INTRODUCING "ROOM AT THE TOP"

**ANOTHER FIRST FROM
COMM/SCOPE.
NEW PATENTED PIII PLUS™
COAXIAL CABLE 30db SRL*
5-450 MEGAHERTZ.**

6 Reasons why PIII Plus™ coax cable offers you more.

1. PIII Plus cable means 50% more bandwidth with access from 5-450 megahertz. Now that's "room at the top."
2. Return loss (SRL)* is tested to assure that PIII Plus cable has a minimum of 30 db (SRL)* throughout 5-450 MHz.
3. Stable attenuation is assured to 450 megahertz, the same super low loss characteristics you've learned to expect from our standard PIII cable.
4. The mechanical characteristics of PIII Plus coax are identical to those time proven properties that have made patented PIII so successful.
5. Even with all this increased capability and "room at the top," PIII Plus cable uses the same connectors as PIII.
6. Comm/Scope's reputation and commitment to manufacturing only the highest quality coaxial cable stands behind every reel of new PIII Plus coax.

PIII Plus is the ultimate cable for all your telecommunication needs. For more information on how to put a plus in your system, contact Comm/Scope Company.

*Available in copper clad aluminum center conductor. Additional one inch cable specifications are available from Comm/Scope.
