**(1)** Channel, power and antenna. WOF-TV operates with 200 kilowatts (effective radiated power) visual and 20 kilowatts aural. Its antenna is 500 feet above average terrain and 300 feet above the ground; it holds a construction permit for a height increase. TL refers to the longitude and latitude of the transmitter location.

**(2)** Date station first went on the air (regardless of subsequent ownership changes).

**(3)** Address and zip code, telephone, Teletype Write Exchange number.

**(4)** Licensee name and date of acquisition (if not original owner). If a station has been sold and the sale information is available, it is listed following the acquisition date, ie. acq date; purchase price; FTR date. FTR refers to

*Broadcasting Magazine's* "For the Record" column, which records station sales as received from the FCC.

**(5)** Ownership. Acme Stations owns WOF-TV and several other broadcast properties, all detailed in the Group Ownership directory in section A. The station additionally has print media connections, explained in the Newspaper directory (also section A). Principal stockholders are listed for independently owned stations.

**(6)** Network, foreign language, rep and Washington attorney. The primary WOF-TV national affiliate is CBS, the secondary is NBC. The station broadcasts two hours of Spanish a week. Sales representatives are listed with the national rep first, then regional.

**(7)** Personnel.

**(8)** Cable and translators. WOF-TV is carried on six cable TV systems with a total of 20,000 subscribers, and on ten rebroadcasting translators.

**(9)** Co-owned radio. WOF-TV has the same licensee as WOF-AM-FM.

**(10)** Advertising rates. The prices the station charges for a 30-second spot are shown for each of three day-parts:

Prime time; early fringe; daytime in that order. If a day-part is inapplicable a dash (--) replaces the rate.

\* An asterisk indicates noncommercial stations.

**ADI.** Immediately beneath every city heading is the ranked market Area of Dominant Influence into which the city falls. ADI details are presented in the ADI Atlas.

# Is Local Advertising Becoming an Issue After Issue?

Winning over local newspaper advertisers can be an important new source of revenue for your television station. The Local Multimedia Report is a new tool to help you target newspaper advertising dollars and move them into television.

With the Local Multimedia Report, you can identify which advertisers are concentrating their buys in newspaper, how much they're spending and when they advertise. Using trends provided in the Report, you can time your sales proposal to get to advertisers before they make

their media plans.

The Local Multimedia Report is just one more example of the Arbitron commitment to the business of local market television. So when you want local market tools that solve local market problems, turn to the champion who's been at it since 1949. Contact your local Arbitron representative for answers to the issues.

## TV Assignments

The following table of assignments contains the channels designated for the listed communities in the United States, its Territories, and possessions. Channels designated with an asterisk (\*) are assigned for use by noncommercial educational broadcast stations only. A Station on a channel identified by a plus (+) or minus (-) mark is required to operate with its carrier frequencies offset 10 kHz above or below, respectively, the nominal carrier frequencies.

Footnotes: 1) Following the decision in Docket 18261 (amendment of rules regarding geographic re-allocation of channels 1-20 to land mobile radio in the 25 largest urbanized areas of the U.S.) channels so indicated will not be available for use until further action by the FCC. 2) Channel 15 will not be available for television use until further action by the FCC. 3) This channel is not available for Elgin, Ill., unless FCC determines it is not needed at Joliet, Ill. 4) Stations using these assignments shall limit radiation toward stations on the same channel in Puerto Rico. 5) Operation on this channel is subject to the conditions, terms, and requirements set out in the Report and Order in Docket No. 19075, RM-1645, adopted Jan. 5, 1972, released Jan. 7, 1972, FCC 72-19. (Added FCC 72-19, Jan. 7, 1972) 6) Reserved for land mobile use.

## There's more to creating a family of cameras than putting your name on them.

Thomson's new generation of CCD cameras is actually a camera "family." Each camera gives you virtually identical video performance. Every one uses the same high resolution, 450,000 pixel CCD sensors. Each delivers equally high quality colorimetry, sensitivity, signal-to-noise, resolution, and registration. And each offers the specific features you need whether your production is in the studio, outside, at a news or sports event.

But the relationships run far deeper. Thomson's concept of *family* means each camera not only uses the same CCU, it can use Thomson's master control panel, operational control

panels and set-up control panels. Thus, a multi-camera production using Thomson studio, ENG and EFP cameras provides absolutely uniform video performance with the added efficiency and cost benefits of total component compatibility and system integration. One final family trait. Each camera is equipped for today and prepared to accept tomorrow's enhancements. It's part of Thomson's Theory of Evolution.

Put the family to all the tests (including price) against any cameras you might be considering. For more information or to arrange an on-site, side-by-side demonstration, call Thomson Broadcast tollfree at 1-800-882-1824.

Do you know where  
your VNR is?

Modern does.

With TeleTrak, Modern TV's state-of-the-art program monitoring system, there's no guesswork about who saw your VNR and when. TeleTrak is the complete, accurate and justifiable way to measure VNR usage. And it's an integral part of Modern's comprehensive NewsBridge video news release service.

So when success is determined by *measurable* results, don't trust guesswork. Trust Modern... reporting PR TV activity with accuracy and integrity since 1957.

Modern TV... distributing television programming to broadcast, cable and low-power systems.

## The ADI Market Atlas

The Area of Dominant Influence is the geographic market design that defines each television market exclusive of the others, based on measuring viewing patterns. Each market's ADI consists of all the counties in which the home market stations receive a preponderance of viewing, and every county in the continental U.S. is allocated exclusively to one ADI—there is no overlap. The total of all ADI's represents the total television households in the U.S.

The ADI is a standard market definition. As a television buying tool it is a geographical and demographic means for maximum efficiency. As a station tool it is a geographic and demographic means for maximum efficiency. As a station tool it has applications for sales, programming and promotion planning. Following, in alphabetical order, are Arbitron's 209 ADI markets for 1990-1991

with coverage maps for each, and county by county breakouts of TV households. Other data include the markets' stations, their cities of license, channel numbers and network affiliations.

Coverage maps show total survey areas in light shading, the ADI's themselves outlined in black, and Arbitron Metro rating areas in white. The survey areas consist of all counties in which the home market stations are viewed to any significant extent, including via cable. The Metro Areas usually conform to U.S. Census Standard Metropolitan statistical areas.

Non-ADI markets do not meet Arbitron's criteria for having an ADI of their own, they are listed with the ADI of which they are a part.

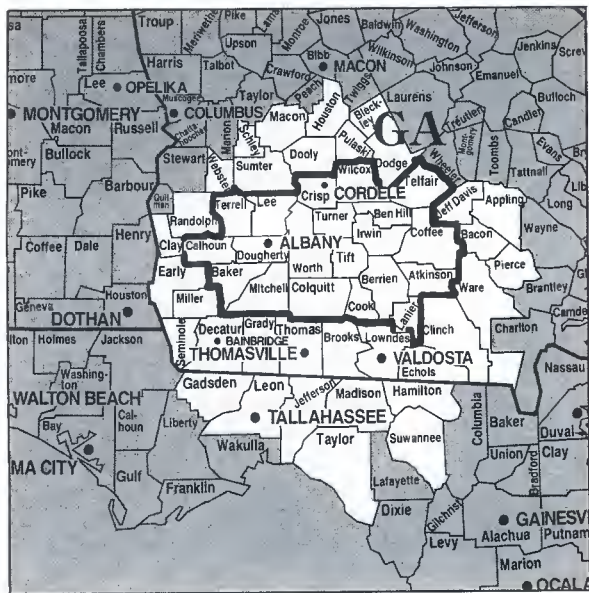

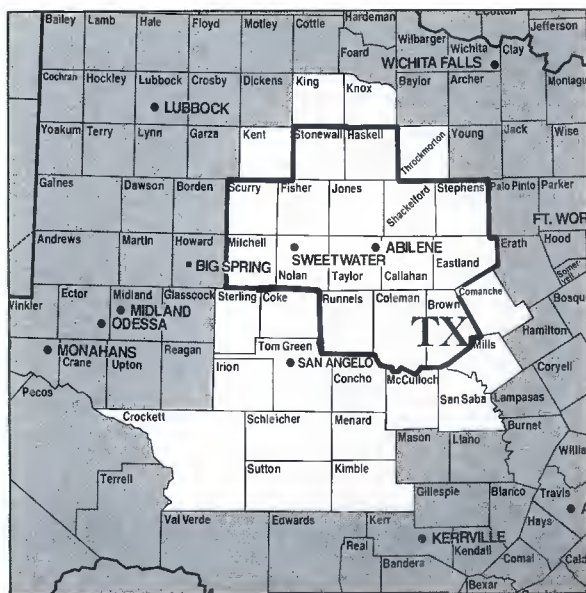

A complete listing of the non-ADI markets and a cross reference list of cities in multi-city ADI's appear on page C-131.

## Non-ADI Markets

The following single-county markets did not achieve ADI status because the preponderance of viewing is not to the home-market station. Neither did they meet the criteria of the 10% Rule to become an ADI. The home counties in non-ADI markets are assigned to the ADIs that do receive the preponderance of viewing.

## The Markets Ranked by Size

Here are the television markets of the U.S. ranked in descending order by the number of television homes they contain. Also shown are the numbers of women, men, teenagers and children in each market and the percentage of the total U.S. population each represents.

All data is from the Arbitron Company and represents the Arbitron Television household and population estimates for the 1990-1991 season.

## TV Markets by Nielsen Marketing Research Territory

Nielsen Marketing Research territory groups are another standard way of reporting sales data. The following table ranks TV markets within each Nielsen Territory. This provides a yardstick for determining the number of spot markets needed to achieve a given coverage of territory. For example, if the national media are not delivering sufficient advertising weight in New England, the planner will

find that 3 TV markets (Boston, Hartford and Providence) contain almost 80% of New England territory households. Or the planner can use the table to get a better idea of what TV markets are needed to cover all of New England. Data is from a Nielsen Station Index tabulation based on a January 1991 estimate.

## How Network Delivery Varies by Market

National advertisers use spot television to increase network advertising weight in specific markets to achieve a predetermined level. These market goals are derived from the advertising budget and the market's share of the brand's projected sales. Thus, a spot schedule is usually indicated where a market has an unusually high brand-sales potential, or where the network weight delivered for the brand is below the national average used in planning, or both.

The first factor, market brand potential, varies by product and is difficult to generalize. The second factor, local market network audiences, must be generalized because planning is based upon next season's *anticipated* network performance. The prevalence of network package buys, which tends to deliver average audience levels, supports

the use of average data.

The following tabulation, chosen especially for THE BROADCASTING YEARBOOK, shows Arbitron Television's Areas of Dominant Influence (ADI) in terms of percent of the total number of U.S. TV households. Also given, in like percentage of terms, are the network audiences in each ADI market during prime time hours. It is this market audience figure, when compared to the market's share of the population, that indicate whether the network commitment will perform above or below the national plan average in that market.

The figures are based on Arbitron Television's May 1990 Network Program Group Analysis.

# When News Breaks PVS Is There.

**PVS captures newsworthy events around the world. As they happen. Here's why:**

- Offers worldwide connectivity via ...
  - Washington's largest rooftop teleport (includes service to PanAmSat)
  - Fiber and microwave paths to and from Keystone, Washington Int'l. Teleport, Vyvx and C&P
- Owns and operates advanced transmission equipment including a Ku-band air-transportable earth station and Ku-band trucks
- Works directly with the BBC, the European Broadcast Union, NHK and other major broadcasting organizations worldwide

- One of the largest equipment rental departments on the East Coast
- Complete studio and editing facilities run by award-winning professionals

Whether it's around the corner or around the world, we're there ... in the Middle East for the war with Iraq, in Panama for Noriega's overthrow, Sioux City for the United Air Crash, San Francisco for the earthquake, Malta for the Bush/Gorbachev Summit, the U.S. for Presidential elections, Hawaii and Jamaica for sports coverage.

For more information on how PVS can serve you call us today. In Washington, DC USA at 202/775-0894. Or Toll Free at 1-800-232-0894.

# *Others Promise We Produce*

You judge a sales representative on performance, not on promises. Performance over time. Consistency you can count on. No one performs better than CNI, the leading national spot cable representative in the country. We deliver and the proof of that delivery is best summed up in the facts.

- #1 in total national spot cable billing.
- The largest sales organization in the country; 15 regional sales managers, 41 account executives, 59 sales support personnel.
- #1 in combined cable and broadcast sales experience.
- Totally integrated research department using the resources of Arbitron, Nielsen, MRI, BAR, SQAD and Conquest.

Plus the CNI EXCLUSIVE—Guaranteed 90-day payment on billing.
