Voice of America

Headquarters: 330 Independence Ave., S.W., Washington 20547. (202) 485-8238. FAX: (202) 485-8241. Richard W. Carlson, dir; Robert T. Conrod, deputy dir; Sid Davis, dir office of prog; Robert J. LaFleur, dir office of engr; Judy Jamison & Beth Knisley, co-dirs of pub affrs.

Policy: The Voice of America (VOA), the international broadcasting service of the U.S. Information Agency, is governed by its Charter (Public Law 94-350) which stipulates the VOA will: (1) serve as a consistently reliable and authoritative source of news and that its news will be accurate, objective and comprehensive; (2) represent America, not any single segment of American society, and will therefore present a balanced and comprehensive projection of significant American thought and institutions; (3) present the policies of the United States clearly and effectively, and will also present responsible discussion and opinion on these policies.

Facilities: VOA has 112 medium wave and shortwave transmitters which collectively have a total power in excess of 26 million watts. The power of individual transmitters in VOA's worldwide network ranges from 35 kw to 1000 kw. The VOA standard is to use three transmitters for each broadcast. These transmitters are located at 18 relay stations in the U.S. and abroad in Antigua, Belize, Botswana, Costa Rica, England, Greece, Liberia, Morocco, the Philippines, Sri Lanka, Thailand and West Germany. Programs originate in the studio complex at VOA headquarters. A 150-channel master control panel is used to route them onto appropriate satellite circuits for delivery to the relay stations.

Programing: U.S. and world events are reported accurately and fully in VOA newscasts and news programs. Features, backgrounders, interviews, on-the-scene coverage of special events, and documentaries provide listeners around the world with an accurate, comprehensive, and balanced portrayal of American life and opinion. Clear information on U.S. policies is reflected in editorials.

Program placement: VOA programing is also made available to, and extensively used by, foreign media in more than 100 countries. Radio stations in some countries simply relay VOA's direct broadcasts or tape program segments from them for rebroadcast at prime local listening times. Satellite or high frequency feeds, dial-up systems, and airmailed tapes are also used to provide VOA programing in 20 languages to stations in Africa, the American Republics, East and South Asia, the Middle East and Western Europe.

Program hours and languages: The 1,200 hours of programing produced at VOA each week include two special services: VOA Europe and Radio Marti. VOA Europe is an around-the-clock radio service in English which is delivered to Western Europe by satellite for broadcast on FM and cable radio stations in 10 countries; 90.5 hours weekly of the VOA Europe broadcast are originated by the VOA staff and the balance is syndicated music programs. The Radio Marti program is beamed to Cuba 122.5 hours each week by a 50 kw medium wave transmitter in Florida. All other programing (986.25 hours weekly) is transmitted on shortwave and/or medium wave in the following 44 languages:

Armed Forces Radio and Television Service (AFRTS).

AFRTS operates over 800 radio and television outlets located in 56 foreign countries. AFRTS facilities are established with major concentrations of U.S. forces overseas as well as in remote areas of Alaska, U.S. trusts, territories and possessions, aboard 542 Navy ships and as closed-circuit facilities in 243 isolated locations. Most of the land-based stations are grouped into regional AFRTS networks to serve specific geographical areas, i.e. American Forces Network-Europe in Europe and Far East Network in the Pacific. AFRTS networks and independent stations overseas create their own individual radio and television program schedules from broadcast materials provided by the AFRTS Broadcast Center in Sun Valley, Calif. and from their own local productions. Some outlets are broadcast operations and some are carried on closed circuit systems of various types. Domestic and Intelsat satellite service is leased on a 24 hour-a-day basis, providing real-time stateside radio and TV to overseas locations.

Headquarters, AFRTS. AFRTS is the broadcast arm of the American Forces Information Service located at 601 N. Fairfax St., Alexandria, Va. 22314. (202) 696-5280. Melvin Russell, asst dir, AFRTS; Lieutenant Colonel Tom Hansen, opns mgr; Lieutenant Colonel Michael Patterson, mgmt svcs.

NAB Radio MONTREUX

JUNE 10-13, 1992

☀ *What Is NAB/Montreux Radio?*

The NAB/Montreux International Radio Symposium and Exhibition will be the first major event of its kind for the rapidly changing and expanding radio broadcasting industry in Europe. Planned by an international committee and drawing upon expertise from around the world, the show will feature exhibits by suppliers of equipment and services to radio broadcasters, as well as symposia on radio station management, sales, marketing, programming and engineering.

☀ *Why Should I Be There?*

Contacts. Information. Knowledge. Technologies. Regulations. Programming methodologies. Sales techniques. This will be the premier world gathering of radio broadcast professionals. If you work in radio ANYWHERE, you should be in Montreux in June, 1992.

☀ *Where Is It?*

Montreux, Switzerland, is the home of the world-renowned International Television Symposium. Centrally located in Western Europe, the city offers a 25,000 square meter Exhibition Hall, extensive hotel accommodations, entertainment and scenic vistas to convention attendees.

☀ *Who Is Hosting The Show?*

National Association of Broadcasters (USA), representing the broadcasting industry in the United States, brings more than 70 years of experience in conducting the world's largest and most comprehensive broadcast conventions and exhibitions, and

Montreux, Switzerland, a city long known for its television symposia and exhibitions, provides the site and facilities and years of experience in meeting European broadcaster needs.

The European Broadcasting Union (EBU) has enthusiastically endorsed the project and has agreed to be a patron.

To be placed on mailing list for further information, please call NAB Conventions & Exhibitions (011-202-429-5409), FAX (011-202-775-2146) or mail the coupon below to:

Table of FM Allotments

The following Table of Allotments contains the channels (other than non-commercial educational Channels 201-220) designated for use in communities in the United States, its territories and possessions as of July 1989. All listed channels are for class B stations in Zones I and I-A and for class C stations in Zone II unless otherwise specifically designated. (See "FCC Rules," Section A.)

The transmitter for a station operating on Channel 276A at Waynesburg must be located two miles southeast of the community in order that minimum distance separation requirements be met.

Channels 246 and 251 at Rutland, Vt., are regarded as class B allotments.

Radio Markets in the U.S.

The following is the Arbitron population ranking for Fall 1990, based on market definitions at that time. It is based on the 1980 U.S. Bureau of Census estimates updated and projected to January 1, 1991.

The MSA number is the population of all persons aged twelve or older in the Metro Survey Area. The TSA number is the population total of all persons older than twelve in the Total Survey Area. Following that are the call letters of stations which fall within the market as defined by Arbitron. The actual city of license for each station may be found by looking it up in either AM by Calls (page B-401) or FM by Calls (page B-409).

Certain market population totals are also included in larger nearby markets. It is therefore possible for a station to be listed in more than one market.

The first professional dockable camera with broadcast features. The new Z-one.

Hitachi's new Z-one is the first professional 400 000 pixel IT CCD camera to offer broadcast camera performance—with 750 line resolution and 60 dB S. N. And with many super-smart features, the Z-one is easier to use, and more versatile, than any other camera in its class.

With computer-controlled Real-time Auto White, the Z-one makes continuous adjustments as color temperatures change. An electronic variable speed shutter ensures that even fast action is captured with perfect clarity.

Our unique adjustable shoulder mount maintains a comfortable

balance with large lenses and dockable recorders. The high resolution 1.5" viewfinder displays the camera's operating status and diagnostics on the screen. It's also equipped with a flip-up eyepiece. A 5" studio VF and a variety of EFP system options are available.

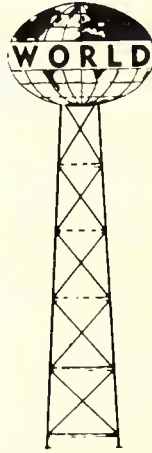

Learn more about the new Z-one. Contact the Hitachi Denshi America regional office nearest you.
