BROADCAST STATION

OWNED and OPERATED by

RADIO NEWS

On Top The Roosevelt
Madison Ave. & 45th St., N.Y. City

RADIO'S GREATEST and BIGGEST MAGAZINE

Radio News, with its 240 pages, is the largest radio magazine published. It is the outstanding authority in the radio field carrying more new developments, more hookups and more news than any other radio magazine.

Radio News carries in every issue more than a dozen separate departments that cover every angle of the great industry from the beginner to the professional broadcaster or ship operator.

Radio News has been radio's greatest magazine since the very beginning of radio broadcasting.

WRNY RADIO NEWS

Broadcast Station

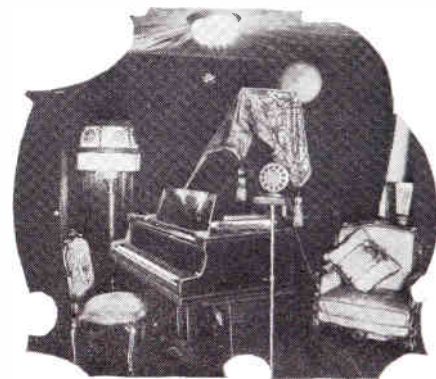

Radio Broadcast Station WRNY gave its initial entertainment on Friday evening, June twelfth, and at once took its place among the ranking Broadcast Stations of the United States.

This new Radio station is fitly installed on the eighteenth floor of New York's superb new hotel, The Roosevelt, the perfect appointments and location advantages of which make it ideal for a station like WRNY.

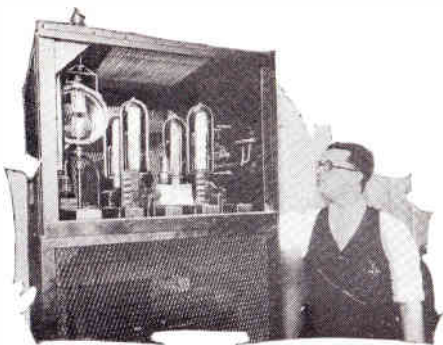

Radio listeners are assured of hearing the very finest programs from WRNY, as it will present the highest type of musical and other forms of refined entertainment such as will measure up to the quality

A view of WRNY's control room. At the extreme left is shown the speech input equipment, while at the right appears a front view of the main transmitter panel. Note the lightning switch overhead and the Western Union clock, which insures the correct time being given at all times from WRNY. In this room there are operators in attendance on the apparatus at all times during broadcasting and also a relay of men listening in on the wave-lengths used by ships at sea, in order to intercept any SOS messages, calling for cessation of broadcasting.

A corner of station WRNY's magnificent studio with the microphone in the foreground. Elaborate draperies and furnishings give the studio a warm home-like atmosphere which is so comforting to the radio artist.

The heart of WRNY's transmitting equipment is shown above. Four large 250 watt vacuum tubes provide the power for putting over the big "kick" at this station. Note the size of tubes as compared with the small receiving tube placed between them.

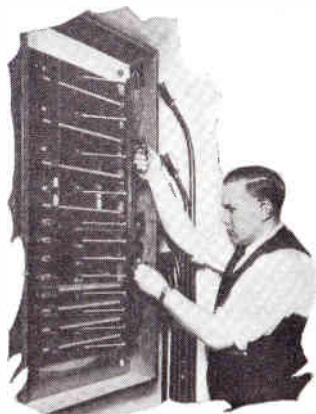

standard maintained by our publications and the pre-eminent position they hold in public esteem.

These entertainments are to be interspersed with many unique and novel features—a distinct departure from usual broadcast programs and are sure to receive a hearty welcome by the radio public. One item, of importance to the real "dye in the wool" enthusiast—those who must have full and complete

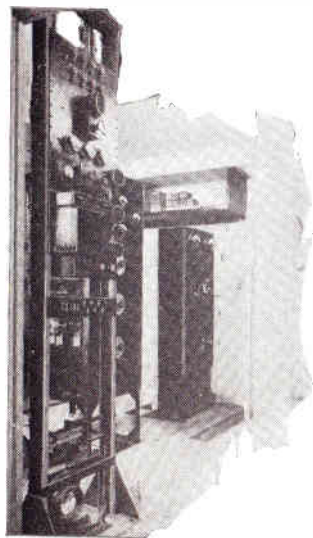

information of the latest improved radio hookups and circuits—is the fact that WRNY by a newly patented method will broadcast these new hookups with full and complete data.

The new station while officially known by its call letters WRNY will very likely be more extensively referred to by the radio public as **RADIO NEWS** station, the Magazine with which it is so closely identified.

No expense has been spared in the installation of WRNY—and its equipment is the *dernier cri* in radio broadcasting apparatus. A standard Western Electric Unit, em-

WRNY is equipped with duplicate power plants supplying all the power for the transmitters. If one power plant goes out of order or is in need of repairs, the operator can immediately switch to the other plant by merely throwing the switch illustrated at the right.

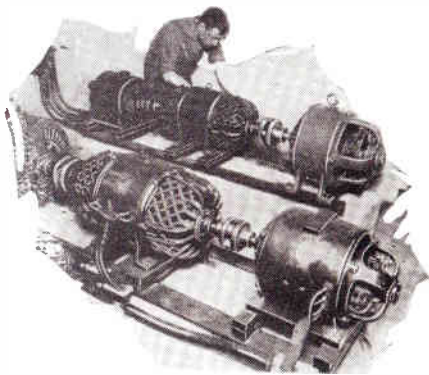

Another view of the control room and apparatus. In the foreground is the speech input system, in the middle the main transmitter panel, and on the right is the power control panel.

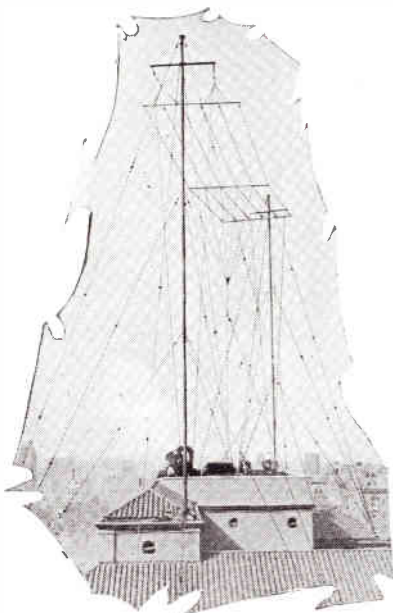

These two sets of motor-generators supply 2,000 volts available for plate potential, and 18 volts at 30 amperes for filament current for the operation of the powerful transmitter. They are installed in a specially constructed sound-proof room and remotely controlled from the main transmitter room. These two sets of motor-generators are connected to the large switch shown in the lower photo on page 4. In this way each set can be used at will by means of the switch located in the transmitter room.

employing two 250 Watt Oscillator tubes and two 250 Watt Modulator tubes in the standard Heising Circuit, give a total power of 500 Watts. The wave length is 258.5 Meters or 1160 Kilocycles. The generative system, is located two floors above the transmitting studio and control rooms, thus assuring freedom from noise made by the generators. In fact WRNY has been most carefully planned throughout. There are two complete power supply systems, and all vital parts are in duplicate, making practically two stations in one, thereby assuring the complete absence of those annoying delays so frequently experienced by radio listeners on "single stations." In case of accidents or the failure of parts to function at full

The antenna atop The Roosevelt Hotel, New York, a twenty-story structure, showing the two 125-foot steel masts supported by their many insulated guy wires. The aerial itself is composed of six wires 74 feet long strung between large spreaders.

efficiency, by the mere turn of a switch, requiring only a few seconds, a new system is in operation, and there has been no delay whatever.

There are many innovations in the new equipment of WRNY. One of these is a Harmonic Suppressor which eliminates all harmonics and the tendency to "mush" on the part of the modulated carrier wave. Another is the Staccato signal, which is heard before announcements and between numbers. Listeners can readily identify the station by this distinctive signal without the necessity of listening for the station call announcement.

A complicated public address system is employed for the transmission of addresses, musical entertainments or amusements from any part of the hotel.

The hotel guest may have a receiving set placed in his room by making request of the clerk. Every possible means has been used to afford ease of control and continuity of operation—to enhance the value of our station to the radio listener.

The call letters WRNY not only symbolize "RADIO NEWS, NEW YORK," the greatest radio magazine in the world—and "ROOSEVELT NEW YORK," one of the very finest new hotels in the United States, but also symbolize one of the most important and best equipped radio broadcast stations in this country—a station whose every effort will be to please that

vast public of radio listeners with well balanced programs, of clean—always clean entertainment.

One of the very important features of every broadcast station is centered in the personnel of its engineering staff. Station WRNY is most fortunate in this respect. Its engineering staff is composed of men of long experience in the radio field—covering every phase of radio and broadcast transmission. Listeners of WRNY have the satisfaction of knowing that the operation of this wonderful station is in the capable hands of men who know the intricacies and vagaries of the highly technical broadcasting apparatus and who are able to produce the very acme of efficient operation.

The Experimenter Publishing Company is very happy to have dedicated its new station to the entertainment of the general public and to the furtherance of the radio industry, and especially desires to make station WRNY a direct benefit to that vast army of radio enthusiasts who look to **RADIO NEWS** for the very latest word in radio progress and invention.

Station WRNY is broadcasting the answers to your radio questions as well as printing them in **RADIO NEWS** and our radio laboratories will help solve your problems.

Make WRNY your favorite station—write us your criticisms and suggestions for new programs and we will use them if possible.

Address Station WRNY, The Roosevelt, Madison Avenue and Forty-fifth Street, New York City. Telephone: Vanderbilt 7360, 9200.

Complete Radio Map of the United States

The Conrad Radio Map is different from all other maps in that it is printed on CLOTH. With proper care will last a lifetime.

The Map measures 17 x 22 in. and contains a special distance-computing gauge of our own design which enables one to determine the distance in miles between any broadcast station and his receiving set at a glance.

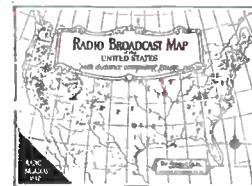

Another special feature of this map is a novel Finder device for locating a broadcast station in quick time.

A complete list of broadcast stations are given on a separate sheet which can be fastened to the map by ordinary paper fasteners.

The map furnished in two colors with the sheet of broadcast stations, enclosed in a two-color heavy manila envelope 9 1/2 x 12 inches.

The Great Hookup Magazine

RADIO REVIEW

*A Digest of the Latest
Radio Hookups*

IN EACH ISSUE AN INSTALLMENT OF
**ILLUSTRATED
Radio Encyclopedia**

No longer do you have to seek here or there for this or that hookup—Just refer to your file of the RADIO REVIEW. All the modern, useful circuits are accumulated in this magazine and every hookup is described in a constructional manner so as to aid the reader in the building of a complete receiver or transmitter.

RADIO REVIEW is absolutely impartial as it is published entirely in the interest of the reader. It is of the large magazine size, 9 by 12 inches, printed on fine magazine paper and profusely illustrated. It contains 100 pages of reading matter.

**In Every Issue is a Supplement of
One Installment of
S. Gernsback's Radio Encyclopedia**

In every issue of RADIO REVIEW there is a 16 page supplement of S. Gernsback's Radio Encyclopedia. This real encyclopedia of radio explains every word used in radio fully by means of photographs, drawings, charts or tables. The supplement is arranged in a convenient loose-leaf form so that it can be kept apart until you have accumulated all the installments.

RADIO FOR ALL

Radio's Most Complete
Book of Information

The information that you ordinarily have to dig out of government publications, text-books, pamphlets, etc., is handily combined in this one book.

A combination of a radio course for the novice in radio telegraphy and telephony with a reference book for the more experienced amateur. Half a dozen books in one.

PRICE \$2.00

Wireless Course in 20 Lessons

The Standard Radio Textbook just as its name implies, gives the fundamentals of radio. It is the kind of a book that helps you no matter what circuit you intend to construct, the kind of a book that enables you to more clearly understand a hookup, to lay out a receiver or transmitter most efficiently and to wire it satisfactorily. The information in the book will never grow old, because it is an accumulation of basic principles that everyone ought to know.

Size of book, 6x9 inches, 264 pages. Flexible De Luxe Binding.

You should have a copy by your side at all times.
