KEYNOTES

ANARC

A letter received 17 July from Wendell Craighead, Executive Secretary of ANARC, informs us that SPEEDX has been elected to full membership in ANARC, and that only ASWLC had voted against admission.

SPEEDXer Bill Sparks, of San Francisco, and another member yet to be named, will serve as our ANARC Representatives.

CONSTITUTION & BYLAWS APPROVED

With only three dissenting votes cast, SPEEDX full-members voted in June to ratify the Constitution & Bylaws. All ballots were examined, and the tallies verified, by both President Art Glover and Business Manager Dave Thorne, as required.

*** NOTICE TO EAST COAST DXERS ***

SPEEDXer Phil Schnabel, is interested in making contact with DXers in New Jersey, New York metropolitan area, and Connecticut.

Please contact Phil; at 163 White Plains Road, Bronxville, N.Y. 10708,

*** FOR SALE ***

Admiral portable "All World" model number Y1009B, covers 2-9 mc, 31, 25, 19, 16, & 13 meter bands, plus 150-400 kc. and other features.

Make offer: Contact - Roger Bernstein, 2300 Brookhurst Drive, Chamblee, Georgia 30341.

*** FOR SALE ***

A complete Short-Wave Listening Post consisting of: DX-150A receiver, in good condition 1 year old, Gilfer antenna matcher, Heathkits 100 KC crystal calibrator, SP-150 speaker, 2400 hour clock. All for \$80.00, any one interested may contact; Billy Ray Eaton, 517 Apt. C Croyden Street, San Antonio, Texas, 78226.

Congratulations are in order for the following three New Full Members.

Bruce A Boomer
Nutter Port, WV.

Chas. Donegan
Warner Robbins, GA.

Michael P. Mahoney
Muncie, IN.

Full members are determined by the SPEEDX president, in accordance with rules and regulations governing full member selections.

CFCX SALE APPROVED

via Norman HANCHERUK Quebec, CAN.

CFCX shortwave, CFCF-TV, CFCR-FM and CFCF-AM (all Montreal), formerly under Canadian Marconi Co., ownership, have been sold to Multiple Access Ltd. of Toronto for \$18 million. The Toronto-based firm would move its head office to Montreal. What affect this will have on CFCX and its programming is yet to be determined. CFCX relays CFCF-AM programs, and began broadcasting as XYA on November 19th, 1919.

*** NOTICE TO ALL OHIO DXERS ***

There will be a get-together at Ken Lazear's home the weekend after Labor day. All DXers (ALL BANDS) are welcome. If you plan to attend please call Ken a week in advance. Ken's phone number is 614 231 8023.

Ken Lazear, 87 North Gould Road, Columbus, Ohio 43209

SPEEDX - August 1972 - TREASURERS REPORT - period June 1, 1971 - June 30, 1972

(Note: This report is a condensation of a 4 page report sent to the SPEEDX Board of Directors. It covers the period above - 13 months - for all future reports they will cover a 12 month fiscal year. July 1, to June 30.)

RECEIPTS: June 1, 1971 to June 30, 1972

Donations and Loans	-----	448.94
Subscription/Dues	-----	2,272.90
Advertising revenue	-----	10.00
Renewals (2nd year)	-----	562.00
Supply sales	-----	16.30
Sample requests	-----	164.26

THIS MONTH IN DX MONTAGE:

AUGUST 1973

- World Year of DXing: An Idea
- New Boss at French radio & television
- And the Jamming goes on...

286 Scheidler Apts., Muncie IN 47304

AND THE JAMMING GOES ON

WORLD YEAR OF DXING: Good Vibrations

1973 may well be the year for good vibrations among the world's hobbyists. We certainly hope so!

The proposal was first made by Radio Nederland's Harry van Gelder, a couple of months back. His idea is that the radio listening hobby be promoted throughout 1973 via many of the world's shortwave broadcasters leading the way - by promoting activities during "World Year."

To promote the listening hobby; to renew an interest in each other and each others' activities; to sincerely seek to work with each other on "necessities of common concern."

These should be only a few of the many goals during "World Year of DXing 1973." It's now the duty of the hobby leaders and hobby associations such as the European DX Council, DX Alliansen, and Association of North American Radio Clubs to take the idea and run with it. Let's toot our horn in 1973!

A NEW BOSS AT O-R-T-F

A French journalist and Gaullist member of the National Assembly was named July 12 to head the state-run radio and television networks (ORTF). Arthur Conte was appointed to the newly-created post, after discovery of a publicity scandal and accusations of mismanagement at the network level. (Associated Press.)

ANOTHER REGIONAL DX GROUP SOUGHT

Although still without a name, a new regional DX group is in the formative stages. Target area: Indiana.

Mike Mahoney, 426 Janney Street Muncie, IN, 47304... is organizing this informal group, and he requests all Indiana DXers, regardless of affiliation, to contact him... He will supply more information.

The Soviet government has begun jamming Kol Israel's Russian and Hebrew-language broadcasts to the Soviet Union, as part of an effort to cripple the dissident Jewish movement.

The Associated Press quotes sources in Moscow as saying the Jewish movement relies greatly on Radio Israel.. and that jamming, heard as a pulsating drone...began in the 24-hour period of June 24-25.

The sources said the jamming was far more effective than that directed at the Voice of America, R.Liberty and BBC.

Jewish and other dissidents say the news of arrests, trials and persecutions they report to Western correspondent in Moscow are broadcast back to the Soviet Union by these stations, and thereby help increase the Soviet public's awareness of what the activists believe to be violations of their civil rights.

The Soviet government's electronic iron curtain is the result of hundreds of ground-based jamming transmitters which can completely cut off reception. The transmitters, normally located in urban and heavily populated areas, send out a blanket signal totally effective over an area of about 4.4 miles. The knowledgeable eye easily spots their tall antenna around Moscow.

Beyond the Ural Mountains, the Soviets employ skywave transmitters, that bounce signals off the ionosphere to come down over cities.

Reception of the American station's broadcasts is no easier these days, and it appeared that new jamming transmitters had been installed to handle Radio Israel.

A good radio receiver is often a Russian's most prized possession, & there are few Soviets in urban areas who haven't listened at one time or another to Western radio broadcasts. (Associated Press; Rick Hird - from Boston Herald-Traveler.)

Good DX!
Serge

FEATURE *from* SPEEDX

LOBBY FOR THE HOBBY

by: Al Sizer
North Haven, CT.

Shortwave listeners, in contrast to Amateur radio operators, tend to be passive and on the defensive, when it comes to their hobby. I think this is all wrong.

As a newspaperman, I know that when something is in my paper, readers think shouldn't be there, or if they feel something important is being left out, they immediately let their feelings be known by calling or writing. And if there are enough of them to shake us up, we do something about their complaints. Otherwise we wouldn't stay in circulation.

I'd like to see some of that same kind of opinion pressure being used by shortwave listeners, to eliminate some of the things they don't like in the hobby and to add others they think should be incorporated.

Why don't we band together to lobby for the hobby? Why doesn't some club or clubs, form an Action Committee whose purpose would be to enlist SWLs in a common cause? The effect of several hundred letters or so directed at a common target could be considerable.

Don't dismiss the idea without considering some of the things that have been achieved by letter-writing SWLs. A couple of years ago, the Voice of America decided to stop giving transmitter sites at the beginning and end of broadcast periods, and it was letters from DXers who made them restore their former procedure. And has it not been letters from listeners that have kept Austria on shortwave?

To give a better indication of what I think might possibly be accomplished, here are a few SW lobby projects I think are not far fetched at all, and are timely:

1. Persuade R.Moscow to resume the practice of listing transmitter sites on any legitimate QSL report...not just those for North America. Although threat of a listening boycott seems too extreme, it should be possible to get across the point that SWLs find the incentive gone for listening to any R.Moscow programs.

2. In the light of improved relationships with Peking, an attempt could be made to have more satisfactory QSL cards issued, with some of the main transmitter sites listed. Explanation of our dissatisfaction with Moscow for not doing this might have weight with Peking.

3. Panama has no station on shortwave at the moment. Panama has many problems, especially the matter of the Panama Canal, that require a voice to the world. The point could be made that Nicaragua, Honduras, Guatemala, El Salvador, Mexico, Venezuela and Colombia, all have national voices.

4. Poor QSLers. In the four years I have been in the hobby, I've never seen evidence of a genuine, all-out effort by DXers to get a country to improve its QSL policy. We have had QSL committees, but their efforts have been largely individual...and for the most part, ineffective. Does anyone really know what the effect of scores of letters to a country like Guinea or Burma might be?

These are just a few projects that might be attempted. You undoubtedly can add to the list yourself.

So how about it? Come on, hobbyist---turn lobbyist!

Why not try your hand at writing a feature article? The pay is non-existent, but the satisfaction is guaranteed! Not only is this a fine way of gaining membership points, but it is an excellent way for you to share your experiences with others!

Send manuscripts to:

THE INVERTED "L" and WINDOW ANTENNAS

If you are having trouble deciding on which antenna to use, I suggest looking into the inverted "L" and Window antennas. These antennas are very popular among DXers because of their ease of construction, low cost, and most important, the very good results obtained from these systems.

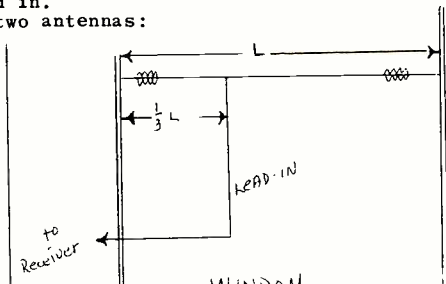

THE INVERTED "L" antenna is an omni-directional antenna; that is it receives signals equally well from all directions. This antenna works quite well when a length of 45-65 feet of stranded #18 copper wire is used. This wire should cost you no more than \$3.00, in most hardware and electronic dealers. Make sure you have the antenna as high as possible and free from any obstructions, especially power lines. The lead-in wire connecting the antenna to the antenna terminals on your receiver should be insulated so that the signal won't be shorted if the wire touches the house. Keep the lead-in as short as possible to prevent any signal loss. If connecting this or any antenna to two trees, use a pulley and counterweight arrangement to compensate for the swaying the trees do in the breeze. This will prevent any breakage.

THE WINDOW ANTENNA is a directional antenna, which should be aimed at the general Direction your DX lies. Reception is thus best when the antenna is receiving the signal from its broadsides. To determine the length, you must first take the lowest frequency band you will be using and then use this formula: Length = 468 divided by the frequency (MHz.) The lead-in wire should be placed exactly at one-third the entire antenna length at one end (the end closest to the receiver to keep the lead-in as short as possible.) When used for the entire international shortwave band ranges, the antenna can be as long as 156 feet, but the length as I said varies with the frequency range you are interested in.

Here are diagrams of the two antennas:

INVERTED "L"

WINDOW

One important "extra" that should be added to these antennas is the lightning arrester. This stops any lightning travelling through your antenna from reaching your receiver and destroying it, and maybe you if you happen to be nearby. So if you are starting your antenna system, try one of these!

DX/73s,

Mark

AT LAST!! The long awaited acknowledgment/verification cards for the SPEEDX-TWR reception survey were mailed the week of 16 July.

A picture of this "limited-edition" QSL appears at the right.

We thank the reporters for their participation and patience.

ALGERNON STATICSIFTER JR

We are pleased to confirm your reception

of TRANSWORLD RADIO (Bonaire)

17 March 1972 at 00h30 G.M.T.

on 11815 khz

and thank you for participating in the
related SPEEDX reception survey.

US COAST GUARD DX HANDBOOK

We are extremely pleased to announce that SPEEDXer David Curvin of Houston Texas will be presenting a section of the "Handbook" concerned with monitoring Coast Guard search and rescue communications. Dave, retired from the USN, is one of the most informed and experienced DXers around in this specialized field...having logged literally thousands of hours at the receiver while closely following the action on his coastal charts. We're certain SWLs, whether ute-chasers or not, will find this particular piece prepared by a real expert highly interesting and informative.

Although the collection of Coast Guard station information for the Directory Section of the "Handbook" is progressing quite well, we are extending the deadline for submitting data until 15 August. The reason for this is that "Doc" Hardester suggested a little contest to determine the person sending in information on the "most unlikely" CG station location. Unfortunately, his idea arrived too late for last month's issue; hence the extension. Also, since one person's opinion of what is "unlikely" might seem perfectly logical to someone else, the competition will assume a slightly different slant:

There are two questions below. The first person to correctly answer either one (2 chances to win) will receive a free copy of the "Handbook" when published this fall. Earliest postmark will determine the winners, and duplicate prizes will be awarded in the event of ties. Now, for the "hook": it is presumed that anyone answering these questions will be required to do a little research...we are asking that you send along whatever else you might turn up that might be of value for the publication.

QUESTION NUMBER 1: Listed below are the radio call signs for five Coast Guard stations. Give the location of each installation or unit.

- (1) NOJ (2) NML4 (3) NMK (4) NMR5 (5) NMD

QUESTION NUMBER 2: From the following list of states or "countries" select those which DO NOT have a Coast Guard station of some type (except maybe recruiting offices) within their boundaries.

Georgia	Newfoundland	Iowa	Japan
Caiicos Islands	West Virginia	Philippines	Colorado
Nebraska	Puerto Rico	Tennessee	Virgin Islands
Samoa	Arkansas	Marianas Islands	Delaware
Kentucky	Saipan	Kansas	Marcus Island

There you are "sports", a chance at a free SPEEDX Coast Guard DX Handbook. The correct answers will appear in next month's issue along with names of the winners....and don't forget to send along your other little tid-bits of CG information, because even the smallest scrap could be important!! As an example, Carl Lease of San Francisco was responsible for unravelling a whole chain of details with a single item that quite likely seemed to him to be insignificant or redundant...but he sent it!!! Remember new deadline 15 August.

HAPPENNINGS

Gene Moser

News about the SPEEDX Handicapped Aid Program

I am happy to announce that we are 99% completed on our presentation package for HAP!! This means we have our first chance to reach out and really help someone into this fantastic hobby! You will soon learn of my attempts to get HAP's first "member" and hopefully it won't be too long.

As mentioned in last month's "pennings", Lynn Hyndman was at the ANARC doings. he has agreed to give a brief report on how our efforts on behalf of HAP went. I will present his comments next month if space permits.

Many of you belong to other clubs, as do I. Some of you hold an office in the clubs. In the spirit of fellowship and mutual understanding will you please do this:

1) At ANARC we urged executives or directors of other clubs to appoint a "HAP Representative". Will you consider bringing this proposal before your officers?

2) Contact me, and let me answer any questions you have. I want to work with you as we all have something to gain.

Each month my list of "thank yous" grows larger, and I want to send them to our own Mark Konen and to Wendell Craighead for their help in extending our Fact Sheet to include all clubs.

Next time you're in the pages of the phone book, do me a favor. Write down the address of the nearest VA hospital and send it to me...That's all. It's an easy thing to do that may mean a lot to someone. Thank you.

Once more the HAP family increases its number!! A very able typist by the name of Kenneth Compton has given us his help. Welcome Ken! Naturally, I put him right to work (HI). How about you YLs? HAP has 5 men to 1 gal. Join us and get in on some very worthwhile work. This is one job where our work is fun and rewarding.

Finally, a request: When you write, please use air mail if you don't live near Michigan. First class is taking 6 or more days when mailed from any distance.

Good Health,

Gene

Dateline -- BOSTON

The following hurried dispatches concerning the SPEEDX/HAP presentation at the ANARC convention were received just at the copy deadline for this section:

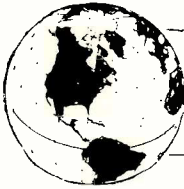

From OLIVER ELLSWORTH: "After Lynn (Hyndman) made his presentation on HAP, three guys fought for the last copy of the Utility DKers Handbook. It was the first time many had heard the proceeds help support HAP. You should publicize this more."

Via PAUL MAYO: "Lynn gave a fine talk on HAP."

De LYNN HYNDMAN: "It (the HAP presentation) was very well received....Gene or you should be hearing from some of them (ANARC clubs) soon."

Next month this section will carry a full report from SPEEDX/HAP's "Ambassador to Boston", who at the last moment was required to speak unexpectedly and did a very creditable job of it. In the meantime, a summation of these early reports all indicate that "SPEEDX was there!!!"

It is not the policy of either SPEEDX or this section to advance the interests of one particular commercial venture over those of another. However, it is felt SPEEDXers should be aware that earlier this year, and upon learning the revenue would be used to support HAP, Mr Perry Ferrell of GILFER Associates "took a gamble" in placing a quantity order for the Utilities DKers Handbook for redistribution. Subsequent re-orders would indicate his judgement sound and faith justified. If you are contemplating the purchase of SWling equipment or supplies, we ask that you consider GILFER as a possibility. Catalogs and other information may be obtained from GILFER, PO Box 239, Park Ridge NJ 07656.

SPECIAL NOTICE: Circumstances beyond the control of the host dictate that the scheduled 19 August meeting of the "Grand Order of Oregon DXers" (GOOD Guys) must be postponed to a later date. It seems we will be gaining some first-hand knowledge of the technology and expertise of modern medical science just a couple of weeks prior to that time, and it is uncertain whether we shall be sufficiently recouped in time to satisfactorily cope with the anticipated shenanigans of this auspicious group.

-REFRAN-

"Mas vale algo que nada"

RADIO AMERICA OF HONDURAS

From its headquarters in Tegucigalpa, the capital of Honduras, Radio America feeds 16 hours of daily programming into a network consisting of five medium wave and one shortwave stations. With outlets in each of the major cities of the country the network is truly LA PRIMERA CADENA RADIAL DE HONDURAS.

Capital city listeners receive Radio America on a frequency of 610 kilohertz via a 10 kilowatt medium wave transmitter while listeners in La Cieba (a major port), San Pedro Sula (the second largest city), Choluyteca (a large southern city), and Santa Rosa de Copan receive low power relay broadcasts of the same programs. These programs are also relayed on shortwave via a 5 kilowatt Collins transmitter on a frequency of 6050 khz.

Among Radio America's daily programs is one called Radio America en el Mundo (Radio America in the World). In this program interesting mail from listeners outside Honduras is acknowledged and only reports used in this program are verified with the usual form letter and pennant. So, if you report to Radio America, your chances for a verification will be greatly enhanced if you include a few facts about yourself, your family, and local attractions.

A GOOD SHOW

A hearty round of applause is due Jerry Berg, Steve d'Adolf, Chris Loddell and Mike Macken for the outstanding job they did in bringing off the 1972 ANARC Convention. I am sure all in attendance will agree that it was a really good show. Thanks fellows.

Well, on to the loggings. Heading this months loggings are two Bolivians, Radio Antiplano, which has again been heard on its old channel of 5045 kilohertz, and Radio Riberalta, which has tentatively been logged by Larry Magne. In addition, several seldom heard Brazilians and Ecuadorians have shown up as conditions continue to favor the equatorial region. Many loggings so, with the usual reminder that all frequencies are in khz and all times in GMT, AWAY WE GO!!!

 Hopefully the ANARC Frequency Recommendation Committee can get something done about the interference Bob Zilmer mentioned above. Bob and others are on this committee but need your help. When you report to a station be sure to comment on the interference, or the lack of it, for NA Broadcasts. SPD

FRANCE

- 11930 0515 ORTF, Paris: Eng "Paris Calling Afr" (v.poor 7/4 Hunt-CA); (fair 0515 7/8 Johnson-CA)

CALENDAR

The following indicated holidays might result in extended broadcasts from the indicated country of if not, you might just want to wish them a happy holiday in your next report.

- Aug. 11: Independence Day in Chad
- Aug. 15: National Day in the People's Republic of the Congo
- Aug. 24: Flag Day in Liberia, Public Holiday in Romania
- Aug. 25: Public Holiday in Romania
- Sept. 1: National Day in Libya, Citizen's Day in Luxembourg
- Sept. 4: National Holiday in Rwanda, Settler's Day in South Africa
- Sept. 8: Republic Day in Uganda
- Sept. 9: National Holiday in Bulgaria

CAD GUYS HAVE ANOTHER GET-TOGETHER

Another successful meeting of the CAD Guys (Chicago area DXers) was held on June 18th at the home of Bob Slowey in Park Forest, IL. Attending this get-together were Bob Slowey, Jack Lester, Richard Pistek, Alan Mayer, Andrew Pappas, Michael Tenegal and Samy Ghaba. A good time was had by all, viewing QSL's and experimenting with various receivers, etc. Anyone else want to join in? Get in touch with Richard Pistek, 8559 South Komensky Ave, Chicago, IL 60652. They are always looking for more DXers/SVLs.

Small social groups are becoming popular. We have the BAD guys from the Boston area, the CAD guys from Chicago, the GOOD GUYS from Oregon, the ODD guys from down Virginia way, the CONN men from Connecticut, and a group called CURLS who are spread out and get-together by mail.

Across the editor's desk

Welcome to new reporters Bob Estand, Eric Happell and David Wilson.

Continued thanks to all the guys who reported this month. You make the column what it is.

CONTEST NEWS

"Radio Moscow announces a quiz to mark the 50th anniversary, next December, of the formation of the Soviet Union.

After the Socialist Revolution of 1917, several Soviet Republics came into being on the territory of the former Russian Empire. They fought together against internal counter-revolution and invasion by foreign powers. They jointly carried out social reforms.

Then, in 1922, the Soviet Republics decided to unite in a federal multinational working class state, the Union of Soviet Socialist Republics.

Our 50th anniversary quiz consists of three questions:

1. Name the 15 Sovereign, or Union, Republics forming the Union of Soviet Socialist Republics.

2. How would you explain the unity and friendship between Nationalities of this multinational country?

3. When did the Soviet Union and the United States establish diplomatic ties? Who was the American President at the time?

Prizes will be awarded for best answers and most active participation. We will announce the winners in our broadcasts in the week of December.

Replies must be postmarked no later than October 31st. Please send them in on a separate sheet of paper. Address your letter to:

"The 50 Year Quiz"
Radio Moscow
Moscow, U.S.S.R."

Deutsche Welle is running a series of monthly quizzes. Tune in for more information.

FRENCH ADOPT REFORM BILL ON RADIO-TV

"The French legislature today approved a government-backed bill freeing the controversy-ridden state radio television network, the ORTF, from complete state control." "The new statute, however, allows the government to retain some say over ORTF activities, since it will be responsible for naming the new director."

This is from the June 16th International Herald Tribune. It is expected that the majority, if not all, of the changes will occur in the controversy-ridden television network.

THE LONGEST DAY IN YOUR LIFE

Have you checked your DXing clock lately. On June 30th all the National time standards around the World advanced their clocks one second. The purpose was to correct a discrepancy in time-keeping due to tiny changes in the earth's rotation. I hope you enjoyed that extra second of DXing. hi!

A VISIT TO THE VOA

Last month I reported on a tour of the VOA in Washington, DC. Dan Henderson informs me that I went to the wrong place. You can visit the VOA in action if you inquire at the ground floor information desk in the USIA building.

Woody Seymour reports that you can also visit the VOA transmitters in Greenville, NC. If you are going to be down that way write and find out about a visit.

MEZ VS GMT

A number of stations send out schedules in Middle European Zone time (MEZ) rather than GMT. Don't assume all schedules are GMT. I did and that is why my comment under Portugal, in last months column was in error.

EUROPE/AFRICA NEWS

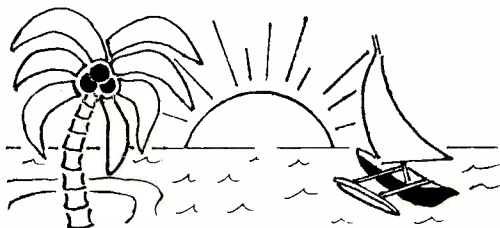

If you have any news concerning Europe/Africa stations that you feel might be of interest to others, send it along.

 15005a 2040 VOV Hanoi (TENTATIVE): Eng nx, entry (poor 6/11 Brooks-NH) ...Is this the
 freq you mean? You gave 15105...
 15012v 1445 Tay-Bac (TENTATIVE): Viet talks & Viet mx // 6376 on new freq; apparently
 broken crystal as freq made sudden jumps between 15012a & 15015a; no clear
 IDs heard at 1500 (weak but clear 7/18 BB) ...distinct from VOV-15007v...

VIETNAM, South

9430v 1010 V of the Patriotic Militiamen's Front (CIA Elack Clandestine): mostly Viet
 talks w/some Viet mx; still operating despite closedown of most US
 espionage operations in SWN (poor 7/4 Magne-PA)

YEMEN ARAB REPUBLIC

U.S. - Yemeni Relations Resumed After 5 Years

The Yemen Arab Republic and the United States officially announced the resumption of diplomatic relations today (July 2)...Premier el-Ayni emphasized Yemen's needs for development assistance in a wide variety of areas and said his country looked forward to reestablishing "strong relations and fruitful cooperation" with the United States.

--From the N.Y. Times via Steve d'Adolf

Improved relations will hopefully extend to DXers and will lead to long awaited Sanaa QSLs! Best bet will be 0300a s/on on 5804v. WRTM gives ID as "Idha'at al Jumhuriyah al Arabiyah al Yamaniyah."

UNIDENTIFIED

- 6133 $\frac{1}{2}$ 1016 Pat Boone oldies past 1035, but unable to make out much more due to spatter from VOFK-6135...suspect RRI Samarinda, Borneo-6135 list (7/4 BB)
 7190 1207 tonal lang, FE chant, signal flutter indicating possible polar path; Seoul? (v weak 6/18 Schnabel-NY) ...Korean is not a tonal lang...I suspect you have Peking HS2 on new fq at new time hrd here 7/15...

A special thanks & welcome goes to Ken Hunt for his first contribution to A/O. Special recognition goes to Bob Zilmer and Albert Miller for their 12th consecutive reports to A/O!:

Some suggestions to reporters follow. It is useful to indicate listening periods. Please indicate s/on-s/off times when observed. If you don't recognize a language, simply write "lang" as short for unknown language. If you use WRTH as source for identifying language, please indicate so. When reporting a non-English regional station it is best to indicate how you arrived at the identification--ID, previous logging, freq, //',s, etc.

For an aid in recognizing languages I recommend Dr. Richard Wood's article in How to Listen to the World 1969-70.

I now close out and make a mad dash for the post office.

73's and Best DX!

de Bob

(Gene Moser and direct)

INDONESIA

Radio Republik Indonesia: The Djajapura station of R.R.I. has been noted on 6.070 MHz. ID at 09.30 after news in clearly-spoken Indonesian, as "Siaran Regional Irian Barat", i.e. "West Irian Regional Service". ID at 09.34 as "Inilah R.R.I. Djajapura".

(Richard Wood)

GREECE

Voice of America: From Ruth Walter, who is the Public Relations Officer for the Voice of America, we have word on the new shortwave relay at Kavala. The station will consist of ten 250 kw and two 50 kw transmitters, a 150 kw medium-wave transmitter (791 kc), a large power generating plant, a receiving station, and housing for the American staff.

The transmitting plant is located 21 miles south of the town of Xanthi near the village of Dashorian. The receiving plant is located 32 miles east of Kavala near the town of Aghiasma. The station will provide shortwave coverage for the Central U.S.S.R., Central Europe and South Asia, auxiliary shortwave service for Africa and medium-wave service for the Balkans and the Southern U.S.S.R., Turkey and North Africa.

Presently, the V.O.A. is broadcasting 5 1/2 hours on the medium-wave transmitter, with programs in English, Romanian and Serbian. In addition, the Greek Government radio (NBI) uses this transmitter for 1 1/2 hours of broadcasting daily. Cost of the station was \$27,929,000.

The medium-wave transmitter began operation on April 17, 1972. The shortwave transmitters are scheduled to begin their operation in the fall/winter 1972.

(direct)

BELGIUM

O.R.U.: This station is observed on the new freq. of 15.110 MHz at 06.30 sign-on in French and also Dutch.

(Richard Wood)

TAIWAN

ODDS AND ENDS

To all of you who attended the 1972 ANARC Convention here in Boston, I'm sure that you will agree that this one was most

likely the best one ever put on. Congrats go to Steve d'Adolf, Jerry Berg, Chris Lobdell and Mike Macken. Don't forget to read the articles elsewhere in this issue on ANARC and the 1972 ANARC Convention.

(Simon Petravick)

Reminder: Don't forget that the short fall broadcasting season is only a month away, so try to keep your contributions current. Make sure that they are valid for the fall and/or winter seasons.

I Need Help Department, Continued: I am still on the lookout for a Hammarlund HQ-100 manual. If anybody has one please be so kind as to contact me.

A few months ago I gave a list of frequencies for the China Press Agency. Larry Magne has sent the following information about the China Press Agency.

Frequencies

17504	16373	16105	13700	10206
17221	16342	14820	12074	9330
16435	16270	14416	11413	

Transmitter Location: Peking Power: 3/20 kw

First Transmission:

0000-0200a (GMT) 17504, 17221, 16435, 16373, 16343, 16105, 14416

Second Transmission:

1100-1400a (GMT) 17504, 17221, 16435, 16373, 16342, 16270, 16105, 11413, 10206

Third Transmission:

1500-1800a (GMT) 16342, 16270, 16105, 14820, 13700, 12074, 9330

Sign on identification "Chungkuo Hsinwen Kwangpo Tientai" Programs consist of dictation-speed news, usually read by female announcers, plus "filler" Chinese revolutionary music.

ID's as above. Sign on is with the song "The East is Red"; sign off is with the song "Internationale". Only Chinese language is used.

Reception reports are NOT wanted or verified. Their address is: Hsinhua She (New China News Agency), Peking.

(Sources for above information: R. Bundy, D. Jemsem, L. Magne)

QSL SECTION

CHRISTOPHER LOBDELL
149 WALNUT STREET
READING,
MASSACHUSETTS 01867

DEADLINE: AUG. 15TH

This month we again have a very interesting listing of verifications to report. RADIO SWEDEN issued a special card during the environment conference showing a postage stamp entitled "Only One Earth". Californian Steve Kamp received a folder card from the seldom heard ORTF-Djibouti station in the AFARS & ISSAS. Ralphus Perry's full data card from La VOIX DE LA REVOLUTION-BURUNDI can be considered a prize for any DXer. Al Sizer got a letter reply from the ABU DHABI BC SERVICE for the 31 MB Outlet. NASWA's QSL REPORT editor Gregg Calkin is in BRITISH HONDURAS and he says they will reactivate the 90 MB channel soon; Evan Rosen reports a QSL from them. In Bolivia, RADIO FIDES is now replying. Now to the reports:

EUROPE

ALBANIA: R. Tirana, 9780, folder card w/B&W pix of building on front came by sea in 127 days for 2 IRCs; reported freq given in meters. (Day-CA) 4 months for 3 IRCs on second try. (Dildine-VA)

3355 Kh 90 m 20 KW ~
7170 Kh 42 m 20 KW

This is the current style card of the RTF station at New Caledonia. Best time to hear this station is from 0900 to 1100 GMT on 7170, 9510, 11710 kHz.

Radio Quito - HCQR-1
Casilla 57
Quito, ECUADOR S.A.

Radio Quito is perhaps one of the most frequently heard of the commercial domestic broadcast stations in Ecuador. The station is owned by the newspaper "El Comercio," and carries newscasts from the newspaper service.

Frequencies in use: 760 kHz (medium-wave) 3 kW power
 4923 kHz (short-wave) 3 kW
 93.5 MHz (FM) unknown

Broadcasting times: 0545 - 2330 local time (same as EST)
 or 1045 - 0430 GMT

The Ecuadorian-built transmitters are all under the call-sign HCQR-1.

Radio Quito's slogan is "La Voz de la Capital." It uses a completely Spanish format, with news bulletins every hour on the hour. A distinguishing characteristic of Radio Quito's broadcast format is the gong & chimes (similar to BBC's "Big Ben") with the time given by a male and female announcers every 15 minutes. Radio Quito signs off with the "Indian Love Song," a violin solo.

Announcers include: Jorge Carrera, Rene Torres, and Jorge Torres.

On reception reports: Radio Quito receives approximately 50 reception reports monthly from overseas listeners. They can use reports in languages other than Spanish, though the station hasn't specified which ones. Reports are appreciated (using the SINPO code), and are currently being verified by an attractive (but undetailed) folder-card and nice pennant. They also appreciate the use of International Reply Coupons whenever possible. The QSL-folder contains acknowledgement messages in Spanish, Portuguese, French, and English.

Among the major advertisers, is "El Banco de Pichincha," which sponsors the 0300 GMT news.

**Brighten
Your DX
with
SPEEDX**

I would like to thank Don Jensen and Serge Neumann who helped me introduce my first SPEEDX Special Features column! There is some real food for thought in what they have to say.

I look forward to hearing from YOU. If you find newspaper clippings in your local newspapers that pertain to the international radio world, please forward it to me. Support for this column has been pretty good so far... let's keep up the good work!

RADIO PROGRESO

OF HONDURAS

by e.j. "jim" whitehead

Employing a unique cultural-commercial programming concept, Radio Progreso enthusiastically works to meet the basic educational needs of the rural population of northwestern Honduras. Now in its second year, this broadcaster has already established itself as one of the DXers best bets in Central America.

Calling itself La Voz de un Pueblo en Marcha, The Voice of a Town on the Move, Radio Progreso operates both medium and shortwave outlets. As stated by the Committee for the Cultural Progress of El Progreso which operates the station, the goals of this station are

- to satisfy the educational, religious, cultural and social needs of the population
- to promote the well-being of the community
- to serve as the voice of all groups working for the betterment of the community
- to publicize community events

The area served by Radio Progreso is largely rural, except for the heavily populated north coast. It includes Yoro, the third largest city in Honduras, and about 100 widely scattered villages of varying sizes. Communications in the region are very poor and the people, mostly poor farmers and fishermen, are largely illiterate and in need of basic education in hygiene, agriculture, and community awareness. Radio Progreso was created to satisfy these needs.

Originally, the idea for a cultural-commercial radio was the brainstorm of two American Jesuits, the Rev. P. Jose Fischer, Episcopal Vicarate of Yoro, and Rev. P. Felipe Pick. They decided that the only effective way to reach the widely scattered population was to employ the highly successful radio school techniques pioneered by Escuelas Radiofonicas Suyapa. Since the only radio outlet available was Radio Catolica de Tegucigalpa, which covered only a small portion of the northwest region, they decided to create a new radio station near San Pedro Sula.

The Bishop of San Pedro Sula showed considerable interest in the project and the Promocion Humana de Tegucigalpa agreed to try to obtain a suitable frequency for the new station. In addition, help was obtained from the United States in the form of the assistance of Rev.P. James T. Meehan of the Jesuit Mission Bureau and the cooperation of radio station KNOX in St. Louis, Missouri. When a new frequency proved impossible to obtain, it was decided to attempt to buy an existing radio station. Negotiations were undertaken with the owner of a small station in the town of El Progreso and, on 15 November 1970, the new Radio Progreso began medium wave service.

Early transmissions were made from temporary studios located at the transmitter site. Soon, however, Radio Progreso moved to its permanent quarters located in the basement of the Clinica Parroquial Las Mercedes in the center of El Progreso. This facility has three studios and two fully equipped control rooms, as well as the usual offices, press room, maintenance shop, and FM relay transmission facilities.

On 15 January 1971, only four days after the move to the new studios, Radio Progreso completed its initial installation with the inauguration of shortwave service and by placing a new 210-ft. high antenna tower into service. This completed, the new radio then turned full attention to the task of expanding programming.

The programming of Radio Progreso is unusual in that commercial broadcasting is mixed with non commercial educational, cultural, and religious programming. This mixture ensures that Radio Progreso will always have sufficient funds to employ adequate personnel, maintain an up-to-date record library, maintain and purchase equipment, and present high quality programming. A ten-man committee, composed of seven laymen and three representatives of the Institucion Educativa Yoreña, oversees the operation of the radio.

The Chairman of this pro tem committee, Prof. Adalberto Paz, is the director of the station. Day-to-day operations are managed by Jerry E. Tolle S.J., an American Jesuit from Kansas City, Missouri. Engineering support is provided by another American, Rev. Felipe (Phil) Pick (HR2-FP), who hails from West Bend, Wisconsin. The staff of 25 also includes announcers Roy Arturo Maradiaga, Oscar Alberto Girón, Rodimiro Ortez, Adalid Portillo, María Janette Castro, Roberto Flores Discua, and Ramon Osorio Espinal and news reporters J. Rolando Sarmiento, Roberto Rodríguez, and Jorge A. Zaldiver.

Radio Progreso operates on 1110 khz medium wave with a Westinghouse transmitter of 5 kw output and on 4920 khz shortwave with a CBS "custom built" transmitter of 1.5 kw output. The original medium wave transmitter, a 1 kw Gates BC-1F, is used as a standby. In addition, a 10 kw transmitter, presumably for use on medium wave, is already installed and, once checkout is completed, will soon be in use. These transmitters feed a quarter wave vertical tower (mw) and a half wave dipole (sw) and are located some distance outside of town. A 10 watt FM transmitter operating on 144 Mhz is used to feed these transmitters from the studio building.

Radio Progreso has been widely noted in the United States and Europe between the hours of 0100 and sign off at 0400 GMT. It has also been noted at local sunrise and is easily identified by its frequent IDs. One station identification, accompanied by the "Dagnet" theme, is "Esta es La Voz de un Pueblo en Marcha, Radio Progreso, desde la ciudad de Progreso, Departamento de Yoro, en Honduras, Centro America" The sign off is equally distinctive and includes a hymn, "Lara's Theme" from "Dr. Zivago", and a full ID giving frequencies.

Radio Progreso is an excellent verifier. Correct reports, which may be submitted in either English or Spanish, are promptly verified with an informative Spanish language form letter. The verification letter contains all details and is signed by manager Tolle. International Reply Coupons or mint stamps should, of course, accompany reports. Tapes, if included with reports, should be accompanied by a written report. Tapes will not be returned and are accorded no special treatment.

It is still too early to tell whether Radio Progreso is accomplishing its stated goals. Working for a better world is a big job although judging from the enthusiasm with which Radio Progreso has undertaken that task, HCBJ had better watch out. Why not tune them in from time to time; you will be surprised at the high quality they have been able to attain in a relatively short time.

Nuestro anhelo es que marchemos unidos
"Adelante" con los ojos puestos
 En el servicio de la gran comunidad universal.  **"Arriba"**
 en el ideal de construir un progreso moral,
 educativo y económico, constante y efectivo.

SEGUIMOS NUESTRAS LABORES, SEGUROS DE COOPERAR A LA FORMACION DE UN MUNDO MEJOR.
