Note: Unless indicated as French (Fr), programming is in English on Canadian stations in all provinces except Quebec. In Quebec, programming is in French unless shown as English (Eng). Due to Canada's geographic expanse, several Canadian stations have affiliates on shortwave (sw) frequencies for domestic broadcasting. In all cases they duplicate the AM station programming 100%.

Voice of America

Headquarters: 330 Independence Ave. S.W., Washington. (202) 755-4180. Hans N. (Tom) Tuch, deputy dir & acting dir; Robert Kays, dir, programs; Robert H. Henry, dir, administration; Kenneth Langenbeck, engr dir. Public info office: 755-4744.

Policy

By law, the Voice of America, a part of the International Communication Agency, operates under the following directive: "The long-range interests of the United States are served by communicating directly with the peoples of the world by radio. To be effective, the Voice of America must win the attention and respect of listeners. These principles will govern VOA broadcasts:

"1. VOA will serve as a consistently reliable and authoritative source of news. VOA news will be accurate, objective and comprehensive.

"2. VOA will represent America, not any single segment of American society, and will therefore present a balanced and comprehensive projection of significant American thought and institutions.

"3. VOA will present the policies of the United States clearly and effectively, and will also present responsible discussion and opinion on these policies."

To implement this directive, these broadcasts present news and news-related items of American and world events, news analyses, commentaries, correspondents' reports, editorial roundups, and feature material such as documentaries, roundtable discussions, interviews and special events all of which provides overseas audiences with a balanced and accurate concept of the many facets of American life and clear information regarding U.S. policies.

Facilities

The Voice of America has a network of 109 transmitters: 41 in the continental United States and 68 overseas. These are short and medium wave stations ranging in power from 35 kw to 1,000 kw. The largest transmitter complex is at Greenville, N.C. There, 18 transmitters relay programs received via microwave from the Washington studios to audiences and relay stations abroad over 73 directional antennas. Total power at Greenville is 4,800 kw. Other domestic facilities are at Bethany, Ohio; Marathon, Fla. (MW); Delano and Dixon, both California.

Overseas relay stations are at: Munich, Germany; Kavala and Rhodes, Greece; Tangier, Morocco; Monrovia, Liberia; Tinang and Poro, The Philippines; Woolferton, England; Colombo, Sri Lanka; Bangkok, Thailand. These include short and medium wave transmitters, among which are three one-megawatt transmitters. VOA's total power is now 21,840,000 watts.

Local Placement

Many VOA tapes, music recordings and script materials are furnished by International Communication Agency offices overseas for local distribution and broadcast. Other relays and rebroadcasts are made through arrangements with local broadcasters in Western Europe, Africa, the Near East, South Asia, the Far East and Latin America. For example, VOA's Spanish-language feed of 20 daily (M-F) correspondent reports are broadcast a total of 1,200 times on stations and networks throughout the southern hemisphere.

We interrupt this magazine

One call is all it takes to get anything and everything you need in broadcast equipment — from turntables to AM and FM transmitters.

Choose from Rockwell-Collins equipment plus that of close to a hundred different manufacturers. It's one-stop shopping with fourfold advantages.

1. Quality products. Our transmitters and consoles are the result of our technical excellence and single-minded dedication exclusively to the radio broadcaster for over 40 years. We've never once deviated from our goal: to make our name synonymous with quality, reliability and long life... for your benefit.

2. Broad choice of products. In addition to our own Generation 4™ FM transmitters and our all-new Power Rock 5-kW AM transmitters (the cleanest,

to bring you all you need in broadcast equipment.

brightest, loudest AM in town), we carry products from the largest team of respected specialty vendors available anywhere from a single source — from ADC to UREI, with nearly a hundred other such leaders in between. If we don't have what you want, chances are we can get it for you. Fast.

3. Flexible financing arrangements. If it's under \$1000, you can use your own or your company's Master Charge. For larger orders, take your choice of time-purchase (up to 5 years) or lease plans.

4. Unbeatable customer support. Your emergency is our emergency. We're ready to respond — without delay — 24 hours a day, 365 days a year.

See the cities listed below for the representative nearest you — and call him for one-stop shopping, Rockwell-Collins style. Ask him for a copy of our new brochure, or contact: Collins Broadcast Marketing, Dept. 406-106, Electronics Operations, Rockwell International, Dallas, Texas 75207. Phone: 214/996-5424.

CHECK CONTINENTAL'S 317C-2 50 KW AM TRANSMITTER It's the "best" 50 KW package you can buy!

Continental's 317C, the world's most popular and most thoroughly field-proven 50 KW AM transmitter, sets a new standard of performance with the introduction of the 317C-2.

Loud Sound

Automatic Program Peak Controller enables you to achieve maximum loudness without overmodulation.

Completely Transparent

The 317C-2 faithfully reproduces the most sophisticated audio processing: what you program in is what you get out.

AM Stereo Compatibility

Cost Efficient

Continental's proven, patented circuitry gives you extraordinary tube life and high overall efficiency.

Reliability

All components, output networks and power supplies are conservatively rated, so you enjoy extra operating margins with extended life and performance. 317C "on-air" performance has been proven over years of operation.

Let us show you how the 317C-2 50 KW AM transmitter gives you quality sound and superior performance. For information, write or call Continental Electronics Mfg. Co.; Box 270879 Dallas, Texas 75227. (214) 381-7161.

Continental Electronics 

The most complete and advanced line of modulators

presents its most advanced modulator

The TVM 4930 is just one model in the most complete line of modulators available today in terms of price, performance and ability to be tailored to special applications. It is the highest quality modulator in its class. It provides both a modulated visual and modulated aural rf carrier output to +60 dBmV on any vhf channel 2 to 13. It's ideal where broadcast quality is a must for CATV, educational, TV studio and cable pay TV. The callouts

above will give you a clue to the quality of this professional ETV and CATV studio broadcast performance modulator.

THE NETWORKS' CHOICE. (AND EVERYONE ELSE'S.)

At Camera Mart, we've been a leading equipment supplier to broadcasters and producers for years. We're no strangers to the 'instant' needs, unexpected calls, tough standards and difficult operating conditions that are often S.O.P. in this rough-and-tumble business. But you probably know that...at least, when it comes to film.

What you may *not* know is, for the past few years, we've been quietly doing the same in *video!* Testing and selecting the leading equipment for performance and reliability. And offering a wide selection of production and post-production components and packages—on rental, lease and purchase plans with our customary flexibility.

But don't take our word for it: talk to our customers. You'll see why so many people the industry depends on, depend on us.

Camera operator Harry Mathias (with Steadicam) shoots an action sequence for a Hertz TV commercial produced by Jerry Kaufmann Productions, Inc.

Most action sequences simply beg for the use of Steadicam...

Our Oscar-winning Steadicam film/video camera stabilizing system is a most exciting — as well as extremely practical — production tool.

Steadicam will transform virtually anything that moves into an effective camera platform, saving countless hours in production time and reducing costs. It is ideal for shooting any kind of action sequences... on land, at sea, and in the air.

Actually, whether in the studio or on location, there's hardly anything that our unique Steadicam system cannot do. And it accepts, interchangeably, most portable 16mm, 35mm and video cameras currently in professional use!

When you plan your next production, make sure you take the time to consider how you can use Steadicam to your best advantage. And discover the thousand and one creative ways you can make Steadicam work for you.

DELTA BROADCAST PRODUCTS

AMC-1

The **Amplitude Modulation Controller** is the only modulation controlling system that provides a completely closed loop around the transmitter. The sampling of actual modulation levels after the PA output network assures precise adjustment for optimum modulation levels. The AMC-1 also keeps a digital count of positive and negative overmodulation bursts for both present and previous one minute periods.

APC-1

The **Automatic Power Controller** is your insurance against citations for over- and under-power operation. The APC-1 continuously monitors the transmitter output power, and makes automatic power adjustments with the transmitter loading control. This assures proper power adjustment at all times.

OIB-1

OIB-3

The **Operating Impedance Bridge** measures the impedance of networks, radiators, and the like while they operate under full power. VSWR as well as complex impedances of up to $400 \pm j300$ ohms can be measured.

The **OIB-3 Operating Impedance Bridge** provides extended resistance and reactance ranges, measuring up to $1000 \pm j900$ ohms. The bridge has a built-in carrying case and RF amplifier for improved nulling.

DAM-1

The **Digital Antenna Monitor** couples pushbutton ease of operation with digital accuracy. The DAM-1 will accept RF samples from up to 12 towers (with an auxiliary panel) and features $\pm 1^\circ$ phase and $\pm 2\%$ current ratio accuracies. Remote panels and other accessories are available.

6730-E
6740-B

Designed to switch two transmitters from antenna to dummy load, the 6730E interfaces with 1 5/8 inch coaxial cable. For 3 1/8" lines, the 6740-B transfer switch is used. Either manually or remote controlled, the **Transfer Switch** is fully interlocked and can be wired to existing equipment to prevent "hot" switching.

RG-3

The **Receiver/Generator** combines a two-watt RF output and a correlation detector circuit that virtually eliminates interference problems. The RG-3 can be used in conjunction with any conventional impedance bridge including the OIB series.

AAM-1

The **Analog Antenna Monitor** gives stable phase and ratio readings even in high RF fields. Separate phase and ratio mirrored-scale meters assure accurate meter indications.

TCA

State of the art antenna current metering has arrived in the **TCA Ammeter Systems**. Accurate, Modulation-free, temperature stable current indications are found in the TCA. Models include single and dual scale meters.

CPB-1

The **Common Point Impedance Bridge** is designed for permanent installation; and allows continuous monitoring of the common point, thus facilitating network adjustment. This model can be provided with one of Delta's TCA ammeters mounted in the front panel.

TMCS

The **TMCS Antenna/Transmitter Remote Control System** offers complete transmitter and antenna parameter control for stations utilizing the DAM-1 Antenna Monitor. Alarm indications and failsafe circuitry is also provided, giving complete transmitter system control.

TCT

Delta's **Toroidal Current Transformers** provide accurate sampling current and phase values without the problems associated with sampling loops. Three output voltage ranges are available, as well as high voltage models for high-power facilities.

DPM-1

Delta's **Digital Panel Meter** displays up to sixteen channels of information in a 3 1/2 digit LED display. Any combination of operating parameters can be selected, such as plate current and voltage, common point current, base currents, etc.

14X zoom

Here's the FUJINON line. With more ENG/EFP lenses than anyone else. All available with studio conversion kits for extra economy. All with adjustable back focus for faster lens changing.

If you want to get in close, consider the new 22X zoom with built-in 2X extender. It gives you F/2 speed with a total range of 12.5 to 550 mm. If you're already in close, use the unique F/1.4 6 mm ultra wide angle distortion-free lens. It

gives you a "0" MOD with a 70° horizontal field of view.

For studio and field productions, FUJINON BCTV lenses are now offered with built-in test pattern projectors for the fastest, most accurate computerized camera set up. (Not available on 10X wide angle zoom.)

For maximum definition, the new 14X ultra high resolution lens reads 1300 TV lines and maintains a fast F/2.1 in all zoom and focus ranges.

Quality, performance and service make FUJINON best. Camera manufacturers, networks, stations and production companies around the world have made FUJINON first. Before you buy any camera or replace any lenses on your existing cameras, see the difference for yourself. Specify FUJINON. It will improve your image.

Does Your AM Tuner Sound Like Quality FM?

Our Dymek AM5 Does!

"Listening to a local classical-music station that carries the same programs on its AM and FM outlets, switching between the audio-output signals from an FM tuner (set to mono) and the AM 5, we found that the differences were very slight, actually comparable to those we have sometimes heard between different FM tuners. Much of the time no difference at all could be heard." . . . JULIAN HIRSCH

Introducing the Pop-Up TV Camera

This is one of the few TV camera innovations that hasn't come from Hitachi...yet. But if there's any demand, we're ready. Because besides the longest line of cameras in television, Hitachi also makes toasters. In fact, depending on where you live in the world, you might leave work in a Hitachi elevator, ride home on a Hitachi train, get a cold beer out of a Hitachi refrigerator, look through the bills sent to you by a Hitachi computer, watch Hitachi-transmitted-and-received TV shows, and get the power to make it all happen from a Hitachi power plant.

So what has all this got to do with our Hitachi TV cameras? It's just to let you know that the company behind those cameras is a major force in world business. In fact, you'll find Hitachi in the *Fortune* top 50. It also helps explain how we manage to come up with all those revolutions in video technology; Hitachi is a company with impressive credentials and resources.

The results speak for themselves.

The Automatic Beam Optimizer.
The Tri-Electrode tube.
The Saticon tube. The integrated pick-up component. More cameras and a greater range of prices than anyone. Backed up by our seven fully-staffed U.S. regional parts and service centers, all of them on 24-hour call for you. True, no toaster camera yet. But if you ever need one, we're ready. Hitachi...If we don't make it, it doesn't exist...yet.

Need Electric power on the job?

The Auto-Gen generator can turn your vehicle into a 115 volt AC power plant.

It provides up to 5,000 watts wherever you go. Presently in use for field monitoring, service and emergency power by many CATV and broadcasting companies.

Belt driven from your vehicles, the Auto-Gen generator can be used in pickups, service trucks, automobiles, and most other vehicles.

Complete, ready for installation.

27.5 Kilowatt FM Broadcast Transmitter

The Sintronic SI-F-25 transmitter is designed for long-term, reliable performance in the 88-108 MHz FM Broadcast band.

It provides the broadcaster with a high specification, easily maintained, reliable transmitter with a long operating lifetime. Proven circuitry is combined with the latest technological advances to meet these design goals. All the specifications are verifiable and represent conservative statements which all transmitters will meet at a *minimum*. They are not engineering estimates of performance. Considerable care has also been taken in the mechanical design to ensure technician accessibility, ease of testing, and component replacement.

The same concern for detail and reliability are found in Sintronic 1.5, 3.5, 5.5, 17.5, and 55 kW FM transmitters. We wouldn't build them any other way.

When does a portable color camera become an affordable studio camera?

When it's a Panasonic ENG/EFP camera.

Now you can stop admiring ENG/EFP color cameras, and start owning one! The surprisingly affordable Panasonic AK-750. Thanks to its impressive list of options, our three-tube Plumbicon® portable camera doubles as a studio camera.

In the field it's a fully self-contained portable camera that weighs only 20 lbs. (with our optional 12:1 zoom lens shown), so it's easy to handle. It's just as easy on the power, using only 23 watts. You can interface the AK-750 with any EFP system, because it can be externally synchronized with a single cable. Timing and phase adjustments are built right into the camera head. Or connect it to any studio system, simply by adding the optional Remote Control Unit and studio viewfinder.

Indoors or out, you can look forward to impressive performance: With an S/N ratio of 49 dB, and horizontal resolution of 500 lines center at the recommended illumination of 200 footcandles at f/4. There's even a +6 dB gain for a minimum illumination of just 15 footcandles at f/1.8.

Some impressive circuitry was built into the camera: Like a Y I/Q encoder, an RS-170A sync generator with genlock for studio or EFP use, and a color bar generator.

It also features an optical black, and automatic white balance. And there's electronic color conversion, as well as a filter wheel behind the lens.

Horizontal and vertical blanking are both adjustable to meet a variety of recording or playback requirements. And your picture is always crisp and clear thanks to horizontal aperture correction and 1-line vertical aperture correction built right into the camera head.

Not only do you get a long list of standard features with the AK-750, there's also a long list of camera options available. Such as 2-line vertical aperture correction, a chroma key unit, and more.

So if you're pricing both studio cameras and portable cameras, price one camera that can do both. The Panasonic AK-750.

Plumbicon is a registered trademark of N.V. Philips of Holland for TV camera tubes.

Play with the cart/cassette record/playback/duplication center that eliminates stereo phase shift error once and for all. The most advanced turntable preamp in captivity. Consoles so advanced, so silent you're not going to believe them until you try them. Or an audio router that makes whatever you've got now look—and sound—like so much spaghetti.

Then, if it's not for you, just ship it back.

But in all fairness, we have to warn you—once you've tried Ramko, chances are you're hooked for life.

No more phase shift error

The Ramko PhaseMaster provides phase-error-free recording/reproduction/duplication of your carts and cassettes, with performance specifications that meet or exceed whatever cart drives you're using now.

Instead of adding failure-prone electro-mechanical components or re-inventing the cartridge, we simply encode the stereo before it sees the heads or tape, then use this recorded information to eliminate any phase shift error introduced by the heads or cart when you play the signal back.

Features of the Ramko PhaseMaster Cart/Cassette Duplicating Center include two A and B cart decks and a cassette deck. Simple cassette-to-cart(s) and cart-to-cassette duplication. Automatic switching of record/playback, encoding/decoding and mono/stereo. Left, right and phase analysis meters. Front panel input selection. Three cue tones.

And so much more that you'll

just have to contact us for details and a demonstration. Ask for the Ramko PhaseMaster.

Just another turntable preamp?

Look at what one user wrote: *"Three days ago I replaced the (brand name) preamps in our studio with your ESP-38 preamps.*

"The result was astounding. The next day we had six unsolicited calls from local stereo stores. All commented on our improved disk reproduction and wanted to know what we had done."

Try it. You're going to like it a lot.

Consoles for AM stereo, or an FM station upgrade

Ramko consoles come with features you won't even find in more expensive competitive units.

Total dc control of all mixing and switching functions means no more noisy pots and switches, no stereo tracking error, and much more resistance to RFI.

We've developed solid-state balanced inputs for better sound. Added gain select on each input. Included switch-programmable cue and monitor mute selection. Provided mono, stereo and phase meters.

Get your hands on a winner now.

Kiss your patch panels good-bye

Because with the Ramko ARA-1612 Audio Router/Amplifier you use front panel pushbuttons to route 16 inputs to any of 12 outputs, simultaneously or individually, with an instant LED display of what is going where.

You've never seen anything like it. IC switching and isolation

buffers mean no loading and no degradation of S/N or frequency response with multiple feeds (stack additional units for up to 45 in and thousands out). On-board switches change stereo to mono instantly. Individual gain control on all inputs allows precise level matching. Response is 20 Hz-20 kHz ± 0.5 dB; S/N is -75 dB; distortion $< 0.3\%$; and input/output levels are +21 dBm max.

And all this is yours at the lowest cost per crosspoint in the industry.

For moving sound around

Ramko offers more different kinds of amplifiers than anybody.

Ten models of Audio Distribution Amplifiers, each with 20 Hz-20 kHz ± 0.5 dB frequency response, less than 0.1% distortion, and more inputs and outputs for the size and price than any other comparable ADA.

Four different Line Amplifiers with 20 Hz-50 kHz $\pm 0, -1$ dB frequency response, 0.008% distortion, balanced in and out, and +21 dBm max out.

Portable and studio dual function MIC/LINE amplifiers with balanced in and out, built-in RFI suppression, 20 Hz-20 kHz ± 0.5 dB frequency response, gain from 64 dB on MIC to 26 dB on the high level channels, and distortion at an inaudible 0.1%.

And now, our warranties...

We build our products so well that we back them with two-year warranties (four years on the DC-12 and DC-38). And isn't that music to your ears?

ever made!”**

No matter how many times we've heard this from customers, we'd love to hear it this time from you!

When you choose Stainless to fill your tower needs you get quick access to a wealth of experience. We don't just *sell* towers, we give you performance-proven advice on all aspects of the job, even ones you may have overlooked in your specs.

We'll show you how we cut costs with no sacrifice of quality, using automated processes for faster, cheaper and better results.

Stainless will build to *your* specs on *your* site or, we'll pick the best site, run soil analyses, then design, build and erect the optimum performance tower you need. We've been satisfying government, military and industrial customers, worldwide, for over 30 years. Every Stainless Tower, whether 200' or 2000', has priceless experience and reliability built in — to last!

Call Stainless, "the Tower People" and make a good investment for the future.

We stand out from the crowd.

Thanks to the unique design of the patented Beau pancake motor, our Type 10 Recorder/Reproducer gives you *space economy* (it's only 3 5/8" high and stackable) and *power economy*, too. Also cool-running and compact, there's the inexpensive Beaucart II Reproducer.

Simple design means greater efficiency. Our versatile Model SFE-1 Automatic Splice Finder and Bulk Eraser combines *two machines in one*.

A common-sense approach makes Beau-Master Stereo Console and its companion Beau-Pro easy to operate—with the performance you demand.

Simple functional design makes UMC stand out from the crowd.

Tini "Q-G" — The New Switchcraft Connector That Has Less Bulk! Less Weight! And Low Cost! It's designed for today's miniaturized lavalier microphones and instrumentation. Disconnect is quick and easy!

Take it apart. See Tini "Q-G" quality. Silver-plated pins and contacts for starters. "Non-scoop" plugs and receptacles have recessed pins to protect against accidental damage. They're keyed for proper mating. Tini "Q-G" reflects the proven quality of Switchcraft "Q-G" and "QGP" professional audio connectors.

Choose either three, four or five pin/contact styles in both cord plugs and receptacles. The cord plug diameter measures a mere .413" ... accepts cables up to .115" dia. with flex relief bushing - 170" dia. without bushing.

Tini "Q-G" receptacles are available with PC terminations and a choice of seven trim, colored panel escutcheons for quick, easy identification. The mach metal cord plug housing has a nickel finish that minimizes glare and lighting "hot spots!"

Compare! You'll easily see why Tini "Q-G" gives you more. But then it's from Switchcraft ... a leader for decades in audio connection design.

EASY WRITER.

VIDIFONT® started it all. The first name in character/graphics generation. And today, VIDIFONT is the most flexible, easiest-to-use system.

VIDIFONT gives variety and visual impact—with features like an unsurpassed number of custom fonts and special logos. Patented character overlap. Flash, character colors, black or outline. Varying edge sizes, levels and edge positions, including drop shadow. Background colors on full-row, partial-row or page basis. Plus, color windows for graphic highlighting, and much more.

And now, you have the total capability to prepare, rehearse and deliver top quality election coverage to your viewers. The VIDIVOTE® Election Reporting Package and VIDITEXT® on/off line composing, editing and animation make VIDIFONT the industry's choice for rapid, accurate accumulation and display of data.

With options like VIDIVOTE and VIDITEXT, you have a carefully designed microprocessor-based system that is self-contained. There's no need for computer time-sharing or a staff programmer. Simple, easy keyboard functions give you an all-new capability for character/graphics generation. VIDIFONT. Try doing things the easy way with the Easy Writer. More than 400 systems in operation.

Add VIDIFONT and add impact. Contact Thomson-CSF Broadcast, Inc., 37 Brownhouse Road, Stamford, CT 06902. (203) 327-7700. TWX (710) 474-3346.

BOOKS FOR BROADCASTERS

- T471. THE COLLEGE RADIO HANDBOOK** by Billy Grant. A readable, information-packed examination of college radio stations. The author discusses the purpose of college radio stations, programing factors, responsibility and ethics, and funding. There's also a section on how to overcome engineering problems, staff the station and promote a station image. Must reading for the broadcast professor and student alike. 210 pages. **\$14.95**
- T472. THE COMPLETE BROADCAST SALES GUIDE FOR STATIONS, REPS & AD AGENCIES** by Jay Hoffer and John McRae. How to sell and buy broadcast advertising. This is a sure-fire guide to selling and buying advertising that works because of its simplicity—it just gives the plain truth about all aspects of broadcast sales, including planning and managing a sales effort, training salesmen, effectively using sales tools and sales aids, writing copy, sales contests, collections, hiring practices, rating services, A-V aids, time-buying, liaison, etc.! Carefully examines the relationship between station personnel and advertiser, and contains many actual examples of successful promotional materials. 252 pages, 43 illus. **\$14.95**
- T403. AM-FM BROADCAST STATION PLANNING GUIDE** by Harry A. Etkin. A comprehensive guide to planning, building, and operating a radio broadcast facility—AM, FM, or combined operation. Based on a lifetime of experience and intimate association in broadcasting. 8-1/2 x 11", illustrated. **\$12.95**
- T404. THE ANATOMY OF LOCAL RADIO-TV COPY** by William A. Peck. Leading station executives have called this book the one that sets the standard for radio-TV copy at the local level. Loaded with hundreds of ways to increase station billing with sales-proven copy. 146 pages. **\$5.95.**
- T418. HANDBOOK OF RADIO PUBLICITY & PROMOTION** by Jack Macdonald. This handbook is a virtual promotion encyclopedia—includes over 250,000 words, over 1500 on-air promo themes adaptable to any format; and over 350 contests, stunts, station and personality promos! One idea alone of the hundreds offered can be worth many times the small cost of this indispensable sourcebook. 372 pages, 8-1/2 x 11" bound in long-life 3-ring binder. **\$29.95**
- T426. MODERN RADIO BROADCASTING: Management & Operation in Small to Medium Markets** by R.H. Coddington. A comprehensive guide to successful practices of radio stations in small-to-medium-sized markets. 288 pages, illustrated. **\$12.95**
- T428. ORGANIZATION & OPERATION OF BROADCAST STATIONS** by Jay Hoffer. An exhaustive examination of the responsibilities and capabilities required in each job classification. 256 pages. **\$14.95**
- T423. MANAGING TODAY'S RADIO STATION** by Jay Hoffer. Outlines principles evolved by the author during his 20 years as a broadcaster. 288 pages, illustrated. **\$12.95**
- T411. COMMERCIAL FCC LICENSE HANDBOOK** by Harvey F. Swearer. A unique study guide and reference manual, combining theory and applications with up-to-date questions and answers for 1st, 2nd and 3rd Class Radiotelephone license exams plus broadcast and radar endorsements. Complete detailed answers to questions on virtually any subject you may be asked when you take your exam, plus sample questions on each element (with answers in the back of the book). Also for practical reference in your profession. 444 pages. 150 illustrations. **\$10.95.**
- T419. HOW TO BECOME A RADIO DISC JOCKEY** by Hal Fisher. Essentially a course in showmanship, this book teaches all the techniques needed to become a successful broadcast announcer (or disc jockey). 256 pages, illustrated. **\$12.95**
- T420. HOW TO PREPARE A PRODUCTION BUDGET FOR FILM & VIDEO TAPE** by Sylvia Allen Costa. A complete guide to determining finances for any video tape or film production, from TV commercials to feature-length films. Jammed with facts covering every aspect of estimating costs. Tells how to estimate every cost associated with any size production, including the production location, cameras and accessories, sound equipment, light gear, raw film stock or video and sound recording tape, lab developing, printing and processing fees, personnel—(creative, technical, and talent), scenic elements, location expenses, surveys of remote shooting locations, film and tape editing, optical effects and animation, plus a host of miscellaneous expenses such as writer fees, animals, special effects requirements, and insurance. Also included are typical rate listings and eight sample budgets, representing TV commercials, documentaries, and feature-length films. 192 pages. **\$12.95**
- T421. HOW TO SELL RADIO ADVERTISING** by Si Willing. The right formula for sales depends on the individual and the prospective advertiser. Therein lies the secret as Si Willing illustrates it by theory and by practice. You'll hear of all sorts of objections (including a few you haven't heard!) and how they've been successfully countered. From the dialog between salesman and prospect you'll learn the approaches and the clinchers, how to use available sales tools to the best advantage and how to deal with competition. You'll learn ways to sidestep objections, how to recognize the "opportunity moment," and how to convert a "No" to a "Yes." 320 pages. **\$12.95**

AT YOUR SERVICE WITH OVER
20 YEARS EXPERIENCE

RICHARD A.

SHAHEEN, INC.

435 NORTH MICHIGAN AVE. • CHICAGO 60611

312/467 • 0040

Your Broker for the '80s!

There have been many changes in the broadcast industry in the past decade. And many more will happen in the '80s.

The market for broadcast properties has changed, too. Rule-of-thumb guidelines of ten years ago no longer apply. Supply and demand are making a "seller's market" for some, a "buyer's market" for others.

In this dynamic, changing broadcasting industry, both buyers and sellers can profit from the services of the *only* people who really know and understand *the market* — established, successful media brokers like The Keith W. Horton Company.

We work with buyers and sellers every day of the year, in confidence, to the benefit of both. Our experienced brokers know that "a good sale" for one party must also be "a good buy" for another. That's the principle which has helped us become one of America's major media brokerage firms in the '70s. And it's your assurance that we can profit you, as your broker in the '80s!
