| 5.0    | 21.79 | 10.0   | 30.00 | 15.0   | 35.71 | 20.0   | 40.00 | 25.0   | 43.30 | 30.0   | 45.83 | 35.0   | 47.70 | 40.0   | 48.99 | 45.0   | 49.75 | 50.0   | 50.00 |

Note: When a rating is greater than 50.0, use the value given for a rating equal to 100.0 minus the original rating. For example, if the rating were 87.3, use the value shown for a rating of 12.7 (100.0 - 87.3).

## Instructions

### Estimating the Reliability of Audience Ratings Estimates

The reliability of a survey estimate is generally defined in terms of the estimated margin of sampling error around the estimate, or *confidence interval*. The confidence interval describes the extent to which a survey estimate, based on a random sample of a population, may vary from the result that would be obtained through a complete census of that population. (See Page M5, Paragraph 14, for further information.)

Confidence intervals can be obtained for any rating in the "Listener Estimates" section in this report in two steps: (1) determine an estimated standard error and (2) use this estimated standard error to construct a confidence interval around the rating.

#### 1. Determine an estimate of standard error:

**a.** For AQH and Cume ratings, select the rating for which you want to obtain the standard error and locate the corresponding Table A value. For example, the corresponding Table A value for a 2.9 rating is 16.78. Table A values represent the square root of (the rating x [100 - the rating]); therefore, Table A values are constant across all markets and surveys.

**b.** For AQH ratings, select the demographic group (down the side) and the daypart (across the top) for the corresponding Table B value. For Cume ratings, select the demographic group (down the side) for the corresponding Table B value in the first column.

Table B values are the square roots of the Effective Sample Bases (ESBs) for each market and survey; therefore, Table B values vary from report to report. For example, a hypothetical Table B value for a Metro AQH rating for Men 25-54, Mon-Fri 6AM-7PM might be 93.14.

**c.** Divide the Table A value by the Table B value to obtain an estimated standard error. Using the example above,  $16.78 \div 93.14 = 0.18$ .

#### 2. Use the estimated standard error to construct a confidence interval around the rating:

**a.** The rating +/- one standard error will yield a 68% confidence interval. In the above example,  $2.9 \pm 0.18$  yields a confidence interval of 2.72 to 3.08. Interpretation: The user can be 68% confident that a survey of all Men 25-54 would yield a Mon-Fri 6AM-7PM AQH rating between 2.7 and 3.1.

**b.** The rating +/- (1.64 x the standard error) yields a 90% confidence interval. In the above example,  $2.9 \pm (1.64 \times 0.18)$  yields a confidence interval of 2.61 to 3.20. Interpretation: The user can be 90% confident that a survey of all Men 25-54 would yield a Mon-Fri 6AM-7PM AQH rating between 2.6 and 3.2.

**c.** The rating +/- (1.96 x the standard error) yields a 95% confidence interval (compute as in (b) above), and the rating +/- (2.58 x the standard error) yields a 99% confidence interval (compute as in (b) above).

**Estimating Reliability for Projected Numbers of Persons/** To estimate standard error (and construct confidence intervals) for Persons estimates rather

than ratings: (1) Convert the Persons estimate into a rating.  $([Persons + the population] \times 100)$ . (2) Determine standard error using the instructions above. (3) Convert standard error for the rating into standard error for the Persons estimate.  $([Standard error \times the population] + 100)$ . (4) Use the Persons estimate +/- one standard error for a 68% confidence interval; use the Persons estimate +/- the standard error multiplied by 1.64, 1.96 or 2.58 to get 90%, 95% or 99% confidence intervals, respectively.

### Estimating Effective Sample Base (ESB) Sizes/

Approximate ESB for sex/age groups and dayparts can be obtained by squaring Table B values. For example, the estimated ESB for M25-54, Mon-Fri 6AM-7PM, with a hypothetical Table B value of 93.14 would be 93.14 squared, or 8675. (See Page M5, Paragraph 15, for further information on ESB values.)

## For Additional Methodology Details

Please refer to the *Arbitron Radio Description of Methodology and Arbitron Replication II: A Study of the Reliability of Radio Ratings* for further discussion of the above and a discussion of more complex applications.

## Limitations

Although Arbitron believes the above-described procedures provide report users with useful estimates of standard errors, the reader should note the limitations described in Paragraphs 14-16 and 18-21 herein on Pages M5-M6.

# Description of Methodology

## Introduction

The following Description of Methodology is applicable to the data and estimates contained in the "Listener Estimates" section of this report. A more detailed description of Arbitron methodology can be found in a separate publication titled *Arbitron Radio Description of Methodology* and in other associated relevant documents, made available by Arbitron to all Arbitron syndicated Radio Report subscribers. In the event that the separate publication titled *Arbitron Radio Description of Methodology* conflicts with the "Description of Methodology" printed herein, the latter is considered the more current Description of Methodology.

## The Market

**1. The Market/**An Arbitron Radio Market can be composed of up to three geographic areas: the Metro Survey Area (Metro), the Total Survey Area (TSA) and the Designated Market Area (DMA®). These areas are composed of counties and/or county equivalents. (A county equivalent generally consists of an independent city or geographic split portion of a whole county.) A geographic split county is defined as one or more zip codes within a county and is based on zip code information from 1990 Census data, as updated annually by Market Statistics.

### a. Metro Survey Area (Metro)

The Metro Survey Area is the primary reporting area of local radio. Arbitron Radio Metros generally correspond to the federal government's Office of Management and Budget's (OMB) Metropolitan Areas. A radio Metro may deviate from its respective OMB definition due to topographical, sampling, or other considerations. The OMB updates its Metropolitan Areas every 10 years, based on the new decennial census data.

For areas that do not have an OMB-defined Metropolitan Area, Arbitron usually defines the Metro Survey Area to include the county (ies) of the majority of the local area stations' city (ies) of license. Additionally, Arbitron may consider such factors as: the historical market definition(s), local trade and commuting patterns, local radio listening patterns, and input from its subscribers.

Changes to an existing Metro definition will be considered by Arbitron upon receipt of a formal request from at least 75 percent of subscribing station owners. If there are fewer than four subscribing station owners in a market, the request must be made by all subscribing station owners for Arbitron to proceed.

Before a formal request is filed, Arbitron will provide a subscribing station owner with reports that will allow a subscriber to determine the commuting and listenership data for existing Metro counties and any county contiguous to the current Metro.

**NOTE:** All existing Metro counties and all counties adjacent to existing Metro counties are subject to the Metro evaluation. The two criteria that determine whether evaluated counties are included in the Metro definition are: (i) at least 55.0 percent of listening quarter-hours from the county must be credited to existing Metro stations, and (ii) at least 15.0 percent of commuting from the county must be into the existing Metro. **Metro evaluation results are final — and automatic.** This rule applies even if the evaluation finds that one or more counties should be removed from the existing Metro. Changes in Metro geography implemented through this process will remain in effect for at least three (3) years.

### b. Total Survey Area (TSA)

The TSA of an Arbitron Radio Market is designed to provide a comprehensive measure of listening to Metro-licensed radio stations. The TSA is composed of the Metro and any additional counties (or county equivalents) that meet certain criteria for inclusion.

TSA definitions are based on historical radio listening patterns and are updated biennially based on the syndicated diary data used for the most recent County Coverage study [excluding any extra sample used for Custom Survey Area Reports (CSARs)]. The specific criteria for adding, retaining, or deleting non-Metro TSA counties are outlined in a separate publication titled *Arbitron Radio Description of Methodology* and in other associated relevant documents.

### c. Designated Market Area (DMA®)

The DMA is composed of counties and/or county equivalents, and is defined and updated annually by Nielsen Media Research, Inc., based on historical television viewing patterns. A county or county equivalent is assigned exclusively to one DMA.

Arbitron reports radio listening estimates for the Top 50 DMAs (ranked on TV households) in the Radio Market Reports of all Arbitron standard radio markets whose Metros are located within the DMA and whose names are contained in the DMA name.

## Sampling & Measurement Techniques

**2. Sampling Methodology/**Survey sample targets are established for the Metro and, if applicable, the non-Metro TSA and/or the DMA. Sample targets are then established for each sampling unit proportional to its Persons 12+ population in the respective survey area subject to minimum sample requirements for Radio County Coverage. The amount of sample ordered is determined by dividing the sampling unit target by the expected rate of response based on previous survey(s) sample performance and other factors.

For each 12-week survey period, a new sample of telephone numbers is computer-selected for each sampling unit through the use of a systematic interval random selection technique. Listed and unlisted telephone numbers are randomly generated using the random digit dial (RDD) technique. Sample RDD numbers are generated from telephone "hundred blocks" containing at least 10 listed residential telephone numbers based on current telephone listings as provided and updated by Survey Sampling, Inc. (SSI). These qualifying hundred blocks comprise the sample frame for each sampling unit. Known residential names and addresses are appended to sample telephone numbers not listed in current telephone directories. Known nonresidential telephone numbers (e.g., businesses, institutions) are excluded from the sample frame. The sample of telephone numbers is then randomly divided into approximately equal weekly groups for diary placement calling.

If a need for additional sample arises after the original sample has been selected by the computer, then such additional sample is generally selected in the same manner and from the same sample frame as the original sample.

**3. Arbitron Radio Listening Diary/**The Arbitron radio survey is a prealerted, telephone-placed mail survey. The survey instrument, Arbitron's seven-day radio listening diary, is self-administered and designed to be personally maintained by all individuals

12 years of age and older (Persons 12+) in each sample household, up to a maximum of nine persons. The diary contains a varying number of questions (depending on the market/market segment) regarding socioeconomic characteristics of the survey participant(s). Bilingual (Spanish-English) diaries, which include a three-part language preference question, are provided to all survey participants in the Metro of a Hispanic-controlled market who have identified themselves as Hispanic in response to an ethnicity question or from whom ethnic information was not obtained, and to any others indicating a preference for a bilingual diary.

Premiums of varying monetary amounts are provided to encourage respondent cooperation.

**4. Diary Placement and Retrieval/**Initial contact with listed sample households is by mail, informing them of their selection and that an interviewer will be calling to request their cooperation in the survey. Generally, initial contact with unlisted sample households is by telephone, when an interviewer calls to request participation in the survey.

Arbitron interviewers call selected telephone numbers to: ascertain the possibility of a media affiliation; gain consent for participation in the survey; determine the number of Persons 12+ living in the household at the time of the placement call; and, where applicable, determine the race/ethnicity and demographics of the household. Households with more than nine persons 12 years of age and older and media-affiliated households are ineligible for survey participation.

Interviewers are instructed to make a number of attempts to reach every telephone number in the sample. These attempts are made at different hours of the day and evening. Arbitron then sends diaries directly to consenting sample households.

In addition to follow-up by mail from Arbitron, the interviewers are directed to make further contact(s) with consenting sample households by telephone to: make sure the diaries have been received; assist members of the household in understanding the diaries' purpose; answer any questions; remind the diarykeepers to return their diaries after the survey week; and thank them for their participation in the survey.

Explicit instructions are provided to each interviewer, and validation checks are regularly conducted to help ensure that instructions are being properly followed.

## Processing Techniques

**5. Processing of Diaries/**Arbitron makes reasonable efforts to utilize all returned diaries. However, some returned diaries are determined by Arbitron to be unusable. Among those that are unusable are diaries that Arbitron determines: are incomplete; are post-marked and/or arrive before or after established dates; or that otherwise lack essential information. The total number of in-tab diaries may differ from the sample target.

Usable diaries are prepared for computer processing in accordance with procedures listed in the *Arbitron Diary Processing Radio Edit Training Manual* and in other associated relevant documents. The listening information in the diaries is then computer-entered so that certain verifications and edits can be made. These include ascension procedures, the allocation of credit for aberrated call letters, and other analyses and pretabulation preparations.

## Calculating Techniques

### 6. Calculation of Estimates/

#### a. Sample Balancing

The weighting system used by Arbitron, sample balancing, is an iterative marginal weighting technique designed to compensate for disproportionate in-tab from specified marginal classes. Marginal weighting means that in-tab diaries are weighted to represent the population for each specified marginal class. The number of geographic marginal classes (e.g., counties, county equivalents or county clusters) will vary. The number of sex/age marginal classes is generally 16. In addition, markets that are race and/or ethnically controlled are sample balanced so that in-tab diaries from the race/ethnic group are weighted to represent the population of that race/ethnic group. As a result of this cumulative weighting, a Persons-Per-Diary Value (PPDV) is computed for each in-tab diary. The PPDV is the number of persons that diary is estimated to represent.

#### b. Computing Cume Persons Estimates

Station Cume Persons estimates are computed by summing the PPDVs for each diary in which a station received listening credit for the time the station is on the air within a daypart. PPDVs are summed for all diaries within the particular demographic group (e.g., Men 18-34, Persons 25-54), then rounded to hundreds.

#### c. Computing Average Quarter-Hour (AQH) Persons Estimates

Station AQH Persons estimates are computed by multiplying, for each diary, the number of quarter-hours of listening to a station for the time the station is on the air within a daypart by that diary's PPDV. The result of this multiplication is summed for all diaries within the particular demographic group, then divided by the number of quarter-hours the station is on the air within the same daypart, then rounded to hundreds.

#### d. Computing 4-Book and 2-Book Averages

4-Book and 2-Book Averages are applicable to Continuous Measurement and Fall/Spring markets, respectively. 4-Book and 2-Book Averages are averages of rounded audience estimates computed for the total demographic group and daypart for each applicable survey. A 4-Book or 2-Book Average is computed for a station if the station is reported in the applicable Radio Market Report for each survey included in the average. A zero value is used for survey(s) for which an estimate did not appear for a station reported in the Radio Market Report. A 4-Book or 2-Book Average is not shown if a station is not reported for one of the surveys to be averaged.

#### e. Rounding of Calculations

Rounding occurs at various stages in the calculation of audience estimates at demographic and daypart summation levels.

#### f. Broadcast Hours

(i) Local time differences within a market that overlaps time zones are accounted for by adjusting to the time observed by the majority of counties in the Metro of the market being measured. (ii) Only one set of sign-on/sign-off times for a station is used in calculating audience estimates for a market report. Arbitron uses the sign-on/sign-off times reported for the month closest to December and the shortest broadcast day within that month as provided by the affected radio station. (iii) Audience estimates are adjusted for the station's broadcast schedule as reported to Arbitron. However, when a station changes sign-on/sign-off

time(s) during an Arbitron survey period, the times used in calculating audience estimates are based on the sign-on/sign-off times in effect on the last day of the survey period as reported to Arbitron. (iv) Stations broadcasting for less than an entire reported daypart are indicated in the Radio Report by a footnote symbol next to the station's call letters or audience estimates for the applicable daypart(s). (v) Stations broadcasting for less than an entire daypart must be on the air for a minimum of four quarter-hours on each day of the applicable daypart in order to be reported in that daypart. (vi) Stations should notify Arbitron in writing of any changes in the station's sign-on/sign-off time(s) as soon as they occur but no later than the day after the last day of the survey.

#### g. Technical Difficulties

Generally, no adjustments are made to either diary entries or published audience estimates for periods of technical difficulty. The notation of technical difficulties on Page 13 is to assist users of this report in making their own evaluation of the audience estimates. Arbitron will accept information on technical difficulties up to the day after the last day of the survey.

#### h. Stations on the Air Less Than 12 Weeks

No adjustments are made to the reported estimates for a station that does not broadcast for the entire survey period. Since the time a station is off the air is counted as zero listening in the 12-week average, the reported estimates for a station that is on the air less than the entire survey period could understate the audience for the time the station is on the air.

## Criteria for Reporting Stations

**7. Criteria for Reporting Stations/**To be listed in an Arbitron report, a radio station must engage in systematic regular commercial broadcasting pursuant to the authority of the Federal Communications Commission (FCC) or other appropriate governmental authority. Call letter designations exceeding four characters are shortened to four characters. Generally, reported call letters are the FCC-authorized call letters in effect on the last day of the survey as reported to Arbitron. In the event a station has changed call letters during the survey period, the first call letters listed in the report are those in effect on the last day of the survey, with the station's previous call letters noted immediately below them.

Arbitron maintains a call letter history based on information provided by radio stations, the FCC and other sources. In the event of exchanges of frequencies between stations in a market, the call letters under which audience estimates are published in this report are based on Arbitron's verification and interpretation of information from various relevant sources, which include the FCC and the affected stations. Specifics regarding the above are listed on Page 13 of this report.

All radio stations, commercial and noncommercial alike, are measured using the same methodology and are included in Metro, TSA and/or DMA Totals. All commercial stations are evaluated using the Minimum Reporting Standards (MRS) as described in Paragraphs 8 and 9. Noncommercial stations are not eligible to be listed in this report and are not considered in MRS evaluations. For report qualification purposes, stations are considered commercial or noncommercial based on their status as of the last day of the survey as reported to Arbitron. Audience estimates for a station that does not meet MRS cannot be obtained in any way from the audience estimates published in this report, including the Target Listener Trends estimates from prior survey periods. However, individual audience estimates for commercial stations that do

not meet MRS for this report and noncommercial stations may be obtained through other Arbitron services for which the stations qualify.

**8. Minimum Reporting Standards (MRS) for Nonsimulcast Stations/**A commercial station that does not simulcast with another station is included in this report if it has met all of the following Minimum Reporting Standards for the Metro or, if applicable, the DMA among Persons 12+ during the Monday-Sunday 6AM-Midnight daypart for the current survey of the market:

a. The station must have received five or more minutes of listening in a quarter-hour in at least 10 in-tab Metro diaries (10 in-tab DMA diaries for DMA qualification), and

b. The station must have a Metro Cume rating of 0.495 or greater (DMA Cume rating of 0.495 or greater for DMA qualification), and

c. The station must have a Metro Average Quarter-Hour rating of 0.05 or greater (DMA Average Quarter-Hour rating of 0.05 or greater for DMA qualification) for the time the station is on the air during the Monday-Sunday 6AM-Midnight daypart for the current survey of the market.

**9. Minimum Reporting Standards (MRS) for Simulcast Stations/**MRS for simulcast stations are generally based on the percent of quarter-hours in the Monday-Sunday 6AM-Midnight daypart (when both stations are on the air simultaneously) that the two stations simulcast for every week of the current survey:

a. 9.49 percent or less – Each station must independently meet the criteria used for nonsimulcast stations. (See Paragraph 8.)

b. 9.50 percent to 90.49 percent – If one of the two stations meets all MRS criteria described in Paragraph 8, the second station is included in the report if it (i) meets the criteria of Paragraphs 8(a) and (b) and (ii) achieves an Average Quarter-Hour rating of 0.05 or greater for any one of the four basic Monday-Friday dayparts, i.e., 6AM-10AM, 10AM-3PM, 3PM-7PM, 7PM-Midnight.

c. 90.50 percent or greater – If the combined audience of the two stations is sufficient to meet all criteria of Paragraph 8, then both stations will be listed in the report even though one (or both) stations might not meet the MRS criteria if considered individually, so long as each station received a mention in at least one in-tab diary in the market anytime during the 24-hour/7-day survey week.

**10. Home and Outside Stations/**Any Metro-qualifying station that is licensed to a city located within the Metro of a market, or that has requested Metro home status and is recognized under Arbitron's policies and procedures as having an acceptable alternate city identifier, is listed in the market report as a home station. However, if two stations are partially or totally simulcast and one of the two stations is a home station, both may be treated as home stations. A station can be home to only one Metro, unless a station is licensed to a Metro that is embedded in another Arbitron Metro. All other stations are classified as outside stations. For reports containing a DMA section, outside stations are further classified into: (a) outside the Metro but home to the DMA, or (b) outside the Metro and the DMA. Within each reporting classification, U.S. stations are listed alphabetically followed by non-U.S. stations listed alphabetically.

### Simulcast Reporting

**11. Station Information/**Stations that simulcast for 9.50 percent or more during the Monday-Sunday 6AM-Midnight daypart are listed on the Station Information page in alphabetical order within Home/Outside reporting classifications (see Paragraph 10) with their simulcast partner noted in parentheses next to their call letters. Simulcast partners are further distinguished with the following indicators: \* denotes 10 to 50 percent simulcasting; † denotes 51 to 90 percent simulcasting; ‡ denotes 91 to 100 percent simulcasting.

**12. Special Notices/**Stations that simulcast for 9.50 percent or more during the Monday-Sunday 6AM-Midnight daypart are listed in Special Notices on Page 13 of this report, along with an indication of the dayparts for which they simulcast 100 percent.

**13. Station Lineup/**If two stations simulcast for 9.50 percent or more during the total Monday-Sunday 6AM-Midnight daypart, the stations are reported in the following order for all dayparts: (1) For AM/FM simulcast partners, the AM station is listed in alphabetical sequence within the lineup of qualifying stations within Home/Outside reporting classification (see Paragraph 10) with its FM simulcast partner listed immediately below it; (2) For same-band simulcast partners, the stations are listed together in alphabetical sequence within the lineup of qualifying stations within Home/Outside reporting classification (see Paragraph 10), based on the alphabetical position of the first simulcast partner.

### Statistical Reliability

**14. Sampling Error/**Arbitron estimates are subject to the statistical variances associated with all surveys which use a sample of the universe and, additionally, to all of the factors described in Special Notices and Paragraph 16. Approximations of the sampling error can be developed by use of Tables A and B included herein. These tables were derived from an empirical study which employed "Jack-Knife Replication." This study, published by Arbitron, is titled *Arbitron Replication II: A Study of The Reliability of Radio Ratings*. Tables A and B produce estimates of sampling error at the one standard error (one sigma) level. However, users of this report should keep in mind that, due to the factors discussed in Paragraph 16, the reliability of Arbitron estimates, data and reports and their statistical evaluators cannot be determined to any precise mathematical value or definition.

**15. Effective Sample Base (ESB)/**Estimates of the Effective Sample Base indicate the size of a simple random sample (in which all diaries have equal value) that would be required to provide the same degree of reliability as the in-tab sample actually used to produce the audience estimates in the "Listener Estimates" section in this report. The statistical reliability of such estimates depends on the ESB and only indirectly on the number of diaries tabulated. Statistical reliability is also affected by factors described in Paragraph 16. Approximations of ESBs may be determined by squaring the values in Table B of this report. The Arbitron formula for estimating ESBs is based upon the empirical study referenced in Paragraph 14. This formula takes into account overlapping Metro sample designs (Embedded Metros) and differences in return rates among sampling units, the individual sex-age categories and race/ethnic groups, where applicable. As a general rule, ESBs for all Cume

estimates will be less than the number of in-tab diaries, and ESBs for all Average Quarter-Hour estimates will be larger than the ESBs for Cume estimates and may be greater than the number of in-tab diaries for the applicable demo. This is due to the intraclass correlation of the listening between quarter-hours for the various dayparts.

### Limitations

**16. Limitations/**In addition to sources of possible error described elsewhere in this report, the user should be aware of the following limitations:

**a.** The sample is drawn from telephone households. Persons in nontelephone households are thereby excluded from the sample frame. Known commercial establishments and other known nonresidential facilities listed in directories are specifically excluded from the sample frame. Steps are taken during diary placement calling to further exclude: business or other nonresidential telephone numbers inadvertently included in the sample; residents of media-affiliated households; and group quarters residences containing ten or more individuals 12 years of age and older. Additionally, all possible telephone listings may not be included in the directories available to Survey Sampling, Inc. when Arbitron places its sample order, which may affect the identification of qualifying telephone hundred blocks. Such excluded persons may have listening habits which differ from those included in the survey.

**b.** Effort is made to exclude households with a media affiliation. The inclusion or exclusion of such households from the sample is dependent upon information revealed by the sample household in response to Arbitron's media affiliation question at the time of the diary placement call, or at any time thereafter.

**c.** There may be instances where Arbitron instructions are not followed by the interviewer. Also, the interviewer may not be under the direct control of Arbitron, because independent marketing research suppliers are used by Arbitron.

**d.** Nonresponding persons may have listening habits that differ from those of respondents.

**e.** Nonresponding persons and other limitations in the original designated sample prevent the in-tab sample from being a perfect probability sample.

**f.** The sample design and/or response patterns may preclude proportional representation of certain groups within the population such as ethnic groups, racial groups, persons in certain income or education groups, or persons whose primary language is other than English. Such persons may have listening habits that differ from other persons.

**g.** The limitations in data from Market Statistics are inherent in the Arbitron estimates based thereon. The population estimates from Market Statistics used in designing and weighting the sample are based upon the decennial U.S. Census and are subject to all the limitations inherent therein. In addition, population estimates are subject to limitations such as sampling errors, errors in locating undocumented populations, and processing and recording errors. Furthermore, the sources used by Market Statistics to update populations between decennial Census dates may not include adjustments for known or unknown over- or undercounts of various segments of the population, including undocumented population groups. In addition, annual population updates may be based on the results of sample surveys and are subject to their respective limitations.

**h.** Zip code information (including information supplied by diarykeepers) used to produce this report is subject to defects and limitations that are inherent in Arbitron estimates based thereon.

**i.** Diaries, or portions thereof, may be completed improperly if the diary instructions are not followed by diarykeepers. Such diaries may be unusable and excluded from the survey. Some diary entries may have been made on the basis of hearsay, recall, diarykeeper approximations or could have been influenced by comments made by the interviewer or others to diarykeepers.

**j.** Human and computer processing errors may occur before or after the diaries are received by Arbitron. Consequently, the degree of variance in the data may be greater than that expected from sampling variance alone.

**k.** The data upon which Arbitron has based its in-tab sample weighting, including racial or ethnic identification, may not be precise.

**l.** Defects and limitations found in data supplied by others are inherent in Arbitron estimates based thereon.

**m.** Data analysis, preprocessing preparation, ascertainment of the data, or postsurvey week telephone validation calls may affect diary listening entries before the data are projected. Diaries, or portions thereof, may thereby be modified or excluded from the survey. These procedures may affect the audience estimates or a station's ability to meet MRS.

**n.** Arbitron conducts research involving new methods of improving cooperation of diarykeepers and/or securing additional information from such persons. Occasionally, a portion of this research may be integrated with actual surveys and, if and when so done, may cause the degree of variance in the data to be greater than that expected from sampling variance alone.

**o.** Certain data, such as when a station was on and off the air, facilities, call letters in effect, station name claimed, format, programming, Sales Representative, network affiliation(s) and time periods when two stations were simulcast or separately programmed, are based on data supplied by stations, the FCC, industry publications or notices and/or other sources. These data may not be accurate or timely. Some of the data may affect the way certain audience estimates are reported.

**p.** Situations in which stations use or have used the same call letters or frequency, or have changed call letters or frequency, may result in diarykeeper confusion in correctly identifying the station to which the listening occurred.

**q.** Rounding occurs at various stages in the calculation of audience estimates, at demographic and daypart summation levels. Due to rounding, mathematical manipulation by the user of estimates for narrow dayparts and/or demographic groups in the Radio Market Report may produce a result which may be incongruent with estimates for broader dayparts and/or demographic groups also contained in the Radio Market Report.

**r.** Reported trends estimates may not be comparable over time due to: methodological or operational changes; changes in survey area definitions or populations; conditions not under Arbitron's control, such as changes in station operations/facilities/special activities; or other factors.

**Retention of Survey Materials**

**17. Retention Schedule/In-tab** Arbitron diaries used for the compilation of the most current estimates published in this report are retained in the form of electronic images for one year from the date on which this report was first mailed to subscribers by Arbitron. Unusable diaries and other survey materials are retained in paper format or electronic image for one year from the date on which this report was first mailed to subscribers by Arbitron. After such time, diaries and other survey materials are destroyed. Subscribers to this report are reminded that any special tabulations of previously published estimates should be ordered before the end of the retention period. Similarly, subscribers to this report interested in scheduling an electronic review of the Arbitron in-tab listening diaries used for this report may do so upon proper appointment with Arbitron's Client Services department in Columbia, MD.

**Special Notices**

**18. Special Notices/**To the extent that any provisions contained in this description of methodology are inconsistent or conflict with any provision contained in the Special Notices on Page 13 of this report, such Special Notices are deemed to supersede and/or amend this description of methodology.

**Reservation of Rights**

**19. Reservation of Rights/**Arbitron reserves the right to exercise its professional research judgment in modifying, waiving or suspending any policy, procedure or element of methodology that would appear to Arbitron to be unreasonable, illogical or impractical in light of known conditions.

**Disclaimer of Warranties**

**20. Disclaimer of Warranties/**Arbitron makes no warranties, express or implied, concerning: data gathered or obtained by Arbitron from any source; the present or future methodology employed by Arbitron in producing Arbitron data or estimates; or the Arbitron data or estimates contained herein. All Arbitron data and estimates represent only the opinion of Arbitron and reliance thereon and use thereof shall be at subscriber's own risk.

**Restrictions on Use of Report**

**21. Restrictions on Use of Report/**All Arbitron radio audience estimates, together with the map contained herein, are confidential, proprietary to and copyrighted by Arbitron. They are provided to Arbitron clients pursuant to the terms of both written license agreements between Arbitron and such clients and the restrictions and limitations on use printed herein. All Arbitron audience data and estimates are for the exclusive use of Arbitron clients and their authorized representatives and may be disclosed only to advertisers, prospective advertisers and their agencies for the purpose of obtaining and retaining advertising accounts and through advertising or promotional literature. Any commercial use of Arbitron audience estimates or data for the purpose of selling advertising time or space by or on behalf of broadcast, cable, or print media must be under the terms of a written license agreement between that medium and Arbitron specifying permitted uses. For an Arbitron client to divulge any data or estimates to a nonsubscribing station, or, unless specifically permitted by Arbitron, to lend and/or give a copy and/or a reproduction of any part of any report to any nonsubscriber, including print media, advertisers and/or their agencies, constitutes a breach of the license agreement between Arbitron and client and violation of copyright law. Quotations by clients of the estimates as allowed by this section for purposes of advertising or promotion must identify Arbitron as the source and that Arbitron's data and estimates are copyrighted. Users of this report should also mention that the audience estimates are subject to all qualifications and limitations stated in the Arbitron report. Arbitron recommends that the appropriate market, survey period and kind of audience estimate be stated (e.g., Boston, Spring 1999, Metro Survey Area, Monday-Friday 3PM-7PM, Average Quarter-Hour Estimates, Men 18-34).

A subscriber to any particular report may not use the demographic data or audience estimates printed in the "Target Listener Trends" section which reference a market report to which they did not subscribe.

Neither this report, the map contained herein nor any audience estimate may be used in any manner by nonclients of Arbitron without written permission from Arbitron.

Users of audience estimates are referred to the current policies of the Federal Trade Commission relating to the use of audience estimates.

## Selected Arbitron Terms

**Average Quarter-Hour Persons**/The estimated average number of persons who listened to a station for a minimum of five minutes within a reported daypart. The estimate is the average of the reported listening for the total quarter-hours the station was on the air during a reported daypart. This estimate, expressed in hundreds (00), is reported for the Metro, TSA, and DMA, where applicable.

**Average Quarter-Hour Rating**/The Average Quarter-Hour Persons estimate expressed as a percentage of the appropriate estimated population. This estimate is reported for the Metro and, where applicable, the DMA.

**Average Quarter-Hour Share**/The Average Quarter-Hour Persons estimate for a given station expressed as a percentage of the Metro Total Average Quarter-Hour Persons estimate within a reported daypart. This estimate is reported for the Metro only.

**Cume Duplication**/The percentage of estimated Cume Persons for one station that also listened to a second station. This estimate is reported for the Metro only.

**Cume Persons**/The estimated number of *different* persons who listened to a station for a minimum of five minutes in a quarter-hour within a reported daypart. (Cume estimates may also be referred to as *cumulative* or *unduplicated* estimates.) This estimate, expressed in hundreds (00), is reported for the Metro, TSA, and DMA, where applicable.

**Cume Rating**/The estimated number of Cume Persons expressed as a percentage of the appropriate estimated population. This estimate is reported for the Metro only.

**Daypart**/A time period for which audience estimates are reported (e.g., Monday-Friday, 6AM-10AM; Weekend 10AM-7PM).

**Designated Market Area (DMA®)**/Nielsen Media Research, Inc.'s geographic market design which defines each television market exclusive of others based on measurable viewing patterns. Every county (or county equivalent) in the United States is assigned exclusively to one DMA®.

**Diary Mentions**/The number of different in-tab diaries in which a station received credit for at least one quarter-hour of listening.

**Diarykeeper**/Any individual that Arbitron determines to be eligible to receive and who is sent survey materials.

**Effective Sample Base (ESB)**/An estimate of the size of a simple random sample which would be required to produce the same degree of reliability (amount of sampling error) as the sample for a complex survey such as Arbitron's.

**Ethnic Composition**/Audience estimates for Total, Black and/or Hispanic persons expressed in hundreds (00), ratings and composition percents. Ethnic composition estimates are based on total Metro in-tab diaries and are reported for the Metro of ethnically controlled markets only if at least 30 Black and/or 30 Hispanic diaries, as appropriate, are in-tab for the Metro.

**Exclusive Cume Audience**/The estimated number of Cume Persons who listened to only one selected station within a reported daypart. This estimate is reported for the Metro only.

**Group Quarters**/For Arbitron sampling purposes, group quarters refers to living arrangements such as college dormitories, military barracks, nursing homes and prisons, plus dwelling units of 10 or more individuals. However, residents of college dorms, military housing, etc., are considered eligible to participate in the survey if the telephone number is assigned to a private telephone serving fewer than 10 individuals.

**High-Density Area (HDA)**/A zip code-defined sampling unit that may be established in a county within the Metro of an ethnically controlled market. The specific criteria for establishing, retaining, or eliminating an HDA are outlined in a separate publication titled *Arbitron Radio Description of Methodology*.

**Home Station**/Generally, any station licensed to a city located within a particular Arbitron radio Metro (or a reported Nielsen Media Research, Inc. DMA). A station that is not licensed to a city within an Arbitron radio Metro may be granted "home" status, if it meets certain criteria. (See Page M4, Paragraph 10.)

**In-Tab Sample**/The number of usable diaries tabulated in producing the report.

**Listed Sample**/Sample telephone numbers for which names and mailable addresses are published in telephone directories.

**Listening Locations**/Locations for which audience estimates are reported (At Home, In Car, At Work, Other).

**Metro In-Tab/Target Index**/The ratio of the number of Metro in-tab diaries to the Metro sample target, generally expressed as a whole number.

**Metro Survey Area (Metro)**/The primary reporting area for local radio. Metro survey area definitions generally correspond to the federal government's Office of Management and Budget's (OMB) Metropolitan Areas, subject to exceptions dictated by historical industry usage or other marketing considerations as determined by Arbitron.

**Metro Totals or DMA Totals**/Total reported listening to radio in the Metro or DMA (could refer to AQH or Cume estimates). Includes listening to reported stations, nonqualifying commercial stations, noncommercial stations, cable-only stations, and unidentified stations.

**Minimum Reporting Standards (MRS)**/Criteria used to determine which stations qualify to be listed in this report. (See Page M4, Pars. 8-9.)

**Outside Station**/A station that is not "home" to a particular Metro and/or DMA. (See "Home Station.")

**Persons-Per-Diary Value (PPDV)**/The numerical value assigned to each in-tab diary for the purpose of projecting audience estimates to the entire 12+ population in a market. The PPDV reflects the number of persons in the geographic/sex/age/ethnic (if applicable) group represented by each in-tab diary after sample balancing has been performed.

**Rating**/(See "Average Quarter-Hour Rating" and "Cume Rating.")

**Respondents**/Sampled persons who provide information in response to survey questions.

**Response Rate**/The ratio of in-tab diaries to the Estimated Persons in Usable Households, generally expressed as a percentage.

**Sample Frame**/The universe from which potential respondent households are randomly selected. The sample frame for Arbitron radio surveys is designed to include households with telephones.

**Sample Target**/The number of diaries that is the in-tab sample size objective for a particular survey area.

**Sampling Unit**/A geographic area consisting of a county or county equivalent (e.g., geographic or ethnic split county, or independent city) for which sample is separately selected and monitored.

**Share**/(See "Average Quarter-Hour Share.")

**Simulcast**/The simultaneous broadcast of one station's total uninterrupted broadcast flow, including commercials, by a second station, without any variation except if the two stations choose to *separately and simultaneously* identify their call letters, frequency, Station Name, and/or city of license.

**Split County**/A portion of a county, consisting of one or more zip codes, which is recognized as a separate sampling unit for purposes of survey area definition or more discrete sample control.

**Technical Difficulty (TD)**/Time period(s) of five or more consecutive minutes during the survey period for which a station listed in this report notified Arbitron in writing of: reduced power; intermittent power; signal interference; or times the station was off the air within the station's authorized broadcast day.

**Time Spent Listening (TSL)**/An estimate of the amount of time the average listener spent with a station (or total radio) during a particular daypart. This estimate, expressed in hours and minutes, is reported for the Metro only.

**Total Survey Area (TSA)**/A geographic area that includes the Metro Survey Area and may include additional counties (or county equivalents).

**Unlisted Sample**/Sample telephone numbers for which names and mailable addresses are not published in telephone directories and may or may not be known prior to placement calling.

**Unusable Diaries**/Returned diaries determined by Arbitron to be unusable according to established criteria.

**Unusable Sample**/Telephone numbers in the originally selected sample determined by Arbitron to be ineligible for survey participation for reason(s) which include: (1) disconnected telephone number; (2) nonresidential listing; (3) those who reside in households of 10 or more persons age 12 and older; (4) those who volunteer that they reside in group quarters; (5) those who state that a member of the household is media affiliated (in accordance with Arbitron's definition).

# Metro Market Profile Sources

## PRIZM®

PRIZM is a market segmentation system developed by Claritas, Inc. to help marketers target consumers and profile markets and audiences by lifestyle. Claritas analyzes key demographic characteristics from the U.S. Census and hundreds of millions of actual consumer purchase records to classify each neighborhood in the U.S. into one of 62 distinct PRIZM clusters. Among the characteristics analyzed are income, value and type of housing, marital status, presence and ages of children in a household, ethnicity, urban-suburban-town-rural location, age, sex, occupation, level of education, as well as new car registrations, magazine subscriptions, real estate transactions, and financial data. Claritas updates PRIZM annually.

The 62 unique PRIZM clusters are organized into 15 broader social groups. Each group is identified by a group code which denotes a basic neighborhood type. (U1-U3 groups are Metro Urban; C1-C3 groups are 2nd City; S1-S3 groups are Metro Suburb; T1-T3 groups are Small Town; and R1-R3 groups are Rural.) When linked to market and radio measurement data, this geodemographic model produces descriptive audience information.

Each PRIZM group's composition in this Metro for Persons 12+ is compared to the group's national composition. The Index of Concentration compares the Metro's composition with the national composition for each PRIZM group. An index of 100 indicates that the Metro has the same percent concentration as the nation. An index of 200 means that the Metro's composition is twice that of the nation.

For more information about PRIZM, please call (703) 812-2700. PRIZM is a registered trademark of Claritas, Inc.

## Metro Census Data

Market Statistics has furnished Household Data, Group Quarters Populations, Retail Sales and Employer Industries Data to Arbitron for the Winter 1999 Metro definition. All data are based on the 1990 Census. For further information, contact your Arbitron representative.

1. Total Households are based on 1990 Census data, updated to 1/1/99.

2. Households by Income is grouped into eight discrete income categories. The income reported represents pretax personal income for households as defined by the Department of Commerce, Bureau of Economic Analysis. Households by Income is shown for total Metro households (1990 Census-based, updated to 1/1/99).

3. Value of Owner-Occupied Housing Units are 1990 Census data. These data include single-family condominiums, and exclude mobile homes, housing units located on 10 or more acres, housing units located on commercial property, and two housing units sharing the same address. The base for the Metro Percent is 1990 Census metro housing units which includes total housing units.

4. Monthly Gross Rent of Renter-Occupied Housing Units are 1990 Census data in six monthly contract groups. Median rent is shown for total rented units in this Metro. These data exclude no-cash rental units. The base for the Metro Percent is 1990 Census metro housing units which includes total housing units.

5. Household Size categories are for Persons 0+. These categories are based on 1990 Census data, updated to 1/1/99.

6. Seasonal Housing Units are defined as housing units used or intended for use only during certain seasons of the year, and are not included in the total household base (1990 Census). The Metro Percent is 1990 Census total metro housing units (occupied and unoccupied).

7. Education represents the educational attainment of Persons 25+ in the Metro (1990 Census).

8. Colleges and Universities enrollment is taken from the most current available survey of colleges and universities conducted by the National Center for Education Statistics. Only students enrolled in an accredited degree program are included in the enrollment figures. Percentages for the full-time enrollment are based on total enrollment.

9. Occupation data are 1990 Census data and represent the number of Persons 16+ that are employed in each of six occupation categories. Percentages are based on 1990 Census total metro employed Persons 16+.

10. Farm Population data are 1990 Census data for total Persons 0+ living on a farm within the Metro definition.

11. Transportation to Work data are 1990 Census data for total metro employed Persons 16+ who work away from home.

12. Average Travel Time to Work data are 1990 Census data for total metro employed Persons 16+ who work away from home.

13. Car Ownership by Household data are distributed into four Car Ownership categories. Percentages are based on total 1/1/99 household estimates.

## Magazine and Newspaper Circulation

Magazine and newspaper circulation data, as of June 1999, were obtained from the Audit Bureau of Circulations' Data Bank Service, 900 North Meacham Road, Schaumburg, IL 60173, (847) 605-0909, and are copyright 1999, Audit Bureau of Circulations (ABC). Unauthorized copying or reprinting of this information is prohibited.

Newspaper circulation figures represent average estimated paid circulation reported to and covered by the latest available Audit Report. Reported publications are listed in Metro circulation order up to a maximum of 35 newspapers. Arbitron may have adjusted the ABC Newspaper Circulation data for Metros comprised of a portion of one or more counties, to reflect as closely as possible the newspapers' circulation in the Arbitron-defined Metro area. Note that any adjusted data may not represent the newspaper's total circulation. Magazine circulation data are the latest paid circulation for a single issue.

## Passenger Car Registrations

The Metro Share of New Private Passenger Car Registrations is supplied by the Automotive Information Services Division of The Polk Company. Polk prepares monthly reports (actual counts) of new cars registered in each state. Percentages are listed for American car manufacturers and the five leading imports. The top imports are determined through nationwide ranking. Fleet, other commercial or government registrations are not included. Further automotive statistical information may be obtained from The Polk Company, 26955 Northwestern Highway, Southfield, MI 48034, (248) 728-7000.

*More information on Metro Market Profile Sources, including limitations for each service, can be obtained by contacting the individual services.*

# Media Targeting 2000<sup>SM</sup>

Limited Report Edition

## Survey Period

February 8 - March 7, 1995

**This Service is Not Accredited by the MRC**/This service is not part of a regular syndicated rating service accredited by the Media Rating Council (MRC), and Arbitron has not requested accreditation. Arbitron does provide syndicated services which are accredited by the MRC.

**PREFACE**/*Media Targeting 2000* is a national study that was conducted by The Arbitron Company in cooperation with the Radio Advertising Bureau (RAB). *Media Targeting 2000* examines media usage and consumer profiles for 116 different qualitative categories, such as automobile ownership and usage, beverage consumption, and travel and entertainment. The report herein is an excerpt from the *Media Targeting 2000* report, and is intended to provide limited estimated media usage and consumer information for Persons 12+ for the 48 contiguous states of the United States. The specific sections and dayparts contained herein are: **Average Weekday Share of Time Spent with Each Medium**, Monday-Friday, 6AM-6PM; and **Media Exposure Prior to Purchasing**, within one hour prior

to largest purchase based on respondents reporting any purchase within 24 hours prior to interviewer contact.

**METHODOLOGY**/Users of this limited report should become familiar with the "Description of Methodology" and "Limitations" sections in the *Media Targeting 2000* report. The *Media Targeting 2000* report is made available by Arbitron to Arbitron clients and the Radio Advertising Bureau.

**DISCLAIMER OF WARRANTIES**/Arbitron makes no warranties, express or implied, concerning: data gathered or obtained by Arbitron from any source; the present or future methodology employed by Arbitron in producing the data and estimates in this report; or the data and estimates contained herein. All Arbitron data and estimates represent only the opinion of Arbitron and reliance thereon and use thereof shall be at user's own risk.

**LIMITATION ON LIABILITY**/The sole and exclusive remedy for Arbitron's liability of any kind, including without limitation liability for negligence with respect to this report shall be limited to an amount not to exceed \$500. In no event shall Arbitron be liable for incidental or consequential damages, nor shall Arbitron be subject to injunctive relief with respect to the *Media Targeting 2000* data or estimates.

**RESTRICTIONS ON USE OF REPORT**/All *Media Targeting 2000* data and estimates are copyrighted by and proprietary to The Arbitron Company. *Media Targeting 2000* data and estimates are provided by Arbitron to Arbitron clients and the Radio Advertising Bureau, and may only be used pursuant to the restrictions and limitations on use printed herein and in the *Media Targeting 2000* report. Quotations of the data or estimates contained herein by users of this report must identify Arbitron as the source and that the data and estimates are copyrighted. Users of this report should also mention that these data and estimates are subject to all qualifications and limitations stated in the *Media Targeting 2000* report.

# Arbitron Covers the Country with Qualitative...

## *Arbitron Data Are Even More Powerful with QUALITAP™ Software*

### **Arbitron Qualitative Services Help Your Ad Dollars Go Further**

Arbitron qualitative services deliver some of the most comprehensive data available. Arbitron offers stations, agencies and advertisers profiles of local market consumers in 246 radio Metros across the United States. Arbitron's qualitative services help local advertisers see customers up close — their occupation, income, race, education, shopping habits and more.

#### *Arbitron qualitative services include:*

- Scarborough Research — Comprehensive survey of local consumers and their retail media purchase behavior. Available in the top 64 markets.
- RetailDirect® — Tracks key media usage as well as national and market-specific consumer behavior in 44 mid-sized markets.
- Qualitative Diary — Delivers key categories of consumer, media and retail behavior in 145 small markets.

### **...and QUALITAP Software Makes Arbitron Qualitative Data More Powerful**

QUALITAP is one of the most popular software tools for analyzing qualitative data. Now you can use the speed and ease of QUALITAP software to unleash the power found in Scarborough, RetailDirect and Qualitative Diary data. The unbeatable combination of QUALITAP software and Arbitron qualitative data can help radio stations describe their audience more precisely and advertisers get more power from every buy.

To learn more about the power of Arbitron's QUALITAP software and qualitative data, contact your Arbitron representative.

\* In Macon, GA, Peoria, IL, and Springfield, MO, both RetailDirect and the Qualitative Diary service are offered.

QUALITAP™ and RetailDirect® are marks of The Arbitron Company.

# Instant Qualitative Profile

## Preface

Scarborough data and estimates provided herein are intended to provide a limited summary of product and media use among adults 18 years or older for this Scarborough market, Release 1 (Feb 98-Jan 99). The Scarborough data and estimates provided herein are based on product and media usage information obtained through telephone interviews and questionnaires mailed to respondents. All estimates are approximations subject to statistical variations and other limitations. The reliability of these estimates cannot be determined to any precise mathematical value or definition.

The Scarborough data and estimates provided herein are intended to furnish radio station, advertiser and agency clients of this Arbitron Radio Market Report with an aid in evaluating demographic and retail shopping profiles of radio listeners. A description of Scarborough methodology is available to Arbitron subscribers upon request.

Users of this report should note that Scarborough survey periods and methodology differ from Arbitron survey periods and methodology. Therefore, Scarborough data and estimates may differ from Arbitron data and estimates.

## Warning

All Scarborough data and estimates are proprietary and confidential.

Each Scarborough estimate and Arbitron Qualitative Map is copyrighted. The unauthorized use of any Scarborough estimate constitutes copyright infringement.

## Liabilities and Limitations of Remedies

The sole and exclusive remedy at law or in equity for Arbitron's and/or Scarborough's breach of any warranty express or implied, including without limitation any warranty of merchantability or fitness, and the sole and exclusive remedy for Arbitron's and/or Scarborough's liability of any kind, including without limitation liability for negligence or delay with respect to the Scarborough service, shall be limited to an amount not to exceed \$500.

In no event shall Arbitron and/or Scarborough be liable for incidental or consequential damages, nor shall they be subject to injunctive relief with respect to the Scarborough data and estimates.

## Reservation of Rights

Scarborough reserves the right to exercise its professional research judgment in modifying, waiving or suspending any policy, procedure or element of methodology that would appear to Scarborough to be unreasonable, illogical or impractical in light of known conditions.

## Disclaimer of Warranties

Arbitron and Scarborough make no warranties, express or implied, concerning: data gathered or obtained by Scarborough; the present or future methodology employed by Scarborough in producing the data or estimates; the data and estimates provided herein. All data and estimates provided herein and all other aspects of the Scarborough service represent only the opinion of Scarborough. Reliance thereon and use thereof shall be at user's own risk.

## Restrictions on Use of Report

All Scarborough data and estimates are confidential, proprietary to, and copyrighted by Scarborough. The Scarborough data and estimates provided by way of this Arbitron Radio Market Report may only be used by Arbitron clients who are also subscribers to this Arbitron Radio Market Report and pursuant to the restrictions and limitations on use printed herein. All Scarborough data and estimates provided herein are for the exclusive use of licensed users of this Arbitron Radio Market Report and/or Scarborough clients and their representatives and may be disclosed only to advertisers, prospective advertisers and their agencies for the purpose of obtaining and retaining advertiser accounts and through advertising or promotional literature. Any commercial use of Scarborough data or estimates provided herein for the purpose of selling advertising time or space by or on behalf of broadcast, cable or print media must be under the terms of a written license agreement between that medium and Arbitron specifying permitted uses. For a subscriber to this Arbitron Radio Market Report to divulge any Scarborough data or estimates to a nonsubscriber, unless specifically permitted by Arbitron, or to lend and/or give a copy and/or a reproduction of any part of any report to any nonsubscriber, including print media, advertisers and/or their agencies, constitutes a violation of copyright law. Quotations of the Scarborough data and estimates as allowed by this section for purposes of advertising or promotion must identify Scarborough as the source and that the Scarborough data and estimates are copyrighted. Users of the Scarborough data and estimates provided herein should also mention that these data and estimates are subject to all qualifications and limitations stated in Scarborough's description of methodology. Scarborough recommends that the appropriate report title, survey period, market/demographic and kind of estimate and data be stated (e.g., The Instant Qualitative Profile, 1999 Scarborough Report, Persons 18+ Who Own or Lease a Domestic Vehicle in the Baltimore Arbitron Metro Area, Demographic Breakout).

A subscriber to this Arbitron Radio Market Report may not use the Scarborough demographic data or estimates printed in a report to which they do not subscribe. This report may not be used in any manner by nonclients of Arbitron without written permission from Arbitron.

Users of the Scarborough data and estimates provided herein are referred to the current policies of the Federal Trade Commission relating to the use of audience estimates.

# Special Notices

## The Market

**Metro Definition/** The geographic area surveyed by Scarborough for this market is defined as follows:

### County/State

Burlington, NJ  
Camden, NJ  
Gloucester, NJ  
Bucks, PA  
Chester, PA  
Delaware, PA  
Montgomery, PA  
Philadelphia, PA

**Station Subscribers/** The following radio stations are Scarborough subscribers as of release to print:

WBEB-FM  
WDAS-AM  
WDAS-FM  
WHYY-FM  
WIOQ-FM  
WIP -AM  
WJBR-FM  
WMGK-FM  
WMMR-FM  
WPEN-AM  
WPHI-FM  
WPLY-FM  
WRTI-FM  
WJSL-FM  
WWDB-FM  
WXPN-FM  
WXTU-FM  
WXXM-FM  
WYSP-FM  
WYXR-FM

## The Sample

**Sample Size/** The in-tab sample for this Metro as defined and surveyed by Scarborough is **2,869**.

# Profiling a Consumer Has Never Been Easier

With the new Instant Qualitative Profile (IQP), you can now see at a glance key socioeconomic characteristics of consumers and radio listeners. The IQP is available through the following Arbitron services: Maximizer 99<sup>SM</sup> service (for radio stations); Media Professional<sup>SM</sup> (for ad agencies); or MaxQualitative<sup>SM</sup> (for radio stations). It's as easy as a few mouse clicks to do a customized report to identify target consumers.

The IQP works with the Scarborough service, RetailDirect<sup>®</sup> service or Qualitative Diary service. For example, you can find out about consumers in a market who are planning to buy a new car—what their household income is, their education level, their home ownership status, and much more.

In this report, we've provided profiles on five important consumer characteristics

to get you started toward having a more in-depth understanding about this market's consumers and their purchasing habits. For more information about the Instant Qualitative Profile or about any other Arbitron service, contact your Arbitron representative.
