DC-300A II. Current version of the DC-300 introduced in 1967.

5000VZ. VZ technology packs 5000 watts into three rack spaces.

Back in 1967, we rocked the audio world with the introduction of the DC-300. With 150 watts per channel, signal-to-noise ratio of 100 dB, and <.05% THD, the DC-300 radically changed the future of amplifier design. Today, 25 years later, that same basic design continues to impress buyers around the world. In fact, you'll find our original DC-300's *still* in active service.

Now, this doesn't mean that all Crown amplifiers will be as equally impressive in another 25 years. But we're working on it.

Take our new Macro-Tech 5000VZ for example. This touring workhorse packs 5000 watts into just 5" of rack space. Patented VZ™ (Variable Impedance) technology allows the amp to dynamically adapt itself to both signal and load requirements, providing the best power matching to the widest range of loads possible. Combine ultra-low distortion with revolutionary features such as I-Load/I-Limit and Speaker Offset Integration, and

you've got an amp that redefines again every existing standard for amplifier design.

Of course, all the technical achievements are only as good as the support. At Crown, that starts with a 3-Year No-Fault Warranty that's extendable up to a full six years. And an experienced technical staff that's readily available with toll-free telephone support — the best in the industry.

When all is said and done, owning a Crown amplifier is a proven *investment* in long-term reliability and performance. And isn't that what you're really looking for?

For more information on any Crown product, call us toll-free: 1-800-535-6289.

 **crown**  
Guaranteed Excellence

<b>The Professional Audio Registry™</b> .....107	<b>The Professional Audio <i>Yellow Pages</i>™</b> .....110

You are holding the most comprehensive and informative directory available today. We annually bring you this clear, concise, and accurate sourcebook. Keep us on your desktop throughout the coming year.

See for yourself how easy it is to use. Each section begins with a category grid. You see at a glance, which companies produce the products you are looking for. Following each grid is an alphabetical listing with a sales and a technical contact name, address, telephone and fax numbers.

This book features the Professional Audio *Yellow Pages*™—a complete listing of all pro-audio manufacturers and consultants. And new this year—The Professional Audio Registry™—a reverse listing of personnel and their companies.

Professional Audio Journals, Inc. is proud to present the 1992 Professional Audio Directory.

Sincerely,  
*Hannah Klapholz*

**U**p to 16 low noise/high headroom, +48V phantom powered mic preamps? 7 AUX sends? 4 stereo returns? Even a built-in power supply...all in 7 rack spaces?

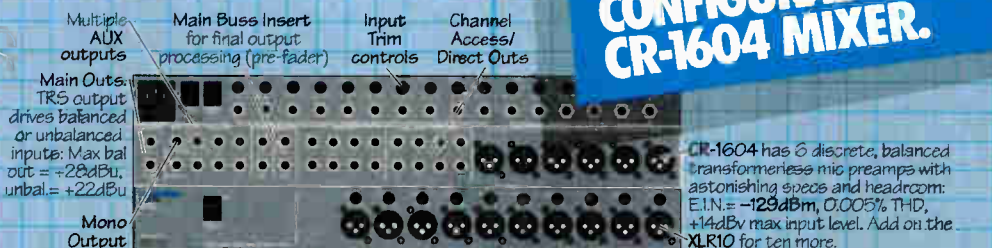

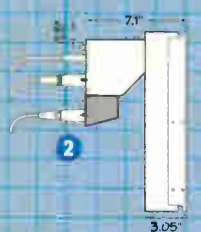

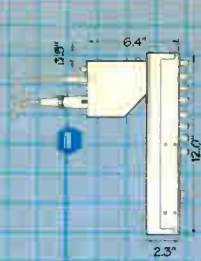

The CR-1604 delivers it all, along with superb sound quality, impeccable specifications and built-like-a-tank construction. It was created for non-stop, 24-hour-a-day professional duty in auditorium sound systems, broadcast and permanent PA applications, TV and radio stations and post-editing suites where nothing must ever go wrong.

The CR-1604 is part of a unique mixing system. Add ten more mic preamps with the XLR10. For 32 or 48 inputs, combine all outputs of up to three CR-1604's with the MixerMixer (mountable on an inside rack wall). And configure the mixer to exactly fit your installation needs. Here are just a few of the possibilities:

- MULTIPLE CONFIGURATIONS CONVERTS IN MANY TENS**
- 1 Pbd to back - 7 rack space installation
  - 2 Pbd to back with XLR10 (16 total mic inputs). Chassis recessed for security cover.
  - 3 Jacks to front with RotoPod bracket attached (for tabletop use or 10 rack space installation).
  - 4 Tabletop configuration with jacks to top.
  - 5 Tabletop with XLR10 Expander installed.

**NO. 1 IN A SERIES**

**ALL THIS IN 7 RACK SPACES!  
THE MULTI-CONFIGURABLE CR-1604 MIXER.**

Shown above: CR-1604 in table-top configuration with XLR10 attached to form integral unit.

- 7 AUX sends from 4 knobs with plenty of gain for effects
- SHIFT button changes AUX 3&4 to AUX 5&6
- 3-band EQ at 80Hz, 2.5kHz and 12kHz
- Stereo in-place solo maintains stereo perspective for all soloed chs. & returns
- Peak LEDs use multiple detectors to sense overload anywhere in input channel
- UnityPlus faders' 20dB headroom above unity reduces need to readjust trims.

- 4 stereo AUX returns with plenty of gain
- Silky-feeling SEALED pots throughout
- ALT PREVIEW solos all muted channels
- Large RUDE SOLO light lets you know you're in solo
- High-output headphone amp
- Dual-purpose Headphone/Solo control
- Inside: All-steel, heavy-duty chassis, double-sided thru-hole flex glass boards, multiple protection circuits

**Rethinking "small" mixer performance.**

The CR-1604 is proof that low noise and high headroom need no longer be mutually exclusive goals for the designer, specifier or contractor. You get 90dB working S/N and 108dB dynamic range with two times more headroom than old-style mixers — where it counts, in the critical mix amp stage. Instead of afterthought XLR's stuck on the back, we provide real phantom-powered mic inputs with discrete,

balanced microphone preamps as good as large consoles. Four conjugate-pair transistors with large emitter geometry reduce distortion at all levels, while delivering extremely low noise (our -129 dBm @150 ohms spec is verifiable).

The ultimate proof is the growing number of system designers specifying the CR-1604. They like its price. They like how it sounds. And above all, they trust its reliability.

- balanced left, right and mono outs
- -10 to +4 operation
- 8 direct outputs
- inserts chs. 1-8
- 4 stereo/8 mono effects returns
- 3-band EQ
- BNC lamp connector
- 3-yr Ltd. Warranty

MULTIDIMENSIONAL IMAGING ON SPEAKERS AND HEADPHONES  
TOTAL COMPATIBILITY—STEREO, MONO, TRANSAURAL  
HUMAN SPATIAL HEARING  
AUDITORY TELEPRESENCE

*Accurate geometry  
and precise free-field  
equalization produce remark-  
able results, which is why the  
AACHENHEAD®—a product of ten years  
of research—is in use worldwide as the premier  
sound quality measurement system. • Along with  
our HEAD technology, you can upgrade your current  
sound capabilities by adding a Binaural Mixing Console™  
for natural, three-dimensional processing of conventionally  
recorded sounds. Recordings made with the AACHENHEAD or  
Binaural Mixing Console are fully compatible—in stereo or mono, on  
loudspeakers or headphones. • So if your clients demand the best in sound  
technology, use our HEAD—we guarantee it'll turn theirs. Call Sonic  
Perceptions, Inc. at (203) 838-2650 for more information, or to arrange a demonstration.*

Sonic Perceptions is the exclusive North American distributor of **HEAD acoustics** technology

# DEAL YOURSELF A WINNING HAND!

Card frame systems are rapidly becoming the equipment choice of the 90's. And the INTEGRA III SYSTEM from PROTECH AUDIO is rapidly becoming the choice in card frame systems.

Why? Because we offer our dealers more products, more design support, and more market protection. We work to help our dealers develop the competitive edge.

Our dealers find they can offer

their customers a dependable product line, with extensive factory support. From initial system layout, to after sale support, we strive to give our dealers a reliable source for professional audio equipment.

Get the competitive edge! Become one of a limited number of authorized INTEGRA III SYSTEM dealers. For the winning story, call or write today!

# Classic—Now In Print!

HARRY F. OLSON

## ACOUSTICAL ENGINEERING

From fundamentals to practical applications, complete working methods covering the entire field of acoustical engineering for radio, television, sound motion picture and recording engineers, architects, and musicians.

Professional Audio Journals

*"This book should be in the hands of any serious electroacoustic amateur or professional."*

Syn-Aud-Con

*"The great value of this book lies in its clear and unified approach to electroacoustical problems and in its extensive summary of many important results."*

Frank F. Romanow, Bell Labs

*"A thorough reading of the chapters on radiating systems can give a reader a firm understanding of the basic phenomena of horns and direct radiators. ...these chapters and the cornucopia they contain have never been supplanted."*

Neil A. Shaw, Vonoklason and Associates

*"One can turn around in the shadows of giants and see that electronics meant audio and physics meant sound. I continually use Acoustical Engineering."*

Chris Foreman, Panasonic/RAMSA

# DROP IT!

Until Headsets and Belt-Packs become lighter than air, they're going to be dropped. And if damage occurs, you can bet it will be in mid-performance. Production Intercom Headsets and Belt-Packs are built to keep communicating. Even after they are dropped. Ask us to prove it.

In a world of "or equals," Oxmoor Corporation introduces the DEQ-I and DEQ-II—high-resolution, programmable equalizers that simply have no equal.

**Exceptional security.** Set them and walk away, because Oxmoor's sophisticated system is more than just an easily removed front panel.

**Comprehensive control.** Both the DEQ-I and DEQ-II feature 29 constant-Q, minimum-phase,  $1/3$  octave combining filters, plus sweepable second-order low- and high-pass filters. Adjustment of third-octave filters and output gain is in precise  $1/2$  db steps over a

## TWO EQUALIZERS. NO EQUALS.

( $\pm$ )12 dB range. Store up to eight equalization curves and other settings in non-volatile memory presets for rapid recall. The DEQ-II's large LCD display and versatile front-panel controls make programming simple, while the DEQ-I's numerical read-out assists in programming through internal controls. Rear ports allow programming either model by a PC, a Macintosh, a PA-422 compatible controller system, or another DEQ-II.

**Unequaled value.** An unbeatable combination of security, flexibility, and performance—all at an affordable price.

## OUR RMX-44 OFFERS ALMOST AS MANY COMBINATIONS.

Zone control and routing problems can be puzzling. You could spend a lot of time trying to get the right combinations. Or you could get the RMX-44 and save yourself a lot of trouble.

With it you can select or mix four input sources and route them to as many as four different outputs. And you can make your selections remotely using simple contact closures. The RMX-44 can eliminate patch bays or mixing boards, but mostly it gets rid of your problems. Our RMX-62 has six inputs and two outputs where you need a slightly different mix. No matter what your switching or routing problems, call Oxmoor for all the right combinations.

### THE OXMOOR RMX-44 MIXING MATRIX SYSTEM

# We're making the laws of physics work harder than ever.

If you think it's easy to develop full performance from an enclosure this size (3.4 ft.<sup>3</sup>), just listen to any other ultra-compact system.

If you already have, you've probably decided it's impossible for anything this small to combine high output with high definition. In that case, you really should hear our new KF300 Series.

These are true 3-way designs—unheard of in this size class, but a fundamental principle in all EAW full-range systems. An advanced midbass horn and ultra-rigid carbon-fiber cone driver cover the entire midband, producing over 130 dB SPL with lower distortion than comparable two-way systems. The custom-designed woofer uses a flat wire wound voice coil and massive, optimally aligned magnet structure to achieve exceptional efficiency and surprisingly impressive bass.

True 3-way design also makes the KF300 Series a genuine Virtual Array™ system. Horizontal coverage is uniform from 400 Hz all the way to 18 kHz, and precisely matched to the enclosure angles of two KF300i's arrayed with our new SB330 subwoofer. The result is consistent, predictable coverage without comb filtering, lobing or hot spots.

The KF300 Series includes a variety of hardware configurations and powering options, such as the horizontal AS300 enclosure, designed for distributed systems. Each version delivers coherent output, controlled directivity and wide full power bandwidth in concert sound fill coverage, theatrical systems, dance clubs, corporate theater and other demanding applications.

The MX300i CCEP™ (Closely Coupled Electronic Processing™) unit provides overload protection, LF excursion control phase compensation and idealized crossover characteristics for the KF300i.

It was no small task to make so little do so much. But at EAW, we insist that even our smaller systems embody big ideas.

# Sound Architecture.

You are looking at the distinctive profile of superior sound; the innovative engineering inside the Community RS Loudspeaker. A unique Wavefront Coherent™ design that delivers ultimate audio in low, mid and high frequencies, simultaneously, to every seat in the house. It begins with a solid foundation of hand laminated fiberglass horn moldings. The shape is mathematically correct, perfectly rigid and computer optimized to provide extraordinary sound projection. The RS Series replaces traditional direct radiators with full horn loading for uniform high sensitivity, and matched directivity. The result is a fully seamless illusion. Talk with our Community sales representative and begin to explore the shape of pure sound.

**"Our lives have real meaning since we discovered P.A.S. offers loudspeakers for a wide range of demanding professional applications."**

**"What I like best about all P.A.S. speakers is their obvious lack of distortion."**

You may not know that P.A.S. is one of the only American loudspeaker manufacturers that designs and builds its own cone speakers, including a range of drivers for those who build their own enclosures. This allows us to provide our customers with unmatched levels of service, reliability and support.

We've become well-known for our high power coaxial technology and TOC™ Time Offset

Correction. These, together with our unique APM Active Parameter Modification circuitry, provide critical audio pros with highly accurate, extremely transient, low distortion sound.

P.A.S. also makes an entire range of products to satisfy the needs of *every* discriminating sound professional. Our TOC Studio Monitors are used by the most demanding recording and mastering engineers. Our

System-2 Sound Reinforcement enclosures combine the power and precision of TOC and APM for live mixers who want new levels of accuracy. Our PL Series brings excellent TEF and polar response characteristics to sound contractors. And now we've introduced our new Target Series for small venue and club users.

So if high resolution sound can bring more meaning to *your* life, discover P.A.S.

Please write to us for more information about P.A.S. products.

Professional Audio Systems, 660 N. Twin Oaks Valley Rd., Suite #101, San Marcos, CA 92069 Tel: (619) 591-0360 Fax: (619) 591-3602

1992  
 SYN-AUD-CON'S  
 20th YEAR OF SERVICE  
 TO THE AUDIO INDUSTRY

To Celebrate SYN-AUD-CON'S 20th Year . . .

## 3-Day Audio Engineering Seminars—\$550 The Farm—S. Indiana

May 21-23, 1992

June 18-20, 1992

July 16-18, 1992

August 20-22, 1992

September 17-19, 1992

October 15-17, 1992

## 3-Day Workshop—\$600

### Binaural Auralization & Precision Equalization

Instructors: Dr. Wolfgang Ahnert, Berlin  
 Dr. Eugene Patronis, Georgia Tech

The Farm & Medora, IN  
 May 15-17, 1992

LIKE TO KNOW MORE ABOUT SYN-AUD-CON?  
 Fax, call or write for a complimentary Syn-Aud-Con  
 Newsletter as well as our 1992 schedule and brochure.  
 A subscription to our quarterly Newsletter is \$35/year.  
 Syn-Aud-Con  
 12370 W. Co. Rd. 100 North  
 Norman, IN 47264

 Cohen, Mark: Foster of America  
 Colhill, Jim: Systems Wireless, Ltd.  
 Colangelo, Tom: Cello Ltd.  
 Colgan, Ron: Sharp Electronics/LCD Products  
 Collins, Neil: AMX  
 Collins, Norman: E3MC/Emilar  
 Conger, Tom: Redco Audio  
 Connolly, Craig: Neatek  
 Conrad, Al: Wescom  
 Conte, Anthony: Dr. T's Music Software  
 Cook, Ron: Akornco  
 Cooper, Andrew: Cooper Sound Systems  
 Cooper, Janet: Cooper Sound Systems  
 Coen, Charles: Arcor  
 Creamer, Michael: BEC Technologies  
 Crank, John: Russound/F.M.P.  
 Cunningham, Tess: CFI Audio  
 Curtin, Steve: Ariel  
 D'Agostino, Mike: Acousonics Systems  
 D'Alessio, Al: Northeastern Communications Concepts (NCC)  
 D'Ambrosio, Marco: Lucasfilm Ltd./THX Group  
 D'Angelo, Nonnette: Auteri Assocs.  
 Daigler, Matt: Westlake Audio  
 Dain, Ron: VanSon  
 Dall, Dave: Capoul  
 Dall, Joyce: Indus-Tool, Div. of Bird-X  
 Daniel, Francis: ARCooustics  
 Danielson, Gary: California Switch & Signal  
 Danter, Laurence: Paladin  
 Dantzer, Don: Telex Communications  
 Dautenspeck, Larry: Draper Shade & Screen  
 Davies, John: Cerwin-Vega  
 Davis, Ed: American Fibertek  
 Davis, Jeanine: Russian Dragon/Jeanius  
 Davis, Kevin: Audio-Videographics  
 Dayman, Grant: Vega  
 De Rosa, Joe: Sound Engineering Technology  
 Deaton, Ken: Mann Endless Cassette Industries  
 DeBelius, Ken: Soundcraft  
 Debinger, Ron: Audiocom  
 DeCastro, Eymard: Atkinson Dynamics  
 Deinzler, Gerard: Teleconferencing Systems  
 Deitz, Greg: Cooper Industries, Belden Div.  
 DeLangis, Phil: Verite Technology  
 DeLeon, David: QSC Audio Products  
 Deletetz, Barbara: Audio Chicago  
 Delgado, Roy: Klipsch & Assocs.  
 Demarest, Eric: Middle Atlantic Products  
 Densen, Richard: Current Designs  
 Dengler, Chris: Amprobe Instrument  
 Dennis, Nancy: ETA Lighting Systems  
 Der, Tom: Neatek  
 Desouza, Vincent: Amber Electro Design  
 Devacka, John: LPB  
 Devdas, Paul: Spatial Sound  
 DiFrancesco, David: Rolls  
 Digre, Don: Misco/Minneapolis Speaker  
 Dineen, Susan: Digisonix/Nelson Ind.  
 Dodge, Tom: Cor Wire and Cable  
 Dodson, Dan: Pyle Industries  
 Doggett, Felicia: Metropolitan Acoustics  
 Dolin, Jeff: Luxesay Manufacturing  
 Dornitz, Lonnie: Ethereal Concepts

Don, Chris: Sonic Boon Digital Sound Effects  
 Dookie, Lakesh: Adamson Acoustic Design  
 Dore, Darrell: Acoustic Systems  
 Dorman, William: Neutrik USA  
 Dorwaldt, Carl: Renkus-Heinz  
 Dowart, Timothy: Bose  
 Dow, Herb: Ediflex Systems  
 Doyle, Link: American Fibertek  
 Dragon, Christopher: Stewart Electronics  
 Drever, Les: Light Wave Systems  
 Diskill, Larry: Ivie Technologies  
 Duffield, Joy: Aiphone  
 Dufford, John: Stamford Advanced Acoustic Technology  
 Dukamaon, Don: Atlas Wire & Cable  
 Dunaway, Jason: Valley International  
 Dunn, Chris: Dreamhire  
 Dupoux, Steve: Comtek

## IDP is *not* a food preservative.

**I**ntegrated Dynamics Processing... the concept behind the new Symetrix 425 Dual Compressor/Limiter/Expander. Three totally *priority-interactive* processors in each of the Dual/Stereo channels provide the essential level control tools you need for any mixing, recording or sound reinforcement task. And it's dead quiet—super smooth.

Demo the new 425 and the power of IDP from the the company that has specialized in dynamics processing for over 15 years. Because, audio problems don't come in neat little boxes—Symetrix solutions do.

- **Transparent soft-knee compressor**
- **'Brick wall' infinite ratio peak limiter**
- **Noise reducing downward expander**
- **Separate LED monitoring of all functions**
- **Functional ease of operation**

**Set a new standard.**

**Symetrix** 4211 24th Avenue West Seattle, WA USA Tel 206-282-2555 1-800-288-8855 Fax 206-283-5504

# A Revolutionary State of Mind

**UDAPS™ --the answer to managing audio processing in today's complex environments.**

**As audio management systems and overall requirements become more critical, count on IED™ for innovative solutions.**

**Innovative Electronic Designs' UDAPS™ is a totally integrated processing system --- one answer for all needs --- achieved by utilizing IED's Digital Domain Processing (DDP™) --- in a modular, rack mountable system, with plug-in cards.**

**This unified system is exciting news for forward thinkers who want reliability and flexibility...  
and reassuring news for practical thinkers who worry about product economy and obsolescence.**

**UDAPS™ provides maximum audio processing --- routing, mixing, signal delay, multi-types of EQ and level control, with a capacity of 508 simultaneous signal paths. Reliability and versatility are unsurpassed.**

**IED™ is the proven industry leader --- providing technology for the Universal Digital Audio Processing System (UDAPS™), with a training program, and documentation to support it.**

**Make it your first priority to find out more. Contact Tom Roseberry or Mark Lewellyn (502) 267-7436 or FAX (502) 267-9070 for details.  
Or write us at 9701 Taylorsville Road, Louisville, KY 40299, USA.**

# BACKED BY POPULAR DEMAND.

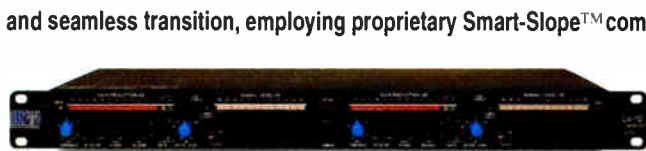

After more than twenty years, UREI Compressor/Limiters remain the of choice of audio professionals, having earned a reputation for excellence as hard working tools of the trade. It is difficult to find a recording or broadcast studio that does not own at least one UREI Compressor/Limiter. And engineers in the Sound Reinforcement and Installed Sound industries have long considered our products as vital links of any high quality audio equipment chain. With experience as our teacher, and modern technology as our guide, we are proud to offer three LA Series Compressor/Limiters, beginning with the LA-22.

The LA-22, a dual channel unit, contains three Gain Reduction circuits, can be used as a Dynamic Expander, and is equipped with a Full Parametric Filter on each channel. Its unmatched versatility sets it apart as a truly unique multi-function tool. Designed with innovative "spectral agility," the user has the option to reduce or expand gain across the total audio bandwidth or at a chosen center frequency with variable "Q" of 1/6 octave to 2-1/2 octaves. With proper settings in the expansion mode, you can use the LA-22 to "lift" vocals in a live or studio mix or increase intelligibility in paging systems or radio broadcasts. Conversely, in the gain reduction mode, the compression can be frequency focused to control levels to prevent feedback, for De-essing, De-popping or to creatively "fatten" the sonic character of particular instruments and vocals. The parametric filter circuit, completely accessible via the rear panel barrier strip, can be accessed and routed to the Side Chain, thus making the LA-22 a frequency dependent gain reduction or expander system.

Full Parametric EQ Section.

As a pure Compressor/Limiter, the LA-22, along with the LA-10 single channel and LA-12 dual channel models, offers unparalleled performance and seamless transition, employing proprietary Smart-Slope™ compression ratios. All three models feature transformer isolated output stages, optimized by a patented active circuit to assure the elimination of distortion and saturation frequently associated with transformers. Active Balanced Bridging

Inputs easily handle amplitudes in excess of +24 dB and both input and output connections can be achieved by your choice of XLR-type, 1/4 inch phone or Barrier Strip connectors. Exceptional signal integrity, low distortion and superb dynamic range is common to all models.

All three LA Series models are housed in a compact 1U rack space and are designed to deliver years of reliable service, in the studio or on the road. Whether your application is sound reinforcement, recording, broadcast or for permanent install, you'll find LA Series to be a trustworthy and hardworking addition to any system. From the people who set the standard, UREI.
