Co-owned FM. WOF-FM has the same ownership as WOF(AM), and the FM listing contains only information different from the AM. Co-owned AM and FM stations are always listed together, even when they have dissimilar call letters.

(8) Frequency in megahertz, effective radiated power, and antenna height above average terrain. WOF-FM broadcasts in stereo.

Policy

By law, the Voice of America, a part of the International Communication Agency, operates under the following directive: "The long-range interests of the United States are served by communicating directly with the peoples of the world by radio. To be effective, the Voice of America must win the attention and respect of listeners. These principles will govern VOA broadcasts:

"1. VOA will serve as a consistently reliable and authoritative source of news. VOA news will be accurate, objective and comprehensive.

"2 VOA will represent America, not any single segment of American society, and will therefore present a balanced and comprehensive projection of significant American thought and institutions

"3. VOA will present the policies of the United States clearly and effectively, and will also present responsible discussion and opinion on these policies."

To implement this directive, these broadcasts present news and news-related items of American and world events, news analyses, commentaries, correspondents' reports, editorial roundups, and feature material such as documentaries, roundtable discussions, interviews and special events all of which provides overseas audiences with a balanced and accurate concept of the many facets of American life and clear information regarding U.S. policies.

Facilities

The Voice of America has a network of 101 transmitters: 33 in the continental United States and 68 overseas. These are short and medium wave stations ranging in power from 35 kw to 1,000 kw. The largest transmitter complex is at Greenville, N.C. There, 18 transmitters relay programs received via microwave from the Washington studios to audiences and relay stations abroad over 73 directional antennas. Total power at Greenville is 4,800 kw. Other domestic facilities are at Bethany, Ohio; Marathon, Fla. (MW); Delano, California.

Overseas relay stations are at: Munich, Germany; Kavala and Rhodes, Greece; Tangier, Morocco; Monrovia, Liberia; Tinang and Poro, The Philippines; Woolerton, England; Colombo, Sri Lanka; Bangkok, Thailand. These include short and medium wave transmitters, among which are three one-megawatt transmitters. VOA's total power is now 20,590,000 watts. Also 15 satellite circuits are used to feed VOA's overseas relay stations.

Local Placement

Many VOA tapes, music recordings and script materials are furnished by International Communication Agency offices overseas for local distribution and

broadcast. Other relays and rebroadcasts are made through arrangements with local broadcasters in Western Europe, Africa, the Near East, South Asia, the Far East and Latin America. For example, VOA's Spanish-language feed of 20 daily (M-F) correspondent reports are broadcast a total of 1,200 times on stations and networks throughout the southern hemisphere.

American Forces Radio and Television Service

AFRTS operates over 800 radio and television outlets located in more than 20 foreign countries, remote areas of Alaska, U.S. trusts, territories and possessions, and aboard Navy ships. Most of the land-based stations are grouped into regional AFRTS networks to serve specific geographical areas (for example, American Forces Network-Europe in Europe and American Forces Korea Network in Korea). These AFRTS networks and independent stations create their own individual radio and television program schedules from broadcast materials provided by the AFRTS Programming Center in Los Angeles. Some outlets are broadcast operations and some carried on closed circuit systems of various types. AFRTS stations broadcasting in U.S. territory (primarily Alaska and the Pacific), in Canada and in the Caribbean are listed below.

Radio Billings—1955-1980

Figures for the years 1955 through 1967 are net time sales by stations and networks after all frequency and promotional discounts but before deduction of commissions to agencies and representatives. Figures from 1969 on were computed under a new formula and represent total amounts paid by advertisers for the use of

broadcast facilities. They include commissions paid to advertising agencies and representatives and payments for broadcast time and programs, materials, facilities and services supplied by broadcast stations and networks in connection with the sale of time. Figures are based on FCC data.

*Prior to 1971, data reflects factory sales by U.S. manufacturers plus those products imported directly by distributors or dealers for resale. All import statistics are based on average value as published by the U.S. Department of Commerce, which is FOB, and therefore excludes U.S. import duties, freight charged from the foreign country to the U.S. and insurance.
