GENERAL REPORT DESCRIPTION

This report is a compilation of selected Average Quarter-Hour and Cume listening estimates for the Metro and TSA and data as they appeared in the Spring 1991 Radio Market Reports. In Condensed markets, the data presented are Average Quarter-Hour and Cume estimates for the Metro. Metro population estimates for each market also are included. The audience estimates presented in this report are subject to the Limitations presented in the Radio Market Report from which these estimates are reprinted. A summary description of the survey methodology used to produce these estimates is presented in the back of this report. A more detailed description of Arbitron methodology can be found in a separate publication, available to all Radio Market Report subscribers, entitled *Radio Description of Methodology*.

WHAT EMRC ACCREDITATION MEANS

The Arbitron Radio Service has been accredited by the Electronic Media Rating Council (EMRC) since 1968. To merit continued EMRC accreditation, Arbitron: (1) adheres to the Council's Minimum Standards for Broadcast Rating Research, (2) supplies full information to the EMRC regarding all details of its operation, (3) conducts its measurement service substantially in accordance with representations to its subscribers and the Council and (4) submits to, and pays the cost of, thorough ongoing audits of Arbitron operations by CPA firms engaged by the EMRC. In addition to sizable annual audit charges, Arbitron provides office and file space for EMRC auditors as well as considerable staff and computer time involved in various aspects of these inspections.

Further information about the EMRC's accreditation and auditing procedures can be obtained from the Executive Director, Electronic Media Rating Council, 509 Madison Avenue, Suite 1112, New York, New York 10022.

Special Notices and Station Activities

BATON ROUGE AND/OR NEW ORLEANS, LA

RATING BIAS/ Radio Station KHOM-FM repeatedly aired the following statement during the Winter 1991 survey and through May 14 of the Spring 1991 survey:

"Hey, remember this and write-it-down. When you're listening to your favorite oldies, you're listening to Rocking Oldies KHOM 104."

This announcement may prompt diarykeepers to remember to report KHOM-FM in their diaries. However, as in the case of other such activities, Arbitron does not attempt to determine the extent of any possible bias or distortion. Our action in this matter (page 5B note) is intended to alert users of this report to activities which have been conducted in the market. Arbitron continues to discourage stations from conducting activities which have the potential to bias survey participants or distort survey results.

CHAMPAIGN, IL

EXTEMPORANEOUS COMMENT/ Radio Station WDWS-AM's on-air morning personality received a call between 5:30 AM and 6:30 AM on April 11, 1991 from an Arbitron diarykeeper.

While live on-the-air, a caller gave her name and then, early in the conversation, told the DJ that she was keeping a diary. The on-air personality responded by advising her to "be accurate" and "put down whatever you listen to." The diarykeeper kept the conversation going by telling the DJ that she was "plugging" his station and especially the DJ. At that point the DJ responded by making the comment, "well it looks like I'll have to send you some sort of cash bonus now."

Arbitron's concern is that on-air mention of a "cash bonus" for survey participation may prompt other diarykeepers to report their WDWS-AM listening or to advise the station that they have a diary. However, the station informed us that no other diarykeepers called the station.

As in the case of other such activities, Arbitron does not attempt to determine the extent of any possible bias or distortion. Our action in this matter (page 5B note) is intended to alert users of this report to activities which have been conducted in the market. Arbitron continues to discourage stations from conducting activities which have the potential to bias survey participants or distort survey results.

DENVER, CO

RATING BIAS/ Radio Station KJME-AM conducted an on-air survey announcement

about five times per day for about two weeks, starting about April 5 and ending April 19, 1991 (terminated at Arbitron's request).

The announcement (aired in Spanish), began with the general manager of the station introducing himself and the station. Then he said [English translation]:

"I am happy for the support given to the Mexican J [KJME], that, according to surveys conducted by the national companies it is amongst the most popular ones. And, special thanks to those persons that took the time to fill out the forms asking in detail about your favorite station. When you receive these forms by mail, please don't throw them away, fill them out and tell them, the whole world, 'I listen to the Mexican J' [KJME]."

Such announcements may alert listeners about Arbitron's survey in progress, thereby differentially sensitizing KJME-AM listeners as compared to listeners of other stations. This announcement may also serve to prompt diarykeepers who listen to KJME-AM to remember to report their KJME-AM listening. However, as in the case of other such activities, Arbitron does not attempt to determine the extent of any possible bias or distortion. Our actions in this matter (cover note, page 5B note, computer tape flag, and below-the-line placement) are intended to alert users of this report to activities which have been conducted in the market. Arbitron continues to discourage stations from conducting activities which have the potential to bias survey participants or distort survey results.

FARGO-MOORHEAD, ND-MN

RATING BIAS/ Radio Station KQWB-FM aired the following statement from February 25 through March 25, 1991 about one to three times a day.

"When someone should ask you what radio station you listen to, don't just tell them, write it down for them, like this...Q98. That's Q98 KQWB."

This statement may be suggestive of our survey process and may prompt a diarykeeper to remember to record listening to KQWB-FM. However, as in the case of other such activities, Arbitron does not attempt to determine the extent of any possible bias or distortion. Our action in this matter (page 5B note) is intended to alert users of this report to activities which have been conducted in the market. Arbitron continues to discourage stations from conducting activities which have the potential to bias survey participants or distort survey results.

FT. PIERCE-STUART-VERO BEACH

RATING BIAS/ Radio Station WZZR-FM used the following on-air liner about six times per day (Monday-Friday) from April 29 through May 20, 1991. The statement was discontinued at Arbitron's request.

"If you're keeping track, our call letters are WZZR. Our frequency is 92.7 and the radio station is Z93."

"Keeping track" of the station's call letters, frequency and slogan is a task that resembles the process of participating in our survey and may serve to remind diarykeepers to report their WZZR-FM listening in their diaries. However, as in the case of other such activities, Arbitron does not attempt to determine the extent of any possible bias or distortion. Arbitron's action in this matter (page 5B note) is intended to alert users of this report to activities which have been conducted in the market. Arbitron continues to discourage stations from conducting activities which have the potential to bias survey participants or distort survey results.

LA CROSSE, WI

RATING BIAS and RATING DISTORTION/ Radio Station WLXR-FM used the following liner on-air from January 10 through the end of the Spring 1991 survey:

"In case you forgot to write it down, the station you heard at work today was Hit 105 WLXR, today's best music."

This statement may prompt diarykeepers to remember to report their WLXR-FM listening in their diaries; or write down (report) that any radio station heard at work that day was WLXR-FM. However, as in the case of other such activities, Arbitron does not attempt to determine the extent of any possible bias or distortion. Our actions in this matter (cover note, page 5B notice and computer tape flag) are intended to alert users of this report to activities which have been conducted in the market. Arbitron continues to discourage stations from conducting activities which have the potential to bias survey participants or distort survey results.

LAFAYETTE, IN

RATING DISTORTION/ Radio Station WAZY-FM used the following on-air statement about once or twice a day from late April through the end of the Spring survey. The station discontinued the liner upon Arbitron's request:

"Remember, when you go home tonight the station you listened to all day is 96.5 WAZY. Thank you."

Special Notices and Station Activities

Instructing listeners to remember listening to WAZY-FM all day may encourage diarykeepers to report more or different listening to WAZY-FM than actually occurred. However, as in the case of other such activities, Arbitron does not attempt to determine the extent of any possible bias or distortion. Our action in this matter (page 5B note) is intended to alert users of this report to activities which have been conducted in the market. Arbitron continues to discourage stations from conducting activities which have the potential to bias survey participants or distort survey results.

LUBBOCK, TX

RATING BIAS/ Radio Station KKIK-FM conducted a promotion/opinion poll called the "Radio Report Card" during the Spring survey. Several on-air statements alerted listeners that the..."Radio Report Card will be in your mailbox next week. Get cash for your opinion from KKIK..."

KKIK-FM listeners may be more likely to respond to Arbitron's survey due to the station's cash offer for expressing an opinion by way of something received in the mail. Diarykeepers hearing the announcement may also be reminded to report their KKIK-FM listening. However, as in the case of other such activities, Arbitron does not attempt to determine the extent of any possible bias or distortion. Our action in this matter (page 5B note) is intended to alert users of this report to activities which have been conducted in the market. Arbitron continues to discourage stations from conducting activities which have the potential to bias survey participants or distort survey results.

PALM SPRINGS, CA

RATING BIAS and RATING DISTORTION/ Radio Station KCLB-AM conducted a survey announcement from April 16 to April 30, 1991, about once per air shift. In addition, KCLB-AM placed a newspaper advertisement in the May 2 edition of a weekly newspaper.

The newspaper ad and on-air announcement were in Spanish and have been translated into English by the station as follows:

Newspaper Ad

"K-CLUB 970, The Musical Wave of the 90's.

The department of Arbitron [sic] is conducting a survey of the radio stations of the Coachella Valley and Imperial Valley. If you are asked which station you listen to...tell them KCLB 970 AM.

The Musical Wave of the 90's. Thank you for your preference."

On Air

"Dear Radio listener, the Department of Arbitron is conducting the 1991 audience survey and you will be sent a formulary (form) by mail asking you which radio station you listen to...Please answer the formulary (form) and say, I listen to K.C.L.B., K-CLUB 970 and thank you for your support."

These statements may alert listeners about an Arbitron survey in progress, and about the survey process, which may differentially sensitize them or prompt them to participate in order to help KCLB-AM. Diarykeepers hearing or seeing these announcements may be encouraged to "support" or "say" that they listen to KCLB-AM and report more KCLB-AM listening than actually occurred.

However, as in the case of other such activities, Arbitron does not attempt to determine the extent of any possible bias or distortion. Our actions in this matter (cover note, page 5B note, computer tape flag and below-the-line placement) are intended to alert users of this report to activities which have been conducted in the market. Arbitron continues to discourage stations from conducting activities which have the potential to bias survey participants or distort survey results.

RICHMOND, VA

RATING BIAS/ Radio Station WPLZ-FM aired the following statement over the past year and a half on a rotating basis and discontinued it May 6, 1991 at Arbitron's request.

"If anyone asks what station you listen to, tell them Magic 99.1 FM. Write-it-down. Magic 99, Magic 99 FM."

This statement may be suggestive of our survey process and may prompt a diarykeeper to remember to record listening to WPLZ-FM. However, as in the case of other such activities, Arbitron does not attempt to determine the extent of any possible bias or distortion. Our action in this matter (page 5B note) is intended to alert users of this report to activities which have been conducted in the market. Arbitron continues to discourage stations from conducting activities which have the potential to bias survey participants or distort survey results.

ST. LOUIS, MO

RATING BIAS/ Radio Station WKKX-FM conducted an on-air telephone opinion survey April 3rd, 4th, 5th, 1991. The on-air personalities tried calling people at random from telephone numbers in the phone book. While waiting for people to answer, in between calls and in some of the conversations with respondents, they commented that "ratings were in

progress," this was a "radio ratings poll...not like other ratings services" or "Pinion-tron audience research."

Such references to other ratings in progress and audience research may prompt WKKX-FM listeners to participate in surveys or remind diarykeepers to report their WKKX-FM listening in their diary. However, as in the case of other such activities, Arbitron does not attempt to determine the extent of any possible bias or distortion. Our actions in this matter (cover note, page 5B note, computer tape flag) are intended to alert users of this report to activities which have been conducted in the market. Arbitron continues to discourage stations from conducting activities which have the potential to bias survey participants or distort survey results.

SALISBURY-OCEAN CITY, MD

RATING BIAS and RATING DISTORTION/ Radio Station WQHQ-FM aired the following statement about five times per day beginning in December 1990 and continuing through the end of the Spring 1991 survey:

"The call letters are WQHQ. Our station name is Q105. Our dial setting is 104.7 on your FM dial. This is the station you hear all day, every day at work, at home, in your car or truck and all other places. Remember, you listen to WQHQ, Q105 for the biggest variety of music on the radio here on the Eastern Shore."

This statement may prompt diarykeepers to remember to fill out their diaries and may also prompt them to report more or different listening to WQHQ-FM than actually occurred. However, as in the case of other such activities, Arbitron does not attempt to determine the extent of any possible bias or distortion. Our actions in this matter (cover note, page 5B note and computer tape flag) are intended to alert users of this report to activities which have been conducted in the market. Arbitron continues to discourage stations from conducting activities which have the potential to bias survey participants or distort survey results.

TALLAHASSEE, FL

RATING BIAS and RATING DISTORTION/ Radio Station WBGM-FM aired a series of promotional liners during the entire Spring 1991 survey at a rate of about three per hour. These liners also appeared in print and on TV during this time. The following are some examples of the liners:

"This is the station you listen to most every afternoon between 4 and 7 to hear the biggest variety of music with less talk....This is Lite Rock 99 FM."

Special Notices and Station Activities

"If you remember only one thing this morning, please remember that you listened to Lite Rock 99 FM, between 6 and 10 to hear the biggest variety of music on the radio in Tallahassee, Lite Rock 99 FM."

"Lite Rock 99 FM. This is the radio station you listen to the most everyday between 9 and 5 'at work' to hear the biggest variety of music with less talk, Lite Rock 99 FM."

These statements may prompt diarykeepers to remember to report their WBGW-FM listening or to report that they listened during the specific amounts of time stated in the liners rather than the time they actually listened. However, as in the case of other such activities, Arbitron does not attempt to determine the extent of any possible bias or distortion. Our action in this matter (page 5B note) is intended to alert users of this report to activities which have been conducted in the market. Arbitron continues to discourage stations from conducting activities which have the potential to bias survey participants or distort survey results.

WICHITA FALLS, TX

RATING BIAS/ Radio Station KTLT-FM conducted a contest during the Spring survey which began March 25 and ended June 30, 1991. The following promotional liner was aired by KTLT-FM in conjunction with the contest:

"It could come anywhere at anytime, at home, at work, in the mail, or on the phone. If anyone asks your favorite radio station, there's only one answer that pays...FM 106 is my favorite radio station."

This announcement may alert diarykeepers, or prospective diarykeepers, that someone may contact them by phone or mail about their radio listening and that there is one answer that pays. This may sensitize KTLT-FM listeners about the survey or prompt them to remember to report their KTLT-FM listening in their diaries.

However, as in the case of other such activities, Arbitron does not attempt to determine the extent of any possible bias or distortion. Our actions in this matter (cover note, page 5B note and computer tape flag) are intended to alert users of this report to activities which have been conducted in the market. Arbitron continues to discourage stations from conducting activities which have the potential to bias survey participants or distort survey results.

Notations

Glossary of Selected Arbitron Terms Used in this Report

1. AREA OF DOMINANT INFLUENCE

(ADI)/Arbitron Television's geographic market design which defines each television market exclusive of others based on measurable viewing patterns. Every county or sampling unit in the contiguous United States is assigned exclusively to one ADI.

2. AVERAGE QUARTER-HOUR PERSONS/

The estimated number of persons who listened to a station for a minimum of five minutes within a quarter-hour. The estimate is the average of the reported listening in the total number of quarter-hours the station was on the air during a reported daypart. This estimate, expressed in hundreds (00), is shown for the Metro, TSA and, where applicable, the ADI.

3. AVERAGE QUARTER-HOUR RATING

(Rating Point)/The Average Quarter-Hour Persons estimate expressed as a percentage of the appropriate estimated population. This estimate is shown in the Metro and, where applicable, the ADI.

4. AVERAGE QUARTER-HOUR SHARE/

The Average Quarter-Hour Persons estimate for a given station expressed as a percentage of the total Average Quarter-Hour Persons estimate to all radio within a reported daypart. This estimate is shown for the Metro only.

5. CUME PERSONS/The estimated number of *different* persons who listened to a station for a minimum of five minutes in a quarter-hour within a reported daypart. (Cume estimates may also be referred to as *cumulative* or *unduplicated* estimates.) Cume Persons estimates are expressed in hundreds (00) in this report. This estimate is shown in the Metro, TSA and, where applicable, the ADI.

6. CUME RATING/The estimated number of Cume Persons expressed as a percentage of the appropriate estimated population. This estimate is shown for the Metro only.

7. DAYPART/A time period for which audience estimates are reported (e.g., Monday-Friday, 6AM-10AM; Saturday, 10AM-3PM).

8. DESIGNATED SAMPLE/Telephone numbers selected from the sample frame for this survey determined by Arbitron to be usable.

9. DIARY MENTIONS/The number of in-tab diaries in which listening to a station is recorded for at least five minutes in a quarter-hour.

10. DIARYKEEPER/Any individual selected and found eligible to receive survey materials.

11. EFFECTIVE SAMPLE BASE (ESB)/The theoretical sample size to be used for estimating the sampling error of audience estimates. (See Par. 42.)

12. EXCLUSIVE CUME AUDIENCE/The estimated number of Cume Persons who listened to only one station within a reported daypart. This estimate is shown for the Metro only.

13. GROUP QUARTERS/Group quarters are residences such as college dormitories, homes for the aged, military barracks, rooming houses, institutions and other residences of nine or more unrelated individuals.

14. IN-TAB SAMPLE/The number of usable diaries tabulated in producing the report.

15. METRO SURVEY AREA (Metro)/Metro Survey Area definitions generally correspond to the federal government's Office of Management and Budget's Metropolitan Statistical Areas, Primary Metropolitan Statistical Areas or Consolidated Metropolitan Statistical Areas subject to exceptions dictated by historical industry usage or other marketing considerations as determined by Arbitron.

16. METRO TOTALS AND/OR ADI TOTALS (Total listening in the Metro and/or Total listening in the ADI)/The Metro Total and/or ADI Total estimates include estimates of listening to reported stations as well as to commercial stations that did not meet the Minimum Reporting Standards plus estimates of listening to noncommercial and unidentified stations.

17. MINIMUM REPORTING STANDARDS (MRS)/Criteria used to determine the stations listed in this report. (See Pars. 35-36.)

18. RATING/(See *Average Quarter-Hour Rating and Cume Rating*.)

19. SAMPLE TARGET/The number of diaries that is the objective for the Metro in-tab sample size.

20. SAMPLING UNIT/A geographic area consisting of a county or split county. (See Par. 28.)

21. SHARE/(See *Average Quarter-Hour Share*.)

22. SIMULCAST/The simultaneous broadcast of one station's total and uninterrupted broadcast flow by a second station without any variation except if the simulcast stations choose to separately identify their call letters, frequency and/or city of license, if appropriate, at the same time.

23. SIMULCAST TOTALS/Combined audience estimates for two stations in dayparts when they are simulcast. (See Pars. 22 and 38-40.)

24. SPLIT COUNTY/A portion of a county composed of one or more zip codes which has been separately identified for purposes of ordering and controlling sample.

25. TECHNICAL DIFFICULTY (TD)/Time period(s) of five or more consecutive minutes during the survey period in which a station listed in this report notified Arbitron in writing of reduced power, intermittent power, signal interference or brief times the station was off the air within the station's authorized broadcast day.

26. TIME SPENT LISTENING (TSL)/An estimate of the amount of time the average person spent listening to radio or to a station during a specific daypart expressed in hours and minutes. This estimate is shown for total radio listening for the Metro only.

27. TOTAL SURVEY AREA (TSA)/A geographic area that includes the Metro Survey Area and may include additional counties. (For explanation of the criteria used in establishing the TSA, see Par. 29.)

For additional information, the reader is directed to *Standard Definitions of Broadcast Research Terms*, published by the National Association of Broadcasters, 1771 N Street, NW, Washington, DC 20036.

Description of Methodology

SAMPLING AND MEASUREMENT TECHNIQUES

28. SAMPLING METHODOLOGY/Surveys for Arbitron Radio Market Reports are conducted by using geographic units called sampling units. A sampling unit consists of a county or a split county. The latter are defined by zip code information based on 1980 Census data, as updated annually by Market Statistics.

Sample targets are established for the Metro, the non-Metro TSA and, if applicable, the ADI. Sample targets then are established for each sampling unit proportional to the Persons 12+ population in the respective survey area subject to minimum sample requirements for Radio County Coverage. The amount of sample ordered is determined by dividing the sampling unit target by the expected rate of response based on previous survey(s) sample performance and other factors.

For each 12-week survey period, a complete new sample of telephone numbers is computer-selected for each sampling unit through the use of a systematic interval random selection technique. These samples of telephone numbers are drawn from a sample frame provided by Metromail Corporation containing all listed, residential telephone numbers and all possible unlisted telephone numbers from 100-blocks with at least 10 listed, residential telephone numbers. The sample frame is updated by Metromail using current available telephone directories. Known business and group quarters telephone numbers are excluded from the sample frame. The total sample is then randomly divided into approximately equal weekly groups for placement.

If a need for additional sample arises after the original samples have been selected by the computer, then such additional sample is generally selected in the same manner from the original sample frame.

29. TOTAL SURVEY AREA (TSA)

DEFINITION/The TSA is comprised of the Metro and any additional counties (or split counties) which meet certain criteria for inclusion. TSA definitions are based on historical radio listening patterns and are updated biennially from an analysis of the diary data used for the most recent County Coverage study. For TSA analyses purposes, all stations are considered as Home to the county (or split county) of the city to which they are FCC-licensed.

A county or geographic split-county (hereafter, simply "county") from which at least 10 in-tab diaries were returned will be added to the TSA of an existing market if:

(i) the Metro-licensed stations cumulatively receive a minimum of 10 diary mentions; **and**

ii) the mentions to Metro-licensed stations account for at least 10 percent of the total mentions to all stations from that county (9.5+ rounds to 10).

A county from which at least 10 diaries in-tab will be *retained* in the TSA of a market if:

(i) the Metro-licensed stations cumulatively receive a minimum of 8 diary mentions; **and** the mentions of Metro-licensed stations account for a minimum of 8 percent of the total station mentions from that county (7.5+ rounds to 8);

or

(ii) Metro-licensed stations cumulatively receive fewer than 8 diary mentions **but** the percent of listening to Metro-licensed stations is at least 10 percent (9.5+ rounds to 10).

However, for purposes of survey area stability, a county from which fewer than 10 diaries in-tab will generally not be added to or deleted from a TSA. A county which does not meet the applicable criteria outlined above may nevertheless be added to, or retained in, the TSA if:

(i) at least 15 percent of its station mentions are to Metro-licensed stations, *regardless* of the number of in-tab diaries and/or number of mentions to Metro-licensed stations (14.5 rounds to 15); **or**

(ii) approximately 75 percent of the county's border is contiguous with other counties in the same TSA.

A county which does not meet any of the above criteria will be excluded from the TSA. Counties which qualify for inclusion in the TSA under any of the above criteria will *still* be excluded if they are not contiguous with the TSA.

TSA's for new markets are established in accordance with all of the above criteria, except that more recent diary data may be used, if available.

The TSA definition does not imply that all stations have equal coverage in TSA counties.

Since TSA's for adjacent markets frequently overlap, TSA estimates for a particular station in one market may not be additive to TSA estimates for the same station in an adjacent market.

Arbitron reserves the right to make market definition decisions based on its professional research judgment in cases where strict application of the above criteria would produce illogical survey area configurations or would adversely affect the quality and/or utility of the reported estimates.

30. ARBITRON RADIO LISTENING DIARY/

Arbitron uses one-week individual diaries to gather listening information from persons 12 years of age and older. Bilingual (Spanish-English) diaries are provided to all survey participants in the Metro of a Hispanic-controlled market who have either identified themselves as Hispanic in response to an ethnicity question or from whom ethnic information was not obtained, and to any others indicating a preference for a bilingual diary. Premiums of varying monetary amounts are provided to encourage respondent cooperation. Arbitron sends a diary for each Person 12+ reported in the sample household up to a maximum of nine.

31. SAMPLE PLACEMENT AND DATA

RETRIEVAL/Initial contact with listed sample households is by a letter informing them of their selection by the computer and stating that an interviewer will be calling to request their cooperation in the survey. Initial contact with unlisted sample households is made by the interviewer at the time cooperation is requested.

Arbitron interviewers call all selected telephone numbers to ascertain the possibility of a media affiliation, to gain consent for participation in the survey, to determine the number of Persons 12+ living in the household at the time of the placement call and, where applicable, to determine the race/ethnicity and demographics of the household. Households with more than nine persons 12 years of age and older are ineligible for survey participation.

Interviewers are instructed to make a number of attempts to reach every telephone number in the sample. These attempts are made at different hours of the day and evening. Diaries are then mailed directly to the consenting sample households from Arbitron.

After the initial contact, the interviewer is directed to make additional contacts with the sample households to make sure the diary has been received, to assist members of the household in understanding the diary's purpose, to answer any questions, to remind the diarykeepers to return their diaries after the survey week, and to thank them for their participation in the survey.

Explicit instructions are provided to each interviewer, and independent checks are regularly conducted by Arbitron interviewer coordinators or the Arbitron Interviewing Center staff.

Description of Methodology (continued)

PROCESSING TECHNIQUES

32. PROCESSING OF DIARIES/Arbitron makes reasonable efforts to utilize all returned diaries. However, some diaries returned to Arbitron are unusable. Among those which are unusable are diaries which are obviously incomplete; are postmarked and/or arrive on or before the last day of the survey week or after the production cutoff date; or which otherwise lack essential information. Only those with seven usable days are processed. The total number of in-tab diaries may be greater or less than the sample target.

Usable diaries are prepared for computer processing in accordance with procedures listed in the Arbitron *Radio Edit Procedures Manual*. The listening information in the diaries is then computer-entered so that certain computer verifications and edits can be made. These include ascription procedures, the allocation of credit for aberrated call letters and other logical analyses and pretabulation preparations.

CALCULATING TECHNIQUES

33. CALCULATION OF ESTIMATES/

a. Sample Balancing. The weighting system used by Arbitron, sample balancing, is an iterative marginal weighting technique designed to compensate for disproportionate in-tab from specified marginal classes. Marginal weighting means that in-tab is weighted to represent the population for each specified marginal class. The number of geographic marginal classes (i.e., counties, split counties or county clusters) will vary. The number of age/sex marginal classes is generally 16. In addition, markets that are race and/or ethnically controlled are sample balanced so that in-tab from the race/ethnic group is weighted to represent the population of that race/ethnic group. As a result of this cumulative weighting, a Persons-Per-Diary Value (PPDV) is computed for each diary. The PPDV is the number of persons that diary is estimated to represent.

b. Computing Cume Persons Estimates. Station Cume Persons estimates are computed by summing the PPDVs for each diary in which a station received listening credit within a daypart. PPDVs are summed for all diaries within each discrete demographic group with listening to the station, then rounded to hundreds. Station Cume Persons estimates for broader demographic groups are computed by adding the rounded Cume Persons estimates for the component discrete demographic groups within the same daypart.

c. Computing Average Quarter-Hour (AQH) Persons Estimates. Station AQH Persons estimates are computed by multiplying the number of quarter-hours of listening to a station within a daypart in each diary by the diary's respective PPDV. The result of this multiplication is summed for all diaries within each discrete demographic group, then divided by the number of quarter-hours the station is on the air during the applicable daypart and rounded to hundreds. Station AQH Persons estimates for broader demographic groups are computed by adding the rounded AQH Persons estimates for the component discrete demographic groups within the same daypart.

d. Rounding of Calculations. Rounding occurs at various stages in the calculation of audience estimates at demographic and daypart summation levels.

e. Broadcast Hours. (i) Local time differences within a market that overlaps time zones and time differences caused by seasonal time changes are accounted for in the results by adjusting diary entries to the time observed by the the majority of counties in the Metro of the market being measured. (ii) Only one set of sign-on/sign-off times for a station is used in calculating audience estimates for the market report. Arbitron uses the sign-on/sign-off times reported for the month closest to December and the shortest broadcast day within that month as provided by the affected radio station. (iii) Audience estimates are adjusted for the station's actual broadcast schedule. However, when a station changes sign-on/sign-off times during an Arbitron survey period, the times used in calculating audience estimates are taken from those days of operation comprising the majority of consecutive days of the survey period. (iv) Stations broadcasting for less than an entire reported daypart are indicated by a footnote symbol next to the station's call letters or audience estimates. (v) Stations must notify Arbitron in writing of any changes in the station's sign-on/sign-off time as soon as they occur but no later than the day after the last day of the survey; changes in daytime or 24-hour status will be noted on page 5B of the applicable Radio Market Report.

f. Technical Difficulties. No adjustments are made to either diary entries or reported audience estimates for periods of brief technical difficulty. The notation of technical difficulties on Page 5B of applicable reports is only to assist the users in making their own evaluation of the reported audience estimates. Arbitron will accept information on technical difficulties only up to the day after the last day of the survey.

CRITERIA FOR REPORTING STATIONS

34. CRITERIA FOR REPORTING STATIONS/

To be listed in an Arbitron report, a commercial radio station must engage in systematic regular commercial broadcasting pursuant to the authority of and the Rules and Regulations of the Federal Communications Commission (FCC) or other appropriate governmental authority. Call letter designations exceeding four characters are shortened to four characters. Reported call letters are those in use on the last day of the survey as reported to Arbitron. In the event a station has changed call letters during the survey period, the first call letters listed in the report are those in use on the last day of the survey, with the station's call letters in use on the first day of the survey noted immediately below them. Arbitron maintains a call letter history based on information provided by radio stations and the FCC. In the event of exchanges of call letters or frequencies between stations in this market, the audience estimates published in a report are based on Arbitron's verification and interpretation of information from various sources, which include the FCC and the affected stations. Specifics regarding the above are listed on Page 5B of the applicable Radio Market Report.

Audience estimates for a station which does not meet Minimum Reporting Standards (MRS) for the Metro cannot be obtained in any way from the data in this report. TSA estimates are limited to stations which have qualified for reporting in the Metro. All radio stations, commercial and noncommercial alike, are measured using the same methodology and are included in Metro and/or ADI Totals. All commercial stations are evaluated using the same Minimum Reporting Standards. Noncommercial stations are not eligible to be listed in this report and are not considered in MRS evaluations. For report qualification purposes, stations are considered commercial/noncommercial based on their status as of the last day of the survey as reported to Arbitron.

35. MINIMUM REPORTING STANDARDS (MRS) FOR NONSIMULCAST STATIONS/

A commercial station which does not simulcast with another station is included in this report if it has met **all** of the following Minimum Reporting Standards for the Metro or, if applicable, the ADI among Persons 12+ for the time the station is on the air during the Monday-Sunday 6AM-Midnight daypart during the current survey of the market:

Description of Methodology (continued)

- a. The station must have received five or more minutes of listening in a quarter-hour in at least ten in-tab Metro diaries (ten in-tab ADI diaries for ADI markets), **and**,
- b. The station must have a Metro Cume rating of 0.495 or greater (ADI Cume rating of 0.495 or greater for ADI markets), **and**,
- c. The station must have a Metro Average Quarter-Hour rating of 0.05 or greater (ADI Average Quarter-Hour rating of 0.05 or greater for the ADI).

36. MINIMUM REPORTING STANDARDS (MRS) FOR TWO SIMULCAST STATIONS/

MRS for simulcast stations are based on the percent of quarter-hours in the Monday-Sunday, 6AM-Mid daypart (when both stations are on the air simultaneously) that the two stations simulcast for every week of the survey:

- a. 9.49 percent or less — The two stations are considered to be **nonsimulcast** stations and each must independently meet the criteria used for nonsimulcast stations. (See Par. 35.)
- b. 9.5 percent to 90.49 percent — The two stations are considered to be **partially simulcast** stations. Provided that *one* of the two stations meets **all** MRS criteria described in Par. 36 above, the second station is included in the report if (i) meets the criteria of Par. 35(a) and (b) and (ii) achieves the Average Quarter-Hour Rating described in Par. 36(c) for any one of the four basic Monday-Friday dayparts; viz., 6AM-10AM, 10AM-3PM, 3PM-7PM, 7PM-Midnight.
- c. 90.5 percent or greater — The two stations are regarded as **totally simulcast** stations for MRS purposes and therefore will be treated as a single station in **all** phases of the MRS criteria described in Par. 35. If the **combined** audience of the two stations is sufficient to meet **all** criteria of Par. 35, then both stations will be listed in the report even though one (or both) stations might not meet the MRS criteria if considered individually, so long as each station is mentioned in at least one Metro (or ADI) in-tab diary.

37. HOME AND OUTSIDE STATIONS/Any station either licensed to a city located within the Metro of a market or which is recognized under Arbitron's policies and procedures as having acceptable Multi-City of Identification is listed in the market report as a home station. However, if two stations are partially or totally simulcast and one of the two affiliates is a home station, both may be treated as home stations. All other stations are classified as outside stations. For reports containing an ADI section, outside stations are further classified into: (a) *outside the Metro but home to the ADI*, or (b) *outside the Metro*

and the ADI. Within each reporting classification, U.S. stations are listed alphabetically followed by non-U.S. stations listed alphabetically.

SIMULCAST TOTALS

38. CRITERIA/A simulcast Total line in a particular daypart is only available to stations which partially or totally simulcast (see Pars. 36 b and c) and which simulcast 100 percent (as defined by Arbitron, see Par. 22) for the entire daypart during the entire survey period. For simulcast stations a Total line of combined audience estimates will appear following the individual station estimates when the two stations are simulcast for the entire time both stations are on the air in a reported daypart.

Total lines may still be shown even if one or both simulcasting stations are not on the air during the entire reported daypart.

39. SIMULCAST TOTAL AVERAGE QUARTER-HOUR PERSONS/

The simulcast Total line is the summation of the estimated average number of persons who listened to one station plus the estimated average number of persons who listened to the second station during a reported daypart. If one or both of the simulcast stations are not on the air for the entire reported daypart, the individual station estimates will be adjusted for their actual broadcast schedule(s); the Total line for the two stations uses the longest on-air time of the two.

40. SIMULCAST TOTAL CUME PERSONS/

The simulcast Total line represents the estimated number of *different* persons who listened to either station during the reported daypart; thus, the Total line provides an estimate of the *unduplicated* audience to the simulcast pair during the reported daypart.

STATISTICAL RELIABILITY

41. SAMPLING ERROR/Arbitron estimates are subject to the statistical variances associated with all surveys using a sample of the universe and, additionally, to all of the factors described in Special Notices and in Paragraph 43.

42. EFFECTIVE SAMPLE BASE (ESB/ Estimates of the Effective Sample Base indicate the size of a simple random sample (in which all diaries have equal value) that would be required to provide the same degree of reliability as the in-tab sample actually used to produce the audience estimates in this report. The statistical reliability of such estimates

depends on the ESB and only indirectly on the number of diaries tabulated. Statistical reliability is also affected by all of the factors described in Paragraph 43. The Arbitron formula to estimate ESBs takes into account the disproportionate sampling of Metro areas, and differences in return rates among sampling units, the individual sex-age categories and race/ethnic groups, where applicable. As a general rule, ESBs for all Cume estimates will be less than total in-tab diaries, and the ESBs for all Average Quarter-Hour estimates will be larger than the ESBs for Cume estimates and may be even greater than the total in-tab sample. This is due to the intraclass correlation of the listening between quarter-hours for the various dayparts.

LIMITATIONS

42. LIMITATIONS/In addition to the sources of possible error which are described elsewhere in this report, the user should be aware of the limitations described below:

- a. The sample is drawn from telephone households only. Persons in nontelephone households are thereby excluded from the sample frame. Commercial establishments listed in directories are specifically excluded from the sample. Steps are taken to exclude residents of group quarters from Arbitron's sample frame. Further, all possible telephone directories and all possible unlisted telephone numbers may not be available in the lists prepared by Metromail and used as Arbitron's sample frame.
- b. Effort is made to exclude households with a media affiliation. The inclusion or exclusion of such households from the sample is dependent upon information revealed in response to Arbitron's media affiliation question.
- c. The interviewer may not always be under the direct control of Arbitron. In certain instances, independent telephone survey organizations are utilized by Arbitron. As a result, there may be instances where Arbitron instructions are not followed.
- d. Nonresponding persons may have listening habits which differ from those of respondents. Persons residing in nontelephone households may have listening habits which differ from those of persons residing in households with telephones.
- e. Nonresponding persons in the original designated sample prevent the in-tab sample from being a perfect probability sample.

Description of Methodology (continued)

f. The sample design and/or response patterns may preclude proportional representation of certain groups within the population such as ethnic groups, racial groups, persons in certain income or education groups, or persons whose primary language is other than English. Such persons may have listening habits which differ from other persons.

g. The population estimates from Market Statistics used in designing the sample are based upon the Decennial U.S. Census and are subject to all the limitations inherent therein. In addition, population estimates are subject to limitations such as sampling errors, errors in locating undocumented populations, and processing and recording errors. Furthermore, the sources used by Market Statistics to update populations between decennial Census dates may not include adjustments for known or unknown, over- or undercounts of various segments of the population, including undocumented populations groups. In addition, annual population updates may be based on the results of sample surveys and are subject to their respective limitations. These limitations in data from Market Statistics are inherent in Arbitron estimates based thereon.

h. Diaries, or portions thereof, may be completed improperly if the diary instructions are not understood or are not followed. Such diaries may therefore be unusable and excluded from the survey. Some diary entries may have been made on the basis of hearsay, recall, diarykeeper approximations or could have been influenced by comments made by the interviewer or others to survey participants.

i. Human and computer processing errors may occur before or after the diaries are received by Arbitron. Consequently, the degree of variance in the data may be greater than that expected from sampling variance alone.

j. The data upon which Arbitron has based its in-tab sample weighting, including racial or ethnic identification, may not be precise. Additionally, zip code information used in this report is subject to defects and limitations. Therefore, defects and limitations found in data supplied by others are inherent in Arbitron estimates based thereon.

k. Logical analysis, preprocessing preparation or ascription of the data may affect some of the diary listening entries before the data are projected. Some diaries, or portions thereof, may also be checked by postsurvey week telephone validation calls to diarykeepers. Diaries, or portions thereof, may thereby be modified or excluded from the survey. These procedures may affect a station's ability to meet MRS.

l. Arbitron conducts research involving new methods of improving cooperation of diarykeepers and/or securing additional information from such persons. Occasionally, a portion of this research may be integrated with actual surveys and, if and when so done, may cause the degree of variance in the data to be greater than that expected from sampling variance alone.

m. Certain data, such as when the station was on and off the air, facilities, call letters used, slogans claimed, format, programming, Sales Representative, network and time periods when two stations were simulcast or separately programmed, are based on data supplied by the stations and/or recent industry publications or notices. These data may not be accurate or timely and may affect the way certain audience estimates are reported.

n. Situations in which stations have or have had the same call letters or frequency or have changed call letters or frequency may result in diarykeeper confusion in correctly identifying the station to which the listening occurred.

o. Due to rounding, mathematical manipulation by the user of estimates for narrow dayparts in this report may produce a result which may be incongruent with estimates of broader dayparts also contained in this report.

p. The audience estimates published herein represent a typical week of radio listening during the survey period stated on the front of this report.

RETENTION OF RAW MATERIALS

44. RETENTION SCHEDULE/In-tab Arbitron listening diaries used for the compilation of the most current audience estimates published in this report, along with all unusable diaries and other survey materials, will be stored for one year from the date on which this report was first mailed to subscribers by Arbitron; after such time, all diaries and other survey materials are destroyed. Subscribers to this report are advised that if special cross-tabulations of the reported estimates are desired, they should be ordered before the retention period has expired. Upon proper appointment, subscribers to this report may examine, but not copy, the in-tab Arbitron listening diaries used in this report at Arbitron's Laurel, MD, office.

SOURCE DOCUMENTATION

45. SOURCE DOCUMENTATION/The sources of data contained in this report are the Radio Market Reports published for this survey period. The user is referred to such reports for more complete information regarding Market Characteristics,

Special Notices and Station Activities, Limitations, Qualifications and the Statistical Reliability of all audience estimates contained in this report.

DISCLAIMER OF WARRANTIES

46. DISCLAIMER OF WARRANTIES/Arbitron makes no warranties, express or implied, concerning: data gathered or obtained by Arbitron from any source; the present or future methodology employed by Arbitron in producing Arbitron ratings; or the Arbitron data, estimates or ratings contained herein. All Arbitron data and estimates represent only the opinion of Arbitron and reliance thereon and use thereof shall be at subscriber's own risk.

RESTRICTIONS ON USE OF REPORT

All Arbitron radio audience estimates are proprietary to Arbitron. They are provided to Arbitron clients pursuant to the terms of written license agreements between Arbitron and such clients. All Arbitron audience data and estimates are for the exclusive use of Arbitron clients and their authorized representatives and may be disclosed only to advertisers, prospective advertisers and their agencies for the purpose of obtaining and retaining advertising accounts and through advertising or promotional literature. For an Arbitron client to divulge any data or estimates to a non-subscribing station, or to lend and/or give a copy and/or a reproduction of any part of any report to any nonsubscriber, including advertisers and/or their agencies, constitutes a breach of the license agreement between Arbitron and client. Quotations by clients of the estimates as allowed by the preceding sentence for purposes of advertising or promotion must identify Arbitron as the source and that Arbitron's data and estimates are copyrighted. It also should be mentioned that the audience estimates are subject to all qualifications and limitations stated in the Arbitron report. Arbitron recommends that the appropriate market, survey period and kind of audience estimate (e.g., Boston, Spring 1991, Total Survey Area, Monday-Sunday 6AM-Midnight, Average Quarter-Hour Estimates, Men 18-24) be stated.

Neither this report nor any audience estimate may be used in any manner by nonclients of Arbitron without written permission from Arbitron.

Users of audience estimates are referred to the current policies of the Federal Trade Commission relating to the use of such estimates.
