WE UNDERSTAND EVERY TOWER OWNER FACES UNIQUE RISKS.

Atlantic Risk Management is a large, independent insurance agency and an expert in protecting tower owners from unexpected risks. We offer complete, competitively priced programs endorsed by PCIA and tailored to suit your specific exposures, including: self-supporting, guyed or monopole towers; support equipment; shelters and fencing; plus general liability, business auto, workers' compensation, umbrella and more.

Find out why we protect more tower owners than any other agency.

Call 866-226-0555, visit towerinsurance.net or email David Saul at dsaul@atlanticrisk.com.

Weighing in the New Year: 20 pounds

Commitment, reflection, honesty, planning. That is how I usually spend my New Year's Day. "I will lose 20 pounds," I tell myself. "I should have lost 20 pounds. You need to lose 20 pounds. I will lose 20 pounds in 2008."

This buyers guide issue of AGL is always fun for me because I get to know a little better all of the companies in the industry that I don't have a chance to work with throughout the year. I read the lists and spend time looking up web sites of companies

with which I'm not familiar, figuring out who is who, who worked where and how or if I might have reason to work with them in the coming year. So readers put every copy of AGL aside as a reference, but if there is one issue of the magazine I would encourage you to keep it is this annual buyers guide.

Blatant guilt or "honesty": We can afford to write, print and mail this magazine to you 11 times a year due to one group of supporters in particular: the advertisers. With the costs of

where you saw their ad and that you appreciate their support of AGL. For that matter, if you know of companies that would benefit from advertising in AGL, don't be afraid to do our jobs for us and promote AGL to them.

Planning: 2008 is going to be a very busy time for the industry. We face the eight-hour backup power issue, backhaul, WiMAX deployments (and other technologies in the AWS band) – our continuing battles for truth, justice, and the wireless world. We'll do everything we can at AGL to research, document and present meaningful and timely information on the issues as they unfold.

Commitment: The more I've discussed the idea of working on a series of educational material, the more positive feedback I get. I've made the commitment to develop a series of documents for the industry, and I'll work toward that throughout 2008. I need input here from everyone and anyone with a few minutes to drop me a note about what topics are important to them. Please, please spend a few moments and drop me a note. What issue do you see as important to your company and the overall industry?

Reflection: I don't mean VSWR either. I'm a little worried because I tend to only hear positive things about

AGL. Don't get me wrong; I love to hear what people like about the magazine, but I don't hear those friendly criticisms. What other issues or topics should we be addressing in feature articles or in standing columns? Are we covering topics in enough detail? Did we miss the point?

Give me a piece of your mind. The email address is at the left. Have a wonderful, successful and safe 2008. **agl**

I need input here from everyone and anyone with a few minutes to drop me a note about what topics are important to them.

paper, gas, printing, postage, etc., my out-of-pocket expense is more than \$1 per copy of each issue – more like \$18 per year per subscriber. Help me keep this magazine coming to you. If you do business with advertisers, particularly as a result of their presence in AGL, don't hold back: Let them know

Nobody Does it Better

Nobody can deliver one or a package of sites that fit better, that are more sensibly priced than Tower Economics.

Who else has been doing this since 1980? Who else has the depth of RF and Real Estate knowledge to so thoroughly "put their arms around" your particular site objectives? Prominent developers such as The Trump Organization, Girard Estate Leasehold, E.B. Realty Mgmt., Interstate Realty Mgmt. Corp. and McConnell Johnson Real Estate have chosen us to market/manage their rooftops.

- Tower & Rooftop Site Acquisition
- Site Management & Marketing
- **COMPLETE LEASE
TURN-AROUND GUARANTEED
IN 10 DAYS**
- Contract Installation and Supervision

New sites always being added. For the most current update, go to our website.

www.sa-lawyers.net

We provide all legal services required of tower and rooftop operators, with over 20 years experience negotiating site leases, fulfilling regulatory

requirements, representing buyers and sellers, assuring tenant compliance, and providing valuation of tower properties for sale or commercial financing. Robert Schwaninger, coauthor of the Fryer's Market Report for over five years, is also available to provide expert witness testimony in a variety of site leasing areas. We can help whether it's one tower or a thousand. Call us today. We make the difference in the deal.

Survivability

**Your towers are built to withstand tough conditions.
Your Environmental Compliance and Reviews should
withstand tough scrutiny.**

If you are building a new tower you must comply with the National Environmental Policy Act (NEPA) and the FCC National Programmatic Agreement (NPA) for Impacts to Historic Resources. In many cases, modifications to existing towers must also comply with the NPA.

Dynamic Environmental Associates, Inc. is the Industry Recognized, Source For:

- ◆ NEPA & NPA Compliance
- ◆ ASTM Environmental Site Assessments
- ◆ Permitting, Auditing & Reporting

We have been working with the tower and wireless industries since 1993. Our track record speaks for itself.

We don't cut corners. We cut risk.

Need More Cooling?

No Problem.

The more your business grows, the more communication equipment you add inside your existing shelters. When your shelter's cooling requirements outgrow its original capacity, turn to the Bard line of telecommunication upgrade equipment. The new, large capacity units fit the same supply and return air wall openings of the smaller units they replace, providing an easy, cost-effective solution to your increased environmental control needs.

More cooling with no costly wall modifications? No problem if you leave it to the most respected name in wall-mount technology – Bard. Contact Bard to learn more.

HUGE LIABILITIES
SAFETY ISSUES
LOST REVENUE
MAJOR DAMAGE

Demand Only Genuine Andrew Steel Products

You Risk A Lot If You Specify Low Quality Steel Tower Mounts

You might not even know it, but your suppliers could be subcontracting their steel tower mount components to low end fabricators that do not meet the EIA/TIA/222-G standards. These standards help ensure that the mounts you use conform to superior industry standards for safety and quality.

Leaders in design and technology for steel products and accessories, Andrew designs steel tower mounts to meet the latest EIA/TIA code requirements. All welding and steel inspection processes are backed by AISC and ISO 9001 certifications. We've been committed to safety for over 70 years.

To learn more about quality issues, reducing liabilities, and promoting safety contact TESSCO at 1-800-472-7373 or visit www.tessco.com/go/andrew

Maybe we like our steel products too much!

We like steel by Andrew AND steel by Wireless Solutions®. We particularly like offering you a choice between Andrew's innovative, time-saving products and Wireless Solutions consistent, value-oriented products. Only TESSCO offers the industry's widest selection of sector frames, antenna mounts, co-location platforms, grounding and cable accessories. Whether you need the industry's best-quality products from Andrew or the industry's best price from Wireless Solutions, only at TESSCO do you have a choice.

Two great brands. One great source.

Call TESSCO Today!

From Coax Cable Accessories, Grounding Products, Ice Bridge Kits to Antenna Mounts, Site Pro 1 can DELIVER your site kit on time from any one of our Distribution Centers: New York, Atlanta or Los Angeles.

RF Safety for Rent

Whether you lease or buy,
nobody makes RF protection
easier to use than UniTech.

Leave it to UniTech to raise the bar on RF protective clothing. 50 years in PPE development gives us a distinct edge in protecting workers without compromising ease of use.

Our most popular improvement is the RF hood. We streamlined its profile to make a comfortable head cover that moves with you. The soft textile screen is replaceable and a ball cap style brim is standard. Our system also offers machine-washable knit gloves and socks.

But UniTech's RF protection expertise doesn't end with garments. Consider us for:

- RF Garment Rentals
- RF Shielding
- Tower and Rooftop Signs
- RF Compliance Training
- Consulting

Call or visit our web site to learn more.

SPAA05-NEX Superior Antenna Alignment Tool

The SPAA05 series of GPS based antenna alignment tools offer a very fast & very accurate antenna azimuth optimization solution. After selling more than 350 units in Europe, the SPAA05-NEX is now available on the US market and already under evaluation with two major US Carriers for their 3G/UMTS Network Roll-outs.

For more details, please contact:
 3Z Telecom 954-581-6565

www.spaa05.com

Main features:
 Azimuth/Heading up to 0.5° accurate
 X,Y position < 3 foot
 Max 15 minutes for aligning 3 antennas
 Includes HP PDA and approved encryption software
 Also available with SPAA05 PC version
 US and UTM coordinates and NAD datum

Pricing:
 Prices start from \$12,990
 48 hr delivery

On request:
 Rental, On site training,
 Azimuth services, software

www.alumaform.com

Aluma-Form manufactures a wide range of antenna mounts and accessories designed and manufactured using our unique extruded aluminum alloy. This high strength 6061-T6 alloy (35,000-PSI minimum yield strength) provides the structural equivalent of steel with approximately 65% less weight. 6061-T6 aluminum is also extremely corrosion resistant. *see our ad on this page*

Aluminum Monopole T-Boom

- The new tubular antenna mounts reduce the affected wind loading on the mounts.
- Meet new revision "G" standard for wind loading that will withstand 140 MPH wind.
- 80% preassembled at the factory.
- Constructed using 6061-T6 Aluminum which is 35,000 psi material.
- Half the weight of a comparable steel mount.

Specialty Tower Lighting, Ltd. offers a diverse line of high-quality obstruction lighting

Path Align-R™ Models 2200, 2201, 2240, 2241

Antenna Path-Alignment made simple

The *Path Align-R™* is a high performance, affordable and complete test solution designed to quickly and accurately optimize the transmission path between microwave antenna sites...all in a matter of minutes!

Each *Path Align-R™* (set of two) contains 4 bands (to 23.5 GHz) and is both a synthesized source, that *directly drives* the site's antennas, and a narrow-band receiver. The instruments provide continuous 2-way voice communication between antennas!

Models 2201/2241 contain an internal data logger, with GPS receiver, which records frequency, path-loss in dB, and GPS position/date/time from a single button push.

The *Path Align-R™* is battery powered (4-5 hrs operation / 3 hrs recharge), and weighs 7 lbs, including the Instrument Back-pack.

IS YOUR TOWER COMPLIANT?

New rules are coming....

A coalition of broadcasters, engineers and OEMs filed a Request for Further Rule Making to unsnarl the FCC's AM detuning rules. The Commission released the Request for comments, which have been received. Indications are that the rules changes and additions in the Request will be adopted, wholly or in part. These changes should facilitate AM detuning compliance and improve relations among broadcasters and tower owners and their tenants.

To learn more, go to www.waterfordconsultants.com and read the articles about the proposed rule changes and the impact these changes may have on you.

Free online screening – Easy to use – Immediate results – NIER/MPE Studies – Experienced Engineers – Industry Leaders

2008 IWCE

INTERNATIONAL WIRELESS COMMUNICATIONS EXPO

College of Technology: February 25-26, 2008
 Conference & Exposition: February 27-29, 2008
 Las Vegas Convention Center, South Halls 3 & 4

■ www.iwceexpo.com ■

IWCE is the ONE place where all industries and all communications/IT professionals come together to share thoughts and ideas on wireless communications technologies.

WHO SHOULD ATTEND:

ANYONE who is responsible for planning and implementing an organization's wireless technology future...

- Enterprise users from all industries, including security, utilities, transportation, construction, education, retail, healthcare and facilities management
- IT professionals
- Public safety agencies
- Dealers and consultants
- Wireless service providers

WHAT YOU'LL GET AT IWCE:

- North America's largest forum on communications technologies developed for a variety of industry sectors
- A one-stop opportunity to shop for ideas and solutions from emerging wireless technologies at the industry's leading event featuring 350+ exhibitors
- Content-rich education and training developed by industry professionals
- Keynote Address by leading industry speakers
- General Sessions highlighting current industry topics
- Two Levels of College of Technology Workshops - Level 100 for IT professionals and others new to the wireless world and Level 400 technical training courses for communications professionals
- In-Depth Conference Sessions on Mobile Voice Communications, Mobile Data, Spectrum Utilization, Emerging Technologies, Interoperability and Technology/General Business
- Dealer Day Workshops - share best practices with other dealers and learn about new technologies in special workshops for dealers
- Unparalleled networking opportunities

IWCE is your best opportunity for training, contacts/networking, and seeing what's new from industry suppliers. IWCE has something for everyone regardless of what industry you are from.

IWCE...Providing Wireless Solutions for the Working World

For more information or to register, visit our website at www.iwceexpo.com or call 800-927-5007 or 508-743-0105
