THE COIN MACHINES JOBBER

One of the most important and yet unique positions maintained in this industry is that of the jobber. Here is one man that bears the brunt of the attacks that come from the operators. He acts as the buffer between the operators and the distributors and manufacturers. In return he asks very little for the work he does to bring about as amiable a relationship as possible among the operators and the distributors and manufacturers.

The average jobber is much more than the name implies. He risks a great deal financially when he enters into this division of the industry. At the same time he takes a much smaller profit. He buys all the products of all the distributors. He must sell in quantity to continue his position in the trade. He is the man who offers credit up and beyond what the average distributors offer. He pays cash, in most cases, for the machines he purchases. Then turns around and builds up a huge book-keeping system because of the fact that he allows "charges" on most of the sales he makes.

He must carry a large stock of supplies and parts of all the manufacturers products he handles. The average distributor only carries parts and supplies of the manufacturers he represents. The jobber is the man who makes regular loans to those operators who suddenly require a few extra dollars for one thing or another. He is the man who sends out his mechanics to locations to repair machines for operators. He is the man who goes out of his way to obtain something or other, whether it be just a 10¢ part or an entire machine, for his customers. Many times, just as a favor, he'll go out and buy things for his operator-customers that have absolutely nothing to do with this business. And yet he can only count his profits in pennies when it's all over.

The jobber is the man who has been largely responsible for helping to maintain a strong nucleus of operators to act as the backbone for this industry for the post-war era. Most jobbers, tho they are in a unique sales position today, remember the many hardships they had to undergo so as to be able to continue their position in the field. Almost every jobber would like to become a distributor for some factory when the war is over.

When the war hit this trade hard, and the average operator found himself desperately in need of machines, parts and supplies, the jobber was the man who rushed to the highways and byways and purchased what he could where he could. The operator that wants to sell a jobber a machine should remember that the jobber must obtain this machine much lower than market price. Otherwise the reconditioning work the average returned machine requires takes all possibility of profit from the equipment. Regardless of how fine the operator may believe his used equipment to be, unless it is brand new and in its original case, never opened, the jobber simply must go over the machine, and very carefully, too. He must completely recondition it. And then first begin to spend money to sell it to someone else.

Jobbers therefore definitely deserve a decent profit for their work. They must get a profit so as to remain in business and continue to service the operators in the style to which these operators have now become accustomed. It is absolutely unfair for any operator to demand the higher price from a jobber for he then isn't giving him a fair chance to do the sort of job he expects from him at all times.

Many jobbers, in years gone by, came to the financial rescue of operators in many matters outside of regular business. When ops were faced with mortgage interest payments on their homes, or had to loan money when the wife and children were hospitalized, the jobber was the first to help. Many jobbers have helped operators to purchase their first autos and trucks. All this should be taken into consideration by the operator today when he deals with his favorite jobber. When the post-war era starts, these jobbers will again become the closest friends of the operators. It will be these same jobbers who will probably sell operators the first new machines. They will be the ones to buy the new machines first, gambling their own money, and completely test them before they even offer them to their operator-customers.

"The Coin Machines Merry-Go-Round"

The jobber has been largely responsible for a great many operators remaining in a profitable position in this industry during this war period. The jobber has gone all out to assure the operator that he is going to remain in a position to take care of him for the duration. This is a heavy and responsible task.

Distributors working thru jobbers have enjoyed closer and better contact with operators. The distributor, because he worked thru the jobber, was assured his money on each and every machine he sold. Whereas the jobber, in turn, had to risk his money on a credit basis to the average operator. When such towns as New York City, Newark, N.J., Cleveland, Ohio, and many others went down during the pre-war era, many a jobber was cleaned out because of the credit he gave. Many ledgers, reading well into five figures, were just tossed out of the window when these cities went down.

The jobber has today continued his importance to this field just as much as he did in the pre-war era. Not only has he been the one to dash about the countryside and obtain machines for repairing and revamping, but has been the referee in disputes between the operators themselves regarding locations as well as general operating conditions and a hundred and one other differences. The importance of the jobber in the coin machines merchandising picture is therefore not to be discounted. He has won himself a definite place in the merchandising picture.

In post-war era much will be demanded of the jobber. He will once again become the closest possible contact with the operators. He will again create the first new blood for this field. He will also be the one who will take the first big chances on the new equipment. He will be the man who will have to "eat" the machines that won't work or won't earn sufficient money. And who, when he does get a winner, will have to be satisfied with the short end of the profit.

Distributors in the post-war era will, without any doubt, find the jobber their most valuable ally. In the small towns thruout his territory the average distributor won't have daily contact, nor care to travel regularly, nor will he care to offer credit and constant service. This would require very great expense and too much risk. He will, as in past years, find a jobber who will carry on for him and will take over all these headaches for a short profit.

The operators should therefore continue to cultivate the jobbers' friendship. These are the men upon whom the operators can depend. These are the men who will treat the operator with utmost consideration. Whether it be one manufacturer's products or another's, the jobber will maintain and guide the operator. Working with the jobber now, the operator is assured a real friend for the post-war era.

HONORABLE MENTION AWARDS

It is indeed a pleasure to present our Honorable Mention Award to W. E. Bolen of The Northwestern Corp., Morris, Ill., for obtaining the Army & Navy "E" for war production work. This reflects with great glory upon all the industry.

To C. T. McKelvey of the J.P. Seeburg Corp., Chicago, Ill., for his fine efforts in behalf of all coinmen and the work that he has and is doing to help put this industry on the highest possible plane,

To Meyer C. Parkoff of Atlantic Distributing Co., New York, N.Y., for his fine work among the trade and his efforts to help operators to better business methods.

To Charles W. Hughes of C.W. Hughes & Company, Ladoga, Ind., for his fine work in behalf of all the trade and the fact that he continues to give of his time and energy to help put this industry on top.

To George W. Coleman of Coleman Novelty Co., Rockford, Ill., for his marvelous donations to the boys on the Alcan Highway and the pleasure that he has brought and is continuing to bring to the armed forces with his contributions.

BETTER BUSINESS BUREAU

Since the article which appeared in The Cash Box a few issues ago regarding the "deposit grabbers" there has arisen a demand for the creation of a Better Business Bureau in this industry as suggested by The Cash Box in that issue to help gain a higher and more ethical level for this business. This is most necessary to help pave the way for greater and smoother post-war expansion. Coinmen are eager and even anxious to help clean out all nefarious business practises. It is an accepted fact that this industry faces its grandest era. To make sure of this industry reaching the highest possible peak of development after the war a Better Business Bureau should be created now to keep this industry cleansed of questionable business actions which may hamper its future growth and development.

This demand that a Better Business Bureau be created, so that all in the trade can help eliminate any questionable business practise, is naturally winning the complete support of all in this industry. Coinmen feel that just as Better Business Bureaus exist in their own cities, that such organizations can be created to function in much the same fashion for this industry in each city thruout the country.

"The Coin Machines Merry-Go-Round"

There is no doubt that these will eventually be started. There is already proof that some of the leaders in this business have taken upon themselves to bring this need to the attention of all territories. The Better Business Bureaus that will be created will prove of great value to all the trade. They will mean much to each manufacturer, distributor, jobber and operator, and especially to the new people who will be entering into this industry in large numbers.

They will mean the most complete protection for all concerned with this business, as far as such men as "deposit grabbers" are concerned. Whereas The Cash Box has been constantly in receipt of wires, letters and phone calls to act as a bureau of such nature in clearing many deals, and has advised regarding financial and other business information, as well as arranged for shipments, etc., etc., thru its inner knowledge of this trade, such effort could be more easily and better handled by better Business Bureaus in each coin machines center.

MARKET REPORT

For some weeks now the coin machines market has shown greater action than in many past months. This past week tho, it turned about to a sort of jittery doubtfulness. The average coin machines man is again starting to cut down to the bone as far as his routes are concerned and because of this machines are again coming to market. Prices in some categories have shown definite drops. In others prices have held and in some cases have even gone up. The music machines field leads all action with arcade equipment a close second.

Appearance of new revamps has helped bring more action. These are getting good sales response. The oldest type pins are now being demanded and good prices are being paid for them even tho they are being purchased just for parts. Many such purchasers request that the glass, cabinets, legs, etc., not be shipped and no crating necessary.

The consoles field saw some of the better products such as Super Bells, Three Bells, Four Bells, and many others back on the market again. These are still obtaining very fine prices. Yet, in general, prices have somewhat fallen on even these, too. Consoles will continue popular. The few that are being sold help to create smaller and tighter operations. Console territories have opened quietly here and there where small quantities can be used. Action in the consoles field is again on the upgrade.

There is no let-up in the 1-Ball field. Demand continues very big. Some are being offered at extremely good prices. Demand so far exceeds the possible supply that prices in this category will remain high for sometime to come. Probably until the manufacture of new one-balls starts once again. There is no possible way at this time in which to completely satisfy the demand in this field. The numbers of one-balls manufactured, at the time the factories were producing them, were never in the quantity now being called for from all over the country.

The arcade equipment field continues to zoom on ahead. Some new revamps are being introduced to this field. The peek shows, bowling alleys, roll-down games, etc., are helping to keep this category going at top speed. This field will see even greater and speedier action as February wanes and March comes in. The climax to the speed action in this field will come with the opening of the seasonal arcades. Guns continue to be in greatest demand. Watch this field for some unique developments in the next few months.

Action in slots is somewhat jittery. The great many revamps appearing in this field have brought about unique buying action. Demand continues great but older equipment is left by the wayside and is only being used for revamp purposes. The demand here grows to the Spring season when even more locations are expected to open. The summer season usually finds slots at its limit in locations with the vacation spots taking a heavy share. Best action is in the newer type revamps with gold chroming, 2/5 and 3/5 pay action, knee action handles, etc., etc. Still demand for original equipment continues high. This field will see its best season this spring and summer is prediction of leaders.

Merchandising equipment is definitely in a let-down period. With cigarettes harder than ever to obtain many of these have lost sales action. Candy bar machines would be used in greatest quantity than ever were it possible to obtain a steady supply of merchandise. Bulk merchandisers also affected by the supply problem. With many ingenious substitutes being used this field is still carrying on. This is one field where great developments are expected. The drink vendors continue to show record business as do many other vendors located in war production areas and in war plants.

In general, the market can be stated to be rather jittery in all developments with buyers and sellers bought more cautious than ever. Belief is that warmer weather will loosen this stiffness and that action will be greater and speedier than ever before.

Girl Escapes Nazis

She escapes the terror of Nazi rule only because she is an American—safe in America, far from the fury of war.

She will remain free, because American men are fighting day and night, pounding the Fortress Europe, sacrificing their lives to destroy the curse of Nazism.

American fighters can do their bitter, bloody job only if we at home—safe in America, far from the fury of war—lend our support ungrudgingly.

Buy War Bonds. Buy the Bonds you can easily afford as a good investment. Then dig down again and buy Bonds until you know in your heart you are halfway square with the men who are fighting and falling in battle for you.

THE CONFIDENTIAL PRICE LISTS

AN EXCLUSIVE MERCHANDISING SERVICE FOR THE COIN MACHINES INDUSTRY
ISSUED EVERY WEEK BY: THE CASH BOX, 381 FOURTH AVE., NEW YORK 16, N.Y.

FOREWORD

Many times, wide differences appear in the high and low prices of certain equipment. Like any true reporter The Confidential Price Lists can only feature the market prices as they are quoted. The Confidential Price Lists act exactly the same as the market quotation board at the Stock Exchange—posting the prices exactly as they are quoted for each week, regardless of how much they may seem to be out of line. Some machine prices do not change for months. The Confidential Price Lists, rather than show no price for the week, retain the last known quotations for such equipment so that the subscriber at least has the last known quoted prices as a basis to work with. Prices continue to be very widely divergent these days. Someone on the West Coast may feel a certain machine worth \$150.00 whereas someone on the East Coast may think it worth but \$75.00. Of course, condition, serial, appearance, demand, territory, quantity, etc., must all be taken into consideration. The Confidential Price Lists report each quotation exactly as it is made and depend on the subscriber to make average price adjustment to fit the peculiarities of his own territory.

METHOD

The Confidential Price Lists are to be read as follows: First price listed is lowest price for the week; Second price listed is highest price for the week; Where only one price appears this should be considered lowest price.

CODE

CHECK THIS CODE CAREFULLY. BECOME ACQUAINTED WITH EACH ONE OF THE CODE NUMBERS AND WHAT THEY SIGNIFY. THESE CODE NUMBERS APPEAR IN FRONT OF THE NAME OF EACH MACHINE.

1. MEANS PRICE WENT UP.
2. MEANS PRICE WENT DOWN.
3. MEANS MACHINE JUST ADDED TO LIST.
4. MEANS PRICES WENT UP AND DOWN
SAME WEEK.
5. MEANS PRICES REMAINED SAME AS IN
PAST WEEK'S ISSUE.
6. MEANS NO PRICES QUOTED FOR
PAST TWO WEEKS.
7. MEANS NO PRICES QUOTED FOR
PAST THREE WEEKS.
8. MEANS NO PRICES QUOTED FOR
PAST FOUR WEEKS OR LONGER.

IMPORTANT

Machines underlined mean these were most active
in trading this past week.
