world dx handicapped aid year

Nov. 1974

Vol. IV — No. XI

KEYNOTES

CONGRATULATIONS TO 6 NEW FULL MEMBERS

GLENN THOMPSON
DEMING, NM

RENEE SCHNEIDER
VAN NUYS, CA

MICHAEL O'SHEA
BUFFALO, NY

JOSEPH KANNRY
BRONX, NY

DEMPSEY CREWS
MAYO, FL

JAMES CAPILI
HONOLULU, HI

Certificates of Full Membership and a copy of the SPEEDX Constitution were mailed to each of the above members in October.

SPEEDX WELCOMES THE FOLLOWING NEW ASSOCIATE MEMBERS

H.I. CHADBOURNE
LA JOLLA, CA

DOUG COPELAND
MAN., CANADA

EARL WARFIELD
MT CARRO, IL

DONALD SCHEILING
BUENA PARK, CA

*RICHARD LEWIS
HAVERTOWN, PA

*JOHN ROGERS
LEWISTON, ME

*DAVE CLARKE
ONT., CANADA

*D. BARBER
ALB., CANADA

CRISPINO MESSINA
ITALY

DONALD HEIM
ALLENTOWN, PA

DENNIS DEAN
DAYTON, OH

A. VAN HIMBERGEN
CHERBOYGAN, MI

JOHN WALTERS
MAPLE SHADE, NJ

PETER POMPE
BELGIUM

* Is my face red! Apologies to 4 new Associate members whose names should have appeared in the September issue of SPEEDX. We are asking each of you to support SPEEDX by sharing your loggings and ideas with others.

RADIO RSA DX CORNER - DX COMPETITION

Gerry E. Wood DX Editor RSA announces a Certificate will be issued to each listener correctly verifying 6 frequencies. Reports for 3 external frequencies(RSA) and 3 internal (SABC) frequencies. Reports can be sent individually but must be marked, Radio RSA DX Competition. Report number-----
All reports to be sent to Radio RSA P.O. Box 4559 Johannesburg, South Africa. Competition ends 31 December 1974.

-***-

BOSTON AREA DXERS

The BAD GUYS will get together at the home of Mark Scannell, 20 Ridgewood Drive Norwood, Mass. on Sunday November 17 1974. Information may be obtained from Frank Testa, 617-588-4921 or from Mark, 617-762-7051.

-***-

SOUTHERN CALIFORNIA AREA DXERS

The big date for the SCADS meeting is Saturday November 23, 12536 Arabian Way, Poway, Calif.

-***-

FOR SALE

Allied SX-190, speaker & Superlex head-phones. Hardly used. \$200.00 write or phone Maurice Roberts, 7151 Orange, Highland, CA 92346. Ph. 714-864-0521

-***-

FOR SALE OR TRADE

A SRR-13 receiver for \$400.00, including technical manual and power extender. You ship. Will trade for any one of following complete working receivers, including tech manual: Collins 51S-1 or 75S-3C; Galaxy R1530 or R530; Drake SPR-4, R4-C or SW4-A. The Drake receivers must have complete coverage 2.5-5 MHz plus all international SW bands (11-49 meters). In case of trade we each pay own shipping. Contact Charles A. Wootten, 4911 Battery Lane, Apt. 1, Bethesda, Maryland 20014.

-***-

WANTED

A communication type receiver with full coverage that is fairly new and in good condition; Interested in Drake SPR-4 or SW-4A or comparable receiver. Please contact Scott L Sigel, 135 Deppe Lane, Ottumwa, Iowa 52501.

-***-

DX JUKE BOX RADIO NEDERLAND

Harry van Gelder has informed us that he is retiring from DX Juke Box. His successor Dick Speekman who was introduced on the October 10th program will take over on November 1 1974. Harry will be missed, however because of van Gelder's interest in the DX Handicapped Aid Campaign and is a representative of HAP International Coordinating Committee, he will have a hand in DX Juke Box from time to time.

On behalf of the members and staff of SPEEDX, we wish Harry the very best.

-***-

HAP CHRISTMAS FUND DRIVE

Is there a better way of wishing your DX friends a Merry Christmas than by sending \$1.00 or more to SPEEDX Hdqs. to help support the Handicapped Aid Program (HAP). The decorative Holiday page is now being prepared for your name. To insure that your Holiday wishes are known by DXers, will you please forward your donation today.

-***-

RADIO CALIFORNIA-USA

Due to John Drew's health he was forced to suspend the operations of the Radio California-USA News Letter in October. Anyone wishing to take over the operation should contact John Drew 3858 226th St. #200, Torrance, California 90505. John, SPEEDX was sorry to hear of your Doctor's order and we do wish you the best. Word just received: R/C-USA has moved to AZ.

-***-

ANARC'S MAN OF THE YEAR COMMITTEE

Al Reynolds has announced that he has appointed Gene Moser as Chairman of the Man of the Year Committee. Gene will coordinate the Man of the Year award and related matters. Congratulations Gene to this important task.

-***-

QSL EDITORS

Doug, we are going to miss you!! Doug tells you in his column, that his last QSL column will be the December issue. Bill Cleveland of 2441 Fairview Drive, Visalia, Calif. will be the new SPEEDX QSL Editor, starting with the January issue. All QSL items for the January issue are to be mailed to Bill at the Visalia address to reach him no later than December 15. All items for the December issue are to be mailed to Doug San Jose, CA.

DX MONTAGE

RESEARCH/COMPILATION/REDACTION by A. W. BROOKS

74 Massachusetts Road

Oakdale, Connecticut 06370

THE SAGA OF THE BULGARIAN WISHING WELL (or "Entries Must Be Received By..."):

One of the more interesting sidelights of listening to foreign radio programs is for a number of enthusiasts the chance to participate in station-sponsored contests. While the prizes range from a two week stay in picturesque Irkutsk in January to stereopticon pictures of ancient aboriginal fertility rites in downtown Moncton, the subjects of any essay contest thus presented are always propagandized...if not politically or culturally, at least promoting tourism. Oh, yes, I try my hand from time to time. For my efforts I have a few souvenirs not the least of which is my Bulgarian Wishing Well, a wooden handicraft award for my writing in a Radio Sofia-Lenin Centenary competition...but the conversation piece of the lot is a form letter from Radio Berlin International after submission of a highly uncomplimentary endeavor concerning the aforementioned Mr. Lenin in which they stated "your essay showed that you, too, belong to those for whom Lenin's ideas are a guide". I wonder if they ever really read them?

RADIO SOFIA

BULGARIA

"THIS WASN'T INTENDED TO BE A PARTY LINE":

Two operators employed by the Israeli Posts and Telecommunications Administration were recently fired for listening to telephone calls. How was their secret eavesdropping discovered? During a call from Washington to a government building in Israel one of the callers asked the other a question to which he did not know the answer. But the operator did...and, most unwisely, gave it.

SURPRISE PARTY!:

A few years ago one of the major SW broadcasters advertised in their program bulletin monthly segment entitled simply "Surprise Program". Radio Canada, however, pulled it off without warning on 7 September in their 1200 GMT transmission by inadvertently broadcasting

Sunday's programming on Saturday. Surprise!

YOU'RE NOT LIKELY TO HEAR IT ON PAPUA-NEW GUINEA BROADCASTING, BUT

...the administration of the now self-governing republic does not plan to put an end to the traditional custom there of paying for brides in money and/or livestock. According to an item appearing in a recent issue of Family Circle magazine, the going rate for a new bride is five pigs, one cassowary, and three hundred dollars. On the other hand, a woman who has been married before has "...no commercial value..." as far as the law is concerned; nonetheless, it is considered a graceful gesture to give a token sum of, say, two pigs, one cassowary, and thirty-seven dollars in exchange for her hand. Presumably, all but the legal tender as a medium of exchange are immune from inflationary increases. Quickly, now, just how much is your bride worth...in round cassowaries, of course...

THRUSH STRIKES AGAIN!:

Alameda County SPEEDer Gus Miller forwards the accompanying news item from an October story by Associated Press. An unreliable rumor says that at a recent English section meeting at Radio Moscow voted that Mr. Giddens be wished a speedy recovery. Reports indicated that the motion passed by a margin of 12 to 10!

Voice of America Chief in Hospital

Mobile, Ala.

Kenneth R. Giddens, Voice of America director, yesterday was reported resting quietly after undergoing surgery at a Mobile hospital.

Giddens, a Mobile businessman, has headed the Voice of America overseas radio program since 1969.

Associated Press

FIFTY YEARS OF RADIO BROADCASTING HONORED:

Two more postage stamps have recently been released commemorating the Golden Anniversary of Broadcasting and a third issue will join them in December. Back on 13 July the Republic of South Africa honored the fifty year mark with a single 4¢ issue...then on 2 September Austria issued a single stamp signalling Fifty Years of Sound Broadcasting. The latter issue features prominent display of the ORF emblem. Next month the Swedish Postal Administration will print a 75-öre denomination issued to commemorate a half-century of broadcasting in Sweden....

ACCURS FROM OAKDALE:

A Prague abortion results in a cancelled Czech...

SON OF DX MONTAGE

.....IF YOU MUST BLAME SOMEONE FOR THIS CONTINUATION, MAKE IT ALAN W. BROOKS!

LXXIII AND GOOD DX: Chris hansen, ANARC's resident consultant on all things classical, has composed a reception report form in the Latin language. Use of this form will assure you of receipt of an attractive Vatican Radio verification card. Ignore those cynics who hasten to point out that the same results are achieved by using an English language report....

LATIN REPORT FORM

Optimī virī:

Volō referre vōbīs relatiōnem undārum radiōphonicārum audīrūrūm ā mē quās misistis per aethera. Āgō dē singulīs relatiōnis.

Audīvī undās vestras radiophonicās:

Vester famulus oboedientissimus,

ENGLISH TRANSLATION

Esteemed Sirs:

I wish to send to you a reception report. Here are the details.

I heard your broadcast:

Date _____
 Time _____
 Frequency _____

Here is how much strength there was in your broadcast _____

Here is by how much other signals mixed in themselves with yours _____

Here is how much of noise there was in your signal _____

Here is in what state your signals come to me _____

Here is how much quality on the whole there was in your broadcast _____

I now give details on the music and talk which was in your broadcast _____

My radio receiver is _____

My antenna type is _____

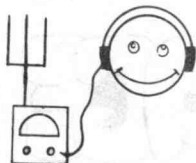

I thank you for taking so much time to read my report. I hope that my report was interesting and worthwhile to you; I also hope that I will receive a QSL card. Lastly, after thanking you, I am, with 73's,

Your obedient servant,

TUNE IN AGAIN TOMORROW...SAME TIME...SAME FREQUENCY: Exercising once again his keen sense of reportorial excellence Jack Jones, our correspondent in Jackson, Mississippi, forwards this excerpt from the most widely read section of any newspaper and wonders aloud if maybe the guy who draws this is a DXer...

THE WIZARD OF ID

TECHNICAL TOPICS

Hello there readers. Only one question received here this month, so get busy and send in your questions.

Bill Klett writes "I have a perfectly dead spot in my SPR-4 at 4972 MHz. The S meter registers S9 / 40, and is exactly the same with or without an antenna. There is absolutely no sound or noise of any kind. Can you explain?" Drake mentions in the operating manual that there are various unavoidable spurious internal signals, due to the outputs of internal conversion oscillators. 4972 is another one for their list. This is not a dead spot, but the receiver being blanked by a strong carrier, in this case, inside the radio. If you switch to CW, LSB, or USB modes, you will hear a heterodyne as you tune towards this frequency, indicating the presence of a carrier. The SPR-4 is a superheterodyne. Where most superhets have a simple local oscillator, Drake gets their L.O. signal by mixing various crystal freqs with a tunable oscillator, the main tuning dial, which covers a freq range from 5445 kHz at 0, and 4945 at 500 on the tuning dial. At a received frequency of 4972½, the tunable oscillator (P.T.O.) frequency is also 4972½, and this leaks back into the RF stages of the receiver just as if it had come in on the antenna. Note: all this was on the 4.5-5.0 MHz range; 4972 can be received on the 5.0-5.5 MHz range OK. Most complex receivers such as the Drake will have a few spurious signals of some sort, and these just have to be lived with. It's much better to have a few unusable freqs like this than poor performance on most freqs because of images.

Bill would also like to know the names of any receivers I consider better than the SPR-4 for over-all performance. I like the SPR-4 better than any receiver I've owned. The Swan 600-R might be marginally better, but it is a ham band only receiver. The Drake R-4C might be better if you don't need broadcast band. The Allied SX-190, while not up to the SPR-4, was a better deal to many because of its low price. No longer available, unfortunately. The AX-190, the ham band equivalent, can be converted to a SX-190, if you have fair mechanical and electrical skills. Write Grant Manning for details. The AX-190 is rather common second hand. Yaesu Musen (Japanese) has a couple of new high performance receivers much like the SPR-4, but I don't have any data on them.

Don't forget, there's a meeting of the Southern California Area DXers here in Poway on November 23. Write for details.

Gene Moser, HAF Director, would like to know how and when a RF Gain control should be used. A RF Gain control reduces the gain of the receiver in the early stages; the RF amp and perhaps the first IF. The normal volume or AF gain control controls the gain after the detector. For AM stations leave the RF gain up full usually. The diode detector used for AM works best at high input levels. In the early days of SSB, normal AM diode detectors were being used for receiving SSB. In this case, the BFO signal at the detector must be much stronger than the SSB signal to be received, so the procedure was to turn the AF gain all the way up, and control the listening level with the RF gain control. This keeps a low signal level at the detector. Modern receivers, however, are built with product detectors for use on SSB, and all this is not necessary. In the HRO-500 manual, National states "Under certain conditions of high background signal level (such as frequently encountered in the amateur and marine bands), intelligibility of the stronger desired signal is impaired because of AGC action on background signals which increases them in amplitude. The normal procedure in such instances is to turn down the RF GAIN control of the receiver in order to reduce or eliminate AGC action on weaker background signals. Although the performance of the receiver is usually somewhat improved, AGC action is lost and it becomes necessary to "ride" the gain control." National goes on to say this is not necessary in the HRO-500 because of their AGC Threshold switch. In most receivers the RF gain control will reduce cross modulation. If your receiver is picking up signals in places where they shouldn't be, try reducing the RF gain. The RF gain in my HQ-180 didn't work that way however. It reduced the IF gain to zero before reducing the RG amp gain any, so it did no good at all. Use of the RF gain defeats the S meter in almost all receivers, usually causing the S meter to go to a high, steady reading. I've never had a reason to use the RF gain control on the SPR-4.

That's all for this month. Don't forget to send in your questions. If you're embarrassed to ask a simple question, don't sign your name, but please write. 730, John

HANDICAPPED AID PROGRAM

GENE MOSER - HAP DIRECTOR
6805 Woodland Court
Coloma, Michigan 49038 USA

"1974 WORLD DX HANDICAPPED AID YEAR"

CORRECTION: Last month I reported that R. Canada was issuing a new QSL in tribute to WDXHAC during Sept. and Oct. That should have read Oct. and Nov. My apologies to all!

AN "OPEN LETTER": This is the first of a series. It is directed at all of you reading this column. To any club, their executives, editors and all SW's-DXers who receive SPEEDX as a so-called "2nd Club". At any SW broadcaster, I want, and respectfully request your opinions, suggestions, comments and CONSTRUCTIVE criticism. The subject: HAP, its operation, policies and funding, its HAP chapters and the new HICC.

HAP OPERATION: As 99% of you know HAP (henceforth referred to as "we") began in Jan. 1972. Jack White, then SPEEDXTRAS editor had the idea of putting a project together to help and introduce SW to the handicapped. He felt it should be done by someone who was handicapped as a "normal" person might not understand the problems involved. He asked me after I answered a Want Ad in his column. I was given a free hand in planning HAP. There were 3 elements I wanted to bring together as a central focus point which we would maintain at all times. 1. To introduce the physically handicapped to SW and "show them the ropes". To give them a feeling of belonging to an organization which cared more for their abilities in and out of SW, then to their disabilities. 2. To help those already in our hobby by providing replacement equipment and other services which are given to the new handicapped SWL also. 3. We had to have one other element to make our project work. Support of all kinds. Not just from SPEEDX. SPEEDX, in our first 2 years provided our only financial source. Our main publicity outlet was SPEEDX in the 1st year. The 2nd year, news of HAP was published in perhaps 80% of NA clubs, EDXC, ANARC and a few European clubs. Today we are given space on nearly all SW DX programs with regualrity, and when they don't it is my fault, for they can't air what they don't have. We are now on two stations which play taped HAP Reports; HCJ3, R. Canada. But our backbone are the Clubs. Their bulletins keep their members informed about our work. We would have problems of a severe nature without them. Unfortunately, not all clubs support our efforts. We have about 98% club support. "oh well, why kick about 2%", you may say. Because that 2% is important. It reaches an audience that we could help. If they don't publish HAP news then there's the possibility some disabled person won't be helped. So, it takes those 3 elements to make HAP-us work. A HAP cannot succeed if only 1 club operates it for their own members. With our 3 elements in mind we set out to make HAP acceptable and available to the hobby in North America.

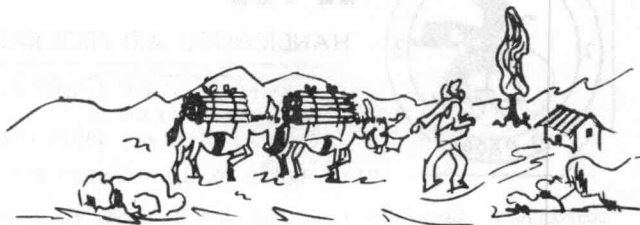

We have the following services for the handicapped: A Welcome Wagon committee which is now part of my Assist. Director's duties because of finances, HAP PALS which is the pen pal/teaching arm of HAP, a Hospitality Hostess which sends get well, birthday, etc. cards to HAPees, loan of equipment, memberships in all clubs (1 club membership per HAPee) at $\frac{1}{2}$ price, taped SPEEDX bulletins for those with sight problems, a Blind DXers Talk, free Translation Committee privledges. Also a HAP membership card, and life membership in the Lunar AM-SSB Club and membership in the RCSWC. We furnish program schedules, handbooks and other printed material when available.

To date we have 60 HAP members. Most were in the hobby when they joined HAP. We try at all times to bring the uninfomed handicapped person into HAP first. Because we reach a hobby audience, 99% of the time we are not as successful on this point. We get 9 applications from those in SW to every 1 who is new or does not know about SW. And about 10 HAPees pay for part of a club membership with HAP paying the other half or the clubs absorb it. I have been strongly criticized because we help more handicapped who are in SW, and not bringing the new element in more. I don't know who issued the criticism as it came in the back door. We help all those who genuinely need it. We rejected about 5 applicants a year for one reason or another. As we were set up in 1972, we are performing correctly. Just because we help those in SW does not mean we don't want or try to help those not in it. I approve or reject all applicants according to our standards.

SWBC DX - Western Hemisphere

REFRAN

"A mal tiempo buena cara"

Saludos amigos, just returned from a two week swing through Japan, Taiwan, and Korea so you lucky folks are going to be spared the usual verbage. Before I get into the many loggings before me though I should extend mil gracias to Chris Lobdell who so ably filled in for me last month after being drafted at the last moment. Chris did, however, make one minor boo-boo in the refrán which might have given you some trouble. I have, therefore, corrected it and repeated it this month. I think you'll find it a little easier to understand now and pretty good advice to the DXer who just had his wife wipe out a long awaited ID with the vacuum cleaner.

On to the loggings with the usual reminder that all time are given in GMT and that all dates are given in the month/day format. Furthermore, reception conditions are reported in the SIO Code which is explained in the table below.

SIO CODE			
Rating	S SIGNAL STRENGTH	I INTER- FERENCE	O OVERALL RATING
5	Very Strong	None	Very Good
4	Strong	Slight	Good
3	Fair	Moderate	Fair
2	Weak	Severe	Poor
1	Very Weak	Extreme	Unusable

CLANDESTINE

15481 1910 R. Portugal Livre (Romania): Port tlks, brief mx pieces (-3 9/28 Hauser-OK)

EUROPE AFRICA ROUNDUP:

Ciao! Thanks go this month to new reporters Jim Brooker and Lloyd Scott, welcome aboard. Also, a "glad to hear from you again" to Steve d'Adolf, Glen Hauser, and Serge Neumann. Not so long between reports/letters next time!

The next B.A.D. Guys meeting/get-to-gether will be held at the home of Mark Scannell / 20 Ridgewood Drive / Norwood, Massachusetts 02062 on Sunday the 17th of November 1974. For those of you who don't know the Norwood area, drop Mark a note and he'll give you directions. In any case, don't forget to send him a card if you have hopes of being there. Hope to see you!

Holland - R. Nederland's DX Jukebox changes hands: In a letter dated October 1, 1974, Harry van Gelder tells us that as of the 1st of November he will step down from his hosting duties for DX Jukebox and Dick Speelman will be taking over. Harry still promises to still have a hand in DX Jukebox from time to time when reporting on the HAP International Coordinating Committee. We wish both gentlemen the best of luck!

Belgium - DX-Corner: We think it's time to express our continued thanks to Jackie Marshall and Paul Renard for their support and info they send each month.

Poland - How high is high?: The strongest transmitter in Europe and the tallest mast in the world is now being put into service in Poland. The mast is 2120 feet (642.5 m.) tall. That's how high!

(SCDX via R. Sridhar)

Notice to pennant collectors: Jim "Kimo" Capili sends word that Mrs. Stepanova informs him that "we send (a pennant) upon receiving no less than five (5) reception reports on our broadcasts to North America ..."

We're not the "Washington Post" but: ... We do our best, let the below tidbits remind you of some past news we haven't been able to fit in the last few months ...

New African nation emerges, Sept. 10

ALGIERS — The first of Portugal's African colonies to get independence becomes the new nation of Guinea-Bissau on Sept. 10

from the BostonGlobe

According to the independence agreement signed in Algiers yesterday, the colonial administration of Portuguese Guinea will be replaced by the rebel government proclaimed last fall by the liberation movement in the West African territory, the African Party for the Independence of Guinea and the Cape Verde Islands.

ANTARCTICA

6012 0630 --- OK Glenn Hauser reports tentative reception of AFAN's carrier on this frequency. Severe splash from WOA 6015 until 0800. Little audio, carrier seems to have a polar flutter. This on 9/24 and 10/7.

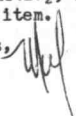

DATELINE...

PORTLAND... Many thanks for your support of Bob Bodell during my absence. Bot is currently suffering from an acute case of post column withdrawals (something only editors can really understand) and those wishing to send flowers or cards may do so to 5230 S.E., Portland, Oregon, 97206.

ISRAEL (REVISITED)... JAY LEVIN continues his report from last month and notes the new IBA transmitters are, indeed, on and beaming programming to Russia. IBA hopes to install motors to slew their antennas in order to use the 300 kw signals for other areas.

YEMEN ARAB REPUBLIC... GUS MILLER reports tentative reception of Radio Sanaa on their new frequency of 7280 at 1400 with Arabic music, QRM from SABC. Listeners should look out for Australia on that frequency at the same time.

AUSTRALIA... RA has apparently dropped its use of 7295 to North America for the 1115-1245 time slot. GLENN HAUSER reports hearing only 9580 given as a frequency on 9/29 and wonders if pressure from American hams had anything to do with the change. GLENN THOMPSON reports hearing them there as late as 9/20. ARTHUR CUSHEN notes that some states of Australia will advance time from 11/3 until 3/2/75. Western Australia will be GMT+9, Northern Territory GMT+9½, Queensland GMT+10, South Australia GMT+10½, and NSW/Victoria/Tasmania GMT+11. Thanks to GLENN HAUSER for forwarding the last item.

PORTLAND (AGAIN)... Thanks for the help this month, Good DX, 73's, 

STATION SKEDS

TO N.Z.'S SCIENTIFIC PARTY
BASED IN THE ANTARTIC CIRCLE

DEADLINE: 15th

EDITOR: Mark Koukol

Apartment: E-1

1400 W. Lincoln Hwy.

De Kalb, Illinois 60115

I have nothing to say this month except HELP! Two mid-term exams in 3 days.

Albania: Radio Tirana uses 7290 as an alternate to usual 7300 for all xmsns to North America 0000-0500. Tirana relay of Peking in English noted beginning 0300 on unlisted 9750, abruptly switching to usual 9780 at 0301. (R. Wood)

Argentina: RAE has these English xmsns-

To Europe 2300-2350 11710
To East N.A. 0300-0400 9690
To West N.A. 0400-0700 9690
To Africa/M.E. 2300-2350 11710
To Far East 0300-0400 9690
To N. Pacific 0600-0700 9690
(Ralph Famularo, Jim Capili)
Radio El Mundo has this sked-
2200-0300 6120
2200-0100 9710
0900-1700 15290

Radio Splendid xmts 2100-0100 on 5985, 9740, 11880. (Don Moore)

Australia: Radio Australia in French to S.E. Asia via Darwin 2330-0030 has changed from 15395 to 15405. To North America 1115-1245, 7295 has been dropped, only 9580 now used. (Richard Wood)

Belgium: BRT to North America 2215-2315 is now on 9730, replacing 9655 and 9785. To Africa at 1800 on new 11950. (Richard Wood)

Canada: Effective Nov. 3, Radio Canada's xmsns to Europe & Africa will be fed directly by cable to Daventry, England, to be beamed from here new relay facilities. Malta will also be used to relay these Daventry xmsns. Note new English sked effective to March:

To North America
0100-0157 9755, 6085 (S)
0400-0457 9655, 6135 (S)
0500-0557 9655, 6135 (S)
To Africa
0530-0730 11720, 9685, 6130 (D)
1800-1857 15325(S), 9525, 6110, 1570 (M)

To Europe
0530-0730 7250, 6100 (M)
2102-2159 7225, 6100, 1570 (M)

To South Pacific
0900-1000 9625, 5970 (S)
Also to North America (sorry)
1115-1215 11825, 9655, 5970 (S)

(S)- Sackville, (D)- Daventry, (M)- Malta. (Radio Canada, Greg Paris, Scott Sigel)

China, P.R.: Radio Peking to N. A. 0100-0155 noted on new 15165

and 15350 in // with usual 15060, 15520. (Richard Wood)

Finland: Radio Finland has this English sked to March 2-

To North America

1400-1430 15185
0300-0330 9550

To Europe

1400-1430 9550, 11755
1600-1630 9550, 11755
1800-1830 9550, 11755
2030-2100 9550, 11755

To South America

1600-1630 15185
1800-1830 15185
1400-1430 21605
2030-2100 9550

(Greg Paris, Barry Harding)

Hungary: Radio Budapest has English to North America at-

0100-0130 21685, 17710, 15220, 11910, 9833, 7220, 6000
0300-0330 15220, 11910, 9833, 7220, 6000

0415-0445 as above

(David Chaffin)

Holland: Radio Nederland sends a new English sked effective to March 3rd, from the Engineering Services. Oddly, parts of this sked are at variance with the usual glossy-printed sked for same period. This, however, just received-

To Australia/N.Z.

0630-0750 11730(B)

0800-0920 9715(B)

To Far East (test xmi)

0930-1050 11825, 9640 (L)

To Europe

0930-1050 6020(S), 6045, 7210 (L)

1400-1520 6020(S), 6045

1830-1950 6085(L)

2000-2120 11730(M)

To South & Southeast Asia

To North America East

2130-2250(W) 9715, 5965 (L)

0200-0320 6165(B)

To Africa

1830-1950 11730(L), 6020(M)

(B)- Bonaire, (L)- Lopik, (M)- Malagasy, (S)- Sundays, (*)- Mon-Fri, (W)- weekdays.

(Radio Nederland, Hobart Beal, Jim Capili)

International Waters: Radio Nord-see international closed down August 31, 1974. RNI plans to

move to a position off Italy's coast. Regular programs were scheduled to begin Oct. 15th. In other MW pirate news, Radio Veronica waits silent off Holland; Radio Caroline has moved to England's coast and is still broadcasting. (Woody Smith)
Japan: Radio Japan has English to N.A. effective from Nov. 3-
 2345-0045 15270, 11725
 0130-0230 17825, 17725, 15235, 15195

and this General Service sked to N.A. with 15 min. each of English and Japanese-
 0000-0030 15105
 0200-0230 15105
 0500-0530 9505
 0600-0630 9505
 0900-0930 9505
 1100-1130 5990
 12/13/14/15/16/17/1800-1830 5990
 2100-2130 9505
 2300-0000 15105

Hope I interpreted that right, Barry! (Barry Harding)

Korea, Rep.: Radio Korea sends this English sked-
 To America

0500-0530 11925
 0900-0930 11925
 To Europe
 0630-0700 9640, 11925
 1900-1930 9640, 11925

To South America
 1100-1130 9640, 11925

To Southeast Asia
 1430-1500 9640, 11925

(Jim Capili)

Malagasy: RTVM has this French sked. This interpretation is rather foot-in-the-mouth due to the way it was printed.

weekdays
 0300-0500 3288, 6170, 7105
 0900-1100 6170, 7105, 9515
 1500-1900 3288, 6170

Saturdays

as above except also 1100-1500 on 6170, 7105

Sundays

0300-0500 3288, 6170, 7105

IF YOU LISTEN YOU COULD HAVE HEARD the new SR-71 SPY Plane as it streaked from London to Los Angeles covering 5645 miles in 3 hours, 47 minutes, breaking the worlds speed record. They used 8989, 8993, 11228 and several other standard air-ground Airforce frequencies.

RECENTLY the Cunard Ambassador caught fire and burnt for several days. If you would have tuned in 2182 and 5696 you could have heard Coast Guard Operations in the area!

Why let the world pass you by, hear the action on the Utility Bands!

Thats all for this month-73's and Good DX

Capsizing of luxury liner feared as flames spread

KEY WEST, Fla. (AP) — The \$7 million luxury liner Cunard Ambassador, a fire raging in its interior, wallowed abandoned in the Gulf of Mexico Friday. Officials feared it might capsize before the fire could be put out.

The blaze, spreading amid-ship, forced 53 Ambassador crewmen and 40 Coast Guardsmen who fought the fire to abandon ship late Thursday as it lay dead in the water 33 miles off Key West. There were no reports of injuries.

The Ambassador, portions of its gleaming white exterior scorched by intense heat, was listing from water pumped aboard as Coast Guard ships stood by through the night.

"The risk of capsizing is a definite one now and it doesn't look good," a Coast Guard spokesman said.

THE 490-FOOT liner was carrying 309 crewmen but no passengers when the fire erupted shortly after dawn Thursday. Most of the crewmen were transferred to a passing naval tanker within hours.

The Coast Guard spokesman said the blaze started as the liner rounded the tip of Florida en route from Miami to New Orleans, where it was to pick up passengers for a cruise to

Vera Cruz, Mexico. The fire apparently was caused when fuel spewed from a ruptured line and ignited when it hit the hot diesel engine, the spokesman said.

Capt. Robert Howard ordered most of the crew to abandon ship soon afterward. Two hours later they were aboard the naval vessel Tallulah, which then continued on course to Fort Lauderdale.

The fire marked the second time in four months that the ship experienced trouble. The engines failed June 2 while the ship was cruising off Venezuela with 625 persons aboard. It drifted close to shore before the engines could be restarted.

do, owned by a subsidiary of Cunard Lines Ltd., was leased to Bahama Cruise Lines of Miami. Most of the crew, including Howard, are from England.

If you would have tuned in 5696 Khz and 2182 Khz you could have heard Coast Guard Rescue Operations!

Spy plane beats the sun

LOS ANGELES (AP) — The SR-71 spy plane Blackbird beat the sun from London to Los Angeles Friday, covering 5,645 miles and seven time zones in 3 hours 47 minutes. Figured on local time zones, the plane reached Los Angeles more than three hours before leaving London.

A sonic boom shook the area about the time the plane arrived in the California area, but the SR-71 navigator denied that the plane was responsible.

Police in suburban Altadena, Pasadena, Glendale and other cities reported scores of telephone calls. "It was a tremendous boom. It shook the whole house," said Audrey Jacoby of Montrose. Broken windows were reported in Tujunga, Glendale, La Crescenta and Altadena.

The black, needle-nosed plane, which flew at an average ground speed of 1,480 m.p.h., landed at Beale Air Force Base near Sacramento, its home base.

"We decelerated more than 200 miles back from Los Angeles," said the navigator, Maj. William C. Machorek, 32, of Jersey City, N.J. The pilot was Capt. Harold B. Adams, 31, of Albuquerque, N.M.

An Air Force spokesman here said the plane was traveling at subsonic speeds when it reached the Los Angeles area. However, he said that "it's possible, though unlikely, that the SR-71 caused the boom."

During the flight, the SR-71 refueled three times, slowing speed and descending from 80,000 feet to 10,000 to rendezvous with the subsonic tankers.

There was no official speed record to beat for the route. The SR-71 run will be the record

If it is certified by the Federation Aeronautique Internationale. The FAI is the accrediting organization for aviation records.

On Sept. 1 the same aircraft set a New

in London-L.A. flight

York-to-London speed record of 1 hour 55 minutes. The first attempt at a Los Angeles run was aborted Thursday because of engine trouble.

The Lockheed-built SR-71 is a reconnaissance aircraft that is deployed on missions around the world. It cruises at altitudes above 15 miles.

The SR-71 used standard air-ground frequencies including 8989, 8993, and 13241 KHz. See what you miss when you don't DX UTILITIES!

CENTRO INTERNAZIONALE RADIO-MEDICO

★

INTERNATIONAL RADIO-MEDICAL CENTRE

★

CENTRE INTERNATIONAL RADIO-MÉDICAL

THE FREE RADIO-MEDICAL SERVICE OF THE C. I. R. M.

The International Radio-Medical Centre was founded in 1935 with the purpose of supplying radio-medical assistance to sailors aboard ship of every nationality navigating on all seas, to the populations of the small Italian islands of the Mediterranean, and to whoever is in need of urgent medical assistance. The Centre has its headquarters in Rome and its services, both medical and radio, are completely free. They also include arrangements for the transfer, if necessary, of a patient to a ship with a doctor on board or, if the distance allows, to remove the patient by naval craft or helicopter to ensure rapid hospitalization.

Requests for radio-medical assistance reaching the Centre are handled by the doctors on continuous duty at the CIRM headquarters. These doctors, who can if necessary call on the help of specialist consultants, prescribe the appropriate treatment and keep in contact with every ship that has asked for assistance, following the progress of the patient until his recovery or disembarkation and, often, even when hospitalized; in this way it is possible to check the initial preliminary diagnosis, which in most cases is confirmed.

The Centre also has its own Study Section for research in the field of the pathology of seamen.

Communications with the CIRM can be carried out in Italian English or French and can be sent either to IRM (the radio-station of the Centre, solely concerned with radio-medical assistance) or to IAR (Rome-Radio). A large network of radio stations can be used when it is impossible to get into direct contact with IAR or IRM. This network includes all the Atlantic and Pacific coastal stations of the U.S. Coast Guard, the RCA and Globe radio stations of Manila. Moreover, the national French radio centre of St. Lys handles traffic for French ships. The messages are transmitted by direct teleprinter lines of the U.S. Coast Guard; the I.T.T. World Communications, Inc.; the Press Wireless, Inc.; Italcable and Radio-Stampa.

Finally, the CIRM collaborate with the AMVER service of the U.S. Coast Guard.

RADIO SERVICE OF THE CIRM STATION:

1) The CIRM radio-telegraph station — Call-sign IRM — keeps continuous listening watch (H24) on the mobile maritime service frequencies indicated by automatic tape. It listens-in on any other frequency when requested, also through other Italian radio stations.

2) In relation to the season and the hour of day, the frequencies on which IRM operates during the 24 hours are chosen from among the following:

Frequency	Call-sign	Service
KHz 4342	IRM	On request and in order to answer ships using the medium frequencies.
KHz 4350	IRM	Available when necessary.
KHz 6365	IRM	Winter night service.
KHz 6420	IRM	Available when necessary.
KHz 8685	IRM	Replaces the 12760 KHz frequency when this is used for other services, and on request.
KHz 12760	IRM	Continuous. When used for other services it is replaced by 8685 or 12748 KHz.
KHz 12748	IRM	Available when necessary.
KHz 17105	IRM	Continuous during the summer season; daytime during the winter.
KHz 22525	IRM	Available when necessary.

3) At 0200, 0900, 1400 and 2000 GMT, the list of outstanding traffic (CQ) is transmitted on the particular frequencies being used at that moment. Ships are recommended to listen in to this list in case of any possible request for QSP.

In order to facilitate and speed up the handling of the radio-medical traffic, Radio Officers are advised to observe the following rules, as far as possible:

- always to attempt to communicate directly with the CIRM station, requesting, in case of difficulty, to be linked through other Italian coastal radio-stations. This is particularly necessary when first-aid messages are concerned;
- always to indicate their position and the frequency that offers the best reception, in order to enable the frequency or frequencies most suitable for subsequent communications to be established;
- bear in mind that, in the event of urgent necessity and of difficulty in communicating with the CIRM radio station, messages can be sent, free of charge, through the stations listed in the prospectus shown on the following page. The reply messages will be transmitted through the same stations unless, in the meantime, direct communication has been established.

VOLMET

A FUNCTION OF THE SYDNEY FLIGHT SERVICE CENTRE

The purpose of the Sydney Volmet Service is to provide pilots in flight with a continuously updated meteorological service. The information broadcast consists of not only the present weather conditions, but also the forecasted weather conditions at certain locations selected for their frequency of use as destinations or alternates.

Although the service was originally designed to cater for International pilots, who are the main users, the Volmet Service is available to anyone who wishes to tune in to it. In fact, all pilots are encouraged to obtain their meteorological requirements from Volmet direct, as this method reduces the work load on the aeromobile circuits.

Sydney is the only station in Australia to broadcast a Volmet Service. By international agreement, the frequencies allocated are 3432, 6680 and 10017 KHZ; transmissions being limited to a five minute period commencing on the hour and at the hour plus 30.

The broadcast is arranged in the following order:

- 1) Met Reports for ... Sydney, Brisbane, Melbourne, Townsville, Adelaide, Alice Springs, Darwin and Perth.
- 2) Aerodrome Forecasts ... Brisbane and Sydney (on the hour) Melbourne and Perth (at the hour plus 30)
- 3) Sigmet ... Those that affect the Sydney Flight Information Region.

Sydney Volmet is probably one of the most appreciated of all meteorological services provided for International pilots who report good reception from as far away as Singapore, Japan and the U.S.A. In addition, the numerous unsolicited reports received from short wave listeners indicate that good reception of Volmet occurs in many other widespread parts of the world.

For those who are technically interested, additional aspects of the Volmet Service have been supplied overpage.

VOLMET

The Volmet broadcast originates from the Sydney Flight Service Centre and is oversighted and monitored by the Supervisor, Flight Service.

The information required to be broadcast is received in the sound-proofed Volmet Room on a Siemens teleprinter which is coupled to the Ferranti Computer.

Operators are alerted to prepare to broadcast by means of an aural alarm and a flashing console - mounted light. The alarm rings automatically five minutes prior to each broadcast time. Messages from the supplying stations are then assembled in their correct order and are broadcast at the average speed of 100 words per minute.

Transmissions leave the Centre through a low impedance microphone, through a wide band UHF Teletra beam to Horonora, re-transmitted up to Kings Tablelands and thence down to the transmitting site at Llanillo, approximately 30 miles north west of Sydney.

Each of the three STC CK4 type transmitters delivers a maximum output of 3 kw on 3432, 6680 and 10017 KHZ. The antenna system for each transmitter is an end fed, broadband, omni-directional Quad type, elevated about 70 feet above the ground.

The Operator can monitor his own transmissions by observing a console light which responds to an audio operated relay. Spot check monitoring of the transmitted signal for quality, procedures and timing is conducted at frequent intervals by the Supervisor, by means of his console mounted CMB receiver.

S.I.M.F.O. reports received from listeners are always appreciated and acknowledgements are forwarded to those who require verification.

Deadline: 15 th of the month

89's everyone!(89 is taking the place of greetings, hi, howdy, etc.)

This month, as the old saying goes, I have some good news and some bad news. Let's start off with the good: five new countries verified this month, including one report from Radio Lebanon, the first time reported to SPEEDX in at least two years! Eduardo Rodriguez in Puerto Rico had the honor of receiving the verie and I hope that this signals a new trend for R. Lebanon. Other first time reports came from Jack Jones who verified Radio Mar, Nicaragua, Wayne Oliver with a QSL from Voice of Kenya, Ken Earhart with a Sierra Leone BC QSL, and Tom Gavaras and Roger Giannini received veries from The Sudan. Fantastic, guys; I've only heard two of those five and neither one QSWL'ed (yet). Other interesting news include a verification of VOA, Ascension Island (yep, that's right!) received by Alan Mayer, an English written non-verie letter from Chekiang People's Broadcasting Station in Hengechon, China as sent to Kevin Szot, a verification from Stimme der DDR, East Germany reported by Jay Levin, and a rarely reported QSL from Radio Madagascar, Malagasy Republic received by Doctor Dave Chaffin in the Cameroon Republic. Dan Henderson also reports his 194th country verified as the Radio Moscow site located in Tallin, Estonian SSR. Out of site! (hi)

The SPEEDX geographers hit on the right country again, dog gone it. The country in the last question was St. Helena, located in the South Atlantic Ocean. The other two dependencies were Tristan da Cunha and Ascension Island. The geographers with the right answer were Don Moore, Jim Davis, Bob Bodell, Gary Froemming, Mike Hardester and Kevin Fleming. So on with November's quizzical query; this one will probably be easier for you to answer than it was for me to think up: From 51.5° south of 75° North, I am located 1.5° north of the point where the sun is overhead at noon, local time, on June 21st. In another line of direction, I am 238° west of the point that is 20,033 kilometers, measured along the N-S divider, east of the line that sees each new day arrive before anywhere else. My programming is strictly in English. What station am I?

Now the bonus question - this was sent in by Mike Hardester, who has a QSL from this station (and will be printed in the column next month). "For nostalgia buffs, I was an integral part of the psychological warfare of the Korean War. My broadcasts continued until 1972 when I became a Voice of America "rebroadcasting station." Though most think of me as from another country, I was located in Seoul, Korea, and did operate on 2 out-of-band frequencies. What station was I?

I'd like to say hi, oops, 89, and welcome to new reporters Skipper Thurman and Lloyd Scott Jr. Skipper says in his report that he requested and received from R. Moscow a stereo record of the USSR National Anthem. Does it sound like the theme from "Peter and the Wolf?" I'd also like to say 89's to Mel Hickman, SPEEDX's super Asia-Oceania editor and to Serge Neumann, formally of the great DX program "DX Jukebox" and a founding member of SPEEDX. Glad to hear from you, Serge!

Now the bad news(at least bad for me): next month, December, will be my last QSL column. The arch villain of us all, time, has caught up with me and so, for the time being, I regretably have to give up being an editor for SPEEDX, which I have enjoyed tremendously. But hopefully, later next year, I will have the opportunity to edit a shorter column for SPEEDX. My worthy replacement, who we all know and love (hi), is no stranger to these pages. Bill Cleveland of Visalia, California will be taking over the reins in January. Bill has been reporting to the Qsl column for as long as I have been editor and I know that you will give him the support that all of you have given me the past 13 months. Full details next month.

CHINKS IN THE IRON CURTAIN: Foreign Radio Audiences in Eastern Europe

by Ron Lanoue

A few years back, when Radio Free Europe was still pretending to be a privately-financed broadcaster, it ran a series of TV fund-raising ads in which a storm trooper burst in on a group of guilty-looking Slavic peasants and smashed the radio around which they were huddled. The message was plain: RFE had a large, determined audience which took great risks to hear this, their only source of objective information. With the revelations of CIA financing, and Sen. Fulbright's assessment of RFE and R. Liberty as "cold war relics", some doubt may however have been cast on the simple-minded TV commercial.

Measuring Socialist bloc audiences presents various problems. The target nations are hardly likely to permit surveys of their populations. Audience mail is also unpredictable, as official policy on this type of foreign contact changes: for example a few years ago the R. Canada SW Club suddenly stopped receiving letters from its Hungarian members. Earlier this year, a Soviet TV commentator warned that the VOA used letters to set up spy networks--a warning not to be taken lightly in a country such as the USSR. Actually, this type of official pronouncement, and the long history of jamming of Western stations, in themselves indicate that enough people must be listening to get the governments worried.

One solution to audience measurement is surveys of visitors to foreign countries. This method can hardly produce a scientific sample, as generally only the more "trustworthy" citizens are given travel visas. This leads to a second bias toward the upper strata of the classless socialist societies, as these visitors tend to be professionals. Nonetheless, this type of survey, in the absence of other yardsticks, provides useful information. The remainder of this essay will draw on one group of US Information Agency surveys of visitors from four Eastern nations to Vienna, Austria in the summer of 1969.

In the four national samples--of Czechs and Slovaks, Hungarians, Poles, and Romanians--radio ownership was almost universal, while well over 90% of the respondents own sets capable of tuning to both shortwave and medium-wave. In contrast with Western nations, especially the United States, nearly all of those questioned listened to foreign stations: only 2% or less in each country said they never listened to them. The RFE ad, although a bit self-serving, was correct: Western broadcasters are heard by substantial segments of the populations of Eastern Europe. The implication of a climate of fear is however vitiated by the large numbers of those admitting that they listen; another statistic tells a similar story, as only a few percent of those in each sample, when asked why they didn't listen to specific stations, cited a danger to themselves.

Table 1 "Station Ratings." Percent listening at least once a week. Sample sizes are 600 for each nationality except Romania, which is 400. "-" means less than $\frac{1}{2}$ of 1%.

Listeners of several stations were also asked whether they listened "mostly" on shortwave or medium wave. Numbers in parentheses are the percent of the total sample listening to that station mostly on shortwave.

The respondents were also asked to name any other stations to which he or she listened regularly. In none of the samples did the total of other stations surpass 2%.

	Czechoslovakia	Hungary	Poland	Romania
R. Vienna	15% (1%)	16% (14%)	7% (2%)	6% (-%)
R. Luxembourg	15 (15)	2 (2)	5 (2)	6 (-)
ORTF	2	5	21	16
R. Moscow	-	1	1	1
BBC	10 (10)	26 (26)	31 (30)	11 (11)
RFE	34 (32)	53 (53)	32 (31)	53 (51)
VOA	20 (20)	22 (12)	36 (16)	14 (14)
Deutsche Welle	-	-	4 (4)	5 (3)
R. Peking	-	-	-	-
Vatican R.	2	2	12	4
RNE	6	-	22	1

It is clear from the sample values obtained in these surveys (see Table 1) that, among the upper groups in Czechoslovakia, Hungary, Poland, and Romania, if not among the general populations, the three most popular foreign stations are Western broadcasters--the BBC, Radio Free Europe, and the Voice of America. In all but Poland, RFE is the broadcaster most widely listened to, with a third to a half of the respondents tuning in at least once a week. In other words, a quite sizable chunk of the most influential persons in these countries are regular listeners of the one station most often cited in their homelands as a tool of capitalist and reactionary interests. The VOA and BBC, number two and number three on the governments' lists, are closely behind, with roughly a quarter of the sample groups as a weekly audience. The VOA appears to have a slight lead over the BBC in all but Hungary; the differences are however not really statistically significant. Unlike some non-Communist countries, there is scarcely a chemical trace here of an audience for the two largest Eastern broadcasters, R. Moscow and R. Peking.

Table 2 Newscast Credibility. Those saying each stations' newscasts are "very objective" or "fairly objective", among those listening to that station at least once a week. Sub-sample sizes are in parentheses after the appropriate percentages.

	BBC		RFE		VOA	
	Very	Fairly	Very	Fairly	Very	Fairly
Czechoslovakia	18%	67% (148)	22%	63% (310)	40%	56% (187)
Hungary	53	43 (180)	28	64 (378)	45	47 (177)
Poland	26	67 (196)	8	61 (199)	38	58 (221)
Romania	37	62 (52)	42	55 (178)	38	56 (55)

Another set of statistics (Table 2) show that the inhabitants of the four countries not only listen to the BBC, VOA, and RFE, but that they believe what they hear. The four samples give a high credibility rating to the news of these stations: in only one case (RFE in Poland) is the combined percentage of those describing any station's news as "very" or "fairly" objective less than 85%; in Romania, no one called anyone's news "very" or "fairly biased."

Again unlike other regions, the VOA is given a somewhat higher credibility rating than the BBC: about four of ten respondents call its news "very objective." Radio Free Europe appears to have improved over the "bad old days" when its dogmatic and inflammatory programs were said to have contributed to uprisings in several countries: it is about as believable as either of the other two stations (except in Poland). It should be

emphasized that these figures represent the opinions of those persons most favorably inclined toward their countries' regimes; one could hypothesize that among the general population these broadcasters are rated even more highly.

The station listenership percentages (Table 1) show several other items of interest. Radio Luxembourg, that phenomenon of West European radio, enjoys a certain audience beyond the border checkpoints; perhaps, as it has been claimed, pop music is an international language. Heavily Catholic Poland listens to Vatican broadcasts more than other countries. Finally, Deutsche Welle, despite programming generally similar to the VOA, BBC, and RFE (and no disadvantages in transmitting facilities) has an unexplainably smaller audience.

At any rate, it is easy to understand why the region's governments are so irritated by the Western broadcasters; the latter are doing their jobs well. These stations are performing an important function in breaking the seal of the vacuum chamber of the East and preventing suspicions and fears from growing in isolation. Maybe the fact that the governments still sell radios capable of receiving these stations, and apparently take only token action against listeners, is an implicit acknowledgement of the value of international broadcasting.

RADIO FREE EUROPE RESEARCHERS TAKE PULSE OF SOVIET BLOC

Contributed by Jim Whitehead from the
International Herald Tribune of 4/22/74

MUNICH, (IHT)--The effective working of what is perhaps the West's most extensive analysis operation concerned with trends and events in Eastern Europe--the research department of Radio Free Europe--is being threatened by lack of funds.

Action by the US Congress has caused a 12 percent reduction in RFE's staff in recent months and, while trying to fend off accusations by Sen. William Fulbright that the whole institution is "a cold-war relic", RFE will shortly launch a campaign for contributions from European sources.

Its executives propose that the operational costs for running the broadcasting side of RFE's activities should continue to be covered by the United States, but European governments, institutions, and businesses should be persuaded to help with the rest of its budget.

The research department has existed ever since RFE first went on the air in 1950 and is regarded as a uniquely comprehensive record of life in Communist countries. It currently employs 63 full time researchers, most of whom have at various times fled their native countries in the Soviet bloc. Their work, evidenced mainly in monthly reports and background papers, has been praised by academics and politicians throughout the West--not least by (Ex)president Nixon, who admits to a "long-standing and unreserved admiration for the job RFE is doing," adding that it is "indispensable to more normal relations between East and West and to better prospects for an enduring peace."

The research department grew to meet the needs of RFE's broadcasting activities on the grounds that intelligent and informed programs to the Eastern bloc necessitated up-to-date knowledge of RFE's "target area" on a daily basis.

During the last 15 years, the department's scope has changed considerably. From being merely a "passive" adjunct to the broadcasting, it has steadily developed its own identity and now suggests topics for programs, backing those up with facts and interpretations. Interested bodies outside RFE, including Communist clients, began to make increasing numbers of requests for the departments' material. There are now more than 1000 subscribers worldwide to its output which they receive free of charge paying only the postal costs.

Its main source of information is the Eastern European press itself. Every publication--ranging from national and regional newspapers to specialist

magazines and even papers concerned with pop music and sports--is meticulously sifted for material.

Thus, RFE takes about 178 publications from Czechoslovakia, more than 100 from Poland and 80 from Bulgaria. In addition, it monitors all radio programs from the East and reports on them.

While much of this monitored material is arid propagandizing, the expert knows what is genuine news, has learned to read between the lines of Communist officialese and regards no detail as too trivial to provide a useful clue to life and events "on the other side" as they say.

"This sort of painstaking work requires a special 'nose', " said Jim Brown, an Anglo-American who has headed RFE research for the last five years. "Our anxiety is to preserve this unique team of experts. If for any financial reason they had to be disbanded, they would be absolutely irreplaceable. We could never find or train people with their special skills and background again." Already, he said, the problem facing his department is not lack of material, but lack of staff.

A tour of the department gives some idea of the depth of research. In the Polish section, for example, there are more than 150,000 index cards, nearly half of which are personal cards recording biographical details of leading past and present government and Communist party officials.

On one batch of cards as thick as a fist, is the 20-year history of Poland's largest steel plant from its launching with Soviet aid to its current production. There are files on the police, on old-age pensioners, architecture, the Roman Catholic Church, water conservation, foreign relations and even gastronomy.

The director of RFE's Polish research section, Kazimierz Zamorski, author of a book on Soviet justice who never returned to his homeland after World War II, said: "It's interesting that the regime officially acknowledges that there are such things as juvenile delinquency and prostitution in Poland but no Polish authority will admit that unemployment exists under the system. Of course, it does. By doing calculations with some of the material available to us, we can make an accurate assessment of how much unemployment there is in the country." This sort of activity is, he said, "Benedictine work," but claimed that he and his staff have an insatiable appetite for it, fueled by fierce intellectual distaste for Marxism.

Another aspect of RFE's research effort is what he called "cross reporting." By monitoring all Communist radio stations the department is able to feed news back into the Soviet bloc, informing listeners of what is going on in a neighboring Communist country.

As a matter of Communist policy, very little of what goes on in one Eastern European country is broadcast to another. The public in each satellite country is, therefore, almost as poorly informed of what goes on in other Warsaw Pact nations as it is about happenings in the West.

During the last 10 years the fact that all the Communist states, despite widely differing backgrounds have many problems in common and that what is happening in one may be of considerable interest to an audience of another, has found a growing reflection in RFE's output.

A research paper on Hungarian intellectuals will provide program material for the other RFE national services, as will an analysis of the growing anti-Chinese campaign in Czechoslovakia or the problems of the Turkish minority in Bulgaria or reports of Romania's interventions at the Geneva conference on East-West security and cooperation.

The research department's executives believe its scope far outstrips the resources of any Western government to record and analyze information from the Communist bloc. It is significant that every Western ministry of foreign affairs subscribes to the department's reports. The US State Department is a client and so, through a roundabout route, are the Chinese. RFE's effort to involve the Europeans more closely in its operations have to be seen against the background of the current security talks. Executives here fear these talks might stimulate a demand from the Russians that RFE be closed down and this might find some sympathy in certain US political quarters. They feel that a contribution from European sources would help to blunt a complaint of US critics that the Europeans are not paying for facilities which are of essential and direct benefit to them. *Andrew*
