BETACART BVC-10

IN USE

"Makegood? What's a makegood?"

How soon they forget.

All those people from Anchorage to New York who already use Sony Betacart™ Systems.

They forget about downtime. They forget about on-air backup systems. And they forget about ad agencies demanding damngood makegoods.

Why?

Betacart is the smart cart machine.

Microprocessors keep constant track of forty cassettes. They maintain system alignment. They run self-check diagnostic routines.

And Betacart's simple operation not only prevents human error, it prevents human boredom.

Technicians at KDNL, St. Louis use their Betacart to put snap into station breaks. For station IDs they shoot logo artwork, add movement with digital effects and air the cassettes through the Betacart. Now there are no more dull title cards at KDNL.

At WDBJ, Roanoke, commercial delivery has improved dramatically. So has the picture quality of the spots.

Carl Guffey, director of operations, reports: "The sales staff is happy, traffic is happy, the engineers are happy and the general manager is ecstatic."

Want to improve your station's commercial outlook?
Put the Gold Standard to work for you.

Call Sony Broadcast at (201) 833-5231.

GLOBAL

FRENZY:

A picture is worth a thousand words, but *sometimes* a group of words can create a remarkable picture . . . a moment in time that has been accurately captured. So it is with the *new* Special Report from the International arm of Television Digest, Inc. . . .

International Telecommunications in Transition

GLOBAL FRENZY is a concise (150 pages) report that serves as a *snapshot* of an industry that is undergoing dramatic growth and change. It is not intended to be an exhaustive study of international telecommunications policy, technology and economics, but rather a quick and easy-to-read overview of where that industry seems to be *at this moment in history* and where it is headed.

GLOBAL FRENZY is an introduction to what is happening in telecommunications around the world. Also an historical document, it chronicles developments while analyzing them in introductions by Jonathan Miller, whose reputation as a journalist and lecturer in the fields of space and telecommunications is worldwide, and by Mary E. Crowley, the nation's premier journalist in the field of communications legislation and an acknowledged expert on international communications policy.

GLOBAL FRENZY is a guide to the issues, a tour of the horizon, and a resource to help policymakers and business planners more fully define international telecommunications problems *and* find paths toward their solutions.

ORGANIZATION OF THE BOOK

The book is divided into three parts. Section I reports on and analyzes the Telecom 83 International Exposition in Geneva. Section II provides an overview of trends and changes in international telecommunications. This section is called "Primer" and its opening line illustrates its direction: "International telecommunications policy is undergoing so many often contradictory changes that 'global frenzy' is an apt descriptor." Section III is an archive of news reports compiled from the pages of **COMMUNICATIONS DAILY**. They focus on such international items as

the cabling of the United Kingdom, videotext development in France and the privatization of Japanese telecommunications.

IT'S EASY TO ORDER

You may either fill out, clip and mail the coupon below to order your copy of **GLOBAL FRENZY** or you may call our Book Order Desk at (202) 872-9200 to get even faster service. Whichever way you decide to order, please do it today while you're thinking about it.

(clip and mail coupon below)

Order Form for GLOBAL FRENZY

Please send me _____ copies of **GLOBAL FRENZY: International Telecommunications in Transition** at \$85 each (Washington, D.C. orders add 6% sales tax; foreign orders add \$10 per book ordered.) Include check or credit card instructions. Make checks payable to Television Digest, Inc.

TELEVISION DIGEST INC.

Covering the Communications Industry Since 1945

Authoritative Analysis of Industry Trends & Issues

SPECIAL REPORTS

THE VIDEOCASSETTE RECORDER: AN AMERICAN LOVE AFFAIR

No. 116

Explores the 1983/1984 VCR boom, the most explosive period of growth in the VCR field. Looks at who's producing what and how much, market-share ranking, new products, home taping, 8mm video, the European market, forecasts for the future and more. Published April 1985. \$95.00 per copy.

ENTER DBS: THE SATELLITE STORY FROM THE PAGES OF SATELLITE WEEK

No. 115

Provides a convenient study of satellite television trends; the players, their tactics, and how money is being made and lost. A valuable resource for television and satellite industry executives, ENTER DBS offers a quick, yet comprehensive, overview of industry facts. Published January 1985. Price: \$115.00.

TELEVISION STATION COVERAGE CENSUS

No. 114

An exclusive study of the potential audience for every commercial U.S. television station. Under new FCC rules, allows users to evaluate strategies and calculate alternatives for acquiring or selling stations. The study is *unique*. There is nothing else serving its purpose. Published March 1985. Cost is \$250.00.

1984 CONSUMER ELECTRONICS VIDEO DATA BOOK

No. 113

A myriad of consumer electronics market statistics and projections for fiscal 1983/1984 pulled together from the archives of Television Digest With Consumer Electronics. This edition expanded to include a fund of relevant statistics on the broadcasting and CATV industries. Any attempt to assemble comparable data would cost hundreds of thousands of dollars. Published December 1984. \$95.00 to subscribers to Television Digest publications; \$125.00 to non-subscribers.

GLOBAL FRENZY: INTERNATIONAL TELECOMMUNICATIONS IN TRANSITION

No. 112

A concise overview of where the telecommunications industry is at this moment in history. It's a guide to the issues, a look at the future, and a valuable resource to help policymakers and business planners define international telecommunications problems and find solutions. Published late 1984. \$85.00 each.

COMPLETE TELEPHONE EXECUTIVE GUIDE TO 1984 A.D. (AFTER DIVESTITURE)

No. 111

A detailed look at the twenty months leading to and following divestiture. Covers regulatory, financial, policy issues and more. Published May 1984. Cost is \$75.

SHAKEOUT: THE YEAR IN CABLE PROGRAMMING

No. 110

Who is surviving and prospering in the cable programming field? This resource book, covering the most volatile period in the industry, May 1982 to October 1983, explains with important facts, figures and analyses. Bonus extra: A complete mini-directory of pay-TV and satellite services and TV and cable program sources. Published January 1984. \$95 for subscribers to TV Digest publications. \$125 for non-subscribers.

CELLULAR RADIO 84: FACTS FOR THE NEW FRONTIER

No. 109

Updates the latest activity in the cellular field with a specific look at application data for markets 61 through 90. Published February 1984. \$85 per copy. When purchased with No. 101, discounted price of \$175 for both volumes.

1983 CONSUMER ELECTRONICS VIDEO DATA BOOK

No. 108

Updated edition of market statistics and projections covering color and monochrome TV, VCRs, videocassettes, videodiscs and players, and audio equipment. Covers the period July 1982 through July 1983. Television Digest subscribers pay \$95.00, non-subscribers pay \$125.00.

1982 CONSUMER ELECTRONICS VIDEO DATA BOOK

No. 107

Annual compilation of key statistics of the consumer electronics industry, including table of weekly sales to dealers, data on total market supply, import-export summaries, share-of-market rankings, forecasts, analyses and other pertinent information. This 150-page book covers the period from January 1981 through June 1982. \$95.00 for subscribers to Television Digest publications. \$125.00 for non-subscribers. When purchased with the 1983 Edition, discounted price of \$25.00.

COUNTDOWN II: JOCKEYING AT THE DBS STARTING GATE

No. 106

Updated edition covering all the developments and maneuverings affecting the new DBS industry as it prepares to enter the marketplace. Published 1983. Cost is \$95.00.

COUNTDOWN I: DIRECT-TO-HOME SATELLITE BROADCASTING IN THE EIGHTIES

No. 105

A strategic planner's source book presenting a complete status report on DBS. It identifies the players, issues and technology shaping this new TV service. Published 1982. \$75.00 for domestic. When purchased with Countdown II, discounted price of \$25.00.

VIDEODISC: BOOM OR BUST?

No. 104

The story of the videodisc in 1981. Follows videodisc developments in its watershed year with reports on retailers' marketing experiences, new products, pricing activities, marketing strategies and plans of major participants, studies and forecasts. Published 1982. \$65.00 per copy.

TURMOIL IN TELECOMMUNICATIONS— 8 MONTHS THAT SHOOK THE INDUSTRY

No. 103

This 125-page book examines the breakup of the Bell System by presenting an up-to-date, blow-by-blow account of the involved players, their statements and their actions during the most critical 8 months of the industry's history. Published 1982. The first copy is \$85.00, additional copies are \$35.00 each.

HOW TO MAKE
OUR NUMBERS
ADD UP
TO

*Better
Promotion
Campaigns*

Numbers are just numbers unless you can use them to your advantage. That's why more and more stations are using Promotion AID. With Promotion AID you can identify the days and times your competitor's viewers are watching your station. It gives you the numbers you need to effectively reach the viewers you want to attract.

PROMOTION AID

Our ratings add up to more than just numbers.

The authoritative weekly information service covering the latest developments in broadcasting, cable, consumer electronics and allied industries . . .

TELEVISION DIGEST With Consumer Electronics

Television Digest has been keeping leading communications executives informed since 1945 and is aimed at all those decision-makers . . . like you . . . who have a big stake in the ever-changing broadcasting and cable industries.

Television Digest goes beyond the scope of any other publication by bringing into sharp focus all the conflicting forces at work—broadcast, cable, MDS, DBS, SMATV and others. It provides experienced coverage of the entire industry.

Each issue furnishes thorough coverage of government activities—the FCC, Capitol Hill, the White House. Each issue gives you the latest news on programming ploys . . . marketing strategies . . . personnel shifts . . . and current standings on the ever-changing revenue and ratings picture.

Television Digest regularly includes a host of industry surveys and statistics that cannot be found anywhere else. And because trade shows, conventions and professional meetings are of such vital importance in the communications industry, Television Digest provides complete pre- and post-meeting coverage of virtually every major trade show and professional meeting in the world.

Television Digest gives you the information you need, delivered in a fast-paced style and clear format that always respects your busy schedule!

For subscription information, call collect: (202) 872-9200.

OUR RATINGS
ADD UP
TO

*more just
than
numbers*

They add up to better sales, programming and advertising decisions. Because at Arbitron Ratings, we're constantly developing the most advanced methods of putting the ratings to work for your station and your advertisers.

For audience profiles closer to home you'd have to live there.

Product Target AIDSM designs an ideal commercial schedule for the advertiser and the television station. You use an IBM[®] XT to match the lifestyle profiles of the television viewers in your market with the lifestyle profiles of proven users

for 600 heavily advertised products and services. Now, you can manage your inventory and win new advertisers, all with a database that you create just once and then use as often as you want for as many advertisers as you can call on.

One number that puts you in touch with your market.

At Arbitron Ratings, we give you more than just numbers. So call us today and see how we can help you identify your advertising targets and reach them more efficiently. Arbitron Ratings — we define broadcast audiences like never before. Contact your Arbitron Ratings Representative.

Description of Station Directory Section

THE STATION MAPS

The only official and uniform rough guide to a station's physical coverage is found in the files of the Federal Communications Commission. Each TV station grantee is required to submit to the Commission its coverage contours predicted on the basis of engineering formulas designated by the Commission. The FCC specifies three grades of service as a general indication of the probable quality of reception.

The FCC does not intend or expect the predicted coverage contours, submitted by each station, to reflect whether a signal is received or not received at any specific location. Rather, the Commission regards the contours as a general guide to probable reception. The basic use made by the Commission of the contours is as a tool to determine where to allocate channels to minimize interference among stations.

Though all stations and applicants are required to submit predicted contours to the FCC, stations may also file contours based on actual measurements of transmitted signals. Under FCC rules, such filings are not mandatory, and only a relatively few stations have offered such measurements voluntarily. The Commission has no official and uniform rules for measuring service contours; such submissions are associated with stations' files but are not given official status by the Commission.

The maps are intended to serve as guides. It should be emphasized that the use of maps for legal proceedings, such as those before the FCC, may require precision greater than that reasonably obtainable in maps of the size employed in the *Factbook*.

On May 29, 1975 the FCC amended Section 73.699 of the rules providing revised charts for the prediction of field strengths of TV stations and requiring licensees to file new contours with renewal applications filed after the effective date. When a revised map was not available from the station or the FCC, a note to that effect appears on the station page.

The three grades of predicted contours required by the FCC are as follows:

Grade B Service: The quality of picture expected to be satisfactory to the median observer at least 90% of the time for at least 50% of the receiving locations within the contour, in the absence of interfering co-channel and adjacent-channel signals.

Grade A Service: Satisfactory service expected at least 90% of the time for at least 70% of the receiving locations.

Principal City Service: Satisfactory service expected at least 90% of the time for at least 90% of the receiving locations.

We obtained the predicted contour maps from the FCC files or from the stations. We publish two contour lines, "Grade A" and "Grade B."

(The composite maps and all other contents of this book are copyrighted by Television Digest, Inc., publishers of Television & Cable Factbook. The American Map Corp. (46-35 54th Rd., Maspeth, NY 11378), is the copyright owner of the base maps which are reprinted herein under Licenses # 14244 and # 14244-W. Reproduction in whole or part is prohibited without written permission of the copyright owners.)

ARBITRON TV STATION CIRCULATION

The counties listed on the station pages represent the home market Arbitron Metro area plus those counties in which the station receives a Net Weekly Circulation of at least 5% according to Arbitron circulation estimates. Each of these counties is then delineated by three circulation categories which include those in which the station's circulation is 50% or more, 25%-49% and 5%-24%. In some instances, counties listed do not appear on the maps, since the reduction in scale required to include them would impair the legibility of the maps.

The station circulation estimates which determined the allocation of each county to the proper category were derived from samples obtained over several survey periods. The estimates were based on Arbitron market surveys conducted during 1984 and 1985.

The Total Households and Television Households which are listed for each county qualifying for inclusion in one of the three circulation categories are current Arbitron projections as of January 1985 (see Definitions of Arbitron Terms).

Net Weekly and Average Daily Circulation totals for each station are based on the above surveys.

(Data from Arbitron Ratings are fully protected by copyright. Reproduction in whole or part is prohibited without written permission from the Arbitron Ratings Company, 1350 Ave. of the Americas, New York, NY 10019.)

DEFINITIONS OF ARBITRON TERMS

Total Households—A household is a single dwelling unit, which may be a house, an apartment, or a group of one or more rooms. The total households figures shown in the current study are Market Statistics estimates projected to January 1, 1985 and rounded to the nearest hundred. These estimates include households on military installations.

Television Households—A television household is an occupied dwelling unit having one or more television sets. Updated estimates of TV households in each county are prepared annually by the Arbitron Research Department.

EDITOR'S NOTE: Total Households listed for each station in this Volume of the Television and Cable Factbook do not include households in any county in which the station's circulation is less than 5%.

TV Penetration—The percent of total homes having one or more television sets at the time of the surveys. TV penetration uses current regional penetration estimates derived by the Advertising Research Foundation from U.S. Bureau of the Census surveys conducted in accordance with ARF specifications.

Net Weekly Circulation—The estimated number of different television households viewing a particular station at least once per week, Monday-Sunday, Sign-on to Sign-off.

Average Daily Circulation—The estimated average number of different television households reached by a particular station on each day of the week, Sign-on to Sign-off.

Station Directory Description

SURVEY METHODS, Described by ARBITRON

Arbitron uses one-week, interviewer-supervised family viewing diaries to secure information for television audience estimates. Families are contacted initially by mail to inform them of their selection for the survey. They are then contacted by telephone to secure their cooperation in the survey and to elicit basic information as to television set ownership and number of sets owned in the household. Contact is maintained with the sample families through followup calls to encourage proper recording and prompt return of the diaries.

Sampling is controlled by geographic units of no larger than county size, and in some instances for reasons of population distribution, terrain or technical control a county is divided into two sampling units. Sample homes are selected by computer from all available households with listed telephones in the sampling universe through a systematic interval selection technique with random selection occurring within each interval.

In the Metro and ADI Rating Area, households with unlisted telephones are included in the sample universe by using a list of potential telephone numbers. Known listed numbers, business numbers, nonresidential business exchanges and unassigned number blocks have been eliminated.

The Arbitron family viewing diary measurement technique is used for both market surveys of television viewing and broadscale station circulation information by county.

At least four times each year, Arbitron surveys every county to provide viewing information for every television market in the country. Further details on Arbitron sampling procedures are available from Arbitron.

EXPLANATION OF FCC SYMBOLS

FCC Filing Symbols:

1. BPCT: Broadcast Permit Commercial Television.
2. BMPCT: Broadcast Modification of Permit Commercial Television.
3. DOC: Docket (designation applied by FCC to hearing cases).
4. GRANTED: Date of authorization by FCC.

Note: "BPCT" and "BMPCT" designations, accompanied by numbers, are affixed by the FCC to applications for new or changed station facilities to identify each when it is accepted for filing. They therefore constitute file numbers. Each map in the Factbook is accompanied with its file number to facilitate reference to the Commission's official files. In each case, the file number used in the one affixed to the application for facilities which were subsequently authorized by the FCC and in use at the time this Factbook was published. "Docket" numbers are used in those few cases where the application was in a hearing status and a file number hasn't been assigned. The "granted" date indicates when the FCC approved construction of facilities involved.

After a station is completed according to the terms of its construction permit, it receives a license; this is identified by a number

with a "BLCT" (Broadcast License Commercial Television) prefix. When a license is renewed, a number with a "BRCT" (Broadcast Renewal Commercial Television) prefix is employed. Applications for licenses or license renewals do not include requests for changes in facilities, thus do not affect predicted Grade A & B contours. Therefore, they are not employed as references in the Factbook.

The Grade A & B contours on the maps are predicted by station engineers according to the formulas designated by the FCC, as previously explained. They are based on facilities authorized or in use by stations at the time of Factbook publication.

BBM SURVEY METHODS

BBM is a non-profit tripartite association of advertising agencies, advertisers, broadcasters and broadcast representatives.

BBM conducts national surveys of television viewing and radio listening in all ten Canadian provinces.

A television market survey is taken over a seven day period and compiled and reported as the average of two or three weeks. Three week surveys are the designated sweep surveys. BBM identifies a range of dates during which a sweep survey can be taken. The individual weeks selected by BBM are not disclosed. Network television reports are also produced for fifty-two weeks of each year.

BBM provides detailed survey data for fifty recognized markets across Canada. BBM divides the country into three hundred and forty-six mutually exclusive sampling cells which, when combined, cover all of Canada's ten provinces. Ten times yearly, household enumerations are conducted by telephone. A master file of all individuals aged two and over is compiled. From this master file, BBM draws its television sample, just prior to each survey interval. Households selected are not used again except as they may occur in the random selection of a sample. More than a half million Canadians participate in BBM television surveys each year.

Randomly selected households are mailed a diary for each television set in the home. Household members are asked to record their personal television tuning by quarter hour for a specific seven day period to each set. The returned diaries are then weighted to represent the population within each sampling cell. Projections are made separately by age/sex group and by week of survey. In the bilingual markets of Montreal and Ottawa-Hull the intab diaries are also weighted by language group.

For each home station, BBM provides rating information by time periods and for each program for all specified markets in either central and/or extended markets. Furthermore, full coverage audience data or total station tuning from all measured areas is also published. A reach report is produced each Fall and Spring.

The definition of the central markets correspond to Statistics Canada defined Census Metropolitan Areas (CMA) or Census Agglomerations (CA) from which the home stations broadcast. To be considered a central market, CA/CMA will normally contribute the largest of the total hours of tuning to a home station. All BBM central markets have one accompanying extended market (similar in definition to an Area of Dominant Influence) except for some markets where no concentration of hours of tuning to home stations is found within the CA/CMA.

U.S. Television Station Directory

Data updated to August 15, 1985. Includes rate digests, personnel, facilities and other data. CP holders reported due by November 1985.

EXPLANATORY NOTES

Rates, personnel and other data supplied by stations.

RATE DIGESTS: These show only the highest one-time rate charged by the stations. Most rates are also subject to frequency discounts, separate or additional rehearsal charges, talent & production charges, etc. For further details and for contract conditions, specifications etc., consult complete station rate cards, available from the stations on request.

STATION POWER: Powers shown are Effective Radiated Powers (ERP).

NETWORK SYMBOLS (registered trademarks)

indicate ABC, CBS, and NBC TV network affiliation.

THE STATION PAGES

The individual station tables show a complete listing of all counties grouped by Arbitron Net Weekly Circulation levels, with Total Households, and TV Penetration in each county individually. For definitions of Arbitron terms, see Introduction.

SATELLITE STATIONS are shown with a dash line pattern in relation to the parent listing. In the satellite listing the parent station is shown with a dash line pattern.

THE STATE PAGES

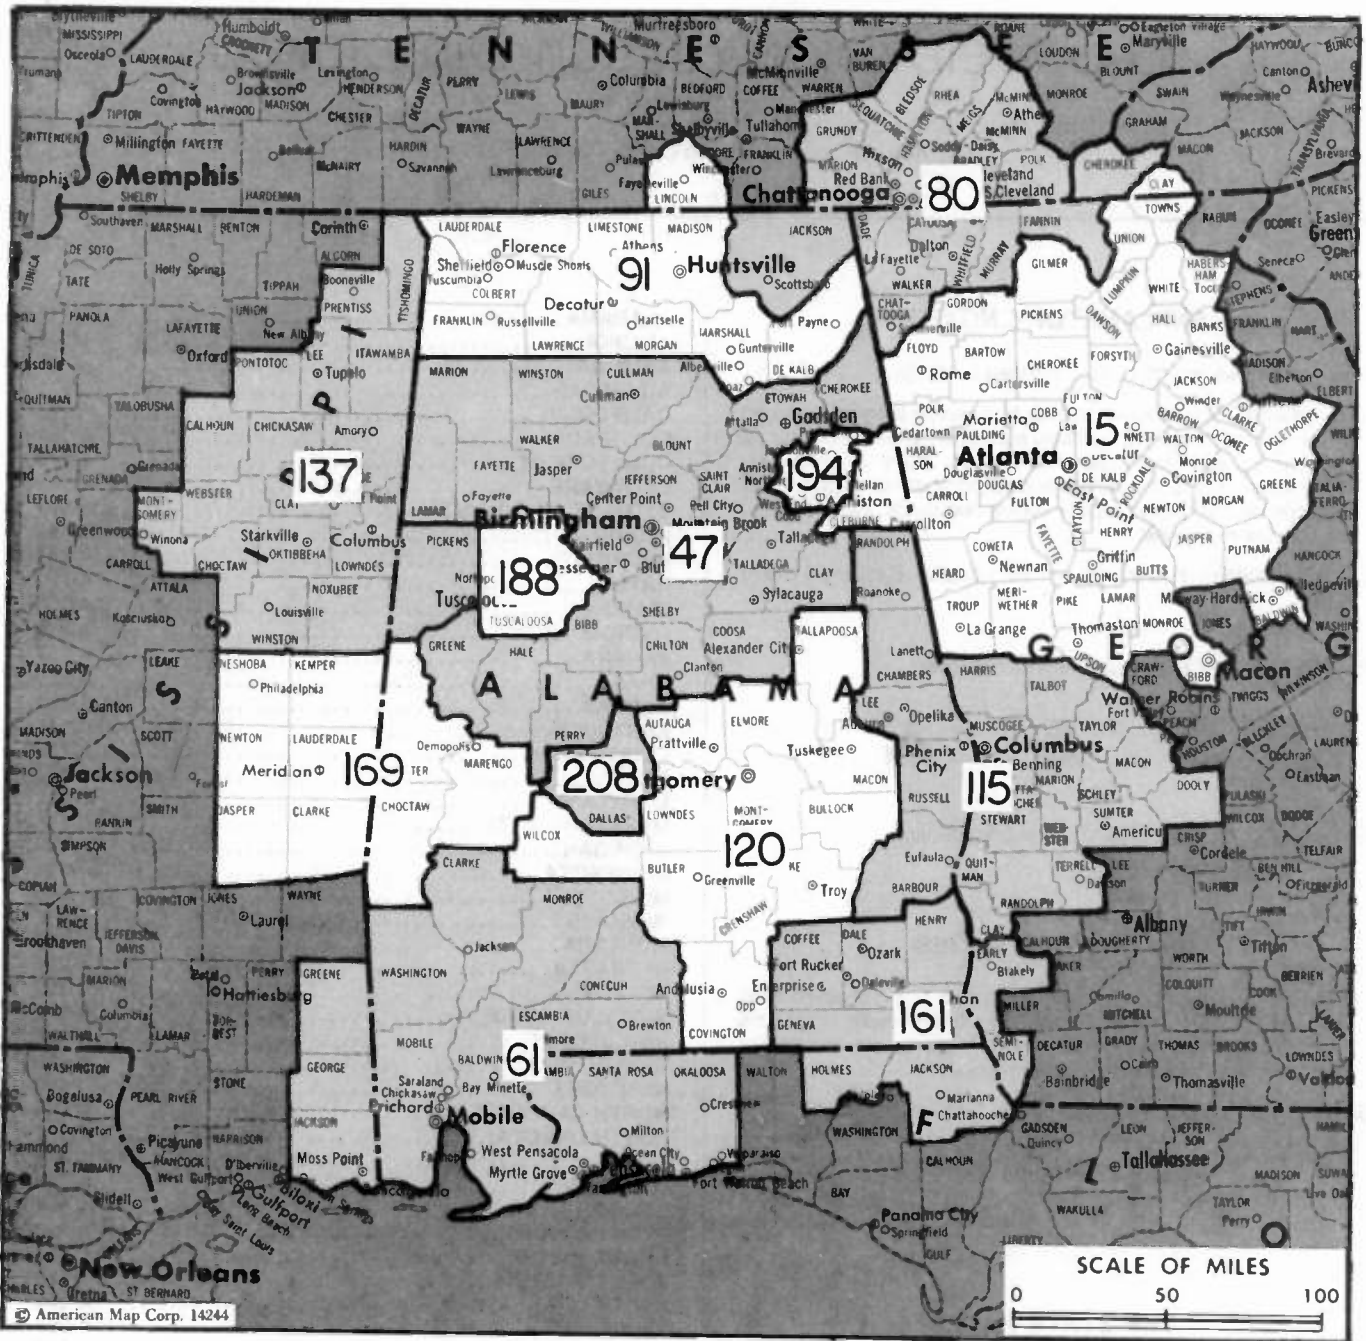

Following the map of each state, rankings for Arbitron's Area of Dominant Influence Television Households are shown. ADI Households Rank is established by Arbitron.

The state pages also carry additional cross-reference material, indicating for example, those stations within the state that are identified with two or more cities, or with cities in another state.

Operating commercial and educational TV stations by VHF and UHF are shown for each state in a status report as of August 15, 1984.

OUR RATINGS
ADD UP
TO

*more just
than
numbers*

They add up to better sales, programming and advertising decisions. Because at Arbitron Ratings, we're constantly developing the most advanced methods of putting the ratings to work for your station and your advertisers.

For audience profiles closer to home you'd have to live there.

Product Target AIDSM designs an ideal commercial schedule for the advertiser and the television station. You use an IBM[®] XT to match the lifestyle profiles of the television viewers in your market with the lifestyle profiles of proven users

for 600 heavily advertised products and services. Now, you can manage your inventory and win new advertisers, all with a database that you create just once and then use as often as you want for as many advertisers as you can call on.

One number that puts you in touch with your market.

At Arbitron Ratings, we give you more than just numbers. So call us today and see how we can help you identify your advertising targets and reach them more efficiently. Arbitron Ratings — we define broadcast audiences like never before. Contact your Arbitron Ratings Representative.

**HOW TO MAKE
OUR NUMBERS
ADD UP TO**

*Better
Programming
Decisions*

Numbers are just numbers unless you can use them to your advantage. That's why more and more stations are using Television AID. With the AID Audience Flow

Report you can track how audiences change from one quarter-hour to the next. It lets you find out if your news lead-in is getting you the viewers you want.

TELEVISION AID

Our ratings add up to more than just numbers.

The authoritative weekly information service covering the latest developments in broadcasting, cable, consumer electronics and allied industries...

TELEVISION DIGEST With Consumer Electronics

Television Digest has been keeping leading communications executives informed since 1945 and is aimed at all those decision-makers... like you... who have a big stake in the ever-changing broadcasting and cable industries.

Television Digest goes beyond the scope of any other publication by bringing into sharp focus all the conflicting forces at work—broadcast, cable, MDS, DBS, SMATV and others. It provides experienced coverage of the entire industry.

Each issue furnishes thorough coverage of government activities—the FCC, Capitol Hill, the White House. Each issue gives you the latest news on programming ploys... marketing strategies... personnel shifts... and current standings on the ever-changing revenue and ratings picture.

Television Digest regularly includes a host of industry surveys and statistics that cannot be found anywhere else. And because trade shows, conventions and professional meetings are of such vital importance in the communications industry, Television Digest provides complete pre- and post-meeting coverage of virtually every major trade show and professional meeting in the world.

Television Digest gives you the information you need, delivered in a fast-paced style and clear format that always respects your busy schedule!

COMMON CARRIER WEEK

Each weekly issue tracks proposed regulation changes, looks at successful (and unsuccessful) business strategies, comments on new equipment and services, reports on what the decision-makers in the industry are up to, and provides the key intelligence that busy telecommunications executives need.

**HOW TO MAKE
OUR NUMBERS
ADD UP TO**

*Better
Programming
Decisions*

Numbers are just numbers unless you can use them to your advantage. That's why more and more stations are using Television AID. With the AID Audience Flow Report you can track how audiences change from one quarter-hour to the next. It lets you find out if your news lead-in is getting you the viewers you want.

TELEVISION AID

Our ratings add up to more than just numbers.

WHAT'S THE MOST
EFFICIENT WAY TO REACH
FOOD STORE CUSTOMERS
IN THE SIOUX CITY
MARKET ?

KMEG-TV
TAKES YOU RIGHT
TO THE PEOPLE
WITHIN BUYING
DISTANCE.

Food store sales in the Sioux City ADI amount to more than \$467 million.* And 65% of those dollars are spent in the 13-county Retail Trade Area. If that's where your stores are, that's where your customers are. So when you advertise, you need to reach people within buying distance, not viewing distance as outlined by the ADI.

KMEG-TV is tailor-made to deliver Sioux City's rich "market within the market" effectively with top-rated CBS programming. It gets your message to your market most efficiently because you don't have to pay for reaching distant viewers who aren't your customers.

Advertising on KMEG-TV could really beef up your sales. For more information, call your Harrington, Righter & Parsons representative today.

HOW TO
MAKE OUR
NUMBERS
ADD UP
TO

*More
Sales
Dollars*

Numbers are just numbers unless you can use them to your advantage. That's why more and more stations are turning to Product Target AID. Product Target AID gives you numbers that show your station reaches the people who buy what advertisers want to sell. It lets you talk to advertisers who are put off by the "television reaches everybody syndrome"

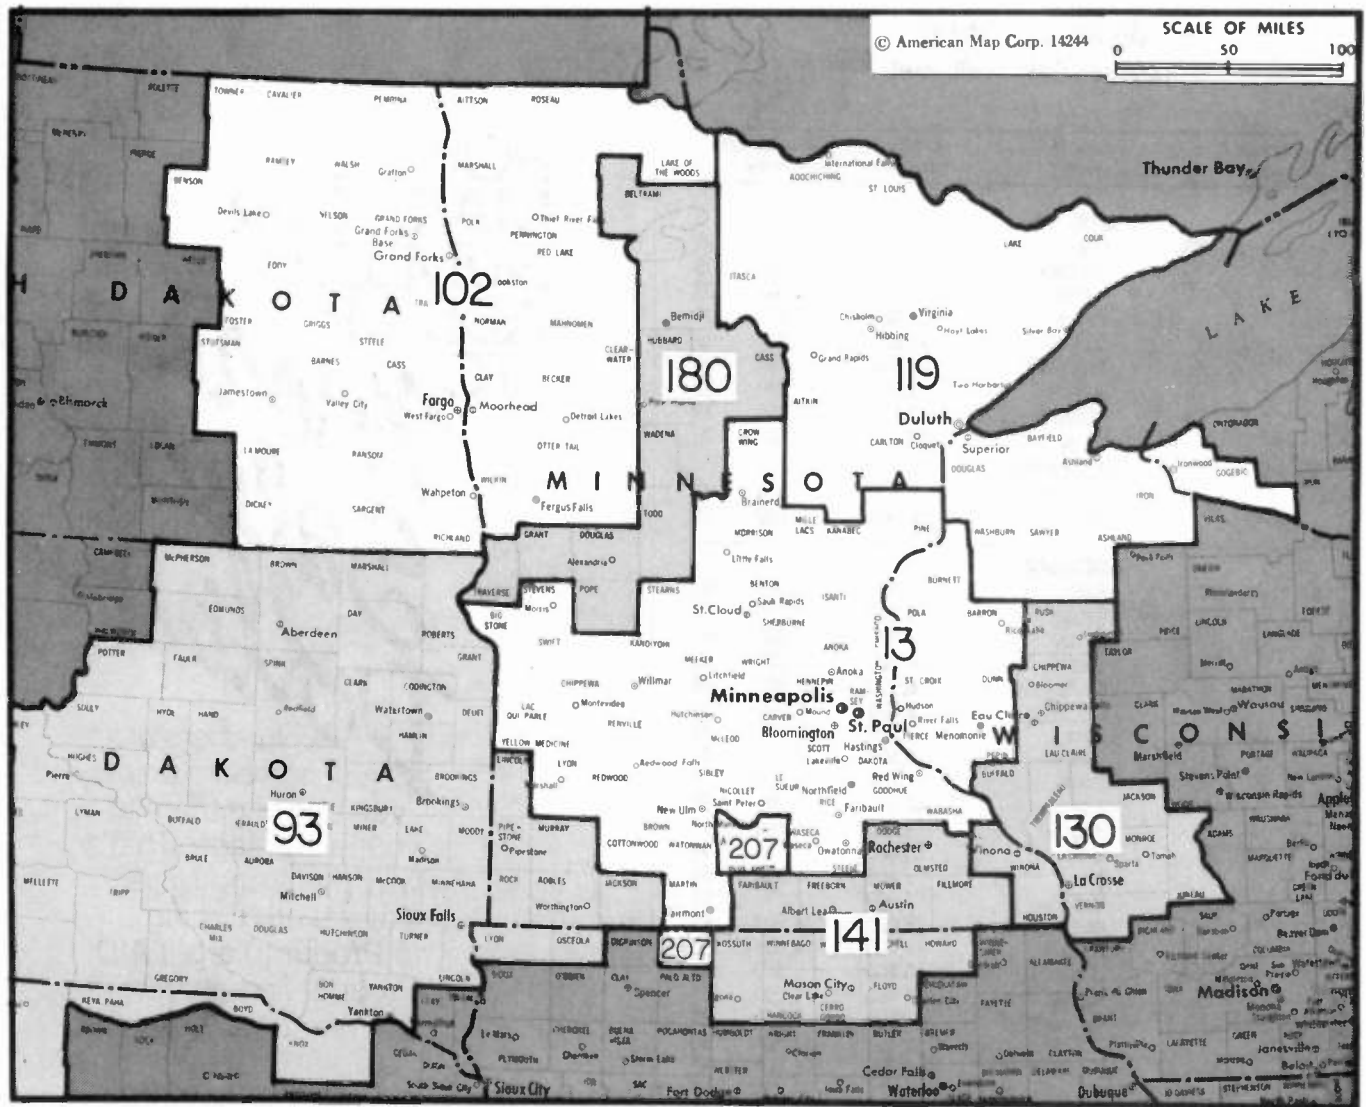

PRODUCT TARGET AID

Our ratings add up to more than just numbers.

News Service: AP.

Ownership: Beam Broadcasters Ltd. See Group Ownership of TV Stations.

Began Operation: June 8, 1956 on Ch. 9. Two months later WDSU-TV, New Orleans, acquired 51% interest, with remaining 49% being held equally by 4 founding partners, Dave A. & Harold M. Matison and Milton J. & Alvin H. Fine (Television Digest, Vol. 12:31, 38). Plant was sold to owners, who held CP for Ch. 7, Laurel, MS; when WDSU-TV received FCC authorization to shift WAFB-TV, Baton Rouge from Ch. 28 to Ch. 9 pending outcome of hearings, new owners began operation on Ch. 7 Sept. 3, 1959 (Vol. 13:44; 15:36). Sale of 43.75% to S. A. Rosenbaum as well as stock to Marvin Reuben & Jerry P. Keith by William S. Smylie family approved Dec. 7, 1960 by FCC (Vol. 16:49, 50). Sale to present owners approved July 27, 1983.

From the publishers of
Communications Daily, Common Carrier Week and Satellite Week . . .

the eagerly-awaited new 1986 edition of the . . . TELECOM FACTBOOK!

About the 1985 edition . . .

"It's terrific, been very useful. Nice layout, good information. It's a very good value for the money. I'll buy it again next year. Probably one of the best directories out there. Most readable."

*Kate Hampford, Director
Data Base and Research Services
The First Communications Group*

What is the Telecom Factbook?

A master directory of common carriers, long-distance resellers, major independent telcos, satellites, data communications organizations, regulators, international telecommunications entities, along with a telecommunications glossary and a Buyer's Guide of major equipment manufacturers and suppliers, and more. All at your fingertips!

What's the purpose of the Telecom Factbook?

To serve as *your* personal reference/phone directory for the telecommunications industry.

To function as *your* guidebook through the confusing organizational changes that have taken place in telecommunications in such an unbelievably short time.

What's NEW about the 1986 edition?

- Revised company charts and personnel lists
- Glossary of telecommunications terminology
- BUYER'S GUIDE to manufacturers and distributors
- Everything updated and expanded where appropriate
- Organizational charts for additional important companies

- Graphs and charts showing industry trends, numbers of access lines and company operating revenues
- And more . . .

What kinds of information would you use the Telecom Factbook to find?

Whether you need to find out who's doing what at AT&T . . . or an individual responsible for buying equipment at Ameritech . . . or a contact at the German PTT . . . or what satellite is scheduled to go up next . . . or the name of the Chairman of the Florida PSC . . . or names of specific executives at America's independent telephone groups . . . or simply the names of board members of MCI . . . you'll have answers in just one easy-to-use volume with the *new 1986 Telecom Factbook*.

It's Easy to Order

All you have to do is fill out, clip and mail the order certificate below. And please remember to include your check or credit card instructions. If you would like to buy ten or more copies, you may deduct 10% from the list price. But hurry, copies of the new 1986 Telecom Factbook are going quickly.

(clip and mail order certificate below)

1986 TELECOM FACTBOOK Order Certificate

YES, the 1986 Telecom Factbook sounds good to me. Please rush me _____ copies for only \$95 each—plus \$2 domestic delivery, \$10 foreign delivery (Washington, D.C. buyers add \$5.70 sales tax for each copy that you order).

I'd like to take advantage of your special **MULTIPLE-COPY PRICE** of \$85.50 plus \$2 domestic delivery, \$10 foreign delivery per copy by buying 10 or more copies. Please send me _____ copies (Washington, D.C. buyers add \$5.13 sales tax per copy ordered).

NO-RISK GUARANTEE: I understand that if I am not 100% satisfied with the 1986 Telecom Factbook (with no questions asked!), I may return it to you in good condition within 30 days of receipt and receive a full refund.

Fill out and return this card with your check or credit card authorization.
Telecom Factbooks will be shipped via United Parcel Service.

OUR RATINGS
ADD UP
TO

*more just
than
numbers*

They add up to better sales, programming and advertising decisions. Because at Arbitron Ratings, we're constantly developing the most advanced methods of putting the ratings to work for your station and your advertisers.

For audience profiles closer to home you'd have to live there.

Product Target AIDSM designs an ideal commercial schedule for the advertiser and the television station. You use an IBM[®] XT to match the lifestyle profiles of the television viewers in your market with the lifestyle profiles of proven users

for 600 heavily advertised products and services. Now, you can manage your inventory and win new advertisers, all with a database that you create just once and then use as often as you want for as many advertisers as you can call on.

One number that puts you in touch with your market.

At Arbitron Ratings, we give you more than just numbers. So call us today and see how we can help you identify your advertising targets and reach them more efficiently. Arbitron Ratings — we define broadcast audiences like never before. Contact your Arbitron Ratings Representative.

Corporate giving. Without it, a lot of important things might go out of business.

A lot of organizations in a lot of different fields could barely exist without help from corporations.

Schools, job training programs, the arts and more.

To their credit, a great many companies realize this.

Every year for the past ten years, corporate giving has gone up. Regardless of fluctuations in the economy. In spite of unpredictable corporate profits. And that's

something the entire corporate community can take pride in. And be congratulated for.

There are so many ways a corporation can give. So many ways to lend a hand.

Whether it's giving money to a college, making a donation to a local hospital, or just giving a kid a summer job — it makes a difference.

The fact is, when corporate giving thrives, so do the organizations it supports.

And everyone profits.
