money for WNYC-FM, New York.

The FCC just granted a waiver so that Bill Kling's idea — to piggyback onto the fundraising process at Minnesota Public Radio — could become legal. Not only that, attorney Richard Bodorff at Wiley Rein & Fielding tells M Street that the Commission is offering similar waivers to any non-commercial FM that wants to apply. We're already hearing about stations like the University of Cincinnati's classical WGUC (90.9) taking up the challenge. You need FCC permission first, and here's how to get it: drop an e-mail to Peter Doyle ("PDoyle@FCC.gov") and to Michael Wagner ("MWagner@FCC.gov"). Include Facility ID number, nature and duration of the fundraising effort, and recipient of funds raised. We think it's a terrific idea, since WNYC-FM lost its transmitting facilities on September 11. It has since launched a \$4M emergency fund, and was already facing an early-2002 deadline for a \$3.3M installment payment on its license.

We said on page 1 that radio is at war – and news and news/talk stations may be the beneficiaries in the ratings. M Street's analysis of the first big-market Summer Arbitrons shows some truly startling gains for news stations in the days after the September 11 attacks. All-newsers WINS and WCBS, New York, KYW, Philadelphia and similar stations are seeing some increases that may foretell a Fall survey period that looks like the Gulf War of 1990-91. Emmis Jeff Smulyan even tells analysts that advertisers may "discount" the Fall book somewhat when it hits the street in January. In the short term, interest in breaking news benefited all stations, no matter what format: Arbitron found that both cume and TSL (Time Spent Listening) rose immediately on September 11, in both New York and Los Angeles. The jump was biggest for 25-54s and 35-64s. Non-news stations held steady, while all-newsers tended to show heavier listening. Arbitron's Owen Charlebois says radio is "the medium people can turn to for news, information and a sense of community." More at "Arbitron.com."

Rush sounds relieved that his secret is out. You're undoubtedly aware of Limbaugh's October 8 shocking revelation that he's battling severe deafness. Before his disclosure, managers had been complaining to us that "Rush sounds different." And he did – but not because he had nodes on his vocal cords or there was some oddball processing in the audio chain. Now that Rush has come clean, he sounds like "the old Rush" – and he sounds just as sarcastic as ever, ridiculing favorite "liberal" targets like Rosie O'Donnell for cancelling shows because of the anthrax scare. Rush may be on an uncertain journey as he seeks

medical (and perhaps surgical) treatment of his Auto-immune Inner Ear Disease. But we believe strongly that his fans will be cheering all the way (even if he can't hear them). And he intends to continue broadcasting: "The word 'retire' is not in my vocabulary."

Country radio should benefit from the new patriotism. It's not just that Lee Greenwood's "God Bless The USA" is flying out of stores that ordinarily sell rock and rap. Part of the appeal may be the desire to return to bedrock values – something many Americans associate with country music. Billboard/Airplay Monitor Country Editor Phyllis Stark notes another reason why country may prosper this Fall: "Country traditionally does better when the economy's down."

Crystal Awards voters are going to have the toughest time ever –

because radio continues to innovate when it comes to the September 11 attacks and the war on terrorism. We're impressed with the spontaneous idea that swept everybody in Milwaukee radio in just a few days, and sent morning shows from 15 different stations to New York. Stations owned by Clear Channel, Entercom, Journal, Milwaukee Radio Alliance and Saga all sent their staffs into the air, thanks to a quickly-arranged deal with Midwest Express Airlines. Meanwhile, almost every radio group has established its own relief fund for victims in New York and Washington – and they're keeping up the effort. Makes you proud, doesn't it? If you'd like to talk about how Milwaukee did its "fly-in" to New York, talk to Jack Lee of MARS at (262) 691-3707 or "JLeeMars@MSN.com."

RAB's Gary Fries: Top radio execs "must return to the front lines" and lead the sales effort. Last month in New Orleans Fries was chastising the industry for its "deer in the headlights" reaction to the advertising slowdown. Now he's issued an "Open Letter to the Radio Industry" and challenging the very top leadership of radio groups to get back into the trenches and lead. That's because Fries says many radio salespeople are "emotionally bruised and reluctant to conduct business aggressively with customers and prospects." Therefore "Let's make a commitment to stop lamenting about how business is and start doing what needs to be done. . . It's time for leaders to start leading, and it's time for all of us to get moving." Full text at www.RAB.com. The RAB's also trying to craft the agenda for its 2002 conference at Disney's Coronado Springs Resort in Orlando to meet the needs of a country – and a sales effort – at war.

The Dallas Cowboys may be struggling, but the Dallas-Ft. Worth market has no trouble pushing Philadelphia out of the #5 slot in the new Arbitron rankings. That's the highest-profile change in the newly-issued rankings by population – based on new data from Census 2000. Elsewhere: Washington, D.C. rises from #9 to #7. Detroit falls from #7 to #10. Minneapolis (now #16) and San Diego (down to #17) trade places. More – including new updates for black and Hispanic population changes – at "Arbitron.com."

Music Of Your Life champion Al Ham dies. Nobody had more passion than Al did for adult standards and the great artists of his format. He used to talk about playing "the music of romantic optimism." Ham died in Florida, following complications from an operation related to his cancer treatment.

The following items are based on recent, noteworthy ownership-transfer applications filed with the FCC. The information is based on FCC contracts filed with the Commission and made public within the last few weeks. Market and revenue information is based on data culled from Duncan's American Radio and from M Street's own databases. When known, broker notices are included. Fax releases to Tom Taylor, (609) 883-5696.

Seattle, WA:

Clear Channel finally reels in the Ackerley stations with an \$800M acquisition of the whole company. The stock deal brings CC four stations in Seattle, plus Ackerley's deal to buy KFNK. Not to mention 21 TV stations, and major outdoor portfolios in Boston, Washington State and Oregon, plus Ackerley Interactive. Seattle was by far the largest market where CC had no foothold. From Ackerley, it's acquiring urban KUBE (93.3). Rhythmic oldies KBTB, the former KJR-FM at 95.7. Sports KJR at 95.0. And Tacoma-licensed sports KHHO (850). There's a fifth station in Ackerley's sphere of influence, and it's modern rock KFNK, Eatonville at 104.9. Ackerley's got a Joint Sales Agreement with Bedrock, plus a purchase option. Ackerley also brings along 21 TV stations. The TV markets and stations are: Syracuse (WIXT-TV). Rochester, NY (WOKR). Utica (WUTR). Binghamton (a duopoly with WIVT and WBGH). Elmira (WETM). Watertown, NY (WWTI). Bakersfield (KGET). Fresno (KGPE). Salinas-Monterey (duopoly of KION and KCBA). Santa Maria (KCOY). Santa Barbara (KKFX). Santa Rosa (KFTY). Eureka (KVIQ). Eugene (KMTR). Coos Bay, OR (KMTZ). Roseburg, OR (KMTX). Bellingham, WA (KVOS). And Fairbanks (KTVF). Will radio stations in markets like Rochester need to be sold? That requires complicated engineering signal-overlap studies.

Chillicothe, OH:

WKJ has a Columbus-friendly CP, and Clear Channel is buying it from Frank Wood for \$17.5M. Clear Channel's now ready to add the station that Jacor didn't buy back in early '99, when Frank Wood acquired it through his Secret Communications — and LMA'd it to Mark Jorgenson's Concord Media. The station is "93 Country" WKJ at 93.3 MHz. It has several future options. For sure, it's got a CP to move closer to Columbus, by dropping power from 50-kw to 18.5-kw and raising antenna height. Other possibilities include a city of license move to Ashville or Williamsport. Terms: Frank "Bo" Wood gets \$14M cash on January 2, with the rest at closing. Wood bought it in 1999 for \$6M. Clear Channel's substantial Columbus grouping includes country WCOL-FM (92.3).

Albany, NY:

Ed Levine's Galaxy buys "Z-Country" WHTR, Corinth, NY for \$2.4million. Levine's assembling whatever he can around the Albany market, now that he's poised to close on TeleMedia's WABY/WKLI-FM. The Z-Country deal is with Vox Radio Group (Bruce Danziger and Jeff Shapiro). The trick here is that WHTR is up for a bit of a move-in: from 93.5 to 93.7 with new city of license Scotia, NY. The FCC issued a Notice of Proposed Rulemaking on April 20 about that Table of Allocation change.

Phoenix, AZ:

Jim Hilliard buys Jack Mortenson's KXEG (1280) for \$2.3M. KXEG is currently doing both English and Spanish language religion for seller Mortenson, and the facility has 2500 watts day, 49 night. Hilliard's James Crystal Enterprises already owns in-market talker KXEM, Tolleson, AZ at 1010 KHz — which until recently was named KXEG.

Southern Minnesota:

Jim Ingstad's back in buying mode, paying \$900,000 for KCHK-AM/FM, New Prague, MN. Ingstad's one of three Midwest-based brothers who've historically been quite active in buying and selling stations. At the moment Jim's only interest is KGBY, licensed to Faribault, MN. So this just-filed deal with Northland Radio may be the start of Jim's next growth curve. In New Prague, Ingstad's acquiring KCHK at 1350 (ethnic and classic country) and Class A KCHK-FM at 95.5 (oldies).

South of Minneapolis, MN:

Cumulus deals away KOWO (1170), KRUE (92.1) and KQPR (96.1) to Greg Jensen. Cumulus originally got these from Jim Ingstad, and now it spins them off for \$1.9M. Jensen's Hometown Broadcasting gets country KOWO, Waseca, MN (1170/1-kw day, 60-w night). Hot AC "Star" KRUE, Waseca (92.1/class C3). Plus classic rock KQPR,

Albert Lea, MN (96.1/class A). But this is a "pass-through" deal, as you'll see in the next story —

Greg Jensen will keep one of the three Cumulus stations and hand off the other two to Main Street Broadcasting (John Linder and Lynn Ketelsen). Jensen hangs onto classic rock KQPR, Albert Lea, MN at 96.1. But says goodbye to the combo that's licensed to Waseca, MN: country KOWO at 1170, and hot AC "Star" KRUE at 92.1. Linder and Ketelsen have local interests in KTOE, Mankato (1420) and KOWZ, Blooming Prairie (100.9).

Puerto Rico:

Radio and TV owner Pedro Roman Collazo buys WIBS, Guayama (1540), for his fifth AM on the island. This deal's between the estate of WIBS owner Wigberto Baez Santiago, and Roman Collazo, who holds quite a collection of licenses in Puerto Rico, including WMTI, Morovis (1580), WVOZ-FM, Carolina (107.7), WAVB-TV, San Juan and WVOZ-TV, Ponce. Roman Collazo's is paying \$300,000 for the 1-kw daytimer. WIBS does Spanish-language talk and standards.

Las Vegas, NV:

David Peschau's Continental Radio Broadcasting pays \$2M for talker KRLV (1340). Don't confuse your radio Continentals: Peschau's "Continental" is not the same as the Indy-based Continental Broadcasting Group that has WEDJ/WSYW. Peschau is from La Crosse, WI. One-kw fulltimer KRLV does talk and news for seller Fred Weinberg. Peschau's LLC includes Las Vegas-based Donald Brown, and Phoenix-based Serena Ventures. Broker: Terrill Fischer of Norman Fischer & Associates.

Northern Utah:

Chris Devine and Bruce Buzil (as "3 Point Media") buy oldies KNFL, Tremonton (104.9) from Morgan Skinner for \$1,725,000. Chicago-based Devine and Buzil are building assets around Salt Lake — and some of that activity may be to create a move-in, by controlling outlying frequencies. Morgan Skinner's KNFL is a full class C that had been doing classic hits until it re-focused to oldies. Broker is Greg Merrill of Media Services Group.

Kent Frandsen's Sun Valley Radio buys "Giant" country KGNT, Smithfield, UT (103.9) for \$775,000. The locals call this area along the Utah-Idaho border "Cache Valley" — and Sun Valley Radio has a considerable cache of stations there already. Its six current facilities are: CHR KVFX, AC "Q92" KBLQ-FM, talk/sports KVNU, "Memories 1390" standards KLGK (all licensed to Logan). Plus Idaho-licensed "Kix" country KKEX, Preston, and classic rock KLZX, Weston. So country "Giant" KGNT, a class A facility, makes #7. Seller is Morgan Skinner's Legacy, and the broker is Greg Merrill of Media Services Group.

South of Indianapolis:

It's a swap meet, as Findlay Publishing scores another Indiana FM in an exchange with Marty Pieratt. Findlay — doing business in radio as White River Broadcasting — fattens its local holdings with "Magic" AC WWWY, Columbus, IN. While Marty Pieratt picks up news/talk WNVJ, North Vernon, IN (1460) from Findlay — along with \$1.2M cash in exchange for WWWY. "Magic" is a class A at 104.9 and it joins other Findlay properties like country WKKG, Columbus (101.5) and oldies WINN, North Vernon (106.1). Pieratt winds up with WNVJ plus that cash.

Coastal SC:

The Pearce family asks the Mass Media Bureau for speedy handling of its app to buy WJZX, Port Royal, SC (99.7). Here's why: they'll lose the financial advantage of a tax-free exchange if they don't re-invest their money in a qualified broadcast investment by December 12. The Pearces' Apex Broadcasting is buying smooth jazz WJZX from Pegram Harrison's Barnacle Broadcasting, and it's one of those booming southeastern full Class C's. WJZX spills into both the Savannah and Charleston Arbitrons. Broker Don Sailors worked for seller Pegram Harrison.

De Ridder, LA:

Houston Pearce and Dean Pearce pay \$400,000 for adult alternative "Wave" KROK, a C3 at 92.1. Seller is Doug Stannard's West Central Broadcasting. Check how many other Louisiana stations the Pearce-owned Apex is piling up: It has attributable interests in KHLA, Lake Charles, KVEE, Lake Arthur, KJEF-FM, Jennings, and KLCL, Lake Charles.

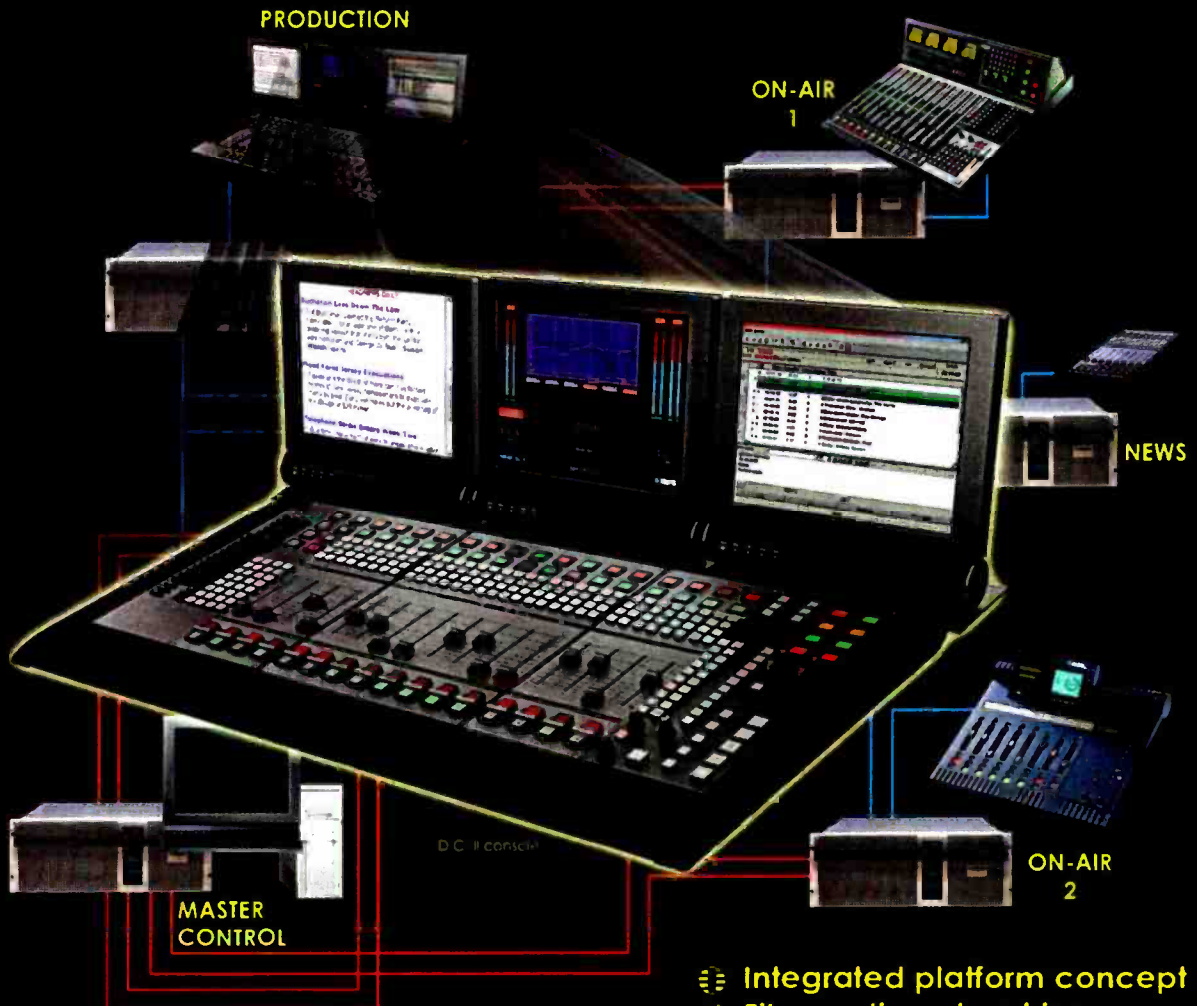

Lancaster, PA:

The Association for the Blind sells "Vision" WVZN to a local Spanish religious operator. WVZN, Columbia, PA at 1580 will remain a non-commercial AM, but will change programming — from music, interviews and talk programmed for the local sight-impaired population, to Spanish-language religion. The Association for the Blind bought then-dark WNZT in May 1997. Now it will go back to relying on its closed-circuit and cable delivery. Wilson Cortez and Amelia Cortez are the principals of buyer Esfuerzo de Union Cristiana, and they're paying the association \$165,000. WVZN has 500-watts daytime, 5-watts night.

No deal in suburban Boston (Lawrence, MA):

The Boston Archdiocese's deal to buy WCCM from Pat Costa and the Lawrence Eagle-Tribune newspaper falls through. Partly because of money ("significant financial constraints") and partly because of personnel changes at the archdiocese, the \$1.5M deal is dead. The church was planning to use WCCM, Lawrence, MA (800) to reach the area's Spanish-speaking population. WCCM is currently doing talk and standards.

Our Secret is Behind the Scenes!

- Integrated platform concept
- Fiber optic networking
- Any audio source, anywhere

KLOTZ DIGITAL's unique VADIS Platform provides the perfect solution for facilities searching for the ultimate in digital audio integration. From single studio build-outs to new mega-facility operations, KLOTZ DIGITAL provides a cost effective and time saving option to traditional analog and digital facility installations. *Our secret is behind the scenes.* Fiber optic based, the VADIS Platform integrates all audio functions, combining operator tasks, reducing the need for

traditional wiring, and paving the way for effortless future expansion. And, the elimination of a central router means distribution of "any audio source anywhere at any time!" Compare the costs for yourself. When it comes to savings, quality and performance...nobody even comes close. That's why the most sophisticated and technologically advanced facilities throughout the world choose KLOTZ DIGITAL.
