People Listen To Our Stations Because We Listen To Our People.

At American Radio Systems, we've grown from 18 stations in 1993 to 94 stations in 18 markets,* with over 2400 qualified professionals on staff. The principal reason for our incredible success is our people. They come to us from all walks of life, in all shapes

and sizes, each with a valuable point of view based upon years of broadcast experience. They tell us what does and doesn't work in their markets. *And we listen.* At American Radio, our people are the true stars. Our people make *all* the difference.

*We Pledge To Grow
People Faster Than Assets,
Earn Our Listeners' Loyalty,
Be Committed To The Success
Of Our Clients, Do What We
Say We're Going To Do,
Have Fun And Play To Win!*

*Giving Effect To Pending Transactions

SOURCE GUIDE CONTENTS BY CATEGORY

This index is alphabetical and cross-referenced to make it easy as possible to find the page you want. For example, we use the name Consulting Engineers for that category in this book. You, however, may think of them as Technical Consultants. This index lists them both (and other) ways. Happy hunting!

UNITED PRESS INTERNATIONAL

United Press International expands broadcast services

United Press International, the wire service that invented both the broadcast wire and the audio service, has established a new 24-hour Focus Desk in its Broadcast Headquarters in Washington. The new desk, launched December 1996, means significant growth of news coverage for broadcasters.

UPI BROADCAST WIRE

UPI correspondents file your report *first*. Bulletins and urgents are supplemented by Spotlights...which follow the same format as urgents but move on every story we cover. Then we follow up with Focus reports, written for the ear but offering more detail (about one computer screen's worth of information). We update our Focus reports frequently and move sidebars as well.

News, sports and business summaries move hourly. You also get state news and PowerPrep 3.0, the best show-prep feature package in the industry, including JockStrip, Blast From the Past, Horoscopes, Watercooler Stories, and many other features, more than a dozen a day.

UPI RADIO NETWORKS

UPI Net-1 has news on the hour (you can use two, three or four minutes) followed by sports (two minutes in the morning, a minute in the evening); news on the half hour (one minute, 24 hours a day, seven days a week) followed by business (around the clock during the business week)...plus the world's original audio service, still cranking out the sound bites at 10 minutes past the hour.

UPI Net-2 has live news feeds, special event coverage, and The UPI Morning News (6:00 a.m.-10:00 a.m., Eastern time, Monday-Saturday), a turnkey news and feature program, dual-anchored with easy opportunities to get in and out. No morning show has a more flexible format.

IS THIS MORE THAN YOU THOUGHT?

Maybe it's time you spoke to a UPI sales representative and got more information about UPI's resurgence. We're here to serve you...with more news and information than ever. Call us...at 800-503-9993.

United Press International

Around the World, Around the Clock

Group Owners

A radio group is defined as a company holding stations in two or more rated markets.

The Group Owner section includes data incorporated up to December 15, 1996. Included in each listing is information on group headquarters, followed by owned stations listed in descending market order.

Each station listing includes call letters, format, frequency, general manager, LMAs, address, phone and fax, closed and pending transactions.

For additional information on the stations and markets, see **Stations by Market** following this section.

How this section is organized

This section profiles the commercial radio stations in each of the 263 radio markets where Arbitron surveyed radio listening in the Spring of 1996. **Markets are listed alphabetically by Arbitron market title.** For cross-references on hyphenated market names, see page 8. Please scan the call letter cross-reference chart at the beginning of each market to find stations in combo, duopoly or superduopoly listings.

Who is listed

Generally, we included all stations which have averaged one share or more over the last few Arbitron surveys. In larger markets, we have included many stations which didn't meet the one-share threshold. Co-owned stations are always presented together, even if the combo or duopoly mate didn't meet the threshold. Non-commercial stations are listed if they are part of a group listed in our group section.

Duopoly and LMA listings

Stations and combos linked by ownership (duopoly) or full sales and programming LMAs are listed together, between cross bars, and marked as consolidated "Duopoly", "Superduopoly" or "JSA" "LMA" operations.

Usually, the first of multiple stations listed is the highest-rated. Basic information is included in that listing. Subsequent stations include only data different from that of than the first station. For example, if a duop's management team is the same for all stations except for the PD's only PD's are named under other stations

LMAs (local market agreements) and JSAs (joint sales agreements, a specific type of LMA) are strategic alliances between two or more owners involving programming, sales or both. Usually. Some LMAs in this book are nothing more than two separate operations sharing office space. Generally, LMA partners are listed together when they share the same address, phone/fax and have overlapping personnel. In the case of JSAs where there is not significant overlap, the stations are listed separately with the arrangement noted in each listing.

For many years, owners were limited to one AM and one FM in a market with further limits on total station ownership nationally. In September 1992 the local limit (for large markets) was upped to two stations in each service, and the national cap was increased.

All of this has changed dramatically. The Telcom Act which was signed into law early last year upped the local ownership limits to as many as eight stations (with no more than five in one band) and did away with national limits entirely.

The legal determinant for a duopoly or superduopoly is overlapping signals in the same band. If two co-owned FM stations can be tuned in from the same spot it is a duopoly; if three or more it is a superduopoly.

The Source Guide definition is a bit different. Our mar-

kets are those determined by Arbitron, and if two co-owned FMs receive Arbitron ratings in the same market, we consider it to be a duopoly whether they overlap or not.

Demographics & Revenues

At the top of each market, the Arbitron 12+ population figure is given, followed by Arbitron's estimates of Black and Hispanic population, average household income and total retail sales for the market. All info is used by permission of Arbitron.

Check our group section for group execs and addresses

If a station or combine is group-owned, it is so noted on the bold-face line listing the owner, with the notation, (grp). Please check our group directory, beginning on page 1-1 for group information.

What the facility listings tell you

For AM stations, we've listed the day and night operating powers in kilowatts, and the antenna configuration. For FM stations, we list the effective radiated power in kilowatts and the antenna height above average terrain in feet.

AM facility boilerplate: Generally, lower AM frequencies yield better coverage for a given power level. "D" means day hours, "N" means night hours. "U" means unlimited hours, or fulltime (day and night) operation. "ND" indicates a non-directional antenna. "DA" means directional antenna. "DAD" denotes a directional daytime-only station. "DAN" denotes a fulltime station which operates directionally at night only. "DA1" means a directional station with the same pattern all hours. "DA2" means different directional patterns day and night. A complex AM directional antenna often, though not always, indicates restricted coverage in one or more directions. AM directional antennas can also be used to reinforce coverage; this is especially true of the older and larger AM stations.

FM facility boilerplate: Coverage is determined by the combination of effective radiated power and antenna height. Power is a relative indicator of signal performance. More is generally better, but greater antenna height generally yields better coverage, up to a point. The FCC has a complex set of rules which often require swap-offs; many stations must cut back their power if they are able to use a very high antenna site. Many different combinations of power and antenna height can yield the same geographic coverage area.

A word on FM antenna heights

Though the FCC now lists antenna heights above average terrain in meters, we elected to use English units. For stations licensed prior to the FCC's shift to metric, we have listed the station's actual, licensed height above average terrain, in feet, as listed on the station's license documents. For stations licensed after the FCC's shift to metric, we have converted the licensed height in meters to feet, using a conversion factor of 1 ft. = 0.3048 m.

“LIVE”
FROM THE FIELD OF DREAMS

SportsAmerica is ON THE AIR. And here's your "Dream Team" of sports broadcasting: Charlie Jones of NBC; CBS's Michele Tafoya and Irv Cross; Kevin Harlan from Fox TV; Hall of Famer Ray Scott; Mickey Charles from the Sports Network; Mike Elliott; and Tom Skibosh.

Now fans from coast to coast can really talk with professionals from around the world of sports.

Get in the game with "The new legend in SportsRadio." Call 319-875-6111 and visit with Brian Schultz or Pam Backer in our Affiliations Department for all the stats and information on SportsAmerica Radio Network - we're just a cornfield down from the Field of Dreams.

SHANE MEDIA

Q Do you specialize in one format?

A NO! We're RADIO specialists first. Our approach to each station is based on that station's needs and goals. We have number one Country stations in markets of all sizes. News, talk and information stations rely on Shane Media's expertise to keep them in touch with what's going on. We've helped several CHR stations make the national Top 25. We've launched Oldies and Classic Rock stations. We invented RADIO X™, the modern rock format.

Shane Media programmer/consultant Pam Shane (r) with rising Country star Terri Clark

Q What does this multiformat experience mean to your clients?

A It means that we're not so wrapped up in any one format that we lose sight of the marketplace and its interaction. That's real assurance in today's Superduopolies. Shane Media has the experience to react to virtually any situation, whether competitive or internal.

Q Who handles my station?

A We all do. You don't "hire a consultant" when you assign your project to Shane Media, you hire a team of radio professionals who are committed to your goals.

Q Why should I choose Shane Media?

- A** Here are seven reasons our clients tell us:
1. Limited Client List – maximum attention is given to your station's needs.
 2. Instant Access to Answers – A member of the Shane Media team is virtually always available.
 3. Straight Shooting – We're not "yes men." We tell you what we think, good or bad.
 4. No Private Agenda – We aim our work at your goals and help you meet or exceed them.
 5. All Custom – Everything we do is tailored to your station's needs. There's no "cookie-cutter" blueprint that's modified to look like it's unique.
 6. Exclusivity – We work with only one station or duopoly combo in each metro.
 7. Clear Action Plans – We speak in plain language, clearly communicating action steps to set a strategic agenda.

Programmer/consultant Chuck Dickemann

Q Why does your advertising talk about research?

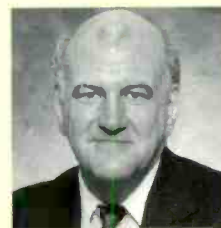

A We've quietly gained a solid reputation for perceptual research and strategic planning. Shane Media Research is custom-designed, every project starts from scratch. There's no boiler-plate.

Q What's the best methodology?

A Don't let anyone sell you methodology. You're after answers your station can act upon. Your project from Shane Media begins with your questions and your needs. Only then can we apply the appropriate methodology.

Shane Media's webmaster, programmer/consultant Jon Lutes

ED SHANE

Co.: **Shane Media Services**
Address: **2450 Fondren,
Suite 112
Houston, TX 77063**

Phone: **(713)952-9221**
Fax: **(713)952-1207**

Email: **smsofc@shanemedia.com**
Web Site:
http://www.shanemedia.com

Year started: **1977**

Consultation staff:

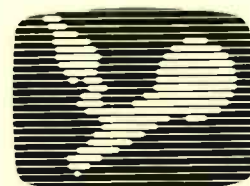

**Ed Shane
Chuck Dickemann
Pam Shane
Jon Lutes**

Services Offered:

Shane Media provides strategic management, tactical programming and probing research consultation to radio stations nationwide.

Our programming success stories are in virtually all formats: Country, News/Talk, AC (both "Hot" and "Soft"), Full Service and Modern Rock.

Shane Media Research conducts custom-designed strategic studies, projective focus groups, and music testing.

Now in 235 markets

Today, Arbitron delivers more than just ratings; we can give you access to detailed profiles of the consumers in your market. Now you can talk about the consumers who are reached by your station and by the other advertising media in your market. That's valuable information you can use to pitch and win new local retail business.

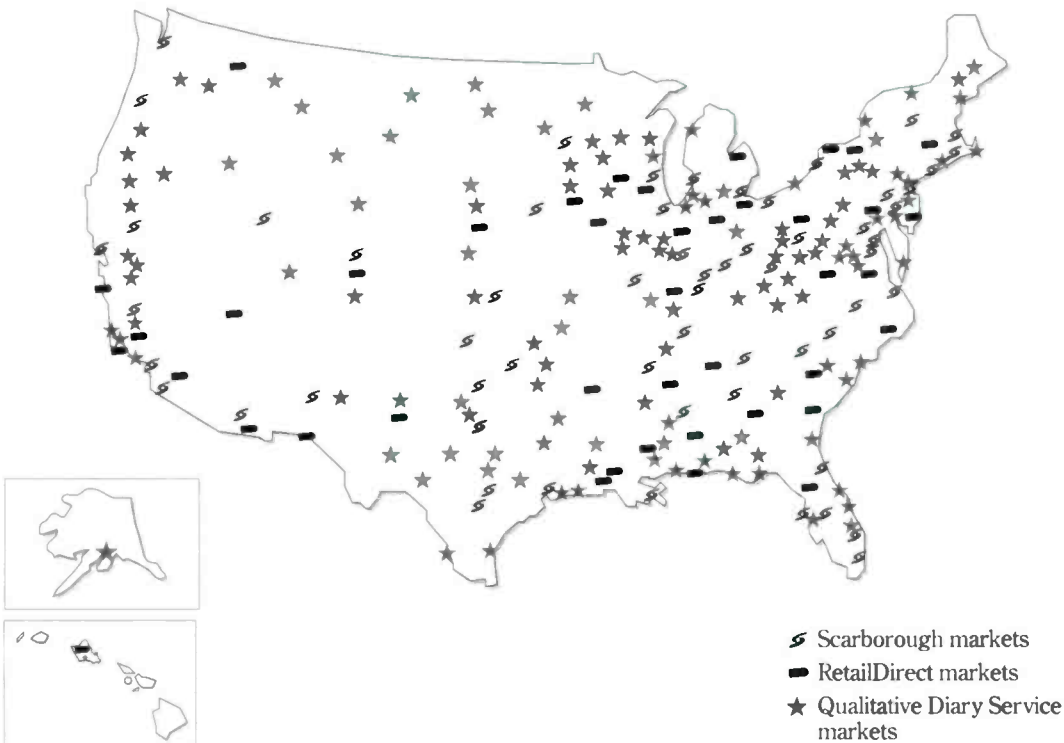

From the Scarborough Report in 60 major markets, to RetailDirectSM in 42 mid-sized markets, and the new Qualitative Diary Service slated for Spring 1997 in 133 markets*, Arbitron provides the right qualitative information tailor-made for the needs of your local market.

Ad dollars gain more power

There's one word that makes a retailer sit up and listen: "customers." With any of Arbitron's qualitative services, you can talk to your local advertisers in the language they want to hear. You can help an advertiser see their customers as they are: their income, education, where they shop, the retail services they use. You can help advertisers find the customers they want to reach, spend ad dollars more efficiently and increase the power of marketing resources with every buy.

Contact your local Arbitron representative for more information about the local market qualitative services that can help your business grow.

**Number of markets as of November 11, 1996.*

SUPERDUOPOLY

It's a whole new game.

Wouldn't you know it, just when you were getting used to LMAs and duopolies, the rules of the game have changed again.

So now how do you win?

Well, we've been around the board a few times ourselves — identifying popular programming to fill desirable niches no one else had noticed, grouping several stations together with formats that dominate their market, helping our clients succeed.

We think that finding the right answers in this new radio game is a function of asking the right questions. And that's exactly what we do: we identify formats that are prime for development, and then help you develop the strategic blueprints to build them...all of them.

If you're interested in cornering your market, please call Mike Henderson, our Director of Sales. We promise that when you pass GO with Paragon, you'll pick up a lot more than \$200.

After 23 Years It Becomes Clear What Really Makes Radio Stations Win.

After 23 years working with hundreds of the leading radio stations in America, we've seen that there is only one thing that is certain and common to all situations: Radio stations don't win just because they have good facilities, good financial backing, or good research.

Those things are certainly helpful. But what we've learned is that radio stations win — first and foremost — because they have a smart winning strategy. And when it comes to the top name in successful marketing strategy, there is only one...

50,000 watts and no static.

LONGTIME
BROADCASTING
EXECUTIVES MICHAEL
O'SHEA, GEORGE
KRISTE AND LANCE
ANDERSON recently
established New
Century Seattle
Partners, L.P., to
acquire and operate
radio stations. When
they wanted advice
on how to capitalize
the new venture,
they had only one

call to make. To us.
With over 25 years
of experience
financing entrepre-
neurial media and
entertainment com-
panies, Union Bank
of California was
their ideal partner.
We recommended a
creative solution
that allowed New
Century to meet sev-
eral objectives:
financial flexibility,

a desirable capital
structure and an
attractive return
on investment. The
senior debt and
equity financing
that we provided
allowed New
Century to close on
their initial station
acquisitions. It was
easy. With Union
Bank of California,
there was no static
at all. Stay tuned.

New Dynamax MX/D Digital Console

The Sensible Solution, Sensibly Priced

- Conventional 8 channel on air layout eliminates special operator training
- Selectable analog and digital input modules enhance future flexibility and usefulness
- A/D input modules with 18-bit precision converters provide digital transparency
- Digital input modules with SRC accept both AES/EBU and SPDIF formats
- XLR input and output connectors simplify installation
- Solid steel construction ensures durability and RF immunity
- Main DSP Board with 24-bit internal processing and 48 kHz sampling rate designed for reliability by industry leader Graham-Patten Systems

Available Now!

Going Digital!

MASTER CONTROL

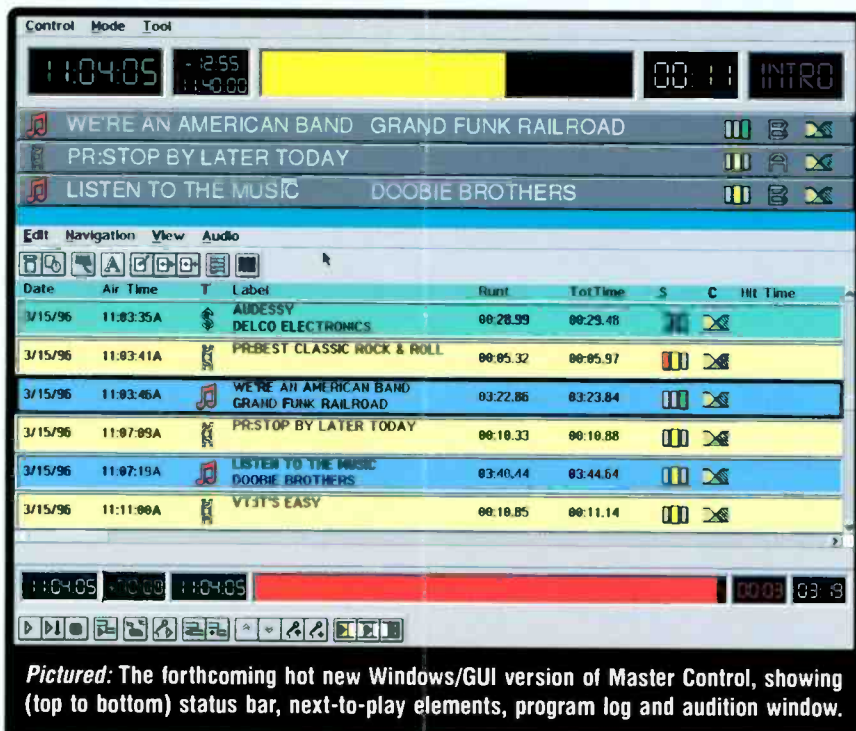

Tested, trusted & proven in hundreds of large & small markets.

“We waited for the digital options to mature and we think RCS has arrived with the best possible solution for us.”

Talmage Ball,
VP/Engineering
Bonneville International

“At WTMX, the RCS Master Control digital system was quick to install and simple to teach the air staff. They love it.”

Drew Horowitz
GM, WTMX/Chicago

Pictured: The forthcoming hot new Windows/GUI version of Master Control, showing (top to bottom) status bar, next-to-play elements, program log and audition window.

Let the Buyer be Smart . . .

ALL systems should have:

- ___ background recording
- ___ split commercial feeds
- ___ phone call editing
- ___ live assist & automation
- ___ voice tracking
- ___ traffic integration
- ___ editing log on air
- ___ hot-key audio carts
- ___ last minute changes
- ___ quick song access
- ___ multi-track editing
- ___ 24 hour support

But ONLY RCS adds:

- ___ Selector-smart automation
- ___ Selector rules guide talent
- ___ station-wide audio
- ___ electronic copy book
- ___ reconciliation to Selector
- ___ full newsroom services
- ___ custom installation
- ___ easy growth
- ___ complete product line
- ___ preloaded library service

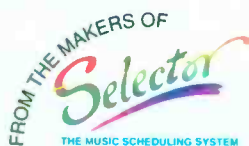

Make sure you get what you need!

. . . better talk to RCS

RADIO BUSINESS REPORT

The voice of the radio broadcasting industry for more than 14 years

Stay totally informed with Radio Business Report's complete and comprehensive coverage of the radio business.

The weekly publication that gets down to the business of radio. The most important news, the most insightful analysis.

Mid-Week News Brief

Delivered via FAX every Wednesday, this is the buzz of the biz—the news before it happens.

Monthly radio intelligence for radio managers to increase ratings, revenues and profit. Sign up now and receive MBR for 1997 at no charge.

Introducing...
RBR's

Information Services Group

Source Guide and Directory The All-Radio Yearbook

The all-radio yearbook that is the undisputed authority on who's who and what's what. Now in its fifth year.

RBR's Guide to the Super Groups

Our up-datable listing of radio's top 50 groups and what stations they own, with revenues, stock analysis, and consolidation stats. As a new subscriber to the weekly Radio Business Report, you'll receive the Guide to the Super Groups at no charge, along with all the updates planned for 1997.

Your total resource for radio business information. Call today and stay informed (703) 719-9500

WELCOME TO
RadioLink

All the Radio Marketing Information You Need to Make the Sale Today!

RadioLink is RAB's marketing resource center on the Internet that allows Radio professionals and advertisers access to the most current information 24 hours a day, seven days a week.

Everything you need to prepare your next needs analysis, develop your next client presentation, or seed your hard-to-get prospects. And best of all, it's affordable. The \$25 monthly fee more than pays for itself in large sales and new orders. In fact, you have to ask yourself just one question: Can you really afford to be without RadioLink?

Cost-efficient access
to virtually every
tool and service
available from
the RAB.
