# Index

Use this Index for Radio and TV models prior to 1965.  
For 1965 and 1966 models see Index on page 43.

This Master INDEX lists every television and radio set included in Supreme Publications manuals. For sets up to and including most 1964 models see Index starting below and continued through page 42. For 1966, 1965, and some older sets and additions, see separate Index on pages 43 through 47. Use both Indices. Manufacturers' names are listed alphabetically from Admiral to Zenith. Under each manufacturer, models and chassis of that make are listed numerically on the left side of the column. Corresponding to each model entry there is a reference at the right. In such right hand reference, words such as: One, Three, and up to Twelve, refer to volume number of RADIO Diagram

manuals. Radio volumes 13 through 26 are listed by their corresponding years: 1953 through 1966. These numbers tell what volume is needed in each case. Reference to TV volumes is made by volume numbers, TV25 through TV5. In every reference entry, the figure following the volume number (-after the dash) tells you on what page in the volume stated, the material you need will be found. You will find the applicable year and volume number printed on the cover and backbone of every Supreme manual so they can be easily picked out. As a further aid, a cross-reference of volume numbers and years of manuals is given on the page at left (page 2).

# HOW TO USE RADIO-TV DATA

To be a repairman is to take on someone else's troubles. A completely dead radio set. Vertical sync bad, picture roll. Next job may be anything. Almost every fact needed for quick fault finding and adjustment can be presented in a diagram and additional service data. Here is help to permit you to know what is wrong, get promptly to the section at fault, test a couple of parts, finish the repair in minutes instead of wasting hours. Easy? Yes. Maybe you have never realized how to use factory released service data such as published by Supreme Publications.

Use service data to quickly disassemble and get at the chassis, find the section at fault with simple signal tracing tests (using the diagram, of course), and then a couple more measurements to diagnose the fault. Voltage values, scope patterns, pictures of printed boards included, all help. Use this material to select replacement parts needed. If alignment is required, you have instructions. Even factory recommended changes (used in later version of sets) included. This is the help you need for real speed-servicing, handling the tough dogs, breezing through usual repairs. This is the kind of service data you obtain from low-priced, factory authorized, SUPREME radio and TV manuals.

The engineers and technical editors at Supreme Publications are experienced in practical servicing and, because of this, succeeded in issuing service manuals that give you all technical help needed for fast repairs. Radio and TV material is separated in annual volumes and presented in easy-to-use form. This factory authorized material guarantees correctness. All important manufacturers included. Every popular set is to be found in one of the manuals. Radio material from the 30's through 1966. Television data from early 1951 through modern 1966 sets. Radio volumes include all types of sets, AM, FM, stereo, portables, and auto. Complete TV data including giant double-page diagrams. These large, 8-1/2 x 11", manuals are priced at only \$2.50 and \$3, postpaid.

No need to spend money every week for folders. Just once a year get a \$3 TV volume and a \$2.50 Radio manual for the whole year of coverage. If you ever need data for some rare radio or TV (perhaps of a TV made in limited quantities or an antique radio), Supreme Publications usually can find such material for you and the charge is one dollar. But you will find almost every model and chassis covered in easy-to-use, amazingly low-priced SUPREME manuals.
