The Braille Institute is \$15,679 richer, thanks to KHJ's young marrieds.

We're involved in community affairs. Our listeners get involved, too. In projects like our annual KHJ Appreciation Concerts, to raise money for worthy causes. KHJ produces the concerts. KHJ's young married listeners pitch in with ticket donations. Last year, \$15,679, the entire concert proceeds, went to the Braille Institute. So far this year, we've raised \$8,000 for the Motown Scholarship for Musical Excellence endowed at UCLA through the United Negro College Fund. It's another way KHJ works with and for the community.

BEELINE[®] COUNTRY . . . AWFULLY BIG IN POPULATION INCREASES

. . . and BEELINE RADIO is a proven way to reach this important market

Heard about the population explosion in Beeline Country? Last year, the total population of our 47-county western market increased almost 6% . . . from 2,981,700 to 3,148,300 . . . as opposed to a U.S. population increase of only 1%. Take advantage of this big boom by advertising your product or service on Beeline Radio. At the same time, you will be covering a market

with an effective buying income of over \$8 billion. And, a market whose combined farm income is greater than any one of 46 states — \$2.2 billion. It can be all yours on Beeline Radio. So don't turn a deaf ear . . . include the four Beeline stations in your next media schedule. They are the key to California's Inland Valley and Western Nevada.

WDBJ

IS

BASIC

For all 'round listenership (especially adult) in western Virginia, WDBJ is the station. Programming, strong on news, sports and mid-road music is the reason. This, combined with aggressive merchandising support, has kept WDBJ a choice medium of many leading advertisers. To them WDBJ is basic!

All figures shown are gross before deduction of any discounts or agency commission. This makes them comparable to data for other media including comparable radio, spot TV and network TV. Brand expenditures are, in most cases, based on break outs as reported. In the few instances where exact figures were not available due to product scheduling on a rotating basis, RAB has projected estimates of brand expenditures.

Rack
Assembly

Before ordering a custom installation for your control room, check your requirements against these features of Collins' standard 212T-1 and 212T-2 Audio Control Consoles:

REMOTE CAPABILITY. Rack-mounted assembly containing amplifier cards can be located in an equipment room and linked by cable to the audio control panel in the studio. Sensitive audio wiring is concentrated in a card cage away from interference. Noiseless switching and audio level control are accomplished by photoconductive cells which employ a light beam to isolate control voltages from the audio circuits.

COMPONENT ACCESSIBILITY. Plug-in etched circuit card construction ends time-wasting troubleshooting. Attenuator, input switches, amplifiers, and amplifier output switches are replaced by simply taking one card out of the rack-mounted assembly and plugging in another card.

The 212T Audio Control Consoles consist basically of three units:

CONTROL PANELS. The control panel constitutes the difference between the two systems.

The 212T-1 control panel provides 28 inputs to 14 faders, 2 program output channels, and 2 10-watt monitor speaker outputs. The overall dimensions are 15 $\frac{3}{4}$ " high by 24" wide.

The 212T-2 control panel has 32 inputs to 16 faders. The panel is divided into two sections: The fader operating controls are mounted on a panel 10 $\frac{1}{2}$ " high by 19" wide; the

VU meters and monitoring controls are mounted on a panel 5 $\frac{1}{4}$ " high by 19" wide.

RACK-MOUNTED ASSEMBLY. The assembly contains 16 pre-amplifier cards. Quantity and types of cards depend upon individual requirements. The assembly includes three program amplifier cards—one for cue and two for program channels. Two amplifiers are for speaker monitors; two switching cards select monitor inputs. The rack-mounted assemblies for the 212T-1 and 212T-2 are identical.

POWER SUPPLIES. Two power supplies are housed with the rack-mounted assembly. One power supply provides variable illumination for meters and push-button controls. Another provides powering for cards, attenuators, amplifiers, switches, and photoconductive cells.

Most studio audio requirements can be met by adapting the standard 212T-1 or 212T-2 Console through strapping options and minor wiring changes. Expansion and adaptation can be accomplished easily with additional space which the units provide for two extra preamplifier cards, two additional program amplifiers, and two unwired spare card receptacles.
