KEYNOTES

CONGRATULATIONS TO 4 NEW FULL MEMBERS

ROSEMERY A. TRZASKUS
CHICAGO, ILL.

JOSEPH SMITH JR.
JOHNSON CITY, NY.

DAVID P. SIMON
ROCHESTER, NY.

TOM CAVARAS
WAYZATA, MN.

Certificates of Full Membership and a copy of the SPEEDX Constitution were mailed to each of the above in September.

ANNOUNCEMENT

A copy of the latest NASWA reprint, RECOGNITION OF LANGUAGES, by professor Richard E. Wood, is available to any DXer. This article explains techniques DXers can use in identifying the language of a program they are hearing.

To obtain a copy, just send a self addressed stamped, legal size envelope to.

NORTH AMERICAN SHORTWAVE ASSOCIATION
P.O. BOX 8452
SOUTH CHARLESTON, WEST VIRGINIA 25303

DXers outside the United States can obtain a copy for one (1) IRC. The article will be sent via AIRMAIL if two (2) IRC's are included.

HAP has done so much for the handicapped, and there is much more to be done. Lets all support HAP by donating \$1.00, \$2.00 or more to the CHRISTMAS TREE fund c/o SPEEDX, P.O. Box 321, Santa Ana, Calif. 92702. See HAP-penings in the September issue of SPEEDX for particulars.

A MESSAGE OF THANKS

Members of our hobby, in and out of SPEEDX are to be complimented for the interest they show in others.

Recently members of SPEEDX, FRENDX, SWAPS NEWS LETTER and other SWL publications heard of a SPEEDX member being in the hospital. The cards and messages they sent him, and delivered to his room by the "Candy Strippers" (volunteers) was over-whelming. There was no room to display the cards, so about one third of them were hung on the venetian blinds of the windows. All the nurses on the 5th floor West, at one time or other, visited the room to see the beautiful display.

The thoughts and prayers contained in those messages will never be forgotten by this SPEEDXer, they meant so much to him. The thoughtful messages, renewed his faith in humanity, and proved to him the best are members of our hobby.

It is mighty nice to be back home after my 54 day stay at the Hollywood Presbyterian Hospital. Thanks again for your messages and prayers.

DX MONTAGE

RESEARCH/COMPIATION/REDUCTION by A. W. BRUCKS

74 Massachusetts Road

Oakdale, Connecticut 06370

THE BUNDY-d'ADOLF SYNDROME REVISITED (or "Hafa Adai To Tropical Isle DX"):

There I was...an east coast SWL suddenly placed on a 32-mile long island in the tropics half-way around the world. Difficult as it may be to think of 1100-1400 GMT as "prime time"...it is still more difficult to attempt to make some sense from an overabundance of Indonesian regionalism when the sum total of your experience with that exotic land has been to leg Voice of Indonesia English transmissions four years previous. Undaunted...armed with a Teshiba portable purchased that afternoon and a few free hours before departure...I settled down near the shores of Agana Bay for a quick course in Asian DX. Visions of Maldives danced in my head...so what to my wondering ears should appear...but Nihon at 1045 with Japanese lessons...the same legging so oft present on the old DX-150A at the family homestead 9,000 miles to the East! So, of course, I gave up and went looking for uninformed Japanese soldiers in the hillside caves!

SNYDER'S LOG: For those DXers whose logs or log-keeping aren't what they'd like them to be, Doug Snyder may have found the answer. It's an accountant's book called "DAY BOOK"...sturdy...at 8x12 large, but still convenient and has many columns of various sizes for numbers or words...can handle up to 37 entries per page and should be available in most stationary stores...

GEE...M.T.! For those among us still having trouble converting Greenwich Mean Time, prepare for the arrival of "Moon Time". Scientists devised a system of time registration for the moon calculated in lunar stellar days. The 50th Anniversary SPEE DX Edition will inaugurate a column utilizing this method for coverage of interplanetary DX...

YOU'RE NOT LIKELY TO HEAR IT ON RADIO PRAGUE, BUT... a July TV Guide article sites Czechoslovakia's first color telecasts as a useful object lesson in free vs. government controlled communications. The Czechs had to choose between a West German or a French color system...which, it seems, are incompatible...i.e., the German set cannot receive the French colorcasts and vice versa. Enter the Soviets, under yet another of the ubiquitous secret pacts, as user and manufacturer of equipment for the French system to sell the hardware to the Czechs and also to assist with the development of the new Czech system. One "advantage" in their eyes is that such a system would render it impossible for border-dwelling Czechs to receive color programs from West Germany and Austria. It is obvious that government control of communications is not always as crude as the old jamming technique. Oddly enough, the black-and-white broadcasts in Europe are not plagued by incompatibility. The Czechs who cling to their old sets will continue to receive a free flow of news and entertainment from beyond the Iron Curtain...Czech-Mate!

ANONYMOUS CONTRIBUTION: "This is the Israel Broadcasting Authority on 9,625 kilohertz... but for you...only 9,624..."

ACORNS FROM OAKDALE:

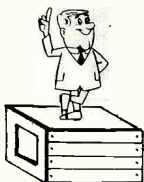

A Candidate is a man who makes an issue of himself...

NORTHEAST REGION SOCIAL CALENDAR: The Greater Philly group gathering reported upon in two other columns last month is living proof that the hobby spans all ages...Bill Shaw is 78, host Harlan Bye 50-plus, John Vackeroth 26, and youngster John Fischer but 19! However, in response to a challenge by one of these reporting columnists...and rejecting as too obvious the immediate impulse to dub them the "PENN-MEN"...I tentatively label this imposing body the "SUPRE - MEN", an acronym derived, of course, from SUBurban Philadelphia Radio Enthusiasts. Mr. Bye provided the surprise of the September 9th B.A.D. Guys gathering at the Whitehead estate by dropping by to say hello to all the Boston Area DX followers...and though he didn't stay long enough to partake of the usual fine Italian cuisine, another Philadelphia DXer, John Fischer, and Metropolitan DXer Phil Schnabel did. Which reminds us that the Metropolitan Area DXers...who, at the risk of offending activists in Maryland or Manitoba, have been called "THE M.A.D.-MEN"...are planning a Greater New York meeting on the afternoon of November 11th in Bronxville. For further details...and so that he might warn his parents...contact Philip Schnabel, 163 White Plains Road, Bronxville, NY, 10708...or if classical Greek or Latin is your bag chisel out an inquiry and send it along to Chris Hansen, 927 Farnald Hall, Columbia University, New York, NY, 10027...See you there?

SUBURBAN PHILADELPHIA

RADIO ENTHUSIASTS

The SOAP BOX

A DIVISION OF "DX MONTAGE"

Moderator: *Glan W. Brooks*

This month THE SOAP BOX features a rebuttal from the Grand Order of Oregon DXers, commonly known throughout the DX World as "The G.O.O.D. Guys", to the SPEEDX Exposé which had been published in the April Edition of the club bulletin...

"Certainly some comment seems indicated on behalf of 'The G.O.O.D. Guys', depicted as cherubs, indeed!...

GRAND ORDER

"Following April's 'DX MONTAGE', an informal poll was taken from the ranks in an effort to formulate an official response from the group. After an exhaustive tour of the taverns and other watering holes known to be frequented by the membership, we can now officially state that 'The G.O.O.D. Guys' are the most representative collection of SWIs anywhere... we can't agree on anything...except the inadequacy of the SWling monarchy...

"Most noteworthy of our indecisions is the propensity for not scheduling regular meetings...we do, however, manage to break with this time-honored tradition about once each year and descend upon whoever might be coerced into saying:

...'we ought to get together sometime'... the record for hosting 'The G.O.O.D. Guys' presently stands at one....a distinction shared by several...and, unless some new blood is soon infused, this may stand for all posterity...

"Actually, if it were not for our deep sense of responsibility toward the order we would not consider disrupting our personal affairs for any such gathering... but, since the ANARC group sees fit to establish its annual convention at a distance beyond our modest means of horse and buggy transport...as well as to totally ignore our recommendations...after concerted solicitation of same...we do extract a modicum of pleasure by harmoniously joining in a rather raucous 'Bronx Cheer' as a salute to that august body..."

"THE G.O.O.D. GUYS"

Four months ago our mailbox was graced by a most eloquent letter addressed to SPEEDX club members from fledgling DXer Arjon D'Angelo...who calls Sherman Oaks, California, her home...and we'd like to share it with you now:

DISTAFF DX

"...First of all, I am a woman...which seems to be rare in this particular hobby...besides being a housewife and mother. I am twenty-five and started listening last December. My husband purchased a Lloyd's Pathfinder 10-band portable for me during Christmas...and away I went. Nobody I talked to knew a thing about shortwave listening, so I went about the task of finding...or should I say digging up...books concerning the hobby. Finally, after reading several paperback books on it, I began to understand all the history and details of it.

"...Next step was to put on the roof a cheap long wire, which helped my receiver a great deal. I read about clubs and joined one, which helped me discover how bad my receiver was for DXing. After huddling about with my portable I decided I enjoyed the hobby enough to go on to better things and, therefore, purchased an Allied SX-190. My husband constructed a multi-band antenna and my reception seems to be 100% better...

"...I still have many problems, however, because of my limited abilities on being 'stupid' when it comes to mechanics, on being a woman listening to shortwave; for instance, people say, 'YOU listen to shortwave radio', or 'That's odd for a WOMAN to do, etc...I also have a hard time picking up Europe and I get discouraged thinking I just don't have what it takes to really be a good DXer..."

"...Anyway, I enjoy my new hobby and am able to 'travel' while sitting at home. I recently joined your club and was truly amazed at the way it was run and organized. I hope to participate in it and also hope being a woman will not have its drawbacks!!!!...

"...I have found that Radio Nederland has been a big help and also the kindest of all the stations in generating enthusiasm for the hobby..."

"...I hope that I'll meet other members in the future and that I'll get a little better at DXing harder to find stations in the months ahead. I know your bulletin will help and I am glad that I am with your organization..."

GHANA BROADCASTING CORPORATION OFFERS YOU

THE FASTEST, MOST DIRECT WAY TO THE GHANAIAN MARKET

- * There are more than 600,000 radio sets in Ghana
- * There are more than 100,000 TV viewers
- * 'Ad' spots are inexpensive and effective

For Rate Cards and full details write to:

GHANA BROADCASTING CORPORATION

Broadcasting House, P.O. Box 1633, Accra, Ghana.

Sole Overseas Sales Representatives:

RMA LIMITED 28 Margaret Street, London W.1., England.

GHANA BROADCASTING CORPORATION

(Written exclusively for SPEEDX by PAUL K. KUSSE, Senior Technical Assistant, RADIO GHANA, and edited by Serge C. P. Neumann).

THE GHANA BROADCASTING CORPORATION began operations July 31st, 1935, as a wired relay station in the Gold Coast, now Ghana. The station, then a wing of the information services, was known as Station ZOY, and operated from a small bungalow in Accra, the capital of Ghana. Initially, the station relayed BBC programs to about 300 listeners in Accra only.

In 1936, the service began to expand. A radiodiffusion center was opened in Cape Coast (a regional center), and a year later, broadcasting stations opened at Sekondi, Kumasi and Koforidua.

In 1939, the Colonial government provided the funds for the construction of a new broadcasting house in Accra, and the purchasing of a 1.3 kilowatt transmitter—the first transmitter to carry programs from Ghana to its neighbors.

On recommendation of a Commission appointed in 1952, the government established the Gold Coast Broadcasting System in 1954. The first Director of Broadcasting was Mr. J. B. Miller, who came to that post from the BBC. He was the Chairman of the Commission which brought reforms to the Service after 19 years of operation.

The first Ghanaian to be appointed to the post of Director of Broadcasting was Mr. W. F. Coloman. He held the post from 1960-1968, when he was appointed Director-General. He held that position until 1970.

The Ghana Broadcasting Corporation (GBC) was formally incorporated on March 1st, 1968 under a decree that (now) consists of nine main areas; Sound (programmes), Television programs; Engineering, News and Current Affairs; Common Services; Administration; Accounting; Music; and Commercials (advertising).

The objectives of the GBC are, among others, to undertake sound, commercial and television broadcasts; to prepare in the field of culture, education and information-entertainment, programs reflecting national progress and aspirations; to carry on an external service of sound broadcasting; and (in its) public service broadcasting—including the airing of government announcements; political party speeches; and the expression of differing viewpoints on matters of public controversy.

The GBC operates with funds derived from its commercial broadcasting (both radio and television), wired broadcast service, television license fees, and thorough financial support of the Ghana Government.

The Corporation employs more than 3,400 men and women, including engineers, lawyers, administrators, accountants, producers, technicians, announcers, designers, carpenters, monitors, artists and workers.

The GBC operates three radio networks in its National Service. It also operates the External Service and the Television Service. The three National Services are NBL-1, GBC-2 and NBL-3.

(continued)

GHANA BROADCASTING- continued.

The GBC-1: Broadcasts in the major Ghana languages, Akan, Ga, Ewe, Hausa, Dagbani and Nzema. But there are a few programs in English broadcast on this network, such as news, commentaries, Ghana Newsreel and various school or educational broadcasts. Most of the transmission time is devoted to programs on culture, plays, features, health talks, and so on. This service operates on 3350 kHz, 4915 kHz, and on 5990 kHz, respectively.

The GBC-2: This service which is our commercial service, is heard on radios only, and covers 13½ hours per day on weekends and on holidays. Inaugurated five years ago, GBC-2 carries mainly popular music programs and English programs, with "News on the Hour". Advertisements and social and public announcements are also part of the program fare. Frequencies are 4980 kHz and 3366 kHz.

GBC-3: This is the third network of the Corporation, and it carries only English-language programs. The programs have been designed to fulfill functions of cultural leadership, and patronage in the fields of Music, Drama, the Arts, Literature, and the Sciences. It operates from 1655 (GMT) until 2300 (GMT) daily, Sunday through Saturdays, on 3295 kHz and on 3326 kHz.

The External Service: This Service was inaugurated on June 1, 1961, and broadcasts in English, French, Swahili, Arabic, Portuguese and Hausa on four 100 kilowatt transmitters situated at Tema. Two high power transmitters of 250 kilowatts each at Ejura in the Ashanti Region augment the service. Service areas include North America, the Caribbean, Europe and the Middle East.

GBC-TV: The 30th anniversary of sound broadcasting in Ghana also marked the birth of the Television Service on July 31, 1965. It consists of studios at Accra, with four transmitters of about 20 kilowatt E.R.P. (effective radiated power) and linked by microwave to the studio center at Accra. GBC-TV is on the air for two-and-a-half hours in the morning when schools and colleges are in session. It goes back on the air from 1755 GMT on weekdays, and at 1600 GMT on Sundays, with entertainment programs.

* * *

(Editor's note: Our sincere thanks to Mr. Kusse for providing our readers with an insight into the Ghana Broadcasting Corporation. It can be said without qualification, that the GBC has been a consistently good verifier, now as in former days. This, in combination with their very interesting programs, makes it no wonder that the GBC must be considered as one of the broadcast leaders in Africa. Their programs and attitude clearly reflect the new and progressive Ghana. We hope you'll give it a listen, often).

From antenna expert and HAP Vice-Chairman, Bill Paschke, comes word of a new antenna tuner, known as the "TG RANDOM WIRE ANTENNA TUNER". It is billed as "especially helpful if you are limited to an inadequate, short indoor antenna. Yet equally beneficial with a too-long Inverted-L". "...Simple to operate and install".

Bill tells us that he has tested out the first one manufactured and found it to be "a FB producer... a good and economical antenna tuner unit". Further, "I can highly recommend this antenna tuner and, I am a hard one on either testing or recommending a product unless it is a producer".

Should you care to investigate this one, you may write for detailed information directly to Todd Graves, SWL GUIDE, 414 Newcastle Road, Syracuse, NY 13219. The advertised price is \$ 17.95 postpaid.

* * *

We pass along this request that we invite SPEEDXers to contribute to a DX Poll being conducted by the Crestwood DX Club (CDX), in Maryland. Between the dates, 15 September to 15 December, you are invited to submit your list of what you deem to be "The ten best SW stations". Mail your list to CDX, c/o Joe Geckle, 421 Sudbury Road, Linthicum, MD 21090.

Joe says, "The winning station will receive a copy of our CDX Bulletin and five beautiful picture post cards".

SPEEDX SELECT AWARD

● L A R G E S T 1972 Q S L ————— 1049.64 Sq Cm

Verification/Program Schedule folder from Radio Bougainville/VL9BA for a 17 August 1972 logging at 1103 GMT on 3322.5 kHz.

Winner: Mike Hardester, 401 Birchwood Ct, Modesto CA 95350

● L A R G E S T 1972 Q S L C A R D ————— 301.32 Sq Cm

Verification Card from Ma Bell's Overseas Telephone Service station WOO in Manahawkin NJ for an 8 April 1972 logging.

Winner: Andris Straumanis, RFD#1, Box 213, Murphysboro IL 62966

● S M A L L E S T 1972 Q S L ————— 107.00 Sq Cm

Spanish language QSL card from Difusoras del Uruguay/CXA19 for a logging on 11935 kHz at 2302 GMT 27 March 1972.

Winner: Ron Lanoue, 69 Blackinton St, North Adams MA

Congratulations to Messrs Hardester, Straumanis, and Lanoue!! They have been mailed their SPEEDX Select Award certificates in recognition of their achievements.

A portion of an actual Select Award certificate has been used to highlight the QSL size winners, but the editor isn't at all sure just how well it will come through the photoreduction process. In the event it happens to turn out badly, we'll state that they are 5½ x 9 inches, brown and gold in color, and have a fancy engraved border and background (just like money....almost).

It will be noted that the winning entries are shown in terms of square centimeters (Sq Cm). This was done since the metric system provides units that more readily lend themselves to resolving a really close situation....and such a situation did arise!!

We received two entries for "Smallest QSL" using a veri from Radio Yerevan which being of slightly different proportions, appeared to be at least as small as the one from Uruguay. Putting an accurate engineer's scale to work, it was determined that R Yerevan officially came in at 108,00 square centimeters...or only one Sq Cm more than CXA19!! (In case you're wondering how big a Sq Cm is, just divide a standard sized US postage stamp into fourths, and you'll come pretty close). Also not too far off the pace was Radio Peace and Progress' verification which came up 112.45 Sq Cm.

The degree of interest generated in this slightly off-beat award offering insures its continuation and certainly sometime next year SPEEDXers may expect the "Second Annual QSL Size" competition for 1973 verifications....So keep a ruler handy to the mailbox in the meantime.

Somewhat the opposite seems to be the case for the "Most Non QSLs" award announced last month. Even though no less than four SPEEDXers suggested the idea, we have not as yet received a single entry!! As of this writing there are still a few days left until the deadline, but it appears as though "Most Non QSLs-1972" will be vacated by reason of default. (This editor received at least four turn-downs last year that would qualify...and would slip in the back door...but alas, he is inellegible). Needless to say, any consideration of continuing this particular award on an annual basis is presently in limbo.

SOME SIMPLE ARITHMETIC:

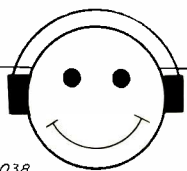

6 Christmas Cards @ 0.10	\$0.60
6 US postage Stamps @ 0.08	0.48
TOTAL	\$1.08

If you normally send these half-dozen Xmas cards to fellow SWLs, why not donate the buck to CHRISTMAS TREE instead, and still have your holiday greetings passed along to everybody rather than just six??? Gene Moser can get more worthwhile miles-per-dollar than either the Post Office or card manufacturer....See HAPPENINGS for details.

HAPpenings

NEWS ABOUT THE SPEEDX HANDICAPPED AID PROGRAM

HAP Chairman — Gene Moser • 6805 Woodland Ct • Coloma MI 49038

SOLD OUT: The SPEEDX emblem stamp is gone. We sold 50 stamps in one year, and because of the slow sales, a new supply will not be ordered until the first of the year, if then. Our club emblem will be available, but how soon will depend upon you. Because HAP can't tie its money up in products that don't move, we cannot order this stamp until 25 stamps are ordered by the membership. For a new price and ordering instructions, see the January 1974 "Happenings" column.

SCADS Meeting in Tustin: I hope all the CA SPEEDXers have signed up to attend this ASWLC/SPEEDX get-together. Latest report indicates a packed house, and I urge you to contact **Don Johnson** pronto!!

William Shaw, good friend and HAP supporter, sends news that Philadelphia DXers are holding DX meetings, and that they would like more SWLs to attend. If you live near Philly, write **Bill** at 7-5 Wilde Ave, Drexel Hill PA 19026. Get in on the real action!!

Evelyn Dolyak, HAP-5, has been named HAP Hospitality Hostess. She is a charming "old gal" (I mean that in the fondest interpretation) and will send birthday, get-well, or sympathy cards to any SWL brought to her attention. You can send a card on its way to someone "special" by sending a note to Evelyn "Dolly" at Box A, Griswold Iowa 51535.

Frank Testa, HAP-19, is the new Welcome Wagon Chairman. This is our official greeting committee for new HAPees.

Willard "Whitey" Herman, HAP-9, has recently undergone serious surgery on both eyes when both retinas became detached. Whitey is a gentle man who we enrolled this year. Your cards and letters would be appreciated greatly. Send them to Central YMCA, Reed and Washington Streets, Reading PA 19601.

No. 5 ————— In the SPOTLIGHT ————— No. 5

Well, it's my turn this month, and I hope you can resist the temptation to yawn. I'm 32, born 5 June 1941. I was born with muscular dystrophy, and luckily it is of the slowly progressing variety. In 1962 I graduated from Benton Harbor High with all "A's". After high school I went into a negative retouching business which lasted ten years. I live with my mother, father, and brother (who has MD also, is 29, and a good part-time artist) who was my partner in the retouching business. Asas 1968 began my "armchair travelling" when I was given a 5 band portable. The 4.5-13.0 MHz SW band was something new and exciting and led me to a Lafayette Mark VI, then to my present DX150A. I'm a member of NNRC, Lunar (AM-SSB) Club in addition to SPEEDX. I served 3 years on the NNRC CPC, and in 1972 started HAP at the request of the guy on the page before this. He placed a lot of faith in a "SW nobody", and with his help, and that of my staff, HAP is now a multi-committee-club-international-program.

NOTICE IMPORTANT !! HAP needs your help! There is this month, November, and until 15 December for you to send your donation to HAP. Please, send \$1.00-\$2.00 to: CHRISTMAS TREE, % SPEEDX, PO Box 321, Santa Ana CA 92702. Checks payable to SPEEDX, cash accepted. Your donation will place your name on a special Christmas page in December. We can't do it without Y O U !!!

SAVE THOSE STAMPS! Wes Ogden, Lunar Club President, has begun a used US stamp drive. All stamps will be sold to a stamp dealer and the proceeds go to HAP. We need thousands of US Stamps. Please leave stamps on the paper and send them to Wes at PO Box 283, Bell CA 90201.

Since June HAP has been mentioned on the following SW broadcasts: Radio Nederland's DX Juke Box, Radio Canada SW Club, BBC World Radio Club, Sweden Calling DXers, Radio Bucharest, Radio Australia, and HCJB's DX Party Line. Thank you for the loan of your international voices!!! Through your generosity we have made contacts with the handicapped worldwide.

On 13 September Serge Neumann reported Harry Van Gelder had spent some time in the hospital. However, Harry is now back home and on the air. Welcome back dear friend!!

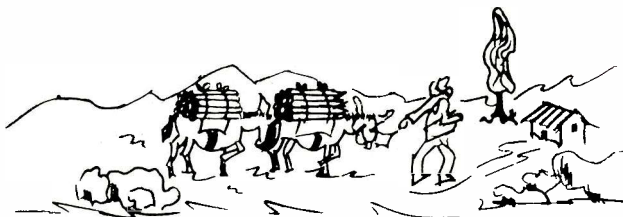

SPEEDX joins the ranks of NNRC this month in sending out our bulletin on cassette to our blind HAPies. NNRC began sending their excellent bulletin out around May. If you know a blind person who would enjoy this hobby more through a taped bulletin, contact me for SPEEDX. Robert H Ladd, 178 Vreeland Ave, Rutherford NJ 07070 for NNRC on cassette. Rates and further details sent on request.

That about does it for this month...except for one plea: Please don't play trick-or-treat on HAP. If you all give \$1.00, it will add nearly \$400.00 to our treasury and make HAP totally self-supporting....for the first time. Just think of the help we could provide then!!! **HAPPY Halloween!!**

- REFRAN -

"Quien no se atreve no pasa el mar"

YOU CAN'T TELL YOUR PLAYERS WITHOUT A SCORECARD

For some time DXers have noted Radio Tupi programming on channels allocated to Radiodifusora de São Paulo and recently Radio Panamericana has appeared on frecuencies allocated to Radio Record. In addition, there are recorded instances of frequency switches by Radio National and Radio Excelsior and by Radio América and Radio Novo de Julho. Although this all seems a general state of confusion, one look at the ownership of these flip flopping pairs reveals that they are all linked together in some way. Either the stations are both owned by the same owner or organization or they are so closely related that, for all intents and purposes, they may be considered a single entity.

Radio Tupi and Radiodifusora de São Paulo are both owned by the same company. Both operate medium wave outlets in their respective cities but, when it comes to shortwave, on Radio Tupi broadcasts are relayed. From time to time the license holder's name might be aired but, for the most part, only Radio Tupi programming is heard.

A slightly different situation is true for Radio Panamericana and Radio Record. Although they are separate organizations, the Board of Directors is so closely interlocked that it is no wonder that Panamerica would turn to Radio Record to "rent" transmitter time. I suspect, however, that the rent is more a bookkeeping transaction than a sale of spare transmitter time.

The National-Excelsior and Novo de Julho-América switches are also the result of common ownership, a fact which should come as no surprise to most old timers. This won't tell you who is on first, but at least you'll know why he is there.

A MONTH OF SURPRISES

Several DXers checked in this month with the news that Radio Colosal, 4945 khz, has been noted with English language announcements in the time slot of 0500 - 0630 GMT. These announcements thank those who have written to the station and promise an answer and a souvenir to those who write in to the station. Do you suppose this means they will at last answer one of my reports????

Was not a clue to the impending coup in Chile noted while tuning to Radio Corporación the night before it all happened. Not a sign of that pro-government station now at this QTH nor of Radio Portales either. I suspect we might not hear from those two for some time. Look for Radio Presidente Balmaceda to be back soon, however, as the Christian Democrats, who own the station, have endorsed the junta in power.

Got to get on to the reports as the biggest and most pleasant surprise of all this month was the pile of reports sent in by 51 great guys. Keep these cards and letters coming in boys, I love it. And, so to the loggings.

RADIO FREE AMERICA

CONDENSED FROM ARTICLES WHICH APPEARED IN THE
N.Y. TIMES 20 AND 21 SEPTEMBER 1973

By E. J. "JIM" WHITEHEAD

America's first "pirate" broadcaster took to the air at 12:23 P.M. on 19 September from a location some 12 miles off Cape May, New Jersey. With the words "This is Radio Free America, the silence of the sea is broken at 1160 on the AM dial", Dr. Carl McIntire fulfilled his pledge to continue broadcasting after the F.C.C. shut down his station in Media, PA WKUR. The broadcasts lasted only a day, however, as technical difficulties developed and the transmitter was shut down until some minor adjustments could be made.

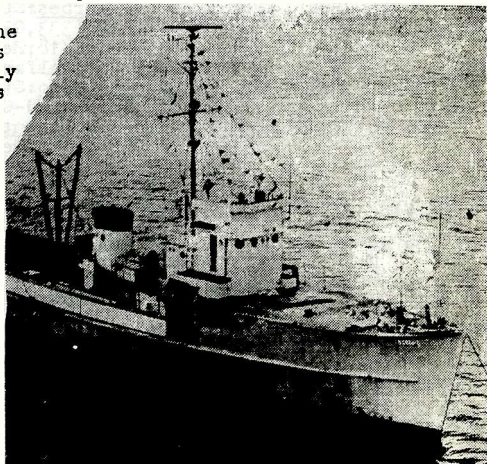

Radio Free America was born after the F.C.C. shut down WKUR last July for allegedly misrepresenting programming plans and favoring conservative over liberal speakers, a violation of the F.C.C. "fairness doctrine". Charging the F.C.C. violated his right of "free speech", McIntire choose the "pirate" broadcasting route to escape F.C.C. jurisdiction.

Delayed for a time by money and legal problems, McIntire finally arranged for the use of a former minesweeper, the S.S. Oceanic, and outfitted it with a 10kw transmitter. The 138 ft. wood hulled vessel put to sea on 30 August but first the loss of a sea anchor and later transmitter troubles delayed the commencement of broadcasting. Finally, however, the difficulties were overcome and, on 19 September, broadcasting was begun only to be discontinued a day later.

The termination of broadcasting on 20 September was the decision of Dr. McIntire after he received a complaint from station WHLW in Lakewood, New Jersey that Radio Free America was interfering with its signal on 1170 khz. Dr. McIntire is quoted as saying "There is no dearth of wavelengths and we do not want to interfere with other stations." Present plans call for Radio Free America to try to eliminate the problem of interference through the use of a directional antenna but, if that fails, a move to 1613 khz is contemplated.

The shutdown also stalled for the the moment the confrontation that was brewing with the F.C.C.. Initially the F.C.C. simply trailed the ship as it cruised along making no attempt to interfere. However, the F.C.C. plans to seek a restraining order in Federal Court should broadcasting resume. The order will be sought on the grounds that the converted minesweeper, which is of U.S. registry, must have a license under the terms of the Communications Act of 1934 which states "No person shall use or operate any apparatus for the transmission of energy or communications or signals by radio upon any vessel or aircraft of the United States without a license."

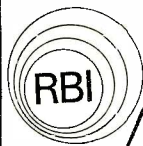

By the time this reaches you, Radio Free America may be on the air once again as the required adjustments are expected to take about a week to complete. You had best keep a close watch, however, as there is no assurance that Radio Free America will be around for long. Larry Magne reports in "FRIENDX" that reports to Radio Free America, Cape May, N.J. Attn: John Jones, Engineer will be answered so, if you hear it, report it. Good luck!!!!

Europe/Africa Roundup

Ciao! First off, thanks go to new reporters Dave Atchisson, Arch Dawson, Kevin De Angelis, Karl Forth, Joe Geckle, Eugene Kelly, Gus Miller, Dan Sheedy, and a special welcome to Henry Durant who sends his reports in all the way from Thailand. Also, a welcome back to Lynn Hyndman. A total of 51 reporters. In fact, we would have had more 'cept for the fact that these guys were late: Bob Beck, Scott Brown, Mike Collier, Steve Handler, Ian Henderson, Serse Neumann, and Andris Straumanis. Remember, late reports cannot be used nor credited. (Especially now that I can't s-t-r-e-t-c-h the rules a little).

Cape Verde Islands: We have a correction to report. Phil Schnabel in response to my query at the recent BAD guys meeting—his report on R. Barlavento in the September SPEEDX should be 3930 kHz.

Greece - Radiofonikos Stathmos Macedonias: Gregg Calkin writes us in response to my query in the August SPEEDX on this Greek station: "The station is a new one in recent months it seems. It seems to operate regularly, best here (Spain) around 1300 GMT on 9710 kHz; it is located in Thessaloniki and QSL's (LIR card) are sent from Veniselou 4, Thessaloniki." Thanks Gregg.

Reporting forms available: Don't forget that SPEEDX reception report forms are available from SPEEDXPARAS. These are tri-lingual forms (English, French, & Spanish) for use in reporting to individual stations. These forms are available free to active SPEEDX'ers only ... three (!) forms are available for each magazine credit point received (up to a maximum of 18 forms per month) with only return postage.

Soviets cease radio jamming: Perhaps the article put here for your edification (coming from the Boston Globe recently) may not do too much for your love of Radio Moscow, but is of some interest.

LONDON — The Soviet government has stopped jamming official and semi-official Western broadcasts to the Soviet people, the British Broadcasting Corp. reported today.

A spokesman said interference with the reception of the BBC Russian Service and the Russian-language services of the Voice of America and West Germany's Deutsche Welle stopped on Monday.

"But the jamming of Radio Liberty, the American station based in the Federal German Republic, and Israel's transmission to the Soviet Union in Russia, is reported to be continuing," the spokesman added.

The Voice of America is an official division of the US government; Radio Liberty and Radio Free Europe are financed by Congress but do not have official status.

It is interesting to note, however, that it will be no easier to decipher what is behind all that noise over R. Free Europe and R. Liberty. The tides of change do come in, but not all that fast.

(direct)

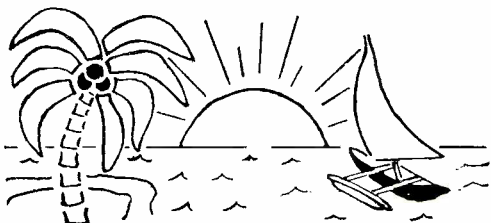

B.A.D. Guys do it again! Not being exactly sure what we did 'cept for the fact we did meet at Jim Whitehead's lovely residence in suburban Reading. In attendance besides yours truly and the host and hostess were John Fisher, Harlan Eye, Phil Schnabel, Chris Hansen, Jon Fay, Frank Testa, Ken Compton, Mike Macken, and the ever-present Alan Brooks. As usual we all had a grand time being served the famous traditional meatballs and lasagne (or should I say infamous). Much of the rest of the time was spent exchanging the latest D.'ing info and in the case of Phil Schnabel and myself, watching Jon Fay trying to hang himself in the Whitehead's backyard trying to put up a temporary antenna.

Then, what may become an annual event—the first BAD Guys Grand Prix came as all were about to leave. Alan Brooks and his navigator, daughter Belinda, along with excess "baggage" Phil Schnabel and Chris Hansen headed out in the Brooks' Volkswagon Camper, ahead of the second entry, piloted by your Europe/Africa editor along with co-pilot and sometimes ASLAC Americas editor and ASLAD'er John Fisher. There must have been a mix-up at the starting gate. It was to our surprise to then see the hasty Alan coming up behind us. After we had made our entrance on to the highway, he must have taken a further up entrance ramp (hoh!). From then on it was practically no-contest with John and I easily setting the pace. As we went off our exit ramp we saw Alan and his companions streaking off down the road coming in a close second.

Hey Alan, what does that blue flashing light mean? 73's Bob

Frequencies in khz Deadline: Here by 15th Times in GMT

Many interesting loggings this month. Note the many Indo stations reported. SIBS & TIMOR are still being logged. KHMER is heard on 60 meters. And MORE! What you may NOT find this month are the high frequency loggings from the well heard stations such as; Australia, Japan, China, ect. This is necessary due to the fact that A/O has over 50 reporters this month, which is twice as many as in June with the same number of pages. I'd rather print the lower freq. loggings, since this is where the DX is at. As the Asian DX season is starting now, try working into the lower bands a bit earlier. You'll be surprized at what you may hear. TRISTAN da CUNHA.....HERE I COME.

Thanks are in order to SPEEDX editors Jim Whitehead & Alan Brooks for sending in loggings from their recent trips to the Asian area. And you fellows get PAID for this? I'll go for free.

A large THANKS to 53 reporters this month. Late loggings rec'd from Steven Handler, Dan Henderson & Allan Gaede. Best mail a day or so earlier next time fellows. The US Post Office is not always prompt. Mail arrives here in two days from Australia but takes up to 6 days from ECNA. Here are a few of the more interesting loggings that arrived to late to go in regular section.

HELP STAMP OUT RUMORS

Mike Hardester took the time to clear up a point raised by a ?DXer? in another club bulletin in regards to the VOA site in Honolulu. From a letter of 29 August 1973 from George Jacobs of the VOA: "In regards to the question concerning the former VOA Honolulu Relay Station, you are informed that VOA has completely dismantled the station, has no plans to reactivate it, and has disposed of the site." Thanks for the info Mike.....dj

PAKISTAN

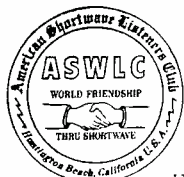

Radio Pakistan has added a new slow-speed newscast in English, beamed to Western Europe. 1100-1115 @ 17915 & 15305. (BBC-MS)

INDONESIA

Having trouble writing reception reports in Indonesian? You might try English reports to these studios; Jakarta, Jayapura, Ambon, & Yoyakarta. They have recently verified English reports. Send return postage.....dj

A/O DX NEWS

My thanks to the interested DXers who took the time to remark on my 'opinions wanted' (cf Sept. issue). The comment from Woody Smith, Knoxville Tennessee is typical of replies rec'd. "I like A/O NEWSCAN and think that you should keep it. Your readers may not be supporting your feature because they don't have any news. A/O DX news doesn't grow on trees! That is one other reason why you should keep it. Readers who can't always listen to DX shows can look in A/O NEWSCAN." Thanks Woody. True, DX news doesn't grow on trees, but surely more than one SWler a month has news of interest. Remember, if you chance across an item of general interest, send it in. 'til next month....73 Don

S C A D S

Last chance to register for the upcoming meeting of the SOUTHERN CALIFORNIA AREA DXERS to be held in Tustin, California the week-end of October 20 & 21. This meet is co-hosted by ASWLC & SPEEDX in the spirit of DX FRIENDSHIP, and all DX'ers are welcome, club member or not, novice or expert. If you have not contacted me yet, and would like to attend, drop a note to address below for full details, maps, ect. Don Johnson, P. O. Box E, Elsinore, CA 92330.

STATION SKEDS

Trans World Radio

 1400-1430 17770
 0515-0545 17840
 To Middle East
 1600-1630 11930
 1830-1900 11705
 West North America
 0330-0400 6045

To Australia, New Zealand
 0515-0545 11840 (direct)

Swaziland: Frans World Radio relay here will be installing a 35 kW SW xmtr soon. (HCJB)
Togo: Radio Togo is building 3 SW xmtrs to serve Northern Togo. They will operate on 3222 (Morn & Eve, 50 kW), 6155 (all day, 10 kW), and 11960 (afternoon, 50 kW). Test xmsns are expected to start this November. (HCJB)

U.S.A.: Organization of American states announces regular xmsns in French, Spanish, Portuguese, and English daily 2345-0000 on 11740 and 15160. (Richard Wood)

A special thanks to new reporters William Klett, Ronald Warren, and Evelyn Dolyak. Please keep your reports coming.

Note: Please remember to put your name and state on every item you send in, so they can be more easily credited.

At present I am residing at Northern Illinois University in De Kalb. My SX-130 is a bit sluggish on a 20 foot longwire bent at 90 degree angles, but they don't make worms very big. My mail is forwarded from Naperville so don't worry about an address change for your reports.

73s in 1973, Mark Kukul

UTILITY QSL REPORT

Deadline: 13th of the month

Steven J. Handler
1270 Carol Lane
Deerfield, IL. 60015

BELGIUM: OSU OOSTENDE RADIO 13189.5 kc/s sent B&w card full data for EE rpt & IRC's. (Koret)

BRAZIL: EMBRATEL Rio de Janeiro 13440 kc/s sent PFC w/all data in 6 weeks for an EE rpt and IRCs. (Koret) 11670 using their own card in 4 weeks for an EE rpt and 3 IRC's. Card has a photo of the Tangua Earth Station. VS: Edison Soffiatti. (Warren)

CANADA: COTC CGBZ 10520 Drummondville sent full data personal letter in 10 days for EE rpt and ms. (Straumanis) COTC CGBZ 10520 Drummondville sent letter in 1 1/2 weeks for ms. power 30kw, vs: R.B.Millar. (Forth) VCS-HALIFAX sent full data PFC for rpt of 2182. 22 days for EE rpt and IRC (Koret)

FRANCE: St. Lys Radio 12912 returned french PFC w/full data for FF rpt and ms. Rply Air in 12 days. (Straumanis)

FRENCH GUIANA: FKL35 6816 kc/s French Telecommunications Service Cayenne sent a form letter with no definite verification statement. 14 days air for FF rpt and 1 IRC. (Straumanis)

MOROCCO: RADIO ELECTRICAL CENTRE (PTT) Rabat CNR28 13965 20 kw FF letter w/freq. only in 27 days for 3 IRC's and EE rpt. VS:Mouhcine (Simon)

POLAND: Gdynia Radio 13141.9 PFC from PTT in Warsaw. Full QSL in 35 days for EE rpt and IRCs. (Koret)

SENEGAL: TELESENEGAL 6VK217 17610 French letter w/incorrect frequency as 20327.5 khz. (7VK221) 20 kw also no time or date. I guess they don't check their logs that well, in 26 days for French rpt and 2 IRC's. (Simon) I know what you mean about not checking reports. However in your case it could be they sent you someone elses QSL? That happened to me with the PTT in Liberia. The sent me some guy in West Germany's QSL. I sent it on to him. About a week later I received my QSL from a guy in California who had gotten it by mistake. If you ever do get a QSL that is not yours, please be good enough to forward it on to the owner. Many times after addressing the envelopes, stations line them up to put in the letters. More often than not, this involves several people having their QSLs put into the wrong envelope.

SPAIN: I sent a rept to CTNE in Madrid for one of the FTP stations on 14.9 MHz.

In 3 weeks I got a QSL for their Coastal Station on 13,17, and 22 MHz. This may be an indication that they do not read their mail to well, or that my Spanish is pretty bad. In any case, if this type of thing happens to you, all you can do is send a follow up.

TAHITI: FTS-Papeete FZ099 9928 French no data ltr from Paris but rpted to Tahiti. 25 days for 3 returned IRC's and a FF rpt.

WEST GERMANY: Lahr Military 5690 reject ltr from Lt. Col. Belliveau saying that

"It is not the Canadian Forces policy to either acknowledge or deny xmsns made on military nets. Therefore we are unable to comply with your request of 13 July 1973." Is this a New Policy?(Koret) Lahr Military Canadian Forces Europe sent a personal letter saying they can't veri due to regulations. PFC and SASE sent and returned. VS: R.A.Sieffert. How did you get it verified(Simon). I guess I got lucky? My QSL letter is dated April 26, 1973. It say's- "Your letter of March 16 is acknowledged. The Lahr station on the Canadian Military Aeronautical Communications Service provides communications for Canadian Forces aircraft to or from Europe. Being a military unit we are unable to impart any classified information, however, our international Call Sign is DHM 95 and our voice call sign is Lahr Military/ We broadcast weather information on a schedule on the hour plus 16 minutes, for Lahr, Soellingen, Dusseldorf and Stuttgart, followed by terminal forecasts for these locations. We confirm that we commenced our broadcast at 0616 on March 16th on 5690 upper side band. Thank you for your evaluation of our signals. Your reply coupon was not required, and is returned, Signed-T.R.Barber, Captain, for the commander Canadian Forces, Europe." Since I sent them a report for their 0616 wx forecast, the Captain QSLed it as it could hardly be called a classified broadcast. However even my QSL is not as "Tightly worded", as I would like. I wrote to them using a West German address-Lahr Military, Canadian Forces Station, Commanding Officer, Canadian Forces Europe, Lahr, West Germany. However they QSLed via CFPO 5000 via Belleville, Ontario, Canada. If you tried the CFPO try direct or visa versa. Also try addressing it directly to Captain T.R. Barber.

As long as I am answering questions, I get about 10 requests a month for addresses of stations. I don't mind answer them, however, you may have to wait a week or so for my answer. However, I would suggest that you purchase the new **WORLD UTILITY DXER'S HANDBOOK**. It is available from Jack White, 780 NW Wallula, Gresham, OR. 97030. The price for Speedx full members is only \$6.95 (\$7.95 for others). The Handbook is over 200 pages and contains over 100 pages of individual station data, listing alphabetically by country, the addresses, QSL policy, operating frequency and other information on literally thousands of utility stations throughout the world. Also, remember the advise of the Sage of Utility DXing, when you don't have an address of a station and are in doubt, make one up., something is better than nothing.

Back to Utility QSLs. Once again the US loggings dar outnumber the others so I have changed the US logging format- all QSLs listed below are USA.

WWV-National Bureau of Standards 10000kc/s 13 days for no rp. (Straumanis)
NOS-USCG Air Stn Cape Cod 5696 SSB 100 watts PFC 9 days for SASE (Simon)

At last I am caught up, all reports to date have been used. I even have some room left for a few brief addresses-

Telesenegal
 B.P. 69
 Dakar, Senegal

Commanding Officer
 US Coast Guard Air Station
 Selfridge Ang, MI 48045

US Coast Guard
 Air Station Savannah
 Hunter AFB
 Savannah, GA

US Coast Guard
 Air Station Cape May
 Cape May, NJ 08212

Sydney Volmet
 Commonwealth of Australia
 Dept. of Civil Aviation
 Box 211
 Mascott, NSW 2020, Australia

Empresa Nacional de Telecom.
 Casilla 4450
 La Paz, Bolivia

Directorate General
 of Posts & Tele-
 communications
 37 Kebon Sirih St.
 Djakarta, Rep. of
 Indonesia

Once again QSL will be using ALL reports each month. Keep them coming. Also any news about the stations can and will be used, so if you have any new info, send it on in. The winter DX season will be here soon, so good luck, and

DEADLINE: OCTOBER 15th

NEWS

A rather long news section this month, but well worth it ... I have received a copy of Chris's Sept. column and herewith include some of his closing remarks; With this edition of the SPEEDX QSL Section, I round out my career as a column editor, at least for the time being that is. I would like to thank all those who helped get me on my way and encouraged me when things looked gloomy. Special thanks should go to people like Art Glover, the late Don Billingsley, Mike Macken, Steve d'Adolf, Jim Whitehead, and Frank Testa (and his meatballs, hi!) not to mention many other people. For those who want to keep in touch, my new school address is: Box 1614C, 700 Commonwealth Ave., Boston, Mass. 02215. The telephone no. is (617)353-8689."

In adding my remarks, I would like to thank Chris for a job well done and I know that everybody in SPEEDX wishes you all the best and thanks you for your dedicated contribution to SPEEDX and to the hobby.

I only hope I can carry on the column as well as Chris, so I am asking for support from all you super SPEEDX'ers, and the best support you can give is to send those QSL reports in. But please don't hold back in writing to me with your comments, suggestions, criticisms, or nifty little pieces of information that you come across concerning QSL's. All will be welcome! And I sure appreciate the use of those QSL report forms that are available from headquarters for just a SASE.

Enough chitchat. Not being as adept as Chris in picking out rare or unusual QSL's, I'll make a stab at it as well as include some from his Sep. list. Starting in Europe, there is Mike Wiseberg's reply from Radiostantsia Rodina, and Al Sizer's great catches from Radio Baku in the Azerbaidjan SSR and Radio Riga in Latvia. On the African scene, Alan Mayer received his reply from the ORF-St. Denis station at Reunion and Ron Lanoue received his card from Radiodiffusion Television Tunisienne. In Asia, several of the regional stations in Indonesia have started replying and in Central America, Radio Lux, Honduras, replied to Gregg Calkin.

EUROPE

ALBANIA: Radio Tirana, 6200, full data folding card w/picture of building on the front, sea mail in 100 days for 2 IRC's and report in EE. (Kamber)

AUSTRIA: ORF, Aldrans, 6000, full data color card of the Tirol; 2 months airmail for 2 IRC's; also received packet of info on ORF. (Calkin)

 R. Barquisimeto, 4990, green/white card, 18 days, 1 IRC, Sp. rpt. (Luberski)

In closing my first column, I want to thank all contributors and I promise to do better next month, hi!. During the last few days, several items have come up. First off, please obtain all QSL report forms from headquarters in Santa Ana; please list frequencies heard and be sure to put your name with every item. Also, I have a few questions for all SPEEDKer's - would you like to continue the policy of placing the name of the state after the contributors name? I know its necessary for the other columns, but I'm not sure about this particular column. Be sure to let me know. I will put the state in certain cases, like for Smith, which we all know there are several that belong to SPEEDX, and for certain other cases. Also, please send suggestions for a new name for the column, something catchy and distinctive for SPEEDK. It must refer to QSL's or verifications and not be too long. The winner will receive a neat little surprise from me, and the judges decision is final!

Next month, there will be more reports and less chatter from me, you can be sure! But in the meantime, let me thank Chris Lobbell, Art Glover, Oliver Ellsworth, Don Johnson and Bill Flynn for getting me started this month and a bunch of contributors for keeping me going.

New deadline is 15th of every month.

Radiodifusora "Cenit" de Portoviejo - Ecuador S.A.

Le Augura

*Felices Pascuas de Navidad y
Un Venturoso Año Nuevo*

GRACIAS POR SU AMABLE SINTONIA

Diciembre 25/71.-

Dr.
RICHARD E. WOOD
Dept. of Foreign Languages
Louisiana State University
Baton Rouge, La. 70803, U.S.A.
Distinguido oyente:

Reposa en nuestro ARCHIVO DE HONOR su gentil reportaje.— Todo cuanto indica coincide con lo programado en la fecha a que Ud. hace mención

Gracias por tan valioso envío, y permítanos contarle entre nuestros amigos de siempre. Si algún día visita Ecuador, le invitamos para que llegue a nuestra ciudad donde será muy placentero atenderlo. La presente misiva le servirá como la mejor tarjeta de presentación.

Reciba el cordial saludo de los que hacen Radiodifusora CENIT de Portoviejo - Manabí - Ecuador S.A.)

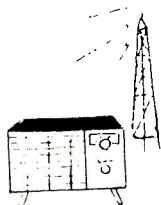

Wilfrido Macías Parrales
GERENTE

Nuestra Emisora transmite en dos frecuencias: 1.155 y 4.770 Kcs.
Programaciones artísticas - culturales - deportivas - comerciales, etc. Esta Emisora pertenece a la Empresa Radial CENIT del Ecuador, con Emisoras en Portoviejo, Manta - Bahía y Guayaquil.

From the collection of Dr. Richard E. Wood.

RADIO SUTATENZA

ESCUELA RADIOFONICA

by E. J. WHITEHEAD

For 24 years, Radio Sutatenza has been a pioneer in the use of radio for educational purposes--especially in the education of the rural adult, the "campesino". From modest beginnings Radio Sutatenza has grown into a major force in the battle against illiteracy in Colombia. Its multi-media approach has been so successful, in fact, that it is now being widely copied by other developing nations in Asia, Africa, and Latin America.

Radio Sutatenza is an arm of Accion Cultural Popular, an organization of educational media dedicated to providing the 8 million rural adults of Colombia with the wherewithal to assume the responsibility for their own development. Radio Sutatenza functions as the primary means of reaching these people with a program of instruction based upon the five basic notions of Health, Alphabet, Numbers, Economy and Work, and Spirituality. These programs in hygiene and basic health care, reading and writing, simple arithmetic, increasing productivity, and the recognition of personal dignity are supported and reinforced with a newspaper "El Campesino", rural libraries, personal correspondence, extension schools, and institutes for farmers.

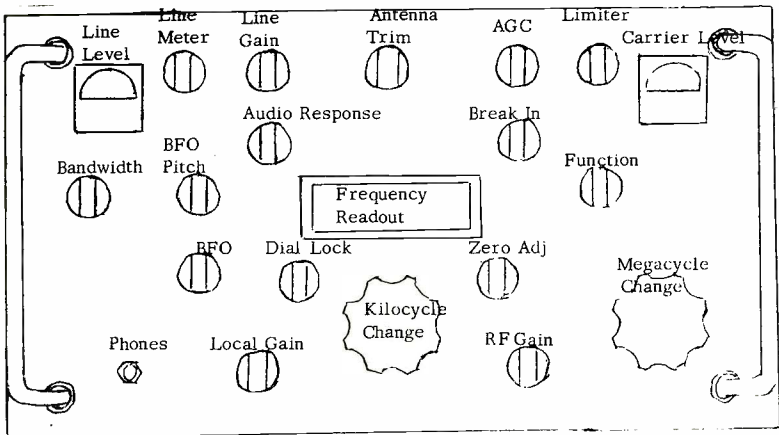

Accion Cultural Popular was founded in 1948 by Monsignor Jose Joaquin Salcedo, the pastor of Sutatenza, a small village in the Andes. An amateur radio operator, Msgr. Salcedo realized radio was the most effective way to bring educational instruction to the far flung rural adults of Colombia. His dream was realized in 1949 when Radio Sutatenza began educational broadcasts using a 100 watt transmitter. At first there were but a few battery operated receivers to receive the broadcasts but the audience quickly grew. So too did Radio Sutatenza which then moved to Bogota and added more powerful transmitters. Later, to meet regional needs, Radio Sutatenza added transmitters in other major cities.

Radio Sutatenza operates two different programming formats simultaneously. The "A" program is a general purpose format mixing entertainment and sports coverage with educational instruction while the "B" program concentrates on instruction with frequent repeat broadcasts of lessons for the convenience of the students. The "A" program serves as the attention getter drawing the attention of the people to the instruction which is then reinforced with repeat broadcasts by the "B" program. Among the many features broadcast by Radio Sutatenza is one of special interest to the SWL. Called "Frecuencia Internacional", this program designed for foreign listeners is aired daily Monday through Friday at 1400 GMT.

The studios of Radio Sutatenza are located in Bogota, Cali, Barranquilla, Magangue, and Medellin. The station in Bogota is the largest with a 300 kw medium wave transmitter operating on 810 khz and three shortwave transmitters, a 50 kw RCA unit operating on 5095 khz, a 25 kw water cooled GE unit operating on 5075 khz, and a 10 kw Gates unit operating on 6075 khz. The Cali station operates on medium wave only. The transmitter there is 120 kw and operates on 700 khz. The same is true of the stations at Barranquilla, Magangue and Medellin which operate 120 kw on 960 khz, 120 kw on 590 khz, and 100 kw on 1810 khz respectively. This totals over 600 kw making Radio Sutatenza the most powerful educational radio in the world.

R-390A/URR

The R-390A/URR is a 26 tube superhetrodyne receiver for reception of cw, am, ssb, and RTTY signals. This receiver covers 500 Khz to 32 Mhz in 30 1 Mhz wide bands and one 500 Khz wide band. From 500 Khz to 8 Mhz the R390A/URR is a triple conversion receiver, and from 8 Mhz to 32 Mhz, it operates as a double conversion receiver. The first IF stage is variable from 17.5 to 25 Mhz and is used on the eight lowest bands. The second IF stage is also a variable type with a range of 3 to 2 Mhz. The third IF stage operates at 455 Khz. There is one stage of tuned RF amplification prior to the first mixer. The oscillators feeding the first two mixers are crystal controlled. There is provided a set of heaters for these crystals, but they are not needed if the receiver is to be used indoors. Also, there is a built in crystal calibrator. The readout is by means of a digital counter type of arrangement, and there is a mark every 10 Hz. The readout is accurate to 300 Hz. The linear tuning is accomplished by means of the insertion of powdered iron cores into the RF and IF coils at a rate controlled by a complex arrangement of gears, shafts and cams. The IF selectivity is 100 Hz to 16 Khz in six steps. There are inputs for both a balanced antenna and an unbalanced antenna. An output from the 455 Khz final IF is also provided. There also is an 800 Hz audio filter for use with cw reception. The carrier strength meter is marked 0 - 100 and there is a graph in the technical manual for converting this reading into microvolts. There is audio outputs for a 600 ohm unbalanced line, a 600 ohm set of headphones, and a 600 ohm balanced audio line. The balanced audio output is fully metered in volume units (VU Meter). The R390A/URR operates from 115/230 volts ac and consumes 140 watts of power with the crystal ovens off. The receiver comes in a standard 19 inch rack mount and weighs 75 pounds. Also, there is a noise limiter, the clipping action of which is manually controlled. The R390A/URR is now available from surplus dealers for about \$750.

*****CONTRIBUTORS TO OCTOBER SPEEDX*****

Numbers indicate how many credits each contributor has earned this month. One credit per column reported to. List is complete this month except for Station Sceduals, which is missing again this month. Note that September QSL reporters will be given credit as loggings are used.
