Tapes play continuously . . . never require
threading, winding or rewinding.

**two 5 1/4 inch
speakers
(included)**

...matched to the cir-
cuitry to produce full
bodied tones. Rich
highs and deep, vibrant
lows.

track selection . . . manual switching is provided to allow
program selection as desired. To change program selection, simply press
left control knob and release it. Each
time the knob is pressed and released,
the unit will step to the next program,
returning to the first program when all
programs have been selected.

automatic program change . . . tape cartridges
contain a number of programs; each program consists of a series of
musical selections. This player is designed to automatically play each
program on the tape. It will play the entire tape cartridge continuously
until the cartridge is removed.

variable tone control

... lets you adjust the highs and lows to achieve
the exact tone quality to satisfy your
individual listening preference.

interchangeable tape cartridges

...the tape cartridge used with this unit may also be
played with Motorola 8 track tape cartridge home units.

balance control...lets you balance the left and
right channels for the precise stereo effect you desire.
