W-G-N, Inc.—Inter-Department Memo

To   Master Control Bulletin Board   **From** Geogre Lang

CC: Bob Sibold   Frank Schreiber
      Bob Baird   Irene Dahm
      Ralph Batt   WGN Transmitter   **Date** February 12, 1943
      Bob Perkins   File
      John Park

On the occasion of Clyde White taking leave of WGN to go into active service, the following changes in personnel will be effective beginning February 14, 1943:

Robert Sibold becomes Day Supervisor and will be replaced by Robert Baird as Assistant Supervisor.

It is assumed that full assistance will be given these men who are taking on new responsibilities. Your cooperation in the past assures me that such will be the case.

From Reymond Taylor

Date. October 19, 1949

      Inasmuch as we are having problems again with Phil Maxwell, and no authorization on additional work from the Sales Department, in the future, will the Traffic Department take no requests from Mr. Maxwell in person.

      Likewise, will Mr. Baird inform his engineers that there will be no extra recordings or engineers dispatched to record interviews on location, except by direction of the Sales Department.

      You may refer Mr. Maxwell to me, and I will explain why everything has to come through the Sales Department.

W-G-N, Inc.—Inter-Department Memo

To— **Charlie Gates**
~~cc Bob Baird~~

From **Tom Elvidge**

Date **Fri., December 30, 1949**

I have talked with Bob Baird, our engineering supervisor with regard to the complaint of poor quality on Radio Quiz of Monday, December 26. No mention of any difficulty was made on our engineering log of that day and Bob tells me he has also checked the engineer on location, the supervisor in charge of master control and the supervisor at the transmitter to determine if there was any indication of trouble on this program. All of them report no difficulty and no indication whatsoever of poor quality or breaks in the program.

It is possible that the trouble heard might have been caused in the receiving set of the checker.
