# Television Assignments by State

The following table of assignments contains the channels designated for the listed communities in the United States, its Territories, and Possessions. Channels designated with an asterisk (\*) are assigned for use by noncommercial educational broadcast stations only. A station on a channel identified by a plus (+) or minus (-) mark is required to operate with its carrier frequencies offset 10 khz above or below, respectively, the nominal carrier frequencies. **Footnotes:** 1) Following the decision in Docket 18261 (amendment of rules regarding geographic re-allocation of channels 1-20 to land mobile radio in the 25 largest urbanized areas of the U.S.) channels so indicated will not be available for use until further action by the FCC. 2) Operation on this channel is subject to the conditions, terms and requirements set out in the report and Order in Docket No. 19075, RM-1645, adopted Jan. 5, 1972, released Jan. 7, 1972, FCC 72-19 (Added 72-19, 1/7/72). 3) This channel is not available for Elgin, Ill., unless FCC determines it is not needed at Joliet, Ill. 4) Stations using these assignments shall limit radiation toward stations on the same channel in Puerto Rico, to no more than the effective radiated power which would be radiated by an omnidirectional radio station using maximum permissible effective radiated power for antenna height above average terrain, at the minimum distances from such stations specified in 73.610(b). The FCC shall consider the status of the negotiations with the appropriate British authorities concerning these allotments when the applications for construction permits come before the FCC.
