The TV Marketplace

The ADI Market Atlas

The Areas of Dominant Influence is a geographic market design that defines each television market exclusive of the others, based on measurable viewing patterns. Each ADI market consists of all counties in which the home market stations receive a preponderance of viewing, and every county in the U.S. (excluding Alaska and Hawaii) is allocated exclusively to only one ADI—there is no overlap. The estimated television households are therefore additive, and the total of all ADI's represents the total number of television households in the U.S.

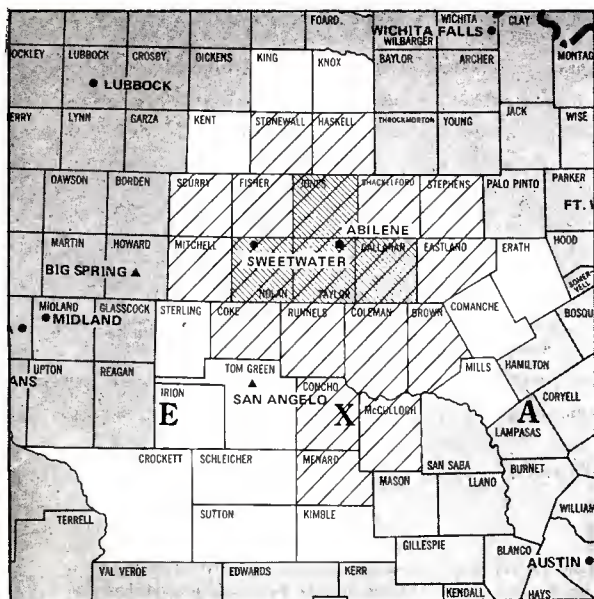

The ADI is a standard market definition. As a television buying tool it provides the means for geographic and demographic control of dollar expenditures to obtain maximum media efficiency. As a station tool it has numerous applications for more effective sales

efforts, and for programing and promotion planning.

Following, in alphabetical order, are Arbitron Television's 207 ADI markets for 1975, with coverage maps for each; county-by-county breakouts of TV households; totals of women, men, teens and children in the ADI audience, and a listing of all stations covering the ADI. Other data include the market's stations, their cities of license, channel numbers and network affiliations. (Networks in parentheses indicate secondary affiliations.)

Coverage maps show total survey areas in white, with ADI's indicated by light crosshatching where appropriate, and Arbitron Metro Rating Areas shown by heavier crosshatching.

On page B-76 are a crossreference list for cities within a multi-city market and a list of "supplementary markets" that have no ADI.

SETTING A NEW STANDARD

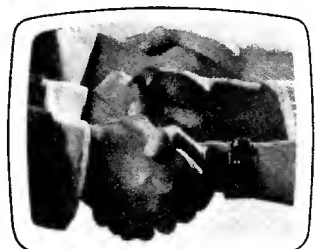

New England's first live entertainment television network. Now covering six states.

"House Call", America's pioneer prime-time medical program with Dr. Timothy Johnson.

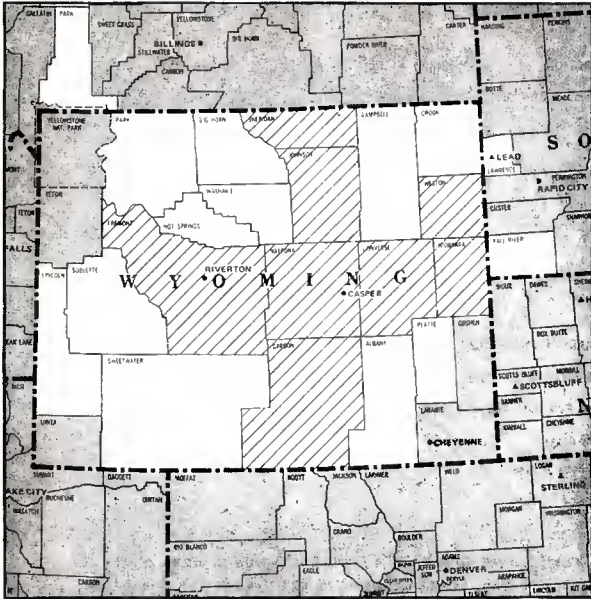

The nation's number one station in total hours of news and public affairs programming.

More than 60 awards since we began broadcasting 33 months ago.

How Network Delivery Varies by Market

National advertisers use spot television to increase network advertising weight in specific markets to achieve a predetermined level. These market goals are derived from the advertising budget and the market's share of the brand's projected sales. Thus, a spot schedule is usually indicated where a market has an unusually high brand-sales potential, or where the network weight delivered for the brand is below the national average used in planning, or both.

The first factor, market brand potential, varies by product and is difficult to generalize. The second factor, local-market network audiences, must be generalized because planning is based upon next season's *anticipated* network performance. The prevalence of network "package" buys, which tend to deliver average audience levels,

supports the use of average data.

The following tabulation, chosen especially for the BROADCASTING Yearbook, shows Arbitron Television's Areas of Dominant Influence (ADI) in terms of percent of the total number of U.S. TV households. Also given, in like percentage terms, are the network audiences in each ADI market during prime-time hours. It is this market audience figure, when compared to the market's share of population, that indicates whether the network commitment will perform above or below the national plan average in that market.

The figures are based on Arbitron Television's May 1974 Network Program Group Analysis.

Will you invest \$50 a year to promote your station better?

That's the price of a membership in the Broadcasters Promotion Association.

Over 300 stations . . . from every size market . . . have found that it does pay off . . . in sharper ideas, sounder promotion.

Here's what you get for your \$50:

- 12 monthly Newsletters covering everything from anniversaries to ascertainment.

- 12 monthly Big Ideas magazines, each devoted to a particular subject. (To illustrate, recent issues have dealt with newspaper advertising, sales promotion, outdoor, etc.)

- A wealth of other member services. (Like the 1974 BPA Survey of What Stations Need To Promote Syndicated Programs.) Want to know more? Return the coupon below and we'll be in touch.

HOUSTON SAW IT FIRST ON KPRC TV.

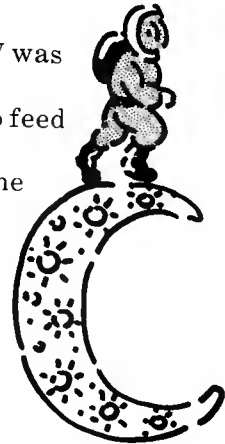

In 1940, KPRC TV brought Houston its first newscast.

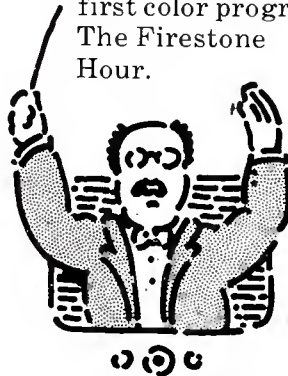

And the first production studio.

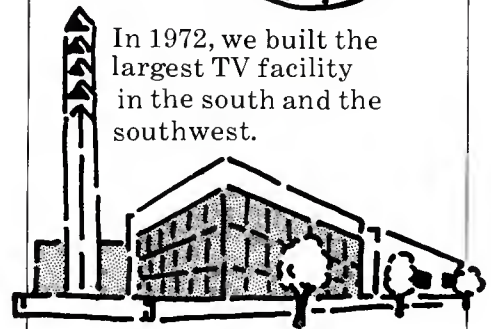

In 1969, KPRC TV was the only station to feed the moon walk to the world.

In 1954, the first color program: The Firestone Hour.

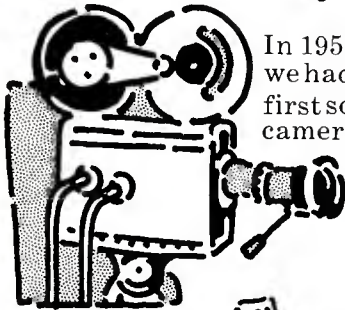

In 1972, we built the largest TV facility in the south and the southwest.

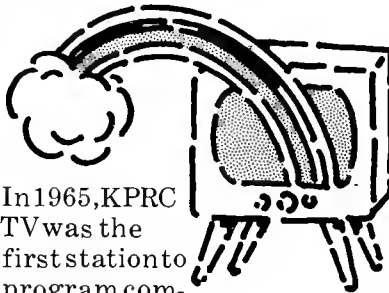

That same year we got Houston's first news camera.

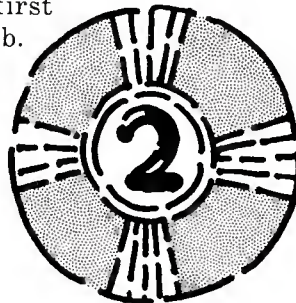

In 1950, we had the first sound camera.

In 1965, KPRC TV was the first station to program completely in color.

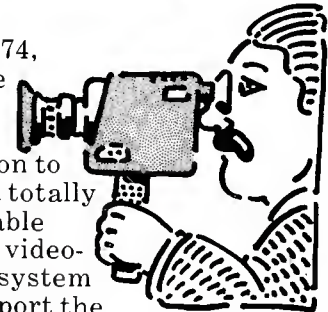

In 1966, we put in the first color lab.

In 1953, the first film lab.

In 1974, we're the first station to use a totally portable color video-tape system to report the news faster.

Fact is, KPRC TV has been first in bringing Houston the news for the past 25 years.

If you'd like to see the facts on Houston's first news station contact our national reps: Petry Television, Inc.

The Radio and Television Audiences

Radio and television were in more U.S. homes than ever before as 1975 approached.

Television. A total of 68.5 million homes, or 97% of all U.S. homes (excluding Alaska and Hawaii), were TV-equipped as of September 1974, according to the A. C. Nielsen Co.

Color TV. Homes equipped with color TV sets totaled 48.6 million, or 71% of all TV homes, as of October 1974, according to estimates by NBC.

Radio. The Radio Advertising Bureau estimated that 70.4 million U.S. homes, 98.6%, were radio-equipped as of Jan. 1, 1975.

Radio Sets. The number of working-order radio sets in the U.S. totaled 401.6 million in January 1975, according to estimates by the Radio Advertising Bureau. RAB estimated that 291.2 million of these were home and personal radio sets and 110.4 million were out-of-home receivers.

Viewing and Listening. The extent to which radio and television sets were used is indicated in the tables that follow. The television figures were furnished by the Nielsen company and its Nielsen Television Index (NTI). The radio data came from RAB and other sources as noted.

Television Billings 1948-1973

Figures for the years 1949 through 1967 are net time sales by stations and networks after all frequency and promotional discounts but before deduction of commissions to agencies and representatives. Figures for 1968 through 1973 were computed under a new formula and represent total amounts paid by advertisers for

the use of broadcast facilities. They include commissions paid to advertising agencies and representatives and payments for broadcast time and programs, materials, facilities and services supplied by broadcast stations and networks in connection with the sale of time. Figures are based on FCC data.

In 1948 FCC reported only "total revenues" (from time, talent and services) from "network programs" and from business "sold directly by stations." Hence figures for that first year of financial reporting are not comparable with time sales in ensuing years.

U.S. Sales of Television Receivers — 1946-1973

Prior to 1971, data reflects factory sales by U.S. manufacturers plus those products imported directly by distributors or dealers for resale. Import statistics are based on average value as published by the U.S. Department of Commerce, which is F.O.B., and therefore excludes U.S. import duties, freight charged from the foreign country to the U.S., and insurance.

**Data from 1971 on reflects products produced or purchased by U.S. manufacturers plus those products imported directly by distributors or dealers for resale. Import statistics are adjusted to U.S. factory values, including U.S. import duties, freight charged from the foreign country to the U.S., and insurance.*

a Estimated for years 1946-1954.

b Estimated for years 1954-1960. Data for 1961-1963 from U.S. Department of Commerce. Data for 1964 and subsequent years from EIA reports.

TV Allocations

Note: UHF and VHF TV allocations have been made by the FCC to the following cities. A plus or minus after a channel indicates that a station occupying the channel must operate with its carrier frequencies offset 10 kilohertz above or below, respectively, the normal carrier frequencies. The offset indicators are not shown for UHF assignments, which were the subject of a rule-making adopted June 4, 1965. The designators were added in a later order, but had not been published by time the Yearbook went to press. Meanwhile, the appropriate designators are shown on construction permits and licenses issued for UHF stations.

Asterisks (*) indicate channels reserved for noncommercial use. Footnotes: 1) Following the decision in Doc 18261 (amendment of rules regarding geographic reallocation of channels 14-20 to land mobile radio in the 25 largest urbanized areas of the U.S.) channels so indicated will not be available for use until further action by the FCC. 2) This channel is not available for Elgin, Ill., unless FCC determines it is not needed at Joliet, Ill. 3) This channel is not available for Asbury Park, N.J., unless FCC determines it is not needed at New Brunswick, N.J. 4) Channel 15 will not be available for television use until further action by the FCC. 5) Stations using these assignments shall limit radiation toward stations on the same channel in Puerto Rico. 6) Operation on this Channel is subject to the conditions, terms, and requirements set out in the Report and Order in Docket No. 19075, RM-1645, adopted January 5, 1972, released January 7, 1972. RADIO FREE AMERICA.

American music was set free when BMI was born in 1940. Because BMI recognized the long neglected creators of country and western, rhythm and blues, jazz, concert, and gospel, Americans could turn their radio dials to all kinds of music.

Today, BMI writers and publishers provide America with most of its hits, and provide radio with most of its music. Just like in the beginning, BMI believes the music you hear should spring from all of America's music.
