## Vintage Radio Auction

**Saturday, August 31, 2013 - 10AM EST**

At the Expo Auction Center  
 8157 Garman Rd., Burbank Ohio  
 From I-71 Exit #204 turn south on SR #83 then turn left at the Love's gas station onto Garman Rd., follow it 1/4 mile to the auction.

**Featuring a "Zenith Walton" a "Majestic Dealer Eagle"**

**RCA 9 PC 41 Projection Television.**

**1940's era Emerson Projection Television.**

**Crosley Grandfather Clock Radio.**

This will be another large sale with lots of items, and will feature a large selection of cathedral and tombstone radios including the 75232 Zenith "Walton" and a Philco 90 cathedral radio. We will have loads of table radios, wood and bakelite types, nice array of circa 1920's battery sets and horn speakers, cone speakers, and other types. There will be lots of amateur radio pieces transmitters, receivers, transceivers, transmitting tubes, a Cushcraft vertical, a tri-band beam, some military pieces also. Many audio items, many pieces of radio test equipment, including tube testers. Lots of radio tubes, many early types, many bulk lot type tubes, a big selection of radio books, magazines, price guides, repair manuals, radio call books, lots of radio parts, records will include Edison cylinder records, Edison diamond disc type, 78 RPM disc records, 45 RPM disc records, several phonographs. There are crystal sets, headphones, a nice majestic melody cruiser, Zenith Transoceanics, novelty radios, transistor radios, Western Union telegram clock. Our early sale will include radios to restore or use for needed parts, test equipment, parts, books, manuals, box lots and more. And the regular sale will have a selection of console radios and several console phonographs. This will be a good sale and we hope you can attend. We will be at the AWA Rochester meet during August to check out the new museum and also conduct the auction there, so we hope to see you there also!

## THE HISTORY OF RADIO ON CD-ROM

Radio Era Archives produced the QST-VIEW series of CD's for the American Radio Relay League (ARRL) and over 1/2 million CD's have been sold. QST Magazine has been continuously published since 1915. We are now proud to announce that this small mountain of CD's (about 35) is now available exclusively from REA (All Sets) ! Every magazine published from 1915 to 1994, front cover to back cover, every article and column, all accessible with our database search engine.

QST-VIEW CD Edition truly captures the history of radio in 11 volumes. All CD's warranted to work on all Windows platforms from Windows 95 through XP. Each set is \$ 39.95 and we have all sets in stock. The sets are: 1915-1929, 1930-1939, 1940-1949, 1950-1959, 1960-1964, 1965-1969, 1970-1974, 1975-1979, 1980-1984, 1985-1989, 1990-1994. Each set of years is a self-contained set so you can operate one or all sets together. Now that large capacity hard drives are so inexpensive, the 36 CD's can be loaded on about 20Gb of hard disc space for instant searching and viewing without having to swap discs! Full information is provided with each purchase and QST-VIEW has on-line instructional help for operating the QST-VIEW browser!

**EACH SET \$ 39.95 (specify the years)**

**ALL 11 SETS \$ 379**

**S&H USA for first set is \$ 5.00, add \$ 1.00 each set thereafter**  
**S&H Export first set is \$ 15.00, add \$ 2.00 for each set thereafter**

POSTMASTER: Send address changes to  
Antique Radio Classified, PO Box 1558,  
Port Washington, NY 11050.

Printed in U.S.A.

**PURPOSE** - Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

**Publisher:** Jon Kummer; **Layout:** Maureen Schwarz; **Publisher/Editor Emeritus:** John Terrey; **Founding Publisher/Editor:** Gary B. Schneider; **Contributing Editor:** John Terrey; **Contributing Writers & Consultants:** Mike Adams, Ray Bintliff, Ray Chase, Dave Crocker, Alan Douglas, Richard Foster, Daniel Schoo, John Vuolo.

## CONTACTING ANTIQUE RADIO CLASSIFIED

All correspondence should be sent to:  
A.R.C., PO Box 1558, Port Washington, NY 11050  
Telephone: (866) 371-0512; Fax: (516) 883-1077  
Email: [ARC@antiqueradio.com](mailto:ARC@antiqueradio.com)  
Web: [www.antiqueradio.com](http://www.antiqueradio.com)

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However A.R.C. does solicit letters of interest from its readers and publishes them as space permits.

**ADVERTISING.** Display and Classified advertising rates and artwork specifications are available on the web site.

**CHANGE OF ADDRESS.** Please notify us in advance of a change of address. Send your new address, your old address, your SUB# and the effective date of the change.

**PUBLISHING RIGHTS.** Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, email, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

**DISCLAIMER.** The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

**NOTICE.** Subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

**ATTENTION SUBSCRIBERS:** All paid subscribers receive a FREE classified ad of up to 50 words in each issue.

## Publisher's Comments

As discussed last month, this will be the March/April 2013 combination issue. We are trying to catch up and make the issue date current. Since we are combining 2 issues, as promised, all subscribers will have their subscriptions extended by one issue.

Ray Bintliff has an excellent article on Sound Quality in Early Battery Radios. Ray takes a look at the manufacturers' claims, audio frequency response curves, the real world, and The Road to Better Sound Reproduction. This article has excellent graphs and will be an asset to all those interested in Battery Set Sound Reproduction.

This issue will be distributed at the Antique Wireless Association Convention in Rochester, NY taking place from August 20-24, 2013. We have the complete schedule of presentations, banquets, as well as photographs from last year's Convention.

Did you know that Major Edwin Armstrong was a resident of Yonkers, NY? Yonkers is a small town just north of New York City. For many years Steve Klose and others have worked tirelessly to have a plaque dedicated to "the Major" in Yonkers. Finally, on June 17 the plaque was finally unveiled. The unveiling was attended by my local politicians, members of the New

Jersey Antique Radio Club, and other radio enthusiasts. It was a beautiful day for the unveiling and a great time was had by everyone.

On April 20, 2013 the New Jersey Antique Radio Club held their semi-annual radio meet in Parsippany, NJ. About 125 people attended the meet. There were many battery sets as well as AC radios and televisions represented.

A new book has been released. *Wireless at War* by Peter Jensen. It is a history of radio in war time covering the period 1895 to present. The book has 352 pages of excellent information for people interested in war time radio. Be sure to pick up your copy as soon as possible.

Thank you and until next month happy collecting.

Jon Kummer  
Publisher

### On The Cover

This month on the cover we have the June 17, 2013 unveiling of the Edwin Armstrong memorial plaque in his home town of Yonkers, NY. See Further information on page 12 of this issue.

# Sound Quality in Early Battery Radios

BY RAY BINTLIFF, W1RY

Some time ago while working on a Freshman Masterpiece, I got thinking about the sound quality of the battery-operated radios from the early 1920s. As a result, I ran some frequency response curves on the set. The Freshman is now long gone but I recently unearthed the frequency response data during a purge of ancient files. A Freshman Masterpiece, circa 1924, is shown in Figure 1.

Figure 1. A Freshman Masterpiece, ca. 1924. This 5-tube Tuned Radio Frequency (TRF) set used two TRF stages, a detector and two stages of audio amplification.

## Manufacturers' Claims

Advertising from that period praised the clarity of sound that emanated from a given manufacturer's product. Advertising hype has always been around. So did these radios sound as good as the manufacturers claimed?

Let's take a look. Figure 2 shows the audio frequency response curve for the 1st audio transformer used in the Masterpiece. The useful frequency range extends from approximately 50 Hz to 9 kHz which is more than adequate for good reproduction as it was defined in the 1920s. However, some minor peaks occur at 5 kHz and 8 kHz. Figure 1 has been simplified for easy interpretation.

Figure 2. The audio frequency response curve for the 1st audio transformer.

## About Audio Frequency Response Curves

Frequency response curves came into use in the 1920s. They were a relative simple means of evaluating an audio circuit and cascading audio circuits. In the 20s and 30s the equipment used to perform these tests was very basic. The collection of response data is typically accomplished by applying a 1 kHz audio signal to the input of the circuit under test and its output voltage is measured. (Usually with an accurate AC voltmeter). This measured value is the reference voltage to which all other outputs are compared. A variable audio frequency generator is used to apply a number of input frequencies and the output of each chosen frequency is measured and recorded. These data are then recorded as dots on logarithmic graph paper like that shown in Figures 2 and 3. The dots are then connected by a hand-drawn line and a frequency response curve is produced. (So that I do not get lots of letters, let me state that the above description is very basic. There were in fact some very elaborate devices that automatically tuned the audio signal generator and a recording pen mechanism that produced response curves).

In addition to frequency response, the measurement of waveform distortion is an important factor in determining the quality of an audio signal.

## Multi-stage Response Curves

Figure 3 shows the overall response of the two audio frequency amplifier stages of the Masterpiece. The smoother curve shows the output level at the plate of the audio output tube when the output was terminated in a 2,000 ohm resistor – a typical load resistance for a magnetic speaker or headphones. There are two inconsequential peaks at 4.5 and 8 kHz. Connecting a horn speaker, an inductive load, instead of the resistive load resulted in a 10 dB peak at 8 kHz.

Figure 3. The audio frequency response for the 1st audio and audio output stages.

## The Real World

What does all this mean? The audio stages produced a reasonably flat frequency response which is good. But that is not the end of the story. What of the actual sound reproduced by the speaker? Early, horn speakers, like the one

shown in Figure 4, are very efficient devices. However, their frequency response was poor. Alas, at the time I lacked (and still lack) an anechoic chamber and a calibrated microphone necessary to produce a response curve for an early horn speaker. That 10db peak at 8 kHz may have been attenuated by the speaker's stiff diaphragm. For any sound reproduction system, the quality

of its output is no better than its weak-

mounted in the base.

Figure 4. An early horn speaker with its driver mounted in the base.

est link. In this case, it was the tinny sounding speaker.

But in the early 20s radio listeners were happy to be able to listen to radio stations regardless of the quality of sound. The thrill came from hearing those distant radio stations. Also keep in mind that these radio listeners were accustomed to listening to acoustical phonographs that also used horns. The radios must have sounded good when compared to those phonographs that were noted for their limited frequency response and scratchy record surfaces.

## The Road to Better Sound Reproduction

Over time, advances in radio technology produced better sound reproduction. The development of the electrodynamic speaker solved the problem of limited low frequency response. Manufacturers began adding tone controls to their radios. Variable band pass IF stages that offered better frequency response were included in high end radios. Noise suppression circuits were developed. Beam power tubes, such as the 6L6, enabled greater power output. Radio buyers were becoming more discriminating and wanted better sounding radios. Radio advertisements began to emphasize "High Fidelity" and the race to HiFi, FM and stereo began.

# **Antique Wireless Association 2013 World Convention Rochester, New York August 20-24, 2013**

The Antique Wireless Association will be holding their convention in  
Rochester, NY August 20-24, 2013.

Listed below is the schedule of events and some photographs of last year's convention.

## **Schedule of Events**

### **Tuesday August 20**

**9:00am**

Registration opens at The RIT Inn  
AWA Book Fair opens  
Special Events Station W2AN is on the air

**2:00pm -5:00pm**

The Grand Opening of the Museum. A gala afternoon with refreshments and entertainment by the Canadice Quartet. We will be honoring those who played such an important part in this endeavor. Don't miss seeing our wonderful new facilities and all the new displays.

**7:00pm**

AWA International Dinner at The Holloway House. A dinner honoring our International Members held in our most historic venue. But open to anyone who has registered for the Convention. A fascinating look into the collectors and their collections not often seen in America. **OPEN ONLY TO PRE-REGISTERED ATTENDEES!**

The Holloway House is where some of the earliest banquets were held. The food is delicious.

### **Wednesday August 21**

**8:00am**

Registration opens  
Book Fair opens

**9:00am**

Station W2AN (sign up to do a shift! We need operators. Non Hams welcome with advance notice.

**10:00am**

Presentation, Anders Widell, The Radiomuseum in Jonkoping, Sweden, a museum that was founded by the late Erik Karlsson.

**11:00am**

Presentation, Bengt Svensson, highlights from some of the early AWA Conventions

**11:45am**

Lunch break

**1:00pm**

Presentation, Paul Jason, K2FX, Modern Radio. A convention favorite. Rochester DJ Paul explains it all.

**2:30pm**

Presentation, Jerry Begel W9NPI  
The Singing ARC, "Unconventional Communication Methods". Covering: James Lindsay Bowman-Underwater; Mahlon Loomis and his Aerial Theories; Duddell and Pohlson's Arcs; and Spinning Wheels: Generator and Alternator Transmitters.

**3:30pm**

Presentation, Steve Auyer, GE Portables

**4:30pm**

Presentation, Dan Bedford, A Discussion of Radio Collecting in Australia. Dan is a relative newcomer to our international group, but has already made quite an impression!

**7:30pm**

Party FREE to attendees of the AWA Convention. This a great evening of fun. So get out your dancing shoes and get ready to eat pizza on us. Sorry, the beer is on you.

### **Thursday August 22**

**5:00am**

Round-the-clock Flea Market opens. Food and beverage service will be available on-site Thursday through Saturday.

**9:00am**

Registration continues

Book Fair

Presentation, Mike Molnar, Hazeltine & the Neutrodyne

**10:00am**

AWA Members' Forum. Be ready with questions, discussion topics, suggestions, regarding the operation/mission of the AWA.

**11:30am**

Ladies Luncheon. OPEN TO ALL.

**1:00pm**

Presentation, Mike Adams. A Conversation with Eleanor de Forest. Mike met and videotaped Lee de Forest's daughter, who was born in 1919. Lived with Lee 1919-1926 and kept in touch all his life. The focus of the interview was on de Forest the person, the father, and husband.

**2:00pm**

Presentation, Bart Lee. Radio Archeology: Do It Now Before It's Too Late.

**3:00pm**

Key & Telegraph Seminar. Tom Perera WITP, moderator. Prof. Franz Pichler: The Cooke/Wheatstone Telegraph; Ivor Hughes: Telegraph New Pioneer Daniel H. Craig; Bill Burns: Atlantic Submarine Telegraph Cable BBroadsides; Gil Shlehman: Semi-Automatic Keys.

**6:00pm**

Heath Banquet: Dinner presentations, discussions and fellowships hosted by Chuck Penson. **OPEN ONLY TO PRE-REGISTERED ATTENDEES.**

**8:00pm**

Moonlight Restorations Seminar, Marc Ellis, host. Case histories of challenging restoration projects.

Dan Bedford – Building a look-alike to a 1 tube AK breadboard set

Dan Gervais – Dan will present a program on constructing a semiconductor replacement for a 6X5 rectifier and also demonstrate methods for gluing veneer on curved surfaces.

Richard Modaffieri – Rebuilding miniature IF transformers

Dan Merz – Dan is sending a powerpoint presentation on rebuilding a Crosley cathedral rescued from a landfill

**8:00pm – 11:00pm**

Old Equipment Contest check in

After Moon light Restorations: Movie Night: Greatest Hits of the AWA. A collection of rare video presentations made by some of the early AWA pioneers. Begins at the conclusion of Moonlight Restorations.

**Friday August 23**

Continuation of Flea Market – Open to general public

**8:00am – 5:00pm**

Public Book Fair

**8:00am**

Old Equipment Contest (last minute check-in)

**9:00am**

Old Equipment Contest (judging)

Presentation, Tom Perera, A Major Talk on the Enigma

**11:00am**

Presentation, Roy Wildermuth. From Ule to Man: The Development of the Military Squad Radio in Allied and Soviet Armies from WWI through present. Roy discusses the use of the squad radio in becoming an essential tool for the modern warfighter.

**12:00noon**

Contest Viewing

**1:00pm**

Presentation, Richard Brewster, WWII Television System. A demonstration.

**2:00pm**

Pre-1912 Wireless and Electrical Apparatus Seminar. Lauren Peckham and Felicia Kreuzer moderators.

**3:00pm \***

Review of Amateur Operations. Time Walker

**2:00pm – 5:00pm**

Main Auction check in

**6:00pm**

Social Hour – Banquet Dining Room (Full bar)

**7:00pm**

AWA Members' Banquet. Keynote Speaker, Dick Goslee. Dick was the manager of the Rochester, NY Heathkit Store for many years.

**SOCIAL HOUR AND BANQUET  
OPEN ONLY TO PRE-REGISTERED  
ATTENDEES!**

**9:00pm – 11:00pm**

Auction preview

**11:00pm**

Old Equipment Contest Viewing

**12:00 midnight**

Contest Pickup

**Saturday August 24**

**8:00am**

Petals Restaurant open for Special Auction  
Day Breakfast

**7:00am – 8:00am**

Auction Preview

**8:00am – 2:00pm**

Book Fair

General Auction to run continuously from  
8:00am to 3:00pm.

---

# Edwin Armstrong Plaque Dedicated

BY RICHARD LEE

After almost three years, the dream of Englewood Cliffs New Jersey resident Steve Klose has come to fruition! On Monday, June 17th, the elders of the Yonkers City Council, including Mayor Mike Spano, unveiled the commemorative plaque to Major Edwin H. Armstrong. As you probably know, "The Major" was a resident of Yonkers during his formative years between 1898 to 1920. Attending the ceremonies were over 60 interested parties and two of Armstrong's ancestors, grand nephew Steve McGrath and great grand nephew Adam Brecht. Mr. Brecht spoke anecdotally of stories he had overheard as a young boy about the grand house at 1032 Warburton Ave. that was demolished in 1983.

The location of the plaque is a fitting tribute to Armstrong's enjoyment of trains at an early age, located at the elevated entrance to the Greystone station of Metro North. By looking to the extreme left (about 75 yards) of the plaque, you can see where the Warburton Ave. house once stood, now an apartment house. Looking over the concrete abutment on which the plaque is mounted, you can see the Alpine Tower, built in 1937, standing majestically over the Palisades and Hudson River. We

can only speculate how, as a young man, Armstrong envisioned building a tower and station (W2XMN) for his experimental FM transmissions, just across from his boyhood home!

The unveiling festivities started at 1PM with a flurry of political speeches celebrating Armstrong's accomplishments and the pride the city of Yonkers has for their most noted former resident. Media coverage was thick. Radio station WFDU FM's Barry Scheet was there with a video crew for webcasting, as was Hudson Valley local news channel 12. Long time Armstrong admirer Steve Hemphill's low band FM license for 42.8 MHz and homebrew transmitter allowed him to broadcast the ceremony from the Alpine tower; it could be heard for those of us with older FM band receivers. In addition, NJARC's technical coordinator Al Klase showed off his DJ'ing skills with vintage experimental FM recordings and commentary. NJARC member Dave Terwilliger stayed up late the night before and got his 1941 low band FM Pilot model T301 receiver in good working order to the delight of the attendees.

Steve Klose's opening statements about the funding of the Armstrong plaque gave credit first to the NJARC and then to the HARPS followed by the Armstrong foundation and individual donors. The event closed with Steve Klose inviting everyone for refreshments provided by his wife Marie. What could be more appropriate than to have a piece of cake with Armstrong's portrait imprinted on it!

Why it took a New Jersey history buff so long to awaken Yonkers to the commemoration of Edwin Armstrong is a story yet to be told, and we hope to have Steve Klose tell it at a future NJARC meeting.

## Wireless At War

# Developments in Military and Clandestine Radio 1895 to 2012

BY PETER R. JENSEN  
ROSENBERG PUBLISHING PTY LTD., AUSTRALIA

Since 1895, when the history of wireless communication began, some of the most inspired and significant technological advances have been spurred by warfare. Following the demonstration by Heinrich Hertz in 1885 of the existence of electromagnetic radiation, this new field of science was at first investigated by a relatively small group of experimenters, supported by the early telecommunications industrial entities such as the Marconi Company in Great Britain, and Telefunken in Germany, based on the system developed by Professor Braun in conjunction with Adolf Slaby and Georg von Arco.

After 1900, as the potential advantages of wireless technology to the battlefield and for marine warfare became known, interested industrial organisations multiplied, keeping pace with the growth of the armies and navies.

That twentieth-century warfare helped to speed the development of radio and electronic communications is important to note.

Describing how warfare has led to improved systems of communications and a progressive diminution in size and weight of apparatus is one of the main objectives of this book.

In following the development of military wireless or radio initially, Great Britain is a major source of Australian inspiration; only later does America appear in the context of military radio used in Australia. This reflects the developments in Australia's international relationships. Since the 1950s, geographical realities and the emergence of bitterly fought wars in Southeast Asia, and Vietnam in particular, have furthered an alliance with the United States that was initially forged in the Second World War. In more recent times it has led to Australian involvement with the United States in its pursuit of change in Afghanistan and the destruction of al-Qaeda.

The book is copiously illustrated with 250 photographs and diagrams. For the enthusiasts there are projects showing how to make some of the radios featured in the book.

The author is an architect and town-and-country planner who has been involved in electronics, amateur radio and microcomputers for many years. He is a member of the Wireless Institute of Australia and the Historic Radio Society of Australia as well as the British Vintage Wireless Society. His research at Sydney University has looked at the future of personal communications and the internet and their potential impact on city form.

# CLASSIFIED ADVERTISEMENTS

**FOR SALE:** Federal. (same people who made those great old radios), "Candlestick-type" telephone. Has familiar "Federal Telephone & Telegraph" metal tag. A keeper! \$115. Dave Crocker, 35 Santuit Pond Rd., #4B, Mashpee, Cape Cod, MA 02649. Tel. (508) 477-1578, before 9 p.m. EST please, Thanx.

**FOR SALE:** Old keys, bugs, telephones, mikes, huge insulator, portable radio, fire alarm system, power tubes, quack violet unit, 85 years old, antenna tuner. SASE for list describing details. Robert Enemark W1EC, 47 Colonial Rd., Westbrook, ME 04092.

## Practical Radio Repair – Volume II

by Ray Bintliff

**\$22.95 - 126 pages, 315 illustrations, soft cover**

Volume I of *Practical Radio Repair* by Ray Bintliff is one of the hottest selling titles in the A.R.C. Bookstore.

Volume II complements the original volume and provides additional information regarding special tools, test adapters, supplies, chemicals, and shop set-up. An excellent book for both the experienced restorer as well as the novice learning repair.

## OLD TECH BOOKS & THINGS

A 2,000 sq. ft. museum is not enough space for my 1000+ set collection. And, hundreds of boxes await either space in the museum or sale. Some things must go! Choices must be made. As the late Dr. Muchow said, "As collectors, we truly are temporary caretakers of these historical artifacts."

Items for sale are either duplicates or the result of fine-tuning the scope of my collection.

For details on these items and much more, visit:

[www.oldtech.com](http://www.oldtech.com)

or contact:

**Order today. We gladly accept:**

\$3.00 shipping & handling on all U.S. orders (typical U.S. order will be received within 7 days, but allow 2-3 weeks). Non-U.S. orders, write for shipping costs, or use credit card. Most orders shipped by next business day. If using credit card, include name on card, card number and expiration date. Send payment with order. New York residents must add sales tax.

# A.R.C. RATES & POLICIES

**PAYMENT.** Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA, MasterCard, American Express or Discover. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

**FAX & E-MAIL PROCEDURES/PAYMENT.** Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or our secure website. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by credit card via our secure website or send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax. For your protection, please no credit cards by e-mail, use our secure website only.

**CHANGE OF ADDRESS.** Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

**SUBMISSION OF MATERIAL.** Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

**PUBLISHING RIGHTS.** Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

**MAILING OF ISSUES.** U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the last day of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

**DISCLAIMER.** The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

## DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

*The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.*

**Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.**

Advertising must be prepaid, except as noted below; see Payment paragraph above for details. Late ads will be run only if space and time permit. **Originals must be the artwork size listed below.** Send all artwork via e-mail or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to repair your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. **Do not cut or trim photos or glue photos to artwork; submit separately.**

If you are confused by these requirements and terms, please

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed (size in magazine)	
	H x W (inches)		H x W (inches)	
Full	7 3/4 x 4 3/4		7 3/4 x 4 3/4	
1/2 H	3 5/16 x 4 3/4		3 5/16 x 4 3/4	
1/2 V	7 3/4 x 2 1/4		7 3/4 x 2 1/4	
1/4	3 5/16 x 2 1/4		3 5/16 x 2 1/4	
1/8	1 5/8 x 2 1/4		1 5/8 x 2 1/4	
Business Card (1st)	2 x 3 3/4		1 1/4 x 2 3/8	
Business Card (2nd....)	2 x 3 3/4		1 1/4 x 2 3/8	

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

**First business card per advertiser is at lower rate.**

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

	Cost for 1-month	Cost for 3-months	Cost for 6-months	Cost for 12-months	One Time to make up Ad

## CLASSIFIED ADS • DETAILS AND RATES

**ONE FREE 50-WORD AD** for subscribers in each issue; additional words are 10¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted. Free ads are OK via e-mail but for your protection, please use our secure website for longer, paid ads.

**Faxed & e-mailed ads: Please see additional information on opposite page.**

**When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper.** Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive months up to your subscription expiration: 12-months, maximum) you want the ad to run.

**To minimize our typing errors: Please write legibly.** Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, I and l (the number one, the capital I and the small L.) Also: 0, O, o, Q and D; v, r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

**Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.**

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address are required in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

**Clubs:** Since club activities receive free coverage on the *Coming Radio Events* pages, the free 50 words may not be used for club activity ads. A discount on display advertising is available for clubs.

### Classified Ad Rates per Month

**Deadline: NOON ET- 10th of the month!**

Subscribers (First Ad):

First 50 words: **FREE!**

10¢ per word for words over 50

Subscribers (Ads after first ad):

10¢ per word for all words

Non-Subscribers:

30¢ per word

Please do not forget to send in the extra 10¢ per word when your classified ad runs over the free 50 words; your payment will be appreciated, and it will help to keep A.R.C. healthy

### PHOTO & DRAWING DETAILS

**Deadline: 1st of the month**

**for all ads with drawings or photos!**

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

### Photo and Drawing Rates per Month

\$10.00 per month for each photo or drawing

(If ad is canceled, this amount cannot always be refunded.)

### CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

### IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address are required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

## DO YOU KNOW YOUR A.R.C. SUBSCRIBER BENEFITS?

Since becoming publisher I've asked many of our subscribers about the benefits that come with a subscription to *Antique Radio Classified*.

These have included both our print subscribers as well as our online edition subscribers. The only difference between the print and online subscribers is that the online subscribers pay a reduced subscription rate and don't receive the print magazine.

Many of the people I spoke with didn't know about our subscription benefits.

Let's take a look at them:

### ABILITY TO LOOK AT THE MAGAZINE ONLINE

As a print or online subscriber you can look at the latest issue of the magazine online on our web site. This is the entire issue of the magazine and not an abbreviated edition. Subscribers can look at the last four issues of the magazine. Non-subscribers can look at earlier editions of the magazine at no cost.

One advantage of the online edition is that any photograph sent to us in color is posted in color!

### ABILITY TO LOOK AT PAST AUCTION RESULTS

Almost every month we publish auction results in the magazine. Did you know that we have a database of the auction prices online on our web

site? Subscribers can look at the auction results and they are **SEARCHABLE!** If you want to see if a specific radio, piece of equipment, tube, magazine, etc. that has been sold, all you have to do is enter the item and see every time the item has been sold as well as the price, auction house, and date!

### ABILITY TO LOOK AT ONLY THE CLASSIFIED ADS

Subscribers can also look only at the classified ads without downloading the entire magazine. This is very useful for readers who just want to read the classified ads. Readers with dial up Internet service will save a lot of downloading time.

### FREE MONTHLY CLASSIFIED AD

Each month a paid subscriber is entitled to place a free classified ad in the magazine. The classified ad can be up to 50 words. Additional words are 10 cents each. Classified ads can be submitted by email, fax, or mail. Typewritten preferred to reduce possible errors. Name, address and telephone number count as 6 words. Full name and address are required in all classified ads.

Of course the most important benefit to the subscribers of *Antique Radio Classified* are the articles containing information that will help you in increasing your knowledge of our hobby.

## HOW DO I ACCESS THESE BENEFITS?

Your print subscriber user ID and password are on your mailing label. Online subscribers are emailed their user ID and password. Your user ID is the number after "SUB#" on your mailing label. Your password is the digits in brackets [xxxx] after your "SUB#".

Go to A.R.C.'s home page [www.antiqueradio.com](http://www.antiqueradio.com) and click on *Subscriber Only Page*.

On the *Subscriber-Only Access* page you can click on the *Full Issue* you would like to view or click on the *Classified Ads* section from that issue.

Or you can click on the *Auction Prices Data Base*. Just enter the item that you are researching.
