★ HUGE 3-DAY AUCTION ★

Antique Phonographs, Radios, Music Boxes, Televisions, Juke Boxes, Etc.
 To be held at 1025 S. Cochran Ave., Eaton County Fairgrounds, in Charlotte, Michigan on:
Auction - Thursday Nov. 17 @ 3:30 P.M. – Selling approximately 250 lots
Preview begins at 1:00 P.M. – Luncheon from 1:00 – 3:00 P.M.

Auction: Friday Nov. 18th & Saturday Nov. 19th @ 9:00 A.M. each day

A fantastic auction including large Estate collections, accumulations of rare, early and collectible machines of all types & lots more. We are in the beginning stages of assembling, photographing and cataloging items that will be sold, as well as still acquiring additional pieces from around the country and Canada. Call if you have questions or to be put on our list to receive our free catalog. Also go to our website at www.stantons-auctions.com for more information.

Rare early cylinder, disc and coin-operated phonographs, excellent and scarce music boxes including a Regina automatic changer, bell boxes, Reginaphones, etc., an excellent collection of antique radios including many rare Atwater Kent breadboards, Sparton Peach sleigh, Catalin, speakers, floor, the list goes on and on, a great collection of antique televisions including early mechanical, pre and post-war examples, table and floor and related items, many jukeboxes, a Cremona nickelodeon w/stained and leaded glass, and thousands of interesting and rare pieces from all fields. This is an excellent and diversified offering.

10% buyer's premium charged

THE HISTORY OF RADIO ON CD-ROM

Radio Era Archives produced the *QST-VIEW* series of CD's for the American Radio Relay League (ARRL) and over 1/2 million CD's have been sold. *QST* Magazine has been continuously published since 1915. We are now proud to announce that this small mountain of CD's (about 35) is now available exclusively from REA (All Sets) ! Every magazine published from 1915 to 1994, front cover to back cover, every article and column, all accessible with our database search engine.

QST-VIEW CD Edition truly captures the history of radio in 11 volumes. All CD's warranted to work on all Windows platforms from Windows 95 through XP. Each set is \$ 39.95 and we have all sets in stock. The sets are: 1915-1929, 1930-1939, 1940-1949, 1950-1959, 1960-1964, 1965-1969, 1970-1974, 1975-1979, 1980-1984, 1985-1989, 1990-1994. Each set of years is a self-contained set so you can operate one or all sets together. Now that large capacity hard drives are so inexpensive, the 36 CD's can be loaded on about 20Gb of hard disc space for instant searching and viewing without having to swap discs! Full information is provided with each purchase and *QST-VIEW* has on-line instructional help for operating the *QST-VIEW* browser!

EACH SET \$ 39.95 (specify the years)

ALL 11 SETS \$ 379

S&H USA for first set is \$ 5.00, add \$ 1.00 each set thereafter
S&H Export first set is \$ 15.00, add \$ 2.00 for each set thereafter

2009 1/2 PRICE SPECIAL (while supply lasts)

Don't forget, we have the entire John Rider's Perpetual Troubleshooters Manuals on a single DVD. All 23 Volumes of the Riders available at the click of a mouse! Over 120,000 different model radio schematics and related service information in an easy to use DVD. Thousands sold at \$ 199. **SPECIAL \$ 99 + \$ 6.00 S&H in the USA, add \$12 for worldwide delivery. Order Now while supply lasts !**

We now have a small mountain of vacuum tubes at very competitive prices - Thousands sold since our first posting of these tubes. All types including receiving and transmitting types. Tube price listings on the web:
<http://www.radioera.com/tubes.asp>

SCHEMATIC DIAGRAM & MANUAL SERVICE

Over a Million schematics & 100,000 manuals and growing! Schematics and most manuals may be emailed instantly via the internet

Check the web - On-line antique radio flea market - Radios for sale - Antique radio museum - Zenith Trans-Oceanic museum - thousands of old catalogs, manuals, literature, information, how-to data, reference, auction price section and much-much more! Visit antique radios largest web address today!

POSTMASTER: Send address changes to
Antique Radio Classified, PO Box 1558,
Port Washington, NY 11050.

Printed in U.S.A.

PURPOSE - Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

Publisher/Editor: Jon Kummer, **Publisher/Editor Emeritus:** John Terrey, **Founding Publisher/Editor:** Gary B. Schneider, **Contributing Editor:** John Terrey, **Contributing Writers & Consultants:** Mike Adams, Richard L. Arnold, Richard Begbie, Ray Bintliff, Norman Braithwaite, Ray Chase, Dave Crocker, Alan Douglas, Richard Foster, Jim Kreuzer, Phil MacArthur, Ron Ramirez, Gary Schneider, Daniel Schoo, Frank White.

CONTACTING ANTIQUE RADIO CLASSIFIED

All correspondence should be sent to:
A.R.C., PO Box 1558, Port Washington, NY 11050
Telephone: (866) 371-0512; Fax: (516) 883-1077
Email: ARC@antiqueradio.com
Web: www.antiqueradio.com

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However A.R.C. does solicit letters of interest from its readers and publishes them as space permits.

WEB. Antique Radio Classified issues are published on the web as PDF files for subscribers. Web-only subscriptions are available. One issue is available for viewing by all on the web as a sample.

ADVERTISING. Display and Classified advertising rates and artwork specifications are available on the web site.

PAYMENT. Please include full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid. Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA, MasterCard, American Express, Discover or PayPal. Make check out to "A.R.C." Subscriptions will be prorated to amount sent if amount is incorrect. *For your protection, no credit cards by e-mail; use our secure website instead.*

CHANGE OF ADDRESS. Please notify us in advance of a change of address. Send your new address, your old address, your SUB# and the effective date of the change.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, email, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). Mailing dates change each month.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

NOTICE. Subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

SUBSCRIBERS: All paid subscribers receive a FREE classified ad of up to 50 words in each issue.

Publisher's Comments

With fall just around the corner – and winter not too far behind – it's time to get working on those radio projects that have been sitting on the work bench while we were all outdoors enjoying radio swap meets in the summer weather.

The Antique Wireless Association 2011 World Convention is over and, I'm delighted to say, a good time was had by all. I attended the annual gathering in Henrietta, New York, and saw many new faces and also had an opportunity to meet again with old friends. We'll have a full report on the convention in the next few months.

Also look for our piece on the New Jersey Antique Radio Club auction next month. Keeping an eye on what's on display, what's selling, and what's being bought at these local events is one more great reason to keep your issues of A.R.C. coming to your mailbox!

This month we report on Antique Radio Charlotte 2011, complete with plenty of photographs and an extensive look at the equipment contest results. The convention, which featured interesting seminars, a flea market, and an auction, was well attended.

And remember: We want to hear from you. We'd love to receive your reports on all the swap meet activities, radio auctions, and club meetings you've attended. Don't be shy; we can help walk you through your submission. The first step in publicizing your favorite radio activity is to get in touch with us. I urge you to do it today!

What's that you say? You don't know of any local activities? Well, as I repeat pretty much each month, join your local club. We've spent a lot of time updating all the club listings and you should have no trouble finding a club to join or to visit within a reasonable distance of your home. Reaching out to fellow radio enthusiast through a club can add a lot of enjoyment to collecting.

As I expected, our new column, "At Home

With The Collector" seems to be well enjoyed by readers. This month we visit with Mike who shows us how he integrated some of his collection in the area of the home usually off limits to radios: the living and dining rooms! See, our radios and related equipment don't have to be locked away in the basement!

Another article this month looks at the Sears Silvertone Neutrodyne battery set of 1925. How many versions we came up with is amazing. It certainly helped to have a copy of the Sears 1925 catalog to sort out the confusion.

Also in these pages we have John Vuolo's examination of the Heathkit AG-9A Audio Generator, how it works, and how it can be used. We're looking forward to many more articles on vintage test equipment and how they can help us diagnose and troubleshoot our radios.

Rounding out this issue is Richard Majestic's tour of his restoration of a 1934 Majestic model 55 "Duette" console, not only the chassis but the cabinet as well. There's lots of good stuff in there to keep in mind for your own projects.

As always, I want your ideas on how to make a better A.R.C. Contact me with your thoughts or suggestions. I'm available by phone, email, or regular mail (see contact info on facing page).

Until next time, happy collecting and restorations!

Jon Kummer

Heathkit Audio Generator Model AG-9A

BY JOHN VUOLO

When I first got started in the radio collecting hobby I realized early on that I would need test equipment. As funds were limited I began to go to a local radio swap meet that I heard about held on Sundays. There I met other enthusiasts like me, and I made some ham radio friends. They saw my interest in the hobby and one of them was kind enough to give me a Heathkit AG-9A Audio Generator. It was a spare for him and it wasn't working anyway, so he passed it on to me along with the manual. I took my prize in hand and went home to read the book and tear down the unit to see what I needed to do to get it back to operational.

The Heathkit AG-9A Audio Generator is a simple, yet versatile instrument. It provides ease of operation in a multitude of test setups encountered in audio work. The wide range of repeatable frequencies and the metered low distortion output voltages, covering nearly all values encountered in audio work, contained in the conveniently small cabinet meant this instrument would have a preferred spot on my workbench—once I got it going.

FIXING THE AG-9A

The first repair I made to the AG-9A was in the power supply. It uses the conventional power transformer full-wave rectifier circuit feeding a ripple filter consisting of two capacitors and a choke. I found that I had to replace the 6X4 tube

as well as the dual 40- μ f capacitors in the power supply. That brought the voltages back up. I also had to replace the pilot lamp.

The oscillator uses a 6AU6 pentode voltage amplifier and a 6CL6 triode-connected cathode follower. Regenerative feedback from the 6CL6 to the 6AU6 cathode is applied through the tungsten filament candelabra-based lamp. A filament check of the lamp indicated it was still good. I had tested the 6CL6 and 6AU6 tubes on a friend's TV7 tester and found them to be good as well.

Degenerative feedback is applied from the 6CL6 through a "notch" network to the grid of the 6AU6. The resultant oscillation occurs at the "notch" frequency, where degeneration is minimal and phase shift is zero. The notch network is a capacitor-shunted bridged-T type. I found that the C1 and C2 values had gone up in the X1 and X10 settings, so I replaced them. The amplitude of oscillation is maintained at a nearly constant value by the tungsten lamp. The regenerative feedback is applied through a voltage divider consisting of the lamp and the "oscillator" control. An increase in output signal increases the lamp current, the lamp temperature and the lamp resistance. This reduces the amount of feedback applied to the 6AU6 cathode and the resultant output. A balanced condition is thus obtained. The oscillator control is used to set the nominal output level.

HEATHKIT AUDIO GENERATOR MODEL AG-9A

The notch network consists basically of two resistors and two capacitors. From the relationship shown it is evident that a decrease in capacities by a factor of 10 will increase the frequency by a factor of 10. As the values of C₁ and C₂ were chosen with a 10:1 ratio, five capacitors can do the job of four pair or eight in achieving four decade ranges.

The attenuator reduces the output voltage from the 6CL6 cathode-follower through a continuously variable 5000-ohm "output" control, and then through a step attenuator. The attenuator system is designed for 600-ohm output up

through 1 volt and high-impedance output at the 3- and 10-volt positions. The 600-ohm positions may be terminated by an internal load for high-impedance work, or this load may be disconnected when an external 600-ohm load is used. In the 3- and 10-volt positions, the internal load is automatically disconnected. The attenuator operates in steps of 10 dB.

The metering circuit measures the voltage at the arm of the output control. A portion of this voltage, determined by the "meter" control, is rectified by a half bridge using crystal diodes. Non-linearity of the diodes at low signal level is

compensated by a third diode across the meter. The meter carries three scales: 0-10 volt, 0-3 volt, and -10-+2 dB. When the instrument is operated with the proper termination, the meter and attenuator will indicate the output level at the binding posts.

I found that both crystal diodes had to be replaced. I also tested all the resistor and capacitor values and replaced any out-of-tolerance ones I found. Fortunately at the time I was able to get the needed parts from Heathkit. I don't remember now what I paid for them, but it had to be \$10 or less.

After making these repairs and giving the AG-9A a thorough cleaning it was time to test it out.

PUTTING IT THROUGH ITS PACES

I brought the AG-9A over to my friend's place and we used his Oscilloscope to check it out. I used the AG-9A for years but retired it some two decades ago for better equipment. I recently brought it back out of mothballs, however, and found that it's still about as accurate today as I remember it was back then. Over the years I've repaired one or two other AG-9As for friends who, for various reasons, didn't want to take on the repair themselves. Some of the parts are harder to come by, but with a little searching and ingenuity you, too, can still repair one.

John Vuolo, e-mail: jvuolo9603@aol.com

John has been working in the telecommunications industry for 34 years. He has been restoring and collecting antique radios, tube amplifiers and receivers, TVs, phonographs, and reel-to-reel machines for 40 years.

RESTORATION REPORT

1934 Majestic Radio Model 55 "Duette"

BY RICHARD MAJESTIC

One of the most iconic art deco radios ever manufactured in the United States is the 1934 Majestic "Duette" model 55. It's one of 33 different Majestic radio models offered as part of the company's "Smart Set" series of radios and it features the then modern deco look and a highly polished aluminum lyre grille.

Introduced to dealers in the summer of 1933, the Duette is a five-tube, two-band set covering the AM broadcast band (535-1550 kc) and the old "police band" (1480-4400 kc.). When I got it, the very nice example of the Majestic 55 pictured here was finished decoupage green with eagle decals and had been electronically repaired some 20-plus years ago.

When I stripped the green paint to restore the radio, the top gloss finish looked like it might have been dark brown originally, or possibly black as paint stripper darkens dark lacquer somewhat. I believed it most likely a dark brown so that's the way I refinished it. According to original factory information, the set had a high gloss "piano finish" and I refinished it accordingly.

BRINGING THE DUETTE BACK TO LIFE

The Hawaiian Lacewood veneer - which some mistake for Birdseye Maple or other types of wood - is in very good condition, except for a dent above the volume knob. The uniquely designed wood knobs were missing when I got the radio, and I still need to get the correct ones. The cloth-covered line cord and plug I replaced look original to the radio now. The grille cloth is an exact reproduction of the original and is held in place with four wood splines made out of precut balsa from the hobby store. The one-piece chassis with enclosed speaker was in excellent condition and very clean. The speaker was also like new and worked perfectly; there were no finger holes and no need for repairs.

The top knob is the On/Off/Volume control; the bottom knob is for tuning. The band switch is located at the back of the chassis and has a small "rosette" knob over it. The polished aluminum lyre grille is in very good condition considering that most others I've seen over the years are somewhat bent, over-polished or just plain worn. The

reception and sound quality is very good, probably the best of Smart Set series of radios, mainly because of the two IF stages and separated audio and AVC detection circuits. A 10-inch-long external antenna works very well, and I was able to pick up more than 15 stations on the AM band and every signal was clean, crisp and very clear. There was no hum, static or buzzing.

A SOUND DESIGN

In 1933 the Grigsby-Grunow Majestic model 55 radio was "a radical departure from the conventional design," incorporating "Majestic

Before restoration

Duo-Valve" tubes. The good pre-selection is obtained through a low-loss antenna coil. The tuned antenna circuit feeds a Duo-Valve (pentagrid converter) 6A7-S that serves as the local oscillator and mixer ("modulator"). The 456-kHz IF output feeds a double tuned IF transformer into the pentode section of the 6F7-S. The plate feeds the second IF transformer. The secondary is tuned and feeds the pentode section of a Duo-Valve 6B7-S into the third primary tuned IF transformer. The untuned IF secondary feeds the second detector diode plate for audio, and the second plate is capacitor-coupled for AVC voltage applied to the three IF amplifier stages, providing very good AVC action. The detected audio feeds the triode section of the 6F7-S and onto the 42-pentode power output stage. The radio is transformer-powered and uses an 80 rectifier; B+ is 250 VDC.

Although during the 1930s most superheterodyne radios used tuned RF stages and one IF amplifier stage, this model 55 radio's 500 series chassis has significantly better selectivity, sensitivity and noise rejection capability as a result of the two IF amplifier stages. Also the second detector for audio recovery is not biased negative by the AVC voltage; instead the company separated the AC audio from the rectified AVC voltage, thereby reducing audio distortion. During this period most radio manufacturers – including GG Majestic, as in the 460 chassis – were still using a 175-kHz IF frequency; however, to minimize shortwave reception images a 456-kHz IF frequency was needed.

Dimensions of this very nice looking radio are 9 x 12 1/2 x 7 1/2 inches (HWD).

Bottom view

The accompanying photos show the radio as received, the green color scheme and the stripping in progress. I will say one good thing about the ugly green paint: it protected the wood nicely!

Richard Majestic, 5640 Superstition Drive, Las Cruces, NM 88011. (575) 521-0018. E-mail: rmajestic@msn.com. Web site: www.majesticradios.com.

Richard Majestic has more than 30 years experience in broadcast television engineering system design and engineering management. He holds 10 patents for digital servo system designs, cryogenic instrumentation, and low-noise analog circuit designs. Richard and his wife are recently unemployed (retired) and moved to Las Cruces New Mexico where Richard was elected president of the New Mexico Radio Collectors Club, a group of engineers and scientists dedicated to preserving early radio, television and computer products.

*Top: Inside view of Version I – Plain cabinet with 01A tubes
 Middle: Fancy cabinet
 Bottom: Version II – 01A tubes*

a decorative front edge. I thought that Silvertone had simply changed cabinet sources.

The labels on both units indicate they were manufactured by King-Hinners Radio Company

in Buffalo, NY. The serial number of the first radio was 10766 and the second was 7549.

End of story. Well, not yet.

Last year I saw another one of these radios

with the same cabinet as the fancy example but not decorative trim. Close inspection showed the outline of the trim had once been there but removed. I believe the trim covered the screws fastening the front panel to the cabinet. Again I opened the lid and there was a different chassis using five UV199 tubes! The 4-volt "C" battery was still present held in by a metal bracket. You know what happened - I had to buy it. It also had a King-Hinners label with a serial number of 6582.

Another surprise in the UV199 radio was a letter dated January 12, 1925 from Sears to the owner

apologizing for not including the instructions with the radio. Included in the envelope were the letter, a wiring diagram, and three pages of operating instructions for both chassis.

Furthermore, I was able to obtain a 1925 Sears catalog (courtesy of John Terrey) that shows this radio and discusses it could be purchased for either dry cell (UV199 tubes) or storage battery (01A tubes) operation. The cost for either radio was \$97.00. The cost for the dry cell tubes and batteries was \$42.50 and \$52.50 for storage cell batteries and tubes. In addition, the catalog

Antique Radio Charlotte 2011

Charlotte, NC, March 24-26, 2011

BY: STAFF

Antique Radio Charlotte 2011 was held on March 24-26, 2011 at the Sheraton Charlotte Airport Hotel.

As always the host of the convention, the Carolinas Chapter of the Antique Wireless Association, organized an excellent event with seminars, flea market, auction, equipment contests, luncheons, banquets, and an opportunity to meet with old friends and make new friends.

The club is well known for its well orchestrated events and the high end hotel is very reasonably priced.

CONTEST WINNERS

The equipment contest was well attended. It was an opportunity to see rare and excellent equipment on display and talk with their owners.

Here is a list of the winners.

1. PRE-1912 ELECTRICAL DEVICES, NON RADIO

1st Thomas Burgess - 1890 Style
Manchester motor

2. PRE-1920 RECEIVERS & TRANSMITTERS AND WIRE LINE TELEGRAPH ITEMS

1st Thomas Burgess - DeForest Syntonezer & Responder

2nd John Reinicke - Morkrum Telegraph
Geoffery Bourne - Bunnell Key on board

3. 1920'S ERA BROADCAST RECEIVERS

A1. PASSIVE DETECTORS

1st Stephen Brown - Wireless Speciaity Apparatus
2nd Merrill Bancroft - Aeriola X (10)
3rd Geoffery Bourne - Gecophone BC1001 w/ head phone box
3rd R L Barnett - Ozarka Hex shaped crystal set

A2. 1 TUBE SETS

1st Merrill Bancroft - RTM & QT Light
1st Gary Alley - Parkin
2nd Barker Edwards - Tuska 224

B. 2-3 TUBE SETS

1st Merrill Bancroft - Fada 140A

C. SETS WITH 4 & 5 TUBE SETS

1st Richard Owens - Pilot Supper Wasp AC & DC Models
2nd Merrill Bancroft - Cardwell 125A
2nd R L Barnett - ERLA S-11
3rd Gary Alley - Trego Compact

D. SETS WITH 6 TUBES OR MORE

1st Gary Alley - Page Model 6

4. 1930'S - 40'S - 50'S ERA

A. CATHEDRALS & TOMBSTONES

1st Robert Lozier - Fascist ERA Peoples Radios

2nd Barry Callis - Majestic Studio 59

B. CONSOLES

Top: Class 3D - Page Model 6
Bottom: People's Choice, Zenith 40A radio owned by
Richard Owens

1st Richard Owens - Zenith 40A
2nd Joe Kolster - Zenith Zephyr

C. CATALIN & BAKELITE

Honorable Mention John Reinicke - Zenith T723

Class 11 - RCA Tube display

Class 7B - Aerchome Model 20 -
Belonged to Jackie Coogan

D. TELEVISION RECEIVERS

No Set Entered

5. TRANSISTOR RADIOS

A. LARGE MULTIBAND PORTABLES

- 1st John Reinicke - Heath Kit GC-1
2nd Richard Owens - Sanyo RP880

B. EARLY POCKET SETS

- 1st Hal Kravig - First Transistor by Western Electric "IF Filter"

C. NOVELTIES SETS

No Set Entered

6. COMMUNICATIONS EQUIPMENT RX & TX

A. PRE WW2

- 1st Geoffery Bourne - Marconi Spark Transmitter

B. POST WW2

- 1st Neil Freedman - Pickering KB-1 Keyboard Keyer

7. SOUND REPRODUCERS, CONES AND HORNS

A. HORNS

- 1st Betty Callis - Graef & Frecartin Graephone Horn
2nd Gary Alley - Meistersinger Cabinet Speaker

B. CONE REPRODUCER

- 1st Buford Chidester - Aerchome Model 20 - Belonged to Jackie Coogan
2nd R L Barnett - British Thomson-Houston Bakelite Speaker

8. MILITARY COMMUNICATIONS EQUIPMENT, ANY ERA

- 1st Geoffery Bourne - Marconi CM-425 Key

9. TEST EQUIPMENT

- 1st John Reinicke - RCA 151 Scope
2nd Raymond Gwynn - Simpon 221 & Weston 280 Volt/Amp meter

10. VACUUM TUBES

- 1st Ron Lawrence - Chain Home Low Valve from England
2nd Geoffery Bourne - Admeraly Pattern 7406 Valves

11. RADIO LITERATURE, BOOKS, MAGAZINES & ADVERTISING

- 1st Merrill Bancroft - RCA Tube Display

- 2nd Geoffery Bourne - Modern Wireless 1923 / 1924

- 2nd Steve Naga - Bakelite Advertising Map US Radio Stations

- 3rd Merrill Bancroft - First 4 Volumes of Wireless Age

12. NEW CONSTRUCTION FROM OLD PARTS OR REPLICAS.

- 1st Philip Taylor - Oscillodyne

13. 'SURVIVORS' COMPLETELY ORIGINAL AND UNRESTORED, ANY ERA, THEY MAY HAVE BEEN CLEANED, BUT THAT'S ALL.

- 1st Barker Edwards - Eveready Model 20
2nd Merrill Bancroft - NR Briggs Elec. Co.
3rd John Reinicke - Home Brew Cigar Box Crystal set
3rd R. Norman Hill - Atwater Kent 60

14 SPECIAL "DISPLAY ONLY" CATEGORY FOR THOSE NOT INTERESTED IN BEING JUDGED. ANYTHING GOES HERE

- John Reinicke - Rylies Radio Repair Sign 2010
Robert Lozier - Lafayette Model EM-47
R L Barnett - Western Electric Speaker

At Home With the Collectors: Mike From Long Island

BY STAFF

This month we visit the collection of Mike who lives in Long Island, NY.

Mike has been collecting since 1983 when he lived in an apartment in New York City. Since space is limited in most Manhattan apartments, Mike made the best use of space as shown in photo 1.

Now-a-days Mike and his family live in a house in the New York suburbs. It is a good example of how a radio collector can integrate his collection in spaces where normally radios aren't allowed – the living room and dining room. Photo 2 shows how radios can be arranged in a cabinet of family photos and memories, and in photo 3 there is a single radio in the dining room area.

The remainder of his collection is in the other two levels of the "split level" home. Photo 4 shows radios as part of his home entertainment center. The other photos are from various places in the basement section.

At this point, Mike has decided to collect only table top radios (mostly

Photo 1: Mike learned how to use space efficiently when he lived in a small New York City apartment

Photos 2 (left) and 3 (above): Integrating his radio collection into the decor of his family's home gives Mike more opportunities to display some of his most striking pieces.

Photos 4 (above): Radios displayed as part of the home entertainment center. Photo 5 (below): Mike only does cosmetic repairs to his collection. Photos 6 and 7 (bottom): The remainder of his collection is displayed on shelving in the basement.

wood) – no consoles or televisions – as well as a number of portable radios. Most of his radios are U.S. made while many of the portables are foreign and quite unique. Also, many of his radios are rare and difficult to find such as those from Ozarka, Pilot, or Defiant.

The only repairs he performs are cosmetic and out-sources any electronic repairs.

It's nice to see a collector who makes the best use of space to exhibit his collection both in the main sections of his house as well as his "Radio Cave" area.

DO YOU KNOW YOUR A.R.C. SUBSCRIBER BENEFITS?

Since becoming publisher I've asked many of our subscribers about the benefits that come with a subscription to *Antique Radio Classified*.

These have included both our print subscribers as well as our online edition subscribers. The only difference between the print and online subscribers is that the online subscribers pay a reduced subscription rate and don't receive the print magazine.

Many of the people I spoke with didn't know about our subscription benefits.

Let's take a look at them:

ABILITY TO LOOK AT THE MAGAZINE ONLINE

As a print or online subscriber you can look at the latest issue of the magazine online on our web site. This is the entire issue of the magazine and not an abbreviated edition. Subscribers can look at the last four issues of the magazine. Non-subscribers can look at earlier editions of the magazine at no cost.

One advantage of the online edition is that any photograph sent to us in color is posted in color!

ABILITY TO LOOK AT PAST AUCTION RESULTS

Almost every month we publish auction results in the magazine. Did you know that we have a database of the auction prices online on our web

site? Subscribers can look at the auction results and they are SEARCHABLE! If you want to see if a specific radio, piece of equipment, tube, magazine, etc. that has been sold, all you have to do is enter the item and see every time the item has been sold as well as the price, auction house, and date!

ABILITY TO LOOK AT ONLY THE CLASSIFIED ADS

Subscribers can also look only at the classified ads without downloading the entire magazine. This is very useful for readers who just want to read the classified ads. Readers with dial up Internet service will save a lot of downloading time.

FREE MONTHLY CLASSIFIED AD

Each month a paid subscriber is entitled to place a free classified ad in the magazine. The classified ad can be up to 50 words. Additional words are 10 cents each. Classified ads can be submitted by email, fax, or mail. Typewritten preferred to reduce possible errors. Name, address and telephone number count as 6 words. Full name and address are required in all classified ads.

Of course the most important benefit to the subscribers of *Antique Radio Classified* are the articles containing information that will help you in increasing your knowledge of our hobby.

HOW DO I ACCESS THESE BENEFITS?

Your print subscriber user ID and password are on your mailing label. Online subscribers are emailed their user ID and password. Your user ID is the number after "SUB#" on your mailing label. Your password is the digits in brackets [xxxx] after your "SUB#".

Go to A.R.C.'s home page www.antiqueradio.com and click on Subscriber Only Page.

On the *Subscriber-Only Access* page you can click on the Full Issue you would like to view or click on the Classified Ads section from that issue.

Or you can click on the Auction Prices Data Base. Just enter the item that you are researching.

A.R.C. RATES & POLICIES

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA, MasterCard, American Express or Discover. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or our secure website. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by credit card via our secure website or send a check or money order, state the amount being sent and that the payment is in the mail. **Do not** send another copy of your ad with your payment; simply indicate that it is a payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax. For your protection, please no credit cards by e-mail, use our secure website only.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the last day of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork via e-mail or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed (size in magazine)		Cost for 1-month	Cost for 3-months	Cost for 6-months	Cost for 12-months	One Time to make up Ad

† For 6 and 12 month ads, no ad make-up charge if no change is made to ad for entire run.

E-mail: arc@antiqueradio.com

Web: www.antiqueradio.com

A.R.C. RATES & POLICIES

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 50-WORD AD for subscribers in each issue; additional words are 10¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by Noon Eastern Time on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted. Free ads are OK via e-mail but for your protection, please use our secure website for longer, paid ads.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive months up to your subscription expiration; 12-months, maximum) you want the ad to run.

To minimize our typing errors: **Please write legibly.** Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital i and the small L.) Also: 0, O, o, Q and D; v, r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address are required in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 50 words may not be used for club activity ads. A discount on display advertising is available for clubs.

Classified Ad Rates per Month

Deadline: NOON ET- 10th of the month!

Subscribers (First Ad):

First 50 words: **FREE!**
10¢ per word for words over 50

Subscribers (Ads after first ad):

10¢ per word for all words

Non-Subscribers:

30¢ per word

Please do not forget to send in the extra 10¢ per word when your classified ad runs over the free 50 words; your payment will be appreciated, and it will help to keep A R C. healthy.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month
for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$10.00 per month for each photo or drawing
(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address are required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

E-mail: arc@antiqueradio.com

Web: www.antiqueradio.com

PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

Grundig Majestic model M1PX – manufactured in Germany in 1958. This six tube mono radio/phonograph console covered the AM, FM, and shortwave bands from 6 mc to 16mc. The record changer is marked Grundig and came with the 45 RPM record spindle. *Roger Smith - Lawrence, KS.*

Emerson model 250-AW – manufactured in 1933. This is a five tube radio that covered AM and short wave. It has two knobs in front and the band switch in the rear. *Jerry Fulcrum - Sioux Falls, SD.*

PHOTO REVIEW

Precision model 640 tube tester – this is a cathode conductance tube tester that tested both the older and newer style tubes. Made during the 1950s. *Jaime Lopez - Phoenix, AZ.*

Philco model 54C – This table radio has two bands – AM and short wave. There is a painted faux finish. The volume and tuning knob are in front and the band switch is in the back. It has five tubes and was AC or DC powered. *Larry Green - St. Paul, MN.*

Fisher model 90-T – This is an AM/FM mono tuner pre-amplifier manufactured approximately 1958. It features a tuning eye and inputs for phono, tape, aux 1, and aux 2. *Arthur Morris, Englisht:cwn - NJ.*

PHOTO REVIEW

Benjamin Miracord Elac 10H turntable – German made turntable from the early 1960s. Played at speeds 16, 33, 45, 78 RPM and 7", 10", and 12" records. Came with spindle to stack records. *Norman Hughes - San Francisco, CA.*

E. Singer Compendyne radio – This TRF battery set was made in 1924 and uses 5 01A tubes. Came with station log and battery. *Jon Kummer - Port Washington, NY.*

Western Electric model 540 Speaker – manufactured approximately 1923. Speaker cone needs to be replaced. *Elmer Petersen - Seattle, WA.*

PHOTO REVIEW

Zenith model 6D628 radio – Interesting grillework on this 1942 radio. Covers the AM band with six tubes. Runs on both AC and DC power. *Robert Brettschneider - Queens, NY.*

Penron HF-400 Reel-To-Reel Tape Deck – Manufactured in 1956. This mono deck was called the “Emperor” and has two speakers in the cabinet and one external speaker referred to as a tweeter. There are seven tubes. *Sam Goetzmann - Memphis, TN.*

Motorola SH18GL Portable Phonograph – This “portable” phonograph weighs about 45 pounds. Has six tubes and two detachable speakers with 10 feet of wire. Made in 1959 with a four-speed record changer. *Ari Hourani - Bangor, ME.*

Sargent Auction Service

Presents

ANOTHER GREAT RADIO/ PHONOGRAPH AUCTION

Saturday, September 24, 2011

Main Auction starts at 10 am CST
3630 Cavalier Drive
Garland, TX 75042

Sale includes items from at least 3 estates, plus additional consignments. We expect this sale to include radios, phonographs, consoles, table models, battery and electric, some tube audio amplifiers and tuners. Consignments are still coming in, so the list is not complete at this time. Watch our website for updates.

DON'T MISS THIS SALE!

Check the photo line-up at www.sargentauction.com
Absentee Bids will be accepted by contacting the auctioneer. Doors open for previewing on Friday, September 23rd, from 4 pm to 8 pm. Day of auction preview begins at 8 am. First auction of lesser quality items begins at 9 am, followed by the Main Auction beginning at 10 am. Even though many of the items in the Main Auction have been electrically and cosmetically restored/repaired, all items will be sold "as is, where is". Announcements made day of sale take precedence over other advertisements.

Terms: Cash, check, VISA, MasterCard, and Discover
5% buyers premium for on-site sales, 10% if sale is via absentee bid

OLD TECH BOOKS & THINGS

What am I doing after A.R.C.? I now have time to sort through the dozens (probably 100s) of boxes of duplicate items in my collection... books, catalogs, manuals, pamphlets, horn speakers, radios... and offer them via my long-dormant business: Old Tech - Books & Things. Old Tech handles more than just radio-related items... included are vintage television, wireless, skiing, computers, musical synthesizers, and more. For details on what's for sale, visit:

www.oldtech.com

or contact:
John Terrey
Old Tech - Books & Things
P.O. Box 803, Carlisle, MA 01741

CRYSTAL CLEAR

By Maurice L. Sievers

Volume 1

750 Illustrations – 570 Crystal Sets
341 Detectors – 207 Crystals
Perfect for the beginning collector!
Useful for the experienced too!

Crystal Clear is the most comprehensive reference for collectors, historians and anyone interested in early radio. In addition to the many excellent photos and reproductions of ads, *Crystal Clear* includes lists showing all sets by manufacturer, set name, selling price and date of manufacture. 8 1/2" x 11", 282 pages.

\$29.95 – Softcover

Volume 2

Crystal Clear, Vol. 2 supplements the first volume. It identifies an additional 172 crystal radio sets, 91 crystal detectors and 26 crystals by manufacturer, model, year produced, description and original selling price. Further research on many of the crystal sets covered in Volume 1. Detailed history on the Philmore Manufacturing Company and the Western Manufacturing Company. 8 1/2" x 11", 252 pages.

\$29.95 – Softcover

Everything stocked and shipped promptly — Radio is our middle name.

**A.R.C., PO Box 1558, Port Washington, NY 11050 – Toll Free: (866) 371-0512
Fax: (516) 883-1077 – E-mail: ARC@antiqueradio.com – Web: www.antiqueradio.com**

U.S. orders \$3 for first book, \$1 per additional book (typical U.S. order will be received within 7 days, but allow 2-3 weeks). Most orders shipped by next business day. Send payment with order. New York residents add sales tax. Non-U.S. orders, contact us for shipping costs. For your protection, if using a credit card, use our secure website. Do not send credit card information via e-mail.

- Take I-495 Exit 32. Head south following the "To Rte. 225" sign & go only 0.1 miles.
- At the traffic light by the two gas stations, turn right (westbound) onto Rte. 110.
- Follow Rte. 110-west for 0.4 miles. The Westford Regency will be on your right.
- Take the first Westford Regency driveway and follow it to the large parking lot.
- Enter the Regency using either of the two double-doors facing the parking lot.

RCA Tube Manuals – All Tubes All The Time!

RCA Cunningham Radiotron Manual RC-12 Now available again as a reprint, this is the RCA Cunningham Radiotron Tube Manual RC-12. Originally published in 1934. All the information you need on pre-1934 tubes. Soft cover, 154 pages. \$16.95

RCA Receiving Tube Manual RC-14. The reprint of the 1940 RCA Receiving Tube Manual RC-14. Final manual produced by RCA before WWII, contains data on many tubes which were obsolete by publication of the next manual. Valuable historical data. Soft cover, 255 pages. \$11.95
