Complete Riders Troubleshooter Manuals On A Single DVD Disc!

Tired of changing CD's? Tired of getting "that" schematic on your old radio where you can't read the values? REA has sold hundreds of this DVD-ROM publication at a break-through price. REA created the first Riders Professional CD-Series

that is the **ONLY** database driven system ever created and is the "standard" that others are judged by. Now we are providing a lower cost alternative to our earlier CD-ROM database driven series. Every collector or restorer who repairs radios should own this DVD. Requires Windows on a PC to use it. It requires nothing to download as it has its own built in digital browser that allows viewing, magnification, rotation and printing to your own printer. This DVD holds almost 120,000 of the early radio models made from 1920 to 1954. A true price breakthrough yet with no sacrifice in quality. A professionally produced product.

Only \$ 199 + \$ 6 S&H (Sold only on DVD)

Please, no classified ads by telephone: thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

EDITOR'S COMMENTS

Thinking about recent letters we've received and the articles in this issue, I'm struck by the idea that diversity is a key to radio collecting. Readers often ask for articles on a wide range of topics, and we would like to be able to comply. However, everything we publish comes from you readers, and we can't urge you enough to share with us your wide-ranging projects and discoveries.

Some of you do that regularly; others may hesitate, thinking that a particular topic has already been covered and does not bear repeating. We beg to differ. There's always a new angle to explore on a topic, and not everyone today has read the article of ten or twenty years ago on the same subject. And, of course we're always open to the new and unusual in this constantly evolving radio world.

Ed Ripley's lead article certainly fits that category, even though he admits to committing the "unpardonable sin" — marrying a 5-tube Invicta chassis to an Art Deco intercom unit. Purists will forgive Ed when they think about how he's given new life to the old intercom, and, at the same time, saved a chassis that might have been discarded. The result is eminently pleasing to its creator, and isn't that one very desirable goal of collecting? Such a project also illustrates the diversity in collector interests.

Take Richard Brewster as another example of diversity. Richard may well be called our "museum reporter," as in his world travels aboard a Mercy Ship, he doesn't forget his radio roots. He's always on the lookout for a radio museum, and his latest find is in the Orkney Islands in a remote corner of Scotland. This small local museum is indicative of how widespread the passion for radio preservation is and how it combines the old and new technology through its website. A vacation trip to Orkney may sound like a good idea, but now you can also visit the museum on the Internet.

Again speaking of diversity, many readers tell us that the auction reports are of prime interest to

PRINTED WITHOUT COMMENT

We continue to receive reports from advertisers of e-mail responses to their classified ads proposing to pay them with a check, sometimes via a third party, in excess of the purchase price. The seller is asked to refund the difference by wire. In more than one case reported to A.R.C., the check received was "bad."

To minimize problems, we suggest that you always know whom you are dealing with or ask for references.

them. As we've no doubt said before, Ray Chase has made almost a life's work of auction reporting, a real gift to us all. This Estes auction offered a collection illustrating a wide range of interests, everything from radios to phonographs, parts, magazines, tubes, military and communications receivers. Unlike a collector with a focus on something like battery sets, Kenneth McCall's interests were broad, and so, for the auction reader, there's something for everyone.

Not for everyone is the importance of who was the first radio broadcaster. But Gordon Greb and Mike Adams have been steadfast in their defense of Charles Herrold as the man who first broadcast regularly scheduled, publicized programs as early as 1909. Paul Bourbon presents an excellent review of the Greb-Adams book, and asserts that, in his opinion, their case for Herrold is a strong one. Furthermore, he found the book to be a very good narrative. Thanks to Paul, and our best wishes to Gordon and Mike on the sale of their book and its message.

David Row's letter and message to readers from Singapore on the other side of the world reminded us once again of the far-reaching appeal of antique radios. Even though David's primary interest has always been gramophones, he became hooked on the world of radio through A.R.C. For him, the diversity in the designs of radios is what has made him an "addict." We're glad we were part of his addiction and wish him well in his very productive retirement.

A.R.C. Benefits. Continue to take advantage of A.R.C. benefits: a toll-free number (866) 371-0512; Discover, MasterCard, American Express, Visa accepted; the Web, www.antiqueradio.com; books shipped free in the U. S. by USPS media mail; and for current subscribers, a 10 percent discount on all book orders.

Coming Radio Events. We're in the thick of summer radio activity now, as the calendar shows: 24 meetings, 2 auctions, and 9 meets, including two major meets — A.R.C.'s RadioFest XXIV and AWA's 44th Annual Conference. I hope you can make one of these events.

Happy Collecting!

John V. Terrey, Editor

ON THE COVER

Thanks to Ray Chase, our cover photo this month shows a small sampling of the hundreds of items at the Estes auction of the Kenneth McCall collection. This something-for-everyone type of auction appeals to diverse interests and is a reason that auction reports are so important to collectors.

WITH THE COLLECTORS

American Carrier Call Corporation Intercom Conversion

BY ED RIPLEY

Ed Ripley tells us about a happy marriage. He installed a 5-tube radio in an intercom cabinet and produced an unusual Art Deco radio. (Editor)

Over the years I kept seeing these very cool looking Art Deco intercom units at flea markets and antique shows. They were made by American Carrier Call Corporation of New York. Every time I saw one I would think, "Why couldn't it be a radio?" Why indeed! Finally, I gave in and bought one. Obviously it was part of a system, and it wasn't much good by itself. So I committed the unpardonable sin. I replaced the intercom guts with a small tube-type radio chassis. The completed conversion is shown in Figure 1.

The style of the case called for something that would be "right hand drive." In other words, it needed to have the tuning capacitor on the right side. Luckily, all the front controls of the original intercom were located in a rectangular panel, which meant I didn't have to match a lot of shaft holes. However I did have to find some kind of dial that would fit the 2½" x 3¼" opening. In the junk box I located a celluloid dial from an old Troy receiver. It was a simple piece of printed celluloid with one hole in the center for a tuning shaft to come through. It was

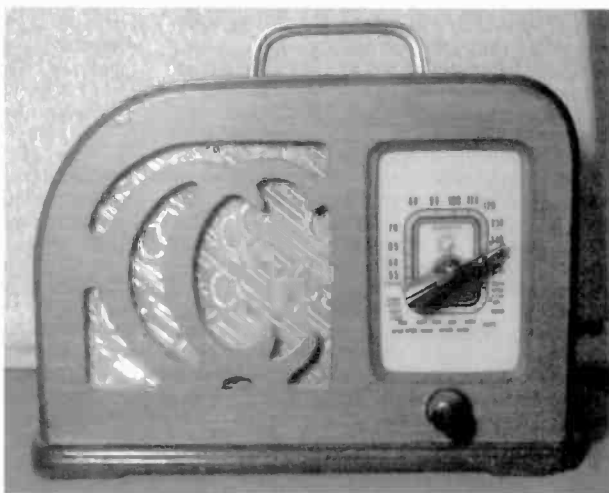

Figure 1. The results of marrying an American Carrier Call Corp. intercom cabinet an Invicta 5-tube AC/DC chassis and a Troy dial scale.

a simple matter to glue it to the inside of the cabinet. Next I found a fairly long black pointer knob, the generic kind of pointer that's used on a lot of test equipment. I still needed a chassis, however, and until I found one, I wouldn't know where the on-off-volume would go.

After a lot of trial and error, I found a little Invicta 5-tube AC/DC AM chassis from one of those late '50s

Figure 2. This rear view of the intercom shows two of the three possible mounting positions for the speaker.

Figure 3. The third possible speaker location at the front of the cabinet was the final choice.

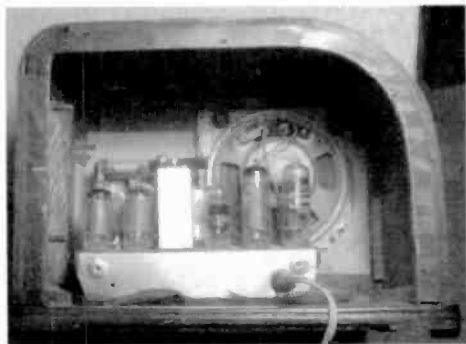

Figure 4. A rear view of the cabinet with the Invicta chassis and the speaker in place.

Japanese receivers. By raising the chassis a bit (sort of like on stilts) I could get it to line up with the hole in my Troy dial. The only logical place for the volume control seemed to be the area just below the dial opening. By lowering the control about $\frac{3}{4}$ " and mounting it at the very bottom of the chassis, I was able to make it work. Since I already was raising the chassis from the floor of the cabinet, I was able to mount the volume control where it would protrude a little below the chassis base. A hole was drilled into the wood cabinet, just $\frac{2}{4}$ " below the dial shaft, and about $\frac{1}{2}$ " below the bottom of the dial opening. Figure 4 shows a rear view of the chassis and speaker in place.

The speaker was a little easier to manage. As Figures 2 and 3 show, I had a choice of mounting it in the front, the right side or the back, as all three had openings and grille cloth. For the sake of better sound, I selected a 4-inch PM speaker to replace the tiny one that came with the Invicta chassis, and mounted it to the inside front of the cabinet.

At this point, I must confess to one mistake. The original plan was to mount the speaker to the right side, and I drilled holes for the rosette-head machine screws. Later, that arrangement proved to be too crowded for the chassis, so I used the ornamental screws to cover my mistake, and mounted the speaker facing the front. This time the front panel was thick enough that I could use short wood screws and mount from the inside.

Figure 5. There was no need to drill holes to mount the chassis. The intercom cabinet came with plenty of vent holes.

As Figure 5 shows, there were already vent holes in the bottom of the intercom cabinet, so I didn't have to drill any new ones to mount the Invicta chassis. The composite radio sounds quite respectable. Using the larger speaker greatly improved the sound quality of the chassis over the original Invicta. The dial doesn't quite track as true as I'd like, but with a little judicious positioning of the pointer, it reads with reasonable accuracy over most of the band. A close-up of the dial and tuning knob is shown in Figure 6. You'll notice, too, that the old Troy dial is "stationized." Since Troy was a California manufacturer, all the station call letters are from the West.

The end result is that I now have a late 1930s Art Deco cabinet housing a late '50s tube-type AM radio. I really like the asymmetrical look with the sloping left side, the brass carry handle and the interesting grille cut-outs. If you look closely, you'll see that they read "C C" for Carrier Call. The original grille cloth also has the "C C" trademark pattern.

The main components used are: American Carrier Call intercom unit. Type I-3C cabinet; Troy celluloid radio dial; Invicta 5-tube AM chassis; generic black knob and pointer knob; 4-inch PM speaker, (possibly from an old GE clock radio)

(Ed Ripley, 230 Stanley Ave., South St. Paul, MN 55057)

Ed Ripley has been an avid enthusiast of old radios for more than two decades, and collects Art Deco receivers from the 1930s and 1940s. He is a retired radio broadcaster, and spent 30 years as a deejay, talk show host and program manager for stations in Tampa, Jacksonville, New Orleans, Cleveland, Rochester, and Minneapolis-St. Paul. He is a past-president of the Northland Antique Radio Club, of which he was one of the founders.

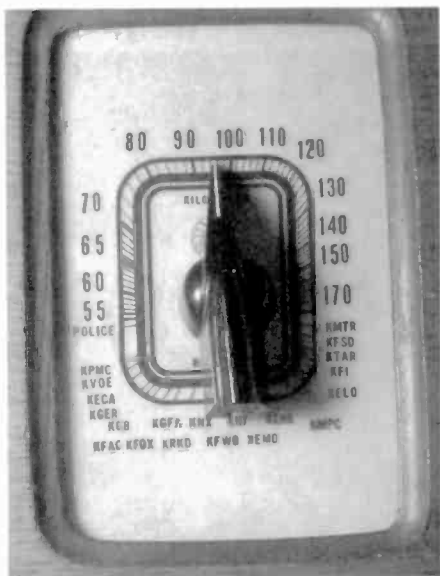

Figure 6. The dial scale from the Troy radio includes West Coast call signs.

MUSEUM MUSINGS

Orkney Wireless Museum

BY RICHARD BREWSTER

In the November 2001 issue of A.R.C., Richard Brewster wrote about a radio museum he happened to run across in the Netherlands. Here he reports on another museum discovery in Scotland's Orkney Islands. Travels aboard a Mercy Ship, the M/V Anastasis, sometimes offer extra rewards to Richard, who keeps an eye out along the way for supplements to his radio interests. Richard, the ship's Head Electronics Technician, and his wife Susan, the Crew Clinic Nurse, have volunteered in their "retirement" to provide medical care to people in West Africa. (Editor)

This past summer, my wife Susan and I had the distinct pleasure and responsibility of representing both Mercy Ships and Rotary International by visiting Rotary Clubs all over Scotland. Our purpose was to help prepare for the visit of the Mercy Ship M/V Anastasis to Dundee, Scotland, in September.

The Orkney Wireless Museum is housed in the kind of stone "cottage" built to withstand the harsh winds of the North Sea.

One of our stops was to be the Orkney Islands.

It's a long drive to the northeast corner of Scotland and then a multihour ferry trip to the island. The weather too can be a problem as we found out when our walk-on ferry from John O'Groats was delayed and later canceled due to heavy seas. (This is the North Sea after all!) We finally caught another ferry from a nearby town.

One of the Rotary Clubs at which we spoke was located in the town of Kirkwall on the main island of the Orkneys, located about 500 miles due North of London. There we found the Orkney Wireless Museum, one of the most northerly radio museums in the world, in a small stone cottage near the North Sea.

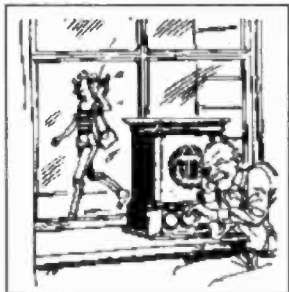

The Orkneys are a great place for tourists, but we were in a hurry and the weather continued to be problematic. However, I did have time for the museum just a short walk from the town center.

HISTORY OF THE MUSEUM

Founded in 1983 in St. Margaret's Hope, Orkney, and moved in 1997 to Kirkwall, the facility is small but well organized. It was the creation of the late Jim MacDonald, a lifetime collector of all things electric. Essentially a local collection, it was MacDonald's attempt "to capture the evolution and swift passing of an intriguing era. After he died, a charitable trust

Sandy Firth, a "fount of knowledge" about Orkney, is the contact for the Orkney Wireless Museum.

The museum has its own "whimsical" logo.

was established, and in October 1994, the museum obtained full registration with the Museums and Galleries Commission in London. Volunteers run the museum every day of the season from April to September.

EARLY RADIO DISPLAY

Early wireless sets are a strong feature in the museum. They range from early sets with separate speakers and batteries to 1930s ornate furniture sets and 1950s "modern" valve sets. One wall stand traces the history of the valve; another, the history of portable wireless sets from the late 1920s to the advent of transistor radios. Some rare 1920s sets are also displayed.

An interior section of the museum displays an eclectic mix of commercial radios, a communications receiver, microphones, photos, and a map.

Part of the early wireless equipment on display. Note the home-brew crystal set built in a cigar box, center and foreground.

WORLD WAR II DISPLAYS

Of major interest in the museum are the wartime displays. "Fortress Orkney," as it was known during World War II, was the location of the Home Fleet at Scapa Flow. A radar station was set up at Netherbourton in Orkney and equipped with top secret equipment.

Items you will see in the wartime sections are transmitters used for short-range speech to fighters and long-range Morse code to bombers; replica radar equipment; the original gun operation's map from operations headquarters in Kirkwall; a bomber transmitter and receiver; army signal equipment; the famous, No. 19 "tank set," Navy communications receivers, pictures, documents, and the original Scapa Flow boom defense chart.

The history buff will be fascinated by the extensive displays, including U-boat and spy radios, early wireless gear, and ephemera. Maps and charts are used to explain wartime operations. Also on display is a Spy Suitcase radio, and a collection of radios used by "Y" service operators. The German section includes wartime equipment and a U-boat radio.

Of special interest is the extensive photo archive display covering virtually every aspect of life in "Fortress Orkney" during World War II. For you Hams out there, the call sign of the museum's Amateur Radio station is GB2OWM, and the station is sometimes operational.

Make the Orkney Wireless Museum a must on your next trip to Scotland! The address is Kiln Corner, Kirkwall, Orkney KW15 1LB. Tel.: 01856871400; www.owm.org.uk

AUCTION REPORT

Estes Auctions — Kenneth McCall Collection Burbank, Ohio — October 23, 2004

REPORTED BY RAY CHASE

The Estes auction of October, 2004, was characterized by quantity but not a lot of the quality that had been seen at previous auctions. Just one Atwater Kent breadboard was offered, and it was the only item to draw bidding barely over \$1,000.

Nonetheless, there was something for everybody — lots of good consoles that went for bargain prices, many wood radios of the 1930s, Ham gear, military items, enough battery sets to keep those collectors busy, lots of magazines, and the usual run of tubes.

Many large tube lots and parts box lots — the “under the table” commodities — were present, but I was not able to list most of them. I left at 4:45 P.M. while those miscellaneous items were still being auctioned. Over 100 lots were brought in by consignors on Friday evening and Saturday morning, including many nice consoles.

The auction hours were the usual: viewing Friday evening 5:00 to about 9:00 and Saturday morning 8:00 to 10:00 when the auction started. Richard Estes sold well over 600 lots. The auction sale total was in excess of \$30,000.

e=excellent, vg=very good, g=good, f=fair, p=poor, unk=unknown condition, N.O.S.=new old stock, wk=working, nwk=not working, WT=with tubes, NT=no tubes, BB=brass-based, TT=tipped tube, SW=shortwave, PS=power supply, PB=push buttons, WE=Western Electric. All prices have been rounded down to the dollar. Some mixed lot, low cost items, items in poor condition or items with non-specific descriptions are omitted.

Radio and Related Items:

AC Dayton Navigator highboy console, w/doors, vg	\$60
Air Castle 11X, 4 knobs, w/eye, f	20

Arkay white plastic, 2 knobs, g	10

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

BOOK REVIEW

Charles Herrold, Inventor of Radio Broadcasting By Gordon Greb and Mike Adams

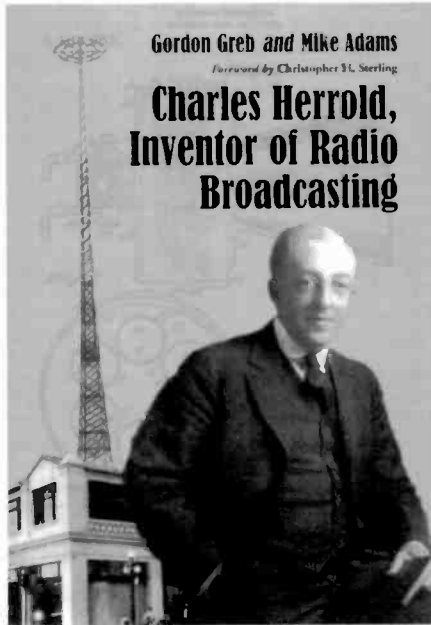

REVIEWED BY PAUL JOSEPH BOURBIN

Traditionally, the first radio broadcast has been attributed to the election returns broadcast by station KDKA, in Pittsburgh, Pennsylvania, in November 1920. This is what one will read in almost all history books and what has been accepted as fact for eighty years. However, for the last sixty years, a handful of people have been trying to gain recognition for the efforts of Charles "Doc" Herrold.

In the then rather obscure farm town of San Jose, California, Herrold broadcast his regularly scheduled, publicized radio programs to a known audience as early as 1909 and continued until the advent of World War I. Efforts by Herrold and his friends and colleagues failed to gain Herrold the recognition that he felt he deserved. Network commemorative documentaries were forgotten, including a video by author Mike Adams. However, the printed page has permanence and garners more respect than any other medium. To this end, Gordon Greb and Mike Adams have authored a book to plead the case for Charles Herrold's claim to be the first to undertake radio broadcasting, as we now know it.

After a preface stating the intent of the authors' publication of the book, they discuss the state-of-the-art of radio, especially voice transmission, as it was when Herrold came upon the scene. In order to appreciate Herrold's accomplishments properly, one has to have a good understanding of pre-World War I radio development and use, as well as the personalities involved. This overview would also give the reader an insight into the business and creative mindset of the early twentieth century.

Most of the work being done in radio was commercial in nature. Its direction was towards improving wireless telegraphy as a means of point-to-point communication, such as ship-to-ship, ship-to-shore and the use of wireless telegraphy to replace wired telegraphy. The few who were interested in

voice transmission followed a similar route; that is, the replacement of the wired telephone with wireless telephony.

The Amateurs of the time enjoyed listening in to commercial transmissions and communicating amongst themselves. The few transmissions of music were mainly for test purposes. It was easier to play music than keep saying, "Testing, one, two, three" over and over. Radio was one of the last major inventions where the individual working in his attic laboratory had just about as much chance of making a major breakthrough as the companies that were created to improve and exploit it.

HERROLD'S EARLY BROADCASTS

What follows is a biographical sketch of Herrold's life up to the start of his engineering college and the subsequent development of his arcphone transmitter. In 1909, when he found out that local Amateurs were listening in to the tests, he decided it would be a good idea to transmit programs regularly for them to listen to. He thought it would be a good way to promote his school.

To make the program interesting, he borrowed records from a local music store to play over the air. His wife was the first radio DJ. The store's name was mentioned, and it would then sell out of the records played on the program. These were the first radio commercials. People would call in and ask for certain records to be played, just as some popular music radio stations do today.

The authors then document many of Herrold's and his station's activities up to the time that the station was forced to close, as most stations were, at the advent of World War I. During the war, Herrold trained a number of men to be radio operators for military service.

After the war, when stations were again permitted
(Continued on following page)

(Charles Herrold Book Review, continued)

ted to operate, Herrold was beset by another problem. The government changed the frequency that he would be permitted to use. This rendered his arcophone obsolete. Vacuum tube transmitters were now the way to go, and Herrold was forced to purchase a modern vacuum tube transmitter.

Herrold fell upon difficult financial times and was forced to sell the station. He remained in radio for a while, but eventually was forced to work menial jobs.

OTHER CLAIMS TO THE TITLE

While Doc Herrold claimed to be the "Father of Broadcasting," there were other claimants to the title "oldest broadcaster" or "first broadcaster." Greb and Adams discuss each of the major claimants and their accomplishments. While each had valid points, the authors concluded that none met the criteria necessary to remove Herrold from being the first broadcaster.

Although Herrold and others tried to gain for him the recognition he felt he deserved, he remained obscure and almost forgotten in spite of their best efforts. All of these attempts are documented in this book, as well as later attempts to document what Herrold accomplished. In the final chapter, the authors make their case, based upon the documentation presented in the previous chapters, for giving Herrold the title of "Father of Broadcasting."

A STRONG CASE

In my opinion, their case is a strong one. In a very fine piece of scholarship, Greb and Adams have carefully and methodically put forth their argument and documented each and every attribute so the reader will understand why they know that Herrold was the first to broadcast radio programs.

Why was he forgotten? Perhaps it is the way we often look at history. Often, to receive recognition, one does not have to be the first to do something, but the one who opens it up for exploitation. For instance, Edison did not invent the light bulb. He knew of others' work on it. What he did was invent a cheap, reliable bulb, and the system of electrical distribution to make electric lighting a commercial reality.

On the other hand, Herrold operated his station as part of a small trade school in a small town in California. He never made a lot of money from the opera-

tion of his station, nor did he become rich through the sale of merchandise offered through his station.

As another example, Conrad had the backing of a large company, Westinghouse, when he did the early broadcasts of KDKA in Pittsburgh, a populous city. Westinghouse made radio sets that were sold through RCA. To sell sets to the general public (who were much more numerous than radio hobbyists), you had to give them something to listen to. Hence KDKA.

By the time people started looking at the history of broadcasting, Herrold was in obscurity, and Westinghouse and RCA, led by Sarnoff, had plenty of resources to make history go their way. Perhaps it is time to go from a history of commercial exploitation to a history of fact.

WHY BUY THE BOOK

I know some of those reading this review are thinking, "A book of historical research is going to be dry and boring." Indeed not. This book is not one where over half the page is footnotes. Instead, it is written in a very pleasant narrative form, and while the footnotes are there for the scholarly types, they are unobtrusive enough not to bother the casual reader.

For those who wish to dig more deeply into the subject, there are extensive notes, a fine bibliography and a good index at the back of the book. There are numerous monochrome pictures and diagrams well placed throughout the book that serve to make the story that much more interesting. One need not be afraid of long, dry technical discussions.

My only complaint is that the list price of the book is \$45. For a book of this size and binding — 259 pages, softbound — that seems a bit dear. I am afraid that the price will discourage some from purchasing the book. However, it is a book of merit, and it makes a compelling case for Herrold's achievements. Whether you agree with the author's conclusions or not, it is an essential book for any radio historian's library. The book is available from the publisher, McFarland and Company, at www.mcfarlandpub.com order line, (800-253-2187), and most radio history book vendors.

(Paul J. Bourbin, 25 Greenview Ct., San Francisco, CA 94131)

Thanks to A.R.C. and Fellow Collectors

BY DAVID ROW

The following letter from David Row was accompanied by a newspaper clipping noting his Merit Award as "Active Senior of the Year" and including his advice on retirement plans for all of us. We think the combined information makes a good "Collector's Profile." (Editor)

This letter of appreciation comes all the way from Singapore, a dot of an island at the southern tip of the peninsula Malaysia.

I am a gramophone-man. I was looking for gramophone club membership. Instead, I got to A.R.C. in early 1999 (see my ad on page 31, March 1999). I have never regretted staying on. For the first three or four years, I was doing yearly subscriptions. Then I wanted to give up A.R.C., but found the "addiction" too overwhelming. So I was doing last minute decisions on 6-month extensions. I am so grateful to John Terrey and Cindie Bryan for giving in to my 11th hour re-

quests. Also thank you for writing up my advertisements on pages 39, 51, and 57 of January 2005. But all good things must come to an end. So my subscription will cease in February 2005.

WHY A.R.C.?

And now why I stayed with ARC for seven years, though my primary interest is gramophones. I was simply awed by the beautiful and unique designs of American radios. In all my 72 years I have never seen such a vast array of radio design and shapes. I became fascinated, even close to obsessed, with wanting to buy radios. This, however, cannot take place as the DIY man is a fast dying breed in this part of the world. And the valve radio has no repair men, except for a handful who are in their seventies and over. So it was my passion for radio designs that kept me close to A.R.C. Of course, these antique radios are my only link with you all because gramophone is my passion too.

Through A.R.C., I've made a number of friends, bought a few items, and discovered the existence of wire recorders. Regarding relationships, I have found that radio enthusiasts are ever so helpful, obliging, and trustworthy. They even direct you to resources for particular interests. Thank you Kremer (wire recorders), Wayne and Ward Eaton (Pilot Maestro radio), and a few more great fellows. I am still waiting for responses to the three ads in the January '05 issue. I will wait.

A FAMILY RADIO PAST

Now for two items of personal interest. My brother, also a retired school teacher, age 73, made his first crystal set 48 years ago. We listened to Radio Singapore sharing one earphone each. We had an aerial 40 feet long strung across two coconut trees. He is one of the last radio hobbyists, and that is why I am yearning to get that radio on page 57 of the January '05 issue. In 1951, he was in his last year in school when that radio was used to receive school broadcast lessons.

I have an RCA Model AR-88, a gift from my other late brother, who was working with the BBC in its monitoring station at what was then Malaya, and later Singapore. I believe this set was the American contribution to Britain for the war effort

when the Germans were bombing the UK nightly. The British used the AR-88 as a radio receiver.

I am a retired school teacher, age 72, a hospice volunteer for 17 years and still counting. I collect and repair rare gramophones and sound machines. Right now, I am into kiddie gramophones and gizmos, gadgets and gimmicks for the 78 rpm records, like the carousel. Then I will finally look again for my first love, a gramophone club.

ADVICE TO RETIREES

A 2001 article in *The Straits Times*, a Singapore newspaper quotes David Row as saying, "Long before you retire, get a hobby. It gives you a new lease on life."

Two years before he retired as a teacher, he happened upon the hobby of collecting vintage gramophones. Now 16 years later, 100 gramophones and 2,000 records later, Row is proudest of his gramophone which has the stylus moving from the inner grooves of the record to the outer grooves. He owns the oldest known gramophone in Singapore, a 100-year-old Edison.

Row's advice about taking up a hobby is also based on his insights into human nature, the result of his volunteer work with hospice patients and their families. He says, "It is deeply gratifying to know how much you are needed by the patients and their families in their times of need."

In the almost twenty years since his retirement, he has had no routine days. Instead, a day is determined by the needs of the patients. He sleeps with his pager, and he says, "If my work keeps me up till 4 a.m., there are always my gramophones to wind me down."

MESSAGE TO A.R.C. AND READERS

"To the Staff and readers of A.R.C., thank you for the great time and joy you have given me. Happy collecting, repairing and selling!"

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify U.S. funds. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

E-mail: arc@antiqueradio.com

Web: www.antiqueradio.com

A.R.C. RATES & POLICIES

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by Noon Eastern Time on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive months up to your subscription expiration; 12-months, maximum) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital i and the small L.) Also: 0, O, o, Q and D; v, r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C. and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

Classified Ad Rates per Month

Deadline: NOON ET- 10th of the month!

Subscribers:

- First 20 words: **FREE***
- 29¢ per word for extra words over 20 plus
- 10¢ per word for a shaded ad (count all words including free words).
- * Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

- 47¢ per word plus
- 10¢ per word for shaded ad.

Please do not forget to send in the extra 29¢ per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month
for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing
(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

FOR SALE: Talk-a-phone Intercom Model 5411-10 station - \$35. (2) Talk-a-phone sub stations K-LR3 - \$20 each. (1) Talk-a-phone KS 100 selector switch - \$15. Raymer Model 802 pre-amp/mixer, 4 channel - \$40. Arkay Model A12 amplifier, 2-6V6pp outputs - \$30. Leader Model LD12, 50 watt dummy load for amplifiers - \$35. Leader Model LS-5 electronic switch for any oscilloscope - \$35. RCA booklet: How to Fix 45 Players - \$10. We have all kinds of parts for 45 players. Plus S&H. J.J. Papovich, 165 Trellis Ln., Sewell NJ 08080. (856) 464-6741. E-mail: jipapo@juno.com

FOR SALE: Philco console, 3-band, Model 40-190, with tubes - \$90. Zenith Model 12S265 shutter remote dial console, with tubes - \$1,100. American Bosch Magneto Model 48 console, with tubes, cabinet needs refinishing, best offer over \$200. Radios pick up only. W. Boyd, 74 Atsion Ct., Medford, NJ 08055. (609) 654-0299

FOR SALE: 1941 & 1942 Philco escutchcons, knobs and pushbuttons reproductions now available. Other various knobs and pushbuttons also available. Contact us for specific model numbers on escutchcons. Old Time Replications, 5744 Tobias Ave., Van Nuys, CA 91411. (818) 786-2500. E-mail: oldtimerep@aol.com. Web: <http://www.antiqueradioknobs.com>

FOR SALE: Flyback transformers, new but no boxes, so will sell for used, good condition, FLY-329, FLY-617, FLY-277, RCACT-35C. Also new H.V. tripler, RCA #3306/523/526A, in original box - make offer. A-1 Radio & T.V., 1402 Mather Ave., Utica, NY 13502. E-mail: tiesthatbind1527@aol.com

FOR SALE: Telefunken Opus 7, large hi-fi, multi-band + FM, looks and plays good - \$225. Gilfillan wood table Model 55B, nice - \$55. Zenith 6D029, wood, Deco - \$60. Philco cathedral 84B Baby Grand, good - \$200. Zenith T.O. 3000, good, complete - \$135. James R. Lopaz, 5467 S 975 E, Ogden, UT 84405. (801) 476-1470

FOR SALE: RCA RC604 chassis - \$25. Parting out Majestic 130-A. **WANTED:** Nice Crosley Pup. Brian Kurrle, 2222 Nodleigh Ter., Jarrettsville, MD 21084. (410) 692-0450. E-mail: briansoldradios@aol.com

FOR SALE: HP 608D laboratory frequency (VHF) generator, vg - \$150, OBO. David Boyle, 1058 Colt Cir., Castle Rock, CO 80109. (303) 681-3258

FOR SALE: Philco 19LZ chairside radio, 6 tubes, Queen Anne cabinet, complete, not working - \$95. Jim Ligouri, 7 Sycamore Ct., Atkinson, NH 03811. E-mail: jligouri@aol.com

FOR SALE: (31) Telegraph sounders, relays, keys, selling individually. Request free photo CD. Bob Puttre, 637 Stratford Rd., Baldwin, NY 11510. (516) 223-9667. E-mail: puttre925@usadat.net

FOR SALE: Scott Model 800-B, excellent condition with new 15" speaker and Sams Photofax, best offer plus shipping. John Snow, W9MHS, 1910 Remington Ct., Andover, KS 67002. (316) 733-1856

FOR SALE: 1955 Hoffman 21" color TV. BC-348Q receiver. Kennedy 525 amp. Hickok 6000 tube tester. Simpson 1000 tube tester. Eye tubes. Nicholas A. Vaksvik, 235 Marvin Ave., Los Altos, CA 94022-3702. (650) 279-9931

.....
 A.R.C. Advertising Policy
 Sellers and Buyers, Please Note!
 Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Estes Auctions

*Specializing in Vintage Radios
Complete Auction & Appraisal Service*

Radio Auction

Saturday, August 20, 2005 at 10 AM EDT

at the Seville Antique Auction Barn
8240 Wooster Pike Rd., Seville, Ohio

From I-76 Exit #2, then north on SR #3, 1 mile to the sale.

This sale will offer the collection of a Pennsylvania collector and will include a large amount of tubes of all types. Lots of early tubes 201-301A, UV-99, UX-99, WD-11, WD-12, many others including 80, 45, 6L6, etc. A nice collection of tombstone and cathedral style radios, many battery set radios ca. '20s. All types of speakers, cone, horn type, mantle, cabinet speakers. A large amount of radio books and magazines, lots of wood and Bakelite table radios, many pieces of home brew amateur radio pieces, some complete - some partial. Nice early loose coupler, Zenith 4R receiver. Several crystal sets, floor model radios, Edison cylinder player (standard), other phonographs. This will be a very large sale. We will start selling parts, part sets, project pieces and misc. tubes and test equipment at 8:30 AM outside, then at 10 AM we will start the main auction inside. Terms: check, Visa, M/C, cash.

Estes Auctions

*Specializing in Vintage Radios
Complete Auction & Appraisal Service*

Vintage Radio Auction

Saturday, September 24, 2005 at 10 AM

at the Expo Auction Center

8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)

then south to the Duke Gas Station, turn left onto Garman Rd. and follow to the
auction site.

Estes Auctions is pleased to have been selected to sell the large collection of the estate of Earl England of Los Angeles, California. The sale will be held at our Burbank, Ohio facility and will offer this superb collection for auction. This collection contains early radios, crystal sets, loose couplers, horn speakers, a nice headphone collection, many early tubes, a variety of phonographs including cylinder players, console style phonographs, disc players some with wood hoods, a large selection of radio related books and magazines. Earl was an amateur radio operator and we will also be selling his amateur radio items. There are advertising pieces and many parts to be offered. This will be a very good auction and will contain radios for every type of collector. We will bring the collection to our Ohio facility in mid-summer and will start readying it for our website. Watch for ads in *Antique Radio Classified* and at the AWA meet in Rochester, New York in August.

Vintage Radio Auction

Saturday, October 22, 2005 at 10 AM

at the Expo Auction Center

8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)

then south to the Duke Gas Station, turn left onto Garman Rd. and follow to the auction site.

This is a collection from Zanesville, Ohio and offers a variety of radios including a superb Philco bar radio with all the original glass items. This is a beautiful and hard-to-find radio. An Arvin Model 532 Catalin, 1929 Parmak by Parker-McCrory Mfg., over a dozen horn speakers, (20) cathedral radios, over (50) nice battery sets, many different makes & models, two Atwater Kent Model 10 breadboards, lots of headphones, several crystal sets, a very large selection of tubes, many early types. Some of the more common type tubes will sell in a separate ring, amateur radio receivers by Hallicrafters, Hammarlund, and National, many nice console style radios, radio books, magazines, new and used parts, tube testers and other pieces of equipment. We will have a better listing in the September issue of *Antique Radio Classified* and at the Rochester AWA meet. Hope to see you there. Terms: Cash, check, Visa, M/C. 5% gallery fee.

Price Guides from Radiomania Books By Mark V. Stein

The Machine Age to Jet Age/Tabletop Radio Series

The continuing series of vintage radio pictorial reference and price guides. Each volume is a supplement to the others with virtually no overlap among the three. Over 10,000 vintage tabletop radios are individually described and valued.

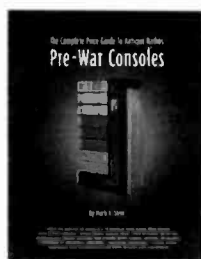

Volume 1: 2,500 radios. Black and white photos. Updated with 2003 market values. Includes master index for all three volumes. 239 pages. \$29.95

Volume 2: 2,700 radios. Black and white photos. 16 page color insert. Updated with 2001 market values and hundreds of variations not previously included. 372 pages. \$28.95

Volume 3: 3,000 radios. Tube and band-count information. Black and white photos. Includes 2001 market values. 256 pages. \$29.95

Volume 4: 2,500 new radio listings. 1,500 new illustrations. B&W photos. 239 pages. \$29.95

The Complete Price Guide to Antique Radios Series

Pre-War Consoles

Identification, grading, and current market values for 3,500 models focusing on the period from 1930 through the end of pre-war production in 1942. Tube and band-count information and variations. Expanded resource section. B&W photos. 240 pages. \$29.95

Sears Silvertone Catalogs 1930-1942

Current market values for 1,000+ radios. Original advertising, options, specs and pricing. Historical preface. Manufacturer source code table. Full model cross reference with tube and band counts, variations, cabinet materials and colors. B&W photos. 240 pages. \$34.95

Everything stocked and shipped promptly — Radio is our middle name.

A.R.C., P.O. Box 2, Carlisle, MA 01741 – Toll Free: (866) 371-0512
Fax: (978) 371-7129 – E-mail: ARC@antiqueradio.com – Web: www.antiqueradio.com

Free shipping & handling on all U.S. orders (typical U.S. order will be received within 7 days, but allow 2-3 weeks). Mass. residents add 5% sales tax. Non-U.S. orders, write for shipping costs, or use credit card and specify air or surface (allow 2-3 months for surface shipping). Most orders shipped by next business day. If using credit card, include name on card, card number and expiration date. Send payment with order. Money back return policy.

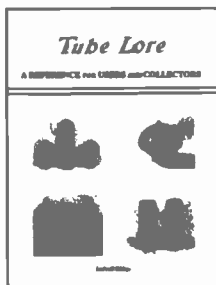

Subscribers, ask for discount when placing order: 10% off books; order must be mailed to address on file.

(#30-Nov03)
