MAGNAVOX *"Dynamic"* SPEAKERS

Charlie Wellman's "Hot Time Orchestra"
KHJ—Don Lee Station, Los Angeles

The Beverly

Gracefully proportioned cabinet
finished in light mahogany.
For A-Battery Operation . . . \$50
For AC Operation \$60

A fast-stepping orchestra and a Magnavox Dynamic! What more could twitching feet desire? Tingling melody. Swinging rhythm. Ringing volume. And sensational realism of reproduction . . even the *spirit* of the original. Remember Magnavox made the first dynamic . . . and makes the finest.

THE MAGNAVOX COMPANY

Oakland, California Chicago, Illinois

New Call Book is Green

THE nation-wide station changes at last become a reality. Practically all local stations, favorite stations, DX stations and stations seldom heard of, come in at very strange points on the dials. More than ever before a complete and reliable guide is needed at once by every listener-in.

The 1928-29 RADIO DOINGS Call Book is off the press. It contains the last station alterations directly from the Federal Radio Commission's office in Washington. Completeness and accuracy in every detail has been the watchword. At the modest cost of 25c you can get this indispensable guide log today wherever magazines are sold.

Glance at the features that it contains:

CONTENTS OF 1928-29 CALL BOOK

- DIAL-LOG—A pleasant surprise for every listener.
- CHANNEL LISTING—Every station in the United States.
- ALPHABETICAL LOGS—Cross-indexed U. S. Broadcasters.
- AIR LINE DISTANCE TABLE—Nation-wide broadcasting cities.
- CANADIAN STATIONS—Every Dominion station by channel.
- MEXICAN BROADCASTERS—Complete, conveniently arranged.
- TERRITORIAL STATIONS—Alaska, Hawaii, Porto Rico.
- EUROPEAN AND AMERICAN STATIONS, for real DX enthusiasts.
- TRANS-PACIFIC STATIONS—Japan, New Zealand, Hawaii, Australia.
- LOG OF WESTERN STATIONS—Entire list.
- FREQUENCY CHANNEL LIST of all U. S. Stations of 500 watts and up.
- SHORT-WAVE STATIONS, AMERICAN AND FOREIGN.
- EFFICIENT RADIO RECEPTION—Timely article by K. G. Ormiston.

The use of this CALL BOOK will amaze you at the added enjoyment of tuning in. Go to your nearest radio or news dealer and get your copy before he is sold out. Or you can use this coupon. But do it NOW, for it is the only complete Call Book for Western listeners exclusively and you will enjoy its use.

Radio Topics of the Day

A Weekly Review of Radio News, Thought and Opinion

CANADA SITS PRETTY ON NEW WAVES

A particular effort is being made by radio officials to favor Canada in the reallocation. "We are happy to advise," a telegram from the Federal Radio Commission to C. P. Edwards, Canadian director of Radio, reads, "that under the new allocation, effective November 11, no station in the United States, on a channel shared with Canada exceeds 500 watts power, and that no station within approximately 250 miles of the border is using more than 250 watts. On United States shared channels, the commission has established a policy of granting to three times the night power for use during daytime until local sun-down. The commission is withholding any similar action on channels shared with Canada until we obtain your recommendation as to how many times night time power the day time power may be increased on the channels shared by the two governments."

KOLSTER NOW OWNS FEDERAL TELEGRAPH

It has been learned that the Kolster Radio Corporation of Newark now owns approximately 99.7 per cent of the entire capital stock of the Federal Telegraph Company.

Actually, the Mackay System purchased last year the communication properties of Federal Telegraph Company, but did not acquire any of the stock of that company.

Federal Telegraph Company is affiliated with the Mackay System by virtue of a contract under the terms of which Federal Telegraph Company manufactures certain equipment for the Mackay System, in accordance with announcements which have been previously made, but there is no financial inter-linkage between the two organizations.

CHICAGO CASE TO BE RADIO LAW ACID TEST

The suit of the Federal Radio Commission against station WOK-WMBB in Chicago, which, according to Louis G. Caldwell, general counsel of the commission, is expected to develop into the outstanding test case of the validity of the Radio act, is now rapidly approaching the stage of preliminary skirmishes between government counsel and attorneys representing the broadcasting station.

It was this station that advertised in Chicago newspapers that in spite of the fact that it had no license, it would go on the air on October 22.

CAPITAL WOULD SILENCE STREET LOUD SPEAKERS

The raucous volume of radio loud speakers along the sidewalks of the national capital is going to be shut down, if Mayor Edwin B. Hesse, its chief of police, can accomplish his purpose to do so.

Study is being made by police officials to determine whether the loud speakers placed outside radio and other stores in all sections of the city can be shut down through application of the existing police regulations against unnecessary noises.

BROADCASTER MUST TRY OUT ALLOCATIONS

All broadcasting stations going on the air under the assignments made by the Federal Radio Commission in the reallocation effective November 11, will thereby accept licenses for the period beginning on that date and ending February 1, 1929. This three-month period is intended to require each broadcaster to take ample time to try out the new allocation before making a protest to the commission.

Falck

Model 7B

\$199.50

Complete

The Price of the Falck Model 7B, illustrated here, includes Tubes, and a Genuine Magnavox Dynamic Speaker, Model 80.

Why is the Falck so Popular?

The answer is very obvious after you examine and compare this radio. In the first place, no other high-grade set, with as many genuine refinements, can be purchased at so low cost. In addition, because Falck radios are made right in Los Angeles, every Falck purchaser in this territory is guaranteed direct factory service. What more can the hardest-to-please buyer want in radio value?

Falck

ALL-ELECTRIC* RADIO

*Since August, 1926

Any of the dealers listed below will be glad to demonstrate the new Falck Radio to you in your own home, without obligating you in the slightest degree.

in Radio ..

This new Sparton Equasonne is the greatest radio the world has ever known at any price. And don't you buy a radio until you have heard it

Kalter M. Fagan
President Pacific Wholesaler, Inc.

...why? Because the new Sparton Equasonne All-Electric Radio will increase by 300% the number of stations you can hear, at room volume, with satisfaction.

AT LEFT

Usual method of tuning to a peak with consequent spreading of signals which overlap and blanket weaker signals, thus reducing by 66% the number of stations you can hear with satisfaction.

AT RIGHT

Sparton Equasonne method of tuning squarely across the full 10 kilocycle wave channel. No overlapping or blanketing of weaker stations by more powerful stations.

SPARTON EQUASONNE

THE PIONEER ALL-ELECTRIC RADIO

5 models, beautifully encased, \$210 to \$925 complete

Elsa Zelinda Foley, coloratura soprano, has been a staff artist at KNX for over three years and is to be heard regularly over that station. Miss Foley's picture appears on the cover this week.

The Sunny Three, Hawaiian Trio, are to be heard over KPLA every Monday, Wednesday, and Friday evening from 8:15 to 8:45.

Dick Moder and his orchestra are proving very popular on the Dinner Hour program from 6 to 7 every evening over KGFJ.

KTAB has added a Setting-Up Exercise program which goes on the air every morning except Sunday, at 7.

A novelty program of unusual merit in both continuity and musical arrangement will be the feature Sunday evening at 7:30 from KJR, presenting Murray and Harris and the Show Boat Band.

Robert Hurd, popular KFI tenor, will be heard Tuesday evening at 9 in a specially arranged program, assisted by the Packard Concert Orchestra under the direction of Pryor Moore.

KGEN will go on the air November 11 with new call letters, which the manager is confident will be a much better arrangement of letters. The new call letters are KXO, El Centro.

A feature of the New Idea Man's program every morning from 8 to 9 at KMTR is a Funny Story Contest, which closes November 15.

Ray Silverman, popular blues singer, assisted by Esther Kahm, has a feature request program over KGFJ every noon except Sunday.

Gladys Blackwell Pickering, talented staff artist of KHJ, will be heard Sunday evening at 10, assisted by the Viennese Quintet and Wesley Tourtellotte at the mighty Este organ.

Charles Lierly, tenor, and Beth Whitney, soprano, will be heard in a song recital over KSL, Salt Lake, next Friday, November 16, at 8:30 p. m.

KMIC Breakfast Frolic, under the direction of Little Eddie Barnes, the Happy Voice of Inglewood, is a daily feature at 8:30.

KFWB Shopping Directory introduces a different program and many worthwhile announcements every day except Saturday, at 11:30 a. m.

Saturday, November 17, the Majestic Trio, and Alberta and Virginia Farmer, will be heard in a program of music from KFQZ, at 10 p. m.

KEJK's new schedule, beginning November 12, provides for a two-hour program nightly, except Sunday, from 9 to 11, during which period a very excellent ten-piece orchestra will be featured. This aggregation is either a dance orchestra or small symphony, as desired, and together with a vocal ensemble will comprise the backbone of the station's afternoon and evening programs. The reallocation scheme places KEJK in the 1250 kc. channel with KFON, with which station it will share time.

The Blu-Green Gas Boys present a memory contest from KNRC featuring old time numbers, every Thursday night between 9 and 10 o'clock, the prize being a full tank of Blu-Green gasoline and a supply of Monogram motor oil.

? Questions and Answers ?

A Weekly Department Conducted by K. G. Ormiston, I.R.E.

QUESTION—I am interested in putting up a good aerial and a good ground connection. I have a Majestic radio, but I do not get the distance I believe I should get. KFI and KMTR drown out everything between them and on each side for quite a space. KFON and other stations near it are much easier to tune. I am a new fan and have not learned much about radio so far. Have been wondering if I can improve reception by proper aerial and ground arrangements.

J. C. Elmore, Garden Grove, Cal.

ANSWER—Antennas and grounds are very important in attaining efficient operation. They affect not only the range of the set, but also the selectivity. The antenna and ground combination which has been recommended for use with the Majestic is the Preston ground and Bouldin cage aerial. This affords maximum selectivity while maintaining the pick-up necessary to bring in the distant stations. The Majestic is capable of fine DX work, as is evidenced by the great number of letters which weekly come in to the DX Club from owners.

QUESTION—During the KFI broadcast of the Hoover speech from St. Louis, November 2, I heard through the radio a conversation over the telephone in which I could hear the telephone operator and both parties concerned in the phone hook-up. I would appreciate very much an explanation on the cause of this condition.

E. M. Pruitt, Pasadena, Calif.

ANSWER—This broadcast was picked up in St. Louis and carried to New York by telephone lines to the central distributing point of the National Broadcasting Company. Here it was put on telephone lines to the West Coast and then distributed to the stations of the Pacific Network. These telephone lines naturally are bundled together in cables, with countless other lines which are carrying regular phone conversations, and by the process of induction some of the conversations occasionally get into the radio lines and cause what is called

“cross-talk.” Every effort is made by the telephone engineers to eliminate this sort of thing, but in some of the hurried arrangements necessary for the political broadcasts the lines have not been entirely cleaned up, with the resulting cross-talk which you observed. The telephone lines that are used for radio hook-ups must be exceptionally quiet,—an ordinary circuit used for telephone conversations being entirely unsuitable. In the first place, the circuits which are used to carry radio broadcasts must have such characteristics as will permit the transmission of all of the frequencies of the musical scale, while in the ordinary telephone work only a narrow band of frequencies (those of the speaking voice) are needed. Secondly, the output from the telephone circuit, when it finally reaches the broadcast station, is amplified tremendously (millions of times) and the small noises, cross-talk and other imperfections of ordinary telephony would therefore become very prominent over the radio.

It is necessary for telephone engineers to work over these lines to be used for radio hook-ups to reduce all extraneous noises to a minimum, as well as equalize the electrical properties, so that the wide range of frequencies to be carried will be handled uniformly and without distortion. Innumerable amplifiers are inserted along the transcontinental line also, to boost up the speech and music so that a suitable volume will be delivered to the distant radio station which is to broadcast the material.

QUESTION—I have an RF-5 Supreme battery set. It was made in Los Angeles, and is, incidentally, the best five-tube set I have ever owned. Here is what I wish to know: I want to change the audio transformers to something better. Can I use the S-M 255 and 256 to advantage in the change? And will it be worth the cost? My set has unlimited power and I have a log of a

An Ardent Admirer

Two of Mr. Taufenbach's most cherished possessions are his small daughter, Carolyn Jane, and the new Stewart-Warner Dynamic Console. This model is the ultimate in radio—a combination of the cabinetmaker's art, an efficient, powerful radio receiver coupled with the very latest type of speaker, which is the Power Dynamic. The Stewart-Warner sets have met with spontaneous approval by both the dealers and radio public. Stewart-Warner receivers are distributed in Southern California by Western Radio, Inc., 1224 Wall Street, Los Angeles.

The Power Behind KNX!

Naylor Rogers, Manager

Glen Rice, Asst. Manager

Marita Roehl, Studio Secretary

N. D. Garver, Chief Technician

KNX

The photograph shows the new transmitting equipment of KNX. The station is located at Sherman Oaks in the San Fernando Valley, and is an example of the last word in transmission engineering.

While the output of the set is 5000 watts, and this is the power which the station is authorized to use, certain of

The transmitter incorporates the latest developments of the Bell Laboratory engineers, developed at the experimental station, 3XN, Whippany, New Jersey. These improvements include high percentage modulation and positive crystal control of the frequency.

The towers are 250 feet high and sup-

THE NEW KNX TRANSMITTER

the equipment has been installed with sufficient capacity to facilitate the change to 50,000 watts should later developments make this desirable and permissible.

Real efficiency in radio transmission is obtained when a station is designed and built from the ground up in a favorable location, rather than patched into some existing building in a congested area. It facilitates the planting of an efficient ground system directly under the station, and the locating of the transmitter under the center of the antenna, etc.

port a vertical cage antenna, suspended from a cable. Living quarters for the technicians are located right at the station. Telephone lines to the studio on the Paramount lot make connection with the distribution center at that point, where either the various remote control points or the local studios may be connected with the transmitter.

The station has already been well received in every state in the Union, and with the new "cleared channel" assignment after November 11th should carry the message of Southern California to all corners of the continent.

The Most Modern High Power Station In Western America

... for ...

KNX

"The Voice of Hollywood"

Next Sunday, November 11th, station KNX will "move" to the national "cleared channel" awarded by the Radio Commission in its reallocation plan. New studios have been finished on the Paramount Motion Picture lot, and the massive 5000-watt transmitter at Sherman Oaks will hurl the message of Southern California to the world on the new wave-length.

Formal dedication of the new transmitter and studios will be held next Sunday night, when listeners will hear a program such as has never before been attempted in radio broadcast. The audience, whose loyal support is to a large degree responsible for the KNX award of one of the 40 coveted "cleared channels," is invited to participate. KNX will be found on 1050 kilocycles, 285.5 meters.

NAYLOR ROGERS,
Director-Manager

GLEN RICE,
Assistant Manager

Short Wave Club

THANKS, HUGH!

Here is a particularly helpful letter from a S. W. C. member, in that the writer gives details which will aid other fans in picking up the stations mentioned. This is in line with Mr. Dexter's suggestion of last week.

"552 Page St., San Francisco, Cal.,
November 2, 1928.

"Short Wave Club,
"Radio Doings,

"Dear Sirs: I buy nearly every issue of 'Radio Doings,' and I especially like the 'two clubs,' the DX Club and the Short Wave Club. I have noticed that the Short Wave Club hasn't made any reference to CJRX in Winnipeg, Man. CJRX is on 25.6 meters with 2,000 watts and rebroadcast CJRW, in Fleming, Sask. Verifications from them say that they broadcast from 2:30 to 4:30 p. m., Pacific time, every day except Saturday and Sunday, but I receive them nearly every night until at least 7:30. They come in as loud as either of WGY's stations, and only about one point from KDKA.

"I have also received 2XAL (WRNY) on 30.91 meters, one point below W2XAF. The best bet for 2XAL is from 6 to 6:30 Tuesday night. I have also received two phone stations, W6EEQ, in Mount Eden, and one in Marshfield, Ore., as well as 6XAR on 60 meters.

"Yours truly,

"HUGH SHARMAN."

The New KEJK

The new transmitter of KEJK, the Macmillan Petroleum Company's station, located on Wilshire boulevard in Beverly Hills, is now putting out the regular schedules of KEJK. The power is 500 watts, and during the initial tests, conducted after midnight, reports were received from all over the country. The equipment is of Western Electric manufacture and was installed by K. G. Ormiston, technical editor of Radio Doings.

The station employs a vertical cage

Sargent B Stabilizer

E. M. Sargent of the Radio Constructors Corporation, who developed the famous Infradyne and more recently the Sargent-Rayment Screen Grid Seven which is bringing joy to a lot of DX fans who now have more selectivity and range than they thought possible, has announced a new device for the prevention of "motor-boating" when a "B" power unit is used. The device is called the Sargent "B" Stabilizer.

Motor-boating is the name for the "put-put-put" noise which often occurs when eliminators are used on sets which have good audio transformers. Just as feed-back in the radio frequency portion of a receiver sets up oscillations, so does feed-back between the audio stages develop oscillations of an audio frequency. The frequency of the oscillations thus set up is usually very low, due to the values of inductance and capacity in the circuits. The feed-back takes place in the B eliminator where the audio stages are coupled together through the circuits which are common to both.

The Sargent Stabilizer is an electrical filter which serves to isolate the circuits of the radio set from those of the eliminator. While it permits the uninterrupted flow of the direct current which the eliminator supplies to the plate circuits of the amplifier tubes, it blocks the passage of the audio frequency energy and confines it to circuits suitably by-passed by condensers. The filter circuit is made up of choke coils, resistors and condensers. The 135-volt plate lead is equipped with a resistance-capacity filter, and the 45-volt lead an impedance-capacity filter.

The Sargent Stabilizer will improve the operation of any receiver that operates from an eliminator, and is necessary on sets equipped with the new high-grade audio transformers such as the S-M 255 and 256.

antenna similar to that of KNX at Sherman Oaks. These are the first two stations in the Southwest to take advantage of the high efficiency and non-directional properties of this aerial design.

Through the courtesy of the Sunset Mfg. Co. of Los Angeles, a Sunset Aerial will be given each week as first prize, and a Sunset Ground as second prize, for the two best DX letters. In addition, Radio Doings will send a special "Logging Graph" with Map and Distance Chart to the writer of each DX letter published.

FIRST PRIZE

DX Club:

I have a Sparton Radio which is performing with surprising results.

I, like all radio fans, am strong on DX stations. If the air is clear of static, I stay up to the early morning hours to log new stations and get distance. During the past week, from October 15 to 3:45 a. m., October 21, I have logged the following stations:

KFSD, KFOA, KFON, KFWB, WFLA, KOIN, KVOO, KSO, KOMO, WBZ, WIL, KFAA, KFI, KFJL, WELW, KEX, WLW, WSAI, WSM, KDKA, KFCR, KGER, KMIC, KLS, KGB, KFRC, WNAX, KGA, KJR, WOAI, KPLA, WSBC, WTAS, WWL, KNX, KOA, KNRC, KMOX, KGW, KSL, KGO, WLS, KGW, KHJ, KTAB, KWKH, KTHS, WCCO, KGEF, KFWM, WENR, WBBM, WJAD, WBAP, WJBT, KPO, KDYL, WDAF, WABZ, KXA, WCJS, WHT, WGN, KFJZ, KFEL, KFXF, WCAL, WIBX, WMBI, WPG, WOS.

Mexico: CYJ, CYH, CYG.

Canada: CNRV, CKWX, CKAC, CKFC.

Cuba: PWX.

Australia: 3AR, Melbourne.

Japan: JOAK, Tokyo; JOGK, Kumamoto; JOBK, Osaka.

The three stations in Japan can be picked up most any morning about 1 a. m. Can't say very much for their programs. Sunday morning, October 21, JOAK was broadcasting a play; JOGK had children sing; JOBK, a lecture.

According to my set, JOAK broadcasts on a wave length of 350.1 meters, instead of 345 meters as listed.

When I log more stations, will send them in; some local stations I have not logged.

O. Z. WHITT,
237 Spruce St., San Diego, Cal.

SECOND PRIZE

DX Club:

Dear companion Radio Nuts, Bugs, and Cuckoos:

Station WAR, Mars, came in very strong about fourteen years ago, and although we have not been able to get him again, we seem to have done very well with what we have here on this old world. And who knows but what in a few more years we may be able to hear other planets!

I may not be able to do it with my present Majestic 71, but there will probably be a Majestic then that can do it. I've just had it a short time and here are all the stations I have had this past week: Thirty-five California stations, one Arizona, three Oregon, four Washington; CNRC, Vancouver, B. C.; KSL, KFBU, KMMJ, WCCO, WENR, 9XF, KFKB, KDYL, KFKF, WGN, WHO, WJJD, WLW, W8XAL, KMOX, WBAW, KTHS, KWAP, WFAA, CYJ, and last, but not the easiest, JOAK, Tokyo, Japan, and JOHK, Sendai, Japan; also a few that I have not been able to verify because of interference or static, and one that spoke Spanish without announcing during the time I heard him, and who, judging from the approximate wave length, might be OYY, Merida, Mexico. There's sixty-nine anyway and some uncertain ones. Is this enough to qualify me for a season membership?

Signing off at 11:1:28, Pacific Standard Radio Season.

W. E. R. CRAWFORD,
144 East Elm Ave., Fullerton, Cal.

DX Club:

Three weeks ago I purchased a Sargent-Rayment Screen-Grid 7 receiver, and for those fans desiring information

K.C.

Selectivity

De Luxe Model Sargent-Rayment Screen Grid Seven

When You Go "DX" Hunting

You need the Sargent-Rayment Seven. When you hunt ducks you do not always have the limit, especially if you are out in the game. If you do not get back any, you will not get that reason condemn the sport of hunting, but will place the blame where it belongs—on conditions beyond your control. At any rate, you will not take your gun back to the store and ask for money back because it did not bring down any ducks.

DX hunting—one of the most fascinating of winter sports—is very similar. To start with, you need the right equipment. We provide you with that. Then you have to learn how to use it. You will require more than one night in which to become proficient. Our instrument is more than just a single-dial receiver. It has other adjustments which are necessary for high sensitivity. It has been designed especially for long distance receiving and nothing has been left off which would in any way aid in accomplishing better results.

After you have learned to operate the set, you are still subject to receiving conditions and other things beyond your control. That is where the sport comes in. It's in knowing how to get the most out of your receiver, and in being on the job when conditions are right, the dial filled with carrier waves, and half of them singing of a "W".

You can buy ducks at the meat market, but you would rather have the fun of going out after them yourself. So can you get all back and be content with local reception—until you accidentally run into a "DX" carrier. After that, the fun is on.

Verniers on Every Stage

It is a well-known fact that five condensers, ranged on the same shaft, will not contribute to uniform even the slightest irregularity in plate spacing, an almost intangible factor in DX hunting. The vernier might be enough to throw off the tuning and lose an otherwise readable signal from a "DX" station. The same condenser used in the Sargent-Rayment Seven is the result of a year on the market. We most carefully selected and tested every condenser until after examining and testing almost every competitive condenser. It has wide spacing between plates. All necessary adjustments are provided for. Still, for real "DX" tuning, we would not have been safe in leaving off the verniers. And the set has been designed only for local and coastwise reception, these verniers could have been put inside the cabinet. For long distance reception, every circuit must be in resonance and the only way to insure this is to have necessary adjustments where they are readily accessible. It means the difference between a crude, approximate factory adjustment and a finely balanced meshine.

Tuning

Those New Wave Length Allocations

The new wave length allocations have now been corrected and published in their final form, and in a few days will be effective. Just what does this mean, from the point of view of the average radio fan on the Pacific Coast? Without getting too technical, we can say at once that it will probably result in remaining heterodyne whistles from all stations on wave lengths higher than 500 meters. Your favorite station will probably be found in different parts of the dial after November 11. There will be wide open gaps between locals, leaving a chance to tune in several middle western and eastern stations. Clear channels are provided for receiving all the way across the continent. No longer will we have to sit up until 10 p. m. and get a "test" program to hear the Atlantic Coast. Receiving conditions being right, it will now be possible to tune in WJAF and WJZ during early evening hours, providing your set has enough power to bring in these stations. If you own a Sargent-Rayment Seven—try it. The best time to hear them is about half an hour after sunset.

A Word about "All Electric Operation"

Your vacuum cleaner is "all-electric" and runs from the house lighting current, but it doesn't use A.C. tube. Neither does the Sargent-Rayment Seven. For this receiver we have chosen the D.C. tube for two very good reasons: first, their regulation for stable operation and freedom from trouble, and second, because the D.C. tube has back of it 15 years of field experience and has been tested in our own research laboratories. We consider it a noteworthy fact that when marketing their latest and most sensitive radio frequency tube, both RCA and General Electric used a D.C. filament in it. We refer to the vacuum grid tube.

"All-electric" operation is accomplished by rectifying the house current, then filtering it, after which it is suitable for radio use. These procedures insure all the line noise and a great part of the fluctuation and make for really practicable A.C. operation. The Knapp "A" power or similar units are recommended as "A" supply for the Sargent-Rayment Seven.

Prices

The deal "B" Power Supply!

For the Sargent-Rayment Seven

We wish to take this opportunity to endorse a really good power amplifier and "B" supply. We refer to the Silver-Marshall No. 675 ABC, illustrated herewith. Development of high power audio tubes has resulted in an increased demand for a power supply that would handle the 210 and 250 tube. This one will do it. It has voltage taps for 225, 135, 90, 22 to 90 variable, and 22. A CX-101 tube is used as a rectifier, giving a world of power in reserve. The Sargent-Rayment Seven will take the 350 tube right in the last audio socket. Provision was made for this when the set was designed. It is only necessary to change two filament wires, and run the leads out to the 7 1/2 volt filament supply posts on the SM-675.

Silver-Marshall 675 ABC

Stop That Motor-Boating! Something New Sargent "B" Stabilizer

Here, at last, is a device that will stop your set from "motor-boating" on a "B" eliminator. "Motor-boating" is audio oscillation, and is caused by feedback through power supply devices. The Sargent-Rayment Stabilizer is an additional filter of special design, that completely isolates the radio set from the power supply and prevents feedback.

**Especially Recommended for
SARGENT-RAYMENT SEVEN
SUPER-HETERODYNES
INFRAHYDRES
TUNED RADIO FREQUENCY
RECEIVERS**

Anyone can install it in five minutes.
Absolutely guaranteed.

S-M Short Waver

The reception of England, Holland, Siberia, Japan and Australia by Pacific Coast short-wave fans is becoming almost an everyday occurrence. As a result there is an unbounded enthusiasm in short-wave work and a great demand for kits and parts to make up receivers. The small three and four tube sets which are used are so inexpensive and are capable of opening up such a vast field for exploration and DX hunting, that it is little wonder many new experimenters daily tune in on the short-wave zones.

Among the short-wave sets which enjoy the greatest popularity is the Silver-Marshall "Round-the-World Four." This compact little four-tube set is completely shielded in an aluminum cabinet and employs a screen grid tube ahead of the regenerative detector. This tube gives some amplification while at the same time taking out the "dead spots" which would occur were it not present, and preventing radiation from the antenna when the detector tube is allowed to oscillate.

There are four coils which may be successively plugged into a 5-prong socket on top of the cabinet, providing four tuning ranges. The total range is from 17.4 meters to 204 meters.

There are two dials, one controlling wavelength and the other regeneration. A knob operates a rheostat in the detector filament circuit, and is not used for tuning after once adjusted.

In tuning the set it is well to remember that to find a station, the right dial must be turned above the "plunk" point so that the station squeal may be easily found, and the left dial rotated, with proper coil in place, to find squeal. Once a squeal is found, the right dial should be retorted, bearing in mind that broadcast programs will be loudest when it is just below the point where squeal disappears, whereas code will be the loudest when the right dial is just above the point where the squeal disappears.

Although not confirmed officially, it was said if the Radio Commission keeps on making changes, far from cutting down the number, as was intended, more wave lengths will be used by stations in Chicago, after the reallocation—November 11—than there were before.

St. Louis Fans Storm Radio Commission

Nineteen hundred St. Louis listeners started something new when they chipped in from 5 cents to \$5, raised a fund of \$3,000, and sent a delegation of forty men and women, elected by popular vote, to the capital to register a personal protest with the Radio Commission against the broadcasting hours of KWK, their favorite radio station being cut, as it will be if it is obliged to divide time with station WIL, another St. Louis station, as ordered, November 11.

The commission is quite accustomed to receiving hundreds of thousands of telegrams and letters—these come in bales. Also witnesses brought to Washington by interested stations. However, this is believed to be the first time "Vox Populi," as Commissioner O. H. Caldwell humorously put it, has ever descended upon the commission in person.

Nor, once here, were they diverted from their purpose by attractive sight-seeing trips and a beautiful Fall day, but every single one of them attended a hearing, where they were packed in a small, stuffy room from 10 o'clock in the morning until midnight, with only short intervals for meals, which, incidentally, is believed to be a record for a continuous session of the commission.

NOTE

Due to the chaotic conditions resulting from the sweeping changes to take effect Sunday, November 11th, many broadcast stations either failed to submit programs for publication, or sent us programs in which they failed to allow for the time-sharing required by the ruling of the Commission.

Many of the printed programs in this issue are therefore inaccurate, through no fault of ours, and we beg the indulgence of our readers.

Every effort will be made to obtain for publication the correct schedules and programs of all stations for next issue.

SM

Hear London's Big Ben Chime in Your Own Home

Not with any ordinary radio receiver, of course—the Atlantic is too broad. But an S-M "Round the World" short-wave set will do just that—quite regularly. Turn yours on some night—don't be surprised if you hear a foreign language, or if the announcer mentions "Paris" or "Amsterdam" or "London" instead of the cities you are accustomed to hear from. Call your neighbor to listen—but be cautious—your wonders may be tame to him. Perhaps he has an S-M short-wave set too! For in short waves almost anything is possible.

S-M 730 "Round the World," complete 4-tube set, with aluminum cabinet; factory wired, \$66; complete kit, \$51.

S-M 731 "Round the World" 2-tube adapter with same cabinet (converts any set to short waves), factory wired, \$46; or kit \$36.

S-M 732 Essential Kit, \$16.50.

New S-M Audios

You will marvel at the tone quality provided in the new S-M sets by S-M Clough-system transformers. They are unconditionally guaranteed to give better results than any other type, regardless of price. Try a pair. Large models (No. 225, first stage; No. 226, second stage), \$9.00 each; small models (No. 255, first stage; No. 256, second stage) \$6.00 each.

Write the factory for free 24-page catalog and sample copy of the RADIOWUILDER.

You Get Everything in the S-M 720 Screen Grid Six

Ten to fifteen kilocycle selectivity; distance range you can't get without standard (D.C.) screen grid tubes; the finest tone quality that up-to-the-minute inventions have only now made possible; clean, accurate construction with easy assembly; modern design and lower price, made possible by quantity production. These are the points you'll look for in your 1929 receiver, and you'll find all of them and more in the new S-M 720. It is "way above the market" in value and "way below the market" in price. Why go further? Custom-built complete with S-M 700 Metal Shielding Cabinet, \$102; complete kit, less cabinet, \$72.50.

MARSHANK SALES COMPANY

Southern California Representative

224 East Sixteenth St.

Los Angeles, Calif.

SILVER-MARSHALL, INC., 876 West Jackson Blvd., Chicago, U. S. A.

(Continued from Page 27)

regarding the distance ability of the set, I have enclosed my log to date:

Fifty-four Pacific Coast stations, and the following: KDKA, WBBM, WJBT, WYW, WBAP, WLW, WGN, WCCO, KWKH, KDYL, KSL, KFAD, KOB, WSB, WGN, KFBB, KMOX, KGBU, KFJM, KFBU, KOA, CFCN, and KFPL, a 15-watter in Texas.

Also JOAK, JOBK, JOCK, JODK, and 2YA, 5CL.

The secret of good distance lies in the aerial and ground and patience—I wish I had more of the latter.

Yours for a successful DX season.

Respectfully,

A. S. DUNANN,

837 Portal Ave., Oakland, Calif.

DX Club:

I have become an ardent DX fan in the month we have had a Majestic 71. Have an inside aerial, 43 feet long, partly insulated, connected to the S. A. post. My ground is much too long, 16 feet—in fact, I get about the same results from connecting the ground wire to the antenna post.

Here is my log, arranged in the order of increasing distances. I am not including, of course, 19 stations in Los Angeles county and one at Santa Ana. The 42 distant stations follow: KFSD, KQW, KFAD, KFL, KTAB, KGO, KFWI, KFRC, KYA, KPO, KGW, KSL, KDLY, KOB, KFUP, KFXF, KOA, KLZ, KOIN, KEX, KGW, KFOA, KOMO, KJR, KHQ, CNRV, WFAA, WFDM, WBAP, WTHS, KMMJ, KFAB, KFNF, KMA, WHO, WCCO, KMOX, WGN, WLW, W8XAL.

As for Jap stations, so far have failed to get call letters, but have heard four Japanese stations on Oct. 13 and 20, between two and four o'clock in the morning. (1) On my dial at 49, just above KHJ, before KMA comes on at 4 a. m. (2) On 45, just above KNRC. (3) On 40, exactly KFWB. (4) And 35.5, just above KNX, almost K^WWG.

Can anyone tell me what station—not SSL—is operating on 990 k. c., 302.8 meters? I caught the announcement distinctly, 4:30 a. m., Oct. 18, but a

blast of static drowned out the call letters.

When can the Mexican stations be heard? I got a program in Spanish at 4:20 a. m., Oct. 18, on approximately 384 meters, but it faded out completely after about four minutes. What are the wave lengths of some of the Mexicans?

Another question: Isn't there any Hawaiian station? If so, what wave length?

Very truly yours,

W. R. BIGGER,
Riverside, Cal.

DX Club:

Can't you find a place for a member who is just starting in. I have a five tube T. R. F. set and so far this year I have logged the following: WDAF, KMOX, KFAB, KFBC, KFAD, WBBM, KWKH, KOB, CNRV, CKLC, KSL, KOA, WGN, KDKA, KFBU, CFCN, KNX, KFL, KFWB, KFOA. This log is not bad, and it was all done with the help of your little Red Book. It is a great help in getting DX, and I will tell my friends about it.

Wishing you luck,

DAN B. WHEELIHAN,
720 Linden St., Oakland.

DX Club:

May I make my bow to the DX Club and give the results I have obtained with the new Radiola 60 Superheterodyne. Have logged thirty-seven stations in the state of California, thirty-eight stations in the U. S. outside of California, six Japanese stations, two Canadian stations, and one Australian station.

Am listing the stations outside of the state of California for the benefit of anyone interested: KEX, KFJR, KGW, KJR, KMO, KOIN, KOMO, KVI, KFBU, KDYL, KLS, KFAD, KOA, KFEL, KFXF, KGHF, KLZ, KOW, WBAP, KFJB, KOB, KFAB, KFNF, KDKA, KMA, KMMJ, KMOX, KOIL, KSO, KTNT, KWKH, WCCO, WENR, WGN, WJJD, WLS, WNAX, WGY.

Japanese stations: JOAK, JOBK, JOCK, JOF'K, JOGK, JOHK.

(Continued on Page 75)

Majestic will build 1,200,000 all electric Receivers in 1929

THE HIGHBOY
Seven Tubes. Self-
Contained Dynamic
Power Speaker,
\$213
Less Tubes

The tremendous and unprecedented demand for Majestic All Electric Radio receivers has made it necessary for the manufacturers of this "much talked about" equipment to greatly increase their factory facilities. Radio enthusiasts who do not, for one reason or another, purchase Majestic this year, can be assured of immediate delivery at any time in the new year that is fast approaching.

If you are a lover of good music...if you like trouble-free radio reception...you'll appreciate the performance of Majestic Electric Radio. Hear it for yourself...then you'll KNOW why radio enthusiasts in Southern California alone have purchased more than 115 carloads of Majestic in less than 5 months.

[Any of the Majestic dealers listed on the two following pages will gladly,
and without obligation, demonstrate Majestic Radio in your own home.]

DAILY

9:00 p. m.—Time broadcast (except Saturday).
10:00 p. m.—The Trocadero's Dance Orchestra, except Monday.

SUNDAY, NOVEMBER 11

1:30 p. m.—Peerless Reproduction program will observe Armistice Day with a "World War" music.
Broadcast over KHQ, KOMO, KGW, KGO KPO and KFI.
3:30 p. m.—Sunday Afternoon Concert will bring ninety minutes of music by Eva Gruninger Atkinson, contralto, Easton Kent, tenor, and the National Concert Orchestra.
Broadcast over KOMO, KGW, KGO and KFI.
4:30 p. m.—Biblical Drama period will dramatize the story the biblical parable "Thou Faithful Servant."
Broadcast over KHQ, KOMO, KGW, KGO and KFI.
7:30 p. m.—"An Armistice Cycle" containing a number of songs favorites appropriate to Armistice Day.
Broadcast over KHQ, KOMO, KGW, KGO and KFI.
9:00 p. m.—Atwater Kent program brings five selections of a pleasingly light character.
Broadcast over KHQ, KOMO, KGW, KGO, KFI and KPO.

MONDAY, NOVEMBER 12

6:45 p. m.—"A Week of the World's Business"
Broadcast over KHQ, KOMO, KGO.
7:00 p. m.—"Mars" will be the theme of Henry M. Hyde's talk on the wonders of the sky. Miss O'Dea, contralto, and Harold Dana, baritone, are the soloists and The RCA Orchestra under Max Dolin are the instrumentalists.
Broadcast over KHQ, KOMO, KGW, KGO, KPO and KFI.
8:00 p. m.—Rudy Selger's Shell Symphonists will entertain the radio audience for an hour tonight, opening with "A Waltz Dream."
Broadcast over KHQ, KOMO, KGW, KGO, KPO and KFI.
9:00 p. m.—Song Paintings presents solos and duets by Gail Taylor, soprano, and Myron Nisley, tenor.
Broadcast over KHQ, KGO.

TUESDAY, NOVEMBER 13

10:30 a. m.—"Woman's Magazine of the Air"
Broadcast over KHQ, KOMO, KGW, KGO, KPO and KFI.
8:00 p. m.—"Neil Gwynne" is the comic opera shown by the Eveready program for presentation.
Broadcast over KHQ, KOMO, KGW, KGO, KPO and KFI.
8:30 p. m.—Light and classical music, featuring principally the melodies of Spain, will be offered to listeners by Amazo's Gitanos.
Broadcast over KHQ, KOMO, KGW, KGO, KPO and KFI.

WEDNESDAY, NOVEMBER 14

10:30 a. m.—"Woman's Magazine of the Air"
Broadcast over KGW, KGO, KPO and KFI.
7:30 p. m.—Yellow Cab Gayeties will bring William and Suzanne, the Master and Mistress of Ceremonies before the microphone.
Broadcast over KPO and KFI.
8:30 p. m.—Cheer with Juan brings the "Four-Gladstators" in a program reminiscent of football story of some years ago.

National Broadcasting Co., Inc.
PACIFIC COAST NETWORK

Broadcast over KHQ, KOMO, KGW, KGO, KPO and KFI.

9:00 p. m.—"Jack and Ethyl, The Motor Mates," will be present again tonight to tell of their glorious adventure traveling up and down the Pacific Coast.
Broadcast over KHQ, KOMO, KGW, KGO, KPO and KFI.

THURSDAY, NOVEMBER 15

11:30 a. m.—Standard School Broadcast illustrates the use of the legend as a basis for operatic stories.
Broadcast over KHQ, KOMO, KGW, KGO, KPO and KFI.
8:00 p. m.—Selberling Transcontinental program opens with the Selberling Singers presenting for the first time Vaughn de Leath's "Gingerbread Brigade."
Broadcast over KHQ, KOMO, KGW, KGO and GFI.
7:30 p. m.—Standard Symphony Hour is devoted to music of Carl Maria von Weber.
Broadcast over KHQ, KOMO, KGW, KGO and KFI.
9:30 p. m.—Memory Lane presents a radio dramatization built around the incident of "Miss Malvina" who went to New York to be in a play.
Broadcast over KOMO, KGW, KGO.
8:00 p. m.—Irving Kennedy, tenor, will sing special Max Dolin arrangement of "Believe Me If All Those Endearing Young Charms" during the Maxwell House Coffee Concert broadcast.
Broadcast over KHQ, KOMO, KGW, KGO, KPO and KFI.

FRIDAY, NOVEMBER 15

10:30 a. m.—Mammy Sperry will entertain her radio guests in her kitchen.
Broadcast over KHQ, KOMO, KGW, KGO, KPO and KFI.
5:35 p. m.—Land O'Health program takes listeners to Fruit Center.
Broadcast over KHQ, KOMO, KGW, KGO.
8:00 p. m.—A gay trio of Sparmen will present a "Billy-Billy Love Song" as the feature number of the Whiggy Review.
Broadcast over KHQ, KOMO, KGW, KGO.
8:00 p. m.—"Chicago Rufferty" will be featured by the General Independents as the opening number on their weekly broadcast.
Broadcast over KHQ, KOMO, KGW, KGO, KPO and KFI.
8:30 p. m.—Chopin Nocturnes will be presented by Charles Gabriel, Jr., and Max Dolin in their half hour.
Broadcast over KHQ, KOMO, KGO and KFI.
9:30 p. m.—Moon Magic will enchant listeners who tune in at this period.
Broadcast over KOMO, KGW, KGO.

SATURDAY, NOVEMBER 17

7:00 p. m.—Lucky Strike Hour features "The Beautiful Blue Danube" and "Tales from the Vienna Woods."
Broadcast over KHQ, KOMO, KGW, KGO, KPO and KFI.
8:00 p. m.—"Saranoff and Company," a dancing group of Russian dancers will make their radio debut on the Philco program.
Broadcast over KHQ, KOMO, KGW, KGO, KPO and KFI.
9:00 p. m.—Earl C. Anthony program celebrating the opening of the new Earl C. Anthony Inc. building at Oakland, California.
Broadcast over KGO, KPO and KFI.
9:00 p. m.—"Uncle Tom's Cabin" will be dramatized by the Golden Legends period.
Broadcast over KHQ, KOMO, KGW.
10:00 p. m.—Professor Herman Schnitzel, humorist, will act as Master of Ceremonies during the Big Show period. The usual array of NBC talent will be present.
Broadcast over KOMO from 10:00 to 11:00 p. m.; KGO and KPO from 11:00 to 12:00 p. m.; KHQ from 10:00 to 12:00 p. m.

They Win Preference by Performance

GREATER sensitivity, clearer reception and longer tube life are the cardinal features that have won legions to the use of CeCo Tubes and the endorsement of the leading radio engineers of the country.

One of the contributing factors making these features possible is the exclusive CeCo process of evacuation—a process used by no other radio tube manufacturer.

Let actual performance be the convincing evidence! Insert the proper CeCo tube in each socket of your set. A CeCo dealer will gladly advise what types of CeCo Tubes to use to obtain the best results.

THE RICHEST TONE IN RADIO

Gilfillan Radio

**“Unique—Alone—with
its Golden Overtone”**

*Gilfillan
Radio 44*

The winning slogan in our contest emphasized the superior ability of Gilfillan Radio to reproduce more overtones, therefore making Gilfillan Tone richer, more brilliant and more life-like than any other. Everyone should hear it before buying a Radio.

This is Model 44, 7 tubes, one dial, completely shielded, AC operated, Jensen Dynamic Speaker, Push-Pull Power. Complete with tubes, \$388.

NEW HI-Q RECEIVERS

Custom-built To Any Pocketbook!

10 K. C. SELECTIVITY . . . AB. SOLUTE FLAT TOP TUNING... COAST-TO-COAST RECEPTION... NEW TONE QUALITY... SCREEN-GRID TUBES . . . SHIELDED STEEL CHASSIS . . . CONCEALED WIRING . . . SIMPLIFIED CONSTRUCTION.

Again Hammarlund-Roberts announces advancements in construction and performance that will be marveled at throughout the entire radio world.

Instead of merely one outstanding Custom-built receiver as in past years, we announce FOUR wonderful instruments—Junior D.C., Junior A.C., Master D.C. and Master A.C. that establish totally new standards in radio design.

The new Master Hi-Q typifies the marvelous efficiency of the entire line of 1929 Hi-Q's. A five-tube stage-shielded receiver, built upon a solid steel chassis, using the very finest parts in the industry, including the new screen-grid tube. A BAND-PASS FILTER effects absolute FLAT-TOP square cut-off TUNING for the first time to our knowledge in radio history. FLAT-TOP TUNING with 10 K.C.

MASTER HI-Q 29

The outstanding feature of this set is the Hi-Q Band-pass Filter, which actually effects FLAT-TOP TUNING within a 10 K. C. band. Also screen-grid tubes, completely shielded, concealed wiring. Master Hi-Q 29 complete without cabinet, \$99.50. Master A. C. Hi-Q 29 complete without cabinet, \$151.80.

selectivity! "Cross-talk" impossible because you cannot receive more than one station at a time, even in large cities where many powerful stations are broadcasting!

The Master Hi-Q 29 is a real "coast-to-coast" instrument. Stations absolutely "CLICK" in—sharp, clear, definite. No hum, no buzz, no oscillation—nothing but the pure, natural signal exactly as it is delivered to the microphone. Wonderful sensitivity. Wonderful selectivity. And tone quality that simply cannot be described.

The other three new Hi-Q 29 Receivers have similar qualities—each the fullest value in radio world—each a finer instrument than any ready-built receiver selling at \$50 to \$100 more money.

Send Now for Our 80-Page Manual

Biggest and most complete book ever published. Tells how to build the 4 new Hi-Q Receivers. Photos and diagrams illustrate every detail. Covers power amplifiers, tube and battery combinations, antennae, installation, short-wave adapters, house wiring and a wealth of other data on custom-built radio. Price 25c. Hammarlund-Roberts, 1182-P Broadway, New York.

—with many types of resistances from which to choose, it is highly significant that the most important radio and electrical laboratories and manufacturers in this country have standardized on DURHAM Resistors, Powerohms and Grid Suppressors. The reasons are plain. *First* — there is a DURHAM Resistance unit for every practical need up to 100 megohms. *Second* — the DURHAM Metallized principle has proved its utter superiority for years. *Third* — DURHAM accuracy and uniformity can be relied upon regardless of the type of unit or the purpose for which it is used. Each succeeding year sees more manufacturers, laboratories, professional radio men and dealers and jobbers endorsing DURHAMS. Descriptive literature on the DURHAM line gladly sent upon request.

Seven Foreign Stations

with Sunset Ground

In a recent
all night test
at Balboa, K.
G. Ormiston
played three
Australian
and one New
Zealand sta-
tion on an A.
C. set, using a
Sunset Ground
as an aerial.
This is just an-
other instance
of the wonder-
ful efficien-
cy of this im-
proved
Ground. Recep-
tion is 50%

better than with ordinary grounds. Costs
only \$2.25. Made by the manufacturers
of the Sunset Selective Aerial. At all
dealers.

ALL over the country they are praising this wonderful improvement that blocks out line interference noise and radio frequency disturbances. Plug in a Falck Claroceptor between your receiving set and wall socket. You won't get any more of that man-made "static" from motors, street cars, telephones, electrical appliances, etc. An absolute necessity to clear reception in some locations. Also improves selectivity and distance.

A Falck Claroceptor requires no changes in your set. Measures just $3\frac{1}{2} \times 5\frac{1}{2} \times 2\frac{1}{2}$ inches. Tested, proved. Get one right away—only equipment of its kind. At radio parts dealers, or write to factory for new descriptive folder FREE.

\$7.50

*complete with
cord and plug*

Falck CLAROCEPTOR

Manufactured by ADVANCE ELECTRIC CO.
1256 W. Second St., Los Angeles
JOBBER AND DEALERS. GET OUR PROPOSITION

Gilfillan Contest

The exciting Gilfillan Radio slogan contest came to an end on October 27. For several weeks Gilfillan Brothers have been putting on a very enjoyable organ program over KNX from 6:30 to 7; they announced that the winner of a ten-word or less slogan which would most adequately describe the marvelous Gilfillan Tone would receive one of their new models free of all cost.

Many thousands of letters were received and it took many hours for the committee to make their decision as

to the most appropriate slogan, which according to the rules must be on Gilfillan Radio tone. The writer of the winning slogan was Miss M. A. Foshay, 2022 West Adams street, Los Angeles. Miss Foshay is the principal of the Twenty-fourth street school and has lived in Los Angeles for many years. She is an ardent music lover and her ability to grasp the fundamental thought with regard to the rich Gilfillan tone enabled her to write the winning slogan, which is: "Gilfillan Radio Unique—Alone with Its Golden Over-Tone." In

A new model 44 was delivered to Miss Foshay at her home address on October 28. She is shown above with it. Miss Foshay was the happiest person in Los Angeles to know that she was the winner of such a beautiful radio with "Its Golden Over-Tone."

Timely Trade Topics

C. W. Smith, manufacturer of the well-known line of Royale cabinets, reports that the demand for the complete line is rapidly increasing. These beautiful cabinets met with instant approval with both the trade and the radio public. Mr. Smith is increasing his manufacturing facilities so that he can take care of the large quantity of orders that are being placed.

Ed. W. Watkins, well-known president of the Electric Supply Company, 370 Eleventh street, Oakland, Calif., has gone in strong for the mail order business. He will soon be off the press with five thousand nice new catalogs, and states that he will be glad to send one of these catalogs to any dealer in the West who writes in and requests one.

The Stromberg-Carlson Company has opened up a new warehouse and office at 766 East 12th street—phone Westmore 0115—under the management of Mr. R. E. Stone.

Q and A

(Continued from Page 18)

great many stations throughout the United States. The tone of the set might be improved, I believe, and hence this inquiry.

C. W. H., Los Angeles.

ANSWER—Yes. Your set is an old one, and there have been some very decided improvements in the matter of audio amplification recently which will enable you to obtain modern tone quality by rebuilding the audio end of your set. The Clough audio system is an outstanding example of how the new conception of fine tone quality may be obtained at moderate cost. The transformer you mention (they are not really transformers, but are called such for the want of a better name) would give you a quality equal to the best of modern sets, providing the proper B and C voltages are used and a good speaker. The circuit diagram was given in the October 27th issue of Radio Doings.

Work is progressing on the new building being erected for the Powell Mfg. Co., manufacturers of power units, transformers and the "Powell 10" all electric receiver.

The Atlas Coil Co., manufacturers of the Atlas power amplifier, are now occupying their new manufacturing plant at 1916 East Colorado street, Pasadena, Calif., and are now in full production on their various types of power amplifiers.

DX Club

(Continued from Page 45)

Canadian stations: CNRV, CKGW.

Australian station: 2BL.

The majority of these stations have been logged in the last two weeks; have only had my set three weeks, but was used to operating Radiola, having used one of the Radiola 17's before getting the 60 Superhet. Have tested several types of arials, but have obtained best results from an indoor type, using forty feet of No. 22 double cotton covered copper wire, run behind the picture molding; also underground type has given very good results, all six of the Japanese stations coming in clearly on this type.

Yours for "More and Better DX,"

O. L. AU BUCHON,
Box 296, Encanto, Calif.

DX Club:

I enjoy reading your little red book, and especially the DX letters. I have a Sonora AC set and so far have received the following stations this month: KOIL, KSL, KPO, KGW, KFRC, KEX, KTAB, KFWI, KOB, WENR, WBBM, KFBN, KOMO, WBSAL, KMMJ. Got JOBK, 3 a. m., October 23. I have written to them to get it verified.

Yours for More DX,

JAMES M. CAMERON,
728 W. Popular St., Compton, Cal.
