A brand new tube for TV transmitters

Amperex® 7900

4 KW RF Power Triode

... specifically designed to solve your short-life problems in TV transmitter applications

This new forced-air-cooled triode was developed to replace conventional 2½ to 3 KW RF power types, to provide optimum reliability and long life in the VHF TV bands.

This degree of reliability has been achieved by virtue of the 7900's platinum grid—resulting in lower drive power requirements—by means of its 4 KW plate dissipation—and through its brazed and silver-plated radiator design and external glass structure, providing minimum air back-pressure and cooler operation.

The 7900 is, moreover, accurately dimensioned for use in many existing cavities. For 'built-in' long life in new equipment, and for replacement purposes, we recommend your consideration of the 7900. As always, application engineering assistance is available.

RF Power Amplifier, Class B TV Service

Typical Operation at 220 Mc in an Approved Cavity

DC Plate Voltage	4500 volts
Negative DC Grid Voltage	130 volts
Peak RF Grid Voltage (sync)	450 volts
DC Plate Current (sync)	1.75 amps
DC Grid Current (sync)	approx. 0.35 amp
Power Output (sync)	approx. 5.6 KW

AMPEREX ELECTRONIC CORPORATION
230 Duffy Avenue, Hicksville, L. I., N. Y.

In Canada: Rogers Electronic Tubes & Components, 116 Vanderhoof Avenue, Toronto, Ont.

INDEX

A—The Facilities of Television (A-3 through A-134)	
U. S. stations directory, including station profiles	A-3
Translator stations	A-96
Experimental stations	A-101
Station ownership, a record of station sales	A-102
Stations identified with newspaper or magazine ownership	B-228
Group ownership of broadcast stations in the U. S.	B-220
Station call letters	A-109
Stations by channels	A-112
Closed circuit tv operators	A-114
Community antenna television systems	A-115
Subscription television interests	A-121
Channel allocations for U. S.	A-122
U. S. Television Balance Sheet, 1960	A-133
Network routes map (Bell System)	C-42
Station representatives and personnel	E-3
Networks and executive personnel	E-10
Canadian Board of Broadcast Governors	A-126
Canadian stations directory, including station profiles	A-127
Canadian station call letters	A-133
B—The Facilities of AM/FM Radio (B-3 through B-250)	
U. S. stations directory, including am/fm profiles	B-3
International radio stations operating in the U.S.	B-193
Am station call letters	B-193
Fm commercial call letters	B-202
Fm educational call letters	B-204
Am stations by frequencies	B-205
Group ownership of broadcast stations in the U.S.	B-220
Stations identified with newspaper or magazine ownership	B-228
College campus-limited stations	B-235
Mexican and Caribbean stations	B-237
Canadian am call letters	B-241
Canadian am stations by frequencies	B-242
Canadian directory of stations	B-244
C—Equipment, and Federal Communications Commission Rules (C-3 through C-42)	
Manufacturers and distributors of broadcast equipment	C-3
How to apply for a broadcasting station	C-24
FCC rules regulating radio-tv (selected sections)	C-26
Special publishing services of FCC actions, et al	C-30
Frequency measuring services	C-41
D—NAB Codes, and Program Services (D-3 through D-34)	
NAB Television Code	D-3
NAB Radio Code	D-6
Program producers and distributors	D-8
News services	D-24
Talent agents and managers	D-25

for full facilities
to sell Atlanta's million...
put your faith in WSB

"White Columns" is more than a building, it is the efficient home of both WSB Radio and TV

In Atlanta and Georgia, WSB Radio and Television lead the way in programming, in coverage and facilities. Through the years both stations have maintained a tradition of leadership through sound, well-balanced programming and by backing up top men with every facility available to help them do a top job. Dominance in ratings and many notable awards attest to their success as broadcast media. To sell Atlanta's million people, plus other Georgians too... put your schedules on **WSB radio/WSB-TV**

BELL SYSTEM TELEVISION NETWORK ROUTES

as of Sept. 1, 1961

ever, be considered in determining whether a revocation and/or cease and desist order should be issued.

§1.79 Availability of station logs and records for Commission inspection.—(a) Station records and logs shall be made available for inspection or duplication at the request of the Commission or its representative. Such logs or records may be removed from the licensee's possession by a Commission representative or, upon request, shall be mailed by the licensee to the Commission by either registered mail, return receipt requested, or certified mail, return receipt requested. The return receipt shall be retained by the licensee as part of the station records until such records or logs are returned to the licensee. A receipt shall be furnished when the logs or records are removed from the licensee's possession by a Commission representative and this receipt shall be retained by the licensee as part of the station records until such records or logs are returned to the licensee. When the Commission has no further need for such records or logs, they shall be returned to the licensee. The provisions of this rule shall apply solely to those station logs and records which are required to be maintained by the provisions of this chapter.

(b) Where records or logs are maintained as the official records of a recognized law enforcement agency and the removal of the records from the possession of the law enforcement agency will hinder its law enforcement activities, such records will not be removed pursuant to this section if the Chief of the law enforcement agency shall promptly certify in writing to the Federal Communications Commission that the removal of the logs or records will hinder law enforcement activities of the agency, and stating insofar as feasible the basis for his decision and the date when it can reasonably be expected that such records may be released to the Federal Communications Commission.

(Of Operator Licenses)

§1.72 Suspension of operator licenses.—Whenever grounds exist for suspension of an operator license, as provided in Section 303(m) of the Communications Act, the Chief of the Safety and Special Radio Services Bureau, with respect to amateur operator licenses, or the Chief of the Field Engineering and Monitoring Bureau, with respect to commercial operator licenses, may issue an order suspending the operator license. No order of suspension in any operators' license shall take effect until 15 days' notice in writing of the cause for the proposed suspension has been given to the operator licensee, who may make written application to the Commission at any time within said 15 days for a hearing upon such order. The notice to the operator licensee shall not be effective until actually received by him, and from that time he shall have 15 days in which to mail the said application. In the event that physical conditions prevent mailing of the application before the expiration of the 15-day period, the application shall then be mailed as soon as possible thereafter, accompanied by a satisfactory explanation of the delay. Upon receipt by the Commission of such application for hearing, said order of suspension shall be designated for hearing by the Chief, Safety and Special Radio Services Bureau or the Chief, Field Engineering and Monitoring Bureau, as the case may be, and said order of suspension shall be held in abeyance until the conclusion of the hearing. Upon the conclusion of said hearing, the Commission may affirm, modify or revoke said order of suspension. If the license is ordered suspended, the operator shall send his operator license to the office of the Commission in Washington, D. C., on or before the effective date of the order, or, if the effective date has passed at the time notice is received, the license shall be sent to the Commission forthwith.

LOTTERIES

For all stations . . .

§3.122 Lotteries.—(a) An application for construction permit, license, renewal of license, or any other authorization for the operation of a broadcast station, will not be granted where the applicant proposes to follow or continue to follow a policy or practice of broadcasting or permitting "the broadcasting of any advertisement or information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance or any list of the prizes drawn or awarded by means of any such

lottery, gift enterprise, or scheme, whether said list contains any part or all such prizes." (See 18 U.S.C. §1304.)

(b) The determination whether a particular program comes within the provisions of paragraph (a) of this section depends on the facts of each case. However, the Commission will in any event consider that a program comes within the provisions of paragraph (a) of this section if in connection with such program a prize consisting of money or thing of value is awarded to any person whose selection is dependent in whole or in part upon lot or chance, if as a condition of winning or competing for such prize, such winner or winners, are required to furnish any money, or thing of value or are required to have in their possession any product sold, manufactured, furnished or distributed by a sponsor of a program broadcast on the station in question.

§1304 (of U. S. Criminal Code) Broadcasting Lottery information.—Whoever broadcasts by means of any radio station for which a license is required by any law of the U. S. or whoever, operating any such station, knowingly permits the broadcasting of any advertisement or information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance, or any list of the prizes drawn or awarded by means of any such lottery, gift enterprise or scheme, whether said list contains any part or all of such prizes, shall be fined not more than \$1,000 or imprisoned not more than one year, or both. Each day's broadcasting shall constitute a separate offense.

CENSORSHIP

For all stations . . .

§326 (of Communications Act.)—Nothing in this Act shall be understood to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station, and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication.

INDECENT LANGUAGE

§1464 (of U. S. Criminal Code) Broadcasting obscene language.—Whoever utters any obscene, indecent, or profane language by means of radio communication shall be fined not more than \$10,000 or imprisoned not more than two years, or both.

TRANSFERS and ASSIGNMENTS

Voluntary . . .

§1.329 Applications for voluntary assignment or transfer of control.—(a) Application for consent to the assignment of construction permit or license, or for consent to the transfer of control or a corporation holding such a construction permit or license, shall be filed with the Commission on FCC Form 314 (Assignment of License), FCC Form 315 (Transfer of Control), or FCC Form 316 (Short Form). Such application should be filed with the Commission at least 45 days prior to the contemplated effective date of assignment or transfer of control.

(b) The following assignment or transfer applications may be filed on FCC Form 316.

- (1) Assignment from an individual or individuals (including partnerships) to a corporation owned and controlled by such individuals or partnerships without any substantial change in their relative interests;
- (2) Assignment from a corporation to its individual stockholders without effecting any substantial change in the disposition of their interests;
- (3) Assignment or transfer by which certain stockholders retire and the interest transferred is not a controlling one;
- (4) Corporate reorganization which involves no substantial change in the beneficial ownership of the corporation;
- (5) Assignment or transfer from a corporation to a wholly owned subsidiary thereof or vice versa, or where there is an assignment owned or controlled by the assignor stockholders without substantial change in their interests; or
- (6) Assignment of less than a controlling interest in a partnership.

[EDITOR'S NOTE: In a statement issued by the FCC in 1943, licensees were warned that no transfers of station control are permitted until after Commission approval. The FCC also asked that li-

cencees who are in doubt whether a transfer application is necessary bring ownership changes to the attention of the Commission to determine whether they are changes in control before consummating the transfer action.]

Involuntary transfers and assignments

§1.330 Application for involuntary assignment license.—(a) The Commission shall be notified in writing promptly of the death or legal disability of an individual permittee or licensee, a member of a partnership, or a person directly or indirectly in control of a corporation which is a permittee or licensee.

(b) Within 30 days after the occurrence of such death or legal disability, an application on FCC Form 316 shall be filed requesting consent to involuntary assignment of such permit or license or for involuntary transfer of control of such corporation to a person or entity legally qualified to succeed to the foregoing interests under the laws of the place having jurisdiction over the estate involved.

FCC Rules CONTINUED

by an auxiliary broadcast station licensed to the television broadcast station is not considered a rebroadcast. (As used in this section, program includes any complete program or part thereof.)

(b) The licensee of a television broadcast station may, without further authority of the Commission, rebroadcast the program of a United States television broadcast station, provided the Commission is notified of the call letters of each station rebroadcast and the licensee certifies that express authority has been received from the licensee of the station originating the program.

NOTE 1: The notice and certification of consent shall be given within 3 days of any single rebroadcast, but in case of the regular practice of rebroadcasting certain programs of a television broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for such rebroadcast practice if begun during a license period.

NOTE 2: By Order No. 82, dated and effective June 24, 1941, until further order of the Commission, Section 3.655(c) is suspended only insofar as it requires prior written authority of the Commission for the rebroadcasting of programs originated for that express purpose by U. S. Government radio stations.

(c) No licensee of a television broadcast station shall rebroadcast the program of any United States radio station not designated in paragraph (b) of this section without written authority having first been obtained from the Commission upon application (informal) accompanied by written consent or certification of consent of the licensee of the station originating the program.

REVOCATIONS, MODIFICATIONS, SUSPENSIONS

(All Classes of Station Licenses)

§1.63 Modification of licenses or construction permits on motion of the Commission.—(a) Whenever it appears that a station license or construction permit should be modified, the Commission will notify the licensee or permittee in writing of the proposed action and the grounds and reasons therefor and direct him to show cause why an order modifying the license or construction permit in the manner proposed by the Commission should not be issued.

(b) Any order to show cause issued in accordance with paragraph (a) of this section will notify the licensee or permittee that he may request, within a period of time to be stated in the order to show cause, that a hearing be held on the proposed modification. In case of timely request, a hearing will be held on the proposed modification, in no event less than 30 days after the receipt of the order to show cause, unless the Commission finds that safety of life or property require the fixing of a shorter period.

(c) In order to avail himself of the right to request a hearing and of the opportunity to appear and give evidence upon the matters specified in the order to show cause, the licensee or permittee, in person or by his attorney shall, within the period of time as may be specified in the order to show cause, file with the Commission a written statement stating that he requests a hearing and will appear at the hearing and present evidence on the matter specified in the order to show cause. Such written statement must contain a detailed response to the matter specified in the order to show cause and the permittee or licensee shall be limited in the hearing to matters fairly encompassed within the issues raised by the response.

(d) The right to request a hearing shall, unless a good cause is shown in a petition to be filed not later than 5 days before the lapse of the time specified in paragraph (c) of this section, be deemed waived:

- (1) In case of failure to timely file a written statement as required by paragraph (c) of this section.
- (2) In case of filing the written statement provided for in paragraph (c) of this section but failure to appear at the hearing, either in person or by counsel.

(e) Where the right to request a hearing is waived and no written statement has been filed within the period of time specified in the order to show cause, the licensee or permittee will be deemed to consent to the modification as proposed in the order to show cause and a final decision will be issued by the Commission accordingly.

(f) Where the right to request a hear-

ing has been waived, a written statement may be filed within the period of time to be specified in the order to show cause, showing with particularity why the license or construction permit should not be modified or not so modified as proposed in the order to show cause. In this case, the Commission may, depending upon the facts alleged and proof offered, either call upon the submitting party to furnish additional information under oath, designate the proceeding for hearing, or issue without further proceedings an order modifying the construction permit or license as proposed in the order to show cause or in said written statement. The order to show cause will advise the person against whom it is directed of procedure set forth in this paragraph.

(g) Any order of modification issued pursuant to this section shall include a statement of the findings and the grounds and reasons therefor, shall specify the effective date of the order and shall be served on the licensee or permittee.

§1.76 Notice of violations.—(a) Any licensee who appears to have violated any provision of the Communications Act or any provision of this chapter shall be served with a written notice calling the facts to his attention and requesting a statement concerning the matter. FCC Form 793 may be used for this purpose.

(b) Within 10 days from receipt of notice or such other period as may be specified, the licensee shall send a written answer, in duplicate, direct to the office of the Commission originating the official notice. If an answer cannot be sent nor an acknowledgement made within such 10-day period by reason of illness or other unavoidable circumstances, acknowledgement and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay.

(c) The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. If the notice relates to violations that may be due to the physical or electrical characteristics of transmitting apparatus, the answer shall state fully what steps, if any, have been taken to prevent future violations, and, if any new apparatus is to be installed, the date such apparatus was ordered, the name of the manufacturer, and the promised date of delivery. If the installation of such apparatus requires a construction permit, the file number of the application shall be given, or if a file number has not been assigned by the Commission, such identification shall be given as will permit ready identification of the application. If the notice of violation relates to lack of attention to or improper operation of the transmitter, the name and license number of the operator in charge shall be given.

§1.77 Revocation and/or cease and desist proceedings: hearings.—(a) If it appears that a station license or construction permit should be revoked and/or that a cease and desist order should be issued, the Commission will issue an order directing the person to show cause why an order of revocation and/or a cease and desist order, as the facts may warrant, should not be issued.

(b) An order to show cause why an order to show cause why an order of revocation and/or a cease and desist order should not be issued will contain a statement of the matters with respect to which the Commission is inquiring and will call upon the person to whom it is directed (the respondent) to appear before the Commission at a hearing, at a time and place stated in the order, but not less than thirty days after the receipt of such order, and give evidence upon the matters specified in the order to show cause. However, if safety of life or property is involved, the order to show cause may specify a hearing date less than thirty days from the receipt of such order.

(c) To avail himself of such opportunity for hearing, the respondent, personally or by his attorney, shall file with the Commission, within thirty days of the service of the order or such shorter period as may be specified therein, a written appearance stating that he will appear at the hearing and present evidence on the matters specified in the order. The Commission in its discretion may accept a late appearance. However, an appearance tendered after the specified time has expired will not be accepted unless accompanied by a petition stating with particularity the facts and reasons relied on to justify such late filing. Such petition for acceptance of late appearance will be granted only if the Commission determines that the facts and reasons stated therein constitute good cause for failure to file on time.

(d) Hearings on the matters specified

in such orders to show cause shall accord with the practice and procedure prescribed in this subpart and Subpart B of this part, with the following exceptions: (1) In all such revocation and/or cease and desist hearings, the burden of proceeding with the introduction of evidence and the burden of proof shall be upon the Commission; and (2) the Commission may specify in a show cause order, when the circumstances of the proceeding require expedition, a time less than that prescribed in §§1.153 and 1.154 within which the initial decision in the proceeding shall become effective, exceptions to such initial decision must be filed, parties must file requests for oral argument, and parties must file notice of intention to participate in oral argument.

(e) Correction or promise to correct the conditions or matters complained of in a show cause order shall not preclude the issuance of a cease and desist order. Corrections or promises to correct the conditions or matters complained of, and the past record of the licensee, may, however, be considered in determining whether a revocation and/or cease and desist order should be issued.

(f) Any order of revocation and/or cease and desist order issued after hearing pursuant to this section shall include a statement of findings and the grounds therefor, shall specify the effective date of the order, and shall be served on the person to whom such order is directed.

§1.78 Revocation and/or cease and desist proceedings: after waiver of hearing.

(a) After the issuance of an order to show cause, pursuant to §1.77, calling upon a person to appear at a hearing before the Commission, the occurrence of any one of the following events or circumstances will constitute a waiver of such hearing and the proceeding thereafter will be conducted in accordance with the provisions of this section.

(1) The respondent fails to file a timely written appearance as prescribed in §1.77(c) indicating that he will appear at a hearing and present evidence on the matters specified in the order.

(2) The respondent, having filed a timely written appearance as prescribed in §1.77(c), fails in fact to appear in person or by his attorney at the time and place of the duly scheduled hearing.

(3) The respondent files with the Commission within the time specified for a written appearance in §1.77(c), a written statement expressly waiving his rights to a hearing.

(b) When a hearing is waived under the provisions of paragraph (a) (1) or (3) of this section, a written statement signed by the respondent denying or seeking to mitigate or justify the circumstances or conduct complained of in the order to show cause may be submitted within the time specified in §1.77(c). The Commission in its discretion may accept a late statement. However, a statement tendered after the specified time has expired will not be accepted unless accompanied by a petition stating with particularity the facts and reasons relied on to justify such late filing. Such petitions for acceptance of a late statement will be granted only if the Commission determines that the facts and reasons stated therein constitute good cause for failure to file on time.

(c) Whenever a hearing is waived by the occurrence of any of the events or circumstances listed in paragraph (a) of this section, the Chief Hearing Examiner at the earliest practicable date shall issue an order reciting the events or circumstances constituting a waiver of hearing, terminating the hearing proceeding, and certifying the case to the Commission. Such order shall be served upon the respondent.

(d) After a hearing proceeding has been terminated pursuant to paragraph (c) of this section, the Commission will act upon the matters specified in the order to show cause in the regular course of business. The Commission will determine on the basis of all the information available to it from any source, including such further proceedings as may be warranted, if a revocation order and/or a cease and desist order should issue, and if so, will issue such order. Otherwise, the Commission will issue an order dismissing the proceeding. All orders specified in this paragraph will include a statement of the findings of the Commission and the grounds and reasons therefor, will specify the effective date thereof, and will be served upon the respondent.

(e) Corrections or promise to correct the conditions or matters complained of in a show cause order shall not preclude the issuance of a cease and desist order. Corrections or promises to correct the conditions or matters complained of, and the past record of the licensee, may, how-

association or other unincorporated group, the announcement required by this section shall disclose the name of such corporation, committee, association or other unincorporated group. In each such case the station shall require that a list of the chief executive officers or member of the executive committee or of the board of directors of the corporation, committee, association or other unincorporated group shall be made available for public inspection at one of the radio stations carrying the program.

(e) In the case of programs advertising commercial products or services, an announcement stating the sponsor's corporate or trade name or the name of the sponsor's product, shall be deemed sufficient for the purposes of this section and only one such announcement need be made at any time during the course of the program.

[EDITOR'S NOTE: Rulemaking currently is under way to amend this section to prohibit payola to licensees and employes and unidentified announcements of products in which licensees or their employes have financial interests.]

In fm rules . . .

§3.289 [EDITOR'S NOTE: Identical with §3.119 above.]

In tv rules . . .

3.654 [EDITOR'S NOTE: Identical with §3.119 above.]

[EDITOR'S NOTE: In a statement issued in 1950, the FCC warned that the sponsor or his product must be identified by a distinctive name and not by one merely descriptive of the type of business or product. The following are acceptable, the Commission said: "Henry Smith offers you . . ." or "Smith Stove Co. offers you . . ." or "Ajax Pens brings you . . ." The following are not acceptable: "Write to the Comb Man . . ." or "Send your money to Nylons. Sox . . ." or "This program is sponsored by your Sink man . . ."]

RECORDINGS and TRANSCRIPTIONS (Identification of)

In am rules . . .

§3.118 Mechanical reproductions.—(a) No mechanically reproduced program consisting of a speech, news event, news commentator, forum, panel discussion, or special event in which the element of time is of special significance, or any other program in which the element of time is of special significance and presentation of which would create, either intentionally or otherwise, the impression or belief on the part of the listening audience that the event or program being broadcast is in fact occurring simultaneously with the broadcast, shall be broadcast without an appropriate announcement being made either at the beginning or end of such reproduction or at the beginning or end of the program in which such reproduction is used that it is a mechanical reproduction or a mechanically reproduced program: Provided, however, that each such program of one minute or less need not be announced as such.

(b) The exact form of identifying announcement is not prescribed, but the language shall be clear and in terms commonly used and understood. Any other program mechanically reproduced or series of mechanical reproductions, including a mechanical reproduction used for background music, sound effects, station identification, program identification (theme music of short duration) or identification of sponsorship of the program proper, need not be announced as provided in subsection (a), but the licensee shall not attempt affirmatively to create the impression that any program being broadcast by mechanical reproduction consists of live talent.

(c) The requirements of subsection (a) are waived with respect to network programs, transcribed and rebroadcast at a later hour because of the time zone differentials between the place where the program originates and where it is rebroadcast, this waiver being applicable whether the off-the-line recording is made by the network itself at one of its key stations or by an individual station, but only when the off-the-line recording is for broadcast at an hour not exceeding the time zone differential between the place where the program originates and where it is rebroadcast. Each station which broadcasts network programs at a later hour in accordance with this waiver shall make an appropriate announcement at least once each day between the hours of 10:00 a.m. and 10 p.m., stating that some or all of the network programs which are broadcast by that station are delayed broadcasts by means of transcription. This waiver provision also applies during the annual period in which daylight saving

time will be effective with respect to network programs transcribed and rebroadcast one hour later because of the time differential resulting from the adoption of daylight saving time in some areas.

POLITICAL BROADCASTS

For am, fm and tv . . .

§3.120 Definitions.—(a) A "legally qualified candidate" means any person who has publicly announced that he is a candidate for nomination by a convention of a political party or for nomination or election in a primary, special, or general election, municipal, county, state or national, and who meets the qualifications prescribed by the applicable laws to hold the office for which he is a candidate, so that he may be voted for by the electorate directly or by means of delegates or electors, and who

(1) has qualified for a place on the ballot or

(2) is eligible under the applicable law to be voted by sticker, by writing in his name on the ballot, or other method, and (1) has been duly nominated by a political party which is commonly known and regarded as such, or (2) make a substantial showing that he is a bona fide candidate for nomination or office, as the case may be.

(b) General requirements.—No station licensee is required to permit the use of its facilities by any legally qualified candidate for public office, but if any licensee shall permit any such candidate to use its facilities, it shall afford equal opportunities to all other such candidates; provided, that such licensee shall have no power of censorship over the material broadcast by any such candidate.

(c) Rates and practices.—(1) The rates, if any, charged all such candidates for the same office shall be uniform and shall not be rebated by any means direct or indirect. A candidate shall, in each case, be charged no more than the rate the station would charge if the candidate were a commercial advertiser whose advertising was directed to promoting its business within the same area as that encompassed within the particular office for which such person is a candidate. All discount privileges otherwise offered by a station to commercial advertisers shall be available upon equal terms to all candidates for public office.

(2) In making time available to candidates for public office no licensee shall make any discrimination between candidates in charges, practices, regulations, facilities, or services for or in connection with the service rendered pursuant to this part, or make or give any preference to any candidate for public office or subject any such candidate to any prejudice or disadvantage; nor shall any licensee make any contract or other agreement which shall have the effect of permitting any legally qualified candidate for any public office to broadcast to the exclusion of other legally qualified candidates for the same public office.

(d) Records: inspections.—Every licensee shall keep and permit public inspection of a complete record of all requests for broadcast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the licensee of such request, and the charges made, if any, if request is granted. Such records shall be retained for a period of two years.

(e) A request for equal opportunities must be submitted to the licensee within one week of the day on which the prior use occurred.

(f) A candidate requesting such equal opportunities of the licensee, or complaining of non-compliance to the Commission, shall have the burden of proving that he and his opponent are legally qualified candidates for the same public office.

[EDITOR'S NOTE: In fm this is §3.290; in tv, §3.657.]

REBROADCASTS

In am rules . . .

§3.121 Rebroadcast.—(a) The term "rebroadcast" means reception by radio of the program of a radio station, and the simultaneous or subsequent retransmission of such program by a broadcast station.

NOTE: As used in this section, program includes any complete program or part

thereof, or any signals if other than A-3 emission. In case a program is transmitted from its point of origin to a broadcast station entirely by telephone facilities in which a section of such transmission is by radio, the broadcasting of this program is not considered a rebroadcast.

(b) The licensee of a standard broadcast station may, without further authority of the Commission, rebroadcast the program of a United States standard or high frequency broadcast station, provided the Commission is notified of the call letters of each station rebroadcast and the licensee certifies that express authority has been received from the licensee of the station originating the program.

NOTE: The notice and certification of consent shall be given within three (3) days of any single rebroadcast, but in case of the regular practice of rebroadcasting certain programs of a standard broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for renewal of license, or at the beginning of such rebroadcast practice if begun during a license period.

(c) (1) The licensee of a standard broadcast station located within a state or the District of Columbia may, without further authority of the Commission, rebroadcast on a noncommercial basis a noncommercial program of a United States international broadcast station.

(2) The licensee of a standard broadcast station located in any territory or insular possession of the United States may, without further authority of the Commission, rebroadcast any program of a United States international broadcast station.

(3) In the case of any rebroadcast under the provisions of this paragraph (c), the Commission shall be notified of the call letters of each station whose programs are rebroadcast and the licensee shall certify that express authority has been received from the licensee of the station originating the program.

(d) No licensee of a standard or high frequency broadcast station shall rebroadcast the program of any other class of United States radio station without written authority having first been obtained from the Commission upon application accompanied by written consent or certification of consent of the licensee of the station originating the program.

NOTE: The broadcasting of a program relayed by a remote pickup broadcast station (section 4.401) is not considered a rebroadcast. Informal application may be employed. By Order No. 82, dated and effective June 24, 1941, until further order of the Commission, section 3.121 (d) is suspended only insofar as it requires prior written authority of the Commission for the rebroadcasting of programs originated for that express purpose by U.S. Government radio stations.

(e) In case of a program rebroadcast by several standard broadcast stations, such as a chain rebroadcast, the person legally responsible for distributing the program or the network facilities may obtain the necessary authorization for the entire rebroadcast both from the Commission and from the person or licensee of the station originating the program.

Attention is directed to section 325(b) of the Communications Act of 1934, which reads as follows:

No person shall be permitted to locate, use, or maintain a radio broadcast studio or other place or apparatus from which or whereby sound waves are converted into electrical energy, or mechanical or physical reproduction of sound waves produced, and caused to be transmitted or delivered to a radio station in a foreign country for the purpose of being broadcast from any radio station there, having a power output of sufficient intensity, and/or being so located geographically that its emissions may be received consistently in the United States, without first obtaining a permit from the Commission, upon proper application therefor. [See §1.327.]

In fm rules . . .

§3.29—[EDITOR'S NOTE: Identical in terms with §3.121, above, with two exceptions: Paragraph (e) of §3.121 is deleted in §3.291, and Paragraph (b) relates to rebroadcast of programs of U.S.: "standard, fm or noncommercial educational" stations.]

In tv rules . . .

§3.655. Rebroadcast.—(a) The term "rebroadcast" as used below means reception by radio of the program of a television broadcast station, and the simultaneous or subsequent retransmission of such programs by a broadcast station. The broadcasting of a program relayed

FCC Rules CONTINUED

previously reported. Such report shall include without limitation:

- (1) Any change in capitalization or organization;
- (2) Any change in officers and directors;
- (3) Any transaction affecting the ownership, direct or indirect, or voting rights of licensee's or permittee's stock, such as:
 - (i) A transfer of stock;
 - (ii) Issuance of new stock or disposition of treasury stock; or
 - (iii) Acquisition of licensee's or permittee's stock by the issuing corporation; or
- (4) Any change in the officers, directors, or stockholders of a corporation other than the licensee or permittee such as X, Y, or Z corporation described in the example in paragraph (a)(3) of this section.

NOTE: Before any change is made in the organization, capitalization, officers, directors or stockholders of a corporation other than licensee or permittee, which results in a change in the control of the licensee or permittee, prior Commission consent must be received under Section 310(b) of the Communications Act and §1.329. A transfer of control takes place when an individual, or group in privity, gains or loses affirmation or negative (50%) control. See instruction on FCC Form 323 "Ownership Report."

(d) Exceptions: Where information is required under paragraphs (a), (b), or (c) of this section with respect to a corporation or association having more than 50 stockholders or members, such information need be filed only with respect to stockholders or members who are officers or directors of the corporation or association, or to other stockholders or members who have 1% or more of either the voting or non-voting stock of the corporation or voting rights in the association.

LICENSE RENEWALS

General . . .

§1.328 Application for renewal of license.—(a) Unless otherwise directed by the Commission, an application for renewal of license shall be filed at least 90 days prior to the expiration date of the license sought to be renewed except that applications for renewal of license of an experimental or developmental broadcast station or a television broadcast translator station shall be filed at least 60 days prior to the expiration date of the license sought to be renewed.

(b) No application for renewal of license of any broadcast station will be considered unless there is on file with the Commission, the information, if any, currently required by §§1.341 to 1.343, inclusive, for the particular class of station. The renewal application shall include a reference by date and file number to such information on file.

(c) Whenever the Commission regards an application for a renewal of license as essential to the proper conduct of a hearing or investigation, and specifically directs that it be filed by a certain date, such application shall be filed within the time thus specified. If the licensee fails to file such application within the prescribed time, the hearing or investigation shall proceed as if such renewal application had been received.

(d) The following application forms shall be used:

[EDITOR'S NOTE: There follows a list of forms to be used in filing for license renewals.]

In fm rules . . .

§3.34 Normal license period.—(a) Licenses for standard broadcast stations ordinarily will be issued for a period of three years and, when regularly renewed, at three year intervals thereafter; provided, however, that, if the Commission finds that the public interest, convenience and necessity will be served thereby, it may issue either an initial license or a renewal thereof for a lesser term. When regularly issued or renewed, licenses will be issued to expire at the hour of 3:00 a.m., eastern standard time, in accordance with the following schedule, and at three year intervals thereafter.

[EDITOR'S NOTE: Expiration dates for licenses are grouped geographically.]

In fm rules . . .

§3.218 Normal license period.—(a) Licenses for fm broadcast stations ordinarily will be issued for a period of three years and, when regularly renewed, at three year intervals thereafter; provided, however, that, if the Commission finds that the public interest, convenience and necessity will be served thereby, it may issue either an initial license or a renewal thereof for a lesser term. When regularly

issued or renewed, licenses will be issued to expire at the hour of 3:00 a.m., eastern standard time, in accordance with the following schedule, and at three year intervals thereafter.

[EDITOR'S NOTE: Expiration dates for licenses are grouped geographically.]

In tv rules . . .

§3.60 Normal license period.—(a) Licenses for television broadcast stations ordinarily will be issued for a period of three years and when regularly renewed, at three year intervals thereafter; provided, however, that, if the Commission finds that the public interest, convenience and necessity will be served thereby, it may issue either an initial license or a renewal thereof for a lesser term. When regularly issued or renewed, licenses will be issued to expire at the hour of 3:00 a.m., eastern standard time, in accordance with the following schedule, and at three year intervals thereafter.

(1) For stations located in Delaware and Pennsylvania, August 1, 1957.

(2) For stations located in Maryland, District of Columbia, Virginia, West Virginia, October 1, 1957.

(3) For stations located in North Carolina, South Carolina, December 1, 1957.

(4) For stations located in Florida, Puerto Rico and Virgin Islands, February 1, 1958.

(5) For stations located in Alabama and Georgia, April 1, 1958.

(6) For stations located in Arkansas, Louisiana and Mississippi, June 1, 1958.

(7) For stations located in Tennessee, Kentucky and Indiana, August 1, 1958.

(8) For stations located in Ohio and Michigan, October 1, 1958.

(9) For stations located in Illinois and Wisconsin, December 1, 1958.

(10) For stations located in Iowa and Missouri, February 1, 1956.

(11) For stations located in Minnesota, North Dakota, South Dakota, Montana and Colorado, April 1, 1956.

(12) For stations located in Kansas, Oklahoma, Nebraska, June 1, 1956.

(13) For stations located in Texas, August 1, 1956.

(14) For stations located in Wyoming, Nebraska, Arizona, Utah, New Mexico and Idaho, October 1, 1956.

(15) For stations located in California, December 1, 1956.

(16) For stations located in Washington, Oregon, Alaska, Guam, and Hawaii, February 1, 1957.

(17) For stations located in Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont, April 1, 1957.

(18) For stations located in New Jersey and New York, June 1, 1957.

STATION IDENTIFICATION

In am rules . . .

§3.117 Station identification.—(a) A licensee of a standard broadcast station shall make station identification announcement (call letters and location) at the beginning and ending of each time of operation and during operation (1) on the hour and (2) either on the half hour or at the quarter hour preceding the next hour; provided:

(b) Such identification announcement need not be made on the hour when to make such announcement would interrupt a single consecutive speech, play, religious service, symphony concert, operatic production or forum of longer duration than 30 minutes. In such cases the identification announcement shall be made at the beginning of the program, at the first interruption of the entertainment continuity, and at the conclusion of the program.

(c) Such identification announcement need not be made on the half hour or quarter hours when to make such an announcement would interrupt a single consecutive speech, play, religious service, symphony concert, or operatic production. In such cases an identification announcement shall be made at the first interruption of the entertainment continuity and at the conclusion of the program; provided, that an announcement within 5 minutes of the time specified in paragraph (a) (2) of this section will satisfy the requirements of identification announcements.

(d) In the case of variety show programs of longer duration than 30 minutes, the identification announcement shall be made within 5 minutes of the hour and of the times specified in paragraph (a) (2) of this section.

(e) In the case of all other programs the identification announcement shall be made within 2 minutes of the hour and of the times specified in paragraph (a) (2) of this section.

(f) In making the identification an-

nouncement the call letters shall be given only on the channel of the station identified thereby, except as otherwise provided in §3.287 of the Commission's Rules Governing Fm Broadcast Stations.

In fm rules . . .

§3.287 Station Identification.—(a) A licensee of an fm broadcast station shall make separate station identification announcement (call letters and location) for such station; provided, however, that if the same licensee operates an fm radio broadcasting station and a standard broadcast station and simultaneously broadcasts the same programs over the facilities of both such stations, station identification announcements may be made jointly for both stations for periods of such simultaneous operation. If the call letters of the fm station do not clearly reveal that it is an fm station, the joint announcement shall state that one of the stations is an fm station. Station identification announcements shall be made at the beginning and ending of each time of operation and during operation (1) on the hour and (2) either on the half hour or at the quarter hour following the hour and at the quarter hour preceding the next hour; provided:

[EDITOR'S NOTE: Remainder is identical with paragraphs (b), (c), (d), (e) and (f) of §3.117 above.]

In tv rules . . .

§3.652 Station identification.—(a) A licensee of a television broadcast station shall make station identification announcements (call letters and location) at the beginning and ending of each time of operation and during the operation on the hour. The announcement at the beginning and ending of each time of operation shall be by both aural and visual means. Other announcements may be by either aural or visual means.

(b) Identification announcements during operation need not be made when to make such announcement would interrupt a single consecutive speech, play, religious service, symphony concert, or any type of production. In such cases, the identification announcement shall be made at the first interruption of the entertainment continuity and at the conclusion thereof.

SPONSORED PROGRAMS

(Announcement of)

In am rules . . .

§3.119 Sponsored programs, announcements of.—(a) In the case of each program for the broadcasting of which money, services, or other valuable consideration is either directly or indirectly paid or promised to, or charged or received by, any radio broadcast station, the station broadcasting such program shall make, or cause to be made, an appropriate announcement that the program is sponsored, paid for, or furnished, either in whole or in part.

(b) In the case of any political program or any program involving the discussion of public controversial issues for which any records, transcriptions, talent, scripts, or other material or services of any kind are furnished, either directly or indirectly, to a station as an inducement to the broadcasting of such program, an announcement shall be made both at the beginning and conclusion of such program on which such material or services are used that such records, transcriptions, talent, scripts, or other material or services have been furnished to such station in connection with the broadcasting of such program, provided, however, that only one such announcement need be made in the case of any such program of five minutes' duration or less, which announcement may be made either at the beginning or the conclusion of the program.

(c) The announcement required by this section shall fully and fairly disclose the true identity of the person or persons by whom or in whose behalf such payment is made or promised, or from whom or in whose behalf such services or other valuable consideration is received, or by whom the material or services referred to in subsection (b) hereof are furnished. Where an agent or other person contracts or otherwise makes arrangements with a station on behalf of another, and such fact is known to the station, the announcement shall disclose the identity of the person or persons in whose behalf such agent is acting instead of the name of such agent.

(d) In the case of any program, other than a program advertising commercial products or services, which is sponsored, paid for or furnished, either in whole or in part, or for which material or services referred to in subsection (b) hereof are furnished, by a corporation, committee,

responsingly as agreed by the station and network organization.

(e) **Right to reject programs.** No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which, with respect to programs offered or already contracted for pursuant to an affiliation contract, prevents or hinders the station from (1) rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable or contrary to the public interest, or (2) substituting a program which, in the station's opinion, is of greater local or national importance.

(f) **Network ownership of stations.** No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control of a network organization, for a television broadcast station in any locality where the existing television broadcast stations are so few or of such unequal desirability (in terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing. (The word "control" as used in this section is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.)

(g) **Dual network operation.** No license shall be issued to a television broadcast station affiliated with a network organization which maintains more than one network of television broadcast stations: Provided, that this section shall not be applicable, if such networks are not operated simultaneously, or if there is no substantial overlap in the territory served by the group of stations comprising each such network.

(h) **Control by networks of station rates.** No license shall be granted to a television broadcast station having any contract, arrangement or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, fixing or altering its rates for the sale of broadcast time for other than the network's programs.

(i) **No license shall be granted to a television broadcast station which is represented for the sale of non-network time by a network organization or by an organization or by an organization directly or indirectly controlled by or under common control with a network organization, if the station has any contract, arrangement or understanding, express or implied, which provides for the affiliation of the station with such network organization: provided, however, that this rule shall not apply until December 31, 1961, to television broadcast stations so represented on October 30, 1959; and provided further, that this rule shall not be applicable to stations licensed to a network organization or to a subsidiary of a network organization.**

COMMON ANTENNA SITE

§3.635. Use of common antenna site. No television license or renewal of a television license will be granted to any person who owns, leases, or controls a particular site which is peculiarly suitable for television broadcasting in a particular area and (a) which is not available for use by other television licensees; and (b) no other comparable site is available in the area; and (c) where the exclusive use of such site by the applicant or licensee would unduly limit the number of television stations that can be authorized in a particular area or would unduly restrict competition among television stations.

REPORTS TO BE FILED

All broadcast stations . . .

§1.341 Financial report.—Each licensee or permittee of a commercially operated standard, fm, television, or international broadcast station (as defined in Part 3 of this chapter) shall file with the Commission on or before April 1 of each year, on FCC Form 324, broadcast revenue and expense statements for the preceding calendar year together with a statement as to investment in tangible broadcast property as of Dec. 31 of such calendar year.

§1.342 Filing of contracts.—Each licensee or permittee of a standard, fm, television, or international broadcast station (as defined in Part 3 of this chapter), whether operating or intending to operate on a commercial or non-commercial basis, shall file with the Commission copies of the following contracts, instruments, and documents together with amendments, supplements, and cancellations, within 30 days of execution thereof. The substance of oral contracts shall be reported in writing.

(a) Contracts relating to network service. All network affiliation contracts, agreements, or understandings between a station and a national, regional, or other network shall be filed. Transcription agreements or contracts for the supplying of film for the television stations which specify option time must be filed. This section does not require the filing of transcription agreements or contracts for the supplying of film for television stations which do not specify option time, nor contracts granting the right to broadcast music such as ASCAP, BMI, or SESAC agreements.

(b) Contracts relating to ownership or control. Contracts, instruments, or documents relating to the present or future ownership or control of the licensee or permittee's stock, rights, or interests therein, or relating to changes in such ownership or control. This paragraph shall include but is not limited to the following:

(1) Articles of partnership, association, and incorporation, and changes in such instruments;

(2) Bylaws, and any instruments effecting changes in such bylaws;

(3) Any agreement, document, or instrument (i) providing for the assignment of a license or permit or (ii) affecting, directly or indirectly, the ownership or voting rights of the licensee's or permittee's stock (common or preferred, voting or non-voting), such as: (a) Agreements for transfer of stock; (b) Instruments for the issuance of new stock; or (c) Agreements for the acquisition of licensee's or permittee's stock by the issuing licensee or permittee corporation. Pledges, trust agreements, options to purchase stock and other executory agreements are required to be filed.

(4) Proxies with respect to the licensee's or permittee's stock running for a period in excess of one year; and all proxies, whether or not running for a period of one year, given without full and detailed instructions binding the nominee to act in a specified manner. With respect to proxies given without full and detailed instructions, a statement showing the number of such proxies, by whom given and received, and the percentage of outstanding stock represented by each proxy shall be submitted by the licensee or permittee within 30 days after the stockholders' meeting in which the stock covered by such proxies has been voted: Provided, however, that when the licensee or permittee is a corporation having more than 50 stockholders, such complete information need be filed only with respect to proxies given by stockholders who are officers or directors, or who have 1% or more of the corporation's voting stock; in cases where the licensee or permittee is a corporation having more than 50 stockholders and the stockholders giving the proxies are neither officers or directors nor hold 1% or more of the corporation's stock, the only information required to be filed is the name of any person voting 1% or more of the stock by proxy, the number of shares voted by proxy by such person, and the total number of shares voted at the particular stockholders' meeting in which the shares were voted by proxy;

(5) Mortgage or loan agreements containing provisions restricting the licensee's or permittee's freedom of operation, such as those affecting voting rights, specifying or limiting the amount of dividends payable, the purchase of new equipment, the maintenance of current assets, etc.; or

(6) Any agreement reflecting a change in the officers, directors, or stockholders of a corporation, other than the licensee or permittee, having an interest, direct or indirect, in the licensee or permittee as specified by §1.343.

(c) Contracts relating to the sale of broadcast time to "time brokers" for resale.

(d) Contracts relating to Subsidiary Communications Authorization Operation, except contracts granting licensees or permittees engaged in SCA the right to broadcast copyright music.

(e) Time sales contracts. Time sales contracts with the same sponsor for 4 or more hours per day except where the length of the events (such as athletic contests, musical programs, and special events) broadcast pursuant to the contract is not under control of the station.

(f) Contracts relating to personnel.

(1) The following contracts, agreements, or understandings shall be filed: management consultant agreements with independent contractors; contracts relating to the utilization in a management capacity of any person other than an officer, director, or regular employee of the licensee or permittee station; management contracts with any persons, whether or not officers,

directors, or regular employees which provide for both a percentage or profits and a sharing in losses, of any similar agreements.

(2) The following contracts, agreements, or understandings need not be filed: agreements with persons regularly employed as general or station managers or salesmen; contracts with program managers or program personnel; contracts with chief engineers or other engineering personnel; contracts with attorneys, accountants, or consulting radio engineers; contracts with performers; contracts with station representatives; contracts with labor unions; or any similar agreements.

§1.343 Ownership reports.—(a) Each licensee of a standard, fm, or television station (as defined in Part 3 of this chapter), whether operating or intending to operate on a commercial or non-commercial basis, shall file an Ownership Report (FCC Form 323) at the time the application for renewal of station license is required to be filed: Provided, however, that licensees owning more than one standard, fm, or television broadcast station need file only one Ownership Report at three-year intervals. Ownership Reports shall give the following information as of a date not more than 30 days prior to the filing of the Ownership Report:

(1) In the case of an individual, the name of such individual;

(2) In the case of a partnership, the names of the partners and the interest of each partner;

NOTE: Any change in partners or in their rights will require prior consent of the Commission upon an application for consent to assignment of license or permit. If such change involves less than a controlling interest, the application for Commission consent to such change may be made upon FCC Form 316 (Short Form).

(3) In the case of a corporation, association, trust, estate, or receivership, the data applicable to each:

(i) The name, residence, citizenship, and stock-holdings of officers, directors, stockholders, trustees, executors, administrators, receivers, and members of any association;

(ii) Full information as to family relationship or business association between two or more officials, and/or stockholders, trustees, executors, administrators, receivers, and members of any association;

(iii) Capitalization with a description of the classes and voting power of stock authorized by the corporate charter or other appropriate legal instrument and the number of shares of each class issued and outstanding; and

(iv) Full information on FCC Form 323 with respect to the interest, and identity of any person having any direct, indirect, fiduciary, or beneficiary interest in the licensee or any of its stock;

For example:

(a) Where A is the beneficial owner or votes stock held by B, the same information should be furnished for A as is required for B.

(b) Where X corporation controls the licensee, or holds 25% or more of the number of issued and outstanding shares of either voting or non-voting stock of the licensee, the same information should be furnished with respect to X corporation (its capitalization, officers, directors, and stockholders and the amount of stock [by class] in X held by each) as is required in the case of the licensee, together with full information as to the identity and citizenship of the person authorized to vote licensee's stock in case of voting stock.

(c) The same information should be furnished as to Y corporation if it controls X corporation or holds 25% or more of the number of issued and outstanding shares of either voting or non-voting stock of X, and as to Z corporation if it controls Y corporation or holds 25% or more of the number of issued and outstanding shares of either voting or non-voting stock of Y and so on back to natural persons.

(4) In the case of all licensees: (i) A list of all contracts still in effect required to be filed with the Commission by §1.342 showing the date of execution and expiration of each contract; and (ii) Any interest which the licensee may have in any other broadcast station.

(b) A permittee shall file an Ownership Report (FCC Form 323) within 30 days of the date of grant by the Commission of an application for original construction permit. The Ownership Report of the permittee shall give the information required by the applicable portions of paragraph (a) of this section.

(c) A supplemental Ownership Report (FCC Form 323) shall be filed by each licensee or permittee within 30 days after any change occurs in the information required by the Ownership Report from that

FACSIMILE

§3.266 Facsimile broadcasting and multiplex transmission.—(a) Fm broadcast stations may transmit simplex facsimile in accordance with transmission standards set forth in §3.318 during periods not devoted to fm aural broadcasting. Such transmissions may not exceed one hour during the period between 7 a.m. and midnight (no limit for the hours between midnight and 7 a.m.) and may not be counted toward the minimum operation required by section 3.261. The Commission shall be notified by the licensee of the fm broadcast station of its intent to transmit such facsimile.

(b) Fm broadcast stations may, upon securing authorization from the Commission, transmit multiplex facsimile in accordance with transmission standards set forth in §3.318; provided that the transmission of such facsimile does not reduce the quality of aural programs simultaneously transmitted by the licensee below that required by the technical standards of this subpart and that no degradation of such aural programs will result from such facsimile transmissions when received on fm receivers not equipped with filter or other additional equipment.

NETWORK AFFILIATION

In am rules . . .

§3.131 Exclusive affiliation of station.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, broadcasting the programs of any other network organization. (The term "network organization" as used herein includes national and regional network organizations. See Chapter VII, J of Report on Chain Broadcasting.)

§3.132 Territorial exclusivity.—No license shall be granted to a standard broadcast station having any contract arrangement, or understanding, express or implied, with a network organization which prevents or hinders another station serving substantially the same area from broadcasting the network's programs not taken by the former station, or which prevents or hinders another station serving a substantially different area from broadcasting any program of the network organization. This section shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization pursuant to which the station is granted the first call in its primary organization.

§3.133 Term of affiliation.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which provides, by original term, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than two years; provided, that a contract, arrangement, or understanding for a period up to two years, may be entered into within six months prior to the commencement of such period.

§3.134 Option time.—No license shall be granted to a standard broadcast station which options for network programs any time subject to call on less than 56 days notice, or more time than a total of three hours within each of four segments of the broadcast day, as herein described. The broadcast day is divided into four segments, as follows: 8:00 a.m. to 1:00 p.m.; 1:00 p.m. to 6:00 p.m.; 6:00 p.m. to 11:00 p.m.; 11:00 p.m. to 8:00 a.m. (These segments are to be determined for each station in terms of local time at the location of the station but may remain constant throughout the year regardless of shifts from standard to daylight saving time or vice versa.) Such option may not be exclusive as against other network organizations and may not prevent or hinder the station from optioning or selling any or all of the time covered by the option, or other time, to other network organizations.

NOTE: As used in this section, an option is any contract, arrangement, or understanding, express or implied, between a station and a network organization which prevents or hinders the station from scheduling programs before the network agrees to utilize the time during which such programs are scheduled, or which requires the station to clear time already scheduled when the network organization seeks to utilize the time.

NOTE: All time options permitted under this section must be for specified clock hours, expressed in terms of any time sys-

tem set forth in the contract agreed upon by the station and network organization. Shifts from daylight saving to standard time or vice versa may or may not shift the specified hours correspondingly as agreed by the station and network organization.

§3.135 Right to reject programs.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which (a) with respect to programs offered pursuant to an affiliation contract, prevents or hinders the station from rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable; or which (b) with respect to network programs so offered or already contracted for, prevents the station from rejecting or refusing any program which, in its opinion, is contrary to the public interest, or from substituting a program of outstanding local or national importance.

§3.136 Network ownership of stations.—No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control with a network organization, for more than one standard broadcast station where one of the stations covers substantially the service area of the other station, or for any standard broadcast station in any locality where the existing standard broadcast stations are so few or of such unequal desirability in (terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing. (The word "control" as used herein, is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.)

NOTE: Effective date of this section with respect to any station may be extended from time to time in order to permit the orderly disposition of properties; and it shall be suspended indefinitely with respect to regional network organizations.

§3.137 Dual network operation.—No license shall be issued to a standard broadcast station affiliated with a network organization which maintains more than one network; provided, that this section shall not be applicable if such networks are not operated simultaneously, or if there is no substantial overlap in the territory served by the group of stations comprising each such network.

§3.138 Control by networks of station rates.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, fixing or altering its rates for the sale of broadcast time for other than the network's programs.

In fm rules . . .

§3.231-3.238, inclusive—

EDITOR'S NOTE: Same as §§3.131-3.138, above, with the following exceptions: (1) references are to fm rather than standard stations and networks; and (2) the section on "Network Ownership of Stations" is changed to read as follows:

§3.238 Network ownership of stations.—No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common controls of a network organization, for an fm broadcast station in any locality where the existing fm broadcast stations are so few or of such unequal desirability in terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing. The word "control" as used herein, is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.]

In tv rules . . .

§3.658. Affiliation agreements.—(a) **Exclusive affiliation of station.** No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, broadcasting the programs of any other network organization.

(The term "network organization" as used herein includes national and regional network organizations. See ch. VII, J of Report on Chain Broadcasting.)

(b) **Territorial exclusivity.** No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which prevents or

hinders another broadcast station in the same community from broadcasting the network's programs not taken by the former stations, or which prevents or hinders another broadcast station located in a different community from broadcasting any program of the network organization. This regulation shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization pursuant to which the station is granted the first call in its community upon the program of the network organization. As employed in this paragraph the term "community" is defined as the community specified in the instrument of authorization as the location of the station.

(c) **Term of Affiliation.** No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which provides, by original terms, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than 2 years; Provided that a contract, arrangement, or understanding for a period of up to two years may be entered into within 6 months prior to take commencement of such period.

(d) **Option time.** (1) No license shall be granted to a television broadcast station which options for network programs any time subject to call on less notice than is required by subdivisions (i), (ii), and (iii) of this subparagraph.

(i) In no event may a station subject its time to call, under an option, for a network program to commence earlier than four weeks after notice of exercise of the option.

(ii) If a station has a written contract with one or more advertisers pursuant to which a non-network program series is being broadcast, the time so contracted shall not be callable under an option held by a network until the earlier of (a) the end of a 13-week waiting period or (b) the end of the program series so contracted.

(iii) If a station has entered into a written contract with an advertiser or advertisers for the broadcast of a non-network program scheduled to commence no later than four weeks after the network exercises its option for the same time segment, the network may not under its option require the station to substitute a network program until the earlier of (a) 13 weeks from the commencement of such non-network programs or (b) the end of the program series so contracted.

(iv) If the station has contracted with more than one advertiser for the program series, the end of the program series for the purposes of this section shall be the latest of the several contract termination dates.

(2) No licensee shall be granted to a television broadcast station which options for network programs more than a total of 2½ hours within each of four segments of the broadcast day, as herein described. In determining the number of hours of option time, any network program which begins during the hours agreed upon by the network and station as option time and extends into non-option time, or which begins during non-option time and extends into the hours agreed upon as option time, shall be considered as falling entirely outside option time. The broadcast day is divided into four segments, as follows: 8 a.m. to 1 p.m.; 1 p.m. to 6 p.m.; 6 p.m. to 11 p.m.; 11 p.m. to 8 a.m. (These segments are to be determined for each station in terms of local time at the location of the station but may remain constant throughout the year regardless of shifts from standard to daylight saving time or vice versa.) Time options may not be exclusive as against other network organizations and may not prevent or hinder the station from optioning or selling any or all of the time covered by the option, or other time, to other network organizations.

NOTE: FCC currently is reconsidering option time rule relating to amount of time that may be optioned by affiliate.

(3) As used in this section, an option is any contract, arrangement or understanding, express or implied, between a station and a network organization which prevents or hinders the station from scheduling programs before the network agrees to utilize the time during which such programs are scheduled, or which requires the station to clear time already scheduled when the network organization seeks to utilize the time. All time options permitted under this section must be specified clock hours, expressed in terms of any time system set forth in the contract agreed upon by the station and network organization. Shifts from daylight saving to standard time or vice versa may or may not shift the specified hours cor-

(1) Stations regularly sharing time during daylight hours either under licenses pursuant to which time-sharing agreements have been entered into or licenses specifying hours of operation, unless time-sharing agreements have been reached covering such operation prior to local sunrise. Sections 3.74, 3.77, and 3.78 of these rules shall be applicable to such agreements.

(2) Any class II station causing interference as determined by the standard broadcast technical standards of this subpart by use of its daytime facilities within the 0.5 mv/m 50% skywave contour of any class I station either of the United States or of any country party to the North American Regional Broadcasting Agreement, except (a) where the class I station is located East of the class II station, in which case operation may begin at local sunrise at the class I station; (b) where an agreement has been reached with the class I station to begin operation prior to local sunrise.

(b) Any station operating during such hours receiving notice from the Commission that undue interference is caused shall refrain from such operation during such hours pending further notice from the Commission.

(c) Nothing contained in outstanding instruments of authorization for such stations shall prohibit such operation except as herein provided.

(d) The period 4 a.m. to 6 a.m., local standard time, shall not be included in determining compliance with section 3.71.

(e) Restrictions imposed by section 3.187 on daytime operations shall apply to pre-sunrise operation under this section.

§3.88 Blanketing interference.—The licensee of each broadcast station is required to satisfy all reasonable complaints of blanketing interference with the 1 v/m contour.

For fm stations . . .

§3.261 Time of operation.—(a) All fm broadcast stations will be licensed for unlimited time operation. A minimum of 36 hours per week during the hours of 6 a.m. to midnight, consisting of not less than 5 hours in any one day, except Sunday, must be devoted to the fm broadcast operation; time devoted to operations conducted pursuant to a Subsidiary Communications Authorization (see §§3.293-3.295) shall not be included in meeting this 36-hour broadcast requirement.

(b) In the event that causes beyond a licensee's control make it impossible to adhere to the operating schedule in paragraph (a) of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 10 days, without further authority of the Commission. However, the Commission and the Engineer in Charge of the radio district in which the station is located shall be immediately notified in writing if the station is unable to maintain the minimum operating schedule and shall be subsequently notified when the station resumes regular operation.

§3.262 Experimental operation.—The period between 1:00 a.m. and 6:00 a.m., local standard time, may be used for experimental purposes in testing and maintaining apparatus by the licensee of any fm broadcast station on its assigned frequency and not in excess of its authorized power, without specific authorization by the Commission.

For tv stations . . .

§3.651 Time of operation.—(a) (1) All television broadcast stations will be licensed for unlimited time operation. Each such station shall maintain a regular program operating schedule as follows: not less than 2 hours daily in any five broadcast days per week and not less than a total of 12 hours per week during the first 18 months of the station's operation; not less than 2 hours daily in any 5 broadcast days per week and not less than a total of 16 hours, 20 hours and 24 hours per week for each successive 6-month period of operation, respectively; and not less than a total of 28 hours per week thereafter.

(2) "Operation" includes the period during which a station is operated pursuant to temporary authorization or during program tests, as well as during the license period. Time devoted to test patterns, or to aural presentations accompanied by the incidental use of fixed visual images which have no substantial relationship to the subject matter of such aural presentations, shall not be considered in computing periods of program service.

(3) In the event that causes beyond a licensee's control make it impossible to adhere to the operating schedule in paragraph (a) (1) of this section or to continue operating, the station may limit or

discontinue operation for a period of not more than 10 days, without further authority of the Commission. However, the Commission and the Engineer in Charge of the radio district in which the station is located shall be immediately notified in writing if the station is unable to maintain the minimum operating schedule and shall be subsequently notified when the station resumes regular operation.

(b) Noncommercial educational television broadcast stations are not required to operate on a regular schedule and no minimum number of hours of operation is specified; but the hours of actual operation during a license period shall be taken into account when considering the renewal of noncommercial educational television broadcast licenses.

(c) (1) The aural transmitter of a television station shall not be operated separately from the visual transmitter except for the following purposes:

(i) For actual tests of station equipment or actual experimentation in accordance with Section 3.666; and

(ii) For emergency "fills" in case of visual equipment failure or unscheduled and unavoidable delays in presenting visual programs. In such situations the aural transmitter may be used to advise the audience of difficulties and to transmit for a short period program material of such nature that the audience will be enabled to remain tuned to the station: for example, music or news accompanying a test pattern or other visual presentation

(2) During periods of transmission of a test pattern on the visual transmitter shall consist only of a single tone or series of variable tones. During periods when still pictures or slides are employed to produce visual transmissions which are accompanied by aural transmissions, the aural and visual transmission shall be integral parts of a program or announcement and shall have a substantial relationship to each other. Provided: That nothing herein shall preclude the transmission of a test pattern, still picture or slides for the following purposes and periods:

(1) To accompany aural announcements of the station's program schedule and aural news broadcasts or news commentaries, for a total period not to exceed one hour in any broadcast day.

(ii) To accompany aural transmissions for a period of time not to exceed fifteen minutes immediately prior to the commencement of a programming schedule.

Examples: (1) Duplication of am or fm programs on the aural transmitter of a television station while the same program is broadcast on the visual transmitter (i.e., a "simulcast") is consistent with this paragraph.

(2) Duplication of am or fm programs on the aural transmitter of a television station while a test pattern is broadcast on the visual transmitter is not consistent with this paragraph, except for the specific purposes and periods specified in paragraph (c) (2).

(3) A travel lecture in which the words of the lecturer are broadcast simultaneously with still pictures or slides of scenes illustrating the lecture, and a newscast in which the words of the newscaster are broadcast simultaneously with still pictures or slides of the news events, are examples of programs in which the aural and visual transmission are integral parts of the same program having a substantial relationship to each other, within the meaning of paragraph (c) (2). Mood music unrelated to the visual transmission is not consistent with this paragraph.

(4) The broadcast of a test pattern accompanied by a musical composition for the purpose of demonstration, sale, installation or orientation of television receivers, or receiving antennas is not consistent with this paragraph.

(5) Music accompanying the transmission of a test pattern upon which is visually imposed a moving test consisting of continuous program material, such as a running newscast or news commentary, is consistent with this paragraph.

(6) Music accompanying the transmission of a test pattern upon which is visually imposed a clock indicating the time of day, or a text that is changed at spaced intervals, is not consistent with this paragraph.

OPERATOR REQUIREMENTS

In am rules . . .

§3.93 Operator requirements.—(a) One or more radio operators holding a valid radio-telephone first-class operator license, except as provided in paragraph (b) of this section, shall be in actual charge of the transmitting apparatus and shall be on duty either at the transmitter location or remote control point.

(b) A station which is authorized for non-directional operation with power of 10 kilowatts or less may be operated by persons holding commercial radio operator license of any class when the equipment is so designed that the stability of the frequency is maintained by the transmitter itself within the limits of tolerance specified, and none of the operations, except those specified in subparagraphs (1) through (4) of this paragraph, necessary to be performed during the course of normal operation may cause off-frequency operation or result in any unauthorized radiation. (A person holding any class of radio operator license or permit who is authorized thereunder to perform limited operation of a standard broadcast station may, when a CONELRAD Radio Alert is called, or for the purpose of participation in a drill or test of the Emergency Broadcast System, make adjustments necessary to effect operation in accordance with a National Defense Emergency Authorization: provided, that the station's full-time radiotelephone first-class operator shall have previously instructed such person in the adjustments to the transmitter which are necessary to accomplish operation in the Emergency Broadcast System.) Adjustments of transmitting equipment by such operators, except when under the immediate supervision of a radiotelephone first-class operator, shall be limited to the following:

(1) Those necessary to commence or terminate transmitter emissions as a routine matter.

(2) Those external adjustments that may be required as a result of variations of primary power supply.

(3) Those external adjustments which may be necessary to insure modulation within the limits required.

(4) Those adjustments necessary to effect any change in operating power which may be required by the station's instrument of authorization.

Should the transmitting apparatus be observed to be operating in a manner inconsistent with the station's instrument of authorization and none of the above adjustments are effective in bringing it into proper operation, a person holding other than a radiotelephone first-class operator shall be required to terminate the station's emissions.

(c) The licensee of a station which is operated by one or more operators holding other than a radiotelephone first-class operator license shall have one or more operators holding a radiotelephone first-class operator license in regular full-time employment at the station whose primary duties shall be to effect and insure the proper functioning of the transmitting equipment. In the event that the licensee also operates an fm broadcast station in the same community, a regular fulltime radiotelephone first-class operator or operators employed in connection with the standard broadcast station may concurrently be employed to satisfy the requirements of §§ 3.265 (c) or 3.565 (c): Provided, that the duties of such operator or operators concerning the fm broadcast transmitting equipment shall in no wise interfere with the proper performance of his duties with respect to the standard broadcast transmitter.

d) The licensed operator on duty and in charge of a standard broadcast transmitter may, at the discretion of the licensee, be employed for other duties or for the operation of another radio station or stations in accordance with the class of operator's license which he holds and the rules and regulations governing such other stations: Provided, however, that such duties shall in no wise interfere with the proper operation of the standard broadcast transmitter.

In fm rules . . .

§3.265 Operator requirements.
[EDITOR'S NOTE: Substantially the same as §3.93.]

In tv rules . . .

§3.661 Operator requirements. One or more licensed radiotelephone first-class operators shall be on duty at the place where the transmitting apparatus of each station is located and in actual charge thereof whenever it is being operated. The original license (or FCC Form No. 759) of each station operator shall be posted at the place where he is on duty. The licensed operator on duty and in charge of a television broadcast transmitter may, at the discretion of the licensee, be employed for other duties or for the operation of another station or stations in accordance with the class of operator's license which he holds and by the rules and regulations governing such stations. However, such duties shall in no wise interfere with the operation of the broadcast transmitter.

cessity. In determining whether there is such a concentration of control, consideration will be given to the facts of each case with particular reference to such factors as the size, extent and location of areas served, the number of people served, and the extent of other competitive service in the areas in question. The Commission, however, will in any event consider that there would be such a concentration of control contrary to the public interest, convenience or necessity for any party or any of its stockholders, officers or directors to have a direct or indirect interest in, or be stockholders, officers, or directors of, more than seven television broadcast stations, no more than five of which may be in the vhf band.

(b) Paragraph (a) of this section is not applicable to non-commercial educational stations.

NOTE 1: The word "control" as used herein is not limited to majority stock ownership, but includes actual working control in whatever manner exercised.

NOTE 2: In applying the provisions of paragraph (a) of this section to the stockholders of a corporation which has more than 50 voting stockholders, only those stockholders need be considered who are officers or directors or who directly or indirectly own 1% or more of the outstanding voting stock.

STUDIO LOCATION ORIGINATIONS

In am rules . . .

§3.30 Station location and program origination.—(a) Except as provided in paragraph (b) of this section, each standard broadcast station will be licensed to serve primarily a particular city, town, or other political subdivision, which will be specified in the station license and the station will be considered to be located in such place. Unless licensed as a synchronous amplifier transmitter, each station shall maintain a studio, which will be known as the main studio, in the place where the station is located, provided that the main studio may be located at the transmitter site whether or not the transmitter site is in the place where the station is located. A majority (computed on the basis of duration and not number) of a station's programs or in the case of a station affiliated with a network two-thirds of such station's non-network programs, whichever is smaller, shall originate from the main studio or from other studios or remote points situated in the place where the station is located.

(b) Stations will be licensed to serve more than one city, town, or other political subdivision only where a satisfactory showing is made that such place meets all the requirements of the Rules and Standards of Good Engineering Practice with respect to the location of main studios; that the station can and will originate a substantial number of local live programs from each such place; and that the requirements as to origination of programs contained in paragraph (a) of this section would place an unreasonable burden on the station if it were licensed to serve only one city, town, or other political subdivision. A station licensed to serve more than one place shall be considered to be located in and shall maintain main studios in each such place. With respect to such station the requirements as to origination of programs contained in paragraph (a) of this section shall be satisfied by the origination of programs from any or all of the main studios or from other studios and remote points situated in any or all of the places in which the main studios are located.

(c) The transmitter of each standard broadcast station shall be so located that primary service is delivered to the borough or city in which the main studio is located in accordance with the Standards of Good Engineering Practice, prescribed by the Commission.

§3.31 Authority to move main studio.—The licensee of a station shall not move its main studio outside the borders of the borough or city, state, district, territory, or possession in which it is located, unless such move is to the location of the station's transmitter, without first securing a modification of construction permit or license. The licensee shall promptly notify the Commission of any other change in location of the main studio.

In fm rules . . .

§3.205—[EDITOR'S NOTE: In substance the same as §3.30, above, except that subsection (c) reads as follows:
"The transmitter of each fm broadcast

station shall be so located that satisfactory service is delivered to the city where the main studio is located in accordance with the technical standards of this subpart; provided, however, upon special showing of need, authorization may be granted to locate the transmitter so that adequate service is not rendered to this city, but in no event shall this city be beyond the 50 uv/m contour."]

In tv rules . . .

§3.613 Main studio location.—(a) The main studio of a television broadcast station shall be located in the principal community to be served. Where the principal community to be served is a city, town, village or other political subdivision, the main studio shall be located within the corporate boundaries of such city, town, village or other political subdivision. Where the principal community to be served does not have specifically defined political boundaries, applications will be considered on a case-to-case basis in the light of the particular facts involved to determine whether the main studio is located within the principal community to be served.

(b) In cases where an adequate showing is made that there is good cause for locating a main studio outside the principal community to be served and that to do so would not be inconsistent with the operation of the station in the public interest, the Commission will permit the use of a main studio location other than that specified in paragraph (a) of this section. The licensee or permittee of a television broadcast station shall not move his main studio outside the principal community in which it is located without first securing a modification of construction permit or license. Such a licensee or permittee shall notify the Commission promptly of any change of the location of the main studio within the community. In any case where the main studio is located outside the principal community to be served, the licensee or permittee of a television broadcast station shall not move his main studio without first securing a modification of construction permit or license.

OPERATING SCHEDULES

For am stations . . .

§3.71 Minimum operation schedule.—(a) All standard broadcast stations are required to maintain an operating schedule of not less than two-thirds of the total hours they are authorized to operate between 6 a.m. and 6 p.m. local standard time, and two-thirds of the total hours they are authorized to operate between 6 p.m. and midnight, local standard time, on each day of the week except Sunday; Provided, however, that stations authorized for daytime operation only need comply only with the minimum requirement for operation between 6 a.m. and 6 p.m.

(b) In the event that causes beyond the licensee's control make it impossible to adhere to the operating schedule in paragraph (a) of this section or to continue operating, the station may limit or discontinue operation for a period of not more than 10 days, without further authority of the Commission. However, the Commission and the Engineer in Charge of the radio district in which the station is located shall be immediately notified in writing if the station is unable to maintain the minimum operating schedule and shall be subsequently notified when the station resumes regular operation.

§3.72 Operation during experimental period.—The licensee of each standard broadcast station shall operate or refrain from operating its station during the experimental period as directed by the Commission in order to facilitate frequency measurement or for the determination of interference.

§3.73 Specified hours.—If the license of a station specifies the hours of operation, the schedule so specified shall be adhered to except as provided in Sections 3.71 and 3.72.

§3.79 License to specify sunrise and sunset hours.—If the licensee of a broadcast station is required to commence or cease operation, or to change the mode of operation of the station at the times of sunrise and sunset at any particular location, the controlling times of each month of the year are set forth in the station's instrument of authorization. Uniform sunrise and sunset times are specified for all of the days of each month, based upon the actual times of sunrise and sunset for the fifteenth day of that month adjusted to the nearest quarter hour. In accordance with a standardized procedure described therein, ac-

tual sunrise and sunset time are derived by interpolation in the tables of the 1946 American Nautical Almanac, issued by the Nautical Almanac Office of the United States Naval Observatory.

§3.80 Secondary station; filing of operating schedule.—The licensee of a secondary station authorized to operate limited time and which may resume operation at the time the dominant station (or stations) on the same channel ceases operation shall, with each application for renewal of license, file in triplicate a copy of its regular operating schedule, bearing a signed notation by the licensee of the dominant station of its objection or lack of objection thereto. Upon approval of such operating schedule, the Commission will affix its file mark and return one copy to the licensee authorized to operate limited time, which shall be posted with the station license and considered as a part thereof. Departure from said operating schedule will be permitted only in accordance with the procedure set forth in section 3.77.

§3.81 Secondary station; failure to reach agreement.—If the licensee of a secondary station authorized to operate limited time and a dominant station on a channel are unable to agree upon a definite time for resumption of operation by the station authorized limited time, the Commission shall be so notified by the licensee of the station authorized limited time. After receipt of such statement the Commission will designate for hearing the applications of both stations for renewal of license, and pending the hearing the schedule previously adhered to shall remain in full force and effect.

§3.82 Departure from schedule; material violation.—In all cases where a station licensee is required to prepare and file an operating schedule, any deviation or departure from such schedule, except as herein authorized, shall be considered as a violation of a material term of the license.

§3.83 Local standard time.—All references herein to standard time or local standard time refer to local standard time as determined and fixed by the Interstate Commerce Commission.

§3.84 Daylight saving time.—If local time is changed from standard time to daylight saving time at the location of all stations sharing time on the same channel, the hours of operation of all such stations on that channel shall be understood to refer to daylight saving time, and not standard time, as long as daylight saving time is observed at such location. This provision shall govern when the time is changed by provision of law or general observance of daylight saving time by the various communities, and when the time of operation of such stations is specified in the license or is mutually agreed upon by the licensees; provided, however, that when the license specifies average time of sunrise and sunset, local standard time shall be observed. In no event shall a station licensed for daytime only operate on regular schedule prior to local sunrise, or shall a station licensed for greater daytime power than nighttime power or for a different radiation pattern for daytime operation than for nighttime operation operate with the daytime power or radiation pattern prior to local sunrise.

§3.85 Changes in time; agreement between licensees.—Where the local time is not changed from standard to daylight saving time at the location of all stations sharing time on the same channel, the hours of operation of such stations shall be understood to have reference to standard time, and not daylight saving time, unless said licensees mutually agree upon a new schedule which shall be effective only while daylight saving time is observed at the location of some of these stations.

§3.86 Local standard time; license provisions.—The time of operation of any broadcast station which does not share time with other stations on the same channel shall be understood to have reference to local standard time unless modification of such license with respect to hours of operation is authorized by the Commission.

§3.87 Program transmission prior to local sunrise.—(a) The provisions of Sections 3.6, 3.8, 3.9, 3.10, 3.23, 3.79 and 3.84 shall not prevent the transmission of programs between four o'clock a.m., local standard time, and local sunrise of standard broadcast stations with their authorized daytime facilities, provided, that the provisions of this rule shall not extend to:

who received an authorization after March 22, 1951, to relocate its transmitter site and construct a new tower and antenna to a height in excess of 1000 feet above average terrain and who constructed or who had substantially completed construction of said tower and antenna prior to April 14, 1952. In such case, maximum power may be utilized at the height above average terrain specified in the authorization. The limitation shall apply, however, where the tower or other principal supporting structure had been constructed prior to the date of such authorization.

(2) In Zones II and III, the maximum powers which may be used by television broadcast stations operating on the respective channels set forth in the above table with antenna heights exceeding 2000 feet above average terrain shall be based on the chart designated as Appendix III, Figure 2b.

(3) The effective radiated power in any horizontal or vertical direction may not exceed the maximum values permitted by this section and Appendix III, Figures 2(a) and 2(b).

(4) The maximum effective radiated power in any direction above the horizontal plane shall be as low as the state of the art permits and may not exceed the effective radiated power in the horizontal direction in the same vertical plane.

(c) The zone in which the transmitter of a television station is located or proposed to be located determines the applicable rules with respect to maximum antenna heights and powers for vhf stations when the transmitter is located in Zone I and the channel to be employed is located in Zone II, or the transmitter is located in Zone II and the channel to be employed is located in Zone I.

[Note: The maximum visual effective radiated power of television broadcast stations operating on channels 14-83 within 250 miles of the Canadian-U. S. border may not be in excess of 30 dbk (1,000 kw).]

MULTIPLE OWNERSHIP

In am rules . . .

§3.35 Multiple ownership—No license for a standard broadcast station shall be granted to any party (including all parties under common control) if:

(1) such party, directly or indirectly owns, operates or controls another standard broadcast station, a substantial portion of whose primary service area would receive primary service from the station in question, except upon a showing that public interest, convenience and necessity will be served through such multiple ownership situation; or

(2) such party, or any stockholder, officer or director of such party, directly or indirectly owns, operates, controls, or has any interest in, or is an officer or director of any other standard broadcast station if the grant of such license would result in a concentration of control of standard broadcasting in a manner inconsistent with public interest, convenience, or necessity. In determining whether there is such a concentration of control, consideration will be given to the facts of each case with particular reference to such factors as the size, extent and location of area served, the number of people served, classes of stations involved and the extent of other competitive service to the areas in question. The Commission, however, will in any event consider that there would be such a concentration of control contrary to the public interest, convenience or necessity for any party or any of its stockholders, officers or directors to have a direct or indirect interest in, or be stockholders, officers, or directors of, more than seven standard broadcast stations.

NOTE: The word "control" as used herein, is not limited to majority stock ownership but includes actual working control in whatever manner exercised.

NOTE: In applying the foregoing provisions to the stockholders of a corporation which has more than 50 voting stockholders, only those stockholders need be considered who are officers or directors or who directly or indirectly own 1% or more of the outstanding voting stock.

NOTE: On Dec. 7, 1960, the FCC proposed to amend the second 'Note' in Rule 3.35, and in the corresponding rules for fm and tv (§§3.240, 3.336, below) to relax the requirements as to stockholders holding less than 1% of stock of corporations with more than 50 stockholders, or less than 5% as to corporations with more than 50 stockholders.

In fm rules . . .

§3.240 Multiple ownership—No license for an fm broadcast station shall be granted to any party (including all par-

ties under common control) if:

(1) such party directly or indirectly owns, operates, or controls another fm broadcast station which serves substantially the same service area; or

(2) such party, or any stockholder, officer or director of such party, directly or indirectly owns, operates, controls, or has any interest in, or is an officer or director of any other fm broadcast station if the grant of such license would result in a concentration of control of fm broadcasting in a manner inconsistent with public interest, convenience or necessity. In determining whether there is such a concentration of control, consideration will be given to the facts of each case with particular reference to such factors as the size, extent and location of areas served, the number of people served, classes of stations involved, and the extent of other competitive service to the areas in question. The Commission, however, will in any event consider that there would be such a concentration of control contrary to the public interest, convenience or necessity for any party or any of its stockholders, officers or directors to have a direct or indirect interest in, or be stockholders, officers, or directors of, more than seven fm broadcast stations.

NOTE: The word "control" as used herein, is not limited to majority stock ownership but includes actual working control in whatever manner exercised.

NOTE: In applying the foregoing provisions to the stockholders of a corporation which has more than 50 voting stockholders, only those stockholders need be considered who are officers or directors or who directly or indirectly own 1% or more of the outstanding voting stock.

In tv rules . . .

§3.636. Multiple ownership.—(a) No license for a television broadcast station shall be granted to any party (including all parties under common control) if:

(1) such party directly or indirectly owns, operates, or controls another television broadcast station which serves substantially the same area; or

(2) such party, or any stockholder, officer or director of such party, directly or indirectly owns, operates, controls, or has any interest in, or is an officer or director of any other television broadcast station if the grant of such license would result in a concentration of control of television broadcasting in a manner inconsistent with public interest, convenience, or ne-

*UHF mileage separations, see Sec. 3.610(d) page C-32.

FCC Rules CONTINUED

(b) In Alaska and Hawaii the frequency bands 76-82 mc and 82-88 mc are allocated for nonbroadcast use. These frequency bands (Channels 5 and 6) will not be assigned in Alaska and Hawaii for use by television broadcast stations.

§3.606. Table of Assignments. (a) The following Table of Assignments contains the channels assigned to the listed communities in the United States, its Territories, and Possessions. Channels designated with an asterisk are assigned for use by non-commercial educational broadcast stations only. A station on a channel identified by a plus or minus mark is required to operate with its carrier frequencies offset 10 kc above or below, respectively, the normal carrier frequencies.

[EDITOR'S NOTE: Channel assignments by cities are reprinted in the tv station directory and are not repeated here.]

§3.607. Availability of channels.—(a) Subject to the provisions of paragraph (b) of this section, applications may be filed to construct television broadcast stations only on the channels assigned in the Table of Assignments and only in the communities listed therein. Applications which fail to comply with this requirement, whether or not accompanied by a petition to amend the Table, will not be accepted for filing provided, however, that applications specifying channels which accord with publicly announced Commission orders changing the Table of Assignments will be accepted for filing even though such applications are tendered before the effective dates of such channel changes.

(b) A channel assigned to a community listed in the Table of Assignments is available upon application in any unlisted community which is located within 15 miles of the listed community. In addition, a channel assigned to a community listed in the Table of Assignments and not designated for use by noncommercial educational stations only, is available upon application in any other community within 15 miles thereof which, although listed in the Table, is assigned only a channel

designed for use only by noncommercial educational stations. Where channels are assigned to two or more communities listed in combination in the Table of Assignments the provisions of this paragraph shall apply separately to each community so listed. The distance between communities shall be determined by the distance between the respective coordinates thereof as set forth in the publication of the United States Department of Commerce entitled "Air Line Distances Between Cities in the United States." (This publication may be purchased from the Government Printing Office, Washington, D. C.) If said publication does not contain the coordinates of either or both communities, the coordinates of the main post office in either or both of such communities shall be used. The method to be followed in making the measurements is set forth in Section 3.611 (d).

§3.609. Zones. (a) For the purpose of allocation and assignment, the United States is divided into three zones as follows:

(1) Zone I consists of that portion of the United States located within the confines of the following lines drawn on the United States Albers Equal Area Projection Map (based on standard parallels 29½° and 45½°; North American datum): Beginning at the most easterly point on the State boundary line between North Carolina and Virginia; thence in a straight line to a point of the Virginia, West Virginia boundary line located at North Latitude 37° 49' and West Longitude 80° 12' 30"; thence westerly along the southern boundary lines of the States of West Virginia, Ohio, Indiana and Illinois to a point at the junction of the Illinois, Kentucky, and Missouri State boundary lines; thence northerly along the western boundary line of the State of Illinois to a point at the junction of the Illinois, Iowa, and Wisconsin State boundary lines; thence easterly along the northern State boundary line of Illinois to the 90th meridian; thence north along this meridian to the 43.5° parallel; thence east along this parallel to the 71st meridian; thence in a straight line to the intersection of the 69th meridian and the 45th parallel; thence east along the 45th parallel to the Atlantic Ocean. When any of the above lines pass through a city, the city shall be considered to be located in Zone I. (See Figure 1 of §3.699.)

(2) Zone II consists of that portion of the United States which is not located in either Zone I or Zone III, and Puerto Rico, Alaska, Hawaiian Islands and the Virgin Islands.

(3) Zone III consists of that portion of the United States located south of a line drawn on the United States Albers Equal Area Projection Map (based on standard parallels 29½° and 45½°; North American datum), beginning at a point on the east coast of Georgia and the 31st parallel and ending at the United States-Mexican border, consisting of arcs drawn with a 150 mile radius to the north from the following specified points:

North Latitude	West Longitude
a) 29°40'00"	83°24'00"
b) 30°07'00"	84°12'00"
c) 30°31'00"	86°30'00"
d) 30°48'00"	87°58'30"
e) 30°00'00"	90°38'30"
f) 30°04'30"	93°19'00"
g) 29°46'00"	95°05'00"
h) 28°43'00"	96°30'30"
i) 27°52'30"	97°32'00"

When any of the above arcs pass through a city, the city shall be considered to be located in Zone II. (See Figure 2 of §3.699.)

§3.610. Separations. (a) The provisions of this section relate to assignment separations and station separations. Petitions to amend the Table of Assignments (§3.606(b)) (other than those also expressly requesting amendment of this section or §3.609) will be dismissed and all applications for new television broadcast stations or for changes in the transmitter sites of existing stations will not be accepted for filing if they fail to comply with the requirements specified in paragraphs (b), (c) and (d) of this section.

NOTE: Licensees and permittees of television broadcast stations which were operating on April 14, 1952 pursuant to one or more separations below those set forth in §3.610 may continue to so operate, but in no event may they further reduce the separations below the minimum. As the existing separations of such stations are increased, the new separations will become the required minimum separations until separations are reached which comply with the requirements of §3.610. Thereafter, the provisions of said section shall be applicable.

(b) Minimum co-channel assignment and station separations:

(1) Zone	Channels 2-13	Channels 14-83
I	170 miles	155 miles
II	190 miles	175 miles
III	220 miles	205 miles

(2) The minimum co-channel mileage separation between a station in one zone and a station in another zone shall be that of the zone requiring the lower separation.

(c) Minimum assignment and station adjacent channel separations applicable to all zones:

(1) Channels 2-13	Channels 14-83
60 miles	55 miles

[EDITOR'S NOTE: On Jan. 7, 1960, the FCC proposed to amend this section and §§3.683, 3.684, 3.685 and 3.686 to permit additional vhf channels to be added to selected markets at reduced adjacent channel mileage separations. Current 60 mile separation requirement would be reduced to 40 miles for adjacent vhf channels.]

(2) Due to the frequency spacing which exists between Channels 4 and 5, between Channels 6 and 7, and between Channels 13 and 14, the minimum adjacent channel separations specified above shall not be applicable to these pairs of channels (see §3.603).

(d) In addition to the requirements of paragraphs (a), (b) and (c) of this section, the minimum assignment and station separations between stations on Channels 14-83, inclusive, as set forth in Table IV of §3.698 must be met in either rule making proceedings looking towards the amendment of the Table of Assignments (§3.606(b)) or in licensing proceedings. No channel listed in column (1) of Table IV of §3.698 will be assigned to any city, and no application for an authorization to operate on such a channel will be granted unless the mileage separations indicated at the top of columns (2)-(7), inclusive, are met with respect to each of the channels listed in those columns and parallel with the channel in column (1).

(e) The zone in which the transmitter of a television station is located or proposed to be located determines the applicable rules with respect to co-channel mileage separations where the transmitter is located in a different zone from that in which the channel to be employed is located.

§3.614. Power and antenna height requirements.—(a) Minimum requirements. Applications will not be accepted for filing if they specify less than—10 dbk (100 watts) visual effective radiated power in any horizontal direction. No minimum antenna height above average terrain is specified.

(b) Maximum power. Applications will not be accepted for filing if they specify a power in excess of that provided in this paragraph. Except as provided in subparagraph (1) below, the maximum effective radiated powers of television broadcast stations operating on the channels set forth below with antenna heights not in excess of 2000 feet above average terrain shall be as follows:

Channel Nos.	Maximum visual effective radiated power in db above one kilowatt (dbk)
2-6	20 dbk (100 kw)
7-13	25 dbk (316 kw)
14-83	37 dbk (5000 kw)

(1) In Zone I, on Channels 2-13 inclusive, the maximum powers specified above for these channels may be used only with antenna heights not in excess of 1000 feet above average terrain. Where antenna heights exceeding 1,000 feet above average terrain are used on Channels 2-13, or antenna heights exceeding 2000 feet above average terrain are used on Channels 14-83, the maximum power shall be based on the chart designated as Figure 3 of §3.699.

NOTE: This limitation shall not apply to any licensee or permittee in Zone I

ONLY THE NAME HAS CHANGED

The Tower Construction Co. has changed its name. The new name is TOWER COMMUNICATIONS CO. That's the only change that's been made. Everything else... management, employees, the modern production facilities, are still the same.

You get a **TOWER OF STRENGTH**

When you buy *Utility*

*You get more for your money
with **UTILITY TOWERS***

EXPERIENCED PACKAGE INSTALLATION

Utility Tower installation crews know their job. Our installation supervisors average 8 years experience. Their assistants average 5. These men know how to do the job correctly, economically and on time. They handle all the details of a package installation including lighting and ground systems.

SOLID BASE INSULATORS

Insulated vertical radiators are equipped with the latest Utility 3401 or Utility 2201 pivot base insulators for positive insulation between base and ground. Utility base insulators have much higher compression rating than hollow insulators of similar size. Resilient. Shatter-proof. Each insulator is proof tested for a load approximately eight times greater than ever carried in normal broadcast service.

EASY TUNING

You save money on initial engineering costs because Utility Towers are easier to tune. One reason for this is the fact they are built to your exact requirements.

SMALLER CONCRETE PIER

Diversified tower support makes massive concrete bases or piers unnecessary—thus doing the job for you at less cost.

EASY MAINTENANCE

Round members and welded construction provide smooth surfaces for easy painting and servicing. Steps are built into bracing to eliminate need for scaffolding and to make entire height of tower easy for maintenance men to reach.

GALVANIZED HARDWARE

All Utility Tower hardware is hot dipped galvanized to prevent rust and corrosion.

FCC Rules CONTINUED

terference will be caused, the need for the proposed service outweighs the need for the service which will be lost by reason of such interference; and (2) primary service will be provided to the community in which the proposed station is to be located; and (3) the interference received does not affect more than 10 percent of the population in the proposed station's normally protected primary service area; however, in the event that the nighttime interference received by a proposed class II or III station would exceed this amount, then an assignment may be made if the proposed station would provide either a standard broadcast nighttime facility to a community not having such a facility or if 25 percent or more of the nighttime primary service area of the proposed station is without primary nighttime service. Further, proviso (3) of this paragraph shall not apply to existing class IV stations on local channels applying for an increase in power above 250 watts, nor to new class IV stations proposing power in excess of 250 watts with respect to population in the primary service area outside the equivalent 250 watt, 0.5 mv/m contour.

§3.29 Class IV stations on regional channels.—No license will be granted for the operation of a class IV station on a regional channel, provided, however, that class IV stations presently authorized to operate on regional channels will not be required to change frequency or power but will not be protected against interference from class III stations.

In fm rules . . .

§3.201. Numerical designation of fm broadcast channels.—For convenience, the frequencies available for fm broadcasting (including those assigned to non-commercial educational broadcasting) are given numerical designations which are shown in the table below:

EDITOR'S NOTE: [The band is 88-108 mc. Non-commercial educational fm occupies 88-92 mc. Class A commercial channels are shown in §3.203 (b), below. The rest are class B.]

§3.202 Areas of the United States.—For the purpose of allocation the United States is divided into two areas. The first area—Area I—includes southern New Hampshire; all of Massachusetts, Rhode Island, and Connecticut; southeastern New York as far north as Albany-Troy-Schenectady; all of New Jersey, Delaware, and the District of Columbia; Maryland as far west as Hagerstown; and eastern Pennsylvania as far west as Harrisburg. The second area—Area II—comprehends the remainder of the United States not included in Area I.

NOTE: In some of the territory contiguous to Area I, the demand for frequencies requires that applications be given careful study and consideration to insure an equitable distribution of facilities throughout the region. This region includes the remainder of Maryland, Pennsylvania, and New York (except the northeastern corner) not included in Area I; Virginia, West Virginia, North Carolina, South Carolina, Ohio and Indiana; southern Michigan as far north as Saginaw; eastern Illinois as far west as Rockford-Decatur; and southeastern Wisconsin as far north as Sheboygan. Other regions may be added as required.

§3.203 Class A Stations.—(a) A class A station is a station which operates on a class A channel and is designed to render service primarily to a community or to a city or town other than the principal city of an area, and the surrounding rural area. The coverage of a class A station shall be not more than the equivalent of 1 kilowatt effective radiated power and antenna height of 250 feet above average terrain, as determined by the methods prescribed in the technical standards of this subpart.

(For the purpose of determining equivalent coverage the 1 mv/m contour should be used. A class A station will not be licensed with more than 1 kilowatt effective radiated power. The power rating of the transmitter used for a class A station shall be not less than 250 watts nor more than 1 kilowatt. The signal intensity requirements of §3.311 shall determine the minimum coverage of a class A station. Class A station will normally be protected to the 1 mv/m contour; however, assignments will be made in a manner to insure, insofar as possible, a maximum of service to all listeners, whether urban or rural, giving consideration to the minimum signal capable of providing service.)

(b) The following frequencies, except as provided in paragraphs (c) and (d) of this

section, are designated as class A channels and are assigned for use by class A stations:

Fre- quency	Chan- nel	Fre- quency	Chan- nel	Fre- quency	Chan- nel
92.1	221	96.7	244	102.3	272
92.7	224	97.7	249	103.1	276
93.5	228	98.3	252	103.9	280
94.3	232	99.3	257	104.9	285
95.3	237	100.1	261	105.5	288
95.9	240	100.9	265	106.3	292
		101.7	269	107.1	296

These channels are available for assignment (1) in cities which are not the central city or cities of a metropolitan district, and (2) in central cities of metropolitan districts which have fewer than six class B stations.

(c) In Hawaii, the frequency band 98-108 mc is allocated for non-broadcast use. The frequencies 98.1 through 107 mc, inclusive, (channels 251 through 300 inclusive) will not be assigned in Hawaii for use by fm broadcast stations.

(d) In Alaska the frequency band 88-108 mc is allocated for non-broadcast use. The frequencies 88-1 mc through 99.9 mc and the non-Government fixed service mc is allocated to Government radio services and the non-Government fixed service only. The frequencies 88.1 mc through 99.9 mc (channels 201 through 260 inclusive) will not be assigned in Alaska for use by fm broadcast stations.

§3.204 Class B Stations.—(a) A class B station is a station which operates on a class B channel and is designed to render service primarily to a metropolitan district or principal city and the surrounding rural area, or to rural areas removed from large centers of population. The service area of a class B sta-

tion will not be protected beyond the 1 mv/m contour; however, class B assignments will be made in a manner to insure, insofar as possible, a maximum of service to all listeners, whether urban or rural, giving consideration to the minimum signal capable of providing service. Standard power ratings of transmitters used for class B stations shall be 1 kw or greater. The signal intensity requirements of §3.311 shall determine the minimum coverage of a Class B station. In the following sub-sections, antenna height above average terrain and effective radiated power are to be determined by the methods prescribed in the technical standards of this subpart.

(1) The coverage of a class B station in Area I shall be not more than the equivalent of 20 kilowatts effective radiated power and antenna height of 500 feet above average terrain. A class B station in Area I will not be licensed with an effective radiated power greater than 20 kilowatts. [NOTE: for the purpose of determining equivalent coverage, the 1 mv/m contour should be used.]

(2) The coverage of a class B station in Area II shall normally be not more than the equivalent of 20 kilowatts effective radiated power and antenna height of 500 feet above average terrain. The use of greater power and antenna height will be encouraged in those portions of Area II where such use would not result in undue interference to stations already authorized or to probable assignments insofar as can be determined at the time of the grant. In such case, the power, antenna height, and area will be determined on the merits of each application with particular attention being given to rural areas which would not otherwise receive service. [NOTE: For the purpose of determining equivalent coverage, the 1 mv/m contour should be used.]

(b) The following frequencies, except as provided in paragraphs (c) and (d) of this section, are designated as class B channels and are assigned for use by class B stations.

EDITOR'S NOTE: Class B channels are those channels between 92 mc and 108 mc which are not designated as class A channels in §3.203 (b).]

(c) In Hawaii the frequency band 98-108 mc is allocated for nonbroadcast use. The frequencies 98.1 through 107.9 mc inclusive (channels 251 through 300 inclusive) will not be assigned in Hawaii for use by fm broadcast stations.

(d) In Alaska the frequency band 88-108 mc is allocated exclusively to Government radio services and the non-Government fixed service. The frequencies 88.1 mc through 99.9 mc (channels 201 through 260 inclusive) will not be assigned in Alaska for use by fm broadcast stations.

In tv rules . . .

would radiate, during two hours following local sunrise and two hours preceding local sunset, in any direction toward the 0.1 mv/m ground-wave contour of a co-channel United States class I station, no more than the maximum radiation values permitted under the provisions of §3.187.

(1) That the public interest, convenience and necessity will be served through the operation under the proposed assignment.

§3.25 Clear channels: Class I and II stations.—The frequencies in the following tabulations are designated as clear channels and assigned for use by the classes of stations given:

(a) To each of the channels below, except as provided in the note to this paragraph (below), there will be assigned one class I station and there may be assigned one or more class II stations operating limited time or daytime only: 640, 650, 660, 670, 700, 720, 750, 760, 770, 780, 820, 830, 840, 870, 880, 890, 1020, 1040, 1100, 1120, 1160, 1180, 1200 and 1210 kilocycles. There also may be assigned to these frequencies class I stations operating unlimited time in Alaska, Hawaii, Virgin Islands and Puerto Rico which will not deliver over 5 microvolts per meter groundwave day or night or 25 microvolts per meter 10 percent time skywave at night at any point within the continental limits of the United States. The power of the class I stations on these channels shall not be less than 50 kilowatts.

NOTE: On the frequency 770 kc, two class I stations may be assigned.

(b) To each of the channels below there may be assigned class I and class II stations: 680, 710, 810, 850, 940, 1000, 1030, 1060, 1070, 1080, 1090, 1110, 1130, 1140, 1170, 1190, 1500, 1510, 1520, 1530, 1540, 1550, and 1560 kilocycles.

NOTE: Class I and II stations on 1540 kilocycles shall deliver not over 5 microvolts per meter groundwave or 25 microvolts per meter 10 percent time skywave at any point of land in the Bahama Islands, and such stations operating nighttime (i.e. sunset to sunrise at the location

of the class II station) shall be located not less than 650 miles from the nearest point of land in the Bahama Islands.

(c) For class II stations which will not deliver over 5 microvolts per meter groundwave or 25 microvolts per meter 10 percent time skywave at any point on Canadian border and provided that such stations operating nighttime (i.e. sunset to sunrise at the location of the class II station) are located not less than 650 miles from the nearest Canadian border: 540, 690, 740, 860, 990, 1010, and 1580 kilocycles.

NOTE: A station on 1010 kilocycles shall also protect a class I-B station at Havana, Cuba.

(d) In continental United States, for class II stations which operate daytime only with power not in excess of 1 kilowatt and which will not deliver over 5 microvolts per meter groundwave at any point on the Mexican border, and in Alaska, Hawaii, Puerto Rico, and the Virgin Islands, for class II stations which will not deliver over 5 microvolts per meter groundwave or 25 microvolts per meter 10 percent time skywave at any point on the said border: 730, 800, 900, 1050, 1220 and 1570 kilocycles.

NOTE: See North American Regional Broadcasting Agreement for use of 1050 kc by a station in New York (Appendix I, Table IV).

NOTE: See agreement with Mexico for further use of 1220 kc.

(e) On the frequency 770 kilocycles, two class I stations may be assigned.

§3.26 Regional channels: Classes III-A and III-B stations.—The following frequencies are designated as regional channels and are assigned for use by class III-A and III-B stations: 550, 560, 570, 580, 590, 600, 610, 620, 630, 790, 910, 920, 930, 950, 960, 970, 980, 1150, 1250, 1260, 1270, 1280, 1290, 1300, 1310, 1320, 1330, 1350, 1360, 1370, 1380, 1390, 1410, 1420, 1430, 1440, 1460, 1470, 1480, 1590, and 1600 kilocycles.

NOTE: See North American Regional Broadcasting Agreement for special provisions concerning the assigning of class II stations in other countries of North America to 560, 570, 590, 630 and 1270 kcs.

Such stations shall be protected from interference in accordance with Appendix II, Table I, of said agreement.

§3.27 Local channels: Class IV stations.—The following frequencies are designated as local channels and are assigned for use by class IV stations: 1230, 1240, 1400, 1450, and 1490 kilocycles.

§3.28 Assignment of stations to channels.—(a) The individual assignments of stations to channels which may cause interference to other United States stations only shall be made in accordance with the provisions of this Part for the respective classes of stations involved. (For determining objectionable interference see §§3.182 and 3.186.)

(b) In all cases where an individual station assignment may cause interference with or may involve a channel assigned for priority of use by a station in another North American country, the classifications, allocation requirements and engineering standards set forth in the North American Regional Broadcasting Agreement shall be observed.

NOTE: Pending action with respect to ratification and entry into force of the North American Regional Broadcasting Agreement, Washington, 1950 (referred to herein as NARBA) and the agreement between the U.S.A. and the United Mexican States Concerning Radio Broadcasting in Standard Broadcast Band (referred herein to as the U.S./Mexican Agreement), no assignment for a standard broadcast station will be made which would be inconsistent with the terms of those agreements, except for the power ceiling permitted for class IV stations on local channels, pursuant to Section 3.21 (c). [EDITOR'S NOTE: This paragraph still is in the FCC rules although both NARBA and the Mexican agreement were ratified in the spring of 1960 by the Senate.]

(c) Upon showing that a need exists, a class II, III, or IV station may be assigned to a channel available for such class, even though interference will be received within its normally protected contour; provided: (1) no objectionable interference will be caused by the proposed station to existing stations or that if in-

FCC Rules Regulating Radio-Television

(Selected sections amended to July 1, 1961. Compiled with the cooperation of Pike & Fischer Inc., publisher of Pike & Fischer Radio Regulation.)

ALLOCATIONS AND DEFINITIONS

In am rules . . .

§3.1 Standard broadcast station.—The term "standard broadcast station" means a station licensed for the transmission of radio-telephone emissions primarily intended to be received by the general public and operated on a channel in the band 535-1605 kilocycles, inclusive.

§3.2 Standard broadcast band.—The term "standard broadcast band" means the band of frequencies extending from 535-605 kilocycles.

§3.3 Standard broadcast channel.—The term "standard broadcast channel" means the band of frequencies occupied by the carrier and two side bands of a broadcast signal with the carrier frequency at the center. Channels shall be designated by their assigned carrier frequencies. The 107 carrier frequencies assigned to standard broadcast stations shall begin at 540 kilocycles and be in successive steps of 10 kilocycles.

§3.4 Dominant station.—The term "dominant station" means a class I station, as hereinafter defined, operating on a clear channel.

§3.5 Secondary station.—The term "secondary station" means any station except a class I station operating on a clear channel.

§3.6 Daytime.—The term "daytime" means that period of time between local sunrise and local sunset.

§3.7 Nighttime.—The term "nighttime" means that period of time between local sunset and 12 midnight local standard time.

§3.8 Sunrise and sunset.—The term "sunrise and sunset" means for each particular location and during any particular month, the time of sunrise and sunset as specified in the instrument of authorization.

§3.9 Broadcast day.—The term "broadcast" means that period of time between local sunrise and 12 midnight local standard time.

§3.10 Experimental period.—The term "experimental period" means that time between 12 midnight and local sunrise. This period may be used for experimental purposes in testing and maintaining apparatus by the licensee of any standard broadcast station on its assigned frequency and with its authorized power, provided no interference is caused to other stations maintaining a regular operating schedule within such period. No station licensed for "daytime" or "specified hours" of operation may broadcast any regular or scheduled program during this period.

§3.11 Service areas.—(a) The term "primary service area" of a broadcast station means the area in which the ground wave is not subject to objectionable interference or objectionable fading.

(b) The term "secondary service area" of a broadcast station means the area served by the sky wave and not subject to objectionable interference. The signal is subject to intermittent variations in intensity.

(c) The term "intermittent service area" of a broadcast station means the area receiving service from the ground wave but beyond the primary service area and subject to some interference and fading.

§3.12 Portable transmitter.—The term "portable transmitter" means a transmitter so constructed that it may be moved about conveniently from place to place, and is in fact so moved about from time to time, but not ordinarily used while in motion. In the standard broadcast band, such a transmitter is used in making field intensity measurements for locating a transmitter site for a standard broadcast station. A portable broadcast station will not be licensed in the standard broadcast band for regular transmission of programs intended to be received by the public.

§3.13 Auxiliary transmitter.—The term "auxiliary transmitter" means a transmitter maintained only for transmitting the regular programs of a station in case of failure of the main transmitter.

Allocations—(am)

§3.21 Three classes of standard broadcast channels.

(a) Clear channel: A "clear channel" is one on which the dominant station or stations render service over wide areas and which are cleared of objectionable interference within their primary service areas and over all or a substantial portion of their secondary service areas.

(b) Regional channel: A "regional channel" is one on which several stations may operate with powers not in excess of 5 kilowatts. The primary service area of a station operating on any such channel may be limited, as a consequence of interference, to a given field intensity contour.

(c) Local channel: A "local channel" is one on which several stations operate with powers not in excess of 1 kilowatt daytime, and 250 watts nighttime. The primary service area of a station operating on any such channel may be limited as a consequence of interference to a given field intensity contour.

NOTE: The power ceiling for class IV stations under the North American Regional Broadcasting Agreement (NARBA) is 250 watts. The Agreement between the United States of America and the United Mexican States Concerning Radio Broadcasting in the Standard Broadcast Band would permit daytime operation of Class IV stations with a maximum power of 1 kilowatt in all areas of the United States more than 100 kilometers (62 miles) from the United States/Mexican border. Pursuant to the U.S./Mexican Agreement and informal coordination with the other NARBA signatories, the Commission will consider applications proposing the use of daytime power in excess of 250 watts by a Class IV station providing such station is located more than 100 kilometers (62 miles) from the U. S. Mexican border, or if located in the State of Florida, providing that such station is not located south of 28 degrees north latitude and between 80 and 82 degrees west longitude. (See Note under Section 3.28(b).)

§3.22 Classes and power of standard broadcast stations.—(a) Class I station: A "class I station" is a dominant station operating on a clear channel and designed to render primary and secondary service over an extended area and at relatively long distances. Its primary service area is free from objectionable interference from other stations on the same and adjacent channels and its secondary service area free from interference except from stations on the adjacent channel, and from stations on the same channel in accordance with the channel designation in section 3.25 or in accordance with the Engineering Standards of Allocation. The operating power shall be not less than 10 kilowatts nor more than 50 kilowatts. (Also see section 3.25 (a) for further power limitation.)

(b) Class II station: A "class II station" is a secondary station which operates on a clear channel (see section 3.25) and is designed to render service over a primary service area which is limited by and subject to such interference as may be received from class I stations. A station of this class shall operate with power not less than 0.25 kilowatt nor more than 50 kilowatts. Whenever necessary, a class II station shall use a directional antenna or other means to avoid interferences with class I stations and with other class II stations, in accordance with §3.182.

[EDITOR'S NOTE: Since 1945 the FCC has been considering various changes in the Clear Channel assignments, including the question of a daytime skywave. On April 15, 1958, FCC issued a Notice of Further Rulemaking in which it proposed to breakdown various clear channels. This is still pending FCC action.]

(c) Class III station: A "class III station" is a station which operates on a regional channel and is designed to render service primarily to a metropolitan district and the rural area contiguous thereto. Class III stations are subdivided into two classes:

(1) Class III-A station: A "class III-A station" is a class III station which operates with power not less than 1 kilowatt nor more than 5 kilowatts, and the service area of which is subject to interference in accordance with §3.182.

(2) Class III-B station: A "class III-B station" is a class III station which operates with a power not less than 0.5 kilowatt and not more than 1 kilowatt night and 5 kilowatts daytime, and the service area of which is subject to interference in accordance with the Engineering Standards of Allocation.

NOTE: The term "metropolitan district" as used in this paragraph is not limited in accordance with the definition given by the Bureau of the Census but includes any principal center of population in any area.

(d) Class IV station: A "class IV station" is a station operating on a local channel and designed to render service primarily to a city or town and the suburban and rural areas contiguous thereto. The power of a station of this class shall not be less than 0.1 kilowatt and not more than 0.25 kilowatt nighttime, and 1 kilowatt daytime, and its service area is subject to interference in accordance with Section 3.182.

§3.23 Time of operation of the several classes of stations.—The several classes of standard broadcast stations may be licensed to operate in accordance with the following:

(a) "Unlimited time" permits operation without a maximum limit as to time.

(b) "Limited time" is applicable to class II (secondary) stations operating on a clear channel with facilities authorized before Nov. 30, 1959. It permits operation of the secondary station during daytime, and until local sunset if located west of the dominant station on the channel, or if located east thereof, until sunset at the dominant station; and in addition during night hours, if any, not used by the dominant station or stations on the channel.

(c) Daytime permits operation during the hours between average monthly local sunrise and average monthly local sunset. Daytime stations operating on local channels with a power of 0.1 kw or 0.25 kw may, upon notification to the Commission and to the Engineer in Charge of the radio district in which they are located, operate at hours beyond those specified in their license.

(d) "Sharing time" permits operation during hours which are so restricted by the station license as to require a division of time with one or more other stations using the same channel.

(e) Specified hours means that the exact operating hours are specified in the license. (The minimum hours that any station shall operate are specified in Section 3.71.) Specified hours stations operating on local channels with a power of 0.1 kw or 0.25 kw, except those sharing time with other stations may, upon notification to the Commission and the Engineer in Charge of the radio district in which they are located, operate at hours beyond those specified in their license.

§3.24 Broadcast facilities; showing required.—An authorization for a new standard broadcast station or increase in facilities of an existing station will be issued only after a satisfactory showing has been made in regard to the following, among others:

(a) That the proposed assignment will tend to effect a fair, efficient, and equitable distribution of radio service among the several states and communities.

(b) That objectionable interference will not be caused to existing stations or that if interference will be caused the need for the proposed service outweighs the need for the service which will be lost by reason of such interference. That the proposed station will not suffer interference to such an extent that its service would be reduced to an unsatisfactory degree. (For determining objectionable interference, see §§3.182 and 3.186.)

(c) That the applicant is financially qualified to construct and operate the proposed station.

(d) That the applicant is legally qualified. That the applicant (or the person or persons in control of an applicant corporation or other organization) is of good character and possesses other qualifications sufficient to provide a satisfactory public service.

(e) That the technical equipment proposed, the location of the transmitter, and other technical phases of operation comply with the regulations governing the same, and the requirements of good engineering practice. (See technical regulations of this subpart and §3.188.)

(f) That the facilities sought are subject to assignment as requested under existing international agreements and the rules and regulations of the Commission.

(g) That the population within the 1 v/m contour does not exceed 1.0 per cent of the population within the 25 mv/m contour: Provided, however, that where the number of persons within the 1 v/m contour is 300 or less the provisions of this subparagraph are not applicable.

(h) That, in the case of an application for a class II station, the proposed station

From GATES...

The Nation's Largest Manufacturer of
AM and FM Broadcast Equipment...

... comes the most
complete *quality* line of
transmitters and associated
products, audio systems, recording
devices and studio accessories available today.

Whatever your requirements – from a compact, rugged and top-performing transistor
preamplifier to the BC-50C, the standard of excellence in 50,000 watt
AM transmitters – you know that each Gates product represents an accumulation of
nearly 40 years of *specialized* engineering and manufacturing experience. The result:
Unprecedented dependability, performance and quality workmanship.

Little wonder that the *sounds of success* are most often heard from broadcasters using Gates equipment.

How to Apply for a Broadcasting Station

(updated to July 1961)

Any qualified citizen, firm, or group may apply to the Federal Communications Commission for authority to construct a standard (am), frequency modulation (fm), or television (tv) broadcast station.

Licensing of these facilities is prescribed by the Communications Act of 1934, as amended, which sets up certain basic requirements. In general, applicants must satisfy the Commission that they are legally, technically and financially qualified, and that operation of the proposed station would be in the public interest.

The licensing procedure is detailed in Part 1 of the Commission's Rules, "Practice and Procedure," while station operation is covered by Part 3, "Radio Broadcast Services." The latter includes technical standards for am, fm, and tv stations; fm frequency allocations by classes of stations, and tv channel assignments by states and communities. Copies of these rules are not supplied by the Commission but are available in Volumes I and III of the FCC rules and regulations sold by the Superintendent of Documents, Washington 25, D. C.

Most applicants employ engineering and legal services in preparing their applications. In many cases the applicant must have a search made for a frequency on which he could operate without causing or receiving interference from existing stations and stations proposed in pending applications. Also, he usually requires legal advice and assistance in filling out the application form. The workload of the Commission does not enable it to make frequency studies, etc., for prospective applicants. Nor does it recommend individual lawyers or engineers. Those who practice before the Commission have their own associations, the members of which are listed in various trade publications.

Following is a summary of the consecutive steps to be followed in applying for authorization to build and operate a broadcast station. The application procedure is substantially the same whether the facility sought is am, fm, or tv.

Selecting a Frequency

Am broadcast stations operate on "local," "regional," or "clear" channels. Stations of 250 watts power and up to 1 kilowatt serve small communities; stations of 500 watts to 5 kilowatts power cover centers of population and surrounding areas; stations of 10 to 50 kilowatts power are for large area coverage, particularly at night. There is no separate classification for am operation by educational stations.

There are two classes of commercial fm stations. Class A fm stations employ up to 1 kw in power for community service; and Class B stations use more power for metropolitan or rural coverage. Educational fm stations are in a separate category and may operate with power as low as 10 watts. Operating fm stations may apply for a "Subsidiary Communications Authorization" to furnish background music and other supplemental program service.

An applicant for a tv station must request a vhf (Very High Frequency) or a uhf (Ultra High Frequency) channel assigned to the community in which he proposes to operate, or a place within 15 miles of that community. Tv "translator" stations serve remote communities by picking up and rebroadcasting the programs of outside stations, with the latter's permission. They operate on vhf or the upper 14 uhf channels. Tv "boosters" fill in the shadow areas of mother uhf stations, whose channels they use.

Applying for a Construction Permit

Once a prospective licensee has decided upon the type of station he desires, and the place where it would be located, the

next step is to apply for a construction permit. This is done on FCC Form 301, "Application for Authority to Construct a New Broadcast Station or Make Changes in an Existing Broadcast Station," which covers am, fm or tv broadcast, except educational fm applicants who use Form 340, translators (Form 346) and uhf station boosters (Form 346). These forms require information about the citizenship, and character of the applicant, as well as his financial, technical, and other qualifications, plus details about the transmitting apparatus to be used, antenna and studio locations, and the service proposed. A specific channel or frequency must be requested. Triplicate copies are required, one of which must be executed under oath or affirmation. If, upon examination of an application, the Commission determines that there are no engineering or other conflicts, or valid protests, that the applicant is qualified, and that all other requirements are met, the application is granted without hearing and a construction permit is issued. All such grants are announced publicly. Petitions for reconsideration must show good cause why the objections could not have been raised prior to the grant.

Application Processing

Applications for new broadcast stations are twice reported by the Commission—when first tendered and, again, when accepted for filing. Such an application is not acted upon until at least 30 days after public notice is given of its acceptance. During that time parties in interest may file petitions to deny such applications.

Applications are, in general, processed in the order in which accepted. They are reviewed in their engineering, legal, and financial aspects by the Broadcast Bureau, which makes recommendations to the Commission.

If, upon examination of an application, the Commission determines that there are no engineering or other conflicts, that the applicant is qualified, and that all other requirements are met, the application is granted without hearing and a construction permit is issued. All such grants are announced publicly.

Hearings

Where it appears that an application violates the Commission's rules and regulations; that serious interference would be caused; there is protest of merit; or if other serious questions of a technical, legal, or financial character are involved, a hearing is usually required. The Commission must accord a hearing to competing applicants.

If unable to grant an application, the Commission is required to notify the applicant and other known parties in interest as to the reason. The applicant is usually given 30 days in which to reply. After that, if the Commission is still unable to make a grant, a hearing is ordered.

In designating an application for hearing, the Commission gives public notice of the issues for the information of the applicant and others concerned. Findings are made upon the basic qualifications (legal, financial, and technical) of the applicant in the hearing order. The hearing notice generally allows the applicant 60 days or more in which to prepare. Even after being designated for hearing, an applicant may find it possible to amend his application to resolve engineering or other problems. (Commission approval is required for all mergers or "pay-offs" involving competing applicants.)

Hearings are customarily conducted by an examiner. The hearing examiner has authority to administer oaths, examine witnesses and rule upon the admission of evidence. A prehearing conference is generally held to reach agreement on procedural matters.

Within 20 days after the close of a record by the hearing examiner, each party and the chief of the Broadcast Bureau of the Commission has the privilege of filing proposed findings of fact and conclusions to support their contentions. After review of the evidence and statements, the hearing examiner issues an initial decision.

If he wishes to contest the initial decision, the applicant or any other interested party has 30 days from the date on which the initial decision was announced to file exceptions. In all cases heard by an examiner, the Commission will hear oral argument on timely request of any party. After oral argument, the Commission may adopt, modify, or reverse the hearing examiner's initial decision. Within 30 days thereafter, any party involved may petition for rehearing.

If no exceptions are filed, and the Commission does not initiate a review of the hearing examiner's initial decision, the latter becomes effective 60 days after its issuance, unless otherwise ordered by the Commission. Court appeals can be taken within 60 days following announcement of the Commission decision.

Construction Permit

When an application is granted, a construction permit is issued. The permittee may then suggest call letters which, if available and conforming to the rules, are issued. A maximum of 60 days from date of the construction permit is provided in which construction shall begin, and a maximum of 6 months thereafter as the time for completion (or 8 months in all). Application to modify a broadcast construction authorization, or to make changes in an existing station, or to modify a license, is made on the same form (301) used in seeking initial construction authorization. If the permittee is unable to build his station within the time specified, he must apply for extension of time on Form 701 ("Application for Additional Time to Construct a Radio Station"), giving the reasons. Upon completion of construction the permittee conducts equipment (not program) tests.

License

The final step is to apply for the actual license on Form 302 ("Application for New Broadcast Station License"), or Form 341 (for non-commercial educational fm stations), Form 344 (for uhf station boosters), or Form 347 (for tv translators). Applicants must show compliance with all terms, conditions, and obligations set forth in the original application and the construction permit. Not until he applies for a license can the holder of a construction permit request authority to conduct program tests. The license application form provides a space for making program test request, or it can be made separately. A station license and program test authority are issued if no new cause or circumstance has come to the attention of the Commission that would make operation of the station contrary to public interest.

Renewal of License

Applicants for renewal of station licenses must show that they have operated according to the terms of their authorizations. Renewal applications are made on Form 303 ("Application for Renewal of Broadcast Station License"), except that noncommercial educational fm licensees use Form 342; uhf station boosters Form 345, and tv translators Form 348. Public notice of the filing of renewal application must be made by the licensee both over its station and in the local newspaper.

Sales and Transfers

If the holder of a construction permit or license desires to assign the same to someone else, he makes application on Form 314 ("Application for Consent to Assignment of Radio Broadcast Station Construction Permit or License"). Should the permittee or licensee wish to transfer corporate control, he applies on Form 315 ("Application for Consent to Transfer Control of Corporation Holding Radio Broadcast Station Construction Permit or License"). Public notice of the assignment or transfer application must be made by the licensee both over its station and in the local newspaper.

Form 316 ("Application for Assignment or Transfer—Short Form") may be used when the transfer or assignment involves no substantial change in interest.

Construction Changes

Applicants for authority to make construction changes in existing stations make application on the same form used in applying for a construction permit for the type of station involved.

CONCERNING FCC RULES AND REGULATIONS

"How to Apply for a Broadcast Station License" is a concise report prepared by the FCC Office of Reports & Information as a lay language guide. Serious applicants will also wish to study the FCC Rules & Regulations. Excerpts of the rules begin on page C-26.

(prices f.o.b. factory)

Used with commercial picture monitors in Master Monitor installations, this precision test instrument displays accurately and dependably both black-and-white and color television signals. It offers you the greatest value in a Waveform Monitor today—considering characteristics, compactness, operational convenience, and cost.

A specially-designed Tektronix 5-inch, rectangular CRT at 4 kilovolts accelerating potential enables this new Waveform Monitor to present bright video displays over the full 7-centimeter by 10-centimeter viewing area. In addition to conventional two LINE and two FIELD displays, this test instrument offers three calibrated time-base rates—at 0.125 H/CM, at 0.025 H/CM with 5X Magnifier, and at 0.005 H/CM with 25X Magnifier—which eliminate the need for time markers.

Other performance characteristics include: amplitude linearity within 1% over full 7 centimeters of vertical deflection . . . sensitivity from 0.25 volt minimum to 1.6 volts maximum for 140 IRE units . . . response flat to 5 megacycles $\pm 1\%$. . . internal voltage calibrator for 1.0 and 1.4-volt peak-to-peak video signals, with excellent long-term accuracy . . . backporch dc restoration, with no color-burst distortion.

. . . for a copy of the complete specifications—including actual-size pictures of this new Video-Waveform Monitor—please call your Tektronix Field Engineer.

Tektronix strives to provide the best possible oscilloscopes and associated instrumentation in the industry and to provide continuing assistance in maintaining this precision test equipment to its fullest capabilities.

Products (for radio & tv): Lighting controls and systems dimmers.

SOLITROL lighting systems... offer unprecedented control flexibility

Now, for the first time, you can buy your complete lighting control system from Ward Leonard—a name made famous through years of experience in the manufacture of dimming components.

SOLITROL lighting systems were research developed for extreme operating versatility... in scene presetting... cueing... fading, and individual

mastering. SOLITROL's functional, modular "packaging" lets you select the system complexity or simplicity you need—no more, no less.

There's a SOLITROL system, utilizing silicon controlled rectifier dimmers, for every application... from the largest theatre or civic center, to the smallest club, church or school.

Write for descriptive literature. Ward Leonard Electric Co., 17 South Street, Mount Vernon, New York. (In Canada, Ward Leonard of Canada, Ltd., Toronto.)

FOR EXTRA AUDIENCE AND ADVERTISER IMPACT

Telechrome Special Effects Center

THE ONLY SPECIAL EFFECTS GENERATOR WITH "JOY-STICK" POSITIONER AND BUILT-IN FADER

First, Telechrome provided broadcasters with a vastly improved special effects generator to provide a wider variety of dramatic wipes, inserts, keying, and other special effects. Now, Telechrome engineers makes available the exclusive "Joy-Stick" Positioner and a built-in fader control to give you a complete, integrated Special Effects Center with previously unobtainable versatility. You can now produce fades—many hundreds more special effects—more wipes, keying, inserts and other effects to any part of the TV screen for truly dramatic TV viewing—from one Special Effects Center. Now, right at your fingertips, you can have a new dimension in program creativity—and for a low cost that will surprise you. See for yourself how Telechrome's Special Effects Center provides profitable extras in advertiser and viewer impact. Contact your Telechrome representative for a free demonstration today.

PORTABLE OR RACK MOUNTED MODELS AVAILABLE.

MODEL 490WA1. (Top) Waveform generator. Generates keying signals for different wipes. MODEL 490SA1. (Center) Switching Amplifier. Combines two picture signals in accordance with applied keying waveform for inserts and fading. MODEL 490RA1. (Bottom) Remote Control Unit selects and controls desired effects. Designed for console or rack mounting. Easily modified for integration into existing facilities. Console Unit below: MODEL 490RA1. Remote Control Unit (at right hand); MODEL 491 Joy-Stick Positioner (directly above) positions inserts at any position on raster, adds motion to standard wipes, serves as electronic spotlight or pointer, etc.

Performance-proved Sylvania Gold Brand Tubes

"CUT MAINTENANCE TIME BY 75%"

DONALD B. PATTON, CHIEF ENGINEER, WKRG, MOBILE, ALA., SAYS...

"I bought a small supply of Sylvania Gold Brand Tubes and found them to be 100% interchangeable in pulse as well as video circuits. I was so impressed I bought an additional twenty... found them to be 100% interchangeable with each other.

"Sylvania Gold Brand Tubes in our sync generators have cut our required maintenance

time by 75%... no longer have to hunt for matched pairs. We are also using Sylvania Gold Brand Tubes in our camera circuits that are critical... almost impossible to detect any change in operation from the crucial first 100-hour period... reasons enough for me to specify Sylvania Gold Brand where reliability and quality are of prime importance."

Available from your Sylvania Industrial Tube Distributor!

At last! **HEAVY DUTY PROFESSIONAL QUALITY AUTOMATIC TAPE CONTROL EQUIPMENT THAT IS DESIGNED ESPECIALLY FOR RUGGED BROADCAST USE**

AND IS FULLY COMPATIBLE WITH ANY SIMILAR UNIT

This is the machine that is the culmination of years of experience by the pioneer manufacturer of tape cartridge devices, Moulic Specialties of Bloomington, Illinois. It was designed and tested with continuous operation in mind. The electronics are smoothed out to a point of virtual perfection (no more wow and flutter problems!). Maintenance is simplicity itself. Truly, here is the first professionally designed, heavy duty unit ever offered the industry. And, it's available on any one of three plans:

- outright purchase if you do not have automatic tape cartridge equipment now.
- trade-in your old equipment to modernize your facilities.
- add on to your present equipment to increase your capacity.

Also available — the MaCarTa professionally built Recording Amplifier.

TAPE CARTRIDGE PROBLEMS?

The MaCarTa Factory Rebuilding Program Will Solve Them!

Now, for the first time, you may send any Fidelipac or CATM cartridges that are non-usable for any reason to MaCarTa and receive in return factory rebuilt cartridges that work like new — and carry a new cartridge guarantee to back them up! The low rebuild price will delight you. That's all there is to it. Just send in malfunctioning cartridges and receive factory rebuilds in return at a substantial savings over new ones. Of course, new cartridges are available, too.

WRITE OR CALL FOR FULL INFORMATION, STARTLINGLY LOW TRADE - IN AND NEW EQUIPMENT PRICES FOR MaCarTa RECORDING/PLAYBACK UNITS AND CARTRIDGES.

Suppliers of Continuous Loop Tape Cartridges and Recording and Playback Equipment.

Rents (for tv): Lighting equipment, camera dollies, grip equipment.

New General Electric Monitors

HIGH RESOLUTION AND BRIGHTNESS — STABLE — LOW MAINTENANCE

▲ **Cabinet Monitors** available in 14, 17 and 21 inch screen sizes using the same chassis for each. Excellent low frequency response gives uniform picture backgrounds with no smear. There are no interactions between controls. Size, focus and linearity controls are operated individually and adjustment of one has no effect on the others.

High picture brightness is achieved without blooming. Picture tube voltage of 20 Kv combined with good regulation provides highest brightness while maintaining 800 line resolution. A polarized safety glass faceplate (optional) minimizes reflections in strongly lighted areas and improves picture contrast ratio.

▲ **Quick set up and servicing.** No major disassembly is required for any normal servicing. Each side panel on cabinet models is held with just two screws, exposing the chassis. As a result, you can adjust the set and look squarely at the tube at the same time. The picture tube is inserted or removed from the front. Four screws release the faceplate for cleaning.

◀ **Rack mounted models** are available in 14, 17 and 21 inch sizes. Image stability is excellent. Sharp focus with no focus drift is attained through the use of a low voltage electrostatic focus type picture tube. The wide band video amplifier (10 Mc \pm 1 db) produces sharp, clear pictures. Picture interference from ground currents is eliminated.

Differential gain of the video amplifier is less than 5 percent on a 50 percent white, 50 percent black picture. Geometric distortion is less than \pm 2 percent.

For complete data on these new monitors — and the full line of G-E transistorized audio equipment and other broadcasting and telecasting equipment — write to Section 48Y1, Technical Products Operation, General Electric Company, Lynchburg, Va.

FISHER

Network FM Tuner

FOR MONITOR AND RELAY APPLICATIONS

Model FMR-1

Designed Specially For FM Broadcast Station Use

The FISHER FMR-1 represents the most advanced state of the art in professional tuner design. For direct off-the-air relay service, it is more economical, more flexible and provides far better fidelity than even the best telephone lines. Ruggedly built, the FMR-1 has been designed for continuous operation under varying temperature and reception conditions—without loss of stability or service interruption. It is completely equipped for outstanding performance in Stereo Multiplex operation. **\$429.50**

TECHNICAL SPECIFICATIONS

■ 1.5 uv for 30 db quieting. ■ 6 I.F. stages. ■ 5 Limiters.
■ Equipped with tuneable and crystal front ends. Each has 4 tuned circuits. ■ 1.3 db capture ratio. ■ Drift (tuneable front end) 0.004% with AFC. ■ Plug-in crystal-controlled front-end for unattended operation.
■ Outputs for diversity operation. ■ VU meter with 9-position switch (-10 to +20 db, on both channels.) ■ Signal-strength tuning meter. ■ Standard 19" rack panel, 5¼" high x 13" deep.

So you want to grow bigger?

*No trick at all! Just grow taller
with a tower by Dresser-Ideco*

A taller tower by Dresser-Ideco can pay off for your station in these two ways. *Greater coverage* extends your market area . . . increased antenna height improves signal quality, and your clearer signal wins *greater audience loyalty*.

Dresser-Ideco is far and away the leader in tall towers. We've built more than half the 1000'-plus television towers in service today. That's in addition to hundreds of smaller towers for TV, radio, and microwave communication. You are assured of money-saving, time-saving attention to detail when you work with Dresser-Ideco. Write us, please . . . and ask for Tower Catalog T-57.

GROWTH OF RADIO, TV CONTINUES

- Criticism of early 1961 gives way to praise toward year end
- Number of stations, audiences hit new highs in both media
- Radio, television time sales set record of \$1,771 million

Both radio and television continued to make progress in 1961, going into the fall and winter season in the strongest position in history.

Audience for the broadcasting media continued to show gains in all time segments and in every part of the country, and total billings for the year promise to be the highest on record.

The year started well for broadcasting, but the "vast wasteland" speech made before the National Association of Broadcasters Convention by the new FCC chairman, Newton N. Minow, touched off a litany of criticism which was magnified and exploited by competitive media.

Today the pendulum has started once more to swing the other way. The sponsor, the advertising fraternity and the public itself have come to the defense of this, the most popular of all the information and entertainment media.

Speaking on television from the agency point of view, Paul C. Harper Jr., president of Needham, Louis and Brorby told the Advertising Club of Washington: "I believe that television programming reflects more than it affects public taste. I see little fundamental difference between the antics of Shakespeare's Falstaff of 300 years ago and the inspired clowning of Red Skelton today. People are still interested in what they always have been . . . laughter, an occasional tear, the thrill of the chase, and plenty of reassurance that other people have problems just like theirs."

Pointing out that his company has decided to "stick with public service broadcasting," Charles H. Percy, board chairman of Bell & Howell, producers of photographic equipment and sponsors of *Close-Up!* on ABC-TV, told the Sales Executives Club of New York that "the answer to the economic welfare of the company and the general welfare of the country are not at all irreconcilable."

In a sampling of 17,500 persons by Research Associates at the Minnesota State Fair the question "Is television a vast wasteland?" was answered negatively by 79% of those replying while only 14% voted that it was. To a second question, "Should the government decide what types of programs you see on television?" only 11% said yes, while 84% said no.

Radio too, has come in for its share of praise. Even Chairman Minow, author of the "vast wasteland" reference to television, has praise for it, telling a CBS Radio Affiliates' meeting in New York that "Radio is America's roommate because it's so downright companionable. It goes places, it does things. And above all, it always takes us along. . . . A recent radio study made use of the 'grim rumor of war' research question. As one might expect, seven out of ten people questioned said that they would turn on their radios to verify a report that war had broken out."

As to the width and breadth of radio and television, it continues to grow. In this, the 27th annual BROADCASTING YEARBOOK there are listed 466 commercial vhf stations and 82 commercial uhf's, a total of 548 commercial stations on the air. This is an increase of 15 over a year ago. Educational stations, too, have increased with 38 v's and 17 u's as compared with 35 and 12 a year ago.

Radio's increase has been just as steady. Today there are 3,624 am radio stations, 931 fm. Last year there were 3,506 and 753. Total of all types of stations both radio and television today is 5,158—passing the 5,000 mark for the first time in history. Last year the total was 4,839.

From an audience viewpoint the broadcasting media continue to attract greater numbers. Measured by number of homes, television today is found in 46,900,000, 90% of the nation's total.

Radio, of course, has an even higher mark with 97% penetration in American homes.

Some 45.1 million homes watch television in the average week while 39.5 million listen to radio. Total tv viewing per home, per day, is up to 6 hours and 4 minutes in the average television home. Radio listening in the home averages 1 hour and 43 minutes daily. This does not include the large amount of radio listening in automobiles or other places than in the home.

Judged by dollar standards both radio and television have prospered in the past year. Total television time sales in 1960, according to official FCC sources (BROADCASTING, Sept. 4, 1961), came to \$1,146 million, an increase of 6.5% over the \$1,077 million a year ago. Network billings were up 5.8% to \$471.6 million as compared with \$445.8 million. Spot television totals were \$459.2 million, up 8.3% over 1959's \$424.2 million. Each year the spot total comes nearer to the network volume. Local tv billings in 1960 reached \$215.8 million, up 7.6% over the \$200.6 million of last year.

In radio similar gains were reported. Total radio sales for 1960 were estimated by BROADCASTING at \$624.8 million, up 7.2% from the \$582.9 million last year. Spot totalled \$199.2 million, up 5.9% over the \$188.1 million of 1959. Local is estimated to have totalled \$389.1 million as compared with \$359.1 million a year ago. Only network was off; 3.2% from \$35.6 million in 1959 to \$34.5 million in 1960.

Total radio and television time sales in 1960 are estimated at \$1,771.1 million.

RADIO REPORT

The FCC radio financial report was not available at press time, but will be reported in detail in BROADCASTING Businessweekly upon release.

THE DIMENSIONS OF BROADCASTING

Key facts about radio and television

Broadcasting Stations on Air

466	commercial vhf tv stations
82	commercial uhf tv stations
548	total commercial tv stations
38	non-commercial, educational vhf stations
17	non-commercial, educational uhf stations
55	total non-commercial, educational stations
603	total television stations
3,264	total am radio stations
931	total fm radio stations
5,158	total broadcasting stations

Total Time Sales, 1960

\$1,146,272,000	for all tv stations and networks
\$624,830,000	for all radio stations and networks
\$1,771,102,000	total radio-tv time sales

(The television time sales are official tabulations by the FCC. Radio time sales are BROADCASTING estimates. The FCC's radio tabulations for 1960 were not completed when the YEARBOOK went to press.)

The Radio-Tv Audiences

46,900,000	U. S. tv homes (almost 90% of all homes)
49,500,000	U. S. radio homes (nearly 97% of all homes)
45,118,000	U. S. homes tune in television in average week
39,461,000	U. S. homes tune in radio in average week
6 hours, 4 minutes	total tv viewing per home per day
1 hour, 43 minutes	total radio listening per home per day (not counted: listening outside home)

Some Other Facts about Facilities

412	am stations owned by newspapers and/or magazines
147	fm stations owned by newspapers and/or magazines
161	tv stations owned by newspapers and/or magazines
81	regional radio networks
10	regional television networks

28	station brokers

Unless otherwise indicated, all figures are as of Sept. 1, 1961

What's first with Hoosiers *...is first with WFBM*

No fooling these mid-westerners when it comes to favorite major events . . . or their favorite stations to carry local radio and TV coverage.

No other Indiana station has manpower, mobility or equipment to match WFBM and its 20-man News-Information Center. Nor can any other equal the broadcasting experience of its active leadership.

WFBM stations pioneered both radio and television in Indiana . . . and continue to earn audience loyalty by their outstanding news and special events coverage. Isn't this the responsive climate you want for your commercials? We'll help you in every way we can . . . call your KATZ man.

TIME-LIFE STATIONS

Tv programming: live, film, video tape

HOW THE STATIONS AND NETWORKS BREAK DOWN THEIR SCHEDULES

Analyses of programming, based on questionnaire returns from U. S. television stations and networks, have been a continuing feature of BROADCASTING since 1953. The current year's statistics cover the week of June 4-10, 1961. The figures on video tape for the networks and stations have been introduced into the survey only for the latter years when video tape installations became of sufficient numbers to warrant consideration.

Prior to 1958, tv's growth fluctuated more and semi-annual

surveys were conducted to pinpoint the trends. However, since then the total number of stations and hours of programming have become more stabilized, hence the survey has been changed to a once-a-year basis.

In comparing returns of network affiliates against non-network stations, consideration should be made for the fact that approximately 96% of the questionnaire returns received this year were furnished by television stations affiliated with at least one of the major networks.

THIS GIANT JET FLEET...

SERVES MORE CITIES IN MORE COUNTRIES THAN ANY OTHER AIRLINE

53 pure jets! This is the giant Air France Jet fleet. 20 Boeing 707 Intercontinental Jets—more American-built Boeing 707 Jets, in fact, than any other European airline. And 33 medium-range Caravelle Jets. The Caravelle is the jet Air France pioneered so successfully.

Already well over one million people have flown Air France Jets. For Air France Jets fly around the world. Air France Boeing 707 Jets fly direct to Europe from New York, Los Angeles, Chicago, Montreal, Anchorage and Mexico City. Air France Boeing 707 Jets also pro-

vide swift giant steps from Europe to South America, Africa and the Far East. And the outstanding Air France Caravelle Jets serve 42 cities in Europe, North Africa and the Middle East.

The pilots who fly Boeing 707 Jets are as remarkable as the jets they fly—6,000,000-mile-experienced veterans. No other airline in the world has higher standards for flight personnel. Small wonder that Air France, with a 42-year record of flying experience and service, is the world's largest airline.

AIR FRANCE JET

PUBLIC-RELATIONS PERSONNEL READY TO SERVE YOU IN NEW YORK, CHICAGO, LOS ANGELES, MONTREAL AND MEXICO CITY

Television Tape

Boost SPOT income with RCA TV Tape— Get peak quality . . . production savings

Advertisers are prone to "buy on sight" and stay sold once they view the excellence of spots made on RCA equipment. Picture quality is virtually "built in." RCA's multiple monitoring checks assure the highest quality production. You can check through the entire system . . . and be confident you are getting the best results at all times. Moreover, you can obtain a perfectly aligned picture in seconds thanks to RCA electronic quadrature adjustment for both record and playback.

RCA's "convenience features" save time and money in production. A central control panel puts the entire operation at the user's fingertips. A continuously variable speed control enables you instantly to cue-up any spot on tape. Speed can be slowed until audio becomes intelligible for cueing. And precision headwheel inter-

changeability—for color, too—means you can playback any tape on any machine, regardless of where made.

Special RCA safeguards protect your production against loss. Simultaneous control track monitoring assures you of a control track as you record. (A tape without a control track is worthless.) And you get simultaneous audio playback as well. You save lost production time, re-dos, talent costs. Only RCA provides these multiple means of protection.

Advertisers will appreciate the difference an RCA TV Tape Recorder will make in your spot production. You'll find a satisfaction in operation without parallel. And service after the sale is the type that only RCA with its broad background in television can perform.

Find out how the RCA TV Tape Recorder can help you produce the most saleable commercials and programs. See your RCA representative. Or write to RCA, Dept. YB-22, Building 15-5, Camden, N.J.

DIRECTORY OF TELEVISION STATIONS IN THE U.S.

Note: Listed in this directory are all television stations authorized by the Federal Communications Commission as of Sept. 1, 1961. Where applicable, the following data is shown: call letters, date station began (or intends to begin) operation, channel number, transmission facilities, address, telephone, teletype number, name of licensee, composition

of ownership, network affiliation, sales representative, executives and Washington attorney. Color facilities of stations having them are also shown. Special note is also made of those stations now having video tape recorders in operation. Noncommercial educational stations are shown with asterisks (*). Translators listing by states starts on page A-96.

BIG

SPENDER!

OVER \$86 MILLION OF THE BILLION-AND-A-HALF-PLUS that the WSFA-TV market spends—and spends big—every year comes from the military—Ft. Rucker in Ozark; Craig AFB in Selma; Maxwell AFB Air University and Gunter AFB Sage Installations, all in Montgomery. THE \$1,669,103,000.00 EBI* IN THIS MARKET of more than a million people comes from many other *diversified* sources—such as agriculture, industry and state government.

ALL OF THESE 247,500 TV HOUSEHOLDS OF BIG SPENDERS can be reached as a complete package *only* through WSFA-TV, Montgomery.

*This figure and those following are based on SM, "Survey of Buying Power," May 10, 1961—38 ARB Counties March, 1961, ARB.

REACH FOR THE BIG SPENDER THROUGH . . .

FRESNO

CALIFORNIA

McCLATCHY BROADCASTING COMPANY
SACRAMENTO, CALIFORNIA
NATIONAL REPRESENTATIVE
THE KATZ AGENCY

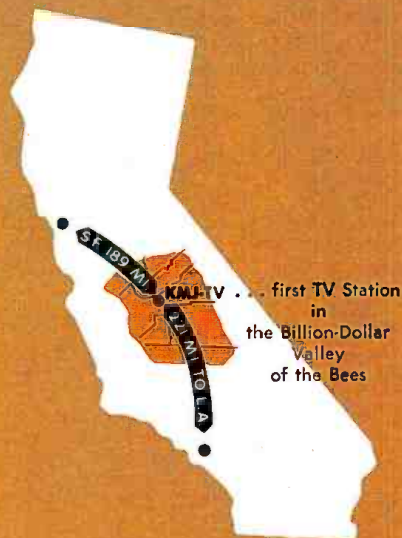

The March, 1961, Fresno ARB survey again proves that KMJ-TV is Fresno's favorite TV station.

KMJ-TV has more quarter hour wins Monday through Friday . . . from sign-on to sign-off . . . than the other two Fresno stations combined. This is true both for the Metro Area and for total homes.

And KMJ-TV's movies have unusual audience appeal. The afternoon movies Monday through Friday were tops in every quarter hour rating from 3:00 to 5:00 p.m. The Sunday Cinema Special from 4:00 to 7:00 p.m. had a 21.5 rating compared with ratings of 10.4 and 9.7 by the other two local stations.

**March 1961 ARB, Fresno*

There's business out there.

You're looking at more than a horizon. It's a future, yours and America's. Out there is Europe and Latin America and Asia and Africa. But in 1960, of all U. S. manufacturers, less than 5% saw these foreign shores for what they are worth: a 19-billion-dollar export market, a vast source of foreign trade.

Move in for your share. Build your business and help keep America growing. Extra production creates more jobs, helps balance the outflow of gold, and wins new friends abroad with U. S.-made products.

Even if you've never sold overseas, you have a rare op-

portunity to start—now. Your U. S. Department of Commerce will help with counsel by experts on what, where and how to sell—with data on credits, payments and financing. A package of invaluable know-how is yours for the asking.

Now's the time to discover the many ways in which your business can grow. In the lucrative export markets. In new U. S. markets. In developing new products. In attracting new industry to your community. Just write or phone the U. S. Department of Commerce Office of Field Services in your city, or Washington 25, D. C. They are ready to help you grow with America!

NOW'S THE TIME TO GET GROWING IN A GROWING AMERICA!

WITH HONORS

Awards are something of custom at WRC-TV. And whatever form they take—citations, commendations, medals, plaques—we take pride in accepting them in behalf of the people and programs that make WRC-TV truly the leadership station in the nation's capital.

The latest is the School Bell award presented to WRC-TV's "Teen Talk" program for "distinguished service in the interpretation of education."

This, and all the other honors, reflect WRC-TV's philosophy of providing a balanced, diversified schedule with programs of interest for all segments of the television audience.

TV HOMES UP
53,000
IN ONE YEAR

... in the land of Profitunity!

NATIONAL REPRESENTATIVES, **BLAIR-TV**

TV homes in the WFLA-TV 28-county sales area jumped an amazing 53,000* in one year (June 1960-June 1961). This increase represents 39.3% of the total increase in the entire state of Florida.

Cash in on this growing market. Spot your product or service on WFLA-TV—the station that best serves West Coast and Central Florida, including Florida's largest city—Tampa!

* ARB estimates June 1961 compared with June 1960.

The quality of leadership!

The leaders of hundreds of America's major industries have, for twenty years, matched beliefs with action by supporting the Payroll Savings Plan for U.S. Savings Bonds. On this, the 20th Anniversary of this great idea, we salute the quality of leadership which continues to use this plan to create reserve public buying power, improve employee morale and strengthen the economy of our country. To learn how your company can benefit from the Payroll Savings Plan, write: **U.S. SAVINGS BONDS DIVISION, TREASURY DEPARTMENT, Washington 25, D.C.**

BROADCASTING
THE BUSINESSWEEKLY OF TELEVISION AND RADIO

The U.S. Government does not pay for this advertisement. The Treasury Department thanks, for their patriotism, The Advertising Council and the donor above.

NEW AND TALLER TOWER FOR

WOC-TV

WOC-TV AVANT-GARDE OR TRADITIONALIST?

A lot of both, actually!

There is need to pioneer and improvise — as WOC did in 1922 in the unexplored frontier of radio communications. There is need to adapt and refine and to improve as WOC-TV has done since 1949 with the advent of television. The new tall tower and new transmitter are further steps along the way.

The thread that holds the old and the new together is **SERVICE**. **SERVICE** to the community in return for loyalty and attention; **SERVICE** to the advertiser by providing the audience.

In its thirteenth year in television, WOC-TV provides these services through constant attention to programming and by providing the advertiser with a responsive audience and effective merchandising.

For all the details, see your PGW Colonel today!

They ALL Talk . . .

about the things that make a television station outstanding. But KTVH does more than just talk. In the past twelve months KTVH has worked with and for the people of Central Kansas in many different ways. At the annual State Fair, the KTVH Information Center is a beehive of activity. More than 100,000 people stopped by during last year's fair to visit KTVH personalities. Other activities that have made KTVH the outstanding television station in Central Kansas include its series of public interest, TWELVE REPORTS, designed to tell Kansans more about their state; sponsorship of an annual water show; continuing on-air editorials; origination of thousands of letters from Santa at Christmas; live telecasting from churches in both Wichita and Hutchinson; advisory service to and sponsorship of a Junior Achievement Company; annual staging of the largest Open Golf Tournament in Kansas; not to mention the hundreds of individual participations in civic and charity ventures of all kinds. These are the things KTVH does (in addition to televising top-quality news and entertainment programming) that make Central Kansans talk . . .

About "Television 12" . . . KTVH

CBS Television for Central Kansas

ON GOVERNMENT UNDER LAW

"Honest men may hold different opinions on the merits of desegregating our public schools . . . The issue is not segregation; it is whether we should continue to have government under law."

From a broadcast editorial by Douglas Manship, President & General Manager (complete text available on request)

BOLD VIEWPOINTS BRING VIEWERS

THE MARKET HAS MONEY

4th Largest in the Gulf South
Richest in Louisiana

Count the big ones in Gulf South states of Louisiana, Mississippi, and Texas, and you'll count Dallas-Fort Worth, Houston, New Orleans, then the big, big market served by WBRZ. Baton Rouge's industrial worker is among the highest paid in the nation. And throughout "WBRZ territory" industry and good jobs prevail. Retail sales in the coverage area, over a billion and a quarter.

Straddling a fence may not win enemies . . . but it does not win friends. WBRZ realizes its role as a public service medium . . . and fulfills that role by presenting bold, sometimes blistering, editorials when issues wax hot. It just as boldly makes equal free time available to the "other side" for rebuttal. Such practices build respect—and audience.

Good News about Detroit ... and

More people live in the three-county metropolitan area than live in 34 of the 50 states.

Cash registers ring up nearly \$5,000,000,000 in retail sales every year.

85 per cent of the labor force works in widely-diversified fields; 15 per cent in making motor vehicles and equipment.

Bank deposits add up to more than \$4,000,000,000.

Good News about the WWJ Stations

Over 7,000,000 people residing in metropolitan Detroit, southeastern Michigan, northwestern Ohio, and western Ontario are within sight and sound.

"In the People's Interest" continues to be the cornerstone of WWJ radio and television programming every day of the year.

The stature of the WWJ Stations is unsurpassed in their coverage areas. Pre-eminent in radio for 41 years, in television for 14, Detroit's basic stations enjoy the highest degree of public confidence and esteem—a priceless advantage for every advertiser.

WLBT's vast "Tall Tower" coverage keeps Southern folks informed . . .

From high atop its 1579-foot effective height Tall Tower, WLBT beams quality programming to one of America's most rapidly expanding markets.

With a coverage area doubling that of Station 'B', WLBT serves the entertainment and information needs of more than a quarter-million Southern homes.

WLBT recognizes that in today's world where so much is happening, in so many places and affecting so many people, news is of vital importance to every person. And when the events that shape the news strike nearby, Mississippi's largest full-time television News Department stands ready to inform the public, both local and national, with speed, accuracy and thoroughness.

Folks in Mississippi, Louisiana and Arkansas know WLBT. As evidence, your attention is invited to any Nielsen or ARB area-wide survey. WLBT boasts unquestioned dominance in the top twenty shows . . . and, incidentally, is the lowest cost-per-thousand TV buy in the United States.

**Public
Service for
millions ...**

A lot goes on in Western New York that's not seen by the nation's eyes — but the millions in the WBEN-TV area (more than 2,800,000 in the U.S. alone) get a graphic glimpse of it all. WBEN-TV public-service programming sees to this — through seasoned crews, up-to-the-minute mobile equipment and a guiding station policy that regards public service programming as a public trust.

Niagara power, international regattas, Seaway progress, urban renewal, regular church telecasts — all come into the field of WBEN-TV cameras. These telecasts and award-winning features contribute to the public service image that WBEN-TV has created among millions of viewers.

This image builds loyal viewers who watch more often and with confidence. *That is why your TV dollars count for more — on Channel 4.*

*Get the facts from Harrington, Righter & Parsons,
National Representatives*

WSOC-TV and Charlotte . . . station and city on the grow, grow, grow!

*Charlotte's industrial
and business development
first 6 months* 1961:*

33 new firms

Plant investments
by new firms—up 205%

New jobs created
—up 12%

Amount building space
used—up 31%

**Compared with same period '60*

Charlotte is one of your finest areas for sales growth. Business expansion far outstrips U. S. average . . . and Charlotte leads in healthy N. C. by a healthy margin. Nation's 29th in wholesale distribution; tops giants like Louisville, Richmond, Miami. Get more sales, more advertising exposure for your money. Get on Charlotte's WSOC-TV, a great area station of the nation.

WSOC-TV

CHARLOTTE 9—NBC and ABC. Represented by H-R

WSOC and WSOC-TV are associated with WSB and WSB-TV, Atlanta, WHIO and WHIO-TV, Dayton

WHERE

the

B I G

decisions

ARE

made . . .

BROADCASTING is. And, the big decision-makers are the executives at the top 50 ad agencies responsible for \$1,000,000 yearly in broadcast advertising. We call this exclusive, influential group "The Million Dollar Club."

A "well-bred" **SUCCESS** story for **WDAY-TV, Fargo!**

Every afternoon from 4:00 to 5:00, the old Hayseed puts on a local live talent show called "Party Line"—breezy informal chatter that really wows the wimmin.

During *one* minute of *one* day, earlier this year, the chat was about the next day's opening of a new Cox's Bakery store—their eighth. Results? To quote Dale Cox himself, "We sold

500 loaves of bread before we got the door open for business; 7,300 loaves on opening day; 9,400 loaves the second day. This is a *first* and the people are still coming in."

"Party Line" is doing a *spectacular* job for a number of big-time food and household products. Ask PGW for all the facts!

I'LL SAY THIS...

"WLW Television Stations have gone all out to sell RCA Victor Color TV sets in the grand tradition of the Crosley Broadcasting group... covering store fronts and home fronts to really mean business for RCA Victor. Advertisers have a pot of gold waiting for them at the end of the WLW Television Color rainbow!"

Raymond W. Saxon, Vice Pres.
Marketing
RCA Sales Corporation

YOU CAN QUOTE ME...

"RCA Victor distributors tell me they select the WLW Television Stations to advertise RCA Victor Color sets because they're among the Colorcasting leaders in the nation... with their Color TV engineering skills, wonderful Color programming, and Color selling power."

Jack M. Williams, Vice Pres.
Advertising and
Sales Promotion
RCA Sales Corporation

OURS: We don't exactly *own* South Carolina, but we claim it as our beat. Our oyster, in a real sense. It opens up for us because we know its business, government, culture, people. People best of all: their likes, dislikes, habits, greatnesses, and strengths. A knowledge growing out of nearly 30 years of operating broadcasting facilities in the capital city. □ This is why we're credited with a 78.7% share of viewing (by Nielsen) in the Columbia Metropolitan Area. Over a quarter million people in the 1960 Census, largest in the state and second only to Charlotte in *both* Carolinas. And our 1526-foot tower makes more of *all* South Carolina ours than any other station can claim. □ This is another good reason why South Carolina's major selling force is

WMCT

... HIGHLIGHTS AMERICA'S 33rd TELEVISION MARKET*

... more local programming
than all other Memphis
TV stations combined ...

including these available daily programs:

Mid-South Today

... Reports on farm and market news. Acts as a "clearing house" for new ideas and improvements in every phase of agriculture.

DEREK ROOKE

Looney Zoo

... Trent Wood hosts an hour of live fun with puppets, cartoons, and 40 studio guests.

TRENT WOOD

Midday News

... Comprehensive local and regional news compiled by the Mid-South's largest, most experienced TV news department.

NORM BREWER

Romper Room

... TV kindergarten for pre-school children and their mothers on a local level with national recognition.

LINDA BOYCE

Weather With Hawley

... Weather becomes interesting and authoritative with one of Memphis' most popular personalities.

DICK HAWLEY

Today in Sports

... Only daily sports program on Memphis TV. Includes personality interviews and late evening sports results.

JACK EATON

DELIVERING THE

QUALITY BUY
IN THE
QUALITY MARKET

WFAA-TV

channel 8 

A single buy delivers all this in two adjacent metro areas

(DALLAS & FORT WORTH)

POPULATION	1,685,700
HOUSEHOLDS	520,400
METRO TV SET	471,500
EFFECTIVE BUYING INCOME	\$3,446,175,000
RETAIL SALES	\$2,183,841,000

Those figures do not represent WFAA-TV's full Nielsen assigned coverage — just the two adjacent metro areas. And keep in mind that Dallas is the true hub, with a better than 2-to-1 majority in every category! With maximum signal from atop Texas' tallest tower (located equidistant between the two major cities), it is natural to turn to WFAA-TV for maximum impact! You only need a single buy to reach this quality market. Let your Petryman show you why!

**NO ONE ELSE
CAN MAKE THAT
STATEMENT!**

... JUST US!

**of all the
TV stations
in the Pacific
Northwest
only KTNT-TV
includes all
5 cities* in its
"A" contour**

*SEATTLE TACOMA EVERETT
BREMERTON OLYMPIA

KTNT-TV
CHANNEL 11

**CBS for Seattle, Tacoma
and Puget Sound area**
Studios in Seattle and Tacoma

Before you buy television in the Pacific Northwest,

consider this one basic fact. Only KTNT-TV in this area includes five major cities of Western Washington within its "A" contour, and KTNT-TV's tower is ideally located to beam a clear signal to all of this major market.

Ask your WEED TELEVISION man about dozens of other reasons you should include KTNT-TV in your advertising plans.

Transfers of Tv Station Ownership

A Record of All Television Station Sales

ALABAMA

WABT Birmingham—Licensed to Television Corp. of Alabama (Birmingham News Co.). Original owners: The Television Co. (Ed Norton 75%; Thad Holt, 25%). Original call letters: WAFM-TV. Sales price: \$2.4 million (with WAPI and WAFM(FM)). FCC approved: June 10, 1953, on condition Birmingham News Co. relinquish WSGN-AM-FM-TV Birmingham. [For the Record, June 22, 1953]. Note: On Jan. 25, 1956, FCC approved \$18.7 million purchase of Birmingham News Co. by S. I. Newhouse [For the Record, Jan. 30, 1956].

WBBC-TV Birmingham—Licensed to WBRC Inc. (see Taft stations in "Group Ownership"). Former owner: Storer Bcstg. Co. Sales price: \$6,350,000 (with WBRC-AM). FCC approved: May 8, 1957 [For the Record, May 13, 1957]. Note: Storer purchased WBRC-AM-TV for \$2.4 million from Eloise S. Hanna in May 1953 [For the Record, June 1, 1953] and was required to sell stations with FCC approval of purchase of WPFH (TV) Wilmington-WIBG-AM-FM Philadelphia.

WSGN-TV Birmingham (now deleted)—Licensed to Jemison Broadcasting Co. Original owners: Birmingham News Co. Sales price: \$300,000 (with WSGN-AM-FM). FCC approved: June 26, 1953 [For the Record, July 6, 1953]. Note: This was part of condition imposed by FCC in granting Birmingham News Co. purchase of WAPI, WAFM (FM) and WAFM-TV (now WABT).

WKRG-TV Mobile—Licensed to WKRG-TV Inc. (Kenneth R. Giddens and Mobile Press Register). Former owners: Shirley Rester Conrad and others. Sales price: \$1,179,915 (with WKRG-AM-FM). FCC approved Feb. 20, 1958 [For the Record, March 3, 1958]. Note: Mr. Giddens was a 20% stockholder before the transaction.

WSFA-TV Montgomery—Licensed to Broadcasting Co. of the South (See listing in "Group Ownership"). Former owner: WKY Television System Inc. Sales price: \$2,225,000. FCC approved: Sept. 2, 1959 [For the Record, Sept. 14, 1959]. Note: Founded by David E. Dunn and associates and sold to WKY Television System Inc. in 1955 for \$568,589 (with WSFA) [For the Record, Feb. 28, 1955].

ALASKA

KENI-TV Anchorage—Licensed to All-Alaska Broadcasters Inc. (Alvin O. Bramstedt and wife, 20%; Ketchikan Alaska TV Inc., 13.33%; and others). Former owner: Lathrop Co. and others. Sales price: \$1.2 million (with KENI and KFAR-AM-TV Fairbanks and KTKN Ketchikan, all Alaska). FCC approved: March 17, 1960 [For the Record, March 28, 1960]. Note: Station founded by Richard R. Rollins and Keith Kiggins as KFIA (TV). Sold to Midnight Sun Broadcasting Co. (Lathrop Co. and others) for \$100,000 interest in Midnight Sun. FCC approved: Dec. 29, 1954 [For the Record, Jan. 10, 1955].

KFAB-TV Fairbanks—See KENI Anchorage, above.

KINY-TV Juneau—Licensed to Juneau Broadcasters Inc. (Jerry W. McKinley, 35.4%; Elton E. Engstrom, 13.4% and others). Original owner: Alaska Broadcasting System Inc. Sales price: \$52,250. FCC approved: March 27, 1959. [For the Record, April 6, 1959].

ARIZONA

KVAB (TV) Mesa—Licensed to KTAR Broadcasting Co. Original owners: Harkins Broadcasting Co. Original call letters: KTYL-TV. Sales price: Assumed obligations totaling \$251,000 and leased land and buildings for five years at \$630 a month. FCC approved: June 17, 1954 [For the Record, June 28, 1954].

KOY-TV Phoenix (now deleted)—Licensed to Maricopa Broadcasters (KOOL-AM-TV) with which it shared time on ch. 10. Original owners: KOY Broadcasting Co. Sales price: \$200,000. FCC approved: May 5, 1954 [For the Record, May 10, 1954].

KPHO-TV Phoenix—Licensed to Meredith Engineering Co. Original owners: Phoenix Television Inc. Sales price: \$1.5 million (with KPHO). FCC approved: June 25, 1952 [For the Record, June 30, 1952].

Note: Station, originally KTLX, first owned by W. L. Pickens, R. L. Wheelock and H. H. Coffield, then ownership broadened to include some KPHO stockholders, finally (in 1949) taken over by John C. Mullins and associates.

KVOA-TV Tucson—Licensed to Arizona Broadcasting Co. (Clinton D. McKinnon and associates). Original owner: John J. Louis and family. Sales price: \$288,904 plus assumption of \$225,000 in obligations (with KVOA). FCC approved: June 29, 1955 [For the Record, July 4, 1955].

KGUN-TV Tucson—Licensed to KGUN-TV Inc. (See Hilberg-Buse-Richter stations in Group Ownership). Previous owner: H. U. Garrett and associates. Sales price: \$1.44 million. FCC approved: Dec. 14, 1960 [For the Record, Dec. 26, 1960]. Note: Mr. Garrett and his group bought KGUN-TV (then KDWI-TV) for \$533,000 in 1956 from D. W. and Kathleen Ingram.

KIVA (TV) Yuma—Licensed to Valley Telecasting Co. (Bruce Merrill). Previous owners: Floyd B. Odum and Harry Butcher. Sales price: \$550,000. FCC approved: Feb. 1, 1961 [For the Record, Feb. 13, 1961]. Note: Odum group took over control in 1959 by assuming indebtedness of \$241,000; Mr. Butcher bought 25% interest for \$150,000. Mr. Butcher originally bought the station from Donald Ellsworth and associates in 1957 for \$241,000.

KYAT Yuma (now deleted)—Licensed to Marietta Investment Corp. (See KFMB-TV San Diego, Calif.).

ARKANSAS

KTVE (TV) El Dorado—Licensed to KTVE Inc. (Veterans Broadcasting Co., 80.5%; William H. Simon, 19.5%). Previous owner: Dr. Joe F. Rushton and associates. Sales price: \$1.1 million. FCC approved: Sept. 8, 1960 [For the Record, Sept. 19, 1960]. Note: Mr. Simon sold 48% to Veterans in July and another 32.5% in September, for a total consideration of \$282,000. KTVE was originally licensed to South Arkansas Tv Co. under call letters KRBB (TV). Rep. Oren Harris (D-Ark.) bought 25% interest in 1957 for \$5,000, but sold back his interest in 1958 for the return of his \$5,000 note.

KNAC-TV Fort Smith—Licensed to American Television. Donald W. Reynolds (49%) purchased remaining 51% from Harry Pollock. Sales price: \$565,000. FCC approved: Jan. 8, 1959. [For the Record, Jan. 19, 1959]. Note: Mr. Pollock (16.8% owner) purchased 50% of American Television from George T. Henrich and Harry Newton Co. for \$175,000. FCC approved: March 5, 1958 [For the Record, March 10, 1958]. Mr. Henrich bought 50% from estate of Hiram S. Naxdmin in 1957 for obligations in excess of \$150,000.

KBTM-TV Jonesboro—Licensed to Regional Bcstg. Co. (John T. Griffin-James C. Leake). Original owner: Harold E. King and wife. Sales price: \$6,500. FCC approved: July 19, 1956 [For the Record, July 30, 1956].

KRTV (TV) Little Rock (now deleted)—Licensed to Little Rock Telecasters Inc. (Rowley-Brown Broadcasting Co.). Original owners: Rowley-Brown Broadcasting Co. and Donald W. Reynolds. Sales price: \$52,500 and assumption of \$300,000 in liabilities. FCC approved: Aug. 26, 1953 [For the Record, Aug. 31, 1953]. Note: Station facilities sold to Central South Sales Co., owners of KATV (TV) Pine Bluff, Ark., for \$400,000 in March 1954 [For the Record, March 8, 1954].

CALIFORNIA

KBAK-TV Bakersfield—Licensed to Bakersfield Broadcasting Co. (Reeves Broadcasting & Development Corp.). Previous owner: San Francisco Chronicle-KRON-TV. Sales price: \$1.25 million. FCC approved: Oct. 12, 1960 [For the Record, Oct. 17, 1960]. Note: Founded by Sheldon Anderson as KAFY-TV in 1953. 51% sold to San Francisco Chronicle in 1953 for \$85,000 (with KAFY), with remainder of stock purchased in 1954.

KERO-TV Bakersfield—Licensed to Transcontinent Television Corp. (See KFMB-TV San Diego, Calif.).

KVIQ-TV Eureka—Licensed to California Northwest Broadcasting Corp. (Carl R. and Leah McConnell). Former owners: Carroll R. Hauser, 50%; Shasta Telecasting Corp. (KVIP-AM-TV Redding, Calif.), 50%. Sales price: \$83,472. FCC approved: May 18, 1960 [For the Record, May 23, 1960]. Note: Founded by Carroll R. Hauser as KHUM-TV. Sold 50% to Shasta Telecasting Corp. for out-of-pocket expenses.

FCC approved August 2, 1957 [For the Record, August 5, 1957].

KFRE-TV Fresno—Licensed to Triangle Publications Inc. Original owner: California Inland Broadcasting Co. (Paul R. Bartlett, et al). Sales price: \$3 million (with KFRE-AM-FM). FCC approved: Dec. 30, 1959 [For the Record, Jan. 5, 1959].

KJEO (TV) Fresno—Licensed to Shasta Telecasting Corp. (see Group Ownership). Original owner: J. E. O'Neill and associates. Sales price: \$3 million. FCC approved: May 17, 1961 [For the Record, May 22, 1961].

KABC-TV Los Angeles—Licensed to American Broadcasting-Paramount Theatres Inc. Original owner: American Broadcasting Co. Inc. Original call letters: KECA-TV. Note: This was change of ownership when ABC merged with United Paramount Theatres Inc. FCC approved: Feb. 9, 1953 [For the Record, Feb. 16, 1953].

KCOP (TV) Los Angeles—Licensed to KCOP Television Inc. (Naf Corp.). Former owners: Kenyon Brown, Harry L. (Bing) Crosby, George L. Coleman, Joseph A. Thomas and Alvin G. Flanagan. Sales price: \$1.5 million in the aggregate. FCC approved: Jan. 28, 1960 [For the Record, Feb. 8, 1960]. Note: Founded by Mrs. Dorothy Schiff Sonneborn as KLCAC-TV. Sold to Copley Press for \$1,375,000 in December 1953 [For the Record, Jan. 4, 1954]. Messrs. Brown, Crosby, Coleman, Thomas and Flanagan bought station from Copley Press Inc. for \$4 million. FCC approved: Dec. 11, 1957 [For the Record, Dec. 16, 1957].

KKJ-TV Los Angeles—Licensed to RKO Teleradio Inc. (General Tire & Rubber Co.). Original owner: Earle C. Anthony Inc. Original call letters: KFJ-TV. Sales price: \$2.5 million. FCC approved: Aug. 8, 1951 [For the Record, Aug. 13, 1951].

KNKT (TV) Los Angeles—Licensed to Columbia Broadcasting System Inc. Original owner: Thomas S. Lee Enterprises Inc. (General Tire & Rubber Co.). Original call letters: KTSL. Sales price: \$3.6 million. FCC approved: Dec. 27, 1950 [For the Record, Jan. 1, 1951]. Note: Licensee sold to General Tire & Rubber Co. from estate of Thomas S. Lee in 1950, with other Don Lee properties, for \$12,320,000 [For the Record, Jan. 1, 1951].

KTRB-TV Modesto—Licensed to O'Neill Broadcasting Co. (J. E. O'Neill). Former owners: William H. Bates Jr. and Margie W. Cleary. Sales price: \$5,000 (assignment of CP). FCC approved: Sept. 5, 1957 [For the Record, Sept. 16, 1957].

KBET-TV Sacramento—Licensed to Great Western Broadcasting Corp. (J. H. Whitney & Co.). Original owner: Sacramento Telecasters Inc. (William Wright and sons, 20.56%; John H. Schachte, 15.48% and others). Sales price: \$4.5 million. FCC approved: Dec. 23, 1958 [For the Record, Dec. 29, 1958].

KCCC-TV Sacramento—Licensed to Capital Television Co. (Melvin Lord, 16.8%; Melvin Lucas, Clarence A. Hallen, Henry P. Deane, 11.1%, and others. Original owners: Melvin Lucas and group. Sales price: \$70,548. FCC approved: Oct. 7, 1959 [For the Record, Oct. 19, 1959].

KCCC-TV Sacramento (now deleted)—Licensed to Capital City TV Corp. (Lincoln Dellar). Original owners: Harry W. McCarty and Ashley L. Robison. Sales price: \$400,000. FCC approved: Oct. 4, 1956 [For the Record, Oct. 8, 1956].

KFMB-TV San Diego (also see KYAT [TV] Yuma, Ariz. and KERO-TV Bakersfield, Calif.)—Licensed to Transcontinent Television Corp. Former owner: Marietta Broadcasting Inc. Sales price: stock merger between Marietta (Jack D. Wrather Jr., Edward Petry Inc.) and Transcontinent (J. Fred Schoellkopf IV, Seymour H. Knox III, David Forman, George F. Goodyear, Paul A. Schoellkopf Jr.). FCC approved: May 13, 1959 [For the Record, May 18, 1959]. Former owner: Wrather-Alvarez Broadcasting Inc. (Jack D. Wrather Jr., 38.9%; Maria Helen Alvarez, 38.9%; Edward Petry & Co., 22.2%). Sales price: \$2.9 million for Mrs. Alvarez' 38.9%. FCC approved: July 10, 1958 [For the Record, July 14, 1958]. Note: Petry company bought 22.2% of then Wrather-Alvarez Broadcasting Inc. for \$633,333 in July 1953 [For the Record, July 27, 1953]. Wrather-Alvarez Broadcasting Inc. bought KFMB-AM-TV from John A. Kennedy for \$3 million in March 1953 [For the Record, March 30, 1953]. Mr. Kennedy bought stations from Jack Gross for \$925,000 in April 1951 [For the Record, April 25, 1951]. Wrather-Alvarez bought KERO-TV Bakersfield, Calif., from Kern County Broadcasters Inc. (Albert E. DeYoung and associates) for

\$2.15 million in July 1957 [For the Record, July 22, 1957].

MESA

MICROWAVE INC.

COMMON CARRIER SERVICES FOR

- COMMERCIAL BROADCAST STATIONS
- EDUCATIONAL BROADCAST STATIONS
- COMMUNITY ANTENNA SYSTEMS
- EDUCATIONAL CLOSED CIRCUIT SYSTEMS
- INDUSTRIAL COMMUNICATIONS

Offering facilities in all phases of communications as well as transportation of television signals.

A NEW CONCEPT IN RATES

It is now possible for many businesses to utilize a common carrier service which has heretofore been uneconomical due to existing rates charged by others.

U.S. tv balance sheet 1960

How U. S. tv networks, stations fared 1958-60

TABLE 1
BROADCAST REVENUES, EXPENSES AND INCOME OF 3 TV NETWORKS AND 530 TV STATIONS 1960-1959-1958 (\$ Millions)

	1960	1959 ²	1958 ¹
Broadcast Revenues			
3 Networks (including 15 owned and operated stations*)	\$ 640.7	\$ 576.1	\$ 516.7
93 Pre-Freeze television stations	303.2	291.2	263.6
Subtotal	943.9	867.3	780.3
Post-Freeze television stations:			
346 vhf stations	293.9	268.6	223.6
76 uhf stations	30.8	28.0	26.1
Industry total	\$1,268.6	\$1,163.9	\$1,030.0

	Broadcast Expenses		
3 Networks (including 15 owned and operated stations*)	\$ 545.5	\$ 488.2	\$ 439.7
93 Pre-Freeze television stations	204.6	196.1	187.8
Subtotal	750.1	684.3	627.5
Post-Freeze television stations:			
346 vhf stations	243.9	228.8	202.3
76 uhf stations	30.5	28.5	28.3
Industry total	\$1,024.5	\$ 941.6	\$ 858.1

	Broadcast Income (Before Federal Income Tax)		
3 Networks (including 15 owned and operated stations*)	\$ 95.2	\$ 87.9	\$ 77.0
93 Pre-Freeze television stations	98.5	95.1	75.8
Subtotal	193.7	183.0	152.8
Post-Freeze television stations:			
346 vhf stations	50.1	39.8	21.3
76 uhf stations	.3	† .5	† 2.2
Industry total	\$ 244.1	\$ 222.3	\$ 171.9

† Denotes loss.

¹ 1958 data cover 3 networks and 19 owned and operated stations; 94 pre-freeze and 401 post-freeze stations (322 vhf and 79 uhf).

² 1959 data cover 3 networks and 17 owned and operated stations; 93 pre-freeze and 411 post-freeze stations (334 vhf and 77 uhf). Two network owned uhf stations were sold prior to December 31, 1959.

* Includes one post-freeze vhf station.

How U. S. networks, stations apportioned operating costs:

TABLE 2: BROADCAST EXPENSES OF 3 TV NETWORKS AND 530 TV STATIONS 1960

Type of Expenses	3 Networks	15 Network Owned and Operated TV Stations	515 Other TV Stations	Total 3 Networks and 530 TV Stations
				(\$ Thousands)
Technical	\$ 27,783	\$14,812	\$ 78,039	\$ 120,634
Program	376,948	42,173	196,944	616,065
Selling	23,207	8,895	58,238	90,340
General and Administrative	33,232	18,436	145,767	197,435
Total Broadcast Expenses	\$461,170	\$84,316	\$478,988	\$1,024,474

“In our generation, the most profound change to come upon the music scene undoubtedly was the formation of Broadcast Music, Inc. . . . Tin Pan Alley is now the United States of America.”

An Editorial by

PAUL ACKERMAN, *Music Editor*

Billboard Music Week

January 30, 1961

“Music—both as an art and an industry—is dynamic and ever-changing. To maintain a state of health it must be ever-seeking; it must always reach out and embrace new ideas and forms. It must avoid the status quo, for when an art and an industry lapses deeply into a rut, it can only decline and lose importance as a facet of the nation’s culture.

“In our generation, the most profound change to come upon the music scene undoubtedly was the formation of Broadcast Music, Inc. The creation of BMI set up a chain reaction of developments which brought to American music a richer repertoire and a broader base. In a phrase: Tin Pan Alley is now the United States of America.

DEPTH OF CHANGE

“The drama of this statement needs no undue emphasis. The simple statement of fact indicates clearly the depth of change that has come upon the music industry—upon its songwriters, publishers, artists and recording executives. And, of course, upon the people—the last and most important link to be effected.

“BMI brought to the music business not only dramatic change, but a large measure of romance. New sounds and new writers from faraway cities emerged to leave fresh impressions upon a musical scene.

“As is true of all major departures from the norm, the changing patterns dislocated writers and publishers

of the old school. All who were solidly entrenched viewed the new era with irritation—if not loathing. The day of sleek comfort was dissipated by the onset of sharp competition.

A RICHER ART

“Yet, in our view, this competition has resulted in a richer musical art and a more progressive music business. This we feel is true not only in the fields of concert and jazz music, but also in the pop category where BMI has been most strongly attacked by adherents of the older music business. We feel that when serious composers begin the task of capturing the essence of musical America in major works, they will find that their basic material is all the richer because of the folk-oriented repertoire which BMI brought to the mainstream of pop music. When the tumult dies, it will be realized that this repertoire, neglected through the years, represents much of the musical heartland of the continent.

“Competition has made this musical growth possible. It is worth remarking that this competition was created by the broadcasting industry. It was not imposed by a governmental agency; rather, it is one of the notable examples of an industry facing a problem—the need for competition—and solving that problem from within.”

DIRECTORY OF AM AND FM RADIO STATIONS IN THE U.S.

Note: Listed in this directory are all am (amplitude modulation) and fm (frequency modulation) stations in the U. S. and its territories. Information for each station listed below has been corrected to Sept. 1, 1961. Where applicable, the following data are shown in this order: call letters, date station began (or intends to begin) operation, frequency, power, station address, telephone, TWX number, name of licensee together with date present licensee acquired station, national and regional network affiliations, national representative, hours of specialty programs (Negro or foreign language) broadcast each week, executives, companion fm and tv stations.

For each station associated with newspaper ownership

and/or multiple owners of radio and/or television stations the phrases "see Newspaper Ownership" or "see Group Ownership" appear after the name of the licensee. These refer to specialized directories which may be located by consulting the index on page 3.

For fm stations which are companions of am stations and which duplicate the programming of the am, only facilities are listed. Fm stations which are programmed and operated independently are listed in greater detail.

Appropriate note is made of television companions of radio stations listed here. Full information about all television stations is presented in the Directory of Television Stations in the U. S. beginning on page A-3.

IN INLAND CALIFORNIA
(AND WESTERN NEVADA)

BEELINE
RADIO
delivers more
for the
money

Harvesting cotton in the fertile Central Valley of California.

Kern and Fresno counties — covered in depth by Beeline radio — are the two top cotton producing counties in the United States.*

This is an area that produces big and spends big. Beeline radio makes your product part of this prosperous scene. In fact, throughout Inland California and Western Nevada, the Beeline stations deliver more radio homes than any other combination of stations — and at the lowest cost per thousand. (Nielsen, SR&D)

*Sociis suis
erit cognotus**

Associated Business Publications is a group of leading business journals which, since 1906, has been working cooperatively to improve the service of business papers to their readers . . . and to help advertisers use the business press more effectively.

Only publications whose paid circulation is audited by ABC (Audit Bureau of Circulations) are eligible for membership in Associated Business Publications.

BROADCASTING Businessweekly is the **only** publication in the radio-tv field which qualifies for membership in ABP and ABC, your guarantee of integrity in reporting paid circulation facts.

BROADCASTING
THE BUSINESSWEEKLY OF TELEVISION AND RADIO

WHO Radio should be No. 14 on any "Top Market" radio list!

50,000-Watt WHO Radio Covers 865,350 Homes In Iowa PLUS!

EVERY time your marketing strategy calls for radio in America's top *radio* markets . . . 50,000-watt WHO Radio belongs on the list!

There are only 13 markets in America in which any radio station reaches a larger audience or more buying power than does WHO!

WHO Radio reaches 865,350 homes in "Iowa *PLUS!*" (96 of Iowa's 99 counties *plus* a number of counties in neighboring states). 75% of all Iowa retail sales are made in counties you reach with WHO. (Metropolitan Des Moines accounts for only 9% of Iowa's retail sales. All eight of Iowa's leading

metro areas, including Des Moines, account for just 33%.)

Many surveys, for 24 consecutive years, have measured the Iowa radio audience, and have *proved* that WHO is Iowa's most listened-to radio station. A 93-county area Pulse (March, 1961) gives WHO the No. 1 position in every weekday quarter-hour surveyed over 94 other stations.

Next time you make up a "top radio market" list, be sure No. 14 is WHO Radio! Ask your PGW Colonel for the latest information on "Iowa Plus."

Sources: Pulse (March, 1961), NCS No. 2, SRDS.

WHO

for Iowa PLUS!

Des Moines . . . 50,000 Watts

MAKE YOUR KURUS COUNT! A cache of Kurus would be a Turkish delight to any Ottoman. The coin-with-the-hole is currency from Istanbul to Azerbaijan, and Turks today count on Kurus to buy everything from new scimitars to compact cars. In Baltimore, an advertising Turk could work wonders with a conservative collection of Kurus because there isn't any mystery or mysticism about the sales promotion power of WBAL-Radio. Maryland's only 50,000 watt station dominates the entire metropolitan area plus 37 surrounding counties in a radius that reaches four adjacent states. WBAL-Radio produces results in this rich region by providing more unduplicated coverage than any other native station. WBAL-Radio sells by sustaining listener interest with a consistent format of full range programming and music for mature minds. Turk or Tycoon, you don't need multiple schedules to cover the Maryland market . . . just depend on WBAL-Radio—the basic buy in Baltimore, the medium that makes every Kuru count.

WBAL-RADIO BALTIMORE  Maryland's only 50,000 watt station

SPELLING OUT DETROIT'S BIGGEST RADIO VALUE...

WELL-TO-DO . . . listeners with incomes sufficient to buy products and services of every kind . . . plus the continued desire for "more and better."

COVERAGE . . . 50,000 watts of good music, lively news and sports reports . . . continually attracting more and more listeners . . . throughout Southern Michigan and from Ashtabula to Elkhart.

ADULT AUDIENCE . . . with ability to make buying decisions—and favorably influenced by programming that provides a desirable "climate" for commercial messages.

RESULTS . . . attested by success of a wide range of local and national advertisers. . . . Details gladly supplied.

**50,000 WATTS
1130 KC**

MARKET DATA

Population 6,669,700
 Total radio homes 1,808,575
 Retail sales \$7,848,632,000

WJLK

The Radio Voice
of

The Asbury Park Press,

features vital community programming that attracts and holds more listeners than any other radio station heard on the North Jersey shore.

Day and night our air is jam-packed with half-hourly newscasts, and important news bulletins, produced by a special radio news staff; plus bright and interesting information about shore events and personalities; plus intelligently presented middle-of-the-road music that keeps people tuned to WJLK hour after hour.
