## WANTED

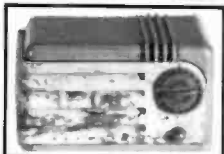

### AIR KING SKYSCRAPERS

PAYING **\$14,500.00+** for near mint condition red or blue  
**\$10,000.00+** for green, lavender or yellow  
**\$3000.00+** for black and **\$2000.00+** for white or brown  
**ALSO WANTED ANY COLOR-ANY CONDITION**  
 COLLECTOR PAYING TOO MUCH, CALL ME LAST

### TOM THUMB CATALIN RADIOS WANTED

paying **\$6,750.00+** for mint cond. red, green, orchid, blue  
**\$2500.00+** for any mint condition one  
**ALSO WANTED ANY COLOR-ANY CONDITION**

### DETROLA PEE WEE & SUPER PEE WEE WANTED

paying **\$600.00+** for mint cond. black, white  
**\$1,450.00+** for beate, gray, salt & pepper  
**\$2000.00+** for red, blue **\$3500.00+** for green or lavender  
**ALSO WANTED ANY COLOR-ANY CONDITION**

### WANTED ANY CATALIN RADIO

ADDISON 2 MAROON & YELLOW \$900.00, YELLOW & RED \$3,750.00  
 ARVIN 532 ANY COLOR \$2,500.00, BENDIX 576 GREEN & BLACK \$625.00  
 DeWALD A501, A502 BROWN \$375.00, YELLOW \$425.00, RED \$1,200.00  
 EMERSON AU 190 & BT 245 YELLOW \$1,300.00, GREEN \$2,500.00  
 DARA RED \$2,700.00, BLUE \$6,850.00, BRIGHT RED \$11,000.00  
**EPEY MIDGET, YOU NAME THE PRICE I WILL PAY IT!**  
 EMERSON BM258 YELLOW \$750, GREEN \$1,350, RED \$2,150, BLUE \$4,000  
 EMERSON 564 BLACK \$500.00, GREEN \$1,150.00, RED \$1,650.00  
 FADA L56, F55, 52, 5F50, 5F60, 136, 53X, YELLOW \$1,500.00, LT GREEN \$1,750.00  
 MAROON & YELLOW \$2,200.00, YELLOW & BLUE \$2,500.00, YELLOW & RED \$3,100.00  
**EMERALD GREEN & YELLOW \$7,000.00, BLUE & YELLOW \$7,000.00,**  
 FADA 115, 116 & 1000 ALL YELLOW \$700.00, MAROON & YELLOW \$950.00,  
 YELLOW & RED \$1,150.00, PEA GREEN \$1300.00, BLUE & YELLOW \$2,550.00  
**GAROD 6AU1 MAROON \$675.00, YELLOW & RED 1,350.00,**  
 RED & YELLOW \$1,450.00  
**MOTOROLA 50XC ALL YELLOW \$1,750, BROWN & TORT \$2,750.00,**  
 BROWN & TORT \$2,750.00, RED & YELLOW \$6,000.00,  
 GREEN & YELLOW \$6,250.00,  
**MOTOROLA 52 YELLOW & TORT \$1,500.00, MAROON & YELLOW \$1,850.00,**  
 GREEN & YELLOW \$2,900.00,  
**SONORA KM ANY COLOR \$1,600.00,**  
**SENTINEL 284 WAVY GRILL, YELLOW \$700.00, SAND 950.00,**  
 RED 1,450.00, BLUE 6,500.00  
**SPARTON CLOISSONNE ANY COLOR \$3,500.00 TO \$5,500.00,**  
 EMERSON 520 \$50.00

always buying any catalin or pre-war colored bakelite radios  
 We will buy one piece of the entire collection.

"watch out there's a new guy in town"

## Complete Riders Troubleshooter Manuals On A Single DVD Disc!

Tired of changing CD's? Tired of getting "that" schematic on your old radio where you can't read the values? REA has just released the first DVD-ROM publication at a break-through introductory price. REA created the first Riders Professional

CD-Series that is the ONLY database driven system ever created and is the "standard" that others are judged by. Now we introduce the Riders Standard Series DVD using Riders' indexes for finding "that" schematic that you need occasionally. Priced at a very low introductory price, every collector or restorer who repairs radios should own this DVD. Requires Windows on a PC to use it. It requires nothing to download as it has its own built in digital browser that allows viewing, magnification, rotation and printing to your own printer. This DVD holds almost 120,000 of the early radio models made from 1920 to 1954. A true price breakthrough yet with no sacrifice in quality. Introductory Offer - Limited Time - A professional produced product.

**Only \$ 150 + \$ 6 S&H (Sold only on DVD) -  
Introductory Price - Reg. Price \$ 199**

### Other CD-ROM Publications:

Riders Professional database driven 6-CD set - now only \$ 299 or \$ 59 per CD (4 volumes/CD) . . . . .  
Cunningham-Radiotron Hi-Rez CD \$ 85 . . . . .  
Sam's Photofact Sets 1-175 - 7 CD's, with Sets 1-25, 26-50, 51-75, 76-100, 101-125, 126-150 and 151-175. Only \$ 79 each CD-ROM (25 sets per CD)  
*All 7 Sam's CD's (1-175) - \$ 495.00* . . . . .  
Radiophile Vol. 1 - \$ 85 . . . . .  
Radiophile Vol. 2 - \$ 85 . . . . .

## ANTIQUE RADIO CLASSIFIED

Antique Radio Classified (ISSN:8750-7471) is published monthly, 12 times per year, by John V. Terrey, 498-A Cross Street, P.O. Box 2, Carlisle, MA 01741. Periodicals postage paid at Carlisle, MA, and additional mailing offices. Telephone: (866) 371-0512, 9:00 AM to 5:00 PM ET weekdays; machine answers phone at other times.

Annual subscription rates within the U.S. are \$39.49 by Periodicals mail and \$57.95 by First Class mail.

Annual foreign rates. By air: Canada - \$61.00; Mexico - \$67.00; Other foreign countries - \$105.00. Surface mail: Canada - \$51.00; Other foreign countries - \$58.00. (Surface delivery to countries other than Canada may take two or more months and cannot be guaranteed.)

Two-year subscriptions are twice these rates and receive an extra month. Sample issues are available free on request.

If A.R.C. inadvertently has infringed on a copyright, A.R.C. will pay an appropriate usage fee when notified.

POSTMASTER: Send address changes to Antique Radio Classified, P.O. Box 2, Carlisle, MA 01741.

Printed in U.S.A.

**PURPOSE.** Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

## STAFF:

**Publisher and Editor:** John V. Terrey  
**Assistant Publisher:** Cindie Bryan  
**Managing Editor:** Dorothy Schecter  
**Office Manager:** Pat Wedge  
**Advertising Manager:** Cindie Bryan  
**Issue Coordinator:** Pat Wedge  
**Publishing & Editorial Staff:** Ray Bintliff, Dave Crocker, Bobby Lyman  
**Founding Publisher/Editor:** Gary B. Schneider  
**Contributing Writers & Consultants:** Mike Adams, Richard L. Arnold, Richard Begbie, Ray Bintliff, Paul J. Bourbin, Norman Braithwaite, Dave Crocker, Dick Desjarlais, Alan Douglas, Richard Foster, Jim Kreuzer, Ron Ramirez, Gary Schneider, Daniel Schoo, Frank White, Walter Worth

**CONTACTING ANTIQUE RADIO CLASSIFIED.** All correspondence should be sent to:

A.R.C., P.O. Box 2, Carlisle, MA 01741.  
Only UPS, FedEx, etc. items to street address: 498-A Cross Street.  
Telephone: (866) 371-0512; Fax: (978) 371-7129  
E-mail: [ARC@antiqueradio.com](mailto:ARC@antiqueradio.com)

Please, no classified ads by telephone, thanks.  
Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SU# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

## EDITOR'S COMMENTS

"Then and Now" — these are ongoing themes for radio collectors. Our articles this month reflect interests ranging from the early days of broadcast radio and touch upon almost every decade to the 1960s. The "then" of our hobby guarantees endless fascination. But the "now" seems to be taking on greater emphasis in the proliferation of auctions, as our reports indicate.

Once again, Estes Auctions takes center stage on the auction circuit. What is impressive is not just the number of auctions, but also the quality of what is being offered. More and more significant items are showing up on the block and commanding high prices. Why should this be so?

Perhaps the whole Internet exposure to eBay has given collectors more confidence in the auction process. Or perhaps, in contrast to eBay, collectors now fully realize the pleasure of being able to see and touch items before bidding at a live auction. Whatever the reason, Estes is offering many important collections, not just estates, and it would seem that radio auctions have entered a whole new vibrant phase that will enrich many collections.

This particular Estes Auction offered something for everyone, including typical battery sets and cathedrals, as well as audio and Ham equipment. But also noteworthy was a large transistor novelty collection and oddities like a child's record player mounted in a drum and a toy TV service and repair truck.

We commend our reporter Ray Chase for his careful attention to detail, and also for his recruitment of a second reporter to handle the separate transistor radio auction — none other than his wife Edith. As many of us know, Edith is truly a supportive "radio wife," and you will note that she too has a byline on this report as our way of saying thanks.

Though high-end items have appeared more commonly in today's auctions, Phil MacArthur's All-American Five collection, averaging \$20 apiece, represents an eminently affordable end of the collectible spectrum. Phil's good news is that what was affordable in the 1960s remains so today, and he assures us that these colorful little sets are great attention getters.

Wally Worth gives "affordable" a new twist as a home-brew guy who likes to build all kinds of items. One specialty is reproductions of loop antennas, and his article includes several of his creations, as well as a few originals. Some folks liken loop antennas to the dream catchers of Native American lore, which are reputed to filter out bad dreams. Loop antennas must have been a dream come true for those looking for good reception in the 1920s.

From the 1960s to the 1920s and now to William Garner's memories of World War II in the 1940s. William's long military career covers radio opera-

tions on some equipment appearing in past A.R.C. articles. He also describes the use of pieces of cloth on the ground to communicate codes to aircraft.

It's gratifying when past A.R.C. articles prompt new ones. Like William Garner, Doug Houston was inspired by another previous article to write about his favorite radio topic — RCA and the Victor Talking Machine Co. Doug adds interesting views on RCA's marketing policies and photograph sound quality to Paul Bourbin's article in the July 2003 A.R.C. He also conveys the true collector's passion for a particular company and its products.

Another follow-up is from Doug Fox — in this case, a follow-up to his own June 2003 article about his 3-tube, AC-powered "Regen." Several readers helped Doug to identify his Meissner set and provided a schematic and diagram. This is a real success story, a study in collaboration.

Jerry Wieland makes our round of the decades complete with his unusual 1950s Motorola portable. Jerry could easily have passed this one up, but he was glad he didn't after finding that it used several subminiature tubes. Why Motorola would market such a design remains a mystery.

Another 1950s Motorola portable appears in *Photo Review*, along with a wide variety of sets from the 1920s onward and including a British "Peoples Set."

**A.R.C. Benefits.** Be sure to take advantage of A.R.C. benefits: a toll-free number (866) 371-0512; the Web: [www.antiqueradio.com](http://www.antiqueradio.com); Discover, Visa, American Express, and MasterCard accepted; books shipped free in the U.S. by book rate; and to current subscribers, a ten percent discount on all book orders.

**Coming Radio Events.** As winter progresses, the number of radio events inches up from January's 34 to February's 39. They include 27 meetings, nine swap meets, two auctions, and one workshop. Two major events of the month are our own Greater Boston Antique Radio Club's Radio XXXV in Westford, Mass., where 800 or more usually attend, and the Houston Vintage Radio Association's 25th anniversary celebration. These are certainly highlights of the radio season, so be sure to get to at least one of them.

Happy Collecting!

John V. Terrey, Editor

## ON THE COVER

Our cover photo by reporter Ray Chase captures the sheer magnitude of what is offered at an Estes Auction. If you haven't attended one of these auctions, you're missing the sensation of being overwhelmed when you walk in — radios everywhere, from floor to table after table. Are they suspended from the ceiling? You owe yourself this experience.

# WITH THE COLLECTORS

## The Last Stand for Tube Radio

BY PHIL MACARTHUR

*Tube radios are ancient history, but that's exactly why they continue to fascinate preservers of radio history. Phil MacArthur pursues that noble cause, despite the dismay of recipients of his "gifts." (Editor)*

It's the summer of 1963 and the last few tube Trans-Oceanics are moving off the dealers' shelves. Transistors are appearing in several television applications, IBM has released at least two solid-state computers, and every teenager has an annoying little transistor radio in his or her pocket.

The colossal battle between the tube and the transistor is essentially over. (The vacuum tube will, happily, be with us indefinitely, thanks to high-end audio, musicians, and collectors.) Tubes would persist in television a bit longer, but the long day of tube radio, begun in the early 1920s with Federal, Kennedy and the gang, is finally done.

But, a few minutes before midnight, unusually large orders hit the doors of Toshiba, Futaba and Hitachi for five very familiar tube types — yep, the 12BE6, 12BA6, 12AV6, 35W4, and the 50C5. The last shout for tube radio came from Japan in the form of a flood of very colorful, midget (about 100 cubic inches) AM radios bearing all manner of British nameplates — Wales, Saxony, Essex, Windsor, Viscount, Kent.

Some names — Hi-Fi Master, Fine Tone and Supreme — would promise qualities impossible for these little guys with their 3-inch speakers to

Figure 2. The *Finetone* bears a strong resemblance to the *Sorrento*.

deliver. Other names trying to look "Anglo" were Montclair, Starlite, Dorset, Linton, Impala, Amico, Jupiter, Classic, and just one actual Far Eastern name — "Sanshin." Figures 1 through 8 show some examples of these radios.

This last invasion of tube radios appears in Rexall, Woolworth, Dollar, and Five and Dime stores all over the country, and they sell for \$5.95 or so, impossibly cheap. Some show up as kits, retailed by Olsen or Lafayette.

There is a welcome return of the Art Deco touch in the cases and a wonderful variety of color: red, pink, beige, turquoise, yellow, blue, green, mauve, taupe, ivory and more. These de-

Figure 1. This radio branded the *Sorrento* shares the same chassis as other brands. Note the Civil Defense markings on the tuning scale.

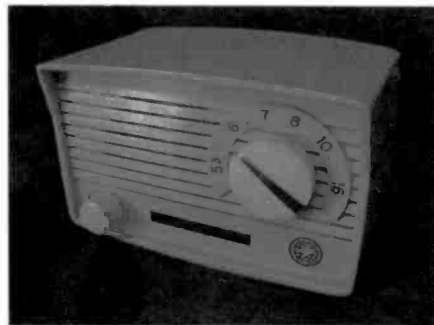

Figure 3. The *Monarch Hi-Fi Master* is an example of other radios from this series. The volume control is positioned at the far left rather than centered under the tuning knob.

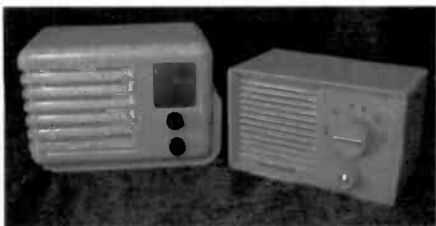

Figure 4. Two other examples of cabinet styling and knob placement are the "Mirror Midget," left, and the "Classic."

signs are the last of their type to be seen, as the whole world shifts over to a clean, black, utilitarian design.

These inexpensive sets had several nice extras: most have tube clamps, all have heat shields over the 50C5 and 35W4, most have solid brass nameplates, and all have backs bolted to the chassis or case or both. All have schematics glued to the bottom, although, if you've seen one "All American Five" circuit, you've seen them all.

#### ATTENTION-GETTERS IN 2004

We move now to 2004, a time when most of us have all the Catalans we can afford, all the consoles that fit, and that very last battery set we needed. Suddenly, here are all these lovely little colorful plastic radios celebrating their 40th birthday and looking for a home. The 30 or so I've found at radio meets and on e-Bay have cost me an average of \$20, and they get more attention from visitors than any other genre I display.

I keep the AC cords wrapped up inside the back because, let's face it, no one really wants to hear the "fine tone" or "hi-fi mastery" these sets produce. Still, they're no worse than the Federal 59 in the next room. I've even used some as gifts; my friends really are surprised to get a radio that has to "warm up" and "only gets AM." It's usually just a month or so until they're speaking to me again.

Figure 5. The "Dorset" is the only model to have its tuning scale on the knob rather than on the cabinet.

Figure 6. The "Amico" shares the same chassis as several other models.

Figure 7. The "Starlite" differs only in cabinet styling and knob type.

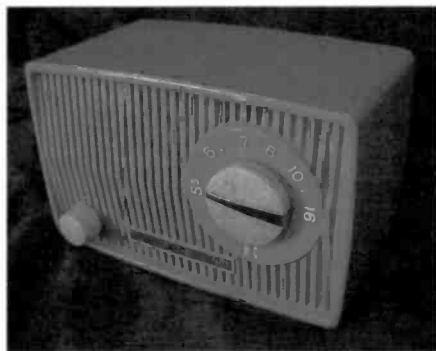

Figure 8. The "Saxony" model bears a strong resemblance to the "Classic" shown in Figure 4.

(Phil MacArthur, 701 Spanish Maine Dr., #71, Summerland Key, FL 33042)

Phil MacArthur teaches mathematics at the Florida Keys Community College in Key West, Florida, and has collected radios since the 1950s. Please e-mail comments to [keywestmac@cs.com](mailto:keywestmac@cs.com)

## Loop Antennas

BY WALLY WORTH

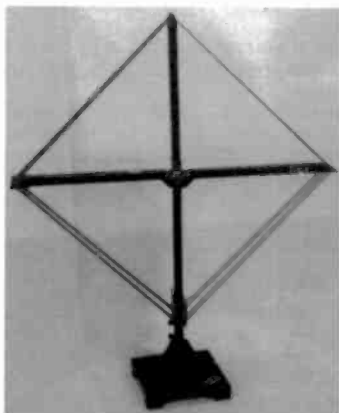

*If you want information on loop antennas, Wally Worth is your man. Specimens of Wally's workmanship are always a center of attention at his table at New England shows. (Editor)*

Loop antennas were first used in the late teens and early 1920s. They soon caught on as a replacement for the long and high outdoor antennas used up to that time. Of course, the outside antennas had to be long (100 feet) and high (about 30 feet) to be useful on the crystal sets and 1-tube radios of the time.

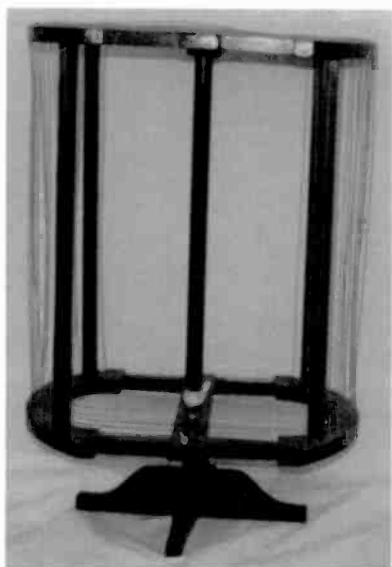

The first loop antennas were advertised in the early and mid-1920s. They were soon used by many listeners because of their good reception and ease of use. The arrival of the superheterodynes in the later 1920s also spurred the further use of the loops. These superhets mostly used a doublet antenna, and a loop could be easily substituted.

### SIZES AND SHAPES

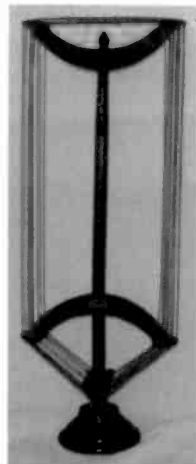

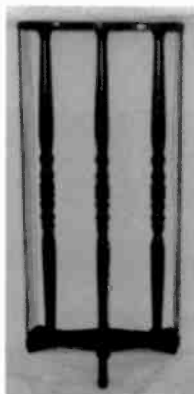

The early loops were quite large, as the manufacturers thought this was the only way to get the

*The RCA AG-1380 was manufactured in the more familiar diamond shape. This repro is shown minus its rare Model UC-1820 Faradon tuning condenser mounted on the base.*

*This is a repro of the Radiola AG-814, one of the larger loops that RCA manufactured.*

*Repros of two of the taller type of loop antennas are shown here. At left is the familiar style that fitted into the top of the 1925 RCA Radiola 25 receiver. At right is the self-standing, bank-wound, Fiat Type "C" made by Radio Appliance Corp.*

reception to equal the outside antennas. Some were 36" long on each side of the diamond shape.

Later, smaller and smaller loops were designed and proved themselves capable. These smaller loops also appealed to those who further tuned the incoming signals by rotating the loop to receive the strongest signal.

The shape of most of the loops in the early 1920s was a diamond shape, though the square and rectangular types were also made. In 1926, loops used a small rotating winding inside the larger winding to further tune, much like the radio variometer.

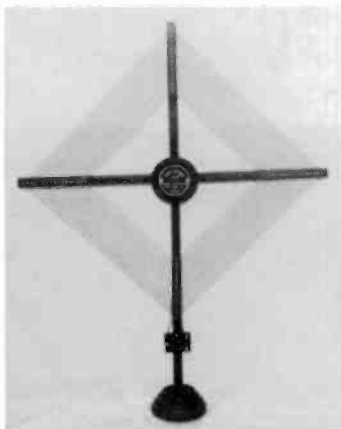

An early author, M.L. Mukleman, had an article on loop antennas vs. the outside antenna in *Radio Review* magazine of September 1926, page 100.

Shown here are some of the loops in my collection. All are reproductions except for the Duo-Spiral, Portaloop and Portena shown on this page. Note that some manufacturers made the loops in different sizes as they progressed in time. This

was especially true of the RCA-Radiola line, like the Model AG1380 that shrank from 36" on a side in 1923 to 24" and even 18" as time went by. This line was followed by Federal types with "suggested" sides of 96" to 15" on a side. Others of the later types also were collapsible to minimize size for shipping and delivery.

*(Walter Worth, 2 W. Elm Ave., Wollaston, MA 02170)*

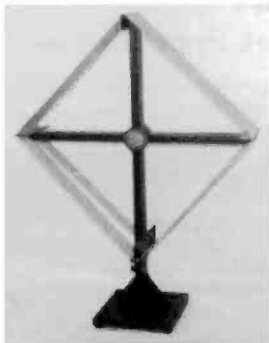

*At age fifteen, Wally Worth began saving his paper route money to buy parts for 1-tube sets. Then in 1986, fifty years later, he started to collect anything that needed cabinet work. His diverse collecting tastes include everything from crystal sets to novelty radios. He also collects early tubes and both horn and cone speakers.*

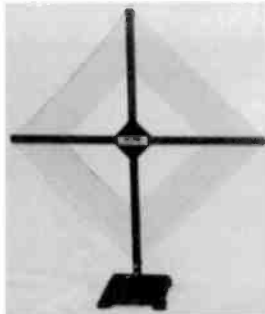

*This original Duo-Spiral loop antenna was made by Radio Units Company. Some units had a dial with a long handle on the base for tuning.*

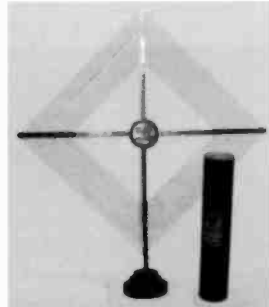

*This original loop antenna with a square format was called the "Portaloop." It was manufactured by Eagle Radio Company of Newark, New Jersey, maker of a complete line of radio receivers.*

# VINTAGE MILITARY EQUIPMENT

## The SCR-161 and Other WWII Experiences

BY WILLIAM GARNER

*Certain articles or photos send different readers down memory lane. For many collectors, military sets represent defining moments in their personal histories. William Garner tells us about some of his World War II experiences. (Editor)*

Over the years, I have enjoyed seeing pictures of old military radio sets in A.R.C. I worked on two of those sets — the BC-148 and the SCR-245. Though some of this may not be accurate, as I am 81 years old, I thought you might like to have some first-hand information on these sets.

I enlisted in the Army in June 1940 in the 83rd horse drawn Battalion. I started as a field wire lineman, switchboard operator. In 1942, I went to radio operator school. In addition to Morse code, we studied semaphore flags, blinkers, and ground-to-air panels used to signal observation aircraft. These panels, which were about 18 inches wide and about 8 feet long, were white on one side and orange on the other side. We also studied pigeons. At that time the Fort Benning Signal Corps still had mobile pigeon lofts, and they would send out small boxes with four birds, two on each side. A small door opened through which you could attach a message to the leg and then open the front door and release without handling the bird.

### THE SCR-161

The first radio I operated was like the one pictured in the October 2000 issue of ARC, the BC-148. We called this set the SCR-161. A battery-operated receiver-transmitter was powered by a hand-cranked generator. I think it was a GN-42, which was on a tripod and had a metal bicycle seat on one leg. The handles were spaced like bicycle pedals.

The set had no side tone. All sending was in the blind, and if you made too many mistakes, the generator operator (G-Man) would hit you in the back with one of the handles. If you worked 10 miles, you were doing well. I think it worked at about 3.5 Mc. One problem I remember is that someone would look to see what was being sent and put his head through the antenna loop shutting off the transmitter.

The Infantry had the same basic set called the SCR-171. The only difference was that this set used a long wire antenna with a ground counterpoise that was an insulated wire on the ground under the antenna.

### OTHER EQUIPMENT

After the SCR-161, we got the SCR-245. It used the BC-312 receiver and about a 25-watt transmitter mounted in the old Dodge command car. It had voice and CW. When sending code on the move, we used

*"Willie & Joe" in Germany in 1945. In this old and faded photo, author William Garner is the one on the right.*

## Z-Signals and Radio Net Procedures

We changed from Z signals (a 3-letter code group in which the first letter was "Z") in late 1941 or 1942 and started to use Q signals. We also changed our radio net operating procedure. I think it was a British procedure where the net control station had no call sign. When a station called, the net control station would answer using the same call sign. We used this procedure during World War II.

*Summer of 1941 – From my notebook used in Radio Operator School.*

a Morse key mounted on a steel band placed on the right side of the right leg.

In 1942, our artillery outfit was changed to Company A, 654th Tank Destroyer Battalion. The Tank Destroyer was like a tank except it had open turrets, bigger guns, and better armor. We had 12 per company.

We got our equipment in the spring of 1943. We had M-10 tank destroyers, and M-8 and M-20 armored cars. The SCR-608 radio was mounted in the M-20 armored cars. One receiver was used to work down to the Tank Destroyers; the other receiver worked up to Battalion H.Q. The ten push buttons were easy to pretune, and the set was very reliable. It was broadband FM, covering from 27.0 to 38.9 Mc.

All other vehicles in the company had the SCR-610 made by the Galvin Radio Co. This was a two-channel set, about two watts. We had about 16 or 18 of them, but they were more trouble to tune and not as reliable as the 608. The most trouble we had was broken headsets and microphone jacks. They would get stepped on and hit by shell cases.

An odd thing happened on maneuvers in Tennessee in 1943. We were tuning a receiver at the top of the band in the 608 receiver and heard music. We had someone pull the whip antenna down to

horizontal and walk around the vehicle. Using the trimmer, we could hear a commercial FM from New England.

My unit landed on Omaha Beach between D-Day and the first of July. We were attached to the 35th Infantry Division, 3rd Army. After the Battle of the Bulge, we were transferred to the 9th Army.

#### MILITARY CAREER

I reenlisted in the AAF/USAF in June 1946. I was in Airways and Communications. We did all the long-range communication from overseas bases — Control, Nav Aids, Teletype, etc. They were short of radio operators at the time, so I operated for about six months and then went back to maintenance. I worked on about everything we had, except Ground Approach Radar. I later went into Aircraft Control and Warning and worked on long-range radar.

I was commissioned as a Warrant Officer in 1956. The work was hard because I had had only two years of high school. I served as Communications Officer and Radar Maintenance Officer until I retired in 1978.

*(William Garner, 6950 Driskell Circle, Cumming, GA 30041)*

Above are panel arrangements used for 2-digit codes.

*During World War II in Europe, these panels, which were about 18 inches wide and 8 feet long, were used by ground troops to communicate with aircraft. They were, as I recall, white on one side and orange on the other, and were used with a two-digit code. For security, the panel colors were changed daily to conform with the "color of the day."*

# WITH THE COLLECTORS

## Motorola 53LC3 The Missing Link Portable

BY JEROME WIELAND

*Sometimes a seemingly insignificant, but large set is worth a second look. And to find that it contains subminiature tubes poses a mystery too intriguing to pass up. (Editor)*

I usually don't give portables a second glance, particularly if they are plastic. However, this one, shown in Figure 1, caught my eye because it seemed to have two dials. When I looked closer, one dial was a clock. Rather unusual I thought. It was also a Motorola which raised my interest more since that's my employer. Besides being rather beat up and dirty, it was also rather large, heavy, and somewhat ugly.

I opened the back to see if it had batteries that might account for the weight. It did have a 67½-volt pack that had leaked and corroded, a battery retaining clip, and a battery connector. The chassis was missing all its mounting screws (not a good sign). I then noticed the speaker was missing the magnet and voice coil. Broken off, I speculated.

### TUBE MYSTERY

I saw only one tube in the chassis. Did someone take the others? Hold on. I don't see any more tube sockets. What are these glass vials? I wiggled one gently and out it came. It looked like a thin, flat vacuum tube with wires in a row for pins. It had a Motorola

Figure 1. The "Missing Link Portable," a Motorola Model 53LC3. The set is unusual because of its tube complement and mechanical clock.

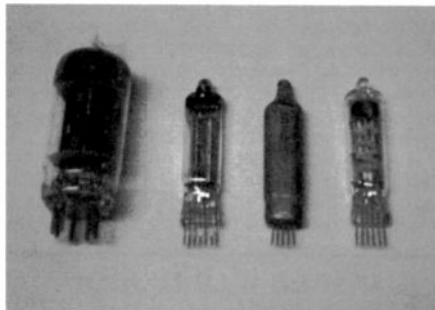

Figure 2. The radio's tubes, from left to right: a miniature 3S4 and three subminiatures — a 1V6, a 1AH4 and a 1AJ5.

logo and ID number. There were two other such tubes, one completely covered with what appeared to be a conductive coating, probably for shielding. I was in a hurry, so I left without making an offer on what I considered an undesirable radio.

At home I consulted my RCA tube manuals and could find no mention of any such tubes. My tube tester did not have a socket that would accept such a pin configuration. I began to wonder why the Motorola designers would use such a compact tube in such a large portable. The more I thought about the tubes, the more they reminded me of early transistors with in-line wire pins. I thought of Darwin and evolution. Visions of these glass vial tubes morphing into transistors danced in my head. Had I found a missing link?

The next week I returned to the antique shop and bought the radio for ten dollars expecting some of the unusual tubes to be dead and probably difficult or impossible to replace. At home, the first order of business was cleaning. The battery terminals were so corroded that the connector could not be removed. The terminal separated from the battery pack. The D-cell spring terminals were also very corroded.

The radio model number 53LC3 indicates a 1953 production year. The tube location diagram listed the following tube types: 1AJ5, 1V6, 1AH4, 3S4. Only the 3S4 audio output tube is a conventional size tube. The "vials" have 5 to 7 terminals. The tubes are shown in

Figure 3. The radio's compact speaker is designed with the permanent magnet and voice coil mounted in front of the speaker cone.

Figure 2. All the in-line sockets are subminiature tubes with 1.5-volt filaments. The 1AJ5 is a 6-lead sharp cutoff pentode and diode. The 1V6 is a 7-lead triode-pentode converter and the 1AH4 is a 5-lead RF pentode.

The tubes and sockets are marked with a paint dot to indicate to which side of the socket the tube should be offset. It would be easy to insert the tubes incorrectly if one ignores these dots. This caution is noted on the tube location diagram on the back cover.

The chassis was easily removed since all the mounting screws were missing. The clock had no electrical connection and was a mechanical model that started working when wound. I then removed the speaker, still thinking it was damaged. When it was loose, I noticed a metal basket in front of the cone. As Figure 3 shows, the magnet was mounted to this basket and the voice coil was on the front of the cone! I have never seen this speaker design before. This configuration saves about an inch in speaker depth. Since the 67½-volt battery is mounted behind the speaker, I suppose this inch savings helped reduce the thickness of the radio, but it is still about three inches thick.

Before applying power, I tested the conventional 3S4 tube and found it to be good. An ohmmeter check of the vial tubes showed continuity between an outside terminal and a middle one on each tube. This, I assumed, was the filament. The chassis components

Figure 4. An interior view of the radio with what first appeared to be a damaged speaker.

and wiring appeared to be in good condition, so I slowly applied power through a Variac. The radio sprang to life and performed well. Alignment was very close to optimal. The internal ferrite loopstick antenna provides good AM reception. A thorough case cleaning with soapy water brought the radio to respectable condition. Figure 4 shows the radio with the housing open.

It is a mystery to me why the Motorola designers used subminiature tubes and a special speaker in a portable that is not light or small. It would be interesting to know how many other manufacturers used these small tubes, and if they took better advantage of their size than Motorola did. Since transistors began appearing in portables in only a few more years, the product life of these small tubes must have been limited.

*(Jerry Wieland, 780 Charleston Ln. Hoffman Estates, IL 60195. E-mail: jeromewieland@comcast.net)*

*Jerry Wieland is an electrical engineer working in cellular phone development at Motorola. His interest in old radios began at age 12 when he started listening to shortwave broadcasts on a 1930s Silvertone console.*

## Victor Talking Machine Follow-Up

BY DOUG HOUSTON

*One interesting article leads to another. The topic of RCA is obviously irresistible to Doug Houston, and we're happy to share his views in a follow-up to Paul Bourbin's article in the July 2003 A.R.C. (Editor)*

The article on RCA in the July 2003 A.R.C. by Paul Bourbin stimulated a few comments that I

offer here. Since I'm notorious for my interest in RCA and the Victor Talking Machine Co. (VTM-Co), there are some things that I'd like to talk about here.

One important part of VTMCo that Paul didn't mention was Victor's vast dealer organization. In addition to the dealer system RCA had for radio,

*(Continued on following page)*

(Victor Follow-Up Continued)

Victor's dealer system would be (and was) a valuable asset to RCA's sales. It's also important to emphasize that RCA had manufactured nothing prior to acquiring Victor.

Sarnoff wanted Victor so badly, he could taste it. All RCA's apparatus had been made by GE and Westinghouse, and Sarnoff realized that dependency on other manufacturers was not healthy business policy. In the original sales agreements, RCA didn't get the manufacturing component, and following his vacation to Europe, Sarnoff became livid, and had the agreement changed to give him Victor's manufacturing complex. One important item here was that RCA had previously depended on many cabinet suppliers for its cabinets. Victor's factory made all of Victor's cabinets, and would now do so for RCA products.

Part of the events of the new electrical recording introduced in 1925 was the increase of record and phonograph sales by Victor. At the time of RCA's bagging Victor, the sales of Victor radio-phonograph combinations and straight phonographs were strong. The electronics were supplied by RCA to Victor and to Brunswick. Victor had offered phono combinations using RCA Radiolas ranging from the Radiola 17 TRF chassis to the Radiola 64 Superheterodyne.

### SOUND QUALITY

The commentary that the early Electrolas didn't have the sound of the Orthophonic Victor phonographs is right out of Oliver Read and Walter Welch, particularly Welch! That duet, coauthors of a book titled *From Tinfoil to Stereo*, had a strong fixation against electrical phonographs. It's unfortunate that Read and Welch are quoted as authorities as much as they are. Their statement is badly defective.

Read was editor of Radio and Television News, and displayed some rational thinking. Welch had an intense bias toward Edison and, of course, outside horn phonographs as well. He is often quoted as saying that the early Victor Electrolas (electrical reproducing phonographs) had little or no performance advantage over the early acoustic Victor Orthophonic machines. They certainly did. While partially true for the very earliest Victor models with cone magnetic speakers or magnetic drivers for the Orthophonic horns, the Electrolas with the RCA 104 and 106 dynamic speakers far out-performed the Orthophonic Victrolas in power output, as well as in frequency range and low distortion, in that day.

For those skeptics who adhere to Welch, I invite any of them for a listening session to my Victor 9-18, 9-54, 12-15, or Brunswick P11. Even the Cone Magnetic Victor Hyperion sounds respectable, though being short on bass output. Oh, and I do have a Credenza and a Borgia 1 as well. I often comment that, while playing the Credenza, you tend to forget that it's not an electric player! But, there is no doubt when you hear an Electrola with the cone Dynamic speaker.

### WHY THE PHONOGRAPH BUSINESS?

Note that RCA never made an electric radio-phonograph prior to acquisition of Victor. In RCA's 1929 line, the handsome Radiola 67 appeared along with Victor's RE45-75 phono combinations. Previously, the phonograph business was Victor and Brunswick's department. Paul Bourbin speculated in his article that RCA wanted to shut out phonograph production. I find that hard to imagine for the following reason:

Consider that RCA's newly acquired VTMCo sold about half the records in the industry. RCA needed to continue building equipment to play them. Records were still a good money-maker, and RCA had also secured Victor's record pressing plant. I feel that RCA felt good about continuing in the phonograph business. The last (acoustical) Orthophonic phonograph was offered in 1928. From then on, all Victor phonographs, except suitcase portables, were electronic. Phonographs brought in good money until the Depression put the brakes on the entire business world.

### RECORD CHANGERS

It's sort of amusing, but RCA (wisely) didn't continue building Victor's record changers. Victor built a reasonably decent changer in 1927, except for the horrible pot metal die castings used in them. The 1928 changer that followed was a mournful disaster that Victor never could get to work reliably. Note also that the 1929 Victor and RCA lines had no changers. Other companies, such as Spartan and Capehart, did have changers, but poor Victor had proven that it did not have the ability to make a good record changer.

This fact was reaffirmed with the swinging magazine changer of 1931-33 in the "RAE" models. The changer could change only 10-inch records, in spite of the fact that Victor (now RCA) was the biggest producer of recorded classical music, most of it on 12-inch records! Had Rube Goldberg been retained as a design consultant for Victor, the company might have made a successful record changer! In those years, RCA somewhat quietly sold a phono combination, using a Capehart drop changer that would play both 10- and 12-inch records.

There are few things that spark my interest more than tales about RCA and its products. A large percentage of my collection consists of Victor and RCA creations. I can condemn many of RCA's business practices, for its ruthless and monopolistic behavior, but the products of this corporation hold a magnetic attraction for me. I certainly enjoyed Paul Bourbon's article. I'd like to see more like it.

*(Doug Houston, a mechanical engineer, has been collecting radios since the age of 14, when he worked as an apprentice for a radio repair shop. His collection, numbering 500-plus items, ranges from crystal sets to transistor radios, with emphasis on grandiose creations and high stature phono combinations.)*

# RESTORATION TOPICS

## More on the 3-Tube AC-Powered "Regen"

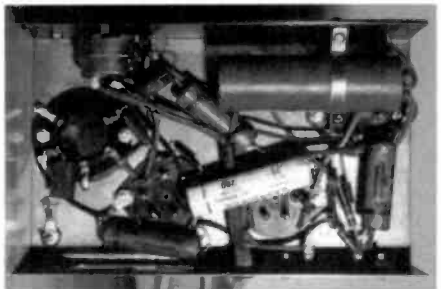

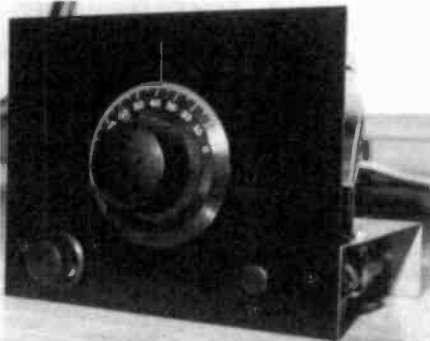

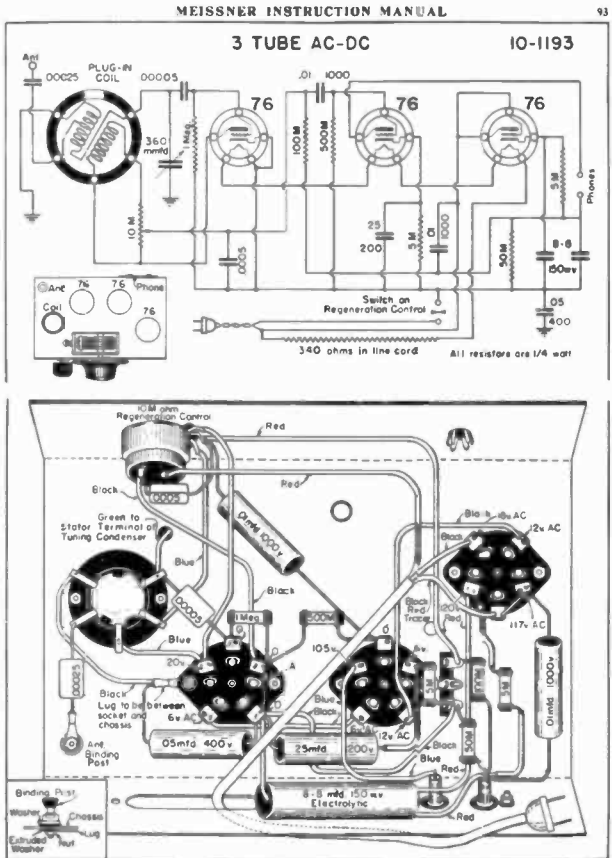

BY DOUGLAS D. FOX

*Communication through A.R.C. definitely pays off. Doug Fox's June article has led to considerably more information from no fewer than seven readers, and that's what we like to think A.R.C. is all about. (Editor)*

Thanks to a number of helpful A.R.C. readers, I am able to follow up my "A 3-Tube AC-Powered "Regen" article in the June 2003 issue with more information. I have learned that the radio is actually a Meissner 10-1193 "Three-Tube AC-DC Midget Receiver" manufactured by the Meissner Manufacturing Co. of Mt. Carmel, Illinois. It is a radio kit that was sold by Allied Radio, Lafayette Radio, World Radio Laboratories, and other dealers in the early 1940s. The design suggests that it may have been manufactured and sold by Meissner as early as 1937.

The schematic and wiring diagrams of the Meissner 10-1193 shown here are from the 1943 edition of the Meissner "How to Build" instruction manual. Also shown are the front and bottom view from my June 2003 article. My thanks to A.R.C. readers Tobie, Hyman, Bradish, Beam, Pennington, Hockman, and Ryan for the information, comments, and interest.

*(Douglas D. Fox, 603 S. 12th Ave., St. Charles, IL 60174)*

## PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

**PHILCO MODEL 444** – This Bakelite cathedral radio was manufactured in the United Kingdom in 1936. Called "The Peoples Set," it is a 4-tube superhet that tunes medium and long wave bands. It was a low-cost set selling for \$25 (U.S.). (*Jim Taylor – Bournemouth, England*)

**AIRLINE MODEL 04BR514** – This stylized Deco radio, housed in a painted Bakelite cabinet, was sold in 1940 by the Montgomery Ward Company of Chicago, Illinois. The chassis has 5 tubes and 5 push buttons. (*Clark Trissell – Lincoln, NB*)

**MOTOROLA RANGER 700** – This AC/DC/battery-operated portable has a rotatable loop antenna built into the handle. It features lots of chrome trim. (*Ray Chase – Plainfield, NJ*)

**CLAPP-EASTHAM TYPE HRA** – This 1-stage amplifier was made for use with the Clapp-Eastham Type HRD detector panel set. It was manufactured in 1921 by the Clapp-Eastham Company of Cambridge, Mass. (*Wally Worth – Wollaston, MA*)

---

## PHOTO REVIEW

---

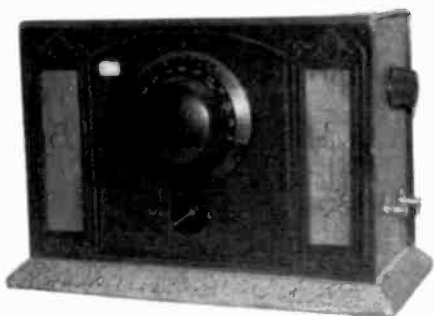

**WIRELESS SPECIALTY APPARATUS IP-503** – This long-wave unit is used with the IP-500 or IP-501 receivers to extend their tuning range for long-wave reception. (Dave Crocker – Mashpee, MA)

---

**SIGNAL CORPS I-166 VOLT-OHMETER** – This volt-ohmmeter was manufactured in 1944. It requires a 4 ½-volt battery for operation. It is rated at 1,000 ohms per volts, DC. (Louis L. D'Antuono – Brooklyn, NY)

---

**VIKING MODEL 599** – This 5-tube radio was manufactured by the Viking Radio Laboratories of Chicago, Illinois, which was part of Ozarka Radio Manufacturers. In 1926, this set sold for \$25 without tubes or speaker. The cabinet is made of embossed leatherette over heavy fiberboard. (Wally Worth – Wollaston, MA)

---

**EDISON BABY GRAND** – A seldom seen set, this early battery receiver, manufactured by the Edison Corp. in Chicago, Ill., uses four Type UV-199 tubes. (Ray Chase – Plainfield, NJ)

---

# AUCTION REPORT

## Estes Auction Burbank, Ohio - July 26, 2003

REPORTED BY RAY AND EDITH CHASE

The July 26th Estes Auction at the Auction Expo Center in Burbank, Ohio, sure had something for everybody. The auction hall was packed to overflowing with items for this large sale. Included were a Bulova collection, many Ham and hi-fi items, TV sets, transistor radios along with a large selection of table radios, the usual tube lots and a large batch of parts and test equipment.

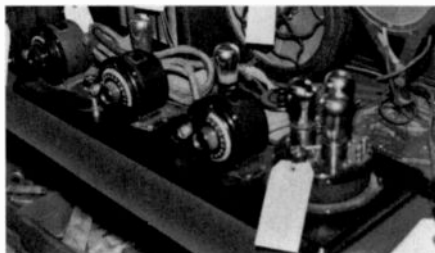

Because of the very large number of novelty transistor radios to be sold, a separate auction to deal with these was held off to one side of the hall. As a result, I drafted my wife Edith to record this part of the sale while I continued with the main auction. She had not done this before, but she handled it very well for her first try at being an auction recorder. There were more novelty sets than are listed, as many did not draw an opening bid of \$5 and were passed up to be offered at a future auction.

After the novelty radios were sold, the separate auction still continued with many of the parts and test equipment lots, which Edith was unable to record. Unfortunately, there were some unbuild Heathkits in with the parts lots that were not recorded. This auction was also heavy in regular pocket transistors in addition to the Bulova collection, but many were sold as "choice" from bulk lots. This process involved multiple rounds of selling which are difficult to keep track of. The result is that quite a few of these sales are not listed.

### MAIN AUCTION

The size of the main auction may have caused it to go past 6:00 P.M., and our travel plans did not allow us to stay for the last hour. Consequently, many of the later lots were also not noted. There

**A warning:** Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

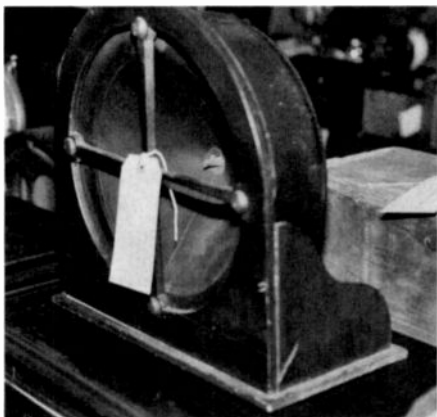

*This Atwater Kent Model 10 breadboard, 3550, was the auction's top-dollar item at \$950.*

were no "high flyer items" at this sale, but there was plenty for the average collector and many vehicles were filled at the end of the day. The most expensive radio was an Atwater Kent breadboard selling at \$950. The total auction proceeds were over \$34,000, not counting the 5 percent buyer's premium which is charged at this location and is not included in the below listed sale results. Prices are rounded down to the dollar.

e=excellent, vg=very good, g=good, f=fair, p-poor, wk=works, nwk=not working, NT=no tubes, WT=with tubes, PB=push buttons, gf=good fil, N.I.B.=new in box, BB=brass-based, TT=tipped

# A.R.C. RATES & POLICIES

**GUARANTEE.** You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

**PAYMENT.** Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

**FAX & E-MAIL PROCEDURES/PAYMENT.** Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. **Do not** send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

**CHANGE OF ADDRESS.** Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

**SUBMISSION OF MATERIAL.** Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

**PUBLISHING RIGHTS.** Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

**MAILING OF ISSUES.** U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

**ETHICS.** No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

**DISCLAIMER.** The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

## DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

*The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.*

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/8-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed (size in magazine)		Cost for 1-month	Cost for 3-months	Cost for 6-months	Cost for 12-months	One Time to make up Ad

† For 6 and 12 month ads, no ad make-up charge if no change is made to ad for entire run.

# A.R.C. RATES & POLICIES

## CLASSIFIED ADS • DETAILS AND RATES

**ONE FREE 20-WORD AD** for subscribers in each issue; additional words are 29¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

**Faxed & e-mailed ads:** Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive two months) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital i and the small L.) Also: 0, O, o, Q and D; r and n; 6, b and G; V, U, u, v and Y; A and R; S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets].

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights or opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

### CLASSIFIED AD DETAILS

**Deadline: NOON ET— 10th of the month!**

Classified ads must have a standard heading such as **WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE.** This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is **required** in all classified ads; we will add it if you forget.

#### Classified Ad Rates per Month

Subscribers:

- First 20 words: **FREE\***
- 29¢ per word for extra words over 20 **plus**
- 10¢ per word for a shaded ad (count all words including free words).

\* Subscribers may take 20 free words on **only one ad each month.**

Non-Subscribers:

- 47¢ per word **plus**
- 10¢ per word for shaded ad.

Please do not forget to send in the extra 29¢ per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

### BOXED CLASSIFIED AD DETAILS

**Deadline: 1st of the month!**

Boxed classified ads can run unchanged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with "For Sale," etc. Minimum run is 3 months. prepaid Discount: 10% for 6 months; 20% for 12 months.

#### Boxed Classified Ad Rates per Month

Nonshaded ads:

- 40¢ per word for all words, \* none free, **plus**
- 10¢ per word for each bold word **plus**
- 10¢ per word for each all-caps word.

Shaded Ads (All words are bold at no charge):

- 50¢ per word for all words **plus**
- 10¢ per word for each all-caps word.

Non-Subscribers:

- Add 20¢ per word to above costs.

\*Three words can be bold-all-caps at no extra charge.

### PHOTO & DRAWING DETAILS

**Deadline: 1st of the month**

**for all ads with drawings or photos!**

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

#### Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing  
(If ad is canceled, this amount cannot always be refunded.)

### CHANGES & CANCELLATIONS

Please check your ads carefully before sending them. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

### IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: **WANTED, FOR SALE, etc.**, count as one word each time used in an ad. **Name, address** and (one) **telephone number**, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is **required** in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

# RADIO XXXV

Biggest Show on the East Coast ★ Same Giant Location

★ Last Year's Show Sold-Out ★

797 Attendees ★ 75 Exhibitors ★ 7,900 Square Feet ★ 110 Tables

## An Indoor Old Radio Flea Market

Sunday, February 15, 2004 — 8:00 AM till 1:00 PM

Registration begins for all at 7:30 AM

\$8 admission (spouse & children free) – Exhibitors see below.

**Westford Regency Inn — Regency Room — Westford, Mass.**

(I-495 at Exit 32 — directions below)

Refreshments will be available.

Informal Dinner – Sat., Feb. 14th, 7 PM to 9 PM – No reservations needed – Dutch

Yangtze River Chinese Restaurant — 2.2 mi. west of Westford Regency on Rt. 110.

**Visit John Terrey's Collection of Early Radio & Wireless**

Sunday 1:00 pm - 3:00 pm 5 mi. from meet. Over 600 items on display!

**Pre-registration & Info:** A.R.C., P.O. Box 2-W20, Carlisle, MA 01741 – (866) 371-0512 – arc@antiqueradio.com

**Exhibitors:** \$8 per person for admission plus \$26 per table. Table sizes and location assigned on a first come-first serve basis. Early registration is recommended in order to obtain space in the main hall. Last year's exhibitors may reserve the same location as last year if we receive their paid registration by February 1, 2004. Adjacent rooms will be used for overflow. Four table limit per exhibitor. Exhibitors must occupy tables for entire show. Tables unoccupied 15 minutes prior to the end of the show will not be eligible for early reservation of the same location in 2005. Exhibitors may register at the door or may pre-register by mailing payment to: Radio XXXV, c/o A.R.C., P.O. Box 2-W20, Carlisle, MA 01741. (Make check/MO to A.R.C.; Visa, MasterCard, Discover, American Express OK, too.) If paying by credit card, exhibitors may pre-register by calling (866) 371-0512 or faxing (978) 371-7129. **Note:** After picking up registration materials at the registration desk, exhibitors may enter the hall only to deliver goods to their table (e.g. not to set up) and then must return to the foyer until the doors open for everyone at 8 AM. **Cancellation Policy:** Table fee will be refunded only if requested and the table is resold. If a table is not occupied by 9 AM, a table may be cancelled and resold.

**Overnight stay:** Westford Regency Inn at 1-800-543-7801. Mention Radio XXXV for special rates. Room reservations should be made by January 31, 2004 for special rates. Bring your family to enjoy indoor pool, health club, racquetball courts, three restaurants, bar, etc. Night skiing at Nashoba Valley Ski Area, only 2 miles away!

**Directions:** From I-495, take Exit 32. Follow "To Rt. 225" sign. At stop light, turn right onto Rt. 110-West for 0.4 miles. The Westford Regency Inn is on the right. Use doors on right (north) side of Inn. Ramps at both show entrances! The Westford Regency Inn and Conference Center is a 193-room hotel with 3 restaurants and over 500 parking spaces. With over 20,000 square feet of conference space, we have room to expand our future radio meets!

*Sponsored by:*

**The Greater Boston Antique Radio Collectors**

*Not a club, no dues, no newsletter... just a great group of collectors!*

*Thanks to Antique Radio Classified for organizing this meet.*

# Estes Auctions

*Specializing in Vintage Radios  
Complete Auction & Appraisal Service*

## Special

## Announcement

Estes Auctions announces the opening of their new West Coast Branch, serving the entire Western U.S., including the Rocky Mountains and West Coast. Estes Auctions have specialized in the sale of radios and radio-related items for 12 years. We are known worldwide for our radio auctions. We also specialize in amateur radio. Auctioneer Richard Estes has been a licensed ham operator for 45 years. We have conducted over 100 radio auctions. The most notable were the Henry Ford Museum Radio Auction and Muchow Historical Museum Radio Auction. We look forward to serving radio collectors in the Western United States. Our Operations Director on the West Coast is Mr. Gary Fletcher, located in Carlsbad, California. Gary will be able to assist you with any questions or concerns you may have regarding the auction process. Gary is also an avid radio collector and is well known in the radio collecting community. He has the knowledge and experience to help you in any way you desire to consign a radio or a complete collection. You may reach us at the following:

## Best Wishes From Stanton's

From everyone at Stanton's Auctioneers and Realtors, we wish you all the best for the 2004 year.

We have appreciated having the opportunity to talk, meet, and work with everyone this past year. Our auction service conducted a total of 184 auctions of all types during the year ranging from musical to real estate, coins, antiques, farm equipment and general sales... for estates and private individuals.

The year 2003 opened with our specialized auction of antique phonographs and records conducted in Omaha, Nebraska in May. Here we worked with Mary Holmes (sister of the deceased) and liquidated this estate that contained over 150 machines, 7,000 cylinder records, parts, books and even trains. Two days of selling over 1,500 lots sent home purchases to individuals from all over the United States, Canada and even to our friend flying in from France, as well.

From that point, we moved on and had the opportunity of selling a fine collection of phonographs, music boxes, lamps, coins, jukeboxes and even modern style electronics that originated from Toronto, Canada. The auction that was held in Charlotte, Michigan, August 22 and 23, and represented a group of very clean and fine items that all found new homes by the end of the two day auction.

Finally the annual event for 2003 was the Thanksgiving weekend sale. Plan on it next year on Friday and Saturday, November 26 and 27, 2004. This year the sale found items coming to Michigan from all over the U.S. and Canada. The Waggoner Estate from Colorado Springs, as well as other collections from Alabama, two groups from Missouri, West Virginia, Ohio, Indiana, Pennsylvania, and British Columbia as well as from various collections around Michigan. The auction produced a catalog of 40 pages and an addendum listing that ended up being 4-14" long pages of additional items. A great sale of phonographs, music boxes, Vogue records, pianos, pump organs, roller organs and a huge quantity of parts.

We just want to thank you all for participating in our events. I appreciate your interest, your calls, and having the opportunity to talk about this collecting field with you... and of course being able to learn from you.

I hope that we have the same opportunities in 2004. Keep in mind that our service is available to everyone, everywhere! Regardless of where you live, I would be glad to talk with you and even come and discuss your needs and plans as far as your own collection or a collection that you may be helping someone else make the right decision about.

Steven E. Stanton

#### CLASSIFIED AD NOTICE

**Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.**

**FOR SALE:** Parts, tubes, books. Send SASE with (2) stamps or e-mail for list. Wayne Letourneau, PO Box 62, Wannaska, MN 56761. E-mail: letourneau@wiktel.com

**FOR SALE:** Puritan radio, 1946, Model 501, (see Bunis), plays – \$35 plus S&H. Leroy Neal, 603 Butterworth, Dyersburg, TN 38024. (731) 285-5120 after 8 pm CST

**FOR SALE:** Playing, Philco 46-200 chassis – \$20. Filament rheostats – \$4. Used 5Y3G, 6F6G – \$4. James S. Looney, Rt. 1, Box 54, Grundy, VA 24614. (276) 531-8677. E-mail: mowman2003@yahoo.com

**FOR SALE: Glass dials, high quality reproduction glass dial scales, over 70 styles available and more available every week. Visit our web site for regularly updated status. Radio Daze, LLC, 7620 Omnitech Pl., Victor, NY 14564. (585) 742-2020. Fax: (800) 456-6494. E-mail: info@radiodaze.com. Web: www.radiodaze.com**

**FOR SALE:** Electronic books, over 100 books. Send SASE for list. Daniel Seidler, 10337 S. Keating Ave., Apt. 202, Oak Lawn, IL 60453. (708) 424-2057

**FOR SALE:** Microphones embracing 1932 through thirties, forties, fifties to the Neuman TLM 103s and Beyer Limited Edition M500s. Broadcaster since 1936 has many ribbons, dynamics, crystals, tube condensers and electrets. Mostly name brand, but some unusuals too, such as Master-Mic ribbon made in Akron in 1932, an English Reslo ribbon or Aiwa's look-alike copy of an RCA 77 from 1960. You'll find honest descriptions and fair value prices in my list. Mail – \$2 U.S. for same. No stamps please as U.S. postage not usable in Canada. If you're not familiar with truly collectable mics, their history and present day values, then please save your money and ignore this ad. Serious collectors may find it worth writing to me: Trevor Wood, Box 42172, RPO Ferry Rd., Winnipeg, Manitoba, Canada, R3J 3X7. Soon, I may even consider parting with my new in the original cradle-style shipping carton, 1958 RCA 44 BX. It is one of the last of the assembly line when RCA closed their English HMV factory. This microphone is probably the most beautiful, flawless example of its type in the world. Of course, that will be a bidding situation to truly appreciative collectors or historic broadcast institutions. Meanwhile, how about a 77D or a 639? They're on my list. Dr. T. Dan Wood, PO Box 42172, RPO Ferry Rd., Winnipeg, Manitoba, Canada, R3J 3X7

# Price Guides from Radiomania Books By Mark V. Stein

## The Machine Age to Jet Age/Tabletop Radio Series

The continuing series of vintage radio pictorial reference and price guides. Each volume is a supplement to the others with virtually no overlap among the three. Over 10,000 vintage tabletop radios are individually described and valued.

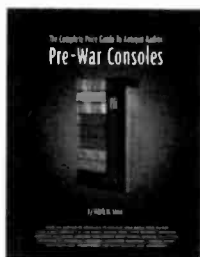

**Volume 1:** 2,500 radios. Black and white photos. Updated with 2003 market values. Includes master index for all three volumes. 239 pages. \$29.95

**Volume 2:** 2,700 radios. Black and white photos. 16 page color insert. Updated with 2001 market values and hundreds of variations not previously included. 372 pages. \$28.95

**Volume 3:** 3,000 radios. Tube and band-count information. Black and white photos. Includes 2001 market values. 256 pages. \$29.95

**Volume 4:** 2,500 new radio listings. 1,500 new illustrations. B&W photos. 239 pages. \$29.95

## The Complete Price Guide to Antique Radios Series

### Pre-War Consoles

Identification, grading, and current market values for 3,500 models focusing on the period from 1930 through the end of pre-war production in 1942. Tube and band-count information and variations. Expanded resource section. B&W photos. 240 pages. \$29.95

### Sears Silvertone Catalogs 1930-1942

Current market values for 1,000+ radios. Original advertising, options, specs and pricing. Historical preface. Manufacturer source code table. Full cross reference with tube and band counts, variations, cabinet materials and colors. B&W photos. 240 pages. \$34.95

**Everything stocked and shipped promptly — Radio is our middle name.**

**A.R.C., P.O. Box 2, Carlisle, MA 01741 – Toll Free: (866) 371-0512**
